Item 1.01. Entry into a Material Definitive Agreement.

On December 18, 2017, Aratana Therapeutics, Inc. (the “Company” or “we”) entered into a Sales Agreement (the “Sales Agreement”) with Cowen and Company, LLC. (“Cowen”) pursuant to which the Company may sell from time to time, at its option, up to an aggregate of \$50.0 million of shares of its common stock (the “Shares”) through Cowen, as sales agent. Sales of the Shares, if any, will be made under the Company’s previously filed and currently effective Registration Statement on Form S-3 (Reg. No. 333-219681), by means of ordinary brokers’ transactions on The Nasdaq Global Market or otherwise. Additionally, under the terms of the Sales Agreement, the Shares may be sold at market prices, at negotiated prices or at prices related to the prevailing market price. Cowen will use reasonable efforts to sell the Shares from time to time, based upon the Company’s instructions (including any price, time or size limits or other customary parameters or conditions the Company may impose). The Company cannot provide any assurances that it will issue any shares of its common stock pursuant to the Sales Agreement. The Company will pay Cowen a commission of 3% of the gross proceeds from the sale of the Shares, if any. The Company has also agreed to provide Cowen with customary indemnification rights. The offering of the Shares will terminate upon the earliest of (a) the sale of all of the Shares or (b) the termination of the Sales Agreement by the Company or Cowen.

The foregoing description of the Sales Agreement is not complete and is qualified in its entirety by reference to the full text of such agreement, a copy of which is filed herewith as Exhibit 10.1 to this Current Report on Form 8-K and is incorporated herein by reference.

Latham & Watkins LLP, counsel to the Company, has issued an opinion to the Company, dated December 18, 2017, regarding the validity of the shares of common stock to be issued and sold pursuant to the Sales Agreement. A copy of the opinion is filed as Exhibit 5.1 to this Current Report on Form 8-K.

This Current Report on Form 8-K shall not constitute an offer to sell or the solicitation of any offer to buy the securities discussed herein, nor shall there be any offer, solicitation, or sale of the securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

Item 8.01. Other Events.

The Company recently updated its business information as follows:

AT-003 (bupivacaine liposome injectable suspension) for cats

In December 2017, the Company received the target animal safety technical section complete letter for AT-003 (bupivacaine liposome injectable suspension) in cats from the U.S. Food and Drug Administration's ("FDA") Center for Veterinary Medicine ("CVM").

As previously announced, we completed an FDA-concurred pivotal field effectiveness study evaluating bupivacaine liposome injectable suspension for post-operative pain management in cats. The multi-center, placebo-controlled, randomized and masked pivotal field effectiveness study evaluated approximately 200 client-owned cats undergoing an elective onychectomy. Results from the study showed bupivacaine liposome injectable suspension met protocol-defined efficacy success criteria, which were statistically significant ( $p < 0.05$ ). The therapeutic candidate was well-tolerated. In October 2017, data from the study was submitted as part of the effectiveness technical section to CVM.

As previously announced, we have submitted all major technical sections to CVM, which if approved, would support the filing of a supplemental New Animal Drug Application ("NADA") with CVM to expand the NOCITA label to include cats in 2018.

AT-016 (allogeneic adipose-derived stem cells) for dogs

The Company announced it had received top-line pivotal field effectiveness study results for AT-016, an investigational adipose-derived allogeneic stem cell therapeutic candidate for the control of clinical signs associated with osteoarthritis.

On December 14, 2017, Aratana's license partner VetStem BioPharma Inc., who is responsible for the development of AT-016, shared the results of a pivotal study, which did not achieve protocol-defined efficacy

regulatory reform with respect to pet therapeutics; the volatility of the price of our common stock; our status as an emerging growth company, which could make our common stock less attractive to investors; dilution of our common stock as a result of future financings; the influence of certain significant stockholders over our business; and provisions in our charter documents and under Delaware law could delay or prevent a change in control. These and other important factors discussed under the caption “Risk Factors” in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016, filed with the Securities and Exchange Commission, or SEC, on March 14, 2017, along with our other reports filed with the SEC could cause actual results to differ materially from those indicated by the forward-looking statements made in this report.
