MTS SYSTEMS CORPORATION

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

1. Basis of Presentation

The consolidated financial statements include the accounts of MTS Systems Corporation and its wholly owned subsidiaries (the Company). All significant intercompany balances and transactions have been eliminated.

The interim consolidated financial statements included herein have been prepared by the Company, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). The information furnished in these financial statements includes normal recurring adjustments and reflects all adjustments which are, in the opinion of management, necessary for a fair presentation of such financial statements. Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. The accompanying financial statements of the Company should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company's 2006 Form 10-K filed with the SEC. Interim results of operations for the three- and nine-month periods ended June 30, 2007 are not necessarily indicative of the results to be expected for the full year.

Summary of Significant Accounting Policies

The Company believes that of its significant accounting policies, the following are particularly important to the portrayal of the Company's results of operations and financial position and may require the application of a higher level of judgment by the Company's management and, as

Edgar Filing: MTS SYSTEMS CORP - Form 10-Q

a result, are subject to an inherent degree of uncertainty.

Revenue Recognition. Orders that are manufactured and delivered in less than six months with routine installations and no special acceptance protocol are considered to involve separable elements for revenue recognition purposes. Sufficient evidence of fair value of these elements exists to allow revenue recognition for these systems upon shipment, less the greater of the fair value associated with installation and training (if applicable) or the amount of revenue for which payment is deemed contingent upon delivery of these elements, which amount is deferred until customer acceptance. Fair value is determined based upon the sale price of similar products sold individually. In cases where special acceptance protocols exist, installation and training are not considered to be separable from the other elements of the arrangement. Accordingly, revenue for these systems is recognized upon the completion of installation and fulfillment of obligations specific to the terms of the arrangement.

Revenue on contracts requiring longer delivery periods, generally longer than six months (long-term contracts), is recognized using the percentage-of-completion method based on the cost incurred to date relative to estimated total cost of the contract. In most cases, orders with complex installations and/or unusual acceptance protocols involve long-term contracts for custom systems that follow the percentage-of-completion method of revenue recognition through customer acceptance. However, when elements that would not separately fall within the scope of accounting literature prescribing percentage-of-completion accounting are included in an arrangement, the fair value of these elements is separated from the arrangement and accounted for as such services are provided.

The Company enters into long-term contracts for customized equipment sold to its customers. Under the terms of such contracts, revenue recognized using the percentage-of-completion method may not, in certain circumstances, be invoiced until completion of contractual milestones, upon shipment of the equipment, or upon installation and acceptance by the customer. Unbilled amounts for these contracts appear in the Consolidated Balance Sheets as Unbilled Accounts Receivable.

Revenue for services is recognized as the service is performed or ratably over a defined contractual period for service maintenance contracts.

Inventories. Inventories consist of material, labor and overhead costs and are stated at the lower of cost or market, determined under the first-in, first-out accounting method. Inventories at June 30, 2007 and September 30, 2006 were as follows:

5

Table of Contents

	June 30, 2007	September 30, 2006
	(expressed in thousands)	
Customer projects in various stages of completion	\$ 15,324	\$ 14,046
Components, assemblies and parts	27,718	26,434
Total	\$ 43,042	\$ 40,480

Warranty Obligations. Sales of the Company's products and systems are subject to limited warranty guarantees that are included in customer contracts. For sales that include installation services, warranty guarantees typically extend for a period of twelve months from the date of either shipment or acceptance. Product guarantees typically extend for a period of twelve to twenty-four months from the date of purchase. Under the terms of these warranties, the Company is obligated to repair or replace any components or assemblies it deems defective due to workmanship or

Edgar Filing: MTS SYSTEMS CORP - Form 10-Q

materials. The Company reserves the right to reject warranty claims where it determines that failure is due to normal wear, customer modifications, improper maintenance, or misuse. The Company records warranty provisions monthly based on an estimated warranty expense percentage applied to current period revenue. The percentage applied reflects historical warranty claims experience over the preceding twelve-month period. Both the experience percentage and the warranty liability are evaluated on an ongoing basis for adequacy. Warranty provisions and claims for the periods ended June 30, 2007 and July 1, 2006 were as follows:

	Three Months Ended		Nine Months Ended	
	June 30,	July 1,	June 30,	July 1,
	2007	2006	2007	2006
	(expressed in thousands)			
Beginning balance	\$5,582	\$4,511	\$5,894	\$5,333
Warranty provisions	2,892	1,915	5,699	3,986
Warranty claims	(1,855)	(1,508)	(5,092)	(4,417)
Currency translation	41	104	159	120
Ending balance	\$6,660	\$5,022	\$6,660	\$5,022

2. Stock-Based Compensation

The Company compensates employees, officers, and directors with stock-based compensation under four plans approved by the Company's shareholders and administered under the supervision of the Company's Board of Directors. Stock-based compensation awards are generally granted annually at pre-determined dates, with occasional awards being granted at the hire date for new employees. The Company has awarded stock options, employee stock purchase plan shares, and restricted stock under these plans. At June 30, 2007, a total of 2,546,134 shares were available for future grant under these plans. Stock-based compensation expense is determined based on the grant-date fair value and is recognized proportionally over the vesting period of each grant, which is generally three years. Stock-based compensation expense for the three-month periods ended June 30, 2007 and July 1, 2006 was \$1.3 million and \$1.1 million, respectively. Stock-based compensation expense for the nine-month periods ended June 30, 2007 and July 1, 2006 was \$3.9 million and \$3.2 million, respectively.

3. Discontinued Operations

On August 5, 2005, the Company sold substantially all of the net assets of its engine test business, which was based in Ann Arbor, Michigan and also maintained operations in Byfleet, United Kingdom, to A&D Co., Ltd. of Tokyo, Japan. This sale represented the Company's exit from the engine test business. The engine test business was historically included in the Company's Test segment for financial reporting. The gain on the sale of the engine test business and its results of operations are excluded from the results of operations of the Test segment and are reported as discontinued operations.

Effective October 1, 2005, the Company closed its AeroMet subsidiary, a laser deposition technology business located in Eden Prairie, Minnesota. The AeroMet subsidiary was historically included in the Company's Industrial segment (now the Sensors segment) for financial reporting. The loss on disposition of the AeroMet business and its results of operations have been excluded from results of operations of the Sensors segment and are reported as discontinued operations.

Edgar Filing: MTS SYSTEMS CORP - Form 10-Q

The assets of discontinued operations at June 30, 2007 and September 30, 2006 were as follows:

	June 30, 2007 (expressed in thousands)	September 30, 2006
Accounts receivable, net of allowances for doubtful accounts	\$	\$635
Other current assets	183	168
Total assets of discontinued operations	\$183	\$803

4. Recently Issued Accounting Standards

In July 2006, the FASB issued FIN No. 48, Accounting for Uncertainty in Income Taxes. FIN 48 defines the threshold for recognizing the benefits of tax positions in the financial statements as more-likely-than-not to be sustained upon examination. The interpretation also provides guidance on the de-recognition, measurement and classification of income tax uncertainties, along with any related interest and penalties. FIN 48 also includes guidance concerning accounting for income tax uncertainties in interim periods and increases the level of required disclosures associated with any recorded income tax uncertainties. The differences between the amounts recognized in the statements of financial position prior to the adoption of FIN 48 and the amounts reported after adoption are to be accounted for as a cumulative-effect adjustment recorded to the beginning balance of retained earnings. FIN 48 is effective for fiscal years beginning after December 15, 2006 and thus will be effective for the Company in fiscal year 2008. The Company is evaluating the impact of the adoption of FIN 48 on its consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements. SFAS No. 157 clarifies the principle that fair value should be based on the assumptions market participants would use when pricing an asset or liability and establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. Under this statement, fair value measurements are required to be separately disclosed, by level, within the fair value hierarchy. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007. The Company is evaluating the impact of the adoption of SFAS No. 157 on its consolidated financial statements.

In September 2006, the FASB issued SFAS No. 158, Employers Accounting for Defined Benefit Pension and Other Post Retirement Plans an Amendment of SFAS No. 87, Employers Accounting for Pensions, SFAS No. 88, Employers Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits, SFAS No. 106, Employers Accounting for Postretirement Benefits Other Than Pensions, and SFAS No. 132(R), Employers Disclosures about Pensions and Other Postretirement Benefits. SFAS No. 158 requires the recognition of the funded status of defined benefit pension and other post-retirement plans in the balance sheet, as well as the recognition as a component of other comprehensive income, net of tax, the gains or losses and prior service costs or credits that have yet to be recognized as components of net periodic retirement cost pursuant to SFAS No. 87 and SFAS No. 106. The provisions of SFAS No. 158 are effective as of the end of fiscal years ending after December 15, 2006. The adoption of SFAS No. 158 is not expected to have a material impact on the Company's consolidated financial statements.

In September 2006, the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin (SAB) No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements. SAB No. 108 provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement. The SEC staff believes that registrants should quantify errors using both a balance sheet and an income statement approach and evaluate whether either approach results in quantifying a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. SAB No. 108 is effective as of the end of fiscal years ending after November 15, 2006. The adoption of SAB No. 108 is not expected to have a material impact on the Company's consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities. SFAS No. 159 allows entities to choose, at specified election dates, to measure eligible financial assets and liabilities at fair value in situations in which they are not otherwise required to

Edgar Filing: MTS SYSTEMS CORP - Form 10-Q

be measured at fair value. If a company elects the fair value option for an eligible item, changes in that item's fair value in subsequent reporting periods must be recognized in current period earnings. SFAS No. 159 also establishes presentation and disclosure requirements designed to draw comparison between entities that elect different measurement attributes for similar assets and liabilities. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. The Company is evaluating the impact of the adoption of SFAS No. 159 on its consolidated financial statements.

7

Table of Contents

5. Earnings Per Common Share

Basic earnings per share are computed by dividing net earnings by the daily weighted average number of common shares outstanding during the applicable periods. Diluted earnings per share includes the potentially dilutive effect of common shares granted in connection with stock-based compensation using the treasury stock method. The amount of weighted common shares related to stock options that have been excluded from the diluted weighted average shares outstanding calculation for the three-month periods ended June 30, 2007 and July 1, 2006 was not material. Stock options to acquire 0.5 million weighted common shares have been excluded from the diluted weighted average shares outstanding calculation for the nine-month periods ended June 30, 2007 and July 1, 2006, as the exercise of these options would lead to a net reduction in common shares outstanding under the treasury stock method. A reconciliation of these amounts is as follows:

	Three Months Ended		Nine Months Ended	
	June 30, 2007	July 1, 2006	June 30, 2007	July 1, 2006
	(in thousands, except per share data)			
Net income	\$ 10,005	\$ 8,489	\$ 30,453	\$ 27,744
Weighted average common shares outstanding	17,739	18,258	18,046	18,928
Dilutive potential common shares	350	489	363	516
Total dilutive weighted average shares outstanding	18,089	18,747	18,409	19,444
Earnings per share:				
Basic	\$0.56	\$0.46	\$ 1.69	\$ 1.47
Diluted	\$0.55	\$0.45	\$ 1.65	\$ 1.43

6. Short-Term Investments

At June 30, 2007 and September 30, 2006, the Company's short-term investments consisted of U.S. municipal bonds with maturity dates ranging from 2029 through 2036. These bonds carry double-A or higher credit ratings from at least one of the three globally recognized credit rating services. The interest rates on these bonds are re-set every 7, 28, or 35 days in a market auction process such that yields typically reflect current market interest rates. The Company classifies these investments as available-for-sale, as it intends to liquidate them to fund current operations, acquisitions, or the return of capital to shareholders. All investments in available-for-sale securities are carried at fair value, and unrealized gains and losses are reported as a component of Accumulated Other Comprehensive Income within Shareholders' Investment on the Consolidated Balance Sheet. At June 30, 2007 and September 30, 2006, there were no material unrealized gains or losses associated with the Company's short-term investments.

7. Business Segment Information

The Company's Chief Executive Officer and its management regularly review financial information for the Company's discrete business units. Based on similarities in the economic characteristics, nature of products and services, production processes, type or class of customer served, method of distribution and regulatory environments, the operating units have been aggregated for financial statement purposes into two reportable segments -- Test and Sensors. During the three-month period ended December 30, 2006, the former Industrial segment was re-named the Sensors segment. This change was a change in name only; there was no underlying change in the components of the segment. The Test segment provides testing equipment, systems, and services to the ground vehicles, aerospace, and infrastructure markets. The Sensors segment provides high-performance position sensors for a variety of industrial and vehicular applications.

The accounting policies of the reportable segments are the same as those described in Note 1 to the Consolidated Financial Statements found in the Company's 2006 Form 10-K. In evaluating each segment's performance, management focuses on income from operations. This measure excludes interest income and expense, income taxes and other non-operating items. Corporate expenses, including costs associated with various support functions such as human resources, information technology, finance and accounting, and general and administrative costs, are allocated to the reportable segments primarily on the basis of revenue.

8

Table of Contents

Financial information by reportable segment for the periods ended June 30, 2007 and July 1, 2006 was as follows:

	Three Months Ended		Nine Months Ended	
	June 30, 2007	July 1, 2006	June 30, 2007	July 1, 2006
	(expressed in thousands)			
Revenue by Segment:				
Test	\$89,123	\$79,287	\$253,383	\$243,101
Sensors	19,432	16,600	56,058	47,497
Total revenue	\$108,555	\$95,887	\$309,441	\$290,598
Income from Operations by Segment:				
Test	\$8,135	\$8,848	\$30,341	\$33,384
Sensors	3,533	2,902	10,631	7,798
Total income from operations	\$11,668	\$11,750	\$40,972	\$41,182

8. Derivative Instruments and Hedging Activities

The Company periodically enters into contracts with banks to exchange currencies at a set future date and rate to maintain the reporting currency value of specifically identified foreign currency exposures. Because the market value of these currency contracts is derived from current exchange rates, they are classified as derivative financial instruments. The Company does not use currency contracts for speculative or trading purposes.

Edgar Filing: MTS SYSTEMS CORP - Form 10-Q

Currency exchange contracts utilized to maintain the U.S. dollar value of expected financial transactions denominated in foreign currencies are designated as foreign currency cash flow hedges. Gains and losses related to changes in the market value of the contracts are recorded in Accumulated Other Comprehensive Income within Shareholders' Investment on the Consolidated Balance Sheet until they are recognized in earnings at the time currency gain or loss is recognized on the underlying expected transaction. The Company periodically assesses whether the contracts are effective in offsetting the changes in the U.S. dollar value of the expected transactions. When a contract is no longer effective as a hedge, the Company discontinues hedge accounting prospectively, and changes in the market value of the contract are recognized in Other Income (Expense), net on the Consolidated Statement of Income in the current period.

The Company also uses currency contracts to hedge the functional currency value of monetary assets and liabilities denominated in foreign currencies. The gains and losses related to the changes in the market value of these contracts are included in Other Income (Expense), net on the Consolidated Statement of Income in the current period.

At June 30, 2007 and July 1, 2006, the Company had outstanding currency exchange contracts with gross notional U.S. dollar equivalent amounts of \$108.0 million and \$105.4 million, respectively. Netting offsetting contracts, net notional contracts outstanding in U.S. dollar equivalent amounts were \$34.3 million and \$26.0 million, respectively. At June 30, 2007 and July 1, 2006, the market value of the foreign currency exchange contracts was \$0.7 million and \$0.2 million, respectively. The amount recognized in earnings as a result of the ineffectiveness of cash flow hedges was not material for the periods ended June 30, 2007 and July 1, 2006. At June 30, 2007 and July 1, 2006, the amount projected to be reclassified from Accumulated Other Comprehensive Income into earnings in the next 12 months was \$0.2 million and \$0.1 million, respectively. The maximum remaining maturity of any currency exchange contract was 0.8 years at June 30, 2007 and 0.9 years at July 1, 2006.

9. Comprehensive Income

Comprehensive Income, a component of Shareholders' Investment, consists of net income, minimum pension liability adjustment, unrealized gains or losses on investments classified as available-for-sale, derivative instrument gains or losses, and foreign currency translation adjustments.

9

Table of Contents

Comprehensive income for the periods ended June 30, 2007 and July 1, 2006 was as follows:

	Three Months Ended		Nine Months Ended	
	June 30,	July 1,	June 30,	July 1,
	2007	2006	2007	2006
	(expressed in thousands)			
Net income	\$ 10,005	\$ 8,489	\$ 30,453	\$ 27,744
Change in cumulative translation adjustment	51	4,042	3,817	4,191
Increase (decrease) in unrealized gain/loss on derivative instruments	317	(27)	(208)	(1,384)
Comprehensive income	\$ 10,373	\$ 12,504	\$ 34,062	\$ 30,551

10. Retirement Benefit Plan

One of the Company's German subsidiaries has a non-contributory, unfunded defined benefit retirement plan for eligible employees. This plan provides benefits based on the employee's years of service and compensation during the years immediately preceding retirement, early retirement, termination, disability, or death, as defined in the plan. The Company uses a September 30 measurement date for this defined benefit retirement plan.

The cost for the plan for the periods ended June 30, 2007 and July 1, 2006 included the following components:

	Three Months Ended		Nine Months Ended	
	June 30, 2007 (expressed in thousands)	July 1, 2006	June 30, 2007	July 1, 2006
Service cost-benefit earned during the period	\$ 129	\$ 113	\$ 380	\$ 342
Interest cost on projected benefit obligation	142	111	417	336
Net amortization and deferral	33	33	98	100
Net periodic retirement cost	\$ 304	\$ 257	\$ 895	\$ 778

11. Restructuring and Other Charges:

In the fourth quarter of fiscal year 2005, the Company decided to exit its noise and vibration business. The Company assessed the recoverability of the assets associated with this business using an undiscounted cash flow methodology. Based on this assessment, the Company reduced the assets to their fair market value. In addition, the Company recorded employee severance costs and software development expense that will not repeat in future years.

For the nine-month period ended June 30, 2007 and the fiscal year ended September 30, 2006, the Company's provisions and write-offs associated with this restructuring activity were as follows:

	Severance Charges (expressed in thousands)	Contract Termination Charges	Total
Balances at October 1, 2005	\$ 1,267	\$ 52	\$ 1,319
Provision	30		30
Write-off/payments	(1,257)	(52)	(1,309)
Balances at September 30, 2006	\$ 40	\$	\$ 40
Provision			
Write-off/payments	(40)		(40)
Balances at June 30, 2007	\$	\$	\$

Table of Contents

12. Contingencies

The Company is subject to the export control regulations of the U.S. Department of Commerce. As previously reported in the Company's Form 10-Q for the quarterly period ended March 31, 2007, the Department of Commerce and the U.S. Attorney for the District of Minnesota have each been conducting an inquiry into the Company's compliance with certain export regulations. The initial inquiry, as described in a newspaper article published in the Minneapolis Star Tribune in August 2003, resulted in a less than \$0.1 million civil settlement with the Department of Commerce without the Company admitting to violating any law or regulation. The separate criminal inquiry by the U.S. Attorney's office has been ongoing and, during the second quarter of fiscal 2007, the U.S. Attorney's office proposed terms to terminate the criminal inquiry, if the Company were to plead guilty to violating federal export control regulations and a related federal criminal statute and pay the maximum criminal fine, which the Company understands could be up to \$1.0 million, under applicable law.

The Company, together with its outside counsel, has thoroughly investigated all actions in question and firmly believes any allegation of wrongdoing is without merit. Furthermore, while the Company does not know whether any formal charges will be brought against it, it has evaluated its legal defenses, and the range of possible and probable outcomes, and does not believe the ultimate outcome of any proceeding would have a material adverse effect on the Company's business or financial condition.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

MTS Systems Corporation is a leading global supplier of test systems and industrial position sensors. The Company's testing hardware, software, and service solutions help customers accelerate and improve their design, development, and manufacturing processes and are used for determining the mechanical behavior of materials, products, and structures. MTS' high-performance position sensors enhance control to improve the productivity and safety of fixed and mobile industrial equipment. MTS had 1,510 employees and revenue of \$397 million for the fiscal year ended September 30, 2006.

Summary of Results

Three Months Ended June 30, 2007 (Third Quarter of Fiscal 2007) Compared to Three Months Ended July 1, 2006 (Third Quarter of Fiscal 2006)

Orders for the Third Quarter of Fiscal 2007 increased 14.5%, to \$111.9 million, compared to \$97.7 million for the Third Quarter of Fiscal 2006, primarily driven by two large Test segment orders in North America and Europe, and worldwide growth in the Sensors segment, as well as an estimated \$0.7 million favorable impact of currency translation. Backlog of undelivered orders at June 30, 2007 was approximately \$206 million, an increase of 1.0% from backlog of approximately \$204 million at March 31, 2007. Backlog at the end of the Third Quarter of Fiscal 2006 was approximately \$198 million.

Revenue of \$108.6 million for the Third Quarter of Fiscal 2007 increased 13.2%, compared to revenue of \$95.9 million for the Third Quarter of Fiscal 2006, primarily driven by a higher proportion of standard product and service business in Test, continued growth in Sensors, and an estimated \$1.4 million favorable impact of currency translation. Gross profit for the Third Quarter of Fiscal 2007 was \$42.8 million, an increase of 4.4% compared to gross profit of \$41.0 million for the Third Quarter of Fiscal 2006, primarily due to increased volume, partially offset by

Edgar Filing: MTS SYSTEMS CORP - Form 10-Q

unplanned project costs and increased warranty expense in the Test segment. Income from operations for the Third Quarter of Fiscal 2007 was \$11.7 million, flat compared to income from operations of \$11.8 million for the Third Quarter of Fiscal 2006, as planned increases in sales, marketing, and research and development spending to support strategic initiatives equaled the increase in gross profit. Net income for the Third Quarter of Fiscal 2007 was \$10.0 million, or \$0.55 per diluted share, an increase of 17.6% compared to \$8.5 million, or \$0.45 per diluted share, for the Third Quarter of Fiscal 2006, driven by decreased income tax expense of \$1.6 million due to increased tax benefits resulting from research and development credits and export transactions.

Nine Months Ended June 30, 2007 (First Nine Months of Fiscal 2007) Compared to Nine Months Ended July 1, 2006 (First Nine Months of Fiscal 2006)

Orders for the First Nine Months of Fiscal 2007 increased 16.0%, to \$320.4 million, compared to \$276.1 million for the First Nine Months of Fiscal 2006, primarily driven by large custom orders in the Test segment in North America and Asia and worldwide growth in the Sensors segment, as well as an estimated \$5.9 million favorable impact of currency translation. Backlog of undelivered orders at June 30, 2007 was approximately \$206 million, an increase of 7.3% from a backlog of approximately \$192 million at September 30, 2006, due to higher order volume and an estimated \$3.0 million favorable impact of currency translation.

11

Table of Contents

Revenue of \$309.4 million for the First Nine Months of Fiscal 2007 increased 6.5%, compared to revenue of \$290.6 million for the First Nine Months of Fiscal 2006, driven by a higher proportion of standard product and service business in Test, continued growth in the Sensors segment, and an estimated \$8.3 million favorable impact of currency translation. Gross profit for the First Nine Months of Fiscal 2007 was \$130.8 million, an increase of 2.7% compared to gross profit of \$127.3 million for the First Nine Months of Fiscal 2006, primarily due to increased volume, favorable product mix, and an estimated \$2.6 million favorable impact of currency translation, partially offset by unplanned custom project costs and increased warranty expense in the Test segment. Income from operations for the First Nine Months of Fiscal 2007 was \$41.0 million, flat compared to income from operations of \$41.2 million for the First Nine Months of Fiscal 2006, as planned increases in sales, marketing, and research and development spending to support strategic initiatives equaled the increase in gross profit and an estimated \$0.9 million favorable impact of currency translation. Net income for the First Nine Months of Fiscal 2007 was \$30.5 million, or \$1.65 per diluted share, an increase of 10.1% compared to \$27.7 million, or \$1.43 per diluted share, for the First Nine Months of Fiscal 2006, primarily due to decreased income tax expense of \$3.5 million, and an estimated \$0.7 million favorable impact of currency translation, partially offset by a \$1.2 million increase in net losses on foreign currency transactions. The decrease in income tax expense is primarily due to the enactment of favorable tax legislation in the United States and Germany during the First Nine Months of Fiscal 2007, and increased tax benefits resulting from research and development credits and export transactions.

Detailed Financial Results

Orders and Backlog

Third Quarter of Fiscal 2007 Compared to Third Quarter of Fiscal 2006

Edgar Filing: MTS SYSTEMS CORP - Form 10-Q

Orders for the Third Quarter of Fiscal 2007 aggregated \$111.9 million, an increase of 14.5% compared to orders of \$97.7 million for the Third Quarter of Fiscal 2006, primarily driven by two large Test segment orders in North America and Europe, and worldwide growth in the Sensors segment, as well as an estimated \$0.7 million favorable impact of currency translation.

Orders for the Test segment in the Third Quarter of Fiscal 2007 increased 12.5%, to \$90.8 million, compared to orders of \$80.7 million for the Third Quarter of Fiscal 2006, reflecting an increase in North America and Europe, and an estimated \$0.4 million favorable impact of currency translation. Orders in the Third Quarter of Fiscal 2007 included two large custom orders which aggregated to approximately \$17 million. The Test segment accounted for 81.1% of total Company orders for the Third Quarter of Fiscal 2007, compared to 82.6% for the Third Quarter of Fiscal 2006.

Orders for the Sensors segment in the Third Quarter of Fiscal 2007 increased 24.1%, to \$21.1 million, compared to orders of \$17.0 million for the Third Quarter of Fiscal 2006, reflecting business growth in all geographies and an estimated \$0.3 million favorable impact of currency translation. One large order of approximately \$1.4 million accounted for 8 percentage points of the growth. The Sensors segment accounted for 18.9% of total Company orders for the Third Quarter of Fiscal 2007, compared to 17.4% for the Third Quarter of Fiscal 2006.

Backlog of undelivered orders at June 30, 2007 was approximately \$206 million, an increase 1.0% from backlog of \$204 million at March 31, 2007. Backlog at July 1, 2006 was approximately \$198 million. While the Company's backlog is subject to order cancellations, the Company seldom experiences an order cancellation larger than \$1.0 million.

First Nine Months of Fiscal 2007 Compared to First Nine Months of Fiscal 2006

Orders for the First Nine Months of Fiscal 2007 aggregated \$320.4 million, an increase of 16.0% compared to orders of \$276.1 million for the First Nine Months of Fiscal 2006, due to increased custom order volume in the Test segment in Asia and North America and worldwide growth in the Sensors segment, as well as an estimated \$5.9 million favorable impact of currency translation.

Orders for the Test segment in the First Nine Months of Fiscal 2007 increased 15.1%, to \$261.8 million, compared to orders of \$227.5 million for the First Nine of Fiscal 2006. This increase was primarily due to increased custom order bookings in Asia and North America, and an estimated \$3.9 million favorable impact of currency translation. The Test segment accounted for 81.7% of total Company orders for the First Nine Months of Fiscal 2007, compared to 82.4% for the First Nine Months of Fiscal 2006.

Table of Contents

Orders for the Sensors segment in the First Nine Months of Fiscal 2007 increased 20.6%, to \$58.6 million, compared to orders of \$48.6 million for the First Nine Months of Fiscal 2006, reflecting worldwide business growth and an estimated \$2.0 million favorable impact of currency translation. The Sensors segment accounted for 18.3% of total Company orders for the First Nine Months of Fiscal 2007, compared to 17.6% for the First Nine Months of Fiscal 2006.

Edgar Filing: MTS SYSTEMS CORP - Form 10-Q

Backlog of undelivered orders at June 30, 2007 was approximately \$206 million, an increase of 7.3% from backlog of \$192 million at September 30, 2006, primarily due to higher order volume and an estimated \$3.0 million favorable impact of currency translation.

Results of Operations

Third Quarter of Fiscal 2007 Compared to Third Quarter of Fiscal 2006

Revenue for the Third Quarter of Fiscal 2007 was \$108.6 million, an increase of \$12.7 million, or 13.2%, compared to revenue of \$95.9 million for the Third Quarter of Fiscal 2006. Revenue from international customers for the Third Quarter of Fiscal 2007 represented 65.3% of total revenue, compared to 67.2% for the Third Quarter of Fiscal 2006. Test segment revenue for the Third Quarter of Fiscal 2007 was \$89.1 million, an increase of \$9.8 million or 12.4%, compared to revenue of \$79.3 million for the Third Quarter of Fiscal 2006, reflecting an increase in the proportion of standard product and service business and an estimated \$1.0 million favorable impact of currency translation. Sensors segment revenue for the Third Quarter of Fiscal 2007 was \$19.5 million, an increase of \$2.9 million or 17.5%, compared to revenue of \$16.6 million for the Third Quarter of Fiscal 2006, driven by increased worldwide volume and an estimated \$0.4 million favorable impact of currency translation.

Gross profit for the Third Quarter of Fiscal 2007 was \$42.8 million, an increase of 1.8 million or 4.4%, compared to gross profit of \$41.0 million for the Third Quarter of Fiscal 2006. Gross profit as a percent of revenue was 39.4% for the Third Quarter of Fiscal 2007, a decrease of 3.4 percentage points from 42.8% for the Third Quarter of Fiscal 2006. Test segment gross profit for the Third Quarter of Fiscal 2007 was \$32.2 million, an increase of \$0.3 million, or 0.9%, compared to gross profit of \$31.9 million for the Third Quarter of Fiscal 2006. Gross profit as a percent of revenue for the Test segment decreased 4.1 percentage points, to 36.1%, for the Third Quarter of Fiscal 2007, compared to 40.2% for the Third Quarter of Fiscal 2006. This decrease was primarily due to unplanned project costs and increased warranty expense on a few large custom projects, partially offset by an estimated \$0.2 million favorable impact of currency translation. Sensors segment gross profit for the Third Quarter of Fiscal 2007 was \$10.6 million, an increase of \$1.5 million, or 16.5%, compared to gross profit of \$9.1 million for the Third Quarter of Fiscal 2006, primarily due to volume. Gross profit as a percent of revenue for the Sensors segment decreased 0.4 percentage points, to 54.4%, for the Third Quarter of Fiscal 2007, compared to 54.8% for the Third Quarter of Fiscal 2006. There was an estimated \$0.2 million favorable impact of currency translation on gross profit for the Third Quarter of Fiscal 2007.

Selling and marketing expense for the Third Quarter of Fiscal 2007 was \$17.8 million, an increase of \$1.7 million, or 10.6%, compared to \$16.1 million for the Third Quarter of Fiscal 2006, primarily due to \$1.3 million increased compensation, benefits, travel and commission expenses in the Test segment, \$0.5 million increased staffing and benefits expense in the Sensors segment, and an estimated \$0.3 million unfavorable impact of currency translation, partially offset by a \$0.4 million decrease in expense associated with the exited noise and vibration business. Selling expense as a percent of revenue decreased to 16.4% for the Third Quarter of Fiscal 2007, compared to 16.8% for the Third Quarter of Fiscal 2006.

General and administrative expense totaled \$8.2 million for the Third Quarter of Fiscal 2007, flat compared to \$8.3 million for the Third Quarter of Fiscal 2006, as \$0.2 million decreased consulting expenses and \$0.3 million decreased legal and audit fees were offset by \$0.3 million increased compensation and benefits expense, and an estimated \$0.1 million unfavorable impact of currency translation. General and administrative expense as a percent of revenue decreased to 7.6% for the Third Quarter of Fiscal 2007, compared to 8.7% for the Third Quarter of Fiscal 2006.

Research and development expense totaled \$5.1 million for the Third Quarter of Fiscal 2007, an increase of \$0.3 million, or 6.3%, compared to \$4.8 million for the Third Quarter of Fiscal 2006. This increase was primarily due to a planned increase in expenditures for new product development in both segments. Research and development expense as a percent of revenue decreased to 4.7% for the Third Quarter of Fiscal 2007, compared to 5.0% for the Third Quarter of Fiscal 2006. There was no significant impact on research and development expense from currency translation.

Income from operations for the Third Quarter of Fiscal 2007 was \$11.7 million, flat compared to income from operations of \$11.8 million for the Third Quarter of Fiscal 2006. Income from operations in the Test segment decreased \$0.7 million, or 7.9%, to \$8.2 million for the Third Quarter of Fiscal 2007, compared to \$8.9 million for the Third Quarter of Fiscal 2006. This decrease was primarily attributable to planned increases in operating expenses, partially offset by higher gross profit. Income from operations in the Sensors segment for the Third Quarter of Fiscal 2007 increased \$0.6 million, or 20.7%, to \$3.5 million, compared to \$2.9 million for the Third Quarter of Fiscal 2006, primarily due to increased gross profit and an estimated \$0.1 million favorable impact of currency translation, partially offset by planned increases in operating expenses.

13

Table of Contents

Interest expense was \$0.4 million for the Third Quarter of Fiscal 2007, flat compared to interest expense of \$0.4 million for the Third Quarter of Fiscal 2006. There was no significant impact on interest expense from currency translation.

Interest income was \$0.9 million for the Third Quarter of Fiscal 2007, an increase of \$0.2 million compared to interest income of \$0.7 million for the Third Quarter of Fiscal 2006, reflecting higher average interest rates, partially offset by a lower average balance of cash, cash equivalents and short-term investments during the Third Quarter of Fiscal 2007 compared to the Third Quarter of Fiscal 2006. There was no significant impact on interest income from currency translation.

Other income (expense), net was \$0.6 million of net income for the Third Quarter of Fiscal 2007, flat compared to \$0.7 million of net income in the Third Quarter of Fiscal 2006. There was no significant impact on other income (expense), net from currency translation.

Provision for income taxes totaled \$2.7 million for the Third Quarter of Fiscal 2007, a decrease of \$1.6 million, or 37.2%, compared to \$4.3 million for the Third Quarter of Fiscal 2006, primarily due to increased tax benefits resulting from research and development credits and export transactions. The effective tax rate for the Third Quarter of Fiscal 2007 was 21.1%, a decrease of 12.4 percentage points compared to a tax rate of 33.5% for the Third Quarter of Fiscal 2006. There was no significant impact on provision for income taxes from currency translation.

Net income was \$10.0 million for the Third Quarter of Fiscal 2007, a decrease of \$1.5 million, or 17.6%, compared to \$8.5 million for the Third Quarter of Fiscal 2006. The increase was primarily due to decreased income tax expense and an estimated \$0.1 million favorable impact of currency translation.

The reduction in number of shares outstanding, resulting from the Company's share purchases, positively impacted earnings per share by \$0.02 for the Third Quarter of Fiscal 2007.

First Nine Months of Fiscal 2007 Compared to First Nine Months of Fiscal 2006

Edgar Filing: MTS SYSTEMS CORP - Form 10-Q

Revenue for the First Nine Months of Fiscal 2007 was \$309.4 million, an increase of \$18.8 million, or 6.5%, compared to revenue of \$290.6 million for the First Nine Months of Fiscal 2006. Revenue from international customers for the First Nine Months of Fiscal 2007 represented 63.9% of total revenue, compared to 66.8% for the First Nine Months of Fiscal 2006. Test segment revenue for the First Nine Months of Fiscal 2007 was \$253.4 million, an increase of \$10.3 million, or 4.2%, compared to revenue of \$243.1 million for the First Nine Months of Fiscal 2006, driven by an increase in the proportion of standard product and service business in Test, and an estimated \$6.2 million favorable impact of currency translation. Sensors segment revenue for the First Nine Months of Fiscal 2007 was \$56.0 million, an increase of \$8.5 million, or 17.9%, compared to revenue of \$47.5 million for the First Nine Months of Fiscal 2006, driven by continued worldwide business growth and an estimated \$2.1 million favorable impact of currency translation.

Gross profit for the First Nine Months of Fiscal 2007 increased \$3.5 million, or 2.7%, to \$130.8 million, compared to gross profit of \$127.3 million for the First Nine Months of Fiscal 2006. Gross profit as a percent of revenue was 42.3% for the First Nine Months of Fiscal 2007, a decrease of 1.5 percentage points from 43.8% for the First Nine Months of Fiscal 2006. Test segment gross profit for the First Half of Fiscal 2007 was \$100.0 million, a decrease of \$1.9 million, or 1.9%, compared to gross profit of \$101.9 million for the First Nine Months of Fiscal 2006. Gross profit as a percent of revenue for the Test segment decreased 2.5 percentage points, to 39.4%, for the First Nine Months of Fiscal 2007, compared to 41.9% for the First Nine Months of Fiscal 2006. This decrease was primarily due to unplanned custom project costs and increased warranty expense on a few large custom projects, partially offset by favorable product mix, and an estimated \$1.5 million favorable impact of currency translation. Sensors segment gross profit for the First Nine Months of Fiscal 2007 was \$30.8 million, an increase of \$5.4 million, or 21.3%, compared to gross profit of \$25.4 million for the First Nine Month of Fiscal 2006. Gross profit as a percent of revenue for the Sensors segment increased 1.5 percentage points, to 55.0%, for the First Nine Months of Fiscal 2007, compared to 53.5% for the First Nine Months of Fiscal 2006, primarily due to increased volume, and an estimated \$1.1 million favorable impact of currency translation.

14

Table of Contents

Selling and marketing expense for the First Nine of Fiscal 2007 was \$52.1 million, an increase of \$4.0 million, or 8.3%, compared to \$48.1 million for the First Nine Months of Fiscal 2006, primarily due to \$3.0 million increased compensation, benefits, travel and commission expenses in the Test segment, \$1.2 million increased staffing and commission expense in the Sensors segment, and an estimated \$1.2 million unfavorable impact of currency translation, partially offset by a \$1.4 million decrease in expense associated with the exited noise and vibration business. Selling expense as a percent of revenue increased to 16.8% for the First Nine Months of Fiscal 2007, compared to 16.6% for the First Nine Months of Fiscal 2006.

General and administrative expense totaled \$24.0 million for the First Nine Months of Fiscal 2007, a decrease of \$1.3 million, or 5.1%, compared to \$25.3 million for the First Nine Months of Fiscal 2006. This decrease was primarily due to a \$2.1 million reduction in consulting expenses and a \$0.7 million reduction in legal and audit fees, partially offset by a \$1.1 million increase in staffing and benefits expense, and an estimated \$0.4 million unfavorable impact of currency translation. General and administrative expense as a percent of revenue decreased to 7.8% for the First Nine Months of Fiscal 2007, compared to 8.7% for the First Nine Months of Fiscal 2006.

Research and development expense totaled \$14.5 million for the First Nine Months of Fiscal 2007, an increase of \$0.9 million, or 6.6%, compared to \$13.6 million for the First Nine Months of Fiscal 2006. This increase was primarily due to a planned increase in expenditures for new product development in both segments. Research and development expense as a percent of revenue for the First Half of Fiscal 2007 was 4.7%, flat compared to the First Half of Fiscal 2006. There was no significant impact on research and development expense from currency translation.

(Loss) gain on sale of assets of \$0.7 million for the First Nine Months of Fiscal 2007 resulted from the sale of assets associated with the Company's linear friction welding technology. The \$0.9 million gain on sale of assets for the First Nine Months of Fiscal 2006 resulted from the sale of assets of the Company's exited noise and vibration business. There was no impact on gain on sale of assets from currency translation.

Income from operations for the First Nine Months of Fiscal 2007 was \$41.0 million, flat compared to income from operations of \$41.2 million for the First Nine Months of Fiscal 2006. Income from operations in the Test segment decreased \$3.0 million, or 9.0%, to \$30.4 million for the First Nine Months of Fiscal 2007, compared to \$33.4 million for the First Nine Months of Fiscal 2006. This decrease was primarily attributable to decreased gross profit and planned increases in operating expenses, partially offset by an estimated \$0.4 million favorable impact of currency translation. Income from operations in the Sensors segment for the First Nine Months of Fiscal 2007 increased \$2.8 million, or 35.9%, to \$10.6 million, compared to \$7.8 million for the First Nine Months of Fiscal 2006, primarily due to increased gross profit and an estimated \$0.5 million favorable impact of currency translation, partially offset by planned increases in operating expenses.

Interest expense was \$1.1 million for the First Nine Months of Fiscal 2007, a decrease of \$0.2 million compared to interest expense of \$1.3 million for the First Nine Months of Fiscal 2006, due to a reduction in the Company's long-term debt obligations. There was no significant impact on interest expense from currency translation.

Interest income was \$2.8 million for the First Nine Months of Fiscal 2007, an increase of \$0.6 million compared to interest income of \$2.2 million for the First Nine Months of Fiscal 2006, reflecting higher average interest rates, partially offset by a lower average balance of cash, cash equivalents and short-term investments during the First Nine Months of Fiscal 2007 compared to the First Nine Months of Fiscal 2006. There was no significant impact on interest income from currency translation.

Other income (expense), net was \$0.3 million in net expense for the First Nine Months of Fiscal 2007, compared to \$1.0 million in net income in the First Nine Months of Fiscal 2006, primarily due to net losses on foreign currency transactions in the First Nine Months of Fiscal 2007 compared to net gains on foreign currency transactions in the First Nine Months of Fiscal 2006. There was no significant impact on other income (expense), net from currency translation.

Provision for income taxes totaled \$11.9 million for the First Nine Months of Fiscal 2007, a decrease of \$3.5 million, or 22.7%, compared to \$15.4 million for the First Nine Months of Fiscal 2006, primarily due to a lower effective tax rate and decreased income before taxes, partially offset by an estimated \$0.3 million unfavorable impact of currency translation. The effective tax rate for the First Nine Months of Fiscal 2007 was 28.2%, a decrease of 7.5 percentage points compared to a tax rate of 35.7% for the First Nine Months of Fiscal 2006, primarily due to the enactment of tax legislation in Germany during the First Nine Months of Fiscal 2007 that entitled the Company to a corporate income tax refund, favorable legislation in the United States that retroactively extended the research and development tax credit, as well as favorable tax benefits resulting from export transactions.

Table of Contents

Net income was \$30.5 million for the First Nine Months of Fiscal 2007, an increase of \$2.8 million, or 10.1%, compared to \$27.7 million for the First Nine Months of Fiscal 2006. The increase was primarily due to decreased income tax expense and an estimated \$0.6 million favorable impact of currency translation, partially offset by a \$1.2 million increase in net losses on foreign currency transactions.

The reduction in number of shares outstanding, resulting from the Company's share purchases, positively impacted earnings per share by \$0.08 for the First Nine Months of Fiscal 2007.

Capital Resources and Liquidity

Total cash and cash equivalents increased \$0.2 million in the First Nine Months of Fiscal 2007, primarily due to strong earnings and net proceeds generated from the conversion of short-term investments to cash and cash equivalents, partially offset by increased accounts and unbilled receivables, and purchases of the Company's common stock. Total cash and cash equivalents increased \$8.3 million in the First Nine Months of Fiscal 2006, primarily due to strong earnings, advance payments received from customers, and net proceeds generated from the conversion of short-term investments to cash and cash equivalents, partially offset by employee incentives and related benefits payments, increased accounts and unbilled receivables, and purchases of the Company's common stock. The Company believes that its anticipated operating cash flows, in addition to funds available from cash, cash equivalents and short-term investments totaling \$103.9 million at June 30, 2007, are adequate to fund ongoing operations, capital expenditures, and share purchases, as well as to fund internal growth opportunities and strategic acquisitions.

Cash flows from operating activities provided cash totaling \$17.5 million for the First Nine Months of Fiscal 2007, compared to cash provided of \$25.3 million for the First Nine Months of Fiscal 2006. Operating cash flow for the First Nine Months of Fiscal 2007 primarily resulted from strong earnings, partially offset by a \$16.5 million increase in accounts and unbilled receivables, \$2.2 million increase in inventories, and net employee incentives and related benefit payments of \$2.1 million. Operating cash flow for the First Nine Months of Fiscal 2006 primarily resulted from strong earnings, \$8.4 million increase in advance payments from customers, and \$3.9 million increase in income taxes payable, partially offset by net employee incentives and related benefits payments of \$5.5 million and an increase in accounts and unbilled receivables of \$11.3 million.

Cash flows from investing activities provided cash totaling \$9.0 million for the First Nine Months of Fiscal 2007, compared to cash provided of \$46.6 million for the First Nine Months of Fiscal 2006. During the First Nine Months of Fiscal 2007, the Company received net proceeds of \$17.8 million from the conversion of short-term investments to cash and cash equivalents, received \$1.0 million from the sale of assets associated with the Company's linear friction welding technology, and invested \$9.8 million in property and equipment additions. During the First Nine Months of Fiscal 2006, the Company received net proceeds of \$52.8 million from the conversion of short-term investments to cash and cash equivalents and invested \$6.0 million in property and equipment additions.

Cash flows from financing activities required the use of cash totaling \$29.8 million for the First Nine Months of Fiscal 2007, compared to a use of cash totaling \$67.2 million for the First Nine Months of Fiscal 2006. The cash usage for the First Nine Months of Fiscal 2007 was due to the use of \$30.4 million to purchase shares of the Company's common stock, payment of cash dividends of \$6.0 million, and repayment of interest-bearing debt of \$1.1 million, partially offset by \$5.8 million received in connection with stock option exercises and \$1.9 million equity compensation income tax benefits. The cash usage for the First Nine Months of Fiscal 2006 was due to the use of \$64.5 million to purchase shares of the Company's common stock, payment of cash dividends of \$5.8 million, and net repayment of interest-bearing debt of \$2.4 million, partially offset by \$4.4 million received in connection with employee stock option exercises and \$1.1 million equity compensation income tax benefits.

Under the terms of its long-term debt agreements, the Company has agreed to certain financial covenants. At June 30, 2007 the Company was in compliance with the financial terms and conditions of its debt and credit facility agreements.

During the three and nine-month periods ended June 30, 2007, the Company purchased 108,000 and 783,206 shares of its common stock for \$4.5 million and \$30.4 million, respectively. During the three and nine-month periods ended July 1, 2006, the Company purchased 134,800 and 1,756,235 shares of its common stock for \$5.0 million and \$64.5 million, respectively.

Restructuring and Other Charges

In the fourth quarter of fiscal year 2005, the Company decided to exit its noise and vibration business. The Company assessed the recoverability of the assets associated with this business using an undiscounted cash flow methodology. Based on this assessment, the Company reduced the assets to their fair market value. In addition, the Company recorded employee severance costs and software development expense that will not repeat in future years.

16

Table of Contents

For the nine-month period ended June 30, 2007 and the fiscal year ended September 30, 2006, the Company's provisions and write-offs associated with this restructuring activity were as follows:

	Severance Charges (expressed in thousands)	Contract Termination Charges	Total
Balances at October 1, 2005	\$1,267	\$52	\$1,319
Provision	30		30
Write-off/payments	(1,257)	(52)	(1,309)
Balances at September 30, 2006	\$40	\$	\$40
Provision			
Write-off/payments	(40)		(40)
Balances at June 30, 2007	\$	\$	\$

Critical Accounting Policies

The Consolidated Financial Statements are prepared in accordance with U.S. generally accepted accounting principles, which require the Company to make estimates and assumptions in certain circumstances that affect amounts reported. In preparing these financial statements, management has made its best estimates and judgments of certain amounts, giving due consideration to materiality. The Company believes that of its significant accounting policies, the following are particularly important to the portrayal of the Company's results of operations and financial position, may require the application of a higher level of judgment by the Company's management, and as a result, are subject to an inherent degree of uncertainty. Further information is provided in Note 1 in the Condensed Notes to Consolidated Financial Statements in this Form 10-Q.

Revenue Recognition. Due to the diversity of its products, the Company is required to comply with a variety of technical accounting requirements in order to achieve consistent and accurate revenue recognition. This requires a certain amount of judgment in the evaluation of completed contract versus percentage-of-completion accounting, the determination of estimated costs to complete contracts, and evaluation of customer acceptance terms.

Inventories. The Company maintains a material amount of inventory to support its engineering and manufacturing operations, and a certain amount of judgment is required in determining the appropriate level of inventory valuation reserves. While the Company expects its sales to grow, a reduction in its sales could reduce the demand for the Company's products, and additional inventory valuation adjustments may be required.

Warranty Obligations. The Company is subject to warranty guarantees on sales of its products. A certain amount of judgment is required in determining appropriate reserve levels for anticipated warranty claims. While these reserve levels are based on historical warranty experience, they may not reflect the actual claims that will occur over the upcoming warranty period, and additional warranty reserves may be required.

Stock-Based Compensation. For purposes of determining estimated fair value of stock-based payment awards on the date of grant in accordance with Statement of Financial Accounting Standard (SFAS) No. 123R, Share-Based Payment, the Company utilizes a Black-Scholes option pricing model for estimating the fair value of stock option grants, which requires the input of certain assumptions requiring management judgment. Because the Company's employee stock option awards have characteristics significantly different from those of traded options, and because changes in the input assumptions can materially affect fair value estimates, existing models may not provide a reliable single measure of the fair value of employee stock options. Management will continue to assess the assumptions and methodologies used to calculate estimated fair value of stock-based compensation. Circumstances may change and additional data may become available over time that could result in changes to these assumptions and methodologies and thereby materially impact the fair value determination. If factors change and the Company employs different assumptions in the application of SFAS 123R in future periods, the compensation expense recorded under SFAS No. 123R may differ significantly from the stock-based compensation expense recorded in the current period. See Note 2 in the Condensed Notes to Consolidated Financial Statements in this Form 10-Q for more information regarding stock-based compensation.

New Accounting Principles

In July 2006, the FASB issued FIN No. 48, Accounting for Uncertainty in Income Taxes. FIN 48 defines the threshold for recognizing the benefits of tax positions in the financial statements as more-likely-than-not to be sustained upon examination. The interpretation also provides guidance on the de-recognition, measurement and classification of income tax uncertainties, along with any related interest and penalties. FIN 48 also includes guidance concerning accounting for income tax uncertainties in interim periods and increases the level of required disclosures associated with any recorded income tax uncertainties. The differences between the amounts recognized in the statements of financial position prior to the adoption of FIN 48 and the amounts reported after adoption are to be accounted for as a cumulative-effect adjustment recorded to the beginning balance of retained earnings. FIN 48 is effective for fiscal years beginning after December 15, 2006 and thus will be effective for the Company in fiscal year 2008. The Company is evaluating the impact of the adoption of FIN 48 on its consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements. SFAS No. 157 clarifies the principle that fair value should be based on the assumptions market participants would use when pricing an asset or liability and establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. Under this statement, fair value measurements are required to be separately disclosed, by level, within the fair value hierarchy. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007. The Company is evaluating the impact of the adoption of SFAS No. 157 on its consolidated financial statements.

In September 2006, the FASB issued SFAS No. 158, Employers' Accounting for Defined Benefit Pension and Other Post Retirement Plans, an Amendment of SFAS No. 87, Employers' Accounting for Pensions, SFAS No. 88, Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits, SFAS No. 106, Employers' Accounting for Postretirement Benefits Other Than Pensions, and SFAS No. 132(R), Employers' Disclosures about Pensions and Other Postretirement Benefits. SFAS No. 158 requires the recognition of the funded status of defined benefit pension and other post-retirement plans in the balance sheet, as well as the recognition as a component of other comprehensive income, net of tax, the gains or losses and prior service costs or credits that have yet to be recognized as components of net periodic retirement cost pursuant to SFAS No. 87 and SFAS No. 106. The provisions of SFAS No. 158 are effective as of the end of fiscal years ending after December 15, 2006. The adoption of SFAS No. 158 is not expected to have a material impact on the Company's

consolidated financial statements.

In September 2006, the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin (SAB) No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements. SAB No. 108 provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement. The SEC staff believes that registrants should quantify errors using both a balance sheet and an income statement approach and evaluate whether either approach results in quantifying a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. SAB No. 108 is effective as of the end of fiscal years ending after November 15, 2006. The adoption of SAB No. 108 is not expected to have a material impact on the Company's consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities. SFAS No. 159 allows entities to choose, at specified election dates, to measure eligible financial assets and liabilities at fair value in situations in which they are not otherwise required to be measured at fair value. If a company elects the fair value option for an eligible item, changes in that item's fair value in subsequent reporting periods must be recognized in current earnings. SFAS No. 159 also establishes presentation and disclosure requirements designed to draw comparison between entities that elect different measurement attributes for similar assets and liabilities. SFAS no. 159 is effective for fiscal years beginning after November 15, 2007. The Company is evaluating the impact of the adoption of SFAS No. 159 on its consolidated financial statements.

Other Matters

The Company is exposed to market risk from changes in foreign currency exchange rates and interest rates. The Company manages exposure to changes in foreign currency exchange rates through its regular operating and financing activities and through the use of foreign currency exchange contracts. These contracts are used to hedge the Company's overall exposure to exchange rate fluctuations, as the gains and losses on these contracts are intended to offset gains and losses on the Company's assets, liabilities, and cash flows.

The Company's dividend policy is to maintain a payout ratio that allows dividends to increase with the long-term growth of earnings per share, while sustaining dividends through economic cycles. The Company's dividend payout ratio target is approximately 25% of earnings per share over the long term.

Table of Contents

Forward-Looking Statements

Statements included or incorporated by reference in this Management's Discussion and Analysis of Financial Condition and Results of Operations, elsewhere in this Form 10-Q, and in the Company's press releases and oral statements made with the approval of an authorized executive officer, which are not historical or current facts are forward-looking statements, as defined in the Private Securities Litigation Reform Act of 1995, and are subject to certain risks and uncertainties that could cause actual results to differ materially from historical results and those presently anticipated or projected. The following important factors, among others, could affect the Company's actual results in the future and could cause the Company's actual financial performance to differ materially from that expressed in any forward-looking statements:

Edgar Filing: MTS SYSTEMS CORP - Form 10-Q

- (i) Possible significant volatility in backlog and/or quarterly operating results may result from the timing of individual large, fixed-price orders in connection with sales of Test segment systems.
- (ii) Order volumes and other operating considerations may be directly or indirectly impacted by economic conditions generally and/or in various geographic areas in which the Company operates. The Company derives significant revenue from the global ground vehicles and aerospace industries and therefore is subject to economic cycles affecting these customers.
- (iii) Export controls based on U.S. initiatives and foreign policy, as well as import controls imposed by foreign governments, may cause delays in certain shipments or the rejection of orders by the Company. Such delays could create material fluctuations in quarterly operating results and could have a material adverse effect on results of operations. Local political conditions and/or currency restrictions may also affect foreign revenue. Violation of export control laws or regulations could result in civil or criminal penalties applicable to the Company which, under some circumstances, could have a material adverse impact on the Company.
- (iv) Delays in realization of orders in backlog may occur due to technical difficulties or delays in export licensing approval or the customer's preparation of the installation site, any of which can affect the quarterly or annual period when backlog is recognized as revenue and could materially affect the results of any such period.
- (v) The Company experiences competition on a worldwide basis. Customers may choose to purchase equipment from the Company or from its competitors. For certain of the Company's products, customers may contract with testing laboratories or construct their own testing equipment from commercially available components. Factors that may influence a customer's decision include price, service, and required level of technology.
- (vi) The Company operates internationally and thus is subject to foreign currency exchange rate changes, which can affect its results of operations and financial condition.
- (vii) With regard to the Company's new product developments, there may be uncertainties concerning the expected results. In addition, the Company may not be aware of the introduction of new products or product enhancements by its competitors.
- (viii) The Company's short-term investments and borrowings carry floating interest rate risk. The Company has minimal earnings and cash flow exposure related to market risk on its long-term debt obligations as a result of the primarily fixed-rate nature of its debt.
- (ix) The Company relies on various raw material, component, and sub-assembly suppliers in its production processes and as such, business interruptions affecting these suppliers may cause delays in the Company's ability to convert its backlog of unfilled orders to revenue.

The foregoing list is not exhaustive, and the Company disclaims any obligation to revise any forward-looking statements to reflect new information, future events, or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The Company's investment portfolio at June 30, 2007 included \$98.1 million of cash and cash equivalents and \$5.8 million of short-term investments. The cash equivalent portion of the Company's investment portfolio is invested in money market funds and bank deposits. The short-term investment portfolio consisted of U.S. municipal bonds for which the interest rates are re-set every 7, 28, or 35 days in a market auction process such that yields typically reflect current market interest rates. Thus, changes in market interest rates will impact interest income on a current basis. A hypothetical 1.0 percentage point increase or decrease in market interest rates would have caused interest income to increase or decrease by \$0.8 million for the nine months ending June 30, 2007.

The Company operates internationally and is subject to foreign currency exchange rate fluctuations. A hypothetical 10% appreciation or depreciation in foreign currencies against the U.S. dollar, assuming all other variables were held constant, would have resulted in an estimated increase or decrease of \$13.3 million in revenue for the nine months ended June 30, 2007.

At June 30, 2007 the Company's long-term debt consisted of notes payable with fixed interest rates ranging from 6.6% to 7.5%. As such, interest rate fluctuations would not have an impact on the Company's interest expense or cash flows.

Item 4. Controls and Procedures

The Company's management, including the Chief Executive Officer and Chief Financial Officer, have conducted an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined under Rules 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934 (the "1934 Act")) as of June 30, 2007. Based on that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective in ensuring that information required to be disclosed by the Company in the reports it files or submits under the 1934 Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms.

There have been no changes in internal control over financial reporting during the fiscal quarter ended June 30, 2007 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

Reference is made to the disclosure under Item 1 of Part II in the Company's Form 10-Q for the quarterly period ended March 31, 2007.

Item 1A. Risk Factors

No material changes.

Table of Contents**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

Purchases of Company Equity Securities:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs
April 1, 2007 -				
May 5, 2007	36,000	\$38.73	36,000	777,032
May 6, 2007 -				
June 2, 2007	36,000	\$42.99	36,000	741,032
June 3, 2007 -				
June 30, 2007	36,000	\$43.39	36,000	705,032
Total	108,000	\$41.70	108,000	

The Company purchases Company common stock to offset dilution from new shares created by equity compensation such as stock options, restricted stock awards, and the employee stock purchase plan, and as a means of returning excess cash to shareholders. The Company executes all purchases in accordance with Rule 10b-18 of the Securities Exchange Act of 1934.

The Company's share purchases were executed under a 3.0 million share purchase authorization approved by the Company's Board of Directors and announced on August 25, 2005. Authority over pricing and timing under the program has been delegated to management. The program has no expiration date.
