#### Section 19 Disclosure

BlackRock Enhanced Capital and Income Fund, Inc. (CII) and BlackRock Preferred and Equity Advantage Trust (BTZ) (each a Fund and collectively, the Funds ), acting pursuant to a Securities and Exchange Commission (SEC) exemptive order and with the approval of each Fund's Board of Directors/Trustees (the Board), each have adopted a level distribution plan (the Plan) that is consistent with its investment objectives and policies. In adopting the Plan, each Fund employs either a managed distribution or option over-write policy to support a level distribution of income, capital gains and/or return of capital. In accordance with the Plans, the Funds currently distribute the following fixed amounts per share:

|                 | Amount Per   | Distribution |
|-----------------|--------------|--------------|
| Exchange Symbol | Common Share | Frequency    |
| CII             | \$0.485      | Quarterly    |
| BTZ             | \$0.100      | Monthly      |

The fixed amounts distributed per share are subject to change at the discretion of each Fund s Board. Under its Plan, each Fund will distribute all available investment income to its shareholders, consistent with its primary investment objectives and as required by the Internal Revenue Code of 1986, as amended (the Code ). If sufficient investment income is not available on a monthly/quarterly basis, the Funds will distribute long-term capital gains and/or return of capital to shareholders in order to maintain

a level distribution. Each monthly/quarterly distribution to shareholders is expected to be at the fixed amount established by the Board, except for extraordinary distributions and potential distribution rate increases or decreases to enable the Funds to comply with the distribution requirements imposed by the Code.

Shareholders should not draw any conclusions about the Fund s investment performance from the amount of these distributions or from the terms of the Plan. Each Fund s total return performance on net asset value is presented in its financial highlights table.

The Board may amend, suspend or terminate a Fund s Plan without prior notice if it deems such actions to be in the best interests of the Fund or its shareholders. The suspension or termination of the Plan could have the effect of creating a trading discount (if the Fund s stock is trading at or above net asset value) or widening an existing trading discount. The Funds are subject to risks that could have an adverse impact on their ability to maintain a level distribution. Examples of potential risks include, but are not limited to, economic downturns impacting the markets, decreased market volatility, companies suspending or decreasing corporate dividend distributions and changes in the Code. Please refer to each Fund s prospectus for a more complete description of its risks.

Please refer to Additional Information for a cumulative summary of the Section 19(a) notices for each Fund s current fiscal period. Section 19(a) notices for the Funds, as applicable, are available on the BlackRock website

www.blackrock.com.

2 SEMI-ANNUAL REPORT

## **Dear Shareholder**

The past 12 months reveal a tale of two markets one of investor pessimism and decided weakness, and another of optimism and some early signs of

recovery. The majority of the past year was characterized by the former as the global financial crisis erupted into the worst recession in decades. Economic

data were uniformly poor and daily headlines recounted the downfalls of storied financial firms, volatile swings in global financial markets, and monumental

government actions that included widespread (and globally coordinated) monetary and quantitative easing by central banks and large-scale fiscal stimuli.

Sentiment improved noticeably in March 2009, however, on the back of new program announcements by the Treasury and Federal Reserve Board, as well

as signs of improved economic performance, such as in retail sales, consumer confidence and select areas of the housing market.

Against this backdrop, US equities contended with unprecedented levels of volatility, posting steep declines early, and then pared some of those losses in

March and April. The experience in international markets was similar to that in the United States, though there was a marked divergence in regional perform-

ance. Notably, emerging economies, which lagged most developed regions through the downturn, were among the market leaders during the late-period rally.

In fixed income markets, while risk aversion remained a dominant theme overall, relatively attractive yields and distressed valuations, alongside a more

favorable macro environment, eventually captured investor attention, leading to a modest recovery in non-Treasury assets. A notable example from the

opposite end of the credit spectrum was the high yield sector, which generally outperformed in the first four months of 2009 after extraordinary challenges

and severe underperformance last year. At the same time, the new year ushered in a return to normalcy for the tax-exempt market, which had registered one

of its worst years on record in 2008.

All told, the major benchmark indexes posted mixed results for the current reporting period, reflective of a bifurcated market.

| Total Returns as of April 30, 2009                                | 6-month | 12-month |

On June 16, 2009, BlackRock, Inc. announced that it received written notice from Barclays PLC ( Barclays ) in which Barclays Board of Directors had

accepted BlackRock s offer to acquire Barclays Global Investors (BGI). Barclays also notified BlackRock that its Board will recommend the transaction to

Barclays shareholders for approval at a special meeting to be held in early August 2009. The combination of BlackRock and BGI will bring together market

leaders in active and index strategies to create the preeminent asset management firm. The transaction is expected to close in the fourth quarter 2009

following approval by Barclays shareholders, the receipt of client consents and regulatory approvals, and satisfaction of customary closing conditions.

Through periods of market turbulence, as ever, BlackRock s full resources are dedicated to the management of our clients assets. We thank you for entrusting

BlackRock with your investments and look forward to continuing to serve you in the months and years ahead.

Sincerely,

## Fund Summary as of April 30, 2009 BlackRock Broad Investment Grade 2009 Term Trust Inc.

#### **Investment Objective**

BlackRock Broad Investment Grade 2009 Term Trust Inc. (BCT) (the Fundseeks to manage a portfolio of fixed income securities that will return \$15 per

share (the initial public offering price per share) to investors on or about December 31, 2009 while providing high monthly income. No assurance can be

given that the Fund s investment objective will be achieved. As discussed in the performance commentary below, it is expected the Fund will return less than

\$15 per share. See Note 1 of the Notes to Financial Statements (Organization and Significant Accounting Policies).

#### Performance

For the six months ended April 30, 2009, the Fund returned (10.48)% based on market price and (9.84)% based on net asset value (NAV). For the same

period, the closed-end Lipper US Mortgage Funds category posted an average return of (1.09)% on a market price basis and (1.40)% on a NAV basis. All

returns reflect reinvestment of dividends. The Fund s discount to NAV, which widened during the period, accounts for the difference between performance

based on price and performance based on NAV. On June 3, 2009, the investment advisor and the Board of Trustees (the Board ) of the Fund announced

that the Fund will make its final liquidating distribution on or about October 30, 2009, instead of December 31, 2009. Based on the Fund s net assets,

prolonged adverse market conditions and investment opportunities currently available to the Fund, BlackRock and the Board believe it is in the investors

best interest to liquidate the Fund in advance of its scheduled date. At final liquidation, the Fund s shareholders will receive the net asset value of the Fund

at that time in one or more liquidating distributions, which is expected to be less than the Fund s initial offering price. The Fund remains focused on its

December 2009 maturity and is positioned accordingly. During the six months, we maintained the Fund s allocation to agency debt and corporate debt,

as well as to mortgage-backed securities (MBS). The exposure to MBS detracted from performance, while the allocation to corporates was beneficial. The

Fund maintained moderate levels of cash during the period, which did not significantly impact performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These

views are not intended to be a forecast of future events and are no guarantee of future results.

|                                                                           |               |

#### Leverage as of April 30, 2009<sup>3</sup>

<sup>1</sup> Yield on closing market price is calculated by dividing the current annualized distribution per share by the closing market price.

Past performance does not guarantee future

results.

<sup>2</sup> Effective November 2008, the Fund has discontinued its monthly distribution in an effort to meet its termination target of \$15.00.

<sup>3</sup> Represents reverse repurchase agreements as a percentage of total managed assets, which is the total assets of the Fund (including any assets

attributable to any borrowing that may be outstanding) minus the sum of accrued liabilities (other than debt representing financial leverage).

For a discussion of leveraging techniques utilized by the Fund, please see the Benefits and Risks of Leveraging on page 11.

The table below summarizes the changes in the Fund s market price and net asset value per share:

|                                            | 4/30/09             | 10/31/08   | Change   | High    | Low     |

## Fund Summary as of April 30, 2009 BlackRock Enhanced Capital and Income Fund, Inc.

#### **Investment Objective**

BlackRock Enhanced Capital and Income Fund, Inc. (CII) (the Fundseeks to provide investors with a combination of current income and capital

appreciation. The Fund seeks to achieve its investment objective by investing primarily in a diversified portfolio of common stocks in an attempt to

generate current income and by employing a strategy of writing (selling) call options on equity indexes in an attempt to generate gains from option

premiums primarily on the S&P 500 Index. No assurance can be given that the Fund s investment objective will be achieved.

The Board recently approved a change to the Fund s option writing policy. Please refer to page 65 in the General Information section.

#### Performance

For the six months ended April 30, 2009, the Fund returned 0.05% based on market price and 2.12% based on net asset value (NAV). For the same period, the benchmark S&P 500 Citigroup Value Index returned (14.39)%. All returns reflect reinvestment of dividends. The Fund s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The largest contributor to performance was the Fund s underweight exposure to the financials sector, which was a weak performer during the six months. Stock selection in healthcare, energy and industrials also was strong. Key individual contributors in healthcare were Schering-Plough Corp. and Wyeth, while BJ Services Co., Exxon Mobil Corp. and Halliburton Co. led within energy and industrials. The lack of ownership in General Electric Co. and Deere & Co. also was advantageous. The main detractor from performance was stock selection in the consumer discretionary sector. Key laggards included General Mills, Inc. and Kimberly-Clark Corp.,

which posted weak returns during the period.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These

views are not intended to be a forecast of future events and are no guarantee of future results.

#### SEMI-ANNUAL REPORT

## Fund Summary as of April 30, 2009 BlackRock Floating Rate Income Trust

#### **Investment Objective**

BlackRock Floating Rate Income Trust (BGT) (formerly BlackRock Global Floating Rate Income Trust) (the Fundseks to provide a high level of current

income and to seek the preservation of capital. The Fund seeks to achieve its objective by investing in a global portfolio of primarily floating and variable

rate securities. No assurance can be given that the Fund s investment objective will be achieved.

#### Performance

For the six months ended April 30, 2009, the Fund returned 16.00% based on market price and 5.03% based on net asset value (NAV). For the same

period, the closed-end Lipper Loan Participation Funds category posted an average return of 0.24% on a market price basis and (4.14)% on a NAV basis.

All returns reflect reinvestment of dividends. The Fund s discount to NAV, which narrowed during the period, accounts for the difference between performance

based on price and performance based on NAV. For the first two months of the reporting period, the high yield loan market was under extreme pressure

and lost 10.90%, as measured by the Barclays Capital High Yield Loan Index. However, this underperformance was followed by a strong first four months of

2009, in which the sector gained in excess of 20%. This resulted in positive market performance for the six months as a whole. During this time, the Fund

maintained a high level of leverage and focused on higher-quality sectors and structures, which benefited most during the market rally; these were the pri-

mary contributors to the Fund s outperformance of its Lipper peers. Conversely, conservative positioning hampered results during the sharp rally in the first

four months of 2009.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These

views are not intended to be a forecast of future events and are no guarantee of future results.

#### **6 SEMI-ANNUAL REPORT**

## Fund Summary as of April 30, 2009 BlackRock Preferred and Corporate Income Strategies Fund, Inc.

#### **Investment Objective**

BlackRock Preferred and Corporate Income Strategies Fund, Inc. (PSW) (the Fundseks to provide shareholders with high current income and capital

appreciation. The Fund seeks to achieve its objectives by investing primarily in a portfolio of preferred securities and debt securities, including convertible

securities that may be converted into common stock or other securities of the same or a different issuer. No assurance can be given that the Fund s invest-

ment objective will be achieved.

#### Performance

For the six months ended April 30, 2009, the Fund returned (11.81)% based on market price and (15.87)% based on net asset value (NAV). For the same period, the closed-end Lipper Income & Preferred Stock Funds category posted an average return of (5.69)% on a market price basis and (8.83)% on a NAV basis. All returns reflect reinvestment of dividends. The Fund s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The Fund s Lipper category contains both preferred and equity funds, both of which declined significantly through early March and rebounded sharply afterwards. Equities, as measured by the S&P 500 Index, lost 8.53% for the six months, while preferred securities, as measured by the Merrill Lynch Fixed Rate Preferred Index, lost 11.62%. Financial issues make up a significant percentage of the preferred market and, during the period, were highly correlated to financial equities, which significantly underperformed. Accordingly, the Fund s holdings of financials detracted from returns, as did relatively high levels of leverage. Due to adverse market conditions during the period, the Fund invested a higher than usual percentage of its assets in cash equivalent securities. This higher-than-normal allocation to cash helped performance for the six months.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These

views are not intended to be a forecast of future events and are no guarantee of future results.

APRIL 30, 2009

7

## Fund Summary as of April 30, 2009 BlackRock Preferred and Equity Advantage Trust

#### **Investment Objective**

BlackRock Preferred and Equity Advantage Trust (BTZ) (the Fundseeks to achieve high current income, current gains and capital appreciation. The

Fund will invest primarily in preferred and equity securities and derivatives with economic characteristics similar to individual or groups of equity securi-

ties. The Fund will seek to generate income through an allocation of Qualified Dividend Income-eligible preferreds, common stocks that generate qualified

dividend income and an index options strategy. No assurance can be given that the Fund s investment objective will be achieved.

#### Performance

For the six months ended April 30, 2009, the Fund returned (4.23)% based on market price and (8.73)% based on net asset value (NAV). For the same period, the closed-end Lipper Income & Preferred Stock Funds category posted an average return of (5.69)% on a market price basis and (8.83)% on a NAV basis. All returns reflect reinvestment of dividends. The Fund s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The Fund s Lipper category contains both preferred and equity funds, both of which declined significantly through early March and rebounded sharply afterwards. Equities, as measured by the S&P 500 Index, lost 8.53% for the six months, while preferred securities, as measured by the Merrill Lynch Fixed Rate Preferred Index, lost 11.62%. Financial issues make up a significant percentage of the preferred market and, during the period, were highly correlated to financial equities, which significantly underperformed. Accordingly, the Fund s holdings of financials detracted from returns, as did relatively high levels of leverage. Due to adverse market conditions during the period, the Fund invested a higher than usual percentage of its assets in cash equivalent securities. This higher-than-average allocation to cash, combined with options strategies used by the Fund to generate additional income, helped performance for the six months. #### **8 SEMI-ANNUAL REPORT**

## Fund Summary as of April 30, 2009 BlackRock Preferred Income Strategies Fund, Inc.

#### **Investment Objective**

BlackRock Preferred Income Strategies Fund, Inc. (PSY) (the Funds) eks to provide shareholders with current income and capital appreciation. The Fund

seeks to achieve its objectives by investing primarily in a portfolio of preferred securities, including convertible preferred securities that may be converted

into common stock or other securities of the same or a different issuer. No assurance can be given that the Fund s investment objective will be achieved.

#### Performance

For the six months ended April 30, 2009, the Fund returned (16.83)% based on market price and (17.88)% based on net asset value (NAV). For the same

period, the closed-end Lipper Income & Preferred Stock Funds category posted an average return of (5.69)% on a market price basis and (8.83)% on a

NAV basis. All returns reflect reinvestment of dividends. The Fund s premium to NAV, which widened during the period, accounts for the difference between

performance based on price and performance based on NAV. The Fund s Lipper category contains both preferred and equity funds, both of which declined

significantly through early March and rebounded sharply afterwards. Equities, as measured by the S&P 500 Index, lost 8.53% for the six months, while

preferred securities, as measured by the Merrill Lynch Fixed Rate Preferred Index, lost 11.62%. Financial issues make up a significant percentage of the

preferred market and, during the period, were highly correlated to financial equities, which significantly underperformed. Accordingly, the Fund s holdings of

financials detracted from returns, as did relatively high levels of leverage. Due to adverse market conditions during the period, the Fund invested a higher

than usual percentage of its assets in cash equivalent securities. This higher-than-normal allocation to cash helped performance for the six months.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These

views are not intended to be a forecast of future events and are no guarantee of future results.

#### SEMI-ANNUAL REPORT

## Fund Summary as of April 30, 2009 BlackRock Preferred Opportunity Trust

#### **Investment Objective**

BlackRock Preferred Opportunity Trust (BPP) (the Fundseeks high current income consistent with capital preservation by investing primarily in preferred

securities. No assurance can be given that the Fund s investment objective will be achieved.

#### Performance

For the six months ended April 30, 2009, the Fund returned (7.59)% based on market price and (15.77)% based on net asset value (NAV). For the same

period, the closed-end Lipper Income & Preferred Stock Funds category posted an average return of (5.69)% on a market price basis and (8.83)% on a

NAV basis. All returns reflect reinvestment of dividends. The Fund moved from a discount to NAV to a premium by period-end, which accounts for the differ-

ence between performance based on price and performance based on NAV. The Fund s Lipper category contains both preferred and equity funds, both of

which declined significantly through early March and rebounded sharply afterwards. Equities, as measured by the S&P 500 Index, lost 8.53% for the six

months, while preferred securities, as measured by the Merrill Lynch Fixed Rate Preferred Index, lost 11.62%. Financial issues make up a significant per-

centage of the preferred market and, during the period, were highly correlated to financial equities, which significantly underperformed. Accordingly, the

Fund s holdings of financials detracted from returns, as did relatively high levels of leverage. Due to adverse market conditions during the period, the Fund

invested a higher than usual percentage of its assets in cash equivalent securities. This higher-than-average allocation to cash helped performance for the

six months.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These

views are not intended to be a forecast of future events and are no guarantee of future results.

|                     | Symbol on New York Stock Exchange                                        | BPP               |
|                     | Initial Offering Date                                                    | February 28, 2003 |
|                     | Yield on Closing Market Price as of April 30, 2009 (\$7.08) <sup>1</sup> | 17.80%            |
|                     | Current Monthly Distribution per Common Share <sup>2</sup>               | \$0.105           |
|                     | Current Annualized Distribution per Common Share <sup>2</sup>            | \$1.260           |
|                     | Leverage as of April 30, 2009 <sup>3</sup>                               | 40%               |

<sup>1</sup> Yield on closing market price is calculated by dividing the current annualized distribution per share by the closing market price. Past performance does not guarantee future results.

<sup>2</sup> The Monthly Distribution per Common Share, declared on June 1, 2009, was decreased to \$0.0725. The Yield on Closing Market Price, Current Monthly Distribution per Common Share and Current Annualized Distribution per Common Share do not reflect the new distribution rate. The new distribution rate is not constant and is subject to further change in the future. A portion of the distribution may be deemed a tax return of capital or

#### net realized gain.

<sup>3</sup> Represents reverse repurchase agreements and Preferred Shares as a percentage of total managed assets, which is the total assets of the Fund (including any assets attributable to any borrowing that may be outstanding and Preferred Shares) minus the sum of accrued liabilities (other than debt representing financial leverage). For a discussion of leveraging techniques utilized by the Fund, please see the Benefits and Risks of Leveraging

on page 11.

The table below summarizes the changes in the Fund s market price and net asset value per share:

|                 | 4/30/09 | 10/31/08 | Change   | High    | Low    |
|-----------------|---------|----------|----------|---------|--------|
| Market Price    | \$7.08  | \$8.51   | (16.80)% | \$10.18 | \$4.00 |
| Net Asset Value | \$6.65  | \$8.77   | (24.17)% | \$ 9.05 | \$5.06 |

**10 SEMI-ANNUAL REPORT** 

## The Benefits and Risks of Leveraging

The Funds may utilize leverage to seek to enhance the yield and NAV of their Common Shares. However, these objectives cannot be achieved in all interest rate environments.

To leverage, BlackRock Floating Rate Income Trust, BlackRock Preferred and Corporate Income Strategies Fund, Inc., BlackRock Preferred and Equity Advantage Trust, BlackRock Preferred Income Strategies Fund, Inc. and BlackRock Preferred Opportunity Trust issue Preferred Shares, which pay dividends at prevailing short-term interest rates. In addition, certain Funds may utilize leverage through borrowings or issuance of short-term securities. In general, the concept of leveraging is based on the premise that the cost of assets to be obtained from leverage will be based on short-term interest rates, which normally will be lower than the income earned by each Fund on its longer-term portfolio investments. To the extent that the total assets of each Fund (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Fund s Common Shareholders will benefit from the incremental yield.

The interest earned on securities purchased with the proceeds from leverage is paid to Common Shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV of each Fund s Common Shares. However, in order to benefit Common Shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. If the yield curve becomes negatively sloped, meaning short-term interest rates exceed long-term interest rates, returns to Common Shareholders will be lower than if the Funds had not used leverage.

To illustrate these concepts, assume a Fund s Common Shares capitalization is \$100 million and it issues Preferred Shares for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are 3% and longterm interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Fund pays dividends on the \$50 million of Preferred Shares based on the lower short-term interest rates. At the same time, the Fund s total portfolio of \$150 million earns the income based on long-term interest rates. In this case, the dividends paid to Preferred Shareholders are significantly lower than the income earned on the fund s long-term investments, and therefore the Common Shareholders are the beneficiaries of the incremental yield.

Conversely, if prevailing short-term interest rates rise above long-term interest rates of 6%, the yield curve has a negative slope. In this case, the Fund pays dividends on the higher short-term interest rates whereas the Fund s total portfolio earns income based on lower long-term interest rates. If shortterm interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental yield pickup on the Common Shares will be reduced or eliminated completely. Furthermore, the value of the Fund s portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Fund s Preferred Shares does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Fund s NAV positively or negatively in addition to the impact on Fund performance from leverage from debt securities.

The use of leverage may enhance opportunities for increased returns to the Fund and Common Shareholders, but as described above, they also create risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in a Fund s NAV, market price and dividend rate than a comparable portfolio without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Fund s net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, the Fund s net income will be less than if leverage had not been used, and therefore the amount available for distribution to shareholders will be reduced. The Fund may be required to sell portfolio securities at inopportune times or below fair market values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments which may cause a Fund to incur losses. The use of leverage may limit a Fund s ability to invest in certain types of securities or use certain types of hedging strategies, such as in the case of certain restrictions imposed by ratings agencies that rate preferred shares issued by the Fund. The Fund will incur expenses in connection with the use of leverage, all of which are borne by the holders of the Common Shares and may reduce returns on the Common Shares.

Under the Investment Company Act of 1940, the Funds are permitted to issue Preferred Shares in an amount of up to 50% of their total managed assets at the time of issuance. Under normal circumstances, each Fund anticipates that the total economic leverage from Preferred Shares, reverse repurchase agreements and credit facility borrowings will not exceed 50% of its total managed assets at the time such leverage is incurred. As of April 30, 2009, the Funds had economic leverage from Preferred Shares, reverse repurchase agreements and/or credit facility borrowings as a percentage of their total managed assets as follows:

|                                                               | Percent of |
|---------------------------------------------------------------|------------|
|                                                               | Leverage   |
| BlackRock Broad Investment Grade 2009 Term Trust Inc          | 6%         |
| BlackRock Floating Rate Income Trust                          | 32%        |
| BlackRock Preferred and Corporate Income Strategies Fund, Inc | 44%        |
| BlackRock Preferred and Equity Advantage Trust                | 39%        |
| BlackRock Preferred Income Strategies Fund, Inc               | 43%        |
| BlackRock Preferred Opportunity Trust                         | 40%        |

#### **Derivative Instruments**

The Funds may invest in various derivative instruments, including swap agreements, futures and forward currency contracts, and other instruments specified in the Notes to Financial Statements, which constitute forms of economic leverage. Such instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market and/or interest rate risks. Such derivative instruments involve risks, including the imperfect correlation between the value of a derivative instrument and the underlying asset, possible default of the other party to the transaction and illiquidity of the derivative instrument. The Funds ability

to successfully use a derivative instrument depends on the Advisor s ability to accurately predict pertinent market movements, which cannot be assured. The use of derivative instruments may result in losses greater than if they had not been used, may require the Funds to sell or purchase portfolio securities at inopportune times or for prices other than current market values, may limit the amount of appreciation the Funds can realize on an investment or may cause the Funds to hold a security that it might otherwise sell. The Funds investments in these instruments are discussed in detail in the Notes to Financial Statements.

#### Total

(a) Fund pays floating interest rate and receives fixed rate.

Effective November 1, 2008, the Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstance, to the extent observable inputs are not available (including the Fund s own assumptions used in determining the fair value of investments) The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Fund s policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements. The following table summarizes the inputs used as of April 30, 2009 in determining the fair valuation of the Fund s investments:

| Valuation | Investments in | Other Fina | ncial          |
|-----------|----------------|------------|----------------|
| Inputs    | Securities     | Instrume   | nts*           |
|           | Assets         | Assets     | Liabilities    |
| Level 1   | \$ 2,780,000   |            | \$ (247,416)   |
| Level 2   | 32,244,022     | \$ 91,865  | (2,272,644)    |
| Level 3   | 1,181,560      |            |                |
| Total     | \$ 36,205,582  | \$ 91,865  | \$ (2,520,060) |

\* Other financial instruments are reverse repurchase agreements, futures and swap contracts. Reverse repurchase agreements are shown at market value. Futures and swap contracts are valued at the unrealized appreciation/ depreciation on the instrument.

The following is a reconciliation of investments for unobservable inputs (Level 3) used in determining fair value:

Securities
