

LINCOLN NATIONAL CORP
Form 10-Q
October 30, 2014

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended September 30, 2014

OR

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from to

Commission File Number: 1-6028

LINCOLN NATIONAL CORPORATION

(Exact name of registrant as specified in its charter)

Indiana (State or other jurisdiction of incorporation or organization)	35-1140070 (I.R.S. Employer Identification No.)
150 N. Radnor Chester Road, Suite A305, Radnor, Pennsylvania (Address of principal executive offices)	19087 (Zip Code)

(484) 583-1400

(Registrant's telephone number, including area code)

Not Applicable

(Former name, former address and former fiscal year, if changed since last report.)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of October 27, 2014, there were 259,789,727 shares of the registrant’s common stock outstanding.

LINCOLN NATIONAL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Nature of Operations and Basis of Presentation

Nature of Operations

Lincoln National Corporation and its majority owned subsidiaries (“LNC” or the “Company,” which also may be referred to as “we,” “our” or “us”) operate multiple insurance businesses through four business segments. See Note 13 for additional details. The collective group of businesses uses “Lincoln Financial Group” as its marketing identity. Through our business segments, we sell a wide range of wealth protection, accumulation and retirement income products and solutions. These products include fixed and indexed annuities, variable annuities, universal life insurance (“UL”), variable universal life insurance (“VUL”), linked-benefit UL, indexed UL, term life insurance, employer-sponsored retirement plans and services, and group life, disability and dental.

Basis of Presentation

The accompanying unaudited consolidated financial statements are prepared in accordance with United States of America generally accepted accounting principles (“GAAP”) for interim financial information and with the instructions for the Securities and Exchange Commission (“SEC”) Quarterly Report on Form 10-Q, including Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by GAAP for complete financial statements. Therefore, the information contained in the Notes to Consolidated Financial Statements included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2013 (“2013 Form 10-K”), should be read in connection with the reading of these interim unaudited consolidated financial statements.

Certain GAAP policies, which significantly affect the determination of financial position, results of operations and cash flows, are summarized in our 2013 Form 10-K.

In the opinion of management, these statements include all normal recurring adjustments necessary for a fair presentation of the Company’s results. Operating results for the nine month period ended September 30, 2014, are not necessarily indicative of the results that may be expected for the full year ending December 31, 2014. All material inter-company accounts and transactions have been eliminated in consolidation.

2. New Accounting Standards

Adoption of New Accounting Standards

Financial Services – Investment Companies Topic

In June 2013, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2013-08, “Amendments to the Scope, Measurement, and Disclosure Requirements” (“ASU 2013-08”), which provides comprehensive accounting guidance for assessing whether an entity is an investment company. For a more detailed description of ASU 2013-08, see “Future Adoption of New Accounting Standards – Financial Services – Investment Companies Topic” in Note 2 of our 2013 Form 10-K. We adopted the requirements in ASU 2013-08 effective January 1, 2014, and evaluated all of our entities under the investment company criteria defined in ASU 2013-08. The adoption of ASU 2013-08 did not have an effect on our consolidated financial condition and results of operations.

Income Taxes Topic

In July 2013, the FASB issued ASU No. 2013-11, “Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists” (“ASU 2013-11”) in order to explicitly define the financial statement presentation requirements in GAAP. For a more detailed description of ASU 2013-11, see “Future Adoption of New Accounting Standards – Income Taxes Topic” in Note 2 of our 2013 Form 10-K. We adopted the requirements of ASU 2013-11 effective January 1, 2014. The adoption of ASU 2013-11 did not have an effect on the deferred tax asset or liability classification on our balance sheet and did not result in any additional disclosures to our financial statements.

Other Expenses Topic

In July 2011, the FASB issued ASU No. 2011-06, “Fees Paid to the Federal Government by Health Insurers” (“ASU 2011-06”) in order to address the question of how health insurers should recognize and classify fees mandated by the Patient Protection and Affordable Care Act as amended by the Health Care and Education Reconciliation Act. For a more detailed description of ASU 2011-06, see “Future Adoption of New Accounting Standards – Other Expenses Topic” in Note 2 of our 2013 Form 10-K. We adopted the requirements of ASU 2011-06 effective January 1, 2014. The adoption of ASU 2011-06 did not have a material effect on our consolidated financial condition and results of operations.

Future Adoption of New Accounting Standards

Investments – Equity Method and Joint Ventures Topic

In January 2014, the FASB issued ASU No. 2014-01, “Accounting for Investments in Qualified Affordable Housing Projects” (“ASU 2014-01”) in response to stakeholders’ feedback that the presence of certain conditions in order to apply the effective yield method to investments in qualified affordable housing projects may be overly restrictive and could result in certain investments being accounted for under a method of accounting that may not fairly represent the economics of the investments. For a more detailed description of ASU 2014-01, see “Future Adoption of New Accounting Standards – Investments – Equity Method and Joint Ventures” in Note 2 of our 2013 Form 10-K. We will adopt the requirements of ASU 2014-01 effective January 1, 2015, and do not expect the adoption will have a material effect on our consolidated financial condition and results of operations.

Revenue from Contracts with Customers Topic

In May 2014, the FASB issued ASU No. 2014-09, “Revenue from Contracts with Customers” (“ASU 2014-09”) in order to clarify the principles of recognizing revenue. ASU 2014-09 establishes the core principle of recognizing revenue to depict the transfer of promised goods or services in an amount that reflects the consideration the entity expects to be entitled in exchange for those goods or services. The FASB defines a five-step process that systematically identifies the various components of the revenue recognition process, culminating with the recognition of revenue upon satisfaction of an entity’s performance obligation. By completing all five steps of the process, the core principles of revenue recognition will be achieved. The amendments in ASU 2014-09 are effective for annual and interim reporting periods beginning after December 15, 2016, with early adoption prohibited. We will adopt the requirements of ASU 2014-09 effective January 1, 2017, and are currently evaluating the impact of the adoption on our consolidated financial condition and results of operations.

Transfers and Servicing Topic

In June 2014, the FASB issued ASU No. 2014-11, “Repurchase-to-Maturity Transactions, Repurchase Financings and Disclosures” (“ASU 2014-11”) in order to eliminate a distinction in current accounting guidance related to certain repurchase agreements. The FASB noted that the distinction in the accounting guidance was not warranted because in all types of repurchase transactions the transferor retains exposure to the transferred financial assets and obtains important benefits from those assets through the term of the transaction. ASU 2014-11 amends current accounting guidance to require repurchase-to-maturity transactions and linked repurchase financings to be accounted for as secured borrowings, which is consistent with the accounting for other repurchase agreements. In addition, ASU 2014-11 includes new disclosure requirements related to transfers accounted for as sales that are economically similar to repurchase agreements, and information about the types of collateral pledged in repurchase agreements and similar

transactions accounted for as secured borrowings. The amendments in ASU 2014-11 are effective for annual and interim reporting periods beginning after December 15, 2014, with early adoption prohibited. Changes in accounting for transactions outstanding on the effective date are reported as a cumulative-effect adjustment to retained earnings as of the beginning of the period of adoption. The disclosures are not required to be presented for comparative periods before the effective date. We will adopt the requirements of ASU 2014-11 effective January 1, 2015, and are currently evaluating the impact of the adoption on our consolidated financial condition and results of operations.

3. Variable Interest Entities (“VIEs”)

Consolidated VIEs

See Note 4 in our 2013 Form 10-K for a detailed discussion of our consolidated VIEs, which information is incorporated herein by reference.

The following summarizes information regarding the credit-linked note (“CLN”) structures (dollars in millions) as of September 30, 2014:

	Amount and Date of Issuance

Total return swap	1	402	-	1	361	-
Total assets (1)	1	\$ 402	\$ 598	1	\$ 361	\$ 697
Liabilities						
Non-qualifying hedges:						
Credit default swaps	2	\$ 600	\$ 17	2	\$ 600	\$ 27
Contingent forwards	2	-	-	2	-	-
Total liabilities (2)	4	\$ 600	\$ 17	4	\$ 600	\$ 27

- (1) Reported in variable interest entities' fixed maturity securities on our Consolidated Balance Sheets.
- (2) Reported in variable interest entities' liabilities on our Consolidated Balance Sheets.

For details related to the fixed maturity available-for-sale ("AFS") securities for these VIEs, see Note 4.

As described more fully in Note 1 of our 2013 Form 10-K, we regularly review our investment holdings for other-than-temporary impairment ("OTTI"). Based upon this review, we believe that the AFS fixed maturity securities were not other-than-temporarily impaired as of September 30, 2014.

The gains (losses) for the consolidated VIEs (in millions) recorded on our Consolidated Statements of Comprehensive Income (Loss) were as follows:

	For the Three Months Ended September 30, 2014		For the Nine Months Ended September 30, 2013	
Non-Qualifying Hedges				
Credit default swaps	\$ (7)	\$ 35	\$ 10	\$ 61
Contingent forwards	-	-	-	-
Total non-qualifying hedges (1)	\$ (7)	\$ 35	\$ 10	\$ 61

(1) Reported in realized gain (loss) on our Consolidated Statements of Comprehensive Income (Loss).

Unconsolidated VIEs

See Note 4 in our 2013 Form 10-K for a detailed discussion of our unconsolidated VIEs, which information is incorporated herein by reference.

Effective December 31, 2010, we issued a \$500 million long-term senior note in exchange for a corporate bond AFS security of like principal and duration from a non-affiliated VIE. For a more detailed description of this transaction, see “Unconsolidated VIEs” in Note 4 of our 2013 Form 10-K. Effective September 30, 2014, we terminated our \$500 million long-term senior note financing arrangement and entered into a new transaction with the same non-affiliated VIE whose primary activities are to acquire, hold and issue notes and loans, pay and collect interest on the notes and loans, and enter into derivative instruments. Under this new transaction, we issued a \$697 million long-term senior note to the non-affiliated VIE in exchange for a corporate bond AFS security of like principal and duration that was assigned to one of our subsidiaries. The outstanding principal balance of this new long-term senior note is variable in nature, moving concurrently with any variability in the face amount of the corporate bond AFS security up to a maximum amount of \$1.1 billion. We have concluded that we are not the primary beneficiary of the non-affiliated VIE because we do not have power over the activities that most significantly affect its economic performance. In addition, the terms of the senior note provide us with a set-off right with the corporate bond AFS security we purchased from the VIE; therefore, neither appears on our Consolidated Balance Sheets. The VIE has entered into a total return swap with an unaffiliated third party that supports any necessary principal funding of the corporate bond AFS security required by our subsidiaries while the security is outstanding.

We invest in certain limited partnerships (“LPs”) that operate qualified affordable housing projects that we have concluded are VIEs. We receive returns from the LPs in the form of income tax credits that are guaranteed by creditworthy third parties, and our exposure to loss is limited to the capital we invest in the LPs. We are not the primary beneficiary of these VIEs as we do not have the power to direct the most significant activities of the LPs. Our maximum exposure to loss was \$70 million and \$77 million as of September 30, 2014, and December 31, 2013, respectively.

4. Investments

AFS Securities

See Note 1 in our 2013 Form 10-K for information regarding our accounting policy relating to AFS securities, which also includes additional disclosures regarding our fair value measurements.

The amortized cost, gross unrealized gains, losses and OTTI and fair value of AFS securities (in millions) were as follows:

	As of September 30, 2014				
	Amortized Cost	Gross Gains	Unrealized Losses	OTTI	Fair Value
Fixed maturity securities:					
Corporate bonds	\$ 68,077	\$ 6,175	\$ 369	\$ 85	\$ 73,798
U.S. government bonds	365	38	1	-	402
Foreign government bonds	489	62	-	-	551
Residential mortgage-backed securities ("RMBS")	4,063	267	-	21	4,309
Commercial mortgage-backed securities ("CMBS")	607	29	-	14	622
Collateralized loan obligations ("CLOs")	287	-	1	-	286
State and municipal bonds	3,709	716	5	-	4,420
Hybrid and redeemable preferred securities	887	110	37	-	960
VIEs' fixed maturity securities	586	12	-	-	598
Total fixed maturity securities	79,070	7,409	413	120	85,946
Equity securities	217	17	-	-	234
Total AFS securities	\$ 79,287	\$ 7,426	\$ 413	\$ 120	\$ 86,180

	As of December 31, 2013				
	Amortized Cost	Gross Gains	Unrealized Losses	OTTI	Fair Value

Fixed maturity securities:					
Corporate bonds	\$ 65,808	\$ 4,374	\$ 1,157	\$ 90	\$ 68,935
U.S. government bonds	355	26	14	-	367
Foreign government bonds	505	45	1	-	549
RMBS	4,135	256	10	31	4,350
CMBS	713	36	4	17	728
CLOs	232	-	1	6	225
State and municipal bonds	3,638	308	27	-	3,919
Hybrid and redeemable preferred securities	967	89	51	-	1,005
VIEs' fixed maturity securities	682	15	-	-	697
Total fixed maturity securities	77,035	5,149	1,265	144	80,775
Equity securities	182	19	-	-	201
Total AFS securities	\$ 77,217	\$ 5,168	\$ 1,265	\$ 144	\$ 80,976

The amortized cost and fair value of fixed maturity AFS securities by contractual maturities (in millions) as of September 30, 2014, were as follows:

	Amortized Cost	Fair Value
Due in one year or less	\$ 2,338	\$ 2,388
Due after one year through five years	17,352	18,852
Due after five years through ten years	22,426	23,467
Due after ten years	31,997	36,022
Subtotal	74,113	80,729
Mortgage-backed securities ("MBS")	4,670	4,931
CLOs	287	286
Total fixed maturity AFS securities	\$ 79,070	\$ 85,946

Actual maturities may differ from contractual maturities because issuers may have the right to call or pre-pay obligations.

The fair value and gross unrealized losses, including the portion of OTTI recognized in other comprehensive income (loss) (“OCI”), of AFS securities (dollars in millions), aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, were as follows:

	As of September 30, 2014					
	Less Than or Equal to Twelve Months		Greater Than Twelve Months		Total	
	Fair Value	Gross Unrealized Losses and OTTI	Fair Value	Gross Unrealized Losses and OTTI	Fair Value	Gross Unrealized Losses and OTTI
Fixed maturity securities:

For information regarding our investments in VIEs, see Note 3.

We perform detailed analysis on the AFS securities backed by pools of residential and commercial mortgages that are most at risk of impairment based on factors discussed in Note 1 in our 2013 Form 10-K. Selected information for these securities in a gross unrealized loss position (in millions) was as follows:

	As of September 30, 2014		
	Amortized Cost	Fair Value	Unrealized Loss
Total			
AFS securities backed by pools of residential mortgages	\$ 1,088	\$ 1,024	\$ 64
AFS securities backed by pools of commercial mortgages	148	134	14
Total	\$ 1,236	\$ 1,158	\$ 78
Subject to Detailed Analysis			
AFS securities backed by pools of residential mortgages	\$ 790	\$ 731	\$ 59
AFS securities backed by pools of commercial mortgages	26	25	1
Total	\$ 816	\$ 756	\$ 60

	As of December 31, 2013		
	Amortized Cost	Fair Value	Unrealized Loss
Total			
AFS securities backed by pools of residential mortgages	\$ 1,261	\$ 1,146	\$ 115
AFS securities backed by pools of commercial mortgages	193	169	24
Total	\$ 1,454	\$ 1,315	\$ 139
Subject to Detailed Analysis			
AFS securities backed by pools of residential mortgages	\$ 933	\$ 833	\$ 100
AFS securities backed by pools of commercial mortgages	29	24	5
Total	\$ 962	\$ 857	\$ 105

The fair value, gross unrealized losses, the portion of OTTI recognized in OCI (in millions) and number of AFS securities where the fair value had declined and remained below amortized cost by greater than 20% were as follows:

	As of September 30, 2014			
	Fair Value	Gross Unrealized Losses		Number of Securities (1)
		OTTI		
Less than six months	\$ 14	\$ -	\$ 7	3
Nine months or greater, but less than twelve months	1	-	-	3
Twelve months or greater	242	58	51	77
Total	\$ 257	\$ 58	\$ 58	83

	As of December 31, 2013			
	Fair Value	Gross Unrealized Losses		Number of Securities (1)
		OTTI		
Less than six months	\$ 1	\$ 1	\$ -	4
Six months or greater, but less than nine months	7	3	-	1
Nine months or greater, but less than twelve months	59	19	-	4
Twelve months or greater	349	92	81	92
Total	\$ 416	\$ 115	\$ 81	101

(1) We may reflect a security in more than one aging category based on various purchase dates.

We regularly review our investment holdings for OTTI. Our gross unrealized losses, including the portion of OTTI recognized in OCI, on AFS securities decreased by \$876 million for the nine months ended September 30, 2014. As discussed further below, we believe the unrealized loss position as of September 30, 2014, did not represent OTTI as (i) we did not intend to sell the fixed maturity AFS securities; (ii) it is not more likely than not that we will be required to sell the fixed maturity AFS securities before recovery of their amortized cost basis; (iii) the estimated future cash flows were equal to or greater than the amortized cost basis of the debt securities; and (iv) we had the ability and intent to hold the equity AFS securities for a period of time sufficient for recovery.

Based upon this evaluation as of September 30, 2014, management believes we have the ability to generate adequate amounts of cash from our normal operations (e.g., insurance premiums and fees and investment income) to meet cash requirements with a prudent margin of safety without requiring the sale of our temporarily-impaired securities.

As of September 30, 2014, the unrealized losses associated with our corporate bond securities were attributable primarily to securities that were backed by individual issuer companies. For individual issuers, we performed detailed analysis of the financial performance of the issuer and determined that we expected to recover the entire amortized cost for each security.

As of September 30, 2014, the unrealized losses associated with our MBS and commercial real estate (“CRE”) collateralized debt obligations (“CDOs”) were attributable primarily to collateral losses and credit spreads. We assessed our MBS and CRE CDOs for credit impairment using a cash flow model that incorporates key assumptions including default rates, severities and prepayment rates. We estimated losses for a security by forecasting the underlying loans in each transaction. The forecasted loan performance was used to project cash flows to the various tranches in the structure, as applicable. Our forecasted cash flows also considered, as applicable, independent industry analyst reports and forecasts, sector credit ratings and other independent market data. Based upon our assessment of the expected credit losses of the security given the performance of the underlying collateral compared to our subordination or other credit enhancement, we expected to recover the entire amortized cost basis of each temporarily-impaired security.

As of September 30, 2014, the unrealized losses associated with our hybrid and redeemable preferred securities were attributable primarily to wider credit spreads caused by illiquidity in the market and subordination within the capital structure, as well as credit risk of specific issuers. For our hybrid and redeemable preferred securities, we evaluated the financial performance of the issuer based upon credit performance and investment ratings and determined that we expected to recover the entire amortized cost of each security.

Changes in the amount of credit loss of OTTI recognized in net income (loss) where the portion related to other factors was recognized in OCI (in millions) on fixed maturity AFS securities were as follows:

	For the Three Months Ended September 30, 2014		For the Nine Months Ended September 30, 2013	
Balance as of beginning-of-period	\$ 389	\$ 413	\$ 404	\$ 424
Increases attributable to:				

Credit losses on securities for which an OTTI was not previously recognized	1	6	2	26
Credit losses on securities for which an OTTI was previously recognized	4	16	12	37
Decreases attributable to:				
Securities sold	(17)	(16)	(41)	(68)
Balance as of end-of-period	\$ 377	\$ 419	\$ 377	\$ 419

During the nine months ended September 30, 2014 and 2013, we recorded credit losses on securities for which an OTTI was not previously recognized as we determined the cash flows expected to be collected would not be sufficient to recover the entire amortized cost basis of the debt security. The credit losses we recorded on securities for which an OTTI was not previously recognized were attributable primarily to one or a combination of the following reasons:

- Failure of the issuer of the security to make scheduled payments;
- Deterioration of creditworthiness of the issuer;
- Deterioration of conditions specifically related to the security;
- Deterioration of fundamentals of the industry in which the issuer operates; and
- Deterioration of the rating of the security by a rating agency.

We recognize the OTTI attributed to the noncredit portion as a separate component in OCI referred to as unrealized OTTI on AFS securities.

Details of the amount of credit loss of OTTI recognized in net income (loss) for which a portion related to other factors was recognized in OCI (in millions), were as follows:

	As of September 30, 2014				
	Gross Unrealized Losses			Fair	OTTI in Credit
	Amortized Cost	Gains	OTTI	Value	Losses
Corporate bonds	\$ 280	\$ 34	\$ 35	\$ 279	\$ 125
RMBS	472	27	10	489	187
CMBS	48	4	12	40	65
Total	\$ 800	\$ 65	\$ 57	\$ 808	\$ 377

	As of December 31, 2013				
	Gross Unrealized Losses			Fair	OTTI in Credit
	Amortized Cost	Gains	OTTI	Value	Losses
Corporate bonds	\$ 265	\$ 18	\$ 49	\$ 234	\$ 133
RMBS	550	18	18	550	184
CMBS	35	4	12	27	87
Total	\$ 850	\$ 40	\$ 79	\$ 811	\$ 404

Mortgage Loans on Real Estate

See Note 1 in our 2013 Form 10-K for information regarding our accounting policy relating to mortgage loans on real estate.

Mortgage loans on real estate principally involve commercial real estate. The commercial loans are geographically diversified throughout the U.S. with the largest concentrations in California and Texas, which accounted for 23% and 9%, respectively, of mortgage loans on real estate as of September 30, 2014, and December 31, 2013.

The following provides the current and past due composition of our mortgage loans on real estate (in millions):

	As of September 30, 2014	As of December 31, 2013
Current	\$ 7,457	\$ 7,200
60 to 90 days past due	-	4
Greater than 90 days past due	8	3
Valuation allowance associated with impaired mortgage loans on real estate	(3)	(3)
Unamortized premium (discount)	4	6
Total carrying value	\$ 7,466	\$ 7,210

The number of impaired mortgage loans on real estate, each of which had an associated specific valuation allowance, and the carrying value of impaired mortgage loans on real estate (dollars in millions) were as follows:

	As of September 30, 2014	As of December 31, 2013
Number of impaired mortgage loans on real estate	3	3
Principal balance of impaired mortgage loans on real estate	\$ 27	\$ 27
Valuation allowance associated with impaired mortgage loans on real estate	(3)	(3)
Carrying value of impaired mortgage loans on real estate	\$ 24	\$ 24

The changes in the valuation allowance associated with impaired mortgage loans on real estate (in millions) were as follows:

	As of September 30, 2014	As of December 31, 2013
Balance as of beginning-of-year	\$ 3	\$ 21
Additions	-	3
Charge-offs, net of recoveries	-	(21)
Balance as of end-of-period	\$ 3	\$ 3

The average carrying value on the impaired mortgage loans on real estate (in millions) was as follows:

	For the Three Months Ended September 30, 2014		For the Nine Months Ended September 30, 2013	
	2014	2013	2014	2013
Average carrying value for impaired mortgage loans on real estate	\$ 24	\$ 31	\$ 24	\$ 37
Interest income recognized on impaired mortgage loans on real estate	-	-	1	1
Interest income collected on impaired mortgage loans on real estate	-	-	1	1

As described in Note 1 in our 2013 Form 10-K, we use the loan-to-value and debt-service coverage ratios as credit quality indicators for our mortgage loans, which were as follows (dollars in millions):

Edgar Filing: LINCOLN NATIONAL CORP - Form 10-Q

	As of September 30, 2014			As of December 31, 2013		
	Carrying Value	% of Total	Debt-Service Coverage Ratio	Carrying Value	% of Total	Debt-Service Coverage Ratio
Less than 65%	\$ 6,480	86.8%	1.86	\$ 6,026	83.6%	1.78
65% to 74%	663	8.9%	1.54	744	10.3%	1.42
75% to 100%	292	3.9%	0.81	402	5.6%	0.83
Greater than 100%	31	0.4%	0.76	35	0.5%	0.78
Total mortgage loans on real estate	\$ 7,466	100.0%		\$ 7,207	100.0%	

Alternative Investments

As of September 30, 2014, and December 31, 2013, alternative investments included investments in 152 and 121 different partnerships, respectively, and the portfolio represented approximately 1% of our overall invested assets.

Realized Gain (Loss) Related to Certain Investments

The detail of the realized gain (loss) related to certain investments (in millions) was as follows:

	For the Three Months Ended September 30, 2014		For the Nine Months Ended September 30, 2013	
Fixed maturity AFS securities:				
Gross gains	\$ 4	\$ 5	\$ 23	\$ 17
Gross losses	(6)	(28)	(18)	(73)
Equity AFS securities:				
Gross gains	2	1	5	7
Gross losses	-	(1)	-	(2)
Gain (loss) on other investments	-	(2)	3	(3)
Associated amortization of DAC, VOBA, DSI and DFEL and changes in other contract holder funds	(7)	(8)	(24)	(19)
Total realized gain (loss) related to certain investments, pre-tax	\$ (7)	\$ (33)	\$ (11)	\$ (73)

Details underlying write-downs taken as a result of OTTI (in millions) that were recognized in net income (loss) and included in realized gain (loss) on AFS securities above, and the portion of OTTI recognized in OCI (in millions) were as follows:

	For the Three Months Ended September 30, 2014		For the Nine Months Ended September 30, 2013	
OTTI Recognized in Net Income (Loss)				
Fixed maturity securities:				
Corporate bonds	\$ (2)	\$ (11)	\$ (7)	\$ (21)

RMBS	(1)	(10)	(4)	(25)

Equity securities	-	(1)	-	(1)
Gross OTTI recognized in net income (loss)	(5)	(23)	(14)	(63)
Associated amortization of DAC, VOBA, DSI and DFEL	1	4	3	11
Net OTTI recognized in net income (loss), pre-tax	\$ (4)	\$ (19)	\$ (11)	\$ (52)

Portion of OTTI Recognized in OCI

Gross OTTI recognized in OCI	\$ 2	\$ 4	\$ 11	\$ 10
Change in DAC, VOBA, DSI and DFEL	-	(1)	(1)	(1)
Net portion of OTTI recognized in OCI, pre-tax	\$ 2	\$ 3	\$ 10	\$ 9

Determination of Credit Losses on Corporate Bonds and CDOs

As of September 30, 2014, and December 31, 2013, we reviewed our corporate bond and CDO portfolios for potential shortfall in contractual principal and interest based on numerous subjective and objective inputs. The factors used to determine the amount of credit loss for each individual security, include, but are not limited to, near term risk, substantial discrepancy between book and market value, sector or company-specific volatility, negative operating trends and trading levels wider than peers.

Credit ratings express opinions about the credit quality of a security. Securities rated investment grade, that is those rated BBB- or higher by Standard & Poor's ("S&P") Rating Services or Baa3 or higher by Moody's Investors Service ("Moody's"), are generally considered by the rating agencies and market participants to be low credit risk. As of September 30, 2014, and December 31, 2013, 95% and 96%, respectively, of the fair value of our corporate bond portfolio was rated investment grade. As of September 30, 2014, and December 31, 2013, the portion of our corporate bond portfolio rated below investment grade had an amortized cost of \$3.5 billion and \$3.0 billion,

respectively, and a fair value of \$3.5 billion and \$2.9 billion, respectively. As of September 30, 2014, and December 31, 2013, 96% and 94%, respectively, of the fair value of our CDO portfolio was rated investment grade. As of September 30, 2014, and December 31, 2013, the portion of our CDO portfolio rated below investment grade had an amortized cost of \$12 million and \$16 million, respectively, and fair value of \$12 million and \$13 million, respectively. Based upon the analysis discussed above, we believe as of September 30, 2014, and December 31, 2013, that we would recover the amortized cost of each fixed maturity security.

Determination of Credit Losses on MBS

As of September 30, 2014, and December 31, 2013, default rates were projected by considering underlying MBS loan performance and collateral type. Projected default rates on existing delinquencies vary between approximately 10% to 100% depending on loan type and severity of delinquency status. In addition, we estimate the potential contributions of currently performing loans that may become delinquent in the future based on the change in delinquencies and loan liquidations experienced in the recent history. Finally, we develop a default rate timing curve by aggregating the defaults for all loans in the pool (delinquent loans, foreclosure and real estate owned and new delinquencies from currently performing loans) and the associated loan-level loss severities.

We use certain available loan characteristics such as lien status, loan sizes and occupancy to estimate the loss severity of loans. Second lien loans are assigned 100% severity, if defaulted. For first lien loans, we assume a minimum of 30% severity with higher severity assumed for investor properties and further adjusted by housing price assumptions. With the default rate timing curve and loan-level severity, we derive the future expected credit losses.

Payables for Collateral on Investments

The carrying value of the payables for collateral on investments (in millions) included on our Consolidated Balance Sheets and the fair value of the related investments or collateral consisted of the following:

	As of September 30, 2014		As of December 31, 2013	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Collateral payable for derivative investments (1)	\$ 1,276	\$ 1,276	\$ 638	\$ 638
Securities pledged under securities lending agreements (2)	197	191	184	178
Securities pledged under repurchase agreements (3)	205	215	530	553
Securities pledged for Term Asset-Backed Securities				

Loan Facility (“TALF”) (4)	-	-	36	49
Investments pledged for Federal Home Loan Bank of Indianapolis (“FHLBI”) (5)	2,175	3,535	1,850	3,127
Total payables for collateral on investments	\$ 3,853	\$ 5,217	\$ 3,238	\$ 4,545

- (1) We obtain collateral based upon contractual provisions with our counterparties. These agreements take into consideration the counterparties’ credit rating as compared to ours, the fair value of the derivative investments and specified thresholds that if exceeded result in the receipt of cash that is typically invested in cash and invested cash. See Note 5 for details about maximum collateral potentially required to post on our credit default swaps.
- (2) Our pledged securities under securities lending agreements are included in fixed maturity AFS securities on our Consolidated Balance Sheets. We generally obtain collateral in an amount equal to 102% and 105% of the fair value of the domestic and foreign securities, respectively. We value collateral daily and obtain additional collateral when deemed appropriate. The cash received in our securities lending program is typically invested in cash and invested cash or fixed maturity AFS securities.
- (3) Our pledged securities under repurchase agreements are included in fixed maturity AFS securities on our Consolidated Balance Sheets. We obtain collateral in an amount equal to 95% of the fair value of the securities, and our agreements with third parties contain contractual provisions to allow for additional collateral to be obtained when necessary. The cash received in our repurchase program is typically invested in fixed maturity AFS securities.
- (4) Our pledged securities for TALF are included in fixed maturity AFS securities on our Consolidated Balance Sheets. We obtain collateral in an amount that has typically averaged 90% of the fair value of the TALF securities. The cash received in these transactions is invested in fixed maturity AFS securities.
- (5) Our pledged investments for FHLBI are included in fixed maturity AFS securities and mortgage loans on real estate on our Consolidated Balance Sheets. The FHLBI overcollateralization requirements for the assets that we pledge are generally 105% to 115% of the fair value for fixed maturity AFS securities and 165% to 175% of the unpaid principal balance for mortgage loans on real estate. The cash received in these transactions is primarily invested in cash and invested cash or fixed maturity AFS securities.

For information related to balance sheet offsetting of our securities lending and repurchase agreements, see Note 5.

Increase (decrease) in payables for collateral on investments (in millions) included on the Consolidated Statements of Cash Flows consisted of the following:

	For the Nine Months Ended September 30,	
	2014	2013
Collateral payable for derivative investments	\$ 638	\$ (1,610)
Securities pledged under securities lending agreements	13	(17)
Securities pledged under repurchase agreements	(325)	250
Securities pledged for TALF	(36)	(1)
Investments pledged for FHLBI	325	750
Total increase (decrease) in payables for collateral on investments	\$ 615	\$ (628)

Investment Commitments

As of September 30, 2014, our investment commitments were \$1.1 billion, which included \$525 million of LPs, \$316 million of mortgage loans on real estate and \$282 million of private debt investments.

Concentrations of Financial Instruments

As of September 30, 2014, and December 31, 2013, our most significant investments in one issuer were our investments in securities issued by the Federal Home Loan Mortgage Corporation with a fair value of \$2.4 billion and \$2.6 billion, respectively, or 2% and 3%, respectively, of our invested assets portfolio, and our investments in securities issued by Fannie Mae with a fair value of \$1.4 billion and \$1.7 billion, respectively, or 1% and 2%, respectively, of our invested assets portfolio. These investments are included in corporate bonds in the tables above.

As of September 30, 2014, and December 31, 2013, our most significant investments in one industry were our investment securities in the electric industry with a fair value of \$9.7 billion and \$8.7 billion, respectively, or 10% and 9%, respectively, of our invested assets portfolio, and our investment securities in the banking industry with a fair value of \$5.0 billion, or 5% of our invested assets portfolio.

5. Derivative Instruments

We maintain an overall risk management strategy that incorporates the use of derivative instruments to minimize significant unplanned fluctuations in earnings that are caused by interest rate risk, foreign currency exchange risk, equity market risk, default risk, basis risk and credit risk. See Note 1 in our 2013 Form 10-K for a detailed discussion of the accounting treatment for derivative instruments. See Note 6 in our 2013 Form 10-K for a detailed discussion of our derivative instruments and use of them in our overall risk management strategy, which information is incorporated herein by reference. See Note 12 for additional disclosures related to the fair value of our derivative instruments and Note 3 for derivative instruments related to our consolidated VIEs.

We have derivative instruments with off-balance-sheet risks whose notional or contract amounts exceed the credit exposure. Outstanding derivative instruments with off-balance-sheet risks (in millions) were as follows:

	As of September 30, 2014			As of December 31, 2013		
	Notional Amounts	Fair Value Asset	Liability	Notional Amounts	Fair Value Asset	Liability
Qualifying Hedges						
Cash flow hedges:						
Interest rate contracts (1)	\$ 3,678	\$ 499	\$ 151	\$ 4,339	\$ 562	\$ 148

Gains (losses) (in millions) on derivative instruments designated and qualifying as cash flow hedges were as follows:

	For the Three Months Ended	For the Nine Months Ended
--	-------------------------------------	---------------------------------

Edgar Filing: LINCOLN NATIONAL CORP - Form 10-Q

	September 30, 2014		September 30, 2013	
Gain (loss) recognized as a component of OCI with the offset to net investment income	\$ (3)	\$ (5)	\$ (15)	\$ (14)

As of September 30, 2014, \$20 million of the deferred net losses on derivative instruments in accumulated OCI were expected to be reclassified to earnings during the next 12 months. This reclassification would be due primarily to interest rate variances related to our interest rate swap agreements.

For the nine months ended September 30, 2014 and 2013, there were no material reclassifications to earnings due to hedged firm commitments no longer deemed probable or due to hedged forecasted transactions that had not occurred by the end of the originally specified time period.

Gains (losses) (in millions) on derivative instruments designated and qualifying as fair value hedges were as follows:

	For the Three Months Ended September 30, 2014		For the Nine Months Ended September 30, 2013	
Gain (loss) recognized as a component of OCI with the offset to interest expense	\$ 1	\$ 1	\$ 3	\$ 3

Information related to our open credit default swap liabilities for which we are the seller (dollars in millions) was as follows:

As of September 30, 2014

	Reason for	Nature of	Credit Rating of Underlying Obligation	Number of	Fair Value	Maximum Potential Payout
Maturity	Entering	Recourse	(1)	Instruments	(2)	Payout
12/20/2016 (3)	(4)	(5)	BBB-	3	\$ -	\$ 68
3/20/2017 (3)	(4)	(5)	BBB-	3	(1)	58
				6	\$ (1)	\$ 126

As of December 31, 2013

	Reason for	Nature of	Credit Rating of Underlying Obligation	Number of	Fair Value	Maximum Potential Payout
Maturity	Entering	Recourse	(1)	Instruments	(2)	Payout
12/20/2016 (3)	(4)	(5)	BBB-	3	\$ (1)	\$ 68
3/20/2017 (3)	(4)	(5)	BBB-	3	(1)	58
				6	\$ (2)	\$ 126

- (1) Represents average credit ratings based on the midpoint of the applicable ratings among Moody's, S&P and Fitch Ratings, as scaled to the corresponding S&P ratings.
- (2) Broker quotes are used to determine the market value of credit default swaps.
- (3) These credit default swaps were sold to a counterparty of the consolidated VIEs discussed in Note 4 in our 2013 Form 10-K.
- (4) Credit default swaps were entered into in order to generate income by providing default protection in return for a quarterly payment.
- (5) Sellers do not have the right to demand indemnification or compensation from third parties in case of a loss (payment) on the contract.

Details underlying the associated collateral of our open credit default swaps for which we are the seller if credit risk-related contingent features were triggered (in millions), were as follows:

	As of September 30, 2014	As of December 31, 2013
Maximum potential payout	\$ 126	\$ 126
Less: Counterparty thresholds	-	-
Maximum collateral potentially required to post	\$ 126	\$ 126

Certain of our credit default swap agreements contain contractual provisions that allow for the netting of collateral with our counterparties related to all of our collateralized financing transactions that we have outstanding. If these netting agreements were not in place, we would have been required to post \$1 million as of September 30, 2014, after considering the fair values of the associated investments counterparties' credit ratings as compared to ours and specified thresholds that once exceeded result in the payment of cash.

Credit Risk

We are exposed to credit loss in the event of non-performance by our counterparties on various derivative contracts and reflect assumptions regarding the credit or non-performance risk ("NPR"). The NPR is based upon assumptions for each counterparty's credit spread over the estimated weighted average life of the counterparty exposure less collateral held. As of September 30, 2014, the NPR adjustment was less than \$1 million. The credit risk associated with such agreements is minimized by entering into agreements from financial institutions with long-standing, superior performance records. Additionally, we maintain a policy of requiring derivative contracts to be governed by an International Swaps and Derivatives Association ("ISDA") Master Agreement. We are required to maintain minimum ratings as a matter of routine practice in negotiating ISDA agreements. Under some ISDA agreements, our insurance subsidiaries have agreed to maintain certain financial strength or claims-paying ratings. A downgrade below these levels could result in termination of derivative contracts, at which time any amounts payable by us would be dependent on the market value of the underlying derivative contracts. In certain transactions, we and the counterparty have entered into a credit support annex requiring either party to post collateral when net exposures exceed pre-determined thresholds. These thresholds vary by counterparty and credit rating. The amount of such exposure is essentially the net replacement cost or market value less collateral held for such agreements with each counterparty if the net market value is in our favor. As of September 30, 2014, our exposure was \$42 million.

The amounts recognized (in millions) by S&P credit rating of each counterparty, for which we had the right to reclaim cash collateral or were obligated to return cash collateral, were as follows:

S&P Credit Rating of Counterparty	As of September 30, 2014		As of December 31, 2013	
	Collateral Posted by Counter- Party (Held by LNC)	Posted by LNC (Held by Counter- Party)	Collateral Posted by Counter- Party (Held by LNC)	Posted by LNC (Held by Counter- Party)
AA-	\$ 49	\$ (4)	\$ 34	\$ (10)
A+	73	-	19	-
A	913	(64)	339	(183)
A-	213	-	468	(123)
BBB+	28	-	79	-
	\$ 1,276	\$ (68)	\$ 939	\$ (316)

Balance Sheet Offsetting

Information related to our derivative instruments and the effects of offsetting on our Consolidated Balance Sheets (in millions) were as follows:

	As of September 30, 2014		
	Derivative Instruments	Embedded Derivative Instruments	Total
Financial Assets

Net amount	\$ 187	\$ 1,156	\$ 1,343

6. Federal Income Taxes

The effective tax rate is the ratio of tax expense over pre-tax income (loss). The effective tax rate was 27% and 25% for the three and nine months ended September 30, 2014, respectively. The effective tax rate was 24% and 23% for the three and nine months ended September 30, 2013, respectively. The effective tax rate on pre-tax income from continuing operations was lower than the prevailing corporate federal income tax rate. Differences in the effective rates and the U.S. statutory rate of 35% were the result of certain tax preferred investment income, separate account dividends-received deductions, foreign tax credits and other tax preference items.

7. Guaranteed Benefit Features

Information on the guaranteed death benefit (“GDB”) features outstanding (dollars in millions) was as follows:

	As of September 30, 2014 (1)	As of December 31, 2013 (1)
Return of Net Deposits		
Total account value	\$ 84,253	\$ 79,391
Net amount at risk (2)	171	141
Average attained age of contract holders	62 years	61 years
Minimum Return		
Total account value	\$ 137	\$ 151
Net amount at risk (2)	26	27
Average attained age of contract holders	74 years	73 years
Guaranteed minimum return	5%	5%
Anniversary Contract Value		
Total account value	\$ 25,932	\$ 25,958
Net amount at risk (2)	623	570
Average attained age of contract holders	68 years	68 years

(1) Our variable contracts with guarantees may offer more than one type of guarantee in each contract; therefore, the amounts listed are not mutually exclusive.

(2) Represents the amount of death benefit in excess of the account balance that is subject to market volatility.

The determination of GDB liabilities is based on models that involve a range of scenarios and assumptions, including those regarding expected market rates of return and volatility, contract surrender rates and mortality experience. The following summarizes the balances of and changes in the liabilities for GDBs (in millions), which were recorded in future contract benefits on our Consolidated Balance Sheets:

	For the Nine Months Ended September 30,	
	2014	2013
Balance as of beginning-of-year	\$ 73	\$ 104
Changes in reserves	26	(12)
Benefits paid	(13)	(16)
Balance as of end-of-period	\$ 86	\$ 76

Variable Annuity Contracts

Account balances of variable annuity contracts with guarantees (in millions) were invested in separate account investment options as follows:

Asset Type	As of September 30, 2014	As of December 31, 2013
Domestic equity	\$ 48,446	\$ 47,042
International equity	18,692	18,341
Bonds	26,487	24,547
Money market	12,345	10,926
Total	\$ 105,970	\$ 100,856
Percent of total variable annuity separate account values	99%	98%

Secondary Guarantee Products

Future contract benefits and other contract holder funds include reserves for our secondary guarantee products sold through our Life Insurance segment. These UL and VUL products with secondary guarantees represented 34% of total life insurance in-force reserves as of September 30, 2014, and 40% of total sales for the nine months ended September 30, 2014.

8. Contingencies and Commitments

Regulatory bodies, such as state insurance departments, the SEC, Financial Industry Regulatory Authority and other regulatory bodies regularly make inquiries and conduct examinations or investigations concerning our compliance with, among other things, insurance laws, securities laws, laws governing the activities of broker-dealers, registered investment advisors and unclaimed property laws.

LNC and its subsidiaries are involved in various pending or threatened legal or regulatory proceedings, including purported class actions, arising from the conduct of business both in the ordinary course and otherwise. In some of the matters, very large and/or indeterminate amounts, including punitive and treble damages, are sought. Modern pleading practice in the U.S. permits considerable variation in the assertion of monetary damages or other relief. Jurisdictions may permit claimants not to specify the monetary damages sought or may permit claimants to state only that the amount sought is sufficient to invoke the jurisdiction of the trial court. In addition, jurisdictions may permit plaintiffs to allege monetary damages in amounts well exceeding reasonably possible verdicts in the jurisdiction for similar matters. This variability in pleadings, together with the actual experiences of LNC in litigating or resolving through settlement numerous claims over an extended period of time, demonstrates to management that the monetary relief which may be specified in a lawsuit or claim bears little relevance to its merits or disposition value.

Due to the unpredictable nature of litigation, the outcome of a litigation matter and the amount or range of potential loss at particular points in time is normally difficult to ascertain. Uncertainties can include how fact finders will evaluate documentary evidence and the credibility and effectiveness of witness testimony, and how trial and appellate courts will apply the law in the context of the pleadings or evidence presented, whether by motion practice, or at trial or on appeal. Disposition valuations are also subject to the uncertainty of how opposing parties and their counsel will themselves view the relevant evidence and applicable law.

We establish liabilities for litigation and regulatory loss contingencies when information related to the loss contingencies shows both that it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated. It is possible that some matters could require us to pay damages or make other expenditures or establish accruals in amounts that could not be estimated as of September 30, 2014. While the potential future charges could be material in the particular quarterly or annual periods in which they are recorded, based

on information currently known by management, management does not believe any such charges are likely to have a material adverse effect on LNC's financial condition.

See Note 13 in our 2013 Form 10-K and Note 8 in our Form 10-Q for the quarters ended March 31, 2014, and June 30, 2014, for additional discussion of commitments and contingencies, which information is incorporated herein by reference.

9. Shares and Stockholders' Equity

Common and Preferred Shares

The changes in our preferred and common stock (number of shares) were as follows:

	For the Three Months Ended September 30, 2014		For the Nine Months Ended September 30, 2013	
Series A Preferred Stock				
Balance as of beginning-of-period	-	4,164	-	9,532
Conversion of convertible preferred stock (1)	-	(450)	-	(5,818)
Redemption of convertible preferred stock	-	(3,714)	-	(3,714)
Balance as of end-of-period	-	-	-	-
Common Stock				
Balance as of beginning-of-period	260,831,708	264,316,340	262,896,701	271,402,586
Conversion of convertible preferred stock (1)	-	7,200	-	93,088
Stock issued for exercise of warrants	1,199,609	220,107	4,299,088	220,318
Stock compensation/issued for benefit plans	601,359	112,398	1,501,167	636,356
Retirement/cancellation of shares	(2,846,230)	(2,313,682)	(8,910,510)	(10,009,985)
Balance as of end-of-period	259,786,446	262,342,363	259,786,446	262,342,363
Common Stock as of End-of-Period				
Assuming conversion of preferred stock	259,786,446	262,342,363	259,786,446	262,342,363
Diluted basis	265,527,521	272,503,337	265,527,521	272,503,337

- (1) Represents the conversion of Series A preferred stock into common stock.

Our common and Series A preferred stocks are without par value.

25

Average Shares

A reconciliation of the denominator (number of shares) in the calculations of basic and diluted earnings (loss) per common share was as follows:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2014	2013	2014	2013
Weighted-average shares, as used in basic calculation	260,371,956	263,546,308	261,785,387	266,701,799
Shares to cover exercise of outstanding warrants	3,485,992	9,920,368	4,929,079	10,073,503
Shares to cover conversion of preferred stock	-	1,455	-	99,716
Shares to cover non-vested stock	1,499,529	1,601,684	1,476,448	1,411,833
Average stock options outstanding during the period	3,863,508	3,206,314	3,810,763	2,511,175
Assumed acquisition of shares with assumed proceeds from exercising outstanding warrants	(689,803)	(2,199,597)	(1,026,460)	(2,911,005)
Assumed acquisition of shares with assumed proceeds and benefits from exercising stock options (at average market price for the period)	(2,720,155)	(2,191,630)	(2,657,408)	(1,792,019)
Shares repurchaseable from measured but unrecognized stock option expense	(63,286)	(190,894)	(84,600)	(138,683)
Average deferred compensation shares	1,037,370	-	1,036,683	-
Weighted-average shares, as used in diluted calculation	266,785,111	273,694,008	269,269,892	275,956,319

In the event the average market price of LNC common stock exceeds the issue price of stock options and the options have a dilutive effect to our earnings per share (“EPS”), such options will be shown in the table above.

We have participants in our deferred compensation plans who selected LNC stock as the measure for the investment return attributable to their deferral amounts. For the three and nine months ended September 30, 2014, the effect of settling this obligation in LNC stock (“equity classification”) was more dilutive than the scenario of settling it in cash (“liability classification”). Therefore, for our EPS calculation for this period, we added these shares to the denominator and adjusted the numerator to present net income as if the shares had been accounted for under equity classification by removing the mark-to-market adjustment included in net income attributable to these deferred units of LNC stock. The amount of this adjustment was \$(2) million for the three and nine months ended September 30, 2014.

The income used in the calculation of our diluted EPS is our net income (loss) reduced by preferred stock dividends.

Accumulated OCI (“AOCI”)

The following summarizes the components and changes in AOCI (in millions):

	For the Nine Months Ended September 30,	
	2014	2013
Unrealized Gain (Loss) on AFS Securities		
Balance as of beginning-of-year	\$ 1,609	\$ 4,066
Unrealized holding gains (losses) arising during the period	3,120	(5,145)
Change in foreign currency exchange rate adjustment	(21)	10
Change in DAC, VOBA, DSI, future contract benefits and other contract holder funds	(983)	1,685
Income tax benefit (expense)	(742)	1,208
Less:		
Reclassification adjustment for gains (losses) included in net income (loss)	10	(51)
Associated amortization of DAC, VOBA, DSI and DFEL	(25)	(20)
Income tax benefit (expense)	5	25
Balance as of end-of-period	\$ 2,993	\$ 1,870
Unrealized OTTI on AFS Securities		
Balance as of beginning-of-year	\$ (78)	\$ (107)
(Increases) attributable to:		
Gross OTTI recognized in OCI during the period	(11)	(10)
Change in DAC, VOBA, DSI and DFEL	1	1
Income tax benefit (expense)	4	3
Decreases attributable to:		
Sales, maturities or other settlements of AFS securities	35	51
Change in DAC, VOBA, DSI and DFEL	(7)	(6)
Income tax benefit (expense)	(9)	(16)
Balance as of end-of-period	\$ (65)	\$ (84)
Unrealized Gain (Loss) on Derivative Instruments		
Balance as of beginning-of-year	\$ 256	\$ 163
Unrealized holding gains (losses) arising during the period	(92)	161
Change in foreign currency exchange rate adjustment	25	(12)
Change in DAC, VOBA, DSI and DFEL	2	6
Income tax benefit (expense)	23	(54)
Less:		
Reclassification adjustment for gains (losses) included in net income (loss)	(12)	(11)
Associated amortization of DAC, VOBA, DSI and DFEL	1	1
Income tax benefit (expense)	4	4
Balance as of end-of-period	\$ 221	\$ 270

Edgar Filing: LINCOLN NATIONAL CORP - Form 10-Q

Foreign Currency Translation Adjustment		
Balance as of beginning-of-year	\$ (5)	\$ (4)
Foreign currency translation adjustment arising during the period	(5)	(1)
Balance as of end-of-period	\$ (10)	\$ (5)
Funded Status of Employee Benefit Plans		
Balance as of beginning-of-year	\$ (219)	\$ (310)
Adjustment arising during the period	2	17
Income tax benefit (expense)	-	(8)
Balance as of end-of-period	\$ (217)	\$ (301)

The following summarizes the reclassifications out of AOCI (in millions) and the associated line item in the Consolidated Statements of Comprehensive Income (Loss):

	For the Nine Months Ended September 30,		
	2014	2013	
Unrealized Gain (Loss) on AFS Securities			
Gross reclassification	\$ 10	\$ (51)	Total realized gain (loss)
Associated amortization of DAC, VOBA, DSI and DFEL	(25)	(20)	Total realized gain (loss)
Reclassification before income tax benefit (expense)	(15)	(71)	Income (loss) from continuing operations before taxes
Income tax benefit (expense)	5	25	Federal income tax expense (benefit)
Reclassification, net of income tax	\$ (10)	\$ (46)	Net income (loss)
Unrealized OTTI on AFS Securities			
Gross reclassification	\$ 35	\$ 51	Total realized gain (loss)
Change in DAC, VOBA, DSI and DFEL	(7)	(6)	Total realized gain (loss)

Reclassifications before income tax benefit (expense)	(11)	(10)	Income (loss) from continuing operations before taxes
Income tax benefit (expense)	4	4	Federal income tax expense (benefit)
Reclassification, net of income tax	\$ (7)	\$ (6)	Net income (loss)

10. Realized Gain (Loss)

Details underlying realized gain (loss) (in millions) reported on our Consolidated Statements of Comprehensive Income (Loss) were as follows:

	For the Three Months Ended September 30, 2014		For the Nine Months Ended September 30, 2013	
Total realized gain (loss) related to certain investments (1)	\$ (7)	\$ (33)	\$ (11)	\$ (73)
Realized gain (loss) on the mark-to-market on certain instruments (2)	(18)	21	(31)	21
Indexed annuity and universal life net derivatives results: (3)				
Gross gain (loss)	21	(12)	(18)	(25)
Associated amortization of DAC, VOBA, DSI and DFEL	(6)	3	3	5
Variable annuity net derivatives results: (4)				
Gross gain (loss)	116	(4)	182	(29)
Associated amortization of DAC, VOBA, DSI and DFEL	(17)	(3)	(19)	(4)
Total realized gain (loss)	\$ 89	\$ (28)	\$ 106	\$ (105)

(1) See “Realized Gain (Loss) Related to Certain Investments” section in Note 4.

(2) Represents changes in the fair values of certain derivative investments (not including those associated with our variable annuity net derivatives results), reinsurance related embedded derivatives and trading securities.

(3) Represents the net difference between the change in the fair value of the S&P 500 call options that we hold and the change in the fair value of the embedded derivative liabilities of our indexed annuity and universal life products along with changes in the fair value of embedded derivative liabilities related to index call options we may purchase in the future to hedge contract holder index allocations applicable to future reset periods for our indexed annuity products.

(4) Includes the net difference in the change in embedded derivative reserves of our GLB riders and the change in the fair value of the derivative instruments we own to hedge the change in embedded derivative reserves on our GLB riders and the benefit ratio unlocking on our GDB riders, including the cost of purchasing the hedging instruments.

11. Stock-Based Compensation Plans

We sponsor stock-based compensation plans for our employees and directors and for the employees and agents of our subsidiaries that provide for the grant of stock options, performance shares (performance-vested shares as opposed to service-vested shares), stock appreciation rights (“SARs”), restricted stock units (“RSUs”) and deferred stock units (“DSUs”). We issue new shares to satisfy option exercises.

LNC stock-based awards granted were as follows:

	For the Three Months Ended September 30, 2014	For the Nine Months Ended September 30, 2014
10-year LNC stock options	14,007	490,852
Performance shares	4,834	182,149
RSUs	11,555	447,012
Non-employee:		
SARs	-	62,887
Agent stock options	-	88,311
Director DSUs	7,754	24,035

12. Fair Value of Financial Instruments

The carrying values and estimated fair values of our financial instruments (in millions) were as follows:

	As of September 30, 2014		As of December 31, 2013	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Assets				
AFS securities:				
Fixed maturity securities	\$ 85,348	\$ 85,348	\$ 80,078	\$ 80,078
VIEs' fixed maturity securities	598	598	697	697
Equity securities	234	234	201	201
Trading securities	2,134	2,134	2,282	2,282
Mortgage loans on real estate	7,466	7,792	7,210	7,386
Derivative investments (1)	1,439	1,439	881	881
Other investments	1,469	1,469	1,218	1,218
Cash and invested cash	1,821	1,821	2,364	2,364
Other assets:				
GLB reserves embedded derivatives (2)	592	592	-	-
Reinsurance recoverable	79	79	-	-
Separate account assets	122,937	122,937	117,135	117,135
Liabilities				
Future contract benefits:				
Indexed annuity and universal life contracts embedded derivatives	(1,117)	(1,117)	(1,048)	(1,048)
GLB reserves embedded derivatives	-	-	1,244	1,244
Other contract holder funds:				
Remaining guaranteed interest and similar contracts	(741)	(741)	(809)	(809)
Account values of certain investment contracts	(29,506)	(31,803)	(29,078)	(30,574)
Short-term debt	(250)	(256)	(501)	(500)
Long-term debt	(5,186)	(5,711)	(5,320)	(5,762)
Reinsurance related embedded derivatives	(141)	(141)	(108)	(108)
VIEs' liabilities – derivative instruments	(17)	(17)	(27)	(27)
Other liabilities:				
Credit default swaps	(1)	(1)	(2)	(2)
Derivative liabilities (1)	(65)	(65)	(187)	(187)
GLB reserves embedded derivatives (2)	(79)	(79)	-	-

- (1) We have master netting agreements with each of our derivative counterparties, which allow for the netting of our derivative asset and liability positions by counterparty.
- (2) Portions of our GLB reserves embedded derivatives are ceded to our third-party reinsurance counterparties. Refer to Note 5 for additional detail.

Valuation Methodologies and Associated Inputs for Financial Instruments Not Carried at Fair Value

The following discussion outlines the methodologies and assumptions used to determine the fair value of our financial instruments not carried at fair value on our Consolidated Balance Sheets. Considerable judgment is required to develop these assumptions used to measure fair value. Accordingly, the estimates shown are not necessarily indicative of the amounts that would be realized in a one-time, current market exchange of all of our financial instruments.

Mortgage Loans on Real Estate

The fair value of mortgage loans on real estate is established using a discounted cash flow method based on credit rating, maturity and future income. The ratings for mortgages in good standing are based on property type, location, market conditions, occupancy, debt-service coverage, loan-to-value, quality of tenancy, borrower and payment record. The fair value for impaired mortgage loans is based on the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's market price or the fair value of the collateral if the loan is collateral dependent. The inputs used to measure the fair value of our mortgage loans on real estate are classified as Level 2 within the fair value hierarchy.

Other Investments

The carrying value of our assets classified as other investments approximates fair value. Other investments includes primarily LPs and other privately held investments that are accounted for using the equity method of accounting and the carrying value is based on our proportional share of the net assets of the LPs. The inputs used to measure the fair value of our other investments are classified as Level 3 within the fair value hierarchy.

Other Contract Holder Funds

Other contract holder funds include remaining guaranteed interest and similar contracts and account values of certain investment contracts. The fair value for the remaining guaranteed interest and similar contracts is estimated using discounted cash flow calculations as of the balance sheet date. These calculations are based on interest rates currently offered on similar contracts with maturities that are consistent with those remaining for the contracts being valued. As of September 30, 2014, and December 31, 2013, the remaining guaranteed interest and similar contracts carrying value approximated fair value. The fair value of the account values of certain investment contracts is based on their approximate surrender value as of the balance sheet date. The inputs used to measure the fair value of our other contract holder funds are classified as Level 3 within the fair value hierarchy.

Short-Term and Long-Term Debt

The fair value of long-term debt is based on quoted market prices. For short-term debt, excluding current maturities of long-term debt, the carrying value approximates fair value. The inputs used to measure the fair value of our short-term and long-term debt are classified as Level 2 within the fair value hierarchy.

Financial Instruments Carried at Fair Value

We did not have any assets or liabilities measured at fair value on a nonrecurring basis as of September 30, 2014, or December 31, 2013, and we noted no changes in our valuation methodologies between these periods.

The following summarizes our financial instruments carried at fair value (in millions) on a recurring basis by the fair value hierarchy levels described in “Summary of Significant Accounting Policies” in Note 1 of our 2013 Form 10-K:

	As of September 30, 2014

Total, net	\$ 2,275	\$ 845	\$ 81	\$ 14	\$ 172	\$ 3,387

- (1) The changes in fair value of the interest rate swaps are offset by an adjustment to derivative investments (see Note 5).
- (2) Transfers in or out of Level 3 for AFS and trading securities are displayed at amortized cost as of the beginning-of-period. For AFS and trading securities, the difference between beginning-of-period amortized cost and beginning-of-period fair value was included in OCI and earnings, respectively, in prior periods.
- (3) Transfers in or out of Level 3 for GLB reserves embedded derivatives represent reclassifications between future contract benefits, other assets and other liabilities on our Consolidated Balance Sheets.
- (4) Amortization and accretion of premiums and discounts are included in net investment income on our Consolidated Statements of Comprehensive Income (Loss). Gains (losses) from sales, maturities, settlements and calls and OTTI are included in realized gain (loss) on our Consolidated Statements of Comprehensive Income (Loss).
- (5) Gains (losses) from sales, maturities, settlements and calls are included in realized gain (loss) on our Consolidated Statements of Comprehensive Income (Loss).
- (6) Gains (losses) from sales, maturities, settlements and calls are included in net investment income on our Consolidated Statements of Comprehensive Income (Loss).

(7) The changes in fair value of the credit default swaps and contingency forwards are included in realized gain (loss) on our Consolidated Statements of Comprehensive Income (Loss).

The following provides the components of the items included in issuances, sales, maturities, settlements and calls, net, excluding any effect of amortization of DAC, VOBA, DSI and DFEL and changes in future contract benefits, (in millions) as reported above:

The following summarizes the fair value (in millions), valuation techniques and significant unobservable inputs of the Level 3 fair value measurements as of September 30, 2014:

	Fair Value	Valuation Technique	Significant Unobservable Inputs	Assumption or Input Ranges
Assets				
Investments:				
Fixed maturity AFS and trading securities:				
Corporate bonds	\$ 1,291	Discounted cash flow	Liquidity/duration adjustment (1)	0.7 % - 12.4 %
Foreign government bonds Hybrid and redeemable	80	Discounted cash flow	Liquidity/duration adjustment (1)	1.8 % - 3.0 %
preferred securities	21	Discounted cash flow	Liquidity/duration adjustment (1)	1.8 % - 1.8 %
Equity AFS and trading securities	28	Discounted cash flow	Liquidity/duration adjustment (1)	4.3 % - 5.8 %
Other assets – GLB reserves embedded derivatives and reinsurance recoverable	671	Discounted cash flow	Long-term lapse rate (2) Utilization of guaranteed withdrawals (3) Claims utilization factor (4) Premiums utilization factor (4) NPR (5) Mortality rate (6) Volatility (7)	1 % - 30 % 90 % - 100 % 60 % - 100 % 70 % - 140 % 0.02 % - 0.36 % (8) 1 % - 29 %
Liabilities				
Future contract benefits – indexed annuity and universal life contracts				

Edgar Filing: LINCOLN NATIONAL CORP - Form 10-Q

embedded derivatives	(1,117)	Discounted cash flow	Lapse rate (2)	1	%	-	15	%	
			Mortality rate (6)				(9)		
Other liabilities – GLB reserves									
embedded derivatives	(79)	Discounted cash flow	Long-term lapse rate (2)	1	%	-	30	%
			Utilization of guaranteed withdrawals (3)	90	%	-	100	%	
			Claims utilization factor (4)	60	%	-	100	%	
			Premiums utilization factor (4)	70	%	-	140	%	
			NPR (5)	0.02	%	-	0.36	%	
			Mortality rate (6)				(8)		
			Volatility (7)	1	%	-	29	%	

- (1) The liquidity/duration adjustment input represents an estimated market participant composite of adjustments attributable to liquidity premiums, expected durations, structures and credit quality that would be applied to the market observable information of an investment.
- (2) The lapse rate input represents the estimated probability of a contract surrendering during a year, and thereby forgoing any future benefits. The range for indexed annuity and universal life contracts represents the lapse rates during the surrender charge period.
- (3) The utilization of guaranteed withdrawals input represents the estimated percentage of contract holders that utilize the guaranteed withdrawal feature.
- (4) The utilization factors are applied to the present value of claims or premiums, as appropriate, in the GLB reserve calculation to estimate the impact of inefficient withdrawal behavior, including taking less than or more than the maximum guaranteed withdrawal.
- (5) The NPR input represents the estimated additional credit spread that market participants would apply to the market observable discount rate when pricing a contract.
- (6) The mortality rate input represents the estimated probability of when an individual belonging to a particular group, categorized according to age or some other factor such as gender, will die.
- (7) The volatility input represents overall volatilities assumed for the underlying variable annuity funds, which include a mixture of equity and fixed income assets. Fair value of the variable annuity GLB embedded derivatives would increase if higher volatilities were used for valuation.
- (8) The mortality rate is based on a combination of company and industry experience, adjusted for improvement factors.
- (9) Based on the “Annuity 2000 Mortality Table” developed by the Society of Actuaries Committee on Life Insurance Research that was adopted by the National Association of Insurance Commissioners in 1996 for our mortality input.

From the table above, we have excluded Level 3 fair value measurements obtained from independent, third-party pricing sources. We do not develop the significant inputs used to measure the fair value of these assets and liabilities,

and the information regarding the significant inputs is not readily available to us. Independent broker-quoted fair values are non-binding quotes developed by market

41

makers or broker-dealers obtained from third-party sources recognized as market participants. The fair value of a broker-quoted asset or liability is based solely on the receipt of an updated quote from a single market maker or a broker-dealer recognized as a market participant as we do not adjust broker quotes when used as the fair value measurement for an asset or liability. Significant increases or decreases in any of the quotes received from a third-party broker-dealer may result in a significantly higher or lower fair value measurement.

Changes in any of the significant inputs presented in the table above may result in a significant change in the fair value measurement of the asset or liability as follows:

- Investments – An increase in the liquidity/duration adjustment input would result in a decrease in the fair value measurement.
- Indexed annuity and universal life contracts embedded derivatives – An increase in the lapse rate or mortality rate inputs would result in a decrease in the fair value measurement.
- GLB reserves embedded derivatives – Assuming our GLB reserves embedded derivatives are in a liability position: an increase in our lapse rate, NPR or mortality rate inputs would result in a decrease in the fair value measurement; and an increase in the utilization of guarantee withdrawal or volatility inputs would result in an increase in the fair value measurement.

For each category discussed above, the unobservable inputs are not inter-related; therefore, a directional change in one input will not affect the other inputs.

As part of our on-going valuation process, we assess the reasonableness of our valuation techniques or models and make adjustments as necessary. For more information, see “Summary of Significant Accounting Policies” in Note 1 of our 2013 Form 10-K.

13. Segment Information

We provide products and services and report results through our Annuities, Retirement Plan Services, Life Insurance and Group Protection segments. We also have Other Operations, which includes the financial data for operations that are not directly related to the business segments. Our reporting segments reflect the manner by which our chief operating decision makers view and manage the business. See Note 22 of our 2013 Form 10-K for a brief description of these segments and Other Operations.

Segment operating revenues and income (loss) from operations are internal measures used by our management and Board of Directors to evaluate and assess the results of our segments. Income (loss) from operations is GAAP net income excluding the after-tax effects of the following items, as applicable:

- Realized gains and losses associated with the following (“excluded realized gain (loss)”):
 - § Sales or disposals of securities;
 - § Impairments of securities;
 - § Changes in the fair value of derivatives, embedded derivatives within certain reinsurance arrangements and trading securities;
 - § Changes in the fair value of the derivatives we own to hedge our GDB riders within our variable annuities;
 - § Changes in the fair value of the embedded derivatives of our GLB riders accounted for at fair value, net of the change in the fair value of the derivatives we own to hedge them; and
 - § Changes in the fair value of the embedded derivative liabilities related to index call options we may purchase in the future to hedge contract holder index allocations applicable to future reset periods for our indexed annuity products accounted for at fair value;
- Changes in reserves resulting from benefit ratio unlocking on our GDB and GLB riders;
- Income (loss) from reserve changes, net of related amortization, on business sold through reinsurance;
- Gains (losses) on early extinguishment of debt;
- Losses from the impairment of intangible assets;
- Income (loss) from discontinued operations; and
- Income (loss) from the initial adoption of new accounting standards.

Operating revenues represent GAAP revenues excluding the pre-tax effects of the following items, as applicable:

- Excluded realized gain (loss);
- Revenue adjustments from the initial adoption of new accounting standards;
- Amortization of DFEL arising from changes in GDB and GLB benefit ratio unlocking; and
- Amortization of deferred gains arising from reserve changes on business sold through reinsurance.

We use our prevailing corporate federal income tax rate of 35% while taking into account any permanent differences for events recognized differently in our financial statements and federal income tax returns when reconciling our non-GAAP measures to the most comparable GAAP measure. Operating revenues and income (loss) from operations do not replace revenues and net income as the GAAP measures of our consolidated results of operations.

Segment information (in millions) was as follows:

	For the Three Months Ended September 30, 2014		For the Nine Months Ended September 30, 2013	
Revenues				
Operating revenues:				
Annuities	\$ 944	\$ 842	\$ 2,779	\$ 2,436

Net income (loss)	\$ 439	\$ 337	\$ 1,166	\$ 893

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following Management's Discussion and Analysis ("MD&A") is intended to help the reader understand the financial condition as of September 30, 2014, compared with December 31, 2013, and the results of operations for the three and nine months ended September 30, 2014, compared with the corresponding periods in 2013 of Lincoln National Corporation and its consolidated subsidiaries. Unless otherwise stated or the context otherwise requires, "LNC," "Company," "we," "our" or "us" refers to Lincoln National Corporation and its consolidated subsidiaries. The MD&A is provided as a supplement to, and should be read in conjunction with our consolidated financial statements and the accompanying notes to the consolidated financial statements ("Notes") presented in "Part I – Item 1. Financial Statements"; our Form 10-K for the year ended December 31, 2013 ("2013 Form 10-K"), including the sections entitled "Part I – Item 1A. Risk Factors," "Part II – Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" and "Part II – Item 8. Financial Statements and Supplementary Data"; our quarterly reports on Form 10-Q filed in 2014; and our current reports on Form 8-K filed in 2014.

In this report, in addition to providing consolidated revenues and net income (loss), we also provide segment operating revenues and income (loss) from operations because we believe they are meaningful measures of revenues and the profitability of our operating segments. Financial information that follows is presented in conformity with accounting principles generally accepted in the United States of America ("GAAP"), unless otherwise indicated. See Note 1 in our 2013 Form 10-K for a discussion of GAAP.

Operating revenues and income (loss) from operations are the financial performance measures we use to evaluate and assess the results of our segments. Accordingly, we define and report operating revenues and income (loss) from operations by segment in Note 13. Our management believes that operating revenues and income (loss) from operations explain the results of our ongoing businesses in a manner that allows for a better understanding of the underlying trends in our current businesses because the excluded items are unpredictable and not necessarily indicative of current operating fundamentals or future performance of the business segments, and, in many instances, decisions regarding these items do not necessarily relate to the operations of the individual segments. In addition, we believe that our definitions of operating revenues and income (loss) from operations will provide investors with a more valuable measure of our performance because it better reveals trends in our business.

FORWARD-LOOKING STATEMENTS – CAUTIONARY LANGUAGE

Certain statements made in this report and in other written or oral statements made by us or on our behalf are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 ("PSLRA"). A forward-looking statement is a statement that is not a historical fact and, without limitation, includes any statement that may predict, forecast, indicate or imply future results, performance or achievements, and may contain words like: "believe," "anticipate," "expect," "estimate," "project," "will," "shall" and other words or phrases with similar meaning in connection with a discussion of future operating or financial performance. In particular, these include statements relating to future actions, trends in our businesses, prospective services or products, future performance or financial

results and the outcome of contingencies, such as legal proceedings. We claim the protection afforded by the safe harbor for forward-looking statements provided by the PSLRA.

Forward-looking statements involve risks and uncertainties that may cause actual results to differ materially from the results contained in the forward-looking statements. Risks and uncertainties that may cause actual results to vary materially, some of which are described within the forward-looking statements, include, among others:

- Deterioration in general economic and business conditions that may affect account values, investment results, guaranteed benefit liabilities, premium levels, claims experience and the level of pension benefit costs, funding and investment results;
- Adverse global capital and credit market conditions could affect our ability to raise capital, if necessary, and may cause us to realize impairments on investments and certain intangible assets, including goodwill and the valuation allowance against deferred tax assets, which may reduce future earnings and/or affect our financial condition and ability to raise additional capital or refinance existing debt as it matures;
- Because of our holding company structure, the inability of our subsidiaries to pay dividends to the holding company in sufficient amounts could harm the holding company's ability to meet its obligations;
- Legislative, regulatory or tax changes, both domestic and foreign, that affect the cost of, or demand for, our subsidiaries' products, the required amount of reserves and/or surplus, or otherwise affect our ability to conduct business, including changes to statutory reserve requirements related to secondary guarantee universal life and annuities; regulations regarding captive reinsurance arrangements; restrictions on revenue sharing and 12b-1 payments; and the potential for U.S. federal tax reform;
- Actions taken by reinsurers to raise rates on in-force business;
- Declines in or sustained low interest rates causing a reduction in investment income, the interest margins of our businesses, estimated gross profits ("EGPs") and demand for our products;
- Rapidly increasing interest rates causing contract holders to surrender life insurance and annuity policies, thereby causing realized investment losses, and reduced hedge performance related to variable annuities;
- Uncertainty about the effect of rules and regulations to be promulgated under the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act") on us and the economy and financial services sector in particular;
- The initiation of legal or regulatory proceedings against us, and the outcome of any legal or regulatory proceedings, such as: adverse actions related to present or past business practices common in businesses in which we compete; adverse decisions in significant actions including, but not limited to, actions brought by federal and state authorities and class action cases; new decisions that result in changes in law; and unexpected trial court rulings;

- A decline in the equity markets causing a reduction in the sales of our subsidiaries' products, a reduction of asset-based fees that our subsidiaries charge on various investment and insurance products, an acceleration of the net amortization of deferred acquisition costs ("DAC"), value of business acquired ("VOBA"), deferred sales inducements ("DSI") and deferred front-end loads ("DFEL") and an increase in liabilities related to guaranteed benefit features of our subsidiaries' variable annuity products;
- Ineffectiveness of our risk management policies and procedures, including various hedging strategies used to offset the effect of changes in the value of liabilities due to changes in the level and volatility of the equity markets and interest rates;
- A deviation in actual experience regarding future persistency, mortality, morbidity, interest rates or equity market returns from the assumptions used in pricing our subsidiaries' products, in establishing related insurance reserves and in the net amortization of DAC, VOBA, DSI and DFEL, which may reduce future earnings;
- Changes in GAAP, including convergence with International Financial Reporting Standards ("IFRS"), that may result in unanticipated changes to our net income;
- Lowering of one or more of our debt ratings issued by nationally recognized statistical rating organizations and the adverse effect such action may have on our ability to raise capital and on our liquidity and financial condition;
- Lowering of one or more of the insurer financial strength ratings of our insurance subsidiaries and the adverse effect such action may have on the premium writings, policy retention, profitability of our insurance subsidiaries and liquidity;
- Significant credit, accounting, fraud, corporate governance or other issues that may adversely affect the value of certain investments in our portfolios, as well as counterparties to which we are exposed to credit risk, requiring that we realize losses on investments;
- Inability to protect our intellectual property rights or claims of infringement of the intellectual property rights of others;
- Interruption in telecommunication, information technology or other operational systems or failure to safeguard the confidentiality or privacy of sensitive data on such systems from cyberattacks or other breaches of our data security systems;
- The effect of acquisitions and divestitures, restructurings, product withdrawals and other unusual items;
- The adequacy and collectability of reinsurance that we have purchased;
- Acts of terrorism, a pandemic, war or other man-made and natural catastrophes that may adversely affect our businesses and the cost and availability of reinsurance;
- Competitive conditions, including pricing pressures, new product offerings and the emergence of new competitors, that may affect the level of premiums and fees that our subsidiaries can charge for their products;
- The unknown effect on our subsidiaries' businesses resulting from changes in the demographics of their client base, as aging baby-boomers move from the asset-accumulation stage to the asset-distribution stage of life; and
- Loss of key management, financial planners or wholesalers.

The risks included here are not exhaustive. Our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and other documents filed with the Securities and Exchange Commission ("SEC") include additional factors that could affect our businesses and financial performance. Moreover, we operate in a rapidly changing and competitive environment. New risk factors emerge from time to time, and it is not possible for management to predict all such risk factors.

Further, it is not possible to assess the effect of all risk factors on our businesses or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. Given these risks and uncertainties, investors should not place undue reliance on forward-looking statements as a prediction of actual results. In addition, we disclaim any obligation to update any forward-looking

statements to reflect events or circumstances that occur after the date of this report.

INTRODUCTION

Executive Summary

We are a holding company that operates multiple insurance and retirement businesses through subsidiary companies. Through our business segments, we sell a wide range of wealth protection, accumulation and retirement income products and solutions. These products include fixed and indexed annuities, variable annuities, universal life insurance (“UL”), variable universal life insurance (“VUL”), linked-benefit UL, indexed UL, term life insurance, employer-sponsored retirement plans and services, and group life, disability and dental.

We provide products and services and report results through our Annuities, Retirement Plan Services, Life Insurance and Group Protection segments. We also have Other Operations. These segments and Other Operations are described in “Part I – Item 1. Business” of our 2013 Form 10-K.

For information on how we derive our revenues, see the discussion in results of operations by segment below.

Our current market conditions, significant operational matters, industry trends, issues and outlook are described in “Introduction – Executive Summary” of our 2013 Form 10-K.

For factors that could cause actual results to differ materially from those set forth in this section, see “Forward-Looking Statements – Cautionary Language” above and “Part I – Item 1A. Risk Factors” in our 2013 Form 10-K.

Critical Accounting Policies and Estimates

The MD&A included in our 2013 Form 10-K contains a detailed discussion of our critical accounting policies and estimates. The following information updates the “Critical Accounting Policies and Estimates” provided in our 2013 Form 10-K and, accordingly, should be read in conjunction with the “Critical Accounting Policies and Estimates” discussed in our 2013 Form 10-K.

DAC, VOBA, DSI and DFEL

Unlocking

As discussed in our 2013 Form 10-K, we conduct our annual comprehensive review of the assumptions and projection models underlying the amortization of DAC, VOBA, DSI, DFEL, embedded derivatives and reserves for life insurance and annuity products with living benefit and death benefit guarantees in the third quarter of each year. As a result of this review, we recorded unlocking on an annual basis that resulted in increases or decreases to the carrying values of these items. See “DAC, VOBA, DSI and DFEL” in Note 1 of our 2013 Form 10-K for a detailed discussion of our unlocking process.

Details underlying the effect to income (loss) from continuing operations from our unlocking as a result of our annual comprehensive review (in millions) were as follows:

	For the Three Months Ended September 30,		
	2014	2013	Change
Income (loss) from operations:			
Annuities	\$ 12	\$ 2	NM
Retirement Plan Services	1	(4)	125%
Life Insurance	(16)	17	NM
Excluded realized gain (loss)	25	(7)	NM
Income (loss) from continuing operations	\$ 22	\$ 8	175%

Unlocking was driven primarily by the following:

2014

- For Annuities, we modified our long-term volatility and policyholder behavior assumptions, partially offset by modifying our separate account fees and interest margin assumptions;
- For Retirement Plan Services, we modified our separate account fees, maintenance expenses and policyholder behavior assumptions, substantially offset by lowering our interest margin assumption;
- For Life Insurance, we modified our mortality/morbidity and premium persistency assumptions and other items, partially offset by modifying our assumptions related to interest margin, policyholder behavior and maintenance expenses; and
- For excluded realized gain (loss), we modified our long-term volatility and policyholder behavior assumptions for GLB riders.

2013

- For Annuities, we modified our policyholder behavior and variable annuity mortality assumptions, partially offset by modifying our interest margin assumptions and other items;
- For Retirement Plan Services, we modified our interest margin assumptions;
- For Life Insurance, we modified our amortization period and mortality assumptions, partially offset by lowering our early duration portfolio yield assumptions; and
- For excluded realized gain (loss), we modified our policyholder behavior assumptions for GLB riders.

Reversion to the Mean (“RTM”)

As variable fund returns do not move in a systematic manner, we reset the baseline of account values from which EGPs are projected, which we refer to as our RTM process, as discussed in our 2013 Form 10-K.

Our long-term variable fund growth rate assumption, which is used in the determination of DAC, VOBA, DSI and DFEL amortization for the variable component of our variable annuity and VUL products, is an immediate drop of approximately 14% followed by growth going forward of 7% to 9% depending on the block of business and reflecting differences in contract holder fund allocations between fixed-income and equity-type investments. If we had unlocked our RTM assumption as of September 30, 2014, we would have recorded a favorable unlocking of approximately \$280 million, pre-tax, for Annuities, approximately \$25 million, pre-tax, for Retirement Plan Services, and approximately \$40 million, pre-tax, for Life Insurance.

46

Investments

Investment Valuation

The following summarizes our available-for-sale (“AFS”) and trading securities and derivative investments carried at fair value by pricing source and fair value hierarchy level (in millions) as of September 30, 2014:

	Quoted Prices in Active Markets for Identical Assets	Significant Observable Inputs	Significant Unobservable Inputs	Total Fair Value
	(Level 1)	(Level 2)	(Level 3)	
Priced by third-party pricing services	\$ 496	\$ 72,548	\$ -	\$ 73,044
Priced by independent broker quotations	-	-	2,246	2,246
Priced by matrices	-	12,978	-	12,978
Priced by other methods (1)	-	-	1,420	1,420
Total	\$ 496	\$ 85,526	\$ 3,666	\$ 89,688
Percent of total	1%	95%	4%	100%

(1) Represents primarily securities for which pricing models were used to compute fair value.

For more information about the valuation of our financial instruments carried at fair value, see “Part II – Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations – Introduction – Critical Accounting Policies and Estimates – Investments – Investment Valuation” in our 2013 Form 10-K and Note 12 herein.

As of September 30, 2014, we evaluated the markets that our securities trade in and concluded that none were inactive. We will continue to re-evaluate this conclusion, as needed, based on market conditions. We use unobservable inputs to measure the fair value of securities trading in less liquid or illiquid markets with limited or no pricing information. We obtain broker quotes for securities such as synthetic convertibles, index-linked certificates of deposit and collateralized debt obligations (“CDOs”) when sufficient security structure or other market information is

not available to produce an evaluation. For broker-quoted only securities, non-binding quotes from market makers or broker-dealers are obtained from sources recognized as market participants. Broker-quoted securities are based solely on receipt of updated quotes from a single market maker or a broker-dealer recognized as a market participant. Our broker-quoted only securities are generally classified as Level 3 of the fair value hierarchy. As of September 30, 2014, we used broker quotes for 66 securities as our final price source, representing approximately 1% of total securities owned.

Derivatives

Our accounting policies for derivatives and the potential effect on interest spreads in a falling rate environment are discussed in Note 5 of this report and “Part II – Item 7A. Quantitative and Qualitative Disclosures About Market Risk” in our 2013 Form 10-K.

GLB

Within our individual annuity business, approximately 71% of our variable annuity account values contained GLB features as of September 30, 2014. Declines in the equity markets increase our exposure to potential benefits with the GLB features, leading to an increase in our existing liability for those benefits. For example, a contract with a GLB feature is “in the money” if the contract holder’s account balance falls below the present value of guaranteed withdrawal or income benefits, assuming no lapses. As of September 30, 2014 and 2013, 4% and 5%, respectively, of all in-force contracts with a GLB feature were “in the money,” and our exposure, after reinsurance, as of September 30, 2014 and 2013, was \$291 million and \$387 million, respectively. However, the only way the contract holder can realize the excess of the present value of benefits over the account value of the contract is through a series of withdrawals or income payments that do not exceed a maximum amount. If, after the series of withdrawals or income payments, the account value is exhausted, the contract holder will continue to receive a series of annuity payments. The account value can also fluctuate with equity market returns on a daily basis resulting in increases or decreases in the excess of the present value of benefits over account value.

For information on our variable annuity hedge program performance, see our discussion in “Realized Gain (Loss) and Benefit Ratio Unlocking – Variable Annuity Net Derivatives Results” below.

For information on our estimates of the potential instantaneous effect to net income, which could result from sudden changes that may occur in equity markets, interest rates and implied market volatilities, see our discussion in “Part I – Item 2. Management’s Discussion and Analysis of Critical Accounting Policies and Estimates – Derivatives – Guaranteed Living Benefits (“GLB”)” in our Form 10-Q for the quarter ended March 31, 2014.

Acquisitions and Dispositions

For information about acquisitions and divestitures, see Note 3 in our 2013 Form 10-K.

RESULTS OF CONSOLIDATED OPERATIONS

Details underlying the consolidated results, deposits, net flows and account values (in millions) were as follows:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change
Net Income (Loss)						
Income (loss) from operations:						
Annuities	\$ 245	\$ 198	24%	\$ 688	\$ 551	25%
Retirement Plan Services	40	33	21%	118	108	9%
Life Insurance	150	140	7%	418	387	8%

Comparison of the Three and Nine Months Ended September 30, 2014 to 2013

Net income increased due primarily to the following:

- Growth in account values and insurance in force.
- Realized gains during 2014 as compared to realized losses during 2013.
- More favorable investment income on alternative investments.
- The effect of more favorable unlocking in 2014.

The increase in net income was partially offset primarily by the following:

- A decline in long-term disability recoveries in our Group Protection segment and higher death claims attributable to growth in business in force in our Life Insurance segment.
- Spread compression due to new money rates averaging below our current portfolio yields, partially offset by actions implemented to reduce interest crediting rates.

RESULTS OF ANNUITIES

Income (Loss) from Operations

Details underlying the results for Annuities (in millions) were as follows:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,

Income (loss) from operations	\$ 245	\$ 198	24%	\$ 688	\$ 551	25%

(1) Includes primarily our income annuities, which have a corresponding offset in benefits for changes in reserves.

(2) See "Realized Gain (Loss) and Benefit Ratio Unlocking" below.

(3) Consists primarily of revenues attributable to broker-dealer services that are subject to market volatility.

Comparison of the Three and Nine Months Ended September 30, 2014 to 2013

Income from operations for this segment increased due primarily to higher fee income driven by higher average daily variable account values.

The increase in income from operations was partially offset primarily by the following:

- Higher commissions and other expenses due to higher account values, resulting in higher trail commissions. This increase was partially offset by the effect of unlocking and higher average equity markets than our model projections assumed, both resulting in a lower amortization rate.
- Higher benefits attributable to an increase in the growth in benefit reserves due to higher guaranteed amounts covered by GLB riders and the effect of unlocking.

We provide information about this segment's operating revenue and operating expense line items, the period in which amounts are recognized, key drivers of changes and historical details underlying the line items and their associated drivers below.

See the Variable Account Value Information table within "Fee Income" below for drivers of changes in our variable account values.

See "Critical Accounting Policies and Estimates – DAC, VOBA, DSI and DFEL – Unlocking" for more information about unlocking.

Additional Information

New deposits are an important component of net flows and key to our efforts to grow our business. Although deposits do not significantly affect current period income from operations, they are an important indicator of future profitability. We continue to monitor the marketplace and economic environment and make changes to our product offerings as needed to sustain the future profitability of our segment. We are continuing to focus on shifting the balance of variable annuity deposits to products without GLB

riders during 2014. Variable annuity deposits on products without GLB riders were 24% and 22% for the three and nine months ended September 30, 2014, compared to 13% and 11% for the corresponding periods in 2013. In July 2014, our primary insurance subsidiary, The Lincoln National Life Insurance Company (“LNL”), amended and restated its reinsurance treaty covering new sales of its variable annuity GLB product. The treaty provides an additional \$4 billion of reinsurance capacity through December 31, 2015. LNL will retain 100% of the product cash flows, excluding the living benefit guarantee.

The other component of net flows relates to the retention of the business. An important measure of retention is the lapse rate, which compares the amount of withdrawals to the average account values. The overall lapse rate for our annuity products was 7% for the three and nine months ended September 30, 2014 and 2013.

Our fixed annuity business includes products with discretionary crediting rates that are reset on an annual basis and are not subject to surrender charges. Our ability to retain annual reset annuities will be subject to current competitive conditions at the time interest rates for these products reset. We expect to manage the effects of spreads on near-term income from operations through portfolio management and, to a lesser extent, crediting rate actions, which assumes no significant changes in net flows into or out of our fixed accounts or other changes that may cause interest rate spreads to differ from our expectations. For information on interest rate spreads and interest rate risk, see “Item 3. Quantitative and Qualitative Disclosures About Market Risk – Interest Rate Risk” herein and “Item 7A. Quantitative and Qualitative Disclosures About Market Risk – Interest Rate Risk – Interest Rate Risk on Fixed Insurance Businesses – Falling Rates” and “Part I – Item 1A. Risk Factors – Market Conditions – Changes in interest rates and sustained low interest rates may cause interest rate spreads to decrease and changes in interest rates may also result in increased contract withdrawals” in our 2013 Form 10-K.

For factors that could cause actual results to differ materially from those set forth in this section, see “Forward-Looking Statements – Cautionary Language” above and “Part I – Item 1A. Risk Factors” in our 2013 Form 10-K.

Fee Income

	1,977	1,674	18%	1,904	1,600	19%

(1) Excludes the fixed portion of variable.

We charge contract holders mortality and expense assessments on variable annuity accounts to cover insurance and administrative expenses. These assessments are a function of the rates priced into the product and the average daily variable account values. Average daily account values are driven by net flows and the equity markets. Charges on GLB riders are assessed based on a contractual rate that is applied either to the account value or the guaranteed amount. In addition, for our fixed annuity contracts and for some variable contracts, we collect surrender charges when contract holders surrender their contracts during their surrender charge periods to protect us from premature withdrawals. Fee income includes charges on both our variable and fixed annuity products, but excludes the attributed fees on our GLB products; see “Part II – Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations – Realized Gain (Loss) and Benefit Ratio Unlocking – Operating Realized Gain (Loss)” in our 2013 Form 10-K for discussion of these attributed fees.

Net Investment Income and Interest Credited

Interest rate spread	1.73%	1.78%	(5)	1.79%	2.02%	(23)

	As of or For the Three Months Ended September 30,			As of or For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change
Fixed Account Value Information						
Fixed annuity deposits (1)	\$ 932	\$ 1,161	-20%	\$ 3,091	\$ 3,592	-14%
Increases (decreases) in fixed annuity account values:						
Net flows (1)	390	632	-38%	1,526	2,021	-24%
Transfers from the fixed portion of variable annuity products to the variable portion of variable annuity products	(663)	(912)	27%	(2,140)	(2,480)	14%
Reinvested interest credited (1)	142	218	-35%	569	673	-15%
Fixed annuity account values (1)	21,273	21,284	0%	21,273	21,284	0%
Average fixed account values (1)	21,368	21,339	0%	21,320	21,217	0%
Average invested assets on reserves	19,185	19,321	-1%	19,152	19,119	0%

(1) Includes the fixed portion of variable.

A portion of our investment income earned is credited to the contract holders of our fixed annuity products, including the fixed portion of variable annuity contracts. We expect to earn a spread between what we earn on the underlying general account investments supporting the fixed annuity product line, including the fixed portion of variable annuity contracts, and what we credit to our fixed annuity contract holders' accounts, including the fixed portion of variable annuity contracts. Changes in commercial mortgage loan prepayments and bond make-whole premiums, investment income on alternative investments and surplus investment income can vary significantly from period to period due to a number of factors and, therefore, may contribute to investment income results that are not indicative of the underlying trends.

Benefits

Details underlying benefits (in millions) were as follows:

Edgar Filing: LINCOLN NATIONAL CORP - Form 10-Q

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change
Benefits						
Net death and other benefits, excluding unlocking	\$ 84	\$ 69	22%	\$ 253	\$ 195	30%
Unlocking	17	9	89%	14	11	27%
Total benefits	\$ 101	\$ 78	29%	\$ 267	\$ 206	30%

Benefits for this segment include changes in income annuity reserves driven by premiums, changes in benefit reserves and our expected costs associated with purchases of derivatives used to hedge our benefit ratio unlocking on benefit reserves associated with our guaranteed death benefit riders.

Commissions and Other Expenses

Details underlying commissions and other expenses (in millions) were as follows:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change
Commissions and Other Expenses						
Commissions:						
Deferrable	\$ 155	\$ 159	-3%	\$ 458	\$ 490	-7%
Non-deferrable	115	91	26%	333	264	26%
General and administrative expenses	104	105	-1%	315	305	3%

Total commissions and other expenses	\$ 376	\$ 372	1%	\$ 1,186	\$ 1,092	9%
DAC Deferrals						
As a percentage of sales/deposits	5.1%	5.0%		4.9%	5.1%	

(1) Includes reimbursements to Annuities from the Life Insurance segment for reserve financing, net of expenses incurred by Annuities for its use of letters of credit ("LOCs"). The inter-segment amounts are not reported on our Consolidated Statements of Comprehensive Income (Loss).

Commissions and other costs that result directly from and are essential to the successful acquisition of new or renewal business are deferred to the extent recoverable and are amortized over the lives of the contracts in relation to

EGPs. Certain types of commissions, such as trail commissions that are based on account values, are expensed as incurred rather than deferred and amortized.

Broker-dealer expenses that vary with and are related to sales are expensed as incurred and not deferred and amortized. Fluctuations in these expenses correspond with fluctuations in other revenues.

RESULTS OF RETIREMENT PLAN SERVICES

Income (Loss) from Operations

Details underlying the results for Retirement Plan Services (in millions) were as follows:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change
Operating Revenues						
Fee income	\$ 62	\$ 59	5%	\$ 184	\$ 172	7%

Income (loss) from operations	\$ 40	\$ 33	21%	\$ 118	\$ 108	9%

(1) Consists primarily of mutual fund account program revenues for mid to large employers.

Comparison of the Three Months Ended September 30, 2014 to 2013

Income from operations for this segment increased due primarily to the following:

- Lower commissions and other expenses due to the effect of unlocking.
- Higher fee income driven by higher average daily account values.

Comparison of the Nine Months Ended September 30, 2014 to 2013

Income from operations for this segment increased due primarily to the following:

- Higher fee income driven by higher average daily account values.
- Lower commissions and other expenses due to the effect of unlocking.

The increase in income from operations was partially offset by lower net investment income, net of interest credited, driven by spread compression due to new money rates averaging below our current portfolio yields and lower prepayment and bond make-whole premiums.

We provide information about this segment's operating revenue and operating expense line items, the period in which amounts are recognized, key drivers of changes and historical details underlying the line items and their associated drivers below.

See the Variable Account Value Information table within "Fee Income" below for drivers of changes in our variable account values and the Fixed Account Value Information table within "Net Investment Income and Interest Credited" below for drivers of changes in our fixed account values.

See "Consolidated Investments – Commercial Mortgage Loan Prepayment and Bond Make-Whole Premiums" below for more information on prepayment and bond make-whole premiums.

See "Critical Accounting Policies and Estimates – DAC, VOBA, DSI and DFEL – Unlocking" for more information about unlocking.

Additional Information

We expect to continue making strategic investments during the remainder of 2014 to improve our infrastructure and expand distribution that will result in higher expenses.

Net flows in this business fluctuate based on the timing of larger plans being implemented on our platform and terminating over the course of the year.

New deposits are an important component of net flows and key to our efforts to grow our business. Although deposits do not significantly affect current period income from operations, they are an important indicator of future profitability. The other component of net flows relates to the retention of the business. An important measure of retention is the lapse rate, which compares the amount of withdrawals to the average account values. The overall lapse rate for our annuity and mutual fund products was 12% and 13% for the three and nine months ended September 30, 2014, respectively, compared to 14% and 12% for the corresponding periods in 2013.

Our lapse rate is negatively affected by the continued net outflows from our oldest blocks of annuities business (as presented on our Account Value Roll Forward table below as “Multi-Fund® and Other Variable Annuities”), which are also our higher margin product lines in this segment, due to the fact that they are mature blocks with much of the account values out of their surrender charge period. The proportion of these products to our total account values was 32% and 34% as of September 30, 2014 and 2013, respectively. Due to this expected overall shift in business mix toward products with lower returns, a significant increase in new deposit production continues to be necessary to maintain earnings at current levels.

Our fixed annuity business includes products with discretionary and index-based crediting rates that are reset on a quarterly basis. Our ability to retain quarterly reset annuities will be subject to current competitive conditions at the time interest rates for these products reset. We expect to manage the effects of spreads on near-term income from operations through portfolio management and, to a lesser extent, crediting rate actions, which assumes no significant changes in net flows into or out of our fixed accounts or other changes that may cause interest rate spreads to differ from our expectations. For information on interest rate spreads and interest rate risk, see “Item 3. Quantitative and Qualitative Disclosures About Market Risk – Interest Rate Risk” herein and “Item 7A. Quantitative and Qualitative Disclosures About Market Risk – Interest Rate Risk – Interest Rate Risk on Fixed Insurance Businesses – Falling Rates” and “Part I – Item 1A. Risk Factors – Market Conditions – Changes in interest rates and sustained low interest rates may cause interest rate spreads to decrease and changes in interest rates may also result in increased contract withdrawals” in our 2013 Form 10-K.

For factors that could cause actual results to differ materially from those set forth in this section, see “Forward-Looking Statements – Cautionary Language” above and “Part I – Item 1A. Risk Factors” in our 2013 Form 10-K.

	1,977	1,674	18%	1,904	1,600	19%

(1) Excludes the fixed portion of variable.

We charge expense assessments to cover insurance and administrative expenses. Expense assessments are generally equal to a percentage of the daily variable account values. Average daily account values are driven by net flows and the equity markets. Our expense assessments include fees we earn for the services that we provide to our mutual fund programs. In addition, for both our fixed and variable annuity contracts, we collect surrender charges when contract holders surrender their contracts during the surrender charge periods to protect us from premature withdrawals.

Net Investment Income and Interest Credited

Details underlying net investment income, interest credited (in millions) and our interest rate spread were as follows:

For the Three Months Ended September 30, 2014			For the Nine Months Ended September 30, 2013

Average invested assets on reserves	15,380	14,881	3%	15,262	14,785	3%

(1) Includes the fixed portion of variable.

A portion of our investment income earned is credited to the contract holders of our fixed annuity products, including the fixed portion of variable annuity contracts. We expect to earn a spread between what we earn on the underlying

general account investments supporting the fixed annuity product line, including the fixed portion of variable annuity contracts, and what we credit to our fixed annuity contract holders' accounts, including the fixed portion of variable annuity contracts. Commercial mortgage loan prepayments and bond make-whole premiums, investment income on alternative investments and surplus investment income can vary significantly from period to period due to a number of factors and, therefore, may contribute to investment income results that are not indicative of the underlying trends.

Benefits

Benefits for this segment include changes in benefit reserves and our expected costs associated with purchases of derivatives used to hedge our benefit ratio unlocking.

Commissions and Other Expenses

Details underlying commissions and other expenses (in millions) were as follows:

	For the Three Months Ended September 30, 2014			For the Nine Months Ended September 30, 2013			Change
Commissions and Other Expenses							
Commissions:							
Deferrable	\$ 3	\$ 3	0%	\$ 11	\$ 11	0%	
Non-deferrable	14	15	-7%	43	43	0%	
General and administrative expenses	77	74	4%	222	220	1%	
Taxes, licenses and fees	4	4	0%	14	14	0%	
Total expenses incurred	98	96	2%	290	288	1%	
DAC deferrals	(8)	(7)	-14%	(21)	(23)	9%	
Total expenses recognized before amortization	90	89	1%	269	265	2%	
DAC and VOBA amortization, net of interest:							
Amortization, net of interest, excluding unlocking	10	11	-9%	30	30	0%	
Unlocking	(1)	7	NM	(1)	7	NM	
Total commissions and other expenses	\$ 99	\$ 107	-7%	\$ 298	\$ 302	-1%	
DAC Deferrals							
As a percentage of annuity sales/deposits	1.0%	0.9%		0.9%	1.0%		

Commissions and other costs that result directly from and are essential to the successful acquisition of new or renewal business are deferred to the extent recoverable and are amortized over the lives of the contracts in relation to EGPs. Certain types of commissions, such as trail commissions that are based on account values, are expensed as incurred rather than deferred and amortized. Distribution expenses associated with the sale of mutual fund products are expensed as incurred.

RESULTS OF LIFE INSURANCE

Income (Loss) from Operations

Details underlying the results for Life Insurance (in millions) were as follows:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change

Income (loss) from operations	\$ 150	\$ 140	7%	\$ 418	\$ 387	8%

(1) Includes term insurance premiums, which have a corresponding partial offset in benefits for changes in reserves.

(2) See "Realized Gain (Loss) and Benefit Ratio Unlocking" below.

Comparison of the Three and Nine Months Ended September 30, 2014 to 2013

Income from operations for this segment increased due primarily to the following:

- Higher fee income attributable to growth in business in force and the effect of unlocking.

Higher net investment income, net of interest credited, driven by more favorable investment income on alternative investments and growth in business in force. These increases were partially offset by spread compression due to new money rates averaging below our current portfolio yields.

The increase in income from operations was partially offset primarily by the following:

- Higher benefits due to higher death claims attributable to growth in business in force, and the effect of unlocking.
- Higher commissions and other expenses due to higher margins than our model projections assumed and the effect of unlocking.

We provide information about this segment's operating revenue and operating expense line items, the period in which amounts are recognized, key drivers of changes and historical details underlying the line items and their associated drivers below.

See "Consolidated Investments – Alternative Investments" below for more information on alternative investments.

See "Critical Accounting Policies and Estimates – DAC, VOBA, DSI and DFEL – Unlocking" for more information about unlocking.

Strategies to Address Statutory Reserve Strain

Our insurance subsidiaries have statutory surplus and risk-based capital ("RBC") levels above current regulatory required levels. Term products and UL products containing secondary guarantees require reserves calculated pursuant to the Valuation of Life Insurance Policies Model Regulation ("XXX") and Actuarial Guideline 38 ("AG38"), respectively. For more discussion of our strategies to lessen the burden of increased XXX and AG38 statutory reserves associated with term products and UL products containing secondary guarantees on our insurance subsidiaries, see "Part I – Item 1A. Risk Factors – Legislative, Regulatory and Tax – Attempts to mitigate the impact of Regulation XXX and Actuarial Guideline 38 may fail in whole or in part resulting in an adverse effect on our financial condition and results of operations" and "Part II – Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations – Results of Life Insurance – Income (Loss) from Operations – Strategies to Address Statutory Reserve Strain" in our 2013 Form 10-K, "Part I – Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations – Results of Life Insurance – Income (Loss) from Operations – Strategies to Address Statutory Reserve Strain" in our Form 10-Q for the quarter ended March 31, 2014, and "Review of Consolidated Financial Condition – Liquidity and Capital Resources – Sources of Liquidity and Cash Flow – Subsidiaries Statutory Reserving and Surplus" herein.

Our insurance subsidiaries employ strategies to reduce the strain caused by XXX and AG38 by using long-dated LOCs as well as other financing transactions. Included in the LOCs issued as of September 30, 2014, was approximately \$3.1 billion of long-dated LOCs issued to support inter-company reinsurance arrangements. Approximately \$2.0 billion of such LOCs were issued for UL products containing secondary guarantees (approximately \$1.8 billion will expire in 2031, and approximately \$175 million will expire in 2018). Approximately \$1.1 billion of such LOCs were issued for term business solutions (approximately \$905 million will expire in 2023, and approximately \$150 million is automatically renewable until 2023). We have also used the proceeds from senior note issuances of approximately \$875 million to execute long-term structured solutions supporting UL products containing secondary guarantees. LOCs and related capital market alternatives lower the capital effect of term products and UL products containing secondary guarantees. An inability to obtain the necessary LOC capacity or other capital market alternatives could affect our returns on our in-force term products and UL products containing secondary guarantees. However, we believe that our insurance subsidiaries have sufficient capital to support the increase in statutory reserves, based on our current reserve projections, if such structures were no longer available. See the table in “Commissions and Other Expenses” below for the presentation of our expenses associated with reserve financing.

Additional Information

We expect to manage the effects of spreads on near-term income from operations through portfolio management, which assumes no significant changes in net flows into or out of our fixed accounts or other changes that may cause interest rate spreads to differ from our expectations.

For information on interest rate spreads and interest rate risk, see “Item 3. Quantitative and Qualitative Disclosures About Market Risk – Interest Rate Risk” herein and “Item 7A. Quantitative and Qualitative Disclosures About Market Risk – Interest Rate Risk – Interest Rate Risk on Fixed Insurance Businesses – Falling Rates” and “Part I – Item 1A. Risk Factors – Market Conditions – Changes in interest rates and sustained low interest rates may cause interest rate spreads to decrease and changes in interest rates may also result in increased contract withdrawals” in our 2013 Form 10-K.

For factors that could cause actual results to differ materially from those set forth in this section, see “Forward-Looking Statements – Cautionary Language” above and “Part I – Item 1A. Risk Factors” in our 2013 Form 10-K.

Insurance Premiums

Insurance premiums relate to traditional products and are a function of the rates priced into the product and the level of insurance in force. Insurance in force, in turn, is driven by sales, persistency and mortality experience.

Fee Income

Details underlying fee income, sales, net flows, account values and in-force face amount (in millions) were as follows:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,

VUL	7,982	6,604	21%
Interest-sensitive whole life	2,277	2,269	0%
Total account values	\$ 41,504	\$ 39,157	6%
In-Force Face Amount			
UL and other	\$ 322,416	\$ 315,763	2%
Term insurance	312,584	292,375	7%
Total in-force face amount	\$ 635,000	\$ 608,138	4%

Fee income relates only to interest-sensitive products and includes mortality assessments, expense assessments (net of deferrals and amortization related to DFEL) and surrender charges. Mortality and expense assessments are deducted

from our contract holders' account values. These amounts are a function of the rates priced into the product and premiums received, face amount in force and account values. Insurance in force, in turn, is driven by sales, persistency and mortality experience.

Sales are not recorded as a component of revenues (other than for traditional products) and do not have a significant effect on current quarter income from operations but are indicators of future profitability. Generally, we have higher sales during the second half of the year with the fourth quarter being our strongest.

Sales in the table above and as discussed above were reported as follows:

- MoneyGuard®, our linked-benefit product – 15% of total expected premium deposits;
- Single premium bank-owned UL and VUL (“BOLI”) – 15% of single premium deposits;
- UL, VUL, and corporate-owned UL and VUL (“COLI”) – first year commissionable premiums plus 5% of excess premiums received, including an adjustment for internal replacements of approximately 50% of commissionable premiums; and
- Term – 100% of annualized first year premiums.

Changes in the marketplace and continuing efforts to increase sales of higher return products in a low interest rate environment have resulted in a shift in our business mix.

Net Investment Income and Interest Credited

Details underlying net investment income, interest credited (in millions) and our interest rate spread were as follows:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change
Averages						
Attributable to interest-sensitive products:						
Invested assets on reserves	\$ 37,649	\$ 36,062	4%	\$ 37,241	\$ 35,611	5%
Account values - universal and whole life	33,947	33,021	3%	33,749	32,717	3%
Attributable to traditional products:						
Invested assets on reserves	4,275	4,453	-4%	4,227	4,401	-4%

A portion of the investment income earned for this segment is credited to contract holder accounts. Statutory reserves will typically grow at a faster rate than account values because of the AG38 reserve requirements. Invested assets are based upon the statutory reserve liabilities and are affected by various reserve adjustments, including financing transactions providing relief from AG38 reserve requirements. These financing transactions lead to a transfer of invested assets from this segment to Other Operations. We expect to earn a spread between what we earn on the underlying general account investments and what we credit to our contract holders' accounts. We use our investment income to offset the earnings effect of the associated growth of our policy reserves for traditional products. Commercial mortgage loan prepayments and bond make-whole premiums and investment income on alternative investments can vary significantly from period to period due to a number of factors, and, therefore, may contribute to investment income results that are not indicative of the underlying trends.

Benefits

Details underlying benefits (dollars in millions) were as follows:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change
Benefits						
Death claims direct and assumed	\$ 796	\$ 939	-15%	\$ 2,597	\$ 2,574	1%
Death claims ceded	(369)	(518)	29%	(1,232)	(1,270)	3%
Reserves released on death	(118)	(119)	1%	(402)	(387)	-4%
Net death benefits	309	302	2%	963	917	5%
Change in secondary guarantee life						

insurance product reserves:

Change in reserves, excluding unlocking	122	111	10%	372	358	4%

Change in linked-benefit product reserves:						
Change in reserves, excluding unlocking	25	16	56%	65	51	27%
Unlocking	23	3	NM	23	3	NM
Other benefits (1)	59	62	-5%	175	171	2%
Total benefits	\$ 550	\$ 476	16%	\$ 1,610	\$ 1,482	9%
Death claims per \$1,000 of in-force	1.96	2.00	-2%	2.05	2.04	0%

(1) Includes primarily changes in reserves and dividends on traditional and other products.

Benefits for this segment include claims incurred during the period in excess of the associated reserves for its interest-sensitive and traditional products. In addition, benefits include the change in secondary guarantee and linked-benefit life insurance product reserves. These reserves are affected by changes in expected future trends of expense assessments causing unlocking adjustments to these liabilities similar to DAC, VOBA and DFEL. See "Future Contract Benefits and Other Contract Holder Funds" in Note 1 of our 2013 Form 10-K for additional information.

Commissions and Other Expenses

Details underlying commissions and other expenses (in millions) were as follows:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change
Commissions and Other Expenses						
Commissions	\$ 171	\$ 157	9%	\$ 508	\$ 442	15%
General and administrative expenses	116	122	-5%	358	354	1%
Expenses associated with reserve financing	20	19	5%	59	55	7%
Taxes, licenses and fees	36	41	-12%	112	109	3%
Total expenses incurred	343	339	1%	1,037	960	8%
DAC and VOBA deferrals	(189)	(175)	-8%	(554)	(498)	-11%
Total expenses recognized before amortization	154	164	-6%	483	462	5%
DAC and VOBA amortization, net of interest:						
Amortization, net of interest, excluding unlocking	135	113	19%	374	322	16%
Unlocking	42	8	NM	42	7	NM
Other intangible amortization	2	1	100%	3	3	0%
Total commissions and other expenses	\$ 333	\$ 286	16%	\$ 902	\$ 794	14%
DAC and VOBA Deferrals						
As a percentage of sales	118.1%	104.2%		116.1%	98.4%	

Commissions and costs that result directly from and are essential to successful acquisition of new or renewal business are deferred to the extent recoverable and for our interest-sensitive products are generally amortized over the life of the contracts in relation to EGPs. For our traditional products, DAC and VOBA are amortized on either a straight-line basis or as a level percent of premium of the related contracts, depending on the block of business. When comparing DAC and VOBA deferrals as a percentage of sales for the three and nine months ended September 30, 2014, to the corresponding periods in 2013, the increase was primarily a result of changes in sales mix to products with higher commission rates.

RESULTS OF GROUP PROTECTION

Income (Loss) from Operations

Details underlying the results for Group Protection (in millions) were as follows:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change
Operating Revenues						
Insurance premiums	\$ 550	\$ 516	7%	\$ 1,685	\$ 1,555	8%
Net investment income	45	41	10%	134	122	10%
Other revenues	3	4	-25%	10	8	25%

Medical	-	1	-100%	2	3	-33%
Income (loss) from operations	\$ 8	\$ 23	-65%	\$ 29	\$ 60	-52%

Comparison of the Three and Nine Months Ended September 30, 2014 to 2013

Income from operations for this segment decreased due primarily to unfavorable total non-medical loss ratio experience attributable to a decline in long-term disability recoveries in 2014 and favorable reserve adjustments related to our long-term disability business in 2013.

We provide information about this segment's operating revenue and operating expense line items, the period in which amounts are recognized, key drivers of changes and historical details underlying the line items and their associated drivers below.

Additional Information

Management compares trends in actual loss ratios to pricing expectations because group-underwriting risks change over time. We expect normal fluctuations in our composite non-medical loss ratios of this segment, as claims experience is inherently uncertain. During the third quarter of 2014, our total non-medical loss ratio of 77.6% was above our long-term expectation of 71% to 74% due primarily to a decline in long-term disability recovery experience. We expect the loss ratios to be at or above the high end of our target range during the remainder of the year. For every one percent increase in the loss ratio, we would expect an approximate annual \$13 million to \$15 million decrease to income from operations.

For information on the effects of current interest rates on our long-term disability claim reserves, see "Item 3. Quantitative and Qualitative Disclosures About Market Risk – Interest Rate Risk."

For factors that could cause actual results to differ materially from those set forth in this section, see "Forward-Looking Statements – Cautionary Language" above and "Part I – Item 1A. Risk Factors" in our 2013 Form 10-K.

Insurance Premiums

Details underlying insurance premiums (in millions) were as follows:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change
Insurance Premiums by Product Line						
Life	\$ 230	\$ 214	7%	\$ 696	\$ 628	11%
Disability	241	228	6%	722	670	8%
Dental	57	52	10%	170	153	11%
Total non-medical	528	494	7%	1,588	1,451	9%
Medical	22	22	0%	97	104	-7%
Total insurance premiums	\$ 550	\$ 516	7%	\$ 1,685	\$ 1,555	8%
Sales	\$ 94	\$ 107	-12%	\$ 229	\$ 273	-16%

Our cost of insurance and policy administration charges are embedded in the premiums charged to our customers. The premiums are a function of the rates priced into the product and our business in force. Business in force, in turn, is driven by sales and persistency experience.

Sales relate to new contract holders and new programs sold to existing contract holders. We believe that the trend in sales is an important indicator of development of business in force over time. Sales in the table above are the combined annualized premiums for our life, disability and dental products. When comparing sales for the three and nine months ended September 30, 2014, to the corresponding periods in 2013, the decrease was partly the result of pricing actions primarily on our employer-paid life and disability business. Through the first half of 2014, we also observed a slowing of industry sales. We continue to shift the business mix to employee-paid blocks of business, which we expect will improve the overall profitability of the business. The proportion of employee-paid sales to our total sales was 45% and 49% for the three and nine months ended September 30, 2014, compared to 43% and 46% for the corresponding periods in 2013.

Net Investment Income

We use our investment income to offset the earnings effect of the associated build of our policy reserves, which are a function of our insurance premiums and the yields on our invested assets.

68

Benefits and Interest Credited

Details underlying benefits and interest credited (in millions) and loss ratios by product line were as follows:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change

Total non-medical	77.6%	73.4%		77.5%	73.9%	
Medical	90.6%	88.3%		88.9%	88.8%	

Commissions and Other Expenses

Details underlying commissions and other expenses (in millions) were as follows:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change

Edgar Filing: LINCOLN NATIONAL CORP - Form 10-Q

Commissions and Other Expenses						
Commissions	\$ 68	\$ 62	10%	\$ 202	\$ 187	8%
General and administrative expenses	73	76	-4%	223	220	1%
Taxes, licenses and fees	14	14	0%	43	39	10%
Total expenses incurred	155	152	2%	468	446	5%
DAC deferrals	(11)	(20)	45%	(45)	(53)	15%
Total expenses recognized before amortization	144	132	9%	423	393	8%
DAC and VOBA amortization, net of interest	13	10	30%	43	34	26%
Total commissions and other expenses	\$ 157	\$ 142	11%	\$ 466	\$ 427	9%
DAC Deferrals						
As a percentage of insurance premiums	2.0%	3.9%		2.7%	3.4%	

Commissions and other costs that result directly from and are essential to the successful acquisition of new or renewal business are deferred to the extent recoverable and are amortized in relation to the revenues of the related contracts. Certain broker commissions that vary with and are related to paid premiums are expensed as incurred. The level of expenses is an important driver of profitability for this segment as group insurance contracts are offered within an environment that competes on the basis of price and service.

RESULTS OF OTHER OPERATIONS

Income (Loss) from Operations

Details underlying the results for Other Operations (in millions) were as follows:

	For the Three Months Ended September 30, 2014			For the Nine Months Ended September 30, 2013			Change
	2014	2013	Change	2014	2013	Change	
Operating Revenues							
Insurance premiums	\$ -	\$ -	NM	\$ -	\$ 1	-100%

Income (loss) from operations	\$ (29)	\$ (27)	-7%	\$ (80)	\$ (104)	23%	

Comparison of the Three Months Ended September 30, 2014 to 2013

Loss from operations for Other Operations increased due primarily to lower other expenses in 2013 driven by the release of incentive compensation accruals. The increase was partially offset by higher net investment income, net of interest credited, driven by higher distributable earnings received from our segments, partially offset by repurchases of common stock and lower average invested assets.

Comparison of the Nine Months Ended September 30, 2014 to 2013

Loss from operations for Other Operations decreased due primarily to the following:

- Lower other expenses attributable to the effect of changes in our stock price on our deferred compensations plans, as our stock price remained relatively flat during 2014 compared to significantly increasing during 2013 (see “Other Expenses” below for more information); and
- Higher net investment income, net of interest credited, related to higher average invested assets driven by distributable earnings received from our segments, partially offset by repurchases of common stock.

We provide information about Other Operations’ operating revenue and operating expense line items, the period in which amounts are recognized, key drivers of changes and historical details underlying the line items and their associated drivers below.

Additional Information

For factors that could cause actual results to differ materially from those set forth in this section, see “Forward-Looking Statements – Cautionary Language” above and “Part I – Item 1A. Risk Factors” in our 2013 Form 10-K.

Net Investment Income and Interest Credited

We utilize an internal formula to determine the amount of capital that is allocated to our segments. Investment income on capital in excess of the calculated amounts is reported in Other Operations. If our segments require increases in statutory reserves, surplus or investments, the amount of excess capital that is retained by Other Operations would decrease and net investment income would be negatively affected.

The majority of our interest credited relates to our reinsurance operations sold to Swiss Re in 2001. A substantial amount of the business was sold through indemnity reinsurance transactions, which is still recorded in our consolidated financial statements. The interest credited corresponds to investment income earnings on the assets we continue to hold for this business. There is no effect to income or

loss in Other Operations or on a consolidated basis for these amounts because interest earned on the blocks that continue to be reinsured is passed through to Swiss Re in the form of interest credited.

Benefits

Benefits are recognized when incurred for Institutional Pension products and disability income business.

Other Expenses

Details underlying other expenses (in millions) were as follows:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change
General and administrative expenses:						
Legal	\$ -	\$ -	NM	\$ (1)	\$ 1	NM
Branding	7	6	17%	19	19	0%
Other (1)	11	1	NM	30	46	-35%
Total general and administrative expenses	18	7	157%	48	66	-27%
Taxes, licenses and fees	1	1	0%	(7)	(2)	NM
Inter-segment reimbursement associated with reserve financing and LOC expenses (2)	(3)	(3)	0%	(8)	(8)	0%
Total other expenses	\$ 16	\$ 5	220%	\$ 33	\$ 56	-41%

(1) Includes expenses that are corporate in nature including charitable contributions, the portion of our deferred compensation plan expense attributable to participants' selection of LNC stock as the measure for their investment

return and other expenses not allocated to our business segments.

- (2) Consists of reimbursements to Other Operations from the Life Insurance segment for the use of proceeds from certain issuances of senior notes that were used as long-term structured solutions, net of expenses incurred by Other Operations for its use of LOCs.

Interest and Debt Expense

Our current level of interest expense may not be indicative of the future due to, among other things, the timing of the use of cash, the availability of funds from our inter-company cash management program and the future cost of capital. For additional information on our financing activities, see “Review of Consolidated Financial Condition – Liquidity and Capital Resources – Sources of Liquidity and Cash Flow – Financing Activities” below.

REALIZED GAIN (LOSS) AND BENEFIT RATIO UNLOCKING

Details underlying realized gain (loss), after-DAC (1) and benefit ratio unlocking (in millions) were as follows:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change
Components of Realized Gain (Loss), Pre-Tax						
Total operating realized gain (loss)	\$ 42	\$ 37	14%	\$ 121	\$ 103	17%
Total excluded realized gain (loss)	47	(65)	172%	(15)	(208)	93%
Total realized gain (loss), pre-tax	\$ 89	\$ (28)	NM	\$ 106	\$ (105)	201%
Reconciliation of Excluded Realized Gain (Loss) Net of Benefit Ratio Unlocking, After-Tax						
Total excluded realized gain (loss)	\$ 31	\$ (43)	172%	\$ (10)	\$ (135)	93%
Benefit ratio unlocking	(6)	13	NM	2	25	-92%
Excluded realized gain (loss) net of benefit ratio unlocking, after-tax	\$ 25	\$ (30)	183%	\$ (8)	\$ (110)	93%
Components of Excluded Realized Gain (Loss) Net of Benefit Ratio Unlocking, After-Tax						
Realized gain (loss) related to certain investments	\$ (4)	\$ (21)	81%	\$ (8)	\$ (48)	83%
Gain (loss) on the mark-to-market on certain instruments	(12)	14	NM	(19)	14	NM
Variable annuity net derivatives results:						
Hedge program performance, including unlocking for GLB reserves hedged	26	6	NM	26	13	100%
GLB NPR component	6	(22)	127%	4	(73)	105%
Total variable annuity net derivatives results	32	(16)	300%	30	(60)	150%
Indexed annuity forward-starting option	9	(7)	229%	(11)	(16)	31%
Excluded realized gain (loss) net of benefit ratio unlocking, after-tax	\$ 25	\$ (30)	183%	\$ (8)	\$ (110)	93%

- (1) DAC refers to the associated amortization of DAC, VOBA, DSI and DFEL and changes in other contract holder funds and funds withheld reinsurance assets and liabilities.

For factors that could cause actual results to differ materially from those set forth in this section, see “Forward-Looking Statements – Cautionary Language” above and “Part I – Item 1A. Risk Factors” in our 2013 Form 10-K.

For information on our counterparty exposure, see “Part I – Item 3. Quantitative and Qualitative Disclosures About Market Risk.”

Comparison of the Three Months Ended September 30, 2014 to 2013

We had realized gains during 2014 as compared to losses during 2013 driven primarily by the following components of excluded realized gain (loss), which we have described net of benefit ratio unlocking, after-tax:

- Gains on variable annuity net derivatives results during 2014 attributable to the effect of unlocking and a favorable GLB NPR component due to widening of our credit spreads, partially offset by less favorable equity market growth and more volatile capital markets during 2014 resulting in unfavorable hedge program performance.
- General improvements in the credit markets during 2014 leading to a decline in OTTI.

The realized gains were partially offset by losses on the mark-to-market on certain instruments during 2014 as compared to gains during 2013 attributable primarily to a decrease in interest rates leading to losses on derivative investments (not including those associated with our variable annuity net derivatives results).

Comparison of the Nine Months Ended September 30, 2014 to 2013

We had realized gains during 2014 as compared to losses during 2013 driven primarily by the following components of excluded realized gain (loss), which we have described net of benefit ratio unlocking, after-tax:

- Gains on variable annuity net derivatives results during 2014 attributable to the effect of unlocking and a favorable GLB NPR component due to less narrowing of credit spreads, partially offset by less favorable equity market growth and more volatile capital markets during 2014 resulting in more unfavorable hedge program performance.
- General improvements in the credit markets during 2014 leading to a decline in OTTI.
- Higher gross realized gains related to certain investments during 2014 originating from asset sales to reposition the investment portfolio.

The realized gains were partially offset by losses on the mark-to-market on certain instruments during 2014 as compared to gains during 2013 attributable primarily to a decrease in interest rates leading to losses on derivative investments (not including those associated with our variable annuity net derivatives results).

See “Realized Gain (Loss) and Benefit Ratio Unlocking – Variable Annuity Net Derivatives Results” in our 2013 Form 10-K for a discussion of how our NPR adjustment is determined.

Operating Realized Gain (Loss)

See “Realized Gain (Loss) and Benefit Ratio Unlocking – Operating Realized Gain (Loss)” in our 2013 Form 10-K for a discussion of our operating realized gain (loss).

Realized Gain (Loss) Related to Certain Investments

See “Consolidated Investments – Realized Gain (Loss) Related to Certain Investments” below.

Gain (Loss) on the Mark-to-Market on Certain Instruments

See “Realized Gain (Loss) and Benefit Ratio Unlocking – Gain (Loss) on the Mark-to-Market on Certain Instruments” in our 2013 Form 10-K for a discussion of the mark-to-market on certain instruments and Note 3 for information about consolidated variable interest entities (“VIEs”).

Variable Annuity Net Derivatives Results

See “Realized Gain (Loss) and Benefit Ratio Unlocking – Variable Annuity Net Derivatives Results” in our 2013 Form 10-K for a discussion of our variable annuity net derivatives results.

Details underlying our variable annuity hedging program (dollars in millions) were as follows:

	As of September 30, 2014	As of June 30, 2014	As of March 31, 2014	As of December 31, 2013	As of September 30, 2013
Variable annuity hedge program assets (liabilities)	\$ 1,039	\$ 502	\$ 335	\$ (49)	\$ 445
Variable annuity reserves – asset (liability):					
Embedded derivative reserves, pre-NPR (1)	\$ 694	\$ 1,043	\$ 1,067	\$ 1,345	\$ 780
NPR	(102)	(111)	(88)	(101)	(69)
Embedded derivative reserves	592	932	979	1,244	711
Insurance benefit reserves	(319)	(265)	(258)	(236)	(233)
Total variable annuity reserves – asset (liability)	\$ 273	\$ 667	\$ 721	\$ 1,008	\$ 478
10-year credit default swap ("CDS") spread	1.26%	1.15%	1.27%	1.46%	1.74%
NPR factor related to 10-year CDS spread	0.19%	0.08%	0.13%	0.15%	0.18%

(1) Embedded derivative reserves in an asset (liability) position indicate that we estimate the present value of future benefits to be less (greater) than the present value of future net valuation premiums.

The following shows the approximate hypothetical effect to net income, pre-DAC (1), pre-tax (in millions) for changes in the NPR factor along all points on the spread curve as of September 30, 2014:

	Hypothetical Effect
NPR factor:	
Down 19 basis points to zero	\$ (105)
Up 20 basis points	55

(1) DAC refers to the associated amortization of DAC, VOBA, DSI and DFEL and changes in other contract holder funds and funds withheld reinsurance assets and liabilities.

See “Critical Accounting Policies and Estimates – Derivatives – Guaranteed Living Benefits” above for additional information about our guaranteed benefits.

Indexed Annuity Forward-Starting Option

See “Realized Gain (Loss) and Benefit Ratio Unlocking – Indexed Annuity Forward-Starting Option” in our 2013 Form 10-K for a discussion of our indexed annuity forward-starting option.

CONSOLIDATED INVESTMENTS

Total investments	\$ 101,385	\$ 95,291	100.0%	100.0%

Investment Objective

Invested assets are an integral part of our operations. We follow a balanced approach to investing for both current income and prudent risk management, with an emphasis on generating sufficient current income, net of income tax, to meet our obligations to customers, as well as other general liabilities. This balanced approach requires the evaluation of expected return and risk of each asset class utilized, while still meeting our income objectives. This approach is important to our asset-liability management because decisions can be made based upon both the economic and current investment income considerations affecting assets and liabilities. For a discussion of our risk management process, see "Part II – Item 7A. Quantitative and Qualitative Disclosures About Market Risk" in our 2013 Form 10-K.

Investment Portfolio Composition and Diversification

Fundamental to our investment policy is diversification across asset classes. Our investment portfolio, excluding cash and invested cash, is composed of fixed maturity securities, mortgage loans on real estate, real estate (either wholly-owned or in joint ventures) and other long-term investments. We purchase investments for our segmented portfolios that have yield, duration and other characteristics that take into account the liabilities of the products being supported.

We have the ability to maintain our investment holdings throughout credit cycles because of our capital position, the long-term nature of our liabilities and the matching of our portfolios of investment assets with the liabilities of our various products.

Fixed Maturity and Equity Securities Portfolios

Fixed maturity securities and equity securities consist of portfolios classified as AFS and trading. Mortgage-backed and private securities are included in both of the AFS and trading portfolios.

Details underlying our fixed maturity and equity securities portfolios by industry classification (in millions) are presented in the tables below. These tables agree in total with the presentation of AFS securities in Note 4; however, the categories below represent a more detailed breakout of the AFS portfolio. Therefore, the investment classifications listed below do not agree to the investment categories provided in Note 4.

(1) Certain trading securities support our modified coinsurance arrangements (“Modco”), and the investment results are passed directly to the reinsurers. Refer to “Part II – Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations – Consolidated Investments – Fixed Maturity and Equity Securities Portfolios – Trading Securities” in our 2013 Form 10-K for further details.

AFS Securities

In accordance with the AFS accounting guidance, we reflect stockholders’ equity as if unrealized gains and losses were actually recognized, and consider all related accounting adjustments that would occur upon such a hypothetical recognition of unrealized gains and losses. Such related balance sheet effects include adjustments to the balances of DAC, VOBA, DFEL, future contract benefits, other contract holder funds and deferred income taxes. Adjustments to each of these balances are charged or credited to accumulated other comprehensive income (loss) (“AOCI”). For instance, DAC is adjusted upon the recognition of unrealized gains or losses because the

amortization of DAC is based upon an assumed emergence of gross profits on certain insurance business. Deferred income tax balances are also adjusted because unrealized gains or losses do not affect actual taxes currently paid.

The quality of our AFS fixed maturity securities portfolio, as measured at estimated fair value and by the percentage of fixed maturity AFS securities invested in various ratings categories, relative to the entire fixed maturity AFS security portfolio (in millions) was as follows:

NAIC Designation (1)	Rating Agency Equivalent Designation (1)	As of September 30, 2014			As of December 31, 2013		
		Amortized Cost	Fair Value	% of Total	Amortized Cost	Fair Value	% of Total

Total fixed maturity AFS securities		\$ 79,070	\$ 85,946	100.0%	\$ 77,035	\$ 80,775	100.0%
Total securities below investment grade as a percentage of total fixed maturity AFS securities		5.2%	4.7%		4.7%	4.4%	

(1) Based upon the rating designations determined and provided by the National Association of Insurance Commissioners (“NAIC”) or the major credit rating agencies (Fitch Ratings (“Fitch”), Moody’s Investors Service (“Moody’s”) and Standard & Poor’s (“S&P”)). For securities where the ratings assigned by the major credit agencies are not equivalent, the second highest rating assigned is used. For those securities where ratings by the major credit rating agencies are not available, which does not represent a significant amount of our total fixed maturity AFS securities, we base the ratings disclosed upon internal ratings. The average credit quality was A- as of September 30, 2014.

Comparisons between the NAIC ratings and rating agency designations are published by the NAIC. The NAIC assigns securities quality ratings and uniform valuations, which are used by insurers when preparing their annual statements. The NAIC ratings are similar to the rating agency designations of the Nationally Recognized Statistical Rating Organizations for marketable bonds. NAIC ratings 1 and 2 include bonds generally considered investment

grade (rated BBB- or higher by Fitch and S&P, or rated Baa3 or higher by Moody's), by such ratings organizations. However, securities rated NAIC 1 and NAIC 2 could be deemed below investment grade by the rating agencies as a result of the current RBC rules for residential mortgage-backed securities ("RMBS") and CMBS for statutory reporting. NAIC ratings 3 through 6 include bonds generally considered below investment grade (rated Ba1 or lower by Moody's, or rated BB+ or lower by S&P and Fitch).

As of September 30, 2014, and December 31, 2013, 88.8% and 92.9%, respectively, of the total publicly traded and private securities in an unrealized loss status were rated as investment grade. Our gross unrealized losses, including the portion of OTTI recognized in other comprehensive income (loss) ("OCI"), on AFS securities as of September 30, 2014, decreased by \$876 million. As more fully described in Note 1 in our 2013 Form 10-K, we regularly review our investment holdings for OTTI. We believe the unrealized loss position as of September 30, 2014, does not represent OTTI as: (i) we do not intend to sell the debt securities; (ii) it is not more likely than not that we will be required to sell the debt securities before recovery of their amortized cost basis; (iii) the estimated future cash flows are equal to or greater than the amortized cost basis of the debt securities; and (iv) we have the ability and intent to hold the equity securities for a period of time sufficient for recovery. For further information on our unrealized losses on AFS securities, see "Composition by Industry Categories of our Unrealized Losses on AFS Securities" below.

Selected information for certain AFS securities in a gross unrealized loss position (dollars in millions) as of September 30, 2014, was as follows:

	Fair Value	Gross Unrealized Losses and OTTI	Estimated Years Until Call or Maturity	Estimated Average Years Until Recovery	Subordination Current	Level Origination
CMBS	\$ 122	\$ 14	1 to 39	14	3.5%	6.9%
Hybrid and redeemable preferred securities	207	37	1 to 52	21	N/A	N/A

As provided in the table above, many of the securities in these categories are long-dated with some of the preferred securities being perpetual. This is purposeful as it matches the long-term nature of our liabilities associated with our life insurance and annuity products. See “Part II – Item 7A. Quantitative and Qualitative Disclosures About Market Risk” in our 2013 Form 10-K where we present information related to maturities of securities and the expected cash flows for rate sensitive liabilities and maturities of our holding company debt, which also demonstrates the long-term nature of the cash flows associated with these items. Because of this relationship, we do not believe it will be necessary to sell these securities before they recover or mature. For these securities, the estimated range and average period until recovery is the call or maturity period. It is difficult to predict or project when the securities will recover as it is dependent upon a number of factors including the overall economic climate. We do not believe it is necessary to impair these securities as long as the expected future cash flows are projected to be sufficient to recover the amortized cost of these securities.

The actual range and period until recovery could vary significantly depending on a variety of factors, many of which are out of our control. There are several items that could affect the length of the period until recovery, such as the pace of economic recovery, level of delinquencies, performance of the underlying collateral, changes in market interest rates, exposures to various industry or geographic conditions, market behavior and other market conditions.

We concluded that it is not more likely than not that we will be required to sell the fixed maturity AFS securities before recovery of their amortized cost basis, that the estimated future cash flows are equal to or greater than the amortized cost basis of the debt securities, and that we have the ability to hold the equity AFS securities for a period of time sufficient for recovery. This conclusion is consistent with our asset-liability management process. Management considers the following as part of the evaluation:

- The current economic environment and market conditions;
- Our business strategy and current business plans;
- The nature and type of security, including expected maturities and exposure to general credit, liquidity, market and interest rate risk;
- Our analysis of data from financial models and other internal and industry sources to evaluate the current effectiveness of our hedging and overall risk management strategies;
- The current and expected timing of contractual maturities of our assets and liabilities, expectations of prepayments on investments and expectations for surrenders and withdrawals of life insurance policies and annuity contracts;
- The capital risk limits approved by management; and
- Our current financial condition and liquidity demands.

To determine the recoverability of a debt security, we consider the facts and circumstances surrounding the underlying issuer including, but not limited to, the following:

- Historical and implied volatility of the security;
- Length of time and extent to which the fair value has been less than amortized cost;
- Adverse conditions specifically related to the security or to specific conditions in an industry or geographic area;

- Failure, if any, of the issuer of the security to make scheduled payments; and
- Recoveries or additional declines in fair value subsequent to the balance sheet date.

As reported on our Consolidated Balance Sheets, we had \$103.2 billion of investments and cash, which exceeded the liabilities for our future obligations under insurance policies and contracts, net of amounts recoverable from reinsurers, which totaled \$88.6 billion as of September 30, 2014. If it were necessary to liquidate investments prior to maturity or call to meet cash flow needs, we would first look to AFS securities that are in an unrealized gain position, which had a fair value of \$73.3 billion, excluding consolidated VIEs in the amount of \$598 million, as of September 30, 2014, rather than selling securities in an unrealized loss position. The amount of cash that we have on hand takes into account our liquidity needs in the future, other sources of cash, such as the maturities of investments, interest and dividends we earn on our investments and the on-going cash flows from new and existing business.

See “AFS Securities – Evaluation for Recovery of Amortized Cost” in Note 1 in our 2013 Form 10-K and Note 4 for additional discussion.

As of September 30, 2014, and December 31, 2013, the estimated fair value for all private placement securities was \$14.1 billion and \$13.3 billion, respectively, representing 14% of total invested assets.

For information regarding our VIEs’ fixed maturity securities, see Note 3 in this report and Note 4 in our 2013 Form 10-K.

Mortgage-Backed Securities (“MBS”) (Included in AFS and Trading Securities)

See “Consolidated Investments – Mortgage-Backed Securities” in our 2013 Form 10-K for a discussion of our MBS.

Our ABS home equity and RMBS had a market value of \$5.1 billion and an unrealized gain of \$249 million, or 5%, as of September 30, 2014.

The market value of AFS securities and trading securities backed by subprime loans was \$473 million and represented less than 1% of our total investment portfolio as of September 30, 2014. AFS securities represented \$461 million, or 97%, and trading securities represented \$12 million, or 3%, of the subprime exposure as of September 30, 2014. The table below summarizes our investments in AFS securities backed by pools of residential mortgages (in millions) as of September 30, 2014:

- (1) Does not include the fair value of trading securities totaling \$5 million, which support our Modco reinsurance agreements because investment results for these agreements are passed directly to the reinsurers. The \$5 million in trading securities consisted of \$4 million CMBS and \$1 million CRE CDOs.
- (2) Does not include the amortized cost of trading securities totaling \$5 million, which support our Modco reinsurance agreements because investment results for these agreements are passed directly to the reinsurers. The \$5 million in trading securities consisted of \$4 million CMBS and \$1 million CRE CDOs.
- (3) Based upon the rating designations determined and provided by the major credit rating agencies (Fitch, Moody's and S&P). For securities where the ratings assigned by the major credit agencies are not equivalent, the second highest rating assigned is used. For those securities where ratings by the major credit rating agencies are not

available, which does not represent a significant amount of our total fixed maturity AFS securities, we base the ratings disclosed upon internal ratings.

As of September 30, 2014, the amortized cost and fair value of our AFS exposure to Monoline insurers was \$507 million and \$547 million, respectively.

Composition by Industry Categories of our Unrealized Losses on AFS Securities

When considering unrealized gain and loss information, it is important to recognize that the information relates to the status of securities at a particular point in time and may not be indicative of the status of our investment portfolios subsequent to the balance sheet date. Further, because the timing of the recognition of realized investment gains and losses through the selection of which securities are sold is largely at management's discretion, it is important to consider the information provided below within the context of the overall unrealized gain or loss position of our investment portfolios. These are important considerations that should be included in any evaluation of the potential effect of unrealized loss securities on our future earnings.

The composition by industry categories of all securities in unrealized loss status (in millions) as of September 30, 2014, was as follows:

	Fair Value	% Fair Value	Amortized Cost	% Amortized Cost	Gross Unrealized Losses and OTTI	% Gross Unrealized Losses and OTTI
Banking	\$ 720	5.8%	\$ 781	6.1%	\$ 61	11.5%

The global financial markets and credit market conditions experienced a period of extreme volatility and disruption that began in the second half of 2007 and continued and substantially increased throughout 2008 that led to a decrease in the overall liquidity and availability of capital in the mortgage loan market, and in particular a decrease in activity by securitization lenders. These conditions and the overall economic downturn put pressure on the fundamentals of mortgage loans through rising vacancies, falling rents and falling property values.

See Note 4 for information regarding our loan-to-value and debt-service coverage ratios and our allowance for loan losses.

As of September 30, 2014, and December 31, 2013, there were three impaired mortgage loans on real estate, or less than 1% of the total dollar amount of mortgage loans on real estate. The carrying value of the mortgage loans on real estate that were two or more payments delinquent as of September 30, 2014, and December 31, 2013, was \$8 million, or less than 1% of total mortgage loans on real estate. The total principal and interest past due on the mortgage loans on real estate that were two or more payments delinquent as of September 30, 2014, and December 31, 2013, was \$5 million. See Note 1 in our 2013 Form 10-K for more information regarding our accounting policy relating to the impairment of mortgage loans on real estate.

Alternative Investments

Investment income (loss) on alternative investments by business segment (in millions) was as follows:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change
Annuities	\$ 8	\$ 2	300%	\$ 23	\$ 9	156%
Retirement Plan Services	3	1	200%	10	5	100%
Life Insurance	32	14	129%	76	36	111%
Group Protection	3	1	200%	9	4	125%
Other Operations	-	-	NM	1	1	0%
Total (1)	\$ 46	\$ 18	156%	\$ 119	\$ 55	116%

(1) Includes net investment income on the alternative investments supporting the required statutory surplus of our insurance businesses.

As of September 30, 2014, and December 31, 2013, alternative investments included investments in 152 and 121 different partnerships, respectively, and the portfolio represented approximately 1% of our overall invested assets. The partnerships do not represent off-balance sheet financing and generally involve several third-party partners. Some of our partnerships contain capital calls, which require us to contribute capital upon notification by the general partner. These capital calls are contemplated during the initial investment decision and are planned for well in

advance of the call date. The capital calls are not material in size and are not material to our liquidity. Alternative investments are accounted for using the equity method of accounting and are included in Other investments on our Consolidated Balance Sheets.

Non-Income Producing Investments

As of September 30, 2014, and December 31, 2013, the carrying amount of fixed maturity securities, mortgage loans on real estate and real estate that were non-income producing was \$9 million.

Net Investment Income

Details underlying net investment income (in millions) and our investment yield were as follows:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change
Fixed maturity AFS securities	\$ 1,010	\$ 997	1%	\$ 3,027	\$ 2,977	2%

Alternative investments	0.20%	0.08%	12	0.17%	0.08%	9
Net investment income yield on invested						

assets 5.23% 5.25% (2) 5.26% 5.32% (6)

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change
Average invested assets at amortized cost	\$ 92,704	\$ 89,910	3%	\$ 91,870	\$ 88,870	3%

We earn investment income on our general account assets supporting fixed annuity, term life, whole life, UL, interest-sensitive whole life and the fixed portion of retirement plan and VUL products. The profitability of our fixed annuity and life insurance products is affected by our ability to achieve target spreads, or margins, between the interest income earned on the general account assets and the interest credited to the contract holder on our average fixed account values, including the fixed portion of variable. Net investment income and the interest rate yield table each include commercial mortgage loan prepayments and bond make-whole premiums, alternative investments and contingent interest and standby real estate equity commitments. These items can vary significantly from period to period due to a number of factors and, therefore, can provide results that are not indicative of the underlying trends.

Commercial Mortgage Loan Prepayment and Bond Make-Whole Premiums

Prepayment and make-whole premiums are collected when borrowers elect to call or prepay their debt prior to the stated maturity. A prepayment or make-whole premium allows investors to attain the same yield as if the borrower made all scheduled interest payments until maturity. These premiums are designed to make investors indifferent to prepayment.

Realized Gain (Loss) Related to Certain Investments

Details of the realized gain (loss) related to certain investments (in millions) were as follows:

	For the Three Months Ended September 30, 2014			For the Nine Months Ended September 30, 2013			Change
Fixed maturity AFS securities:							
Gross gains	\$ 4	\$ 5	-20%	\$ 23	\$ 17	35%	
Gross losses	(6)	(28)	79%	(18)	(73)	75%	
Equity AFS securities:							
Gross gains	2	1	100%	5	7	-29%	
Gross losses	-	(1)	100%	-	(2)	100%	
Gain (loss) on other investments	-	(2)	100%	3	(3)	200%	
Associated amortization of DAC, VOBA, DSI and DFEL and changes in other contract holder funds	(7)	(8)	13%	(24)	(19)	-26%	
Total realized gain (loss) related to certain investments, pre-tax	\$ (7)	\$ (33)	79%	\$ (11)	\$ (73)	85%	

Amortization of DAC, VOBA, DSI and DFEL and changes in other contract holder funds reflect an assumption for an expected level of credit-related investment losses. When actual credit-related investment losses are realized, we recognize a true-up to our DAC, VOBA, DSI and DFEL amortization and changes in other contract holder funds within realized loss reflecting the incremental effect of actual versus expected credit-related investment losses. These actual to expected amortization adjustments could create volatility in net realized gains and losses. The write-down for impairments includes both credit-related and interest rate-related impairments.

Realized gains and losses generally originate from asset sales to reposition the portfolio or to respond to product experience. During the first nine months of 2014 and 2013, we sold securities for gains and losses. In the process of evaluating whether a security with an unrealized loss reflects declines that are other-than-temporary, we consider our ability and intent to sell the security prior to a recovery of value. However, subsequent decisions on securities sales are made within the context of overall risk monitoring, assessing value relative to other comparable securities and overall portfolio maintenance. Although our portfolio managers may, at a given point in time, believe that the preferred course of action is to hold securities with unrealized losses that are considered temporary until such losses are recovered, the dynamic nature of portfolio management may result in a subsequent decision to sell. These subsequent decisions are consistent with the classification of our investment portfolio as AFS. We expect to continue

to manage all non-trading invested assets within our portfolios in a manner that is consistent with the AFS classification.

We consider economic factors and circumstances within countries and industries where recent write-downs have occurred in our assessment of the status of securities we own of similarly situated issuers. While it is possible for realized or unrealized losses on a particular investment to affect other investments, our risk management strategy has been designed to identify correlation risks and other risks inherent in managing an investment portfolio. Once identified, strategies and procedures are developed to effectively monitor and manage these risks. The areas of risk correlation that we pay particular attention to are risks that may be correlated within specific financial and business markets, risks within specific industries and risks associated with related parties.

When the detailed analysis by our external asset managers and investment portfolio managers leads us to the conclusion that a security's decline in fair value is other-than-temporary, the security is written down to estimated recovery value. In instances where declines are considered temporary, the security will continue to be carefully monitored. See "Critical Accounting Policies and Estimates – Investments – Write-downs for OTTI and Allowance for Losses" in our 2013 Form 10-K for additional information on our portfolio management strategy.

Details underlying write-downs taken as a result of OTTI (in millions) were as follows:

	For the Three Months Ended September 30, 2014			For the Nine Months Ended September 30, 2013			Change		
OTTI Recognized in Net Income (Loss)									
Fixed maturity securities:									
Corporate bonds	\$ (2)	\$ (11)	82%	\$ (7)	\$ (21)	67%			
RMBS	(1)	(10)	90%	(4)	(25)	84%			
CMBS	-	(1)	100%	(1)	(15)	93%			
CRE CDOs	(2)	-	NM	(2)	(1)	-100%			
Total fixed maturity securities	(5)	(22)	77%	(14)	(62)	77%			
Equity securities	-	(1)	100%	-	(1)	100%			
Gross OTTI recognized in net income (loss)	(5)	(23)	78%	(14)	(63)	78%			
Associated amortization of DAC, VOBA, DSI and DFEL	1	4	-75%	3	11	-73%			
Net OTTI recognized in net income (loss), pre-tax	\$ (4)	\$ (19)	79%	\$ (11)	\$ (52)	79%			
Portion of OTTI Recognized in OCI									
Gross OTTI recognized in OCI	\$ 2	\$ 4	-50%	\$ 11	\$ 10	10%			
Change in DAC, VOBA, DSI and DFEL	-	(1)	100%	(1)	(1)	0%			
Net portion of OTTI recognized in OCI, pre-tax	\$ 2	\$ 3	-33%	\$ 10	\$ 9	11%			

The decrease in write-downs for OTTI when comparing the first nine months of 2014 to the corresponding period in 2013 was attributable to declines in write-downs for OTTI on corporate bonds and structured holdings. The improvements of the write-downs for OTTI on our RMBS and CMBS holdings were primarily attributable to gradual recovery in both residential and commercial real estate markets.

The \$25 million of impairments taken during the first nine months of 2014 were split between \$14 million of credit-related impairments and \$11 million of noncredit-related impairments. The credit-related impairments were largely attributable to our ABS home equity and RMBS holdings primarily as a result of weakness within select residential real estate securities. The noncredit-related impairments were due to declines in values of securities for which we do not have an intent to sell or it is not more likely than not that we will be required to sell the securities before recovery.

REINSURANCE

See “Part II – Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations – Reinsurance” in our 2013 Form 10-K and “Part I – Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations – Reinsurance” in our Form 10-Q for the quarter ended March 31, 2014, for a detailed discussion regarding our counterparty risk with our reinsurers, including collateral securing our reinsurance recoverable and rate increases sought by certain reinsurers, which information is incorporated herein by reference. For more information about reinsurance, see Note 9 in our 2013 Form 10-K.

REVIEW OF CONSOLIDATED FINANCIAL CONDITION

Liquidity and Capital Resources

Sources of Liquidity and Cash Flow

Liquidity refers to the ability of an enterprise to generate adequate amounts of cash from its normal operations to meet cash requirements with a prudent margin of safety. Our principal sources of cash flow from operating activities are insurance premiums and fees and investment income, while sources of cash flows from investing activities result from maturities and sales of invested assets. Our operating activities provided cash of \$1.1 billion and \$504 million for the nine months ended September 30, 2014 and 2013, respectively. When considering our liquidity and cash flow, it is important to distinguish between the needs of our insurance subsidiaries and the needs of the holding company, LNC. As a holding company with no operations of its own, LNC derives its cash primarily from its operating subsidiaries.

The sources of liquidity of the holding company are principally comprised of dividends and interest payments from subsidiaries, augmented by holding company short-term investments, bank lines of credit and the ongoing availability of long-term public financing under an SEC-filed shelf registration statement. These sources of liquidity and cash flow support the general corporate needs of the

holding company, including its common stock dividends, interest and debt service, funding of callable securities, securities repurchases, acquisitions and investment in core businesses. Our cash flows associated with collateral received from and posted with counterparties change as the market value of the underlying derivative contract changes. As the value of a derivative asset declines (or increases), the collateral required to be posted by our counterparties would also decline (or increase). Likewise, when the value of a derivative liability declines (or increases), the collateral we are required to post to our counterparties would also decline (or increase). During the nine months ended September 30, 2014, our payables for collateral on derivative investments increased by \$638 million due primarily to falling interest rates that increased the fair values of our associated derivative investments. For additional information, see “Credit Risk” in Note 5.

Details underlying the primary sources of our holding company cash flows (in millions) were as follows:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change
Dividends from Subsidiaries						
LNL	\$ 175	\$ 150	17%	\$ 515	\$ 450	14%
First Penn-Pacific	-	-	NM	20	40	-50%
Loan Repayments and Interest from Subsidiaries						
Interest on inter-company notes	34	52	-35%	99	95	4%
	\$ 209	\$ 202	3%	\$ 634	\$ 585	8%
Other Cash Flow and Liquidity Items						
Net capital received from (paid for taxes on) stock option exercises and restricted stock	\$ 23	\$ 1	NM	\$ 20	\$ (2)	NM

The table above focuses on significant and recurring cash flow items and excludes the effects of certain financing activities, namely the periodic issuance and retirement of debt and cash flows related to our inter-company cash management program (discussed below). Taxes have been eliminated from the analysis due to a tax sharing agreement among our primary subsidiaries resulting in a modest effect on net cash flows at the holding company. Also excluded from this analysis is the modest amount of investment income on short-term investments of the holding company.

Subsidiaries' Statutory Reserving and Surplus

Like other life insurers, we utilize inter-company reinsurance arrangements with captives primarily to manage risk and statutory capital. Captive reinsurers are typically special purpose vehicles that either by statute or by restriction in their licensing orders are limited to reinsuring business from insurance affiliates. Specifically, captives help us mitigate the capital impact of XXX and AG38 reserving guidelines. XXX and AG38 require insurers to use reserving assumptions that result in statutory reserves for term life insurance policies and UL policies with secondary guarantees greater than what we expect to adequately support these policies. The captive reinsurance structures we use provide a mechanism for the financing of a portion of the excess reserve amounts in a more efficient manner. This, in turn, frees up capital that the insurance subsidiaries can use for any number of purposes, including for paying dividends to the holding company. Once transferred to the holding company, it can deploy this capital for a variety of corporate purposes, including potentially for stock repurchases.

Currently, insurance companies are using a wide variety of captive reinsurance structures to support their respective businesses. The NAIC through its various committees, task forces and working groups has been studying the use of captives and special purpose vehicles to transfer insurance risk and has been evaluating the adequacy of existing NAIC model laws and regulations applicable to captives. Recently, the NAIC directed its various committees, task forces and working groups to develop draft regulatory changes based upon recommendations of its retained consultant for further consideration by the NAIC. Certain of these recommendations are expected to be implemented effective January 1, 2015. We believe that, ultimately, if adopted by the NAIC and the states, those changes will allow for the continued use of captive structures, although certain types of captive structures may be limited or prohibited or the benefits of certain captive structures reduced. We also believe that existing captive structures, which have been approved by the insurance departments of both the ceding company's and captive's states of domicile, will not be affected materially by the NAIC's final actions.

There remains uncertainty to what extent the NAIC and the state regulators will require changes to future captive reinsurance structures. If we are unable to continue to implement such captive structures, or if changes make the use of future structures less capital efficient, we may have lower returns on such products sold than we currently anticipate and/or raise prices or reduce our sales of these products. As a result, our insurance subsidiaries may have lower capacity to provide dividends to the holding company.

For more discussion of our strategies to lessen the burden of increased XXX and AG38 statutory reserves associated with term products and UL products containing secondary guarantees on our insurance subsidiaries, see "Results of Life Insurance – Income (Loss) from Operations – Strategies to Address Statutory Reserve Strain."

Financing Activities

Although our subsidiaries currently generate adequate cash flow to meet the needs of our normal operations, periodically we may issue debt or equity securities to maintain ratings and increase liquidity, as well as to fund internal growth, acquisitions and the retirement of our debt and equity securities.

We currently have an effective shelf registration statement, which allows us to issue, in unlimited amounts, securities, including debt securities, preferred stock, common stock, warrants, stock purchase contracts, stock purchase units, depository shares and trust preferred securities of our affiliated trusts.

Details underlying debt and financing activities (in millions) were as follows:

	For the Nine Months Ended September 30, 2014					
	Beginning		Maturities, and	Change in Fair Value	Other Changes	Ending
	Balance	Issuance	Refinancing	Hedges	(1)	Balance
Short-Term Debt						
Current maturities of long-term debt (2)	\$ 501	\$ -	\$ (500)	\$ -	\$ 249	\$ 250
Long-Term Debt						
Senior notes	\$ 3,609	\$ -	\$ -	\$ 116	\$ (250)	\$ 3,475
Bank borrowing	250	-	-	-	-	250
Federal Home Loan Bank of Indianapolis advance	250	-	-	-	-	250
Capital securities	1,211	-	-	-	-	1,211
Total long-term debt	\$ 5,320	\$ -	\$ -	\$ 116	\$ (250)	\$ 5,186

(1) Includes the net increase (decrease) in commercial paper, non-cash reclassification of long-term debt to current maturities of long-term debt, accretion of discounts and (amortization) of premiums, as applicable.

(2) As of September 30, 2014, consisted of a \$250 million 4.30% fixed-rate senior note maturing on June 15, 2015.

During the first quarter of 2014, we repaid a \$300 million 4.75% fixed-rate senior note that matured on January 30, 2014, and a \$200 million 4.75% fixed-rate senior note that matured on February 15, 2014. The specific resources or combination of resources that we will use to meet the June 2015 maturity mentioned above will depend upon, among other things, the financial market conditions present at the time of maturity. As of September 30, 2014, the holding company had available liquidity of \$572 million. Available liquidity consists of cash and invested cash, excluding cash held as collateral, and certain short-term investments that can be readily converted into cash, net of commercial paper outstanding.

For more information about our short-term and long-term debt and our credit facilities and LOCs, see Note 12 in our 2013 Form 10-K.

We have not accounted for repurchase agreements, securities lending transactions, or other transactions involving the transfer of financial assets with an obligation to repurchase the transferred assets as sales and do not have any other transactions involving the transfer of financial assets with an obligation to repurchase the transferred assets. For information about our collateralized financing transactions on our investments, see “Payables for Collateral on Investments” in Note 4.

If current credit ratings and claims-paying ratings were downgraded in the future, terms in our derivative agreements may be triggered, which could negatively affect overall liquidity. For the majority of our counterparties, there is a termination event should the long-term senior debt ratings of LNC drop below BBB-/Baa3 (S&P/Moody’s). Our long-term senior debt held a rating of A-/Baa1 (S&P/Moody’s) as of September 30, 2014. In addition, contractual selling agreements with intermediaries could be negatively affected, which could have an adverse effect on overall sales of annuities, life insurance and investment products. See “Part I – Item 1A. Risk Factors – Liquidity and Capital Position – A decrease in the capital and surplus of our insurance subsidiaries may result in a downgrade to our credit and insurer financial strength ratings” and “Part I – Item 1A. Risk Factors – Covenants and Ratings – A downgrade in our financial strength or credit ratings could limit our ability to market products, increase the number or value of policies being surrendered and/or hurt our relationships with creditors” in our 2013 Form 10-K for more information. See “Part I – Item 1. Business – Financial Strength Ratings” in our 2013 Form 10-K for additional information on our current financial strength ratings.

See “Part II – Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations – Review of Consolidated Financial Condition – Liquidity and Capital Resources – Financing Activities” in our 2013 Form 10-K for information on our credit ratings.

Alternative Sources of Liquidity

In order to manage our capital more efficiently, we have an inter-company cash management program where certain subsidiaries can lend to or borrow from the holding company to meet short-term borrowing needs. The cash management program is essentially a series of demand loans between LNC and participating subsidiaries that reduces overall borrowing costs by allowing LNC and its subsidiaries to access internal resources instead of incurring third-party transaction costs. As of September 30, 2014, the holding company had a net outstanding receivable of \$212 million from certain subsidiaries resulting from funds borrowed by the subsidiaries in excess of amounts placed by those subsidiaries in the inter-company cash management account. Any change in holding company cash management program balances is offset by the immediate and equal change in holding company cash and invested cash. Loans under the cash management program are permitted under applicable insurance laws subject to certain restrictions. For our Indiana-domiciled insurance subsidiaries, the borrowing and lending limit is currently 3% of the insurance company's admitted assets as of its most recent year end. For our New York-domiciled insurance subsidiary, it may borrow from LNC less than 2% of its admitted assets as of the last year end but may not lend any amounts to LNC.

Our insurance subsidiaries, by virtue of their general account fixed-income investment holdings, can access liquidity through securities lending programs and repurchase agreements. As of September 30, 2014, our insurance subsidiaries had investments with a carrying value of \$2.6 billion out on loan or subject to repurchase agreements. The cash received in our securities lending programs and repurchase agreements is typically invested in cash equivalents, short-term investments or fixed maturity securities. For additional details, see "Payables for Collateral on Investments" in Note 4.

For factors that could cause actual results to differ materially from those set forth in this section, see "Forward-Looking Statements – Cautionary Language" above and "Part I – Item 1A. Risk Factors" in our 2013 Form 10-K.

Divestitures

For a discussion of our divestitures, see Note 3 in our 2013 Form 10-K.

Uses of Capital

Our principal uses of cash are to pay policy claims and benefits, operating expenses, commissions and taxes, to purchase new investments, to purchase reinsurance, to fund policy surrenders and withdrawals, to pay dividends to our stockholders and to repurchase our stock and debt securities.

Return of Capital to Common Stockholders

One of the Company's primary goals is to provide a return to our common stockholders through share price accretion, dividends and stock repurchases. In determining dividends, the Board of Directors takes into consideration items such as current and expected earnings, capital needs, rating agency considerations and requirements for financial flexibility. The amount and timing of share repurchase depends on key capital ratios, rating agency expectations, the generation of free cash flow and an evaluation of the costs and benefits associated with alternative uses of capital. Free cash flow for the holding company generally represents the amount of dividends and interest received from subsidiaries less interest paid on debt.

Details underlying this activity (in millions, except per share data), were as follows:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change
Common dividends to stockholders	\$ 42	\$ 32	31%	\$ 126	\$ 97	30%
Repurchase of common stock	150	100	50%	450	350	29%
Total cash returned to stockholders	\$ 192	\$ 132	45%	\$ 576	\$ 447	29%
Number of shares repurchased	2.846	2.314	23%	8.911	10.010	-11%
Average price per share	\$ 52.75	\$ 43.24	22%	\$ 50.53	\$ 34.99	44%

On November 14, 2013, our Board of Directors approved an increase of the quarterly dividend on our common stock from \$0.12 to \$0.16 per share. Additionally, we expect to repurchase additional shares of common stock during the remainder of 2014 depending on market conditions and alternative uses of capital. For more information regarding share repurchases, see "Part II – Item 2(c)" below.

Other Uses of Capital

In addition to the amounts in the table above in “Return of Capital to Common Stockholders,” other uses of holding company cash flow (in millions) were as follows:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2014	2013	Change	2014	2013	Change
Debt service (interest paid)	\$ 64	\$ 63	2%	\$ 219	\$ 207	6%
Capital contribution to subsidiaries	5	-	NM	5	-	NM
Total	\$ 69	\$ 63	10%	\$ 224	\$ 207	8%

The above table focuses on significant and recurring cash flow items and excludes the effects of certain financing activities, namely the periodic retirement of debt and cash flows related to our inter-company cash management account. Taxes have been eliminated from the analysis due to a tax sharing agreement among our primary subsidiaries resulting in a modest effect on net cash flows at the holding company.

Significant Trends in Sources and Uses of Cash Flow

As stated above, LNC’s cash flow, as a holding company, is largely dependent upon the dividend capacity of its insurance company subsidiaries as well as their ability to advance funds to it through inter-company borrowing arrangements, which may be affected by factors influencing the insurance subsidiaries’ RBC and statutory earnings performance. We currently expect to be able to meet the holding company’s ongoing cash needs and to have sufficient capital to offer downside protection in the event that the capital and credit markets experience another period of extreme volatility and disruption. A decline in capital market conditions, which reduces our insurance subsidiaries’ statutory surplus and RBC, may require them to retain more capital and may pressure our subsidiaries’ dividends to the holding company, which may lead us to take steps to preserve or raise additional capital. For factors that could affect our expectations for liquidity and capital, see “Part I – Item 1A. Risk Factors” in our 2013 Form 10-K.

OTHER MATTERS

Other Factors Affecting Our Business

In general, our businesses are subject to a changing social, economic, legal, legislative and regulatory environment. Some of the changes include initiatives to require more reserves to be carried by our insurance subsidiaries. Although the eventual effect on us of the changing environment in which we operate remains uncertain, these factors and others could have a material effect on our results of operations, liquidity and capital resources. For factors that could cause actual results to differ materially from those set forth in this section, see “Part I – Item 1A. Risk Factors” in our 2013 Form 10-K and “Forward-Looking Statements – Cautionary Language” above.

Recent Accounting Pronouncements

See Note 2 for a discussion of recent accounting pronouncements that have been implemented during the periods presented or that have been issued and are to be implemented in the future.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We analyze and manage the risks arising from market exposures of financial instruments, as well as other risks, in an integrated asset-liability management process that considers diversification. By aggregating the potential effect of market and other risks on the entire enterprise, we estimate, review and in some cases manage the risk to our earnings and shareholder value. We have exposures to several market risks including interest rate risk, equity market risk, default risk, credit risk and, to a lesser extent, foreign currency exchange risk. The exposures of financial instruments to market risks, and the related risk management processes, are most important to our business where most of the invested assets support accumulation and investment-oriented insurance products. As an important element of our integrated asset-liability management processes, we use derivatives to minimize the effects of changes in interest levels, the shape of the yield curve, currency movements and volatility. In this context, derivatives serve to minimize interest rate risk by mitigating the effect of significant increases in interest rates on our earnings. Additional market exposures exist in our other general account insurance products and in our debt structure and derivatives positions. Our primary sources of market risk are substantial, relatively rapid and sustained increases or decreases in interest rates or a sharp drop in equity market values. These market risks are discussed in detail in the following pages and should be read in conjunction with our consolidated financial statements and the accompanying notes to the consolidated financial statements (“Notes”) presented in “Item 1. Financial Statements,” as well as “Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations” (“MD&A”).

Interest Rate Risk

Effect of Interest Rate Sensitivity

For information about the effect of interest rate sensitivity on our income (loss) from operations, see “Part II – Item 7A. Quantitative and Qualitative Disclosures About Market Risk – Interest Rate Risk – Effect of Interest Rate Sensitivity” in our 2013 Form 10-K.

Interest Rate Risk on Fixed Insurance Businesses

In periods of low interest rates, we have to reinvest the cash we receive as interest or return of principal on our investments in lower yielding instruments. Moreover, borrowers may prepay fixed-income securities, commercial mortgages and mortgage-backed securities in our general accounts in order to borrow at lower market rates, which exacerbates this risk. Because we are entitled to reset the interest rates on our fixed-rate annuities only at limited, pre-established intervals, and because many of our contracts have guaranteed minimum interest or crediting rates, our spreads could decrease and potentially become negative.

Prolonged historically low rates are not healthy for our business fundamentals. However, we have recognized this risk and have been proactive in our investment strategies, product designs, crediting rate strategies and overall asset-liability practices to mitigate the risk of unfavorable consequences in this type of environment. For some time now, new products have been sold with low minimum crediting floors, and we apply disciplined asset-liability management standards, such as locking in spreads on these products at the time of issue.

The following provides detail on the percentage differences between the September 30, 2014, interest rates being credited to contract holders based on the third quarter of 2014 declared rates and the respective minimum guaranteed policy rate (in millions), broken out by contract holder account values reported within our segments:

Account Values				
	Retirement			%
	Plan	Life		Account
Annuities	Services		Total	Values

Insurance
(1)

Excess of Crediting Rates over Contract Minimums

Discretionary rate setting products: (2)

Occurring within the next twelve months: (3)

No difference	\$ 8,618	\$ 9,777	\$ 31,452	\$ 49,847	71.1%
Up to 0.50%	1,639	461	452	2,552	3.6%
0.51% to 1.00%	1,188	151	34	1,373	2.0%
