This Quarterly Report on Form 10-Q is being amended to accurately reflect the non-shell status of the Company. The previous filing made on May 15, 2008, as amended November 12, 2008, inaccurately reflected the Company's status as a shell corporation because the box reflecting shell status was incorrectly marked. Current management has confirmed with Patrick Montablan, the prior President/Chief Executive Officer, that the Company is not nor ever has been a shell corporation as that term is defined in Rule 230.405 of the Securities Act of 1933, as amended. As of the date of this Quarterly Report of March 31, 2008, the Company was operational and had current assets of \$ 87,766 consisting of cash in the amount of \$ 49,409 . The Company further had oil and gas properties valued at net \$3 79.972 .

MAJESTIC OIL & GAS, INC. (A Development Stage Company)

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 - Business Activity and Basis of Presentation

Principle Business Activity

Majestic Oil & Gas, inc. (Company) is a development stage enterprise and its operations consist of oil and natural gas development and production in the Rocky Mountain region. The financial statements and notes to the financial statements are the representation of the Company's management, who is responsible for their integrity and objectivity. The accounting policies of the Company are in accordance with generally accepted accounting principles and conform to the standards applicable to development stage enterprises.

Basis of Presentation

The accompanying interim financial statements of the Company are unaudited. In the opinion of management, the interim data includes all adjustments, consisting only of normal recurring adjustments necessary for a fair presentation of the results for the interim period. The results of operations for the three months ended March 31, 2008 are not necessarily indicative of the operating results for the entire year. These interim financial statements contain certain reclassification of prior period amounts to be consistent with the current period presentation with no effect on net income or loss.

We have prepared the financial statements included herein pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. We believe the disclosures made are adequate to make the information not misleading and recommend that these condensed financial statements be read in conjunction with the financial statements and notes included in our Form 10-KSB for the year ended December 31, 2007.

Note 2 - Basis of Accounting

The accompanying financial statements have been prepared using accounting principles applicable to a going concern, which contemplates the realization of assets and extinguishment of liabilities in the normal course of business. As shown in the accompanying condensed balance sheet the Company has an accumulated deficit of (\$575,486) through March 31, 2008. This and other factors may indicate that the Company may be unable to continue in existence. The Company's financial statements do not include any adjustments related to the realization of the carrying value of assets or the amounts and classification of liabilities that might be considered necessary should the Company be unable to continue in existence. The Company's ability to establish itself as a going concern is dependent upon its ability to obtain additional financing in order to fund exploration and development activities of oil and gas interests and, ultimately, to achieve profitable operations Management believes that it can be successful in obtaining either debt or equity financing that will enable the Company to continue in existence and establish itself as a going concern.

Adopted prior to the three months ended March 31, 2008 - Oil and Gas Interests

The Company utilizes the full cost method of accounting for oil and gas activities. Under this method, subject to a limitation based on estimated value, all costs associated with property acquisition, exploration and development, including costs of unsuccessful exploration, are capitalized within a cost center. No gain or loss is recognized upon the sale or abandonment of undeveloped or producing oil and gas interests unless the sale represents a significant portion of oil and gas interests and the gain significantly alters the relationship between capitalized costs and proved oil and gas reserves of the cost center. Depreciation, depletion and amortization of oil and gas interests is computed on the units of production method based on proved reserves, or upon reasonable estimates where proved reserves have not yet been established due to the recent commencement of production. Amortizable costs include estimates of future development costs of proved undeveloped reserves.

Table of Contents

MAJESTIC OIL & GAS, INC. (A Development Stage Company)

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Capitalized costs of oil and gas interests may not exceed an amount equal to the present value, discounted at 10%, of the estimated future net cash flows from proved reserves plus the cost, or estimated fair market value if lower, of unproved interests. Should capitalized costs exceed this ceiling, an improvement is recognized. The present value of estimated future net cash flows is computed by applying year end prices of oil and gas to estimated future production of proved oil and gas reserves as of year end, less estimated future expenditures to be incurred in developing and producing the proved reserves and assuming continuation of existing economic conditions.

Revenue Recognition

The Company recognizes oil and gas revenues from its interests in producing wells as oil and gas is produced and sold from the wells and when ultimate collection is reasonably assured.

Website Development Costs

The Company has capitalized the costs associated with development of its website, and is amortizing the cost over a three year period.

Stock Based Compensation

The Company accounts for stock based compensation in accordance with Statement of Financial Accounting Standard (SFAS) No.123(R), "Share-Based Payment," which specifies the revised accounting alternative requirements for pre-2006 stock based compensation grants existing at January 1, 2006 and the required accounting for new grants starting January 1, 2006. The Company has no stock based compensation grants made before year 2007.

Accordingly, the provisions of SFAS No. 123(R) pertaining to pre-2006 grants do not apply. The Company values its stock options awarded on or after January 1, 2006 at the fair value at grant date using the Black-Scholes option pricing model. Compensation expense for stock options is recorded over the vesting period on a straight line basis. Compensation paid in vested stock is valued at the fair value at the applicable measurement date and charged to

expense at the date.

Income Taxes

Effective January 1, 2007, the Company adopted the provisions of Financial Accounting Standards board (FASB) Interpretation No. 48 ("FIN 48"), "Accounting for Uncertainty in Income Taxes - An Interpretation of FASB Statement recognition, measurement and disclosure of uncertain tax positions recognized in the financial statements in accordance with SFAS No. 109. Tax positions must meet a "more-likely-than-not" recognition threshold at the effective date to be recognized upon the adoption of FIN 48 and in subsequent periods. Upon the adoption of FIN 48, the Company had no unrecognized tax benefits. During 2007 and during the first three months of 2008, the Company recognized no adjustments for uncertain tax benefits.

Deferred income tax assets, if any are adjusted by a valuation allowance, if necessary, to recognize future tax benefits only to the extent, based on available evidence, it is more likely than not such benefits will be realized. The Company would recognize interest and penalties related to uncertain tax positions were accrued at March 31, 2008. The Company expects no material changes to unrecognized tax positions within the next twelve months.

Earnings per Share of Common Stock

Basic earnings per share is determined in accordance with SFAS No. 128 using net income divided by the weighted average shares outstanding during the period. Diluted earnings per share is computed by dividing net income by the weighted average shares outstanding, assuming all dilutive potential common shares were issued. The effect of outstanding common stock warrants was anti-dilutive for the three months ended March 31, 2008 and 2007, and the year ended December 31, 2007.

Adopted during the three months ended March 31, 2008 - Fair Value Measurement

Effective January 1, 2008, the Company adopted SFAS No. 157 *Fair Value Measurement*, which provides a framework for measuring fair value under generally accepted accounting principles. SFAS No. 157 would apply to all financial instruments that are being measured and reported on a fair value basis. Currently, the Company has no financial instruments to which this statement would apply.

Table of Contents

MAJESTIC OIL, INC. (A DEVELOPMENT STAGE COMPANY)

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Derivative Instruments and hedging Activities

In March 2008, the Financial Accounting Standards Boards (FASB) issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities-an amendment of FASB Statement No. 133 (SFAS No. 161). SFAS No. 161 gives financial statement users better information about the reporting entity's hedges by providing for qualitative disclosures about the objectives and strategies for using derivatives, quantitative data about the fair value of and gains and losses on derivative contracts, and details of credit-risk-related contingent features in their hedged positions. SFAS No. 161 is effective for the Company as of January 1, 2009 with early application encouraged. The adoption of this new standard had no effect on the financial and reporting disclosures of the Company.

Note 3 - Organization and Development of the Company

The Company was formed on April 16, 2002 as a corporation. The Company is considered a development stage enterprise as defined by SFAS No. 7. The accompanying interim financial statements reflect limited oil and gas development and production activities and they are not necessarily indicative of what the financial statements will reflect once the intended operations of the Company are fully underway.

Note 4 - Asset Retirement Obligations

The Company follows SFAS No. 143 "Accounting for Asset Retirement Obligations". SFAS No. 143 addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. SFAS No. 143 requires recognition of the present value of obligations associated with the retirement of tangible long-lived assets in the period in which it is incurred. As of March 31, 2008, the estimated future cost to plug and abandon the Company's gas wells was estimated to be \$3,193. The estimated liability is based on historical experience in plugging and abandoning wells, estimated cost to plug and abandon wells in the future and federal and state regulatory requirements.

Note 5- Related Party Transactions

Altamont Oil & Gas, Inc. (Altamont), an entity related through common ownership and management, is the operator of the wells in which the Company owns its working interests. As the operator of the wells, Altamont is responsible for remitting production taxes to the taxing authorities and royalty interest owners. As of March 31, 2008, the Company had an outstanding receivable from Altamont of \$33,357 for gas sales, and a payable to Altamont during the three months ended March 31, 2008 for a total of \$12,260. This was the same amount originally paid by Altamont to acquire paid by Altamont to acquire the leases.

Note 6 - Farm Out Agreement

During 2007 the Company entered into Farm-out Agreement with Altamont and Number, Inc., an entity whose owner is a member of the Board of Directors of the Company, to a drill a 10-well natural gas development program. This development program will involve the drilling of 5 wells in the Lake Frances gas Field and 5 wells in the Williams Gas Field, located in Pondera County, Montana. The Lake Frances Field is located south of Valier, Montana just offsetting the Lake Frances reservoir. The Williams Field is located 7 miles east of the town of Valier, Montana. The locations for the development program were determined from information gathered from a geological and engineering study. The surveying of each location and the permitting of each drill site with Montana Board of Oil & Gas is currently being completed. The Company will receive 100% of the revenues until the drilling and completion costs have been recovered, at which time the Company's interest will revert to 50%.

Note 7 - Stock Options

The Company granted an option to buy, 125,000 shares at \$0.38 per share to a member of the Company's Board of Directors of the Company on August 9, 2007. These options expire on August 9, 2008. The fair value of these options, \$21,295, was recorded as Board compensation and additional paid in capital at the time the options were granted. No additional options were granted during the three months ended March 31, 2008.

Table of Contents

Item 2. Management's Discussion and Analysis or Plan of Operation.

FORWARD LOOKING STATEMENTS

The following discussion and analysis is provided to increase the understanding of, and should be read in conjunction with, the Financial Statements of the Company and Notes thereto included elsewhere in this Report. Historical results and percentage relationships among any amounts in these financial statements are not necessarily indicative of trends in operating results for any future period. The statements, which are not historical facts contained in this Report, including this Plan of Operations, and Notes to the Financial Statements, constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are based on currently available operating, financial and competitive information, and are subject to various risks and uncertainties. Future events and the Company's actual results may differ materially from the results reflected in these forward-looking statements. Factors that might cause such a difference include, but are not limited to, dependence on existing and future key strategic and strategic end-user customers, limited ability to establish new strategic relationships, ability to sustain and manage growth, variability of operating results, the Company's expansion and development of new service lines, marketing and other business development initiatives, the commencement of new engagements, competition in the industry, general economic conditions, dependence on key personnel, the ability to attract, hire and retain personnel who possess the technical skills and experience necessary to meet the service requirements of its clients, the potential liability with respect to actions taken by its existing and past employees, risks associated with international sales, and other risks described herein and in the Company's other SEC filings.

The safe harbors of forward-looking statements provided by Section 21E of the Exchange Act are unavailable to issuers of penny stock. As we issued securities at a price below \$5.00 per share, our shares are considered penny stock and such safe harbors set forth under the Reform Act are unavailable to us.

The following discussion of our financial condition and results of operations should be read in conjunction with the Financial Statements and Notes to the Condensed Consolidated Financial Statements appearing elsewhere in this report.

OVERVIEW

Majestic Oil & Gas, Inc is engaged in the exploration, development, acquisition and operation of oil and natural gas properties. Because oil and natural gas exploration and development requires significant capital and because our assets and resources are limited, we participate in the gas industry through the purchase of interests in either producing wells or oil and natural gas exploration, development and production projects.

Majestic Oil & Gas, Inc. is a development stage company, and as such it is difficult for us to forecast our revenues or earnings accurately. We believe that future period-to-period comparisons of our operating results may not be meaningful and should not be relied upon as an indication of future performance as we have and will have no backlog of orders. Our operating results in one or more future quarters may fall below investor expectations which, assuming our common stock trades on a recognized market, would almost certainly cause the future trading price of our common stock to decline. You should read the following discussion together with the condensed consolidated financial statements and their accompanying notes, included elsewhere in the report.

Table of Contents

Based upon our Management's experience in the oil and natural gas industry and on recent events, including increasing global demand for energy and energy disruptions caused by natural disasters, we believe the trend in oil and gas prices will remain relatively stable or decrease slightly, but over the long-term are more likely to increase. We expect to continue to generate positive net income from operations in the future, although our revenue and expenses will increase as we expand our drilling and ownership activities.

Majestic Oil & Gas, Inc participated in a drilling program in the Lake Frances Field during the Fourth Quarter 2007. Two successful gas wells were drilled; the B Ag, Inc #25-1 and the Vandebos #19-1. Majestic Oil & Gas, Inc holds a 25% Working Interest in these two wells and the Company has seen an increase in production volumes, as a result of these two wells. In addition, Majestic Oil & Gas, Inc participated in the drilling of the Vandebos #19-2 and the Jody Fields #4-1. The Vandebos #19-2 well was subsequently plugged and abandoned. The Jody Fields #4-1 well, is a wildcat oil well, which is yet to be completed.

RESULTS OF OPERATIONS

Three months ended March 31, 2008 vs. Three months ended March 31, 2007

Revenues for the three-month period ending March 31, 2008 were \$33,357 compared to \$8,795 for the three-month period ending March 31, 2007. The most significant reason for the major increase in the revenues between these two periods is a direct result of the two new wells brought on production during the 4th Quarter of 2007, which increased production/sales volumes, as shown in the chart below. (MCF stands for the price per thousand cubic feet of natural gas)

	Share of	Price	Share of	Price
	Production	Per	Production	Per
Ludwig State 36-1	Volumes	MCF	Volumes	MCF
	2008		2007

March	73.22	4.98	262.14	3.83

Table of Contents

	Share of	Price	Share of	Price
	Production	Per	Production	Per
B. Ag #25-1	Volumes	MCF	Volumes	MCF
	2008		2007	
January	40.80	3.91	-	-
February	41.80	4.45	-	-
March	42.20	4.98	-	-

	Share of	Price	Share of	Price
	Production	Per	Production	Per
Vandenbos #19-1	Volumes	MCF	Volumes	MCF
January	1792.93	3.91	-	-
February	1658.87	4.45	-	-
March	1578.84	4.98	-	-

Majestic Oil & Gas, Inc.'s Net Share of the production volumes from the Ludwig State #36-1 and Boucher #27-1 wells for the period ending March 31, 2008 were 1,059.72 MCF compared to 1,991.35 MCF for the period ending March 31, 2007. Production volumes significantly increased, during the period, due to the B. Ag #25-1 and Vandenbos #19-1. Current year production of 5,155.44 MCF for the new wells, bring the Company's total share of production to 6,215.16 MCF for the period ending March 31, 2008.

The Company saw an increase in production (lifting) costs of \$5,592, the majority of which is reflected in the expense for taxes and royalties, increasing \$4,938 from the \$2,211 reported for the three month period ending March 31, 2007 compared to the \$7,149 for the three-month period ending March 31, 2008. This was due to the increase in production volumes and price.

As the result of production, the Company reported an increase of \$10,200 in depletion, a non-cash item, from the \$3,500 reported for the period march 31, 2007 to the \$13,700 reported for the period ended March 31, 2008.

The Company's selling, general and administrative expenses of \$31,047 increased significantly during the three-month period ending March 31, 2008 compared to the \$19,830 reported for the same period in 2007. This increase is due in part to the increase in our legal, accounting and filing fees. The majority of the legal and accounting fees are a result of the fees paid to our accountants and corporate auditor for financial statement preparation, audit and review for the year ended December 31, 2007.

The Company showed a Net Loss of \$20,352 for the three-month period ending March 31, 2008 compared to a Net Loss of \$17,695 for the same period in 2007. The variance between these two periods is directly related to the changes in expenses detailed above. The Company expects to continue to see steady revenues in 2008, as a result of the volumes expected from the two new wells. The Company continues to see an increasing trend in natural gas pricing as of the date of this report.

The Company also plans to continue its pursuit of oil prospects in the Lake Frances Area, which if successful could contribute to an increase in future revenues due to the price per barrel of oil. With the price of crude oil reaching and exceeding \$120 per barrel recently and natural gas escalating to \$11.00 per MCF, Management is confident that we will build the Company through drilling oil and natural gas prospects.

LIQUIDITY AND RESOURCE CAPITAL

We are still a development stage company. From our inception to March 31, 2008, we incurred an accumulated deficit of (\$575,486). This deficit is primarily the result of approximately \$300,000 in expenses associated with stock issuances during fiscal period ended December 31, 2002, and \$289,920 in legal, accounting and filing fees incurred since inception which are associated with a publicly traded company.

In addition, as of March 31, 2008, we had \$49,909 of current cash available. Our cash resources of \$49,909 are not sufficient to satisfy our cash requirements over the next 12 months. We need an additional minimum of \$1,000,000 to finance our planned expansion in the next 12 months, which funds will be used for drilling of development oil and natural gas wells in the Lake Frances and Williams Fields. We hope to be able to raise additional funds from an offering of our stock in the future. However, this offering may not occur, or if it occurs, may not raise the required funding. We may also consider securing debt financing. We may not raise other equity or debt financing sufficient to fund this amount. If we don't raise or generate these funds, the implementation of our short-term business plan will be delayed or eliminated.

Our ability to continue as a going concern is dependent on our ability to raise funds to implement our planned development; however we may not be able to raise sufficient funds to do so. Our independent auditors have indicated that there is substantial doubt about our ability to continue as a going concern over the next twelve months. Our poor financial condition could inhibit our ability to achieve our business plan.

COMMITMENTS AND CONTINGENCIES

On July 1, 2004, the Company entered into an operating agreement with Altamont Oil & Gas, Inc., through which Altamont Oil & Gas, Inc. will operate the wells in which we have acquired a working interest. Our share of monthly operating costs will be deducted from our monthly share of production revenue.

The Company acquired leases covering approximately 3,963 net acres of undeveloped land during 2007, for the purposes of future oil and gas development. This acreage is located in Pondera County, Montana in the vicinity of the Williams and Lake Frances Gas Fields. These leases remain in good standing with the term of the leases set for periods of 3 or 5 years. Management considers the value of the properties to be as much or more than for what they were acquired.

During the Second Quarter 2007, the Company entered into a Farm-out Agreement with Altamont Oil & Gas, Inc and Numbers, Inc to conduct a 10-well natural gas development program. This development program is still pending and will involve the drilling of 5 wells in the Lake Frances Gas Field and 5 wells in the Williams Gas Field, located in Pondera County, Montana. The Lake Frances Field is located south of Valier, Montana just offsetting the Lake Frances reservoir. The Williams Field is located 7 miles east of the town of Valier, Montana.

Item 3. Quantitative and Qualitative Disclosure about Market Risk

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Securities Exchange Act of 1934 reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, our management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Under the supervision of our Chief Executive Officer and Chief Financial Officer, we have identified the critical disclosure controls and procedures associated with the Company's internal control over financial reporting, but have not yet tested the effectiveness of these disclosure controls and procedures and, therefore, cannot yet deem these controls to be effective. Therefore, the Company has determined that a material weakness exists related to the lack of testing of disclosure controls and procedures associated with the Company's internal control over financial reporting for the three months ended March 31, 2008 and for the fiscal year ended December 31, 2007. This material weakness could materially affect the Company's control over financial reporting.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting that occurred during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting for that period, other than the pre-existing material weakness discussed above.
