## PEOPLES BANCORP INC. AND SUBSIDIARIES NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

#### Note 1 Summary of Significant Accounting Policies

Basis of Presentation: The accompanying Unaudited Consolidated Financial Statements of Peoples Bancorp Inc. and its subsidiaries have been prepared in accordance with accounting principles generally accepted in the United States ("US GAAP") for interim financial information and the instructions for Form 10-Q and Article 10 of Regulation S-X. Accordingly, these financial statements do not contain all of the information and footnotes required by US GAAP for annual financial statements and should be read in conjunction with Peoples' Annual Report on Form 10-K for the fiscal year ended December 31, 2010 ("2010 Form 10-K").

The accounting and reporting policies followed in the presentation of the accompanying Unaudited Consolidated Financial Statements are consistent with those described in Note 1 of the Notes to the Consolidated Financial Statements included in Peoples' 2010 Form 10-K, as updated by the information contained in this Form 10-Q. Management has evaluated all significant events and transactions that occurred after June 30, 2011, for potential recognition or disclosure in these consolidated financial statements. In the opinion of management, these consolidated financial statements reflect all adjustments necessary to present fairly such information for the periods and dates indicated. Such adjustments are normal and recurring in nature. All significant intercompany accounts and transactions have been eliminated. The Consolidated Balance Sheet at December 31, 2010, contained herein has been derived from the audited Consolidated Balance Sheet included in Peoples' 2010 Form 10-K.

The preparation of the consolidated financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Results of operations for interim periods are not necessarily indicative of the results to be expected for the full year, due in part to seasonal variations and unusual or infrequently occurring items. Peoples' insurance income includes contingent performance based insurance commissions that are recognized by Peoples when received, which typically occurs during the first quarter of each year.

#### Note 2 Fair Value of Financial Instruments

The measurement of fair value under US GAAP uses a hierarchy intended to maximize the use of observable inputs and minimize the use of unobservable inputs. This hierarchy uses three levels of inputs to measure the fair value of assets and liabilities as follows:

Level 1: Quoted prices in active exchange markets for identical assets or liabilities; also includes certain U.S. Treasury and other U.S. government and agency securities actively traded in over-the-counter markets.

Level 2: Observable inputs other than Level 1 including quoted prices for similar assets or liabilities, quoted prices in less active markets, or other observable inputs that can be corroborated by observable market data; also includes derivative contracts whose value is determined using a pricing model with observable market inputs or can be derived principally from or corroborated by observable market data. This category generally includes certain U.S. government and agency securities, corporate debt securities, derivative instruments, and residential mortgage loans held for sale.

Level 3: Unobservable inputs supported by little or no market activity for financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation; also includes

observable inputs for single dealer nonbinding quotes not corroborated by observable market data. This category generally includes certain private equity investments, retained interests from securitizations, and certain collateralized
debt obligations.

#### **Table of Contents**

Assets measured at fair value on a recurring basis comprised the following at June 30, 2011:

		Fair Value Measurements at Reporting Date Using			
(Dollars in thousands)		Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs	
	Fair Value	(Level 1)	(Level 2)	(Level 3)	
June 30, 2011					
Obligations of:

Equity securities	3,088	2,960	128		
Total available-for-sale securities	\$613,986	\$24,684	\$589,302	<b>\$</b> —	

The fair values used by Peoples are obtained from an independent pricing service and represent either quoted market prices for the identical securities (Level 1 inputs) or fair values determined by pricing models using a market approach that considers observable market data, such as interest rate volatilities, LIBOR yield curve, credit spreads and prices from market makers and live trading systems (Level 2). The fair values of the residential and commercial mortgage-backed securities measured at fair value using Level 1 inputs at December 31, 2010 represented the purchase price of the securities since they were acquired near year-end 2010. At June 30, 2011, these securities were classified as Level 2 as a pricing model was used to value the securities, which was consistent with the rest of the classification for the sector.

Certain financial assets and financial liabilities are measured at fair value on a non-recurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). Financial assets measured at fair value on a non-recurring basis included the following:

Impaired Loans: Impaired loans are measured and reported at fair value when management believes collection of contractual interest and principal payments is doubtful. Management's determination of the fair value for these loans uses a market approach representing the estimated net proceeds to be received from the sale of the collateral based on observable market prices and market value provided by independent, licensed or certified appraisers (Level 2 inputs). At June 30, 2011, impaired loans with an aggregate outstanding principal balance of \$20.6 million were

measured and reported at a fair value of \$13.4 million. For the three and six months ended June 30, 2011, Peoples recognized losses on impaired loans of \$3.0 million and \$7.2 million, respectively, through the allowance for loan losses.

#### **Table of Contents**

Other Real Estate Owned: Other real estate owned ("OREO") is measured and reported at fair value when the current book value exceeds the estimated fair value of the property. Management's determination of the fair value for these loans uses a market approach representing the estimated net proceeds to be received from the sale of the property based on observable market prices and market value provided by independent, licensed or certified appraisers (Level 2 Inputs). At June 30, 2011, Peoples had \$3.5 million of OREO which was measured and reported at a fair value of \$2.2 million. As a result, Peoples recorded losses of \$1.3 million through earnings for the three and six months ended June 30, 2011.

The following table presents the fair values of financial assets and liabilities carried on Peoples' consolidated balance sheet, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis:

	June 30, 2011		December 31,	2010
(Dollars in thousands)	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets:				
Cash and cash equivalents	\$37,649	\$37,649	\$74,644	\$74,644
Investment securities	670,920	670,909	641,307	641,296
Loans	916,461	824,929	938,707	825,547
Financial liabilities:				
Deposits	\$1,358,826	\$1,372,923	\$1,361,600	\$1,380,336
Short-term borrowings	39,254	39,254	51,509	51,509
Long-term borrowings	151,703	160,716	157,703	164,075
Junior subordinated notes held by subsidiary trust	22,583	23,811	22,565	23,861

The methodologies for estimating the fair value of financial assets and liabilities that are measured at fair value on a recurring or non-recurring basis are discussed above. For certain financial assets and liabilities, carrying value approximates fair value due to the nature of the financial instrument. These instruments include cash and cash equivalents, demand and other non-maturity deposits and overnight borrowings. Peoples used the following methods and assumptions in estimating the fair value of the following financial instruments:

Loans: The fair value of portfolio loans assumes sale of the notes to a third-party financial investor. Accordingly, this value is not necessarily the value to Peoples if the notes were held to maturity. Peoples considered interest rate, credit and market factors in estimating the fair value of loans. In the current whole loan market, financial investors are generally requiring a much higher rate of return than the return inherent in loans if held to maturity given the lack of market liquidity. This divergence accounts for the majority of the difference in carrying amount over fair value.

Deposits: The fair value of fixed maturity certificates of deposit is estimated using a discounted cash flow calculation based on current rates offered for deposits of similar remaining maturities.

Long-term Borrowings: The fair value of long-term borrowings is estimated using discounted cash flow analysis based on rates currently available to Peoples for borrowings with similar terms.

Junior Subordinated Notes Held by Subsidiary Trust: The fair value of the junior subordinated notes held by subsidiary trust is estimated using discounted cash flow analysis based on current market rates of securities with similar risk and remaining maturity.

Bank premises and equipment, customer relationships, deposit base, banking center networks, and other information required to compute Peoples' aggregate fair value are not included in the above information. Accordingly, the above

fair values are not intended to represent the aggregate fair value of Peoples.

Peoples' investment in equity securities was comprised entirely of common stocks issued by various unrelated bank holding companies at both June 30, 2011 and December 31, 2010.

At June 30, 2011, there were no securities of a single issuer, other than U.S. Treasury and government agencies and U.S. government sponsored agencies that exceeded 10% of stockholders' equity. Peoples had pledged investment securities with a carrying value of \$370.7 million and \$394.7 million at June 30, 2011 and December 31, 2010, respectively, to secure public and trust department deposits and repurchase agreements in accordance with federal and state requirements. Peoples also pledged investment securities with carrying values of \$48.1 million and \$28.1 million at June 30, 2011 and December 31, 2010, respectively, to secure additional borrowing capacity at the Federal Home Loan Bank of Cincinnati ("FHLB") and the Federal Reserve Bank of Cleveland ("FRB").

The gross gains and gross losses realized by Peoples from sales of available-for-sale securities for the three and six months ended June 30 were as follows:

	Three Months Ended		Six Months Ended	
	June 30,			
(Dollars in thousands)	2011	2010	2011	2010
Gross gains realized	\$56	\$3,018	\$498	\$3,034
Gross losses realized	_	_	82	_
Net gain realized	\$56	\$3,018	\$416	\$3,034

The cost of investment securities sold, and any resulting gain or loss, was based on the specific identification method and recognized as of the trade date.

\_

Management systematically evaluates investment securities for other-than-temporary declines in fair value on a quarterly basis. At June 30, 2011, management concluded no individual securities were other-than-temporarily impaired since Peoples did not have the intent to sell nor was it more likely than not that Peoples would be required to sell any of the securities with an unrealized loss prior to recovery. Further, the unrealized losses at both June 30, 2011 and December 31, 2010, were attributable to changes in market interest rates and spreads since the securities were purchased.

At June 30, 2011, the residential and commercial mortgage-backed securities that have been at an unrealized loss position for less than twelve months consisted almost entirely of securities issued by U.S government sponsored agencies. Additionally, approximately 93% of the mortgage-backed securities that have been at an unrealized loss position for twelve months or more were issued by U.S government sponsored agencies. Of the remaining mortgage-backed securities, all of the underlying mortgages were originated prior to 2004. Furthermore, five of the eight bank-issued trust preferred securities were within 98% of book value, while the unrealized losses for the remaining three were primarily attributable to the floating nature of these investments and the current interest rate environment.

Of the positions with a fair value less than 90% of their book value, five of the ten securities were mortgage-backed securities issued by U.S government sponsored agencies. The remaining securities were limited to three variable rate bank-issued trust preferred securities, which had an aggregate book value of \$3.0 million and fair value of \$2.5 million at June 30, 2011, and two variable rate residential mortgage-backed securities with book and market values of \$2.0 million and \$1.7 million, respectively. Management has analyzed the underlying credit quality of these securities and concluded the unrealized losses were primarily attributable to the floating rate nature of these investments and current market interest rates.

#### **Table of Contents**

The table below presents the amortized cost, fair value and weighted-average yield of securities by contractual maturity at June 30, 2011. The average yields are based on the amortized cost. In some cases, the issuers may have the right to call or prepay obligations without call or prepayment penalties prior to the contractual maturity date. Rates are calculated on a fully tax-equivalent basis using a 35% federal income tax rate.

(Dollars in thousands) Amortized cost Obligations of:	Within 1 Ye	ear 1 to 5 Years	5 to 10 Years	Over 10 Ye	ears Total

#### Held-to-Maturity

At June 30, 2011, Peoples' held-to-maturity investments consisted of two qualified school construction bonds that are classified as held-to-maturity because of Peoples' intent and ability to hold the securities to maturity given uncertainty regarding ownership rights of associated tax credits. These securities are carried at an aggregate amortized cost of \$3.0 million and have gross unrealized losses totaling \$10,744; weighted average cash coupon and tax credit rates of 1.83% and 6.09%, respectively, and remaining contractual maturity over 10 years.

#### Other Securities

Peoples' other investment securities on the Consolidated Balance Sheets consist solely of restricted equity securities of the FHLB and the FRB. These securities are carried at cost since they do not have readily determinable fair values due to their restricted nature and Peoples does not exercise significant influence over the entities.

#### **Table of Contents**

#### Note 4 Loans

Peoples' loan portfolio consists of various types of loans originated primarily as a result of lending opportunities within Peoples' primary market areas of central and southeastern Ohio, west central West Virginia, and northeastern Kentucky markets. The major classifications of loan balances, excluding loans held for sale, were as follows:

	June 30,	December 31,
(Dollars in thousands)	2011	2010
Commercial real estate	\$430,832	\$452,875
Commercial and industrial	148,254	153,192
Real estate construction	28,136	22,478
Residential real estate	196,428	200,275
Home equity lines of credit	47,784	48,130
Consumer	86,540	81,567
Deposit account overdrafts	2,145	2,201
Total loans	\$940,119	\$960,718

Peoples has acquired various loans through business combinations for which there was, at acquisition, evidence of deterioration of credit quality since origination and for which it was probable that all contractually required payments would not be collected. The carrying amounts of these loans included in the loan balances above are summarized as follows:

	June 30,	December 31,
(Dollars in thousands)	2011	2010
Commercial real estate	\$3,245	\$3,616
Commercial and industrial	201	200
Residential real estate	16,371	17,893
Consumer	123	123
Total outstanding balance	\$19,940	\$21,832
Net carrying amount	\$19,431	\$21,229

Peoples has pledged certain loans secured by 1-4 family and multifamily residential mortgages under a blanket collateral agreement to secure borrowings from the FHLB. The amount of such pledged loans totaled \$185.6 million and \$181.8 million at June 30, 2011 and December 31, 2010, respectively. Peoples also had pledged commercial loans to secure borrowings with the Federal Reserve Bank of Cleveland. The outstanding balances of these loans totaled \$138.1 million and \$195.6 million at June 30, 2011 and December 31, 2010, respectively.

#### Nonaccrual and Past Due Loans

A loan is considered past due if any required principal and interest payments have not been received as of the date such payments were required to be made under the terms of the loan agreement. A loan may be placed on nonaccrual status regardless of whether or not such loan is considered past due. The recorded investments in loans on nonaccrual status and accruing loans delinquent for 90 days or more were as follows:

			Accruing Loa	ins
	Nonaccrual Loans		90+ Days Pas	t Due
	June 30,	December 31,	June 30,	December 31,
(Dollars in thousands)	2011	2010	2011	2010
Commercial real estate	\$27,455	\$34,392	\$—	\$ <i>-</i>
Commercial and industrial	1,325	1,714	_	_
Real estate construction				_
Residential real estate	2,358	3,790	124	27
Home equity lines of credit	283	554		_
Consumer	_			

Total \$31,421 \$40,450 \$124 \$27

#### **Table of Contents**

At December 31, 2010, nonaccrual commercial real estate loans with an aggregate carrying amount of \$951,000 were classified as held-for-sale and thus excluded for the table above. During the second quarter of 2011, one loan with a carrying value of \$379,000 was sold for a gain of \$371,000, while the remaining loans were transferred to OREO. The following table presents the aging of the recorded investment in past due loans and leases:

	Loans Past D	)ue		Current	Total	
(Dollars in thousands)	30 - 59 days	60 - 89 days	90 + Days	Total	Loans	Loans

Total	\$9,007	\$7,588	\$18,131	\$34,726	\$925,992	\$960,718

#### **Credit Quality Indicators**

As discussed in Note 1 of Peoples' 2010 Form 10-K, Peoples categorizes the majority of its loans into risk categories based upon an established risk grading matrix using a scale of 1 to 8. A description of the general characteristics of the risk grades used by Peoples is as follows:

"Pass" (grades 1 through 4): Loans in this risk category involve borrowers of acceptable-to-strong credit quality and risk who have the apparent ability to satisfy their loan obligations. Loans in this risk grade would possess sufficient mitigating factors, such as adequate collateral or strong guarantors possessing the capacity to repay the debt if required, for any weakness that may exist.

"Watch" (grade 5): Loans in this risk grade are the equivalent of the regulatory definition of "Other Assets Especially Mentioned" classification. Loans in this category possess some credit deficiency or potential weakness, which requires a high level of management attention. Potential weaknesses include declining trends in operating earnings and cash flows and /or reliance on the secondary source of repayment. If left uncorrected, these potential weaknesses may result in noticeable deterioration of the repayment prospects for the asset or in Peoples' credit position.

"Substandard" (grade 6): Loans in this risk grade are inadequately protected by the borrower's current financial condition and payment capability or of the collateral pledged, if any. Loans so classified have one or more well-defined weaknesses that jeopardizes the orderly repayment of debt. They are characterized by the distinct possibility that the bank will sustain some loss if the deficiencies are not corrected.

"Doubtful" (grade 7): Loans in this risk grade have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or orderly repayment in full, on the basis of current existing facts, conditions and values, highly questionable and improbable. Possibility of loss is extremely high, but because of certain important and reasonably specific factors that may work to the advantage and strengthening of the exposure, its classification as an estimate loss is deferred until its more exact status may be determined.

#### **Table of Contents**

"Loss" (grade 8): Loans in this risk grade are considered to be non-collectible and of such little value that their continuance as bankable assets is not warranted. This does not mean the loan has absolutely no recovery value, but rather it is neither practical nor desirable to defer writing off the loan, even though partial recovery may be obtained in the future. Charge-offs against the allowance for loan losses are taken in the period in which the loan becomes uncollectible. Consequently, Peoples typically does not maintain a recorded investment in loans within this category. Consumer loans and other smaller-balance loans are evaluated and categorized as "substandard", "doubtful" or "loss" based upon the regulatory definition of these classes and consistent with regulatory requirements. All other loans not evaluated individually nor meeting the regulatory conditions to be categorized as describe above would be considered as being "not rated".

The following table summarizes the risk category of Peoples' loan portfolio based upon the most recent analysis performed:

	Pass Rated	Watch	Substandard	Doubtful	Not	Total
(Dollars in thousands)	(Grades 1 - 4)	(Grade 5)	(Grade 6)	(Grade 7)	Rated	Loans
June 30, 2011
