Prospectus Summary

Prospective investors are urged to read this prospectus in its entirety.

As used in this prospectus, references to the “Company,” “we,” “our,” “us” or “Berkshire Homes” refer to Berkshire Homes, Inc., unless the context otherwise indicates.

The following summary highlights selected information contained in this prospectus. Before making an investment decision, you should read the entire prospectus carefully, including the “Risk Factors” section, the financial statements and the notes to the financial statements.

Berkshire Homes, Inc. was founded in the State of Nevada on June 2, 2010 under the name “Indigo International, Corp.” From inception to November 16, 2012, We operated a consulting business in commercial cultivation of white mushrooms (*agaricus bisporus*). Effective November 16, 2012, Odelio Arouca resigned as our Chief Executive Officer, Chief Financial Officer, Secretary and Treasurer and Llorin Kylo was appointed as our President, Chief Executive Officer, Chief Financial Officer, Secretary and Treasurer. Additionally, on November 16, 2012, Mr. Kylo was appointed to our Board of Directors. Immediately upon Mr. Kylo’s appointment to the Board of Directors, Mr. Odelio resigned from his position as a director. The Company now has a new business model, which is to acquire and rehabilitate distressed residential real estate in the United States. Distressed residential real estate is property that is under a foreclosure order or is advertised for sale by its mortgagee. Distressed property can sometimes be purchased at below market value. Our model is to acquire properties at below market value, rehabilitate them, and then sell or lease (rent) them, depending on which approach will generate the highest return. On December 4, 2012, in connection with the change in management and our new business direction, as further described herein, our majority shareholder and our board of directors approved an amendment to our Articles of Incorporation for the purpose of changing our name to “Berkshire Homes, Inc.” We are a development stage company and cannot state with certainty whether we will achieve profitability. We have limited revenues, have minimal assets and have incurred losses since inception.

We may need to raise additional capital in order for our business plan to succeed through the sale of additional shares of common stock or debt financing. There is no assurance that any additional financing will be available or if available, on terms that will be acceptable to us. Failure to raise additional financing will cause us to go out of business.

There have been no material reclassifications, mergers, consolidations or purchases or sales of any significant amount of assets not in the ordinary course of business since the date of incorporation. We are a start-up, development stage company and have generated minimal revenues. We cannot guarantee that we will be successful in our business operations. Our business is subject to risks inherent in the establishment of a new business enterprise, including limited capital resources and possible cost overruns, such as increases in inventory, shipping, and marketing costs,

increases in administration expenditures associated with daily operations, increases in accounting and audit fees, increases in legal fees related to filings and regulatory compliance and increases in travel expenditures. We may, from time to time, re-evaluate our business plan relative to our capital requirements and ongoing commitments and expenditures.

Our auditors have issued a going concern opinion and have substantial doubt that we can continue as an ongoing business for the next twelve months.

We were incorporated on June 2, 2010 under the laws of the state of Nevada. Our principal office is located at 2375 East Camelback Road, Suite 600, Phoenix, AZ 85016. Our telephone number is 602-387-5393. Our fiscal year end is November 30.

Risk Factors related to our Business and Industry

An investment in our common stock involves a high degree of risk. You should carefully consider the risks described below and the other information in this prospectus before investing in our common stock. If any of the following risks occur, our business, operating results and financial condition could be seriously harmed, the trading price of our common stock could decline and you may lose all or part of your investment.

Our business and financial results are affected by local real estate conditions in areas where we own properties.

We may be affected adversely by general economic conditions and local real estate conditions. For example, an oversupply of residential properties in a local area or a decline in the attractiveness of our properties to buyers and potential buyers would have a negative effect on us.

Other factors that may affect general economic conditions or local real estate conditions include:

- population and demographic trends;
- employment and personal income trends;
- zoning, use and other regulatory restrictions;
- income tax laws;
- changes in interest rates and availability and costs of financing;
- competition from other available real estate;
- increased operating costs, including insurance premiums, utilities and real estate taxes, which may not be offset by increased real estate prices.

We may be unable to compete with our larger competitors and other alternatives available to tenants or potential tenants of our properties.

The real estate business is highly competitive. We compete for properties with other real estate investors and purchasers, including other real estate investment trusts, limited partnerships, syndications and private investors, many of whom have greater financial resources, revenues and geographical diversity than we have. We also compete with a wide variety of institutions and other investors for capital funds necessary to support our investment activities and asset growth. To the extent that we are unable to effectively compete in the marketplace, our business may be adversely affected.

We are subject to significant regulation that inhibits our activities and may increase our costs.

Local zoning and use laws, environmental statutes and other governmental requirements may restrict expansion, rehabilitation and reconstruction activities. These regulations may prevent us from taking advantage of economic opportunities. Legislation such as the Americans with Disabilities Act may require us to modify our properties at a substantial cost and noncompliance could result in the imposition of fines or an award of damages to private litigants. Future legislation may impose additional requirements. We may incur additional costs to comply with any future requirements.

Because our auditors have issued a going concern opinion, there is substantial uncertainty that we will continue operations in which case you could lose your investment.

Our auditors have issued a going concern opinion. This means that there is substantial doubt that we can continue as an ongoing business for the next twelve months. The financial statements do not include any adjustments that might result from the uncertainty about our ability to continue in business. As such we may have to cease operations and you could lose your investment.

If we do not obtain additional financing, our business will fail.

While on November 30, 2011, we had no cash on hand and prepaid expenses of \$7,338, we have accumulated a deficit of \$532,034 in business development and administrative expenses. Our current cash reserves are not sufficient to meet our obligations for the next twelve-month period. We anticipate that the minimum additional capital necessary to fund our planned operations for the 12-month period will be approximately \$500,000 and will be needed for general administrative expenses, business development, marketing costs, support materials and costs associated with being a publicly reporting company. We have generated some revenue from operations to date. In order to expand our business operations, we anticipate that we will have to raise additional funding. If we are not able to raise the capital necessary to fund our business expansion objectives, we may have to delay the implementation of our business plan.

We raised \$200,000 in January and February of 2012 by selling two promissory notes, in the principal amount of \$100,000 each with interest calculated at the rate of sixteen (16%) per cent per annum from the date of advance to the date of payment. Both promissory notes are unsecured and payable on demand. We do not currently have further arrangements for financing. Obtaining additional funding will be subject to a number of factors, including general market conditions, investor acceptance of our business plan and initial results from our business operations. These factors may impact the timing, amount, terms or conditions of additional financing available to us.

The most likely source of future funds available to us is through the sale of additional shares of common stock or debt financing.

There is no assurance that any additional financing will be available or if available, on terms that will be acceptable to us. Failure to raise additional financing will cause us to go out of business. If this happens, you could lose all or part of your investment.

We have a very limited history of operations and there is no assurance our future operations will result in revenues or profitability. If we cannot generate sufficient revenues to operate profitably, we may suspend or cease operations.

We were incorporated on June 2, 2010, and our net loss from inception to November 30, 2011 is \$532,034. We have a very limited history of operations upon which an evaluation of our future success or failure can be made. There is no guarantee that we will be able to expand our business operations. Even if we expand our operations, at present, we do not know precisely when this will occur. We cannot guarantee that we will be successful in generating revenues and profit in the future. Failure to generate revenues and profit will cause us to suspend or cease operations.

If we are unable to build and maintain our brand image and corporate reputation, our business may suffer.

We are a new company, having been formed and commenced operations only in 2010. Our success depends on our ability to build and maintain the brand image for our company. We cannot be certain that any additional expenditure on advertising and marketing will have the desired impact on our brand image and on purchaser preferences. We need to maintain and expand our relationships with potential purchasers and business partners and effectively manage these relationships. If we fail to successfully manage our relationships with purchasers and our business partners, to build and maintain our brand image and corporate reputation our business may suffer.

Because our sole director and officer owns 66.52% of our issued and outstanding common stock, he could make and control corporate decisions that may be disadvantageous to minority shareholders.

Our sole director and officer, Mr. Kylo, owns approximately 66.52% of issued and outstanding shares of our common stock. Accordingly, he will be able to determine the outcome of all corporate transactions or other matters that require shareholder approval, including but not limited to, the election of directors, mergers, consolidations, and the sale of all or substantially all of our assets. He will also have the power to prevent or cause a change in control. The interests of our sole officer and director may differ from the interests of the other stockholders and thus result in corporate decisions that are disadvantageous to other shareholders.

We do not expect to pay dividends in the foreseeable future.

We have never paid any dividends on our common stock. We do not expect to pay cash dividends on our common stock at any time in the foreseeable future. The future payment of dividends directly depends upon our future earnings, capital requirements, financial requirements and other factors that our board of directors will consider. Since we do not anticipate paying cash dividends on our common stock, a return on your investment, if any, will depend solely on an increase, if any, in the market value of our common stock.

Any additional funding we arrange through the sale of our common stock will result in dilution to existing shareholders.

We must raise additional capital in order for our business plan to succeed. Our most likely source of additional capital will be through the sale of additional shares of common stock. Such stock issuances will cause stockholders' interests in our company to be diluted. Such dilution will negatively affect the value of investors' shares.

There is a limited trading market for our securities, and shareholders may be unable to sell their shares.

There is currently a limited market for our common stock on the Over-The-Counter Bulletin Board. It may be difficult for shareholders to sell their stock. In such a case, shareholders may find that they are unable to achieve benefits from their investment.

Our shares of common stock are subject to the “penny stock” rules of the securities and exchange commission and the trading market in our securities will be limited, which will make transactions in our stock cumbersome and may reduce the value of an investment in our stock.

The SEC has adopted rules that regulate broker-dealer practices in connection with transactions in "penny stocks." Penny stocks generally are equity securities with a price of less than \$5.00 (other than securities registered on certain national securities exchanges or quoted on the NASDAQ system, provided that current price and volume information with respect to transactions in such securities is provided by the exchange or system). Penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from those rules, to deliver a standardized risk disclosure document prepared by the SEC, which specifies information about penny stocks and the nature and significance of risks of the penny stock market. A broker-dealer must also provide the customer with bid and offer quotations for the penny stock, the compensation of the broker-dealer, and sales person in the transaction, and monthly account statements indicating the market value of each penny stock held in the customer's account. In addition, the penny stock rules require that, prior to a transaction in a penny stock not otherwise exempt from those rules, the broker-dealer must make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written agreement to the transaction. These disclosure requirements may have the effect of reducing the trading activity in the secondary market for stock that becomes subject to those penny stock rules. If a trading market for our common stock develops, our common stock will probably become subject to the penny stock rules, and shareholders may have difficulty in selling their shares.

The trading price of our stock may fluctuate significantly and stockholders may have difficulty reselling their shares.

There is a volatility associated with Bulletin Board securities in general and the value of your investment could decline due to the impact of any of the following factors upon the market price of our common stock: (i) disappointing results from our development efforts; (ii) failure to meet our revenue or profit goals or operating budget; (iii) decline in demand for our common stock; (iv) downward revisions in securities analysts' estimates or changes in general market conditions; (v) lack of funding generated for operations; (vi) investor perception of our industry or our prospects; and (vii) general economic trends.

In addition, stock markets have experienced price and volume fluctuations and the market prices of securities have been highly volatile. These fluctuations are often unrelated to operating performance and may adversely affect the market price of our common stock. As a result, investors may be unable to sell their shares at a fair price and you may lose all or part of your investment.

Because we can issue additional shares of common stock, purchasers of our common stock may incur immediate dilution and may experience further dilution.

We are authorized to issue up to 500,000,000 shares of common stock, of which 4,510,000 shares are issued and outstanding. Our board of directors has the authority to cause us to issue additional shares of common stock, and to determine the rights, preferences and privileges of such shares, without consent of any of our stockholders. Consequently, the stockholders may experience more dilution in their ownership of our stock in the future.

A decline in the price of our common stock could affect our ability to raise further working capital, it may adversely impact our ability to continue operations and we may go out of business.

A prolonged decline in the price of our common stock could result in a reduction in the liquidity of our common stock and a reduction in our ability to raise capital. Because we may attempt to acquire a significant portion of the funds we need in order to conduct our planned operations through the sale of equity securities, a decline in the price of our common stock could be detrimental to our liquidity and our operations because the decline may cause investors to not

choose to invest in our stock. If we are unable to raise the funds we require for all our planned operations, we may be forced to reallocate funds from other planned uses and may suffer a significant negative effect on our business plan and operations, including our ability to develop new products and continue our current operations. As a result, our business may suffer, and not be successful and we may go out of business. We also might not be able to meet our financial obligations if we cannot raise enough funds through the sale of our common stock and we may be forced to go out of business.

FINRA sales practice requirements may also limit a stockholder's ability to buy and sell our stock.

In addition to the "penny stock" rules promulgated by the Securities and Exchange Commission, the Financial Industry Regulatory Authority (FINRA) has adopted rules that require that in recommending an investment to a customer, a broker-dealer must have reasonable grounds for believing that the investment is suitable for that customer. Prior to recommending speculative low priced securities to their non-institutional customers, broker-dealers must make reasonable efforts to obtain information about the customer's financial status, tax status, investment objectives and other information. Under interpretations of these rules, the FINRA believes that there is a high probability that speculative low priced securities will not be suitable for at least some customers. FINRA requirements make it more difficult for broker-dealers to recommend that their customers buy our common stock, which may limit your ability to buy and sell our stock.

Use of Proceeds

We will not receive any proceeds from the sale of the common stock offered through this prospectus by the selling shareholders.

Determination of Offering Price

The selling shareholders will sell our shares at prevailing market prices or privately negotiated prices. Each of the selling shareholders, and any broker-dealer executing sell orders on behalf of the selling shareholders, may be deemed to be an “underwriter” as such term is defined in the Securities Act of 1933, as amended (the “Securities Act”).

Other than disclosed above, none of the selling shareholders:

1. has had a material relationship with us other than as a shareholder at any time within the past three years;
2. has ever been one of our officers or directors;
3. is a broker-dealer; or a broker-dealer affiliate.

Plan of Distribution

The selling shareholders may sell some or all of their common stock in one or more transactions, including block transactions. There are no arrangements, agreements or understandings with respect to the sale of these securities.

The selling shareholders will sell our shares at prevailing market prices or privately negotiated prices. Our common stock was quoted on the OTC Bulletin Board under the symbol "IDGR". On December 4, 2012, we changed our name from "Indigo International, Corp." to "Berkshire Homes, Inc." In connection with the name change, we changed our trading symbol and commencing on December 13, 2012, our common stock has been quoted on the OTC Bulletin Board under the symbol "BKSH".

The shares may also be sold in compliance with the Securities and Exchange Commission's Rule 144, when eligible.

If applicable, the selling shareholders may distribute shares to one or more of their partners who are unaffiliated with us. Such partners may, in turn, distribute such shares as described above. If these shares being registered for resale are transferred from the named selling shareholders and the new shareholders wish to rely on the prospectus to resell these shares, then we must first file a prospectus supplement naming these individuals as selling shareholders and providing the information required concerning the identity of each selling shareholder and his or her relationship to us. There is no agreement or understanding between the selling shareholders and any partners with respect to the distribution of the shares being registered for resale pursuant to this registration statement.

We can provide no assurance that all or any of the common stock offered will be sold by the selling shareholders.

We are bearing all costs relating to the registration of the common stock. The selling shareholders, however, will pay any commissions or other fees payable to brokers or dealers in connection with any sale of the common stock.

The selling shareholders must comply with the requirements of the Securities Act of 1933 and the Securities Exchange Act of 1934 in the offer and sale of the common stock. In particular, during such times as the selling shareholders may be deemed to be engaged in a distribution of the common stock, and therefore be considered to be an underwriter, they must comply with applicable law and may, among other things:

1. Not engage in any stabilization activities in connection with our common stock;
2. Furnish each broker or dealer through which common stock may be offered, such copies of this prospectus, as amended from time to time, as may be required by such broker or dealer; and
3. Not bid for or purchase any of our securities or attempt to induce any person to purchase any of our securities other than as permitted under the Securities Exchange Act.

The Securities and Exchange Commission (the "Commission") has also adopted rules that regulate broker-dealer practices in connection with transactions in penny stocks. Penny stocks are generally equity securities with a price of less than \$5.00 (other than securities registered on certain national securities exchanges or quoted on the NASDAQ system, provided that current price and volume information with respect to transactions in such securities is provided by the exchange or system).

The penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from those rules to deliver a standardized risk disclosure document prepared by the Commission, which contains:

- a description of the nature and level of risk in the market for penny stocks in both public offerings and secondary trading;
- a description of the broker's or dealer's duties to the customer and of the rights and remedies available to the customer with respect to a violation of such duties or other requirements;
- a brief, clear, narrative description of a dealer market, including "bid" and "ask" prices for penny stocks and the significance of the spread between the bid and ask price;
- a toll-free telephone number for inquiries on disciplinary actions;
- a definition of significant terms in the disclosure document or in the conduct of trading penny stocks; and
- such other information and is in such form (including language, type, size, and format) as the Commission shall require by rule or regulation.

The broker-dealer also must provide, prior to effecting any transaction in a penny stock, the customer with:

- bid and offer quotations for the penny stock;
- the compensation of the broker-dealer and its salesperson in the transaction;
- the number of shares to which such bid and ask prices apply, or other comparable information relating to the depth and liquidity of the market for such stock; and
- monthly account statements showing the market value of each penny stock held in the customer's account.

In addition, the penny stock rules require that prior to a transaction in a penny stock not otherwise exempt from those rules; the broker-dealer must make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written acknowledgment of the receipt of a risk disclosure statement, a written agreement to transactions involving penny stocks, and a signed and dated copy of a written suitability statement.

These disclosure requirements will have the effect of reducing the trading activity in the secondary market for our stock because it will be subject to these penny stock rules. Therefore, stockholders may have difficulty selling those securities.

Description of Business

Overview

We were incorporated in the State of Nevada on June 2, 2010 under the name “Indigo International, Corp.” Effective November 16, 2012, Odelio Arouca resigned as our Chief Executive Officer, Chief Financial Officer, Secretary and Treasurer and Llorne Kylo was appointed as our President, Chief Executive Officer, Chief Financial Officer, Secretary and Treasurer. Additionally, on November 16, 2012, Mr. Kylo was appointed to our Board of Directors. Immediately upon Mr. Kylo’s appointment to the Board of Directors, Mr. Odelio resigned from his position as a director. On December 4, 2012, our majority shareholder and our board of directors approved an amendment to our Articles of Incorporation for the purpose of changing our name to “Berkshire Homes, Inc.” Prior to our change of management, we operated a consulting business in commercial cultivation of white mushrooms (*agaricus bisporus*). Following this change in management, we determined it to be in our best interest to change our business focus to that of a company that acquires and rehabilitates distressed residential real estate in the United States. Distressed residential real estate is property that is under a foreclosure order or is advertised for sale by its mortgagee. Distressed property can sometimes be purchased at below market value. Our model is to acquire properties at below market value, rehabilitate them, and then sell or lease (rent) them, depending on which approach will generate the highest return. We are a development stage company and there is no guarantee that we will be able to expand our business, given the lack of revenues and operations to date. We have minimal assets and have incurred losses since inception. It is likely that we will not be able to achieve profitability and might need to cease operations due to the lack of funding. We maintain our statutory registered agent's office at 375 North Stephanie Street, Suite 1411, Henderson, Nevada 89014-8909. Our business office is located at 2375 East Camelback Road, Suite 600, Phoenix, AZ 85016. Our telephone number is 602-387-5393.

We plan to engage in the acquisition, development, rehabilitation, and resale or lease (rental) of distressed residence real estate. We believe that our experience and resources will enable us to acquire real estate properties at a favorable price. We are reviewing real estate opportunities with a view toward acquiring those which we believe have potential for profits. We will likely need to raise additional capital to make any such acquisition. There is no assurance that we will succeed in acquiring any real estate or that we will profit from the real estate that we acquire.

In addition, we plan to invest in both debt and equity securities of REITs. We may, from time to time, purchase these securities on margin when the interest and dividend yields exceed the cost of the funds. This securities portfolio, to the extent not pledged to secure borrowings, provides us with liquidity and additional income. Such securities are subject to risk arising from adverse changes in market rates and prices, primarily interest rate risk relating to debt securities and equity price risk relating to equity securities. There is no guarantee that we will profit from these securities.

Our business model is to assemble a portfolio of below market value distressed residential real estate nationwide, rehabilitate those properties, and then sell or rent them at a profit. These properties will be assembled at foreclosure auctions, short sales, direct from financial institutions, and from the Federal Deposit Insurance Corporation. Our model is to only buy properties at deep discounts to market prices. Each property will be rehabilitated to give it a modern and refreshed feel. This typically includes but is not limited to paint, tiles, carpet, appliances, landscaping etc. Our model is to not purchase homes built pre 2004 or that are in need of major, mechanical, structural, or electrical rehabilitation. Once the homes have been rehabilitated, market analytics are used to determine short and long term goals for each property. Typically, if a 30% or greater return on investment can be achieved, the home will be liquidated. However, if greater profit can be realized by holding the property we will lease it to a tenant. Both strategies are effective at maximizing returns. The short-term strategy can provide high returns and quick turnover, while the long-term leasing strategy can provide strong capitalization rates and appreciation potential, so long as the United States housing market normalizes back to pre 2007 pricing.

We will have to raise additional capital to continue to purchase residential properties. We have no third party commitments for the capital we will require for these planned investments. Although real estate investing is marked by its cycles, there can be no assurances that the housing market in general and the market will improve in the future.

In analyzing the potential development of a particular project, we evaluate the geographic, demographic, economic, and financial data, including:

- Households, population and employment growth;
- Prevailing rental and occupancy rates in the market area, and possible growth in those rates; and
- Location of the property in respect to schools and public transportation.

Clients

We do not currently have any customers. We expect that our potential clients will consist of, first time homebuyers, young professionals, young families, retirees, and newcomers to the area market.

Competition

Our competitors will include other investors in real estate looking for attractive investment opportunities. These investors include other “equity” investors, real estate investment trusts, limited partnerships, syndications and private investors, among others. Competition in the market areas in which the Company operates is significant and affects the Company’s ability to acquire or expand properties. We will not be differentiating ourselves from the foregoing, but merely competing with them. Our competitive position within the industry is negligible in light of the fact that we have not started our operations. Older, well-established companies, companies with substantial customer bases, longer operating histories and better financial positions currently attract customers. Since we are a development stage company, we cannot compete with them on the basis of reputation. We do expect to compete with them on the basis of the quality of the consulting services that we intend to provide. There can be no assurance that we can maintain a competitive position against current or future competitors, particularly those with greater financial, client database, marketing, service, technical and other resources. Our failure to maintain a competitive position within the market could have a material adverse effect on our business, financial condition and results of operations. At this time, our principal method of competition will be through personal contact with potential clients.

Description of Property

We lease approximately 400 square feet of office space at 2375 East Camelback Road, Suite 600, Phoenix, AZ 85016. The lease expires on January 1, 2014 and provides for a rent of \$142.35.

Insurance

We do not maintain any insurance. However, we intend to maintain insurance in the future if management believes it is in the best interests of the Company. Because we do not currently have any insurance, if we are made party to an action, we may not have sufficient funds to defend the litigation. If that occurs a judgment could be rendered against us that could cause us to cease operations.

Employees; Identification of Certain Significant Employees

Mr. Llorn Kylo, our CEO and CFO, is our sole employee. If business is successful and we experience rapid growth, Mr. Kylo may be required to hire new personnel to improve, implement and administer our operational, management, financial and accounting systems.

Government Regulation

We will be required to comply with all regulations, rules and directives of governmental authorities and agencies applicable to real estate in any jurisdiction in which we would conduct activities. Local zoning and use laws, environmental statutes and other governmental requirements may restrict our activities.

In the opinion of management, all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of financial position and the results of operations for the interim periods presented have been reflected herein. Reclassifications

Certain comparative figures have been reclassified to conform to the current period's presentation.

The Company has incurred losses since inception resulting in an accumulated deficit of \$910,380 as of August 31, 2012 and further losses are anticipated in the development of its business raising substantial doubt about the Company's ability to continue as a going concern. The ability to continue as a going concern is dependent upon the Company generating profitable operations in the future and/or to obtain the necessary financing to meet its obligations and repay its liabilities arising from normal business operations when they come due. Management anticipates financing operating costs over the next twelve months with loans and/or private placement of common stock. These financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts, or amounts and classification of liabilities that might result from this uncertainty.

NOTE 3 – RELATED PARTY TRANSACTIONS

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders
Indigo International, Corp.

We have audited the accompanying balance sheets of Indigo International, Corp. (A Development Stage Company) as of November 30, 2011 and 2010 and the related statements of operations, stockholders' equity (deficit), and cash flows for the years then ended and from inception (June 2, 2010) to November 30, 2011. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. The company is not required to have, nor were we engaged to perform an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control over the financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Indigo International, Corp. (A Development Stage Company) as of November 31, 2011 and 2010 and the results of its operation and its cash flow for the years then ended and from inception (June 2, 2010) to November 30, 2011, in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming the Company will continue as a going concern. As discussed in Note 1 to the financial statements, the Company has suffered recurring losses from operations, which raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 1. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

For purposes of the Statement of Cash Flows, the Company considers all highly liquid instruments purchased with a maturity of three months or less to be cash equivalents to the extent the funds are not being held for investment purposes.

Basic Income (Loss) Per Share

The Company computes loss per share in accordance with “ASC-260,” “Earnings per Share” which requires presentation of both basic and diluted earnings per share on the face of the statement of operations. Basic loss per share is computed by dividing net loss available to common shareholders by the weighted average number of outstanding common shares during the period. Diluted loss per share gives effect to all dilutive potential common shares outstanding during the period. Dilutive loss per share excludes all potential common shares if their effect is anti-dilutive.

Dividends

The Company has not adopted any policy regarding payment of dividends. No dividends have been paid during the period shown.

F-10

Income Taxes

The Company follows the liability method of accounting for income taxes. Under this method, deferred income tax assets and liabilities are recognized for the estimated tax consequences attributable to differences between the financial statement carrying values and their respective income tax basis (temporary differences). The effect on deferred income tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Advertising Costs

The Company's policy regarding advertising is to expense advertising when incurred. The Company incurred advertising expense of \$0 from Inception (June 2, 2010) to November 30, 2011.

Accounting Basis

The Company uses the accrual basis of accounting and accounting principles generally accepted in the United States of America ("GAAP" accounting).

Impairment of Long-Lived Assets

The Company continually monitors events and changes in circumstances that could indicate carrying amounts of long-lived assets may not be recoverable. When such events or changes in circumstances are present, the Company assesses the recoverability of long-lived assets by determining whether the carrying value of such assets will be recovered through undiscounted expected future cash flows. If the total of the future cash flows is less than the carrying amount of those assets, the Company recognizes an impairment loss based on the excess of the carrying amount over the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or the fair value less costs to sell.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Stock-Based Compensation

As of November 30, 2011 the Company has not issued any stock-based payments to its employees. Stock-based compensation is accounted for at fair value in accordance with ASC 718. To date, the Company has not adopted a stock option plan and has not granted any stock options.

Revenue Recognition

The Company recognizes revenue when there is a persuasive evidence of an arrangement, the amount of fees to be paid by the customer is fixed or determinable, products are fully delivered or services have been provided and collection is reasonably assured.

Accounts Receivable

Accounts receivables are carried at original invoice amounts less allowances made for doubtful receivables based on a review of year-end or period end accounts receivables. An allowance for doubtful accounts receivables is made and related bad debt expense is recorded when there is evidence that the Company will not be able to collect the amounts due according to original payment terms.

Fair value of financial instruments

The estimated fair values of financial instruments were determined by management using available market information and appropriate valuation methodologies. The carrying amounts of financial instruments including cash approximate their fair value because of their short maturities.

Recent pronouncements

The Company has evaluated the recent accounting pronouncements and believes that none of them will have a material effect on the Company's financial statements.

NOTE 3 – RELATED PARTY TRANSACTIONS AND BALANCES

A former director of the Company loaned \$274 to the Company on June 2, 2010. The amount was outstanding at November 30, 2011.

During the year ended November 30, 2011, the Company incurred management fees of \$20,472 to the sole director and officer of the Company. All the management fees accrued as at November 30, 2011 was paid and the outstanding balance of \$10,349 was owed to the director and officer for expense reimbursement.

The amounts due to related parties are due on demand, non-interest bearing and unsecured.

NOTE 4 – REVENUE

The Company realized \$22,000 as revenue during the year ended November 30, 2011 per agreement with Ogrodnictwo Piotr Walkowiak dated September 27, 2010 for cultivation of mushrooms. The agreement expired during October, 2011.

NOTE 5 – INCOME TAXES

As of November 30, 2011, the Company had net operating loss carry forwards of \$532,034 that may be available to reduce future years' taxable income through 2030. Future tax benefits which may arise as a result of these losses have not been recognized in these financial statements, as their realization is determined not likely to occur and accordingly, the Company has recorded a valuation allowance for the deferred tax asset relating to these tax loss carry-forwards.

Components of net deferred tax assets, including a valuation allowance, are as follows at November 30, 2011 and 2010.

	2011	2010
Deferred tax assets:		
Net operating loss carry forward	\$ 532,034	\$ 620
Total deferred tax assets	186,212	217
Less: valuation allowance	(186,212)	(217)
Net deferred tax assets	\$ -	\$ -

The valuation allowance for deferred tax assets as of November 30, 2011 was \$186,212. In assessing the recovery of the deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income in the periods in which those temporary differences become deductible. Management considers the scheduled reversals of future deferred tax assets, projected future taxable income, and tax planning strategies in making this assessment. As a result, management determined it was more likely than not the deferred tax assets would not be realized as of November 30, 2011.

Reconciliation between the statutory rate and the effective tax rate is as follows at November 30, 2011 and 2010:

	2011		2010	
Federal statutory tax rate	(35.0)%	(35.0)%
Permanent difference and other	35.0	%	35.0	%
Effective tax rate	-	%	-	%

Indemnification of Directors and Officers

Our sole officer and director is indemnified as provided by the Nevada Revised Statutes (“NRS”) and our bylaws.

Under the NRS, director immunity from liability to a company or its shareholders for monetary liabilities applies automatically unless it is specifically limited by a company's articles of incorporation; that is not the case with our Articles of Incorporation. Excepted from that immunity are:

- (1) a willful failure to deal fairly with the company or its shareholders in connection with a matter in which the director has a material conflict of interest;
- (2) a violation of criminal law (unless the director had reasonable cause to believe that his or her conduct was lawful or no reasonable cause to believe that his or her conduct was unlawful);
- (3) a transaction from which the director derived an improper personal profit; and
- (4) willful misconduct.

Our bylaws provide that we will indemnify our directors and officers to the fullest extent not prohibited by Nevada law; provided, however, that we may modify the extent of such indemnification by individual contracts with our directors and officers; and, provided, further, that we shall not be required to indemnify any director or officer in connection with any proceeding (or part thereof) initiated by such person unless:

- (1) such indemnification is expressly required to be made by law;
- (2) the proceeding was authorized by our Board of Directors;
- (3) such indemnification is provided by us, in our sole discretion, pursuant to the powers vested us under Nevada law; or
- (4) such indemnification is required to be made pursuant to the bylaws.

Our bylaws provide that we will advance all expenses incurred to any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that he is or was our director or officer, or is or was serving at our request as a director or executive officer of another company, partnership, joint venture, trust or other enterprise, prior to the final disposition of the proceeding, promptly following request. This advance of expenses is to be made upon receipt of an undertaking by or on behalf of such person to repay said amounts should it be ultimately determined that the person was not entitled to be indemnified under our bylaws or otherwise.

Our bylaws also provide that no advance shall be made by us to any officer in any action, suit or proceeding, whether civil, criminal, administrative or investigative, if a determination is reasonably and promptly made: (a) by the board of directors by a majority vote of a quorum consisting of directors who were not parties to the proceeding; or (b) if such quorum is not obtainable, or, even if obtainable, a quorum of disinterested directors so directs, by independent legal counsel in a written opinion, that the facts known to the decision-making party at the time such determination is made demonstrate clearly and convincingly that such person acted in bad faith or in a manner that such person did not believe to be in or not opposed to our best interests.
