CITIZENS FINANCIAL SERVICES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1 - Basis of Presentation

Citizens Financial Services, Inc. (individually and collectively with its direct and indirect subsidiaries, the “Company”) is a Pennsylvania corporation organized as the holding company of its wholly owned subsidiary, First Citizens Community Bank (the “Bank”), and the Bank’s wholly owned subsidiary, First Citizens Insurance Agency, Inc. (“First Citizens Insurance”).

The accompanying consolidated financial statements have been prepared pursuant to rules and regulations of the Securities and Exchange Commission (“SEC”) and in conformity with U.S. generally accepted accounting principles. Because this report is based on an interim period, certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted. Certain of the prior year amounts have been reclassified to conform with the current year presentation. Such reclassifications had no effect on net income or stockholders’ equity. All material inter-company balances and transactions have been eliminated in consolidation.

In the opinion of management of the Company, the accompanying interim financial statements at June 30, 2015 and for the periods ended June 30, 2015 and 2014 include all adjustments, consisting of only normal recurring adjustments, necessary for a fair presentation of the financial condition and the results of operations for the period. In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and revenues and expenses for the period. The financial performance reported for the Company for the six month period ended June 30, 2015 is not necessarily indicative of the results to be expected for the full year. This information should be read in conjunction with the Company’s Annual Report on Form 10-K for the year ended December 31, 2014.

Note 2 - Earnings per Share

The following table sets forth the computation of earnings per share. Earnings per share calculations give retroactive effect to stock dividends declared by the Company.

	Three months ended June 30,		Six months ended June 30,	
	2015	2014	2015	2014
Net income applicable to common stock	$3,189,000	$3,365,000	$6,309,000	$6,541,000
Basic earnings per share computation				
Weighted average common shares outstanding	3,019,661	3,039,734	3,022,945	3,040,822
Earnings per share - basic	$1.06	$1.11	$2.09	$2.15
Diluted earnings per share computation				
Weighted average common shares outstanding for basic earnings per share	3,019,661	3,039,734	3,022,945	3,040,822
Add: Dilutive effects of restricted stock	1,064	927	534	405
Weighted average common shares outstanding for dilutive earnings per share	3,020,725	3,040,661	3,023,479	3,041,227
Earnings per share - diluted	$1.06	$1.11	$2.09	$2.15

For the three months ended June 30, 2015 and 2014, there were 3,287 and 2,188 shares, respectively, related to the restricted stock plan that were excluded from the diluted earnings per share calculations since they were anti-dilutive. These anti-dilutive shares had prices ranging from $44.50-$53.15 for the three month period ended June 30, 2015 and prices ranging from $50.15-$50.50 for the three month period ended June 30, 2014. For the six months ended June 30, 2015 and 2014, 3,287 and 2,409 shares, respectively, related to the restricted stock plan were excluded from the diluted earnings per share calculations since they were anti-dilutive. These anti-dilutive shares had prices ranging from $44.50-$53.15 for the six month period ended June 30, 2015 and prices ranging from $34.70-$50.50 for the six month period ended June 30, 2014.

Note 3 - Income Tax Expense

Income tax expense is less than the amount calculated using the statutory tax rate, primarily as a result of tax-exempt income earned from state and municipal securities and loans and investments in tax credits.

Investments in Qualified Affordable Housing Projects

As of June 30, 2015 and December 31, 2014, the Company was invested in four partnerships that provide affordable housing. The balance of the investments, which is included within other assets in the Consolidated Balance Sheet, was $1,088,000 and $1,218,000 as of June 30, 2015 and December 31, 2014, respectively. Investments purchased prior to January 1, 2015, are accounted for utilizing the effective yield method. As of June 30, 2015, the Company has $1,143,000 of tax credits remaining that will be recognized over seven years. Tax credits of $49,000 and $99,000 were recognized as a reduction of tax expense during the three and six months ended June 30, 2015, respectively.

Note 4 – Investments

The amortized cost, gross unrealized gains and losses, and fair value of investment securities at June 30, 2015 and December 31, 2014 were as follows (in thousands):

June 30, 2015	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Available-for-sale securities:				
U.S. agency securities	$ 167,187	$ 778	$ (385)	$ 167,580
Obligations of state and political subdivisions	93,796	2,829	(343)	96,282
Corporate obligations	12,713	141	(49)	12,805
Mortgage-backed securities in government sponsored entities	26,096	287	(33)	26,350
Equity securities in financial institutions	1,318	457	-	1,775
Total available-for-sale securities	$ 301,110	$ 4,492	$ (810)	$ 304,792
December 31, 2014				
Available-for-sale securities:				
U.S. agency securities	$ 150,847	$ 638	$ (600)	$ 150,885
U.S. treasury securities	4,944	-	(95)	4,849
Obligations of state and political subdivisions	101,281	3,854	(99)	105,036
Corporate obligations	13,853	190	(85)	13,958
Mortgage-backed securities in government sponsored entities	29,397	368	(37)	29,728
Equity securities in financial institutions	1,137	553	-	1,690

Total available-for-sale securities	$	301,459	$	5,603	$	(916)	$ 306,146

The following table shows the Company's gross unrealized losses and fair value of the Company's investments with unrealized losses that are not deemed to be other-than-temporarily impaired, aggregated by investment category and length of time, which individual securities have been in a continuous unrealized loss position, at June 30, 2015 and December 31, 2014 (in thousands). As of June 30, 2015, the Company owned 72 securities whose fair value was less than their cost basis.

6

June 30, 2015	Less than Twelve Months		Twelve Months or Greater		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
U.S. agency securities	$ 60,908	$ (302)	$ 10,910	$ (83)	$ 71,818	$ (385)
Obligations of state and political subdivisions	23,486	(263)	5,212	(80)	28,698	(343)
Corporate obligations	5,434	(31)	2,184	(18)	7,618	(49)
Mortgage-backed securities in government sponsored entities	4,616	(21)	273	(12)	4,889	(33)
Total securities	$ 94,444	$ (617)	$ 18,579	$ (193)	$ 113,023	$ (810)
December 31, 2014						
U.S. agency securities	$ 27,382	$ (110)	$ 43,642	$ (490)	$ 71,024	$ (600)
U.S. treasury securities	-	-	4,849	(95)	4,849	(95)
Obligations of states and political subdivisions	3,596	(19)	8,584	(80)	12,180	(99)
Corporate obligations	505	(1)	7,707	(84)	8,212	(85)
Mortgage-backed securities in government sponsored entities	5,025	(4)	2,229	(33)	7,254	(37)
Total securities	$ 36,508	$ (134)	$ 67,011	$ (782)	$ 103,519	$ (916)

As of June 30, 2015, the Company's investment securities portfolio contained unrealized losses on agency securities issued or backed by the full faith and credit of the United States government or are generally viewed as having the implied guarantee of the U.S. government, obligations of states and political subdivisions, corporate obligations and mortgage backed securities issued by government sponsored entities. For fixed maturity investments management considers whether the present value of cash flows expected to be collected are less than the security's amortized cost basis (the difference defined as the credit loss), the magnitude and duration of the decline, the reasons underlying the decline and the Company's intent to sell the security or whether it is more likely than not that the Company would be required to sell the security before its anticipated recovery in market value, to determine whether the loss in value is other than temporary. Once a decline in value is determined to be other than temporary, if the Company does not intend to sell the security, and it is more likely than not that it will not be required to sell the security before recovery of the security's amortized cost basis, the charge to earnings is limited to the amount of credit loss. Any remaining difference between fair value and amortized cost (the difference defined as the non-credit portion) is recognized in other comprehensive income, net of applicable taxes. Otherwise, the entire difference between fair value and amortized cost is charged to earnings. For equity securities where the fair value has been significantly below cost for one year, the Company's policy is to recognize an impairment loss unless sufficient evidence is available that the decline is not other than temporary and a recovery period can be predicted. The Company has concluded that any impairment of its investment securities portfolio outlined in the above table is not other than temporary and is the result of interest rate changes, sector credit rating changes, or issuer-specific rating changes that are not expected to result in the non-collection of principal and interest during the period.

Proceeds from sales of securities available-for-sale for the six months ended June 30, 2015 and 2014 were $18,393,000 and $12,151,000, respectively. For the three months ended June 30, 2015 and 2014, there were sales of $3,770,000 and $6,595,000, respectively, of available-for-sale securities. The gross gains and losses were as follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Gross gains	$ 175	$ 75	$ 312	$ 246
Gross losses	-	-	(11)	-
Net gains	$ 175	$ 75	$ 301	$ 246

Investment securities with an approximate carrying value of $170.9 million and $186.4 million at June 30, 2015 and December 31, 2014, respectively, were pledged to secure public funds and certain other deposits.

Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. The amortized cost and fair value of debt securities at June 30, 2015, by contractual maturity, are shown below (in thousands):

	Amortized Cost	Fair Value
Available-for-sale debt securities:		
Due in one year or less	$ 3,420	$ 3,459
Due after one year through five years	166,695	167,737
Due after five years through ten years	44,355	45,146
Due after ten years	85,322	86,675
Total	$ 299,792	$ 303,017

Note 5 – Loans

The Company grants loans primarily to customers throughout North Central Pennsylvania and Southern New York. Although the Company had a diversified loan portfolio at June 30, 2015 and December 31, 2014, a substantial portion of its debtors' ability to honor their contracts is dependent on the economic conditions within these regions. The following table summarizes the primary segments of the loan portfolio and how those segments are analyzed within the allowance for loan losses as of June 30, 2015 and December 31, 2014 (in thousands):

June 30, 2015	Total Loans	Individually evaluated for impairment	Collectively evaluated for impairment
Real estate loans:			
Residential	$ 181,566	$ 333	$ 181,233
Commercial and agricultural	224,450	5,578	218,872
Construction	8,025	-	8,025
Consumer	8,374	-	8,374

8

The segments of the Company's loan portfolio are disaggregated into classes to a level that allows management to monitor risk and performance. Residential real estate mortgages consists primarily of 15 to 30 year first mortgages on residential real estate, while residential real estate home equity loans are consumer purpose installment loans or lines of credit secured by a mortgage which is often a second lien on residential real estate with terms of 15 years or less. Commercial real estate loans are business purpose loans secured by a mortgage on commercial real estate. Agricultural real estate loans are loans secured by a mortgage on real estate used in agriculture production. Construction real estate loans are loans secured by residential or commercial real estate used during the construction phase of residential and commercial projects. Consumer loans are typically unsecured or primarily secured by assets other than real estate and overdraft lines of credit are typically secured by customer deposit accounts. Other commercial loans are loans for commercial purposes primarily secured by non-real estate collateral. Other agricultural loans are loans for agricultural purposes primarily secured by non-real estate collateral. State and political subdivision loans are loans to state and local municipalities for capital and operating expenses or tax free loans used to finance commercial development.

Management considers commercial loans, other agricultural loans, state and political subdivision loans, commercial real estate loans and agricultural real estate loans which are 90 days or more past due to be impaired. Management will also consider a loan impaired based on other factors it becomes aware of, including the customer's results of operations and cash flows or if the loan is modified in a troubled debt restructuring. In addition, certain residential mortgages, home equity and consumer loans that are cross collateralized with commercial relationships that are determined to be impaired may also be classified as impaired. Impaired loans are analyzed to determine if it is probable that all amounts will not be collected according to the contractual terms of the loan agreement. If management determines that the value of the impaired loan is less than the recorded investment in the loan (net of previous charge-offs, deferred loan fees or costs and unamortized premium or discount), impairment is recognized through an allocation of the allowance for loan losses or a charge-off to the allowance for loan losses.

The following table includes the recorded investment and unpaid principal balances for impaired financing receivables by class, with the associated allowance amount, if applicable (in thousands):

June 30, 2015	Unpaid Principal Balance	Recorded Investment With No Allowance	Recorded Investment With Allowance	Total Recorded Investment	Related Allowance

Credit Quality Information

For commercial real estate, agricultural real estate, construction, other commercial, other agricultural and state and political subdivision loans, management uses a nine grade internal risk rating system to monitor credit quality. The first five categories are considered not criticized and are aggregated as “Pass” rated. The criticized rating categories utilized by management generally follow bank regulatory definitions. The definitions of each rating are defined below:

- Pass (Grades 1-5) – These loans are to customers with credit quality ranging from an acceptable to very high quality and are protected by the current net worth and paying capacity of the obligor or by the value of the underlying collateral.

- Special Mention (Grade 6) – This loan grade is in accordance with regulatory guidance and includes loans where a potential weakness or risk exists, which could cause a more serious problem if not corrected.

- Substandard (Grade 7) – This loan grade is in accordance with regulatory guidance and includes loans that have a well-defined weakness based on objective evidence and be characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected.

- Doubtful (Grade 8) – This loan grade is in accordance with regulatory guidance and includes loans that have all the weaknesses inherent in a substandard asset. In addition, these weaknesses make collection or liquidation in full highly questionable and improbable, based on existing circumstances.
  - Loss (Grade 9) – This loan grade is in accordance with regulatory guidance and includes loans that are considered uncollectible, or of such value that continuance as an asset is not warranted.

To help ensure that risk ratings are accurate and reflect the present and future capacity of borrowers to repay the loan as agreed, the Company's loan rating process includes several layers of internal and external oversight. The Company's loan officers are responsible for the timely and accurate risk rating of the loans in each of their portfolios at origination and on an ongoing basis under the supervision of management. All commercial and agricultural loans are reviewed annually to ensure the appropriateness of the loan grade. In addition, the Company engages an external consultant on at least an annual basis to 1) review a minimum of 55% of the dollar volume of the commercial loan portfolio on an annual basis, 2) review new loans originated for over $1.0 million in the last year, 3) review a majority of borrowers with commitments greater than or equal to $1.0 million, 4) review selected loan relationships over $750,000 which are over 30 days past due, classified Special Mention, Substandard, Doubtful, or Loss, and 5) such other loans which management or the consultant deems appropriate.

The following tables represent credit exposures by internally assigned grades as of June 30, 2015 and December 31, 2014 (in thousands):

June 30, 2015	Pass	Special Mention	Substandard	Doubtful	Loss	Ending Balance
Real estate loans:						
Commercial	$ 177,073	$ 4,390	$ 12,220	$ 44	$ -	$ 193,727

loans									
Other agricultural loans		9,221		727		1,117	-	-	11,065
State and political subdivision loans		79,717		-		-	-	-	79,717
Total	$	324,932	$	17,482	$	17,756	$ -	$ -	$ 360,170

For residential real estate mortgages, home equity and consumer loans, credit quality is monitored based on whether the loan is performing or non-performing, which is typically based on the aging status of the loan and payment activity, unless a specific action, such as bankruptcy, repossession, death or significant delay in payment occurs to raise awareness of a possible credit event. Non-performing loans include those loans that are considered nonaccrual, described in more detail below and all loans past due 90 or more days and still accruing. The following table presents the recorded investment in those loan classes based on payment activity as of June 30, 2015 and December 31, 2014 (in thousands):

June 30, 2015	Performing	Non-performing	Total
Real estate loans:			
Mortgages	$ 119,649	$ 1,160	$ 120,809
Home Equity	60,608	149	60,757
Consumer	8,320	54	8,374
Total	$ 188,577	$ 1,363	$ 189,940
December 31, 2014			
Real estate loans:			
Mortgages	$ 121,968	$ 890	$ 122,858
Home Equity	62,296	284	62,580
Consumer	8,444	53	8,497
Total	$ 192,708	$ 1,227	$ 193,935

Aging Analysis of Past Due Financing Receivables

Management further monitors the performance and credit quality of the loan portfolio by analyzing the age of the portfolio as determined by the length of time a recorded payment is past due. The following table includes an aging analysis of the recorded investment of past due financing receivables as of June 30, 2015 and December 31, 2014 (in thousands):

June 30, 2015	30-59 Days Past Due	60-89 Days Past Due	90 Days Or Greater	Total Past Due	Current	Total Financing Receivables	90 Days or Greater and Accruing

Loans considered non-accrual	$ 48	$ 181	$ 2,014	$ 2,243	$ 4,356	$ 6,599	
Loans still accruing	1,431	641	836	2,908	544,598	547,506	
Total	$ 1,479	$ 822	$ 2,850	$ 5,151	$ 548,954	$ 554,105	

Nonaccrual Loans

Loans are considered for non-accrual status upon reaching 90 days delinquency, although the Company may be receiving partial payments of interest and partial repayments of principal on such loans or if full payment of principal and interest is not expected. Additionally, if management is made aware of other information including bankruptcy, repossession, death, or legal proceedings, the loan may be placed on non-accrual status. If a loan is 90 days or more past due and is well secured and in the process of collection, it may still be considered accruing.

The following table reflects the financing receivables on non-accrual status as of June 30, 2015 and December 31, 2014, respectively. The balances are presented by class of financing receivable (in thousands):

	June 30, 2015	December 31, 2014
Real estate loans:

Other commercial loans	1,118	714
Other agricultural loans	-	-
State and political subdivision loans	-	-
	$ 6,567	$ 6,599

Troubled Debt Restructurings

In situations where, for economic or legal reasons related to a borrower's financial difficulties, management may grant a concession for other than an insignificant period of time to the borrower that would not otherwise be considered, the related loan is classified as a Troubled Debt Restructuring (TDR). Management strives to identify borrowers in financial difficulty early and work with them to modify more affordable terms before their loan reaches nonaccrual status. These modified terms may include rate reductions, principal forgiveness, payment forbearance and other actions intended to minimize the economic loss and to avoid foreclosure or repossession of the collateral. In cases where borrowers are granted new terms that provide for a reduction of interest or principal, or both, management measures any impairment on the restructuring by calculating the present value of the revised loan terms and comparing this balance to the Company’s investment in the loan prior to the restructuring. As these loans are individually evaluated, they are excluded from pooled portfolios when calculating the allowance for loan and lease losses and a separate allocation within the allowance for loan and lease losses is provided. Management continually evaluates loans that are considered TDRs, including payment history under the modified loan terms, the borrower’s ability to continue to repay the loan based on continued evaluation of their operating results and cash flows from operations. Based on this evaluation management would no longer consider a loan to be a TDR when the relevant

facts support such a conclusion. As of June 30, 2015 and December 31, 2014, included within the allowance for loan losses are reserves of $41,000 and $26,000 respectively, that are associated with loans modified as TDRs.

Loan modifications that are considered TDRs completed during the three and six months ended June 30, 2015 and 2014 were as follows (dollars in thousands):

13

For the Three Months Ended June 30, 2015

	Number of contracts		Pre-modification Outstanding Recorded Investment		Post-Modification Outstanding Recorded Investment	
	Interest Modification	Term Modification	Interest Modification	Term Modification	Interest Modification	Term Modification
Real estate loans:						
Mortgages	-	1	$ -	$ 19	$ -	$ 19

Real estate loans:						
Commercial	-	2	$ -	$ 153	$ -	$ 153
Total	-	2	$ -	$ 153	$ -	$ 153

Recidivism, or the borrower defaulting on its obligation pursuant to a modified loan, results in the loan once again becoming a non-accrual loan. Recidivism occurs at a notably higher rate than do defaults on new origination loans, so modified loans present a higher risk of loss than do new origination loans. The following table presents the recorded investment in loans that were modified as TDRs during each 12-month period prior to the current reporting periods,

which begin January 1, 2015 and 2014 (six month periods) and April 1, 2015 and 2014 (3 month periods), respectively, and that subsequently defaulted during these reporting periods (dollars in thousands):

	For the Three Months Ended				For the Six Months Ended

Total	$ 7,098	$ (697)	$ 20	$ 330	$ 6,751

The Company allocates the ALLL based on the factors described below, which conform to the Company's loan classification policy and credit quality measurements. In reviewing risk within the Company's loan portfolio, management has determined there to be several different risk categories within the loan portfolio. The ALLL consists of amounts applicable to: (i) residential real estate loans; (ii) residential real estate home equity loans; (iii) commercial real estate loans; (iv) agricultural real estate loans; (v) real estate construction loans; (vi) other commercial and agricultural loans; (vii) consumer loans; (viii) other agricultural loans and (ix) state and political subdivision loans. Factors considered in this process include general loan terms, collateral, and availability of historical data to support the analysis. Historical loss percentages are calculated and used as the basis for calculating allowance allocations. Certain qualitative factors are evaluated to determine additional inherent risks in the loan portfolio, which are not necessarily reflected in the historical loss percentages. These factors are then added to the historical allocation percentage to get the adjusted factor to be applied to non-classified loans. The following qualitative factors are analyzed:

- Level of and trends in delinquencies, impaired/classified loans
  - Change in volume and severity of past due loans
  - Volume of non-accrual loans

Volume and severity of classified, adversely or graded loans;

- Level of and trends in charge-offs and recoveries;
- Trends in volume, terms and nature of the loan portfolio;
- Effects of any changes in risk selection and underwriting standards and any other changes in lending and recovery policies, procedures and practices;
- Changes in the quality of the Company's loan review system;
- Experience, ability and depth of lending management and other relevant staff;

- National, state, regional and local economic trends and business conditions
  - General economic conditions
  - Unemployment rates
  - Inflation rate/ Consumer Price Index
- Changes in values of underlying collateral for collateral-dependent loans;
- Industry conditions including the effects of external factors such as competition, legal, and regulatory requirements on the level of estimated credit losses; and
- Existence and effect of any credit concentrations, and changes in the level of such concentrations; and
- Any change in the level of board oversight.

The Company also maintains an unallocated allowance to account for any factors or conditions that may cause a potential loss but are not specifically addressed in the process described above. The Company analyzes its loan portfolio each quarter to determine the appropriateness of its ALLL.

Loans determined to be TDRs are impaired and for purposes of estimating the ALLL must be individually evaluated for impairment. In calculating the impairment, the Company calculates the present value utilizing an analysis of discounted cash flows. If the present value calculated is below the recorded investment of the loan, impairment is recognized by a charge to the provision for loan and lease losses and a credit to the ALLL.

We continually review the model utilized in calculating the required ALLL. The following qualitative factors experienced changes during the first six months of 2015:

- The qualitative factor for national, state, regional and local economic trends and business conditions was increased for all loan categories due to an increase in the unemployment rates in the local economy during the first six months of 2015.
- The qualitative factors for changes in levels of and trends in delinquencies, impaired/classified loans were decreased for commercial and agricultural real estate due to the decrease in the amount of loans classified as substandard.
- The qualitative factors for changes in levels of and trends in delinquencies, impaired/classified loans were increased for other commercial and agricultural loans due to an increase in the amount of loans classified as substandard.
- The qualitative factor for levels of and trends in charge-offs and recoveries was decreased for commercial and agricultural real estate and other commercial and agricultural loans due to the decrease in charge-offs compared to the prior year as charge-offs returned to historical levels for the Bank.
- The qualitative factor for experience, ability and depth of lending management and other relevant staff was decreased for commercial real estate, agricultural real estate, other commercial and other agricultural loans due to the length of time employees involved throughout the loan process have been in their positions.
- The qualitative factor for industry conditions, including the effects of external factors such as competition, legal, and regulatory requirements on the level of estimated credit losses was increased for commercial and agricultural related loans due to the decrease in the price received for product sold and the increase in feed costs that has occurred in 2015, which negatively affected customer earnings.
- The qualitative factor for levels of and trends in charge-offs and recoveries was increased for residential real estate loans due to the increase in charge-offs compared to historical norms for the Company.
- The qualitative factors for changes in levels of and trends in delinquencies, impaired/classified loans was increased for residential mortgages due to increases in the amount of delinquent loans.

The following qualitative factors experienced changes during the three months ended June 30, 2015:

- The qualitative factors for changes in levels of and trends in delinquencies, impaired/classified loans were decreased for commercial and agricultural real estate due to the decrease in the amount of loans classified as

substandard.

- The qualitative factors for changes in levels of and trends in delinquencies, impaired/classified loans were increased for other commercial and agricultural loans due to an increase in the amount of loans classified as substandard.

- The qualitative factor for levels of and trends in charge-offs and recoveries was decreased for commercial and agricultural real estate and other commercial and agricultural loans due to the decrease in charge-offs compared to the prior year as charge-offs returned to historical levels for the Bank.
- The qualitative factor for experience, ability and depth of lending management and other relevant staff was decreased for all commercial real estate, agricultural real estate, other commercial and other agricultural loans due to the length of time employees involved throughout the loan process have been in their positions.

The primary factor that resulted in negative provision for commercial and agricultural loans for the six month period ended June 30, 2015 was the reduction in the amount of special mention and substandard loans since December 31, 2014.

The following qualitative factors experienced changes during the first six months of 2014:

- The qualitative factor for national, state, regional and local economic trends and business conditions was decreased for all loan categories due to a decrease in the unemployment rates in the local economy.
- The qualitative factors for changes in levels of and trends in delinquencies, impaired/classified loans were decreased for commercial and agricultural real estate due to the decrease in the Company's classified loans to its lowest level in three years.
- The qualitative factors for changes in levels of and trends in delinquencies, impaired/classified loans were increased for other commercial and agricultural loans due to an increase in classified loans during the quarter.
- The qualitative factor for levels of and trends in charge-offs and recoveries was increased for commercial and agricultural real estate and other commercial and agricultural loans due to the increase in charge-offs compared to historical norms for the Bank.
- The qualitative factor for experience, ability and depth of lending management and other relevant staff was decreased for all loan categories due to the length of time employees involved throughout the loan process have been in their positions.

The following qualitative factors experienced changes during the three months ended June 30, 2014:

- The qualitative factor for national, state, regional and local economic trends and business conditions was decreased for all loan categories due to a decrease in the unemployment rates in the local economy.
- The qualitative factor for levels of and trends in charge-offs and recoveries was increased for commercial and agricultural real estate and other commercial and agricultural loans due to the increase in charge-offs compared to historical norms for the Bank.
- The qualitative factor for experience, ability and depth of lending management and other relevant staff was decreased for all loan categories due to the length of time employees involved throughout the loan process have been in their positions.
- The qualitative factors for changes in levels of and trends in delinquencies, impaired/classified loans were decreased for commercial and agricultural real estate due to the decrease in the Company's classified loans.
- The qualitative factors for changes in levels of and trends in delinquencies, impaired/classified loans were increased for other commercial and agricultural loans due to an increase in classified loans during the quarter.

The primary factor that resulted in negative provisions for certain portfolio segments for the three and six month periods ended June 30, 2014 was due to decreases in the outstanding balances for certain portfolio segments compared to December 31, 2013, a reduction in the amount of substandard loans and the decrease in the qualitative factor associated with the improvement in unemployment rates noted above.

Foreclosed Assets Held For Sale

Foreclosed assets acquired in settlement of loans are carried at fair value, less estimated costs to sell, and are included in other assets on the Consolidated Balance Sheet. As of June 30, 2015 and December 31, 2014 included with other assets are $1,815,000 and 1,792,000, respectively, of foreclosed assets. As of June 30, 2015, included within the foreclosed assets is $422,000 of consumer residential mortgages that were foreclosed on or received via a deed in lieu transaction prior to the period end. As of June 30, 2015, the Company has initiated formal foreclosure proceeds on $1,329,000 of consumer residential mortgages, which have not yet been transferred into foreclosed assets.

Note 6 – Federal Home Loan Bank Stock

The Bank is a member of the FHLB of Pittsburgh and, as such, is required to maintain a minimum investment in stock of the FHLB that varies with the level of advances outstanding with the FHLB. As of June 30, 2015 and December 31, 2014, the Bank's investment in FHLB stock was $1,590,000 and $1,761,000, respectively. The stock does not have a readily determinable fair value and as such is classified as restricted stock, carried at cost and evaluated by management. The stock's value is determined by the ultimate recoverability of the par value rather than by recognizing temporary declines. The determination of whether the par value will ultimately be recovered is influenced by criteria such as the following: (a) a significant decline in net assets of the FHLB as compared to the capital stock amount and the length of time this situation has persisted (b) commitments by the FHLB to make payments required by law or regulation and the level of such payments in relation to the operating performance (c) the impact of legislative and regulatory changes on the customer base of the FHLB and (d) the liquidity position of the FHLB. Management evaluated the stock and concluded that the stock was not impaired for the periods presented herein. Management considered that the FHLB's regulatory capital ratios have improved, liquidity appears adequate, new shares of FHLB stock continue to exchange hands at the $100 par value and the FHLB has repurchased shares of excess capital stock from its members and has paid a quarterly cash dividend.

Note 7 - Employee Benefit Plans

For additional detailed disclosure on the Company's pension and employee benefits plans, please refer to Note 11 of the Company's Consolidated Financial Statements included in the 2014 Annual Report on Form 10-K.

Noncontributory Defined Benefit Pension Plan

The Bank sponsors a noncontributory defined benefit pension plan ("Pension Plan") covering substantially all employees and officers that were hired prior to January 1, 2007. The Bank's funding policy is to make annual contributions, if needed, based upon the funding formula developed by the plan's actuary. Any employee with a hire date of January 1, 2007 or later is not eligible to participate in the Pension Plan. In lieu of the Pension Plan, employees with a hire date of January 1, 2007 or later are eligible to receive, after meeting certain length of service requirements, an annual discretionary 401(k) plan contribution from the Bank equal to a percentage of an employee's base compensation. The contribution amount, if any, is placed in a separate account within the 401(k) plan and is subject to a vesting requirement.

For employees who are eligible to participate in the Pension Plan, the Pension Plan requires benefits to be paid to eligible employees based primarily upon age and compensation rates during employment. Upon retirement or other termination of employment, employees can elect either an annuity benefit or a lump sum distribution of vested benefits in the Pension Plan.

The following sets forth the components of net periodic benefit costs of the Pension Plan for the three and six months ended June 30, 2015 and 2014, respectively (in thousands):

19

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Service cost	$ 78	$ 63	$ 132	$ 153
Interest cost	90	111	153	207
Expected return on plan assets	(172)	(215)	(290)	(393)
Net amortization and deferral	45	(43)	76	25
Net periodic cost (benefit)	$ 41	$ (84)	$ 71	$ (8)

The Company expects to contribute $400,000 to the Pension Plan in 2015.

Defined Contribution Plan

The Company sponsors a voluntary 401(k) savings plan which eligible employees can elect to contribute up to the maximum amount allowable not to exceed the limits of IRS Code Sections 401(k). Under the plan, the Company also makes required contributions on behalf of the eligible employees. The Company’s contributions vest immediately. Contributions by the Company totaled $155,000 and $146,000 for the six months ended June 30, 2015 and 2014, respectively. For the three months ended June 30, 2015 and 2014, contributions by the Company totaled $93,000 and $88,000, respectively.

Directors’ Deferred Compensation Plan

The Company’s directors may elect to defer all or portions of their fees until their retirement or termination from service. Amounts deferred under the plan earn interest based upon the highest current rate offered to certificate of deposit customers. Amounts deferred under the plan are not guaranteed and represent a general liability of the Company. At June 30, 2015 and December 31, 2014, an obligation of $945,000 and $969,000, respectively, was included in other liabilities for this plan in the Consolidated Balance Sheet. Amounts included in interest expense on the deferred amounts totaled $5,000 and $6,000 for each of the three months ended June 30, 2015 and 2014. For the six months ended June 30, 2015 and 2014, amounts included in interest expense on the deferred amounts totaled $12,000 and $11,000, respectively.

Restricted Stock Plan

The Company maintains a Restricted Stock Plan (the “Plan”) whereby employees and non-employee corporate directors are eligible to receive awards of restricted stock based upon performance related requirements. Awards granted under the Plan are in the form of the Company’s common stock and are subject to certain vesting requirements including continuous employment or service with the Company. A total of 100,000 shares of the Company’s common stock have been authorized under the Plan, which terminates in April 2016. As of June 30, 2015, 60,662 shares remain available to be issued under the Plan. The Plan assists the Company in attracting, retaining and motivating employees to make substantial contributions to the success of the Company and to increase the emphasis on the use of equity as a key component of compensation.

The following table details the vesting, awarding and forfeiting of restricted shares during 2015 and 2014:

Three months ended June 30,		Six months ended June 30,	
2015	2014	2015	2014

	Unvested Shares	Weighted Average Market Price	Unvested Shares	Weighted Average Market Price	Unvested Shares	Weighted Average Market Price	Unvested Shares	Weighted Average Market Price
Outstanding, beginning of period	6,998	$ 48.61	6,240	$ 43.55	6,971	$ 48.55	7,172	$ 42.02
Granted	3,340	49.87	3,206	53.10	3,496	50.02	3,598	52.82
Forfeited	-	-	-	-	-	-	-	-
Vested	(3,320)	45.62	(2,259)	42.06	(3,449)	45.80	(3,583)	40.30
Outstanding, end of period	7,018	$ 50.63	7,187	$ 48.28	7,018	$ 50.63	7,187	$ 48.28

Compensation cost related to restricted stock is recognized based on the market price of the stock at the grant date over the vesting period. Compensation expense related to restricted stock was $85,000 and $73,000 for the six months ended June 30, 2015 and 2014, respectively. For the three months ended June 30, 2015 and 2014, compensation expense totaled $43,000 and $37,000, respectively. At June 30, 2015 the total compensation cost related to nonvested awards that has not yet been recognized was $355,000, which is expected to be recognized over the next 2.83 years.

Supplemental Executive Retirement Plan

The Company maintains a non-qualified supplemental executive retirement plan ("SERP") for certain executives to compensate those executive participants in the Company's noncontributory defined benefit pension plan whose benefits are limited by compensation limitations under current tax law. At June 30, 2015 and December 31, 2014, an obligation of $1,269,000 and $1,198,000, respectively, was included in other liabilities for this plan in the Consolidated Balance Sheet. Expenses related to this plan totaled $71,000 and $76,000 for the six months ended June 30, 2015 and 2014, respectively. For the three months ended June 30, 2015 and 2014, expenses totaled $36,000 and $38,000, respectively.

Note 8 – Accumulated Comprehensive Income

The following tables present the changes in accumulated other comprehensive income by component net of tax for the three and six months ended June 30, 2015 and 2014 (in thousands):

	Three months ended June 30, 2015		
	Unrealized gain (loss) on available for sale securities (a)	Defined Benefit Pension Items (a)	Total
Balance as of March 31, 2015	$ 3,897	$ (2,294)	$ 1,603
Other comprehensive income (loss) before reclassifications (net of tax)	(1,351)	-	(1,351)
Amounts reclassified from accumulated other comprehensive income (net of tax)	(116)	35	(81)
Net current period other comprehensive income (loss)	(1,467)	35	(1,432)
Balance as of June 30, 2015	$ 2,430	$ (2,259)	$ 171

	Six months ended June 30, 2015		
	Unrealized gain (loss) on available for sale securities (a)	Defined Benefit Pension Items (a)	Total
Balance as of December 31, 2014	$ 3,093	$ (2,326)	$ 767
Other comprehensive income (loss) before reclassifications (net of tax)	(464)	-	(464)
Amounts reclassified from accumulated other comprehensive income (net of tax)	(199)	67	(132)
Net current period other comprehensive income (loss)	(663)	67	(596)
Balance as of June 30, 2015	$ 2,430	$ (2,259)	$ 171

	Three months ended June 30, 2014		
			Total

	Unrealized gain (loss) on available for sale securities (a)		Defined Benefit Pension Items (a)		
Balance as of March 31, 2014	$	1,264	$ (1,110)	$	154
Other comprehensive income (loss) before reclassifications (net of tax)		986	-		986
Amounts reclassified from accumulated other comprehensive income (net of tax)		(49)	9		(40)
Net current period other comprehensive income (loss)		937	9		946
Balance as of June 30, 2014	$	2,201	$ (1,101)	$	1,100

	Six months ended June 30, 2014				
	Unrealized gain (loss) on available for sale securities (a)		Defined Benefit Pension Items (a)		Total
Balance as of December 31, 2013	$	(108)	$ (1,117)	$	(1,225)
Other comprehensive income (loss) before reclassifications (net of tax)		2,471	-		2,471
Amounts reclassified from accumulated other comprehensive income (net of tax)		(162)	16		(146)
Net current period other comprehensive income (loss)		2,309	16		2,325
Balance as of June 30, 2014	$	2,201	$ (1,101)	$	1,100

(a) Amounts in parentheses indicate debits to the Consolidated Balance Sheet

The following table presents the significant amounts reclassified out of each component of accumulated other comprehensive income for the three and six months ended June 30, 2015 and 2014 (in thousands):

Details about accumulated other comprehensive income	Amount reclassified from accumulated comprehensive income (a)		Affected line item in the statement where net Income is presented
	Three Months Ended June 30,		
	2015	2014	
Unrealized gains and losses on available for sale securities			
	$ 175	$ 75	Investment securities gains, net
	(59)	(26)	Provision for income taxes
	$ 116	$ 49	Net of tax
Defined benefit pension items			
	$ (54)	$ (13)	Salaries and employee benefits
	19	4	Provision for income taxes
	$ (35)	$ (9)	Net of tax
Total reclassifications	$ 81	$ 40	
	Six Months Ended June 30,		
	2015	2014	
Unrealized gains and losses on available for sale securities			
	$ 301	$ 246	Investment securities gains, net
	(102)	(84)	Provision for income taxes
	$ 199	$ 162	Net of tax
Defined benefit pension items			
	$ (102)	$ (25)	Salaries and employee benefits
	35	9	Provision for income taxes
	$ (67)	$ (16)	Net of tax
Total reclassifications	$ 132	$ 146	

(a) Amounts in parentheses indicate expenses and other amounts
indicate income on the Consolidated Statement of Income

Note 9 – Fair Value Measurements

The Company established a hierarchal disclosure framework associated with the level of pricing observability utilized in measuring assets and liabilities at fair value. The three broad levels defined by this hierarchy are as follows:

Level I: Quoted prices are available in active markets for identical assets or liabilities as of the reported date.

Level II: Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reported date. The nature of these assets and liabilities include items for which quoted prices are available but traded less frequently, and items that are fair valued using other financial instruments, the parameters of which can be directly observed.

Level III: Assets and liabilities that have little to no pricing observability as of the reported date. These items do not have two-way markets and are measured using management's best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation.

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality, the Company's creditworthiness, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. Our valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. Transfers between levels of the fair value hierarchy are recognized on the actual date of the event or circumstances that caused the transfer, which generally coincides with the Company's monthly and/or quarterly valuation process.

Financial Instruments Recorded at Fair Value on a Recurring Basis

The fair values of securities available for sale are determined by quoted prices in active markets, when available, and classified as Level I. If quoted market prices are not available, the fair value is determined by a matrix pricing, which is a mathematical technique, widely used in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted securities and classified as Level II. The fair values consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things.

The following tables present the assets and liabilities reported on the Consolidated Balance Sheet at their fair value on a recurring basis as of June 30, 2015 and December 31, 2014 by level within the fair value hierarchy (in thousands). Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

June 30, 2015	Level I	Level II	Level III	Total
Assets				
Securities available for sale:				
U.S. Agency securities	$ -	$ 167,580	$ -	$ 167,580
Obligations of state and political subdivisions	-	96,282	-	96,282
Corporate obligations	-	12,805	-	12,805
Mortgage-backed securities in				

government sponsored entities	-	26,350	-	26,350
Equity securities in financial institutions	1,775	-	-	1,775

December 31, 2014	Level I	Level II	Level III	Total
Securities available for sale:				
U.S. agency securities	$ -	$ 150,885	$ -	$ 150,885
U.S. treasuries securities	-	4,849	-	4,849
Obligations of state and political subdivisions	-	105,036	-	105,036
Corporate obligations	-	13,958	-	13,958
Mortgage-backed securities in government sponsored entities	-	29,728	-	29,728
Equity securities in financial institutions	1,690	-	-	1,690

Financial Instruments, Non-Financial Assets and Non-Financial Liabilities Recorded at Fair Value on a Nonrecurring Basis

The Company may be required, from time to time, to measure certain financial assets, financial liabilities, non-financial assets and non-financial liabilities at fair value on a nonrecurring basis in accordance with U.S. generally accepted accounting principles. These include assets that are measured at the lower of cost or market value that were recognized at fair value below cost at the end of the period. Certain non-financial assets measured at fair value on a non-recurring basis include foreclosed assets (upon initial recognition or subsequent impairment). Non-financial assets measured at fair value on a non-recurring basis during 2015 and 2014 include certain foreclosed assets which, upon initial recognition, were remeasured and reported at fair value through a charge-off to the allowance for possible loan losses and certain foreclosed assets which, subsequent to their initial recognition, were remeasured at fair value through a write-down included in other non-interest expense.

- Impaired Loans - Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, management measures impairment using one of several methods, including collateral value, liquidation value and discounted cash flows. Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans. Collateral values are estimated using Level II inputs based on observable market data and Level III inputs based on customized discounting criteria. For a majority of impaired real estate related loans, the Company obtains a current external appraisal. Other valuation techniques are used as well, including internal valuations, comparable property analysis and contractual sales information.
- Other Real Estate owned – Other real estate owned, which is obtained through the Bank’s foreclosure process, is valued utilizing the appraised collateral value. Collateral values are estimated using Level II inputs based on observable market data and Level III inputs based on customized discounting criteria. At the time the foreclosure is completed, the Company obtains an updated external appraisal.

Assets measured at fair value on a nonrecurring basis as of June 30, 2015 and December 31, 2014 are included in the

table below (in thousands):

June 30, 2015	Level I	Level II	Level III	Total
Impaired Loans	$ -	$ -	$ 7,885	$ 7,885
Other real estate owned	-	-	1,815	1,815
December 31, 2014				
Impaired Loans	$ -	$ -	$ 8,724	$ 8,724
Other real estate owned	-	-	1,792	1,792

The following table provides a listing of the significant unobservable inputs used in the fair value measurement process for items valued utilizing level III techniques.

Quantitative Information about Level 3 Fair Value Measurements

June 30, 2015	Fair Value	Valuation Technique(s)	Unobservable input	Range	Weighted average
Impaired Loans	$ 206	Discounted Cash Flows	Change in interest rates	0-5.5%	3.21%
	7,679	Appraised Collateral Values	Discount for time since appraisal	0-30%	17.09%
			Selling costs	5%-10%	9.28%
			Holding period	0 - 18 months	12 months
Other real estate owned	1,815	Appraised Collateral Values	Discount for time since appraisal	0-20%	20%
			Selling costs	4%-10%	9%
			Holding period	0 - 18 months	12
December 31, 2014	**Fair Value**	**Valuation Technique(s)**	**Unobservable input**	**Range**	
Impaired Loans	$ 230	Discounted Cash Flows	Change in interest rates	0-5.5%	1.99%
	8,494	Appraised Collateral Values	Discount for time since appraisal	0-30%	22.00%
			Selling costs	4%-10%	8.55%
			Holding period	0 - 18 months	15 months
Other real estate owned	1,792	Appraised Collateral Values	Discount for time since appraisal	0-20%	20%
			Selling costs	4%-10%	9%
			Holding period	0 - 18 months	12

The fair values of the Company’s financial instruments are as follows (in thousands):

June 30, 2015	Carrying Amount	Fair Value	Level I	Level II	Level III
Financial assets:					
Cash and due from banks	$ 10,912	$ 10,912	$ 10,912	$ -	$ -

Fair value is determined based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions can significantly affect the estimates.

Fair values have been determined by the Company using historical data, as generally provided in the Company's regulatory reports, and an estimation methodology suitable for each category of financial instruments. The Company's fair value estimates, methods and assumptions are set forth below for the Company's other financial instruments.

Cash and Cash Equivalents:

The carrying amounts for cash and cash equivalents approximate fair value because they have original maturities of 90 days or less and do not present unanticipated credit concerns.

Accrued Interest Receivable and Payable:

The carrying amounts for accrued interest receivable and payable approximate fair value because they are generally received or paid in 90 days or less and do not present unanticipated credit concerns.

Interest bearing time deposits with other banks:

The fair value of interest bearing time deposits with other banks is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities.

Available-For-Sale Securities:

The fair values of securities available for sale are determined by quoted prices in active markets, when available, and classified as Level I. If quoted market prices are not available, the fair value is determined by a matrix pricing, which is a mathematical technique, widely used in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted securities and classified as Level II. The fair values consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things.

Loans held for sale:

The carrying amount for loans held for sale approximates fair value as the loans are only held for less than a week from origination.

Loans:

Fair values are estimated for portfolios of loans with similar financial characteristics. The fair value of performing loans has been estimated by discounting expected future cash flows. The discount rate used in these calculations is derived from the Treasury yield curve adjusted for credit quality, operating expense and prepayment option price, and is calculated by discounting scheduled cash flows through the estimated maturity using estimated market discount rates that reflect the credit and interest rate risk inherent in the loan. The estimate of maturity is based on the Company's historical experience with repayments for each loan classification, modified as required by an estimate of the effect of current economic and lending conditions.

Bank Owned Life Insurance:

The carrying value of bank owned life insurance approximates fair value based on applicable redemption provisions.

Regulatory Stock:

The carrying value of regulatory stock approximates fair value based on applicable redemption provisions.

Deposits:

The fair value of deposits with no stated maturity, such as noninterest-bearing demand deposits, savings and NOW accounts, and money market accounts, is equal to the amount payable on demand. The fair value of certificates of deposit is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities.

The deposits' fair value estimates do not include the benefit that results from the low-cost funding provided by the deposit liabilities compared to the cost of borrowing funds in the market, commonly referred to as the core deposit intangible.

Borrowed Funds:

Rates available to the Company for borrowed funds with similar terms and remaining maturities are used to estimate the fair value of borrowed funds.

Note 10 – Recent Accounting Pronouncements

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (a new revenue recognition standard). The Update's core principle is that a company will recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In addition, this update specifies the accounting for certain costs to obtain or fulfill a contract with a customer and expands disclosure requirements for revenue recognition. This Update is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. The Company is evaluating the effect of adopting this new accounting Update.

In June 2014, the FASB issued ASU 2014-11, Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures. The amendments in this Update change the accounting for repurchase-to-maturity transactions to secured borrowing accounting. For repurchase financing arrangements, the amendments require separate accounting for a transfer of a financial asset executed contemporaneously with a repurchase agreement with the same counterparty, which will result in secured borrowing accounting for the repurchase agreement. The amendments also require enhanced disclosures. The accounting changes in this Update are effective for the first interim or annual period beginning after December 15, 2014. An entity is required to present changes in accounting for transactions outstanding on the effective date as a cumulative-effect adjustment to retained earnings as of the beginning of the period of adoption. Earlier application is prohibited. The disclosure for certain transactions accounted for as a sale is required to be presented for interim and annual periods beginning after December 15, 2014, and the disclosure for repurchase agreements, securities lending transactions, and repurchase-to-maturity transactions accounted for as secured borrowings is required to be presented for annual periods beginning after December 15, 2014, and for interim periods beginning after March 15, 2015. The disclosures are not required to be presented for comparative periods before the effective date. This Update did not have a significant impact on the Company’s financial statements.

In August 2014, the FASB issued ASU 2014-15, Presentation of Financial Statements -Going Concern (Subtopic 205-40). The amendments in this Update provide guidance in accounting principles generally accepted in the United States of America about management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures. The amendments in this Update are effective for the annual period ending after December 15, 2016, and for annual periods and interim periods thereafter. Early application is permitted. This Update is not expected to have a significant impact on the Company’s financial statements.

In November 2014, the FASB issued ASU 2014-17, Business Combinations (Topic 805): Pushdown Accounting. The amendments in this Update apply to the separate financial statements of an acquired entity and its subsidiaries that are a business or nonprofit activity (either public or nonpublic) upon the occurrence of an event in which an acquirer (an individual or an entity) obtains control of the acquired entity. An acquired entity may elect the option to apply pushdown accounting in the reporting period in which the change-in-control event occurs. If pushdown accounting is not applied in the reporting period in which the change-in-control event occurs, an acquired entity will have the option to elect to apply pushdown accounting in a subsequent reporting period to the acquired entity's most recent change-in-control event. The amendments in this Update are effective on November 18, 2014. After the effective date, an acquired entity can make an election to apply the guidance to future change-in-control events or to its most recent change-in-control event. This Update did not have a significant impact on the Company’s financial statements.

In February 2015, the FASB issued ASU 2015-02, Consolidation (Topic 810). The amendments in this Update affect reporting entities that are required to evaluate whether they should consolidate certain legal entities. All legal entities are subject to reevaluation under the revised consolidation model. Specifically, the amendments (1) Modify the evaluation of whether limited partnerships and similar legal entities are variable interest entities (VIEs) or voting interest entities; (2) Eliminate the presumption that a general partner should consolidate a limited partnership; (3) Affect the consolidation analysis of reporting entities that are involved with VIEs, particularly those that have fee arrangements and related party relationships; (4) Provide a scope exception from consolidation guidance for reporting entities with interests in legal entities that are required to comply with or operate in accordance with requirements that are similar to those in Rule 2a-7 of the Investment Company Act of 1940 for registered money market funds. The amendments in this Update are effective for public business entities for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2015. For all other entities, the amendments in this Update are effective for fiscal years beginning after December 15, 2016, and for interim periods within fiscal years beginning after December 15, 2017. This Update is not expected to have a significant impact on the Company’s financial statements.

In April 2015, the FASB issued ASU 2015-03, Interest-Imputation of Interest (Subtopic 835-30), as part of its initiative to reduce complexity in accounting standards. To simplify presentation of debt issuance costs, the amendments in this Update require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by the amendments in this Update. For public business entities, the amendments in this Update are effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. For all other entities, the amendments in this Update are effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within fiscal years beginning after December 15, 2016. An entity should apply the new guidance on a retrospective basis, wherein the balance sheet of each individual period presented should be adjusted to reflect the period-specific effects of applying the new guidance. This Update is not expected to have a significant impact on the Company’s financial statements.

In May 2015, the FASB issued ASU 2015-08, Business Combinations - Pushdown Accounting - Amendment to SEC Paragraphs Pursuant to Staff Accounting Bulletin No. 115. This ASU was issued to amend various SEC paragraphs pursuant to the issuance of Staff Accounting Bulletin No. 115. This Update is not expected to have a significant impact on the Company's financial statements.

In June 2015, the FASB issued ASU 2015-10, Technical Corrections and Improvements. The amendments in this Update represent changes to clarify the Codification, correct unintended application of guidance, or make minor improvements to the Codification that are not expected to have a significant effect on current accounting practice or create a significant administrative cost to most entities. Transition guidance varies based on the amendments in this Update. The amendments in this Update that require transition guidance are effective for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early adoption is permitted, including adoption in an interim period. All other amendments will be effective upon the issuance of this Update. This Update is not expected to have a significant impact on the Company's financial statements.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

We have made forward-looking statements in this document, and in documents that we incorporate by reference, that are subject to risks and uncertainties. Forward-looking statements include information concerning possible or assumed future results of operations of Citizens Financial Services, Inc., First Citizens Community Bank, First Citizens Insurance Agency, Inc. or the combined Company. When we use words such as "believes," "expects," "anticipates," or similar expressions, we are making forward-looking statements. For a variety of reasons, actual results could differ materially from those contained in or implied by forward-looking statements. The Company cautions readers that the following important factors, among others, could in the future affect the Company's actual results and could cause the Company's actual results for subsequent periods to differ materially from those expressed in any forward-looking statement:

- Interest rates could change more rapidly or more significantly than we expect.
- The economy could change significantly in an unexpected way, which would cause the demand for new loans and the ability of borrowers to repay outstanding loans to change in ways that our models do not anticipate.
- The financial markets could suffer a significant disruption, which may have a negative effect on our financial condition and that of our borrowers, and on our ability to raise money by issuing new securities.
- It could take us longer than we anticipate implementing strategic initiatives designed to increase revenues or manage expenses, or we may be unable to implement those initiatives at all.
- Acquisitions and dispositions of assets could affect us in ways that management has not anticipated.
- We may become subject to new legal obligations or the resolution of litigation may have a negative effect on our financial condition or operating results.
- We may become subject to new and unanticipated accounting, tax, or regulatory practices or requirements.
- We could experience greater loan delinquencies than anticipated, adversely affecting our earnings and financial condition.
- We could also experience greater losses than expected due to the ever increasing volume of information theft and fraudulent scams impacting our customers and the banking industry.
- We could lose the services of some or all of our key personnel, which would negatively impact our business because of their business development skills, financial expertise, lending experience, technical expertise and market area knowledge.
- The agricultural economy is subject to extreme swings in both the costs of resources and the prices received from the sale of products, which could negatively impact our customers.
- Exploration and drilling of the natural gas reserves in our market area may be affected by federal, state and local laws and regulations such as restrictions on production, permitting, changes in taxes and environmental protection, which could negatively impact our customers and, as a result, negatively impact our loan and deposit volume and loan quality.
- Similarly, customers dependent on the exploration and drilling of the natural gas reserves may be dependent on the market price of natural gas. As a result, decreases in the market price of natural gas could also negatively impact our customers.

Additional factors that may affect our results are discussed under "Part II – Item 1A – Risk Factors" in this report and in the Company's 2014 Annual Report on Form 10-K under "Item 1.A/ Risk Factors." Except as required by applicable law and regulation, we assume no obligation to update or revise any forward-looking statements after the date on which they are made.

30

Introduction

The following is management's discussion and analysis of the financial condition and results of operations presented in the accompanying consolidated financial statements for the Company. Our Company's consolidated financial condition and results of operations consist almost entirely of the Bank's financial condition and results of operations. Management's discussion and analysis should be read in conjunction with the preceding financial statements presented under Part I. The results of operations for the three and six months ended June 30, 2015 are not necessarily indicative of the results you may expect for the full year.

The Company currently engages in the general business of banking throughout our service area of Clinton, Potter, Tioga and Bradford counties in North Central Pennsylvania and Allegany, Steuben, Chemung and Tioga counties in Southern New York. We maintain our main office in Mansfield, Pennsylvania. Presently we operate 20 banking facilities, 18 of which operate as bank branches. In Pennsylvania, we have branch offices located in Mansfield, Blossburg, Ulysses, Genesee, Wellsboro, Troy, Sayre, Canton, Gillett, Millerton, LeRaysville, Towanda, Rome, the Wellsboro Weis Market store, the Mansfield Wal-Mart Super Center and Mill Hall, which was opened in 2015. We also have a loan production office in Dallas, Pennsylvania. In New York, we have a branch office in Wellsville, Allegany County.

In the second quarter of 2015, the Company entered into a definitive agreement to acquire The First National Bank of Fredericksburg, which is expected to close in the fourth quarter of 2015.

Risk Management

Risk identification and management are essential elements for the successful management of the Company. In the normal course of business, the Company is subject to various types of risk, including interest rate, credit, liquidity, reputational and regulatory risk.

Interest rate risk is the sensitivity of net interest income and the market value of financial instruments to the direction and frequency of changes in interest rates. Interest rate risk results from various re-pricing frequencies and the maturity structure of the financial instruments owned by the Company. The Company uses its asset/liability and funds management policy to control and manage interest rate risk.

Credit risk represents the possibility that a customer may not perform in accordance with contractual terms. Credit risk results from loans with customers and the purchasing of securities. The Company's primary credit risk is in the loan portfolio. The Company manages credit risk by adhering to an established credit policy and through a disciplined evaluation of the adequacy of the allowance for loan losses. Also, the investment policy limits the amount of credit risk that may be taken in the investment portfolio.

Liquidity risk represents the inability to generate or otherwise obtain funds at reasonable rates to satisfy commitments to borrowers and obligations to depositors. The Company has established guidelines within its asset/liability and funds management policy to manage liquidity risk. These guidelines include, among other things, contingent funding alternatives.

Reputational risk, or the risk to our business, earnings, liquidity, and capital from negative public opinion, could result from our actual or alleged conduct in a variety of areas, including legal and regulatory compliance, lending practices, corporate governance, litigation, ethical issues, or inadequate protection of customer information. We expend significant resources to comply with regulatory requirements. Failure to comply could result in reputational harm or significant legal or remedial costs. Damage to our reputation could adversely affect our ability to retain and attract new customers, and adversely impact our earnings and liquidity.

Regulatory risk represents the possibility that a change in law, regulations or regulatory policy may have a material effect on the business of the Company. We cannot predict what legislation might be enacted or what regulations might be adopted, or if adopted, the effect thereof on our operations.

Competition

The banking industry in the Bank's service area continues to be extremely competitive, both among commercial banks and with financial service providers such as consumer finance companies, thrifts, investment firms, mutual funds, insurance companies, credit unions and internet entities. The increased competition has resulted from changes in the legal and regulatory guidelines as well as from economic conditions, specifically, the additional wealth resulting from the exploration of natural gas in our primary market and the limited loan growth opportunities in our primary market and surrounding areas. Mortgage banking firms, financial companies, financial affiliates of industrial companies, brokerage firms, retirement fund management firms and even government agencies provide additional competition for loans and other financial services. The Bank is generally competitive with all competing financial institutions in its service area with respect to interest rates paid on time and savings deposits, service charges on deposit accounts and interest rates charged on loans.

Trust and Investment Services; Oil and Gas Services

Our Investment and Trust Services Department offers professional trust administration, investment management services, estate planning and administration, and custody of securities. Assets held by the Company in a fiduciary or agency capacity for its customers are not included in the Consolidated Financial Statements since such items are not assets of the Company. Revenues and fees of the Trust Department are reflected in the Company's financial statements. As of June 30, 2015 and December 31, 2014, the Trust Department had $96.5 million and $100.7 million of assets under management, respectively. The decrease in assets under management was primarily due to one trust account closing in the second quarter of 2015.

Our Investment Representatives offer full service brokerage services and financial planning throughout the Bank's market area. Products such as mutual funds, annuities, health and life insurance are made available through our insurance subsidiary, First Citizens Insurance Agency, Inc. The assets associated with these products are not included in the Consolidated Financial Statements since such items are not assets of the Company. Assets owned and invested by customers of the Bank through the Bank's Investment Representatives increased from $111.7 million at December 31, 2014 to $116.8 million at June 30, 2015. Fee income from the sale of these products is reflected in the Company's financial statements as a component of non-interest income in the Consolidated Statement of Income. Management believes that there are opportunities to increase non-interest income through these products and services, and as such, has added additional resources to support these opportunities.

In addition to the trust and investment services offered we have an oil and gas division, which serves as a network of experts to assist our customers through various oil and gas specific leasing matters from lease negotiations to establishing a successful approach to personal wealth management. As of June 30, 2015, customers owning 8,300 acres have signed agreements with the Bank that provide for the Bank to manage oil and gas matters related to the customers land, which may include negotiating lease payments and royalty percentages, resolving leasing issues, accounting for and ensuring the accuracy of royalty checks, distributing revenue to satisfy investment objectives and providing customized reports outlining payment and distribution information.

Results of Operations

Overview of the Income Statement

The Company had net income of $6,309,000 for the first six months of 2015 compared to $6,541,000 for last year's comparable period, a decrease of $232,000 or 3.6%. Basic earnings per share for the first six months of 2015 were $2.09, compared to $2.15 last year, representing a 3.0% decrease. Annualized return on assets and return on equity for the six months of 2015 were 1.36% and 12.41%, respectively, compared with 1.45% and 13.63% for last year's

comparable period.

Net income for the three months ended June 30, 2015 was $3,189,000 compared to $3,365,000 in the comparable 2014 period, a decrease of $176,000 or 5.2%. Basic earnings per share for the three months ended June 30, 2015 were $1.06, compared to $1.11 last year, representing a 4.6% decrease. Annualized return on assets and return on equity for the quarter ended June 30, 2015 was 1.36% and 12.45%, respectively, compared with 1.49% and 13.88% for the same 2014 period.

Net Interest Income

Net interest income, the most significant component of the Company's earnings, is the amount by which interest income generated from interest-earning assets exceeds interest expense on interest-bearing liabilities.

Net interest income for the first six months of 2015 was $15,148,000, a decrease of $14,000, or 0.1%, compared to the same period in 2014. For the first six months of 2015, the provision for loan losses totaled $240,000, a decrease of $90,000 over the comparable period in 2014. Consequently, net interest income after the provision for loan losses was $14,908,000 compared to $14,832,000 during the first six months of 2014.

For the three months ended June 30, 2015, net interest income was $7,561,000 compared to $7,650,000, a decrease of $89,000, or 1.2% over the comparable period in 2014. The provision for loan losses this quarter was $120,000 compared to $150,000 for last year's second quarter. Consequently, net interest income after the provision for loan losses was $7,441,000 for the quarter ended June 30, 2015 compared to $7,500,000 in 2014.

The following table sets forth the average balances of, and the interest earned or incurred on, for each principal category of assets, liabilities and stockholders' equity, the related rates, net interest income and interest rate spread created for the six months and three months ended June 30, 2015 and 2014 on a tax equivalent basis (dollars in thousands):

(1) Averages are based on daily averages.
(2) Includes loan origination and commitment fees.
(3) Tax exempt interest revenue is shown on a tax equivalent basis for proper comparison using a statutory federal income tax rate of 34%.
(4) Income on non-accrual loans is accounted for on a cash basis, and the loan balances are included in interest-earning assets.
(5) Interest rate spread represents the difference between the average rate earned on interest-earning assets
and the average rate paid on interest-bearing liabilities.

35

Tax exempt revenue is shown on a tax-equivalent basis for proper comparison using a statutory, federal income tax rate of 34%. For purposes of the comparison, as well as the discussion that follows, this presentation facilitates performance comparisons between taxable and tax-free assets by increasing the tax-free income by an amount equivalent to the Federal income taxes that would have been paid if this income were taxable at the Company's 34% Federal statutory rate. The following table represents the adjustment to convert net interest income to net interest income on a fully taxable equivalent basis for the periods ending June 30, 2015 and 2014 (in thousands):

	For the Three Months Ended June 30		For the Six Months Ended June 30	
	2015	2014	2015	2014
Interest and dividend income from investment securities and interest bearing deposits at banks (non-tax adjusted)	$ 1,639	$ 1,771	$ 3,371	$ 3,564
Tax equivalent adjustment	411	432	849	866
Interest and dividend income from investment securities and interest bearing deposits at banks (tax equivalent basis)	$ 2,050	$ 2,203	$ 4,220	$ 4,430
Interest and fees on loans (non-tax adjusted)	$ 7,129	$ 7,118	$ 14,168	$ 14,106
Tax equivalent adjustment	305	268	601	502
Interest and fees on loans (tax equivalent basis)	$ 7,434	$ 7,386	$ 14,769	$ 14,608
Total interest income	$ 8,768	$ 8,889	$ 17,539	$ 17,670
Total interest expense	1,207	1,239	2,391	2,508
Net interest income	7,561	7,650	15,148	15,162
Total tax equivalent adjustment	716	700	1,450	1,368
Net interest income (tax equivalent basis)	$ 8,277	$ 8,350	$ 16,598	$ 16,530

The following table shows the tax-equivalent effect of changes in volume and rate on interest income and expense (in thousands):

(1) The portion of the total change attributable to both volume and rate changes, which can not be separated, has been allocated proportionally to the change due to volume and the change due to rate prior to allocation.

Tax equivalent net interest income increased from $16,530,000 for the six month period ended June 30, 2014 to $16,598,000 for the six month period ended June 30, 2015, an increase of $68,000. The tax equivalent net interest margin decreased from 3.89% for the first six months of 2014 to 3.81% in 2015.

Total tax equivalent interest income for the 2015 six month period decreased $49,000 as compared to the 2014 six month period. This decrease was primarily a result of a decrease of $582,000 due to a change in rate, as the yield on interest earning assets decreased from 4.48% to 4.36% or 12 basis points for the comparable periods. This decrease was offset by an increase of $533,000 as a result of an increase in the average balance of interest earning assets of $19.8 million for the comparable periods. While the Bank has been able to add interest earning assets, the new assets are priced at lower rates than assets that have matured due to the prolonged low interest rate environment. Additionally, assets repriced at lower rates during the 2015 period.

Tax equivalent investment income for the six months ended June 30, 2015 decreased $254,000 over the same period last year. The primary causes of the decrease were a decrease in the average outstanding balance of taxable securities and a decrease in the yield earned on tax exempt securities.

- The average balance of taxable securities decreased by $22.3 million which resulted in a decrease in investment income of $189,000. The reason there was such a large decrease in the average balance of taxable securities was due to less than favorable investment opportunities. The yield earned on taxable securities decreased 2 basis points, which resulted in a further decrease in investment income of $15,000.

- The yield on tax-exempt securities decreased 32 basis points from 5.32% to 5.00%, which corresponds to a decrease in interest income of $175,000. The yield decrease was due to the amount of purchases we made in the current low interest rate environment. For a discussion of the Company's current investment strategy, see the "Financial Condition – Investments". Offsetting this decrease, the average balance of tax-exempt securities increased $4.1 million resulting in an increase in investment income of $125,000.

The purchase of tax-exempt securities, along with municipal loans and investment tax credits, allows us to manage and reduce our effective tax rate as well as increase the overall after-tax yield on our interest earning assets.

Total loan interest income increased $161,000 for the six months ended June 30, 2015 compared to the same period last year.

- The average balance of state and political subdivision loans increased $18.1 million from a year ago. This had a positive impact of $401,000 on total interest income due to volume. Offsetting this increase, the yield earned decreased 23 basis points to 4.50%, which decreased loan interest income $70,000.

- The average balance of commercial and agricultural loans increased $10.5 million from a year ago. This had a positive impact of $247,000 on total interest income due to volume, which was offset by a decrease of $190,000 due to rate, as the yield earned decreased from 5.46% to 5.30% due to the continued low rate environment and increased competition.

- Interest income on residential mortgage loans decreased $227,000. The average balance of residential loans decreased $2.9 million from a year ago. This resulted in a decrease in loan interest income of $81,000. Additionally, the yield earned on residential loans decreased 16 basis points compared to 2014, which corresponds to a decrease in interest income of $146,000.

Total interest expense decreased $117,000 for the six months ended June 30, 2015 compared with last year. A decrease of $62,000 was the result of a decrease in the average rate paid from 0.71% to 0.67%. The low interest rate environment prompted by the Federal Reserve had the effect of decreasing our rates paid on certificates of deposit. While the Company's rates on deposit products are below its historical averages, they are competitive with rates paid by other institutions in the marketplace. The average balance of interest bearing liabilities increased $12.7 million from June 30, 2014 to June 30, 2015. Increases were experienced in NOW accounts of $12.6 million, savings accounts of $14.3 million and money market accounts of $9.9 million. The cumulative effect of these increases was an increase in interest expense of $53,000. Certificates of deposit decreased $12.1 million, which resulted in a decrease in interest expense due to volume of $70,000. (see also "Financial Condition – Deposits").

- Interest expense on certificates of deposits decreased $216,000 over the same period last year. There was a decrease in the average rate on certificates of deposit from 1.21% to 1.09% resulting in a decrease in interest expense of $146,000. Additionally, the average balance of certificates of deposit decreased $12.1 million causing a decrease in interest expense of $70,000.

- Interest expense on other borrowed funds increased $38,000 over the same period last year. The primary cause of the increase was the average rate on other borrowed funds increasing 71 basis points resulting in an increase in interest expense of $76,000. The increase in rate on the other borrowed funds is a result of the significant amount of overnight borrowings that were outstanding during the 2014 period compared to the 2015 period. In the current rate environment, overnight borrowings have a lower rate than longer term borrowings. The average balance of other borrowed funds decreased $12.0 million resulting in a decrease in interest expense due to volume of $38,000.

Tax equivalent net interest income for the three months ended June 30, 2015 was $8,277,000 which compares to $8,350,000 for the same period last year. This represents a decrease of $73,000 or 0.9%.

Total tax equivalent interest income was $9,484,000 for the three month period ended June 30,2015, compared with $9,589,000 for the comparable period last year, a decrease of $105,000. The primary driver of this decrease was a decrease in yield of 18 basis points on interest earning assets from 4.50% to 4.32%:

- Total investment income decreased by $179,000 compared to same period last year. This was due to a 30 point decrease in rate on tax exempt investments from 5.28% to 4.98%, which equates to a $76,000 decrease in income. In addition, there was a decrease in income of $99,000 as a result of a $23.4 million decrease in the average balance of taxable securities.

- Total loan interest income increased $48,000 compared to the same period last year. This was primarily due to an increase in volume of $25.4 million, which corresponds to a $310,000 increase in interest income. This was offset by a decrease in rate of 26 points from 5.50% to 5.24%, which corresponds to a decrease in loan interest income of $262,000.

Total interest expense decreased $32,000 for the three months ended June 30, 2015 compared with last year as a result of a decrease in the average rate on interest-bearing liabilities of 3 basis points from 0.70% to 0.67%, accounting for a $14,000 decrease in interest expense. Additionally, due to a $9.3 million decrease in the average balance of certificates of deposit, there was a $27,000 decrease in interest expense.

Provision for Loan Losses

For the six month period ending June 30, 2015, we recorded a provision for loan losses of $240,000, which represents a decrease of $90,000 from the $330,000 provision recorded in the corresponding six months of last year. The provision was lower in 2015 than 2014 due to the improvement in the credit quality of the loan portfolio. see "Financial

Condition – Allowance for Loan Losses and Credit Quality Risk”).

For the three months ending June 30, 2015, we recorded a provision of $120,000 compared to $150,000 in 2014.

Non-interest Income

The following table shows the breakdown of non-interest income for the three and six months ended June 30, 2015 and 2014 (in thousands):

	Six months ended June 30,		Change	
	2015	2014	Amount	%
Service charges	$ 2,004	$ 2,141	$ (137)	(6.4)
Trust	374	377	(3)	(0.8)
Brokerage and insurance	382	257	125	48.6
Gains on loans sold	98	70	28	40.0
Investment securities gains, net	301	246	55	22.4
Earnings on bank owned life insurance	306	242	64	26.4
Other	218	209	9	4.3
Total	$ 3,683	$ 3,542	$ 141	4.0

	Three months ended June 30,		Change	
	2015	2014	Amount	%
Service charges	$ 1,028	$ 1,102	$ (74)	(6.7)
Trust	180	186	(6)	(3.2)
Brokerage and insurance	255	137	118	86.1
Gains on loans sold	60	30	30	100.0
Investment securities gains, net	175	75	100	133.3
Earnings on bank owned life insurance	154	121	33	27.3
Other	103	104	(1)	(1.0)
Total	$ 1,955	$ 1,755	$ 200	11.4

Non-interest income for the six months ended June 30, 2015 totaled $3,683,000, an increase of $141,000 when compared to the same period in 2014. During the first six months of 2014, net investment security gains amounted to $301,000 compared to gains of $246,000 last year. We sold three agency securities for gains totaling $100,000, one mortgage backed security in government sponsored entities for a gain of $37,000, seven municipal bonds for gains totaling $99,000, a financial institution equity holding for a gain of $76,000 and a US Treasury note for a loss of $11,000 in order to take advantage of certain market conditions. In 2014, we sold five agency securities for gains totaling $95,000, three mortgage backed securities in government sponsored entities for gains totaling $78,000, and a portion of a financial institution equity holding for a gain of $73,000.

For the first six months of 2015, account service charges totaled $2,004,000, a decrease of $137,000 or 6.4%, when compared to the same period in 2014. The primary decrease was associated with a $109,000 decrease attributable to fees charged to customers for non-sufficient funds. This revenue source has been negatively impacted and will continue to be negatively impacted by changes in regulations implemented as part of Dodd-Frank. The increase in

earnings on bank owned life insurances of $64,000 is due to purchases of an additional $5.0 million of insurance made late in the fourth quarter of 2014. The increase in brokerage and insurance revenues of $125,000 in the current six months is primarily due to sales to a new customer, with a large brokerage balance. The increase in gains on loans sold is due to an increase of 36.0% in the amount of loans sold in 2015 compared to 2014. During the first six months of 2015, the Company received proceeds of $6.9 million from the sale of conforming loans compared to $5.1 million of proceeds for the comparable 2014 period.

For the three month period ended June 30, 2015, the changes experienced from the prior year correspond to the changes experienced for the six month period. The decrease in revenue associated with non-sufficient funds continued into the second quarter, while increases related to brokerage, and earnings on bank owned life insurance continue and are consistent with year to date changes.

Non-interest Expense

The following tables reflect the breakdown of non-interest expense for the three and six months ended June 30, 2015 and 2014 (in thousands):

	Six months ended June 30,		Change	
	2015	2014	Amount	%
Salaries and employee benefits	$ 6,049	$ 5,810	$ 239	4.1
Occupancy	717	654	63	9.6
Furniture and equipment	215	194	21	10.8
Professional fees	412	442	(30)	(6.8)
FDIC insurance	232	229	3	1.3
Pennsylvania shares tax	401	384	17	4.4
ORE expenses	358	137	221	161.3
Other	2,379	2,241	138	6.2
Total	$ 10,763	$ 10,091	$ 672	6.7

	Three months ended June 30,		Change	
	2015	2014	Amount	%
Salaries and employee benefits	$ 2,993	$ 2,893	$ 100	3.5
Occupancy	348	304	44	14.5
Furniture and equipment	87	94	(7)	(7.4)
Professional fees	180	208	(28)	(13.5)
FDIC insurance	116	116	-	-
Pennsylvania shares tax	200	191	9	4.7
ORE expenses	240	47	193	410.6
Other	1,264	1,147	117	10.2
Total	$ 5,428	$ 5,000	$ 428	8.6

Non-interest expenses increased $672,000 for the six months ended June 30, 2015 compared to the same period in 2014. Salaries and employee benefits increased $239,000 or 4.1%. Merit increases effective at the beginning of 2015 and an increase in full time equivalent employees, as part of implementing the Bank’s strategic plan, accounted for an increase in salaries and employee benefits of approximately $179,000. Insurance related expenses increased $48,000 as a result of an increase in claims experience. Due to actuarial changes, pension expense has increased $78,000 in 2015 compared to the 2014 six month period. As a result of the increase in brokerage and insurance revenues, commission expense has increased $41,000. Profit sharing expenses have decreased $99,000 compared to the

comparable period of 2014.

The primary cause of the increases in occupancy and furniture and fixtures is the opening of the Mill Hall branch in the first quarter of 2015. The increase in ORE expenses in 2015 is the result of a $109,000 write-down on one OREO property taken in the second quarter of 2015 due to an updated appraisal and expenses related to OREO proceedings. The largest driver of the increase in other expenses is fees related to the pending merger with The First National Bank of Fredericksburg, which is expected to close in the fourth quarter of 2015.

For the three months ended, June 30, 2015, non-interest expenses increased $428,000 when compared to the same period in 2014. ORE expenses increased $193,000 primarily due to the $109,000 ORE write down and fees related to OREO court proceedings. The increase in other expenses is primarily driven as a result of fees associated with the pending merger.

Provision for Income Taxes

The provision for income taxes was $1,519,000 for the six month period ended June 30, 2015 compared to $1,742,000 for the same period in 2014. The decrease is attributable to a decrease in income before the provision for income taxes of $455,000 and an increase in tax-exempt income as a proportion of total interest income. Through management of our municipal loan and bond portfolios, management is focused on minimizing our effective tax rate. Our effective tax rate was 19.4% and 21.0% for the first six months of 2015 and 2014, respectively, compared to the statutory rate of 34%.

For the three months ended June 30, 2015, the provision for income taxes was $779,000 compared to $890,000 for the same period in 2014. The decrease is attributable to the decrease in income before the provision for income taxes of $287,000 and an increase in tax-exempt income as a proportion of total interest income. Our effective tax rate was 19.6% and 20.9% for the three months ended June 30, 2015 and 2014, respectively, compared to the statutory rate of 34%.

We have invested in four limited partnership agreements that established low-income housing projects in our market areas. We anticipate recognizing an aggregate of $1.1 million of tax credits over the next seven years, with an additional $99,000 anticipated to be recognized during 2015.

Financial Condition

Total assets were $942.5 million at June 30, 2015, an increase of $17.5 million, or 1.9% from $925.0 million at December 31, 2014. Cash and cash equivalents decreased $511,000 or 4.5% to $10.9 million. Investment securities decreased to $304.8 million and net loans increased 3.2% to $564.7 million at June 30, 2015. Total deposits increased $18.0 million to $791.9 million since year-end 2014, while borrowed funds decreased $2.6 million to $39.2 million.

Cash and Cash Equivalents

Cash and cash equivalents totaled $10.9 million at June 30, 2015 compared to $11.4 million at December 31, 2014, a decrease of $0.5 million. Management actively measures and evaluates its liquidity through our Asset–Liability Committee and believes its liquidity needs are satisfied by the current balance of cash and cash equivalents, readily available access to traditional funding sources including the Bank’s core deposits, Federal Home Loan Bank financing, federal funds lines with correspondent banks, brokered certificates of deposit and the portion of the investment and loan portfolios that mature within one year. Management expects that these sources of funds will permit us to meet cash obligations and off-balance sheet commitments as they come due.

Investments

The following table shows the composition of the investment portfolio as of June 30, 2015 and December 31, 2014 (dollars in thousands):

	June 30, 2015		December 31, 2014	
	Amount	%	Amount	%

Mortgage-backed securities in government sponsored entities		26,350	8.6		29,728	9.6
Equity securities in financial institutions		1,775	0.6		1,690	0.6
Total	$	304,792	100.0	$	306,146	100.0

	June 30, 2015/ December 31, 2014 Change	
	Amount	%
Available-for-sale:		
U. S. Agency securities	$ 16,695	11.1
U. S. Treasury notes	(4,849)	(100.0)
Obligations of state & political subdivisions	(8,754)	(8.3)
Corporate obligations	(1,153)	(8.3)
Mortgage-backed securities in government sponsored entities	(3,378)	(11.4)
Equity securities in financial institutions	85	5.0
Total	$ (1,354)	(0.4)

Our investment portfolio decreased by $1.4 million, or 0.4%, from December 31, 2014 to June 30, 2015. During 2015, we purchased approximately $38.9 million of U.S. agency obligations, $10.5 million of state and local obligations and $218,000 of equity securities in financial institutions, which helped offset the $2.8 million of principal repayments and $28.3 million of calls and maturities that occurred during the six month period. We also sold $18.4 million of various securities at a gain of $301,000. Excluding our short-term investments consisting of monies held primarily at the Federal Reserve for liquidity purposes, our investment portfolio for the six month period ended June 30, 2015 yielded 2.81%, which is the same as the comparable period in 2014 on a tax equivalent basis.

During the first six months of 2015, there were significant swings in the yield on investments as a result of economic indicators, comments made by the Federal Reserve that have indicated a potential rise in rates in the near future and turbulence in foreign markets. As a result of this volatility, we have monitored the trading ranges for various investment products and have tried to limit purchases to times when yields are in the top third of the trading range. Additionally, for the purchases made, the investment strategy in 2015 has been to purchase agency securities with maturities of less than five years and high quality municipal bonds with high coupons. The Bank believes it has appropriately mitigated its interest rate risk exposure in the event of rising interest rates, if they occur. Additionally, high coupon municipal bonds have less price volatility in rising rate scenarios than similar lower coupon bonds. We believe this strategy will enable us to reinvest cash flows in the next two to five years when and if investment opportunities improve.

Management continues to monitor the earnings performance and the liquidity of the investment portfolio on a regular basis. Through active balance sheet management and analysis of the securities portfolio, the Company believes it maintains sufficient liquidity to satisfy depositor requirements and various credit needs of its customers.

Loans

The following table shows the composition of the loan portfolio as of June 30, 2015 and December 31, 2014 (dollars in thousands):

	June 30, 2015		December 31, 2014	
	Amount	%	Amount	%
Real estate:				

Residential	$	181,566	31.8	$	185,438	33.5

The Company's lending is focused in the north central Pennsylvania market and the southern tier of New York. The composition of our loan portfolio consists principally of retail lending, which includes single-family residential mortgages and other consumer lending, and commercial lending primarily to locally owned small businesses and area municipalities. New loans are primarily direct loans to our existing customer base, with new customers generated by referrals from real estate brokers, building contractors, attorneys, accountants and existing customers and the efforts and expertise of our business development officers.

During the first six months of 2015, the Company experienced growth in state and political subdivision loans, which increased $5.0 million or 6.3%, other commercial and agricultural loans, which increased $6.0 million or 10.2%, commercial real estate, which increased $2.8 million or 1.5%, agricultural real estate loans, which increased $6.1 million or 24.7% and construction loans, which increased $1.7 million, or 26.3%. The increase in state and political loans, other commercial and agricultural, commercial real estate and agricultural real estate loans reflects on the Company's experienced lenders and their ability to identify and meet the needs of our customers while providing growth opportunities for the Company's loan portfolio. We also look at commercial relationships as a way to obtain deposits from farmers, small businesses and municipalities throughout our market area. We continue to experience growth in the Mill Hall branch that opened in February 2015. Commercial loan demand is subject to significant competitive pressures, the yield curve, the strength of the overall regional and national economy and the local economy. The local economy has been impacted significantly by natural gas exploration activities, which are impacted by regulations and changes in the market price of natural gas. Due to the low price for natural gas exploration activities remained curtailed. We work closely with local municipalities and school districts to meet their needs that otherwise would be provided by the municipal bond market.

Residential real estate loans decreased $3.9 million during the first six months of 2015. Loan demand for conforming mortgages, which the Company typically sells on the secondary market has increased slightly in 2015 when compared to 2014. During the first six months of 2015, $7.5 million of loans were originated, which compares to $5.3 million originated during the same period in 2014. For loans sold on the secondary market, the Company recognizes fee income for servicing these sold loans, which is included in non-interest income. Management continues to build technologies which make it easier and more efficient for customers to choose the Company for their mortgage needs.

Allowance for Loan Losses

The allowance for loan losses is maintained at a level which in management's judgment is adequate to absorb probable future loan losses inherent in the loan portfolio. The provision for loan losses is charged against current income. Loans deemed not collectable are charged-off against the allowance while subsequent recoveries increase the allowance. The following table presents an analysis of the allowance for loan losses and non-performing loans and assets as of and for the six months ended June 30, 2015 and for the years ended December 31, 2014, 2013, 2012 and 2011 (dollars in thousands):

	June 30, 2015	December 31, 2014	2013	2012	2011

net of unearned income	1.61%	1.67%	1.88%	1.83%	2.11%

Management believes it uses the best information available when estimating the allowance for loan losses and that the allowance for loan losses is adequate as of June 30, 2015. However, future adjustments could be required if circumstances differ substantially from assumptions and estimates used in making the initial determination. A prolonged downturn in the economy, high unemployment rates, significant changes in the value of collateral and delays in receiving financial information from borrowers could result in increased levels of non-performing assets, charge-offs, loan loss provisions and reduction in income. Additionally, bank regulatory agencies periodically examine the Bank's allowance for loan losses. The banking agencies could require the recognition of additions to the allowance for loan losses based upon their judgment of information available to them at the time of their examination.

On a monthly basis, problem loans are identified and updated primarily using internally prepared past due reports. Based on data surrounding the collection process of each identified loan, the loan may be added or deleted from the monthly watch list. The watch list includes loans graded special mention, substandard, doubtful, and loss, as well as additional loans that management may choose to include. Watch list loans are continually monitored going forward until satisfactory conditions exist that allow management to upgrade and remove the loan. In certain cases, loans may be placed on non-accrual status or charged-off based upon management's evaluation of the borrower's ability to pay. All commercial loans, which include commercial real estate, agricultural real estate, state and political subdivision loans and other commercial loans, on non-accrual are evaluated quarterly for impairment.

The balance in the allowance for loan losses was $6,959,000 or 1.22% of total loans as of June 30, 2015 as compared to $6,815,000 or 1.23% of loans as of December 31, 2014. The $144,000 increase is a result of a $240,000 provision for the first six months offset by net charge-offs of $96,000. The following table shows the distribution of the allowance for loan losses and the percentage of loans compared to total loans by loan category (dollars in thousands) as of June 30, 2015 and December 31, 2014, 2013, 2012 and 2011:

	June 30		December 31							
	2015		2014		2013		2012		2011

Unallocated	176	N/A	188	N/A	167	N/A	316	N/A	515	N/A
Total allowance for loan losses	$ 6,959	100.0	$ 6,815	100.0	$ 7,098	100.0	$ 6,784	100.0	$ 6,487	100.0

As a result of previous loss experiences and other risk factors utilized in determining the allowance, the Bank's allocation of the allowance does not directly correspond to the actual balances of the loan portfolio. While commercial and agricultural real estate total 39.3% of the loan portfolio, 52.9% of the allowance is assigned to this segment of the loan portfolio as these loans have more inherent risks than residential real estate or loans to state and political subdivisions.

The following table identifies amounts of loans contractually past due 30 to 89 days and non-performing loans by loan category, as well as the change from December 31, 2014 to June 30,2015 in non-performing loans(dollars in thousands). Non-performing loans include those loans that are contractually past due 90 days or more and non-accrual loans. Interest does not accrue on non-accrual loans. Subsequent cash payments received are applied to the outstanding principal balance or recorded as interest income, depending upon management's assessment of its ultimate ability to collect principal and interest.

Consumer	1	1.9
Other commercial and agricultural loans	491	55.3
Total nonperforming loans	$ (42)	(0.6)

For the six month period ending June 30, 2015, we recorded a provision for loan losses of $240,000, which compares to $330,000 for the same time period in 2014. Non-performing loans decreased $42,000 or 0.6%, from December 31, 2014 to June 30, 2015. Approximately 60.0% of the Bank's non-performing loans are associated with the following three customer relationships:

- A commercial customer with a total loan relationship of $3.4 million secured by 164 residential properties was considered non-accrual as of June 30, 2015. In the first quarter of 2011, the Company and borrower entered into a

forbearance agreement to restructure the debt. In July of 2013, the customer filed for bankruptcy under Chapter 11 and a Trustee was appointed in January of 2014. In 2015, the Trustee has decreased the loan payments below what was agreed to in the forbearance agreement. This decrease is currently being litigated in bankruptcy court. As a result of the decrease, the relationship has become more than 90 days past due. In the second quarter of 2015, 25 appraisals were completed and management observed an additional 20 properties. These items did not note any significant change in collateral values. We continue to monitor the bankruptcy proceedings to identify potential changes in the customer’s operations and the impact these would have on the loan payments for our loans to the customer and the underlying collateral that supports these loans.

- A commercial customer with a relationship of approximately $435,000 after a charge-off of $463,000 during the second quarter of 2014, secured by commercial real estate was considered non-accrual as of June 30, 2015. The current economic conditions have significantly impacted the cash flows from the customer’s activities. Management reviewed the collateral and in the second quarter of 2014 charged-off of a portion of the balance associated with this customer, which was based on the appraised value of collateral and as a result there is no specific reserve as of June 30, 2015.
  - A commercial customer with a relationship of approximately $583,000 secured by vacant real estate, equipment and accounts receivable was considered non-accrual as of June 30, 2015. The slowdown in the exploration for natural gas has significantly impacted the cash flows of the customer. Management reviewed the collateral and there is a specific reserve of $56,000 as of June 30, 2015.

Management of the Bank believes that the allowance for loan losses is adequate, which is based on the following factors:

- One loan relationship comprises 46.2% of the non-performing loan balance, whose debt is well collateralized as of June 30, 2015.
- Net and gross charge-offs have returned to their low historical rate of .03% on an annualized basis in the first half of 2015.
- Real estate values in the Bank's primary market area have remained stable. Additionally, our primary market area is predominately centered in a natural gas exploration and drilling area, and while the activities associated with this exploration are cyclical, it has provided a positive impact on the value of local real estate.

Bank Owned Life Insurance

The Company purchased bank owned life insurance to offset future employee benefit costs. As of June 30, 2015, the cash surrender value of this life insurance is $20,615,000, which has resulted in income recognized in the first six months of 2015 of $306,000 compared to $242,000 during the comparable period in 2014. The use of life insurance policies provides the Bank with an asset that will generate earnings to partially offset the current costs of benefits and eventually (at the death of the individuals) provides partial recovery of cash outflows associated with the benefits.

Effective January 1, 2015, the Company restructured the agreements so that any death benefits received from a policy while the insured person is an active employee of the Bank will be split with the beneficiary of the policy. Under the restructured agreements, the employee's beneficiary will be entitled to receive 50% of the net amount at risk from the proceeds. The net amount at risk is the total death benefit payable less the cash surrender value of the policy as of the date of death.

Premises and Equipment

Premises and equipment increased from $12.4 million at December 31, 2014 to $12.6 million at June 30, 2015. This occurred primarily as a result of costs associated with the construction of our branch in Mill Hall, which opened in February 2015.

Deposits

The following table shows the composition of deposits as of June 30, 2015 and December 31, 2014 (dollars in thousands):

		June 30 2015 Amount	%		December 31, 2014 Amount	%
Non-interest-bearing deposits	$	100,469	12.7	$	95,526	12.3
NOW accounts		236,545	29.9		226,038	29.2
Savings deposits		116,201	14.7		108,252	14.0
Money market deposit accounts		91,615	11.6		95,350	12.3
Certificates of deposit		247,057	31.1		248,767	32.2

Total	$	791,887	100.0	$	773,933	100.0

		June 30, 2015/ December 31, 2014 Change	
		Amount	%
Non-interest-bearing deposits	$	4,943	5.2
NOW accounts		10,507	4.6
Savings deposits		7,949	7.3
Money market deposit accounts		(3,735)	(3.9)
Certificates of deposit		(1,710)	(0.7)
Total	$	17,954	2.3

Deposits increased $18.0 million since December 31, 2014. The biggest increase was in NOW accounts, which increased $10.5 million, followed closely by the increase in savings deposit accounts of $7.9 million and non-interest bearing deposits of $4.9 million. The primary drivers of the increase in NOW accounts and Savings accounts is the result of deposits from local government customers and gas related deposits for customers in the Potter County market. The decrease in Money market accounts was attributable to a decrease in local school district deposits. Similar to the prior year, as CD's mature, some customers are converting the balances to other deposits accounts at the bank. This is occurring as customers are seeking more liquidity during this low rate environment. The Bank currently does not have any outstanding brokered certificates of deposit.

Borrowed Funds

Borrowed funds decreased $2.6 million during the first six months of 2015. The decrease was the result of repaying $10.3 million of overnight borrowings from the FHLB. The repayments were offset by borrowing $4.7 million from the FHLB on a long term basis and $4.0 million on a short term basis. Additionally, there was a decrease of approximately $1.1 million in the balances outstanding under repurchase agreements. The Bank's current strategy for borrowings is to consider terms and structures to manage interest rate risk and liquidity in a potential rising interest rate environment. The Company's daily cash requirements or short-term investments are primarily met by using the financial instruments available through the Federal Home Loan Bank of Pittsburgh.

In December 2003, the Company formed a special purpose entity, Citizens Financial Statutory Trust I ("the Entity"), to issue $7,500,000 of floating rate obligated mandatory redeemable securities as part of a pooled offering. The rate is determined quarterly based on the 3 month LIBOR plus 2.80%. The Entity may redeem them, in whole or in part, at face value at any time. The Company borrowed the proceeds of the issuance from the Entity in December 2003 in the form of a $7,500,000 note payable, which is included within "Borrowed Funds" in the liabilities section of the Company's balance sheet. Under current accounting rules, the Company's minority interest in the Entity was recorded at the initial investment amount and is included in the other assets section of the balance sheet. The Entity is not consolidated as part of the Company's Consolidated Financial Statements.

Stockholders' Equity

We evaluate stockholders' equity in relation to total assets and the risks associated with those assets. The greater the capital resource, the more likely a corporation will meet its cash obligations and absorb unforeseen losses. For these reasons, capital adequacy has been, and will continue to be, of paramount importance. As such, the Company has implemented policies and procedures to ensure that it has adequate capital levels. As part of this process, we routinely stress test our capital levels and identify potential risk and alternative sources of additional capital should the need arise.

Total stockholders' equity was $103.2 million at June 30, 2015 compared to $100.5 million at December 31, 2014, an increase of $2.7 million or 2.7%. Excluding accumulated other comprehensive income (loss) stockholders' equity increased $3.3 million, or 3.37%. The Company purchased 18,788 shares of treasury stock at a weighted average cost of $52.59 per share. The Company reissued 3,956 shares as part of the dividend reinvestment program at a weighted average cost of $52.90, 3,340 shares as part of the restricted stock program at a weighted average cost of $52.42 and 1,206 shares as part of an incentive program at a weighted average cost of $52.90. In the first six months of 2015, the Company had net income of $6.3 million and declared cash dividends of $2.5 million, or $0.81 per shares, representing a cash dividend payout ratio of 38.8%.

All of the Company's investment securities are classified as available-for-sale, making this portion of the Company's balance sheet more sensitive to the changing market value of investments. As a result of changes in the interest rate environment, accumulated other comprehensive income (loss) associated with the change in investment securities

decreased $663,000 from December 31, 2014 and accounts for the majority of the total decrease in accumulated other comprehensive income (loss) of $596,000.

The Company has complied with standards of being well capitalized mandated by the banking regulators. The Company's primary regulators have established "risk-based" capital requirements designed to measure capital adequacy. Risk-based capital ratios reflect the relative risks associated with various assets entities hold in their portfolios. A weight category of 0% (lowest risk assets), 20%, 50%, or 150% (highest risk assets for the Company and Bank), is assigned to each asset on the balance sheet. The Company's computed risk-based capital ratios are as follows (dollars in thousands):

	June 30, 2015		December 31, 2014	
Total capital (to risk-weighted assets)	Amount	Ratio	Amount	Ratio

49

Off Balance Sheet Activities

Some financial instruments, such as loan commitments, credit lines, and letters of credit are issued to meet customer financing needs. The contractual amount of financial instruments with off-balance sheet risk was as follows at June 30, 2015 and December 31, 2014 (in thousands):

	June 30, 2015	December 31, 2014
Commitments to extend credit	$ 118,876	$ 108,951
Standby letters of credit	10,024	10,389
	$ 128,900	$ 119,340

We also offer limited overdraft protection as a non-contractual courtesy which is available to demand deposit accounts in good standing. Overdraft charges as a result of ATM withdrawals and one time point of sale (non-recurring) transactions require prior approval of the customer. The non-contractual amount of financial instruments with off-balance sheet risk at June 30, 2015 and December 31, 2014 was $12,373,000 and $12,360,000, respectively. The Company reserves the right to discontinue this service without prior notice.

Liquidity

Liquidity is a measure of the Company's ability to efficiently meet normal cash flow requirements of both borrowers and depositors. To maintain proper liquidity, we use funds management policies, which include liquidity target ratios, along with our investment policies to assure we can meet our financial obligations to depositors, credit customers and stockholders. Liquidity is needed to meet depositors' withdrawal demands, extend credit to meet borrowers' needs, provide funds for normal operating expenses and cash dividends, and to fund other capital expenditures.

Cash generated by operating activities, investing activities and financing activities influences liquidity management. Our Company's historical activity in this area can be seen in the Consolidated Statement of Cash Flows. The most important source of funds is core deposits. Repayment of principal on outstanding loans and cash flows created from the investment portfolio are also factors in liquidity management. Other sources of funding include brokered certificates of deposit and the sale of loans or investments, if needed.

The Company's use of funds is shown in the investing activity section of the Consolidated Statement of Cash Flows, where the net loan activity is presented. Other significant uses of funds include purchasing stock from the Federal Home Loan Bank (FHLB) of Pittsburgh, as well as capital expenditures. Capital expenditures (including software purchases), during the first six months of 2015 were $514,000, primarily related to our Mill Hall branch, compared to $145,000 during the same time period in 2014.

Short-term debt from the FHLB supplements the Bank’s availability of funds. The Bank achieves liquidity primarily from temporary or short-term investments in the Federal Reserve and the FHLB. The Bank has a maximum borrowing capacity at the FHLB of approximately $263.1 million, of which $26.9 million was outstanding at June 30, 2015. Additionally, we have a Federal funds line totaling $10.0 million from a third party bank at market rates. This line is not drawn upon. We also have a borrower in custody line with the Federal Reserve Bank of approximately $8.7 million, which also is not drawn upon as of June 30, 2015. The Company continues to evaluate its liquidity needs and as necessary finds additional sources.

Citizens Financial Services, Inc. is a separate legal entity from the Bank and must provide for its own liquidity. In addition to its operating expenses, Citizens Financial is responsible for paying any dividends declared to its shareholders. Citizens Financial also has repurchased shares of its common stock. Citizens Financial's primary source of income is dividends received from the Bank. Both federal and state laws impose restrictions on the ability of the Bank to pay dividends. In particular, the Bank may not, as a state-chartered bank which is a member of the Federal Reserve System, declare a dividend without approval of the Federal Reserve, unless the dividend to be declared by the Bank's Board of Directors does not exceed the total of: (i) the Bank's net profits for the current year to date, plus (ii) its retained net profits for the preceding two current years, less any required transfers to surplus. The Federal Reserve Board and the FDIC have formal and informal policies which provide that insured banks and bank holding companies should generally pay dividends only out of current operating earnings, with some exceptions. The Prompt Corrective Action Rules, described above, further limit the ability of banks to pay dividends, because banks which are not classified as well capitalized or adequately capitalized may not pay dividends and no dividend may be paid which would make the Bank undercapitalized after the dividend. At June 30, 2015, Citizens Financial Services, Inc. had liquid assets of $7.3 million.

Interest Rate and Market Risk Management

The objective of interest rate sensitivity management is to maintain an appropriate balance between the stable growth of income and the risks associated with maximizing income through interest sensitivity imbalances and the market value risk of assets and liabilities.

Because of the nature of our operations, we are not subject to foreign currency exchange or commodity price risk and, since our Company has no trading portfolio, it is not subject to trading risk. Currently, our Company has equity securities that represent only 0.6% of our investment portfolio and, therefore, equity risk is not significant.

The primary components of interest-sensitive assets include adjustable-rate loans and investments, loan repayments, investment maturities and money market investments. The primary components of interest-sensitive liabilities include maturing certificates of deposit, IRA certificates of deposit and short-term borrowings. Savings deposits, NOW accounts and money market investor accounts are considered core deposits and are not short-term interest sensitive (except for the top-tier money market investor accounts, typically help by local governments, which are paid current market interest rates).

Gap analysis, one of the methods used by us to analyze interest rate risk, does not necessarily show the precise impact of specific interest rate movements on our Company's net interest income because the re-pricing of certain assets and liabilities is discretionary and is subject to competitive and other pressures. In addition, assets and liabilities within the same period may, in fact, be repaid at different times and at different rate levels. We have not experienced the kind of earnings volatility that might be indicated from gap analysis.

The Bank currently uses a computer simulation model to better measure the impact of interest rate changes on net interest income. We use the model as part of our risk management and asset liability management processes that we believe will effectively identify, measure, and monitor the Bank’s risk exposure. In this analysis, the Bank examines the results of movements in interest rates with additional assumptions made concerning prepayment speeds on mortgage loans and mortgage securities. Shock scenarios, which assume a parallel shift in interest rates and is instantaneous, typically have the greatest impact on net interest income. The following is a rate shock analysis and the impact on net interest income as of June 30, 2015 (dollars in thousands):

Changes in Rates		Prospective One-Year Net Interest Income		Change In Prospective Net Interest Income	% Change In Prospective Net Interest Income
-100 Shock	$	29,428	$	(267)	(0.90)
Base		29,695		-	-
+100 Shock		28,707		(988)	(3.33)
+200 Shock		27,910		(1,785)	(6.01)
+300 Shock		27,045		(2,650)	(8.92)
+400 Shock		26,061		(3,634)	(12.24)

The model makes estimates, at each level of interest rate change, regarding cash flows from principal repayments on loans and mortgage backed securities, call activity of other investment securities, and deposit selection, re-pricing and maturity structure. Because of these assumptions, actual results could differ significantly from these estimates which would result in significant differences in the calculated projected change on net interest income. Additionally, the changes above do not necessarily represent the level of change under which management would undertake specific measures to realign its portfolio in order to reduce the projected level of change. It should be noted that the changes in

net interest income noted above are in line with Bank policy for interest rate risk.

Item 3-Quantitative and Qualitative Disclosure about Market Risk

In the normal course of conducting business activities, the Company is exposed to market risk, principally interest rate risk, through the operations of its banking subsidiary. Interest rate risk arises from market driven fluctuations in interest rates that affect cash flows, income, expense and values of financial instruments and was discussed previously in this Form 10-Q. Management and a committee of the Board of Directors manage interest rate risk (see also "Interest Rate and Market Risk Management").

Item 4-Control and Procedures

(a) Disclosure Controls and Procedures

The Company's management, including the Company's principal executive officer and principal financial officer, have evaluated the effectiveness of the Company's "disclosure controls and procedures," as such term is defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended, (the "Exchange Act"). Based upon their evaluation, the principal executive officer and principal financial officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective for the purpose of ensuring that the information required to be disclosed in the reports that the Company files or submits under the Exchange Act with the SEC (1) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (2) is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

(b) Changes to Internal Control over Financial Reporting

There were no changes in the Company's internal control over financial reporting during the quarter ended June 30, 2015 that have materially affected, or are reasonable likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1 - Legal Proceedings

Management is not aware of any litigation that would have a material adverse effect on the consolidated financial position of the Company. Any pending proceedings are ordinary, routine litigation incidental to the business of the Company and its subsidiary. In addition, no material proceedings are pending or are known to be threatened or contemplated against the Company and its subsidiary by government authorities.

Item 1A – Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, "Item 1.A. Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2014, which could materially affect our business, financial condition or future results. At June 30, 2015 the risk factors of the Company have not changed materially from those reported in our Annual Report on Form 10-K. However, the risks described in our Annual Report on Form 10-K are not the only risks that we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

Item 2 – Unregistered Sales of Equity Securities and Use of Proceeds

ISSUER PURCHASES OF EQUITY SECURITIES

Period	Total Number of Shares (or units Purchased)	Average Price Paid per Share (or Unit)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans of Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs (1)
4/1/15 to 4/30/15	-	-	-	54,577
5/1/15 to 5/31/15	364	$48.50	364	54,213
6/1/15 to 6/30/15	-	-	-	54,213
Total	364	$48.50	364	54,577

(1) On January 17, 2012, the Company announced that the Board of Directors authorized the Company to repurchase up to an additional 140,000 shares. The repurchases will be conducted through open-market purchases or privately negotiated transactions and will be made from time to time depending on market conditions and other factors. No time limit was placed on the duration of the share repurchase program. Any repurchased shares will be held as treasury stock and will be available for general corporate purposes.

Item 3 - Defaults Upon Senior Securities

Not applicable.

Item 4 – Mine Safety Disclosure

Not applicable.

Item 5 - Other Information

None.

Item 6 - Exhibits

(a) The following documents are filed as a part of this report:

2.1	Agreement and Plan of Merger by and among Citizens Financial Services, Inc., First Citizens Community Bank and The First National Bank of Fredericksburg, dated as of June 30, 2015(1)
3.1	Articles of Incorporation of Citizens Financial Services, Inc., as amended (2)
3.2	Bylaws of Citizens Financial Services, Inc.(3)
4.1	Form of Common Stock Certificate.(4)
31.1	Rule 13a-14(a)/15d-14(a) Certification of Chief Executive Officer
31.2	Rule 13a-14(a)/15d-14(a) Certification of Chief Financial Officer
32.1	Section 1350 Certification of Chief Executive Officer and Chief Financial Officer
101 **	The following materials from the Company's Quarterly Report on Form 10-Q for the period ended June 30,2015, formatted in XBRL (Extensible Business Reporting Language): (i) The Consolidated Balance Sheet (unaudited), (ii) the Consolidated Statement of Income (unaudited), (iii) the Consolidated Statement of Comprehensive Income (unaudited), (iv) the Consolidated Statement of Cash Flows (unaudited) and (v) related notes (unaudited).
