1. BASIS OF PRESENTATION

Glencairn Gold Corporation's (the Company or Glencairn) business is gold mining including exploration, development, extraction, processing and reclamation. The Company's business also includes acquisition of gold properties in operation or in the development stage. The Company owns the Limon Mine, a producing property in Nicaragua, and the Bellavista Mine in Costa Rica. Construction of the Bellavista Mine commenced in December 2003 and production is expected to begin in the second quarter of 2005. The Company also owns the Keystone Mine, a depleted property in Canada, which is currently under reclamation.

Basis of consolidation

The unaudited consolidated financial statements of the Company, which are expressed in U.S. dollars, have been prepared in accordance with Canadian generally accepted accounting principles for interim financial information and they follow the same accounting policies and methods of application as the audited consolidated financial statements for the year ended December 31, 2004. These unaudited interim consolidated financial statements do not include all the information and note disclosures required by generally accepted accounting principles for annual financial statements and therefore should be read in conjunction with the most recent annual consolidated financial statements and notes thereto. In the opinion of management, all adjustments considered necessary for fair and consistent presentation of interim financial statements have been included.

All dollar amounts are US dollars unless otherwise indicated.

Overview

Glencairn Gold Corporation (Glencairn or the Company) is a gold mining company that operates the Limon Mine in Nicaragua, and is constructing the Bellavista Mine in Costa Rica. The Bellavista Mine is expected to commence gold production in the second quarter of 2005. The Company owns exploration properties in Nicaragua and is exploring for gold on certain of these properties. The Company's objective is to become a mid-tier gold producer through development of existing mines and acquisition of operating mines and advanced development projects.

Results of Operations

The Limon Mine was the Company's only operation during 2005 and 2004 and all sales and cost of sales were generated from that mine.

Sales increased by \$992,000 or 23% in 2005, compared with 2004. In 2005, the Company sold 12,235 ounces of gold at an average realized price of \$428 per ounce. Sales in 2004 were 10,436 ounces of gold at an average price of \$407 per ounce. Increased sales resulted from selling 1,799 ounces more in 2005 and a 5% increase in realized prices.

Cost of sales increased by \$26,000 in 2005, compared with 2004. The volume of gold sold was 1,799 ounces higher in 2005 than 2004 as more tonnes were milled and inventory ounces were reduced slightly. Despite cost increases for electricity, oil and steel and higher production in 2005, total production costs were slightly lower compared with 2004 due to improved cost control procedures, more efficient operations and better labour relations. Cash operating costs per ounce declined during 2005 to \$297 from \$346 in 2004 due to the higher production volumes on a relatively fixed cost base.

General and administrative expense increased by \$61,000 in 2005, or 6%, compared with 2004. The increase resulted mainly from costs related to the Company's new listing on the American Stock Exchange.

Stock option expense decreased by \$191,000 or 55% in 2005 compared with 2004, as fewer options were granted in 2005.

Exploration expense decreased by \$217,000 or 28% in 2005 compared with 2004. In Canada, there was no exploration on the Vogel Property in 2005, compared with \$377,000 in 2004. The Vogel Property was sold in March 2005. In Nicaragua, exploration expense for the area surrounding the Limon Mine was \$549,000 in 2005, compared with \$390,000 in 2004, as the Company increased its efforts to discover additional resources.

Other income was \$732,000 in 2005. Interest and gains on the sales of assets totalled \$1,211,000 and foreign exchange loss was \$479,000. The gains were realized from the sale of marketable securities, the Vogel Property and the mill at the Keystone Mine. Other expense in 2004 was \$476,000 which consisted of interest income of \$67,000 offset by a foreign exchange loss of \$543,000.

Cash Flows

Operating activities used \$94,000 in 2005, compared with \$533,000 in 2004. Cash flows from the Limon Mine operations increased in 2005 compared to 2004 due to the increase in gold ounces sold, higher realized prices per ounce and lower cash operating costs per ounce. Cash flows from non-cash working capital were \$710,000 in 2005 compared with \$1,406,000 in 2004. In both years, the cash flows resulted primarily from the increase in accounts payable related to the construction of the Bellavista Mine.

Financing activities consisted of common share issues and generated \$341,000 in 2005 compared with \$20,951,000 in 2004. Common shares were issued in 2005 upon the exercise of warrants and agent's options. In 2004, common shares were issued under a \$20,488,000 prospectus financing mainly for the construction of the Bellavista Mine, and upon the exercise of warrants and agent's options.

Investing activities used \$7,107,000 in 2005 mainly for the purchase of property, plant and equipment of \$7,104,000 (Bellavista Mine \$6,315,000, Limon Mine \$776,000 and Corporate \$13,000). In 2004, investing activities used \$6,019,000 for the purchase of

property, plant and equipment (Bellavista Mine \$5,122,000, Limon Mine \$857,000 and Corporate \$40,000).

Liquidity and Capital Resources

The Company had cash of \$6,868,000 and working capital of \$12,106,000 at March 31, 2005. As previously disclosed, the Company is also in discussions with a lender to provide a loan of up to \$6,000,000. The cash on hand and the loan will be adequate for the Company to complete construction of the Bellavista Mine as well as provide for exploration and working capital. The Company expects gold production from the Bellavista Mine to commence in the second quarter of 2005 and total gold sales for 2005 to be 23,000 ounces. The Company expects total gold sales from the Limon Mine to be 48,000 ounces for 2005. Future production from the Bellavista and Limon Mines will total over 100,000 ounces of gold annually. Expected cash flows from production will be sufficient to repay the loan and to meet the future funding requirements of the Company.
