Net income for the second quarter of 2005 was \$365 million, up 5% from \$348 million for the second quarter of 2004. "Our continued success highlights the diversity of our business mix and our ability to adapt to challenging market conditions. A brief discussion of the firm's business segments follows:

CAPITAL MARKETS

Capital Markets net revenues for the second quarter of 2005 were \$1.4 billion, up 7% from \$1.3 billion for the quarter ended May 31, 2004. o Institutional Equities net revenues were \$390 million, up 59% from \$246

million for the second quarter of 2004. Increased quarterly revenues were driven primarily by the equity derivatives and the domestic and international equity sales and trading areas. In addition, principal gains on the company's investment in the ISE and certain energy-related ventures contributed to the increase. Revenues rose substantially in the equity derivatives area as origination volumes and customer activity increased. Greater revenues in the equity sales and trading areas reflected domestic market share gains, higher customer volumes and the continued growth of the international sales and trading franchise.

- o Fixed Income net revenues were \$808 million, down 6% from record net revenues of \$860 million in the second quarter of 2004. The continued strength in the fixed income results was led by record revenues in credit derivatives and robust activity in leveraged finance. The interest rate and mortgage product areas continued to perform well in increasingly difficult market conditions. The mortgage franchise remains a dominant market force and was ranked number one for the first half of 2005.
- o Investment Banking net revenues of \$232 million in the second quarter of 2005 were effectively unchanged when compared with the \$234 million in the prior year period. Although industry-completed M&A activity declined, the company's merger and acquisition advisory fees increased reflecting market-share gains. Municipal underwriting revenues increased and high yield underwriting declined in line with industry activity.

GLOBAL CLEARING SERVICES

Global Clearing Services net revenues were \$276 million for the second quarter 2005, up 17% from \$235 million in the year ago quarter. Net interest revenue increases were driven by higher customer balances and improved net interest margins, while commission revenues declined due to competitive market conditions. Average customer margin debt balances for the quarter ended May 31, 2005 were \$58.7 billion, up 26% from \$46.7 billion in the prior year quarter. Customer short balances averaged \$86.8 billion during the second quarter of 2005, up 12% from \$77.2 billion in the prior year period.

WEALTH MANAGEMENT

Wealth Management net revenues for the quarter ended May 31, 2005 were \$156 million, down 12% from \$177 million in the second quarter of 2004. o Private Client Services net revenues were \$106 million, a decrease of

10% from \$117 million in the 2004 second quarter, driven primarily by reduced investor activity.

- o Asset Management net revenues declined 15% to \$50 million for the second quarter of 2005 from \$59 million in the prior year's quarter. The second quarter of 2004 included one-time revenues of \$21.5 million from the sale of certain mutual funds assets. Excluding these revenues, Asset Management net revenues increased 33% on higher management and performance fees. Assets under management increased 35% to \$36.9 billion on May 31, 2005 from \$27.3 billion on May 31, 2004.

EXPENSES

- o Compensation as a percentage of net revenues was 49.3% in the second quarter of 2005 as compared with 49.9% for the second quarter of 2004. Year-to-date compensation to net revenues was 49.3% for 2005 versus 49.5% for the six months ended May 31, 2004.
- o Non-compensation expenses were \$393 million for the quarter ended May 31, 2005, an increase of 12% from \$352 million in the 2004 quarter. The ratio of non-compensation expenses to net revenues was 21.0% in the second quarter 2005 versus 20.4% in the prior year quarter. The increase in

Edgar Filing: BEAR STEARNS COMPANIES INC - Form 8-K

non-compensation expenses is attributable primarily to higher communications and technology costs, occupancy and professional fees.

The pre-tax profit margin increased to 29.8% in the quarter ended May 31, 2005 from 29.7% in the 2004 second quarter.

As of May 31, 2005, total capital, including stockholders' equity and long-term borrowings, was approximately \$49.4 billion. Book value as of May 31, 2005 was \$65.12 per share, based on 145.9 million shares outstanding.

RECLASSIFICATIONS

During the quarter the company changed the income statement presentation of certain servicing fees and asset-based retail investor advisory fees. All net servicing fees are included in the Investment banking line on the income statement. Asset-based retail investor advisory fees are included in the Asset management and other income line on the income statement. In the segment reporting, within the Capital Markets segment, certain servicing fees have been reclassified from Investment Banking to Fixed Income. These reclassifications in both the income statement and the segment reporting were made to prior period amounts to conform to the current period's presentation.
