2 SEMI-ANNUAL REPORT

OCTOBER 31, 2010

# Dear Shareholder

The global economic recovery that began in 2009 has continued on its choppy course this year, delivering mixed but slowly improving economic data and

gradual if uneven improvement of investor sentiment. The risks of a double-dip recession continue to recede, but the economy remains mired in a slow-

growth environment. In the United States, the National Bureau of Economic Research declared that the Great Recession ended in June 2009. Spanning

December 2007 to June 2009, this marked the longest reported recession since the Great Depression. Structural problems of ongoing deleveraging and

weak spending among businesses and households weigh heavily on the pace of economic growth. The unemployment rate remains stubbornly high in the

face of sluggish job gains in the private sector. The US dollar, along with other developed market currencies, has experienced devaluation resulting from

aggressively easy monetary and fiscal policies. Given these long-standing conditions, the Federal Reserve Board has announced that additional policy

action will be taken to combat deflation and unemployment and promote economic growth.

The high levels of volatility experienced in global equity markets throughout 2009 continued into 2010 as mixed economic data and lingering credit issues

caused stocks to trade in both directions, but by the end of the first quarter, most markets had managed to post gains. The second quarter, in contrast,

brought higher levels of volatility and a flight to quality as investor sentiment was dominated by fears of a double-dip recession. Global equity markets saw

negative quarterly returns and for many markets, the first significant downturn since the bull market began in March 2009. In the third quarter, economic

data turned less negative and strong corporate earnings reports became increasingly consistent. These factors, along with attractive valuations and expec-

tations for additional quantitative easing, drove equity markets higher, with most markets recapturing their second quarter losses. Stocks continued their

rally into the beginning of the fourth quarter, closing out the 12-month period in positive territory. International equities posted gains on both a six- and

12-month basis. In the United States, both large and small cap equities posted robust gains for the 12-month period, while on a six-month basis, large

cap stocks remained relatively flat and small caps turned slightly negative.

In fixed income markets, yields fluctuated but declined significantly over the past 12 months amid heightened uncertainty. Weak economic data, lingering

credit problems and, near the end of the period, the expectation of additional quantitative easing drove interest rates lower and bond prices higher.

Treasuries rallied over the period, modestly outperforming the credit spread sectors of the market. Corporate credit spreads benefited from the low interest

rate environment and high yield fixed income became increasingly attractive due to declining default rates and better-than-expected results on European

bank stress tests. Tax-exempt municipal bonds performed well over the 12-month period, driven primarily by technical factors including favorable supply-

### and-demand dynamics.

Cash investments, as represented by the 3-month Treasury bill, returned only a fraction over 0% for the 12-month period as short-term interest rates

remained low. Yields on money market securities remain near all-time lows.

Against this backdrop, the major market averages posted the following returns:

Total Returns as of October 31, 2010	6-month	12-month
US large cap equities (S&P 500 Index)	0.74%	16.52%
US small cap equities (Russell 2000 Index)	(1.24)	26.58
International equities (MSCI Europe, Australasia, Far East Index)	5.74	8.36
3-month Treasury bill (BofA Merrill Lynch 3-Month Treasury Bill Index)	0.08	0.12
US Treasury securities (BofA Merrill Lynch 10-Year US Treasury Index)	10.63	10.03
US investment grade bonds (Barclays Capital US Aggregate Bond Index)	5.33	8.01
Tax-exempt municipal bonds (Barclays Capital Municipal Bond Index)	3.95	7.78
US high yield bonds (Barclays Capital US Corporate High Yield 2% Issuer Capped Index)	6.73	19.10

# Trust Summary as of October 31, 2010

# BlackRock Investment Quality Municipal Trust Inc.

### **Trust Overview**

BlackRock Investment Quality Municipal Trust Inc. s (BKN) (the Trustryestment objective is to provide high current income exempt from regular federal

income tax consistent with the preservation of capital. The Trust seeks to achieve its investment objective by investing at least 80% of its assets in municipal

obligations exempt from federal income taxes (except that the interest may be subject to the federal alternative minimum tax). Under normal market condi-

tions, the Trust invests at least 80% of its assets in securities rated investment grade at the time of investment. The Trust may invest directly in such securi-

ties or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

### Performance

For the six months ended October 31, 2010, the Trust returned 9.33% based on market price and 8.11% based on net asset value ( NAV ). For the same period, the closed-end Lipper General Municipal Debt Funds (Leveraged) category posted an average return of 7.68% based on market price and 6.42% based on NAV. All returns reflect reinvestment of dividends. The Trust's premium to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. The Trust benefited from its moderately long duration (sensitivity to interest rates) relative to its Lipper category and fully invested posture (low cash balance) as bond prices rallied in the declining interest rate environment. The bond rally had a particularly strong impact on the Trust s recently purchased new-issue discount coupon bonds, which had been structured with the goal of creating greater potential for price appreciation when interest rates fall. The Trust s exposure to traditionally higher yielding sectors, including health, housing and corporate-related debt, enhanced performance as credit quality spreads tightened during the period. Conversely, the Trust s exposure to traditionally higher quality sectors, including tax-backed (state, county, city and school district), utilities and pre-refunded debt, detracted from performance as these sectors experienced weak demand while investors sought yield. In addition, the Trust s holdings of pre-refunded bonds had limited upward price movement in the declining interest rate environment due to their shorter maturity structure. The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These

views are not intended to be a forecast of future events and are no guarantee of future results.

**4 SEMI-ANNUAL REPORT** 

OCTOBER 31, 2010

# Trust Summary as of October 31, 2010

# BlackRock Long-Term Municipal Advantage Trust

### **Trust Overview**

BlackRock Long-Term Municipal Advantage Trust s (BTA) (the Trustryestment objective is to provide current income exempt from regular federal income

tax. The Trust seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in municipal obligations and

derivative instruments with exposure to such municipal obligations, in each case that are exempt from federal income tax (except that the interest may be

subject to the federal alternative minimum tax). The Trust invests, under normal market conditions, primarily in long-term municipal bonds with a maturity of

more than ten years at the time of investment and, under normal market conditions, the Trust's municipal bond portfolio will have a dollar-weighted average

maturity of greater than 10 years. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

### Performance

For the six months ended October 31, 2010, the Trust returned 9.74% based on market price and 6.61% based on NAV. For the same period, the closed-

end Lipper General Municipal Debt Funds (Leveraged) category posted an average return of 7.68% based on market price and 6.42% based on NAV. All

returns reflect reinvestment of dividends. The Trust's discount to NAV, which narrowed during the period, accounts for the difference between performance

based on price and performance based on NAV. The following discussion relates to performance based on NAV. The Trust s outperformance relative to its

Lipper category was driven by sector allocation, particularly with respect to concentrations in health, education, and housing, all of which continued to

perform well during the period. The Trust s focus on lower quality credits had a positive impact due to the ongoing contraction of credit quality spreads. In

addition, the Trust s modestly long portfolio duration (sensitivity to interest rates) relative to the Lipper category average proved beneficial in the declining

interest rate environment. Conversely, a concentration of holdings in longer dated issues detracted from performance as the intermediate range of the yield

curve outperformed the longer end of the curve.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These

views are not intended to be a forecast of future events and are no guarantee of future results.

# Trust Summary as of October 31, 2010

# BlackRock Municipal 2020 Term Trust

### **Trust Overview**

BlackRock Municipal 2020 Term Trust s (BKK) (the Trustive) stment objectives are to provide current income exempt from regular federal income tax

and to return \$15 per Common Share (the initial offering price per Common Share) to holders of Common Shares on or about December 31, 2020. The

Trust seeks to achieve its investment objectives by investing, under normal market conditions, at least 80% of its assets in municipal bonds exempt from

federal income taxes (except that the interest may be subject to the federal alternative minimum tax). The Trust invests, under normal market conditions, at

least 80% of its assets in municipal bonds that are investment grade quality at the time of investment. The Trust may invest directly in such securities or

synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

### Performance

For the six months ended October 31, 2010, the Trust returned 5.85% based on market price and 7.35% based on NAV. For the same period, the closed-end

Lipper General Municipal Debt Funds (Leveraged) category posted an average return of 7.68% based on market price and 6.42% based on NAV. All returns

reflect reinvestment of dividends. The Trust's premium to NAV, which narrowed during the period, accounts for the difference between performance based on

price and performance based on NAV. The following discussion relates to performance based on NAV. The Trust benefited from declining interest rates pushing

bond prices higher during the period. Although the Trust has a generally shorter maturity profile relative to its Lipper category, its positioning in the intermediate

range of the yield curve had a positive impact as it outperformed the longer end of the curve. Also contributing to performance was an allocation to longer

maturities in the high yield sector, which performed well. The Trust s concentrations in health and corporate-related debt also enhanced performance as these

sectors performed well during the period. While the Trust s holdings of pre-refunded and escrowed issues continued to provide attractive yields on a book value

basis, their shorter maturity structure limited their upward price movement in the declining interest rate environment, hindering relative performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These

views are not intended to be a forecast of future events and are no guarantee of future results.

# Trust Summary as of October 31, 2010

# BlackRock Pennsylvania Strategic Municipal Trust

### **Trust Overview**

BlackRock Pennsylvania Strategic Municipal Trust s (BPS) (the Trustivestment objectives are to provide current income that is exempt from regular

federal and Pennsylvania income taxes and to invest in municipal bonds that over time will perform better than the broader Pennsylvania municipal bond

market. The Trust seeks to achieve its investment objective by investing, under normal market conditions, primarily in municipal bonds exempt from federal

income taxes (except that the interest may be subject to the federal alternative minimum tax) and Pennsylvania income taxes. The Trust invests, under nor-

mal market conditions, at least 80% of its assets in municipal bonds that are investment grade quality at the time of investment. The Trust may invest

directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

### Performance

For the six months ended October 31, 2010, the Trust returned 7.74% based on market price and 6.63% based on NAV. For the same period, the closed-

end Lipper Pennsylvania Municipal Debt Funds category posted an average return of 9.65% based on market price and 5.84% based on NAV. All returns

reflect reinvestment of dividends. The Trust's premium to NAV, which widened during the period, accounts for the difference between performance based on

price and performance based on NAV. The following discussion relates to performance based on NAV. The Trust benefited from its duration and positioning

on the yield curve as the portfolio was constructed to benefit from declining interest rates. The tax-exempt municipal market in general benefited from the

Build America Bond Program, which alleviated supply pressure in the tax-exempt space, especially on the long end of the yield curve. The Trust s holdings of

health and housing bonds contributed positively to performance as credit quality spreads generally tightened in these sectors during the period. Detracting

from performance was the Trust s exposure to bonds with short call features, which did not fully benefit from the price appreciation that occurred among

**Trust Information** 

bonds with longer call dates and non-callable bonds.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These

8 SEMI-ANNUAL REPORT

OCTOBER 31, 2010

# Trust Summary October 31, 2010

# **BlackRock Strategic Municipal Trust**

### **Trust Overview**

BlackRock Strategic Municipal Trust s (BSD) (the Trustryestment objective is to provide current income that is exempt from regular federal income tax

and to invest in municipal bonds that over time will perform better than the broader municipal bond market. The Trust seeks to achieve its investment objec-

tive by investing, primarily in municipal bonds exempt from federal income taxes (except that the interest may be subject to the federal alternative minimum

tax). Under normal market conditions, the Trust expects to be fully invested (at least 95% of its net assets) in securities exempt from regular federal income

taxes. The Trust invests at least 80% of its assets in investment grade quality securities at the time of investment and, under normal market conditions, pri-

marily invests in municipal bonds with long-term maturities in order to maintain a weighted average maturity of 15 years or more. The Trust may invest

directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

### Performance

For the six months ended October 31, 2010, the Trust returned 7.48% based on market price and 6.83% based on NAV. For the same period, the closed-

end Lipper General Municipal Debt Funds (Leveraged) category posted an average return of 7.68% based on market price and 6.42% based on NAV. All

returns reflect reinvestment of dividends. The Trust moved from a discount to NAV to a premium by period end, which accounts for the difference between

performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. The Trust s outperformance

relative to its Lipper category was driven by sector allocation, particularly with respect to concentrations in health, transportation, and corporate-related

debt, all of which continued to perform well during the period. The Trust s focus on lower quality credits had a positive impact due to the ongoing contraction

of credit quality spreads. In addition, the Trust s modestly long portfolio duration (sensitivity to interest rates) relative to the Lipper category average proved

beneficial in the declining interest rate environment. Conversely, a concentration of holdings in longer dated issues detracted from performance as the

intermediate range of the yield curve outperformed the longer end of the curve.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These

views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT

OCTOBER 31, 2010

# The Benefits and Risks of Leveraging

The Trusts may utilize leverage to seek to enhance the yield and NAV of their Common Shares. However, these objectives cannot be achieved in all interest rate environments.

To leverage, all the Trusts, except for BTA, issue Preferred Shares, which pay dividends at prevailing short-term interest rates, and invest the proceeds in long-term municipal bonds. In general, the concept of leveraging is based on the premise that the cost of assets to be obtained from leverage will be based on short-term interest rates, which normally will be lower than the income earned by each Trust on its longer-term portfolio investments. To the extent that the total assets of each Trust (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Trust s Common Shareholders will benefit from the incremental net income.

To illustrate these concepts, assume a Trust s Common Shares capitalization is \$100 million and it issues Preferred Shares for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are 3% and longterm interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Trust pays dividends on the \$50 million of Preferred Shares based on the lower short-term interest rates. At the same time, the securities purchased by the Trust with assets received from Preferred Shares issuance earn the income based on long-term interest rates. In this case, the dividends paid to Preferred Shareholders are significantly lower than the income earned on the Trust s long-term investments, and therefore the Common Shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between shortterm and long-term interest rates, the incremental net income pickup on the Common Shares will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates of 6%, the yield curve has a negative slope. In this case, the Trust pays dividends on the higher short-term interest rates whereas the Trust s total portfolio earns income based on lower long-term interest rates.

Furthermore, the value of a Trust s portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Trust s Preferred Shares does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Trust s NAV positively or negatively in addition to the impact on Trust performance from leverage from Preferred Shares discussed above.

The Trusts may also leverage their assets through the use of tender option bond ( TOB ) programs, as described in Note 1 of the Notes to Financial Statements. TOB investments generally will provide the Trusts with economic benefits in periods of declining short-term interest rates, but expose the Trusts to risks during periods of rising short-term interest rates similar to

those associated with Preferred Shares issued by the Trusts, as described above. Additionally, fluctuations in the market value of municipal bonds deposited into the TOB trust may adversely affect each Trust s NAVs per share.

The use of leverage may enhance opportunities for increased income to the Trusts and Common Shareholders, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Trusts NAV, market price and dividend rate than a comparable portfolio without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Trusts net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Trust s net income will be less than if leverage had not been used, and therefore the amount available for distribution to Common Shareholders will be reduced. Each Trust may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause a Trust to incur losses. The use of leverage may limit each Trust s ability to invest in certain types of securities or use certain types of hedging strategies, such as in the case of certain restrictions imposed by ratings agencies that rate Preferred Shares issued by the Trusts. Each Trust will incur expenses in connection with the use of leverage, all of which are borne by Common Shareholders and may reduce income to the Common Shares.

Under the Investment Company Act of 1940, the Trusts are permitted to issue Preferred Shares in an amount of up to 50% of their total managed assets at the time of issuance. Under normal circumstances, each Trust anticipates that the total economic leverage from Preferred Shares and/or TOBs will not exceed 50% of its total managed assets at the time such leverage is incurred. As of October 31, 2010, the Trusts had economic leverage from Preferred Shares and/or TOBs as a percentage of their total managed assets as follows:

	Percent of
	Leverage
BKN	36%
ВТА	36%
ВКК	37%
BFK	36%
BPS	41%
BSD	37%

Doroont of

# **Derivative Financial Instruments**

The Trusts may invest in various derivative instruments, including financial futures contracts, as specified in Note 2 of the Notes to Financial Statements, which may constitute forms of economic leverage. Such instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market and/or interest rate risks. Such derivative instruments involve risks, including the imperfect correlation between the value of a derivative instrument and the underlying asset or illiquidity of the derivative instrument. The Trusts ability to successfully use a derivative instrument depends on the investment advisor s ability to accu-

rately predict pertinent market movements, which cannot be assured. The use of derivative instruments may result in losses greater than if they had not been used, may require the Trusts to sell or purchase portfolio investments at inopportune times or for distressed values, may limit the amount of appreciation the Trusts can realize on an investment, may result in lower dividends paid to shareholders or may cause the Trusts to hold an investment that they might otherwise sell. The Trusts investments in these instruments are discussed in detail in the Notes to Financial Statements.

Tax-Exempt Fund

Fair Value Measurements Various inputs are used in determining the fair value of investments, which are as follows:

7,659,955

Level 1 price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for

\$3,824

similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments) The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements. The following table summarizes the inputs used as of October 31, 2010 in determining the fair valuation of the Trust s investments:

otal
222,655
375,347

OCTOBER 31, 2010

# Schedule of Investments (concluded)

### BlackRock Long-Term Municipal Advantage Trust (BTA)

Fair Value Measurements Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments) The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements. The following table summarizes the inputs used as of October 31, 2010 in determining the fair valuation of the Trust s investments:

Valuation Inputs	Level 1	Level 2	Level 3	Total
Assets:				
Investments in Securities:				
Long-Term				
Investments <sup>1</sup>		\$241,268,600		\$241,268,600
Short-Term				
Securities	\$ 83,302			83,302
Total	\$ 83,302	\$241,268,600		\$241,351,902

<sup>1</sup> See above Schedule of Investments for values in each state or political subdivision.

\* The cost and unrealized appreciation (depreciation) of investments as of October 31,

2010, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$464,632,278
Gross unrealized appreciation	\$ 21,579,105
Gross unrealized depreciation	(11,206,953)
Net unrealized appreciation	\$ 10,372,152

(a) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.

(b) US government securities, held in escrow, are used to pay interest on this security as well as to retire the bond in full at the date indicated, typically at a premium to par.

(c) Issuer filed for bankruptcy and/or is in default of interest payments.

(d) Non-income producing security.

(e) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.

(f) Security represents a beneficial interest in a trust. The collateral deposited into the trust is federally tax-exempt revenue bonds issued by various state or local governments, or their respective agencies or authorities. The security is subject to remarketing prior to its stated maturity.

(g) Security is perpetual in nature and has no stated maturity date.

(h) Variable rate security. Rate shown is as of report date.

(i) Securities represent bonds transferred to a tender option bond trust in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.
(j) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

	Shares Held at		Shares Held at		
	April 30,	Net	October 31,		
Affiliate	2010	Activity	2010	Income	
FFI Institutional					
Tax-Exempt Fund	1,901,695	15,743,379	17,645,074	\$3,867	

(k) Represents the current yield as of report date.

See Notes to Financial Statements.

22 SEMI-ANNUAL REPORT

OCTOBER 31, 2010

# Schedule of Investments (concluded)

### BlackRock Municipal 2020 Term Trust (BKK)

Fair Value Measurements Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments) The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements. The following table summarizes the inputs used as of October 31, 2010 in determining the fair valuation of the Trust s investments:

Valuation Inputs	Level 1	Level 2	Level 3	Total
Assets:				
Investments in Securities:				
Long-Term				
Investments <sup>1</sup>		\$461,109,356		\$461,109,356
Short-Term				
Securities	\$ 17,645,074			17,645,074
Total	\$ 17,645,074	\$461,109,356		\$478,754,430

<sup>1</sup> See above Schedule of Investments for values in each state or political subdivision.

See Notes to Financial Statements.

\* The cost and unrealized appreciation (depreciation) of investments as of October 31,

2010, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 850,076,689
Gross unrealized appreciation	\$ 41,261,813
Gross unrealized depreciation	(25,344,088)
Net unrealized appreciation	\$ 15,917,725

(a) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.

(b) US government securities, held in escrow, are used to pay interest on this security as

well as to retire the bond in full at the date indicated, typically at a premium to par.

(c) Issuer filed for bankruptcy and/or is in default of interest payments.

(d) Non-income producing security.

(e) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.

(f) Security represents a beneficial interest in a trust. The collateral deposited into the trust is federally tax-exempt revenue bonds issued by various state or local governments, or their respective agencies or authorities. The security is subject to remarketing prior to its stated maturity.

(g) Variable rate security. Rate shown is as of report date.

(h) Securities represent bonds transferred to a tender option bond trust in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.
(i) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

	Shares Held at		Shares Held at	
	April 30,	Net	October 31,	
Affiliate	2010	Activity	2010	Income
FFI Institutional				
Tax-Exempt Fund	22,810,780	(19,963,236)	2,847,544	\$ 7,290

(j) Represents the current yield as of report date.

Fair Value Measurements Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments) The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements. The following table summarizes the inputs used as of October 31, 2010 in determining the fair valuation of the Trust s investments:

Valuation Inputs	Level 1	Level 2	Level 3	Total
Assets:				
Investments in Securities:				
Long-Term				

Investments <sup>1</sup>		\$938,329,017	\$938,329,017
Short-Term			
Securities	\$ 2,847,544		2,847,544
Total	\$ 2,847,544	\$938,329,017	\$941,176,561

 $^{1}$  See above Schedule of Investments for values in each state or political subdivision.

* The cost and unrealized appreciation (depreciation) of investments as of October 31, 2010, as computed for federal income tax purposes, were as follows:		
Aggregate cost		\$ 43,388,703
Gross unrealized appreciation		\$ 2,189,048
Gross unrealized depreciation		(431,239)

(a) Variable rate security. Rate shown is as of report date.

Net unrealized appreciation

(b) When-issued security. Unsettled when-issued transactions were as follows:

		Unrealized	
		Appreciation	
Counterparty	Value	(Depreciation)	
Merrill Lynch & Co., Inc.	\$ 404,856	\$ (600)	
Pershing LLC	\$ 198,882	\$ 270	

(c) US government securities, held in escrow, are used to pay interest on this security as well as to retire the bond in full at the date indicated, typically at a premium to par.(d) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.

(e) Security represents a beneficial interest in a trust. The collateral deposited into the trust is federally tax-exempt revenue bonds issued by various state or local governments, or their respective agencies or authorities. The security is subject to remarketing prior to its stated maturity.

(f) Securities represent bonds transferred to a tender option bond trust in exchange

\$ 1,757,809

for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.

See Notes to Financial Statements.

## Schedule of Investments (concluded)

#### BlackRock Pennsylvania Strategic Municipal Trust (BPS)

(g) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

	Shares Held at		Shares Held at	
	April 30,	Net	October 31,	
Affiliate	2010	Activity	2010	Income
BIF Pennsylvania				
Municipal Money				
Fund	455,164	950,361	1,405,525	

(h) Represents the current yield as of report date.

For Trust compliance purposes, the Trust s sector classifications refer to any one or more of the sector sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report, which may combine such sector sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments) The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements. The following table summarizes the inputs used as of October 31, 2010 in determining the fair valuation of the Trust s investments:

Valuation	Inputs

SEMI-ANNUAL REPORT

OCTOBER 31, 2010

33

### Schedule of Investments (concluded)

#### BlackRock Strategic Municipal Trust (BSD)

Short-Term Securities	Shares	Value
FFI Institutional Tax-Exempt Fund, 0.14% (i)(j)	4,045,553	\$ 4,045,553
Total Short-Term Securities		
(Cost \$4,045,553) 4.1%		4,045,553
Total Investments (Cost \$147,555,704*) 154.4%		151,395,310
Other Assets Less Liabilities 3.2%		3,176,247
Liability for Trust Certificates, Including Interest		
Expense and Fees Payable (13.8)%		(13,556,405)
Preferred Shares, at Redemption Value (43.8)%		(42,977,006)
Net Assets Applicable to Common Shares 100.0%		\$ 98,038,146

\* The cost and unrealized appreciation (depreciation) of investments as of October 31, 2010, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$133,669,983
Gross unrealized appreciation	\$ 6,708,299
Gross unrealized depreciation	(2,529,137)
Net unrealized appreciation	\$ 4,179,162

(a) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.

(b) US government securities, held in escrow, are used to pay interest on this security as well as to retire the bond in full at the date indicated, typically at a premium to par.

(c) Issuer filed for bankruptcy and/or is in default of interest payments.

(d) Non-income producing security.

(e) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.

(f) Security represents a beneficial interest in a trust. The collateral deposited into the trust is federally tax-exempt revenue bonds issued by various state or local governments, or their respective agencies or authorities. The security is subject to remarketing prior to its stated maturity.

(g) Variable rate security. Rate shown is as of report date.

(h) Securities represent bonds transferred to a tender option bond trust in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.
(i) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940,

as amended, were as follows:

	Shares Held at		Shares Held at	
	April 30,	Net	October 31,	
Affiliate	2010	Activity	2010	Income
FFI Institutional				
Tax-Exempt Fund	1,940,417	2,105,136	4,045,553	\$1,455

(j) Represents the current yield as of report date.

Fair Value Measurements Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments) The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements. The following table summarizes the inputs used as of October 31, 2010 in determining the fair valuation of the Trust s investments:

Valuation Inputs	Level 1	Level 2	Level 3	Total
Assets:				
Investments in Securities:				
Long-Term				
Investments <sup>1</sup>		\$147,349,757		\$147,349,757
Short-Term				
Securities	\$ 4,045,553			4,045,553
Total	\$ 4,045,553	\$147,349,757		\$151,395,310

<sup>1</sup> See above Schedule of Investments for values in each state or political subdivision.
