

(Address of principal executive office)

Issuer's telephone number (414) 973-4300

Securities registered pursuant to Section 12(b) of the Act: None

Securities registered pursuant to Section 12(g) of the Act:

Common Stock, par value \$0.001 per share

(Title of Class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Exchange Act.

Yes No

Indicate by check mark whether the registrant (1) filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by checkmark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (S229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. []

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company ü

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No ü

The aggregate market value of the common stock held by non-affiliates of the registrant, based on the closing price of the registrant's common stock on January 31, 2012 as reported on the OTC bulletin board, was \$8.3 million.

As of October 19, 2012, there were 8,142,550 shares of the registrant's shares outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Definitive Proxy Statement, to be filed with the Securities and Exchange Commission no later than 120 days after July 31, 2012, for the 2013 Annual Meeting of Shareholders are incorporated by reference in Part III hereof.

This Annual Report on Form 10-K, including the section titled “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in Item 7, contains forward-looking statements regarding future events and our future results that are subject to the safe harbors created under the Securities Act of 1933 (the “Securities Act”) and the Securities Exchange Act of 1934 (the “Exchange Act”). All statements other than statements of historical facts are statements that could be deemed to be forward-looking statements. These statements are based on current expectations, estimates, forecasts, and projections about the markets in which we operate and the beliefs and assumptions of our management. Words such as “expects,” “anticipates,” “targets,” “goals,” “projects,” “intends,” “plans,” “believes,” “seeks,” “estimates,” “endeavors,” “strives,” “may,” variations of such words, and similar expressions are intended to identify such forward-looking statements. In addition, any statements that refer to projections of our future financial performance, our anticipated growth and trends in our businesses, and other characterizations of future events or circumstances are forward-looking statements. Readers are cautioned that these forward-looking statements are only predictions and are subject to risks, uncertainties, and assumptions that are difficult to predict, estimate, or verify, including those identified below under “Item 1A. Risk Factors” and elsewhere herein. Therefore, actual results may differ materially and adversely from those expressed in any forward-looking statements. We undertake no obligation to revise or update any forward-looking statements for any reason.

PART I

Item 1. Business

Overview

ARI Network Services, Inc. (“ARI”) is a leader in creating, marketing, and supporting solutions that enhance revenue and reduce costs for our customers. Our innovative, technology-enabled solutions connect the community of consumers, dealers, distributors, and manufacturers to help them efficiently service and sell more whole goods, parts, garments, and accessories (“PG&A”) in selected vertical markets worldwide that include power sports, outdoor power equipment, marine, and appliances. We estimate that more than 19,000 equipment dealers, 140 manufacturers, and 195 distributors worldwide leverage our technology to drive revenue, gain efficiencies and increase customer satisfaction.

Our suite of software products, software as a service (“SaaS”) and data as a service (“DaaS”) solutions are designed to facilitate our customers’ operations, increasing sales through additional foot and website traffic, more effective lead management, and greater conversion rates on those leads. To achieve this, our solutions allow our customers to: (i) efficiently market to their customers and prospects in order to drive increased traffic to their location and website; (ii) manage and nurture customers and prospects; (iii) increase revenues by selling whole goods and PG&A online; (iv)

increase revenues by generating leads for whole goods; and (v) increase revenues and reduce costs of our dealer customers by enhancing the productivity of their parts and service operations.

Most of our solutions leverage our library of content that we have published and aggregated into a large content management system, which we take to market primarily through SaaS and DaaS business models. It is the nature of our products, along with the content and the continual management and updating of the content, which allows us to sell the majority of our products and services in a recurring revenue model. Today, our content database contains data related to more than 10 million active parts across more than 469,000 models; more than 500,000 active accessories; SKUs across more than 73,000 active products; more than 300 actively updated whole goods brands; and holds full model data and images for more than 175,000 active models.

We were incorporated in Wisconsin in 1981. Our principal executive office and headquarters is located in Milwaukee, Wisconsin. The office address is 10850 West Park Place, Suite 1200, Milwaukee, WI 53224, and our telephone number at that location is (414) 973-4300. Our principal website address is www.arinet.com. ARI also maintains operations in Cypress, California; Virginia Beach, Virginia; Floyd's Knobs, Indiana; and The Netherlands.

Our Solutions

Today, we generate revenue from three primary categories of technology-enabled solutions: (i) electronic catalogs for publishing, viewing and interacting with PG&A information from Original Equipment Manufacturers ("OEMs") and distributors; (ii) lead generation and management products and services designed to help dealers generate sales of whole goods and PG&A through efficient marketing of their products; and (iii) websites with eCommerce capabilities designed to leverage leads for sales of whole goods and PG&A through the sites and provide information to consumers in dealers' local areas.

Electronic Catalogs

Our electronic catalog solutions, which encompass our PartSmart®, PartSmart Web™ and PartStream™ products, leverage our industry-leading content database to allow distributors and dealers to view and interact with this information to efficiently support the sales and

service of equipment. We believe that our catalog solution is the fastest and most efficient in the market, as it allows multi-line dealers to quickly access data for any of the brands serviced from within the software, allowing the dealer's parts and service operations to more quickly service and sell to its customers. We derived approximately 60% of our revenues from our electronic catalog services in fiscal 2012.

PartSmart®, our CD-based electronic parts catalog, is used by dealers worldwide in the outdoor power, power sports, marine and agricultural equipment industries to increase productivity by significantly reducing parts lookup time. Our PartSmart® software allows multi-line dealers to look up parts and service information for all manufacturer product lines that the dealer carries, and integrates with more than 85 of the leading dealer business management systems. We also provide a version of our PartSmart® product to the appliance industry, known as PartSmart® IPL.

PartSmart Web™, a SaaS solution, is used by distributors and manufacturers to provide their dealers with access to parts and pricing information via the Internet.

PartStream™, a SaaS solution, is a modular, consumer-focused illustrated parts lookup application that integrates with existing dealer website platforms and shopping carts and allows consumers to quickly identify the desired part, add the part to their electronic shopping cart and check out. It leverages ARI's parts content, delivering it to PartStream™ users on demand from ARI servers.

Website Solutions

Our eCommerce enabled website solutions, which are tailored to the vertical markets we serve, provide consumers with information about the dealership and its product lines and allow consumers to purchase whole goods and PG&A through the dealers' website 24 hours a day, 7 days a week. Our website solutions include WebSiteSmart Pro®, eXceleratePro™, eXceleratePro™ 2, and LeadStorm™. We also offer a mobile solution that allows dealers' websites to be fully functional on smart mobile phones. Website services accounted for approximately 25% of revenues in fiscal 2012.

Lead Management Product

Our award-winning SaaS solution, Footsteps™, is designed to efficiently manage and nurture generated leads, increasing conversion rates and ultimately revenues. Footsteps™ connects equipment manufacturers with their dealer channel through lead consolidation and distribution, and allows the dealers to handle leads more efficiently and professionally

through marketing automation and business management system integration. The product is used as a complete database of customers and prospects, and manages the dealer to customer relationship from generating email campaigns and automated responses, to providing sales teams with a daily follow-up calendar and reminder notices. We derived approximately 5% of our revenues from Footsteps™ in fiscal 2012.

Lead Generation Service

Our web-based lead generation service, SearchEngineSmart™, generates increased traffic to dealers' stores and websites through optimization of the dealers' paid search engine marketing campaigns, which include optimization for results in our dealers' local areas. We derived approximately 6% of our revenues from lead generation services in fiscal 2012.

Other Services

We also offer a suite of complementary solutions, which include software and website customization services, website hosting, and document transfer and communication services. On a combined basis, these other services accounted for approximately 5% of fiscal 2012 revenues.

Our Strategy

ARI's goal is to drive increased value to our shareholders through double digit revenue and earnings growth. We believe the following fundamental strategic pillars will allow us to continue to provide our customers with the innovative solutions and value-added services they have come to expect, which will ultimately drive the long-term growth and profitability our shareholders expect.

Nurture and retain existing customers through world-class customer service and value-added product feature updates

We will continue to leverage our relationships with existing customers and closely monitor and manage the level of customer churn. In fiscal 2012, our rate of customer churn improved by 19% over fiscal 2011, in large part due to our fiscal 2012 accomplishments in this area, including:

- We deployed a brand new, state-of-the-art call center to support our inside sales, customer service, technical support, and renewal teams. The call center was designed to drive increased efficiencies and activity levels within these groups, and includes the display of continuous, real time sales and support metrics throughout the call center.
- We deployed a leading customer relationship management tool (“CRM”) throughout the entire organization, whereas a CRM was previously utilized only within the sales group. This company-wide implementation allows for a consistent, 360 degree view of a customer’s information throughout the organization, creating further efficiencies and driving improvement in our sales order and support processes. The CRM tool also allows for critical dashboard reporting of sales and support metrics, which are utilized within the call center.
- We implemented a new OEM support team and continued to improve our online knowledge-based support, which provides answers to frequently asked questions, troubleshooting information and how-to documentation. In addition to this, we continued to proactively call our renewing customers to ensure their satisfaction and offer additional products and services.
- We developed the technology, now used by more than 90% of our catalog customers, to easily update OEM catalogs via the internet, providing our customers with up to date information and saving them time and money. In addition to this, we made improvements to our website hosting stability and have provided internet updating capabilities for all of our products.
- We deployed new editions of all of our core products during fiscal 2012 and expanded our market leading content library by adding 15 new brands of PG&A catalogs.

Drive organic growth through innovative new service offerings, differentiated content and geographic expansion

As a subscription-based, recurring revenue business, the most important drivers of future growth are increasing the level of our recurring revenue (“RR”) and reducing the rate of our customer churn. We define RR as products and services which are subscription-based and renewable, including license fees, maintenance fees, catalog subscription fees and hosting fees. The improvements made with respect to our customer churn rates were previously discussed. In fiscal 2012 our RR increased 8% overall, and RR on our three core recurring products – catalog, website, and lead management – increased 9.8%. This increase was the result not only of the improvement in customer churn rates discussed above, but was also driven by progress we made during the year with respect to our organic growth strategy, which includes the following critical objectives:

- Develop and deploy innovative new solutions. We have made, and expect to continue to make, significant investments in our product management and development teams. In fiscal 2011, we realigned these teams with resources assigned to each of our core products and, in fiscal 2012, we continued to further augment our staffing in these areas. The teams will continue to research and develop new features and functionality in our existing products. The introduction of new solutions, upgrades to existing products, and new feature sets are all designed to grow our average revenue per dealer (“ARPD”), an important measure for a subscription-based business, and the increase in our customer base serves to quickly compound the benefits of an increased ARPD.

We recently deployed multiple new editions of FootSteps™, including Channel Connect for Manufacturers, Professional and Essentials for dealers. These editions enable customers to add feature upgrades and grow with the product over time. We also launched PartStream Mobile and PartStream Essentials, a lightweight edition of ARI’s award winning

OEM parts eCommerce solution.

In addition to this, we have expanded our WebsiteSmart social media sharing tools, mobile unit brochures and search engine optimization tool enhancements and launched a new Discover Boating lead generation system, built on the Footsteps platform, which supports the delivery of sales leads and nurture marketing to our customers.

We have begun to develop and deploy a more scalable solution, which we refer to these as “freemium” versions of our core products, aimed at targeting the smaller dealers in our vertical markets. We will provide these smaller dealers with a basic version of the product at little or no cost and charge the dealer a variable pricing option, such as usage based pricing. The intent is that, as the dealer begins to utilize the product and realize its value proposition, the dealers will ultimately upgrade to the “premium”, feature-rich version. We believe this will open up to us a portion of the market not previously available. Furthermore, the incremental cost to provide the solutions to these customers is minimal.

· Expand geographically. Currently, only a small percentage of our revenues are generated from international operations. Our OEM customers have stated objectives to drive growth internationally, with a focus on the “BRIC” countries of Brazil, Russia, India, and China. We must continue to support our OEM customers with products and content for these markets. During fiscal 2012, we dedicated one of our business development resources solely to the purpose of obtaining new content with a focus on international manufacturers. We began to upgrade our product roadmaps to allow us to rapidly deploy our products in these

markets in a scalable and efficient manner and without the need to have “boots on the ground” in those countries, much like the freemium / premium model just discussed.

- Differentiate our content. During the year, we obtained content from 15 new OEM relationships. We believe that we have the largest library of whole goods and PG&A content data in the vertical markets we serve. However, simply offering the largest content library in the markets we serve is not sufficient to drive the long term growth we expect. We must continue to enhance our value proposition through enrichment of our content or this competitive advantage will begin to lose its distinction. Content enrichment can take several forms, including the incorporation of user reviews and feedback into our existing content, further enhancing content provided to us by our OEM customers, and creating new forms of content that further our customers’ ability to efficiently service and sell more whole goods and PG&A.

Lead the market with open integration to related platforms

One of our strategic advantages is our focus on integrating our solutions with dealer business management systems (“DMS”) in order to pass key information, including customer and transactional data, between the systems. We currently have integration capabilities with over 90 DMS’s (we refer to these relationships as “Compass Partners”) and we continue to seek other strategic alliances that can be integrated with our product and service offerings. In fiscal 2012, we entered into three new DMS integration relationships and we continuously pursue integration opportunities when they arise.

Successfully execute acquisitions that align with our core strategy

Historically, acquisitions have been a significant driver of ARI’s growth. Since 2007, the Company has successfully closed five strategic acquisitions while reviewing, and ultimately deciding not to pursue, a multitude of others. Our 2009 acquisition of Channel Blade Technologies (“Channel Blade”) and our 2008 acquisition of the electronic parts catalog and eCommerce assets of Info Access expanded not only our product offerings but the number of markets we serve. As a result of those acquisitions, ARI is the market leader in the marine, RV and appliance markets. Although we believe organic growth will be the primary driver of our business for the foreseeable future, we will continue to evaluate acquisitions that are in alignment with our core strategy.

On August 17, 2012 we successfully acquired substantially all of the assets of Ready2Ride, Inc. (“R2R”), the first-to-market and leading provider of aftermarket fitment data to the powersports industry. The acquisition of R2R is directly aligned with our strategy to further differentiate our content.

Sales, Marketing and Support Teams

We organize our sales and marketing programs into three distinct sales channels and two geographic regions: North America and Europe.

Sales Channels

We go to market utilizing four sales teams, determined through a combination of customer, product, and geographic market. Our field sales personnel focus on building relationships with manufacturers and distributors, while our inside, telephone-based sales team focuses on selling to dealers. The dealer sales team located in the US is further divided by product (catalog sales versus other products and services) and we also have an international sales team in The Netherlands. We are also in the process of enhancing our core products to allow for online customer self-service sales capabilities.

7

Marketing

Our marketing strategy is designed to drive knowledge of our value proposition into the markets we serve. We use a variety of marketing programs to target and build relationships with our prospective and current customers and partners. Our primary marketing activities include:

- " participation in dealer meetings, trade shows and industry events to create awareness, build our lead database and develop relationships;
- " search engine marketing and online and print direct marketing to generate awareness and action;
- " ongoing website development to educate prospects and provide product information, testimonials, live demonstrations and marketing collateral;
- " email and phone campaigns used to capture leads;
- " use of customer testimonials; and
- " sales tool kits and field marketing training to enable our sales organization to more effectively develop leads and close transactions.

Customer Service and Support

Customer support is a critical part of our strategy as it is essential to retaining our existing customer base and reducing the level of customer churn. We maintain customer support operations in each of the Company's four locations. Our support representatives are available via telephone or email. We also maintain a customer satisfaction and renewal team that focuses on proactively reaching out to customers to ensure that our customers are satisfied and are receiving the most value possible from their spend with ARI.

Our Competitive Strengths

Market Leader in Core Verticals

We believe that we are one of the leaders in each of our core vertical markets and also believe we are the market leader in the outdoor power, marine, and appliance markets. Our direct relationships with approximately 19,000 dealers, 140 manufacturers, and 195 distributors allow us to cost-effectively leverage our published catalog content into a large and diversified customer base and to launch new product enhancements and technology-enabled solutions

to this customer base.

Breadth and Depth of Published Content

The breadth and depth of our catalog content, as well as our ability to enhance and efficiently publish manufacturers' PG&A data as it becomes available, provides ARI with a critical competitive advantage. Our electronic catalog content enables multi-line dealers to easily access catalog content for multiple manufacturers using a single software platform. This advantage, which saves our customers significant time, provides "stickiness" to our catalog customer base that allows us to efficiently and cost effectively nurture our existing customers while devoting resources to develop new products and services, enabling us to grow our overall customer base.

Recurring Revenue Model

Approximately 84% of our revenue is subscription-based and recurring revenue. The majority of our customers are on contracts of twelve months or longer, and these contracts typically auto-renew for additional twelve month terms. This provides us with advanced visibility into our future revenues and opportunities to sell additional services to our customers. Our recurring revenue model also emphasizes the importance of maintaining a low rate of customer churn, one of the key drivers of any recurring revenue, subscription-based business. Historically, we measured customer renewal rates. Last year, we began measuring customer churn rates. Although similar, we believe that customer churn is a better management tool as it allows us to focus on the reasons we may lose customers and take action on those reasons within our control in order to reduce churn rates in the future.

Our recurring revenue model, when combined with low rates of customer churn, significantly reduces the cost to maintain and nurture our customer base. This in turn frees up resources to enhance our existing products and work toward new revenue generating product innovations. Additionally, a substantial portion of our electronic catalog business is focused on our customers' service and repair operations. This allows our revenues to remain strong even in a down economy, as consumers tend to repair, rather than buy new equipment during a challenging economy.

Suite of Products Covers Entire Sales and Service Cycle

Our suite of dealer products and services and eCommerce capabilities enhance our customers' front office operations by covering the entire sales cycle, from lead generation and lead management to sales of PG&A to the consumer, both in-store and online, and our electronic catalog products allow dealers to efficiently service and repair equipment.

We believe that our competitive advantages will enable us to compete effectively and sustainably in our core markets, although given the current pace of technological change, it is possible that unidentified competitors could emerge, existing competitors could merge and/or obtain additional capital, thereby making them more formidable, or new technologies could come on-stream and potentially threaten our position.

Our Markets and the Challenges We Face

Competition for our products and services varies by product and by vertical market. We believe that no single competitor today competes with us on every product and service in each of our industry verticals. In electronic catalogs, we compete primarily with Snap-on Business Solutions, which designs and delivers electronic parts catalogs, accessory sales tools, and manufacturer network development services, primarily to the automotive, power sports, outdoor power, construction, agriculture and mining markets. In addition, there is a variety of smaller companies focused on one or two specific industries.

In lead management, websites and eCommerce, our primary competitors are PowerSports Network, owned by Dominion Enterprises, and 50 Below. Competition for our website development services also comes from in-house information technology groups that may prefer to build their own web-based proprietary systems, rather than use our proven industry solutions. There are also large, general market eCommerce companies, such as IBM, which offer products and services that could address some of our customers' needs. These general eCommerce companies do not typically compete with us directly, but they could decide to do so in the future. We believe we maintain a competitive advantage in our core vertical markets given the breadth and integration of our published catalog content into our lead management and website products.

Several of the markets we serve, including power sports, marine, and RV, are closely aligned with the state of the economy, given the "luxury" nature of the products in those verticals. In fiscal 2010 we experienced an increase in customer churn in these markets due to manufacturer bankruptcies, dealer closures, and extreme cost reduction measures by our dealers. Our customer churn rates improved in these markets in fiscal 2011 and fiscal 2012 as the effects of the economy began to lessen in those markets. It is also important to note that the impacts of a difficult economic environment are somewhat softened by the consumers' willingness in a down economy to repair existing

equipment rather than purchase new equipment, which serves to amplify the importance of our published parts content provided to customers via our catalog parts lookup products and our website products.

Intellectual Property

We rely on various intellectual property laws in the United States and other jurisdictions as well as confidentiality procedures and contractual provisions to protect our proprietary technology and our brand. We also enter into confidentiality and proprietary rights agreements with our employees, consultants and other third parties and control access to software, documentation and other proprietary information. We have two registered trademarks in the U.S. and elsewhere: PartSmart® and WebsiteSmart Pro®. We also use numerous unregistered trademarks.

Employees

As of July 31, 2012, we had 139 employees. Of these, 50 are involved in customer operations and support, 38 are in sales and marketing, 33 are engaged in maintaining or developing software and providing software customization services and 18 are involved in general and administration functions. None of these employees is represented by a union.

Fiscal Year

ARI's fiscal year ends on July 31st. Any references throughout this document to fiscal 2012 or fiscal 2011 refer to the fiscal years ended July 31, 2012 and 2011, respectively. Also note that the reference to the word "fiscal" has been removed from all tables throughout this document.

Executive Officers of the Registrant

The table below sets forth the names of ARI's executive officers as of October 19, 2012. The officers serve at the discretion of the Board of Directors.

Name	Age	Capacity Served
Roy W. Olivier	53	President, Chief Executive Officer and Director
Darin R. Janecek	44	Vice President of Finance, Chief Financial Officer, Secretary and Treasurer
Jeffery E. Horn	50	Vice President, Global Sales
Jon M. Lintvet	36	Chief Marketing Officer
Marvin A. Berg	37	Vice President, Operations

Roy W. Olivier

Mr. Olivier was appointed President and Chief Executive Officer of the Company in May 2008, after having served in the capacity of Vice President of Global Sales and Marketing of the Company since September 2006. Prior to joining ARI in 2006, Mr. Olivier was a consultant to start-up, small and medium-sized businesses. Prior to that, he was Vice President of Sales and Marketing for ProQuest Media Solutions, a business he founded in 1993 and sold to ProQuest in 2000. Before that, Mr. Olivier held various sales and marketing executive and managerial positions with several other companies in the telecommunications and computer industries, including Multicom Publishing Inc., Tandy Corporation, BusinessLand and PacTel.

Darin R. Janecek

Mr. Janecek was appointed Vice President of Finance and Chief Financial Officer of ARI in December 2010, after having served as Vice President of Finance and Director of Finance since joining the Company in May 2009. Mr. Janecek also serves as Treasurer and Corporate Secretary. Prior to joining ARI, Mr. Janecek served in various mergers and acquisitions, corporate strategy and analysis roles at Johnson Controls, Inc. in Milwaukee, Wisconsin,

and Crowe Horwath LLP, FTI Consulting, and CNA Insurance in Chicago, Illinois. Prior to that, he served in several corporate accounting roles in the manufacturing and health care industries. Mr. Janecek began his career in 1991 as an auditor with Deloitte & Touche LLP. Mr. Janecek is a certified public accountant and earned a Master of Business Administration from Loyola University, Chicago, and a Bachelor of Accounting from the University of Wisconsin - Milwaukee.

Jeffrey E. Horn

Mr. Horn was a member of ARI's management team from 2000 to 2006 and rejoined ARI in June 2011 as Interim Vice President of Global Sales. In October 2011, Mr. Horn was appointed Vice President of Global Sales, responsible for leading ARI's sales teams and the marketing communication efforts required to support them. Mr. Horn has more than 20 years of technology sales experience. Before joining ARI, Mr. Horn was Vice President at Grubb & Ellis | Apex Commercial; Director of North American Sales at CyberShift, Inc. (acquired by SumTotal Systems, Inc.) and Director of Sales with Kronos, Inc. Mr. Horn holds a Bachelor of Business Administration Real Estate/Finance from the University of North Texas.

Jon M. Lintvet

Mr. Lintvet was appointed Chief Marketing Officer of ARI in October 2011. As Chief Marketing Officer, Mr. Lintvet leads all product management, innovation and strategic marketing initiatives for ARI. Mr. Lintvet was Chief Executive Officer of Channel Blade prior to ARI's acquisition of the company in 2009. Following the acquisition, Mr. Lintvet was named ARI's Director of Business Development. In November 2010 Mr. Lintvet was promoted to Vice President of Product. Prior to Channel Blade Mr. Lintvet served in various product development roles at Capital One. Mr. Lintvet earned a Bachelor of Science from Ithaca College in Ithaca, New York.

Marvin A. Berg

Mr. Berg was appointed Vice President of Operations in April 2012, leading the Company's customer support, retention and fulfillment operations, and was named an executive officer in August 2012. Prior to this, Mr. Berg served as Director of Planning & Operations since August 2011 and Director of Finance since joining the Company in March 2010. Prior to joining ARI, Mr. Berg served in various financial positions for Time Warner Cable, Inc. and Norlight Telecommunications, both located in Milwaukee, Wisconsin. Mr. Berg was also a

successful business owner/operator in Milwaukee, WI from 2001 to 2005 and was a licensed stock broker from 1997 to 2000. Mr. Berg earned a B.A. in Finance from Michigan State University.

Available Information

You can obtain copies of our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and other filings with the SEC, and all amendments to these filings, free of charge from our website at www.arinet.com as soon as reasonably practical following our filing of any of these reports with the SEC. You can also obtain copies free of charge by contacting us at our office address listed above.

Item 1A. Risk Factors

The risks and uncertainties described below are not the only ones facing us. Other events that we do not currently anticipate or that we currently deem immaterial also may affect our results of operations and financial condition.

Continued unfavorable economic conditions or reduced investments in technology spending may harm our business.

Our business depends on the overall demand for technology services spending, and on the economic health and general willingness of our current and prospective customers to make capital and expense commitments. If the conditions in the U.S. and global economic environment remain uncertain or continue to be volatile, or if they deteriorate further, our business, operating results and financial condition may be adversely affected. Our customers sell capital goods, some of which are considered “luxury” in nature, which are highly dependent on the disposable income of end consumers. Continued weak or volatile economic conditions, or a reduction in consumer spending may weaken our customers’ demand for electronic catalogs, websites, lead management or other technology-enabled services, or their general information technology spending, which would likely harm our business and operating results in a number of ways, including longer sales cycles, potential lower prices for our services, reduced sales, and reduced subscription renewal rates.

We may become liable to our customers and lose customers if we have defects or disruptions in our service or if we provide poor service.

Because we deliver some of our technology as a service, errors or defects in the software applications underlying our service, or a failure of our hosting infrastructure, may make our services, in particular our eCommerce services, unavailable to our customers. Since our customers use our eCommerce services to facilitate their sales, any errors, defects, disruptions in service or other performance problems with our services, whether in connection with the day-to-day operation of our services, upgrades or otherwise, could damage our customers' businesses.

Despite the implementation of security measures, the core of our network infrastructure is vulnerable to unauthorized access, computer viruses, equipment failure and other disruptive problems, including the following:

- we and our users may experience interruptions in service as a result of the accidental or intentional actions of Internet users, current and former employees or others;
- unauthorized access may jeopardize the security of confidential information stored in our computer systems and our customers' computer systems, which may result in liability to our customers and also may deter potential customers;
- we may face liability for transmitting to third parties viruses that damage or impair their access to computer networks, programs, data or information;
- there may be a systemic failure of Internet communications, leading to claims associated with the general unavailability of some of our products; or
- eliminating computer viruses and alleviating other security or technical problems may require interruptions, delays or cessation of service to our customers.
- If we have any errors, defects, disruptions in service or other performance problems with our services, customers could elect not to renew, or delay or withhold payment to us, we could lose future sales or customers may make claims against us, which could result in an increase in our provision for doubtful accounts, an increase in collection cycles for accounts receivable or litigation costs.

Our core markets and verticals are competitive, and if we do not compete effectively, our operating results may be harmed.

The markets for electronic catalog, websites, lead management and other technology-enabled services targeted at the equipment industry are competitive, and the eCommerce area, specifically, is rapidly changing with relatively low barriers to entry. With the introduction of new technologies and market entrants, we expect competition to remain intense. In addition, increased competition generally could result in reduced sales, reduced margin or the failure of our services to achieve or maintain more widespread market acceptance. Competition in our market is based principally upon service breadth and functionality; service performance, security and reliability; ability to tailor and customize services for a specific company, vertical market or industry; ease of use of the service; speed and ease of deployment, integration and configuration; total cost of ownership, including price and implementation and support costs;

professional services implementation; strength of customer relationships; and financial resources of the vendor. To compete effectively, we also must be able to more frequently update our services to meet market demand.

Our principal competitors include Snap-on Business Solutions, 50 Below, and Powersports Network, owned by Dominion Enterprises. Some of our actual and potential competitors enjoy competitive advantages over us, such as greater name recognition within our target vertical markets, larger marketing budgets, as well as substantially greater financial, technical and other resources. If we are not able to compete effectively, our operating results will be harmed.

The impact of negative factors on the business may not be immediately reflected in our financial results.

Because we recognize subscription revenue over the term of the applicable agreement, non-renewal of subscriptions or reductions in new service agreements may not be reflected immediately in our operating results. The majority of our revenue in any given period is attributable to service agreements entered into during previous periods. A decline in new or renewed service agreements in any one period will not be fully reflected in our revenue in that period but will harm our revenue in future periods. As a result, the effect of significant downturns in sales and market acceptance of our services in a particular period may not be fully reflected in our operating results until future periods. Our subscription model also makes it difficult for us to rapidly increase our revenue through additional sales in any period, because revenue from new customers must be recognized over the applicable subscription term.

Our operating results may fluctuate from quarter to quarter.

We expect that a portion of our revenue in the future will be derived from non-recurring fee income, which consists primarily of revenues from professional services such as software customization and training, software sales and one-time network installation fees. The timing of receipt of this revenue is dependent upon several factors that we cannot predict. These factors include:

- " the time required to close large license fee and development agreements, which can be delayed due to customer requirements and decision-making processes;
- " the seasonality of certain sectors of the equipment industry in which we operate;
- " delays in the introduction of new products or services and their acceptance by customers; and
- " delays in delivering customized software to our customers.

Our costs are not entirely predictable and may vary from quarter-to-quarter due to acquisitions or non-recurring expenditures. Cash flows may also vary from quarter to quarter, depending on the timing of disbursements and customer payments, which exhibit considerable seasonality. These fluctuations may make period-to-period comparisons of our results of operations more complex.

Changes in financial accounting standards or practices may cause adverse, unexpected financial reporting fluctuations and harm our operating results.

A change in accounting standards or practices could harm our operating results and may even affect our reporting of transactions completed before the change is effective. New accounting pronouncements and varying interpretations of accounting pronouncements have occurred and may occur in the future. Changes to existing rules or the questioning of current practices may harm our operating results or the way we conduct our business and may increase our compliance costs.

Our business could suffer if we are unable to protect our intellectual property rights or become liable for infringing the intellectual property rights of others.

We regard our trademarks, proprietary technology and similar intellectual property as critical to our success, and we rely upon trademark law, trade secret protection, and confidentiality and license agreements with our employees, strategic partners, and others to protect our proprietary rights, but these measures can have only limited effectiveness. Prevalent use of the Internet has also increased the ease with which third parties can distribute our intellectual property without our authorization.

We intend to pursue the registration of our material trademarks as necessary. We may not be entitled to the benefits of any such registration until such registration takes effect. In addition, effective protection may not be available in every country in which our products are available. Further, we may be subject to claims in the ordinary course of our business, including claims of alleged infringement of the trademarks, copyrights and other intellectual property rights of third parties by us and our licensees.

Other parties may assert claims of infringement of intellectual property or other proprietary rights against us. These claims, even if without merit, could require us to expend significant financial and managerial resources. Furthermore, if claims like this were successful, we might be required to change our trademarks, alter our content, products or services, or pay financial damages, any of which could substantially increase our operating expenses. We also may be required to obtain licenses from others to refine, develop, market and deliver new services. We may be unable to obtain any needed license on commercially reasonable terms or at all, and rights granted under any licenses may not be valid and enforceable. In the future we could be subject to legal proceedings and claims from time to time in the ordinary course of our business, including claims of alleged infringement of trademarks and other intellectual property rights of

third parties by us and our licensees. Any such claims could have a material adverse effect on our business, financial condition and operating results.

We are dependent on our management and employees.

We are dependent on the services of our executive officers and other key employees. There can be no assurance, however, that we can obtain executives of comparable expertise and commitment in the event of death, disability, or voluntary departure of one of our executive officers or other key employees, or that our business would not suffer material adverse effects as the result of the death, disability, or voluntary departure. Further, the loss of the services of any one or more of these employees could have an adverse effect on our business. In addition, we will also need to attract and retain other highly skilled technical and managerial personnel for whom competition is intense. If we are unable to do so, our business, results of operations and financial condition could be materially adversely affected.

Our common stock has a very limited trading market.

Our common stock is traded on the OTC bulletin board, which typically provides less liquidity than the NASDAQ Stock Market or other national securities exchanges. In addition, trading in our common stock has historically been extremely limited. Because of the thinness of the market for our stock, the price of our common stock may be subject to manipulation. This limited trading may adversely affect the liquidity of our common stock, not only in terms of the number of shares that can be bought and sold at a given price, but also through delays in the timing of transactions and reduction in security analysts' and the media's coverage of us. As a result, there could be a larger spread between the bid and the ask prices of our common stock and an investor may not be able to sell shares of our common stock when or at prices they desire.

Our shareholder rights plan may permit our board to block a takeover attempt and adversely affect the value of our common stock.

Our board of directors adopted a shareholder rights plan and declared a dividend of an associated right, which together are expected to have the effect of deterring any takeover of the Company that is not preceded by board approval of the proposed transaction. The existence of such shareholder rights plan may deter potential tender offers for our common stock or other acquisition offers and may have the effect of delaying or preventing a change of control.

We may not be able to identify, acquire and successfully integrate acquisitions.

A key component of our growth strategy has been and will continue to be acquisitions and other business development opportunities that solidify or accelerate our market position in our core offerings and vertical markets. The successful implementation of this strategy depends upon our ability to identify suitable acquisition candidates, acquire such businesses on acceptable terms, finance the acquisition and integrate their operations successfully into ARI. There can be no assurance that such candidates will be available or, if such candidates are available, that the price will be attractive or that we will be able to identify, acquire, finance or integrate such businesses successfully. In addition, in pursuing such acquisition opportunities, we may compete with other entities with similar growth strategies; these competitors may be larger and have greater financial and other resources than ARI. Competition for these acquisition targets could also result in increased prices of acquisition targets and/or a diminished pool of companies available for acquisition.

The successful integration of these acquisitions also may involve a number of additional risks, including: (i) the inability to retain the clients of the acquired business; (ii) the lingering effects of poor client relations or service performance by the acquired business, which also may taint our existing business; (iii) the inability to retain the desirable management, key personnel and other employees of the acquired business; (iv) the inability to fully realize the desired efficiencies and economies of scale; (v) the inability to establish, implement or police ARI's existing standards, controls, procedures and policies on the acquired business; (vi) diversion of management attention; and (vii) exposure to client, employee and other legal claims for activities of the acquired business prior to acquisition. In addition, any acquired business could perform significantly worse than expected.

The inability to identify, acquire, finance and successfully integrate acquisitions could have a material adverse effect on ARI or its estimated or desired business, income, growth or other condition and results.

Future acquisitions may result in dilution to existing shareholders.

The timing, size and success of acquisition efforts and any associated capital commitments cannot be readily predicted. Future acquisitions may be financed by issuing shares of common stock, cash, or a combination thereof. To the extent our common stock is used for all or a portion of the consideration to be paid for future acquisitions, dilution may be experienced by existing stockholders.

We face risks with our international strategy.

Our business strategy includes increasing our presence in the non-U.S. equipment markets. This strategy presents a number of special risks, including:

- " managing more geographically diverse operations;
- " dealing with currency fluctuations;
- " the increased costs of operation;
- " only having a small number of employees in these markets;
- " our dependence on value-added resellers and contractors to sell and service our products;
- " a much smaller and more concentrated current customer base; and
- " the assumption that U.S. international policy will remain favorable towards the countries in which we sell our products and services.

Our historical losses have resulted in accumulated deficits on the balance sheet.

While we have been profitable in recent years, we have experienced net losses in numerous fiscal years since our organization in 1981, resulting in an accumulated deficit of \$88 million at July 31, 2012. We may not be able to maintain profitability or increase profitability in the future. As a result of our historical losses, our financial position has been weakened, and our ability to finance our growth is constrained.

We will require a significant amount of cash to service our indebtedness. Our ability to generate cash depends on certain factors beyond our control.

Our ability to make principal and interest payments on our indebtedness and to fund planned capital expenditures and product development efforts will depend on our ability to generate cash in the future. Our future operating performance and financial results will be subject, in part, to factors beyond our control, including dealer bankruptcies in the vertical markets we serve, and general economic, financial and business conditions. We cannot assure that our business will generate sufficient cash flow from operations or that future financing facilities will be available to us in an amount sufficient to enable us to pay our indebtedness or to fund our other liquidity needs.

If we are unable to generate sufficient cash flow to service our debt, we may be required to:

- " refinance all or a portion of our debt or obtain additional financing, neither of which can be assured;
- " sell some of our assets or operations;
- " reduce or delay capital expenditures, research and development efforts and acquisitions; or

" revise or delay our strategic plans.

If we are required to take any of these actions, it could have a material adverse effect on our business, financial condition and results of operations. In addition, we cannot assure that we would be able to take any of these actions, that these actions would enable us to continue to satisfy our capital requirements or that these actions would be permitted under the terms of our various debt instruments.

Item 2. Properties

The table below summarizes ARI's current facilities. Management believes that the Company's current facilities are suitable and sufficient to support present operations.

Description of Use	Location	Square Footage	Lease Expiration	Operating Segment
Corporate headquarters	Milwaukee, WI	16,300	July 2021	North America
Product development and professional services team	Cypress, CA	6,000	July 2013	North America
Marine and RV sales and support	Virginia Beach, VA	9,800	April 2014	North America
Aftermarket fitment data development and support	Floyds Knobs, IN	2,200	April 2014	North America
European sales and support	Leiden, The Netherlands	200 m ²	April 2015	Netherlands

Item 3. Legal Proceedings

None.

Item 4. Mine Safety Disclosures

Not Applicable.

PART II

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

ARI’s common stock is currently quoted on the OTC bulletin board under the symbol ARIS. The following table sets forth the high and low sales price for the periods indicated. OTC bulletin board quotations reflect inter-dealer prices, without retail mark-up, mark-down or commission and may not necessarily reflect actual transactions.

Fiscal Quarter Ended:	High	Low
10/31/2010	\$ 0.75	\$ 0.31
1/31/2011	\$ 0.75	\$ 0.45
4/30/2011	\$ 0.80	\$ 0.47
7/31/2011	\$ 0.99	\$ 0.48
10/31/2011	\$ 0.99	\$ 0.66
1/31/2012	\$ 3.00	\$ 1.00
4/30/2012	\$ 1.95	\$ 1.27
7/31/2012	\$ 1.66	\$ 0.90

As of October 19, 2011, there were approximately 822 holders of record of ARI common stock. We have not paid cash dividends to date and have no current intention to pay cash dividends.

During fiscal 2012, the Company did not repurchase any of its equity securities.

Item 6. Selected Financial Data

The following tables set forth certain financial information with respect to the Company for each of the previous five fiscal years, which includes information derived from ARI's audited financial statements and notes thereto for fiscal 2012 and fiscal 2011. The reports, thereon, of Wipfli LLP are included elsewhere in this report. The selected financial data should be read in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operations" and the aforementioned Financial Statements and Notes. All amounts are in thousands, except per share data.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion of our results of operations and financial condition should be read together with our audited consolidated financial statements for fiscal 2012 and fiscal 2011, including the notes thereto, which appear elsewhere in this Annual Report on Form 10-K. This discussion contains forward-looking statements, which as previously identified are subject to the safe harbors created under the Securities Act and Exchange Act.

Overview

Our fiscal 2012 strategies were designed to help ARI achieve double digit, sustainable recurring revenue growth and to drive improvements in the rate of customer churn. As a subscription-based, recurring revenue business, recurring revenues and customer churn rates are two of the critical drivers of growth and are monitored closely by management. During fiscal 2012 recurring revenues grew 8.0% and the rate of customer churn improved by approximately 19.0%. We have experienced recurring revenue growth in each of the last eight quarters, and recurring revenue now comprises approximately 84% of our total revenues. A number of key accomplishments contributed to this improvement, including the following:

- We deployed a brand new, state-of-the-art call center to support our inside sales, customer service, technical support, and renewal teams. The call center was designed to drive increased efficiencies and activity levels within these groups, and includes the display of continuous, real time sales and support metrics throughout the call center.
- We deployed a leading CRM throughout the entire organization, which was previously utilized only within the sales group. The company-wide implementation allows for a consistent, 360 degree view of a customer's information throughout the organization, creating further efficiencies and driving improvement in our sales order and support processes, as well as critical dashboard reporting of sales and support metrics. The company-wide deployment of the CRM is the first step in the implementation of a new, cloud-based scalable ERP system.
- We continued to proactively call renewing customers, implemented a new OEM support team and continued to improve our online knowledge-based support, which provides answers to frequently asked questions, troubleshooting information and how-to documentation.
- We developed the technology, now used by more than 90% of our catalog customers, to easily convert and upload multiple OEM catalog updates simultaneously within a matter of minutes of availability, saving our customers time and money. In addition to this, we made improvements to our website hosting stability and have provided internet updating capabilities to all of our products.
- We deployed new editions of all of our core products during fiscal 2012 and expanded our market leading content library by adding 15 new brands of PG&A catalogs. We make the majority of this new content available to customers as add-on subscription opportunities to their current service, which contributed to the addition of over 300 new dealers during fiscal 2012 in the outdoor power equipment and powersports verticals.

Operating income decreased 25.3% or \$438,000 during fiscal 2012, compared to the same period last year, which resulted primarily from an increase in operating expenses. During fiscal 2012 we made investments in the business to further our strategic initiatives and drive growth. These initiatives included:

- The roll-out of an investor relations program of approximately \$250,000, which included multiple investor road shows and management presentations to more than 90 potential new investors, participation in several investor conferences, and enhancements to our financial releases and earnings calls. During fiscal 2012 we saw an increase in both our average share price and average trading volume.
- We continued to further our investment in product development, which was reflected in the various product and technology upgrades previously discussed.
- We identified and began the implementation of a new cloud-based, scalable ERP system. The first phase of this implementation, the deployment of a CRM throughout the entire organization, has been completed. The implementation of the ERP system will continue into the first and second quarters of fiscal 2013.
- We expensed \$177,000 in fiscal 2012 for potential sales tax liabilities as a result of on-going sales tax audits and an increase in the aggressiveness of state taxing authorities on establishing nexus precedence.

- We acquired substantially all of the assets of R2R, the first-to-market and leading provider of aftermarket fitment data to the powersports industry. This acquisition is directly aligned with our strategy to differentiate our content from the competition. A substantial portion of the legal fees associated with this acquisition were incurred in fiscal 2012.
- In an effort to provide additional strategic support and direction to the organization, we enhanced our Board of Directors by increasing the number of members and committees.

Net income decreased 56.8% or \$1,388,000 from fiscal 2011 to fiscal 2012. This decrease was due to several benefits realized in fiscal 2011 that did not recur in fiscal 2012, including an income tax benefit of \$1,017,000 versus an income tax expense of \$227,000 in fiscal 2012, and a gain of \$433,000 related to the fiscal 2011 divestiture of our AgChem EDI business, versus a gain of only \$70,000 in fiscal 2012 related to this divestiture. These were partially offset by a \$555,000 decrease in interest expense. Net income per share was \$0.13 in fiscal 2012, compared to \$0.31 in fiscal 2011, due to the aforementioned decrease in earnings.

Cash generated from operations increased 1.0% from \$3,471,000 in fiscal 2011 to \$3,507,000 in fiscal 2012. We used this cash to invest \$2,417,000 in our technology products and infrastructure and pay down debt by \$1,402,000 during fiscal 2012 compared to \$2,411,000 of technology investment and \$983,000 of debt repayments in fiscal 2011.

Revenue

The following table summarizes our recurring and non-recurring revenue by major product category (in thousands):

	2012	2011	Percent Change
Catalog			
Recurring revenue	\$ 12,680	\$ 11,848	7.0 %
Non-recurring revenue	769	801	(4.0) %
Total catalog revenue	13,449	12,649	6.3 %
Percent of revenue recurring	94.3 %	93.7 %	
Website			
Recurring revenue	4,685	4,000	17.1 %
Non-recurring revenue	892	1,025	(12.9)%

Edgar Filing: ARI NETWORK SERVICES INC /WI - Form 10-K

Total website revenue	5,577	5,025	11.0 %
Percent of revenue recurring	84.0 %	79.6 %	
Lead management			
Recurring revenue	842	730	15.3 %
Non-recurring revenue	171	154	11.3 %
Total lead management revenue	1,013	884	14.6 %
Percent of revenue recurring	83.1 %	82.6 %	
Lead generation			
Recurring revenue	-	-	- %
Non-recurring revenue	1,296	1,098	18.0 %
Total lead generation revenue	1,296	1,098	18.0 %
Percent of revenue recurring	- %	- %	
Other			
Recurring revenue	606	844	(28.2)%
Non-recurring revenue	553	834	(33.7)%
Total catalog revenue	1,159	1,678	(30.9)%
Percent of revenue recurring	52.3 %	50.3 %	
Total			
Recurring revenue	18,813	17,422	8.0 %
Non-recurring revenue	3,681	3,912	(5.9) %
Total revenue	\$ 22,494	\$ 21,334	5.4 %
Percent of revenue recurring	83.6 %	81.7 %	

Total revenue increased 5.4% or \$1,160,000 during fiscal 2012, compared to fiscal 2011, and recurring revenue increased 8.0% or \$1,391,000 over the same period. Furthermore, recurring revenue on our core catalog, website, and lead management products increased 9.8% or \$1,629,000 during fiscal 2012. As stated above various accomplishments that were directly in line with our strategy drove new sales and an improvement in the rate of customer churn.

Catalog

Catalog revenue is generated from catalog subscriptions, software license fees, license renewal fees, software maintenance and support fees and professional services related to data conversion. Catalog revenue continues to be our largest source of revenue, representing 60% of total revenue. Catalog revenue increased 6.3% or \$800,000 in fiscal 2012, compared to the same period last year. The Company experienced an increase in new recurring subscription sales from our international and U.S. operations of approximately 7.0% or \$832,000 during fiscal 2012, compared to fiscal 2011. We expect to see year over year growth in catalog revenue in fiscal 2013, both organically and from revenue related to the R2R acquisition.

Website

Website revenue is generated from one-time set-up fees and recurring subscription fees on our website products, as well as transaction fees from customers' online sales generated via the websites. Website revenue comprised 25% of our total revenue in fiscal 2012. Website revenue increased 11.0% or \$552,000 during fiscal 2012, compared to the same period last year. Recurring website revenue grew 17.1% during fiscal 2012, compared to fiscal 2011, due to the sale of additional new customer websites as well as up-sells to existing customers. Non-recurring website revenue decreased 12.9% during fiscal 2012 compared to fiscal 2011, as we continued to discount website set-up fees as part of our strategy to attract new customers and increase recurring revenues. We expect website revenue to continue to grow at rates higher than catalog revenue and to be a long-term source of growth for the Company.

Lead Management

Lead management revenue is generated from one time set-up fees and recurring subscription fees for the use of our Footsteps™ products. Lead management revenue increased 14.6% or \$129,000 during fiscal 2012, compared to the same period last year, resulting from an increase in sales of Footsteps™ enhancements and new releases. Lead management recurring revenue increased 15.3% or \$112,000 during fiscal 2012, compared to fiscal 2011. We recently deployed multiple new editions of its Lead Management product, Footsteps Channel Connect™, which offers the product's base functionality at a low price with the option to upgrade to additional functionality, which is expected to drive growth in fiscal 2013.

Lead Generation

Lead generation revenue is realized from the sale of our SearchEngineSmart™ ("SES") service. Although our SES customers typically subscribe to the service for three to six month periods, and many customers renew the service, we consider SES revenue to be non-recurring. SES revenue increased 18.0% or \$198,000 during fiscal 2012, compared to the same period last year, from the addition of several new customers.

Other Revenue

Other revenue primarily consists of professional services related to software customization, website hosting fees, and revenue generated from ancillary products. Approximately \$275,000 of revenue from the divested AgChem EDI business was included within this category in fiscal 2011 prior to its sale, creating the 30.9% decrease in other revenues in fiscal 2012. Management anticipates that other revenue will fluctuate based on the timing of professional fees related to software customization.

Cost of Revenue

We classify as cost of revenue those costs directly attributable to the provision of services. These costs include (i) software amortization, which represents the periodic amortization of costs for internally developed or purchased software sold to customers; (ii) direct labor for the provision of catalog production, product implementations and professional services revenue; and (iii) other direct costs, which represent amounts paid to third party vendors directly attributable to the services we provide our customers.

The table below breaks out cost of revenue into each of these three categories (in thousands):

	2012	Percent of Revenue			2011	Percent of Revenue		
Net revenues	\$ 22,494				\$ 21,334			
Cost of revenues:								
Amortization of capitalized software costs	1,420	6.3	%		1,127	5.3	%	
Direct labor	1,560	6.9	%		1,352	6.3	%	
Other direct costs	2,286	10.2	%		2,008	9.4	%	
Total cost of revenues	5,266	23.4	%		4,487	21.0	%	
Gross profit	\$ 17,228	76.6	%		\$ 16,847	79.0	%	

Gross profit was \$17,228,000 or 76.6% of revenue for the twelve months ended July 31, 2012, compared to \$16,847,000 or 79.0% of revenue for the same period last year. The decline in gross profit margin was primarily attributed to: (i) an increase in SES revenue, which has a lower margin than our other core products; (ii) an increase in website and lead management software amortization; and (iii) an increase in website labor costs, as we delivered more new sites and updates to current customer sites than last year. We expect fluctuations in gross margin based on the mix of products sold, but expect our gross margins to improve over time as we focus our sales and development efforts on higher margin, recurring revenue products.

Gross Margins

The following table summarizes our gross profit and gross margin percentage by major product category (in thousands):

Edgar Filing: ARI NETWORK SERVICES INC /WI - Form 10-K

	2012	2011	Percent Change	
Catalog				
Revenue	\$ 13,449	\$ 12,649	6.3	%
Cost of revenue	1,901	1,733	9.7	%
Gross profit	11,548	10,916	5.8	%
Gross margin percentage	85.9 %	86.3 %		
Website				
Revenue	5,577	5,025	11.0	%
Cost of revenue	1,332	1,120	18.9	%
Gross profit	4,245	3,905	8.7	%
Gross margin percentage	76.1 %	77.7 %		
Lead management				
Revenue	1,013	884	14.6	%
Cost of revenue	546	308	77.3	%
Gross profit	467	576	(18.9)	%
Gross margin percentage	46.1 %	65.2 %		
Lead generation				
Revenue	1,296	1,098	18.0	%
Cost of revenue	1,213	850	42.7	%
Gross profit	83	248	(66.5)	%
Gross margin percentage	6.4 %	22.6 %		
Other				
Revenue	1,159	1,678	(30.9)	%
Cost of revenue	274	476	(42.4)	%
Gross profit	885	1,202	(26.4)	%
Gross margin percentage	76.4 %	71.6 %		
Total				
Revenue	22,494	21,334	5.4	%
Cost of revenue	5,266	4,487	17.4	%
Gross profit	\$ 17,228	\$ 16,847	2.3	%
Gross margin percentage	76.6 %	79.0 %		

Overall gross margin was 76.6% of revenue in fiscal 2012 or \$17,228,000, a 2.3 percent decrease from fiscal 2011. The decrease was attributed to reduced margins on our lead generation and lead management products. Gross margin on our core catalog and website products remained relatively stable at 83.0% in fiscal 2012 versus 83.9% in fiscal 2011.

The decline in lead generation gross margin in fiscal 2012 was due to price discounts on larger sales contracts. The decline in lead management gross margin was due to an increase in software amortization, as we continue to invest in product development of our Footsteps™ technology in an effort to drive significant growth in this area.

Operating Expenses

The following table summarizes our operating expenses by category (in thousands):

	2012	Percent of Revenue	2011	Percent of Revenue	Percent Change
Sales and marketing	\$ 4,249	18.9 %	\$ 4,272	20.0 %	(0.5) %
Customer operations and support ⁽¹⁾	3,379	15.0 %	3,439	16.1 %	(1.7) %
Software development and technical support ⁽²⁾	1,864	8.3 %	1,463	6.9 %	27.4 %
General and administrative ⁽³⁾	5,027	22.3 %	4,252	19.9 %	18.2 %
Depreciation and amortization ⁽⁴⁾	1,414	6.3 %	1,688	7.9 %	(16.2) %
Net operating expenses	\$ 15,933	70.8 %	\$ 15,114	70.8 %	5.4 %

Net operating expenses increased 5.4% or \$819,000 during fiscal 2012, compared to the same period last year. The increase was largely due to the strategic investments previously discussed. These investments support our strategies which are aimed at double-digit revenue growth and maximizing shareholder value.

Sales and Marketing Expenses

Sales and marketing expenses consist primarily of personnel and related costs, including commissions for our sales and marketing employees, and the cost of marketing programs and trade show attendance. Marketing programs consist of lead generation and direct marketing, advertising, events and meeting costs, public relations, brand building and product management activities. Sales and marketing expenses decreased 0.5% or \$23,000 during fiscal 2012, compared to the same period last year. Sales and marketing expenses, as a percentage of revenue, decreased from 20.0% in fiscal 2011 to 18.9% for fiscal 2012. We expect that sales and marketing will continue to be one of our largest expenses, as we intend to continue to invest in sales and marketing to grow our customer base and expand relationships with our existing customers, however, management expects sales and marketing costs to continue to decline as a percentage of revenue in future years.

Customer Operations and Support

Customer operations and support expenses are composed of our customer hosting operations, software maintenance agreements for our core network, and personnel and related costs for operations and support employees. Customer operations and support costs decreased 1.7% or \$60,000 during fiscal 2012, compared to the same period last year, resulting from a reduction in costs related to the ongoing data center consolidation. Management expects customer operations and support costs to increase in fiscal 2013, due to the addition of costs related to the R2R operations, but to decline as a percentage of revenue in future years as we continue to consolidate our data centers into one centralized facility and the implementation of the new ERP system drives efficiencies through the support organization.

Software Development and Technical Support

Our software development and technical support staff have three essential responsibilities for which the accounting treatment varies depending upon the work performed: (i) costs associated with internal software development efforts are typically capitalized as software product costs and amortized over the estimated useful lives of the product; (ii) professional services performed for customers related to software customization projects are classified as cost of revenue; and (iii) all other activities are considered operating expenses and included within the software development and technical support operating expense category.

The table below summarizes our internal software development and technical support spending (in thousands):

	2012	2011	Percent Change
Total software development and technical support costs	\$ 5,114	\$ 4,480	14.2 %
Less: amount capitalized as software development	(1,690)	(1,665)	1.5 %
Less: direct labor classified as cost of revenues	(1,560)	(1,352)	15.4 %
Net software development and technical support costs classified as operating expenses	\$ 1,864	\$ 1,463	27.4 %

We increased total software development and technical support costs by 14.2% or \$634,000 fiscal 2012, compared to the same period last year, which is consistent with the strategy to release new products, create enhancements to existing products, expand our content library and deliver superior services and technical support to our customers.

During fiscal 2012, we capitalized \$1,690,000 of software development labor and overhead, versus \$1,665,000 during fiscal 2011. We recently deployed several new editions of its lead management product FootSteps™, which enable customers to add feature upgrades and grow with the product over time. Other upgrades released during fiscal 2012 include a lightweight edition of PartStream™, our OEM parts eCommerce solution, expansion of our WebSiteSmart™ social media sharing tools, mobile unit brochures, SEO tool enhancements and a new PartStream Mobile™ product. We have also completed a new order integration between WebSiteSmart™ and a leading provider of business management systems to outdoor power, powersports and agricultural equipment industries. We are working on several new

enhancements expected to be released in the upcoming quarters, which we anticipate will increase future revenue for the Company.

Management expects total spending for software development and technical support to increase in fiscal 2013, as we continue to focus on our strategy of product enhancement and innovation. We expect fluctuations in the percentage of software development and technical support costs classified as operating expenses from period to period, based on the mix of research and prototype work versus capitalized software development and professional services activities.

General and Administrative

General and administrative expenses primarily consist of personnel and related costs for executive, finance, human resources and administrative personnel, legal and other professional fees and other corporate expenses and overhead. General and administrative costs increased 18.2% or \$775,000, in fiscal 2012, compared to the same period last year. As a percentage of revenue, general and administrative expenses increased from 19.9% during fiscal 2011 to 22.3% in fiscal 2012. The increase was largely due to the strategic investments we made in our investor relations program, a new ERP system and our acquisition of R2R, as well as a \$177,000 provision for potential sales tax liabilities as a result of on-going sales tax audits. Management expects general and administrative expenses to increase in fiscal 2013 over the previous year due to the costs related to the acquired R2R operations, and the continuation of our strategic investments, both of which are designed to further our strategy and drive future revenue growth and shareholder value. Over time, management expects general and administrative expenses to decline as a percentage of revenue.

Depreciation and Amortization

Depreciation and amortization expenses consist of depreciation on fixed assets, which are composed of leasehold improvements and information technology assets, and the amortization of acquisition-related intangible assets. Costs associated with the amortization of

software assets are a component of cost of revenue. Depreciation and amortization expense decreased 16.2% or \$274,000 during fiscal 2012, compared to last year, as intangible assets related to a previous acquisition became fully depreciated and as older technology related to our infrastructure is getting replaced by newer cloud-based technology, some of which is now classified in general and administrative expense.

Interest Expense

Interest expense decreased 70.3% from \$790,000 in fiscal 2011 to \$235,000 in fiscal 2012, resulting from our July 2011 debt refinancing. On July 27, 2011, the Company refinanced its \$5,000,000 secured promissory note issued in relation to the April 2009 acquisition of Channel Blade Technologies with a commercial loan from Fifth Third Bank, effectively reducing the interest rate by nearly ten percentage points. While the previously seller note bore interest at 14% annually, the Fifth Third Bank loan bears a rate of LIBOR plus 4%. The terms of the Fifth Third agreement are more fully described in footnote 4 to the consolidated financial statements.

Management expects interest expense to increase slightly during fiscal 2013. On August 17, 2012, we incurred an additional \$1,000,000 of debt financing from Fifth Third Bank to fund the acquisition of R2R.

Other Income

The following table summarizes the components of other income (in thousands):

	2012	2011	Percent Change
Gain on disposal of a component of the business	\$ 70	\$ 433	(83.8) %
Gain on liquidation of split dollar life insurance policy	123	-	100.0 %
Foreign currency exchange rate gains	29	25	16.0 %
Total other income	\$ 222	\$ 458	(51.5) %

Other income decreased 51.5% or \$236,000 during fiscal 2012, compared to the same period last year. Other income included a \$433,000 gain recognized on the disposition of the AgChem EDI business in fiscal 2011, compared to a \$70,000 gain in fiscal 2012 as we had a change in estimate related to the expected future cash flows of the earn-out receivable established at the time of the disposition.

ARI was the beneficiary of the total premiums it paid on a split-dollar life insurance policy on the Company's founder, who no longer serves in any capacity for the Company. Insurance premiums receivable were recorded at present value based on the average life expectancy of the policy holder, of which \$74,000 were included in other long term assets at the time of disposal. During fiscal 2012, the Company surrendered the policy receiving approximately \$197,000, recorded in investing activities on the cash flow statement and recorded a book gain in other income of \$123,000, or \$0.02 per basic and diluted share, and taxable income of \$667,000.

Income Taxes

The Company has net deferred tax assets of \$5,129,000, primarily consisting of net operating loss carryforwards and book to tax timing differences. Income tax expense is provided for at the applicable statutory tax rate applied to current U.S. income before taxes, plus or minus any adjustments to the deferred tax assets and to the estimated valuation allowance against deferred tax assets. This does not represent a current cash obligation, as we continue to have net operating loss carryforwards to offset taxable income.

We recorded income tax expense of \$227,000 during fiscal 2012, compared to a tax benefit of \$1,017,000 last year. In fiscal 2011, we recognized a tax gain of \$1,967,000 for a change in our estimated valuation allowance as a result of a gain on the disposition of a component of the business, improved earnings and a change in the income tax reporting method related to the treatment of capitalized software. In fiscal 2012 we recognized a tax gain of \$415,000 for a change in our estimated valuation allowance as a result of the split dollar life insurance proceeds, the forecasted earnings of the Ready 2 Ride acquisition and improved revenue growth. Income tax expense may vary from period to period as we continue to evaluate the valuation allowance against net deferred tax assets on a semi-annual basis.

Liquidity and Capital Resources

The following table sets forth, for the periods indicated, certain cash flow information derived from our financial statements (in thousands):

	2012	2011	Percent Change
Net cash provided by operating activities	\$ 3,507	\$ 3,471	1.0 %
Net cash used in investing activities	(1,941)	(2,293)	15.4 %
Net cash used in financing activities	(1,369)	(977)	(40.1) %
Effect of foreign currency exchange rate changes on cash	19	(5)	480.0 %
Net change in cash	\$ 216	\$ 196	10.2 %
Cash at end of period	\$ 1,350	\$ 1,134	19.0 %

We generated \$216,000 of cash during fiscal 2012, compared to \$196,000 in fiscal 2011. Net cash provided by operating activities increased 1.04% or \$36,000 over the same period, primarily due to increased revenue, offset in part by increased cash operating expenses.

Cash used in investing activities decreased 15.4% or \$352,000 in fiscal 2012, compared to the same period last year. We invested more than \$2,400,000 in software development and the acquisition of equipment in fiscal 2012. This investment was partially offset by \$197,000 of cash received from the liquidation of a split dollar life insurance policy and \$161,000 of cash received from earnouts related to our fiscal 2011 divestiture of our AgChem EDI business. We will continue to invest cash in the business for the development of new products and upgrades to existing products.

Cash used in financing activities increased 40.1% or \$392,000 in fiscal 2012, compared the same period last year. We repaid \$1,402,000 of outstanding debt in fiscal 2012 versus \$983,000 in fiscal 2011.

Management believes that current cash balances and its ability to generate cash from operations, as well as the existing availability under our line of credit with Fifth Third, are sufficient to fund our needs over the next twelve months, although additional financing may be necessary if the Company were to complete a material acquisition or to

make a large investment in its business.

Debt

On July 9, 2004, we entered into a line of credit agreement with JPMorgan Chase, N.A. (the "Chase Line") which, as amended, permitted us to borrow an amount equal to 80% of the book value of all eligible accounts receivable plus 45% of the value of all eligible open renewal orders (provided the renewal rate was at least 85%) minus \$75,000, up to \$2,000,000. The agreement bore interest at 1% per annum above the prime rate plus an additional 3%, at the bank's option, upon the occurrence of any default under the note. The line was paid in full and terminated on July 27, 2011.

On July 27, 2011, we entered into a Loan and Security Agreement (the "Agreement") with Fifth Third Bank. Pursuant to the terms of the Agreement, Fifth Third extended to the Company credit facilities consisting of a \$1,500,000 revolving credit facility (the "Revolving Loan") and a \$5,000,000 three year term loan facility (the "Term Loan"). Each of the credit facilities bears interest at a rate based on the one, two, three or six month LIBOR (as selected by the Company on the last business day of each month) plus 4.0% (effective rate of 4.25% at July 31, 2012). In connection with this Agreement, the Chase Line and all other banking relationships between ARI and JP Morgan Chase, N.A. were terminated. There was nothing outstanding on the Revolving Loan as of July 31, 2012.

The Agreement contains covenants that restrict, among other things and subject to certain conditions, the ability of the Company to incur new debt, create liens on its assets, make certain investments, enter into merger transactions, issue capital securities and make distributions to its shareholders. Financial covenants include a minimum fixed charge coverage ratio, as defined in the Agreement, of 1.2, and a senior leverage (maximum senior funded indebtedness to EBITDA) ratio, as defined in the Agreement, of 2.0. The Agreement also contains customary events of default which, if triggered, could result in an acceleration of the Company's obligations under the Agreement. The Fifth Third Credit Facilities are secured by a first priority security interest in substantially all assets of the Company and by a first priority pledge of all outstanding equity securities of each of the Company's domestic subsidiaries and 65% of outstanding equity securities of the Company's foreign subsidiary.

Long-term debt consisted of the following at July 31, 2012 and 2011 (in thousands):

	2012	2011
Notes payable	\$ 3,972	\$ 5,000
Less current maturities	(1,084)	(917)
Notes payable - non-current	\$ 2,888	\$ 4,083

Principal and interest on the Term Loan will be repaid in fixed monthly principal installments of \$83,333 plus accrued but unpaid interest on the unpaid principal balance commencing on September 1, 2011 through July 1, 2014, with a final balloon payment due July 27, 2014. Mandatory prepayments of the Credit Facilities were required in the amount of 50% of the Company's excess cash flow for the six-month periods ended January 31, 2012 and July 31, 2012 and for each fiscal year thereafter. Excess cash flow is defined as the remainder of net income plus interest, taxes, depreciation and amortization expense for such period, minus cash taxes paid, capital expenditures incurred, capitalized software costs and scheduled payments of principal and interest charges.

Leases

We lease office space and certain office equipment under capital and operating lease arrangements expiring through 2021. The following table shows our remaining obligation under these arrangements as of July 31, 2012 (in thousands):

Fiscal Year Ending July 31:	Capital Leases	Operating Leases
2013	\$ 163	\$ 625

2014	60	521
2015	-	467
2016	-	323
2017	-	328
Thereafter	-	1,382
Total minimum lease payments	223	3,646
Less amounts related to interest	15	-
Net minimum lease payments	\$ 208	\$ 3,646

Acquisitions

Since 1995 we have had a formal corporate development program aimed at identifying, evaluating and closing acquisitions that align with its strategy. Since the program's inception until the end of fiscal 2012, we closed ten acquisitions. All of these acquisitions, with the exception of one that was divested in fiscal 2011, have been fully integrated into our operations.

On August 17, 2012, we acquired substantially all of the assets of Ready2Ride, Incorporated ("R2R"), pursuant to the terms of an Asset Purchase Agreement dated August 17, 2012. R2R sells aftermarket fitment data to the powersports industry. This acquisition directly aligns with our strategy to differentiate our content from the competition. In connection with the R2R acquisition, we have increased the principal amount due under the provisions of the Term Loan by \$1,000,000, extending the payments through December 15, 2014. All other conditions of the Term Loan remained the same. Management does not expect this acquisition to have a significant impact on earnings in fiscal 2013 but to have a positive impact long term, as we take advantage of revenue synergies through cross-selling and operational synergies through software development solutions, customer support and general and administrative cost savings.

Critical Accounting Judgments

The Company's discussion and analysis of its financial condition and results of operations are based upon its financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States ("GAAP"). The preparation of

financial statements in conformance with GAAP requires estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. The SEC has defined a company's critical accounting policies as the ones that are most important to the portrayal of a company's financial condition and results of operations, and which require us to make its most difficult and subjective judgments, often as a result of the need to make estimates of matters that are inherently uncertain. Based on this definition, we have identified as the most critical accounting policies and judgments those addressed below. We also have other key accounting policies, which involve the use of estimates, judgments, and assumptions that are significant to understanding our results. For additional information, refer to Note 1 of the consolidated financial statements, which appear elsewhere within this report on Form 10-K. Although we believe that our estimates, assumptions, and judgments are reasonable, they are based upon information currently available. Actual results may differ significantly from these estimates under different assumptions, judgments, or conditions.

Revenue Recognition

Revenue from software licenses, annual or periodic maintenance fees and catalog subscription fees, which are included in multiple element arrangements, are all recognized ratably over the contractual term of the arrangement, as vendor specific objective evidence does not exist for these elements. Arrangements that include professional services are evaluated to determine whether those services are essential to the functionality of other elements of the arrangement. Types of services that are considered essential include customizing complex features and functionality in a product's base software code or developing complex interfaces within a customer's environment. When professional services are not considered essential, the revenue allocable to the professional services is recognized as the services are performed. When professional services are considered essential, revenue under the arrangement is recognized pursuant to contract accounting using the percentage-of-completion method with progress-to-completion measured based upon labor hours incurred. When the current estimates of total contract revenue and contract cost indicate a loss, a provision for the entire loss on the contract is made in the period the amount is determined.

Allowance for Doubtful Accounts

We maintain an allowance for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. We currently estimate a reserve for most amounts due over 90 days, unless there is reasonable assurance of collectability. If the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

Sales Tax

Taxes collected from customers and remitted to governmental authorities are presented on a net basis, excluding such amounts from revenue. We are subject to examination by state tax jurisdictions for potential sales and use tax liability. We accrued \$177,000 and \$0 in fiscal 2012 and 2011, respectively for potential sales tax liabilities as a result of on-going sales tax audits, which were expensed to general and administrative expense.

Impairment of Long-Lived Assets

Equipment and leasehold improvements, capitalized software product costs and other identifiable assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. If the sum of the expected undiscounted cash flows is less than the carrying value of the related asset or group of assets, a loss is recognized for the difference between the fair value and carrying value of the asset or group of assets. We did not have any events or changes in circumstances to warrant an impairment evaluation in fiscal 2012 or 2011. During fiscal 2012 and fiscal 2011, we disposed of fully depreciated equipment and leasehold improvements with a cost basis of \$560,000 and \$371,000, respectively.

Deferred Income Taxes

The tax effect of the temporary differences between the book and tax basis of assets and liabilities and the estimated tax benefit from tax net operating losses is reported as deferred tax assets and liabilities in the balance sheet. An assessment of the likelihood that net deferred tax assets will be realized from future taxable income is performed. Because the ultimate realizability of deferred tax assets is highly subject to the outcome of future events, the amount established as a valuation allowance is considered to be a significant estimate that is subject to change in the near term. To the extent a valuation allowance is established or there is a change in the allowance during a period, the change is reflected with a corresponding increase or decrease in the tax provision in the statement of income. We recognized tax expense of \$227,000 in fiscal 2012 and a tax benefit of \$1,017,000 from continuing operations in fiscal 2011, which was primarily a result of a change in our estimated tax valuation allowance.

Stock-Based Compensation

We use the Black-Scholes model to value stock options granted. Expected volatility is based on historical volatility of our stock. The expected life of options granted represents the period of time that options granted are expected to be outstanding. The risk-free rate for periods within the contractual term of the options is based on the U.S. Treasury yields in effect at the time of grant. As stock-based compensation expense recognized in our results of operations is based on awards ultimately expected to vest, the amount has been reduced for estimated forfeitures based on our historical experience. Management reviews the critical assumptions used in the Black-Scholes model each quarter and adjusts those assumptions when necessary.

Goodwill and Other Intangible Assets

As fully described in note 1 to the Consolidated Financial Statements, we periodically review the carrying value of goodwill to determine whether an impairment may exist. We determined that there is a single reporting unit for the purpose of goodwill impairment tests. We estimate the fair value of the reporting unit using various valuation techniques, with our primary techniques being a discounted cash flow valuation and control premium adjusted market capitalization. There are many estimates and assumptions involved in preparing a discounted cash flow analysis, including estimating future operating results, selecting a weighted average cost of capital to discount estimated future cash flows, anticipated long-term growth rates, and future profit margins.

Estimating the fair value of a reporting unit is an inherently subjective process. Changes in assumptions, estimates, and other inputs could result in the indication of potential impairment of a portion of the recorded goodwill. Management believes the assumptions, estimates, and other inputs used reflect their best efforts and are appropriate for valuing the reporting unit. Our goodwill impairment test indicated that goodwill was not impaired in fiscal 2012 or fiscal 2011.

Impairment tests are also performed for those intangible assets with estimable useful lives if circumstances warrant a review. There were no circumstances to warrant a review of intangible assets with estimable useful lives in fiscal 2012 or 2011.

Earn-out Receivable

As part of the purchase price for the disposition of our AgChem EDI business, we recorded an earn-out receivable with anticipated payments to ARI annually over a four-year period following the closing date. The earn-out was recorded at fair value, which was the estimated future receipts less an imputed discount, based on the present value of the estimated earn-out payments, discounted at an imputed interest rate at the time the note is issued and any subsequent changes in prevailing interest rates shall be ignored. Imputed interest is amortized to interest income over the life of the earn-out.

An assessment of the expected future cash flows of the earn-out receivable is performed annually in the third fiscal quarter based on historical receipts over the previous twelve month period. Changes in estimate and cash received in excess of expected cash receipts are recorded as a gain in other expense (income). We recorded a benefit of approximately \$433,000 in fiscal 2011 as a result of the initial assessment of expected future cash flows and a benefit of \$70,000 as a result of the assessment performed during fiscal 2012.

Quarterly Financial Data

The following table sets forth the unaudited results of operations for each of the eight quarterly periods ended July 31, 2012, prepared on a basis consistent with the audited financial statements, reflecting all normal recurring adjustments that are considered necessary. The quarterly information is as follows (in thousands, except per share data):

	1st Quarter		2nd Quarter		3rd Quarter		4th Quarter	
	2012	2011	2012	2011	2012	2011	2012	2011
Net revenues	\$ 5,410	\$ 5,324	\$ 5,501	\$ 5,238	\$ 5,712	\$ 5,354	\$ 5,871	\$ 5,418
Gross margin	4,274	4,137	4,250	4,132	4,334	4,239	4,370	4,339
Income from continuing operations	272	99	61	123	210	516	512	1,680
Discontinued operations	-	-	-	-	-	25	-	-
Net income (loss)	\$ 272	\$ 99	\$ 61	\$ 123	\$ 210	\$ 541	\$ 512	\$ 1,680

Basic and diluted income from continuing operations per common share:

Basic	\$ 0.03	\$ 0.01	\$ 0.01	\$ 0.02	\$ 0.03	\$ 0.07	\$ 0.06	\$ 0.21

Off-Balance Sheet Arrangements

ARI has no significant off-balance sheet arrangements that have or are reasonably likely to have a material current or future effect on its financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

Item 8. Financial Statements and Supplementary Data

Reference is made to the consolidated financial statements, the reports thereon and the notes thereto commencing after the signature page of this Report, which are incorporated herein by reference.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures designed to ensure that information required to be disclosed in our reports filed under the Exchange Act, as amended, is recorded, processed, summarized, and reported within the required time periods and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure.

As required by Rule 13a-15 under the Exchange Act, we have completed an evaluation, under the supervision and with the participation of our management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness and the design and operation of our disclosure controls and procedures as of July 31, 2012. Based upon this evaluation, our management, including the Chief Executive Officer and the Chief Financial Officer, has concluded that our disclosure controls and procedures were effective as of July 31, 2012.

Management's Annual Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Under the supervision and with the participation of our management, including our Chief Executive Officer and the Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control over Financial Reporting – Guidance for Smaller Public Companies issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation under this framework, our management concluded that our internal control over financial reporting was effective as of July 31, 2012.

This Annual Report on Form 10-K does not include an attestation report of our independent registered public accounting firm regarding internal control over financial reporting. Internal control over financial reporting was not subject to attestation by our independent registered public accounting firm pursuant to the amendments to Rule 2-02(f) of Regulation S-X that exempt us from this attestation requirement based on our status as a non-accelerated filer. We are required to provide only management's report in this Annual Report on Form 10-K.

Changes in Internal Controls

There were no changes to the Company's internal control over financial reporting during the year ended July 31, 2012 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Limitations on Effectiveness of Controls and Procedures

Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our disclosure controls and procedures or our internal controls will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include, but are not limited to, the

realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of

29

the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers, and Corporate Governance

Information required by Item 10 of Part III will be included in our Proxy Statement relating to our Fiscal 2013 Annual Meeting of Shareholders, and is incorporated herein by reference.

Item 11. Executive Compensation

Report of Wipfli LLP,

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders

ARI Network Services, Inc.

We have audited the accompanying consolidated balance sheets of ARI Network Services, Inc. and Subsidiaries (the Company) as of July 31, 2012 and 2011 and the related consolidated statements of income, shareholders' equity and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of July 31, 2012 and 2011 and the results of its operations and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States.

/s/ Wipfli LLP

Milwaukee, Wisconsin

ARI Network Services, Inc.

Notes to Consolidated Financial Statements

1. Description of the Business and Significant Accounting Policies

Description of the Business

ARI Network Services, Inc. (“ARI”) provides technology-enabled solutions that help dealers, distributors and manufacturers worldwide increase revenue and reduce costs. Our suite of products and services include: (i) electronic catalogs for publishing, viewing and interacting with technical reference information about equipment; (ii) lead generation and management products and services designed to help dealers grow their businesses and increase profitability through efficient marketing of their products; and (iii) websites with eCommerce capabilities designed to generate sales through the sites and provide information to consumers in the dealers’ local areas. We deliver our products and services to companies of all sizes across a dozen vertical markets, with a core emphasis on the outdoor power, power sports, marine, RV, and appliance sectors. We estimate that approximately 19,000 equipment dealers, 140 manufacturers, and 195 distributors worldwide leverage our technology to drive revenue, gain efficiencies and increase customer satisfaction.

Our principal executive office and headquarters is located in Milwaukee, Wisconsin. The office address is 10850 West Park Place, Suite 1200, Milwaukee, WI 53224, and our telephone number at that location is (414) 973-4300. Our principal website address is www.arinet.com.

Basis of Presentation

These consolidated financial statements include the financial statements of ARI and its wholly-owned subsidiaries. We eliminated all significant intercompany balances and transactions in consolidation. Certain reclassifications were made to amounts previously reported in our financial statements reclassifying: (i) other current liabilities to other long term liabilities; and (ii) software development and technical support expense to cost of revenue, in order to conform to the current presentation. Any other adjustments deemed necessary by management for a fair presentation of all periods presented have been reflected as required by Regulation S-X, Rule 10-01, in the normal course of business.

In fiscal 2009, ARI F&I Services, LLC (“AFIS”), a wholly-owned subsidiary of ARI, acquired Powersports Outsourcing Group. AFIS was subsequently sold on July 27, 2010. The results of AFIS have been reported as a discontinued operation in the periods reported.

Fiscal Year

Our fiscal year ends on July 31. References to fiscal 2012, for example, refer to the fiscal year ending July 31, 2012, and references to fiscal 2011 refer to the fiscal year ending July 31, 2011.

Foreign Currency Translation

The functional currency of the Company’s subsidiary in the Netherlands is the Euro; accordingly, monetary assets and liabilities are translated into U.S. dollars at the rate of exchange existing at the end of the period, and non-monetary assets and liabilities are translated into U.S. dollars at historical exchange rates. Translation gains and losses are translated at the weighted-average exchange rates during the period and expensed to other income (expense). Adjustments resulting from the re-measurement of the financial statements into the functional currency are charged or credited to comprehensive income (loss).

Use of Estimates

The preparation of the Company’s financial statements in conformity with accounting principles generally accepted in the U.S. (“GAAP”) requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. The Company considers capitalization and amortization of software product costs, valuation of intangible assets, allowance for bad debt, accruals for anticipated future earn-out receipts related to the disposition of a component of the business, valuation of stock-based compensation and the deferred tax valuation allowance to be significant estimates that are subject to change in the near term.

Changes in Accounting Estimates

During fiscal 2012 and fiscal 2011, the Company had a change in its estimated valuation allowance related to deferred tax assets due to ongoing revisions and evaluations of the estimated future expected results of operations and tax planning strategies. The difference between the amounts previously recorded as a valuation allowance and the amount

currently recorded was charged to income tax

42

expense, as more fully discussed in Note 11. The amount of this change in accounting estimate was income of \$415,000, or \$0.05 per basic and diluted common share in fiscal 2012, and \$1,967,000, or \$0.25 per basic and diluted common share, in fiscal 2011.

Concentrations

The Company had no cash deposits in excess of the insurance coverage provided by the Federal Deposit Insurance Corporation ("FDIC") as of July 31, 2012 that would be exposed to loss in the event of a nonperformance by the financial institution. The Company's policy is to maintain cash in European bank accounts only to the extent required to cover day-to-day operating activities. Any excess European cash balances are transferred to our U.S. accounts on a periodic basis.

No single customer accounted for 10% or more of ARI's revenue in fiscal 2012 or fiscal 2011.

Revenue Recognition

Revenue from software licenses, annual or periodic maintenance fees and catalog subscription fees, which are included in multiple element arrangements, are all recognized ratably over the contractual term of the arrangement, as vendor specific objective evidence does not exist for these elements. ARI considers all arrangements with payment terms extending beyond twelve months not to be fixed or determinable and evaluates other arrangements with payment terms longer than normal to determine whether the arrangement is fixed or determinable. If the fee is not fixed or determinable, revenue is recognized as payments become due from the customer. Arrangements that include acceptance terms beyond the standard terms are not recognized until acceptance has occurred. If collectability is not considered probable, revenue is recognized when the fee is collected.

Revenue for use of the network and for information services is recognized on a straight-line basis over the period of the contract.

Arrangements that include professional services are evaluated to determine whether those services are essential to the functionality of other elements of the arrangement. Types of services that are considered essential to software license arrangements include customizing complex features and functionality in a product's base software code or developing complex interfaces within a customer's environment. When professional services are considered essential to software license arrangements, the professional service revenue is recognized pursuant to contract accounting using the

percentage-of-completion method with progress-to-completion measured based upon labor hours incurred. Professional services revenue for set-up and integration of hosted websites, or other services considered essential to the functionality of other elements of this type of arrangement, is amortized over the term of the contract. When professional services are not considered essential, the revenue allocable to the professional services is recognized as the services are performed. When the current estimates of total contract revenue and contract cost indicate a loss, a provision for the entire loss on the contract is made in the period the amount is determined.

Revenue for variable transaction fees, primarily for use of the shopping cart feature of our websites, is recognized as it is earned.

Amounts invoiced to customers prior to recognition as revenue, as discussed above, are reflected in the accompanying balance sheets as deferred revenue.

Amounts received for shipping and handling fees are reflected in revenue. Costs incurred for shipping and handling are reported in cost of revenue.

Cash and Cash Equivalents

We consider all highly liquid debt instruments purchased with an original maturity of three months or less to be cash equivalents.

Our investment policy, as approved by the Board of Directors, is designed to provide preservation of capital, adequate liquidity to meet projected cash requirements, optimum yields in relationship to risk, market conditions and tax considerations and minimum risk of principal loss through diversified short and medium term investments. Eligible investments include direct obligations of the U.S. Treasury, obligations issued or guaranteed by the U.S. government, certain time deposits, certificates of deposits issued by commercial banks, money market mutual funds, asset backed securities and municipal bonds. Our current investments include money market mutual funds with terms not exceeding ninety days.

Trade Receivables, Credit Policy and Allowance for Doubtful Accounts

Trade receivables are uncollateralized customer obligations due on normal trade terms, most of which require payment within thirty (30) days from the invoice date. Payments of trade receivables are allocated to the specific invoices identified on the customer's remittance advice or, if unspecified, are applied to the earliest unpaid invoices.

The carrying amount of trade receivables is reduced by an allowance that reflects management's best estimate of the amounts that will not be collected. Management individually reviews all receivable balances that exceed ninety (90) days from the invoice date and, based on an assessment of current creditworthiness, estimates the portion of the balance that will not be collected. The allowance for potential doubtful accounts is reflected as an offset to trade receivables in the accompanying balance sheets.

Sales Tax

Taxes collected from customers and remitted to governmental authorities are presented on a net basis, excluding such amounts from revenue. We are subject to examination by state tax jurisdictions for potential sales and use tax liability. We expensed \$177,000 and \$0 in fiscal 2012 and 2011, respectively for potential sales tax liabilities as a result of on-going sales tax audits, which were included in general and administrative expense.

Work in Process

Work in process consists of billable professional services performed by the Company, for which revenue was recognized pursuant to contract accounting primarily using the percentage-of-completion method with progress-to-completion measured based upon labor hours incurred, which have not been invoiced as of the end of the reporting period.

Equipment and Leasehold Improvements

Equipment and leasehold improvements are stated at cost. The Company developed tools for internal use related to the publication of catalog data which is included in computer equipment and software for internal use of which \$164,000 and \$194,000 were capitalized during fiscal 2012 and 2011, respectively. Depreciation and amortization are computed under the straight-line method for financial reporting purposes and accelerated methods for income tax purposes. Depreciation and amortization is expensed over the estimated useful lives of the assets as follows:

Computer equipment	3 – 7 years
Leasehold improvements	2 – 7 years
Furniture and equipment	3 – 5 years

During fiscal 2012 and fiscal 2011, the Company disposed of equipment and leasehold improvements with a cost basis of \$560,000 and \$371,000.

Capitalized and Purchased Software Product Costs

Certain software development and acquisition costs are capitalized when incurred. Capitalization of these costs begins upon the establishment of technological feasibility. The establishment of technological feasibility and the on-going assessment of recoverability of software costs require considerable judgment by management with respect to certain external factors, including, but not limited to, the determination of technological feasibility, anticipated future gross revenue, estimated economic life and changes in software and hardware technologies.

The annual amortization of software products is the greater of the amount computed using: (a) the ratio that current gross revenue for the network or a software product bear to the total of current and anticipated future gross revenue for the network or a software product, or (b) the straight-line method over the estimated economic life of the product which currently runs from three to five years. Amortization starts when the product is available for general release to customers. All other software development and support expenditures are charged to expense in the period incurred.

Capitalized Finance Costs

The Company capitalized finance costs of approximately \$5,000 and \$84,000, respectively, during fiscal 2012 and 2011 for closing costs associated with the loan and security agreement between Fifth Third Bank and the Company, described in Notes 4 and 5, of which approximately \$29,000 and \$0, respectively, was amortized to interest expense in fiscal 2012 and 2011. Other long-term assets include \$30,000 and \$84,000 of capitalized finance costs at July 31, 2012 and 2011, with the current portion of the remaining balance of \$30,000 at July 31, 2012 included in prepaid and other on the Balance Sheet.

Insurance Premiums Receivable

The Company was the beneficiary of the total premiums it paid on a split-dollar life insurance policy at the death of the policy holder. Insurance premiums receivable were recorded at present value based on the average life expectancy of the policy holder, of which \$69,000 were included in other long term assets at July 31, 2011. During fiscal 2012, the Company surrendered the policy, receiving approximately \$197,000 and recorded a book gain of \$123,000, or \$0.02 per basic and diluted share, and taxable income of \$667,000.

Impairment of Long-Lived Assets

In accordance with GAAP, long-lived assets, including capitalized software product costs, property and equipment, and amortized intangible assets, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. If the sum of the expected undiscounted cash flows is less than the carrying value of the related asset or group of assets, a loss is recognized for the difference between the fair value and carrying value of the asset or group of assets. Such analyses necessarily involve judgment. We did not have any events or changes in circumstances to warrant an impairment evaluation in fiscal 2012 or 2011.

Goodwill

GAAP requires that we assess goodwill for impairment annually, or more frequently if circumstances warrant a review. Certain triggering events that may warrant a more frequent impairment test include a significant change in the business climate, legal factors, a decline in operating performance, competition, sale or disposition of a significant portion of the business, or other factors. We tested for goodwill impairment at July 31, 2012 and 2011.

We test goodwill for impairment using a two-step process, as prescribed by GAAP. The first step of the test is used to identify potential impairment by comparing the fair value of a reporting unit with its carrying amount, including goodwill. If the carrying amount of a reporting unit exceeds its fair value, the second step of the goodwill impairment test is performed to measure the amount of impairment loss, if any. The second step of the goodwill impairment test compares the implied fair value of the reporting unit's goodwill with the carrying amount of that goodwill. If the carrying amount of the reporting unit's goodwill exceeds the implied fair value of that goodwill, an impairment loss is recognized in an amount equal to that excess. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination. That is, the fair value of the reporting unit is allocated to all of the assets and liabilities of that unit as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the purchase price paid to acquire the reporting unit.

We determined that there is a single reporting unit for the purpose of goodwill impairment tests. We estimate the fair value of the reporting unit using various valuation techniques, with the primary technique being a discounted cash flow analysis. There are many estimates and assumptions involved in preparing a discounted cash flow analysis, including most significantly the weighted average cost of capital ("WACC") used to discount future cash flows, anticipated long-term growth rates, and future profit margins. Management uses its best efforts to reasonably estimate all of these and other inputs in the cash flow models utilized. We estimated future cash flows using two forecast scenarios and management used its best judgment to assign a weighting to each scenario. Step 1 of the goodwill impairment test indicated that goodwill was not impaired in fiscal 2012 or fiscal 2011. As a result, step 2 of the test was not performed.

Deferred Income Taxes

The tax effect of the temporary differences between the book and tax bases of assets and liabilities and the estimated tax benefit from tax net operating losses is reported as deferred tax assets and liabilities in the balance sheet. An assessment of the likelihood that net deferred tax assets will be realized from future taxable income is performed semi-annually or when events or changes in circumstances indicate that there may be a change in the valuation allowance. Because the ultimate realizability of deferred tax assets is highly subject to the outcome of future events, the amount established as valuation allowance is considered to be a significant estimate that is subject to change in the near term. To the extent a valuation allowance is established or there is a change in the allowance during a period, the change is reflected with a corresponding increase or decrease in the tax provision in the income statement. The Company performed semi-annual assessments of the likelihood that net deferred tax assets will be realized from future taxable income during fiscal 2012 and 2011, as described in Note 11.

Stock-Based Compensation

ARI uses the Black-Scholes model to value stock options granted. Expected volatility is based on historical volatility of the Company's stock. The expected life of options granted represents the period of time that options granted are expected to be outstanding. The risk-free rate for periods within the contractual term of the options is based on the U.S. Treasury yields in effect at the time of grant. As stock-based compensation expense recognized in our results of operations is based on awards ultimately expected to vest, the amount has been reduced for estimated forfeitures, which were estimated based on our historical experience.

Advertising Costs

Advertising costs, which are included in sales and marketing expense on the statement of income, are expensed as incurred. Total advertising costs were \$134,000 and \$77,000 in fiscal 2012 and fiscal 2011, respectively.

Comprehensive Income (Loss)

Comprehensive income is a more inclusive financial reporting method that includes disclosure of financial information that has not been recognized in the calculation of net income. We reported comprehensive income (loss), which includes net income and foreign currency translation adjustments, in the Consolidated Statements of Shareholders' Equity for fiscal 2012 and fiscal 2011.

Legal Provisions

ARI is periodically involved in legal proceedings arising from contracts, patents or other matters in the normal course of business. We reserve for any material estimated losses if the outcome is probable, in accordance with GAAP. We had no legal provisions in fiscal 2012 or fiscal 2011.

Recently Adopted Accounting Standards

The Company has not adopted any new accounting standards during fiscal 2012 that have had a material impact on the financial statements.

New Accounting Pronouncements

In June 2011, the Financial Accounting Standards Board (the "FASB") amended guidance related to the presentation of comprehensive income on the financial statements that will be effective for the Company on a retrospective basis beginning August 1, 2012. Under the new guidance, the Company will be required to report net income and comprehensive income either in a single continuous financial statement or in two separate but consecutive financial statements. The impact of adopting this new standard will not have a material impact on the Company's consolidated financial statements.

Management has reviewed recently issued accounting pronouncement and believes that there are no other pronouncements that will have a material impact on the Company's financial statements in fiscal 2013.

2. Basic and Diluted Net Income per Common Share

Basic net income per common share is computed by dividing net income by the basic weighted average number of common shares outstanding during the period. Diluted net income per common share is computed by dividing net income by the weighted average number of common shares outstanding during the period and reflects the potential dilution that could occur if all of ARI's outstanding stock options that are in the money were exercised (calculated using the treasury stock method).

The following table is a reconciliation of basic and diluted net income per common share for fiscal 2012 and fiscal 2011 (in thousands, except per share data):

	2012	2011
Income from continuing operations	\$ 1,055	\$ 2,418
Income (loss) from discontinued operations	0	25
Net income	\$ 1,055	\$ 2,443
Weighted-average common shares outstanding	7,997	7,855
Effect of dilutive stock options and warrants	174	56
Diluted weighted-average common shares outstanding	8,171	7,911
Earnings per share - basic:		
Income from continuing operations	\$ 0.13	\$ 0.31
Income (loss) from discontinued operations	-	-
Net income	\$ 0.13	\$ 0.31
Earnings per share - diluted:		
Income from continuing operations	\$ 0.13	\$ 0.31
Income (loss) from discontinued operations	-	-
Net income	\$ 0.13	\$ 0.31
Options and warrants that could potentially dilute net income per share in the future that are not included in the computation of diluted net income per share, as their impact is anti-dilutive	877	923

3. Capitalized and Purchased Software Product Costs

The balance of capitalized and purchased software product costs consisted of the following (in thousands):

	Software Product Costs	Accumulated Amortization	Net Value
Balance 7/31/10	\$ 15,919	\$ (13,524)	\$ 2,395
Capitalized costs	1,547	-	1,547
Disposals	(773)	773	-
Amortization expense	-	(1,127)	(1,127)
Balance 7/31/11	\$ 16,693	\$ (13,878)	\$ 2,815
Capitalized costs	1,554	-	1,554
Amortization expense	-	(1,420)	(1,420)
Balance 7/31/12	\$ 18,247	\$ (15,298)	\$ 2,949

The estimated aggregate amortization expense for each of the five succeeding fiscal years related to capitalized and purchased software product costs consist of the following at July 31, 2012 (in thousands):

2013	\$ 1,425
2014	902
2015	421
2016	177
2017	24
	\$ 2,949

4. Line of Credit

On July 9, 2004, the Company entered into a line of credit agreement with JPMorgan Chase, N.A. (the “Chase Line”) which, as amended, permitted the Company to borrow an amount equal to 80% of the book value of all eligible accounts receivable plus 45% of the value of all eligible open renewal orders (provided the renewal rate was at least 85%) minus \$75,000, up to \$2,000,000. The agreement bore interest at 1% per annum above the prime rate plus an additional 3%, at the bank’s option, upon the occurrence of any default under the note. The interest rate was subject to a floor equal to the sum of (i) 2.5%; plus (ii) the quotient of: (a) the one month LIBOR rate divided by (b) one minus the maximum aggregate reserve requirement imposed under Regulation D of the Board of Governors of the Federal Reserve System. The agreement included a non-usage fee of 0.25% per annum on any unused portion of the line of credit and was secured by substantially all of the Company’s assets. The line of credit limited repurchases of common stock, the payment of dividends, liens on assets and new indebtedness. It also contained a financial covenant requiring the Company to maintain a minimum debt service coverage ratio of 1.2 to 1.0. The Chase Line was terminated effective July 27, 2011.

On July 27, 2011, the Company entered into a Loan and Security Agreement (the “Agreement”) with Fifth Third Bank (“Fifth Third”). Pursuant to the terms of the Agreement, Fifth Third extended to the Company credit facilities consisting of a \$1,500,000 revolving credit facility (the “Revolving Loan”) and a \$5,000,000 term loan facility (the “Term Loan” and, together with the Revolving Loan, the “Credit Facilities”), which matures on July 27, 2014. Each of the credit facilities bears interest at a rate based on the one, two, three or six month LIBOR (as selected by the Company on the last business day of each month) plus 4.0% (effective rate of 4.25% as of July 31, 2012). There was \$0 outstanding and \$1,500,000 available on the Revolving Loan as of July 31, 2012.

The Agreement contains covenants that restrict, among other things and subject to certain conditions, the ability of the Company to incur new debt, create liens on its assets, make certain investments, enter into merger transactions, issue capital securities (other than employee and director options, employee benefit plans, and other compensation programs), and make distributions to its shareholders. Financial covenants include a minimum fixed charge coverage ratio, as defined in the Agreement, of 1.2, and a senior leverage (maximum senior funded indebtedness to EBITDA)

ratio, as defined in the Agreement, of 2.0. The Agreement also contains customary events of default which, if triggered, could result in an acceleration of the Company's obligations under the Agreement. The Credit Facilities are secured by a first priority security interest in substantially all assets of the Company and by a first priority pledge of all outstanding equity securities of each of the Company's domestic subsidiaries and 65% of outstanding equity securities of the Company's foreign subsidiaries. The Company was in compliance with its debt covenants as of July 31, 2012.

5. Long-term Debt

On April 27, 2009, the Company issued a \$5,000,000 secured promissory note in connection with the acquisition of Channel Blade Technologies. The annual interest rate on the note was 10% for the first year and 14% thereafter. Accrued interest only was due quarterly commencing July 31, 2009 through April 30, 2011. Twenty equal quarterly payments of principal and interest were due, commencing August 1, 2011. On July 27, 2011 the Company entered into the Agreement described above with Fifth Third Bank, the proceeds of which were used to pay off the Channel Blade note in full on July 27, 2011.

Long-term debt consisted of the following at July 31, 2012 and 2011 (in thousands):

	2012	2011
Notes payable	\$ 3,972	\$ 5,000
Less current maturities	(1,084)	(917)
Notes payable - non-current	\$ 2,888	\$ 4,083

Principal and interest on the new Term Loan will be repaid in fixed monthly principal installments of \$83,333 plus accrued but unpaid interest on the unpaid principal balance commencing on September 1, 2011 through July 1, 2014, with a final balloon payment due July 27, 2014. Mandatory prepayments of the Credit Facilities will be required in the amount of 50% of the Company's excess cash flow for the six-month periods ended January 31, 2012 and July 31, 2012 and for each fiscal year thereafter. Excess cash flow is defined as the remainder of net income plus interest, taxes, depreciation and amortization expense for such period, minus cash taxes paid, capital expenditures incurred, capitalized software costs and scheduled payments of principal and interest charges.

Minimum principal payments due on the Term Loan are as follows for the fiscal years ending (in thousands):

2013	\$ 1,084
2014	2,888
	\$ 3,972

6. Disposition of a Component of an Entity

On March 1, 2011, the Company entered into an Asset Purchase Agreement (the "Agreement") with Globalrange Corporation ("Globalrange"). Under the terms of the Agreement, the Company sold to Globalrange certain rights and assets relating to our electronic data interchange business for the agricultural chemicals industry (the "AgChem EDI Business"). Because the AgChem EDI Business was not a separate entity or reportable segment, the transaction was recorded as a disposition of a component of an entity.

As part of the purchase price for the AgChem EDI Business, Globalrange agreed to assume certain liabilities of ARI relating to the AgChem EDI Business, primarily consisting of unearned revenue (as defined in the

Agreement). Globalrange will make earn-out payments to ARI annually over a four-year period following the closing date, with an initial pre-payment of \$80,000. The amounts of such earn-out payments will be determined based on collections received by Globalrange relating to the AgChem EDI Business during such period, and will be subject to a floor and cap, in accordance with the terms of the Agreement.

The amount of the earn-out was originally estimated at \$580,000 less an imputed discount of \$97,000, based on the present value of the estimated earn-out payments (the "Earn-Out Receivable"), discounted at 14%, which was the prevailing rate of interest charged on the Company's debt at the time of the sale. The discount is amortized to interest income, which is included in other income on the consolidated statements of income, over the life of the earn-out.

An assessment of the expected future cash flows of the Earn-Out Receivable is performed annually in the third fiscal quarter based on historical receipts over the previous twelve month period. Changes in estimate and cash received in excess of expected cash receipts are recorded as a gain or loss in other expense (income). The Company recorded a benefit of approximately \$70,000 and \$433,000 during fiscal 2012 and fiscal 2011, respectively, related to the expected future cash flows of the Earn-Out Receivable.

The remaining earn-out receivable includes \$100,000 in prepaid expenses and other and \$118,000 in other long term assets on the balance sheet at July 31, 2012, with estimated receivables as follows (in thousands):

	2012	2011
Earnout Receivable	\$ 218	\$ 384
Less current maturities	(100)	(190)
Long Term Earnout Receivable	\$ 118	\$ 194

The following table shows changes in the Earn-Out Receivable during fiscal 2012 and 2011 (in thousands):

Balance at March 1, 2011	\$ 483
Net receipts	(118)
Imputed interest recognized	19
Balance at July 31, 2011	\$ 384
Net receipts	(279)
Imputed interest recognized	43
Change in estimate	70
Balance at July 31, 2012	\$ 218

7. Other Intangible Assets

Amortizable intangible assets include customer relationships, trade names and employee non-compete agreements. Amortizable intangible assets are composed of the following at July 31, 2012 and 2011 (in thousands):

	Customer Relationships	Trade Names	Non-Compete Agreements	Total
Net value 7/31/10	\$ 2,568	\$ 189	\$ 70	\$ 2,827
Amortization	(666)	(50)	(70)	(786)
Net value 7/31/11	1,902	139	-	2,041
Amortization	(552)	(50)	-	(602)
Net value 7/31/12	\$ 1,350	\$ 89	\$ -	\$ 1,439
Weighted average remaining useful life		4.75	1.75	- 4.57

The estimated amortization expense related to intangible assets for the years subsequent to July 31, 2012 is as follows (in thousands):

2013	\$ 335
2014	322
2015	284
2016	284
2017	214
	\$ 1,439

8. Capital and Operating Leases

The Company leases office space and certain office equipment under operating lease arrangements expiring through 2021. The Company is generally liable for its share of in the landlord's direct operating expenses and real estate taxes related to these leases. Total rental expense for the operating leases was \$629,000 in fiscal 2012 and \$648,000 in fiscal 2011, respectively.

Where applicable, rent expense for leased offices is recognized on a straight-line basis over the lease terms, which differs from the pattern of payments required by the leases. Other accrued liabilities included \$312,000 and \$310,000 of deferred rent at July 31, 2012 and 2011, respectively.

ARI leases approximately 16,300 square feet of office space located at 10850 West Park Place, Milwaukee, Wisconsin 53224, which commenced on July 17, 2009 and expires on July 17, 2021. Over the twelve year lease agreement, annual base rent of \$149,000 increases approximately 2.9% per year. Rent abatement was negotiated for the first fifteen months totaling approximately \$187,000. Annual projected operating costs and taxes, which are subject to change, are currently \$8.98 per square foot.

The following table shows equipment and leasehold improvements with capital lease obligations (in thousands):

	2012	2011
Equipment and leasehold improvements	\$ 547	\$ 812
Less: accumulated depreciation (1)	366	494
Net equipment and leasehold improvements with outstanding capital lease obligations	\$ 181	\$ 318

(1) Depreciation of leased equipment and leasehold improvements is included in depreciation and other amortization

Minimum lease payments under remaining capital and operating leases are as follows (in thousands):

Fiscal Year Ending July 31:	Capital Leases	Operating Leases
2013	\$ 163	\$ 625
2014	60	521
2015	-	467
2016	-	323
2017	-	328
Thereafter	-	1,382
Total minimum lease payments	223	3,646
Less amounts related to interest	15	-
Net minimum lease payments	\$ 208	\$ 3,646

9. Shareholder Rights Plan

On August 7, 2003, the Company adopted a Shareholder Rights Plan designed to protect the interests of common shareholders from an inadequate or unfair takeover, but not affect a takeover proposal which the Board of Directors believes is fair to all shareholders. Under the Shareholder Rights Plan adopted by the Board of Directors, all shareholders of record on August 18, 2003 received one Preferred Share Purchase Right for each share of common stock they owned. These Rights trade in tandem with the common stock until and unless they are triggered. Should a person or group acquire more than 10% of ARI's common stock (or if an existing holder of 10% or more of the common stock were to increase its position by more than 1%), the Rights would become exercisable for every shareholder except the acquirer that triggered the exercise. The Rights, if triggered, would give the rest of the shareholders the ability to purchase additional stock of ARI at a substantial discount. The Rights will expire on August 18, 2013, and can be redeemed by the Company for \$0.01 per Right at any time prior to a person or group becoming a 10% shareholder.

10. Stock-based Compensation Plans

The Company uses the Black-Scholes model to value stock options granted. Expected volatility is based on historical volatility of the Company's stock. The expected life of options granted represents the period of time that options granted are expected to be outstanding. The risk-free rate for periods within the contractual term of the options is based on the United States Treasury yields in effect at the time of grant.

As recognizing stock-based compensation expense is based on awards ultimately expected to vest, the amount of recognized expense has been reduced for estimated forfeitures based on the Company's historical experience. Total stock compensation expense recognized by the Company was approximately \$195,000 and \$109,000 during fiscal 2012 and 2011, respectively. There was approximately \$164,000 and \$87,000 of total unrecognized compensation costs related to non-vested options granted under the Company's stock option plans as of July 31, 2012 and 2011, respectively. There were no capitalized stock-based compensation costs at July 31, 2012 or 2011.

The fair value of each option granted was estimated in the period of issuance using the assumptions in the following table:

	2012	2011
Expected life (years)	10 years	10 years
Risk-free interest rate	2.1 %	2.9 %
Expected volatility	125.1 %	104.3 %
Expected forfeiture rate	20.9 %	18.6 %
Expected dividend yield	- %	- %
Weighted-average estimated fair value of options granted during the year	\$ 1.11	\$ 0.58

1991 and 1993 Stock Option Plans

The Company's 1991 Stock Option Plan (the "1991 Plan") was terminated on August 14, 2001, except as to outstanding options. All 35,000 options outstanding under the 1991 Plan, with a weighted average exercise price of \$2.33, expired as of September 7, 2010.

The Company's 1993 Director Stock Option Plan (the "1993 Plan") was terminated on August 14, 2001, except as to outstanding options. All 750 options outstanding under the 1993 Plan, with a weighted average exercise price of \$2.05, expired as of September 11, 2010.

2000 Stock Option Plan

The Company's 2000 Stock Option Plan (the "2000 Plan") had 1,950,000 shares of common stock authorized for issuance. Each incentive stock option that was granted under the 2000 Plan is exercisable for a period of not more than ten years from the date of grant (five years in the case of a participant who is a 10% shareholder of the Company, unless the stock options are nonqualified), or such shorter period as determined by the Compensation Committee, and shall lapse upon the expiration of said period, or earlier upon termination of the participant's employment with the Company. The 2000 Plan expired on December 13, 2010, at which time it was terminated except for outstanding options. While options previously granted under the 2000 Plan will continue to be effective through the remainder of their terms, no new options may be granted under the 2000 Plan. Changes in option shares under the 2000 Plan during fiscal 2012 and 2011 are as follows:

	Number of Options	Wtd. Avg. Exercise Price	Wtd. Avg. Remaining Contractual Period (Years)	Aggregate Intrinsic Value
Outstanding at 7/31/10	1,269,981	\$ 1.41	6.48	\$ 13,319
Granted	146,100	0.64	n/a	n/a
Exercised	(800)	0.33	n/a	n/a

Edgar Filing: ARI NETWORK SERVICES INC /WI - Form 10-K

Forfeited	(178,948)	1.15	n/a	n/a
Outstanding at 7/31/11	1,236,333	\$ 1.36	6.10	\$ 34,041
Exercisable at 7/31/11	1,055,241	\$ 1.47	5.63	\$ 22,125
Outstanding at 7/31/11	1,236,333	\$ 1.36	6.10	\$ 34,041
Granted	-	n/a	n/a	n/a
Exercised	(41,325)	0.70	n/a	n/a
Forfeited	(95,239)	1.11	n/a	n/a
Outstanding at 7/31/12	1,099,769	\$ 1.41	5.06	\$ 105,849
Exercisable at 7/31/12	1,021,682	\$ 1.46	4.83	\$ 77,361

The range of exercise prices for options outstanding under the 2000 Plan was \$0.15 to \$2.74 at July 31, 2012 and 2011.

Changes in the 2000 Plan's non-vested option shares included in the outstanding shares above during fiscal 2012 and 2011 are as follows:

	Number of Options	Wtd. Avg. Exercise Price
Non-vested at 7/31/10	282,528	\$ 1.09
Granted	146,100	0.64
Vested	(178,975)	1.13
Forfeited	(68,561)	0.93
Non-vested at 7/31/11	181,092	\$ 0.75
Non-vested at 7/31/11	181,092	\$ 0.75
Granted	-	n/a
Vested	(81,880)	0.80
Forfeited	(21,125)	0.81
Non-vested at 7/31/12	78,087	\$ 0.69

The weighted average remaining vesting period was 1.38 and 1.73 years at July 31, 2012 and 2011, respectively.

2010 Equity Incentive Plan

The Board of Directors adopted the ARI Network Services, Inc. 2010 Equity Incentive Plan (the "2010 Plan") on November 9, 2010, and it was approved by the Company's shareholders in December 2010. The 2010 Plan is the successor to the Company's 2000 Plan.

The 2010 Plan includes the following provisions:

- the aggregate number of shares of Common Stock subject to the 2010 Plan is 650,000 shares;

- the exercise price for options and stock appreciation rights cannot be less than 100% of the fair market value, as defined, of the Company’s Common Stock on the date of grant;
- the exercise prices for options and stock appreciation rights cannot be repriced without shareholder approval, except to reflect changes to the capital structure of the Company as described in the 2010 Plan;
- a maximum term of ten years for options and stock appreciation rights;
- a maximum of 325,000 of the shares available for issuance under the 2010 Plan can be in the form of restricted shares or restricted stock units, and the 2010 Plan does not have liberal share counting provisions (such as provisions that would permit shares withheld for payment of taxes or the exercise price of stock options to be re-granted under the plan); and
- awards cannot be transferred to third parties, with the exception of certain estate planning transfers, which can be made if the committee that administers the 2010 Plan approves such transfers.

Changes in option shares under the 2010 Plan during fiscal 2012 and 2011 are as follows:

	Number of Options	Wtd. Avg. Exercise Price	Wtd. Avg. Remaining Contractual Period (Years)	Aggregate Intrinsic Value
Outstanding at 7/31/10	-	\$ n/a	n/a	\$ n/a
Granted	54,250	0.67	n/a	n/a
Exercised	-	n/a	n/a	n/a
Forfeited	-	n/a	n/a	n/a
Outstanding at 7/31/11	54,250	\$ 0.67	9.64	\$ 5,570
Exercisable at 7/31/11	21,313	\$ 0.66	9.61	\$ 2,221
Outstanding at 7/31/11	54,250	\$ 0.67	9.64	\$ 5,570
Granted	280,667	1.16	n/a	n/a
Exercised	(3,375)	0.66	n/a	n/a
Forfeited	(20,875)	0.95	n/a	n/a
Outstanding at 7/31/12	310,667	\$ 1.10	9.28	\$ 41,962

Exercisable at 7/31/12 117,960 \$ 1.06 9.18 \$ 19,333

The range of exercise prices for options outstanding under the 2010 Plan was \$0.58 to \$1.70 and \$0.58 to \$0.92 at July 31, 2012 and 2011, respectively.

Changes in the 2010 Plan's non-vested option shares included in the outstanding shares above during fiscal 2012 and 2011 are as follows:

	Number of Options	Wtd. Avg. Exercise Price
Non-vested at 7/31/10	-	\$ -
Granted	54,250	0.67
Vested	(21,313)	0.66
Forfeited	-	-
Non-vested at 7/31/11	32,937	\$ 0.67
