Approximate date of proposed public offering: As soon as practicable after the effective date of this Registration Statement.

If any securities being registered on this form will be offered on a delayed or continuous basis in reliance on Rule 415 under the Securities Act of 1933, as amended, other than securities offered in connection with a dividend reinvestment plan, check the following box.

It is proposed that this filing will become effective (check appropriate box)

When declared effective pursuant to section 8(c).

If appropriate, check the following box:

This [post-effective] amendment designates a new effective date for a previously filed [post-effective amendment] [registration statement].

This form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act and the Securities Act registration number of the earlier effective registration statement for the same offering is _____.

CALCULATION OF REGISTRATION FEE UNDER THE SECURITIES ACT OF 1933

Title of Securities	Amount Being Registered	Proposed Maximum Offering Price Per Share	Proposed Maximum Aggregate Offering Price (1)(3)	Amount of Registration Fee
Preferred Shares, \$0.001 par value (2)			\$200,000,000	\$7,860(4)
Notes (2)				
Subscription Rights for Preferred Shares (2)				

(1) Estimated pursuant to Rule 457 solely for the purpose of determining the registration fee. The proposed maximum offering price per security will be determined, from time to time, by the Registrant in connection with the sale by the Registrant of the securities registered under this registration statement.

(2) Subject to Note 3 below, there is being registered hereunder an indeterminate principal amount of preferred shares, notes, or subscription rights to purchase preferred shares as may be sold, from time to time.

(3) In no event will the aggregate offering price of all securities issued from time to time pursuant to this registration statement exceed \$200,000,000.

(4) Previously paid.

THE REGISTRANT HEREBY AMENDS THIS REGISTRATION STATEMENT ON SUCH DATE OR DATES AS MAY BE NECESSARY TO DELAY ITS EFFECTIVE DATE UNTIL THE REGISTRANT SHALL FILE A FURTHER AMENDMENT WHICH SPECIFICALLY STATES THAT THIS REGISTRATION STATEMENT SHALL THEREAFTER BECOME EFFECTIVE IN ACCORDANCE WITH SECTION 8(a) OF THE SECURITIES ACT OF 1933 OR UNTIL THE REGISTRATION STATEMENT SHALL BECOME EFFECTIVE ON SUCH DATE AS THE SECURITIES AND EXCHANGE COMMISSION, ACTING PURSUANT TO SAID SECTION 8(a), MAY DETERMINE.

\$200,000,000

The Gabelli Global Deal Fund

Preferred Shares of Beneficial Interest, Notes and Subscription Rights

Investment Objective. The Gabelli Global Deal Fund, or the “Fund,” is a non-diversified, closed-end management investment company, formed as a Delaware statutory trust, registered under the Investment Company Act of 1940. The Fund’s investment objective is to achieve absolute returns in various market conditions without excessive risk of capital. Absolute returns are defined as positive total returns, regardless of the direction of securities markets. The Fund will seek to achieve its objective by investing primarily in merger arbitrage transactions and, to a lesser extent, in corporate reorganizations involving stubs, spin-offs and liquidations. Gabelli Funds, LLC serves as “Investment Adviser” to the Fund. An investment in the Fund is not appropriate for all investors. We cannot assure you that the Fund will achieve its objective.

We may offer, from time to time, in one or more offerings, our preferred shares, par value \$0.001 per share, our promissory notes, or our subscription rights to purchase our preferred shares, which we refer to collectively as the “securities.” Securities may be offered at prices and on terms to be set forth in one or more supplements to this Prospectus (each a “Prospectus Supplement”). You should read this Prospectus and the applicable Prospectus Supplement carefully before you invest in our securities.

Our securities may be offered directly to one or more purchasers, including existing shareholders in a rights offering, through agents designated from time to time by us, or to or through underwriters or dealers. The Prospectus Supplement relating to the offering will identify any agents or underwriters involved in the sale of our securities, and will set forth any applicable purchase price, fee, commission or discount arrangement between us and our agents or underwriters, or among our underwriters, or the basis upon which such amount may be calculated. The Prospectus Supplement relating to any sale of preferred shares will set forth the liquidation preference and information about the dividend period, dividend rate, any call protection or non-call period and other matters. The Prospectus Supplement relating to any sale of notes will set forth the principal amount, interest rate, interest payment dates, prepayment protection (if any), and other matters. The Prospectus Supplement relating to any offering of subscription rights will set forth the number of preferred shares issuable upon the exercise of each right and the other terms of such rights offering. We may not sell any of our securities through agents, underwriters or dealers without delivery of a Prospectus Supplement describing the method and terms of the particular offering of our securities. Our common shares are listed on the New York Stock Exchange (the “NYSE”) under the symbol “GDL”. On December 9, 2008, the last reported sale price of our common shares was \$12.74. Shares of closed-end funds often trade at a discount from net asset value. This creates a risk of loss for an investor purchasing shares in a public offering.

Investing in the Fund's securities involves risks. See “Risk Factors and Special Considerations” for factors that should be considered before investing in securities of the Fund.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

This prospectus may not be used to consummate sales of securities by us through agents, underwriters or dealers unless accompanied by a Prospectus Supplement.

This prospectus sets forth concisely the information about the Fund that a prospective investor should know before investing. You should read this prospectus, which contains important information about the Fund, before deciding whether to invest in the securities, and retain it for future reference. A Statement of Additional Information, dated [], containing additional information about the Fund, has been filed with the Securities and Exchange Commission and is incorporated by reference in its entirety into this prospectus. You may request a free copy of our annual and semi-annual reports, request a free copy of the Statement of Additional Information, the table of contents of which is on page 49 of this prospectus, request other information about us and make shareholder inquiries by calling (800) GABELLI (422-3554) or by writing to the Fund, or obtain a copy (and other information regarding the Fund) from the Securities and Exchange Commission's web site (<http://www.sec.gov>).

Our securities and notes do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

You should rely only on the information contained or incorporated by reference in this prospectus. The Fund has not authorized anyone to provide you with different information. The Fund is not making an offer to sell these securities in any state where the offer or sale is not permitted. You should not assume that the information contained in this prospectus is accurate as of any date other than the date of this prospectus.

PROSPECTUS SUMMARY

This is only a summary. This summary does not contain all of the information that you should consider before investing in our shares. You should review the more detailed information contained in this prospectus and the Statement of Additional Information, dated [] (the "SAI").

The Fund The Gabelli Global Deal Fund is a non-diversified, closed-end management investment company organized under the laws of the State of Delaware on October 17, 2006. Throughout this prospectus, we refer to The Gabelli Global Deal Fund as the "Fund" or as "we." See "The Fund."

The Fund's outstanding common shares, par value \$0.001 per share, are listed on the New York Stock Exchange under the symbol "GDL." On December 8, 2008, the last reported sale price of our common shares was \$12.90. As of June 30, 2008, the net assets of the Fund attributable to its common shares were \$373,018,366. As of June 30, 2008, the Fund had outstanding 21,270,610 common shares.

The Offering We may offer, from time to time, in one or more offerings, our preferred shares, \$0.001 par value per share, our notes or our subscription rights to purchase our preferred shares, which we refer to collectively as the "securities." The shares and notes may be offered at prices and on terms to be set forth in one or more supplements to this Prospectus (each a "Prospectus Supplement"). You should read this Prospectus and the applicable Prospectus Supplement carefully before you invest in our securities. Our securities may be offered directly to one or more purchasers, including existing shareholders in a rights offering, through agents designated from time to time by us or to or through underwriters or dealers. The Prospectus Supplement relating to the offering will identify any agents, underwriters or dealers involved in the sale of our shares, and will set forth any applicable purchase price, fee, commission or discount arrangement between us and our agents or underwriters, or among our underwriters, or the basis upon which such amount may be calculated. The Prospectus Supplement relating to any sale of preferred shares will set forth the liquidation preference and information about the dividend period, dividend rate, any call protection or non-call period and other matters. The Prospectus Supplement relating to any sale of notes will set forth information about the principal amount, interest rate, and call protection or non-call period and other matters. The Prospectus Supplement relating to any offering of subscription rights will set forth the number of preferred shares issuable upon the exercise of each right and the other terms of such rights offering. We may not sell any of our securities through agents, underwriters or dealers without delivery of a Prospectus Supplement describing the method and terms of the particular offering.

Investment Objective The Fund's investment objective is to achieve absolute returns in various market conditions without excessive risk of capital. Absolute returns are defined as positive total returns, regardless of the direction of securities markets. To achieve its investment objective, the Fund, under normal market conditions, will invest primarily in securities of companies (both domestic and foreign) involved in publicly announced mergers, takeovers, tender offers and leveraged buyouts and, to a lesser extent, in corporate reorganizations involving stubs, spin-offs and liquidations. The key determinants of the profitability of a merger arbitrage transaction are the probability that the deal will close, the length of time to closing, the likelihood that the deal price will be increased or decreased and the level of short-term interest rates.

Merger arbitrage is a highly specialized investment approach generally designed to profit from the successful completion of proposed mergers, takeovers, tender offers and leveraged buyouts. Broadly speaking, an investor purchases the stock of a company in the process of being acquired by another company in anticipation of capturing the spread between the current market price and the acquisition price. A “stub” refers to a small stake in a target company division or subsidiary that is not purchased by an acquirer in a merger, takeover or leveraged buyout. The arbitrageur may buy the stub, and if the acquiring company is successful in boosting the target company’s appeal, the shares will benefit from a boost in price and the arbitrageur will profit. A spin-off occurs when an independent company is created from an existing part of another company through a distribution of new shares. An arbitrageur may benefit from the share price differential in the same manner as in traditional merger arbitrage if, upon completion of the spin-off, the separate securities trade for more in the aggregate than the former single security. Finally, when a company makes the decision to liquidate, or sell all of its assets, it is often worth more in liquidation than as an ongoing entity. An arbitrageur benefits when the company is able to distribute more than the price at which the stock is trading at the time the arbitrageur acquires its position. In order to minimize market exposure and volatility of such merger arbitrage strategies, the Fund may utilize hedging strategies, such as short selling and the use of options and futures. The Fund may hold a significant portion of its assets in liquid money market securities, which may include affiliated or unaffiliated money market mutual funds.

As a non-diversified investment company, the Investment Company Act of 1940 (the “1940 Act”) does not limit the proportion of the Fund’s assets it may invest in securities of a single issuer, however, certain tax diversification requirements will apply at the end of each quarter.

The Investment Adviser believes that blending traditional merger arbitrage for announced deals with strategies that focus on stubs, spin-offs and liquidations will produce absolute returns in excess of short-term interest rates with less volatility than the returns typically associated with conventional equity investing. A systematic and disciplined arbitrage program may produce attractive rates of return even in flat or down markets. The Investment Adviser will consider a number of factors in selecting merger arbitrage transactions in which to invest, including, but not limited to, the credibility, strategic motivation, and financial resources of the participants and the liquidity of the securities involved in the transaction.

Under normal circumstances, the Fund will invest at least 80% of its assets in securities or hedging arrangements relating to companies involved in corporate transactions or reorganizations, giving rise to the possibility of realizing gains upon or within relatively short periods of time after the completion of such transactions, or reorganizations. This policy is not fundamental and may be changed by the Fund with notice of not less than 60 days to its shareholders. In market cycles with scarce transaction opportunities, the Fund may seek to accomplish its objective of achieving absolute returns by temporarily investing in other assets, including, but not limited to, short-term debt securities, which may make it less likely for the Fund to achieve an attractive rate of return.

As a global fund, the Fund may invest without limitation in the securities of foreign and domestic issuers. The Fund’s investment strategy is to invest in merger arbitrage transactions and corporate reorganizations throughout the world. As the dollar volume and range of countries involved in significant merger arbitrage and corporate reorganizations has increased over the past several years, the Fund expects that its assets will usually be invested in several countries. Under normal market conditions, the Fund expects to have at least 40% of its assets invested in at least three countries, other than the United States. To the extent that the majority of mergers, takeovers, tender offers and leveraged buyouts and corporate reorganizations are concentrated in any given geographic region, such as Europe, North America or Asia, a relatively high proportion of the Fund’s assets may be invested in that particular region. See “Investment Objective and Policies.”

Payment on Notes Under applicable state law and our Charter, we may borrow money without prior approval of holders of common and preferred shares. We may issue debt securities, including notes, or other evidence of indebtedness and may secure any such notes or borrowings by mortgaging, pledging or otherwise subjecting as security our assets to the extent permitted by the 1940 Act or rating agency guidelines. Any borrowings, including without limitation the notes, will rank senior to the preferred shares and the common shares. The prospectus supplement will describe the interest payment provisions relating to notes. Interest on notes will be payable when due as described in the related prospectus supplement. If we do not pay interest when due, it will trigger an event of default and we will be restricted from declaring dividends and making other distributions with respect to our common shares and preferred shares.

Dividends and Preferred Share Distributions. Under current law, all preferred shares of the Fund must have the same seniority with respect to distributions. Accordingly, no full distribution will be declared or paid on any series of preferred shares of the Fund for any dividend period, or part thereof, unless full cumulative dividends due through the most recent dividend payment dates

for all series of outstanding preferred shares of the Fund are declared and paid. If full cumulative distributions due have not been declared and made on all outstanding preferred shares of the Fund, any distributions on such preferred shares will be made as nearly pro rata as possible in proportion to the respective amounts of distributions accumulated but unmade on each such series of preferred shares on the relevant dividend date.

In the event that for any calendar year the total distributions on the Fund's preferred shares exceed the Fund's current and accumulated earnings and profits, the excess distributions will generally be treated as a tax-free return of capital (to the extent of the shareholder's tax basis in his or her shares). The amount treated as a tax-free return of capital will reduce a shareholder's adjusted tax basis in his or her preferred shares, thereby increasing the shareholder's potential gain or reducing his or her potential loss on the sale of the shares.

Fixed Rate Preferred Shares. Distributions on fixed rate preferred shares, at the applicable annual rate of the per share liquidation preference, are cumulative from the original issue date and are payable, when, as and if declared by the Board of Trustees of the Fund (the "Board"), out of funds legally available therefor.

Variable Rate Preferred Shares. The holders of variable rate preferred shares are entitled to receive cash distributions, stated at annual rates of the applicable per share liquidation preference, that vary from dividend period to dividend period.

Common Share Distributions. In order to allow its common shareholders to realize a predictable, but not assured, level of cash flow and some periodic liquidity from their investment without having to sell shares, the Board has adopted a policy, which may be modified at any time, of paying quarterly distributions on its common shares. For the fiscal year ended December 31, 2007, the Fund made distributions of \$1.20 per common share, none of which constituted a return of capital. The composition of each distribution is estimated based on earnings as of the record date for the distribution. The actual composition of each distribution may change based on the Fund's investment activity through the end of the calendar year. In the event the Fund does not generate a total return from dividends and interest received and net realized capital gains in an amount equal to or in excess of its distribution in a given year, the Fund may return capital as part of such distribution, which may have the effect of decreasing the asset coverage per share with respect to the Fund's preferred shares. Any return of capital that is a component of a distribution is not sourced from realized or unrealized profits of the Fund and that portion should not be considered by investors as yield or total return on their investment in the Fund. Shareholders should not assume that a distribution from the Fund is comprised exclusively of net profits.

Limitations on Distributions. If at any time the Fund has notes outstanding, the Fund will be prohibited from paying any distributions on any of its preferred shares or common shares (other than in additional shares), and from repurchasing any of such shares, unless, as provided in the 1940 Act, the value of its total assets, less certain ordinary course liabilities, exceed 300% of the amount of the debt outstanding and exceed 200% of the sum of the amount of debt and preferred shares outstanding.

Tax Treatment of Preferred Share Distributions The Fund expects that distributions on the preferred shares may consist of (i) long-term capital gain (gain from the sale of a capital asset held longer than 12 months), (ii) qualified dividend income (dividend income from certain domestic and foreign corporations) and (iii) investment company taxable income (other than qualified dividend income), including interest income, short-term capital gain and income from certain hedging and interest rate transactions. For individuals, the maximum federal income tax rate on long-term capital gain is currently 15%, on qualified dividend income is currently 15%, and on ordinary income (such as distributions from investment company taxable income that are not eligible for treatment as qualified dividend income) is currently 35%. Under current law, these tax rates are scheduled to apply through 2010. The Fund expects that a substantial portion of its income will consist of short-term capital gains. We cannot assure you what percentage of the distributions paid on the preferred shares, if any, will consist of tax advantaged qualified dividend income or long-term capital gains or what the tax rates on various types of income will be in future years. For a more detailed discussion, see "Taxation."

Use of Proceeds The Fund will use the net proceeds from the offering to purchase additional portfolio securities in accordance with its investment objective and policies. It is anticipated that the investment of proceeds will be substantially completed within three months; however, changes in market conditions could result in the Fund's anticipated investment period extending to as long as six months. See "Use of Proceeds."

Exchange Listing The Fund's common shares are listed on the NYSE under the trading or "ticker" symbol "GDL." See "Description of the Securities." Future series of fixed rate preferred shares and subscription rights would also likely be listed on a stock exchange. Variable rate preferred shares and notes will not likely be listed on a stock exchange.

Market Price of Shares Common shares of closed-end investment companies often trade at prices lower than their net asset value. Common shares of closed-end investment companies may trade during some periods at prices higher than their net asset value and during other periods at prices lower than their net asset value. The Fund cannot assure you that its common shares will trade at a price higher than or equal to net asset value. The Fund's net asset value will be reduced immediately following this offering by the sales load and the amount of the offering expenses paid by the Fund. See "Use of Proceeds."

In addition to net asset value, the market price of the Fund's common shares may be affected by such factors as the Fund's dividend and distribution levels (which are affected by expenses) and stability, market liquidity, market supply and demand, unrealized gains, general market and economic conditions and other factors. See "Risk Factors and Special Considerations," "Description of the Securities" and "Repurchase of Common Shares."

Risk Factors and Special Considerations Risk is inherent in all investing. Therefore, before investing in securities of the Fund, you should consider the risks carefully.

Our Notes. An investment in our notes is subject to special risks. There may not be an established market for our notes. To the extent that our notes trade, they may trade at a price either higher or lower than their principal amount depending on interest rates, the rating (if any) on such notes and other factors. See "Risk Factors and Special Considerations — Special Risks to Holders of Notes."

Our Fixed Rate Preferred Shares. Prior to the offering of any additional series of fixed rate preferred shares, there will be no public market for such shares. During an initial period, not expected to exceed 30 days after the date of initial issuance, such shares may not be listed on any securities exchange. Consequently, an investment in such shares may be illiquid during such period. Fixed rate preferred shares may trade at a premium to or discount from liquidation preference for a variety of reasons, including changes in interest rates. See "Risk Factors and Special Considerations — Special Risks to Holders of Fixed Rate Preferred Shares."

Our Variable Rate Preferred Shares. In the event any auction-rate preferred shares are issued, you may not be able to sell your auction-rate preferred shares at an auction if the auction fails, i.e., if more auction-rate preferred shares are offered for sale than there are buyers for those shares. In the event any auction-rate preferred shares are issued, if you try to sell your auction-rate preferred shares between auctions, you may not be able to sell them for their liquidation preference per share or such amount per share plus accumulated dividends. Due to recent market turmoil, most auction-rate preferred share auctions have been unable to hold successful auctions and holders of such shares have suffered reduced liquidity. See "Risk Factors and Special Considerations — Special Risks to Holders of Variable Rate Preferred Shares."

Our Subscription Rights. There is a risk that changes in interest rates or changes in the credit quality of the Fund may result in the underlying preferred shares purchaseable upon exercise of the subscription rights being less attractive to investors at the conclusion of the subscription period. This may reduce or eliminate the value of the subscription rights. Investors who receive subscription rights may find that there is no market to sell rights they do not wish to exercise. If investors exercise only a portion of the rights, the number of preferred shares issued may be reduced, and the preferred shares may trade at less favorable prices than larger offerings for similar securities.

Credit Quality Ratings. In order to obtain and maintain attractive credit quality ratings for preferred shares or borrowings, the Fund's portfolio must satisfy over-collateralization tests established by the relevant rating agencies. These tests are more difficult to satisfy to the extent the Fund's portfolio securities are of lower credit quality, longer maturity or not diversified by issuer and industry. These guidelines could affect portfolio decisions and may be more stringent than those imposed by the 1940 Act. A rating (if any) by a rating agency does not eliminate or necessarily mitigate the risks of investing in our preferred shares, and a rating may not fully or accurately reflect all of the securities' credit risks. A rating (if any) does not address liquidity or any other market risks of the securities being rated. A rating agency could downgrade the rating of our notes, which may make such securities less liquid in the secondary market. If a rating agency downgrades the rating assigned to notes, we may alter our portfolio or redeem the preferred securities under certain circumstances. See "Risk Factors and Special Considerations — Credit Quality Ratings."

Common Share Repurchases. Repurchases of common shares by the Fund may reduce the net asset coverage of the notes and preferred shares, which could adversely affect their liquidity or market prices. See "Risk Factors and Special Considerations — Common Share Repurchases."

Preferred Shares Subordinated to Debt Securities. As provided in the 1940 Act, and subject to compliance with the Fund's investment limitations, the Fund may issue debt securities. In the event the Fund were to issue such securities, the Fund's obligations to make distributions and, upon liquidation of the Fund, liquidation payments in respect of its preferred shares would be subordinate to the Fund's obligations to make any principal and interest payments due and owing with respect to its outstanding debt securities. Accordingly, the Fund's issuance of debt securities would have the effect of creating special risks for the Fund's preferred shareholders that would not be present in a capital structure that did not include such securities. See "Risk Factors and Special Considerations — Special Risks of Debt Securities to Preferred Shares."

Restrictions on Dividends and Other Distributions. Restrictions imposed on the declaration and payment of dividends or other distributions to the holders of the Fund's common shares and preferred shares, both by the 1940 Act and by requirements imposed by rating agencies, might impair the Fund's ability to maintain its qualification as a regulated investment company for U.S. federal income tax purposes. While the Fund intends to redeem its preferred shares or prepay its notes only to the extent necessary to enable the Fund to distribute its income as required to maintain its qualification as a regulated investment company under the Code, there can be no assurance that such actions can be effected in time to meet the Code requirements. See "Taxation" in the SAI.

Common Share Distribution Policy Risk. The Fund has adopted a policy, which may be changed at any time by the Board, of paying quarterly distributions on its common shares. In the event the Fund does not generate a total return from dividends and interest received and net realized capital gains in an amount equal to or in excess of its distribution in a given year, the Fund may return capital as part of such distribution, which may have the effect of decreasing the asset coverage per share with respect to the Fund's preferred shares. Any return of capital should not be considered by investors as yield or total return on their investment in the Fund. For the fiscal year ended December 31, 2007, the Fund made distributions of \$1.20 per common share, none of which constituted a return of capital. The composition of each distribution is estimated based on the earnings of the Fund as of the record date for each distribution. The actual composition of each of the current year's distributions will be based on the Fund's investment activity through the end of the calendar year.

Leverage Risk. The Fund intends to use financial leverage for investment purposes by issuing preferred shares or debt securities. A leveraged capital structure will create special risks not associated with unleveraged funds having a similar investment objective and policies. These include the possibility of greater loss and the likelihood of higher volatility of the net asset value of the Fund and the asset coverage for the preferred shares. Such volatility may increase the likelihood of the Fund having to sell investments in order to meet its obligations to make distributions on the preferred shares or principal or interest payments on debt securities, or to redeem preferred shares or repay debt, when it may be disadvantageous to do so. The use of leverage magnifies both the favorable and unfavorable effects of price movements in the investments made by the Fund. To the extent that the Fund determines to employ leverage in its investment operations, the Fund will be subject to substantial risk of loss. The Fund cannot assure you that borrowings or the issuance of preferred shares will result in a higher yield or return to the holders of the common shares. Also, if the Fund is utilizing leverage, a decline in net asset value could affect the ability of the Fund to make common share distributions and such a failure to make distributions could result in the Fund ceasing to qualify as a regulated investment company under the Code. See "Taxation."

Preferred Share and Note Risk. The issuance of preferred securities causes the net asset value and market value of the common shares to become more volatile. If the interest rate on the notes or the dividend rate on the preferred shares approaches the net rate of return on the Fund's investment portfolio, the benefit of leverage to the holders of the common shares would be reduced. If the interest rate on the notes or the dividend rate on the preferred shares exceeds the net rate of return on the Fund's portfolio, the leverage will result in a lower rate of return to the holders of common shares than if the Fund had not issued preferred shares.

Any decline in the net asset value of the Fund's investments would be borne entirely by the holders of common shares. Therefore, if the market value of the Fund's portfolio declines, the leverage will result in a greater decrease in net asset value to the holders of common shares than if the Fund were not leveraged. This greater net asset value decrease will also tend to cause a greater decline in the market price for the common shares. The Fund might be in danger of failing to maintain the required asset coverage of the notes or preferred shares or, in an extreme case, the Fund's current investment income might not be sufficient to meet the dividend requirements on the preferred shares. In order to counteract such an event, the Fund might need to liquidate investments in order to fund redemption of some or all of the preferred shares.

In addition, the Fund would pay (and the holders of common shares would bear) all costs and expenses relating to the issuance and ongoing maintenance of the preferred shares, including any additional advisory fees on the incremental assets attributable to such shares. Holders of notes and preferred shares may have different interests than holders of common shares and at times may have disproportionate influence over the Fund's affairs. In the event the Fund fails to maintain the specified level of asset coverage of any notes outstanding, the holders of the notes will have the right to elect a majority of the Fund's trustees. In addition, holders of preferred shares, voting separately as a single class, have the right to elect two members of the Board at all times and in the event dividends become in arrears for two full years would have the right (subject to the rights of noteholders) to elect a majority of the Trustees until the arrearage is completely eliminated. In addition, preferred shareholders have class voting rights on certain matters, including changes in fundamental investment restrictions and conversion of the Fund to open-end status, and accordingly can veto any such changes. See "Risk Factors and Special Considerations — Preferred Share and Note Risk."

Special Risks Related to Preferred Shares. Special risks associated with the Fund investing in preferred shares include deferral of distributions or dividend payments, in some cases the right of an issuer never to pay missed dividends, subordination to debt and other liabilities, illiquidity, limited voting rights and redemption by the issuer. Because the Fund has no limit on its investment in non-cumulative preferred shares, the amount of dividends the Fund pays may be adversely affected if an issuer of non-cumulative preferred shares held by the Fund determines not to pay dividends on such shares. There is no assurance that dividends or distributions on preferred shares in which the Fund invests will be declared or otherwise made payable. See "Risk Factors and Special Considerations — Risks of Investing in the Fund — Special Risks Related to Preferred Shares."

Merger Arbitrage Risk. The principal risk associated with the Fund's investment strategy is that certain of the proposed reorganizations in which the Fund invests may be renegotiated, terminated or involve a longer time frame than originally contemplated, in which case losses may be realized. The investment policies of the Fund are expected to lead to frequent changes

in investments, which increase transaction costs to the Fund, and may also result in accelerated recognition of short-term capital gain, which will be taxable to shareholders when distributed by the Fund. See "Risk Factors and Special Considerations — Risk of Investing in the Fund — Merger Arbitrage Risk."

Non-Diversified Status. As a non-diversified, closed-end management investment company under the 1940 Act, the Fund may invest a greater portion of its assets in a more limited number of issuers than may a diversified fund, and accordingly, an investment in the Fund may, under certain circumstances, present greater risk to an investor than an investment in a diversified company. See "Risk Factors and Special Considerations — Risks of Investing in the Fund — Non-Diversified Status."

Foreign Securities Risk. The Fund has no limit on the amount of its net assets it may invest in foreign securities. Investing in securities of foreign companies (or foreign governments), which are generally denominated in foreign currencies, may involve certain risks and opportunities not typically associated with investing in domestic companies and could cause the Fund to be affected favorably or unfavorably by changes in currency exchange rates and revaluation of currencies. See "Risk Factors and Special Considerations — Risks of Investing in the Fund — Foreign Securities Risk."

Lower Grade Securities. The Fund has no limit on the amount of its net assets it may invest in fixed-income securities rated below investment grade by recognized statistical rating agencies or unrated securities of comparable quality. However, the Fund does not expect these investments to exceed 10% of its total assets. The prices of these lower grade securities are more sensitive to negative developments, such as a decline in the issuer's revenues or a general economic downturn, than are the prices of higher grade securities.
