UNITED STATES SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2018

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 0-29923

CUI Global, Inc.

(Exact name of registrant as specified in its charter)

Colorado 84-1463284
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)

20050 SW 112th Avenue

Tualatin, Oregon 97062

(Address of principal executive offices and zip code)

(503) 612-2300

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	Accelerated filer
Non-accelerated filer (Do not check	Smaller reporting company
if a smaller reporting company)	Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Edgar Filing: CUI Global, Inc. - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

YES NO

There were 28,529,606 shares of the registrant's common stock, par value \$0.001 per share, issued and outstanding as of August 6, 2018.

CUI Global, Inc.

Notes to the Condensed Consolidated Financial Statements

(Unaudited)

1. NATURE OF OPERATIONS AND BASIS OF PRESENTATION

Nature of Operations

CUI Global Inc. (CUI Global) is a platform company composed of two segments, the Power and Electromechanical segment and the Energy segment, along with an "Other" category.

The Power and Electromechanical segment consists of the wholly owned subsidiaries: CUI, Inc. (CUI), based in Tualatin, Oregon; CUI Japan, based in Tokyo, Japan; CUI-Canada, based in Toronto, Canada; and the entity holding the corporate building, CUI Properties. All three operating subsidiaries are providers of power and electromechanical components including power supplies, transformers, converters, connectors and industrial controls for Original Equipment Manufacturers (OEMs).

The Power and Electromechanical segment aggregates its product offerings into two categories: **power solutions** - including external and embedded ac-dc power supplies, dc-dc converters and basic digital point of load modules, ICE (Intelligent Control of Energy) products enabled by the VPS patented software system and offering a technology architecture that addresses power and related accessories; and **components** - including connectors, speakers, buzzers, and industrial control solutions including encoders and sensors. These offerings provide a technology architecture that addresses power and related accessories to industries as broadly ranging as telecommunications, consumer electronics, medical and defense.

The Company's Energy segment consists of the Orbital Gas Systems Ltd subsidiary (Orbital-UK) and the Orbital Gas Systems, North America, Inc. subsidiary, collectively referred to as "Orbital." Orbital has developed a portfolio of products, services and resources to offer a diverse range of personalized gas engineering solutions to the gas utilities, power generation, emissions, manufacturing and automotive industries. Its proprietary VE® Technology enhances the capability and speed of our GasPT® Technology. VE Technology provides a superior method of penetrating the gas flow without the associated vortex vibration, thereby making it a "stand-alone" product for thermal sensing (thermowells) and trace-element sampling.

The Other category represents the remaining activities that are not included as part of the other reportable segments and primarily represents corporate activity.

Basis of Presentation

The accompanying interim unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and the rules and regulations of the United States Securities and Exchange Commission for interim financial information, which includes condensed consolidated financial statements. Accordingly, they do not include all the information and notes necessary for a comprehensive presentation of financial position and results of operations and should be read in conjunction with the Company's Annual Report, Form 10-K for the year ended December 31, 2017.

It is management's opinion that all material adjustments (consisting of normal recurring adjustments as well as an adjustment for goodwill impairment) have been made, which are necessary for a fair financial statement presentation. Significant intercompany accounts and transactions have been eliminated in consolidation. The results for the interim period are not necessarily indicative of the results to be expected for the year ending December 31, 2018.

Table of Contents

As a result of the adoption of ASC 606 (Note 2), the following items have been reclassified from the captions in the December 31, 2017 consolidated balance sheet included in our Form 10-K for the year ended December 31, 2017 to the captions in the December 31, 2017 condensed consolidated balance sheet appearing herein:

		Captions in
		December 31, 2017
Captions in December 31,		condensed
2017 consolidated	Reclassified to	consolidated
balance sheet within Form 10-K		balance sheet
		herein
Costs in excess of billings		Contract assets
Billings in excess of costs		Contract liabilities
Unearned revenue		Contract liabilities
Unearned revenue		Refund liabilities

Changes in these accounts as reclassified are reflected on the condensed consolidated statement of cash flows for the six months ended June 30, 2018 and 2017.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates include estimates used to review the Company's goodwill, impairments and estimations of long-lived assets, impairment of prepaid royalties, revenue recognition on cost-to-cost-method type contracts, inventory valuation, warranty reserves, refund liabilities/returns allowances, valuations of non-cash capital stock issuances and the valuation allowance on deferred tax assets. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable in the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Revision

Immaterial revision was made to the condensed consolidated statement of cash flows: for the six months ended June 30, 2017, \$176 thousand was reclassified from effect of exchange rate changes on cash to non-cash unrealized foreign currency gains included as a reconciling item to cash used in operating activities. This change was related primarily to foreign currency gains on intercompany advances to Orbital-UK.

Reclassification

Certain reclassifications have been made to the 2017 condensed consolidated balance sheet and statement of operations in order to conform to the 2018 presentation.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - UPDATE

Our significant accounting policies are detailed in "Note 2 Summary of Significant Accounting Policies" within Item 8 of our Annual Report on Form 10-K for the year ended December 31, 2017 filed with the SEC on March 14, 2018. Significant changes to our accounting policies as a result of adopting Topic 606 are discussed below:

Revenue Recognition

On January 1, 2018, we adopted the new accounting standard ASC 606, "Revenue from Contracts with Customers" and all the related amendments ("new revenue standard"), which supersedes nearly all existing revenue recognition guidance under U.S. GAAP. This guidance includes the required steps to achieve the core principle that a company should recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. The new revenue standard was applied using the modified retrospective method. We recognized the cumulative effect of initially applying the new revenue standard as an adjustment to accumulated deficit as of January 1, 2018. As a result of the adoption of this standard, certain changes have been made to the condensed consolidated balance sheets. We expect the ongoing impact of the adoption of the new standard to primarily affect the timing of revenue recognition. The most significant impact was on Power and Electromechanical segment revenue that was previously recorded as "sell through." This revenue was previously recorded upon the sale by our customers, who are distributors. Under the new accounting guidance, we will record the revenue upon sale to the distributor with an appropriate amount reserved for estimated returns and allowances as the Company recognizes revenue at the time the related performance obligation is satisfied by transferring a promised good or service to its customers. For the Power and Electromechanical segment, their revenue is based upon the transfer of goods and satisfaction of its performance obligations as of a point in time. During the transition this will have the effect of having a certain amount of revenue not recorded as revenue but as part of the cumulative effect of the accounting change. In the Energy segment, for the majority of contracts, revenue will still be measured over time using the cost-to-cost method. The change that most affected the transition adjustment on Energy revenue was the requirement to limit revenue recognition on contracts without an enforceable right to payment for performance completed to date. Revenue on contracts without a specific enforceable right to payment on work performed to date was "clawed back" as part of the Company's transition adjustment. The cumulative effect adjustment recorded as of January 1, 2018 was a net \$1.9 million decrease to accumulated deficit due to a \$2.8 million transition adjustment from the Power and Electromechanical segment partially offset by a \$(0.9) million transition adjustment from the Energy segment, net of deferred tax. See Note 3 for further discussion of our revenue recognition

policies.

9

Table of Contents**3. REVENUE FROM CONTRACTS WITH CUSTOMERS**

On January 1, 2018, we adopted ASC Topic 606 and the related amendments ("ASC 606") using the modified retrospective method applied to those contracts which were not completed as of December 31, 2017. Results for operating periods beginning after January 1, 2018 are presented under ASC 606, while comparative information has not been restated and continues to be reported in accordance with the accounting standards in effect for those periods. See Note 2 for a description of our accounting policy resulting from adoption of ASC 606. We recognized the cumulative effect of initially applying ASC 606 as an adjustment to accumulated deficit in the balance sheet as of January 1, 2018 as follows:

	Balance at December 31, 2017	Adjustments Due to ASC 606	Balance at January 1, 2018
(in thousands)			
<u>Assets</u>			
Inventories	\$13,892	\$ (1,064)) \$12,828

Total liabilities and stockholders' equity	\$81,517	\$83,853	\$(2,336)

The adoption of ASC 606 had no impact on the Company's cash flows from operations.

Power and Electromechanical segment

The Power and Electromechanical segment generates its revenue from two categories of products: **power solutions** - including external and embedded ac-dc power supplies, dc-dc converters and basic digital point of load modules, ICE (Intelligent Control of Energy) products enabled by the VPS patented software system and offering a technology architecture that addresses power and related accessories; and **components** - including connectors, speakers, buzzers, and industrial control solutions including encoders and sensors. These offerings provide a technology architecture that addresses power and related accessories to industries as broadly ranging as telecommunications, consumer electronics, medical and defense. The production and delivery of these products are considered single performance obligations. Revenue is recognized when we satisfy a performance obligation and this occurs upon shipment and ownership transfer of our products to our customers at a point in time.

Energy segment

The Energy segment subsidiaries, collectively referred to as Orbital, generate their revenue from a portfolio of products, services and resources that offer a diverse range of personalized gas engineering solutions to the gas utilities, power generation, emissions, manufacturing and automotive industries.

Orbital accounts for a majority of its contract revenue proportionately over time. For our performance obligations satisfied over time, we recognize revenue by measuring the progress toward complete satisfaction of that performance obligation. The selection of the method to measure progress towards completion can be either an input method or an output method and requires judgment based on the nature of the goods or services to be provided.

Table of Contents

For our construction contracts, revenue is generally recognized over time as our performance creates or enhances an asset that the customer controls. Our fixed price construction projects generally use a cost-to-cost input method to measure our progress towards complete satisfaction of the performance obligation as we believe it best depicts the transfer of control to the customer. Under the cost-to-cost measure of progress, the extent of progress towards completion is measured based on the ratio of costs incurred to date to the total estimated costs at completion of the performance obligation.

The timing of revenue recognition for Energy products also depends on the payment terms of the contract, as our performance does not create an asset with an alternative use to us. For those contracts which we have a right to payment for performance completed to date at all times throughout our performance, inclusive of a cancellation, we recognize revenue over time. As discussed above, these performance obligations use a cost-to-cost input method to measure our progress towards complete satisfaction of the performance obligation as we believe it best depicts the transfer of control to the customer. However, for those contracts for which we do not have a right, at all times, to payment for performance completed to date, we recognize revenue at the point in time when control is transferred to the customer.

For our services contracts, revenue is also generally recognized over time as the customer simultaneously receives and consumes the benefits of our performance as we perform the service. For our fixed price service contracts with specified service periods, revenue is generally recognized on a straight-line basis over such service period when our inputs are expended evenly, and the customer receives and consumes the benefits of our performance throughout the contract term.

For certain of our revenue streams, such as call-out repair and service work, and outage services, that are performed under time and materials contracts, our progress towards complete satisfaction of such performance obligations is measured using an output method as the customer receives and consumes the benefits of our performance completed to date.

Due to uncertainties inherent in the estimation process, it is possible that estimates of costs to complete a performance obligation will be revised in the near-term. For those performance obligations for which revenue is recognized using a cost-to-cost input method, changes in total estimated costs, and related progress towards complete satisfaction of the performance obligation, are recognized on a cumulative catch-up basis in the period in which the revisions to the estimates are made. When the current estimate of total costs for a performance obligation indicate a loss, a provision for the entire estimated loss on the unsatisfied performance obligation is made in the period in which the loss becomes evident.

Product-type contracts (for example, sale of GasPt units) for which revenue does not qualify to be recognized over time are recognized at a point in time. Revenues from warranty and maintenance activities are recognized ratably over the term of the warranty and maintenance period.

Accounts Receivable, Contract Assets and Contract Liabilities

Accounts receivable are recognized in the period when our right to consideration is unconditional. Accounts receivable are recognized net of an allowance for doubtful accounts. A considerable amount of judgment is required in assessing the likelihood of realization of receivables.

The timing of revenue recognition may differ from the timing of invoicing to customers. Contract assets include unbilled amounts from our construction projects when revenue recognized under the cost-to-cost measure of progress exceed the amounts invoiced to our customers, as the amounts cannot be billed under the terms of our contracts. Such amounts are recoverable from our customers based upon various measures of performance, including achievement of certain milestones, completion of specified units or completion of a contract. Also included in contract assets are amounts we seek or will seek to collect from customers or others for errors or changes in contract specifications or design, contract change orders or modifications in dispute or unapproved as to both scope and/or price or other customer-related causes of unanticipated additional contract costs (claims and unapproved change orders). Our contract assets do not include capitalized costs to obtain and fulfill a contract. Contract assets are generally classified as current within the Condensed Consolidated Balance Sheets.

Table of Contents

Contract liabilities from our construction contracts occur when amounts invoiced to our customers exceed revenues recognized under the cost-to-cost measure of progress. Contract liabilities additionally include advanced payments from our customers on certain contracts. Contract liabilities decrease as we recognize revenue from the satisfaction of the related performance obligation and are recorded as either current or long-term, depending upon when we expect to recognize such revenue.

Activity in the current contract liabilities for the six months ended June 30, 2018 was as follows:

In thousands	
Current contract liabilities - January 1, 2018	\$4,661
Long-term contract liabilities - January 1, 2018 ⁽¹⁾	84
Total contract liabilities - January 1, 2018	\$4,745
Total contract liabilities - January 1, 2018	\$4,745

Revenue recognized	(2,391)
Translation	(89)
Total contract liabilities - June 30, 2018	\$4,776
Current contract liabilities - June 30, 2018	\$4,690
Long-term contract liabilities - June 30, 2018 ⁽¹⁾	86
Total contract liabilities - June 30, 2018	\$4,776

⁽¹⁾ Long-term contract liabilities are included in Other long-term liabilities on the Consolidated Balance Sheet.

Refund Liabilities and Corresponding Inventory Adjustment

Refund liabilities primarily represent estimated future new product introduction returns and estimated future scrap returns. Future new product returns are based on a percent of current inventory of newly introduced products held by our distributor customers. The liability for estimated returns of newly introduced product is reversed to revenue as the inventory is sold. Future scrap returns are based on a percentage of total revenues. In addition to the refund liabilities recorded for future returns, the Company also records an adjustment to inventory and corresponding adjustment to cost of revenue for the Company's right to recover products from customers upon settling the refund liability.

Performance Obligations*Remaining Performance Obligations*

Remaining performance obligations, represents the transaction price of firm orders for which work has not been performed and excludes unexercised contract options and potential orders under ordering-type contracts. As of June 30, 2018, the Company's remaining performance obligations are generally expected to be filled within the next 12 months.

Table of Contents

Any quarterly adjustments to net revenues, cost of revenues, and the related impact to operating income are recognized as necessary in the period they become known. These adjustments may result from positive program performance, and may result in an increase in operating income during the performance of individual performance obligations, if we determine we will be successful in mitigating risks surrounding the technical, schedule and cost aspects of those performance obligations. Likewise, these adjustments may result in a decrease in operating income if we determine we will not be successful in mitigating these risks. Changes in estimates of net revenues, cost of revenues and the related impact to operating income are recognized quarterly on a cumulative catch-up basis, which recognizes in the current period the cumulative effect of the changes on current and prior periods based on a performance obligation's percentage of completion. A significant change in one or more of these estimates could affect the profitability of one or more of our performance obligations. For separately priced extended warranty or product maintenance performance obligations, when estimates of total costs to be incurred on the performance obligation exceed total estimates of revenue to be earned, a provision for the entire loss on the performance obligation is recognized in the period the loss is determined.

Performance Obligations Satisfied Over Time

To determine the proper revenue recognition method for contracts for our Energy segment, we evaluate whether a single contract should be accounted for as more than one performance obligation. This evaluation requires significant judgment and the decision to separate the single contract into multiple performance obligations could change the amount of revenue and profit recorded in a given period.

For most of our contracts, the customer contracts with us to provide a significant service of integrating a complex set of tasks and components into a single project or capability (even if that single project results in the delivery of multiple units). Hence, the entire contract is accounted for as one performance obligation. Less commonly, however, we may promise to provide distinct goods or services within a contract in which case we separate the contract into more than one performance obligation. If a contract is separated into more than one performance obligation, we allocate the total transaction price to each performance obligation in an amount based on the estimated relative standalone selling prices of the promised goods or services underlying each performance obligation. We infrequently sell standard products with observable standalone sales. In cases where we do, the observable standalone sales are used to determine the standalone selling price. More frequently, we sell a customized customer specific solution, and in these cases we typically use the expected cost plus a margin approach to estimate the standalone selling price of each performance obligation.

Performance Obligations Satisfied at a Point in Time.

Revenue from goods and services transferred to customers at a single point in time accounted for 87% of revenues for the six-month period ended June 30, 2018. The majority of our revenue recognized at a point in time is in our Power and Electromechanical segment. Revenue on these contracts is recognized when the product is shipped and the customer takes ownership of the product. Determination of ownership and control transfer is determined by shipping terms delineated on the customer purchase orders.

Variable Consideration

The nature of our contracts gives rise to several types of variable consideration, including new product returns and scrap returns allowances primarily in our Power and Electromechanical segment. In rare instances in our Energy segment, we include in our contract estimates, additional revenue for submitted contract modifications or claims against the customer when we believe we have an enforceable right to the modification or claim, the amount can be estimated reliably and its realization is probable. In evaluating these criteria, we consider the contractual/legal basis for the claim, the cause of any additional costs incurred, the reasonableness of those costs and the objective evidence available to support the claim. We include new product introduction and scrap return estimates in our calculation of net revenue when there is a basis to reasonably estimate the amount of the returns. These estimates are based on historical return experience, anticipated returns and our best judgment at the time. Because of our certainty in estimating these amounts, they are included in our calculation of net revenue recorded for our contracts and the associated remaining performance obligations.

Table of Contents

The following table presents our revenues disaggregated by revenue source for the three months ended June 30, 2018:

(in thousands)	Power and Electromechanical	Energy	Total
Distributor sales	\$ 12,161	\$—	\$12,161
Direct Sales	8,159	2,807	10,966

Table of Contents**4. INVENTORIES**

Inventories consist of raw materials, work-in-process and finished goods and are stated at the lower of cost or market using the first-in, first-out (FIFO) method or through the moving average cost method. At June 30, 2018 and December 31, 2017, accrued liabilities included \$1.7 million and \$1.3 million of accrued inventory payable, respectively. At June 30, 2018 and December 31, 2017, inventory by category is valued net of reserves and consists of:

	June 30,	December
(in thousands)	2018	31, 2017
Finished goods	\$8,969	\$ 10,792
Raw materials	3,331	3,287
Work-in-process	3,431	759
Inventory reserves	(1,047)	(946)
Total inventories	\$ 14,684	\$ 13,892

5. PREPAID EXPENSES, DEPOSITS AND OTHER

	June	December
(in thousands)	30, 2018	31, 2017
Prepaid expenses and other	\$1,113	\$ 1,593
Deposits and other assets	\$1,820	\$ 1,865

During the second quarter of 2017, prepaid royalties in the amount of \$1.6 million were transferred to long-term and included in Deposits and other assets from prepaid expenses due to a change in the estimated period of when those prepayments will be amortized based upon management's assessment of future GasPT sales. At June 30, 2018 and December 31, 2017, there were \$1.7 million and \$1.8 million of prepaid royalties included in Deposits and other assets, respectively.

6. GOODWILL AND INDEFINITE-LIVED INTANGIBLES

The Company tests for impairment of indefinite-lived intangibles and Goodwill in the second quarter of each year and when events or circumstances indicate that the carrying amount of Goodwill exceeds its fair value and may not be recoverable. The Company's qualitative assessment of impairment for indefinite-lived assets at May 31, 2018, followed the guidance in ASC 350-30-35-18A and 18B and determined there was no impairment of indefinite-lived intangibles at that time.

Under current accounting guidance, CUI Global is not required to calculate the fair value of a reporting unit unless the entity determines, based on a qualitative assessment, that it is more likely than not that its fair value is less than its carrying amount. The guidance includes a number of factors to consider in conducting the qualitative assessment. The Company tests for goodwill impairment in the second quarter of each year and whenever events or changes in circumstances indicate that the carrying amount of the asset exceeds its fair value and may not be recoverable.

As detailed in ASC 350-20-35-3A, in performing its testing for impairment of goodwill as of May 31, 2018, management completed a qualitative analysis to determine whether it was more likely than not that the fair value of a reporting unit is less than its carrying amount, including goodwill. To complete the qualitative review, management follows the steps in ASC 350-20-35-3C to evaluate the fair values of the goodwill and considers all known events and circumstances that might trigger an impairment of goodwill.

During our review of goodwill as of May 31, 2018, the Company determined that there were indicators present to suggest that it was more likely than not that the fair value of the Orbital-UK reporting unit was less than its carrying amount.

The significant changes for the Orbital-UK reporting unit subsequent to the most recent impairment test performed as of December 31, 2017 included a decline in the 2018 actual revenue, operating income and cash flows compared to prior forecasts for the same period and a negative change in the 2018 forecasted revenue, operating income and cash flows for the remainder of the year due in part to the longer than expected temporary halt in shipping of its GasPT product to a major customer in Italy and market uncertainty due to the continuing effects of Brexit.

To test the Orbital-UK reporting unit for impairment as of May 31, 2018, the Company used a quantitative test. The Company estimated the fair value of the Orbital-UK reporting unit using a blend of a market approach and an income approach, which was deemed to be the most indicative of fair value in an orderly transaction between market participants. Under the income approach, the Company determined fair value based on estimated future cash flows of the Orbital-UK reporting unit discounted by an estimated weighted-average cost of capital, reflecting the overall level of inherent risk of the Orbital-UK reporting unit and the rate of return an outside investor would expect to earn. The Company based its cash flow projections for the Orbital-UK reporting unit using a forecast of cash flows and a terminal value developed by capitalizing an assumed stabilized cash flow figure. The forecast and related assumptions were derived from an updated financial forecast prepared during the second quarter of 2018. Under the market approach, appropriate valuation multiples were derived from the historical operating data of selected guideline companies. The valuation multiples were evaluated and adjusted based on the strengths and weaknesses of the

Company relative to the selected guideline companies and the multiple was then applied to the appropriate operating data of the Company to arrive at an indication of fair market value. As a result of the analysis, the Company concluded that the carrying value of the Orbital-UK reporting unit exceeded its estimated fair value. The quantitative test for the Orbital-UK reporting unit resulted in an impairment for the Orbital-UK reporting unit, and the Company recorded a goodwill impairment charge of \$1.3 million during the second quarter of 2018.

The remaining goodwill related to the Orbital-UK reporting unit as of June 30, 2018 and December 31, 2017 was \$3.2 million and \$4.5 million, respectively, which is included in the Energy segment. As of June 30, 2018, there was also goodwill remaining for CUI Inc., CUI-Canada and CUI-Japan reporting units, which are included in the Power and Electromechanical segment.

Table of Contents

The carrying value of goodwill and the activity for the six months ended June 30, 2018 are as follows:

(in thousands)	Power and			
	Electro -	Energy	Other	Total
	Mechanical			
Balance, December 31, 2017	\$ 13,092	\$4,549	\$	—\$17,641
Currency translation adjustments	(1)	(89)	—	(90)
Goodwill impairment	—	(1,263)	—	(1,263)
Balance, June 30, 2018	\$ 13,091	\$3,197	\$	—\$16,288

7. INVESTMENT AND NOTE RECEIVABLE

During the three months ended March 31, 2016, CUI Global's 8.5% ownership investment in Test Products International, Inc. ("TPI"), recognized under the cost method, was exchanged for a note receivable from TPI of \$0.4 million (\$0.3 million balance at June 30, 2018 and December 31, 2017), which was the carrying value of the investment, earning interest at 5% per annum, due June 30, 2019. The Company recorded \$4 thousand and \$4 thousand of interest income from the note in the three months ended June 30, 2018 and 2017, respectively. The Company recorded \$9 thousand and \$9 thousand of interest income from the note in the six months ended June 30, 2018 and 2017, respectively. The interest receivable is settled on a quarterly basis via a non-cash offset against the finders-fee royalties earned by TPI on GasPT sales. Any remaining finders-fee royalties balance is offset against the note receivable quarterly. The Company also received a \$19 thousand cash payment against the note in the six months ended June 30, 2017. CUI Global reviewed the note receivable for non-collectability as of June 30, 2018 and concluded that no allowance was necessary. For more details on this investment see Note 2 - Summary of Significant Accounting policies to CUI Global's financial statements filed in Item 8 of the Company's latest Form 10-K filed with the SEC on March 14, 2018.

8. DERIVATIVE INSTRUMENTS

The Company uses various derivative instruments including forward currency contracts, and interest rate swaps to manage certain exposures. These instruments are entered into under the Company's corporate risk management policy to minimize exposure and are not for speculative trading purposes. The Company recognizes all derivatives as either assets or liabilities in the condensed consolidated balance sheet and measures those instruments at fair value. Changes in the fair value of derivatives are recognized in earnings. For additional information on fair value of derivatives, see Note 12, "Investments and Fair Value Measurements," of these condensed consolidated financial statements. The Company has limited involvement with derivative instruments and does not trade them. The Company has entered

into one interest rate swap, which has a maturity date of ten years from the date of inception, and is used to minimize the interest rate risk on the variable rate mortgage. During the three and six months ended June 30, 2018, the Company had \$42 thousand and \$126 thousand, respectively of unrealized gain related to the derivative liabilities. During the three and six months ended June 30, 2017, the Company had \$2 thousand and \$35 thousand, respectively of unrealized gain related to the derivative liabilities.

Embedded Derivative Liabilities

The Company evaluates embedded conversion features pursuant to FASB Accounting Standards Codification No. 815 (“FASB ASC 815”), “Derivatives and Hedging,” which requires a periodic valuation of the fair value of derivative instruments and a corresponding recognition of liabilities associated with such derivatives.

9. STOCK-BASED PAYMENTS FOR COMPENSATION, SERVICES AND ROYALTIES

The Company records its stock-based compensation expense under its stock option plans and the Company also issues stock for services and royalties. A detailed description of the awards under these plans and the respective accounting treatment is included in the “Notes to the Consolidated Financial Statements” included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2017 and filed with the SEC on March 14, 2018. The Company did not grant any stock options in the three and six months ended June 30, 2018. For the three and six months ended June 30, 2018, the Company recorded stock-based expense of \$80 thousand and \$146 thousand, respectively and for the three and six months ended June 30, 2017, the Company recorded stock-based expense of \$113 thousand and \$204 thousand, respectively.

Table of Contents**10. SEGMENT REPORTING**

Operating segments are defined in accordance with ASC 280-10 as components of an enterprise for which separate financial information is available that is evaluated regularly by the chief operating decision maker, or decision making group, in deciding how to allocate resources and in assessing performance. The measurement basis of segment profit or loss is income (loss) from operations.

Management has identified six operating segments based on the activities of the Company in accordance with the ASC 280-10. These operating segments have been aggregated into two reportable segments, and an Other category. The two reportable segments are Power and Electromechanical and Energy. The Power and Electromechanical segment is focused on the operations of CUI, CUI-Canada and CUI Japan for the sale of internal and external power supplies, related components and industrial controls. The Power and Electromechanical segment also includes CUI Properties, LLC that owns the Company's Tualatin, Oregon facility. The Energy segment is focused on the operations of Orbital Gas Systems Ltd. and Orbital Gas Systems, North America, Inc. which includes gas related test and measurement systems, including the GasPT. The Other category represents the remaining activities that are not included as part of the other reportable segments and represents primarily corporate activity.

During the three months ended June 30, 2018, the Company's total revenues consisted of 88% from the Power and Electromechanical segment and 12% from the Energy segment. During the three months ended June 30, 2017, the Company's total revenues consisted of 81% from the Power and Electromechanical segment and 19% from the Energy segment. During the six months ended June 30, 2018, the Company's total revenues consisted of 83% from the Power and Electromechanical segment and 17% from the Energy segment. During the six months ended June 30, 2017, the Company's total revenues consisted of 79% from the Power and Electromechanical segment and 21% from the Energy segment.

The following information represents segment activity for the three months ended June 30, 2018 and selected balance sheet items as of June 30, 2018:

11. RECENT ACCOUNTING PRONOUNCEMENTS

See Note 3 - Revenue from Contracts with Customers.

In June 2018, the FASB issued Accounting Standards Update ("ASU") No. 2018-07, Compensation-Stock Compensation (Topic 718): Improvements to Nonemployee Share-Based Payment Accounting ("ASU 2018-07"). These amendments expand the scope of Topic 718, Compensation—Stock Compensation (which currently only includes share-based payments to employees) to include share-based payments issued to nonemployees for goods or services. Consequently, the accounting for share-based payments to nonemployees and employees will be substantially aligned. The guidance will be effective for the fiscal year beginning after December 15, 2018, including interim periods within that year. The Company is currently assessing the impact of this ASU on its consolidated financial statements and will adopt the standard in 2019.

In June 2016, the FASB issued ASU No. 2016-13, *Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments* ("ASU 2016-13"). ASU 2016-13 is intended to provide financial statement users

with more useful information about expected credit losses on financial assets held by a reporting entity at each reporting date. The new standard replaces the existing incurred loss impairment methodology with a methodology that requires consideration of a broader range of reasonable and supportable forward-looking information to estimate all expected credit losses. This ASU is effective for fiscal years and interim periods within those years beginning after December 15, 2019 and early adoption is permitted for fiscal years and interim periods within those years beginning after December 15, 2018. The Company is currently assessing the impact of this ASU on its consolidated financial statements.

Table of Contents

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)* (“ASU 2016-02”). ASU 2016-02 requires lessees to present right-of-use assets and lease liabilities (with the exception of short-term leases) on the balance sheet. The new guidance will be effective for public business entities for fiscal years beginning after December 15, 2018 including interim periods within that fiscal year. We are currently evaluating the impact of the Company’s pending adoption of ASU 2016-02 on the Company’s consolidated financial statements and will adopt the standard in 2019.

12. INVESTMENTS AND FAIR VALUE MEASUREMENTS

The Company’s fair value hierarchy for its cash equivalents, marketable securities and derivative instruments, including contingent consideration, as of June 30, 2018 and December 31, 2017, respectively, was as follows:

(in thousands)

June 30, 2018	Level 1	Level 2	Level 3	Total
Money market securities	\$ 16	\$—	\$ —	\$ 16
Certificates of Deposit	523	—	—	523
Total assets	\$ 539	\$—	\$ —	\$ 539
Derivative instrument payable	\$—	\$ 230	\$ —	\$ 230
Total liabilities	\$—	\$ 230	\$ —	\$ 230

December 31, 2017	Level 1	Level 2	Level 3	Total
Money market securities	\$ 16	\$—	\$ —	\$ 16
Total assets	\$ 16	\$—	\$ —	\$ 16
Derivative instrument payable	\$ —	\$ 356	\$ —	\$ 356
Contingent consideration	—	—	45	45
Total liabilities	\$ —	\$ 356	\$ 45	\$ 401

Fair Value Measurements

Using Significant Unobservable Inputs (Level 3)

(in thousands)	Contingent consideration
Balance at December 31, 2017	\$ 45
Payments	(45)
Fair value adjustments	—
Balance at June 30, 2018	\$ —

There were no transfers between Level 3 and Level 2 in 2018 as determined at the end of the reporting period. The contingent consideration liability is associated with the acquisition of Tectrol in March 2015 and represents the present value of the expected future contingent payment based on revenue projections of select Tectrol legacy products. The inputs used to measure contingent consideration are classified as Level 3 within the valuation hierarchy. The valuation is not supported by market criteria and reflects the Company's internal revenue forecasts. Since the valuation is not supported by market criteria, the valuation is completely dependent on unobservable inputs. During quarterly updates of the valuation, the calculation of the value is based on actual and reasonably estimated future revenues. The final amount of contingent consideration of \$45 thousand was paid out during the six months ended June 30, 2018.

Table of Contents**13. LOSS PER COMMON SHARE**

In accordance with FASB Accounting Standards Codification Topic 260 (“FASB ASC 260”), “Earnings per Share,” basic net loss per share is computed by dividing the net loss available to common stockholders for the period by the weighted average number of common shares outstanding during the period. Diluted net loss per share is computed by dividing net loss available to common stockholders by the weighted average number of diluted shares outstanding during the period calculated using the treasury stock method. Due to the Company’s net loss in the three and six months ended June 30, 2018 and June 30, 2017, the assumed exercise of stock options using the treasury stock method would have had an antidilutive effect and therefore 1.0 million shares related to stock options were excluded from the computation of diluted net loss per share for both the three and six months ended June 30, 2018 and 2017. Accordingly, diluted net loss per share is the same as basic net loss per share for the three and six months ended June 30, 2018 and 2017.

(in thousands, except share and per share amounts)	For the Three		For the Six	
	Months Ended		Months Ended	
	June 30, 2018	2017	June 30, 2018	2017
Net loss	\$ (4,765)	\$ (1,568)	\$ (8,027)	\$ (5,422)
Basic and diluted weighted average number of shares outstanding	28,506,154	20,967,957	28,497,146	20,958,656
Basic and diluted loss per common share	\$ (0.17)	\$ (0.07)	\$ (0.28)	\$ (0.26)

14. CAPITALIZED INTEREST

The cost of constructing facilities, equipment and project assets includes interest costs incurred during the assets’ construction period. The components of interest expense and capitalized interest are as follows:

(in thousands)	For the	For the Six
	Three	Months
	Months	Ended
	Ended	Ended
	June 30,	June 30,

	2018	2017	2018	2017
Interest cost incurred	\$125	\$126	\$246	\$246
Interest cost capitalized - property and equipment and other intangible assets	(1)	(5)	(8)	(9)
Interest expense, net	\$124	\$121	\$238	\$237

15. INCOME TAXES

The Company is subject to taxation in the U.S., as well as various state and foreign jurisdictions. The Company continues to record a full valuation allowance against the Company's U.S. net deferred tax assets as it is not more likely than not that the Company will realize a benefit from these assets in a future period. During the three months ended June 30, 2018, the Company recorded a valuation allowance of \$0.6 million against the Company's foreign UK net deferred tax assets as it is not more likely than not that the Company will realize a benefit from those assets in a future period. In future periods, tax benefits and related deferred tax assets will be recognized when management concludes realization of such amounts is more likely than not.

A net income tax expense (benefit) of \$164 thousand and \$(137) thousand was recorded to the income tax provision for the three and six months ended June 30, 2018, respectively, resulting in an effective tax rate of (3.6)% and 1.7%, respectively. The income tax benefit for the six months ended June 30, 2018 primarily relates to realizable benefits on losses in certain foreign jurisdictions offset by taxes on profitable foreign operations, domestic state minimum taxes and a valuation allowance on the net deferred tax assets of the foreign UK operations. The income tax expense for the three months ended June 30, 2018 primarily consists of taxes on profitable foreign operations, domestic state minimum taxes, and a valuation allowance on the net deferred tax assets of the foreign UK operations. All of our USA and the foreign UK net deferred tax assets were reduced by a valuation allowance.

The Company's total income tax benefit and effective tax rate for the three and six months ended June 30, 2017 was \$157 thousand and \$383 thousand, respectively for resulting in an effective tax rate of 9.1% and 6.6%, respectively. The income tax benefit for the three months and six months ended June 30, 2017 related to realizable benefits on losses in certain foreign jurisdictions offset by taxes on profitable foreign operations and domestic state minimum taxes. All of our USA and the foreign UK deferred tax assets were reduced by a valuation allowance.

Table of Contents**16. WORKING CAPITAL LINE OF CREDIT AND OVERDRAFT FACILITY**

During the period ended June 30, 2018, the Company's wholly owned subsidiary, CUI, Inc., maintained a two-year revolving Line of Credit (LOC) with Wells Fargo Bank with the following terms:

(in thousands)

Credit Limit	June 30, 2018	Expiration Date	Interest rate
Balance	\$ 4,000	\$ 0 ⁽¹⁾	June 1, 2019
			Fixed rate at 2.25% above the LIBOR in effect on the first day of the applicable fixed-rate term, or Variable rate at 2.25% above the daily one-month LIBOR rate.

⁽¹⁾ As a result of the Company's cash management system, checks issued but not presented to the bank for payment may create negative book cash balances. When those checks are presented for payment if there isn't sufficient cash in the bank account, the checks would be honored by the bank with a corresponding increase to CUI's draw on its line of credit. There were no negative book cash balances included in the balance on the line of credit as of June 30, 2018.

The line of credit is secured by the following collateral via a security agreement with CUI Inc. and CUI-Canada at June 30, 2018:

(in thousands)

CUI Inc. and CUI-Canada General intangibles, net	\$8,756
CUI Inc. and CUI-Canada Accounts receivable, net	\$9,741
CUI Inc. and CUI-Canada Inventory, net	\$9,771
CUI Inc. and CUI-Canada Equipment, net	\$1,691

The borrowing base for the line of credit is based on a percent of CUI Inc. and CUI-Canada's inventory plus a percent of CUI Inc.'s accounts receivable.

CUI Global, Inc., the parent company, is a payment guarantor of the LOC. Other terms included in this revolving line of credit for CUI limit capital expenditures by CUI Inc. and CUI-Canada to \$1.75 million in any fiscal year. The LOC is supported by a single long-term note that does not require repayment until maturity although the Company at its option can repay and re-borrow amounts up to the LOC limit. The LOC contains certain financial covenants. The Company was in compliance with the financial covenants as of June 30, 2018. At June 30, 2018, there was a \$0 million balance outstanding on the LOC and \$4.0 million of credit was available.

Table of Contents

On October 5, 2016, Orbital Gas Systems Ltd. signed a five-year agreement with the London branch of Wells Fargo Bank N.A. for a multi-currency variable rate overdraft facility with the following terms:

(in thousands)

Credit Limit	June 30, 2018 Balance	Expiration Date	Interest rate
£1,500 pounds sterling (\$1,980 at June 30, 2018)	\$ 736	October 5, 2021	Base rate plus a 2.25% margin (2.5% as of June 30, 2018)

The London branch of Wells Fargo Bank N.A. can demand repayment of amounts on overdraft at any time. The overdraft facility is primarily secured by land, equipment, intellectual property rights, and rights to potential future insurance proceeds held by Orbital Gas Systems Ltd.

17. ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

The components of accumulated other comprehensive income (loss) are as follows:

(in thousands)	As of June 30, 2018	As of December 31, 2017
Foreign currency translation adjustment	\$(3,892)	\$(3,510)
Accumulated other comprehensive income (loss)	\$(3,892)	\$(3,510)

18. NOTES PAYABLE

Notes payable is summarized as follows:

Edgar Filing: CUI Global, Inc. - Form 10-Q

(in thousands)	As of June 30, 2018	As of December 31, 2017
Mortgage note payable ⁽¹⁾	\$3,303	\$ 3,350
Acquisition Note Payable - related party ⁽²⁾	5,304	5,304
Ending Balance	\$8,607	\$ 8,654

On October 1, 2013, the funding of the purchase of the Company's Tualatin, Oregon corporate offices from Barakel, LLC was completed. The purchase price for this asset was \$5.1 million. The purchase was funded, in part, by a promissory note payable to Wells Fargo Bank in the amount of \$3.7 million plus interest at the rate of 2% above LIBOR, payable over ten years with a balloon payment due at maturity. It was secured by a deed of trust on the ⁽¹⁾purchased property which was executed by CUI Properties, LLC and guaranteed by CUI Global, Inc. During the six months ended June 30, 2018, the Company made principal payments of \$47 thousand against the mortgage promissory note payable. At June 30, 2018, the balance owed on the mortgage promissory note payable was \$3.3 million, of which \$96 thousand and \$3.2 million were in current and long-term liabilities, respectively. See Note 16, Working Capital Line of Credit and Overdraft Facility, for more information on the Company's debt covenants.

The note payable to International Electronic Devices, Inc. (formerly CUI, Inc.) is associated with the acquisition of CUI, Inc. The promissory note is due May 15, 2020 and includes a 5% interest rate per annum, with interest payable ⁽²⁾monthly and the principal due as a balloon payment at maturity. The note contains a contingent conversion feature, such that in the event of default on the note the holder of the note can, at the holder's option, convert the note principal into common stock at \$0.001 per share. As of June 30, 2018, the Company is in compliance with all terms of this promissory note and the conversion feature is not effective.

Table of Contents**19. CONCENTRATIONS**

The Company's major product lines are natural gas infrastructure and high-tech solutions in the Energy segment and power and electromechanical products in the Power and Electromechanical segment. The Company had the following revenue concentrations by customer greater than 10% of consolidated revenue:

For the three months ended June 30, 2018:

Customer	Segment	Percent	
Digi-Key Electronics	Power and Electromechanical	26	%
Future Electronics	Power and Electromechanical	14	%
Total concentrations		40	%

For the three months ended June 30, 2017:

Customer	Segment	Percent	
Digi-Key Electronics	Power and Electromechanical	28	%
Future Electronics	Power and Electromechanical	10	%
Total concentrations		38	%

For the six months ended June 30, 2018:

Customer	Segment	Percent	
Digi-Key Electronics	Power and Electromechanical	26	%
Future Electronics	Power and Electromechanical	13	%
Total concentrations		39	%

For the six months ended June 30, 2017:

Customer	Segment	Percent	
Digi-Key Electronics	Power and Electromechanical	26	%
Total concentrations		26	%

The Company had the following geographic revenue concentrations outside the U.S.A greater than 10% of consolidated revenue:

For the three months ended June 30, 2018:

Country	Percent
None	— %

For the three months ended June 30, 2017:

Country	Percent
United Kingdom	17 %
Total concentrations	17 %

Table of Contents

For the six months ended June 30, 2018:

Country	Percent

Total concentrations	12 %

For the six months ended June 30, 2017:

Country	Percent
United Kingdom	17 %
Total concentrations	17 %

The Company had the following gross trade accounts receivable concentrations by customer greater than 10% of gross trade accounts receivable:

As of June 30, 2018

Customer	Segment	Percent
Digi-Key Electronics	Power and Electromechanical	18 %
Total concentrations		18 %

As of December 31, 2017

Customer	Segment	Percent
GL Industrial Services UK Ltd.	Energy	11 %
Digi-Key Electronics	Power and Electromechanical	10 %
Total concentrations		21 %

The Company had the following geographic concentrations of gross trade accounts receivable outside of the U.S.A greater than 10% of gross trade accounts receivable:

As of June 30, 2018:

Country	Percent
United Kingdom	16 %
Total concentrations	16 %

As of December 31, 2017:

Country	Percent
United Kingdom	28 %
Canada	11 %

Total concentrations 39 %

CUI had one supplier concentration of approximately 10% during the three months ended June 30, 2018. There were no supplier concentrations in the six months ended June 30, 2018. CUI had one supplier concentration of approximately 16% and 13% for the three and six months ended June 30, 2017.

28

Table of Contents**20. OTHER EQUITY TRANSACTIONS**

The following shares issued during 2018 were recorded in expense using the grant-date fair value of the stock:

Date of issuance	Type of issuance	Expense/ Prepaid/ Cash	Stock issuance recipient	Reason for issuance	Total no. of shares	Grant date fair value recorded at issuance (in thousands)	
January and April 2018	Vested restricted common stock	Expense	Four board members	Director compensation	37,336	\$ 100	
January 2018	Common stock	Expense	Employee	Approved bonuses	60,862	163	(1)
Total other equity transactions					98,198	\$ 263	(2)

(1) Bonus was accrued and expensed in 2017.

(2) Total excludes \$18 thousand of stock compensation related to royalties and a stock bonus, which were earned and included in equity but not issued and outstanding as of June 30, 2018.

21. Subsequent Event

During July 2018, CUI Global made an investment of \$0.5 million in a convertible note receivable with Virtual Power Systems (“VPS”) to support the two companies’ continued collaboration and development of industry transforming Software Defined Power technologies.

Table of Contents

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

Important Note about Forward-Looking Statements

The following discussion and analysis should be read in conjunction with the Company’s unaudited condensed consolidated financial statements as of June 30, 2018 and notes thereto included in this document and the audited consolidated financial statements in the Company’s 10-K filing for the period ended December 31, 2017 and the notes thereto. In addition to historical information, the following discussion and other parts of this Form 10-Q contain forward-looking information that involves risks and uncertainties. The Company’s actual results could differ materially from those anticipated by such forward-looking information due to factors discussed elsewhere in this Form 10-Q.

The statements that are not historical constitute “forward-looking statements.” Said forward-looking statements involve risks and uncertainties that may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements, express or implied by such forward-looking statements. These forward-looking statements are identified by their use of such terms and phrases as “expects,” “intends,” “goals,” “estimates,” “projects,” “plans,” “anticipates,” “should,” “future,” “believes,” and “scheduled.”

The variables which may cause differences include, but are not limited to, the following: general economic and business conditions; changes in regulatory environment; competition; success of operating initiatives; operating costs; advertising and promotional efforts; the existence or absence of adverse publicity; changes in business strategy or development plans; the ability to retain management; availability, terms and deployment of capital; business abilities and judgment of personnel; availability of qualified personnel; labor and employment benefit costs; availability and costs of raw materials and supplies; and changes in, or failure to comply with various government regulations. Although the Company believes that the assumptions underlying the forward-looking statements contained herein are reasonable, any of the assumptions could be inaccurate; therefore, there can be no assurance that the forward-looking statements included in this Form 10-Q will prove to be accurate. In light of the significant uncertainties inherent in the forward-looking statements included herein, the inclusion of such information should not be regarded as a representation by the Company or any person that the objectives and expectations of the Company will be achieved.

Overview

CUI Global is a platform company dedicated to maximizing shareholder value through the acquisition and development of innovative companies, products and technologies. Through its subsidiaries, CUI Global has built a diversified portfolio of industry leading technologies that touch many markets.

For the three and six months ended June 30, 2018, CUI Global had consolidated loss from operations of \$4.2 million and \$7.9 million, respectively, compared to consolidated loss from operations in the three and six months ended

June 30, 2017 of \$1.7 million and \$5.7 million, respectively. During the three and six months ended June 30, 2018, CUI Global had consolidated net loss of \$4.8 million and \$8.0 million, respectively, compared to a consolidated net loss in the three and six months ended June 30, 2017 of \$1.6 million and \$5.4 million, respectively. The higher consolidated losses for the three and six months ended June 30, 2018, was the result of lower revenue and gross profit in the Energy segment related to lower overall sales and an impairment of Goodwill in the Energy segment of \$1.3 million. The Energy segment has not experienced the anticipated sales of gas related metering, monitoring and control systems, including GasPts that is forecasted for later this year. Less favorable results in the Energy segment were partially offset by improved revenues and gross profit in the Power and Electromechanical segment for both the three and six month periods due to higher distributor sales volume. On the strength of the Power and Electromechanical distributor revenues, which increased 26% over Q1 distributor revenues, consolidated revenues increased for both the three and six month periods.

Table of Contents

The first six months were remarkable for the continued development of the Power and Electromechanical segment's Intelligent Control of Energy ("ICE") based line of products, utilizing Virtual Power Systems ("VPS") software, successfully receiving UL 9540 certification for our Intelligent Control of Energy (ICE) Block technology and our first order for an ICE Block Data Center Power Utilization Solution Valued at \$2.9 Million.

Results of Operations

The following tables set forth, for the period indicated, certain financial information regarding revenue and costs by segment.

For the three months ended June 30, 2018:

(dollars in thousands)	Power and Electro- mechanical	Percent of Segment Revenues	Energy	Percent of Segment Revenues	Other	Percent of Segment Revenues	Total	Percent of Total Revenues
	\$	%	\$	%	\$	%	\$	%
Total revenues	\$ 20,320	100.0	\$ 2,807	100.0	\$ —	—	\$ 23,127	100.0
Cost of revenue	13,065	64.3	2,427	86.5	—	—	15,492	67.0

Table of ContentsRevenue

(dollars in thousands)

Revenues by Segment or Category	For the Three Months Ended June 30,		\$ Change	%	
	2018	2017		Change	Change
Power and Electromechanical	\$20,320	\$18,180	\$2,140	11.8	%
Energy	2,807	4,320	(1,513)	(35.0)	%
Total revenues	\$23,127	\$22,500	\$627	2.8	%

Revenues by Segment or Category	For the Six Months Ended June 30,		\$ Change	%	
	2018	2017		Change	Change
Power and Electromechanical	\$37,340	\$31,842	\$5,498	17.3	%
Energy	7,753	8,503	(750)	(8.8)	%
Total revenues	\$45,093	\$40,345	\$4,748	11.8	%

The revenues for the three and six months ended June 30, 2018 were higher than the comparable periods due to higher revenues in our Power and Electromechanical segment, partially offset by lower revenues in our Energy segment. Higher revenues in the Power and Electromechanical segment are due to higher sales through our distribution customers while lower Energy segment revenues are associated with the timing of customer project delivery schedules and the continued delay in shipment of GasPTs due to governmental delays in Italy. The increased revenue in the Power and Electromechanical segment related to higher distributor sales while sales to direct customers were only slightly down in both the three and six month periods. Lower revenue in the Energy segment was associated with lower revenue from our UK facility that was partially offset by higher revenue from our Houston facility. Revenue from our UK facility benefited from higher exchange rates in 2018 on the British pound as the pound has rebounded following the initial fall following Brexit.

The customer orders related to the Power and Electromechanical segment are associated with the existing product offering, continued new product introductions, continued sales and marketing programs, new customer engagements, distribution channel sales, and the addition in March 2015 of the products from CUI-Canada. In October 2017, the Company announced its first order for its new power monitoring and switching system (ICE Switch) for data centers that was delivered in the first quarter of 2018. Also in the first quarter of 2018, we received our first order for an ICE Block data center power utilization solution valued at \$2.9 Million.

The Power and Electromechanical segment and Energy segment held backlogs of customer orders of approximately \$26.5 million and \$16.9 million, respectively, as of June 30, 2018. These are both significant increases from December 31, 2017 backlogs of \$20.2 million and \$12.6 million for the Power and Electromechanical and Energy segments, respectively.

Table of ContentsCost of revenues

(dollars in thousands)

Cost of revenues by Segment or Category	For the Three Months Ended June 30,		\$ Change	% Change	
	2018	2017			
Power and Electromechanical	\$13,065	\$11,618	\$1,447	12.5	%
Energy	2,427	2,658	(231)	(8.7))%
Total cost of revenues	\$15,492	\$14,276	\$1,216	8.5	%

Cost of revenues by Segment or Category	For the Six Months Ended June 30,		\$ Change	% Change	
	2018	2017			
Power and Electromechanical	\$24,856	\$20,894	\$3,962	19.0	%
Energy	6,025	5,543	482	8.7	%
Total cost of revenues	\$30,881	\$26,437	\$4,444	16.8	%

For the three months ended June 30, 2018, the cost of revenues as a percentage of revenue increased to 67% from 63% during the prior-year comparative period. For the six months ended June 30, 2018, the cost of revenues as a percent of revenue increased to 69% from 66% during the prior year comparative period. This percentage will vary based upon the power and electromechanical product mix sold, the mix of natural gas systems sold, contract labor necessary to complete gas related projects, the competitive markets in which the Company competes, and foreign exchange rates.

The cost of revenues as a percentage of revenue for the Power and Electromechanical segment for the three and six month period ended June 30, 2018 was 64% and 67%, respectively, compared to 64% and 66%, respectively, during the prior-year comparative period. Cost of revenues as a percentage of revenue increased in the Power and Electromechanical segment primarily as a result of a significant royalty expense paid related to the revenues of the ICE switch recognized in the first quarter of 2018. The royalty rate is higher on the first \$1.4 million of ICE product revenues. The cost of revenues as a percentage of revenue for the Energy segment for the three and six months ended June 30, 2018 was 87% and 78%, respectively, compared to 62% and 65%, in the three and six months ended June 30, 2017. The higher cost percentage in the Energy segment was due to a less favorable product mix during the three and six months ended June 30, 2018 compared to the three and six months ended June 30, 2017 and lower overall sales volumes, which affected the gross profit percentage due to certain fixed costs that do not decrease based on sales volume. As previously noted, the Energy segment was affected by a temporary halt in shipments of higher margin GasPT units to an Italian customer. The Company expects gross margins to improve in late 2018 as a result of the expected resumption of deliveries on the Italian contract as well as increases in integration related products at Orbital-UK.

Selling, General and Administrative Expenses

(dollars in thousands)

Selling, general, and administrative expense by Segment or Category	For the Three Months Ended June 30,		\$ Change	% Change	
	2018	2017			
Power and Electromechanical	\$4,432	\$4,145	\$ 287	6.9	%
Energy	3,582	3,289	293	8.9	%
Other	1,231	1,278	(47)	(3.7)%
Total SG&A	\$9,245	\$8,712	\$ 533	6.1	%

35

Table of Contents

Selling, general, and administrative expense by Segment or Category	For the Six Months Ended June 30,			
	2018	2017	\$ Change	% Change
Power and Electromechanical	\$8,895	\$8,274	\$ 621	7.5 %
Energy	7,057	6,504	553	8.5 %
Other	2,494	2,490	4	0.2 %
Total SG&A	\$18,446	\$17,268	\$ 1,178	6.8 %

Selling, General and Administrative (SG&A) expenses include such items as wages, commissions, consulting, general office expenses, business promotion expenses and costs of being a public company, including legal and accounting fees, insurance and investor relations. SG&A expenses are generally associated with the ongoing activities to reach new customers, promote new product lines including ICE, GasPT, IRIS, VE, and new product introductions.

During the three and six months ended June 30, 2018, SG&A increased \$0.5 million and \$1.2 million, respectively, compared to the prior-year comparative period. These increases in SG&A in the three and six months ended June 30, 2018 were due to increased costs in both the Power and Electromechanical and the Energy segment, primarily due to higher selling expenses on the higher sales in the Power and Electromechanical segment and higher professional fees in the Energy segment in the three and six months ended June 30, 2018 compared to the comparative periods in 2017. Also contributing to the higher SG&A expenses in the Energy segment in the three and six months ended June 30, 2018 were increased marketing expenses related to the World Gas Conference. In addition, higher exchange rates contributed to higher translated costs at Orbital UK in the three and six months ended June 30, 2018 compared to the three and six months ended June 30, 2017.

Depreciation and Amortization

(dollars in thousands)

Depreciation and amortization by Segment or Category	For the Three Months Ended June 30,			
	2018	2017	\$ Change	% Change
Power and Electromechanical	\$376	\$394	\$ (18)	(4.6)%
Energy	397	333	64	19.2 %
Total depreciation and amortization	\$773	\$727	\$ 46	6.3 %

Depreciation and amortization by Segment or Category	For the Six Months Ended June 30,			
	2018	2017	\$ Change	% Change
Power and Electromechanical	\$741	\$775	\$ (34)	(4.4)%
Energy	762	652	110	16.9 %
Total depreciation and amortization	\$1,503	\$1,427	\$ 76	5.3 %

The depreciation and amortization expenses are associated with depreciation on buildings, furniture, equipment, vehicles, and intangible assets over the estimated useful lives of the related assets.

The total depreciation and amortization expense for the three months ended June 30, 2018 and 2017 included \$220 thousand and \$163 thousand, respectively, which was included in cost of revenues. Depreciation and amortization expense for the six months ended June 31, 2018 and 2017 included \$421 thousand and \$312 thousand, respectively, included in cost of revenue. The increase in depreciation and amortization included in cost of sales was due to increased allocation of depreciation and amortization to cost of revenues at CUI Inc. and CUI-Canada.

Table of Contents

Depreciation and amortization expense in the three and six months ended June 30, 2018 were up slightly compared to the three and six months ended June 30, 2017 as a result of higher translated depreciation and amortization at our U.K. operation due to higher pound Sterling translation rates during the current periods.

Research and Development

(dollars in thousands)

Research and development by Segment or Category	For the Three Months Ended June 30,			
	2018	2017	\$ Change	% Change
Power and Electromechanical	\$745	\$573	\$ 172	30.0 %
Energy	38	41	(3)	(7.3)%
Total research and development	\$783	\$614	\$ 169	27.5 %

Research and development by Segment or Category	For the Six Months Ended June 30,			
	2018	2017	\$ Change	% Change
Power and Electromechanical	\$1,333	\$1,146	\$ 187	16.3 %
Energy	70	78	(8)	(10.3)%
Total research and development	\$1,403	\$1,224	\$ 179	14.6 %

Research and development costs are associated with the continued research and development of new and existing technologies including advanced power technologies, ICE, GasPT, VE Technology and other products. Research and development expense was relatively flat in the Energy segment and up in the Power and Electromechanical segment for the three and six months ended June 30, 2018 compared to the three and six months ended June 30, 2017.

Research and development activities were primarily focused on the ICE technology in Power and Electromechanical Segment and GasPT and VE technologies in the Energy segment.

Impairment Loss

As of May 31, 2018, management performed its annual assessment of goodwill impairment which resulted in a \$1.3 million impairment. See Note 6 Goodwill and Indefinite-lived Intangibles for more information on the impairment loss.

Provision (Credit) for Bad Debt

(dollars in thousands)

Provision (credit) for bad debt by Segment or Category	For the Three Months Ended June 30,			
	2018	2017	\$ Change	% Change
Power and Electromechanical	\$(40)	\$(20)	\$ (20)	100.0 %
Energy	—	(3)	3	(100.0)%
Total provision (credit) for bad debt	\$(40)	\$(23)	\$ (17)	73.9 %

Provision (credit) for bad debt by Segment or Category	For the Six Months Ended June 30,			
	2018	2017	\$ Change	% Change
Power and Electromechanical	\$(35)	\$(33)	\$ (2)	6.1 %
Energy	1	(18)	19	(105.6)%
Total provision (credit) for bad debt	\$(34)	\$(51)	\$ 17	(33.3)%

The changes in bad debt are due to normal fluctuations in bad debt reserves based on the age of receivables. Collections are strong across all businesses in the three and six months ended June 30, 2018.

Table of ContentsOther Income (Expense)

Other income (expense) consisted of the following items:

(dollars in thousands)

Other Income (Expense)	For the Three Months Ended June 30,		\$ Change	% Change
	2018	2017		
Foreign exchange gain (loss)	\$ (368)	\$ 31	\$ (399)	(1,287.1)%
Interest income	7	5	2	40.0 %
Unrealized gain on derivative	42	2	40	2,000.0 %
Other, net	11	8	3	37.5 %
Total Other income (expense)	\$ (308)	\$ 46	\$ (354)	(769.6)%

Other Income (Expense)	For the Six Months Ended June 30,		\$ Change	% Change
	2018	2017		
Foreign exchange gain (loss)	\$ (138)	\$ 33	\$ (171)	(518.2)%
Interest income	12	10	2	20.0 %
Unrealized gain on derivative	126	35	91	260.0 %
Other, net	22	14	8	57.1 %
Total Other income (expense)	\$ 22	\$ 92	\$ (70)	(76.1)%

Other income (expense) changes were due primarily to interest rate and exchange rate fluctuations in the three and six months ended June 30, 2018.

Interest Expense

For both the three months ended June 30, 2018 and 2017, the Company incurred interest expense, net of amounts capitalized, of \$0.1 million.

For both the six months ended June 30, 2018 and 2017, the Company incurred interest expense, net of amounts capitalized, of \$0.2 million.

Interest expense in 2018 and 2017 is associated with interest on the line of credit, bank overdraft facility, bank and secured promissory notes.

Income Tax Expense (Benefit)

The Company is subject to taxation in the U.S., various state and foreign jurisdictions. We continue to record a full valuation allowance against the Company's U.S. net deferred tax assets as it is not more likely than not that the Company will realize a benefit from these assets in a future period. During the three months ended June 30, 2018, the Company also recorded a valuation allowance of \$0.6 million against the Company's foreign UK net deferred tax assets as it is not more likely than not that the Company will realize a benefit from these assets in a future period. In future periods, tax benefits and related deferred tax assets will be recognized when management concludes realization of such amounts is more likely than not.

For additional analysis, see Note 15, "Income Taxes," of the condensed consolidated financial statements in Part I - Item I, "Financial Statements."

Table of Contents

Liquidity and Capital Resources

General

As of June 30, 2018, the Company held Cash and cash equivalents of \$7.8 million including \$0.5 million of restricted cash. Operations, investments, patents and equipment have been funded through cash on hand and debt. Trade accounts receivable and accounts payable increased since December 31, 2017 due to an increased volume of business in the Power and Electromechanical segment. Inventories increased due to the increased volume of business in the Power and Electromechanical segment and the ASC 606 revenue recognition transition, in the Energy segment offset by the ASC 606 revenue recognition transition in the Power and Electromechanical segment.

Cash Used In Operations

Cash used in operations of \$4.7 million was a \$1.5 million increase in cash used compared to the comparable period in 2017. The six months ended June 30, 2018 were benefited from higher revenue and the related gross profits in the Power and Electromechanical segment. In the first six months of 2018, cash used in operations by the Energy segment was approximately \$4.7 million, and cash used in operations by the Other category was approximately \$2.5 million. These uses of cash were partially offset by cash provided by operating activities in the Power and Electromechanical segment of approximately \$2.5 million. We believe cash from operations will improve in the Energy segment in the second half of 2018 due to the expected resumption of deliveries on our Italy contract and expected increases in revenue from other integration-related products including biomethane to grid solutions. The Power and Electromechanical segment is expected to continue to provide cash from operations and we believe the cash usage rate in the other category to be flat to slightly lower due to cost cutting initiatives put in place over the last year.

The change in cash used in operating activities, exclusive of net loss, is primarily the result of increased trade receivables of \$1.6 million and an increase to inventories of \$2.2 million offset by increased payables and accrued expenses of \$1.7 million and \$1.1 million, respectively, the \$0.7 million cash effect of a decrease in contract assets, and the \$0.6 million and \$0.1 million cash effect from an increase in refund liabilities and contract liabilities, respectively, for the six months ended June 30, 2018.

During the first six months of 2018 and 2017, the Company used stock as a form of payment to certain employees, vendors and consultants. For the six months ended June 30, 2018 and 2017, the Company recorded a total of \$146 thousand and \$204 thousand, respectively for share-based compensation related to equity given, or to be given to employees and consultants for services provided and as payment for royalties earned. The decrease in expense was due to lower accrued share-based bonuses.

S-3 registration

The Company filed an S-3 registration statement on March 14, 2017 containing a prospectus that was effective March 29, 2017. With this filing, CUI Global may from time to time issue various types of securities, including common stock, preferred stock, debt securities and/or warrants, up to an aggregate amount of \$100 million.

On October 23, 2017, the Company closed on an underwritten public offering of 7,392,856 shares at a public offering price of \$2.80 per share, including 964,285 shares sold at the public offering price pursuant to the underwriter's exercise in full of its option to purchase additional shares to cover over-allotments. The net proceeds to CUI Global (after deducting underwriting discount and other expenses payable by the Company) were approximately \$18.9 million. The Company has used and intends to continue to use the net proceeds from the offering primarily for general corporate purposes, which includes operating expenses, working capital to improve and promote its commercially available products, advance product candidates, future acquisitions or share repurchases, to expand international presence and commercialization, research and development, for general capital expenditures and for satisfaction of debt obligations. In 2017, the Company used some of the proceeds of the public offering to pay off its line of credit and overdraft facility.

As the Company focuses on strategic acquisitions, technology development, product line additions, developing CUI-Canada operations, and developing Orbital Gas Systems, North America, Inc., it will fund these activities together with related sales and marketing efforts for its various product offerings with cash on hand, including proceeds from the October 2017 issuances through the S-3 registration statement, and available debt.

CUI Global may raise additional capital needed to fund the further development and marketing of its products as well as payment of its debt obligations.

See the section entitled Recent Sales of Unregistered Securities for a complete listing of all unregistered securities transactions.

Table of Contents

Capital Expenditures and Investments

During the first six months of 2018 and 2017, CUI Global invested \$0.5 million and \$0.5 million, respectively, in property and equipment. These investments typically include additions to equipment, tooling for manufacturing, furniture, computer equipment, buildings and leasehold improvements and other fixed assets as needed for operations. The Company anticipates further investment in property and equipment during the remainder of 2018 in support of its on-going business and continued development of product lines and technologies.

During the six months ended June 30, 2018 and 2017, CUI Global invested \$0.3 million and \$0.3 million, respectively, in other intangible assets. These investments typically include product certifications, capitalized website development, software for engineering and research and development and software upgrades for office personnel.

Financing Activities

For the six months ended June 30, 2018 and 2017, the Company recorded net proceeds of \$0 and \$1.1 million, respectively, from the line of credit; recorded net proceeds of \$0.8 million and \$0, respectively, from the overdraft facility in the U.K. and made payments of \$2 thousand and \$25 thousand, respectively, toward capital lease obligations; \$47 thousand and \$45 thousand, respectively, toward the mortgage note payable; and \$45 thousand and \$61 thousand, respectively, toward the contingent liability related to the Tectrol, Inc. acquisition.

As a result of the Company's cash management system at CUI, checks issued but not presented to the bank for payment may create a negative book cash balance. Such a negative balance would be included in the Company's two-year revolving line of credit (LOC). There was not a negative book cash balance as of June 30, 2018. At June 30, 2018, the Company did not have a balance on its \$4.0 million LOC. There was a \$0.7 million balance on the Company's Overdraft facility at Orbital UK at June 30, 2018 and \$1.3 million available on the facility.

CUI Global may raise additional capital needed to fund the further development and marketing of its products as well as payment of its debt obligations.

Financing activities – related party activity

For the six months ended June 30, 2018 and 2017, \$0.1 million of interest payments were made in relation to the promissory note issued to related party, IED, Inc.

Recap of Liquidity and Capital Resources

The Wells Fargo mortgage promissory note has a balance at June 30, 2018 of \$3.3 million, of which \$96 thousand is the current portion. Additionally, at June 30, 2018, the Company did not have a balance on its \$4.0 million LOC with Wells Fargo Bank. The LOC contains certain financial covenants, all of which the Company was in compliance with at June 30, 2018 and December 31, 2017. CUI Global, Inc., the parent company, is a payment guarantor of the LOC.

On October 5, 2016, Orbital Gas Systems Ltd. signed a five-year agreement with the London branch of Wells Fargo Bank N.A. for a multi-currency variable rate overdraft facility with a facility limit of £1.5 million pounds sterling (\$2.0 million at June 30, 2018) that expires on October 5, 2021. The balance at June 30, 2018 was \$0.7 million.

At June 30, 2018, the Company had unrestricted cash and cash equivalents balances of \$7.3 million. In addition, the Company had \$0.5 million of restricted cash related to a contract guarantee. At June 30, 2018, the Company had \$0.8 million of cash and cash equivalents balances at domestic financial institutions that were covered under the FDIC insured deposits programs and \$20 thousand and \$76 thousand, respectively, at foreign financial institutions covered under the United Kingdom Financial Services Compensation (FSC) and the Canada Deposit Insurance Corporation (CDIC). The money market balance of \$16 thousand is covered under the SIPC insured program for investments up to a maximum of \$500,000. At June 30, 2018, the Company had cash and cash equivalents of \$0.2 million in Japanese bank accounts, \$20 thousand in European bank accounts and \$79 thousand in Canadian bank accounts.

As described in Item 1A - Risk factors included in the Company's 2017 10-K, the United Kingdom's proposed withdrawal from the European Union could have an adverse effect on our business and financial results but the extent of the effect, if any, is not yet determinable. See Item 1A - Risk factors in our 2017 10-K, for more information on the potential risks that are associated with the United Kingdom's pending withdrawal from the European Union.

Table of Contents

The Company expects the revenues from its Power and Electromechanical and Energy Segments, cash on hand, and cash available from the line of credit (expires June 1, 2019 - renewal is expected during the second half of 2018) and overdraft facility, which is a demand note, to cover operating and other expenses for the next twelve months of operations. However, in the short-term, the Company expects its Orbital operation in Houston to continue to need cash support as it continues to grow revenues and expand its operations. The CUI-Canada operation in the Power and Electromechanical segment acquired in 2015 will also continue to be near break even in the short-term. If revenues and other funds are not sufficient to cover all operating and other expenses, additional funding may be required. There is no assurance the Company will be able to raise such additional capital. The failure to raise capital or generate product sales in the expected time frame would have a material adverse effect on the Company.

Critical Accounting Policies

We have adopted various accounting policies to prepare the consolidated financial statements in accordance with GAAP. Certain of our accounting policies require the application of significant judgment by management in selecting the appropriate assumptions for calculating financial estimates. In our 2017 Annual Report on Form 10-K filed on March 14, 2018, we identified the critical accounting policies that affect our more significant estimates and assumptions used in preparing our consolidated financial statements. Significant changes to our critical accounting estimates as a result of adopting ASC 606 are discussed below:

Revenue Recognition

ASC 606 requires significant estimates as it relates to the timing of revenue recognition, particularly in the Power and Electromechanical segment. The most significant affect was on revenue recorded at distributors that was recorded as “sell through” under prior accounting guidance.

Certain distributor revenue under the previous revenue guidance was deferred until the inventory was sold by the distributor to the end customer. Current guidance requires management to recognize revenues when promised goods or services are transferred to customers in an amount that reflects the consideration to which an entity expects to be entitled for those goods or services. This generally requires management to record revenue sooner than under the previous standard and requires more extensive estimates and reserves on current sales.

Under ASC 606, we record revenue upon sale to the distributor with an appropriate amount reserved for estimated returns and allowances. This is a significant estimate as it relates to the timing of revenue recognition.

In the Energy segment, for the majority of contracts, revenue will still be measured over time using the cost-to-cost method. The change that most affected the transition adjustment on Energy revenue was the requirement to limit

revenue recognition on contracts without an enforceable right to payment for performance completed to date. Revenue on contracts without a specific enforceable right to payment on work performed to date was "clawed back" as part of the Company's transition adjustment. On future contracts, the Company will make efforts to include an enforceable right to payment on work performed to date so the ongoing effect on the timing of revenue in the Energy segment will be limited.

During the transition, a certain amount of revenue will not be recorded as revenue but as part of the cumulative effect of the accounting change. The cumulative effect adjustment recorded as of January 1, 2018 was a net \$1.9 million decrease to accumulated deficit due to a \$2.8 million transition adjustment from the Power and Electromechanical segment partially offset by a \$(0.9) million transition adjustment from the Energy segment.

Recent Accounting Pronouncements

See Note 11 Recent Accounting Pronouncements of the condensed consolidated financial statements in Part I—Item I, "Financial Statements" for a description of recent accounting pronouncements, including the dates of adoption and estimated effects on financial position, results of operations and cash flows.

Off-Balance Sheet Arrangements

As of June 30, 2018, the Company had no off-balance sheet arrangements.

Table of Contents

Item 3. Quantitative and Qualitative Disclosure about Market Risk.

The Company is exposed to market risk in the ordinary course of business. Market risk represents the risk of loss that may impact the Company's financial position due to adverse changes in financial market prices and rates. This market risk exposure is primarily a result of fluctuations in foreign currency exchange rates and interest rates. The Company neither holds nor issues financial instruments for trading purposes.

The following sections provide quantitative information on the Company's exposure to foreign currency exchange rate risk. The Company makes use of sensitivity analyses that are inherently limited in estimating actual losses in fair value that can occur from changes in market conditions.

Foreign Currency Exchange Rates

The Company conducts operations in four principal currencies: the U.S. dollar, the British pound sterling, the Canadian dollar and the Japanese yen. These currencies operate primarily as the functional currency for the Company's U.S., U.K., Canadian and Japanese operations, respectively. Cash is managed centrally within each of the four regions.

Because of fluctuations in currency exchange rates, the Company is subject to currency translation exposure on the results of its operations. Foreign currency translation risk is the risk that exchange rate gains or losses arise from translating foreign entities' statements of earnings and balance sheets from functional currency to the Company's reporting currency, the U.S. dollar, for consolidation purposes. As currency exchange rates fluctuate, translation of the Company's statements of operations into U.S. dollars affects the comparability of revenues and operating expenses between years.

Revenues and operating expenses are primarily denominated in the currencies of the countries in which the Company's operations are located, the U.S., U.K., Canada and Japan. The Company's consolidated results of operations and cash flows are, therefore, subject to fluctuations due to changes in foreign currency exchange rates and may be adversely affected in the future due to changes in foreign exchange rates.

The table below details the percentage of revenues and expenses by the four principal currencies for the three and six months ended June 30, 2018 and 2017:

Canadian Japanese

Edgar Filing: CUI Global, Inc. - Form 10-Q

	U.S. Dollar		British Pound Sterling		Dollar		Yen	
For the Three Months Ended June 30, 2018								
Revenues	89	%	9	%	—	%	2	%
Operating expenses	58	%	33	%	8	%	1	%
For the Three Months Ended June 30, 2017

Table of Contents

To date, the Company has not entered into any hedging arrangements with respect to foreign currency risk and have limited activity with forward foreign currency contracts or other similar derivative instruments. We believe that during the six months ended June 30, 2018, the effect of a hypothetical 100 basis point shift in foreign currency exchange rates applicable to the Company's business would not have had a material impact on the Company's condensed consolidated financial statements.

Investment Risk

The Company has an Investment Policy that, among other things, provides an internal control structure that takes into consideration safety (credit risk and interest rate risk), liquidity and yield. The Company's investment officers, CEO and CFO, oversee the investment portfolio and compile a quarterly analysis of the investment portfolio, if any investments exist during the period.

Investments made by the Company are subject to an investment policy, which limits the Company's risk of loss exposure by setting appropriate credit quality requirements for investments held, limiting maturities to be 1 year or less, and also setting appropriate concentration levels to prevent concentrations. This includes a requirement that no more than 3% of the portfolio, or \$0.5 million, whichever is greater, may be invested in one particular issue.

Cash and cash equivalents are diversified and maintained with several financial institutions. Deposits held with banks may exceed the amount of insurance provided on such deposits. Generally, these deposits may be redeemed upon demand and are maintained with financial institutions of reputable credit, therefore, bear minimal credit risk.

The Company has trade receivable and revenues concentrations with large customers. Additionally, the Company has a large concentration of cash, trade receivables and revenues in foreign countries including the United Kingdom, Canada and Japan.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

The Company's management, with the participation of the Company's Chief Executive Officer (CEO) and its Chief Financial Officer (CFO), evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this quarterly report. In designing and evaluating the Company's disclosure controls and procedures, the Company's management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and the Company's management is required to apply their judgment in

evaluating the cost-benefit relationship of possible controls and procedures. Based upon that evaluation, the Company's management, including the CEO and the CFO, concluded that, as of June 30, 2018, the Company's disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed in the reports that the Company files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the applicable rules and forms, and that it is accumulated and communicated to management, including the CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There were no significant changes in the Company's internal control over financial reporting during the three months ended June 30, 2018, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings.

CUI Global, Inc. and its subsidiaries are not a party in any legal proceedings where they are a defendant. No director, officer or affiliate of CUI Global, Inc., any owner of record or beneficially of more than five percent of any class of voting securities of CUI Global, Inc. or any associate of any such director, officer, affiliate of CUI Global, Inc. or security holder is a party adverse to CUI Global, Inc. or any of its subsidiaries or has a material interest adverse to CUI Global, Inc. or any of its subsidiaries.

Table of Contents**Item 1A. Risk Factors.**

There are no material changes from Risk Factors as previously disclosed in the Company's Form 10-K filed with the Commission on March 14, 2018.
