**2. Date of Material Change**

November 18, 2005

**3. News Release**

A news release with respect to the material change referred to in this report was issued on November 18, 2005 and subsequently filed on SEDAR.

**4. Summary of Material Change**

## Edgar Filing: Glencairn Gold CORP - Form 6-K

Glencairn Gold Corporation (the Company) announced that an agreement has been reached with all three unions at the Limon Mine in Nicaragua allowing operations to resume immediately. Mining operations were suspended November 3, 2005, when an illegal road blockade was established by a small group of employees from one of the unions. During the work stoppage, the Company began preparation of a revised life-of-mine plan using a higher cut-off grade for ore reserves.

### 5. Full Description of Material Change

The Company announced that an agreement has been reached with all three unions at the Limon Mine in Nicaragua allowing operations to resume immediately. Mining operations were suspended November 3, 2005, when an illegal road blockade was established by a small group of employees from one of the unions. This and several other previous blockades had undermined the Company's efforts to contain costs and put the operation on a solid, long-term footing.

The unions have made an unconditional agreement with the Company that future disputes will be resolved according to the resolution mechanisms in the collective agreement signed between the Company and the unions earlier this year. No concessions were made by the Company.

2

During the work stoppage, the Company began preparation of a revised life-of-mine plan using a higher cut-off grade for ore reserves. The Company expects this to result in a minor reduction in mineral reserves at Limon due to the elimination of lower grade blocks as well as those below the 260-metre level in the mine. The effect of these measures will be to increase the mineral reserve grade as well as reduce mining costs in the Talavera deposit, where most of the ore is currently sourced. It will also involve a reduction in the workforce. The Company will publish a summary of the revised life-of-mine plan when completed.

Development of the Santa Pancha Deposit on the Limon concession has also resumed. Santa Pancha is expected to provide mill feed in the second quarter of 2006 and be in full production in the second half of 2006. Production from Santa Pancha will allow Limon greater flexibility in its operations, which the Company expects will result in higher mill throughput and increased grades, thereby further reducing operating costs per ounce of gold produced.

### **Cautionary Note Regarding Forward-Looking Statements**

This material change report contains forward-looking statements, within the meaning of the United States Private Securities Litigation Reform Act of 1995 and applicable Canadian securities legislation. Forward-looking statements include, but are not limited to, statements with respect to the future financial or operating performance of the Company, its subsidiaries and its projects, the future price of gold, the estimation of mineral reserves and resources, the realization of mineral reserve estimates, the timing and amount of estimated future production, costs of production, capital, operating and exploration expenditures, costs and timing of the development of new deposits, costs and timing of future exploration, requirements for additional capital, government regulation of mining operations, environmental risks, reclamation expenses, title disputes or claims, limitations of insurance coverage and the timing and possible outcome of pending litigation and regulatory matters. Generally, these forward-looking statements can be identified by the use of forward-looking terminology such as plans, expects or does not expect, is expected, budget, scheduled, estimates, forecasts, intends, anticipates, or believes, or variations of such words and phrases or state that certain actions, events or results may, could, would, might, or will be taken, occur or be achieved. Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward-looking statements, including but not limited to: general business, economic, competitive, political and social uncertainties; the actual results of current exploration activities; actual results of reclamation activities; conclusions of economic evaluations; changes in project parameters as plans continue to be refined; future prices of gold; possible variations of ore grade or recovery rates; failure of plant, equipment or processes to operate as anticipated; accidents, labour disputes and other risks of the mining industry; political instability, insurrection or war; delays in obtaining governmental approvals or financing or in the completion of development or construction activities, as well as those factors discussed in the section entitled General Development of the Business Risks of the Business in the Company's Form 40-F on file with the Securities and Exchange Commission in Washington, D.C. and the

Company's annual information form for the year ended December 31, 2004 on file with the securities regulatory authorities in Canada. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. The Company does not
