Forward-Looking Statements

This report on Form 10–K contains certain “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, which are intended to be covered by the safe harbors created by those laws. We have based our forward-looking statements on our current expectations and projections about future events. Our forward-looking statements include information about possible or assumed future results of our operations. All statements, other than statements of historical facts, included or incorporated by reference in this report that address activities, events or developments that we expect or anticipate may occur in the future, including such things as the growth of our business and operations, our business strategy, competitive strengths, goals, plans, future capital expenditures and references to future successes may be considered forward-looking statements. Also, when we use words such as anticipate, believe, estimate, expect, intend, probably or similar expressions, we are making forward-looking statements.

Numerous risks and uncertainties may impact the matters addressed by our forward-looking statements, any of which could negatively and materially affect our future financial results and performance. We describe some of these risks and uncertainties in greater detail in Item 1A of this report, Risk Factors.

Although we believe that the assumptions underlying our forward-looking statements are reasonable, any of these assumptions, and, therefore, also the forward-looking statements based on these assumptions, could themselves prove to be inaccurate. In light of the significant uncertainties inherent in the forward-looking statements that are included in this report, our inclusion of this information is not a representation by us or any other person that our objectives and plans will be achieved. Our forward-looking statements speak only as of the date made, and we will not update these forward-looking statements unless the securities laws require us to do so. In light of these risks, uncertainties and assumptions, any forward-looking event discussed in this report may not occur.

PART I

ITEM 1. BUSINESS

Business Overview

Independence Holding Company is a Delaware corporation (NYSE: IHC) that was formed in 1980. We are a holding company principally engaged in the life and health insurance business with principal executive offices located at 96 Cummings Point Road, Stamford, Connecticut 06902. We currently own a 49.7% equity interest in American Independence Corp. (NASDAQ:AMIC), which owns Independence American Insurance Company ("Independence American") and several managing general underwriters ("MGUs").

Our website is located at www.ihcgroup.com. Detailed information about IHC, its corporate affiliates and insurance products and services can be found on our website. In addition, we make our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and all amendments to such reports available, free of charge, through our website, as soon as reasonably practicable after they are filed with or furnished to the SEC. The information on our website, however, is not incorporated by reference in, and does not form part of, this Annual Report on Form 10-K.

IHC provides specialized life and health coverages and related services to commercial customers and individuals. We focus on niche products and/or narrowly defined distribution channels in the United States. Our wholly owned insurance company subsidiaries, Standard Security Life Insurance Company of New York ("Standard Security Life") and Madison National Life Insurance Company, Inc. ("Madison National Life") market their products through independent and affiliated brokers, producers and agents. Independence American also distributes through these sources as well as to consumers through a dedicated controlled distribution.

Madison National Life and Standard Security Life are sometimes collectively referred to as the "Insurance Group." IHC and its subsidiaries (including the Insurance Group) are sometimes collectively referred to as the "Company", or "IHC", or are implicit in the terms "we", "us" and "our".

IHC retains much of the risk that it underwrites, and focuses on the following lines of business:

.

Medical excess (or "stop-loss")

.

Multiple fully insured health lines

.

Group disability and life

.

Individual life, primarily through block acquisitions

Each of Standard Security Life, Madison National Life and our affiliate, Independence American, is rated A- (Excellent) by A.M. Best Company, Inc. ("Best"). Standard Security Life is domiciled in New York and licensed as an insurance company in all 50 states, the District of Columbia, the Virgin Islands and Puerto Rico. Madison National Life is domiciled in Wisconsin, licensed to sell insurance products in 49 states, the District of Columbia, the Virgin Islands and Guam, and is an accredited reinsurer in New York. Independence American is domiciled in Delaware and licensed to sell insurance products in 49 states and the District of Columbia. We have been informed by Best that a Best rating is assigned after an extensive quantitative and qualitative evaluation of a company's financial condition and operating performance and is also based upon factors relevant to policyholders, agents, and intermediaries, and is not directed toward protection of investors. Best ratings are not recommendations to buy, sell or hold any of our securities.

Our administrative companies underwrite, market, administer and/or price life and health insurance business for our owned and affiliated carriers, and, to a lesser extent, for non-affiliated insurance companies. They receive fees for these services and do not bear any of the insurance risk of the companies to which they provide services, other than through profit commissions or profit slides. Our principal administrative companies are Insurers Administrative Corporation (IAC), Majestic Underwriters, LLC ("Majestic"), Health Plan Administrators, Inc. (HPA), GroupLink Inc. (GroupLink), and Actuarial Management Corporation ("AMC"). AMIC's administrative companies are IndependenceCare Underwriting Services, Risk Assessment Strategies, and Voorhees Risk Management, d.b.a. Marlton Risk Group (collectively, the "AMIC MGUs").

Our general agencies earn commissions for selling life and health insurance products underwritten by IHC s owned and affiliated insurance companies and also by unaffiliated carriers. IHC s principal agency is IHC Health Solutions, Inc. (IHC Health Solutions). In addition, AMIC owns controlling interests in Independent Producers of America, LLC ("IPA") and Healthinsurance.org LLC. IPA is a national, career agent marketing organization. Healthinsurance.org LLC is an online marketing company that owns www.healthinsurance.org, a lead generation site for individual health insurance.

For information pertaining to the Company's business segments, reference is made to Note 21 of the Notes to Consolidated Financial Statements included in Item 8 of this report.

Our Philosophy

Our business strategy consists of maximizing underwriting profits through a variety of niche life and health insurance products and/or through distribution channels that enable us to access underserved markets or markets in which we believe we have a competitive advantage. Standard Security Life and Madison National Life focus on establishing preferred relationships with producers who seek an alternative to larger, more bureaucratic health insurers, and on providing these producers with personalized service and unique rewards programs. Independence American focuses on alternative distribution sources, such as captive agencies and direct-to-consumer initiatives. While our management considers a wide range of factors in its strategic planning and decision-making, underwriting profit is consistently emphasized as the primary goal in all decisions. We seek transactions that will generate fee income and profit commissions for our administrative operating companies as well as risk income for our insurance carriers, thereby permitting us to leverage IHC's vertically integrated organizational structure.

The health insurance industry tends to be cyclical, and excess products, such as medical stop-loss, tend to be more volatile than fully insured health products. During a soft market cycle, a larger number of companies offer insurance on a certain line of business, which causes premiums in that line to trend downward. In a hard market cycle, insurance companies limit their writings in certain lines of business following periods of excessive losses and insurance and reinsurance companies redeploy their capital to lines that they believe will achieve higher margins.

As a result of our expansion into the Fully Insured Health Segment and our increased control of distribution through corporate acquisitions, we are now better able to respond to market cycles by redeploying the focus of our insurance underwriting activity across a larger number of business lines. During the soft medical stop-loss market that has persisted for the past five years, we have encouraged our owned and affiliated MGUs to be more selective in order to achieve better underwriting results. While we had seen improvement in our 2005 results, we recognized during 2007 that several of our MGUs had been less selective in their 2006 and 2007 business. As a result we terminated several non-owned MGUs in 2008 and reduced our retention on the business generated by others, and have been successful in improving our underwriting results. While we expect to see some decrease in our gross written stop-loss premiums, we anticipate greater fully insured health premiums both on a gross- and a

net-retained basis, as we selectively retain more risk on certain programs. We are also benefiting from fee income from our administrative and sales companies, which is generally not subject to insurance risk.

DISTRIBUTION

Medical Stop-Loss

We market medical stop-loss primarily through MGUs which are non-salaried contractors that receive administrative fees. MGUs are responsible for underwriting accounts in accordance with guidelines formulated and approved by us, billing and collecting premiums, paying commissions to agents, third party administrators ("TPAs") and/or brokers, and processing claims. We are responsible for selecting MGUs, establishing underwriting guidelines, maintaining approved policy forms and overseeing claims for reimbursement, as well as for establishing appropriate accounting procedures and reserves. In order to accomplish this, we audit the MGUs' underwriting, claims and policy issuance practices to assure compliance with our guidelines, provide the MGUs with access to our medical management and cost containment expertise, and review cases that require referral based on our underwriting guidelines. MGUs receive fee income, generally 8% to 12% of gross premium produced by them on behalf of the insurance carriers they represent, and typically are entitled to additional income based on underwriting results.

During 2008, Standard Security Life and Madison National Life wrote approximately 53.9% of their medical stop-loss business through Majestic, the AMIC MGUs and TRU Services (TRU) (collectively, the "Affiliated MGUs"). During 2008, we terminated three MGUs and did not appoint any new ones.

The agents and brokers that produce this business are non-salaried contractors that receive commissions.

Fully Insured Health

The Fully Insured Health Segment includes six lines of business (major medical health plans for small groups, individuals and families, dental/vision, short-term medical ("STM"), limited medical, and student medical) that are sold in the majority of states through multiple and varied distribution strategies. The largest line of business in this segment continues to be major medical for small employer groups (defined as employers with between two and fifty employees), but the other lines are growing more rapidly. The majority of our business in this segment is written through general agents, agents and brokers. We also market (i) directly to agents through the IHC Health Solutions telesales unit, (ii) through private-label arrangements managed by IHC Health Solutions with non-affiliated carriers,

and (iii) through AMIC's captive agency relationships.

We entered the Fully Insured Health Segment as a result of several strategic acquisitions and partnerships starting in 2005. We have built a controlled platform to write small-group major medical, major medical health plans for individuals and families, dental/vision, short-term medical, limited medical and student medical. Our senior management team has extensive experience in these lines of business and the majority of our current fully insured health block was previously administered (on behalf of other carriers) by the companies we have acquired. Much of this existing block has been transferred to our carriers so we now benefit from administrative fee income at a variety of levels, earn risk profits and receive profit commissions from our reinsurers. The acquisition in 2007 of Actuarial Management Corporation not only brought in-house the actuarial expertise necessary to maintain the profitability of our fully insured business, but also added another source of fee income and potential profit commissions. The acquisition of IHC Health Solutions, also in 2007, has provided us with a marketing company specializing in alternative distribution methods and strategic partnerships.

IAC is a marketing and administration organization that has been underwriting and administering individual and group health insurance (including high-deductible employer-sponsored consumer driven health plans (CDHPs)) since its formation in 1978. IAC has approximately 300 salaried employees performing all aspects of underwriting, policy administration and managing fully insured group and individual health insurance on behalf of IHC and other carriers. IAC manages approximately \$230 million of individual and group health and life premiums and premium equivalents for multiple insurers, including the STM business it manages for HPA.

HPA manages and (together with IAC) administers all of the STM products sold by Standard Security Life, Madison National Life and Independence American. HPA, which has specialized in STM since 1990, distributes nationally through appointed general agents, agents and broker relationships. IHC has also begun cross-selling STM through its other distribution sources (including IAC, GroupLink and the MGUs).

GroupLink manages and administers all of the dental business sold by Standard Security Life and Madison National Life. GroupLink has distributed dental and vision products nationally, primarily through a brokerage distribution system utilizing general agents and brokers, since 1983. GroupLink also administers dental business for alternative distribution such as dental HMO's and other marketing organizations, all of which are independent contractors compensated on a commission-only basis.

IHC Health Solutions distributes our group major medical, individual medical, STM and dental products through strategic relationships with other insurance carriers and by private-labeling our product for large, national marketing organizations. In March 2006, IHC Health Solutions acquired a block of approximately \$50 million of small-group major medical business (including CDHPs) and the key personnel of a marketing and administration company. IHC Health Solutions currently employs approximately 35 sales and administrative staff personnel who promote our products and manage our marketing relationships.

In 2006, Standard Security Life introduced a limited medical policy for hourly workers and other currently uninsured Americans who cannot afford traditional health insurance. This product is primarily distributed for us by an agency which has been in this line of business since 1990. We introduced major medical insurance plans for individuals and families in 2007 through multiple distribution channels, including IAC, IHC Health Solutions and several strategic relationships. IAC currently administers a block of approximately \$75 million of such business. IHC's carriers now reinsure a portion of the business administered by IAC that is not on IHC paper and, in some cases, receive a fee for overseeing the program. Our main emphasis in 2008 was on increasing profit margins and distribution of existing products. In 2009, we will move a block of \$15 million of major medical plans for individuals and families, which has been administered by IAC for many years, from an unaffiliated insurance company to Standard Security Life.

The agents and brokers who produce the Fully Insured Health business are non-salaried contractors who receive commissions. IHC's gross earned premiums from this segment grew very quickly from 2005 to 2007, but were

relatively flat in 2008. We anticipate that the rate of growth will continue to be relatively flat in 2009.

Other Products

Our other products are primarily distributed by general agents, agents and brokers. Standard Security Life distributes group term life insurance products through MGUs (including its medical stop-loss MGUs), managed care organizations, general agents and brokers. It also markets specialized defined benefit and defined contribution service award programs with separate group life coverage to volunteer emergency services personnel and blanket accident insurance sold through two specialized general agents.

The short-term statutory disability benefit product in New York State ("DBL") is marketed primarily through independent general agents who are paid commissions based upon the amount of premiums produced. Madison National Life's disability and group life products are primarily sold in the Midwest to school districts, municipalities and hospital employer groups through a managing general agent that specializes in these target markets. We also sell through independent general agents and agents.

For a number of years Madison National Life has sold a whole-life product with an annuity rider to military personnel and civil service employees. As a result of this experience, in 2008 Madison National Life formed a subsidiary, IHC Financial Group, to recruit agents to sell life and annuity products to state and federal employees. Since these products are currently not available through IHC's carriers, IHC Financial Group has contracted with highly rated insurance companies to sell their life and annuity products to these individuals. The income for IHC Financial Group is derived completely from commissions on the sale of the products of these other companies. The agents and brokers who produce this business are non-salaried contractors who receive commissions. We do not expect to earn significant income from this subsidiary in 2009, but do anticipate growth as we continue to recruit new agents. We anticipate that premiums from our whole-life and annuity rider product will be relatively constant in 2009.

PRINCIPAL PRODUCTS

Medical Stop-Loss

The Company is a leading writer nationally of excess or stop-loss insurance for self-insured employer groups that desire to manage the risk of large medical claims ("Employer Medical Stop-Loss"). We also write excess policies for providers, managed care organizations, including provider hospital organizations, hospital groups, physician groups and individual practice associations (collectively, "MCOs") that have assumed risk and desire to reduce their claim volatility ("Provider Excess Loss") and for health maintenance organizations ("HMOs") that desire to reduce their claim volatility ("HMO Reinsurance"). Employer Medical Stop-Loss, Provider Excess Loss and HMO Reinsurance are collectively referred to as "Medical Stop-Loss."

Standard Security Life was one of the first carriers to market Employer Medical Stop-Loss insurance, starting in 1987, and the Insurance Group is now one of the largest writers of this product in the United States. Employer Medical Stop-Loss insurance provides coverage to public and private entities that elect to self-insure their employees' medical coverage for losses within specified ranges, which permits such groups to manage the risk of excessive health insurance costs by limiting specific and aggregate losses to predetermined amounts. This coverage is available on either a specific or a specific and aggregate basis, although the majority of the Insurance Group's policies cover both specific and aggregate claims. Plans are designed to fit the identified needs of the self-insured employer by offering a

variety of deductibles (i.e., the level of claims after which the medical stop-loss benefits become payable).

IHC anticipates some reduction in premiums in the Medical Stop-Loss line of business in 2009 due to the termination of certain employer medical stop-loss MGUs and even more stringent underwriting guidelines and the continuing consolidation of MCOs and reduced demand for Provider Excess Loss coverage.

Fully Insured Health Products

Group Major Medical

The Company began selling group major medical insurance (including CDHPs) primarily to small employers (two to 50 covered lives) during 2005, and significantly expanded its book of business in

2006 in large part as a result of an acquisition of a block of approximately \$50 million. IHC markets this product in the majority of states. It is fully insured major medical coverage that is principally designed to work with health reimbursement accounts ("HRA") and health savings accounts ("HSA") which are implemented by employers that wish to provide this benefit as part of an employee welfare benefit plan. These plans are offered primarily as preferred provider organizations ("PPO") plans, and provide a variety of cost-sharing options, including deductibles, coinsurance and co-payment. CDHPs are designed to provide participants with economic incentives to be informed consumers of healthcare.

In addition to small group, the Company offers a unique group medical plan to employers (small and large) who are contractors working on government-funded projects under the Davis-Bacon and Service Contract Acts ("the Acts"), much of which is associated with current and future U.S. infrastructure improvements. This plan helps contractors meet the provisions of a "bona fide" fringe benefit for their hourly workers as required in the Acts.

The Company anticipates a decrease in premiums in the small group line in 2009, primarily as a result of stricter underwriting guidelines and fewer groups purchasing major medical coverage as a result of current economic conditions. We do expect growth in plans associated with government-funded projects, primarily as a result of the recently enacted federal stimulus legislation, which will immediately provide funds for infrastructure improvements.

Short-Term Medical

As a result of the acquisition of HPA, IHC began selling individual major medical STM products ("STM") in 2005. During 2006, Standard Security Life underwrote this product in 45 states. STM is designed specifically for people with transient needs for health coverage. Typically, STM products are written as major medical coverage with a defined duration, which is normally twelve months or less. Among the typical purchasers of STM products are self-employed professionals, recent college graduates, persons between jobs, employed individuals not currently eligible for group insurance, and others who need insurance for a specified period of time. HPA, founded in 1939, has specialized in STM since 1990 and has access to approximately 30,000 insurance agents and brokers nationally. The Company has also begun promoting STM through its other distribution sources.

IHC lost market share in this line of business in 2008 as a result of rating actions which significantly improved profit margins. We anticipate modest growth in this line of business as a result of contemplated rating actions that will make this product more competitive while maintaining profitability targets.

Dental/Vision

Standard Security Life and Madison National Life began selling group dental products in late 2005 in the majority of states. GroupLink administers the majority of IHC's dental business and is also the primary distribution source of this line of business. The dental portfolio includes indemnity and PPO plans for employer groups of two or more lives and for individuals within affinity groups. Employer plans are offered on both employer paid and employee voluntary basis. Vision, group life and short-term disability benefits will also be offered by GroupLink. Vision plans will offer a flat reimbursement amount for exams and materials. Life plans are available on scheduled or percentage of salary basis and short-term disability is offered as a percentage of salary or flat amount.

In 2007, Standard Security Life began writing vision policies in the State of New York on behalf of national vision providers. IHC does not control the distribution or underwriting of this product, and therefore it does not retain its normal share of the risk and does not earn administrative fee income, other than the carrier fee.

IHC anticipates continued growth in this line of business in future years as a result of organic growth at GroupLink, our vision programs in New York, a new small group vision product and additional distribution relationships for both dental and vision.

Major Medical for Individuals and Families

The Company markets major medical plans for individuals and families that include CDHP products which are approved in the majority of states. The Company believes that the demand for individual medical products is growing steadily, in large part, to employers reducing the number of employees eligible for group coverage, and to an increase in the number of self-employed individuals. Many of these plans are Federally Qualified High Deductible Health Plans that allow the policy or certificate holder to establish an HSA. For these products, each application is individually underwritten for consideration of coverages.

The Company anticipates growth in this line of business, primarily related to the aforementioned transfer of a block of \$15 million of major medical plans for individuals and families, which has been administered by IAC for many years, from an unaffiliated insurance company to Standard Security Life.

Limited Medical

Standard Security Life insures a limited medical policy to offer affordable health coverage to hourly, part-time and/or seasonal employees, which is currently approved in a majority of states. Limited medical plans are a low cost alternative to major medical insurance for those uninsured Americans who cannot afford traditional health insurance. Employers are using these plans to recruit and retain employees, save costs and compete more effectively. These plans also permit employees who do not otherwise have health insurance to begin to participate in the healthcare system.

The Company began writing this product in 2007 and recorded \$2.1 million of gross premiums in that year. In 2008, the Company recorded \$4.8 million of gross premiums written and projects continued growth in 2009.

Student Medical

Standard Security Life and Madison National Life began selling student accident and student health insurance (collectively, Student Medical) in late 2007. The student accident product is primarily offered to sports, youth, recreational and educational markets. A number of states recommend, and some require, that school districts offer, or provide, student accident insurance to their pupils. The student health insurance product is primarily offered to students enrolled in college and higher education institutions, and often is mandatory for students who do not otherwise have health coverage. This product is comprehensive, major medical coverage, which often has a managed care component through the institutions' health facilities.

IHC anticipates this line of business to remain steady in 2009 due to the cancellation of one production source offset by an expected increase in premiums from the remaining producers.

Group Disability; Life, Annuities and DBL

Group Long-Term and Short-Term Disability

The Company sells group long-term disability ("LTD") products to employers that wish to provide this benefit to their employees. Depending on an employer's requirements, LTD policies (i) cover between 40% and 90% of insurable salary; (ii) have elimination periods (i.e., the period between the

commencement of the disability and the start of benefit payments) of between 30 and 730 days; and (iii) terminate after two, five or ten years, or extend to age 65 or the employee's Social Security normal retirement date. Benefit payments are reduced by social security, workers compensation, pension benefits and other income replacement payments. Optional benefits are available to employees, including coverage for partial or residual disabilities, survivor benefits and cost of living adjustments. The Company also markets short-term disability ("STD") policies that provide a weekly benefit to disabled employees until the earlier of: recovery from disability, eligibility for long-term disability benefits or the end of the STD benefit period.

The Company anticipates an increase in sales to school districts and municipalities as a result of the transfer of a block of business from another carrier. The Company is actively exploring opportunities to leverage its underwriting and administrative expertise to distribute life and disability products through its existing, as well as new, marketing relationships.

New York Short-Term Disability (DBL)

Standard Security Life markets DBL. All companies with more than one employee in New York State are required to provide DBL insurance for their employees. DBL coverage provides temporary cash payments to replace wages lost as a result of disability due to non-occupational injury or illness. The DBL policy provides for (i) payment of 50% of salary to a maximum of \$170 per week; (ii) a maximum of 26 weeks in a consecutive 52 week period; and (iii) benefit commencement on the eighth consecutive day of disability. Policies covering fewer than 50 employees have fixed rates approved by the New York State Insurance Department. Policies covering 50 or more employees are individually underwritten. Standard Security Life's DBL premiums declined in 2008 due to a mandatory rate reduction which took effect in the first quarter of 2008. The Company anticipates premiums will be relatively flat in 2009.

Group Term Life and Annuities

Madison National Life and Standard Security Life sell group term life products, including group term life, accidental death and dismemberment ("AD&D"), supplemental life and supplemental AD&D and dependent life. As with its group disability business, IHC anticipates modest growth in this line of business through expansion of its sales of these group term life products through existing and new distribution sources. Standard Security Life anticipates modest growth in its specialized defined benefit and defined contribution service award programs, with separate group life coverage, to Volunteer Emergency Services personnel.

Individual Life, Annuities and Other

This category includes: (i) insurance products that are in runoff as a result of the Insurance Group's decision to discontinue writing such products; (ii) blocks of business that were acquired from other insurance companies; (iii) individual life and annuities written through Madison National Life's military and civilian government employee division; (iv) blanket accident insurance sold through a specialized general agent; and (v) certain miscellaneous insurance products.

The following lines of Standard Security Life's in-force business are in runoff: individual accident and health, individual life, single premium immediate annuities, disability income, accidental medical, accidental death and AD&D insurance for athletes, executives and entertainers, and miscellaneous insurance business. Madison National Life's runoff in this category consists of existing blocks of individual life, including pre-need (i.e., funeral expense) coverage, traditional and interest-sensitive life blocks which were acquired in prior years, individual accident and health products, annual and single premium deferred annuity contracts and individual annuity contracts.

LIFE INSURANCE IN-FORCE

The following table summarizes the aggregate life insurance in-force of the Insurance Group excluding the credit life and disability segment which is discontinued operations (in thousands):

	2008	2007	2006
LIFE INSURANCE IN-FORCE:			
Group	\$ 5,749,229	\$ 6,226,441	\$ 6,301,171
Individual term	495,075	582,009	660,965
Individual permanent	1,534,056	1,404,363	1,454,043
TOTAL LIFE INSURANCE IN- FORCE (1), (2)	\$ 7,778,360	\$ 8,212,813	\$ 8,416,179
NEW LIFE INSURANCE:			
Group	\$ 218,479	\$ 418,889	\$ 371,416
Individual term	482	7,000	7,743
Individual permanent	64,799	140,829	155,770
TOTAL NEW LIFE INSURANCE	\$ 283,760	\$ 566,718	\$ 534,929

NOTES:

(1)	Includes participating insurance	\$ 228,140	\$ 164,863	\$ 181,796
(2)	Before ceded reinsurance of:			
	Group	\$ 2,228,998	\$ 2,525,418	\$ 3,099,049
	Individual	97,942	232,666	97,015
	Total ceded reinsurance	\$ 2,326,940	\$ 2,758,084	\$ 3,196,064

ACQUISITIONS OF POLICY BLOCKS

In addition to its core life and health lines of business distributed as described above, IHC formed an acquisition group over 10 years ago to acquire blocks of business from other insurance companies, guaranty associations and liquidators. Most of the acquired business has primarily been life, annuities or disability business. Not only have these transactions yielded a healthy rate of return on the investment, but the overall long-term nature of the policies acquired serves as a counterbalance to the bulk of the policies currently being written which are short-term in nature.

During 2008, Madison National Life acquired a block of life insurance policies with approximately \$64.4 million of life reserves. The block consists of approximately \$32.2 million of older, traditional life reserves and \$32.2 million of annuity reserves.

Madison National Life did not record any significant acquisitions in 2007.

During 2006, Madison National Life acquired a total of \$8.0 million of reserves in the following transactions: (i) effective January 1, 2006, entered into an agreement with an unaffiliated insurer to 100% coinsure dental policies totaling approximately \$0.1 million of reserves; (ii) effective October 1, 2006, entered into an agreement with an unaffiliated insurer to 100% coinsure life insurance policies totaling approximately \$7.7 million of reserves; and (iii) effective October 1, 2006, entered into an agreement with an unaffiliated insurer to 100% coinsure life insurance policies totaling approximately \$0.2 million of reserves.

During 2005, Madison National Life acquired a total of \$168.7 million of reserves in the following transactions: (i) effective January 1, 2005, entered into an agreement with an unaffiliated insurer to 100% coinsure life insurance policies totaling approximately \$10.2 million of reserves; (ii) in January 2005, purchased certain credit policies totaling approximately \$0.6 million of reserves from an unaffiliated insurance company; (iii) in June 2005, entered into a reinsurance and assumption agreement with an unaffiliated insurance company to assume approximately \$120.0 million of life and annuity reserves; (iv) in September 2005, assumed approximately \$1.7 million of disability reserves from various state guaranty associations; and (v) in December 2005, entered into a reinsurance and assumption agreement to assume approximately \$36.2 million of life and annuity reserves from an unaffiliated insurance company.

As of January 1, 2005, Standard Security Life reinsured, on a 100% quota share basis, a \$50 million block of small group major medical business, and has received regulatory approval of the assumption certificates in each state.

In June 2004, IHC acquired a block of individual annuity and supplementary contracts and life policies through an assumption reinsurance transaction. The block had reserves of \$26.6 million. Madison National Life assumed responsibility for administration of the block on September 1, 2004.

REINSURANCE AND POLICY RETENTION LIMITS

The Company's average retention of Medical Stop-Loss exposure was 55.9% in 2008, 52.8% in 2007, and 51.2% in 2006. In 2008, 2007 and 2006, Standard Security Life and Madison National Life also ceded, on average, 22.9%, 22.7%, and 22.2%, respectively, of their Medical Stop-Loss business to their affiliate, Independence American. Standard Security Life retained 80% of DBL premium with the balance ceded, commencing July 1, 2004, to Independence American. Retentions on other lines of business remained relatively constant in 2008. The Company purchases quota share reinsurance and

excess reinsurance in amounts deemed appropriate by its risk committee. The Company monitors its retention amounts by product line, and has the ability to adjust its retention as appropriate.

Reinsurance is used to reduce the potentially adverse financial impact of large individual or group risks, and to reduce the strain on statutory income and surplus related to new business. By using reinsurance, the Insurance Group is able to write policies in amounts larger than it could otherwise accept. The amount reinsured is the portion of each policy in excess of the retention limit on a particular policy. Maximum net retention limits for Standard Security Life at December 31, 2008 were: (i) \$210,000 per life on individual life and corresponding disability waiver of premium; (ii) no retention on accidental death benefits provided by rider to individual life policies; (iii) up to \$1,000,000 on any one medical stop-loss claim; (iv) \$2,500 of monthly benefits on disability income policies; (v) \$25,000 on its special disability business; and (vi) up to \$1,000,000 for fully insured medical in a calendar year. Standard Security Life also maintains catastrophe reinsurance in order to protect against particularly adverse mortality which might occur with respect to its overall life business.

At December 31, 2008, maximum net monthly retention limits on any one life for Madison National Life were: (i) \$6,000 per month on group long-term disability insurance; (ii) \$1,600 per week on group short-term disability insurance; (iii) \$125,000 per individual on group term life, accidental death benefits, including supplemental life and accidental death and dismemberment; (iv) \$125,000 on substandard ordinary life, group family life and individual ordinary life; (v) up to \$1,000,000 on any one medical stop-loss claim; (vi) individual monthly benefits from \$1,000 to \$2,500 depending on recipient age and length of benefit period for individual accident and health insurance; and (vii) up to \$2,500,000 for fully insured medical in a calendar year.

The following reinsurers represent 83.8% of the total ceded premium for the year ended December 31, 2008:

Independence American Insurance Co.	27.1%
Munich Re America	21.6%
Everest Reinsurance Co.	12.3%
ReliaStar Life Insurance Company	10.0%
Fidelity Security Life Insurance Company	7.4%
Transatlantic Reinsurance Company	5.4%
	83.8%

The Insurance Group remains liable with respect to the insurance in-force which has been reinsured in the unlikely event that the assuming reinsurers are unable to satisfy their obligations. The Insurance Group cedes business (i) to individual reinsurance companies that are rated "A-" or better by Best or (ii) upon provision of adequate security. The

ceding of reinsurance does not discharge the primary liability of the original insurer to the insured. Since the risks under the Insurance Group's business are primarily short-term, there would be limited exposure as a result of a change in a reinsurer's creditworthiness during the term of the reinsurance. At December 31, 2008 and 2007, the Insurance Group's ceded reinsurance in-force (excluding the credit life and disability segment which is discontinued operations) was \$2.3 billion and \$2.8 billion, respectively.

For further information pertaining to reinsurance, reference is made to Note 20 of Notes to Consolidated Financial Statements included in Item 8.

INVESTMENTS AND RESERVES

More than 99% of the Company's cash, cash equivalents and securities portfolio are managed by employees of IHC and its affiliates, and ultimate investment authority rests with IHC's in-house investment group. The remaining \$4.7 million is invested with independent investment managers. As a result of the nature of IHC's insurance liabilities, IHC endeavors to maintain a significant percentage of its assets in investment grade securities, cash and cash equivalents. At December 31, 2008, approximately 99.1% of the fixed maturities were investment grade and continue to be rated on average AA. The internal investment group provides a summary of the investment portfolio and the performance thereof at the meetings of the Company's board of directors.

As required by insurance laws and regulations, the Insurance Group establishes reserves to meet obligations on policies in-force. These reserves are amounts which, with additions from premiums expected to be received and with interest on such reserves at certain assumed rates, are calculated to be sufficient to meet anticipated future policy obligations. Premiums and reserves are based upon certain assumptions with respect to mortality, morbidity on health insurance, lapses and interest rates effective at the time the policies are issued. The Insurance Group also establishes appropriate reserves for substandard business, annuities and additional policy benefits, such as waiver of premium and accidental death. Standard Security Life and Madison National Life are also required by law to have an annual asset adequacy analysis, which, in general, projects the amount and timing of cash flows to the estimated maturity date of liabilities, prepared by the certifying actuary for each insurance company. Standard Security Life and Madison National Life invest their respective assets, which support the reserves and other funds in accordance with applicable insurance law, under the supervision of their respective board of directors. The Company manages interest rate risk seeking to maintain a portfolio with a duration and average life that falls within the band of the duration and average life of the applicable liabilities. The Company utilizes options to modify the duration and average life of the assets.

Under Wisconsin insurance law, there are restrictions relating to the percentage of an insurer's admitted assets that may be invested in a specific issuer or in the aggregate in a particular type of investment. With respect to the portion of an insurer's assets equal to its liabilities plus a statutorily-determined security surplus amount, a Wisconsin insurer cannot, for example, invest more than a certain percentage of its assets in non-amortizable evidences of indebtedness, securities of any one person (other than a subsidiary and the United States government), or common stock of any corporation and its affiliates (other than a subsidiary).

Under New York insurance law, there are restrictions relating to the percentage of an insurer's admitted assets that may be invested in a specific issuer or in the aggregate in a particular type of investment. For example, a New York life insurer cannot invest more than a certain percentage of its admitted assets in common or preferred shares of any one institution, obligations secured by any one property (other than those issued, guaranteed or insured by the United States or any state government or agency thereof), or medium and lower grade obligations. In addition, there are

certain qualitative investment restrictions.

The following table reflects the asset value in dollars (in thousands) and as a percentage of total investments of the Company as of December 31, 2008:

INVESTMENTS BY TYPE	CARRYING VALUE	% OF TOTAL INVESTMENTS
Fixed maturities:		
United States Government and government agencies and authorities	\$ 51,849	6.8%
Government-sponsored enterprise States, municipalities and political subdivisions	9,573 245,113	1.2% 32.2%
All other corporate securities	301,952	39.7%
Total fixed maturities	608,487	79.9%
Equity securities:		
Non-redeemable preferred stocks	54,007	7.1%
Total equity securities	54,007	7.1%
Short-term investments	52	-
Securities purchased under agreements to resell	60,823	8.0%
Investment partnership interests	5,821	0.8%
Operating partnership interests	5,810	0.8%
Policy loans	24,947	3.3%
Investment in trust subsidiaries	1,146	0.1%
Total investments	\$ 761,093	100.0%

At December 31, 2008, 99.1% of the Company's fixed maturities were investment grade. The composition of the Company's fixed maturities at December 31, 2008, utilizing Standard and Poor's rating categories, was as follows:

GRADE	% INVESTED
AAA	45.2%
AA	24.9%
A	18.8%
BBB	10.2%
BB or lower	0.9%
	100.0%

The Company's total pre-tax investment performance for each of the last three years is summarized below, including amounts recognized in net income, and unrealized gains and losses recognized in stockholders' equity as accumulated other comprehensive income or loss (excluding the credit life and disability segment which is discontinued operations):

	2008	2007	2006
	(In thousands)		
Consolidated Statements of Operations			
Net investment income	\$ 44,044	\$ 46,122	\$ 47,676
Net realized investment gains (losses)	(50,648)	1,258	625
Consolidated Balance Sheets			
Net unrealized losses	(70,747)	(10,914)	(1,352)
Total pre-tax investment performance	\$ (77,351)	\$ 36,466	\$ 46,949

The above net unrealized losses, which have been recognized in the Consolidated Balance Sheets, represent the net change in unrealized gains and losses that occurred during the year, prior to adjustments for deferred acquisition costs and deferred income taxes. At December 31, 2008, the Company only has one non-performing fixed maturity investment with a carrying value of \$.7 million, or .1% of the total carrying value of fixed maturities.

COMPETITION AND REGULATION

We compete with many large insurance companies, small regional health insurers and managed care organizations. Although most life insurance companies are stock companies, mutual companies also write life insurance in the United States. Mutual companies may have certain competitive advantages since profits inure directly to the benefit of the policyholders.

IHC is an insurance holding company; as such, IHC and its subsidiary carriers and administrative companies are subject to regulation and supervision by multiple state insurance regulators, including the New York State Insurance Department (Standard Security Life's domestic regulator) and the Wisconsin Department of Insurance (Madison National Life's domestic regulator). Each of Standard Security Life and Madison National Life is subject to regulation and supervision in every state in which it is licensed to transact business. These supervisory agencies have broad administrative powers with respect to the granting and revocation of licenses to transact business, the licensing of

agents, the approval of policy forms, the approval of commission rates, the form and content of mandatory financial statements, reserve requirements and the types and maximum amounts of investments which may be made. Such regulation is primarily designed for the benefit of policyholders rather than the stockholders of an insurance company or insurance holding company.

Certain transactions within the IHC holding company system are also subject to regulation and supervision by such regulatory agencies. All such transactions must be fair and equitable. Notice to or prior approval by the applicable insurance department is required with respect to transactions affecting the ownership or control of an insurer and of certain material transactions, including dividend declarations, between an insurer and any person in its holding company system. Under New York and Wisconsin insurance laws, "control" is defined as the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a person. Under New York law, control is presumed to exist if any person, directly or indirectly, owns, controls or holds with the power to vote ten percent or more of the voting securities of any other person; in Wisconsin, the presumption is defined as to more than ten percent of the voting securities of another person. In both states, the acquisition of control of a domestic insurer needs to be approved in advance by the Commissioner of Insurance. See

Note 22 of Notes to Consolidated Financial Statements included in Item 8 for information as to restrictions on the ability of the Company's insurance subsidiaries to pay dividends.

Risk-based capital requirements are imposed on life and property and casualty insurance companies. The risk-based capital ratio is determined by dividing an insurance company's total adjusted capital, as defined, by its authorized control level risk-based capital. Companies that do not meet certain minimum standards require specified corrective action. The risk-based capital ratios for each of Standard Security Life and Madison National Life exceed such minimum ratios.

DISCONTINUED OPERATIONS

The Company sold its credit life and disability segment by entering into a 100% coinsurance agreement with an unaffiliated insurer effective December 31, 2007. The transaction closed in February 2008 with a payment of \$10.9 million, representing the net statutory unearned premium reserve as of December 31, 2007 less a ceding fee of \$8.8 million. As a result of the transaction, the Company recorded a gain in statutory surplus of \$4.8 million, net of tax, and a \$3.6 million loss on disposition of discontinued operations, net of \$1.9 million of tax benefits, in the Consolidated Statement of Operations for the year ended December 31, 2007. The loss was primarily the result of the write-off of deferred acquisition costs related to the credit segment.

For the year ended December 31, 2008, the Company recorded income from discontinued operations of \$.5 million, net of taxes, representing expenses and changes in claims and reserves related to the insurance liabilities for claims incurred prior to the aforementioned sale. The Company also recorded a gain on the disposition of discontinued operations amounting to \$.1 million, net of taxes, representing an adjustment to the initial ceding fee.

EMPLOYEES

At December 31, 2008, the Company and its direct and indirect majority- or wholly owned subsidiaries, collectively, had 624 employees.

ITEM 1A.

RISK FACTORS

The risks and uncertainties described below are not the only ones that we face, but are those that we have identified as being the most significant factors that make investment in our stock speculative or risky or that have special application to us. Additional risks and uncertainties that we do not know about, or that we deem less significant than those identified below, may also make investment in our stock speculative or risky. If any of the adverse events associated with the risks described below occurs, our business, financial condition or results of operations could be materially adversely affected. In such a case, the trading price of our stock could decline.

Our investment portfolio is subject to various risks that may result in realized investment losses. In particular, decreases in the fair value of fixed maturities may greatly reduce the value of our investments, and as a result, our financial condition may suffer.

We are subject to credit risk in our investment portfolio. Defaults by third parties in the payment or performance of their obligations under these securities could reduce our investment income and realized investment gains or result in the continued recognition of investment losses. The value of our investments may be materially adversely affected by increases in interest rates, downgrades in the preferred stocks and bonds included in our portfolio and by other factors that may result in the continued recognition of other-than-temporary impairments. Each of these events may cause us to reduce the carrying value of our investment portfolio.

In particular, at December 31, 2008, fixed maturities represented \$608.5 million or 79.9% of our total investments of \$761.1 million. The fair value of fixed maturities and the related investment income fluctuates depending on general economic and market conditions. The fair value of these investments generally increases or decreases in an inverse relationship with fluctuations in interest rates, while net investment income realized by us will generally increase or decrease in line with changes in market interest rates. In addition, actual net investment income and/or cash flows from investments that carry prepayment risk, such as mortgage-backed and other asset-backed securities, may differ from those anticipated at the time of investment as a result of interest rate fluctuations. An investment has prepayment risk when there is a risk that the timing of cash flows that result from the repayment of principal might occur earlier than anticipated because of declining interest rates or later than anticipated because of rising interest rates. The impact of value fluctuations affects our Consolidated Financial Statements. Because all of our fixed maturities are classified as available for sale, changes in the fair value of our securities are reflected in our stockholders' equity (accumulated other comprehensive income or loss). No similar adjustment is made for liabilities to reflect a change in interest rates. Therefore, interest rate fluctuations and economic conditions could adversely affect our stockholders' equity, total comprehensive income and/or cash flows. For mortgage-backed securities, credit risk exists if mortgagees default on the underlying mortgages. Although at December 31, 2008, approximately 99.1% of the fixed maturities were investment grade and continue to be rated on average AA, all of our fixed maturities are subject to credit risk. If any of the issuers of our fixed maturities suffer financial setbacks, the ratings on the fixed maturities could fall (with a concurrent fall in fair value) and, in a worst case scenario, the issuer could default on its financial obligations. If the issuer defaults, we could have realized losses associated with the impairment of the securities.

We regularly monitor our investment portfolio to ensure that investments that are other-than-temporarily impaired are identified in a timely fashion, properly valued and any impairment is charged against earnings in the proper period. Assessment factors include, but are not limited to, the length of time and the extent to which the market value has been less than cost, the financial condition and rating of the issuer, whether any collateral is held and our intent and ability to retain the investment for a period of time sufficient to allow for recovery. However, the determination that a security has incurred an other-than-temporary decline in value requires the judgment of management. Inherently, there are risks and uncertainties involved in making these judgments. Therefore, changes in facts and circumstances and critical assumptions could result in management's decision that further impairments have occurred. This could lead to additional losses on investments, particularly those that management has the intent and ability to hold until recovery in value occurs.

Our earnings could be materially affected by an impairment of goodwill.

Goodwill represented \$52,331,000 of our \$1,273,894,000 in total assets as of December 31, 2008. We review our goodwill annually for impairment or more frequently if indicators of impairment exist. We regularly assess whether any indicators of impairment exist, which requires a significant amount of judgment. Such indicators may include: a sustained significant decline in our share price and market capitalization; a decline in our expected future cash flows; a significant adverse change in the business climate; and/or slower growth rates, among others. Any adverse change in one of these factors could have a significant impact on the recoverability of these assets and could have a material impact on our consolidated financial statements. During 2008, we experienced a significant decline in our stock price. Due to this significant decline, our market capitalization as of December 31, 2008 was significantly below the sum of

our reporting units' fair values. If we experience a sustained decline in our results of operations and cash flows, or other indicators of impairment exist, we may incur a material non-cash charge to earnings relating to impairment of our goodwill, which could have a material adverse effect on our results.

Changes in state and federal regulations, or the application thereof, may adversely affect our business, financial condition and results of operations.

Congress and state legislatures continue to focus on health care issues. In addition, the 2008 elections resulted in a renewed focus on health care and health insurance, and several key legislators and some of the newly appointed and elected officials, including in the executive branch, have proposed significant changes to the existing system. Potential reforms include, but are not limited to: mandating universal coverage; imposing more restrictive regulation of the underwriting and marketing of health insurance; making generally available a government-sponsored health plan as an alternative to private insurance; and changing the federal income tax laws relating to the deductibility of health insurance premiums. A number of states are contemplating significant reform of their health insurance markets. These proposals include provisions affecting both public programs and privately financed health insurance arrangements.

We cannot assure you that, if enacted into law, any of these proposals would not have a material, adverse effect on our business, results of operations or financial condition.

Less-fundamental change in the regulatory requirements imposed on us may also harm our business or results of operations. For example, some states have imposed time limits for the payment of uncontested covered claims and required health care and dental service plans to pay interest on uncontested claims not paid promptly within the required time period. Some states have also granted their insurance regulatory agencies additional authority to impose monetary penalties and other sanctions on health and dental plans engaging in certain unfair payment practices. If we were unable, for any reason, to comply with these requirements, it could result in substantial costs to us and could materially adversely affect our results of operations and financial condition.

If rating agencies downgrade our insurance companies, our results of operations and competitive position in the industry may suffer.

Ratings have become an increasingly important factor in establishing the competitive position of insurance companies. Standard Security Life and Madison National Life are both rated "A-" (Excellent) by A.M. Best Company, Inc. Best's ratings reflect its opinions of an insurance company's financial strength, operating performance, strategic position, and ability to meet its obligations to policyholders and are not evaluations directed to investors. The ratings of Standard Security Life and Madison National Life are subject to periodic review by Best. If Best reduces either or both Madison National Life's or Standard Security Life's ratings from its current levels, our business would be adversely affected.

Given the current economic and political climates, our stock may be increasingly subject to stock price and trading volume volatility. The price of our common stock could fluctuate or decline significantly and you could lose all or part of your investment.

During 2008, the stock markets experienced significant price and trading volume volatility. Company-specific issues and market developments generally in the insurance industry and in the regulatory environment may have caused this volatility. Our stock price declined significantly during 2008 and may continue to materially fluctuate in 2009 in response to a number of events and factors, including: quarterly variations in our reported results; operating and stock price performance of other companies that investors may deem comparable; sales of stock by insiders; and changes in our financial strength ratings. These factors could materially reduce our stock price. In addition, broad market and industry fluctuations may materially and adversely affect the trading price of our common stock, regardless of our actual operating performance.

Our loss reserves are based on an estimate of our future liability, and if actual claims prove to be greater than our reserves, our results of operations and financial condition may be adversely affected.

We maintain loss reserves to cover our estimated liability for unpaid losses and loss adjustment expenses, where material, including legal and other fees, and costs not associated with specific claims but related to the claims payment functions for reported and unreported claims incurred as of the end of each accounting period. Because setting reserves is inherently uncertain, we cannot be sure that current reserves will prove adequate. If our reserves are insufficient to cover our actual losses and loss adjustment expenses, we would have to augment our reserves and incur a charge to our earnings, and these charges could be material. Reserves do not represent an exact calculation of liability. Rather, reserves represent an estimate of what we expect the ultimate settlement and administration of claims will cost. These estimates, which generally involve actuarial projections, are based on our assessment of known facts and circumstances. Many factors could affect these reserves, including economic and social conditions, frequency and severity of claims, medical trend resulting from the influences of underlying cost inflation, changes in utilization and demand for medical services, and changes in doctrines of legal liability and damage awards in litigation. Many of these items are not directly quantifiable in advance. Additionally, there may be a significant reporting lag between the occurrence of the insured event and the time it is reported to us. The inherent uncertainties of estimating reserves are greater for certain types of liabilities, particularly those in which the various considerations affecting the type of claim are subject to change and in which long periods of time may elapse before a definitive determination of liability is made. Reserve estimates are continually refined in a regular and ongoing process as experience develops and further claims are reported and settled and are reflected in the results of the periods in which such estimates are changed.

Our results may fluctuate as a result of factors generally affecting the insurance and reinsurance industry.

The results of companies in the insurance and reinsurance industry historically have been subject to significant fluctuations and uncertainties. Factors that affect the industry in general could also cause our results to fluctuate. The industry and our financial condition and results of operations may be affected significantly by:

.
Fluctuations in interest rates, inflationary pressures and other changes in the investment environment, which affect returns on invested capital;

.
Rising levels of actual costs that are not known by companies at the time they price their products;

Losses related to epidemics, terrorist activities, random acts of violence or declared or undeclared war;

.

Changes in reserves resulting from different types of claims that may arise and the development of judicial interpretations relating to the scope of insurers' liability;

.

The overall level of economic activity and the competitive environment in the industry;

.

Greater than expected use of health care services by members;

.

New mandated benefits or other regulatory changes that change the scope of business or increase our costs; and

.

Failure of MGUs to adhere to underwriting guidelines as required by us in its MGU agreements.

The occurrence of any or a combination of these factors, which is beyond our control, could have a material adverse effect on our results.

Our inability to assess underwriting risk accurately could reduce our net income.

Our success is dependent on our ability to assess accurately the risks associated with the businesses on which we retain risk. If we fail to assess accurately the risks we retain, we may fail to establish the appropriate premium rates and our reserves may be inadequate to cover our losses, requiring augmentation of the reserves, which in turn would reduce our net income.

Our agreements with our producers (including our MGUs) require that each producer follow underwriting guidelines published by us and amended from time to time. Failure to follow these guidelines may result in termination or modification of the agreement. We perform periodic audits to confirm adherence to the guidelines, but it is possible that we would not detect a breach in the guidelines for some time after the infraction, which could result in a material impact on the Net Loss Ratio (defined as insurance benefits, claims and reserves divided by (premiums earned less underwriting expenses)) for that producer and could have an adverse impact on our operating results.

If we fail to comply with extensive state and federal regulations, we will be subject to penalties, which may include fines and suspension and which may adversely affect our results of operations and financial condition.

We are subject to extensive governmental regulation and supervision. Most insurance regulations are designed to protect the interests of policyholders rather than stockholders and other investors. This regulation, generally administered by a department of insurance in each state in which we do business, relates to, among other things:

.

Approval of policy forms and premium rates;

.

Standards of solvency, including risk-based capital measurements, which are a measure developed by the National Association of Insurance Commissioners and used by state insurance regulators to identify insurance companies that potentially are inadequately capitalized;

.

Licensing of insurers and their agents and regulation of their conduct in the market;

.

Restrictions on the nature, quality and concentration of investments;

.

Restrictions on transactions between insurance companies and their affiliates;

Restrictions on the size of risks insurable under a single policy;

Requiring deposits for the benefit of policyholders;

Requiring certain methods of accounting;

Prescribing the form and content of records of financial condition required to be filed; and

Requiring reserves for unearned premium, losses and other purposes.

State insurance departments also conduct periodic examinations of the affairs of insurance companies and require the filing of annual and other reports relating to the financial condition of insurance companies, holding company issues and other matters.

A large portion of our business depends on our compliance with applicable laws and regulations and our ability to maintain valid licenses and approvals for our operations. Regulatory authorities have broad discretion to grant, renew, or revoke licenses and approvals. Regulatory authorities may deny or revoke licenses for various reasons, including the violation of regulations. In some instances, we follow practices based on our interpretations of regulations, or interpretations that we believe to be generally followed by the industry, which may be different from the requirements or interpretations of regulatory authorities. If we do not have the requisite licenses and approvals and do not comply with applicable regulatory requirements, the insurance regulatory authorities could preclude or temporarily suspend us from carrying on some or all of our insurance-related activities or otherwise penalize us. That type of action could have a material adverse effect on our business. Also, changes in the level of regulation of the insurance industry (whether federal, state or foreign), or changes in laws or regulations themselves or interpretations by regulatory authorities, could have a material adverse effect on our business.

We may be unsuccessful in competing against larger or better-established business rivals.

We compete with a large number of other companies in our selected lines of business. We face competition from specialty insurance companies and HMOs, and from diversified financial services companies and insurance companies that are much larger than we are and that have far greater financial, marketing and other resources. Some of these competitors also have longer experience and more market recognition than we do in certain lines of business. In addition to competition in the operation of our business, we face competition from a variety of sources in attracting and retaining qualified employees. There can be no assurance that we will maintain our current competitive position in the markets in which we operate, or that we will be able to expand operations into new markets. If we fail to do so, our results of operations and cash flows could be materially adversely affected.

We rely on reinsurance arrangements to help manage our business risks, and failure to perform by the counterparties to our reinsurance arrangements may expose us to risks we had sought to mitigate.

We utilize reinsurance to mitigate our risks in various circumstances. Reinsurance does not relieve us of our direct liability to our policyholders, even when the reinsurer is liable to us. Accordingly, we bear credit risk with respect to our reinsurers. Our reinsurers may be unable or unwilling to pay the reinsurance recoverable owed to us now or in the future or on a timely basis. A reinsurer's insolvency, inability or unwillingness to make payments under the terms of its reinsurance agreement with us could have an adverse effect on our financial condition, results of operations and cash flows.

We may be required to accelerate the amortization of deferred acquisition costs, which would increase our expenses and reduce profitability.

Deferred acquisition costs, or DAC, represent certain costs which vary with and are primarily related to the sale and issuance of our insurance policies and investment contracts and are deferred and amortized over the estimated life of the related insurance policies and contracts. These costs include commissions in excess of ultimate renewal commissions and certain other sales incentives, solicitation and printing costs, sales material and other costs, such as underwriting and contract and policy issuance expenses. Under U.S. GAAP, DAC is amortized through operations over the lives of the underlying contracts in relation to the anticipated recognition of premiums or gross profits.

Our amortization of DAC generally depends upon anticipated profits from investments, surrender and other policy and contract charges, mortality, morbidity and maintenance and expense margins. Unfavorable experience with regard to expected expenses, investment returns, mortality, morbidity, withdrawals or lapses may cause us to increase the amortization of DAC, resulting in higher expenses and lower profitability.

We regularly review our DAC asset balance to determine if it is recoverable from future income. The portion of the DAC balance deemed to be unrecoverable, if any, is charged to expense in the period in which we make this determination. For example, if we determine that we are unable to recover DAC from profits over the life of a book of business of insurance policies or annuity contracts, or if withdrawals or surrender charges associated with early withdrawals do not fully offset the unamortized acquisition costs related to those policies or annuities, we would be required to recognize the additional DAC amortization as a current-period expense. In general, we limit our deferral of acquisition costs to costs assumed in our pricing assumptions.

The failure to maintain effective and efficient information systems could adversely affect our business.

Our business depends significantly on effective information systems, and we have different information systems for our various businesses. We have committed and will continue to commit

significant resources to develop, maintain and enhance our existing information systems and develop new information systems in order to keep pace with continuing changes in information processing technology, evolving industry and regulatory standards and changing customer preferences. Our failure to maintain effective and efficient information systems could have a material adverse effect on our financial condition and results of operations.

Failure to protect our policyholder s confidential information and privacy could adversely affect our business.

In the conduct of our business, we are subject to privacy regulations and to confidentiality obligations. For example, the collection and use of patient data in our health insurance operations is the subject of national and state legislation, including the Health Insurance Portability and Accountability Act of 1996, or HIPAA, and certain other activities we conduct are subject to the privacy regulations of the Gramm-Leach-Bliley Act. We also have contractual obligations to protect certain confidential information we obtain from our existing vendors, partners and policyholders. These obligations generally include protecting such confidential information in the same manner and to the same extent as we protect our own confidential information. If we do not properly comply with privacy regulations and protect confidential information, we could experience adverse consequences, including regulatory sanctions, such as penalties, fines and loss of license, as well as loss of reputation and possible litigation.

UNRESOLVED STAFF COMMENTS

None.

ITEM 2.

PROPERTIES

IHC

IHC has entered into a renewable short-term arrangement with Geneve Corporation, an affiliate, for the use of 6,750 square feet of office space as its corporate headquarters in Stamford, Connecticut.

Standard Security Life

Standard Security Life leases 13,000 square feet of office space in New York, New York as its corporate headquarters, and 3,000 square feet of office space in Farmington, New York for its DBL claims processing center.

Madison National Life

Madison National Life leases 28,028 square feet of space in Madison, Wisconsin as its corporate headquarters. Madison National Life also leases 6,504 square feet in Birmingham, Alabama for its military and government individual life and annuity division.

Majestic Underwriters

Majestic leases 4,495 square feet of office space in Troy, Michigan as its corporate headquarters.

Health Plan Administrators

HPA leases 7,947 square feet of office space in Tampa, Florida as its corporate headquarters.

GroupLink

GroupLink leases 9,167 square feet of office space in Indianapolis, Indiana as its corporate headquarters.

Insurers Administrative Corporation

IAC leases 49,117 square feet of office space in Phoenix, Arizona as its corporate headquarters and 9,350 square feet in Rockford, Illinois.

IHC Health Solutions

IHC Health Solutions leases 7,424 square feet of office space in Bloomington, Minnesota as its corporate headquarters.

Actuarial Management Corporation

AMC leases 6,408 square feet of office space in Lafayette, California as its corporate headquarters.

ITEM 3.

LEGAL PROCEEDINGS

We are involved in legal proceedings and claims that arise in the ordinary course of our businesses. We have established reserves that we believe are sufficient given information presently available relating to our outstanding legal proceedings and claims. We do not anticipate that the result of any pending legal proceeding or claim will have a material adverse effect on our financial condition or cash flows, although there could be such an effect on our results of operations for any particular period.

ITEM 4.

SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of security holders during the fourth quarter of 2008.

PART II**ITEM 5.****MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED****STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES****Market Information**

The Company's common stock trades under the symbol IHC on the New York Stock Exchange. The following table shows the high and low sales prices for IHC's common stock.

		HIGH		LOW
QUARTER ENDED:				
December 31, 2008	\$	11.54	\$	2.25
September 30, 2008		13.53		9.55
June 30, 2008		15.00		9.77
March 31, 2008		13.89		10.49
 QUARTER ENDED:				
December 31, 2007	\$	21.00	\$	11.10
September 30, 2007		21.50		15.43
September 30, 2007		22.69		19.50
March 31, 2007		24.66		20.25

IHC's stock price closed at \$3.61 on December 31, 2008.

Holdings of Record

At March 13, 2009, the number of record holders of IHC's common stock was 1,377.

Dividends

IHC declared a cash dividend of \$.025 per share on its common stock on each of June 23, 2008 and December 23, 2008 for a total annual dividend of \$.05 per share.

IHC declared a cash dividend of \$.025 per share on its common stock on each of June 25, 2007 and December 21, 2007 for a total annual dividend of \$.05 per share.

IHC declared a cash dividend of \$.025 per share on its common stock on each of June 20, 2006 and December 20, 2006 for a total annual dividend of \$.05 per share.

Private Placements

In 2008 and 2006, IHC issued 127,520 and 617,913 shares of common stock, respectively, as private placements of unregistered securities under Section 4(2) of the Securities Act of 1933, as amended. Accordingly, the shares are "restricted securities", subject to a legend and will not be freely tradable in the United States until the shares are registered for resale under the Securities Act, or to the extent they are tradable under Rule 144 promulgated under the Securities Act or any other available exemption. Information pertaining to the Company's common stock is provided in Note 15 of Notes to Consolidated Financial Statements included in Item 8.

Share Repurchase Program

IHC has a program, initiated in 1991, under which it repurchases shares of its common stock. As of December 31, 2008, 108,642 shares were still authorized to be repurchased under the plan. Share repurchases during the quarter ended December 31, 2008 are summarized as follows:

Month of Repurchase	2008			Maximum Number Of Shares Which Can be Repurchased
	Shares Repurchased	Average Price of Repurchased Shares		
October	16,300	5.96		115,357
November	6,715	5.36		108,642
December	-	-		108,642

Performance Graph

Set forth below is a line graph comparing the five year cumulative total return of IHC's common stock with that of the Russell 2000 Index and the S & P SmallCap Life & Health Insurance. The graph assumes that dividends were reinvested and is based on a \$100 investment on December 31, 2003. Indices data was obtained from Research Data Group, Inc. The performance graph represents past performance and should not be considered to be an indication of future performance.

ITEM 6.**SELECTED FINANCIAL DATA**

The following is a summary of selected consolidated financial data of the Company for each of the last five years excluding the credit life and disability segment, which is discontinued operations.

ITEM 7.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

OVERVIEW

Independence Holding Company, a Delaware corporation (NYSE: IHC), is a holding company principally engaged in the life and health insurance business through: (i) its wholly owned insurance companies, Standard Security Life Insurance Company of New York ("Standard Security Life") and Madison National Life Insurance Company, Inc. ("Madison National Life") (these companies are sometimes collectively referred to as the "Insurance Group"); and (ii) its marketing, administrative and actuarial companies, including Insurers Administrative Corporation (IAC), Majestic Underwriters LLC (Majestic), in which it owns a majority interest, Health Plan Administrators (HPA), GroupLink Inc. (GroupLink), in which it owns a majority interest, IHC Health Solutions, Inc. (IHC Health Solutions), and Actuarial Management Corporation ("AMC"). IHC and its subsidiaries (including the Insurance Group) are sometimes collectively referred to as the "Company." The Company currently owns a 49.7% equity interest in American Independence Corp. (NASDAQ:AMIC) which owns Independence American Insurance Company (Independence American), three managing general underwriters ("MGU s"), and controlling interests in two agencies.

IHC s health insurance products serve niche sectors of the commercial market through multiple classes of business and varied distribution channels. Medical Stop-Loss is marketed to large employer groups that self-insure their medical risks; in 2008 the Company s average case size was 600 covered lives. The small-group major medical product is purchased by employers with between two and 50

covered lives. With regard to those persons in the growing individual market, IHC's products offer major medical coverage for individuals and families and persons with short-term medical needs. Standard Security Life's limited medical product is primarily purchased by hourly workers and others who are generally not eligible for coverage under their employer's group medical plan. The dental and vision products are marketed to large and small groups as well as individuals. The Company sells student major medical insurance to colleges and accident medical, disability and AD&D to K-12 programs. The student medical business is written through one MGU and the student accident business is written through the same MGU as well as a second MGU that specializes in accident business. IHC does not sell health products for the senior market. With respect to IHC's life and disability business, Madison National Life has historically sold almost all of this business through one distribution source specializing in serving school districts and municipalities. In 2008, IHC successfully began to diversify the marketing of these products through other channels, including its health insurance distribution, and expects to build upon this success in 2009.

While management considers a wide range of factors in its strategic planning and decision-making, underwriting profit is consistently emphasized as the primary goal in all decisions as to whether or not to increase our retention in a core line, expand into new products, acquire an entity or a block of business, or otherwise change our business model. Management's assessment of trends in healthcare and morbidity, with respect to medical stop-loss, fully insured medical, disability and DBL; mortality rates with respect to life insurance; and changes in market conditions in general play a significant role in determining the rates charged, deductibles and attachment points quoted, and the percentage of business retained. The Company believes that the acquisition of AMC has further enabled it to make these assessments. IHC also seeks transactions that permit it to leverage its vertically integrated organizational structure by generating fee income from production and administrative operating companies as well as risk income for its carriers and profit commissions. Management has always focused on managing costs of its operations and providing its insureds with the best cost containment tools available.

The following is a summary of key performance information and events:

The results of operations for the years ended December 31, 2008, 2007 and 2006, are summarized as follows (in thousands):

	2008	2007	2006
Revenues	\$ 353,687	\$ 402,322	\$ 342,262
Expenses	394,570	400,390	321,149
Income (loss) from continuing operations before income taxes	(40,883)	1,932	21,113
Income taxes (benefits)	(16,399)	428	6,632

Income (loss) from continuing operations	(24,484)	1,504	14,481
Discontinued operations:			
Income (loss) from discontinued operations	524	(224)	(420)
Gain (loss) on disposition of discontinued operations	120	(3,608)	-
Net income (loss)	\$ (23,840)	\$ (2,328)	14,061

Loss from continuing operations of \$24.5 million, or \$1.59 per share, diluted, for the year ended December 31, 2008 compared to income of \$1.5 million, or \$.10 per share, diluted, for the year ended December 31, 2007. The loss in 2008 is primarily attributed to \$38.2 million of pre-tax losses from other-than-temporary impairments due to the write down in value of investments in preferred stocks of certain financial institutions and fixed maturities (primarily Alt-A mortgage securities). The income in 2007 includes charges for reserve strengthening of \$11.9 million,

before income taxes, in the Medical Stop-Loss segment as more fully described in the Reserve Strengthening discussion under Results of Operations for the Year Ended December 31, 2007;

Consolidated investment yield of 4.9% in 2008 as compared to 5.3% in 2007 primarily due to losses in limited investment partnerships;

Revenues of \$353.7 million, a decrease of 12.1% from 2007; the result of realized losses from other-than-temporary impairments;

Book value of \$10.56 per common share; a 27.8% decrease from December 31, 2007, primarily reflecting net realized and unrealized losses on securities;

Effective April 1, 2008, acquired a block of life insurance policies with approximately \$64.4 million of life reserves. The block consists of approximately \$32.2 million of older, traditional life reserves and \$32.2 million of annuity reserves. Under the terms of the acquisition, Madison National Life assumed administration of the policies on November 1, 2008.

Effective April 1, 2008, increased the Company's controlling interest in Majestic Underwriters LLC ("Majestic"), a medical stop-loss MGU, to 77% with the purchase of an additional 14.7% interest from a retired senior officer;

Income from discontinued operations of \$.5 million, net of taxes, primarily a result of an adjustment to the credit claim reserve for claims prior to December 31, 2007; and

Income from the disposition of discontinued operations of \$.1 million, net of taxes, a result of the final settlement on the sale of the credit segment.

The following is a summary of key performance information by segment:

Income (loss) before taxes from the Medical Stop-Loss segment increased \$7.7 million for the year ended December 31, 2008 compared to the same period in 2007. The results for 2007 include an \$11.9 million charge primarily related to reserve strengthening as more fully described in the Reserve Strengthening discussion under Results of Operations for the Year Ended December 31, 2007;

Underwriting experience as indicated by the GAAP Combined Ratios for the Medical Stop-Loss segment are as follows (in thousands):

	2008	2007	2006
Premiums Earned	\$ 159,392	\$ 162,438	\$ 153,087
Insurance Benefits, Claims & Reserves	117,076	128,409	107,864
Expenses	40,918	41,987	36,044
Loss Ratio ^(A)	73.4%	79.1%	70.5%
Expense Ratio ^(B)	25.7%	25.8%	23.5%
Combined Ratio ^(C)	99.1%	104.9%	94.0%

(A)

Loss ratio represents insurance benefits claims and reserves divided by premiums earned.

(B)

Expense ratio represents net commissions, administrative fees, premium taxes and other underwriting expenses divided by premiums earned.

(C)

The combined ratio is equal to the sum of the loss ratio and the expenses ratio.

The Fully Insured Health segment reported income before taxes of \$.5 million for the year ended December 31, 2008 as compared to a loss of \$.8 million for the year ended December 31, 2007. Included in the results for 2007 is \$1.1 million of adverse development on premiums earned in 2006 on certain fully insured programs. The loss ratio on the fully insured business decreased due to an increase in the dental and student accident lines (which have higher profit margins), improved margins in our short term medical business, and improved margins in our small group major medical line. The expense ratio is higher due to a greater portion of higher commission lines of business.

o

Premiums earned from this segment have increased \$9.0 million for the year ended December 31, 2008 compared to 2007, primarily due to increases in certain new lines of business.

o

Underwriting experience as indicated by the GAAP Combined Ratios for the Fully Insured segment are as follows (in thousands):

	2008	2007	2006
Premiums Earned	\$ 81,020	\$ 72,048	\$ 32,590
Insurance Benefits, Claims & Reserves	51,559	50,901	19,128
Expenses	24,351	17,828	11,051
Loss Ratio	63.6%	70.6%	58.7%
Expense Ratio	30.1%	24.8%	33.9%
Combined Ratio	93.7%	95.4%	92.6%

Income before taxes from the group disability, life, annuities and DBL segment increased \$.5 million for the year ended December 31, 2008 compared to 2007, primarily due to improved loss ratios in the group term life business in 2008 offset by an increase in commissions and other expenses in the long-term disability ("LTD") business in 2008;

Income before taxes from the individual life, annuities and other segment decreased \$1.1 million for the year ended December 31, 2008 compared to the prior year. Prior year results include \$.9 million of other income due to adjustments in settlement of a reinsurance agreement;

Loss before taxes from the corporate segment decreased \$.4 million for the year ended December 31, 2008 compared to the prior year primarily due to lower expenses offset by losses from partnership investments;

Net realized investment losses were \$50.6 million for the year ended December 31, 2008 compared to gains of \$1.3 million in 2007. Included in realized losses for the year ended December 31, 2008 are \$38.2 million of pre-tax losses from other-than-temporary impairments due to the write down in value of investments in preferred stocks of certain financial institutions and fixed maturities (primarily Alt-A mortgage securities) primarily due to the severity of the decrease in fair value and length of time that these securities were in a loss position; and

Premiums by principal product for the years indicated are as follows (in thousands):

Gross Direct and Assumed

Earned Premiums:	2008	2007	2006
Medical Stop-Loss	\$ 253,886	\$ 275,756	\$ 272,260
Fully Insured Health	199,378	210,078	86,259
Group disability; life, annuities and DBL	78,517	79,438	82,540
Individual life, annuities and other	32,338	30,118	31,494
	\$ 564,119	\$ 595,390	\$ 472,553

Net Premiums Earned:	2008	2007	2006
Medical Stop-Loss	\$ 159,392	\$ 162,438	\$ 153,087
Fully Insured Health	81,020	72,048	32,590
Group disability; life, annuities and DBL	46,957	45,220	44,206
Individual life, annuities and other	29,919	27,179	28,787
	\$ 317,288	\$ 306,885	\$ 258,670

Information pertaining to the Company's business segments is provided in Note 21 of Notes to Consolidated Financial Statements included in Item 8.

CRITICAL ACCOUNTING POLICIES

The accounting and reporting policies of the Company conform to U.S. generally accepted accounting principles ("GAAP"). The preparation of the Consolidated Financial Statements in conformity with GAAP requires the Company's management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. A summary of the Company's significant accounting policies and practices is provided in Note 1 of the Notes to the Consolidated Financial

Statements included in Item 8 of this report. Management has identified the accounting policies described below as those that, due to the judgments, estimates and assumptions inherent in those policies, are critical to an understanding of the Company's Consolidated Financial Statements and this Management's Discussion and Analysis.

Insurance Premium Revenue Recognition and Policy Charges

Life

Traditional life insurance products consist principally of products with fixed and guaranteed premiums and benefits, primarily term and whole life insurance products. Premiums from these products are recognized as revenue when due.

Annuities and interest-sensitive life contracts, such as universal life and interest-sensitive whole life, are contracts whose terms are not fixed and guaranteed. Premiums from these policies are reported as funds on deposit. Policy charges consist of fees assessed against the policyholder for cost of insurance (mortality risk), policy administration and early surrender. These revenues are recognized when assessed against the policyholder account balance.

Policies that do not subject the Company to significant risk arising from mortality or morbidity are considered investment contracts. Deposits received from such contracts are reported as other

policyholder funds. Policy charges for investment contracts consist of fees assessed against the policyholder account for maintenance, administration and surrender of the policy prior to contractually specified dates, and are recognized when assessed against the policyholder account balance.

Health

Premiums for short-duration medical insurance contracts are intended to cover expected claim costs resulting from insured events that occur during a fixed period of short duration. The Company has the ability to cancel the annual contract or to revise the premium rates at the beginning of each annual contract period to cover future insured events. Insurance premiums from annual health contracts are collected monthly and are recognized as revenue evenly as insurance protection is provided.

Premiums related to long-term and short-term disability contracts are recognized on a pro rata basis over the applicable contract term.

Insurance Reserves

The Company maintains loss reserves to cover its estimated liability for unpaid losses and loss adjustment expenses, where material, (including legal, other fees, and costs not associated with specific claims but related to the claims payment function) for reported and unreported claims incurred as of the end of each accounting period. These loss reserves are based on actuarial assumptions and are maintained at levels that are in accordance with GAAP. The Company's estimate of loss reserves represents management's best estimate of the Company's liability at the balance sheet date.

Loss reserves differ for short-duration and long-duration insurance policies, including annuities. Reserves are based on approved actuarial methods, but necessarily include assumptions about expenses, mortality, morbidity, lapse rates and future yield on related investments.

All of the Company's short-duration contracts are generated from its accident and health business, and are accounted for based on actuarial estimates of the amount of loss inherent in that period's claims, including losses incurred for which claims have not been reported. Short-duration contract loss estimates rely on actuarial observations of ultimate loss experience for similar historical events.

Management believes that the Company's methods of estimating the liabilities for insurance reserves provided appropriate levels of reserves at December 31, 2008. Changes in the Company's reserve estimates are recorded through a charge or credit to its earnings.

Life

For traditional life insurance products, the Company computes insurance reserves primarily using the net premium method based on anticipated investment yield, mortality, and withdrawals. These methods are widely used in the life insurance industry to estimate the liabilities for insurance reserves. Inherent in these calculations are management and actuarial judgments and estimates that could significantly impact the ending reserve liabilities and, consequently, operating results. Actual results may differ, and these estimates are subject to interpretation and change.

Policyholder funds represent interest-bearing liabilities arising from the sale of products, such as universal life, interest-sensitive life and annuities. Policyholder funds are comprised primarily of deposits received and interest credited to the benefit of the policyholder less surrenders and withdrawals, mortality charges and administrative expenses.

Interest Credited

Interest credited to policyholder funds represents interest accrued or paid on interest-sensitive life policies and investment policies. Amounts charged to operations (including interest credited and benefit claims incurred in excess of related policyholder account balances) are reported as insurance benefits, claims and reserves-life and annuity. Credit rates for certain annuities and interest-sensitive life policies are adjusted periodically by the Company to reflect current market conditions, subject to contractually guaranteed minimum rates.

Health

The Company believes that its recorded insurance reserves are reasonable and adequate to satisfy its ultimate liability. The Company primarily uses its own loss development experience, but will also supplement that with data from its outside actuaries, reinsurers and industry loss experience as warranted. To illustrate the impact that Loss Ratios have on the Company's loss reserves and related expenses, each hypothetical 1% change in the Loss Ratio for the health business (i.e., the ratio of insurance benefits, claims and settlement expenses to earned health premiums) for the year ended December 31, 2008, would increase reserves (in the case of a higher ratio) or decrease reserves (in the case of a lower ratio) by approximately \$2.8 million with a corresponding increase or decrease in the pre-tax expense for insurance benefits, claims and reserves in the Consolidated Statement of Operations. Depending on the circumstances surrounding a change in the Loss Ratio, other pre-tax amounts reported in the Consolidated Statement of Operations could also be affected, such as amortization of deferred acquisition costs and commission expense.

The Company's health reserves by segment are as follows (in thousands):

	December 31, 2008		
	Claim Reserves	Policy Claims	Total Health Reserves
Medical Stop-Loss	\$ 89,558	\$ 126	\$ 89,684
Fully Insured Health	38,168	-	38,168
Group Disability	61,502	10,141	71,643
Individual Accident and Health and Other	9,932	1,891	11,823
	\$ 199,160	\$ 12,158	\$ 211,318

		December 31, 2007		
	Claim Reserves		Policy Claims	Total Health Reserves
Medical Stop-Loss	\$ 94,832	\$	457	\$ 95,289
Fully Insured Health	40,999		-	40,999
Group Disability	58,202		9,604	67,806
Individual Accident and Health and Other	7,961		358	8,319
	\$ 201,994	\$	10,419	\$ 212,413

Medical Stop-Loss

The Company's Medical Stop-Loss segment is comprised of Employer Stop-Loss, HMO Reinsurance and Provider Excess. All of the Company's Medical Stop-Loss policies are short-duration and are accounted for based on actuarial estimates of the amount of loss inherent in that period's claims or

open claims from prior periods, including losses incurred for claims that have not been reported (IBNR). Short-duration contract loss estimates rely on actuarial observations of ultimate loss experience for similar historical events.

The two primary assumptions underlying the calculation of loss reserves for Medical Stop-Loss business are (i) projected Net Loss Ratio, and (ii) claim development patterns. The projected Net Loss Ratio is set at expected levels consistent with the underlying assumptions (Projected Net Loss Ratio). Claim development patterns are set quarterly as reserve estimates are developed and are based on recent claim development history (Claim Development Patterns). The Company uses the Projected Net Loss Ratio to establish reserves until developing losses provide a better indication of ultimate results and it is feasible to set reserves based on Claim Development Patterns. The Company has concluded that a reasonably likely change in the Projected Net Loss Ratio assumption could have a material effect on the Company's financial condition, results of operations, or liquidity (Material Effect) but a reasonably likely change in the Claim Development Pattern would not have a Material Effect.

Projected Net Loss Ratio

Generally, during the first twelve months of an underwriting year, reserves for Medical Stop-Loss are first set at the Projected Net Loss Ratio, which is set using assumptions developed using completed prior experience trended forward. The Projected Net Loss Ratio is the Company's best estimate of future performance until such time as developing losses provide a better indication of ultimate results.

While the Company establishes a best estimate of the Projected Net Loss Ratio, actual experience may deviate from this estimate. This was the case with the 2005, 2006 and 2007 underwriting years which deviated by 8.0, 12.7 and 2.7 Net Loss Ratio points, respectively. After the recorded reserve increase, it is reasonably likely that the actual experience will fall within a range up to five Net Loss Ratio points above or below the expected Projected Net Loss Ratio for 2008 at December 31, 2008. The impact of these reasonably likely changes at December 31, 2008, would be an increase in net reserves (in the case of a higher ratio) or a decrease in net reserves (in the case of a lower ratio) of up to approximately \$3.2 million with a corresponding increase or decrease in the pre-tax expense for insurance benefits, claims and reserves in the 2008 Consolidated Statement of Operations.

Major factors that affect the Projected Net Loss Ratio assumption in reserving for Medical Stop-Loss relate to: (i) frequency and severity of claims; (ii) changes in medical trend resulting from the influences of underlying cost inflation, changes in utilization and demand for medical services, the impact of new medical technology and changes in medical treatment protocols; and (iii) the adherence by the MGUs that produce and administer this business to the Company's underwriting guidelines. Changes in these underlying factors are what determine the reasonably likely changes in the Projected Net Loss Ratio as discussed above.

Claim Development Patterns

Subsequent to the first twelve months of an underwriting year, the Company's developing losses provide a better indication of ultimate losses. At this point, claims have developed to a level where Claim Development Patterns can be applied to generate reasonably reliable estimates of ultimate claim levels. Development factors based on historical patterns are applied to paid and reported claims to estimate fully developed claims. Claim Development Patterns are reviewed quarterly as reserve estimates are developed and are based on recent claim development history. The Company must determine whether changes in development represent true indications of emerging experience or are simply due to random claim fluctuations.

The Company also establishes its best estimates of claim development factors to be applied to more developed treaty year experience. While these factors are based on historical Claim Development

Patterns, actual claim development may vary from these estimates. The Company does not believe that reasonably likely changes in its actual claim development patterns would have a Material Effect.

Predicting ultimate claims and estimating reserves in Medical Stop-Loss is more complex than fully insured medical and disability business due to the excess of loss nature of these products with very high deductibles applying to specific claims on any individual claimant and in the aggregate for a given group. The level of these deductibles makes it more difficult to predict the amount and payment pattern of such claims. Fluctuations in results for specific coverage are primarily due to the severity and frequency of individual claims, whereas fluctuations in aggregate coverage are largely attributable to frequency of underlying claims rather than severity. Liabilities for first dollar medical reserves and disability coverages are computed using completion factors and expected Net Loss Ratios derived from actual historical premium and claim data.

Due to the short-term nature of Medical Stop-Loss, redundancies or deficiencies will typically emerge during the course of the following year rather than over a number of years. For Employer Stop-Loss, as noted above, the Company maintains its reserves based on underlying assumptions until it determines that an adjustment is appropriate based on emerging experience from all of its MGUs for prior underwriting years. Reserves for HMO Reinsurance and Provider Excess are adjusted on a policy by policy basis. Because of the small number of HMO Reinsurance and Provider Excess policies it writes, the Company is able to evaluate each policy individually for potential liability by reviewing open claims with each HMO or provider group and applying completion factors using historical data.

Fully Insured Health

Reserves for fully insured medical and dental business are established using historical claim development patterns. Claim development by number of months elapsed from the incurred month is studied each month and development factors are calculated. These claim development factors are then applied to the amount of claims paid to date for each incurred month to estimate fully complete claims. The difference between fully complete claims and the claims paid to date is the estimated reserve. Total reserves are the sum of the reserves for all incurred months.

The primary assumption in the determination of fully insured reserves is that historical claim development patterns tend to be representative of future claim development patterns. Factors which may affect this assumption include changes in claim payment processing times and procedures, changes in product design, changes in time delay in submission of claims, and the incidence of unusually large claims. The reserving analysis includes a review of claim processing statistical measures and large claim early notifications; the potential impacts of any changes in these factors are minimal. The time delay in submission of claims tends to be stable over time and not subject to significant volatility. Since our analysis considered a variety of outcomes related to these factors, the Company does not believe that any reasonably likely change in these factors will have a Material Effect.

Group Disability

The Company's Group Disability segment is comprised of Long Term Disability (LTD) and Disability Benefits Law (DBL). The two primary assumptions on which Group Disability reserves are based are: (i) morbidity levels; and (ii) recovery rates. If morbidity levels increase, for example due to an epidemic or a recessionary environment, the Company would increase reserves because there would be more new claims than expected. In regard to the assumed recovery rate, if disabled lives recover more quickly than anticipated then the existing claims reserves would be reduced; if less quickly, the existing claims reserves would be increased. Advancements in medical treatments could affect future recovery, termination, and mortality rates. With respect to LTD only, other assumptions are: (i) changes in market interest rates; (ii) changes in offsets; (iii) advancements in medical treatments; and (iv) cost of living. Changes in market interest rates could change reserve assumptions since the payout period could be as long as 40 years. Changes in offsets such as Social Security benefits, retirement plans and state disability

plans also impact reserving. As a result of the forgoing assumptions, it is possible that the historical trend may not be an accurate predictor of the future development of the block. As with most long term insurance reserves that require judgment, the reserving process is subject to uncertainty and volatility and fluctuations may not be indicative of the claim development overall.

While the Company believes that larger variations are possible, the Company does not believe that reasonably likely changes in its primary assumptions would have a Material Effect.

Individual Accident and Health and Other

This segment is a combination of closed lines of business as well as certain small existing lines. While the assumptions used in setting reserves vary between these different lines of business, the assumptions would generally relate to the following: (i) the rate of disability; (ii) the morbidity rates on specific diseases; and (iii) accident rates. The reported reserves are based on management's best estimate for each line within this segment. General uncertainties that surround all insurance reserving methodologies would apply. However, since the Company has so few policies of this type, volatility may occur due to the small number of claims.

Deferred Acquisition Costs

Costs that vary with and are primarily related to acquiring insurance policies and investment type contracts are deferred and recorded as deferred policy acquisition costs ("DAC"). These costs are principally broker fees, agent commissions, and the purchase prices of acquired blocks of business. DAC is amortized to expense and reported separately in the Consolidated Statements of Operations. All DAC within a particular product type is amortized on the same basis using the following methods:

Life

For traditional life insurance and other premium paying policies accounted for under Statement of Financial Accounting Standards ("SFAS") No. 60, amortization of DAC is charged to expense over the related premium revenue recognition period. Assumptions used in the amortization of DAC are determined based upon the conditions as of the date of policy issue or assumption and are not generally revised during the life of the policy.

For long duration type contracts accounted for under SFAS No. 97, such as annuities and universal life business, amortization of DAC is charged to expense over the life of the book of such contracts based on the present value of the estimated gross profits ("EGPs") expected to be realized over the life of the book of contracts. EGPs consist of margins based on expected mortality rates, persistency rates, interest rate spreads, and other revenues and expenses.

The Company regularly evaluates its EGPs to determine if actual experience or other evidence suggests that earlier estimates should be revised. If the Company determines that the current assumptions underlying the EGPs are no longer the best estimate for the future due to changes in actual versus expected mortality rates, persistency rates, interest rate spreads, or other revenues and expenses, the future EGPs are updated using the new assumptions and prospective unlocking occurs. These updated EGPs are utilized for future amortization calculations. The total amortization recorded to date is adjusted through a current charge or credit to the Consolidated Statement of Operations.

Health

For credit health insurance policies accounted for under SFAS No. 60, amortization of DAC is charged to expense in proportion to premium revenue recognized.

Investments

The Company accounts for its investments in debt and equity securities under SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. The Company has classified all of its investments as available-for-sale or trading securities. These investments are carried at fair value with unrealized gains and losses reported in either accumulated other comprehensive income (loss) in the Consolidated Balance Sheets for available-for-sale securities or as unrealized gains or losses in the Consolidated Statements of Operations for trading securities. Fixed maturities and equity securities available-for-sale totaled \$662.5 million and \$710.4 million at December 31, 2008 and 2007, respectively. Premiums and discounts on debt securities purchased at other than par value are amortized and accreted, respectively, to interest income in the Consolidated Statements of Operations, using the constant yield method over the period to maturity. Net realized gains and losses on investments are computed using the specific identification method and are reported in the Consolidated Statements of Operations.

Declines in value of securities available-for-sale that are judged to be other-than-temporary are determined based on the specific identification method and are reported in the Consolidated Statements of Operations as realized losses. The factors considered by management in determining when a decline is other than temporary include but are not limited to: the length of time and extent to which the fair value has been less than cost; the financial condition and near-term prospects of the issuer; adverse changes in ratings announced by one or more rating agencies; subordinated credit support; whether the issuer of a debt security has remained current on principal and interest payments; current expected cash flows; whether the decline in fair value appears to be issuer specific or, alternatively, a reflection of general market or industry conditions (including, in the case of fixed maturities, the effect of changes in market interest rates); and the Company's intent and ability to hold the security for a period of time sufficient to allow for a recovery in fair value. For structured securities, such as mortgage-backed securities, an impairment loss is recognized when there has been a decrease in expected cash flows and/or a decline in the security's fair value below cost.

Goodwill and Other Intangible Assets

Goodwill related to the Company's equity method investment in AMIC is considered in the evaluation of whether there has been an other-than-temporary decline in value of the overall investment in AMIC. All other goodwill carrying amounts are evaluated for impairment at the reporting unit level, at least annually. If the fair value of a reporting unit is less than its carrying amount, further evaluation is required to determine if a write-down of goodwill is required. Other intangible assets are amortized to expense over their estimated useful lives and are subject to impairment testing. Any impairment write-down of goodwill and other intangible assets would be charged to expense. No impairment charge was required in 2008, 2007 or 2006. If we experience a sustained decline in our results of operations and cash flows, or other indicators of impairment exist, we may incur a material non-cash charge to earnings relating to impairment of our goodwill, which could have a material adverse effect on our results.

Deferred Income Taxes

The provision for deferred income taxes is based on the asset and liability method of accounting for income taxes. Under this method, deferred income taxes are recognized by applying enacted statutory tax rates to temporary differences between amounts reported in the Consolidated Financial Statements and the tax bases of existing assets and liabilities. A valuation allowance is recognized for the portion of deferred tax assets that, in management's judgment, is not likely to be realized. The effect on deferred income taxes of a change in tax rates or laws is recognized in income tax expense in the period that includes the enactment date. The Company has certain tax-planning strategies that were used in determining that a valuation allowance was not necessary on its deferred taxes.

RESULTS OF OPERATIONS**Results of Operations for the Year Ended December 31, 2008 Compared to the Year Ended December 31, 2007**

Loss from continuing operations was \$24.5 million, or \$1.59 per share, diluted, for the year ended December 31, 2008, a decrease of \$26.0 million compared to income from continuing operations of \$1.5 million, or \$.10 per share, diluted, for the year ended December 31, 2007. The Company's income from continuing operations before taxes decreased \$42.7 million to a loss of \$40.8 million for the year ended December 31, 2008 from income of \$1.9 million for 2007. Income from discontinued operations, net of taxes, was \$.5 million, or \$.03 per share, diluted, for the year ended December 31, 2008 compared to a loss of \$.2 million or \$.01 per share, diluted, for the year ended December 31, 2007. The gain on the disposition of discontinued operations in 2008 was \$.1 million, or \$.01 per share, diluted, compared to a loss of \$3.6 million, or \$.24 per share, diluted, net of tax, in 2007.

Information by business segment for the years ended December 31, 2008 and 2007 is as follows:

Premiums Earned

Total premiums earned grew \$10.4 million to \$317.3 million from \$306.9 million in 2007. The increase is primarily due to: (i) the Fully Insured Health segment which had a \$9.0 million increase in premiums in 2008 compared to 2007, comprised primarily of: (a) a \$6.7 million increase in student accident premiums as a result of a new program initiated in 2008, (b) a \$6.2 million increase in dental premiums and \$1.0 million increase in limited medical premiums as a result of continuing growth, offset by (c) a decrease of \$4.1 million in short-term medical premiums primarily due to lower production caused in part by an increase in rates, and (d) a \$1.0 million decrease in the small group line due to lower production caused in part by an increase in rates; (ii) a \$1.7 million increase in group disability, life, annuities and DBL segment primarily due to increased retention in the LTD line; (iii) a \$2.7 million increase in the individual life, annuities and other segment primarily as a result of the acquisition of a block of life and annuity business; offset by (iv) a decrease of \$3.0 million in the Medical Stop-Loss segment primarily due to stricter underwriting guidelines and the termination of certain production sources in 2008.

Net Investment Income

Total net investment income decreased \$2.1 million, primarily due to losses from limited investment partnerships in 2008 compared to income from limited investment partnerships recorded in 2007. The losses from investment partnerships were primarily the result of the continued disruption in the equity markets in 2008 and the primary cause of the decrease in the overall investment yield to 4.9% in 2008 from 5.3% in 2007. The decrease in the investment yield on bonds, equities and short-term investments to 5.2% in 2008 from 5.4% in 2007 is primarily due to a higher percentage of investments in states and political subdivisions in our investment portfolio which provide lower yields but result in tax-advantaged earnings.

Net Realized Investment Gains (Losses)

Net realized investment gains (losses) decreased \$51.9 million to a net loss of \$50.6 million in 2008 from a net gain of \$1.3 million in 2007. These amounts include gains and losses from sales of fixed maturities and equity securities available-for-sale, as well as trading securities and other investments. Decisions to sell securities are based on management's ongoing evaluation of investment opportunities and economic and market conditions, thus creating fluctuations in gains and losses from period to period. Included in net realized investment gains (losses) for years ended December 31, 2008 and 2007 are pre-tax losses of \$38.2 million and \$.4 million, respectively, from other-than-temporary impairments primarily due to the write-down in value of investments in preferred stocks of certain financial institutions and fixed maturities (primarily Alt-A mortgage securities) primarily due to the severity of the decrease in fair value and length of time that these securities were in a loss position. In addition, the Company has recently become aware of certain activities engaged in by the non-affiliate broker-dealer that managed the trading accounts of the Company. The Company reduced the value of the assets held in such accounts to their estimated

recoverable amounts. As a result, the Company recorded a \$6.8 million pre-tax loss, net of expected recoveries, in the fourth quarter of 2008 related to such accounts. See Note 7 in the Notes to Consolidated Financial Statements included in item 8 of this report for more information about net realized investment gains and losses.

Fee Income and Other Income

Fee income decreased \$4.4 million to \$39.7 million from \$44.1 million in 2007, primarily due to a decrease in administrative fees in the Fully Insured Health segment primarily as a result of decreases in gross premiums from the short-term medical and small group lines of business.

Total other income decreased \$.5 million to \$2.9 million from \$3.4 million in 2007, primarily due to adjustments in 2007 in settlement of a reinsurance agreement.

Insurance Benefits, Claims and Reserves

Benefits, claims and reserves decreased \$10.2 million. The decrease is mainly due to: (i) a decrease of \$11.3 million in the Medical Stop-Loss segment, primarily resulting from a \$11.9 million charge, before income taxes, in 2007 for reserve strengthening, as described in further detail in the Results of Operations for the Year Ended December 31, 2007; (ii) a decrease of \$1.1 million in the group disability, life, annuities and DBL segment primarily due to decreases in the DBL (\$1.3 million) and group term life (\$1.2 million) lines due to improved loss ratios and claims experience offset by an increase in the LTD line (\$1.8 million) due to increased retention and higher loss ratios; offset by (iii) a \$.6 million increase in the Fully Insured Health segment, primarily due to the increases in dental (\$4.3 million) and student accident (\$3.4 million) lines which correspond to premium growth, offset by decreases in the small group (\$3.4 million) and short-term medical (\$4.4 million) lines due to lower volumes of business and improved loss ratios; and (iv) a \$1.6 million increase in the individual life, annuities and other segment primarily as a result of the acquisition of a block of life and annuity business.

Amortization of Deferred Acquisition Costs

Amortization of deferred acquisition costs increased \$.2 million in 2008 compared to 2007 partially as a result of the acquisition of a block of life and annuity policies in the second quarter of 2008.

Interest Expense on Debt

Interest expense decreased \$.4 million primarily as a result of a lower average outstanding principal balance under a line of credit during 2008 compared to 2007 combined with lower variable interest rates on the junior subordinated debt securities in 2008 compared to 2007.

Selling, General and Administrative Expenses

Total selling, general and administrative expenses increased \$4.5 million in 2008 as compared to 2007. The increase is primarily due to (i) a \$3.9 million increase in commission and administrative expenses associated with the operation of the Fully Insured Health segment, primarily due to (a) increases in commission and administrative expenses for the dental (\$2.2 million) and student accident (\$2.0 million) lines due to increased volume; (b) increase of \$3.2 million primarily in commission expenses in the small group line due to higher profit commissions on 2007 business; offset by (c) a decrease of \$.9 million in short-term medical expenses due to lower production; and (d) a decrease of \$3.0

million primarily from administrative expenses at the third party administrators due in part to cost reductions; (ii) a \$2.0 million increase in commission and administration expenses in the individual life, annuities and other segment as a result of increased volume from the recent acquisition of a block of life and annuity policies; (iii) a \$1.8 million increase in the group disability, life, annuities and DBL segment primarily due to the increase in retention of the LTD business; and (iv) a \$3.2 million decrease in corporate overhead expenses (primarily employee benefits, audit expenses, interest income on accrued income tax refunds and a higher allocation of expenses to the subsidiaries).

Income Taxes

Income tax expense decreased \$16.8 million resulting in a tax benefit of \$16.4 million for 2008 from an expense of \$.4 million in 2007. The effective tax rates were 40.1% and 22.2% for 2008 and 2007, respectively. The difference in the effective tax rates is primarily attributable to tax benefits generated by a pre-tax loss in 2008 coupled with other tax benefits derived from dividend received deductions ("DRDs") and tax exempt interest compared to tax expense generated by pre-tax income in 2007. During 2007, and continuing in 2008, the Company increased its positions in both state and political subdivision investments and preferred securities that generate tax exempt interest and DRDs, creating a greater benefit in 2008 than in 2007.

RESULTS OF OPERATIONS**Results of Operations for the Year Ended December 31, 2007 Compared to the Year Ended December 31, 2006**

Income from continuing operations was \$1.5 million, or \$.10 per share, diluted, for the year ended December 31, 2007, a decrease of \$13.0 million compared to income from continuing operations of \$14.5 million, or \$.95 per share, diluted, for the year ended December 31, 2006. The Company's income from continuing operations before taxes decreased \$19.2 million to \$1.9 million for the year ended December 31, 2007 from \$21.1 million for 2006. The loss from discontinued operations was \$.2 million, or \$.01 per share, diluted, for the year ended December 31, 2007 compared to \$.4 million, or \$.02 per share, diluted, for the year ended December 31, 2006. The loss on the disposition of discontinued operations in 2007 was \$3.6 million, or \$.24 per share, diluted, net of tax benefits of \$1.9 million.

Premiums Earned

Total premiums earned grew \$48.2 million to \$306.9 million from \$258.7 million in 2006. The increase is primarily due to: (i) the Fully Insured segment which had a \$39.4 million increase in premiums (comprised of a \$25.0 million increase in small group premiums as a result of the acquisition of a block of business which transitioned to the Company's paper in the third quarter of 2006, a \$4.8 million increase in dental premiums primarily due to the continued transition of GroupLink premiums to MNL as a carrier, a \$4.0 million increase in short-term medical premiums and a \$5.6 million increase due to new vision, limited medical and student accident products in 2007); and (ii) the Medical Stop-Loss segment, which increased \$9.3 million primarily due to an increase in assumed business.

Net Investment Income

Total net investment income decreased \$1.6 million, primarily due to: (i) lower investable assets as a result of the acquisitions of CAM and AMC in 2007; (ii) lower investment income from limited partnerships due to the liquidation of certain partnership investments in 2007 and losses reported by certain partnerships in 2007 versus income reported in 2006; and (iii) a slightly lower investment yield. The overall investment yield was 5.3% for 2007 versus 5.5% for 2006.

Net Realized Investment Gains

Net realized investment gains increased \$.7 million to \$1.3 million in 2007 from \$.6 million in 2006. These amounts include gains and losses from sales of fixed maturities and equity securities available-for-sale, as well as trading securities and other investments. Decisions to sell securities are based on management's ongoing evaluation of investment opportunities and economic and market conditions, thus creating fluctuations in gains and losses from period to period. Also included in net realized investment gains for the years ended December 31, 2007 and 2006 are gains (losses) of \$(683,000) and \$114,000, respectively, representing the net change in fair value of a stock put issued by IHC in connection with the acquisition of IAC.

Equity Income from AMIC

Equity income from AMIC in 2007 was comparable to 2006.

Fee Income and Other Income

Fee income increased \$11.6 million to \$44.1 million from \$32.5 million in 2006, primarily due to an increase in administrative fees in the Fully Insured Health segment including an increase of \$6.7 million earned by IAC (acquired January 31, 2006) in addition to \$4.9 million of fees earned by IHC Health Solutions, Inc (acquired January 1, 2007) and AMC (acquired April 1, 2007).

Total other income increased \$1.3 million to \$3.4 million from \$2.1 million in 2006, primarily due to adjustments in 2007 in settlement of a reinsurance agreement.

Insurance Benefits, Claims and Reserves

Benefits, claims and reserves increased \$52.8 million. The increase is mainly due to: (i) an increase of \$20.5 million in the Medical Stop-Loss segment, primarily resulting from an increase in claims experience and reserve strengthening of \$11.9 million related to 2006 business and \$5.6 million due to an increase in the Projected Net Loss Ratio on 2007 business, as described in further detail below; and the remainder, as a result of the increase in assumed premiums, and (ii) an increase of \$31.8 million in the Fully Insured Health segment, primarily due to the increase in volume and adverse development of \$1.2 million related to the 2006 year, as described below in Reserve Strengthening.

Reserve Strengthening:

Medical Stop-Loss

In accordance with our reserving methodology, the Company initially establishes its medical stop-loss reserves based on its best estimate of the Projected Net Loss Ratio, which is set based on underlying assumptions developed using completed prior experience trended forward ("Projected Net Loss Ratio"). This use of projections reflects the fact that actual claims on medical stop-loss cases typically are not fully reported until after the end of the policy period. We use the Projected Net Loss Ratio to set reserves until developing losses provide a better indication of ultimate results and it is feasible to set reserves based on claim development patterns. IHC's typical practice is to then increase or decrease claims reserves once we know the actual claims experience. We then review quarterly the Projected Net Loss Ratios and claim development patterns as we develop reserve estimates based on recent claim development history ("Claim Development Patterns").

Medical stop-loss business is excess coverage with a short duration. Predicting ultimate claims and estimating reserves in medical stop-loss is especially complicated due to the excess of loss nature of these products with very high deductibles applying to specific claims on any individual claimant and in the aggregate for a given group. Fluctuations in results for specific coverage are primarily due to the severity and frequency of individual claims. Due to the short-term nature of medical stop-loss, redundancies and deficiencies will typically emerge during the following year rather than over a number of years.

Consistent with our experience, the industry as a whole has succumbed to the pricing pressures caused by an unexpectedly long down cycle (or "soft" market) for medical stop-loss business. The medical stop-loss market has been soft for the past four years, including cases written in 2006 and 2007, which means that many of the Company's competitors have been willing to write business at little or no margin. We had been aware of these market conditions and had curtailed our growth in order to attempt to achieve higher profit margins. The Company believed that it had taken sufficient action to insure that business written in 2006 would produce better margins than that written in 2005 and formulated a Projected Net Loss Ratio reflecting such expectations. As is typical with medical stop-loss business, MGUs do have some discretion within our underwriting guidelines to make pricing concessions on certain cases, particularly as it relates to maintaining their core renewal business and production sources.

In the third quarter of 2007, during our quarterly review of Claim Development Patterns, we identified a material increase in claims and reserves with respect to business written in 2006. Such adverse development was primarily driven by the frequency of claims relative to the business written in that year proving significantly higher than what would have been predicted by prior loss development patterns. This increased frequency of medical stop-loss claims was due, in part, to increased severity of primary claims. The Company determined that this increase in claims was an indication of a pattern of higher loss frequency. While claims related to business written in 2007 have not yet

developed to a level where Claim Development Patterns would provide reliable estimates of ultimate claim levels, we determined that it was appropriate to re-estimate the 2007 Projected Net Loss ratio to take into account developing losses with respect to business written in 2006.

As a result of these actions, the Company increased the Projected Net Loss Ratio on the business written in 2007 by 9.8% and increased the Net Loss Ratio (defined as insurance benefits, claims and reserves divided by (premiums earned less underwriting expenses)) on the business written in 2006 by 11.4%. This resulted in a charge of \$11.9 million, before income taxes, in 2007 primarily relating to the re-estimation of unpaid losses from the prior year. In addition, the Company booked higher reserves of \$5.6 million related to the 2007 business due to the increase of 9.8% in the Projected Net Loss Ratio from the rate at which new business was reserved for in 2006. The Company recorded Net Loss Ratios for the medical stop-loss line of 108.9%, 95.2% and 93.2% for the years ended December 31, 2007, 2006 and

2005 respectively. The Net Loss Ratio equation primarily differs from the Combined Ratio in that it subtracts out expenses from the premiums prior to dividing by the insurance benefits, claims and reserves. We primarily use Net Loss Ratios from a reserving standpoint and as a management tool to measure the profitability of medical stop-loss with respect to each program. The Company primarily uses Combined Ratios as an accounting measurement for reporting purposes.

Fully Insured Health

The adverse development recorded in 2007 in the Fully Insured Health segment was largely related to: (i) overestimating the value of certain new initiatives started in 2006 that were intended to manage and reduce claims costs, including medical care management services to insureds, negotiation of out-of-network claims, and auditing provider bills ("Cost Containment Program"), and (ii) underestimating in 2006 the seasonality patterns that are a result of an increasing portion of the business having high deductible health plans (HDHPs). Although this Cost Containment Program did have a positive impact on the results of the small group major medical line, during 2007 the Company determined that the impact was not as large as it had anticipated when setting reserves in 2006. With respect to the seasonality patterns, HDHPs have fewer claims in the first quarter of a plan year and higher claims in the last quarter of the plan year. Primarily as a result of these two factors during 2006, the Company believed that its small-group major medical business had significantly better loss ratios than we later determined.

Amortization of Deferred Acquisition Costs

Amortization of deferred acquisition costs increased \$.7 million.

Interest Expense on Debt

Interest expense increased \$.3 million primarily as a result of a higher average outstanding principal balance and a higher interest rate paid under a line of credit during 2007 compared to 2006 (an average of 6.7% in 2007 compared to 5.1% in 2006).

Selling, General and Administrative Expenses

Total selling, general and administrative expenses increased \$25.4 million in 2007 as compared to 2006. The increase is primarily due to (i) a \$22.7 million increase in commission and administrative expenses associated with the operation of the Fully Insured segment, primarily due to (a) \$6.3 from the acquisitions of CAM and AMC, (b) an overall increase in costs of \$15.0 million due to the increase in business (reported as SGA expenses, previously described), and (c) a \$1.4 million increase in amortization expenses as a result of the purchase accounting for recent acquisitions; and (ii) a \$3.5 million increase in commissions and other general expenses in the Medical Stop-Loss segment due to higher volume.

Income Taxes

Income tax expense decreased \$6.2 million to \$.4 million for 2007 from \$6.6 million in 2006, primarily due to the decrease in pre-tax income in 2007. The decrease in the effective tax rate to 22.2% in 2007 from 31.4% in 2006 is primarily due to a higher ratio of dividend received deductions ("DRD") and tax exempt income to pre-tax income in 2007 compared to 2006. Although the amount of DRD and tax exempt income has not increased substantially, their proportion to pre-tax income has due to the decrease in operating income in 2007 resulting in a lower effective tax rate in 2007.

LIQUIDITY

Insurance Group

The Insurance Group normally provides cash flow from: (i) operations; (ii) the receipt of scheduled principal payments on its portfolio of fixed maturities; and (iii) earnings on investments. Such cash flow is partially used to fund liabilities for insurance policy benefits. These liabilities represent long-term and short-term obligations.

Corporate

Corporate derives its funds principally from: (i) dividends from the Insurance Group; (ii) management fees from its subsidiaries; and (iii) investment income from Corporate liquidity. Regulatory constraints historically have not affected the Company's consolidated liquidity, although state insurance laws have provisions relating to the ability of the parent company to use cash generated by the Insurance Group.

Cash Flows

As of December 31, 2008, the Company had \$7.8 million of cash and cash equivalents compared with \$72.8 as of December 31, 2007. The decrease in cash and cash equivalents was primarily offset by an increase in securities purchased under agreements to resell of \$47.1 million. Total investments, net of amounts due to and from brokers, were \$763.7 million and \$779.4 million at December 31, 2008 and 2007, respectively.

Net cash provided by operating activities of continuing operations for the year ended December 31, 2008 was \$3.3 million. Net cash used by operating activities of discontinued operations for the year ended December 31, 2008 was \$18.0 million primarily due to cash used for the settlement of the Credit Life and Disability segment.

Net cash used by investing activities of continuing operations for the year ended December 31, 2008 was \$47.0 million primarily as a result of net purchases of \$79.1 million of fixed maturities and \$47.1 million of securities under resale and repurchase agreements, partially offset by \$15.7 million in net proceeds on sales of equity securities in

addition to \$57.3 million received in connection with the acquisition of a block of life insurance and annuity policies.

The Company has \$478.9 million of insurance reserves that it expects to ultimately pay out of current assets and cash flows from future business. If necessary, the Company could utilize the cash received from maturities and repayments of its fixed maturity investments if the timing of claim payments associated with the Company's insurance resources does not coincide with future cash flows. For the year ended December 31, 2008, cash received from the maturities and other repayments of fixed maturities was \$74.7 million.

The Company believes it has sufficient cash to meet its currently anticipated business requirements over the next twelve months including working capital requirements and capital investments.

BALANCE SHEET

Total investments, net of amounts due to and from brokers, decreased \$15.7 million during 2008 largely due to: (i) a \$69.2 million increase in unrealized losses on available for sale securities; (ii) \$38.2 million of losses realized for other-than-temporary impairments; (iii) \$6.8 million of other net trading account losses; (iv) a \$4.9 million decrease in partnership investments; (v) offset by \$107.2 million of net purchases of short-term investments, resale agreements, and fixed maturities and equity securities available-for-sale.

The Company had net receivables from reinsurers of \$100.7 million at December 31, 2008. Substantially all of the business ceded to such reinsurers is of short duration. All of such receivables are either due from highly rated companies or are adequately secured. No allowance for doubtful accounts was necessary at December 31, 2008.

Other assets increased \$39.8 million primarily due to a \$39.0 million increase in net deferred tax assets recorded as a result of a \$23.8 million net loss and \$70.7 million of net unrealized losses on investment securities allocated to stockholders' equity.

The \$60.1 million decrease in total stockholders' equity in 2008 is primarily due to a net loss of \$23.8 million and a \$38.2 million increase in after-tax net unrealized losses on investments.

Asset Quality and Investment Impairments

The nature and quality of insurance company investments must comply with all applicable statutes and regulations, which have been promulgated primarily for the protection of policyholders. Of the aggregate carrying value of the Insurance Group's cash and investment assets, approximately 91.2% was invested in investment grade fixed maturities, resale agreements, policy loans and cash and cash equivalents at December 31, 2008. The Company's gross unrealized losses on available-for-sale securities totaled \$99.2 million at December 31, 2008. Also at such date, approximately 99.1% of the Insurance Group's fixed maturities were investment grade and continues to be rated on average AA. The Company marks all of its available-for-sale securities to fair value through accumulated other comprehensive income or loss. These investments tend to carry less default risk and, therefore, lower interest rates than other types of fixed maturity investments. At December 31, 2008, approximately .9% (or \$5.7 million) of the carrying value of fixed maturities was invested in diversified non-investment grade fixed maturities (investments in such securities have different risks than investment grade securities, including greater risk of loss upon default, and thinner trading markets). The Company has only one non-performing fixed maturity at December 31, 2008 with a carrying value of \$.7 million, or .1% of the total carrying value of fixed maturities.

At December 31, 2008, the Company had \$28.8 million invested in whole loan collateralized mortgage obligations ("CMOs") backed by Alt-A mortgages. Of this amount, 39.8% were in CMOs that originated in 2005 or earlier and 60.2% were in CMOs that originated in 2006. While these mortgages have seen lower market values recently, we believe that the unrealized losses on these securities are not necessarily indicative of their ultimate performance. The Company's mortgage security portfolio has no direct exposure to sub-prime mortgages. The decline in fair value for the equity securities was primarily due to wider spreads for preferred stocks issued by financial institutions following the disruption in credit markets. Some of these financial institutions have exposure to sub-prime mortgages. The unrealized loss for CMO securities is primarily attributable to Alt-A mortgages as described above. The unrealized losses on corporate securities and state and political subdivision securities are due to wider spreads. Spreads have widened as investors shifted funds to U.S. Treasuries in response to the current market turmoil.

The Company reviews its investments regularly and monitors its investments continually for impairments, as discussed in Note 1(F)(vi) of the Notes to Consolidated Financial Statements in Item 8 of this report. For the years ended December 31, 2008 and 2007 the Company recorded losses of \$38.2 million and \$.4 million, respectively, for other-than-temporary impairments. The following table summarizes the carrying value of securities with fair values less than 80% of their amortized cost at December 31, 2008 by the length of time the fair values of those securities were below 80% of their amortized cost (in thousands):

	Less than 3 months	Greater than 3 months, less than 6 months	Greater than 6 months, less than 12 months	Greater than 12 months	Total
Fixed maturities	\$ 37,431	\$ 8,119	\$ 2,087	\$ -	\$ 47,637
Equity securities	3,292	10,083	-	-	13,375
Total	\$ 40,723	\$ 18,202	\$ 2,087	\$ -	\$ 61,012

The unrealized losses on all remaining available-for-sale securities have been evaluated in accordance with the Company's impairment policy and were determined to be temporary in nature at December 31, 2008. In 2008, the Company experienced an increase in net unrealized losses of \$70.7 million which, net of deferred tax benefits of \$21.2 million and net of deferred policy acquisition costs of \$11.3 million, decreased stockholders' equity by \$38.2 million (reflecting net unrealized losses of \$54.3 million at December 31, 2008 compared to net unrealized losses of \$16.1 million at December 31, 2007). From time to time, as warranted, the Company may employ investment strategies to mitigate interest rate and other market exposures. Further deterioration in credit quality of the companies backing the securities, further deterioration in the condition of the financial services industry, a continuation of the current imbalances in liquidity that exist in the marketplace, a continuation or worsening of the current economic recession, or additional declines in real estate values may further affect the fair value of these securities and increase the potential that certain unrealized losses be designated as other-than-temporary in future periods and the Company may incur additional write-downs.

Health Reserves

The following table summarizes the prior year net unfavorable amount incurred in 2008 according to the year to which it relates, together with the opening reserve balance (net of reinsurance recoverable) to which it relates (in thousands):

	Reserves at		Prior Year Amount	
		January 1, 2008		Incurred in 2008
Total Reserves				
2007	\$	77,214	\$	(103)
2006		9,280		1,597
2005		5,342		(6)
2004 and Prior		11,641		89
Total	\$	103,477	\$	1,577

The following sections describe, for each segment, the deficiency - unfavorable development or redundancy - favorable development experienced in 2008, together with the key assumptions and changes therein affecting the reserve estimates.

Medical Stop-Loss

The Company experienced net unfavorable development of \$3.3 million in the Medical Stop-Loss segment primarily related to \$3.2 million of negative development on the 2007 reserves. With respect to the 2007 reserves, the deficiency was the result of on-going analysis of recent loss development trends with respect to 2007 primarily attributable to the increased frequency of claims and the severity of primary claims. In the third quarter of 2007, the Company identified a material increase in claims and reserves with respect to business written in 2006. Such adverse development was primarily driven by the frequency of claims relative to the business written in that year proving significantly higher than what would have been predicted by prior loss development patterns. This increased frequency of medical stop-loss claims was due, in part, to increased severity of primary claims.

Fully Insured Health

The Company experienced \$1.2 million of favorable development in the Fully Insured Health segment primarily related to \$1.0 million on the 2007 business. The favorable development in the Fully Insured Health segment in 2008 is related to overestimating the seasonality patterns of the business having HDHPs in 2007.

Group Disability

The Group Disability segment had an unfavorable development of \$.2 million. This amount consists of a favorable development of \$1.4 million on the 2007 reserves primarily due to DBL and a net unfavorable development of \$1.6 million for all other years due to LTD.

Due to the long-term nature of LTD, in establishing loss reserves the Company must make estimates for case reserves, incurred but not reported reserves (IBNR), and reserves for Loss Adjustment Expenses (LAE). Case reserves generally equal the Company's best estimate of the present value of the liability for future benefits to be paid on claims incurred as of the balance sheet date. The LAE reserve is calculated based on an actuarial expense study. Since the LTD block of policies is relatively small, results can vary from year to year solely on the basis of one or two policies. It is not uncommon for a reserve of several hundred thousand dollars to be associated with one policy. If a small number of claimants with large policy reserves were to recover or a few large claims were incurred, the results could distort the Company's reserve estimates from year to year. However, there were no individual factors in 2008 that caused the unfavorable development in LTD. With respect to DBL, reserves for the most recent quarter of earned premium are established using a Net Loss Ratio methodology. The Net Loss Ratio is determined by applying the completed prior four quarters of historical Net Loss Ratios to the last quarter of earned premium. Reserves associated with the premium earned prior to the last quarter are established using a completion factor methodology. The completion factors are developed using the historical payment patterns for DBL. The favorable development in the DBL line is due to lower than expected claims.

There were normal fluctuations to the Company's experience factor. The IBNR factors were updated to reflect the current experience. The reserving process used by management was consistent from 2007 to 2008.

Individual Accident and Health and Other

The Individual Accident and Health and Other segment had favorable development of \$.7 million. The Company experienced \$.5 million favorable variance related to 2007 reserves on our Blanket Accident and sickness product that is sold to volunteer fire districts, due to lower claims experience than historically experienced. The Company had \$.2 million favorable variance on all other Individual A&H lines related to 2007 and prior reserves. The reserving process used by management was consistent from 2007 to 2008.

CAPITAL RESOURCES

Due to its strong capital ratios, broad licensing and excellent asset quality and credit-worthiness, the Insurance Group remains well positioned to increase or diversify its current activities. It is anticipated that future acquisitions or other expansion of operations will be funded internally from existing capital and surplus and parent company liquidity. In the event additional funds are required, it is expected that they would be borrowed or raised in the public or private capital markets to the extent determined to be necessary or desirable. In November 2004, December 2003 and March 2003, the Company borrowed \$15.0 million, \$12.0 million and \$10.0 million, respectively, through pooled trust preferred issuances by unconsolidated subsidiary trusts. In August 2006, the Company entered into a \$15.0 million line of credit, all of which was drawn down at that time. At December 31, 2008, \$10.0 million remains outstanding due to scheduled reductions of \$2.5 million in this line of credit in both August 2007 and 2008. See Note 13 of the Notes to Consolidated Financial Statements in Item 8 of this report.

IHC enters into a variety of contractual obligations with third parties in the ordinary course of its operations, including liabilities for insurance reserves, funds on deposit, debt and operating lease obligations. However, IHC does not believe that its cash flow requirements can be fully assessed based solely upon an analysis of these obligations. Future cash outflows, whether they are contractual obligations or not, also will vary based upon IHC's future needs. Although some outflows are fixed, others depend on future events.

The chart below reflects the maturity distribution of IHC's contractual obligations at December 31, 2008 (in thousands):

	Debt	Junior Subordinated Debt	Interest On Debt	Leases	Insurance Reserves	Funds on Deposit	Total
2009	\$ 10,000	\$ -	\$ 2,733	3,279	\$ 173,141	\$ 41,120	\$ 230,273
2010		-	1,980	3,152	49,345	39,387	93,864
2011	-	-	1,980	3,088	40,089	36,204	81,361
2012	-	-	1,980	2,183	30,928	33,733	68,824
2013	-	-	1,980	1,623	28,927	31,658	64,188
2014 and Thereafter	-	38,146	39,935	5,560	156,461	229,086	469,188

Totals	\$	10,000	\$	38,146	\$	50,588	\$	18,885	\$	478,891	\$	411,188	\$	1,007,698
--------	----	--------	----	--------	----	--------	----	--------	----	---------	----	---------	----	-----------

OUTLOOK

For 2009 , IHC s business plan is to: (i) continue to maintain the profitability of our Fully Insured Health business, while selectively pursuing new opportunities that leverage our vertically integrated strategy of generating fee income at multiple levels of marketing and administration, as well as risk profit and profit commission income, (ii) expand the distribution and continue to improve the profitability of our Medical Stop-Loss business, (iii) proactively adjust our mix of business to take advantage of market conditions, and (iv) continue to expand the distribution of our life and disability products. IHC believes it will be successful in mitigating any impact from proposed federal health care reform legislation, if enacted, as well as the impact of the current economic downturn because of our reliance on controlled distribution and our mix of business.

The following summarizes what IHC has accomplished and the outlook for 2009 and beyond by segment.

Historic Core Lines of Business

IHC has historically been a life and health insurance holding company for two insurance companies, Standard Security Life Insurance Company of New York ("Standard Security Life") and Madison National Life Insurance Company, Inc. ("Madison National Life"), which relied on independent general agents, managing general underwriters ("MGUs") and administrators to perform the majority of all marketing, underwriting, claims and administrative functions for our two primary product segments (Medical Stop-Loss and group disability, life, annuities and DBL). While it is always our intent to emphasize underwriting profits and not top line growth , the medical stop-loss industry as a whole succumbed to pricing pressures caused by an unexpectedly long down cycle (or "soft" market) from 2004 through 2008. As a consequence of these market conditions, we made a decision to curtail our growth and our 2008 loss ratios are improved. Due to stricter underwriting guidelines and the termination of several MGUs in 2008, we expect a decline in stop-loss premiums in 2009. The Company expects its gross group life and disability premiums to increase in 2009 as a result of taking over an estimated \$18 million block from an insurer that exited the market, of which we will retain approximately 20%.

With respect to distribution , Standard Security Life is approved to write Medical Stop-Loss in all 50 states and Madison National Life in 49 states. Standard Security Life is currently contacted to write this product through nine MGUs, and Madison National Life through one. T he Company has a significant ownership interest in five of these MGUs (including those owned by AMIC), which produced \$ 99.8 million (53.9 %) of Medical Stop-Loss premium s written on IHC paper in 2008 ..

Fully Insured Health Segment

The Fully Insured Health market (estimated at \$500 billion) in the U.S. is a much larger market than the Medical Stop-Loss market (estimated at \$4 billion). The Company limited the amount of its growth in this segment in 2008 and expects to continue to do so in 2009. In the event we determine to accelerate our growth, we are optimistic that (as a result of its multiple product filings, distribution sources, and the sheer size of the market) our Fully Insured Health business could grow while maintaining profitable underwriting results.

Investments

Due to the continued turmoil in the capital markets, IHC, like many insurance and other companies in the financial sector, recognized a loss in 2008 for other-than-temporary impairments. These impairments were realized on certain investments in preferred stocks and fixed maturities (primarily Alt-A mortgage securities). These preferred stocks were investment-grade preferred stocks issued by well-known financial institutions and account for approximately 4% of our total investment portfolio. Our fixed maturity portfolio continues to be rated on average AA, and the Company considers all unrealized losses in this category to be temporary. We have no direct investments in sub-prime mortgages, although approximately 4% of our total investment portfolio is Alt-A mortgages. While these mortgages have seen lower market values recently, we believe that the unrealized losses on these securities are not necessarily indicative of their ultimate performance. Our book value per share decreased to \$10.56 at December 31, 2008 from \$14.63 at December 31, 2007 due to a net loss and changes in the fair value of our investment portfolio. To the extent that the capital markets remain unsettled, we may continue to see volatility in the market price of our equity and fixed maturity securities, which could have a negative impact on our net income and book value per share.

Summary

In summary, the Company anticipates improved operating performance in 2009 as a result of (i) increased profitability from its multiple Fully Insured Health Products through varied distribution channels; (ii) continuing improvement in the profitability of its Medical Stop-Loss business; and (iii) reduced susceptibility to market cycles due to a better balance in our fully insured health business ..

ITEM 7A.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT

MARKET RISK

The Company manages interest rate risk by seeking to maintain an investment portfolio with a duration and average life that falls within the band of the duration and average life of the applicable liabilities. Options may be utilized to modify the duration and average life of such assets.

The following summarizes the estimated pre-tax change in fair value (based upon hypothetical parallel shifts in the U.S. Treasury yield curve) of the fixed income portfolio assuming immediate changes in interest rates at specified levels at December 31, 2008:

Change in Interest Rates	Estimated Fair Value	Estimated Change In Fair Value
	(In millions)	
200 basis point rise	\$ 527.4	\$ (81.1)
100 basis point rise	565.3	(43.2)
Base scenario	608.5	-
100 basis point decline	655.0	46.5
200 basis point decline	705.3	96.8

The Company monitors its investment portfolio on a continuous basis and believes that the liquidity of the Insurance Group will not be adversely affected by its current investments. This monitoring includes the maintenance of an asset-liability model that matches current insurance liability cash flows with current investment cash flows. This is accomplished by first creating an insurance model of the Company's in-force policies using current assumptions on mortality, lapses and expenses. Then, current investments are assigned to specific insurance blocks in the model using appropriate prepayment schedules and future reinvestment patterns.

The results of the model specify whether the investments and their related cash flows can support the related current insurance cash flows. Additionally, various scenarios are developed changing interest rates and other related assumptions. These scenarios help evaluate the market risk due to changing interest rates in relation to the business of the Insurance Group.

In the Company's analysis of the asset-liability model, a 100 to 200 basis point change in interest rates on the Insurance Group's liabilities would not be expected to have a material adverse effect on the Company. With respect to its liabilities, if interest rates were to increase, the risk to the Company is that policies would be surrendered and assets would need to be sold. This is not a material exposure to the Company since a large portion of the Insurance Group's interest sensitive policies are burial policies that are not subject to the typical surrender patterns of other interest sensitive policies, and many of the Insurance Group's universal life and annuity policies were acquired from liquidated companies which tend to exhibit lower surrender rates than such policies of continuing companies. Additionally, there are charges to help offset the benefits being surrendered. If interest rates were to decrease substantially, the risk to the Company is that some of its investment assets would be subject to early redemption. This is not a material exposure because the Company would have additional unrealized gains in its investment portfolio to help offset the future reduction of investment income. With respect to its investments, the Company employs (from time to time as warranted) investment strategies to mitigate interest rate and other market exposures.

ITEM 9A.

CONTROLS AND PROCEDURES

IHC's Chief Executive Officer and Chief Financial Officer supervised and participated in IHC's evaluation of its disclosure controls and procedures as of the end of the period covered by this report. Disclosure controls and procedures are controls and procedures designed to ensure that information required to be disclosed in IHC's periodic reports filed or submitted under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Based upon that evaluation, IHC's Chief Executive Officer and Chief Financial Officer concluded that IHC's disclosure controls and procedures are effective.

There was no change in IHC's internal control over financial reporting during the fourth quarter of 2008 that materially affected, or is reasonably likely to materially affect, IHC's internal control over financial reporting.

During the second quarter of 2008, the Company discovered irregularities relating to account reconciliations of certain other assets and other liabilities of a previously acquired subsidiary. The Audit Committee of the Company's Board of Directors and the Company's independent registered public accounting firm were promptly apprised of these irregularities. The Audit Committee performed a review of this matter, including engaging special, independent legal counsel.

The results of the Audit Committee's review which was conducted in the second and third quarters, concluded that the irregularities: (i) existed at the time the Company acquired the subsidiary in question; and (ii) related exclusively to activities at the subsidiary that occurred prior to its acquisition by the Company. The former shareholders of the subsidiary indemnified the Company in connection with all deficiencies in accounts and entered into an agreement further to indemnify the Company for: (i) any

future undisclosed liability identified as having existed at the time the Company acquired such subsidiary, (ii) all costs incurred in connection with the Audit Committee's review of the matter and (iii) all other costs incurred, or to be incurred, by the Company in connection with the matter. The results of the review were shared with the Company's independent registered public accounting firm.

In addition, the following remedial actions have been taken by management: (i) all deficiencies in certain accounts controlled by the subsidiary identified as resulting from the irregularities were corrected; (ii) existing financial controls relating to the affected accounts were augmented; and (iii) certain appropriate changes in personnel were implemented. Although the Company believes that such remedial steps have been sufficient to address any financial impact of the matter, there can be no assurance that additional liabilities will not be identified or costs incurred. Sufficient work has been done to enable management to conclude that: (i) no restatement of previously reported financial statements is required; and (ii) the irregularities do not affect management's previous conclusion that, as of December 31, 2008, the Company's internal control over financial reporting was effective.

The Report of Management on Internal Control Over Financial Reporting and the related Report of Independent Registered Public Accounting Firm are included in Item 8 of this Form 10-K.

Report of Management on Internal Control Over Financial Reporting

The Board of Directors and Stockholders

Independence Holding Company:

The management of Independence Holding Company ("IHC") is responsible for establishing and maintaining adequate internal control over financial reporting. IHC's internal control system is a process designed to provide reasonable assurance to the Company's management and board of directors regarding the reliability of financial reporting and fair presentation of published financial statements for external purposes in accordance with U.S. generally accepted accounting principles.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of IHC's internal control over financial reporting as of December 31, 2007. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in *Internal Control-Integrated Framework*. Based on our assessment we concluded that, as of December 31, 2008, IHC's internal control over financial reporting is effective.

KPMG LLP, the independent registered public accounting firm that audited the consolidated financial statements in this Annual Report, has issued an audit report on the effective operation of IHC's internal control over financial reporting as of December 31, 2008, which is included herein on page 60.

Report of Independent Registered Public Accounting Firm

**The Board of Directors and Stockholders
Independence Holding Company:**

We have audited Independence Holding Company and subsidiaries (the Company) internal control over financial reporting as of December 31, 2008, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Report of Management on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2008, based on criteria established in *Internal Control - Integrated Framework* issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Independence Holding Company and subsidiaries as of December 31, 2008 and 2007, and the related consolidated statements of operations, changes in stockholders' equity and cash flows for each of the years in the three-year period ended December 31, 2008, and our report dated March 16, 2009 expressed an unqualified opinion on those consolidated financial statements.

/s/ KPMG LLP

New York, New York

March 16, 2009

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Independence Holding Company:

We have audited the accompanying consolidated balance sheets of Independence Holding Company and subsidiaries (the "Company") as of December 31, 2008 and 2007, and the related consolidated statements of operations, stockholders' equity and cash flows for each of the years in the three-year period ended December 31, 2008. In connection with our audits of the consolidated financial statements, we also have audited financial statement schedules I to III. These consolidated financial statements and financial statement schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedules based on our audits.

We conducted our audits in accordance with the auditing standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Independence Holding Company and subsidiaries as of December 31, 2008 and 2007, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2008 in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedules, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the auditing standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Independence Holding Company's internal control over financial reporting as of December 31, 2008, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"), and our report dated March 16, 2009 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

(A)

Business and Organization

Independence Holding Company, a Delaware corporation (IHC), is a holding company principally engaged in the life and health insurance business through: (i) its wholly owned insurance companies, Standard Security Life Insurance Company of New York ("Standard Security Life") and Madison National Life Insurance Company, Inc. ("Madison National Life"); and (ii) its marketing and administrative companies, including Insurers Administrative Corporation (IAC), managing general underwriters ("MGUs") in which it owns a significant voting interest, Health Plan Administrators, Inc. (HPA), GroupLink, Inc. (GroupLink), IHC Health Solutions, Inc. (IHC Health Solutions), and Actuarial Management Corporation ("AMC"). These companies are sometimes collectively referred to as the "Insurance Group," and IHC and its subsidiaries (including the Insurance Group) are sometimes collectively referred to as the "Company." At December 31, 2008, the Company also owned a 49.7% equity interest in American Independence Corp. ("AMIC") which owns Independence American Insurance Company (Independence American), three MGUs and controlling interests in two agencies.

The Company sold its credit life and disability segment by entering into a 100% coinsurance agreement with an unaffiliated insurer effective December 31, 2007. Amounts in years prior to 2007 have been restated in the consolidated financial statements and Notes thereto in order to present the credit life and disability segment as discontinued operations.

Geneve Corporation, a diversified financial holding company, and its affiliated entities, held 53% of IHC's outstanding common stock at December 31, 2008.

(B)

Basis of Presentation

The consolidated financial statements have been prepared in conformity with U.S. generally accepted accounting principles and include the accounts of IHC and its consolidated subsidiaries. All significant intercompany transactions have been eliminated in consolidation. The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect: (i) the reported amounts of assets and liabilities; (ii) the disclosure of contingent assets and liabilities at the date of the financial statements; and (iii) the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(C)

Reclassifications

Certain amounts in prior years' consolidated financial statements and Notes thereto have been reclassified to conform to the 2008 presentation.

(D)

Cash Equivalents and Short-Term Investments

Cash equivalents are carried at cost which approximates fair value and include principally interest-bearing deposits at brokers, money market instruments and U.S. Treasury securities with original maturities of less than 91 days. Investments with original maturities of 91 days to one year are considered short-term investments and are carried at cost which approximates fair value.

(E)

Securities Purchased Under Agreements to Resell and Securities Sold Under Agreements to Repurchase

Securities purchased under agreements to resell ("resale agreements") and securities sold under agreements to repurchase ("repurchase agreements") are carried at the amounts at which the securities will be subsequently resold or repurchased as specified in the agreements.

(F)

Investment Securities

(i) Investments in fixed maturities, redeemable preferred securities, equity securities and derivatives (options and options on futures contracts) are accounted for as follows:

(a) Securities which are held for trading purposes are carried at estimated fair value ("fair value"). Changes in fair value are credited or charged, as appropriate, to net realized investment gains (losses) in the Consolidated Statements of Operations.

(b) Securities not held for trading purposes which may or may not be held to maturity ("available-for-sale securities") are carried at fair value. Unrealized gains and losses deemed temporary, net of deferred income taxes and adjustments to deferred policy acquisition costs, are credited or charged, as appropriate, directly to accumulated other comprehensive income or loss (a component of stockholders' equity). Premiums and discounts on debt securities purchased at other than par value are amortized and accreted, respectively, to interest income in the Consolidated Statements of Operations, using the constant yield method over the period to maturity. Net realized gains and losses on sales of available-for-sale securities, and unrealized losses considered to be other than temporary, are credited or charged to net realized investment gains (losses) in the Consolidated Statements of Operations.

(ii) Financial instruments sold, but not yet purchased, represent obligations to replace borrowed securities that have been sold. Such transactions occur in anticipation of declines in the fair value of the securities. The Company's risk is an increase in the fair value of the securities sold in excess of the consideration received, but that risk is mitigated as a result of relationships to certain securities owned. Unrealized gains or losses on open transactions are credited or charged, as appropriate, to net realized investments gains in the Consolidated Statements of Operations. While the transaction is open, the Company will also incur an expense for any accrued dividends or interest payable to the lender of the securities. When the transaction is closed, the Company realizes a gain or loss in an amount equal to the difference between the price at which the securities were sold and the cost of replacing the borrowed securities. There were no such transactions outstanding at December 31, 2008 and 2007.

(iii) Gains or losses on sales of securities are determined on the basis of specific identification.

(iv) The Company enters into derivative transactions, such as put and call option contracts and options on interest rate futures contracts, to minimize losses on portions of the Company's fixed income portfolio in a rapidly changing interest rate environment. Equity index options are entered into to offset price fluctuations in the equity markets. These derivative financial instruments are all readily marketable and are carried on the Consolidated Balance Sheets at their current fair value with changes in fair value (unrealized gains and losses), credited or charged, as appropriate, to net realized investment gains (losses) in the Consolidated Statements of Operations (hedge accounting is not applied to these derivatives). There were no such derivative transactions outstanding at December 31, 2008 and 2007.

(v) Fair value is determined using quoted market prices when available. In some cases, we use quoted market prices for similar instruments in active markets and/or model-derived valuations where inputs are observable in active markets. When there are limited or inactive trading markets, we use industry-standard pricing methodologies, including discounted cash flow models, whose inputs are based on management assumptions and available current market information. Further, we retain independent pricing vendors to assist in valuing certain instruments.

(vi) The Company reviews its investment securities regularly and determines whether other-than-temporary impairments have occurred. If a decline in fair value is judged by management to be other than temporary, a loss is recognized by a charge to net realized investment gains (losses) in the Consolidated Statements of Operations, establishing a new cost basis for the security. Beginning in the fourth quarter of 2008, for the purpose of other-than-temporary impairment evaluations, preferred stocks are treated in a

manner similar to debt securities. The factors considered by management in its regular review include, but are not limited to: the length of time and extent to which the fair value has been less than cost; the financial condition and near-term prospects of the issuer; adverse changes in ratings announced by one or more rating agencies; subordinated credit support; whether the issuer of a debt security has remained current on principal and interest payments; current expected cash flows; whether the decline in fair value appears to be issuer specific or, alternatively, a reflection of general market or industry conditions (including, in the case of fixed maturities, the effect of changes in market interest rates); and the Company's intent and ability to hold the security for a period of time sufficient to allow for a recovery in fair value. For structured securities, such as mortgage-backed securities, an impairment loss is recognized when there has been a decrease in expected cash flows and/or a decline in the security's fair value below cost.

(G)

Investment in American Independence Corp.

The Company's investment in AMIC is carried on the equity method, with the Company's share of equity income or loss credited or charged, as appropriate, to the Consolidated Statements of Operations with a corresponding change to the investment in AMIC. The investment in AMIC, including related goodwill, is reviewed to determine whether an other-than-temporary impairment has occurred. If a decline in fair value is judged by management to be other-than-temporary, a loss is recognized by a charge to the Consolidated Statements of Operations. No such loss was recognized in 2008, 2007 or 2006.

(H)

Other Investments

Partnership interests relate to limited investment partnerships that have relatively "market neutral" arbitrage strategies, or strategies that are relatively insensitive to interest rates and insurance related limited operating partnerships. All securities held by these partnerships are carried at fair value. The Company's partnership interests are carried on the equity method, which approximates the Company's equity in the underlying net assets of the partnerships. Equity income or loss is credited or charged, as appropriate, to the Consolidated Statements of Operations.

Policy loans are stated at their aggregate unpaid balances.

(I)

Deferred Acquisition Costs ("DAC")

Costs that vary with and are primarily related to acquiring insurance policies and investment type contracts are deferred and recorded as deferred policy acquisition costs ("DAC"). These costs are principally broker fees, agent commissions, and the purchase prices of acquired blocks of business. DAC is amortized to expense and reported separately in the Consolidated Statements of Operations. All DAC within a particular product type is amortized on the same basis using the following methods:

Life

For traditional life insurance and other premium paying policies accounted for under SFAS No. 60, "Accounting and Reporting by Insurance Enterprises" ("SFAS 60"), amortization of DAC is charged to expense over the related premium revenue recognition period. Assumptions used in the amortization of DAC are determined based upon the conditions as of the date of policy issue or assumption and are not generally revised during the life of the policy.

For long duration type contracts accounted for under SFAS No. 97, "Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments" ("SFAS 97"), such as annuities and universal life business, amortization of DAC is charged to expense over the life of the book of such contracts based on the present value of the estimated gross profits ("EGPs") expected to be realized over the life of the book of contracts. EGPs

consist of margins based on expected mortality rates, persistency rates, interest rate spreads, and other revenues and expenses. The Company regularly evaluates its EGPs to determine if actual experience or other evidence suggests that earlier estimates should be revised. If the Company determines that the current assumptions underlying the EGPs are no longer the best estimate for the future due to changes in actual versus expected mortality rates, persistency rates, interest rate spreads, or other revenues and expenses, the future EGPs are updated using the new assumptions and prospective unlocking occurs. These updated EGPs are utilized for future amortization calculations. The total amortization recorded to date is adjusted through a current charge or credit to the Consolidated Statements of Operations.

In accordance with Statement of Position 05-1, "Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection with Modifications or Exchanges of Insurance Contracts" ("SOP 05-1"), internal replacements of insurance and investment contracts other than those specifically described in SFAS 97 will be accounted for as an extinguishment of the replaced contract resulting in a release of the unamortized deferred acquisition costs, unearned revenue, and deferred sales inducements associated with the replaced contract.

Health

For credit health insurance policies accounted for under SFAS No. 60, amortization of DAC is charged to expense in proportion to premium revenue recognized.

Deferred acquisition costs have been increased by \$11,340,000, \$203,000 and \$7,000 in 2008, 2007 and 2006, respectively, representing the portion of unrealized losses on investment securities available-for-sale that have been allocated to deferred acquisition costs on interest sensitive products rather than to stockholders' equity as a component of other comprehensive income or loss.

(J)

Property and Equipment

Property and equipment of \$5,991,000 and \$6,022,000 are included in other assets at December 31, 2008 and 2007, respectively, net of accumulated depreciation and amortization of \$9,325,000 and \$7,130,000, respectively. Improvements are capitalized while repair and maintenance costs are charged to operations as incurred. Depreciation of property and equipment has been provided on the straight-line method over the estimated useful lives of the respective assets. Amortization of leasehold improvements has been provided on the straight-line method over the shorter of the lease term or the estimated useful life of the asset.

(K)

Insurance Reserves

The Company maintains loss reserves to cover its estimated liability for unpaid losses and loss adjustment expenses, where material, including legal, other fees, and costs not associated with specific claims but related to the claims payment function), for reported and unreported claims incurred as of the end of each accounting period. These loss reserves are based on actuarial assumptions and are maintained at levels that are in accordance with U.S. generally accepted accounting principles. Many factors could affect these reserves, including economic and social conditions, frequency and severity of claims, medical trend resulting from the influences of underlying cost inflation, changes in utilization and demand for medical services, and changes in doctrines of legal liability and damage awards in litigation. Therefore, the Company's reserves are necessarily based on estimates, assumptions and analysis of historical experience. The Company's results depend upon the variation between actual claims experience and the assumptions used in determining reserves and pricing products. Reserve assumptions and estimates require significant judgment and, therefore, are inherently uncertain. The Company cannot determine with precision the ultimate amounts that will be paid for actual claims or the timing of those payments. The Company's estimate of loss represents management's best estimate of the Company's liability at the balance sheet date.

Loss reserves differ for short-duration and long-duration insurance policies, including annuities. Reserves are based on approved actuarial methods, but necessarily include assumptions about expenses, mortality, morbidity, lapse rates and future yield on related investments.

All of the Company's short-duration contracts are generated from its accident and health business, and are accounted for based on actuarial estimates of the amount of loss inherent in that period's claims, including losses incurred for which claims have not been reported. Short-duration contract loss estimates rely on actuarial observations of ultimate loss experience for similar historical events.

Health

Medical Stop-Loss

Liabilities for insurance reserves on certain short-term medical coverages, such as medical stop-loss, are computed using completion factors and expected Net Loss Ratios derived from actual historical premium and claim data. Reserves for medical stop-loss insurance are more volatile in nature than those for fully insured medical insurance. This is primarily due to the excess nature of medical stop-loss, with very high deductibles applying to specific claims on any individual claimant and in the aggregate for a given group. The level of these deductibles makes it more difficult to predict the amount and payment pattern of such claims. Furthermore, these excess claims are highly sensitive to changes in factors such as medical trend, provider contracts and medical treatment protocols, adding to the difficulty in predicting claim values and estimating reserves. Also, because medical stop-loss is in excess of an underlying benefit plan, there is an additional layer of claim reporting and processing that can affect claim payment patterns. Finally, changes in the distribution of business by effective month can affect reserve estimates due to the timing of claim occurrences and the time required to accumulate claims against the stop-loss deductible.

The two primary or key assumptions underlying the calculation of loss reserves for Medical Stop-Loss business are (i) projected Net Loss Ratio, and (ii) claim development patterns. The projected Net Loss Ratio is set at expected levels consistent with the underlying assumptions (Projected Net Loss Ratio). Claim development patterns are set quarterly as reserve estimates are developed and are based on recent claim development history (Claim Development Patterns). The Company uses the Projected Net Loss Ratio to establish reserves until developing losses provide a better indication of ultimate results and it is feasible to set reserves based on Claim Development Patterns. The Company has concluded that a reasonably likely change in the Projected Net Loss Ratio assumption could have a material effect on the Company's financial condition, results of operations, or liquidity (Material Effect) but a reasonably likely change in the Claim Development Pattern would not have a Material Effect.

Projected Net Loss Ratio

Generally, during the first twelve months of an underwriting year, reserves for Medical Stop-Loss are first set at the Projected Net Loss Ratio, which is set using assumptions developed using completed prior experience trended forward. The Projected Net Loss Ratio is the Company's best estimate of future performance until such time as developing losses provide a better indication of ultimate results.

Major factors that affect the Projected Net Loss Ratio assumption in reserving for Medical Stop-Loss relate to: (i) frequency and severity of claims; (ii) changes in medical trend resulting from the influences of underlying cost inflation, changes in utilization and demand for medical services, the impact of new medical technology and changes in medical treatment protocols; and (iii) the adherence by the MGUs that produce and administer this business to the Company's underwriting guidelines.

Claim Development Patterns

Subsequent to the first twelve months of an underwriting year, the Company's developing losses provide a better indication of ultimate losses. At this point, claims have developed to a level where Claim Development Patterns can be applied to generate reasonably reliable estimates of ultimate claim levels. Development factors based on historical patterns are applied to paid and reported claims to estimate fully developed claims. Claim Development Patterns are reviewed quarterly as reserve estimates are developed and are based on recent claim development history. The Company must determine whether changes in development represent true indications of emerging experience or are simply due to random claim fluctuations.

The Company also establishes its best estimates of claim development factors to be applied to more developed treaty year experience. While these factors are based on historical Claim Development Patterns, actual claim development may vary from these estimates.

Predicting ultimate claims and estimating reserves in Medical Stop-Loss is more complex than first dollar medical and disability business due to the excess of loss nature of these products with very high deductibles applying to specific claims on any individual claimant and in the aggregate for a given group. The level of these deductibles makes it more difficult to predict the amount and payment pattern of such claims. Fluctuations in results for specific coverage are primarily due to the severity and frequency of individual claims, whereas fluctuations in aggregate coverage are largely attributable to frequency of underlying claims rather than severity.

Due to the short-term nature of Medical Stop-Loss, redundancies or deficiencies will typically emerge during the course of the following year rather than over a number of years. For Employer Stop-Loss, as noted above, the Company typically maintains its reserves based on underlying assumptions until it determines that an adjustment is appropriate based on emerging experience from all of its MGUs for prior underwriting years. Reserves for HMO Reinsurance and Provider Excess are adjusted on a policy by policy basis. Because of the small number of HMO Reinsurance and Provider Excess policies it writes, the Company is able to evaluate each policy individually for potential liability by reviewing open claims with each HMO or provider group and applying completion factors using historical data.

Fully Insured Health

Reserves for Fully Insured Health business are established to provide for the liability for incurred but not paid claims. Reserves are calculated using standard actuarial methods and practices. The primary assumption in the determination of Fully Insured Health reserves is that historical Claim Development Patterns are representative of future Claim Development Patterns. Factors which may affect this assumption include changes in claim payment processing times and procedures, changes in time delay in submission of claims, and the incidence of unusually large claims. Liabilities

for fully insured medical reserves and disability coverages are computed using completion factors and expected Net Loss Ratios derived from actual historical premium and claim data. The reserving analysis includes a review of claim processing statistical measures and large claim early notifications; the potential impacts of any changes in these factors are not material. The delay in submission of claims tends to be stable over time and not subject to significant volatility.

While these calculations are based on standard methodologies, they are estimates based on historical patterns. To the extent that actual claim payment patterns differ from historical patterns, such estimated reserves may be redundant or inadequate. The effects of such deviations are evaluated by considering claim backlog statistics and reviewing the reasonableness of projected claim ratios. Other factors which may affect the accuracy of reserve estimates include the proportion of large claims which may take longer to adjudicate, changes in billing patterns by providers and changes in claim management practices such as hospital bill audits.

Long Term Disability

The Company's long term disability reserves are developed using actuarial principles and assumptions that consider, among other things, future offsets and recoveries, elimination periods, interest rates, probability of rehabilitation or mortality, incidence and termination rates based on the Company's experience. The loss reserve is made up of case reserves, incurred but not reported reserves, reopen reserves, and loss adjustment expense. Incurred but not reported and reopen reserves are calculated by a hind-sight study, which takes historical experience and develops the reserve as a percentage of premiums from prior years.

The two primary assumptions on which long term disability reserves are based are: (i) morbidity levels; and (ii) recovery rates. If morbidity levels increase, for example due to an epidemic or a recessionary environment, the Company would increase reserves because there would be more new claims than expected. In regard to the assumed recovery rate, if disabled lives recover more quickly than anticipated then the existing claims reserves would be reduced; if less quickly, the existing claims reserves would be increased.

Life

For traditional life insurance products, the Company computes insurance reserves primarily using the net premium method based on anticipated investment yield, mortality, and withdrawals. These methods are widely used in the life insurance industry to estimate the liabilities for insurance reserves. Inherent in these calculations are management and actuarial judgments and estimates that could significantly impact the ending reserve liabilities and, consequently, operating results. Actual results may differ, and these estimates are subject to interpretation and change.

Policyholder funds represent interest-bearing liabilities arising from the sale of products, such as universal life, interest-sensitive life and annuities. Policyholder funds are primarily comprised of deposits received and interest credited to the benefit of the policyholder less surrenders and withdrawals, mortality charges and administrative expenses.

Interest Credited

Interest credited to policyholder funds represents interest accrued or paid on interest-sensitive life policies and investment policies. Amounts charged to operations (including interest credited and benefit claims incurred in excess of related policyholder account balances) are reported as insurance benefits, claims and reserves-life and annuity. Credit rates for certain annuities and interest-sensitive life policies are adjusted periodically by the Company to reflect current market conditions, subject to contractually guaranteed minimum rates.

Management believes that the Company's methods of estimating the liabilities for insurance reserves provided appropriate levels of reserves at December 31, 2008 and 2007. Changes in the Company's reserve estimates are recorded through a charge or credit to its earnings.

(L)

Funds on Deposit

Funds received (net of mortality and expense charges) for certain long-duration contracts (principally deferred annuities and universal life policies) are credited directly to a policyholder liability account, funds on deposit. Withdrawals are recorded directly as a reduction of respective policyholders' funds on deposit. Amounts on deposit were credited at annual rates ranging from 2.5% to 8.0% in 2008, and 2.5% to 8.1% in 2007 and 2006. The average credited rate was 4.1% in 2008, 4.2% in 2007, and 4.6% in 2006.

(M)

Insurance Premium Revenue Recognition and Policy Charges

Health

Premiums from short-duration medical insurance contracts are intended to cover expected claim costs resulting from insured events that occur during a fixed period of short duration. The Company has the ability to not renew the contract or to revise the premium rates at the end of each annual contract period to cover future insured events.

Insurance premiums from annual health contracts are collected monthly and are recognized as revenue evenly as insurance protection is provided.

Premiums related to long-term and short-term disability contracts are recognized on a pro rata basis over the applicable contract term.

Life

Traditional life insurance products consist principally of products with fixed and guaranteed premiums and benefits, primarily term and whole life insurance products. Revenue from these products are recognized as premium when due.

Annuities and interest-sensitive life contracts, such as universal life and interest sensitive whole life, are contracts whose terms are not fixed and guaranteed. Premiums from these policies are reported as funds on deposit. Policy charges consist of fees assessed against the policyholder for cost of insurance (mortality risk), policy administration and early surrender. These revenues are recognized when assessed against the policyholder account balance.

Policies that do not subject the Company to significant risk arising from mortality or morbidity are considered investment contracts. Deposits received for such contracts are reported as other policyholder funds. Policy charges for investment contracts consist of fees assessed against the policyholder account for maintenance, administration and surrender of the policy prior to contractually specified dates, and are recognized when assessed against the policyholder account balance.

(N)

Participating Policies

Participating policies represent 11.8%, 9.4% and 9.0% of the individual life insurance in-force and 4.7%, 3.1% and 3.5% of the net life and annuity premiums earned, as of and for the years ended December 31, 2008, 2007 and 2006, respectively, and provide for the payment of dividends. Dividends to policyholders are determined annually and are payable only upon declaration by the Board of Directors of the insurance companies. At December 31, 2008 and 2007, the insurance companies' stockholders' equity was not restricted because of participating policyholders' surplus.

(O)

Deferred Income Taxes

The provision for deferred income taxes is based on the asset and liability method of accounting for income taxes. Under this method, deferred income taxes are recognized by applying enacted statutory tax rates to temporary differences between amounts reported in the Consolidated Financial Statements and the tax bases of existing assets and liabilities. A valuation allowance is recognized for the portion of deferred tax assets that, in management's judgment, is not likely to be realized. The effect on deferred income taxes of a change in tax rates or laws is recognized in income tax expense in the period that includes the enactment date.

In June 2006, the Financial Accounting Standards Board ("FASB") issued Interpretation No. 48, "Accounting for Uncertainty in Income Taxes - An Interpretation of FASB Statement No. 109" ("Interpretation 48"), which prescribes a recognition threshold and measurement attribute for the financial

statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The recognition threshold is based on a determination of whether it is more likely than not that a tax position will be sustained upon examination based on the technical merits of the position. Only tax positions that meet the more-likely-than-not recognition threshold at the effective date may be recognized or continue to be recognized upon adoption of FIN 48. Interpretation 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. Interpretation 48 was effective for fiscal years beginning after December 15, 2006. The cumulative effect of applying the provisions of Interpretation 48 was reported as an adjustment to retained earnings as of the beginning of the year of adoption. The amount of the cumulative-effect adjustment was the difference between the net amount of assets and liabilities recognized in the balance sheet prior to the application of Interpretation 48 and the net amount of assets and liabilities recognized as a result of applying Interpretation 48. The adoption of Interpretation 48 on January 1, 2007 did not have a material impact on the Company's consolidated financial statements and the Company believes there are no significant tax positions that would require disclosure under Interpretation 48. Interest and penalties are classified as other interest expense and are included in selling, general and administrative expenses in the Consolidated Statements of Operations. The Internal Revenue Service is currently auditing our 2003 and 2004 consolidated income tax returns. Management believes that it has made adequate provision for all income tax uncertainties, such that the outcome of any unresolved issues or claims will not result in a material change to our financial position or results of operations.

(P)

Income Per Common Share

Included in the diluted earnings per share calculation for 2007 and 2006, respectively, are 115,000 and 295,000 incremental common shares from the assumed exercise of dilutive stock options and from the assumed vesting of dilutive restricted stock, computed using the treasury stock method. For the year ended December 31, 2008, such shares were deemed anti-dilutive.

(Q)

Reinsurance

Amounts paid for or recoverable under reinsurance contracts are included in total assets or total liabilities as due from reinsurers or due to reinsurers. The cost of reinsurance related to long-duration contracts is accounted for over the life of the underlying reinsured policies using assumptions consistent with those used to account for the underlying policies.

(R)

Share-Based Compensation

Share-based compensation transactions are accounted for in accordance with the provisions of SFAS No. 123(R), "Share-Based Payment" ("SFAS 123R"). Compensation cost is measured based on grant-date fair value and is recognized in the Consolidated Statements of Operations over the requisite service period (which is usually the vesting period). For share-based awards with only service conditions, the Company recognizes the compensation cost on a straight-line basis over the requisite service period for the entire award.

(S)

Goodwill and Other Intangible Assets

Goodwill related to the Company's equity method investment in AMIC is considered in the evaluation of whether there has been an other-than-temporary decline in value of the overall investment in AMIC. All other goodwill carrying amounts are evaluated for impairment at the reporting unit level, at least annually. If the fair value of a reporting unit is less than its carrying amount, further evaluation is required to determine if a write-down of goodwill is required. Other intangible assets are amortized to expense over their estimated useful lives and are subject to impairment testing. Any impairment write-down of goodwill and other intangible assets would be charged to expense. No impairment charge was required in 2008, 2007 or 2006.

At December 31, 2008, the Company's market capitalization was less than its book value indicating a potential impairment of goodwill. As a result, the Company assessed the factors contributing to the performance of IHC stock in 2008. The Company does not believe that an impairment of goodwill exists at this time.

(T)

Derivative Instruments

The Company accounts for derivative instruments in accordance with SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities," as amended ("SFAS 133"). Under SFAS 133, all derivatives, whether designated in hedging relationships or not, are required to be recorded in the balance sheet as assets or liabilities at fair value. Hedge accounting is permitted only if certain criteria are met, including a requirement that a highly effective relationship exist between the derivative instrument and the hedged item, both at inception of the hedge and on an ongoing basis. Results of effective hedges are recognized in other comprehensive income for cash flow hedges and in current earnings for fair value hedges. The ineffective portions of hedge results are recognized in current earnings.

At December 31, 2008 and 2007, the Company had an interest rate swap agreement that was designated and effective as a cash flow hedge in accordance with SFAS 133. The objective of the swap is to reduce the variability in cash flows associated with the re-pricing of interest rates on certain variable rate debt. Changes in fair value of the swap are recorded in accumulated other comprehensive income or loss and are reclassified to net income as earnings are affected by the variability in the interest payments on the hedged debt.

(U)

Adoption of Staff Accounting Bulletin No. 108

In September 2006, the staff of the Securities and Exchange Commission (the "SEC") issued Staff Accounting Bulletin No. 108, "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements" (SAB 108). SAB 108 requires quantification of prior year immaterial uncorrected misstatements under both the "rollover approach" and the "iron curtain approach." The "rollover approach" quantifies a misstatement based on the amount of the error originating in the current year income statement, but ignores the effects of correcting the portion of the current year balance sheet misstatement that originated in prior years. The "iron curtain approach" quantifies a misstatement based on the effects of correcting the misstatement existing in the balance sheet at the end of the current year, irrespective of the misstatement's year(s) of origination. Prior to SAB 108, the Company utilized the rollover approach when quantifying misstatements. The provisions of SAB 108 were applied to financial statements for fiscal years ending after November 15, 2006.

The Company previously reported actual premiums and related amounts from its Medical Stop-Loss and Fully Insured Health lines of business using a consistent one and two month lag, respectively, rather than through the end of the reporting period. The resulting misstatement primarily arose over the period from 2002 to 2005 when the Company experienced considerable growth in these lines of business. This misstatement was not material to the consolidated financial statements in any of the respective years affected.

Under the rollover approach described above, management did not consider this item to be material to the consolidated financial statements. However, under the dual approach required by SAB 108, this item was adjusted effective as of January 1, 2006. The Company recognized an increase in due and unpaid premiums of \$12,987,000; an increase in insurance reserves health of \$9,069,000; an increase in commissions payable of \$3,060,000; an increase in income taxes payable of \$300,000; and an increase in retained earnings of \$558,000. These amounts were recorded as adjustments of the January 1, 2006 opening balances for these accounts and the impact, net of tax, was reflected as a cumulative effect adjustment to retained earnings.

(V)

Recent Accounting Pronouncements

Recently Issued Accounting Standards

In November 2008, the FASB issued EITF Issue No. 08-7, "*Accounting for Defensive Intangible Assets*," ("EITF No. 08-7"). EITF No. 08-7 applies to defensive intangible assets, which are acquired intangible assets that the acquirer does not intend to actively use but intends to hold to prevent its competitors from obtaining access to them. As these assets are separately identifiable, EITF No. 08-7 requires an acquiring entity to account for defensive intangible assets as a separate unit of accounting. Defensive intangible assets should not be included as part of the cost of the acquirer's existing intangible assets because the defensive intangible assets are separately identifiable. Defensive intangible assets must be recognized at fair value in accordance with SFAS 141(R) and SFAS 157. EITF No. 08-7 is effective for fiscal years beginning after December 15, 2008. The adoption of EITF No. 08-7 is not expected to have a material effect on the Company's consolidated financial statements.

In November 2008, the FASB issued EITF Issue No. 08-6, "*Equity Method Investment Accounting*" (EITF No. 08-6). EITF No. 08-6 requires that the cost basis of an equity method investment be determined by using a cost-accumulation model, which would continue the practice of including transaction costs in the cost of the investment and would exclude the value of contingent consideration. Equity method investments are subject to other-than-temporary impairment analysis, however, an equity investor shall not separately test an investee's underlying assets for impairment. EITF No. 08-6 also requires an equity investor to account for a share issuance by an investee as if the investor had sold a proportionate share of its investment. Any gain or loss to the investor resulting from an investee's share issuance shall be recognized in earnings. EITF No. 08-6 is effective for fiscal years beginning after December 15, 2008. The adoption of EITF No. 08-6 is not expected to have a material effect on the Company's consolidated financial statements.

In June 2008, the FASB issued FSP EITF No. 03-6-1, "*Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities*" (FSP EITF No. 03-6-1). FSP EITF No. 03-6-1 addresses whether instruments granted in share-based payment transactions are participating securities prior to vesting and therefore need to be included in the earnings allocation in calculating earnings per share under the two-class method described in SFAS No. 128, "*Earnings per Share*". FSP EITF No. 03-6-1 requires companies to treat unvested share-based payment awards that have non-forfeitable rights to dividend or dividend equivalents as a separate class of securities in calculating earnings per share. FSP EITF No. 03-6-1 is effective for fiscal years beginning after December 15, 2008; earlier application is not permitted. The adoption of FSP EITF No. 03-6-1 is not expected to have a material effect on the Company's consolidated financial statements.

In May 2008, the FASB issued SFAS No. 163, "*Accounting for Financial Guarantee Insurance Contracts - An interpretation of FASB Statement No. 60*" (SFAS 163). SFAS 163 requires that an insurance enterprise recognize a claim liability prior to an event of default when there is evidence that credit deterioration has occurred in an insured financial obligation. It also clarifies how Statement 60 applies to financial guarantee insurance contracts, including the recognition and measurement to be used to account for premium revenue and claim liabilities, and requires expanded disclosures about financial guarantee insurance contracts. It is effective for financial statements issued for fiscal years beginning after December 15, 2008, except for some disclosures about the insurance enterprise's risk-management activities. SFAS 163 requires that disclosures about the risk-management activities of the insurance enterprise be effective for the first period beginning after issuance. Except for those disclosures, earlier application is not permitted. The adoption of SFAS 163 is not expected to have a material effect on the Company's consolidated financial statements.

In April 2008, the FASB issued FSP FAS 142-3, *Determination of the Useful Life of Intangible Assets*. (FSP FAS 142-3). FSP FAS 142-3 amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under SFAS No. 142, *Goodwill and Other Intangible Assets*. FSP FAS 142-3 applies prospectively to intangible assets that are acquired, individually or with a group of other assets, after the effective date in either a business combination or asset acquisition. FSP FAS 142-3 is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years. Early adoption is prohibited. The adoption of FSP FAS 142-3 is not expected to have a material effect on the Company's consolidated financial statements.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities - an amendment of FASB Statement No. 133* (SFAS 161). SFAS 161 expands the current disclosure requirements for derivative instruments and hedging activities. Entities are required to provide enhanced disclosures about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under FASB Statement 133 and its related interpretations, and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. In addition, SFAS 161 requires disclosure of fair values of derivative instruments and their gains and losses in a tabular format as well as cross-referencing within the footnotes to allow users of financial statements to locate important information about derivative instruments. SFAS 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. SFAS 161 encourages, but does not require, comparative disclosures for earlier periods at initial adoption. The adoption of SFAS 161 is not expected to have a material effect on the Company's consolidated financial statements.

In February 2008, the FASB issued FSP on SFAS No. 140-3, *Accounting for Transfers of Financial Assets and Repurchase Financing Transactions* (FSP SFAS 140-3). The objective of FSP SFAS 140-3 is to provide guidance on accounting for a transfer of a financial asset and a repurchase financing. FSP SFAS 140-3 presumes that an initial transfer of a financial asset and a repurchase financing are considered part of the same arrangement (linked transaction) under SFAS No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities* ("SFAS 140"). However, if certain criteria are met, the initial transfer and repurchase financing shall not be evaluated as a linked transaction and shall be evaluated separately under SFAS No. 140. FSP SFAS 140-3 is effective for financial statements issued for fiscal years beginning after November 15, 2008, and interim periods within these fiscal years. Earlier application is not permitted. The adoption of FSP SFAS 140-3 is not expected to have a material effect on the Company's consolidated financial statements.

In November 2007, the FASB issued SFAS No. 141 (revised 2007), *Business Combinations* (SFAS 141(R)) and SFAS No. 160, *Non-controlling Interests in Consolidated Financial Statements*, an amendment of ARB No. 51 (SFAS 160). These standards aim to improve, simplify, and converge internationally the accounting for business combinations and the reporting of non-controlling interests in consolidated financial statements. SFAS 141(R) will change how business acquisitions are accounted for and will impact financial statements both on the acquisition date and in subsequent periods. SFAS 160 will change the accounting and reporting for minority interests, which will be re-characterized as non-controlling interests and classified as a component of equity. SFAS 141(R) and SFAS 160 are effective for both public and private companies for fiscal years beginning on or after December 15, 2008. SFAS 141(R) will be applied

prospectively. SFAS 160 requires retroactive adoption of the presentation and disclosure requirements for existing minority interests. All other requirements of SFAS 160 will be applied prospectively. Early adoption is prohibited for both standards. The adoption of SFAS 141(R) and SFAS 160 is not expected to have a material effect on the Company's consolidated financial statements.

Recently Adopted Accounting Standards

In January 2009, the FASB issued FSP No. EITF 99-20-1, "*Amendments to the Impairment Guidance of EITF Issue No. 99-20*" ("FSP EITF 99-20-1"). FSP EITF 99-20-1 aligns the impairment guidance in EITF Issue No. 99-20, "*Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests That Continue to be Held by a Transferor in Securitized Financial Assets*," with that in SFAS No. 115, "*Accounting for Certain Investments in Debt and Equity Securities*," and other related guidance. The adoption of FSP EITF 99-20-1 did not have a material effect on the Company's consolidated financial statements.

In December 2008, the FASB issued FSP FAS 140-4 and FIN 46(R)-8, "*Disclosures by Public Entities (Enterprises) about Transfers of Financial Assets and Interests in Variable Interest Entities*" (FSP FAS 140-4 and FIN 46(R)-8). This FSP amends SFAS No. 140, "*Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*" , and requires public entities to provide additional disclosures about transfers of financial assets. It also amends FASB Interpretation No. 46 (revised December 2003), "*Consolidation of Variable Interest Entities*" , requiring public enterprises, including sponsors that have a variable interest in a variable interest entity, to provide additional disclosures about their involvement with variable interest entities. FSP FAS 140-4 and FIN 46(R)-8 shall be effective for annual or interim periods ending after December 15, 2008. The adoption of FSP FAS 140-4 and FIN 46(R)-8 did not have a material effect on the Company's consolidated financial statements.

In September 2008, the FASB issued FSP FAS 133-1 and FIN 45-4, "*Disclosures about Credit Derivatives and Certain Guarantees: An Amendment of FASB Statement No. 133 and Interpretation No. 45; and Clarification of the Effective Date of FASB Statement No. 161*" ("FSP FAS 133-1 and FIN 45-4"). FSP FAS 133-1 and FIN 45-4 expands the disclosure requirements of SFAS 133 for sellers of credit derivatives and hybrid instruments that have embedded credit derivatives to include (a) the nature of the credit derivative, including the approximate term, the reasons for entering into the credit derivative and the events or circumstances that would require the seller to perform under the credit derivative and the current status of the payment/performance risk of the credit derivative, (b) the maximum potential amount of future payments (undiscounted) the seller could be required to make under the credit derivative, (c) the fair value of the credit derivative, and (d) the nature of (1) any recourse provisions that would enable the seller to recover from third parties any of the amounts paid under the credit derivative, and (2) any assets held either as collateral or by third parties that, upon the occurrence of any specified triggering event or condition, the seller can obtain and liquidate to recover all or a portion of the amounts paid under the credit derivative. With respect to hybrid instruments that have an embedded credit derivative, the seller shall disclose the required information for the entire hybrid instrument, not just the embedded derivative. Disclosure requirements of Interpretation 45 were expanded to include the current status of the payment/performance risk of the guarantee. FSP FAS 133-1 and FIN 45-4 shall be effective for annual or interim periods ending after November 15, 2008. FSP FAS 133-1 and FIN 45-4 encourages, but does not require, comparative disclosures for earlier periods at initial adoption. The adoption of FSP FAS 133-1 and FIN 45-4 did not have a material effect on the Company's consolidated financial statements.

In May 2008, the FASB issued SFAS No. 162, "*The Hierarchy of Generally Accepted Accounting Principles*" (SFAS 162). SFAS 162 identifies the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles in the United States. It is effective 60 days following the Securities and Exchange Commission's approval of the Public Company Accounting Oversight Board amendments to AU Section 411, "*The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*". The adoption of SFAS 162 did not have a material effect on the Company's consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, "*The Fair Value Option for Financial Assets and Financial Liabilities - Including an Amendment of FASB Statement No. 115*" ("SFAS 159"). SFAS 159 would create a fair value option of accounting for qualifying financial assets and liabilities under which an irrevocable election could be made at inception to measure such assets and liabilities initially and subsequently at fair value, with all changes in fair value reported in earnings. SFAS 159 is effective as of the beginning of the first fiscal year beginning after November 15, 2007. The adoption of SFAS 159 did not impact the Company's consolidated financial statements, as no items were initially elected for fair value measurement.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS 157), which defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. This Statement applies under other accounting pronouncements that require or permit fair value measurements. FSP FAS 157-2, "*Effective Date of FASB Statement No. 157*", amends SFAS 157 to defer its effective date to fiscal years beginning after November 15, 2008, and for interim periods within those fiscal years. The delayed effective date applies to all non-financial assets and non-financial liabilities except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). FSP FAS 157-3, "*Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active*" clarifies the application of SFAS 157 in a market that is not active and provides an example to illustrate key considerations in determining the fair value of a financial asset when the market for that financial asset is not active. Revisions resulting from a change in the valuation technique or its application shall be accounted for as a change in accounting estimate. The adoption of SFAS 157 for financial assets and liabilities did not have a material impact on the Company's consolidated financial statements.

Note 2.

American Independence Corp.

AMIC is an insurance holding company engaged in the insurance and reinsurance business as a result of its acquisition of First Standard Holdings Corp. ("FSHC") from the Company in November 2002. AMIC does business with the Insurance Group, including reinsurance treaties under which, in 2008, Standard Security Life and Madison National Life ceded to Independence American an average of 23% of their medical stop-loss business, 10% of certain of their fully insured health business and 20% of their New York Statutory Disability Business. IHC owned 49.7% and 48% of AMIC's outstanding common stock at December 31, 2008 and 2007, respectively, which was purchased in various transactions from 2002 through 2008. In January 2008, the Company purchased 165,656 shares of AMIC's common stock at \$8.46 per share and recorded negative goodwill of \$248,000. IHC accounts for its investment in AMIC under the equity method. At December 31, 2008 and 2007, IHC's investment in AMIC had a total carrying value of \$45,439,000 and \$44,945,000, respectively, including goodwill of \$4,222,000 and \$4,470,000, respectively. This goodwill represents the excess of IHC's cost over the underlying equity in AMIC's net assets at the respective purchase dates.

Edgar Filing: INDEPENDENCE HOLDING CO - Form 10-K

For the years ended December 31, 2008, 2007 and 2006, IHC recorded \$480,000, \$546,000, and \$699,000, respectively, of equity income from its investment in AMIC representing IHC's proportionate share of income based on its ownership interests during the respective years. AMIC paid no dividends on its common stock in 2008, 2007 and 2006.

The fair value of the AMIC shares owned by IHC was approximately \$11,541,000 at December 31, 2008, based on the closing market price of AMIC's common stock.

The condensed balance sheets of AMIC at December 31, 2008 and 2007 are as follows:

	2008		2007
	(In thousands)		
Investments, at fair value	\$ 52,847	\$	60,148
Cash and restricted cash	11,381		21,485

IHC and its subsidiaries earned \$805,000, \$776,000 and \$622,000 for the years ended December 31, 2008, 2007 and 2006, respectively, from service agreements with AMIC and its subsidiaries. These are reimbursements to IHC and its subsidiaries, at agreed upon rates including an overhead factor, for management services provided by IHC and its subsidiaries, including accounting, legal, marketing, compliance, underwriting and claims.

The Company ceded premiums to AMIC of \$57,031,000, \$68,143,000 and \$56,854,000 for the years ended December 31, 2008, 2007 and 2006, respectively. Benefits to policyholders on business ceded to AMIC were \$39,670,000 in 2008, \$50,128,000 in 2007, and \$39,611,000 in 2006. Additionally, AMIC subsidiaries market, underwrite and provide administrative services (including premium collection, medical management and claims adjudication) for a substantial portion of the Medical Stop-Loss business written by the insurance subsidiaries of IHC. IHC recorded gross premiums of \$76,835,000, \$85,749,000 and \$90,518,000 for the years ended December 31, 2008, 2007 and 2006, respectively, and net commission expense of \$3,632,000, \$4,174,000 and \$4,962,000 for the years ended December 31, 2008, 2007 and 2006, respectively, for these services. The Company also contracts for several types of insurance coverage (e.g. directors and officers and professional liability converge) jointly with AMIC. The cost of this coverage is allocated between the Company and AMIC according to the type of risk, and IHC's portion is recorded in Selling, General and Administrative Expenses.

Included in the Company's Consolidated Balance Sheets at December 31, 2008 and 2007, respectively, are the following balances arising from transactions in the normal course of business with AMIC and its subsidiaries: Due from reinsurers - \$18,394,000 and \$19,263,000; Other assets - \$3,009,000 and \$6,592,000; and Other liabilities - \$404,000 and \$242,000.

Note 3.

Securities Purchased Under Agreements to Resell

Securities purchased under agreements to resell are utilized to invest excess funds on a short-term basis. At December 31, 2008, the Company had \$60,823,000 in resale agreements outstanding, all of which settled on January 2, 2009 and were subsequently reinvested. The Company maintains control of securities purchased under resale agreements, values the collateral on a daily basis and obtains additional collateral, if necessary, to protect the Company in the event of default by the counterparties.

Note 4.

Investment Securities

The cost (amortized cost with respect to certain fixed maturities), gross unrealized gains, gross unrealized losses and fair value of investment securities are as follows:

(1)

Collateralized mortgage obligations (CMOs).

(2)

Mortgage-backed securities (MBS).

(3)

Government-sponsored enterprises (GSEs) which are the Federal Home Loan Mortgage Corporation, Federal National

Mortgage Association and Federal Home Loan Banks. GSEs are private enterprises established and chartered by the Federal Government.

Government-sponsored enterprise securities consist of Federal National Mortgage Association mortgage-backed securities and other fixed maturity securities issued by the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association.

The amortized cost and fair value of fixed maturities at December 31, 2008, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. The average life of mortgage-backed securities is affected by prepayments on the underlying loans and, therefore, is materially shorter than the original stated maturity.

	AMORTIZED COST	FAIR VALUE	% OF TOTAL FAIR VALUE
	(In thousands)		
Due in one year or less	\$ 9,994	\$ 9,500	1.6%
Due after one year through five years	44,507	38,517	6.3%

Substantially all of the unrealized losses at December 31, 2008 and 2007 relate to investment grade securities and are attributable to changes in market interest rates and general disruptions in the credit market subsequent to purchase. The unrealized loss on corporate securities and state and political subdivisions is due to wider spreads. Spreads have widened as investors shifted funds to US Treasuries in response to the current market turmoil. At December 31, 2008, the Company had \$28,758,000 invested in whole loan CMOs backed by Alt-A mortgages. Of this amount, 39.8% were in CMOs that originated in 2005 or earlier and 60.2% were in CMOs that originated in 2006. The Company's mortgage security portfolio has no direct exposure to sub-prime mortgages. The decline in unrealized losses for the equity securities was primarily due to wider spreads for preferred stocks issued by financial institutions following the disruption in credit markets in late 2007 and continuing in 2008. Some of these financial institutions have exposure to sub-prime mortgages.

At December 31, 2008 and 2007, a total of 110 and 73 securities, respectively, were in a continuous unrealized loss position for less than 12 months; 64 and 82 securities, respectively, had continuous unrealized losses for 12 months or longer. The Company has only one non-performing fixed maturity investment at December 31, 2008 with a carrying value of \$.7 million, or .1% of the total carrying value of fixed maturities. Based on management's review of the portfolio, which considered the various factors described in Note 1 (F) (vi), including management's expectation for recovery in fair value and the Company's intent and ability to hold securities for a period of time sufficient to allow for such recovery in fair value, the Company recorded losses for other-than-temporary impairments of \$38,247,000, \$385,000 and \$91,000 for the years ended December 31, 2008, 2007 and 2006, respectively. The losses recorded for other-than temporary impairments for the year ended December 31, 2008 represent losses on preferred stocks of financial institutions and fixed maturities (primarily Alt-A

mortgage securities) that the Company determined to be other-than-temporary primarily due to the severity of the decrease in fair value and length of time that these securities were in a loss position. Further deterioration in credit quality of the companies backing the securities, further deterioration in the condition of the financial services industry, a continuation of the current imbalances in liquidity that exist in the marketplace, a continuation or worsening of the current economic recession, or additional declines in real estate values may further affect the fair value of these securities and increase the potential that certain unrealized losses be designated as other-than-temporary in future periods and the Company may incur additional write-downs.

Note 5.

Fair Value Disclosure of Financial Instruments

The adoption of SFAS 157 did not have a material impact on our financial statements. SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. SFAS 157 applies whenever other standards require or permit assets or liabilities to be measured at fair value but does not expand the use of fair value in any new circumstances. In this standard, the FASB clarifies the principle that fair value should be based on the assumptions market participants would use when pricing the asset or liability. In support of this principle, SFAS 157 establishes a fair value hierarchy that prioritizes the information used to develop those assumptions.

The valuation techniques required by SFAS 157 are based upon observable and unobservable inputs. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect our market expectations. These two types of inputs create the following fair value hierarchy:

Level 1 - Quoted prices for identical instruments in active markets.

Level 2 - Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations whose inputs are observable or whose significant value drivers are observable.

Level 3 - Instruments where significant value drivers are unobservable.

When available, we use quoted market prices to determine fair value and classify such items in Level 1. In some cases, we use quoted market prices for similar instruments in active markets and/or model-derived valuations where inputs are observable in active markets and classify such items in Level 2. When there are limited or inactive trading markets, we use industry standard pricing methodologies, including discounted cash flow models, whose inputs are based on management assumptions and available current market information. These items are classified in Level 3. Further, we retain independent pricing vendors to assist in valuing certain instruments.

The following section describes the valuation methodologies we use to measure different financial instruments at fair value.

Investments in fixed maturities and equity securities:

Investments included in Level 1 are equities with quoted market prices. Level 2 is primarily comprised of our portfolio of government securities, agency mortgage-backed securities, corporate fixed income securities, collateralized mortgage obligations, municipals, GSEs and certain preferred stocks that were priced with observable market inputs. Level 3 securities consist of CMO securities, primarily Alt-A mortgages.

Other:

The financial liability included in Level 2 consists of an interest rate swap on IHC debt. It is valued using market observable inputs including market price, interest rate, and volatility within a Black Scholes model.

The following table presents our financial assets and liabilities measured at fair value on a recurring basis at December 31, 2008 (in thousands):

	Level 1	Level 2	Level 3	Total
FINANCIAL ASSETS:				
Investment securities held for sale:				
Fixed maturities	\$ -	\$ 583,155	\$ 25,332	\$ 608,487
Equity securities	51,851	2,156	-	54,007
Total	\$ 51,851	\$ 585,311	\$ 25,332	\$ 662,494
FINANCIAL LIABILITIES:				
Interest rate swap	\$ -	\$ 260	\$ -	\$ 260

Inputs for certain fixed maturity securities that were observable during the second and third quarters of 2008 were not unobservable at December 31, 2008 as a result of limited or inactive markets. These securities were transferred out of Level 2 and into the Level 3 category during 2008. No securities were sold or transferred out of the Level 3 category in 2008. Changes in the carrying value of Level 3 financial assets and liabilities for the year ended December 31, 2008 are summarized as follows (in thousands):

	Fixed Maturities
Balance at beginning of year	\$ -

Edgar Filing: INDEPENDENCE HOLDING CO - Form 10-K

Transfers into Level 3		30,603
Net realized investment gains (losses) included in earnings:		
Net realized investment gains from repayments of fixed maturities		45
Other-than-temporary impairments		(7,014)
		(6,969)
Net unrealized gains (losses) included in accumulated other comprehensive loss:		
Net unrealized losses		(5,187)
Reclassification of unrealized losses deemed to be other-than-temporary to net realized losses included in earnings		7,014
		1,827
Repayments of fixed maturities		(129)
Balance at end of year	\$	25,332

The following methods and assumptions were used to estimate the fair value of financial instruments not disclosed elsewhere in the Notes to Consolidated Financial Statements:

(A)

Policy Loans

The fair value of policy loans is estimated by projecting aggregate loan cash flows to the end of the expected lifetime period of the life insurance business at the average policy loan rates, and discounting them at a current market interest rate.

(B)

Funds on Deposit

The Company has two types of funds on deposit. The first type is credited with a current market interest rate, resulting in a fair value which approximates the carrying amount. The second type carries fixed interest rates which are higher than current market interest rates. The fair value of these deposits was estimated by discounting the payments using current market interest rates. The Company's universal life policies are also credited with current market interest rates, resulting in a fair value which approximates the carrying amount.

(C)

Debt

The fair value of debt with variable interest rates approximates its carrying amount. The fair value of fixed rate debt is estimated by discounting the cash flows using current market interest rates.

The estimated fair values of financial instruments not disclosed elsewhere in the Notes to Consolidated Financial

Statements are as follows:

	DECEMBER 31, 2008		DECEMBER 31, 2007	
	CARRYING AMOUNT	FAIR VALUE	CARRYING AMOUNT	FAIR VALUE
	(In thousands)			
FINANCIAL ASSETS:				
Policy loans	\$ 24,947	\$ 32,914	\$ 25,113	\$ 29,443
FINANCIAL LIABILITIES:				
Funds on deposit	\$ 411,188	\$ 407,767	\$ 383,711	\$ 385,480
Debt and junior subordinated debt securities	48,146	48,620	50,646	50,746
Other	260	260	922	922

Note 6.**Net Investment Income**

Major categories of net investment income for the years ended December 31, 2008, 2007 and 2006 are summarized as follows:

	2008	2007	2006
	(In thousands)		
Fixed maturities	\$ 38,248	\$ 38,531	\$ 37,567
Equity securities	4,990	4,586	3,772
Short-term investments	1,278	3,981	4,326
Policy loans	1,836	1,740	1,757
Equity income (loss):			
Investment partnerships	(3,046)	43	2,237
Operating partnerships	663	425	819
Other	617	200	529
Investment interest expense	(99)	(2,283)	(2,369)
Investment expenses	(272)	(172)	(186)
subtotal	44,215	47,051	48,452
Investment income allocated to discontinued operations	(171)	(929)	(776)
Net investment income	\$ 44,044	\$ 46,122	\$ 47,676

Note 7.**Net Realized Investment Gains and Losses**

Net realized investment gains (losses) for the years ended December 31, 2008, 2007 and 2006 are as follows:

Edgar Filing: INDEPENDENCE HOLDING CO - Form 10-K

	2008	2007 (In thousands)	2006
Net realized investment gains (losses):			
Fixed maturities	\$ 1,008	\$ (193)	\$ (4,319)
Common stocks	(7,724)	1,437	1,900
Preferred stocks	718	346	457
	(5,998)	1,590	(1,962)
Other-than-temporary impairments:			
Fixed maturities	(18,123)	-	-
Common stocks	-	(385)	(91)
Preferred stocks	(20,124)	-	-
	(38,247)	(385)	(91)
Sale of other investment	-	-	1,581
Sales of trading securities	493	715	850
IHC stock puts/call and other gains (losses)	(137)	(662)	247
Other trading account losses, net	(6,759)	-	-
Net realized investment gains (losses)	\$ (50,648)	\$ 1,258	\$ 625

For the years ended December 31, 2008, 2007 and 2006, the company realized gross gains of \$7,232,000, \$5,374,000 and 6,475,000, respectively, and gross losses of \$13,230,000, \$3,784,000 and \$8,437,000, respectively, on sales of available-for-sale securities.

In the fourth quarter of 2008, the Company became aware of certain activities engaged in by the non-affiliate broker-dealer that managed the trading accounts of the Company. At the December 31, 2007, the consolidated balance sheet includes the Company's direct and indirect investments of \$8,533,000 and \$1,026,000, respectively, in these accounts. Net realized investment gains and losses reported in the accompanying consolidated statements of operations for 2008, 2007 and 2006 include \$493,000, \$715,000 and \$850,000, respectively, of income related to direct investments in these trading accounts. Net investment income reported in the accompanying consolidated statements of operations includes \$217,000, \$529,000 and \$575,000 of income (loss) related to direct and indirect investments in these trading accounts. The broker-dealer is now in bankruptcy. The Company intends to file a claim and believes it will likely recover the \$500,000 maximum amount available from the Securities Investor Protection Corporation (SIPC). Accordingly, the Company recorded a pre-tax loss of \$6,759,000, included in net realized gains and losses on the consolidated statement of operations, in the fourth quarter of 2008 consisting of: (i) the carrying amounts of the Company's direct investments in these trading accounts amounting to \$5,857,000 at the time of the loss; (ii) \$1,402,000 of profits withdrawn in 2008 that may be subject to return; net of (iii) \$500,000 of expected recoveries from SIPC. The write-down in value in the fourth quarter of 2008 of the Company's indirect investments in these accounts at the time of the loss, amounting to \$235,000, is included in net investment income on the consolidated statement of operations. While the Company may be subject to legal claims in this matter, the ultimate resolution of any such claims would not be material to its financial condition.

Note 8.

Other Investments

Other investments consist of the following at December 31, 2008 and 2007:

	2008		2007
	(In thousands)		
Policy loans	\$ 24,947		\$ 25,113
Investment partnership interests	5,821		10,868
Operating partnership interests	5,810		5,650
Investment in trust subsidiaries	1,146		1,146
Other	-		122
	\$ 37,724		\$ 42,899

The Company had invested a total of \$3,345,000 and \$5,703,000 at December 31, 2008 and 2007, respectively, in a domestic feeder fund of Dolphin Limited Partnership III, L.P. ("Dolphin III"). Dolphin III operates as a private investment partnership to act as the master fund in a master-feeder fund structure. Dolphin III generally seeks significant investment stakes in publicly traded North American companies with a market value of equity plus debt of approximately \$2 billion or less. The Company's net investment income (loss) from Dolphin III for the years ended December 31, 2008, 2007 and 2006 was \$(2,358,000), \$(632,000) and \$335,000, respectively.

Note 9.

Acquisitions

The Company completed the following acquisitions in 2008, 2007, and 2006. The results of operations of the acquired companies are included in IHC's Consolidated Financial Statements from the respective acquisition dates. None of the goodwill recognized in these acquisitions is deductible for income tax purposes. Pro forma results of operations for 2008, 2007 and 2006, as though these acquisitions had been completed at the beginning of those years, have not been presented since the effect of the acquisitions was not material.

(A)

Majestic Underwriters LLC

Effective September 30, 2007, the Company purchased a 10.3% interest in Majestic pursuant to terms set forth in the limited liability company agreement Majestic, thereby increasing its controlling interest in the medical stop-loss MGU at that time to 62.3%. The interest was purchased from a senior officer of Majestic for a total purchase price of \$649,000 and was settled on July 2, 2007. The Company recorded goodwill of \$521,000 and other intangible assets of \$62,000 for fair value of broker relationships, which is being amortized over 10 years.

On April 1, 2008 the Company purchased an additional 14.7% interest in Majestic Underwriters LLC (Majestic) pursuant to terms set forth in the limited liability company agreement of Majestic, thereby increasing its controlling interest in the medical stop-loss MGU to 77%. The interest was purchased from a senior officer of Majestic for a total purchase price of \$998,000. The Company recorded goodwill of \$884,000 and other intangible assets of \$88,000 for the fair value of broker relationships, which is being amortized over 10 years.

(B)

CA Marketing and Management Services, LLC.

In January 2007, IHC Health Holdings acquired 100% of the outstanding membership interest in CA Marketing and Management Services, LLC (CAM) for total purchase price of \$3,500,000. Immediately thereafter, CAM was merged into IHC Health Solutions, Inc., a wholly owned subsidiary of IHC Health Holdings. The company recorded goodwill of \$640,000 and other intangible assets of \$2,860,000 primarily for the fair value of agent and management services relationships, which is being amortized over weighted average period of 9.06 years. CAM was previously 100% owned by a senior officer of IHC. The Audit Committee of the Board of Directors of IHC unanimously approved the transaction, and upon recommendation by the Audit Committee, it was unanimously approved by the Board of Directors.

(C)

Actuarial Management Corporation

Effective April 2, 2007, the Company acquired 100% of the outstanding shares of capital stock of AMC for a total purchase price of \$5,000,000. The Company recorded goodwill of \$4,324,000 and other intangible assets of \$800,000,

primarily for the fair value of customer relationships, which is being amortized over a weighted average period of 5.7 years. AMC is currently responsible for all actuarial aspects of the Company's fully insured health business. AMC was previously owned by an individual who became a senior officer of IHC prior to the acquisition.

(D)

Insurers Administrative Corporation

In January 2006, the Company entered into a stock purchase agreement to purchase all of the voting and non-voting shares of the common stock of IAC and Interlock Corporation for a total purchase price of \$21,360,000 in cash and 446,663 shares of IHC common stock, which were issued at a value of \$21.54 per share or \$9,622,000. The Company recorded goodwill of \$25,851,000 and other intangible assets consisting of \$7,000,000 for the value of agent relationships and \$1,800,000 for the value of computer software. The relationship intangible and the capitalized software are being amortized over periods of 13 years and 10.3 years, respectively (a weighted-average period of 12.4 years). Prior to entering into this agreement, IAC owned the minority interest in IHC Health Holdings, formerly Strategic Health Associates, Inc., and administered IHC's block of fully insured group health insurance.

IAC, which is based in Phoenix, Arizona, is a leading administrator, manager and distributor of Consumer Driven Health Plans (CDHPs). It currently administers individual and group health and life premiums and premium-equivalents for multiple insurers, including the short-term medical (STM) business it manages for Health Plan Administrators, Inc. (HPA). In combination with IHC's other

subsidiaries engaged in the fully insured business, IAC administers, manages and distributes a full range of health products, including CDHPs, short-term medical, limited medical, dental and vision.

IHC issued a stock put on 194,443 of the IHC common shares issued in the acquisition, which vested on January 31, 2007, at a price of \$17.00 per share. The put was recorded at a fair value of \$228,000 at the acquisition date. The 183,333 shares of IHC common stock that remained subject to the put as of December 31, 2007 were exercised during 2008. For the years ended December 31, 2008, 2007 and 2006, IHC recorded a gain (loss) of \$(38,000), \$(683,000) and \$114,000, respectively, in the Consolidated Statement of Operations, representing the net change in fair value of the IHC stock put.

(E)

CA Insurance Services, LLC

On March 1, 2006, IHC acquired the remaining 55% membership interest in CA Insurance Services, LLC by merging it into CAIS, a newly created and wholly owned direct subsidiary of IHC. The 55% interest was acquired for 46,250 shares of IHC common stock, which were issued at a value of \$22.87 per share or \$1,058,000. The Company recorded goodwill of \$1,163,000 and an intangible asset of \$370,000 for the value of agent relationships in connection with the acquisition. The relationship intangible is being amortized over a period of nine years.

On March 31, 2006, CAIS acquired a marketing organization, including key management and health insurance sales staff, which controlled a block of approximately \$50 million of fully insured group major medical business (including CDHPs) for \$750,000, which was recorded as an intangible asset. This acquired block of group major medical business began to be transitioned to Madison National Life effective August 1, 2006. On January 1, 2008, CAIS was merged into IHC Health Solutions.

Note 10.

Goodwill and Other Intangible Assets

The changes in the carrying amount of goodwill by business segment are as follows for the years ended December 31, 2008, 2007 and 2006:

2008	2007	2006
------	------	------

(In thousands)

Balance at beginning of year	\$ 51,695	\$ 46,210	\$ 15,717
Medical Stop-Loss:			
Acquisition of AMIC shares	(248)	-	-
Acquisition of Majestic	884	521	-
Fully Insured:			
Acquisition of CAM	-	640	-
Acquisition of AMC	-	4,324	-
Acquisition of IAC	-	-	25,851
Acquisition of CAIS, and other additions	-	-	2,802
IHC Health Holdings (minority interest)	-	-	1,840
Balance at end of year	\$ 52,331	\$ 51,695	\$ 46,210

See Note 21 for goodwill carrying amounts by segment as of December 31, 2008 and 2007.

As required by SFAS 142, goodwill impairment tests must be performed annually. Additionally, SFAS 142 states that goodwill shall be tested for impairment between annual tests if an event or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. The Company utilized a discounted cash flow model, which includes residual value, to determine the fair value of the reporting units. The Company performed its annual tests at December 31, 2008 and determined that goodwill was not impaired.

At December 31, 2008, the Company's market capitalization was less than its book value indicating a potential impairment of goodwill. As a result, the Company assessed the factors contributing to the performance of IHC stock in 2008, and concluded that the market capitalization does not represent the fair value of the Company. The Company noted several factors that have led to a difference between the market capitalization and the fair value of the Company, including (i) the Company's stock is thinly traded and a sale of even a small number of shares can have a large percentage impact on the price of the stock, (ii) Geneve Corporation and insiders own approximately 58% of the outstanding shares, which has had a significant adverse impact on the number of shares available for sale and therefore the trading potential of IHC stock, (iii) the general lack of confidence in equity securities, which has resulted in a flight to US Treasury securities and other investments perceived to be of a higher quality, (iv) both financial institutions and the insurance industry as a whole has seen similar drops in share prices, particularly in the fourth quarter of 2008 as concerns over the effects of the volatile equity and bond markets on insurance company's investment portfolios are translating into lower share prices. The Company will continue to monitor IHC's book value against market capitalization to determine whether an interim test of goodwill is warranted. If we experience a sustained decline in our results of operations and cash flows, or other indicators of impairment exist, we may incur a material non-cash charge to earnings relating to impairment of our goodwill, which could have a material adverse effect on our results.

At December 31, 2008 and 2007, the Company had other intangible assets of \$15,308,000 and \$17,584,000, respectively, net of accumulated amortization of \$9,329,000 and \$6,448,000, respectively, which are included in other assets in the Consolidated Balance Sheets. These intangible assets principally represent the estimated fair value of acquired agent and broker relationships. In both 2008 and 2007, \$477,000 of other intangible assets had an indefinite life and is not subject to amortization.

Amortization expense on other intangible assets was \$2,881,000, \$3,107,000 and \$1,726,000 for the years ended December 31, 2008, 2007 and 2006, respectively. Estimated amortization expense for each of the next five years is as follows:

Year	Amortization Expense
	(In thousands)

Edgar Filing: INDEPENDENCE HOLDING CO - Form 10-K

2009	\$	3,000
2010		2,102
2011		1,993
2012		1,745
2013		1,571

Note 11.**Sale of Credit Life and Disability Segment**

The Company sold its credit life and disability segment by entering into a 100% coinsurance agreement with an unaffiliated insurer effective December 31, 2007. The transaction closed in February 2008 with an initial payment of \$10,940,000, representing the net statutory unearned premium reserve as of December 31, 2007 less a ceding fee of \$8,820,000. In accordance with the terms of such coinsurance agreement, the Company continued to administer this block of business through June 30, 2008. Unearned premium reserves of this block and the corresponding amount in due from reinsurers of \$12,781,000 and \$15,742,000 are included in the Consolidated Balance Sheet at December 31, 2008 and 2007, respectively. In connection with the sale, the Company accrued an estimated \$2,520,000 of exit costs, including \$589,000 of one-time termination benefits and a goodwill impairment charge of \$393,000 at December 31, 2007. As a result of the transaction, the Company also recorded a \$3,608,000 loss on the disposition of discontinued operations, net of \$1,942,000 of tax benefits, in the Consolidated Statement of Operations for the year ended December 31, 2007.

The operating results of the credit life and disability segment for the years ended December 31, 2008, 2007 and 2006 have been reclassified to discontinued operations on the Consolidated Statements of Operations as follows (in thousands):

	2008	2007	2006
Revenues	\$ -	\$ 23,588	\$ 22,426
Pretax income (loss) from discontinued operations	\$ 806	\$ (324)	\$ (612)
Tax expense (benefits) allocated to discontinued operations	282	(100)	(192)
Income (loss) from discontinued operations	\$ 524	\$ (224)	\$ (420)

Income from discontinued operations for the year ended December 31, 2008 of \$524,000, net of tax, represents expenses and changes in claims and reserves related to the insurance liabilities (currently in run-off status) for claims incurred prior to the sale on December 31, 2007. In 2008, the Company also recorded a gain on disposition of discontinued operations amounting to \$120,000, net of \$64,000 of income taxes, representing adjustments to the initial ceding fee.

The net liabilities related to the credit life and disability segment at the time of the sale included insurance reserves of \$9,103,000 related to liabilities for claims incurred prior to December 31, 2007, amounts due to reinsurers of \$10,940,000 and accrued exit costs of \$2,520,000. Changes in the net liabilities related to discontinued operations for the year ended December 31, 2008 were as follows (in thousands):

	Claims Liability	Accrued Expenses	Termination Benefits	Due to Reinsurer	Total
Balance at beginning of year	\$ 9,103	\$ 1,931	\$ 589	\$ 10,940	\$ 22,563
Cash settlements of sale transaction	-	-	-	(10,756)	(10,756)
Gain on disposition of discontinued operations:					
Ceding fee adjustment	-	-	-	(184)	(184)
Income from discontinued operations:					
Changes in claims and reserves related to block in run-off	(1,998)	-	-	-	(1,998)
Expenses incurred related to block in run-off	-	1,192	-	-	1,192
					(806)
Payments of expenses accrued to administer the business sold	-	(3,123)	(375)	-	(3,498)
Claim payments related to block in run-off	(3,777)	-	-	-	(3,777)
Balance at December 31, 2008	\$ 3,328	\$ -	\$ 214	\$ -	\$ 3,542

The Company believes that the net liabilities of discontinued operations at December 31, 2008 adequately estimate the remaining costs associated with the credit life and disability discontinued operations.

Note 12.**Insurance Policy Claims and Reserves**

The liabilities for unpaid claims and claim adjustment expenses and insurance reserves-health represent amounts necessary to provide for the estimated cost of settling claims relating to insured events that have been incurred prior to the balance sheet date which have not yet been settled.

Changes in the liability for reserves, unpaid claims and claim adjustment expenses for the Insurance Group's health and disability coverages for the years ended December 31, 2008, 2007 and 2006 are summarized below.

	2008	2007	2006
		(In thousands)	
Balance at beginning of year	\$ 212,413	\$ 174,065	\$ 155,951
Less: reinsurance recoverable	108,936	84,504	83,654
Net balance at beginning of year	103,477	89,561	72,297
Adjustment to January 1, 2006 beginning balance for the adoption of SAB 108	-	-	9,069
January 1, 2006 beginning balance, as adjusted	103,477	89,561	81,366
Reserves acquired	-	-	95
Amount incurred:			
Current year	190,927	191,346	146,332
Prior years	1,577	12,162	3,546
Total	192,504	203,508	149,878
Amount paid, related to:			
Current year	112,748	114,401	93,494
Prior years	75,991	75,191	48,284

Edgar Filing: INDEPENDENCE HOLDING CO - Form 10-K

Total	188,739	189,592	141,778
Net balance at end of year	107,242	103,477	89,561
Plus: reinsurance recoverable	104,076	108,936	84,504
Balance at end of year	\$ 211,318	\$ 212,413	\$ 174,065

The preceding schedule reflects (i) the due and unpaid, including (in 2006) the adjustment under SAB 108 as described in Note 1 (U); (ii) claims in the course of settlement; (iii) estimated incurred but not reported reserves; and (iv) the present value of amounts not yet due on claims. The incurred and paid data above reflects all activity for the year. The amount incurred in 2008 for prior years of 1,577,000 is primarily the result of \$3,310,000 of Medical Stop-Loss reserves and redundancies of \$1,191,000 in the Fully Insured reserves and \$542,000 on all other reserves. The amount incurred in 2007 for prior years of \$12,162,000 is primarily as a result of re-estimation of unpaid losses of \$11,875,000 on Medical Stop-Loss reserves, \$1,082,000 of Fully Insured reserves and a redundancy of \$795,000 on all other reserves. The amount incurred in 2006 for prior years of \$3,546,000 is primarily a result of re-estimation of unpaid losses on Medical Stop-Loss reserves.

These increases in reserve estimates are generally the result of on-going analysis of recent loss development trends. Medical stop-loss business is excess coverage with a short duration. Predicting ultimate claims and estimating reserves in medical stop-loss is especially complicated due to the excess of loss nature of these products with very high deductibles applying to specific claims on any individual

claimant and in the aggregate for a given group. Fluctuations in results for specific coverage are primarily due to the severity and frequency of individual claims. Due to the short-term nature of medical stop-loss, redundancies and deficiencies will typically emerge during the following year rather than over a number of years. In the third quarter of 2007, the Company identified a material increase in claims and reserves with respect to business written in 2006. Such adverse development was primarily driven by the frequency of claims relative to the business written in that year proving significantly higher than what would have been predicted by prior loss development patterns. This increased frequency of medical stop-loss claims was due, in part, to increased severity of primary claims.

Note 13.

Debt and Junior Subordinated Debt Securities

(A)

Debt

A subsidiary of IHC entered into a \$12,500,000 line of credit with a commercial bank in September 2003. In August 2006, the credit agreement was amended and the line of credit increased to \$15,000,000 with automatic reductions of \$2,500,000 in August 2007 and August 2008 and the remaining \$10,000,000 in August 2009. As to such subsidiary, the line of credit (i) contains restrictions with respect to, among other things, the creation of additional indebtedness, the consolidation or merger with or into certain corporations, the payment of dividends and the retirement of capital stock; (ii) requires the maintenance of minimum amounts of net worth, as defined, certain financial ratios, and certain investment restrictions; and (iii) is secured by the stock of Madison National Life and the assets of such subsidiary of IHC. At December 31, 2008 and 2007, there was \$10,000,000 and \$12,500,000, respectively, outstanding under the line of credit. A principal repayment of \$2,500,000 was made in August, 2008. The line of credit bears interest at a variable interest rate equal to LIBOR plus 1.25% (1.76% at December 31, 2008). At the time of the amended credit agreement, the Company simultaneously entered into an interest rate swap, with the commercial bank lender, with a notional amount equal to the debt principal amount, under which the Company receives a variable rate equal to the rate on the debt and pays a fixed rate (6.65% under the current agreement). There was no hedge ineffectiveness on this swap which is accounted for as a cash flow hedge. The change in the fair value of the swap and the related after-tax adjustments recognized in accumulated other comprehensive loss were insignificant at December 31, 2008 and 2007.

(B)

Junior Subordinated Debt Issued to Trust Preferred Subsidiaries

Junior subordinated debt consisted of the following at both December 31, 2008 and 2007 (in thousands):

Edgar Filing: INDEPENDENCE HOLDING CO - Form 10-K

Independence Preferred Trust I - Trust Preferred	\$	10,000
Independence Preferred Trust I - Common Stock		310
Junior subordinated debt security -Trust I		10,310
Independence Preferred Trust II -Trust Preferred		12,000
Independence Preferred Trust II - Common Stock		372
Junior subordinated debt security - Trust II		12,372
Independence Preferred Trust III Trust Preferred		15,000
Independence Preferred Trust III Common Stock		464
Junior subordinated debt security Trust III		15,464
Total junior subordinated debt securities	\$	38,146

The Company has three statutory business trusts that were formed for the purpose of issuing trust preferred securities, totaling \$37,000,000, to institutional investors in pooled issuances. Although the Company owns all of the trusts' common securities, it is not the primary beneficiary for purposes of FASB Interpretation 46R, "Consolidation of Variable Interest Entities," and, accordingly, the trusts are unconsolidated subsidiaries for financial reporting purposes. As a result, the Company recognized liabilities of \$38,146,000 for junior subordinated debt and assets of \$1,146,000 for the investments in trust subsidiaries at both December 31, 2008 and 2007. The Company's subordinated debt securities, which are the sole assets of the subsidiary trusts, are unsecured obligations of the Company and are subordinate and junior in right of payment to all present and future senior indebtedness of the Company. The Company has provided a full and unconditional guarantee of amounts due on the trust preferred securities. The terms of the junior subordinated debt securities, including interest rates and maturities, are the same as the related trust preferred securities.

The distributions payable on the capital securities are cumulative and payable quarterly in arrears. The Company has the right, subject to events of default, to defer payments of interest for a period not to exceed 20 consecutive quarters, provided that no extension period may extend beyond the maturity dates which range from April 2033 to December 2034. The Company has no current intention to exercise its right to defer interest payments. The rates on the capital securities are as follows: Independence Preferred Trust I, fixed at 7.4% for the first five years through April 7, 2008 and 400 basis points over the three-month LIBOR thereafter, or 8.8% and 7.4% at December 31, 2008 and 2007, respectively; Independence Preferred Trust II, 390 basis points over the three-month LIBOR, or 8.7% and 9.1% at December 31, 2008 and 2007, respectively; and Independence Preferred Trust III, fixed at 7.2% through December 15, 2009 and 350 basis points over the three-month LIBOR thereafter.

The capital securities are mandatorily redeemable upon maturity. The Company has the right to redeem the capital securities, in whole or in part and with certain prepayment penalties, on certain dates prior to April 7, 2008, January 8, 2009 and December 15, 2009, with respect to Independence Preferred Trust I, Independence Preferred Trust II and Independence Preferred Trust III, respectively. If the capital securities were redeemed on or after those dates, the redemption price would be 100% (without penalty) of the principal amount plus accrued and unpaid interest.

Cash payments for interest on debt and junior subordinated debt securities were \$3,592,000 \$3,992,000 and \$3,660,000 for the years ended December 31, 2008, 2007 and 2006, respectively.

Note 14.

Preferred Stock

IHC has 100,000 authorized shares of preferred stock, par value \$1.00 per share, none of which was issued as of December 31, 2008 and 2007.

Note 15.

Common Stock

In 1991, IHC initiated a program of repurchasing shares of its common stock. In August 2007, the Board of Directors authorized an additional 100,000 shares to be purchased under the 1991 plan. Through December 31, 2008, the Company has repurchased 5,984,047 common shares at a cumulative cost of \$37,967,000. This total includes repurchases of 23,015 shares, 19,865 shares and 58,315 shares in 2008, 2007 and 2006, respectively. All of the repurchased shares have been either retired, reissued, or have become treasury shares. At December 31, 2008, there were 108,642 shares still authorized to be repurchased under the plan authorized by the Board of Directors.

In January 2008, IHC issued 127,520 shares of common stock as a private placement of unregistered securities under section 4(2) of Securities Act of 1993 (Securities Act). The IHC shares were issued from treasury stock at a fair value of \$1,401,000. The difference between the fair value and the \$2,422,000 cost basis of the treasury stock resulted in a \$1,021,000 charge to retained earnings.

During 2006, the Company issued 446,663 and 46,250 shares of its common stock in connection with the acquisitions of IAC and CAIS, respectively (see Note 9). The shares issued in connection with the IAC acquisition were issued at a value of \$21.54 per share and the shares issued in connection with the CAIS acquisition were issued at a value of \$22.87 per share. Effective February 22, 2006, IHC issued 125,000 shares of common stock to First Integrated Health, Inc. (a.k.a. Employers Direct Health) at \$20.00 per share. All shares issued by IHC in the foregoing transactions were issued in reliance upon the exemption from the registration requirements of the Securities Act, as private placements of unregistered securities under Section 4(2) thereof. Any resale or other disposition of the securities in the United States must be made either under a registration statement filed by IHC with the SEC or under an exemption from the registration requirements of the Securities Act.

Note 16.

Share-Based Compensation

In June 2003, the stockholders approved the Independence Holding Company 2003 Stock Incentive Plan (the "2003 Plan") under which 630,000 shares of common stock were reserved for options and other common stock awards. The final option grants under the 2003 Plan were made during 2006.

In June 2006, the stockholders approved the Independence Holding Company 2006 Stock Incentive Plan (the "2006 Plan") under which 1,300,000 shares of common stock were reserved for options and other common stock awards.

Under the terms of the Company's share-based compensation plans, option exercise prices are equal to the quoted market price of the shares at the date of grant; option terms range from five to ten years; and vesting periods are three years for employee options. The Company may also grant shares of restricted stock, share appreciation rights (SARs) and share-based performance awards. Restricted shares are valued at the quoted market price of the shares at the date of grant and have a three year vesting period. Exercise prices of SARs are equal to the quoted market price of the shares at the date of grant and have three year vesting periods. There were 744,383 shares available for future stock-based compensation grants under the 2006 Plan at December 31, 2008.

Total share-based compensation expense recorded for the years ended December 31, 2008, 2007 and 2006 was \$1,180,000, \$1,325,000 and \$1,567,000, respectively, and the related tax benefits recognized for the years ended December 31, 2008, 2007 and 2006 were \$471,000, \$528,000 and \$625,000, respectively.

Stock Options

The Company's stock option activity for the year ended December 31, 2008 was as follows:

	No. of Shares Under Option	Weighted-Average Exercise Price
December 31, 2007	839,310	\$ 17.56
Granted	225,000	10.99
Exercised	(291,800)	11.29
Forfeited	(7,917)	22.19
Expired	(5,500)	22.55
December 31, 2008	759,093	17.94

The following table summarizes information regarding outstanding and exercisable options as of December 31, 2008:

	Outstanding	Exercisable
Number of shares under option	759,093	443,669
Weighted average exercise price per share	\$ 17.94	\$ 20.73
Aggregate intrinsic value	\$ -	-
Weighted average contractual term remaining	2.3 years	1.2 years

The fair value of an option award is estimated on the date of grant using the Black-Scholes option valuation model. The weighted average grant-date fair value of options granted during the years ended December 31, 2008, 2007 and 2006 was \$3.44, \$6.51 and \$7.25 per share, respectively. The assumptions set forth in the table below were used to value these grants:

	2008	2007	2006
Weighted-average risk-free interest rate	2.2%	4.4%	4.9%
Annual dividend rate per share	\$.05	\$.05	\$.05
Weighted-average volatility factor of the Company's common stock	36.6%	30.3%	32.1%
Weighted-average expected term of options	4.5 years	4.5 years	4.5 years

Compensation expense of \$855,000, \$836,000 and \$1,104,000 was recognized in the years ended December 31, 2008, 2007 and 2006, respectively, for the portion of the grant-date fair value of stock options vested during that period.

During the year ended December 31, 2008, the Company received cash proceeds of \$173,000 upon the exercise of 15,608 options with an intrinsic value of \$31,000. In addition, another 276,192 options were exercised and, pursuant to the terms of the Company's applicable stock option plans, payments were made equal to the difference between the fair value of such shares, with respect to the options at such exercise date, and the aggregate option strike price. The intrinsic value of such totaled \$640,000 and the payments were made in the form of IHC common stock totaling 29,486 shares after deducting applicable income taxes. The total intrinsic value of options exercised during the years ended December 31, 2007 and 2006 was \$333,000 and \$6,685,000, respectively. Cash proceeds received from options exercised during the years ended December 31, 2007 and 2006 were \$570,000 and \$3,488,000, respectively.

At December 31, 2008, the total unrecognized compensation cost related to non-vested stock options was \$838,000 which is expected to be recognized as compensation expense over a weighted average period of 1.27 years.

Restricted Stock

The Company issued 2,250, 7,050 and 49,325 restricted stock awards during the years ended December 31, 2008, 2007 and 2006, respectively, with weighted-average grant-date fair values of \$12.26, \$20.67 and \$22.20 per share, respectively. The total fair value of restricted stock that vested in 2008, 2007 and 2006 was \$223,000, \$372,000 and \$26,000, respectively. Restricted stock expense was \$347,000, \$393,000 and \$319,000 in 2008, 2007 and 2006, respectively.

The following table summarizes restricted stock activity for the year ended December 31, 2008:

	No. of Non-vested Shares	Weighted-Average Grant-Date Fair Value
December 31, 2007	38,329	\$ 21.89
Granted	2,250	12.26
Vested	(18,476)	21.90
Forfeited	(3,127)	22.55
December 31, 2008	18,976	20.66

At December 31, 2008, the total unrecognized compensation cost related to non-vested restricted stock awards was \$126,000 which is expected to be recognized as compensation expense over a weighted average period of 0.67 years.

SARs and Other Share-Based Performance Awards

The fair value SARs is calculated using the Black-Scholes valuation model at the grant date and each subsequent reporting period until settlement. Compensation cost is based on the proportionate amount of the requisite service that has been rendered to date. Once fully vested, changes in fair value of the SARs continue to be recognized as compensation expense in the period of the change until settlement. No SARs were exercised in 2008, 2007 or 2006. Other liability-classified awards include share-based performance awards. Compensation costs for these plans are recognized and accrued as performance conditions are met, based on the current share price. The intrinsic value of share-based liabilities paid in 2008 and 2007 was \$70,000 and \$101,000, respectively. No share-based liabilities were paid in 2006. Included in Other Liabilities on the Company's Consolidated Balance Sheets at December 31, 2008 and December 31, 2007 are liabilities of \$47,000 and \$138,000, respectively, pertaining to SARs and other share-based performance awards.

Note 17.

Income Taxes

The Company and its 80% or more owned subsidiaries file a consolidated Federal income tax return on a June 30

Edgar Filing: INDEPENDENCE HOLDING CO - Form 10-K

fiscal year. The provision for income tax expense (benefit) attributable to income from continuing operations for the years ended December 31, 2008, 2007 and 2006 is as follows:

	2008	2007	2006
		(In thousands)	
CURRENT:			
U.S. Federal	\$ 1,913	\$ 6,669	\$ 3,376
State and Local	(211)	13	211
	1,702	6,682	3,587
DEFERRED:			
U.S. Federal	(17,533)	(5,868)	2,878
State and Local	(568)	(386)	167
	(18,101)	(6,254)	3,045
	\$ (16,399)	\$ 428	\$ 6,632

Taxes computed at the Federal statutory rate of 35% in 2008, 2007 and 2006, attributable to pretax income from continuing operations, are reconciled to the Company's actual income tax expense on income from continuing operations as follows:

	2008	2007	2006
		(In thousands)	
Tax computed at the statutory rate	\$ (14,309)	\$ 676	\$ 7,390
Dividends received deduction and tax exempt interest	(1,433)	(373)	(523)
State and local income taxes, net of Federal effect	(506)	(242)	246
Other, net	(151)	367	(481)
Income tax expense	\$ (16,399)	\$ 428	\$ 6,632

The deferred income tax benefit for the year ended December 31, 2008 allocated to stockholders' equity (principally for net unrealized losses on investment securities) was \$21,241,000, representing the increase in the related net deferred tax asset to \$30,267,000 at December 31, 2008 from \$9,026,000 at December 31, 2007.

Temporary differences between the Consolidated Financial Statement carrying amounts and tax bases of assets and liabilities that give rise to the deferred tax assets and liabilities at December 31, 2008 and 2007 are summarized below. The net deferred tax asset or liability is included in Other Assets or Other Liabilities, as appropriate, in the Consolidated Balance Sheets. The Company has certain tax-planning strategies that were used in determining that a valuation allowance was not necessary on its deferred tax assets at December 31, 2008 or 2007.

	2008		2007
		(In thousands)	
DEFERRED TAX ASSETS:			
Deferred insurance policy acquisition costs	\$ 3,806	\$	4,478
Unrealized losses on investment securities	36,256		9,762
Investment write-downs	11,145		164
Loss carryforwards	10,741		4,268
Other	3,607		2,861

Total gross deferred tax assets	65,555	21,533
---------------------------------	--------	--------

DEFERRED TAX LIABILITIES:

Deferred insurance policy acquisition costs	(16,185)	(10,940)
Insurance reserves	(6,227)	(5,331)
Investment in AMIC	(1,791)	(2,154)
Other	(1,414)	(2,207)

Total gross deferred tax liabilities	(25,617)	(20,632)
--------------------------------------	----------	----------

Net deferred tax asset	\$ 39,938	\$ 901
------------------------	-----------	--------

As of December 31, 2008, the Company had net operating tax loss carryforwards arising from limitations on offsetting non-life insurance company losses against life insurance company income. The non-life insurance company tax loss carryforwards amount to approximately \$24,618,000 at December 31, 2008, which expire as follows (in thousands):

2025	\$	498
2026		1,309
2027		7,294
2028		2,166
2029		13,351
	\$	24,618

In addition, as of December 31, 2008, the Company had capital tax loss carryforwards of approximately \$6,071,000 expiring in 2014 arising from the excess capital losses realized by the life insurance company group.

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the period in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Management believes that it is more likely than not that the Company will realize the benefits of these net deferred tax assets recorded at December 31, 2008.

The Internal Revenue Service is currently auditing the Company's 2003 and 2004 consolidated income tax returns and associated refund claims for the carryback of net operating losses and capital losses. Management believes that it has made adequate provision for all income tax uncertainties, such that the outcome of any unresolved issues or claims will not result in a material change to our financial position or results of operations.

Interest expense and penalties for the years ended December 31, 2008, 2007 and 2006 are insignificant, however \$969,000 of interest income related to tax refunds is included in selling, general and administrative expenses on the Consolidated Statement of Operations for the year ended December 31, 2008.

Net cash payments for income taxes were \$3,022,000, \$6,571,000 and \$6,802,000 in 2008, 2007 and 2006, respectively.

Note 18.**Commitments and Concentration of Credit Risk**

Certain subsidiaries of the Company are obligated under non-cancelable operating lease agreements for office space. Total rental expense for the years 2008, 2007 and 2006 for operating leases was \$4,048,000, \$4,004,000 and \$3,495,000, respectively.

The approximate minimum annual rental payments under operating leases that have remaining non-cancelable lease terms in excess of one year at December 31, 2008 are as follows (in thousands):

2009	\$	3,279
2010		3,152
2011		3,088
2012		2,183
2013		1,623
2014 and thereafter		5,560
Total	\$	18,885

At December 31, 2008, the Company had no investment securities of any one issuer or in any one industry which exceeded 10% of stockholders' equity, except for investments in obligations of the U.S. Government and its agencies, and mortgage-backed securities issued by GSEs, as summarized in Note 4.

Fixed maturities with a carrying value of \$10,340,000 and \$12,053,000 were on deposit with various state insurance departments at December 31, 2008 and 2007, respectively.

At December 31, 2008, the Company had net receivables of \$43,352,000 and \$18,542,000 from two different reinsurers which are both rated A+ by A.M. Best. These are the only reinsurers with a net receivable that individually exceed 10% of the stockholders' equity of the Company. The Company believes that these receivables are fully collectible.

We are involved in legal proceedings and claims that arise in the ordinary course of our businesses. We have established reserves that we believe are sufficient given information presently available relating to our outstanding legal proceedings and claims. We do not anticipate that the result of any pending legal proceeding or claim will have a material adverse effect on our financial condition or cash flows, although there could be such an effect on our results of operations for any particular period.

Note 19.**Acquisitions of Policy Blocks**

In addition to its core life and health lines of business, IHC has acquired blocks of business from other insurance companies, guaranty associations and liquidators. Most of the acquired business has been life, annuities, disability or credit business.

Effective April 1, 2008 Madison National Life acquired a block of life insurance and annuity policies by entering into a coinsurance agreement with an unaffiliated insurer whereby Madison National Life assumed 25% of the business covered under the agreement. Under terms of the acquisition, Madison National Life assumed administration of the policies on November 1, 2008.

In 2007, Madison National Life did not record any significant acquisitions.

During 2006, Madison National Life acquired a total of \$8.0 million of reserves in three transactions. In the principal transaction, effective October 1, 2006, Madison National Life entered into an agreement with an unaffiliated insurer to 100% coinsure life insurance policies totaling approximately \$7.7 million of reserves.

A summary of the policy blocks acquired by the Company as of the effective dates is as follows (in thousands):

	2008	2007	2006
Liabilities:			
Insurance reserves - life	\$ 32,183	\$ 104	\$ 7,872
Insurance reserves - health	-	-	49
Funds on deposit	32,251	-	-
Other policyholders' funds	4,700	-	71
Other	27	-	-
	69,161	104	7,992
Non-cash assets:			
Deferred acquisition costs	8,850	-	2,273
Other investments (policy loans)	2,971	-	442

Edgar Filing: INDEPENDENCE HOLDING CO - Form 10-K

Due and unpaid premiums	61	-	286
Due from reinsurers	-	-	1
Other	-	-	11
	11,882	-	3,013
Cash received	\$ 57,279	\$ 104	\$ 4,979

Note 20.**Reinsurance**

Standard Security Life and Madison National Life reinsure portions of certain business in order to limit the assumption of disproportionate risks. Standard Security Life and Madison National Life retain varying amounts of individual life or group life insurance. Amounts not retained are ceded to other companies on an automatic or facultative basis. In addition, Standard Security Life and Madison National Life participate in various coinsurance treaties on a quota share basis. Standard Security Life and Madison National Life are contingently liable with respect to reinsurance in the unlikely event that the assuming reinsurers are unable to meet their obligations. The ceding of reinsurance does not discharge the primary liability of the original insurer to the insured.

The effect of reinsurance on life insurance in-force, benefits to policyholders and premiums earned is as follows:

	GROSS AMOUNT	ASSUMED FROM OTHER COMPANIES	CEDED TO OTHER COMPANIES	NET AMOUNT	PERCENTAGE OF AMOUNT ASSUMED TO NET
	(In thousands)				
Life Insurance In-Force:					
December 31, 2008	\$ 7,224,141	\$ 554,219	\$ 2,326,940	\$ 5,451,420	10.2%
December 31, 2007	7,538,793	674,020	2,758,084	5,454,729	12.4%
December 31, 2006	7,636,981	779,198	3,196,064	5,220,115	14.9%
Benefits to Policyholders:

Included in Ceded to Other Companies in 2008, 2007 and 2006, respectively, are \$57,031,000, \$68,143,000 and \$56,854,000 of Premiums Earned and \$39,670,000, \$50,128,000 and \$39,611,000 of Benefits to Policyholders for business ceded to Independence American, a subsidiary of AMIC.

Note 21.**Segment Reporting**

The Insurance Group principally engages in the life and health insurance business. Interest expense, taxes, and general expenses associated with parent company activities are included in Corporate. Identifiable assets by segment are those assets that are utilized in each segment and are allocated based upon the mean reserves and liabilities of each such segment. Corporate assets are composed principally of cash equivalents, resale agreements, fixed maturities, equity securities, partnership interests and certain other investments. Information by business segment for the years ended December 31, 2008, 2007 and 2006 is presented below.

	2008	2007	2006
		(In thousands)

Corporate ^(C)	102,349		68,802
	\$ 1,273,894		\$ 1,306,955

(A)

The Medical Stop-Loss segment includes allocated goodwill of \$4,205,000 and \$3,321,000, respectively, at December 31, 2008 and 2007.

(B)

The Fully Insured Health segment includes allocated goodwill of \$43,904,000 at December 31, 2008 and 2007.

(C)

The Corporate segment includes the investment in AMIC (including goodwill) of \$45,439,000 and \$44,945,000 at December 31, 2008 and 2007, respectively.

Note 22.

Dividend Restrictions on Insurance Subsidiaries and IHC

Dividends from Madison National Life are subject to the prior notification to the Commissioner of Insurance of the State of Wisconsin if such dividend distribution exceeds 115% of the distribution for the corresponding period of the previous year. In addition, if such dividends, together with the fair market value of other dividends paid or credited and distributions made within the preceding twelve months, exceed the lesser of (i) total net gain from operations for

the preceding calendar year minus realized capital gains for that calendar year and (ii) 10% of surplus with regard to policyholders as of December 31 of the preceding year, such dividends may be paid so long as such dividends have not been disapproved by the Wisconsin Insurance Commissioner within 30 days of its receipt of notice thereof. No dividends were declared or paid by Madison National Life in 2008 or 2007. Madison National Life declared and paid a dividend of \$3,000,000 in 2006. Madison National Life's statutory capital and surplus was \$138,243,000 (unaudited) and \$136,569,000 as of December 31, 2008 and 2007, respectively. For the years ended December 31, 2008, 2007 and 2006, Madison National Life's statutory net income (loss) was \$(4,824,000) (unaudited), \$7,357,000 and 7,806,000, respectively.

The payment of dividends by Standard Security Life to its parent, Madison National Life, is subject to the prior notification to the New York State Insurance Department if such dividends, together with other dividends in such calendar year exceed the lesser of (i) 10% of surplus as regards policyholders as of the immediately preceding calendar year and (ii) net gain from operations for the immediately preceding calendar year, not including realized capital gains. Such dividends may be paid so long as they have not been disapproved by the New York State Department of Insurance within 30 days of its receipt of notice thereof. Standard Security Life declared and paid dividends to Madison National Life of \$4,500,000 and \$2,000,000 in 2008 and 2007, respectively. No dividends were declared or paid by Standard Security Life in 2006. Standard Security Life's statutory capital and surplus was 114,274,000 (unaudited) and \$109,648,000 as of December 31, 2008 and 2007, respectively. For the years ended December 31, 2008, 2007 and 2006, Standard Security Life's statutory net income (loss) was \$(3,803,000) (unaudited), \$4,617,000 and \$11,416,000, respectively.

Under Delaware law, IHC is permitted to pay dividends from surplus or net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year. IHC declared cash dividends of \$771,000, \$763,000 and \$757,000 in 2008, 2007 and 2006, respectively.

Note 23.**Other Comprehensive Income (Loss)**

The components of total comprehensive income include net income and certain amounts reported directly in stockholders' equity, principally the after-tax unrealized gains and losses on investment securities available-for-sale.

Amounts reported in stockholders' equity and included in total other comprehensive income for the years ended December 31, 2008, 2007 and 2006 are as follows:

	Before Tax	Tax Effect	Net of Tax
	(In thousands)		
<u>2008</u>			
Unrealized losses, arising during the year	\$ (114,993)	\$ 37,065	\$ (77,928)

(1)

Net investment income is allocated between product lines based on the mean reserve method.

(2)

Where possible, direct operating expenses are specifically identified and charged to product lines. Indirect expenses are allocated based on time studies; however, other acceptable methods of allocation might produce different results.

(3)

2008 and 2007 includes \$12,781,000 and \$15,742,000, respectively of unearned premium reserves related to the co-insurance agreement for the sale of the Company's credit segment.
