## **REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

Board of Directors and Stockholders

Sun Pacific Power Corporation and Subsidiaries

We have audited the accompanying consolidated balance sheets of Sun Pacific Power Corporation and its subsidiaries (the “Company”) as of -December 31, 2016 and 2015, and the related consolidated statements of operations, stockholders’ deficit and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Sun Pacific Power Corporation and its subsidiaries as of December 31, 2016 and 2015, and the results of their consolidated operations and cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 3 to the consolidated financial statements, the Company has suffered recurring losses from operations since inception and has a significant working capital deficiency both of which raise substantial doubt about its ability to continue as a going concern. Management’s plans in regard to these matters are also described

in Note 3. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

Cash and cash equivalents

For purposes of the consolidated statements of cash flows, cash includes demand deposits and short-term liquid investments with original maturities of three months or less when purchased. As of December 31, 2016, the Federal Deposit Insurance Corporation (FDIC) provided insurance coverage of up to \$250,000, per depositor, per institution. At December 31, 2016, none of the Company's cash was in excess of federally insured limits.

Accounts Receivable

In the normal course of business, we decide to extend credit to certain customers without requiring collateral or other security interests. Management reviews its accounts receivable at each reporting period to provide for an allowance against accounts receivable for an amount that could become uncollectible. This review process may involve the identification of payment problems with specific customers. Periodically we estimate this allowance based on the aging of the accounts receivable, historical collection experience, and other relevant factors, such as changes in the economy and the imposition of regulatory requirements that can have an impact on the industry. These factors continuously change, and can have an impact on collections and our estimation process. The Company incurred bad debt expenses of \$86,676 and \$150,309 during the years ended December 31, 2016 and 2015, respectively.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

Contingencies

Certain conditions may exist as of the date financial statements are issued, which may result in a loss but which will only be resolved when one or more future events occur or do not occur. We assess such contingent liabilities, and such assessment inherently involves an exercise of judgment. In assessing loss contingencies related to pending legal proceedings that are pending against us or unasserted claims that may result in such proceedings, we evaluate the perceived merits of any legal proceedings or unasserted claims as well as the perceived merits of the amount of relief sought or expected to be sought therein. If the assessment of a contingency indicates that it is probable that a liability has been incurred and the amount of the liability can be estimated, then the estimated liability would be accrued in our consolidated financial statements. If the assessment indicates that a potentially material loss contingency is not probable but is reasonably possible, or is probable but cannot be estimated, then the nature of the contingent liability, together with an estimate of the range of possible loss if determinable would be disclosed.

Fair value of financial instruments

In accordance with the reporting requirements of ASC Topic 825, Financial Instruments, the Company calculates the fair value of its assets and liabilities which qualify as financial instruments under this standard and includes this additional information in the notes to its consolidated financial statements when the fair value is different than the carrying value of those financial instruments. The Company does not have any assets or liabilities measured at fair value on a recurring or a non-recurring basis, consequently, the Company did not have any fair value adjustments for assets and liabilities measured at fair value at the consolidated balance sheet dates, nor gains or losses reported in the consolidated statements of operations that are attributable to the change in unrealized gains or losses relating to those assets and liabilities still held at December 31, 2016 and 2015.

Fair value measurements

ASC Topic 820, Fair Value Measurement, defines fair value, establishes a framework for measuring fair value in accordance with U.S. generally accepted accounting principles, and requires certain disclosures about fair value measurements. In general, the fair values of financial instruments are based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality and the customer's creditworthiness, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time.

Property and equipment

Property and equipment is stated at cost. Additions and improvements that significantly add to the productive capacity or extend the life of an asset are capitalized. Maintenance and repairs are expensed as incurred. Depreciation is computed using the straight-line method over three to five years for vehicles and five to ten years for equipment. Leasehold improvements are amortized over the lesser of the estimated remaining useful life of the asset or the remaining lease term.

#### Impairment of long-lived assets

The Company periodically reviews for the impairment of long-lived assets whenever events or changes in circumstances indicate that the carrying amount of an asset may not be realizable. An impairment loss would be recognized when estimated future cash flows expected to result from the use of the asset and its eventual disposition is less than its carrying amount. At December 31, 2016 and 2015, the Company has not identified any such impairment losses.

#### Income taxes

Under ASC Topic 740, "Income Taxes", the Company is required to account for its income taxes through the establishment of a deferred tax asset or liability for the recognition of future deductible or taxable amounts and operating loss and tax credit carry forwards. Deferred tax expense or benefit is recognized as a result of timing differences between the recognition of assets and liabilities for book and tax purposes during the year.

**SUN PACIFIC POWER CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Deferred tax assets are recognized for deductible temporary differences and operating losses, and tax credit carry forwards. A valuation allowance is established to reduce that deferred tax asset if it is “more likely than not” that the related tax benefits will not be realized.

Research and development expense

Research and development costs are expensed as incurred.

Revenue recognition

The Company recognizes revenue when services are performed, collection of the relevant receivables is probable, persuasive evidence of an arrangement exists and the price is fixed or determinable.

Subsequent events

The Company has evaluated subsequent events from December 31, 2016 and through August 21, 2017, to assess the need for potential recognition or disclosure in this report. Based upon this evaluation, management determined that all subsequent events that require recognition in the financial statements have been included. (See Note 10)

Recent accounting pronouncements

During the year ended December 31, 2016 and through August 21, 2017, there were several new accounting pronouncements issued by the FASB. Each of these pronouncements, as applicable, has been or will be adopted by the Company. Management does not believe the adoption of any of these accounting pronouncements has had or will have a material impact on the Company’s financial statements.

Note 3 - Going concern

The accompanying financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America, assuming the Company will continue as a going concern, which contemplates the realization of assets and satisfaction of liabilities in the normal course of business. For the years ended December 31, 2016 and 2015, the Company incurred losses from operations of \$1,491,223 and \$223,782, respectively. At December 31, 2016 and 2015, the Company had a stockholders' deficit of \$1,866,294 and \$419,071, respectively, and a working capital deficit of \$1,563,674 and \$346,769, respectively. These circumstances raise substantial doubt about the Company's ability to continue as a going concern. The Company's ability to continue as a going concern is dependent on its ability to raise the additional capital to meet short and long-term operating requirements. Management is continuing to pursue external financing alternatives to improve the Company's working capital position however additional financing may not be available upon acceptable terms, or at all. If the Company is unable to obtain the necessary capital, the Company may have to cease operations.

Note 4 - Net loss per share

Under ASC 260, "Earnings Per Share" ("EPS"), the Company provides for the calculation of basic and diluted earnings per share. Basic EPS includes no dilution and is computed by dividing income or loss available to common shareholders by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution of securities that could share in the earnings or losses of the entity. For the years ended December 31, 2016 and 2015, basic and diluted loss per share are the same as the calculation of diluted per share amounts would result in an anti-dilutive calculation.

Note 5 - Borrowings

Vehicle installment notes payable

The Company's vehicle installment notes payable consist of several installment notes for various vehicles used in the Company's operations. At December 31, 2016 and 2015, the notes have annual interest rates between 3.49% and 4.07% and require monthly minimum payments of principal and interest ranging from \$380 to \$434. The Company's installment notes are collateralized by the vehicles purchased with the respective installment notes.

At the election of the holder, the notes can be converted into common stock of the Company at a conversion price per share equal to 50% of the average bid price for the 30 consecutive business days prior to conversion. In connection with the notes, the Company issued a total of 200,000 shares of Series B preferred stock, as further described in Note 6. Note 6 - Preferred stock and common stock

Preferred Stock

Our board of directors has the authority to designate and issue up to 10,000,000 shares of \$0.00001 par value preferred stock in one or more series, and to fix and determine the relative economic rights and preferences of preferred shares any or all of which may be greater than the rights of our common stock, as well as the authority to issue such shares without further stockholder approval. As a result, our Board of Directors could authorize the issuance of a series of preferred stock that would grant to holders preferred rights to our assets upon liquidation, the right to receive dividends before dividends are declared to holders of our common stock, and the right to the redemption of such preferred shares, together with a premium, prior to the redemption of the common stock. In addition, shares of preferred stock could be issued with terms calculated to delay or prevent a change in control or make removal of management more difficult. Preferred stock is designated 1,040,000 shares to Series A-1 at December 31, 2016 and 2015, respectively, and 500,000 to Series B.

*Series A-1 Preferred Stock*

As of December 31, 2016 and 2015, we have 1,040,000 and 1,040,000 shares of Series A-1 preferred stock issued and outstanding, respectively. Each share of the Series A-1 Preferred Stock has voting preferences of 350 votes on all matters presented to be voted on by the holders of common stock. Each holder of shares of Series A-1 Preferred Stock may, at any time, and from time to time, convert each of its shares of Series A-1 Preferred Stock into a number of fully paid and non-assessable shares of Common Stock at a 100 to one conversion.

*Series B preferred stock*

As of December 31, 2016 and 2015, we have 275,000 and zero shares of Series B preferred stock issued and outstanding, respectively. Each share of Series B is entitled to a simple dividend of 12.5% per annum. Series B Preferred Stock is automatically redeemed at zero cost by the Company and returned to the Company for cancellation, as unissued, non-designated, preferred shares in August of 2018. Series B Preferred Stock has no conversion rights and no voting rights on any matters presented to be voted on by the holders of common stock.

On August 24, 2016, the Company issued a total of 275,000 shares of Series B preferred stock in connection with three convertible notes payable totaling \$275,000 (Note 5) pursuant to a private placement memorandum.

The Company recorded a discount on the associated debt based on the relative fair value of the Series B preferred shares of \$44,000 in accordance with ASC 470-20, Debt with Conversion and Other Options. The Company calculated the value of the Series B preferred shares by calculating the present value of the annual 12.5% dividends with the following assumptions: annual dividend expense of \$34,375; term of 2 years; and cost of debt of 8.25% and accounted for them as a debt discount, which will be amortized over the term of the convertible notes payable. During the year ended December 31, 2016, the Company amortized \$7,334 of the debt discount as interest expense.

### Common Stock

We are authorized to issue up to 750 million shares of \$0.00001 par value common stock. Holders of our common stock are entitled to one vote for each share held of record on all matters submitted to a vote of the holders of our common stock. Subject to the rights of the holders of any class of our capital stock having any preference or priority over our common stock, the holders of shares of our common stock are entitled to receive dividends that are declared by our board of directors out of legally available funds. In the event of our liquidation, dissolution or winding up, the holders of our common stock are entitled to share ratably in our net assets remaining after payment of liabilities, subject to prior rights of preferred stock, if any, then outstanding. Our common stock has no preemptive rights, conversion rights, redemption rights, or sinking fund provisions, and there are no dividends in arrears or in default. All shares of our common stock have equal distribution, liquidation and voting rights and have no preferences or exchange rights.

**SUN PACIFIC POWER CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

Common stock purchase warrants

No common stock purchase warrants were issued in during the years ended December 31, 2016 or 2015. All remaining outstanding common stock purchase warrants expired during the year ended December 31, 2016.

Note 7 - Income taxes

We have recorded no provision or benefit for income taxes. The difference between tax at the statutory rate and no tax is primarily due to the full valuation allowance.

The increase in the valuation allowance was \$507,000, and \$74,000 during the years ended December 31, 2016 and 2015, respectively. A valuation allowance has been recorded in the full amount of total deferred tax assets as it has not been determined that it is more likely than not that these deferred tax assets will be realized.

As of December 31, 2016, we have net operating loss carry forwards of approximately \$1.1 million, which begin to expire in 2030 and will continue to expire through 2035 if not otherwise utilized. Our ability to use such net operating losses and tax credit carry forwards is subject to annual limitations due to change of control provisions under Sections 382 and 383 of the Internal Revenue Code, and such limitation would be significant. Realization is dependent on generating sufficient taxable income prior to expiration.

Deferred income taxes represent the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and amounts used for income tax purposes.

Significant components of our deferred tax assets and liabilities and related valuation allowances at December 31, 2016 and 2015 are as follows:
