

MIDDLEFIELD BANC CORP
Form 10-Q
August 12, 2014

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20552

FORM 10 - Q

**QUARTERLY REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934**

For the quarterly period ended June 30, 2014

Commission File Number 000-32561

**Middlefield
Banc Corp.
(Exact
name of
registrant
as specified
in its
charter)**

Ohio **34 - 1585111**
(State or other jurisdiction of incorporation or organization) (IRS Employer Identification No.)

15985 East High Street, Middlefield, Ohio 44062-9263

(Address of principal executive offices)

(440) 632-1666

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (Section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definition of "large accelerated filer", "accelerated filer", and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

YES NO

State the number of shares outstanding of each of the issuer's classes of common equity as of the latest practicable date:

Class: Common Stock, without par value

Outstanding at August 12, 2014: 2,042,873

MIDDLEFIELD BANC CORP.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

The consolidated financial statements of Middlefield Banc Corp. ("Company") include its bank subsidiary, The Middlefield Banking Company ("MB"), and a nonbank asset resolution subsidiary EMORECO, Inc. All significant inter-company items have been eliminated.

The accompanying financial statements have been prepared in accordance with U.S. generally accepted accounting principles and the instructions for Form 10-Q and Article 10 of Regulation S-X. In management's opinion, the financial statements include all adjustments, consisting of normal recurring adjustments, that the Company considers necessary to fairly state the Company's financial position and the results of operations and cash flows. The consolidated balance sheet at December 31, 2013, has been derived from the audited financial statements at that date but does not include all of the necessary informational disclosures and footnotes as required by U.S. generally accepted accounting principles. The accompanying financial statements should be read in conjunction with the financial statements and notes thereto included with the Company's Form 10-K for the year ended December 31, 2013 (File No. 000-32561). The results of the Company's operations for any interim period are not necessarily indicative of the results of the Company's operations for any other interim period or for a full fiscal year.

Recent Accounting Pronouncements

In June 2013, the FASB issued ASU 2013-08, *Financial Services – Investment Companies (Topic 946): Amendments to the Scope, Measurement, and Disclosure Requirements*. The amendments in this Update affect the scope, measurement, and disclosure requirements for investment companies under U.S. GAAP. The amendments do all of the following: 1. Change the approach to the investment company assessment in Topic 946, clarify the characteristics of an investment company, and provide comprehensive guidance for assessing whether an entity is an investment Company. 2. Require an investment company to measure noncontrolling ownership interests in other investment companies at fair value rather than using the equity method of accounting. 3. Require the following additional disclosures: (a) the fact that the entity is an investment company and is applying the guidance in Topic 946, (b) information about changes, if any, in an entity's status as an investment company, and (c) information about financial support provided or contractually required to be provided by an investment company to any of its investees. The amendments in this Update are effective for an entity's interim and annual reporting periods in fiscal years that begin

after December 15, 2013. This ASU became effective for the Company on January 1, 2014 and did not have a significant impact on the Company's financial statements.

In July 2013, the FASB issued ASU 2013-11, *Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists*. This Update applies to all entities that have unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists at the reporting date. An unrecognized tax benefit, or a portion of an unrecognized tax benefit, should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, except as follows. To the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. The assessment of whether a deferred tax asset is available is based on the unrecognized tax benefit and deferred tax asset that exist at the reporting date and should be made presuming disallowance of the tax position at the reporting date. The amendments in this Update are effective for fiscal years, and interim periods within those years, beginning after December 15, 2013. For nonpublic entities, the amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2014. Early adoption is permitted. The amendments should be applied prospectively to all unrecognized tax benefits that exist at the effective date. Retrospective application is permitted. This ASU became effective for the Company on January 1, 2014 and did not have a significant impact on the Company's financial statements.

In January 2014, FASB issued ASU 2014-01, *Investments – Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Qualified Affordable Housing Projects*. The amendments in this Update permit reporting entities to make an accounting policy election to account for their investments in qualified affordable housing projects using the proportional amortization method if certain conditions are met. Under the proportional amortization method, an entity amortizes the initial cost of the investment in proportion to the tax credits and other tax benefits received and recognizes the net investment performance in the income statement as a component of income tax expense (benefit). The amendments in this Update should be applied retrospectively to all periods presented. A reporting entity that uses the effective yield method to account for its investments in qualified affordable housing projects before the date of adoption may continue to apply the effective yield method for those preexisting investments. The amendments in this Update are effective for public business entities for annual periods and interim reporting periods within those annual periods, beginning after December 15, 2014. Early adoption is permitted. This ASU is not expected to have a significant impact on the Company's financial.

In January 2014, the FASB issued ASU 2014-04, *Receivables – Troubled Debt Restructurings by Creditors (Subtopic 310-40): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure*. The amendments in this Update clarify that an in substance repossession or foreclosure occurs, and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either (1) the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure or (2) the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. Additionally, the amendments require interim and annual disclosure of both (1) the amount of foreclosed residential real estate property held by the creditor and (2) the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction. The amendments in this Update are effective for public business entities for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. An entity can elect to adopt the amendments in this Update using either a modified retrospective transition method or a prospective transition method. This ASU is not expected to have a significant impact on the Company's financial statements.

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers* (a new revenue recognition standard). The Update's core principle is that a company will recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In addition, this update specifies the accounting for certain costs to obtain or fulfill a contract with a customer and expands disclosure requirements for revenue recognition. This Update is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. The Company is evaluating the effect of adopting this new accounting Update.

In June 2014, the FASB issued ASU 2014-11, *Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures*. The amendments in this Update change the accounting for repurchase-to-maturity transactions to secured borrowing accounting. For repurchase financing arrangements, the amendments require separate accounting for a transfer of a financial asset executed contemporaneously with a repurchase agreement with the same counterparty, which will result in secured borrowing accounting for the repurchase agreement. The amendments also require enhanced disclosures. The accounting changes in this Update are effective for the first interim or annual period beginning after December 15, 2014. An entity is required to present changes in accounting for transactions outstanding on the effective date as a cumulative-effect adjustment to retained earnings as of the beginning of the period of adoption. Earlier application is prohibited. The disclosure for certain transactions accounted for as a sale is required to be presented for interim and annual periods beginning after December 15, 2014, and the disclosure for repurchase agreements, securities lending transactions, and repurchase-to-maturity transactions accounted for as secured borrowings is required to be presented for annual periods beginning after December 15, 2014, and for interim periods beginning after March 15, 2015. The disclosures are not required to be presented for comparative periods before the effective date. This Update is not expected to have a significant impact on the Company's financial statements.

In June 2014, the FASB issued ASU 2014-12, *Compensation-Stock Compensation (Topic 718): Accounting for Share-Based Payments when the Terms of an Award Provide that a Performance Target Could Be Achieved After the Requisite Service Period*. The amendments require that a performance target that affects vesting and that could be

achieved after the requisite service period be treated as a performance condition. The amendments in this Update are effective for annual periods and interim periods within those annual periods beginning after December 15, 2015. Earlier adoption is permitted. Entities may apply the amendments in this Update either (a) prospectively to all awards granted or modified after the effective date or (b) retrospectively to all awards with performance targets that are outstanding as of the beginning of the earliest annual period presented in the financial statements and to all new or modified awards thereafter. If retrospective transition is adopted, the cumulative effect of applying this Update as of the beginning of the earliest annual period presented in the financial statements should be recognized as an adjustment to the opening retained earnings balance at that date. Additionally, if retrospective transition is adopted, an entity may use hindsight in measuring and recognizing the compensation cost. This Update is not expected to have a significant impact on the Company's financial statements.

NOTE 2 - STOCK-BASED COMPENSATION

The Company had no unvested stock options outstanding or unrecognized stock-based compensation costs outstanding as of June 30, 2014 and 2013.

Stock option activity during the six months ended June 30 is as follows:

	2014	Weighted-average Exercise Price	2013	Weighted-average Exercise Price
Outstanding, January 1	58,581	\$ 28.38	79,693	\$ 26.81
Exercised	-	-	(19,761)	24.09
Forfeited	(907)	27.35	-	-
Outstanding, June 30	57,674	28.40	59,932	28.29
Exercisable, June 30	57,674	28.40	59,932	28.29

NOTE 3 - EARNINGS PER SHARE

The Company provides dual presentation of basic and diluted earnings per share. Basic earnings per share is calculated by dividing net income by the average shares outstanding. Diluted earnings per share adds the dilutive effects of stock options to average shares outstanding.

The following table sets forth the composition of the weighted-average common shares (denominator) used in the basic and diluted earnings per share computation.

For the Three Months Ended	For the Six Months Ended
-------------------------------	-----------------------------

Edgar Filing: MIDDLEFIELD BANC CORP - Form 10-Q

	June 30, 2014	2013	June 30, 2014	2013
Weighted-average common shares issued	2,227,556	2,206,794	2,225,555	2,198,033
Average treasury stock shares	(189,530)	(189,530)	(189,530)	(189,530)
Weighted-average common shares and common stock equivalents used to calculate basic earnings per share	2,038,026	2,017,264	2,036,025	2,008,503
Additional common stock equivalents (stock options) used to calculate diluted earnings per share	6,538	6,697	6,156	8,557
Weighted-average common shares and common stock equivalents used to calculate diluted earnings per share	2,044,564	2,023,961	2,042,181	2,017,060

Options to purchase 57,674 shares of common stock, at prices ranging from \$17.55 to \$40.24, were outstanding during the three and six months ended June 30, 2014. Of those options, 28,282 were considered dilutive based on the market price exceeding the strike price.

Options to purchase 59,932 shares of common stock, at prices ranging from \$17.55 to \$40.24, were outstanding during the three and six months ended June 30, 2013. Of those options, 31,833 were considered dilutive for the three month period based on the market price exceeding the strike price. For the six months ended June 30, 2013, 49,394 options were considered dilutive.

NOTE 4 - FAIR VALUE MEASUREMENTS

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for an asset or liability in an orderly transaction between market participants at the measurement date. GAAP established a fair value hierarchy that prioritizes the use of inputs used in valuation methodologies into the following six levels:

Level I: Quoted prices are available in active markets for identical assets or liabilities as of the reported date.

Level II: Pricing inputs are other than the quoted prices in active markets, which are either directly or indirectly observable as of the reported date. The nature of these assets and liabilities includes items for which quoted prices are available but traded less frequently and items that are fair valued using other financial instruments, the parameters of which can be directly observed.

Level III: Assets and liabilities that have little to no pricing observability as of the reported date. These items do not have two-way markets and are measured using management's best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation.

The following tables present the assets measured on a recurring basis on the Consolidated Balance Sheet at their fair value by level within the fair value hierarchy. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

(Dollar amounts in thousands)	June 30, 2014			Total
	Level I	Level II	Level III	
Assets measured on a recurring basis:				
U.S. government agency securities	\$ -	\$25,061	\$ -	\$25,061
Obligations of states and political subdivisions	-	98,772	-	98,772
Mortgage-backed securities in government- sponsored entities		37,599		37,599

Total debt securities	-	156,393	-	156,393
Equity securities in financial institutions	5	745	-	750
Total	\$ 5	\$157,138	\$ -	\$157,143

The Company obtains fair values from an independent pricing service which represent either quoted market prices for the identical securities (Level I inputs) or fair values determined by pricing models using a market approach that considers observable market data, such as interest rate volatilities, LIBOR yield curve, credit spreads and prices from market makers and live trading systems (Level II).

Financial instruments are considered Level III when their values are determined using pricing models, discounted cash flow methodologies or similar techniques and at least one significant model assumption or input is unobservable. In addition to these unobservable inputs, the valuation models for Level III financial instruments typically also rely on a number of inputs that are readily observable either directly or indirectly. Level III financial instruments also include those for which the determination of fair value requires significant management judgment or estimation. The Company has no securities considered to be Level III as of June 30, 2014 or December 31, 2013.

The Company uses prices compiled by third party vendors due to improvements in third party pricing methodology that have narrowed the variances between third party vendor prices and actual market prices.

The following tables present the assets measured on a nonrecurring basis on the Consolidated Balance Sheet at their fair value by level within the fair value hierarchy. Impaired loans that are collateral dependent are written down to fair value through the establishment of specific reserves. Techniques used to value the collateral that secure the impaired loan include: quoted market prices for identical assets classified as Level I inputs; observable inputs, employed by certified appraisers, for similar assets classified as Level II inputs. In cases where valuation techniques included inputs that are unobservable and are based on estimates and assumptions developed by management based on the best information available under each circumstance, the asset valuation is classified as Level III inputs.

(Dollar amounts in thousands)	June 30, 2014	Total
-------------------------------	------------------	-------

	Level I	Level II	Level III	
Assets measured on a nonrecurring basis:				
Impaired loans	\$ -	\$-	\$14,029	\$14,029
Other real estate owned	-	-	2,392	2,392

	Level I	Level II	Level III	Total
(Dollar amounts in thousands)				
Assets measured on a nonrecurring basis:				
Impaired loans	\$ -	\$-	\$17,158	\$17,158
Other real estate owned	-	-	2,698	2,698

The Company values other real estate owned at the estimated fair value of the underlying collateral less expected selling costs. Such values are estimated primarily using appraisals and reflect a market value approach. Due to the significance of the Level III inputs, other real estate owned has been classified as Level III.

The following table presents additional quantitative information about assets measured at fair value on a nonrecurring basis and for which the Company uses Level III inputs to determine fair value:

<i>(Dollar amounts in thousands)</i>	Quantitative Information about Level III Fair Value Measurements				
	Fair Value Estimate		Valuation Techniques	Unobservable Input	Range (Weighted Average)
	June 30, 2014	December 31, 2013			
Impaired loans	\$14,029	\$17,158	Appraisal of collateral (1)	Appraisal adjustments (2)	-20% to -55.0% (-28.1%)
Other real estate owned	\$2,392	\$2,698	Appraisal of collateral (1)	Appraisal adjustments (2)	0% to -10.0% (-7.5%)

(1) Fair value is generally determined through independent appraisals of the underlying collateral, which generally include various level 3 inputs which are not identifiable.

(2) Appraisals may be adjusted by management for qualitative factors such as economic conditions and estimated liquidation expenses. The range and weighted-average of liquidation expenses and other appraisal adjustments are presented as a percent of the appraisal.

The estimated fair value of the Company's financial instruments is as follows:

	June 30, 2014				Total Fair Value

Financial instruments are defined as cash, evidence of ownership interest in an entity, or a contract which creates an obligation or right to receive or deliver cash or another financial instrument from/to a second entity on potentially favorable or unfavorable terms.

Fair value is defined as the amount at which a financial instrument could be exchanged in a current transaction between willing parties other than in a forced liquidation sale. If a quoted market price is available for a financial instrument, the estimated fair value would be calculated based upon the market price per trading unit of the instrument.

If no readily available market exists, the fair value estimates for financial instruments should be based upon management's judgment regarding current economic conditions, interest rate risk, expected cash flows, future estimated losses, and other factors as determined through various option pricing formulas or simulation modeling. Since many of these assumptions result from judgments made by management based upon estimates which are inherently uncertain, the resulting estimated fair values may not be indicative of the amount realizable in the sale of a particular financial instrument. In addition, changes in assumptions on which the estimated fair values are based may have a significant impact on the resulting estimated fair values.

As certain assets such as deferred tax assets and premises and equipment are not considered financial instruments, the estimated fair value of financial instruments would not represent the full value of the Company.

The Company employed simulation modeling in determining the estimated fair value of financial instruments for which quoted market prices were not available based upon the following assumptions:

Cash and Cash Equivalents, Federal Home Loan Bank Stock, Accrued Interest Receivable, Accrued Interest Payable, and Short-Term Borrowings

The fair value is equal to the current carrying value.

Bank-Owned Life Insurance

The fair value is equal to the cash surrender value of the life insurance policies.

Investment Securities Available for Sale

The fair value of investment securities is equal to the available quoted market price. If no quoted market price is available, fair value is estimated using the quoted market price for similar securities.

Net Loans

The fair value is estimated by discounting future cash flows using current market inputs at which loans with similar terms and qualities would be made to borrowers of similar credit quality. Where quoted market prices were available, primarily for certain residential mortgage loans, such market rates were used as estimates for fair value.

Deposits and Other Borrowings

The fair values of certificates of deposit and other borrowings are based on the discounted value of contractual cash flows. The discount rates are estimated using rates currently offered for similar instruments with similar remaining maturities. Demand, savings, and money market deposits are valued at the amount payable on demand as of period end.

Commitments to Extend Credit

These financial instruments are generally not subject to sale, and estimated fair values are not readily available. The carrying value, represented by the net deferred fee arising from the unrecognized commitment or letter of credit, and the fair value, determined by discounting the remaining contractual fee over the term of the commitment using fees currently charged to enter into similar agreements with similar credit risk, are not considered material for disclosure.

NOTE 5 – ACCUMULATED OTHER COMPREHENSIVE INCOME

The following table presents the changes in accumulated other comprehensive income by component net of tax for the three and six months ended June 30, 2014 and 2013, respectively:

	Unrealized gains on available-for-sale securities (a)
Balance as of December 31, 2013	\$ (2,237)
Other comprehensive income before reclassification	1,847
Amount reclassified from accumulated other comprehensive loss	4
Period change	1,851

There were 86 securities considered temporarily impaired at June 30, 2014.

On a quarterly basis, the Company performs an assessment to determine whether there have been any events or economic circumstances indicating that a security with an unrealized loss has suffered other-than-temporary impairment ("OTTI"). A debt security is considered impaired if the fair value is less than its amortized cost basis at the reporting date. The Company assesses whether the unrealized loss is other than temporary.

OTTI losses are recognized in earnings when the Company has the intent to sell the debt security or it is more likely than not that it will be required to sell the debt security before recovery of its amortized cost basis. However, even if the Company does not expect to sell a debt security, it must evaluate expected cash flows to be received and determine if a credit loss has occurred.

An unrealized loss is generally deemed to be other than temporary and a credit loss is deemed to exist if the present value of the expected future cash flows is less than the amortized cost basis of the debt security. As a result the credit loss component of an OTTI is recorded as a component of investment securities gains (losses) in the accompanying Consolidated Statement of Income, while the remaining portion of the impairment loss is recognized in other comprehensive income, provided the Company does not intend to sell the underlying debt security and it is “more likely than not” that the Company will not have to sell the debt security prior to recovery.

Debt securities issued by U.S. government agencies, U.S. government-sponsored enterprises, and state and political subdivisions accounted for more than 98% of the total available-for-sale portfolio as of June 30, 2014 and no credit losses are expected, given the explicit and implicit guarantees provided by the U.S. federal government and the lack of prolonged unrealized loss positions within the obligations of state and political subdivisions security portfolio. The Company’s assessment was concentrated mainly on private-label collateralized mortgage obligations of approximately \$3.0 million for which the Company evaluates credit losses on a quarterly basis. The gross unrealized gain position related to these private-label collateralized mortgage obligations amounted to \$292,000 on June 30, 2014. The Company considered the following factors in determining whether a credit loss exists and the period over which the debt security is expected to recover:

•The length of time and the extent to which the fair value has been less than the amortized cost basis.

•Changes in the near term prospects of the underlying collateral of a security such as changes in default rates, loss severity given default and significant changes in prepayment assumptions;

•The level of cash flows generated from the underlying collateral supporting the principal and interest payments of the debt securities; and

•Any adverse change to the credit conditions and liquidity of the issuer, taking into consideration the latest information available about the overall financial condition of the issuer, credit ratings, recent legislation and government actions affecting the issuer's industry and actions taken by the issuer to deal with the present economic climate.

For the three and six months ended June 30, 2014 and 2013, there were no available-for-sale debt securities with an unrealized loss that suffered OTTI. Management does not believe any individual unrealized loss as of June 30, 2014 or December 31, 2013 represented an other-than-temporary impairment. The unrealized losses on debt securities are primarily the result of interest rate changes. These conditions will not prohibit the Company from receiving its contractual principal and interest payments on these debt securities. The fair value of these debt securities is expected to recover as payments are received on these securities and they approach maturity. Should the impairment of any of these securities become other than temporary, the cost basis of the investment will be reduced and the resulting loss recognized in net income in the period the other-than-temporary impairment is identified.

NOTE 7 - LOANS AND RELATED ALLOWANCE FOR LOAN AND LEASE LOSSES

Major classifications of loans are summarized as follows (in thousands):

	June 30, 2014	December 31, 2013
Commercial and industrial	\$55,577	\$54,498
Real estate - construction	26,615	25,601
Real estate - mortgage:		
Residential	219,229	210,310

Commercial	142,505	141,171
Consumer installment	6,193	4,145
	450,119	435,725
Less allowance for loan and lease losses	7,129	7,046
Net loans	\$442,990	\$428,679

The Company's primary business activity is with customers located within its local trade area, eastern Geauga County, and contiguous counties to the north, east, and south. The Company also serves the central Ohio market with offices in Dublin and Westerville, Ohio. Commercial, residential, consumer, and agricultural loans are granted. Although the Company has a diversified loan portfolio, loans outstanding to individuals and businesses are dependent upon the local economic conditions in the Company's immediate trade area.

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff generally are reported at their outstanding unpaid principal balances net of the allowance for loan and lease losses. Interest income is recognized as income when earned on the accrual method. The accrual of interest is discontinued on a loan when management believes, after considering economic and business conditions, the borrower's financial condition is such that collection of interest is doubtful. Interest received on nonaccrual loans is recorded as income or applied against principal according to management's judgment as to the collectability of such principal.

Loan origination fees and certain direct loan origination costs are being deferred and the net amount amortized as an adjustment of the related loan's yield. Management is amortizing these amounts over the contractual life of the related loans.

The following tables summarize the primary segments of the loan portfolio and allowance for loan and lease losses (in thousands):

June 30, 2014	Commercial and industrial	Real estate- construction	Real Estate- Mortgage		Consumer installment	Total
			Residential	Commercial		
Loans:

Individually evaluated for impairment	\$ 179	\$ 210	\$855	\$ 563	\$ -	\$1,807
Collectively evaluated for impairment	435	366	2,809	1,607	22	5,239
Total ending allowance balance	\$ 614	\$ 576	\$3,664	\$ 2,170	\$ 22	\$7,046

The commercial real estate loans individually evaluated for impairment declined during the period ended June 30, 2014 mostly due to the payoff of a \$2.1 million relationship.

The Company's loan portfolio is segmented to a level that allows management to monitor risk and performance. The portfolio is segmented into Commercial and Industrial ("C&I"), Real Estate Construction, Real Estate - Mortgage which is further segmented into Residential and Commercial real estate, and Consumer Installment Loans. The C&I loan segment consists of loans made for the purpose of financing the activities of commercial customers. The residential mortgage loan segment consists of loans made for the purpose of financing the activities of residential homeowners. The commercial mortgage loan segment consists of loans made for the purpose of financing the activities of commercial real estate owners and operators. The consumer loan segment consists primarily of installment loans and overdraft lines of credit connected with customer deposit accounts.

Management evaluates individual loans in all of the commercial segments for possible impairment if the loan is greater than \$200,000 and if the loan either is in nonaccrual status, or is risk rated Substandard and is greater than 90 days past due. Loans are considered to be impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in evaluating impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. The Company does not separately evaluate individual consumer and residential mortgage loans for impairment, unless such loans are part of a larger relationship that is impaired.

Once the determination has been made that a loan is impaired, the determination of whether a specific allocation of the allowance is necessary is measured by comparing the recorded investment in the loan to the fair value of the loan using one of the following methods: (a) the present value of expected future cash flows discounted at the loan's effective interest rate; (b) the loan's observable market price; or (c) the fair value of the collateral less selling costs. The method is selected on a loan-by-loan basis, with management primarily utilizing the fair value of collateral method. The evaluation of the need and amount of a specific allocation of the allowance and whether a loan can be removed from impairment status is made on a quarterly basis. The Company's policy for recognizing interest income on impaired loans does not differ from its overall policy for interest recognition.

The following tables present impaired loans by class, segregated by those for which a specific allowance was required and those for which a specific allowance was not necessary (in thousands):

June 30, 2014
Impaired Loans

	Recorded Investment	Unpaid Principal Balance	Related Allowance
With no related allowance recorded:			
Commercial and industrial	\$ 1,375	\$ 1,375	\$ -

Management uses a nine point internal risk rating system to monitor the credit quality of the overall loan portfolio. The first five categories are considered not criticized, and are aggregated as “Pass” rated. The criticized rating categories used by management generally follow bank regulatory definitions. The Special Mention category includes assets that are currently protected but are potentially weak, resulting in an undue and unwarranted credit risk, but not to the point of justifying a Substandard classification. Loans in the Substandard category have well-defined weaknesses that jeopardize the liquidation of the debt, and have a distinct possibility that some loss will be sustained if the weaknesses are not corrected. All loans greater than 90 days past due are considered Substandard. Assets classified as “doubtful” have all the weaknesses inherent in those classified substandard, with the added characteristic that the weaknesses make collection of principal in full — on the basis of currently existing facts, conditions, and values — highly questionable and improbable. Any portion of a loan that has been charged off is placed in the Loss category.

To help ensure that risk ratings are accurate and reflect the present and future capacity of borrowers to repay a loan as agreed, the Company has a structured loan rating process with several layers of internal and external oversight. Generally, consumer and residential mortgage loans are included in the Pass categories unless a specific action, such as bankruptcy, repossession, or death occurs to raise awareness of a possible credit loss. The Company’s Commercial Loan Officers are responsible for the timely and accurate risk rating of the loans in their portfolios at origination and on an ongoing basis. The Credit Department performs an annual review of all commercial relationships \$200,000 or greater. Confirmation of the appropriate risk grade is included in the review on an ongoing basis. The Company has an experienced Loan Review Department that continually reviews and assesses loans within the portfolio. The Company engages an external consultant to conduct loan reviews on a semi-annual basis. Generally, the external consultant reviews commercial relationships greater than \$250,000 and/or criticized relationships greater than \$125,000. Detailed reviews, including plans for resolution, are performed on loans classified as Substandard on a quarterly basis. Loans in the Special Mention and Substandard categories that are

collectively evaluated for impairment are given separate consideration in the determination of the allowance.

The primary risk of commercial and industrial loans is the current economic uncertainties. C&I loans are, by nature, secured by less substantial collateral than real estate-secured loans. The primary risk of real estate construction loans is potential delays and /or disputes during the completion process. The primary risk of residential real estate loans is current economic uncertainties along with the slow recovery in the housing market. The primary risk of commercial real estate loans is loss of income of the owner or occupier of the property and the inability of the market to sustain rent levels. Consumer installment loans historically have experienced higher delinquency rates. Consumer installments are typically secured by less substantial collateral than other types of credits.

The following tables present the classes of the loan portfolio summarized by the aggregate Pass and the criticized categories of Special Mention, Substandard and Doubtful within the internal risk rating system (in thousands):

	Pass	Special Mention	Substandard	Doubtful	Total Loans
June 30, 2014					
Commercial and industrial	\$53,337	\$ 737	\$ 1,460	\$ 43	\$55,577

Management further monitors the performance and credit quality of the loan portfolio by analyzing the age of the portfolio as determined by the length of time a recorded payment is past due.

Nonperforming assets include nonaccrual loans, troubled debt restructurings (TDRs), loans 90 days or more past due, EMORECO assets, other real estate owned, and repossessed assets. A loan is classified as nonaccrual when, in the opinion of management, there are serious doubts about collectability of interest and principal. Accrual of interest is discontinued on a loan when management believes, after considering economic and business conditions, the borrower's

financial condition is such that collection of principal and interest is doubtful. Payments received on nonaccrual loans are applied against principal according to management's shadow accounting system.

The following tables present the classes of the loan portfolio summarized by the aging categories of performing loans and nonaccrual loans (in thousands):

	Current	Still Accruing			Total Past Due	Non- Accrual	Total Loans
		30-59 Days Past Due	60-89 Days Past Due	90 Days+ Past Due

An allowance for loan and lease losses (“ALLL”) is maintained to absorb losses from the loan portfolio. The ALLL is based on management’s continuing evaluation of the risk characteristics and credit quality of the loan portfolio, assessment of current economic conditions, diversification and size of the portfolio, adequacy of collateral, past and anticipated loss experience, and the amount of nonperforming loans.

The Company’s methodology for determining the ALLL is based on the requirements of ASC Section 310-10-35 for loans individually evaluated for impairment (discussed above) and ASC Subtopic 450-20 for loans collectively evaluated for impairment, as well as the Interagency Policy Statements on the Allowance for Loan and Lease Losses and other bank regulatory guidance. The total of the two components represents the Company’s ALLL. Management also performs impairment analyses on TDRs, which may result in specific reserves.

Loans that are collectively evaluated for impairment are analyzed with general allowances being made as appropriate. For general allowances, historical loss trends are used in the estimation of losses in the current portfolio. These historical loss amounts are modified by other qualitative factors.

The classes described above, which are based on the purpose code assigned to each loan, provide the starting point for the ALLL analysis. Management tracks the historical net charge-off activity at the purpose code level. A historical charge-off factor is calculated using the last four consecutive historical quarters.

Management has identified a number of additional qualitative factors which it uses to supplement the historical charge-off factor because these factors are likely to cause estimated credit losses associated with the existing loan pools to differ from historical loss experience. The additional factors that are evaluated quarterly and updated using

information obtained from internal, regulatory, and governmental sources are: national and local economic trends and conditions; levels of and trends in delinquency rates and nonaccrual loans; trends in volumes and terms of loans; effects of changes in lending policies; experience, ability, and depth of lending staff; value of underlying collateral; and concentrations of credit from a loan type, industry and/or geographic standpoint.

Management reviews the loan portfolio on a quarterly basis using a defined, consistently applied process in order to make appropriate and timely adjustments to the ALLL. When information confirms all or part of specific loans to be uncollectible, these amounts are promptly charged off against the ALLL.

The following tables summarize the primary segments of the loan portfolio (in thousands):

	Commercial and industrial	Real estate- construction	Real estate- residential mortgage	Real estate- commercial mortgage	Consumer installment	Total

The real estate construction provision, for the period ended June 30, 2014, was mostly impacted by an improvement in risk rating to a relationship with a specific reserve of \$113,000. The increased residential portfolio provision was mostly related to an increase in the loss ratio of 24 basis points. The negative commercial real estate provision was largely driven by the payoff of a relationship with a specific reserve of \$352,000.

The following tables summarize troubled debt restructurings and subsequent defaults (in thousands):

Troubled Debt Restructurings	For the three months ended June 30, 2014			Pre-Modification Outstanding Recorded Investment	June 30, 2013		
	Number of Contracts				of Contracts	Pre-Modification	
	Term Modification	Other	Total			Term Modification	Total

There were no changes to the recorded investment post modification. No TDRs, modified in the past twelve months, subsequently defaulted in the three and six months ended June 30, 2014.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis provides further detail to the financial condition and results of operations of the Company. The MD&A should be read in conjunction with the notes and financial statements presented in this report.

CHANGES IN FINANCIAL CONDITION

General. The Company's total assets ended the June 30, 2014 quarter at \$668.3 million, an increase of \$21.2 million or 3.3% from December 31, 2013. For the same time period, cash and cash equivalents decreased \$0.6 million, or 2.4% while loans increased \$14.3 million, or 3.3%. Total liabilities increased \$15.5 million, or 2.6% while stockholders' equity grew \$5.7 million, or 10.7%.

Cash on hand and due from banks. Cash and due from banks and Federal funds sold represent cash and cash equivalents. Cash and cash equivalents decreased \$0.6 million at June 30, 2014 from \$26.2 million at December 31, 2013. Deposits from customers into savings and checking accounts, loan and securities repayments and proceeds from borrowed funds typically increase these accounts. Decreases result from customer withdrawals, new loan originations, purchases of investment securities and repayments of borrowed funds.

Investment securities. Investment securities available for sale on June 30, 2014 totaled \$165.5 million, an increase of \$8.4 million or 5.3% from \$157.1 million at December 31, 2013. During this period the Company recorded repayments, calls, and maturities of \$6.8 million. Sales of securities were \$1.5 million with a net realized gain of \$58,000. Purchases for the period were \$12.3 million.

Loans receivable. The loans receivable category consists primarily of single-family mortgage loans used to purchase or refinance personal residences located within the Company's market area and commercial real estate loans used to finance properties that are used in the borrowers' businesses or to finance investor-owned rental properties, and to a lesser extent, construction and consumer loans. Net loans receivable increased \$14.3 million or 3.3% to \$443.0 million as of June 30, 2014 from \$428.7 million at December 31, 2013. Included in this amount were increases in the residential real estate and consumer installment portfolios of \$8.9 million, or 4.2%, and \$2.0 million, or 49.4%, respectively. The commercial real estate, commercial and industrial, and real estate construction portfolios also increased by \$1.3 million, \$1.1 million, and \$1.0 million, respectively.

Allowance for loan and lease losses and Asset Quality. The Company increased the allowance for loan and lease losses to \$7.1 million, or 1.6% of total loans, at June 30, 2014. For the three months ended June 30, 2014, net loan charge-offs totaled \$6,000, or 0.01% of average loans, compared to \$283,000, or 0.3%, for the second quarter of 2013. To maintain the adequacy of the allowance for loan and lease losses, the Company recorded a provision for loan losses of \$120,000, versus \$300,000 for the first half of 2014. For the six months ended June 30, 2014, net loan charge-offs totaled \$217,000, or 0.1% of average loans, compared to \$643,000, or 0.3%, for the second quarter of 2013. To maintain the adequacy of the allowance for loan and lease losses, the Company recorded a provision for loan losses of \$300,000, versus \$613,000 for the first half of 2013.

Management analyzes the adequacy of the allowance for loan and lease losses regularly through reviews of the performance of the loan portfolio considering economic conditions, changes in interest rates and the effect of such changes on real estate values and changes in the amount and composition of the loan portfolio. The allowance for loan and lease losses is a significant estimate that is particularly susceptible to significant changes in the near term. Such evaluation, which includes a review of all loans for which full collectability may not be reasonably assured, considers among other matters, historical loan loss experience, the estimated fair value of the underlying collateral, economic conditions, current interest rates, trends in the borrower's industry and other factors that management believes warrant recognition in providing for an appropriate allowance for loan and lease losses. Future additions to the allowance for loan and lease losses will be dependent on these factors. Additionally, the Company uses an outside party to conduct an independent review of commercial and commercial real estate loans. The Company uses the results of this review to help determine the effectiveness of the existing policies and procedures, and to provide an independent assessment of the allowance for loan and lease losses allocated to these types of loans. Management believes the allowance for loan and lease losses is appropriately stated at June 30, 2014. Based on the variables involved and management's judgments about uncertain outcomes, the determination of the allowance for loan and lease losses is considered a critical accounting policy.

Nonperforming assets. Nonperforming assets includes nonaccrual loans, troubled debt restructurings (TDRs), loans 90 days or more past due, EMORECO assets, other real estate, and repossessed assets. Real estate owned is written down to fair value at its initial recording and continually monitored for changes in fair value. A loan is classified as nonaccrual when, in the opinion of management, there are serious doubts about collectability of interest and principal. Accrual of interest is discontinued on a loan when management believes, after considering economic and business conditions, the borrower's financial condition is such that collection of principal and interest is doubtful. Payments received on nonaccrual loans are applied against principal until doubt about collectability ceases. TDRs are those loans which the Company, for economic or legal reasons related to a borrower's financial difficulties, grants a concession to the borrower that the Company would not otherwise consider. The Company has 29 TDRs with a total balance of \$3.3 million as of June 30, 2014. Nonperforming loans amounted to \$10.5 million, or 2.3% of total loans, and \$12.3 million, or 2.8% of total loans, at June 30, 2014 and December 31, 2013, respectively. A TDR that yields market interest rate at the time of restructuring and is in compliance with its modified terms is no longer reported as TDR in calendar years after the year in which the restructuring took place. To be in compliance with its modified terms, a loan that is a TDR must not be in nonaccrual status and must be current or less than 30 days past due on its contractual principal and interest payments under the modified repayment terms. Nonperforming loans secured by real estate totaled \$9.7 million as of June 30, 2014, down \$1.7 million from \$11.4 million at December 31, 2013.

Asset Quality History

(Dollar amounts in thousands)	6/30/2014	3/31/2014	12/31/2013	9/30/2013	6/30/2013
Nonperforming loans	\$ 10,506	\$ 10,741	\$ 12,290	\$ 13,607	\$ 12,869
Real estate owned	2,392	2,656	2,698	2,719	2,361
Nonperforming assets	12,898	13,397	14,988	16,326	15,230
Allowance for loan and lease losses	7,129	7,015	7,046	7,821	7,749
Ratios					
Nonperforming loans to total loans	2.33 %	2.42 %	2.82 %	3.25 %	3.12 %
Nonperforming assets to total assets	1.93 %	2.00 %	2.32 %	2.48 %	2.32 %
Allowance for loan and lease losses to total loans	1.58 %	1.58 %	1.62 %	1.87 %	1.88 %
Allowance for loan and lease losses to nonperforming loans	67.85 %	65.31 %	57.33 %	57.48 %	60.21 %

A major factor in determining the appropriateness of the allowance for loan and lease losses is the type of collateral which secures the loans. Of the total nonperforming loans at June 30, 2014, 92.6% were secured by real estate. Although this does not insure against all losses, the real estate typically provides for at least partial recovery, even in a distressed-sale and declining-value environment. In response to the performance of the Company's loan portfolio after the Great Recession, additional resources have been allocated to the loan workout process. The Company's objective is to minimize the future loss exposure to the Company.

Deposits. The Company considers various sources when evaluating funding needs, including but not limited to deposits, which are a significant source of funds totaling \$588.8 million or 97.0% of the Company's total funding sources at June 30, 2014. Total deposits increased \$20.0 million or 3.5% at June 30, 2014 from \$568.8 million at December 31, 2013. The increase in deposits is primarily related to the increase in noninterest-bearing demand, time, and interest-bearing demand deposit accounts of \$10.3 million or 12.0%, \$7.6 million or 4.3%, and \$4.6 million or 8.6%, respectively, at June 30, 2014. These increases were partially offset by a decrease in money market accounts of \$3.9 million, or 5.0%, respectively, during the six months ended June 30, 2014.

Borrowed funds. The Company uses short and long-term borrowings as another source of funding used for asset growth and liquidity needs. These borrowings primarily include FHLB advances, junior subordinated debt, short-term borrowings from other banks, federal funds purchased, and repurchase agreements. Short-term borrowings decreased \$3.9 million, or 35.8%, to \$6.9 million as of June 30, 2014. Other borrowings, representing advances from the Federal Home Loan Bank of Cincinnati, declined \$247,000, or 2.1%, for the six months ended June 30, 2014 as a result of scheduled principal payments.

Stockholders' equity. Stockholders' equity increased \$5.7 million, or 10.7%, to \$59.2 million at June 30, 2014 from \$53.5 million at December 31, 2013. This growth was the result of increases in accumulated other comprehensive income ("AOCI") and retained earnings of \$3.1 million, or 138.4%, \$2.3 million, or 8.4%, respectively. The change to AOCI is due to available-for-sale securities fair value adjustments.

RESULTS OF OPERATIONS

General. Net income for the three months ended June 30, 2014, was \$1.6 million, a \$74,000, or 4.4% decrease from the amount earned during the same period in 2013. Diluted earnings per share for the quarter was \$0.79 compared to \$0.83 for the same period in 2013. Net income for the six months ended June 30, 2014, was \$3.4 million, a \$32,000, or 1.0% increase from the amount earned during the same period in 2013. Diluted earnings per share for the quarter was \$1.65 compared to \$1.66 for the same period in 2013.

The Company's annualized return on average assets (ROA) and return on average equity (ROE) for the quarter were 0.96% and 11.58%, respectively, compared with 1.02% and 12.47% for the same period in 2013. The Company's annualized return on average assets (ROA) and return on average equity (ROE) for the six month period were 1.02% and 12.33%, respectively, compared with 1.02% and 12.32% for the same period in 2013.

Net interest income. Net interest income, the primary source of revenue for the Company, is determined by the Company's interest rate spread, which is defined as the difference between income on earning assets and the cost of funds supporting those assets, and the relative amounts of interest-earning assets and interest-bearing liabilities. Management periodically adjusts the mix of assets and liabilities, as well as the rates earned or paid on those assets and liabilities in order to manage and improve net interest income. The level of interest rates and changes in the amount and composition of interest-earning assets and liabilities affect the Company's net interest income. Historically from an interest rate risk perspective, it has been management's goal to maintain a balance between steady net interest income growth and the risks associated with interest rate fluctuations.

Net interest income for the three months ended June 30, 2014 totaled \$5.8 million, an increase of 5.3% from that reported in the comparable period of 2013. The net interest margin was 4.04% for the quarter of 2014, up from the 3.88% reported for the same quarter of 2013. The increase is attributable to lower interest-bearing liability costs, which decreased 24 basis points to 0.80%. Net interest income for the six months ended June 30, 2014 totaled \$11.8 million, an increase of 6.0% from that reported in the comparable period of 2013. The net interest margin was 4.12% for the first half of 2014, up from the 3.90% reported for the same period of 2013. The increase is attributable to lower interest-bearing liability costs, which decreased 25 basis points to 0.81%.

Interest income. Interest income decreased \$28,000, or 0.4%, for the three months ended June 30, 2014, compared to the same period in the prior year. This is attributable to decreases in interest earned on taxable investment securities, partially offset by tax-exempt interest and interest and fees on loans. Interest income decreased \$53,000, or 0.4%, for the six months ended June 30, 2014, compared to the same period in the prior year. This is attributable to decreases in interest earned on taxable investment securities, partially offset by interest and fees on loans.

Interest earned on loans receivable increased \$25,000, or 0.5%, for the three months ended June 30, 2014, compared to the same period in the prior year. This increase is attributable to an increase in the average balance of \$37.2 million, or 9.1% from June 30, 2013, partially offset by a 43 basis point decline in the average yield. Interest earned on loans receivable increased \$147,000, or 1.3%, for the six months ended June 30, 2014, compared to the same period in the prior year. This increase is attributable to an increase in the average balance of \$37.2 million, or 9.1% from June 30, 2013, partially offset by a 39 basis point decline in the average yield.

Interest earned on securities decreased \$60,000, or 4.4%, for the three months ended June 30, 2014, compared to the same period in the prior year. The average balance decreased \$26.7 million, or 14.2% while the 4.24% yield on the investment portfolio was an increase of 51 basis points, from 3.73%, for the same period in the prior year. Interest earned on securities decreased \$203,000, or 7.3%, for the six months ended June 30, 2014, compared to the same period in the prior year. The average balance decreased \$30.2 million, or 15.9% while the 4.26% yield on the investment portfolio was an increase of 50 basis points, from 3.76%, for the same period in the prior year.

Interest expense. Interest expense decreased \$324,000, or 23.9%, for the three months ended June 30, 2014, compared to the same period in the prior year. The decline was mostly attributed to a 24 basis point decline in total interest-bearing liabilities when compared to the same period in the prior year. It was further impacted by a decrease in the average balance of money market deposits of \$4.6 million, or 5.8%, compared to the same period in the prior year. Interest expense decreased \$720,000, or 25.8%, for the six months ended June 30, 2014, compared to the same period in the prior year. The decline was mostly attributed to a 25 basis point decline in total interest-bearing liabilities when compared to the same period in the prior year. It was further impacted by a decrease in the average balance of interest-bearing liabilities of \$10.4 million, or 2.0%, compared to the same period in the prior year.

Interest incurred on deposits, the largest component of the Company's interest-bearing liabilities, declined \$290,000, or 23.8%, for the three months ended June 30, 2014, compared to the same period in the prior year. This decrease was attributed to a decline in the average rate paid on deposits to 0.74% from 0.97% for the same period in the prior year. This improvement was exacerbated by a decrease in the average balance of interest-bearing deposits of \$3.6 million, or 0.7%, to \$501.6 million when compared to \$505.2 million for the same period in the prior year. Interest incurred on deposits declined \$647,000, or 25.7%, for the six months ended June 30, 2014, compared to the same period in the prior year. This decrease was attributed to a decline in the average rate paid on deposits to 0.76% from 1.00% for the same period in the prior year. This improvement was exacerbated by a decrease in the average balance of interest-bearing deposits of \$13.5 million, or 2.7%, to \$495.9 million when compared to \$509.3 million for the same period in the prior year.

Interest incurred on borrowings decreased \$34,000, or 24.6%, for the three months ended June 30, 2014, compared to the same period in the prior year. Interest incurred on borrowings decreased \$73,000, or 27.0%, for the six months ended June 30, 2014, compared to the same period in the prior year.

Provision for loan losses. The provision for loan losses represents the charge to income necessary to adjust the allowance for loan and lease losses to an amount that represents management's assessment of the estimated probable incurred credit losses inherent in the loan portfolio. Each quarter management performs a review of estimated probable incurred credit losses in the loan portfolio. Based on this review, a provision for loan losses of \$120,000 was recorded for the quarter ended June 30, 2014 compared to \$300,000 for the quarter ended June 30, 2013. The provision for loan losses was lower due to decreases in nonperforming loans. Nonperforming loans were \$10.5 million, or 2.3% of total loans at June 30, 2014 compared with \$12.9 million, or 3.1% at June 30, 2013. Net charge-offs were \$6,000 for the quarter ended June 30, 2014 compared with \$283,000 for the quarter ended June 30, 2013. A provision for loan losses of \$300,000 was recorded for the six months ended June 30, 2014 compared to \$613,000 for the same period in June 30, 2013. Net charge-offs were \$217,000 for the six months ended June 30, 2014 compared with \$643,000 for the same period ended June 30, 2013.

Noninterest income. Noninterest income increased \$38,000 for the three months ended June 30, 2014 over the comparable 2013 period. This increase was largely the result of an increase in net investment security gains of \$74,000, partially offset by a decrease in service charges on deposit account of \$42,000, or 8.2%. Noninterest income decreased \$115,000 for the six months ended June 30, 2014 over the comparable 2013 period. This decrease was largely the result of a decline in net investment security gains of \$117,000, or 66.9%, partially offset by an increase in other income of \$58,000, or 14.1%. This change in other income was the result of increases in miscellaneous fees and charges of \$25,000, or 54.5%, and check order fees of \$18,000, or 155.6%.

Noninterest expense. Noninterest expense of \$4.6 million for the second quarter of 2014 was 16.5% or \$650,000 more than the second quarter of 2013. Salaries and benefits and other expense increased \$362,000, or 19.0%, and \$94,000, or 15.8% respectively. These were partially offset by a decrease in Ohio state franchise tax of \$56,000, or 37.6%. Noninterest expense of \$8.8 million for the six months ended June 30, 2014 was 11.0% or \$878,000 more than the same period in 2013. Salaries and benefits and other expense increased \$507,000, or 13.4%, and \$244,000, or 21.5% respectively. These were partially offset by decreases in Ohio state franchise tax of \$127,000, or 41.9%.

Provision for income taxes. The Company recognized \$414,000 in income tax expense, which reflected an effective tax rate of 20.4% for the three months ended June 30, 2014, as compared to \$476,000 with an effective tax rate of 22.0% for the comparable 2013 period. The Company recognized \$913,000 in income tax expense, which reflected an effective tax rate of 21.3% for the six months ended June 30, 2014, as compared to \$958,000 with an effective tax rate of 22.3% for the comparable 2013 period.

CRITICAL ACCOUNTING ESTIMATES

The Company's critical accounting estimates involving the more significant judgments and assumptions used in the preparation of the consolidated financial statements as of June 30, 2014, have remained unchanged from December 31, 2013.

Average Balance Sheet and Yield/Rate Analysis. The following table sets forth, for the periods indicated, information concerning the total dollar amounts of interest income from interest-earning assets and the resultant average yields, the total dollar amounts of interest expense on interest-bearing liabilities and the resultant average costs, net interest income, interest rate spread and the net interest margin earned on average interest-earning assets. For purposes of this table, average balances are calculated using monthly averages and the average loan balances include nonaccrual loans and exclude the allowance for loan and lease losses, and interest income includes accretion of net deferred loan fees. Interest and yields on tax-exempt securities (tax-exempt for federal income tax purposes) are shown on a fully tax-equivalent basis utilizing a federal tax rate of 34%. Yields and rates have been calculated on an annualized basis utilizing monthly interest amounts.

(Dollar amounts in thousands)	For the Three Months Ended June 30,							
	2014				2013			
	Average Balance	Interest	Average Yield/Cost		Average Balance	Interest	Average Yield/Cost	
Interest-earning assets:								
Loans receivable	\$446,478	5,575	5.01	%	\$409,229	\$5,550	5.44	%
Investment securities (3)	161,802	1,309	4.24	%	188,541	1,369	3.73	%
Interest-bearing deposits with other banks	15,727	35	0.89	%	19,120	28	0.59	%
Total interest-earning assets	624,007	6,919	4.45	%	616,890	6,947	4.77	%
Noninterest-earning assets	47,032				44,911			
Total assets	\$671,039				\$661,801			
Interest-bearing liabilities:								
Interest-bearing demand deposits	\$61,224	50	0.33	%	\$61,612	53	0.35	%
Money market deposits	74,675	74	0.40	%	79,253	75	0.38	%
Savings deposits	178,832	141	0.32	%	178,901	151	0.34	%
Certificates of deposit	186,915	664	1.42	%	185,468	940	2.03	%
Borrowings	16,253	104	2.57	%	17,931	138	3.09	%
Total interest-bearing liabilities	517,899	1,033	0.80	%	523,165	1,357	1.04	%
Noninterest-bearing liabilities								
Other liabilities	97,335				84,437			
Stockholders' equity	55,805				54,199			
Total liabilities and stockholders' equity	\$671,039				\$661,801			
Net interest income		\$5,886				\$5,590		
Interest rate spread (1)			3.65	%			3.73	%
Net interest margin (2)			4.04	%			3.88	%
Ratio of average interest-earning assets to average interest-bearing liabilities			120.49	%			117.91	%

(1) Interest rate spread represents the difference between the average yield on interest-earning assets and the average cost of interest-bearing liabilities

(2) Net interest margin represents net interest income as a percentage of average interest-earning assets.

(3) Tax-equivalent adjustments to interest income for tax-exempt securities were \$389 and \$378 for the three months ended June 30 2014 and 2013, respectively.

Analysis of Changes in Net Interest Income. The following table analyzes the changes in interest income and interest expense, between the three month periods ended June 30, 2014 and 2013, in terms of: (1) changes in volume of interest-earning assets and interest-bearing liabilities and (2) changes in yields and rates. The table reflects the extent to which changes in the Company's interest income and interest expense are attributable to changes in rate (change in rate multiplied by prior period volume), changes in volume (changes in volume multiplied by prior period rate) and changes attributable to the combined impact of volume/rate (change in rate multiplied by change in volume). The changes attributable to the combined impact of volume/rate are allocated on a consistent basis between the volume and rate variances. Changes in interest income on securities reflects the changes in interest income on a fully tax-equivalent basis.

LIQUIDITY

Management's objective in managing liquidity is maintaining the ability to continue meeting the cash flow needs of banking customers, such as borrowings or deposit withdrawals, as well as the Company's own financial commitments. The principal sources of liquidity are net income, loan payments, maturing and principal reductions on securities and sales of securities available for sale, federal funds sold and cash and deposits with banks. Along with its liquid assets, the Company has additional sources of liquidity available to ensure that adequate funds are available as needed. These include, but are not limited to, the purchase of federal funds, and the ability to borrow funds under line of credit agreements with correspondent banks and a borrowing agreement with the Federal Home Loan Bank of Cincinnati, Ohio and the adjustment of interest rates to obtain depositors. Management believes the Company has the capital adequacy, profitability and reputation to meet the current and projected needs of its customers.

For the six months ended June 30, 2014, the adjustments to reconcile net income to net cash from operating activities consisted mainly of depreciation and amortization of premises and equipment, the provision for loan losses, net amortization of securities and net changes in other assets and liabilities. For a more detailed illustration of sources and uses of cash, refer to the Condensed Consolidated Statements of Cash Flows.

INFLATION

Substantially all of the Company's assets and liabilities relate to banking activities and are monetary in nature. The consolidated financial statements and related financial data are presented in accordance with U.S. Generally Accepted Accounting Principles ("GAAP"). GAAP currently requires the Company to measure the financial position and results of operations in terms of historical dollars, with the exception of securities available for sale, impaired loans and other real estate loans that are measured at fair value. Changes in the value of money due to rising inflation can cause purchasing power loss.

Management's opinion is that movements in interest rates affect the financial condition and results of operations to a greater degree than changes in the rate of inflation. It should be noted that interest rates and inflation do affect each other, but do not always move in correlation with each other. The Company's ability to match the interest sensitivity of its financial assets to the interest sensitivity of its liabilities in its asset/liability management may tend to minimize the effect of changes in interest rates on the Company's performance.

REGULATORY MATTERS

The Company is subject to the regulatory requirements of the Federal Reserve System as a bank holding company. The affiliate bank is subject to regulations of the Federal Deposit Insurance Corporation (“FDIC”) and the State of Ohio, Division of Financial Institutions.

The Federal Reserve Board and the FDIC have extensive authority to prevent and to remedy unsafe and unsound practices and violations of applicable laws and regulations by institutions and holding companies. The agencies may assess civil money penalties, issue cease-and-desist or removal orders, seek injunctions, and publicly disclose those actions. In addition, the Ohio Division of Financial Institutions possesses enforcement powers to address violations of Ohio banking law by Ohio-chartered banks.

REGULATORY CAPITAL REQUIREMENTS

The Company is subject to regulatory capital requirements administered by federal banking agencies. Capital adequacy guidelines and prompt corrective action regulations involve quantitative measures of assets, liabilities and certain off-balance sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators about components, risk weightings and other factors and the regulators can lower classifications in certain cases. Failure to meet various capital requirements can initiate regulatory action that could have a direct material effect on the company's operations.

The prompt corrective action regulations provide five classifications, including well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized, although these terms are not used to represent overall financial condition. If adequately capitalized, regulatory approval is required to accept brokered deposits. If undercapitalized, capital distributions are limited, as is asset growth and expansion and plans for capital restoration are required.

The following tables illustrate the Company's and Bank's capital ratios:

Item 3. Quantitative and Qualitative Disclosures about Market Risk

ASSET AND LIABILITY MANAGEMENT

The primary objective of the Company's asset and liability management function is to maximize the Company's net interest income while simultaneously maintaining an acceptable level of interest rate risk given the Company's operating environment, capital and liquidity requirements, performance objectives and overall business focus. The principal determinant of the exposure of the Company's earnings to interest rate risk is the timing difference between the re-pricing or maturity of interest-earning assets and the re-pricing or maturity of its interest-bearing liabilities. The Company's asset and liability management policies are designed to decrease interest rate sensitivity primarily by shortening the maturities of interest-earning assets while at the same time extending the maturities of interest-bearing liabilities. The Board of Directors of the Company continues to believe in a strong asset/liability management process in order to insulate the Company from material and prolonged increases in interest rates. Mortgage-backed securities generally increase the quality of the Company's assets by virtue of the insurance or guarantees that back them, are more liquid than individual mortgage loans and may be used to collateralize borrowings or other obligations of the Company.

The Company's Board of Directors has established an Asset and Liability Management Committee consisting of outside directors and senior management. This committee, which meets quarterly, generally monitors various asset and liability management policies and strategies.

Interest Rate Sensitivity Simulation Analysis

The Company utilizes income simulation modeling in measuring its interest rate risk and managing its interest rate sensitivity. The Asset and Liability Management Committee of the Company believes the various rate scenarios of the simulation modeling enables the Company to more accurately evaluate and manage the exposure of interest rate fluctuations on net interest income, the yield curve, various loan and mortgage-backed security prepayments, and deposit decay assumptions.

Earnings simulation modeling and assumptions about the timing and volatility of cash flows are critical in net portfolio equity valuation analysis. Particularly important are the assumptions driving mortgage prepayments and expected attrition of the core deposit portfolios. These assumptions are based on the Company's historical experience and industry standards and are applied consistently across all rate risk measures.

The Company has established the following guidelines for assessing interest rate risk:

Net interest income simulation- Given a 200 basis point parallel gradual increase or decrease in market interest rates, net interest income may not change by more than 10% for a one-year period. Given a 100 basis point parallel gradual decrease in market interest rates, net interest income may not change by more than 8% for a one-year period.

Portfolio equity simulation- Portfolio equity is the net present value of the Company's existing assets and liabilities. Given a 200 basis point immediate and permanent increase in market interest rates, portfolio equity may not correspondingly decrease or increase by more than 20% of stockholders' equity. Given a 100 basis point immediate and permanent decrease in market interest rates, portfolio equity may not correspondingly decrease or increase by more than 10% of stockholders' equity.

The following table presents the simulated impact of a 200 basis point upward or 100 basis point downward shift of market interest rates on net interest income, and the change in portfolio equity. This analysis was done assuming the interest-earning asset and interest-bearing liability levels at June 30, 2014 remained constant. The impact of the market rate movements was developed by simulating the effects of rates changing gradually over a one-year period from the June 30, 2014 levels for net interest income, and portfolio equity. The impact of market rate movements was developed by simulating the effects of an immediate and permanent change in rates at June 30, 2014 for portfolio equity:

Increase	Decrease
