UNITED STATES

SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2013

OR

TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 1-9330

INTELLIGENT SYSTEMS CORPORATION

(Exact name of registrant as specified in its charter)

Georgia
(State or other jurisdiction of incorporation or
organization)

58-1964787
(I.R.S. Employer Identification No.)

4355 Shackleford Road, Norcross, Georgia
(Address of principal executive offices)

30093
(Zip Code)

Registrant's telephone number, including area code: (770) 381-2900

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicated by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting

Edgar Filing: INTELLIGENT SYSTEMS CORP - Form 10-Q

company” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	<input type="radio"/>	Accelerated filer	<input type="radio"/>
Non-accelerated filer	<input type="radio"/>	Smaller reporting company	<input type="radio"/>

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer’s classes of common stock, as of the latest practicable date.

As of April 30, 2013, 8,958,028 shares of Common Stock of the issuer were outstanding.

Intelligent Systems Corporation
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

1. Throughout this report, the terms “we”, “us”, “ours”, “ISC” and “company” refer to Intelligent Systems Corporation, including its wholly-owned and majority-owned subsidiaries. The unaudited Consolidated Financial Statements presented in this Form 10-Q have been prepared in accordance with accounting principles generally accepted in the United States applicable to interim financial statements. Accordingly, they do not include all of the information and notes required for complete financial statements. In the opinion of ISC management, these Consolidated Financial Statements contain all adjustments (which comprise only normal and recurring accruals) necessary to present fairly the financial position and results of operations as of and for the three month periods ended March 31, 2013 and 2012. The interim results for the three months ended March 31, 2013 are not necessarily indicative of the results to be expected for the full year. These statements should be read in conjunction with our Consolidated Financial Statements and notes thereto for the fiscal year ended December 31, 2012, as filed in our Annual Report on Form 10-K.
2. Stock-based Compensation – At March 31, 2013, we have two stock-based compensation plans in effect. We record compensation cost related to unvested stock awards by recognizing the unamortized grant date fair value on a straight line basis over the vesting periods of each award. We have estimated forfeiture rates based on our historical experience. Stock option compensation expense for the three month periods ended March 31, 2013 and 2012 has been recognized as a component of general and administrative expenses in the accompanying Consolidated Financial Statements. We recorded \$20,000 and \$19,000 of stock-based compensation expense in the quarters ended March 31, 2013 and 2012, respectively.

As of March 31, 2013, there is \$93,000 of unrecognized compensation cost related to stock options. No options were granted during the three months ended March 31, 2013. The following table summarizes options as of March 31, 2013:

	# of Shares	Wgt Avg Exercise Price	Wgt Avg Remaining Contractual Life in Years	Aggregate Intrinsic Value
Outstanding at March 31, 2013	265,500	\$ 1.78	6.8	\$ 17,780
Vested and exercisable at March 31, 2013	140,833	\$ 1.92	5.5	\$ 15,847

The estimated fair value of options granted is calculated using the Black-Scholes option pricing model with assumptions as previously disclosed in our 2012 Form 10-K.

The aggregate intrinsic value in the table above represents the total pre-tax intrinsic value (the difference between the company’s closing stock price on the last trading day of the first quarter of 2013 and the exercise price, multiplied by the number of in-the-money options) that would have been received by the option holders had all option holders exercised their options on March 31, 2013. The amount of aggregate intrinsic value will change based on the market value of the company’s stock.

3. Fair Value of Financial Instruments - The carrying value of cash, marketable securities, accounts receivable, accounts payable and certain other financial instruments (such as short-term borrowings, accrued expenses, and other current liabilities) included in the accompanying consolidated balance sheets approximates their fair value principally due to the short-term maturity of these instruments.

Financial instruments that potentially subject us to concentrations of credit risk consist principally of cash, marketable securities and trade accounts. Our available cash is held in accounts managed by third-party financial institutions. Cash may exceed the Federal Deposit Insurance Corporation, or FDIC, insurance limits. While we monitor cash balances on a regular basis and adjust the balances as appropriate, these balances could be impacted if the underlying financial institutions fail. To date, we have experienced no loss or lack of access to our cash; however, we can provide no assurances that access to our cash will not be impacted by adverse conditions in the financial markets.

4. Fair Value Measurements - In determining fair value, the company uses quoted market prices in active markets. GAAP establishes a fair value measurement framework, provides a single definition of fair value, and requires expanded disclosure summarizing fair value measurements. GAAP emphasizes that fair value is a market-based measurement, not an entity specific measurement. Therefore, a fair value measurement should be determined based on the assumptions that market participants would use in pricing an asset or liability.

GAAP establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable input be used when available. Observable inputs are based on data obtained from sources independent of the company that market participants would use in pricing the asset or liability. Unobservable inputs are inputs that reflect the company's assumptions about the estimates market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

The hierarchy is measured in three levels based on the reliability of inputs:

- Level 1

Valuations based on quoted prices in active markets for identical assets or liabilities that we have the ability to access. Valuation adjustments and block discounts are not applied to Level 1 instruments.

- Level 2

Valuations based on quoted prices in less active, dealer or broker markets. Fair values are primarily obtained from third party pricing services for identical or comparable assets or liabilities.

- Level 3

Valuations derived from other valuation methodologies, including pricing models, discounted cash flow models and similar techniques, and not based on market, exchange, dealer, or broker-traded transactions. Level 3 valuations incorporate certain assumptions and projections that are not observable in the market and significant professional judgment is needed in determining the fair value assigned to such assets or liabilities.

In instances where the determination of the fair value measurement is based on inputs from different levels of the fair value hierarchy, the level in the fair value hierarchy within which the entire fair value measurement falls is based on the lowest level input that is significant to the fair value measurement in its entirety.

Our available-for-sale investments are classified within level 1 of the valuation hierarchy.

The fair value of equity method and cost method investments has not been determined as it was impracticable to do so due to the fact that the investee companies are relatively small, early stage private companies for which there is no comparable valuation data available without unreasonable time and expense.

5. Concentration of Revenue – The following table indicates the percentage of consolidated revenue represented by each customer for any period in which such customer represented more than 10% of consolidated revenue.

(unaudited)	Three Months Ended March 31,			
	2013		2012	
ChemFree Customer A	13	%	13	%
ChemFree Customer B	30	%	29	%
ChemFree Customer C	10	%	10	%

6. Commitments and Contingencies – Please refer to Note 8 to our Consolidated Financial Statements included in our 2012 Form 10-K for a description of our commitments and contingencies in addition to those disclosed here.

Legal Matters – On September 29, 2011, ChemFree filed a second patent infringement action against J. Walter in the United States District Court for the Northern District of Georgia, alleging that certain of J. Walter's products infringed a newly issued patent held by ChemFree. The matter was amicably mediated and settled between the parties in January 2013 with each party paying their own legal expenses.

On April 2, 2013, ChemFree received a letter from Clearwater Environmental Services (“CES”) regarding a claim for additional sales commission that CES alleges is owed to it pursuant to a sales agreement between CES and ChemFree that expired October 31, 2012. On April 8, 2013, ChemFree sent a letter in reply to CES disputing its claim. The company believes that all amounts due to CES have been paid in full in accordance with the terms of the sales agreement. The dispute may result in arbitration and, while management believes it will prevail in the matter, there can be no assurance of the outcome of the dispute.

In the ordinary course of business, from time to time we may become a party to various legal matters or threatened legal actions. The litigation process is inherently uncertain and it is possible that the resolution of such matters might have a material adverse effect upon our financial condition and/or results of operations. Except as noted above, other commitments and contingencies described in Note 8 to the Consolidated Financial Statements included in our 2012 Form 10-K are unchanged.

7. Industry Segments – Segment information is presented consistently with the basis described in the 2012 Form 10-K. The following table contains segment information for the three months ended March 31, 2013 and 2012.

(unaudited, in thousands)	Three Months Ended March 31,	
	2013	2012
Information Technology		
Revenue	\$ 837	\$ 706

Consolidated capital expenditures	\$ 179	\$ 71

(unaudited, in thousands)	March 31, 2013	December 31,
		2012
Identifiable Assets		
Information Technology	\$ 1,179	\$ 1,712
Industrial Products	6,760	6,250
Consolidated segments	7,939	7,962
Corporate	1,964	1,974
Consolidated assets	\$ 9,903	\$ 9,936

8. Income Taxes – We have recognized tax benefits from all tax positions we have taken, and there has been no adjustment to any carry forwards (net operating loss or research and development credits) in the past two years. As of March 31, 2013 and December 31, 2012, the company has recorded a liability of \$148,000, in connection with unrecognized tax benefits related to uncertain tax positions. The liability includes \$28,000 of interest and penalties. As of March 31, 2013, management expects some incremental, but not significant, changes in the balance of unrecognized tax benefits over the next twelve months.

Our policy is to recognize accrued interest related to uncertain tax positions in interest expense and related penalties, if applicable, in general and administrative expense. During the three months ended March 31, 2013 and 2012, no interest or penalties were recognized.

We file a consolidated U.S. federal income tax return for all subsidiaries in which our ownership equals or exceeds 80%, as well as individual subsidiary returns in various states and foreign jurisdictions. With few exceptions we are no longer subject to U.S. federal, state and local or foreign income tax examinations by taxing authorities for years before 2009.

9. Recent Accounting Pronouncements – We have considered all recently issued accounting pronouncements and do not believe the adoption of such pronouncements will have a material impact on our Consolidated Financial Statements.

10. Subsequent Event – We evaluated subsequent events through the date when these financial statements were issued. Except as disclosed in Note 6, we are not aware of any significant events that occurred subsequent to the balance sheet date but prior to the filing of this report that would have a material impact on our Consolidated Financial Statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

In addition to historical information, this Form 10-Q may contain forward-looking statements relating to ISC. All statements, trend analyses and other information relative to markets for our products and trends in revenue, gross margins and anticipated expense levels, as well as other statements including words such as "anticipate", "believe", "plan", "estimate", "expect", and "intend", and other similar expressions, constitute forward-looking statements. Prospective investors are cautioned that any such forward-looking statements are not guarantees of future performance and involve risks and uncertainties including those factors described below under "Factors That May Affect Future Operations", and that actual results may differ materially from those contemplated by such forward-looking statements. ISC undertakes no obligation to update or revise forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or changes in future operating results.

For purposes of this discussion and analysis, we are assuming and relying upon the reader's familiarity with the information contained in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, in the Form 10-K for the year ended December 31, 2012 as filed with the Securities and Exchange Commission.

Overview

We derive our product revenue from sales and leases of equipment and supplies in our Industrial Products sector and from sales of software licenses in our Information Technology Products and Services sector. Our service revenue consists of fees for software customization, processing services, maintenance and support for software products in our Information Technology Products and Services sector. Our revenue fluctuates from period to period and our results are not necessarily indicative of the results to be expected in future periods. Period-to-period comparisons may not be meaningful and it is difficult to predict the level of consolidated revenue on a quarterly or annual basis for a number of reasons, including the following:

- A change in revenue level at one of our subsidiaries may impact consolidated revenue or be offset by an opposing change at another subsidiary.
- Software license revenue in a given period may consist of a relatively small number of contracts and contract values can vary considerably depending on the software product and scope of the license sold. Consequently, even minor delays in delivery under a software contract (which may be out of our control) could have a significant and unpredictable impact on the consolidated revenue that we recognize in a given quarterly or annual period.
- Customers may decide to postpone or cancel a planned implementation of our software for any number of reasons, which may be unrelated to our software or contract performance, but which may affect the amount, timing and characterization of our deferred and/or recognized revenue.

We have frequently recognized consolidated operating losses on a quarterly and annual basis and are likely to do so in the future from time to time. Our ChemFree subsidiary generates an operating profit and positive cash flow on a quarterly and annual basis. Our CoreCard subsidiary is not consistently profitable, mainly due to significant software development expense that is invested in its product offerings and the deferral of new contract revenue recognition until the licensed software and associated services are delivered to its customer. Depending upon the size and number of software licenses recognized in a particular period and the level of expenses incurred to support existing customers and development and sales activities, CoreCard may report operating profits on an irregular basis as it builds a larger customer base. A significant portion of CoreCard's expense is related to personnel, including a workforce of approximately 200 employees located in India and Romania. In addition, CoreCard is now offering processing services as an alternative for customers who prefer to outsource this function instead of licensing our software and running the application in-house. There are a number of uncertainties related to a new line of business. We are likely to incur losses in the near future for the processing business because contract revenue is spread out over multi-year

contracts while we are currently investing in the infrastructure, resources and processes to support this new processing business. For these and other reasons, our operating results are likely to vary from quarter to quarter and at the present time are generally not predictable with a reasonable degree of certainty.

From time to time, we derive income from sales of holdings in affiliate and other minority-owned companies or we may record a charge if we believe the value of a non-consolidated company is impaired. We also recognize on a quarterly basis our pro rata share of the income or losses of affiliate companies accounted for by the equity method. The timing and amount of the gain or loss recognized as a result of a sale or the amount of equity in the income or losses of affiliates generally are not under our control and are not necessarily indicative of future results, either on a quarterly or annual basis.

In recent years, most of our cash has been generated by our ChemFree operations and, on an irregular basis, from sales of our investments or subsidiaries. We have used a significant amount of the cash received from these transactions and operations to support the domestic and international operations associated with our CoreCard subsidiary and the corporate office.

Results of Operations

The following discussion should be read in conjunction with the Consolidated Financial Statements and the notes to Consolidated Financial Statements presented in this quarterly report.

Revenue – Total revenue from continuing operations in the three month period ended March 31, 2013 was \$4,086,000, essentially flat with the revenue reported in the first quarter of 2012.

- Revenue from products, which includes sales and leases of equipment and supplies in our Industrial Products segment as well as software license fees related to the Information Technology segment, was \$3,378,000 in the three month period ended March 31, 2013, compared to \$3,418,000 in the three months ended March 31, 2012.
- Service revenue associated with the Information Technology Products and Services segment was \$708,000 in the first quarter of 2013 compared to \$676,000 in the first quarter of 2012, a five percent increase. The change is attributed mainly to an increase in the installed base of CoreCard customers that pay for maintenance and technical support as well as growth in revenue from processing services. We expect that maintenance and processing services revenue will continue to grow as CoreCard's customer base increases; however, it is not possible to predict with any accuracy the number and value of professional services contracts that CoreCard's customers will require in a given period. Customers typically require our professional services to modify or enhance their CoreCard software implementation based on their specific business strategy and operational requirements, which vary from customer to customer and period to period.

Cost of Revenue – Total cost of revenue was 54 percent of total revenue in both the three month periods ended March 31, 2013 and 2012. Changes in product and customer mix between periods affect the overall costs as a percentage of revenue. Cost of product revenue as a percent of product revenue was 48 percent and 49 percent in the period ended March 31, 2013 and 2012, respectively, reflecting slight changes between periods in the mix of domestic versus international sales and consumables versus equipment sales. Cost of services was 83 percent of services revenue in 2013 compared to 79 percent in the same period last year. The mix of service revenue in a given period, as well as the number of customers and new products being supported and the mix of U.S. and offshore employees working on professional service projects impact the cost and gross margins during a given period. A lower level of professional services revenue in 2013 resulted in overall higher costs as a percentage of service revenue because professional services have lower costs than for other services. In addition, our initial costs to develop and support the processing business are high.

Operating Expenses – In the three month period ended March 31, 2013, total consolidated operating expenses were eight percent lower than in the corresponding period in 2012. Marketing expenses were lower by \$82,000 (14 percent) in the three month period in 2013 compared to the same period in 2012, the majority of which is due to lower sale commissions incurred by ChemFree. General and administrative expenses were \$42,000 (5 percent) lower in the first quarter of 2013 than in the first quarter of 2012, reflecting mainly lower legal expenses. Research and development expenses were \$51,000 (8 percent) lower in the first quarter of 2013 compared to the same period last year, mainly due to more technical personnel expenses being charged to cost of services for maintenance and processing revenue.

Interest Income, net – We recorded net interest income of \$2,000 and \$4,000 in the three months ended March 31, 2013 and 2012, respectively. The difference between periods reflects the fact that our note receivable related to the sale of our former VISAer subsidiary was paid in full in January 2013.

Equity in Income (Loss) of Affiliate Company – On a quarterly basis, we recognize our pro rata share of the earnings or losses of an affiliate company that we account for by the equity method. We recorded \$1,000 and \$4,000 in net equity loss in the first quarter of 2013 and 2012, respectively. The change between periods reflects changes in results of operations of the affiliate company.

Income Taxes – We recorded \$2,000 and \$12,000 in the three month periods ended March 31, 2013 and 2012, respectively, for state income tax expense at the ChemFree subsidiary.

Liquidity and Capital Resources

Our cash balance at March 31, 2013 was \$2,611,000 compared to \$2,347,000 at December 31, 2012. During the three months ended March 31, 2013, a principal source of cash was receipt of the final \$250,000 payment from the purchaser of our former VISAer subsidiary (as explained in more detail in Note 2 to the Consolidated Financial Statements contained in our 2012 Annual Report on Form 10-K). Major working capital changes included:

- A decrease in accounts receivable of \$180,000
- an increase of \$45,000 in inventory due mainly to building finished goods inventory to support ChemFree's sales growth and estimated near-term demand
 - an increase in accounts payable of \$90,000 reflecting the timing of receipt of inventory parts at quarter end

We used \$179,000 cash to upgrade accounting software, to purchase computer and manufacturing equipment, and to capitalize SmartWasher parts washers for lease to customers.

We currently project that we will have sufficient liquidity from cash on hand, continued cash positive operations at ChemFree, projected customer payments at CoreCard and periodic working capital borrowings or sale of marketable securities, if needed, to support our operations and capital equipment purchases in the foreseeable future. We renewed our line of credit in June 2012 with a maximum principal availability of \$1.25 million based on qualified receivables and inventory levels which we will use as necessary to support short-term cash needs. We have not drawn down under the bank line of credit in more than two years. We presently project that we will have sufficient accounts receivable, inventory balances and tangible net worth for the foreseeable future to support the borrowing base and loan covenants for any required draws under our bank line of credit. The line of credit expires June 30, 2014, subject to the bank renewing the line for an additional period. If the bank does not renew our line of credit and if we have unforeseen cash requirements, we may experience a short-term cash shortfall. Delays in meeting project milestones or software delivery commitments at CoreCard could cause customers to postpone payments and increase our need for cash. Presently, we do not believe there is a material risk that we will not perform successfully on any contracts but if customer payments are delayed for any reason, if we do not control costs or if we encounter unforeseen technical or quality problems, then we could require more cash than presently planned.

Long-term, we currently expect that liquidity will continue to improve and consolidated operations will generate sufficient cash to fund their requirements with use of our credit facility to accommodate short-term needs. Other long-term sources of liquidity include potential sales of investments, subsidiaries or other assets although there are no current plans to do so. Furthermore, the timing and amount of any such transactions are uncertain and, to the extent they involve non-consolidated companies, generally not within our control.

Off-Balance Sheet Arrangements

We do not currently have any off-balance sheet arrangements that are reasonably likely to have a current or future material effect on our financial condition, liquidity or results of operations.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations is based upon our Consolidated Financial Statements which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amount of assets, liabilities, revenues and expenses. We consider certain accounting policies related to revenue recognition, valuation of intangibles, valuation of investments and accrued expenses to be critical policies due to the estimation processes involved in each. Management discusses its estimates and judgments with the Audit Committee of the Board of Directors. For a detailed description on the application of these and other accounting

policies, see Note 1 to the Consolidated Financial Statements contained in our Annual Report on Form 10-K for the fiscal year ended December 31, 2012. Reference is also made to the discussion of the application of these critical accounting policies and estimates contained in Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for 2012. During the three month period ended March 31, 2013, there were no significant or material changes in the application of critical accounting policies that would require an update to the information provided in the Form 10-K for 2012.

Factors That May Affect Future Operations

Future operations in both the Information Technology Products and Services and Industrial Products segments are subject to risks and uncertainties that may negatively impact our future results of operations or projected cash requirements. It is difficult to predict future quarterly and annual results with certainty. Any trend or delay that affects even one of our subsidiaries could have a negative impact on the company's consolidated results of operations or cash requirements on a quarterly or annual basis. In addition, the carrying value of our investments is impacted by a number of factors which are generally beyond our control since we are typically a non-control shareholder in a private company with limited liquidity.

Among the numerous factors that may affect our consolidated results of operations or financial condition are the following:

Information Technology Products and Services Industry

- Further weakness in the global financial markets could have a negative impact on CoreCard due to potential customers (most of whom perform some type of financial services) delaying decisions to purchase software or initiate processing services with CoreCard.
- As an alternative to licensing its software, CoreCard is now offering processing services running on the CoreCard software system. There are numerous risks associated with entering any new line of business and if CoreCard fails to manage the risks associated with its processing operations, it could have a negative impact on our business.
- Stricter regulations and reluctance by financial institutions to act as sponsor banks for prospective customers (such as issuers and processors of credit and prepaid cards) could increase CoreCard's losses and cash requirements.
- Delays in software development projects could cause our customers to delay implementations or delay payments, which would increase our costs and reduce our revenue.
- Our CoreCard subsidiary could fail to deliver software products which meet the business and technology requirements of its target markets within a reasonable time frame and at a price point that supports a profitable, sustainable business model.
- CoreCard's processing business is impacted, directly or indirectly, by more regulations than its licensed software business. If the company fails to provide services that comply with (or allow its customers to comply with) applicable regulations or processing standards, it could be subject to financial or other penalties that could negatively impact its business.
- Software errors or poor quality control may delay product releases, increase our costs, result in non-acceptance of our software by customers or delay revenue recognition.
- CoreCard could fail to expand its base of customers as quickly as anticipated, resulting in lower revenue and profits (or increased losses) and increased cash needs.
- CoreCard could fail to retain key software developers and managers who have accumulated years of know-how in our target markets and company products, or fail to attract and train a sufficient number of new software developers and testers to support our product development plans and customer requirements at projected cost levels.
- Increasing and changing government regulations in the United States and foreign countries related to such issues as data privacy, financial and credit transactions could require changes to our products and services which could increase our costs and could affect our existing customer relationships or prevent us from getting new customers.

Industrial Products Industry

- One of ChemFree's customers represented approximately 30 percent of our consolidated revenue in the first quarter of 2013 and any unplanned changes in the volume of orders or timeliness of payments from such customer could potentially have a negative impact on inventory levels and cash, at least in the near-term.
- Delays in production or shortages of certain sole-sourced parts for our ChemFree products could impact revenue and orders. For example, recently one of ChemFree's suppliers of a sole-sourced component experienced an equipment malfunction which created a backlog of certain of ChemFree's products early in the second quarter of

2013. The company is exploring options to remedy the short-term impact of the shortage and, longer term, to reduce dependency on a single supplier where feasible.

- Increases in prices of raw materials and sub-assemblies could reduce ChemFree's gross profit if it is not able to offset such increased costs with higher selling prices for its products or other reductions in production costs.
- In certain situations, ChemFree's lease customers are permitted to terminate the lease covering one or more SmartWasher® machines, requiring the unamortized balance of the original machine cost to be written off which could reduce profits in that reporting period and result in lower revenue in future periods.

Other

- Delays in anticipated customer payments for any reason would increase our cash requirements and possibly our losses.
- Competitive pressures (including pricing, changes in customer requirements and preferences, and competitor product offerings) may cause prospective customers to choose an alternative product solution, resulting in lower revenue and profits (or increased losses).
- Declines in performance, financial condition or valuation of minority-owned companies could cause us to write-down the carrying value of our investment or postpone an anticipated liquidity event, which could negatively impact our earnings and cash.
- Our future capital needs are uncertain and depend on a number of factors; additional capital may not be available on acceptable terms, if at all.
 - Other general economic and political conditions could cause customers to delay or cancel purchases.

Item 4. Controls and Procedures

As of the end of the period covered by this report, the company carried out an evaluation, under the supervision and with the participation of the company's management, including the company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the company's disclosure controls and procedures pursuant to Rule 13a-15(b) under the Exchange Act. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the company's disclosure controls and procedures are effective. There were no significant changes in the company's internal control over financial reporting or in other factors identified in connection with this evaluation that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting.

Part II. OTHER INFORMATION

Item 1. Legal Proceedings

Legal Matters – On September 29, 2011, ChemFree filed a second patent infringement action against J. Walter in the United States District Court for the Northern District of Georgia, alleging that certain of J. Walter's products infringed a newly issued patent held by ChemFree. The matter was amicably mediated and settled between the parties in January 2013 with each party paying their own legal expenses.

Other than the above described litigation, we are not currently subject to any material legal proceedings. However, from time to time, we may become a party to certain legal proceedings or threatened claims in the ordinary course of business. The litigation process is inherently uncertain and it is possible that the resolution of such matters might have a material adverse effect upon our financial condition and/or results of operations.

Item 6. Exhibits

The following exhibits are filed or furnished with this report:

3.1 Amended and Restated Articles of Incorporation of the Registrant dated May 4, 2011 (Incorporated by reference to Exhibit 3.(1) to the Registrant's Form 10-Q for the period ended March 31, 2011)

3.2 Bylaws of the Registrant dated December 7, 2007. (Incorporated by reference to Exhibit 3.2 of the Registrant's Form 8-K dated December 7, 2007.)

31.1 Certification of Chief Executive Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

31.2 Certification of Chief Financial Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

32.1 Certification of Chief Executive Officer and Chief Financial Officer furnished as required by Section 906 of the Sarbanes-Oxley Act of 2002.
