FOR ANNUAL AND TRANSITION REPORTS PURSUANT TO SECTIONS 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

(Mark One)

Annual Report Pursuant to Section 13 or
15(d) of the Securities Exchange Act of 1934

For the Fiscal Year Ended December 31, 2004.

OR

Transition Report Pursuant to Section 13 or
15(d) of the Securities Exchange Act of 1934

For the Transition Period From _____ to _____.

Commission File Number 001-31916

AMERICAN HOME MORTGAGE INVESTMENT CORP.
(Exact Name of Registrant as Specified in Its Charter)

Maryland 20-0103914
(State or Other Jurisdiction of (I.R.S. Employer Identification No.)
Incorporation or Organization)

538 Broadhollow Road, Melville, New York 11747
(Address of Principal Executive Offices) (Zip Code)

(516) 949-3900
(Registrant's Telephone Number, Including Area Code)

Securities registered pursuant to Section 12(b) of the Act:

TITLE OF EACH CLASS	NAME OF EACH CLASS
Common Stock, \$0.01 par value per share	New York Stock Exchange
9.75% Series A Cumulative Redeemable Preferred Stock, \$0.01 par value per share	New York Stock Exchange
9.25% Series B Cumulative Redeemable Preferred Stock, \$0.01 par value per share	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark whether the registrant: (1) has filed all reports
required to be filed by Section 13 or 15(d) of the Securities Exchange Act of
1934 during the preceding 12 months (or for such shorter period that the
registrant was required to file such reports), and (2) has been subject to such
filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405
of Regulation S-K is not contained herein, and will not be contained, to the
best of registrant's knowledge, in definitive proxy or information statements
incorporated by reference in Part III of this Form 10-K/A or any amendment to

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

this Form 10-K/A. []

Indicate by check mark whether the registrant is an accelerated filer (as defined in Exchange Act Rule 12b-2). Yes [X] No []

As of December 31, 2004, the aggregate market value of the common stock held by non-affiliates of the registrant was approximately \$919,219,641 (computed by reference to the closing price as of the last business day of the registrant's most recently completed second fiscal quarter, June 30, 2004). For purposes of this information, the outstanding shares of common stock owned by directors and executive officers of the registrant were deemed to be shares of common stock held by affiliates.

As of March 9, 2005, the registrant had 40,311,830 outstanding shares of common stock, par value \$0.01 per share, which is the registrant's only class of common stock.

Documents Incorporated By Reference:

The information required to be furnished pursuant to Part III of this report on Form 10-K/A will be set forth in, and incorporated by reference from, the registrant's definitive proxy statement for the registrant's 2005 Annual Meeting of Stockholders, which definitive proxy statement will be filed by the registrant with the Securities and Exchange Commission not later than 120 days after the end of the registrant's fiscal year ended December 31, 2004.

TABLE OF CONTENTS

This amendment on Form 10-K/A reflects the restatement of the consolidated financial statements of American Home Mortgage Investment Corp., as discussed in Note 25 to the consolidated financial statements. Management of the Company identified material weaknesses in the Company's internal control over financial reporting, as discussed in Item 9A.

All of the information in this Form 10-K/A is as of March 16, 2005, the filing date of the original Form 10-K for the year ended December 31, 2004, and has not been updated for events subsequent to that date other than for the matter discussed above.

SPECIAL NOTES OF CAUTION

Cautionary Note Regarding Forward-Looking Statements

This report, including, but not limited to, the section entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations," contains certain forward-looking statements within the meaning of the federal securities laws. Some of the forward-looking statements can be identified by the use of forward-looking words. When used in this report, statements that are not historical in nature, including, but not limited to, the words "anticipate," "may," "estimate," "should," "seek," "expect," "plan," "believe," "intend," and similar words, or the negatives of those words, are intended to identify forward-looking statements. In addition, statements that contain a projection of revenues, earnings (loss), capital expenditures, dividends, capital structure or other financial terms are intended to be forward-looking statements. Certain statements regarding the following particularly are forward-looking in nature:

- o our business strategy;
- o future performance, developments, market forecasts or projected dividends;
- o projected acquisitions or joint ventures; and
- o projected capital expenditures.

It is important to note that the description of our business in general, and our mortgage-backed securities holdings in particular, is a statement about our operations as of a specific point in time. It is not meant to be construed as an investment policy, and the types of assets we hold, the amount of leverage we use, the liabilities we incur and other characteristics of our assets and liabilities are subject to reevaluation and change without notice.

The forward-looking statements in this report are based on our management's beliefs, assumptions and expectations of our future economic performance, taking into account the information currently available to it. These statements are not statements of historical fact. Forward-looking statements are subject to a number of factors, risks and uncertainties, some of which are not currently known to us, that may cause our actual results, performance or financial condition to be materially different from the expectations of future results, performance or financial position. These factors include, without limitation:

- o our limited operating history with respect to our proposed portfolio strategy;
- o the ability of our management to change or modify our portfolio strategy, without advance notice to stockholders, which may cause us to suffer losses;
- o our need for a significant amount of cash to operate our business;
- o risks associated with the use of leverage;
- o failure to maintain our status as a real estate investment trust ("REIT");
- o changes in federal and state tax laws affecting REITs;
- o repayment speeds within the mortgage-backed securities market;
- o changes in federal and state regulation of mortgage banking;
- o disruptions in the market for repurchase facilities;
- o failure to match the interest rates on our borrowings with the interest rates on the mortgage-backed securities we hold;
- o the overall environment for interest rates and their subsequent effect on our business;
- o dividends declared by us that are not as high as expected;

1

- o risks associated with equity investments and the general volatility of the capital markets and the market price of our common stock;

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

- o competition for business and personnel;
- o our ability to identify and complete acquisitions and successfully integrate the businesses we acquire;
- o general economic, political, market, financial or legal conditions; and
- o those factors, risks and uncertainties discussed in filings we make with the Securities and Exchange Commission ("SEC").

In light of these risks, uncertainties and assumptions, any forward-looking events discussed in this report might not occur, and we qualify any and all of our forward-looking statements entirely by these cautionary factors. You are cautioned not to place undue reliance on forward-looking statements. Such forward-looking statements are inherently uncertain, and you must recognize that actual results may differ from expectations. We are not under any obligation, and we expressly disclaim any obligation, to update or alter any forward-looking statements, whether as a result of new information, future events or otherwise.

2

ITEM 1. BUSINESS

American Home Mortgage Investment Corp. ("AHM Investment" and, collectively with its subsidiaries, the "Company," "we" or "us") is a Maryland corporation in the business of investing in mortgage-backed securities resulting from the securitization of residential mortgage loans that its subsidiaries originate and service. American Home Mortgage Holdings, Inc. ("AHM Holdings"), a Delaware corporation, is a direct, wholly owned subsidiary of AHM Investment that serves as the parent holding company for American Home Mortgage Corp. ("AHM Corp."), a New York corporation, which (together with American Home Mortgage Acceptance, Inc. ("AHM Acceptance"), a Maryland corporation and direct, wholly owned subsidiary of AHM Investment) primarily originates the Company's loans, and American Home Mortgage Servicing, Inc. ("AHM Servicing") (formerly known as Columbia National, Incorporated), a Maryland corporation, which services the Company's loans as well as certain loans for third parties.

We use our equity capital and borrowed funds to invest in securities backed by adjustable-rate mortgages ("ARMs"), and seek to generate income for distribution to our stockholders based on the difference between the yield on our portfolio of mortgage-backed securities and the cost of our borrowings. AHM Investment is organized and operates for U.S. federal income tax purposes as a REIT. As a REIT, it is required to dividend substantially all of its earnings to its stockholders, and the net interest income it earns on the securities it holds generally will not be subject to federal income tax to the extent it distributes those earnings to its stockholders. See "Certain Federal Income Tax Considerations" below.

As of December 31, 2004, the Company held a leveraged portfolio of mortgage-backed securities in the amount of approximately \$6.0 billion in order to generate net interest income and serviced approximately 104,000 loans with an aggregate principal amount of approximately \$16.8 billion. As of December 31, 2004, the Company operated more than 400 loan production offices located in 43 states and made loans throughout all 50 states and the District of Columbia. The Company originated approximately \$23.1 billion in aggregate principal amount of loans in 2004 and for the fourth quarter of 2004 was ranked as the nation's 20th largest residential mortgage lender according to National Mortgage News.

The common stock of AHM Investment is traded on the New York Stock Exchange ("NYSE") under the symbol "AHM." AHM Investment's 9.75% Series A Cumulative

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

Redeemable Preferred Stock and 9.25% Series B Cumulative Redeemable Preferred Stock are also traded on the NYSE under the symbols "AHM PrA" and "AHM PrB," respectively.

The Company's website is <http://www.americanhm.com>. The Company makes available free of charge on its website its annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, Forms 3, 4 and 5 filed on behalf of directors and executive officers and any amendments to such reports filed pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), as soon as reasonably practicable after such material is electronically filed with, or furnished to, the SEC. We also will provide any of the foregoing information without charge upon written request to American Home Mortgage Investment Corp., 538 Broadhollow Road, Melville, New York 11747, Attention: Investor Relations Director.

Also posted on the Company's website within the "investor relations" section under the heading "corporate governance" are (i) the charters for the committees of the Company's Board of Directors which include the Audit Committee, Compensation Committee and Nominating and Corporate Governance Committee, (ii) the Company's Corporate Governance Principles and (iii) the Company's Code of Business Conduct and Ethics (the "Code of Ethics") governing its directors, officers and employees. These documents also are available in print upon request of any stockholder to the Company's Investor Relations Director. Within the time period required by the SEC and the NYSE, the Company will post on its website any modifications to the Code of Ethics and any waivers applicable to Senior Financial Officers (as defined in the Code of Ethics).

The certifications by the Company's Chief Executive Officer and Chief Financial Officer required under Section 302 of the Sarbanes-Oxley Act of 2002 have been filed as Exhibits 31.1 and 31.2, respectively, to this report on Form 10-K/A. The Company also has submitted to the NYSE its 2004 Annual Chief Executive Officer Certification required pursuant to NYSE Corporate Governance Standards Section 303A.12(a), to the effect that, as of the date of such certification, the Chief Executive Officer of the Company was not aware of any violation by the Company of the NYSE's Corporate Governance listing standards.

Description of Our Business

The Company's businesses include holding a leveraged portfolio of mortgage-backed securities in order to earn net interest income, originating mortgage loans (and either securitizing those loans or selling these loans for a profit), and servicing its securitized loans for fee income. A growing portion of the Company's portfolio of mortgage-backed securities consists of self-originated securities, and a core strategy of the Company is to hold self-originated securities, which the Company has, to date, been able to produce at a lower cost than the price for comparable securities offered for sale in the capital markets. The Company is organized and operates as a REIT for U.S. federal income tax purposes. Our REIT-eligible assets and activities are held or

3

performed at the parent level or in qualified REIT subsidiaries ("QRSs"). Our primary QRS, AHM Acceptance, originates and securitizes REIT-eligible mortgage loans. Our assets and activities that are not REIT-eligible, such as part of our mortgage origination business and our servicing business, are conducted by our direct or indirect taxable REIT subsidiaries ("TRSs"), AHM Holdings, AHM Corp. and AHM Servicing. Our TRSs are subject to federal and state corporate income tax.

In general, under our current business strategy, we expect to maximize the operational and tax benefits provided by our REIT structure. Our TRSs accept and

process loan applications. Loan applications that meet the requirements of the REIT, which typically consist of ARMs, are then sold by our TRSs to our QRS, while loan applications that do not meet these requirements are closed and sold to third-party purchasers. The associated servicing rights of all loans originated by our QRS are retained by our TRSs. We generate net interest income from our portfolio of mortgage loans and mortgage-backed securities, which is the difference between (i) the interest income we receive from mortgage loans and mortgage-backed securities and (ii) the interest we pay, plus certain administrative expenses.

The TRSs also engage in other businesses that are ancillary to their mortgage-backed securities holdings, origination and servicing activities, including operating two mortgage reinsurance subsidiaries, a title abstract subsidiary and a vendor management company. The TRSs also are participants in mortgage lending joint ventures that result in the generation of assets for the Company.

Mortgage-Backed Securities Holdings Segment

Our current portfolio strategy, which is subject to change at any time without notice to our stockholders, and which we expect may change from time to time, is to hold a portfolio of securities backed primarily by ARM loans that we originate, fund them using equity capital and borrowed funds and generate net interest income from the difference, or spread, between the yield on our mortgage-backed securities and our cost of borrowing. Accordingly, we expect net interest income to be the largest component of our earnings in the future.

A growing percentage of the Company's portfolio of mortgage-backed securities consists of self-originated securities, and a core strategy of the Company is to hold self-originated securities, which the Company has, to date, been able to produce at a lower cost than the price for comparable securities offered for sale in the capital markets. We believe that the cost advantage we obtain from self-originating loans, and holding such loans in securitized form in the REIT or in our primary QRS, is primarily the result of two economic factors. First, through self-origination, we avoid the intermediation costs associated with purchasing mortgage assets in the capital markets. Second, the REIT or our primary QRS is able to acquire loan applications from our TRSs, rather than purchase closed loans, at a price substantially less than the purchase price of a closed loan.

The size of the Company's leveraged portfolio of mortgage-backed securities was \$6.0 billion as of December 31, 2004. The Company's securities are funded through borrowings in the reverse repurchase market. Our termed repurchase agreements generally have maturities ranging from one to twelve months. Our securities portfolio is managed defensively to mitigate interest rate, credit and liability rollover risks. Interest rate risk is managed by using swaps to extend the duration of the reverse repurchases, thereby causing the Company to approximately achieve a "matched book," with the durations of its assets and liabilities approximately equal. In addition, because we are focused on holding ARM, rather than fixed-rate, loans, we believe we will be less adversely affected by prepayments due to falling interest rates or a reduction in our net interest income due to rising interest rates. Credit risk is managed by holding primarily high-credit quality securities; approximately 95% of the securities we hold are either agency obligations or are rated AAA or AA by Standard & Poor's. Agency securities are mortgage-backed securities for which a U.S. government agency or a government-sponsored or federally chartered corporation, such as Ginnie Mae, Fannie Mae or Freddie Mac, guarantees payments of principal or interest on the certificates. Agency securities are not rated, but carry an implied AAA rating.

Rollover risk is managed by laddering the maturities of the reverse repurchase borrowings. We also believe we are less susceptible to a disruption in the

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

repurchase market because we hold primarily agency securities and securities rated AAA or AA by Standard and Poor's, which have typically been eligible for repurchase market financing even when repurchase financing was unavailable for other classes of mortgage assets.

Loan Origination Segment

The Company's loan origination business is the generator of the bulk of its assets and the source of its gain on sale revenue. It also is the source of the Company's permanent customer base, i.e., those customers whose loans are being serviced by the Company. During 2004, the Company made loans to approximately 105,000 borrowers. The Company's total originations for 2004 were \$23.1 billion, and National Mortgage News ranked the Company as the nation's 20th largest residential mortgage lender for the fourth quarter of 2004.

4

As of December 31, 2004, lending was conducted through over 400 retail and wholesale loan production offices located in 43 states. The Company's origination business obtains approximately 50% of its originations through its retail loan production offices, 49% of its originations from mortgage brokers through its wholesale loan production offices and 1% of its originations from direct-to-consumer lending activities supported by the Company's call center. Of the \$23.1 billion aggregate principal amount of loans the Company made during 2004, 52% were to fund home purchases while 48% were to fund refinancings. The Company offers a broad array of mortgage products and primarily makes loans to borrowers with good credit profiles. The weighted-average FICO score for our \$23.1 billion of total originations in 2004 was 714. All of the loans the Company made in 2004 were secured by one- to four-family dwellings.

We seek to utilize a combination of skilled loan officers, state of the art technology, a broad and fairly priced product line and a high level of customer service to successfully compete in the marketplace. Once a consumer applies for a loan, our mortgage banking operation processes and underwrites the consumer's application and we fund the consumer's loan by drawing on a warehouse line of credit. The loan is then typically either securitized and the resulting securities held by us as a long-term investment or sold by us at a profit.

Our loan origination business has rapidly grown its market share and scale since becoming a public company in 1999. The aggregate principal amount of our total loan originations were \$12.2 billion in 2002, \$21.7 billion in 2003 and \$23.1 billion in 2004. Inside Mortgage Finance reported our national market share as 0.47% in 2002, 0.60% in 2003 and 0.82% in 2004. We believe our growth has made our mortgage banking operation more profitable and more effective at serving our customers. Specifically, growth in originations has lowered the per-loan cost of our centralized support operations and, consequently, our overall per-loan cost of origination. Our growth has also given us a relatively large presence in the secondary mortgage market, and, as a result, has improved our ability to execute loan sales to third-party purchasers. In addition, our size has enabled us to negotiate better terms with warehouse lenders and credit enhancers such as Fannie Mae and Freddie Mac. Finally, our size has made it possible for us to profitably enter businesses ancillary to mortgage lending, such as mortgage reinsurance, title brokerage and vendor management.

AHM Holdings has grown its loan origination franchise substantially since becoming a public company in October of 1999. In 2004, total loan originations were approximately \$23.1 billion, compared to \$21.7 billion in 2003, \$12.2 billion in 2002, \$7.8 billion in 2001 and \$3.0 billion in 2000. The Company's growth has resulted principally from growing its network of loan production offices by acquisitions, recruiting and hiring of sales personnel and internally growing its loan production offices. The Company has increased its number of

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

loan production offices by acquiring small to mid-sized mortgage businesses. AHM Holdings completed eight such acquisitions since December of 1999. In each acquisition, we have generally retained and grown the acquired company's loan production offices while substantially eliminating their centralized support operations and associated costs. These acquisitions have significantly increased our origination capability. The Company's strategy is to continue to opportunistically seek acquisitions to grow its loan origination business.

Growth in our business with mortgage brokers has resulted from adding additional branches and account executives in our wholesale channel and increasing the depth of our mortgage broker support capabilities.

Our newly originated loans held pending sale or securitization were \$4.9 billion as of December 31, 2004. These loans are financed through our commercial paper program, collateralized debt obligations and through borrowings from banks and securities dealers. The interest rate risk posed by our agency eligible conforming loans and most of our non-conforming loans is hedged through forward sales, interest rate swaps or interest rate caps.

Mortgage Products

The Company offers a broad and competitive range of mortgage products that aim to meet the mortgage needs of primarily high-credit-quality borrowers. Its product line includes conventional conforming fixed rate loans, ARMs, government fixed rate loans, jumbo fixed rate loans, non-prime loans, home equity or second mortgage loans, alternate "A" loans, construction loans and bridge loans.

The following table summarizes information with respect to the most significant categories of mortgage loans the Company originated for the years ended December 31, 2004 and 2003:

5

LOAN ORIGINATION SUMMARY

Loan Type	Number of Loans		Loan Originations	
	Year Ended December 31,		Year Ended December 31,	
(Dollars in millions)	2004	2003	2004	2003
Conventional conforming fixed rate	43,295	77,303	\$ 7,147.5	\$ 12,702.9
Adjustable rate mortgages	34,023	18,987	8,466.9	4,116.1
Government fixed rate	8,840	17,434	1,162.7	2,296.3
Jumbo fixed rate	3,953	3,100	1,704.1	1,393.4
Alternate "A"	16,102	2,911	3,091.2	569.5
Non-prime	3,044	2,500	465.9	360.0
Home equity/Second	19,927	6,957	1,025.7	254.5
Construction	7	45	1.3	10.5
Bridge	19	20	3.8	2.1
Loan Originations	129,210	129,257	\$ 23,069.1	\$ 21,705.3
	=====	=====	=====	=====

Conventional Conforming Fixed Rate Loans. These mortgage loans conform to the

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

underwriting standards established by Fannie Mae or Freddie Mac. This product is limited to high-quality borrowers with good credit records and involves adequate down payments or mortgage insurance.

ARMs. The ARM's defining feature is a variable interest rate that fluctuates over the life of the loan, usually 30 years. Interest rate fluctuations are based on an index that is related to Treasury bill rates, regional or national average cost of funds of savings and loan associations, or another widely published rate, such as LIBOR. The period between the rate changes is called an adjustment period and may change every six months or one year. The Company also offers ARMs with a fixed period of three years, five years or ten years. Some of the Company's ARMs may include payment caps, which limit the interest rate increase for each adjustment period.

Government Fixed Rate Loans. These mortgage loans conform to the underwriting standards established by the Federal Housing Authority ("FHA") or the Veterans Administration ("VA"). These loans may qualify for insurance from the FHA or guarantees from the VA. The Company has been designated by the U.S. Department of Housing and Urban Development ("HUD") as a direct endorser of loans insured by the FHA and as an automatic endorser of loans partially guaranteed by the VA, allowing it to offer FHA or VA mortgages to qualified borrowers. FHA and VA mortgages must be underwritten within specific governmental guidelines, which include borrower income verification, asset verification, borrower creditworthiness, property value and property condition.

Jumbo Loans. Jumbo loans are considered non-conforming mortgage loans because they have a principal loan amount in excess of the loan limits set by Fannie Mae and Freddie Mac (which limits were \$359,650, for single-family, one-unit mortgage loans in the continental United States). The Company offers jumbo loans with creative financing features, such as the pledging of security portfolios. Its jumbo loan program is geared to the more financially-sophisticated borrower.

Alternate "A" Loans. Alternate "A" mortgage loans consist primarily of mortgage loans that are first lien mortgage loans made to borrowers whose credit is generally within typical Fannie Mae or Freddie Mac guidelines, but have loan characteristics that make them non-conforming under these guidelines. From a credit risk standpoint, alternate "A" loan borrowers present a risk profile comparable to that of conforming loan borrowers, but entail special underwriting considerations, such as a higher loan to value ratio or limited income verification.

Non-Prime Mortgage Loans. Non-prime mortgage loans focus on customers whose borrowing needs are not served by traditional financial institutions. Borrowers of non-prime mortgage loans may have impaired or limited credit profiles, high levels of debt service to income, or other factors that disqualify them for conforming loans. When the Company originates mortgage loans of borrowers with higher credit risk, the Company offsets this risk with higher interest rates than would be charged for its

conventional and government loans. Offering this category of mortgage loans on a limited basis allows the Company to provide loan products to borrowers with a variety of credit profiles.

Home Equity or Second Mortgage Loans. These loans are generally secured by second liens on the related property. Home equity mortgage loans can take the form of a home equity line of credit, which generally bears an adjustable interest rate, while second mortgage loans are closed-end loans with fixed interest rates. Both types of loans are designed for borrowers with high-quality credit profiles. Home equity lines generally provide for a 5- or 15-year draw

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

period where the borrower withdraws needed cash and pays interest only, followed by a 10- to 20-year repayment period. Second mortgage loans are fixed in amount at the time of origination and typically amortize over 15 to 30 years with a balloon payment due after 15 years.

Construction Loans. The Company offers a variety of construction loans for owner-occupied, single-family residences. These loans are available on a rollover basis, meaning that the borrower can secure funding for the land purchase and construction of the home, then roll the financing over into a permanent mortgage loan. During the construction period, interest-only payments are made. Withdrawals during the construction period, to cover the costs associated with each stage of completion, are usually made in five to ten disbursements.

Bridge Loans. The bridge loans that the Company makes are short-term loans and may be used in conjunction with its other loan products. Bridge loans provide a means for a borrower to obtain cash based on the equity of a current home that is on the market but not yet sold and to use that cash to purchase a new home.

Loan Underwriting

The Company's primary goal in making a decision whether to extend a loan is whether that loan conforms to the expectations and underwriting standards of the secondary mortgage market. Typically, these standards focus on a potential borrower's credit history (often as summarized by credit scores), income and stability of income, liquid assets and net worth and the value and the condition of the property securing the loan. Whenever possible, the Company uses "artificial intelligence" underwriting systems to determine whether a particular loan meets those standards and expectations. In those cases where artificial intelligence is not available, the Company relies on its credit officer staff to make the determination.

Quality Control

The Company performs monthly quality control testing on a statistical sample of the loans we originate. The quality control testing includes checks on the accuracy of the borrower's income and assets and the credit report used to make the loan, reviews whether the loan buyer's underwriting standards were properly applied and examines whether the loan complies with government regulations. Quality control findings are summarized in monthly reports that the Company uses to identify areas that need corrective action or could use improvement. To date, those reports have not identified any material quality control concerns, although there can be no assurances that the Company will not experience material quality control concerns in the future.

Sale of Loans and Servicing Rights

With respect to mortgage loans that the Company originates but does not securitize, the Company typically seeks to sell those loans within 45 days of origination. The Company sells those loans to Fannie Mae, Freddie Mac, large national banks, thrifts and smaller banks, securities dealers, real estate investment trusts and other institutional loan buyers. The Company also swaps loans with Fannie Mae and Freddie Mac in exchange for mortgage-backed securities, which the Company then sells.

Typically, the Company sells loans with limited recourse. By doing so, with some exceptions, the Company reduces its exposure to default risk at the time it sells the loan, except that it may be required to repurchase the loan if it breaches the representations or warranties that it makes in connection with the

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

sale of the loan, in the event of an early payment default, or if the loan does not comply with the underwriting standards or other requirements of the ultimate investor.

The Company sells the loans to investors pursuant to written agreements that establish an ongoing sale program under which those investors stand ready to purchase loans so long as the loans the Company offers for sale satisfy the investors' underwriting standards.

In 2004, the three institutions that bought the most loans from the Company were Wells Fargo Funding, Countrywide Financial Corporation and Fannie Mae, which accounted for 38%, 25% and 7%, respectively, of the Company's total loan sales.

With respect to mortgage loans that it originates but does not securitize, the Company generally sells the mortgage servicing rights ("MSRs") to those loans at the time it sells those loans. The prices at which the Company is able to sell its MSRs vary over time and may be materially adversely affected by a number of factors, including, for example, the general supply of, and demand

7

for, MSRs and changes in interest rates. From time to time the Company retains the servicing rights on a portion of its loan originations. When the Company retains servicing rights, it earns an annual servicing fee.

On December 31, 2004, the carrying value of the Company's MSRs was \$151.4 million. The MSRs are financed by borrowings from a bank syndicate and are not hedged due to their counter-cyclical nature with the Company's mortgage origination business and their relatively small size.

Loan Servicing Segment

On December 31, 2004, the Company's servicing business, conducted through AHM Servicing, serviced the home mortgage loans of approximately 104,000 borrowers. Loans are primarily serviced for the trusts of the Company's securitizations, and for Fannie Mae and Ginnie Mae. The Company's servicing operation is eligible to service loans for Fannie Mae, Freddie Mac and Ginnie Mae, and has been rated a "Select Servicer" by Standard & Poor's.

As of December 31, 2004, AHM Servicing serviced approximately 104,000 loans with an aggregate principal amount of approximately \$16.8 billion. The average annual servicing fee on our servicing portfolio as of December 31, 2004, was 0.348% of the principal amount of each loan we service. Our servicing business collects mortgage payments, administers tax and insurance escrows, seeks to mitigate losses on defaulted loans and responds to borrower inquiries.

We expect our servicing business to grow as we increase our portfolio of self-originated mortgage-backed securities. Our servicing business enables us to retain an ongoing business relationship with our borrowers, which we believe makes it more likely that we will earn those borrowers' business when they need a new loan or wish to refinance an existing loan. We believe that our servicing capability also enables us to sell loans to Fannie Mae, Freddie Mac and Ginnie Mae on more advantageous terms than if we did not service our loan originations.

The following table sets forth certain information regarding the Company's servicing portfolio of single-family mortgage loans serviced for others for the years ended December 31, 2004 and 2003:

LOANS SERVICED FOR OTHERS

Year Ended December 31

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

(In millions)	2004	2003
Composition at end of year:		
Conventional mortgage loans	\$ 10,926.8	\$ 6,000.0
FHA-insured mortgage loans	823.1	1,000.0
VA-guaranteed mortgage loans	205.7	
Loans serviced for others at end of year	\$ 11,955.6	\$ 8,000.0
Loans serviced for others at beginning of year	\$ 8,272.3	\$ 8,000.0
Loans sold or securitized with servicing retained	6,981.1	3,000.0
Prepayments and foreclosures	(2,649.1)	(3,000.0)
Amortization	(648.7)	(1,000.0)
Loans serviced for others at end of year	\$ 11,955.6	\$ 8,000.0
Delinquent mortgage loans and pending foreclosures at end of year		
30 days	\$ 201.9	\$ 100.0
60 days	42.4	
90 days	51.5	
Total delinquencies	\$ 295.8	\$ 100.0
Foreclosures pending	\$ 44.6	\$ 100.0

8

At December 31, 2004, the Company's servicing portfolio of single-family mortgage loans serviced for others was stratified by interest rate as follows:

(Dollars in millions)	December 31, 2004			
	Interest Rate	Principal Balance	Percent of Total Principal	Weighted Average Maturity (Years)
Under 6%	\$ 8,284.1	69.3%	26.8	\$
6.00-6.99%	2,228.5	18.6%	26.4	
7.00-7.99%	1,096.2	9.2%	25.1	
8% and over	346.8	2.9%	23.4	
	\$ 11,955.6	100.0%	26.5	\$

The weighted-average interest rate of the single-family mortgage loans serviced for others as of December 31, 2004 was 5.5%. As of December 31, 2004, 39% of loans serviced for others bore interest at fixed rates and 61% bore interest at adjustable rates. The weighted average net service fee of the Company's loans serviced for others was 0.348% as of December 31, 2004. The weighted-average interest rate of the Company's fixed-rate loans serviced for others was 6.32% as of December 31, 2004.

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

Financial Information About Industry Segments

The Company primarily conducts its business in three principal segments: mortgage-backed securities holdings, loan origination and loan servicing. The business conducted by each segment is described above under "Description of Our Business." Additional financial information regarding the Company's business segments as of December 31, 2004, December 31, 2003, and December 31, 2002, and for the years ended December 31, 2004, December 31, 2003, and December 31, 2002, is set forth in Note 23 to Consolidated Financial Statements, entitled "Segments and Related Information," and is incorporated herein by reference.

Company History and Business Development

AHM Investment was incorporated in July of 2003 under the laws of the State of Maryland. AHM Investment was formed in order to combine the net assets (consisting primarily of mortgage-backed securities) of Apex Mortgage Capital, Inc., a Maryland corporation operating as a REIT ("Apex"), with the mortgage origination and servicing businesses of AHM Holdings. In December of 2003, AHM Investment became the parent company of AHM Holdings through an internal reorganization and acquired Apex by merger. Our primary purpose for combining the net assets of Apex with the origination and servicing businesses of AHM Holdings was to realize the benefits of holding a portfolio of self-originated, mortgage-backed securities.

Prior to the Company's conversion into a REIT, our business strategy was to sell substantially all of the loans we originated and the largest component of our net income was generated by the gain on sale of such loans. Our historical financial results prior to 2004 reflect this discontinued strategy of selling virtually all of the loans that we originated. Since our REIT conversion, our business strategy is to hold the mortgage-backed securities resulting from the securitization of ARM loans we originate, and, consequently, we believe that the largest component of our net income in the future will be net interest income generated by our mortgage-backed securities holdings.

AHM Corp. was the first company formed as part of the American Home Mortgage organization. Historically, AHM Corp., currently a direct, wholly owned subsidiary of AHM Holdings, operated as an independent mortgage lender from its formation in 1988 until 1999. On June 15, 1999, AHM Holdings was formed, and on October 6, 1999, AHM Holdings completed an initial public offering of its common stock and became the parent holding company of AHM Corp. AHM Holdings acquired AHM Servicing (formerly known as Columbia National, Incorporated) in June of 2002. AHM Acceptance was formed as a direct, wholly owned subsidiary of AHM Investment in August of 2003.

Hedging Activities

The Company hedges interest rate risk and price volatility on its mortgage loan interest rate lock commitments and mortgage loans held for sale during the time it commits to acquire or originate mortgages at a pre-determined rate until the time it sells or securitizes mortgages. The Company also hedges interest rate risk associated with funding its portfolio of mortgage-backed

9

securities. To mitigate interest rate and price volatility risks, the Company may enter into certain hedging transactions. The nature and quantity of the Company's hedging transactions are determined based on various factors, including market conditions and the expected volume of mortgage acquisitions and originations.

Additional information regarding interest rate hedging is set forth in

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

"Management's Discussion and Analysis of Financial Condition and Results of Operations" and in Note 1 to Consolidated Financial Statements, entitled "Summary of Significant Accounting Policies," and is incorporated herein by reference.

Government Regulation

The Company's loan origination and loan servicing segments are subject to extensive and complex rules and regulations of, and examinations by, various federal, state, and local government authorities and government sponsored enterprises, including, without limitation, HUD, FHA, VA, Fannie Mae, Freddie Mac and Ginnie Mae. These rules and regulations impose obligations and restrictions on the Company's loan origination and credit activities, including, without limitation, the processing, underwriting, making, selling, securitizing and servicing of mortgage loans.

The Company's lending activities also are subject to various federal laws, including the Federal Truth-in-Lending Act and Regulation Z thereunder, the Homeownership and Equity Protection Act of 1994, the Federal Equal Credit Opportunity Act and Regulation B thereunder, the Fair Credit Reporting Act of 1970, the Real Estate Settlement Procedures Act of 1974 and Regulation X thereunder, the Fair Housing Act, the Home Mortgage Disclosure Act and Regulation C thereunder and the Federal Debt Collection Practices Act, as well as other federal statutes and regulations affecting its activities. The Company's loan origination activities also are subject to the laws and regulations of each of the states in which it conducts its activities.

These laws, rules, regulations and guidelines limit mortgage loan amounts and the interest rates, finance charges and other fees the Company may assess, mandate extensive disclosure and notice to its customers, prohibit discrimination, impose qualification and licensing obligations on it, establish eligibility criteria for mortgage loans, provide for inspections and appraisals of properties, require credit reports on prospective borrowers, regulate payment features, and prohibit kickbacks and referral fees, among other things. These rules and requirements also impose on the Company certain reporting and net worth requirements. Failure to comply with these requirements can lead to, among other things, loss of approved status, termination of contractual rights without compensation, demands for indemnification or mortgage loan repurchases, certain rights of rescission for mortgage loans, class action lawsuits, and administrative enforcement actions.

Although the Company believes that it has systems and procedures in place to ensure compliance with these requirements and that it currently is in compliance in all material respects with applicable federal, state and local laws, rules and regulations, there can be no assurance of full compliance with current laws, rules and regulations, that more restrictive laws, rules and regulations will not be adopted in the future, or that existing laws, rules and regulations or the mortgage loan documents with borrowers will not be interpreted in a different or more restrictive manner. The occurrence of any such event could make compliance substantially more difficult or expensive, restrict the Company's ability to originate, purchase, sell or service mortgage loans, further limit or restrict the amount of interest and other fees and charges earned from mortgage loans that the Company originates, purchases or services, expose it to claims by borrowers and administrative enforcement actions, or otherwise materially and adversely affect its business, financial condition and results of operations.

Members of Congress, government officials and political candidates have from time to time suggested the elimination of the mortgage interest deduction for federal income tax purposes, either entirely or in part, based on borrower income, type of loan or principal amount. Because many of the Company's loans are made to borrowers for the purpose of purchasing a home, the competitive

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

advantage of tax deductible interest, when compared with alternative sources of financing, could be eliminated or seriously impaired by this type of governmental action. Accordingly, the reduction or elimination of these tax benefits could have a material adverse effect on the demand for the kind of mortgage loans the Company offers.

The Company also is performing various mortgage-related operations on the Internet. The Internet, and the laws, rules and regulations related to it, are relatively new and still evolving. As such, there exist many opportunities for the Company's business operations on the Internet to be challenged or to become subject to legislation, any of which may materially and adversely affect its business, financial condition and results of operations.

Information Systems

The Company's loan origination enterprise system controls most aspects of the Company's loan origination operations, from the processing of a loan application through the closing of the loan and the sale of the loan to institutional investors. The system also performs checks and balances on many aspects of the Company's operations and supports the Company's marketing efforts. The Company's enterprise system functions on a wide area network that connects all of its branches in "real time." With its wide area

10

network, a transaction at any one of its locations is committed centrally and is therefore immediately available to all personnel at all other locations. An important benefit of the enterprise system is that it aids the Company in controlling its business processes. The system assures that the Company's underwriting policies are adhered to, that only loans that are fully approved are disbursed, and that the correct disclosures and loan documents for a borrower are used based upon such borrower's state and loan program. The Company's enterprise system also provides its management with operating reports and other key data. In addition, the Company has developed a proprietary website and supporting call center software through the efforts of its in-house computer programming staff.

The Company's loan servicing system, LSAMS ("Loan Servicing and Accounting Management System"), manages most aspects of the loan servicing function, from loan closing to its ultimate payoff or disposition. The Company has developed enhancements and ancillary systems to further automate this function. Efficiencies have been gained through the use of Interactive Voice Response units that allow customers to ask questions and receive answers 24 hours a day. The Company also utilizes CTI ("Computer-Telephone Integration") to speed the work of customer service agents. The Company's customers are able to utilize the Internet to check on current account information as well as to make monthly payments. FORTRACS, a foreclosure tracking system, has been implemented to streamline the foreclosure process, track bankruptcies, expedite foreclosure claims processing and dispose of real estate owned ("REO") property. The Company's loan servicing system is scalable well beyond its current workload.

Seasonality

Seasonality affects the Company's loan origination and loan servicing segments, as loan originations and payoffs are typically at their lowest levels during the first and fourth quarters due to a reduced level of home buying activity during the winter months. Loan originations and payoffs generally increase during the warmer months, beginning in March and continuing through October. As a result, the Company may experience higher earnings in the second and third quarters and lower earnings in the first and fourth quarters from its loan origination segment. Conversely, the Company may experience lower earnings in the second and

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

third quarters and higher earnings in the first and fourth quarters from its loan servicing segment.

Competition

We face intense competition from mortgage REITs, commercial banks, savings and loan associations and other finance and mortgage banking companies, as well as from Internet-based lending companies and other lenders participating on the Internet. Entry barriers in the mortgage industry are relatively low and increased competition is likely. As we seek to expand our business, we will face a greater number of competitors, many of whom will be well-established in the markets that we seek to penetrate. Many of our competitors are much larger than we are, have better name recognition than we do and have far greater financial and other resources than we do. In addition, competition may lower the rates we are able to charge borrowers, thereby potentially lowering the amount of income on future loan sales and sales of MSRs. Increased competition also may reduce the volume of our loan originations and loan sales.

Employees

The Company recruits, hires and retains individuals with the specific skills that complement its corporate growth and business strategies. As of December 31, 2004, the Company had 4,730 employees.

CERTAIN FEDERAL INCOME TAX CONSIDERATIONS

General

AHM Investment elected to be treated as a REIT for federal income tax purposes in the federal income tax return for its first taxable year ending December 31, 2003. In brief, if AHM Investment meets certain detailed conditions imposed by the REIT provisions of the Internal Revenue Code of 1986, as amended (the "Code"), including a requirement that we invest primarily in qualifying REIT assets (which generally include real estate and mortgage loans) and a requirement that we satisfy certain income tests, AHM Investment will not be taxed at the corporate level on the income that we currently distribute to our stockholders. Therefore, to this extent, AHM Investment's stockholders will avoid double taxation, at the corporate level and then again at the stockholder level when the income is distributed, that they would otherwise experience if AHM Investment failed to qualify as a REIT.

If AHM Investment does not qualify as a REIT in any given year, we would be subject to federal income tax as a corporation for the year of the disqualification and for each of the following four years. This disqualification would result in federal income tax,

11

which would reduce the amount of the after-tax cash available for distribution to our stockholders. AHM Investment believes that we have satisfied the requirements for qualification as a REIT since the year ended December 31, 2003. AHM Investment intends at all times to continue to comply with the requirements for qualification as a REIT under the Code, as described below.

In addition, to the extent AHM Investment holds a residual interest in a real estate mortgage investment conduit or is subject to the "taxable mortgage pool" ("TMP") rules, AHM Investment's status as a REIT will not be impaired, but a portion of the taxable income generated by the residual interest or AHM Investment's mezzanine debt and other assets constituting a TMP may be

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

characterized as "excess inclusion" income allocated to AHM Investment's stockholders. Any such excess inclusion income (i) will not be allowed to be offset by the net operating losses of a stockholder, (ii) will be subject to tax as unrelated business taxable income to a tax-exempt stockholder, (iii) will result in the application of U.S. federal income tax withholding at the maximum rate (without reduction for any otherwise applicable income tax treaty) on any excess inclusion income allocable to a stockholder that is not a "United States Person" (as defined in the Code), and (iv) may result in AHM Investment having to pay tax on excess inclusion income to the extent the AHM Investment's stockholders are certain "disqualified organizations."

Requirements for Qualification as a REIT

To qualify for tax treatment as a REIT under the Code, we must meet certain tests, as described briefly below.

Ownership of Common Stock

Each taxable year for which we elect to be a REIT, a minimum of 100 persons must hold our shares of capital stock for at least 335 days of a 12-month year (or a proportionate part of a short tax year). In addition, at all times during the second half of each taxable year, no more than 50% in value of our capital stock may be owned directly or indirectly by five or fewer individuals. We are required to maintain records regarding the ownership of our shares and to demand statements from persons who own more than a certain number of our shares regarding their ownership of shares. We must keep a list of those stockholders who fail to reply to such a demand.

We are required to use the calendar year as our taxable year for income tax purposes.

Nature of Assets

On the last day of each calendar quarter, at least 75% of the value of our assets and any assets held by a QRS must consist of qualified REIT assets (primarily, real estate and mortgages secured by real estate) ("Qualified REIT Assets"), government assets, cash and cash items. We expect that substantially all of our assets will continue to be Qualified REIT Assets. On the last day of each calendar quarter, of the assets not included in the foregoing 75% assets test, the value of mortgage-backed securities that we hold issued by any one issuer may not exceed 5% in value of our total assets and we may not own more than 10% of any one issuer's outstanding securities (with an exception for a qualified electing TRS). Under that exception, the aggregate value of business that we may undertake through TRSs is limited to 20% or less of our total assets. We monitor the purchase and holding of our assets in order to comply with the above asset tests.

We may from time to time hold, through one or more TRSs, assets that, if we held directly, could generate income that would have an adverse effect on our qualification as a REIT or on certain classes of our stockholders.

Sources of Income

We must meet the following separate income-based tests each year:

1. The 75% Test. At least 75% of our gross income for the taxable year must be derived from Qualified REIT Assets including interest (other than interest based in whole or in part on the income or profits of any person) on obligations secured by mortgages on real property or interests in real property. The investments that we have made and will continue to make will give rise primarily to mortgage interest qualifying under the 75% income test.

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

2. The 95% Test. In addition to deriving 75% of our gross income from the sources listed above, at least an additional 20% of our gross income for the taxable year must generally be derived from those sources, or from dividends, interest or gains from the sale or disposition of stock or other assets that are not dealer property. We intend to limit substantially all of the assets that we acquire (other than stock in certain affiliate corporations as discussed below) to Qualified REIT Assets. Our strategy to maintain REIT status may limit the type of assets, including certain hedging contracts and other assets, that we otherwise might acquire.

12

Distributions

We must distribute to our stockholders on a pro rata basis each year an amount equal to at least (i) 90% of our taxable income before deduction of dividends paid and excluding net capital gain, plus (ii) 90% of the excess of the net income from foreclosure property over the tax imposed on such income by the Code, less (iii) any "excess noncash income." We intend to make distributions to our stockholders in sufficient amounts to meet the distribution requirement.

Taxation of Stockholders

For any taxable year in which we are treated as a REIT for federal income tax purposes, the amounts that we distribute to our stockholders out of current or accumulated earnings and profits will be includable by the stockholders as ordinary income for federal income tax purposes unless properly designated by us as capital gain dividends. Our distributions will not be eligible for the dividends received deduction for corporations and generally will not be treated as "qualified dividend income" eligible for reduced rates. Stockholders may not deduct any of our net operating losses or capital losses.

If we make distributions to our stockholders in excess of our current and accumulated earnings and profits, those distributions will be considered first a tax-free return of capital, reducing the tax basis of a stockholder's shares until the tax basis is zero. Such distributions in excess of the tax basis will be taxable as gain realized from the sale of our shares.

In reading this report on Form 10-K/A and the tax disclosure set forth above, please note that although the Company is combined with all of its subsidiaries for financial accounting purposes, for federal income tax purposes, only AHM Investment and AHM Acceptance (and their assets and income) constitute the REIT, and the Company's remaining subsidiaries constitute a separate consolidated group subject to regular corporate income taxes.

The provisions of the Code are highly technical and complex. This summary is not intended to be a detailed discussion of the Code or its rules and regulations, or of related administrative and judicial interpretations. We have not obtained a ruling from the Internal Revenue Service with respect to tax considerations relevant to our organization or operation, or to an acquisition of our stock. This summary is not intended to be a substitute for prudent tax planning and each of our stockholders is urged to consult his or her own tax advisor with respect to these and other federal, state, local and foreign tax consequences of the acquisition, ownership and disposition of shares of our stock and any potential changes in applicable law.

Taxation of AHM Investment

In each year that AHM Investment qualifies as a REIT, it generally will not be subject to federal income tax on that portion of its REIT taxable income or capital gain that it distributes to stockholders. AHM Investment is subject to

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

corporate level taxation on any undistributed income. In addition, AHM Investment faces corporate level taxation due to any failure to make timely distributions, on the built-in gain on assets acquired from a taxable corporation such as a TRS, on the income from any property that it takes in foreclosure and on which it makes a foreclosure property election, and on the gain from any property that is treated as "dealer property" in AHM Investment's hands.

ITEM 2. PROPERTIES

The Company's executive offices and principal administrative offices occupy approximately 177,000 square feet located at 538 Broadhollow Road, Melville, New York 11747, an office building that the Company purchased on November 25, 2003.

In addition, the Company owns an office building located at 950 North Elmhurst Road, Mt. Prospect, Illinois 60056, which consists of approximately 35,700 square feet.

As of December 31, 2004, the Company leased real estate premises at an additional 520 locations in 44 states, ranging in size from 100 to 55,423 square feet with remaining lease terms ranging from one month to six years. The aggregate annual rent for these locations is approximately \$23.5 million.

ITEM 3. LEGAL PROCEEDINGS

In the ordinary course of its business, the Company is from time to time subject to various legal proceedings. The Company does not believe that any of its current legal proceedings, individually or in the aggregate, will have a material adverse effect on its operations or financial condition.

Columbia National, Incorporated

As previously reported in our Current Report on Form 8-K dated June 21, 2004 and our Quarterly Report on Form 10-Q for the quarter ended June 30, 2004, in June of 2002, the Company acquired Columbia National, Incorporated, a Maryland corporation ("Columbia"), which is currently a subsidiary of the Company, and which changed its name in July of 2004 to "American Home Mortgage Servicing,

13

Inc." Prior to the Company's acquisition of Columbia, Columbia discovered fraudulent loan activity at its Bensalem, Pennsylvania, office and notified the U.S. Department of Housing and Urban Development ("HUD"). HUD then instituted an investigation into the loan originations of the Bensalem office. Shortly thereafter, several years before Columbia was acquired by the Company, Columbia closed the Bensalem office and terminated the employees involved in the alleged fraudulent activity. In 2000, Columbia settled with HUD, paying a fine to HUD in the amount of \$24,000 and agreeing to indemnify HUD for certain losses. Columbia, as loan servicer for institutional investors, subsequently made FHA insurance claims with respect to approximately 60 loans that were originated by the Bensalem office between 1997 and 1999. The federal government is now seeking to recover insurance proceeds paid in connection with certain of those claims, along with potentially applicable fines and penalties. The Company is cooperating fully with respect to the federal government's review of these loans. While the amount of any potential settlement is not known at this time, the Company does not expect that such amount will materially affect its financial condition or results of operations.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

The Company did not submit any matter to a vote of its security holders during the quarter ended December 31, 2004.

14

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

The Company's common stock is listed on the NYSE under the symbol "AHM" and began trading on the NYSE on December 4, 2003. The Company's trading symbol on the NYSE has been "AHM" since June 1, 2004. From December 4, 2003, until June 1, 2004, the Company's common stock traded on the NYSE under the symbol "AHH." Before our internal reorganization and merger with Apex, effective as of December 3, 2003, AHM Holdings was listed on the Nasdaq National Market under the symbol "AHMH."

The following table shows the high, low and closing sales prices for our common stock during each fiscal quarter during the years ended December 31, 2004 and 2003 and the cash distributions per share declared during each such period:

	Stock Prices			Cash Distrib Declared Per
	High	Low	Close	
Year Ended December 31, 2004				
Fourth Quarter	\$34.50	\$25.00	\$34.25	
Third Quarter	31.65	24.90	27.95	
Second Quarter	29.15	21.80	25.93	
First Quarter	28.85	21.10	28.80	
Year Ended December 31, 2003				
Fourth Quarter	\$25.27	\$17.50	\$22.51	
Third Quarter	23.90	14.88	17.57	
Second Quarter	21.20	9.94	19.36	
First Quarter	10.90	9.56	10.01	

As of March 9, 2005, the closing sales price of the Company's common stock, as reported on the NYSE, was \$32.01. As of March 9, 2005, the Company had 275 holders of record, and approximately 20,000 beneficial owners, of its common stock.

Dividends are payable on the last calendar day of each January, April, July and October on the Company's 9.75% Series A Cumulative Redeemable Preferred Stock, liquidation preference \$25.00 per share ("Series A Preferred Stock"), and 9.25% Series B Cumulative Redeemable Preferred Stock, liquidation preference \$25.00 per share ("Series B Preferred Stock"). The Series A Preferred Stock and Series B Preferred Stock rank senior to our common stock with respect to dividend rights, redemption rights and rights upon our voluntary or involuntary liquidation, dissolution or winding up. The terms of the Series A Preferred Stock and Series B Preferred Stock require that all accumulated dividends in arrears be paid prior to the payment of any dividends on our common stock.

To maintain our qualification as a REIT, we intend to make regular quarterly

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

distributions to our stockholders. In order to qualify as a REIT for federal income tax purposes, we must distribute to our stockholders with respect to each year at least 90% of our taxable income. Although we generally intend to distribute to our stockholders each year an amount equal to our taxable income for that year, distributions paid by us will be at the discretion of our Board of Directors and will depend on, among other things, our actual cash flow, our financial condition, capital requirements, the annual distribution requirements under the REIT provisions of the Code, as well as any other factors that our Board of Directors deems relevant.

Securities Authorized for Issuance Under Equity Compensation Plans

Information regarding our equity compensation plans as of December 31, 2004 is disclosed in Item 12 of this report, "Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters."

15

Recent Issuances of Unregistered Securities

The following is a description of the Company's securities that were not registered under the Securities Act of 1933, as amended (the "Securities Act"), which were sold during the quarter ended December 31, 2004:

The Company acquired First Home Mortgage Corp., an independent mortgage lender based in metropolitan Chicago ("First Home"), on June 30, 2000. In addition to the shares paid to former First Home stockholders as initial consideration, the Company is required to issue unregistered shares of common stock to the former stockholders as additional consideration under the earnout provisions of the merger agreement. Pursuant to these earnout provisions, in October of 2004, November of 2004 and December of 2004, the Company issued an aggregate of 1,853, 2,462 and 17,984, respectively, to such stockholders as additional consideration. These issuances were exempt from registration under Section 4(2) of the Securities Act because they were pursuant to the terms of a private transaction rather than through a public offering.

16

ITEM 6. SELECTED FINANCIAL DATA

The following selected financial data as of December 31, 2004 and 2003 and for the years ended December 31, 2004, 2003 and 2002 have been derived from our audited consolidated financial statements, beginning on page F-1 of this report. The selected financial data as of December 31, 2002, 2001 and 2000 and for the years ended December 31, 2001 and 2000 have been derived from prior year audited consolidated financial statements. The following selected consolidated financial data as of and for each of the years in the three-year period ended December 31, 2002 is derived from the consolidated financial statements of AHM Holdings. These consolidated financial statements include all adjustments which we consider necessary for a fair presentation of our consolidated financial position and results of operations for these periods. You should not assume that the results below indicate results that we will achieve in the future, particularly because in the future we expect net interest income, rather than gain on sales of loans, to be the principal component of our revenues. The operating data are derived from unaudited financial information that we compiled.

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

You should read the information below along with all the other financial information and analysis presented in this report, including, but not limited to, our financial statements and related notes, and "Management's Discussion and Analysis of Financial Condition and Results of Operations."

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Management's Discussion and Analysis reflects the restatement of our consolidated financial statements, as discussed in Note 25 to the consolidated financial statements.

Critical Accounting Policies and Estimates

Our accounting policies are described in Note 1 to the Consolidated Financial Statements. We have identified the following accounting policies that are critical to the presentation of our financial statements and that require critical accounting estimates by management.

Mortgage-Backed Securities - We record our mortgage-backed securities at fair value. The fair values of our mortgage-backed securities are generally based on market prices provided by certain dealers who make markets on these financial instruments.

Mortgage Loans Held for Sale - Mortgage loans held for sale are carried at the lower of cost or aggregate market value. For mortgage loans held for sale that are hedged with forward sale commitments, the carrying value is adjusted for the change in market during the time the hedge was deemed to be highly effective. The market value is determined by outstanding commitments from investors or current yield requirements calculated on an aggregate basis.

Mortgage Servicing Rights ("MSRs") - When we acquire servicing assets through either purchase or origination of loans and sell or securitize those loans with servicing assets retained, the total cost of the loans is allocated to the servicing assets and the loans (without the servicing assets) based on their relative fair values. The amount attributable to the servicing assets is capitalized as MSRs on the consolidated balance sheets. The MSRs are amortized to expense in proportion to and over the period of estimated net servicing income.

The MSRs are assessed for impairment based on the fair value of those assets. We estimate the fair value of the servicing assets by obtaining market information from a primary MSR broker. When the book value of capitalized servicing assets

exceeds their fair value, impairment is recognized through a valuation allowance. In determining impairment, the mortgage servicing portfolio is stratified by the predominant risk characteristic of the underlying mortgage loans. We have determined that the predominant risk characteristic is the interest rate on the underlying loan. We measure impairment for each stratum by comparing the estimated fair value to the recorded book value. Temporary impairment is recorded through a valuation allowance and amortization expense in the period of occurrence. In addition, we periodically evaluate our MSR for other than temporary impairment to determine if the carrying value before the application of the valuation allowance is recoverable. We receive a sensitivity analysis of the estimated fair value of our MSR assuming a 200-basis-point instantaneous increase in interest rates from an independent MSR broker. The fair value estimate includes changes in market assumptions that would be expected given the increase in mortgage rates (e.g., prepayment speeds would be lower). We believe this 200-basis-point increase in mortgage rates to be an appropriate threshold for determining the recoverability of the temporary impairment because that size rate increase is foreseeable and consistent with historical mortgage rate fluctuations. When using this instantaneous change in rates, if the fair value of the strata of MSR is estimated to increase to a point where all of the impairment would be recovered, the impairment is considered to be temporary. When we determine that a portion of the MSR is not recoverable, the related MSR and the previously established valuation allowance are correspondingly reduced to reflect other than temporary impairment.

Derivative Assets and Derivative Liabilities - Our mortgage-committed pipeline includes interest rate lock commitments ("IRLCs") that have been extended to borrowers who have applied for loan funding and meet certain defined credit and underwriting criteria. IRLCs associated with loans expected to be sold are recorded at fair value with changes in fair value recorded to current earnings. The fair value of the IRLCs initiated on or before March 31, 2004 is determined by an estimate of the ultimate gain on sale of the loans, including the value of MSR, net of estimated net costs remaining to originate the loan and any net deferred origination costs. In March 2004, the SEC issued Staff Accounting Bulletin No. 105 ("SAB No. 105"), which provides industry guidance which changed the timing of recognition of MSR for IRLCs initiated after March 31, 2004. In SAB No. 105, the SEC stated that the value of expected future cash flows related to servicing rights should be excluded when determining the fair value of derivative IRLCs. Under the new policy, the value of the expected future cash flows related to servicing rights is not recognized until the underlying loans are sold.

19

We use other derivative instruments, including mortgage forward delivery contracts and treasury futures options, to economically hedge the IRLCs, which are also classified and accounted for as free-standing derivatives and thus are recorded at fair value with the changes in fair value recorded to current earnings.

We use mortgage forward delivery contracts designated as fair value hedging instruments to hedge 100% of our agency-eligible conforming fixed-rate loans and most of our non-conforming fixed-rate loans held for sale. At the inception of the hedge, we formally document the relationship between the forward delivery contracts and the mortgage inventory, as well as our objective and strategy for undertaking the hedge transactions. In the case of our conventional conforming fixed-rate loan products, the notional amount of the forward delivery contracts, along with the underlying rate and terms of the contracts, are equivalent to the unpaid principal amount of the mortgage inventory being hedged; hence, the forward delivery contracts effectively fix the forward sales price and thereby substantially eliminate interest rate and price risk to us. We classify and account for these forward delivery contracts as fair value hedges. The

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

derivatives are carried at fair value with the changes in fair value recorded to current earnings. When the hedges are deemed to be highly effective, the book value of the hedged loans held for sale is adjusted for its change in fair value during the hedge period.

We enter into interest rate swap agreements to manage our interest rate exposure when financing our adjustable-rate mortgage loans and mortgage-backed securities. Certain swap agreements accounted for as cash flow hedges and certain swap agreements not designated as cash flow hedges are both carried on the balance sheet at fair value. The fair values of our swap agreements are generally based on market prices provided by certain dealers who make markets in these financial instruments or third-party pricing services.

Goodwill - Goodwill represents the excess purchase price over the fair value of net assets stemming from business acquisitions, including identifiable intangibles. We test for impairment, at least annually, by comparing the fair value of goodwill, as determined by using a discounted cash flow method, with its carrying value. Any excess of carrying value over the fair value of the goodwill would be recognized as an impairment loss in continuing operations. The discounted cash flow calculation related to our loan origination segment includes a forecast of the expected future loan originations and the related revenues and expenses. The discounted cash flow calculation related to our Mortgage-Backed Securities Holdings segment includes a forecast of the expected future net interest income, gain on mortgage-backed securities and the related revenues and expenses. These cash flows are discounted using a rate that is estimated to be a weighted-average cost of capital for similar companies. We further test to ensure that the fair value of all our business units does not exceed our total market capitalization.

20

Financial Condition

At December 31, 2004, 52.1% of our total assets were mortgage-backed securities and 42.0% were mortgage loans held for sale, compared to 51.8% and 35.7%, respectively, at December 31, 2003.

Total assets increased \$8.2 billion to \$11.6 billion at December 31, 2004 from \$3.4 billion at December 31, 2003. The increase primarily reflects an increase in mortgage-backed securities of \$4.3 billion and an increase in mortgage loans held for sale of \$3.6 billion. The growth in mortgage-backed securities and mortgage loans held for sale was primarily funded by an increase in reverse repurchase agreements of \$5.7 billion and an increase in collateralized debt obligations of \$2.0 billion. We began issuing commercial paper in the quarter ended June 30, 2004, to fund our loans held for sale. As of December 31, 2004, we had \$529.8 million of commercial paper outstanding, which allowed us to reduce the amount of loans funded by warehouse lines of credit.

The following table summarizes our mortgage-backed securities owned at December 31, 2004 and 2003, classified by type of issuer and by ratings categories:

Total	\$ 479,813	100.0%	\$ 1,283,815	100.0%	\$ 1

During the year ended December 31, 2004, we purchased \$5.3 billion of mortgage-backed securities and added \$3.9 billion of self-originated mortgage-backed securities to our portfolio.

During the year ended December 31, 2004, we sold \$3.6 billion of mortgage-backed securities. Of the mortgage-backed securities sold, \$2.0 billion were created by our securitizations and \$1.6 billion were market-purchased.

The average cost basis of our mortgage-backed securities, excluding unrealized gains and losses, was 100.8% of par as of December 31, 2004 and 101.5% of par as of December 31, 2003.

We had a payable for securities purchased of \$259.7 million as of December 31, 2003.

23

Results of Operations

Comparison of the Years Ended December 31, 2004 and 2003

Overview

Net income for the year ended December 31, 2004 was \$74.9 million compared to \$73.8 million for the year ended December 31, 2003, an increase of \$1.1 million, or 1.5%. This increase was the result of a \$73.8 million decrease in income tax expense and a \$63.9 million increase in net interest income, partly offset by a \$130.8 million decrease in non-interest income and a \$5.8 million increase in non-interest expenses. The \$130.8 million decrease in non-interest income consists of a \$242.5 million decrease in gain on sales of mortgage loans which includes a \$30.7 million reduction associated with the Company's adoption of SAB No. 105, and a \$0.2 million decrease in other non-interest income, partly offset by a \$70.0 million increase in realized and unrealized gains on mortgage-backed securities and derivatives, a \$40.0 million increase in gain on securitizations of mortgage loans and a 1.9 million increase in net loan servicing fees in 2004 versus 2003.

Net Interest Income

The following table presents the average balances for our interest-earning assets, interest-bearing liabilities, corresponding annualized effective rates of interest and the related interest income or expense:

(Dollars in thousands)

		Year Ended December 31,	
		----- 2004 -----

Reverse repurchase agreements	1,022	122,985	124,007
Collateralized debt obligations	--	1,775	1,775
Notes payable	216	2,104	2,320

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

Interest expense	11,652	132,735	144,387
Net interest income	\$ (26,571)	\$ 90,473	\$ 63,902

Interest Income: Interest income on mortgage-backed securities for the year ended December 31, 2004 was \$191.5 million, compared to \$2.3 million for the year ended December 31, 2003, a \$189.2 million increase. This increase reflects the commencement of our holding mortgage-backed securities for net interest income on December 3, 2003, as a result of the reorganization of the Company into a REIT and the merger with Apex.

Interest income on our mortgage loans held for sale for the year ended December 31, 2004 was \$122.8 million, compared to \$103.7 million for the year ended December 31, 2003, an increase of \$19.1 million, or 18.4%. The increase in loans held for sale interest income was primarily the result of an increase in average volume, partly offset by a decrease in average rate in 2004 versus 2003.

Interest Expense: We fund our loan inventory primarily through borrowing facilities with several mortgage warehouse lenders and through a \$2.0 billion Secured Liquidity Note ("SLN") program. Interest expense on warehouse lines of credit for the year ended December 31, 2004 was \$53.6 million, compared to interest expense for the year ended December 31, 2003 of \$53.9 million, a \$0.3 million decrease. The decrease in warehouse lines of credit interest expense was primarily the result of a decrease in average volume, partly offset by an increase in average rate in 2004 versus 2003. In May 2004, we formed a wholly-owned special purpose entity for the purpose of issuing commercial paper in the form of SLNs to finance certain portions of our mortgage loans held for sale. Interest expense on commercial paper for the year ended December 31, 2004 was \$16.5 million. The increase in commercial paper interest expense was due to borrowings in the year ended December 31, 2004 used to fund our increased loan inventory.

We have borrowed funds under reverse repurchase agreements, a form of collateralized short-term borrowing, with nine different financial institutions as of December 31, 2004. We borrow funds under these arrangements based on the fair value of our mortgage-backed securities. Total interest expense on reverse repurchase agreements for the year ended December 31, 2004 was

25

\$124.6 million, compared to interest expense for the year ended December 31, 2003 of \$0.6 million, a \$124.0 million increase. The increase in reverse repurchase agreements interest expense in 2004 versus 2003 was primarily the result of an increase in borrowings used to fund the growth of our mortgage-backed securities portfolio.

Gain on Mortgage Loans, Mortgage-Backed Securities and Derivatives

Gain on Sales of Mortgage Loans: Gain on sales of mortgage loans for the year ended December 31, 2004 totaled \$134.1 million on non-securitized loans sales of \$13.7 billion, compared to \$376.6 million on loan sales of \$20.8 billion for the year ended December 31, 2003. Prior to our conversion into a Real Estate Investment Trust ("REIT") in December 2003, our business strategy was to sell substantially all of the loans that we originated and recognize gain on sales of such loans. The decline in volume of loans sold in 2004 versus 2003 reflects our discontinued strategy of selling virtually all of the loans that we originated. The average gain on sale margin decreased to 0.98% in 2004 from 1.81% in 2003.

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

The decline in average margin reflects higher broker fee expenses included as a reduction to gain on sale of loans as a result of the increased percentage of wholesale originations in 2004 versus the 2003 period. The change in fair value of IRLCs and mortgage loans held for sale included in gain on sales of mortgage loans in the year ended December 31, 2004 was reduced by \$30.7 million, or 0.27% of non-securitized loan sales, on a pre-tax basis as a result of our adoption of SAB No. 105.

Gain on Securitizations of Mortgage Loans: Gain on securitizations of mortgage loans totaled \$40.1 million during the year ended December 31, 2004 compared to \$0.1 million during the year ended December 31, 2003. These gains reflect the gains that existed on the date of securitization of self-originated loans relating to the sale of resultant securities. We securitized loans totaling \$9.3 billion during the year ended December 31, 2004, of which \$1.9 billion were accounted for as sales, compared to \$521.7 million of total securitized loans during the year ended December 31, 2003, of which \$22.1 million were accounted for as sales. The increased volume of loans securitized in 2004 versus 2003 reflects our business strategy since our REIT conversion to securitize ARM loans that we originate. The remaining \$7.4 billion of securitized loans in 2004 consists of \$3.9 billion of mortgage-backed securities and \$3.5 billion of mortgage loans collateralizing debt obligations created with the execution of securitization transactions.

Gain on Sales of Mortgage-Backed Securities and Derivatives: Gain on sales of mortgage-backed securities and derivatives totaled \$0.1 million on mortgage-backed securities sales of \$3.6 billion during the year ended December 31, 2004, compared to \$2.2 million on mortgage-backed securities sales of \$507.2 million during the year ended December 31, 2003. These gains reflect the realized gains or losses on sales of mortgage-backed securities created by our securitizations, sales of market-purchased mortgage-backed securities and sales of related interest rate swaps.

Unrealized Gain on Mortgage-Backed Securities and Derivatives: We recognized \$75.5 million of unrealized gain on mortgage-backed securities and derivatives relating to market valuations of mortgage-backed securities and derivatives classified in the trading portfolio during the year ended December 31, 2004, compared to \$3.3 million during the year ended December 31, 2003. During the year ended December 31, 2004, unrealized gain on mortgage-backed securities and derivatives includes \$67.8 million of unrealized gain on mortgage-backed securities that existed on the date of securitization, \$23.1 million of mark-to-market unrealized loss on our mortgage-backed securities portfolio and \$30.8 million of unrealized gain on related interest rate swaps.

Net Loan Servicing Fees

Net loan servicing fees were a loss of \$4.5 million for the year ended December 31, 2004, compared to a loss of \$6.4 million for the year ended December 31, 2003.

Loan Servicing Fees: Loan servicing fees increased to \$40.6 million for the year ended December 31, 2004 from \$39.1 million for the year ended December 31, 2003, an increase of \$1.5 million, or 3.7%. Included in loan servicing fees are gains on Ginnie Mae early buy-out sales of \$4.5 million for the year ended December 31, 2004 compared to \$11.4 million for the year ended December 31, 2003, a decrease of \$6.9 million, or 60.5%. This decrease partly offset the increase in loan servicing fees in 2004 period versus 2003 as a result of an increase in loans serviced for others.

Amortization of MSRs: Amortization of MSRs decreased to \$32.6 million for the year ended December 31, 2004 from \$51.8 million for the year ended December 31, 2003, a decrease of \$19.2 million, or 37.1%. The decrease in amortization was

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

due to a higher interest rate environment, which resulted in slower projected prepayment speeds in the year ended December 31, 2004 versus the year ended December 31, 2003.

Impairment (Provision) Recovery of MSRs: We recognized a temporary impairment provision of \$12.4 million for the year ended December 31, 2004 versus a temporary impairment recovery of \$6.3 million for the year ended December 31, 2003, resulting in a

26

decrease in net loan servicing fees of \$18.7 million. The increase in impairment provision in the year ended December 31, 2004 was due to a decrease in the fair value of MSRs, which was attributable to a subsequent increase in estimated future prepayment speeds versus the initial estimated future prepayment speeds used to value the MSR upon securitization.

Other Non-Interest Income

Other non-interest income totaled \$7.0 million for the year ended December 31, 2004 compared to \$7.2 million for the year ended December 31, 2003. For the year ended December 31, 2004, other non-interest income primarily includes rental income of \$2.1 million, reinsurance premiums earned totaling approximately \$1.8 million, income from a legal settlement of \$1.5 million and revenue from title services of \$1.0 million. For the year ended December 31, 2003, other non-interest income primarily includes revenue from title services of \$2.2 million, fulfillment fees of \$1.9 million and volume incentive bonuses received from loan purchasers totaling approximately \$1.4 million. The fulfillment fees represent non-recurring fees received from Principal Residential Mortgage, Inc. ("PRM") for loans closed by us on behalf of PRM in connection with our acquisition of the retail mortgage lending branches of PRM in June of 2003. As part of the agreement to acquire the retail branches of PRM, we agreed to assume the costs incurred to close out PRM's application pipeline as of the date of the agreement on behalf of PRM for a per-loan fee.

Non-Interest Expenses

Our non-interest expenses for the year ended December 31, 2004 were \$315.9 million, compared to \$310.1 million for the year ended December 31, 2003, an increase of \$5.8 million, or 1.9%.

Our operating expenses represent costs that are not eligible to be added to the book value of the loans because they are not considered to be certain direct origination costs under the rules of Statement of Financial Accounting Standards ("SFAS") No. 91, "Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Costs of Leases." Direct origination costs are added to the book value of loans and either reduce the gain on sale of loans if the loans are sold or are amortized over the life of the loan.

Salaries, Commissions and Benefits, net: Salaries, commissions and benefits, net, for the year ended December 31, 2004 were \$189.4 million, compared to \$204.9 million for the year ended December 31, 2003, a decrease of \$15.5 million, or 7.6%. The decrease in expenses reflects the higher percentage of wholesale originations in 2004 versus 2003.

Other Operating Expenses: Operating expenses, excluding salaries, commissions and benefits, were \$126.5 million for the year ended December 31, 2004 compared to \$105.2 million for the year ended December 31, 2003, an increase of \$21.3 million, or 20.3%. The increase in operating expenses in 2004 versus 2003

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

includes a \$10.6 million increase in occupancy and equipment expense. The operating expenses in the year ended December 31, 2004 include lease obligations and certain fixed asset expenses relating to our acquisition of certain residential home loan centers and associated satellite offices of Washington Mutual, Inc. in August of 2004.

Income Tax (Benefit) Expense

Income tax expense decreased to a benefit of \$25.6 million for the year ended December 31, 2004, from an expense of \$48.2 million for the year ended December 31, 2003, a decrease of \$73.8 million. The decrease in income tax expense in 2004 versus 2003 reflects a decrease in income before income taxes relating to our TRS.

Loan Originations

We originate and sell or securitize one-to-four family residential mortgage loans. Total loan originations for the year ended December 31, 2004 were \$23.1 billion compared to \$21.7 billion for the year ended December 31, 2003, a 6.3% increase. Our retail originations, which are conducted through our community loan production offices and Internet call center, were 49% of our loan originations in the year ended December 31, 2004 compared to 76% of our originations in the year ended December 31, 2003. Mortgage brokers accounted for 51% of our loan originations in the year ended December 31, 2004 compared to 24% of our originations in the year ended December 31, 2003. Mortgage brokers accounted for an increased percentage of our originations in the year ended December 31, 2004 due to the opening of wholesale branches in the western United States.

27

Comparison of the Years Ended December 31, 2003 and 2002

Overview

Net income for the year ended December 31, 2003 was \$73.8 million, compared to \$39.5 million for the year ended December 31, 2002, an increase of \$34.3 million, or 86.9%. This increase was the result of a \$175.2 million increase in non-interest income, a \$24.2 million increase in net interest income, partly offset by a \$144.9 million increase in non-interest expenses and a \$20.2 million increase in income tax expense. The \$175.2 million increase in non-interest income consists of a \$160.0 million increase in gain on sales of mortgage loans, a \$5.5 million increase in realized and unrealized gains on mortgage-backed securities and derivatives, a \$6.4 million increase in net loan servicing fees, a \$3.1 million increase in other non-interest income and a \$0.2 million increase in gain on securitizations of mortgage loans in 2003 versus 2002.

Net Interest Income

Interest Income: Total interest income for 2003 was \$106.0 million, compared to \$55.9 million for 2002, an increase of \$50.1 million, or 89.8%. The increase was primarily due to higher average loan inventory in 2003. In 2003 and 2002, we funded our loan inventory primarily through borrowing facilities with several mortgage warehouse lenders.

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

We began the holding for net interest income of ARM-backed securities on December 3, 2003, as a result of the reorganization of the Company into a REIT and the merger with Apex. The total interest income on mortgage-backed securities for 2003 was \$2.3 million.

Interest Expense: Total interest expense for 2003 was \$57.0 million, compared to interest expense for 2002 of \$31.0 million, an 83.6% increase, which was primarily due to increased warehouse lines of credit borrowings to fund our large loan inventory.

Gain on Mortgage Loans, Mortgage-Backed Securities and Derivatives

Gain on Sales of Mortgage Loans: Our primary source of revenue in the years ended December 31, 2003 and 2002 was the gain on sales of mortgage loans originated by us. Gain on sales of mortgage loans for 2003 totaled \$376.6 million on loan sales of \$20.8 billion, compared with \$216.6 million on sales of \$12.3 billion for 2002. The average gain on sale margin increased to 1.81% for 2003 from 1.76% for 2002.

Gain on Securitizations of Mortgage Loans: Gain on securitizations of mortgage loans totaled \$0.1 million on loan securitizations of \$22.1 million during the year ended December 31, 2003. These gains reflect the gains that existed on the date of securitization of self-originated loans.

Gain on Sales of Mortgage-Backed Securities: During the year ended December 31, 2003, we sold \$507.2 million of mortgage-backed securities and recognized \$2.2 million of net gains.

Unrealized Gain on Mortgage-Backed Securities: We recognized \$3.3 million of unrealized gain on mortgage-backed securities relating to market valuations of mortgage-backed securities classified in our trading portfolio.

Net Loan Servicing Fees

Net loan servicing fees were a loss of \$6.4 million for the year ended December 31, 2003, compared to a loss of \$12.8 million for the year ended December 31, 2002.

Loan Servicing Fees: Loan servicing fees increased to \$39.1 million in the year ended December 31, 2003 from \$23.9 million in the year ended December 31, 2002, an increase of \$15.2 million, or 63.2%. The increase was primarily the result of the inclusion of Columbia National, Incorporated ("CNI") (currently known as American Home Mortgage Servicing, Inc.), a company that we acquired in June of 2002, for the full year in 2003.

Amortization of MSR's: Amortization of MSR's increased to \$51.8 million in the year ended December 31, 2003 from \$26.4 million in the year ended December 31, 2002, an increase of \$25.4 million, or 96.2%. The increase was primarily the result of the inclusion of CNI for the full year in 2003.

Impairment (Provision) Recovery of MSR's: We recognized a temporary impairment recovery of \$6.3 million in the year ended December 31, 2003 versus an impairment provision of \$10.3 million in the year ended December 31, 2002, resulting in an increase in net loan servicing fees of \$16.6 million. This impairment recovery is due to an increase in the fair value of MSR's attributable to a decrease in estimated future prepayment speeds.

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

Other Non-Interest Income

Other non-interest income totaled \$7.2 million in 2003 compared to \$4.1 million in 2002. For the year ended December 31, 2003, other income primarily includes revenue from title services of \$2.2 million, fulfillment fees of \$1.9 million and volume incentive bonuses received from loan purchasers totaling approximately \$1.4 million. The fulfillment fees represent non-recurring fees received from PRM for loans closed by us on behalf of PRM. As part of the agreement to acquire the retail branches of PRM, we agreed to assume the costs incurred to close out PRM's application pipeline as of the date of the agreement on behalf of PRM for a per-loan fee. For the year ended December 31, 2002, other income primarily consists of revenue from title services of \$1.9 million and volume incentive bonuses received from loan purchasers totaling approximately \$0.8 million.

Non-Interest Expenses

Our non-interest expenses for the year ended December 31, 2003 were \$310.1 million, compared to \$165.3 million for the year ended December 31, 2002, an increase of \$144.8 million, or 87.7%. We made significant investments in our infrastructure, particularly in information technology and corporate services, to support the growth of our loan origination business. Our non-interest expenses in the year ended December 31, 2003 include a full year of expenses associated with the administration of the servicing portfolio acquired through our acquisition of CNI in June of 2002.

Our operating expenses represent costs that are not eligible to be added to the book value of the loans because they are not considered direct origination costs under the rules of SFAS No. 91, "Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Costs of Leases." Direct origination costs are added to the book value of loans and either reduce the gain on sale of loans if the loans are sold or are amortized over the life of the loan.

Salaries Commissions and Benefits, net: Salaries, commissions and benefits, net, for the year ended December 31, 2003 were \$204.9 million, compared to \$106.9 million for the year ended December 31, 2002, an increase of \$98.0 million, or 91.7%.

Other Operating Expenses: Operating expenses, excluding salaries, commissions and benefits, were \$105.2 million for the year ended December 31, 2003, compared to \$58.4 million for the year ended December 31, 2002, an increase of \$46.8 million, or 80.2%.

Income Tax Expense

Income tax expense increased to \$48.2 million for the year ended December 31, 2003, from \$28.1 million for the year ended December 31, 2002, an increase of \$20.1 million. The increase in income tax expense in 2003 versus 2002 reflects an increase in income before income taxes relating to our TRS.

Loan Originations

In 2003, our primary business was the origination and sale of primarily one-to-four family residential mortgage loans. Our origination segment grew significantly in 2003 both organically and through acquisitions. The historically low interest rates of 2003 resulted in record loan originations

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

industry-wide as record numbers of borrowers refinanced their mortgages and purchased new homes. During 2003, we acquired 75 retail branches of PRM and the retail and wholesale branches of American Mortgage LLC, and also hired 325 former employees of Capitol Commerce Mortgage Company. Total loan originations for 2003 were \$21.7 billion compared to \$12.2 billion for 2002, a 77.9% increase. At December 31, 2003, the segment had 272 loan origination offices and 2,791 employees, compared to 131 loan origination offices and 2,528 employees at December 31, 2002.

Liquidity and Capital Resources

We have arrangements to enter into reverse repurchase agreements, a form of collateralized short-term borrowing, with thirteen different financial institutions and on December 31, 2004 had borrowed funds from nine of these firms. Because we borrow money under these agreements based on the fair value of our mortgage-backed securities, and because changes in interest rates can negatively impact the valuation of mortgage-backed securities, our borrowing ability under these agreements could be limited and lenders could initiate margin calls in the event interest rates change or the value of our mortgage-backed securities declines for other reasons.

As of December 31, 2004, we had \$7.1 billion of reverse repurchase agreements outstanding with a weighted-average borrowing rate of 2.13% before the impact of interest rate swaps and a weighted-average remaining maturity of 2.5 months.

29

To originate a mortgage loan, we draw against a \$2.0 billion Secured Liquidity Note Program, a \$1.2 billion pre-purchase facility with UBS Real Estate Securities Inc. ("UBS"), a \$600 million bank syndicated facility led by Bank of America (which includes a \$150.0 million term loan facility which we use to finance our MSR's), a \$450 million facility with CDC Mortgage Capital Inc. ("CDC"), a facility of \$350 million with Morgan Stanley Bank ("Morgan Stanley"), a facility of \$250 million with Lehman Brothers, a facility of \$500 million with Bear Stearns and a facility of \$250 million with Calyon Americas. In addition, we have a gestation facility with Greenwich Capital Financial Products, Inc. ("Greenwich"). These facilities are secured by the mortgages owned by us and by certain of our other assets. Advances drawn under the facilities bear interest at rates that vary depending on the type of mortgages securing the advances. These loans are subject to sublimits, advance rates and terms that vary depending on the type of securing mortgages and the ratio of our liabilities to our tangible net worth. At March 9, 2005, the aggregate outstanding balance under the warehouse facilities was approximately \$2.0 billion, the aggregate outstanding balance in drafts payable was approximately \$15.6 million and the aggregate maximum amount available for additional borrowings was approximately \$2.1 billion.

The documents governing our warehouse facilities contain a number of compensating balance requirements and restrictive financial and other covenants that, among other things, require us to adhere to a maximum ratio of total liabilities to tangible net worth and maintain a minimum level of tangible net worth and liquidity, as well as to comply with applicable regulatory and investor requirements. The facility agreements also contain covenants limiting the ability of our subsidiaries to transfer or sell assets other than in the ordinary course of business and to create liens on the collateral without obtaining the prior consent of the lenders, which consent may not be unreasonably withheld.

In addition, under our warehouse facilities, we cannot continue to finance a mortgage loan that we hold if:

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

- o the loan is rejected as "unsatisfactory for purchase" by the ultimate investor and has exceeded its permissible 120-day warehouse period;
- o we fail to deliver the applicable mortgage note or other documents evidencing the loan within the requisite time period;
- o the underlying property that secures the loan has sustained a casualty loss in excess of 5% of its appraised value; or
- o the loan ceases to be an eligible loan (as determined pursuant to the applicable warehousing agreement).

As of December 31, 2004, our aggregate warehouse facility borrowings were \$735.8 million (including \$25.5 million of borrowings under a working capital sub-limit) and our outstanding drafts payable were \$26.2 million, compared to \$1.1 billion (including \$29.0 million of borrowings under a working capital sub-limit) and our outstanding drafts payable were \$25.6 million as of December 31, 2003. At December 31, 2004, our loans held for sale were \$1.3 billion compared to \$1.2 billion at December 31, 2003.

In addition to the UBS, CDC, Bank of America, Morgan Stanley, and Calyon Americas warehouse facilities, we have purchase and sale agreements with UBS and Greenwich. These agreements allow us to accelerate the sale of our mortgage loan inventory, resulting in a more effective use of the warehouse facilities. Amounts sold and being held under these agreements at December 31, 2004 and December 31, 2003 were \$443.8 million and \$236.0 million, respectively. The amounts so held under these agreements at March 9, 2005 were \$259.5 million. These agreements are not committed facilities and may be terminated at the discretion of the counterparty.

We make certain representations and warranties under the purchase and sale agreements regarding, among other things, the loans' compliance with laws and regulations, their conformity with the ultimate investors' underwriting standards and the accuracy of information. In the event of a breach of these representations or warranties or in the event of an early payment default, we may be required to repurchase the loans and indemnify the investor for damages caused by that breach. We have implemented strict procedures to ensure quality control and conformity to underwriting standards and minimize the risk of being required to repurchase loans. From time to time we have been required to repurchase loans that we sold; however, the liability for the fair value of those obligations has been immaterial.

We also have a \$150.0 million term loan facility with a bank syndicate led by Bank of America which we use to finance our MSR's. The term loan facility expires on December 14, 2005. Interest is based on a spread to the LIBOR and may be adjusted for earnings on escrow balances. At December 31, 2004 and December 31, 2003, borrowings under our term loan facility were \$108.6 million and \$71.5 million, respectively.

30

We issued adjustable rate collateralized debt obligations, which are collateralized by ARM loans held for sale that have been placed in a trust. The trust receives cash flows from the loans held for sale collateral and uses this cash to make principal and interest payments on the debt.

Cash and cash equivalents increased to \$192.8 million at December 31, 2004, from \$53.1 million at December 31, 2003.

Our primary sources of cash and cash equivalents during the year ended December

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

31, 2004, were as follows:

- o \$5.7 billion increase in reverse repurchase agreements;
- o \$2.0 billion increase in collateralized debt obligations;
- o \$529.8 million increase commercial paper; and
- o \$343.4 million proceeds from issuance of common stock.

Our primary uses of cash and cash equivalents during the year ended December 31, 2004, were as follows:

- o \$4.3 billion increase in mortgage-backed securities;
- o \$3.6 billion increase in mortgage loans held for sale, net;
- o \$386.0 million net decrease in warehouse lines of credit; and
- o \$259.7 million decrease in payable for mortgage-backed securities purchased.

Cash and cash equivalents increased to \$53.1 million at December 31, 2003, from \$24.4 million at December 31, 2002.

Our primary sources of cash and cash equivalents during the year ended December 31, 2003, were as follows:

- o \$1.0 billion increase in reverse repurchase agreements;
- o \$393.3 million increase in warehouse lines of credit; and
- o \$259.7 million increase in payable for mortgage-backed securities purchased.

Our primary uses of cash and cash equivalents during the year ended December 31, 2003, were as follows:

- o \$1.3 billion increase in mortgage-backed securities; and
- o \$391.8 million net increase in mortgage loans held for sale.

Our ability to originate loans depends in large part on our ability to sell these mortgage loans at par or for a premium in the secondary market so that we may generate cash proceeds to repay borrowings under our warehouse facilities. The value of our loans depends on a number of factors, including, but not limited to:

- o interest rates on our loans compared to market interest rates;
- o the borrower credit risk classification;
- o loan-to-value ratios; and
- o general economic conditions.

Inflation

For the period 1997 to 2004, inflation has been relatively low and we believe that inflation has not had a material effect on our results of operations. To the extent inflation increases in the future, interest rates will also likely rise, which would reduce the number of loans we originate. Such a reduction

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

would adversely affect our future results of operations.

31

Off-Balance Sheet Arrangements

As of December 31, 2004, we did not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are reasonably likely to be material to investors.

Contractual Obligations

We had the following contractual obligations (excluding derivative financial instruments) at December 31, 2004:

	Total	Less than 1 Year	1 - 3 Years	4 - 5
	-----	-----	-----	-----
(In thousands)				
Warehouse liabilities	\$ 735,783	\$ 735,783	\$ --	\$ --
Operating leases	70,704	21,793	32,475	--
Notes payable	135,761	109,904	729	--
Commercial paper	529,790	529,790	--	--
Reverse repurchase agreements	7,071,168	7,071,168	--	--
Collateralized debt obligations	2,022,218	--	221,112	1

Risk Management

Movements in interest rates can pose a major risk to us in either a rising or declining interest rate environment. We depend on substantial borrowings to conduct our business. These borrowings are all done at variable interest rate terms which will increase as short-term interest rates rise. Additionally, when interest rates rise, loans held for sale and any applications in process with locked-in rates decrease in value. To preserve the value of such fixed-rate loans or applications in process with locked-in rates, agreements are executed for mandatory loan sales to be settled at future dates with fixed prices. These sales take the form of forward sales of mortgage-backed securities.

When interest rates decline, fallout may occur as a result of customers withdrawing their applications. In those instances, we may be required to purchase loans at current market prices to fulfill existing mandatory loan sale agreements, thereby incurring losses upon sale. We use an interest rate hedging program to manage these risks. Through this program, mortgage-backed securities are purchased and sold forward and options are acquired on treasury futures contracts.

In the event that we do not deliver into the forward delivery commitments or exercise our option contracts, the instruments can be settled on a net basis. Net settlement entails paying or receiving cash based upon the change in market value of the existing instrument. All forward delivery commitments and option contracts to buy securities are to be contractually settled within nine months of the balance sheet date.

Our hedging program contains an element of risk because the counterparties to our mortgage and treasury securities transactions may be unable to meet their

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

obligations. While we do not anticipate nonperformance by any counterparty, we are exposed to potential credit losses in the event the counterparty fails to perform. Our exposure to credit risk in the event of default by a counterparty is the difference between the contract and the current market price. We minimize our credit risk exposure by limiting the counterparties to well-capitalized banks and securities dealers who meet established credit and capital guidelines.

Movements in interest rates also impact the value of MSR's. When interest rates decline, the loans underlying the MSR's are generally expected to prepay faster, which reduces the market value of the MSR's. We consider the expected increase in loan origination volumes and the resulting additional origination related income as a natural hedge against the expected change in the value of MSR's. Lower mortgage rates generally reduce the fair value of the MSR's, as increased prepayment speeds are highly correlated with lower levels of mortgage interest rates.

We enter into interest rate swap agreements ("Swap Agreements") to manage our interest rate exposure when financing our ARM loans and our mortgage-backed securities. We generally borrow money based on short-term interest rates, by entering into borrowings with maturity terms of less than one year, and frequently nine to twelve months. Our ARM loans and mortgage-backed securities financing vehicles generally have an interest rate that reprices based on frequency terms of one to twelve

32

months. Our mortgage-backed securities have an initial fixed interest rate period of three to five years. When we enter into a Swap Agreement, we generally agree to pay a fixed rate of interest and to receive a variable interest rate, generally based on the LIBOR. These Swap Agreements have the effect of converting our variable-rate debt into fixed-rate debt over the life of the Swap Agreements. These instruments are used as a cost-effective way to lengthen the average repricing period of our variable-rate and short-term borrowings such that the average repricing of the borrowings more closely matches the average repricing of our mortgage-backed securities. Our duration gap was 0.07 years as of December 31, 2004.

The following tables summarize our interest rate sensitive instruments as of December 31, 2004 and December 31, 2003:

	December 31, 2004	
	Carrying Amount	Estimated Fair Value
Assets:		
Mortgage-backed securities	\$ 6,016,866	\$ 6,016,866
Derivative assets (1)	24,803	30,838
Mortgage loans held for sale, net	4,853,394	4,931,366
Mortgage servicing rights, net	151,436	152,467
Liabilities:		
Reverse repurchase agreements	\$ 7,071,168	\$ 7,065,072
Collateralized debt obligations	2,022,218	2,022,218
Derivative liabilities	1,860	1,860
	December 31, 2003	
	Carrying	Estimated

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

	Amount	Fair Value
Assets:		
Mortgage-backed securities	\$ 1,763,628	\$ 1,763,628
Derivative assets	30,611	30,611
Mortgage loans held for sale, net	1,216,353	1,218,667
Mortgage servicing rights, net	117,784	117,784
Liabilities:		
Reverse repurchase agreements	\$ 1,344,327	\$ 1,344,327
Derivative liabilities	12,694	12,694

- (1) Derivative assets includes interest rate lock commitments ("IRLCs") to fund mortgage loans. The carrying value excludes the value of the mortgage servicing rights ("MSRs") attached to the IRLCs in accordance with SEC SAB No. 105. The fair value includes the value of MSRs.

Management's fair value estimates are made as of a specific point in time based on present value or other valuation techniques. These techniques involve uncertainties and are significantly affected by the assumptions used and the judgments made regarding risk characteristics of various financial instruments, discount rates, estimates of future cash flows, future expected loss experience and other factors. Changes in assumptions could significantly affect these estimates and the resulting fair values. Derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in an immediate sale of the instrument. Also, because of differences in methodologies and assumptions used to estimate fair values, the fair values used by us should not be compared to those of other companies. A further discussion of the methods and assumptions we use to estimate the above financial instruments is presented in Note 1 to the Consolidated Financial Statements.

33

Newly Issued Accounting Pronouncements

In March 2004, the SEC issued SAB No. 105, which provides guidance regarding loan commitments that are accounted for as derivative instruments under SFAS No. 133 (as amended), "Accounting for Derivative Instruments and Hedging Activities." In SAB No. 105, the SEC stated that the value of expected future cash flows related to servicing rights should be excluded when determining the fair value of derivative IRLCs. This guidance must be applied to derivative IRLCs initiated after March 31, 2004. Under the new policy, the value of the expected future cash flow related to servicing rights is not recognized until the underlying loans are sold. Our results of operations for the year ended December 31, 2004 were reduced \$30.7 million on a pre-tax basis by the adoption of SAB No. 105.

Emerging Issues Task Force ("EITF") Issue No. 03-1, "The Meaning of Other-Than-Temporary Impairment and its Application to Certain Investments" was ratified by the FASB in March 2004. This EITF addresses how to determine the meaning of other-than-temporary impairment and its application to investments classified as either available for sale or held to maturity under SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities" (including individual securities and investments in mutual funds), and investments accounted for under the cost method or the equity method. In September 2004, the FASB delayed the effective date of the portion of this EITF that relates to

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

measuring and recognizing other-than-temporary impairment until implementation guidance is finalized. This delay does not suspend the requirement to recognize other-than-temporary impairment required by existing accounting literature.

In December 2004, the FASB issued SFAS No. 123 (revised 2004), "Share-based Payment" ("SFAS No. 123 Revised"). This statement revises SFAS No. 123, "Accounting for Stock-Based Compensation," and supersedes APB opinion No. 25, "Accounting for Stock Issued to Employees," and its related implementation guidance. The most significant change resulting from this statement is the requirement for public companies to expense employee share-based payments under fair value as originally introduced in SFAS No. 123. The statement is effective for public companies beginning in the first annual reporting period that begins after June 15, 2005. The Company will adopt this statement when effective and is currently evaluating the impact.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information required to be included in this Item 7A regarding Quantitative and Qualitative Disclosures about Market Risk is included in Item 7 of this report, "Management's Discussion and Analysis of Financial Condition and Results of Operations--Risk Management."

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The information required by this Item 8 is incorporated by reference to the Company's Consolidated Financial Statements, together with the Notes to Consolidated Financial Statements and Independent Auditors' Report, beginning on page F-1 of this report on Form 10-K/A.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

34

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of its disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this annual report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, solely due to the material weaknesses described below under the heading "Management's Report on Internal Control Over Financial Reporting," the Company's disclosure controls and procedures were not effective as of the end of the period covered by this annual report.

Management's Report on Internal Control Over Financial Reporting (as revised)

Management of American Home Mortgage Investment Corp. and its subsidiaries (the "Company," "we" or "us") is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted

accounting principles.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the Company's ability to initiate, authorize, record, process, or report external Financial information reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the Company's annual or interim financial statements that is more than inconsequential will not be prevented or detected.

Our internal control over financial reporting includes those policies and procedures that:

- o pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- o provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles and that receipts and expenditures are being made in accordance with authorizations of the Company's management and directors; and
- o provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management of the Company has revised its assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2004 originally included in Management's Report on Internal Control Over Financial Reporting in the Company's annual report on Form 10-K filed on March 16, 2005, in which management concluded that the Company's internal control over financial reporting was effective. Subsequent to filing its annual report on Form 10-K on March 16, 2005, the Company identified material misstatements in its 2004 financial statements and has restated those annual financial statements. Management has concluded that these misstatements resulted from control deficiencies that represent material weaknesses. As a

35

result, management has revised its assessment of the effectiveness of the Company's internal control over financial reporting due to the following identified material weaknesses:

- o The Company's control to review securitization documents in order to identify and consider all relevant terms and conditions for the proper application of Statement of Financial Accounting Standards No. 140 ("SFAS 140"), "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities," did not operate effectively as of December 31, 2004. As a result, the

Company failed to identify that the Company retained securities that benefit from derivatives embedded in the securitization trust of a December 2004 securitization of mortgage loans and improperly recorded the December 2004 transaction as a sale rather than a financing, as required by SFAS 140, in the fourth quarter of 2004. SFAS 140 precludes sale accounting treatment for a securitization transaction when the issuer retains securities that benefit from derivatives embedded in the securitization trust. The Company has restated its annual financial statements for the year ended December 31, 2004, including the quarterly disclosures therein.

- o The Company's control intended to ensure the proper classification of cash flows related to the origination and securitization of certain mortgage loans held for sale and the subsequent holding of securities retained from securitizations did not operate effectively as of December 31, 2004. The Company incorrectly concluded that such cash flows should be classified as cash flows from investing activities due to its intent to hold the resulting securities in its portfolio. As a result, the Company improperly classified cash flows related to certain origination, securitization and mortgage-backed securities holding activities as cash flows from investing activities rather than cash flows from operating activities. The Company has restated its annual cash flow statements for the years ended December 31, 2004 and 2003 and intends to restate its quarterly cash flow statements for the first three quarters of 2004.

In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework. Based on its revised assessment and those criteria, management concludes that the Company did not maintain effective internal control over financial reporting as of December 31, 2004 due to the material weaknesses described above.

The Company's Independent Registered Public Accounting Firm, Deloitte & Touche LLP, has audited and issued a report on management's revised assessment of the Company's internal control over financial reporting. The report of Deloitte & Touche LLP appears below.

36

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
American Home Mortgage Investment Corp.

We have audited management's assessment, included in the accompanying "Management's Report on Internal Control Over Financial Reporting (as revised)," that American Home Mortgage Investment Corp. and subsidiaries (the "Company") did not maintain effective internal control over financial reporting as of December 31, 2004, because of the effects of the material weaknesses identified in management's assessment based on criteria established in Internal Control--Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our report dated March 16, 2005, we expressed an unqualified opinion on management's assessment that the Company maintained effective internal control over financial reporting and an unqualified opinion on the effectiveness of internal control over financial reporting. As described in the following paragraph, the Company subsequently identified material misstatements in its annual and quarterly financial statements for 2004, necessitating restatement of the Company's financial statements. Such matters are considered to be material weaknesses as further discussed in the following paragraph. Accordingly, management has revised its assessment about the effectiveness of the Company's internal control over financial reporting and our present opinion on the effectiveness of the Company's internal control over financial reporting as of December 31, 2004, as expressed herein, is different from that expressed in our previous report.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. The following material weaknesses have been identified and included in management's revised assessment:

- o The Company's control to review securitization documents in order to identify and consider all relevant terms and conditions for the proper application of Statement of Financial Accounting Standards No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities," did not operate effectively as of December 31, 2004. As a result, the Company failed to identify

that the Company retained securities that benefit from derivatives embedded in the securitization trust of a December 2004 securitization of mortgage loans and improperly recorded the December 2004 transaction as a sale rather than a financing in the fourth quarter of 2004.

37

- o The Company's control over the proper classification of cash flows relating to the origination and securitization of certain mortgage loans held for sale and the subsequent holding of securities retained from securitizations did not operate effectively as of December 31, 2004. As a result, the Company improperly classified cash flows related to certain origination, securitization and mortgage-backed securities holding activities as cash flows from investing activities rather than cash flows from operating activities.

These material weaknesses resulted in restatements of the Company's previously issued interim and annual financial statements as described more fully in Note 25 to the consolidated financial statements. These material weaknesses were considered in determining the nature, timing, and extent of audit tests applied in our audit of the consolidated financial statements as of and for the year ended December 31, 2004 (as restated), of the Company and this report does not affect our report on such financial statements.

In our opinion, management's revised assessment that the Company did not maintain effective internal control over financial reporting as of December 31, 2004, is fairly stated, in all material respects, based on the criteria established in Internal Control--Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Also in our opinion, because of the effects of the material weaknesses described above on the achievement of the objectives of the control criteria, the Company has not maintained, effective internal control over financial reporting as of December 31, 2004, based on the criteria established in Internal Control--Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statement of financial condition as of December 31, 2004 and the related consolidated statements of income, cash flows and changes in stockholders' equity for the year ended December 31, 2004 (as restated) of the Company and our report dated April 15, 2005 expressed an unqualified opinion on those financial statements.

Changes in Internal Control Over Financial Reporting

The Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the Company's internal controls over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) to determine whether any changes occurred during the fourth quarter of 2004 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting. Based on that evaluation, there has been no such change during the fourth

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

quarter of 2004.

ITEM 9B. OTHER INFORMATION

Pre-Approval of Non-Audit Services

In accordance with Section 10A of the Exchange Act, as amended by Section 202 of the Sarbanes-Oxley Act of 2002, non-audit-related services were approved by the Audit Committee of the Company's Board of Directors, to be performed by Deloitte Tax LLP, an affiliate of Deloitte & Touche LLP, the Company's independent registered public accounting firm. These pre-approved, non-audit-related services relate to tax and tax-related services, including tax compliance and tax consulting services.

Acquisition Agreement with Irwin Mortgage Corporation

On March 14, 2005, the Company announced that it had entered into a definitive agreement with Irwin Mortgage Corporation ("Irwin Mortgage"), a wholly owned subsidiary of Irwin Financial Corporation, to acquire community mortgage loan production branches in Arizona, California, Colorado, Hawaii and Washington, as well as Irwin Mortgage's credit union affinity business, which markets mortgage loans through mortgage salespersons located onsite at approximately 50 credit unions. A copy of the press release announcing the acquisition is attached as Exhibit 99.1 to this report on Form 10-K/A and is incorporated herein by reference.

38

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT

The Company intends to file with the SEC a definitive proxy statement on Schedule 14A in connection with the Company's 2005 Annual Meeting of Stockholders (the "Proxy Statement"), which will involve the election of directors, within 120 days after the end of the year covered by this report on Form 10-K/A. Information regarding directors and executive officers of the Company will be set forth in the Proxy Statement and is incorporated herein by reference.

ITEM 11. EXECUTIVE COMPENSATION

The information required to be furnished pursuant to this item will be set forth in the Proxy Statement and is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required to be furnished pursuant to this item will be set forth in the Proxy Statement and is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

The information required to be furnished pursuant to this item will be set forth in the Proxy Statement and is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required to be furnished pursuant to this item will be set forth in the Proxy Statement and is incorporated herein by reference.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
American Home Mortgage Investment Corp.

We have audited the accompanying consolidated balance sheets of American Home Mortgage Investment Corp. and subsidiaries (the "Company") as of December 31, 2004 and 2003, and the related consolidated statements of income, stockholders' equity and cash flows for each of the three years in the period ended December 31, 2004. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of the Company and its subsidiaries as of December 31, 2004 and 2003, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2004, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 25, the accompanying 2003 and 2004 consolidated financial statements have been restated.

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of the Company's internal control over financial reporting as of December 31, 2004, based on the criteria established in Internal Control--Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated April 15, 2005 expressed an unqualified opinion on management's assessment of the effectiveness of the Company's internal control over financial reporting and an adverse opinion on the effectiveness of the Company's internal control over financial reporting because of material weaknesses.

AMERICAN HOME MORTGAGE INVESTMENT CORP. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization - On December 3, 2003, American Home Mortgage Investment Corp. ("AHM Investment") completed its merger with Apex Mortgage Capital, Inc. ("Apex"), a Maryland corporation that operated and elected to be treated as a real estate investment trust, or REIT. Under the terms of the transaction, American Home Mortgage Holdings, Inc. ("AHM Holdings") reorganized through a reverse triangular merger that caused AHM Investment, a newly formed Maryland corporation that operates and has elected to be treated as a REIT for federal income tax purposes, to become AHM Holdings' parent. AHM Investment was formed to combine the net assets of Apex, consisting primarily of mortgage-backed securities, with the mortgage origination and servicing businesses of AHM Holdings. As used herein, references to the "Company," "American Home," "we," "our" and "us" refer to AHM Investment collectively with its subsidiaries.

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

AHM Investment is a mortgage REIT focused on earning net interest income from purchased and self-originated mortgage-backed securities, and through its taxable subsidiaries, on earning income from originating and selling mortgage loans and servicing mortgage loans for institutional investors. Mortgages are originated through a network of loan origination offices as well as through mortgage brokers and are serviced at the Company's Columbia, Maryland servicing center.

Basis of Presentation - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The Company's estimates and assumptions primarily arise from risks and uncertainties associated with interest rate volatility, prepayment volatility, credit exposure and regulatory changes. Although management is not currently aware of any factors that would significantly change its estimates and assumptions in the near term, future changes in market trends and conditions may occur which could cause actual results to differ materially. When necessary, certain reclassifications of prior year financial statement amounts have been made to conform to the current year presentation.

Due to the Company's exercising significant influence on the operations of its joint ventures, their balances and operations have been fully consolidated in the accompanying consolidated financial statements and all intercompany accounts and transactions have been eliminated.

Cash and Cash Equivalents - Cash and cash equivalents include cash on hand, amounts due from banks and overnight deposits. The carrying amount of cash and cash equivalents approximates its fair value.

Mortgage-backed Securities - Mortgage-backed securities are classified as either trading or available for sale. Trading securities are reported at fair value, and changes in fair value are reported in unrealized gain on mortgage-backed securities and derivatives in the consolidated statements of income. Available for sale securities are reported at fair value, with unrealized gains and losses excluded from earnings and reported in accumulated other comprehensive income (loss). Realized gains and losses on sales of available for sale securities are determined on an average cost basis and included in gain on sales of mortgage-backed securities and derivatives.

When the fair value of an available for sale security is less than amortized cost, management considers whether there is an other-than-temporary impairment in the value of the security (e.g., whether the security is likely to be sold prior to the recovery of fair value) based on estimated credit losses, prepayment speeds and the length of time in an unrealized loss position. If, in management's judgment, an other-than-temporary impairment exists, the cost basis of the security is written down to the then-current fair value, and the unrealized loss is transferred from accumulated other comprehensive income as an immediate reduction of current earnings (i.e., as if the loss had been realized in the period of impairment). Premiums and discounts on the Company's mortgage-backed securities held in available for sale are amortized to interest income using the level yield method over the estimated life of the security.

Mortgage Loans Held for Sale - Mortgage loans held for sale are carried at the lower of cost or aggregate market value. The cost basis includes the capitalized value of the prior interest rate lock commitments ("IRLCs") related to the mortgage loans and any net deferred origination costs. For mortgage loans held for sale that are hedged with forward sale commitments, if the Company meets hedge accounting requirements, the carrying value is adjusted for the change in market during the time the hedge was deemed to be highly effective. The market

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

value is determined by outstanding commitments from investors or current investor yield requirements calculated on the aggregate basis.

Mortgage Servicing Rights - Mortgage servicing rights ("MSRs") are carried at the lower of cost or fair value, based on defined interest rate risk strata, and are amortized in proportion to and over the period of estimated net servicing income. When the Company sells certain loans and retains the servicing rights, it allocates the cost basis of the loans between the assets sold and the MSRs based on their relative fair values on the date of sale.

F-6

The Company estimates the fair value of its MSRs by obtaining market information from one of the primary MSR brokers. When the book value of capitalized MSRs exceeds its fair value, impairment is recognized through a valuation allowance. In determining impairment, our mortgage servicing portfolio is stratified by the predominant risk characteristic of the underlying mortgage loans. The Company has determined that the predominant risk characteristic is the interest rate on the underlying loans. The Company measures impairment for each stratum by comparing the estimated fair value to the recorded book value. Temporary impairment is recorded through a valuation allowance and amortization expense in the period of occurrence. In addition, the Company periodically evaluates its MSRs for other than temporary impairment to determine if the carrying value before the application of the valuation allowance is recoverable. The Company receives a sensitivity analysis of the estimated fair value of its MSRs assuming a 200-basis-point instantaneous increase in interest rates from an independent MSR broker. The fair value estimate includes changes in market assumptions that would be expected given the increase in mortgage rates (e.g., prepayment speeds would be lower). The Company believes this 200-basis-point increase in mortgage rates to be an appropriate threshold for determining the recoverability of the temporary impairment because that size rate increase is foreseeable and consistent with historical mortgage rate fluctuations. When using this instantaneous change in rates, if the fair value of the strata of MSRs is estimated to increase to a point where all of the impairment would be recovered, the impairment is considered to be temporary. When the Company determines that a portion of the MSRs is not recoverable, the related MSRs and the previously established valuation allowance are correspondingly reduced to reflect other than temporary impairment.

Premises and Equipment - Premises and equipment is stated at cost less accumulated depreciation and amortization. Depreciation is provided using the straight-line method over the estimated service lives of the premises and equipment. Leasehold improvements are amortized over the lesser of the life of the lease or service lives of the improvements using the straight-line method. Depreciation and amortization are recorded within occupancy and equipment expense in the consolidated statements of income.

Goodwill - Goodwill represents the excess purchase price over the fair value of net assets acquired from business acquisitions. The Company tests for impairment at least annually and will test for impairment more frequently if events or circumstances indicate that an asset may be impaired. The Company tests for impairment by comparing the fair value of goodwill, as determined by using a discounted cash flow method, with its carrying value. Any excess of carrying value over the fair value of the goodwill would be recognized as an impairment loss in continuing operations. The discounted cash flow calculation related to the Company's loan origination segment includes a forecast of the expected future loan originations and the related revenues and expenses. The discounted cash flow calculation related to the Company's mortgage-backed securities holdings segment includes a forecast of the expected future net interest income, gain on mortgage-backed securities and the related revenues and expenses. These cash flows are discounted using a rate that is estimated to be a

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

weighted-average cost of capital for similar companies. We further test to ensure that the fair value of all of our business units does not exceed our total market capitalization.

Reverse Repurchase Agreements - The Company has entered into reverse repurchase agreements to finance certain of its investments. These agreements are secured by a portion of the Company's investments and bear interest rates that have historically moved in close relationship to the London Inter-Bank Offer Rate ("LIBOR"). Reverse repurchase agreements are accounted for as borrowings and recorded as a liability on the consolidated balance sheet.

Collateralized Debt Obligations - The Company has issued adjustable rate collateralized debt obligations to finance certain portions of its mortgage loans held for sale. The collateralized debt obligations are collateralized by ARM loans held for sale that have been placed in a trust and bear interest rates that have historically moved in close relationship to the LIBOR. Collateralized debt obligations are accounted for as borrowings and recorded as a liability on the consolidated balance sheet.

Commercial Paper - The Company formed a wholly owned special purpose entity for the purpose of issuing commercial paper in the form of short-term Secured Liquidity Notes ("SLNs") to finance certain portions of the Company's mortgage loans held for sale. The commercial paper is secured by the Company's loans held for sale, mortgage-backed securities and cash and bears interest at prevailing money market rates approximating LIBOR. Commercial paper is accounted for as a borrowing and recorded as a liability on the consolidated balance sheet.

Drafts Payable - Drafts payable represent outstanding mortgage loan disbursements that the Company has provided to its customers for the purchase of a home. The amounts outstanding do not bear interest and are transferred into one of the warehouse facilities when they are presented to a bank.

Derivative Financial Instruments - The Company has developed risk management programs and processes designed to manage market risk associated with normal business activities.

Interest Rate Lock Commitments. The Company's mortgage committed pipeline includes IRLCs that have been extended to borrowers who have applied for loan funding and meet certain defined credit and underwriting criteria. The Company classifies and accounts for the IRLCs associated with loans expected to be sold or securitized as free-standing derivatives. Accordingly, IRLCs are recorded at fair value with changes in fair value recorded to current earnings. The fair value of the IRLCs initiated on or before March 31, 2004 is determined by an estimate of the ultimate gain on sale of the loans, including the value of MSR, net of estimated net costs to originate the loan. In

F-7

March 2004, the Securities and Exchange Commission ("SEC") issued Staff Accounting Bulletin No. 105 ("SAB No. 105"), which provided industry guidance that changed the timing of recognition of the value of MSR for IRLCs initiated after March 31, 2004. In SAB No. 105, the SEC stated that the value of expected future cash flows related to MSR should be excluded when determining the fair value of derivative IRLCs. Under the new policy, the value of the expected future cash flow related to servicing rights is not recognized until the underlying loans are sold.

Forward Delivery Commitments Used to Hedge IRLCs. The Company uses mortgage forward delivery contracts to economically hedge the IRLCs, which are also classified and accounted for as free-standing derivatives and thus are recorded

at fair value with the changes in fair value recorded to current earnings.

Forward Delivery Commitments Used to Hedge Mortgage Loans Held for Sale. The Company's risk management objective for its mortgage loans held for sale is to protect earnings from an unexpected charge due to a decline in value. The Company's strategy is to engage in a risk management program involving the use of mortgage forward delivery contracts designated as fair value hedging instruments to hedge 100% of its agency-eligible conforming loans and most of its non-conforming loans held for sale. At the inception of the hedge, to qualify for hedge accounting, the Company formally documents the relationship between the forward delivery contracts and the mortgage inventory as well as its objective and strategy for undertaking the hedge transaction. For conventional conforming fixed-rate loans, the notional amount of the forward delivery contracts, along with the underlying rate and terms of the contracts, are equivalent to the unpaid principal amount of the mortgage inventory being hedged; hence, the forward delivery contracts effectively fix the forward sales price and thereby substantially eliminate interest rate and price risk to the Company. The Company classifies and accounts for these forward delivery contracts as fair value hedges. The derivatives are carried at fair value with the changes in fair value recorded to current earnings. When the hedges are deemed highly effective, the book value of the hedged loans held for sale is adjusted for its change in fair value during the hedge period.

Interest Rate Swap Agreements. The Company enters into interest rate swap agreements which require it to pay a fixed interest rate and receive a variable interest rate based on LIBOR. The fair value of interest rate swap agreements are based on the net present value of estimated future interest payments over the remaining life of the interest rate swap agreement. All changes in the unrealized gains and losses on swap agreements designated as cash flow hedges have been recorded in accumulated other comprehensive income (loss) and are reclassified to earnings as interest expense is recognized on the Company's hedged borrowings. For interest rate swap agreements accounted for as cash flow hedges, the net amount accrued for the variable interest receivable and fixed interest payable affects the amount recorded as interest expense. If it becomes probable that the forecasted transaction, which in this case refers to interest payments to be made under the Company's short-term borrowing agreements, will not occur by the end of the originally specified time period, as documented at the inception of the hedging relationship, or within an additional two-month time period thereafter, then the related gain or loss in accumulated other comprehensive income (loss) would be reclassified to income. Certain swap agreements are designated as cash flow hedges against the benchmark interest rate risk associated with the Company's borrowings. Although the terms and characteristics of the Company's swap agreements and hedged borrowings are nearly identical, due to the explicit requirements of Statement of Financial Accounting Standards ("SFAS") No. 133, "Accounting for Derivative Instruments and Hedging Activities," the Company does not account for these hedges under a method defined in SFAS No. 133 as the "shortcut" method, but rather the Company calculates the effectiveness of these hedges on an ongoing basis, and, to date, has calculated effectiveness of approximately 100%. The Company classifies and accounts for interest rate swap agreements that are not designated as cash flow hedges as free-standing derivatives. Accordingly, these swap agreements are recorded at fair value with changes in fair value recorded to current earnings as a component of unrealized gain on mortgage-backed securities and derivatives as they are used to offset the price change exposure of mortgage-backed securities classified as trading. For interest rate swap agreements accounted for as free-standing derivatives, the net amount accrued for the variable interest receivable and fixed interest payable is recorded in current earnings as unrealized gain on mortgage-backed securities and derivatives.

Termination of Hedging Relationships. The Company employs a number of risk management monitoring procedures to ensure that the designated hedging relationships are demonstrating, and are expected to continue to demonstrate, a

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

high level of effectiveness. Hedge accounting is discontinued on a prospective basis if it is determined that the hedging relationship is no longer highly effective or expected to be highly effective in offsetting changes in fair value of the hedged item. Additionally, the Company may elect to de-designate a hedge relationship during an interim period and re-designate upon the rebalancing of a hedge profile and the corresponding hedge relationship. When hedge accounting is discontinued, the Company continues to carry the derivative instruments at fair value with changes in their value recorded in earnings.

Gain on Sale of Loans - The Company recognizes gain on sale of loans for the difference between the sales price and the adjusted book value of the loans at the time of sale. The adjusted book value of the loans includes the original principal amount plus adjustments related to previously recognized income plus deferrals of fees and points received and direct loan origination costs.

Loan Origination Fees and Direct Origination Costs - The Company records loan fees, discount points and certain direct origination costs as an adjustment of the cost of the loan or security and such amounts are included in revenues when the loan or security is sold. When loans are securitized and held as securities available for sale, net deferred origination costs are amortized over the life of the

F-8

security using the level-yield method and such amounts are included in interest income. When loans are securitized and held as trading securities, net deferred origination costs are an adjustment to the cost of the security and such amounts affect the amount recorded as unrealized gain on mortgage-backed securities and derivatives. Gain on sales of mortgage loans and salaries, commissions and benefits have been reduced by \$105.0 million, \$87.1 million and \$57.5 million due to direct loan origination costs, including commission costs, incurred for the years ended December 31, 2004, 2003 and 2002, respectively.

Interest Recognition - The Company accrues interest income as it is earned. Loans are placed on a nonaccrual status when any portion of the principal or interest is 90 days past due or earlier when concern exists as to the ultimate collectibility of principal or interest. Loans return to accrual status when principal and interest become current and are anticipated to be fully collectible. Interest expense is recorded on outstanding lines of credit at a rate based on a spread to the LIBOR.

The Company enters into interest rate swap agreements which require it to pay a fixed interest rate and receive a variable interest rate based on the LIBOR. For interest rate swap agreements accounted for as cash flow hedges, the net amount accrued for the variable interest receivable and fixed interest payable affects the amount recorded as interest expense. For interest rate swap agreements accounted for as free-standing derivatives, the net amount accrued for the variable interest receivable and fixed interest payable is recorded in current earnings as unrealized gain on mortgage-backed securities and derivatives.

Servicing Fees - The Company recognizes servicing fees when the fees are collected.

Marketing and Promotion - The Company charges the costs of marketing, promotion and advertising to expense in the period incurred.

Income Taxes - The Company accounts for income taxes in conformity with SFAS No. 109, "Accounting for Income Taxes," which requires an asset and liability approach for accounting and reporting of income taxes. Deferred tax assets and liabilities are recognized for the future tax consequences ("temporary

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

differences") attributable to the differences between the carrying amounts of assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which temporary differences are expected to be recovered or settled. A valuation allowance is provided for deferred tax assets where realization is not considered "more likely than not." The Company recognizes the effect of changes in tax laws or rates on deferred tax assets and liabilities in the period that includes the enactment date.

Stock Option Plans - In 1999, the Company established the 1999 Omnibus Stock Incentive Plan, as amended (the "Plan"). The Company has elected to account for the Plan using Accounting Principles Board ("APB") Opinion No. 25, "Accounting for Stock Issued to Employees," and to provide pro forma net income and pro forma earnings per share disclosures for employee stock option grants as if the fair-value based method, as required by SFAS No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure - an amendment of FASB Statement No. 123," had been applied.

The following table presents pro forma net income available to common shareholders, basic earnings per share and diluted earnings per share had compensation cost been determined based on the fair value at the grant dates for awards under the Plan:

(In thousands, except per share data)	----- 2004 -----
Net income available to common shareholders - as reported	\$ 70,924
Less: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects	(1,188) -----
Net income available to common shareholders - pro forma	\$ 69,736 =====
Earnings per share:	
Basic - as reported	\$ 1.89
Basic - pro forma	\$ 1.85
Diluted - as reported	\$ 1.86
Diluted - pro forma	\$ 1.83

In December 2004, the FASB issued SFAS No. 123 (revised 2004), "Share-based Payment" ("SFAS No. 123 Revised"). This statement revises SFAS No. 123, "Accounting for Stock-Based Compensation," and supersedes APB opinion No. 25, "Accounting for Stock Issued

to Employees," and its related implementation guidance. The most significant change resulting from this statement is the requirement for public companies to expense employee share-based payments under fair value as originally introduced in SFAS No. 123. The statement is effective for public companies beginning in the first annual reporting period that begins after June 15, 2005. The Company will adopt this statement when effective and is currently evaluating the impact. The impact, had the Company adopted the fair-value based method under existing guidance, is shown in the table above.

Earnings Per Share - Basic earnings per share excludes dilution and is computed by dividing net income available to common shareholders by the weighted-average number of shares of common stock outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the Company.

Cash Flows - Cash and cash equivalents are demand deposits and short-term investments with a maturity of 90 days or less.

Recently Issued Accounting Standards -

In March 2004, the SEC issued SAB No. 105, which provides guidance regarding loan commitments that are accounted for as derivative instruments under SFAS No. 133 (as amended), "Accounting for Derivative Instruments and Hedging Activities." In SAB No. 105, the SEC stated that the value of expected future cash flows related to servicing rights should be excluded when determining the fair value of derivative IRLCs. This guidance must be applied to derivative IRLCs initiated after March 31, 2004. Under the new policy, the value of the expected future cash flow related to servicing rights is not recognized until the underlying loans are sold. The Company's results of operations for the year ended December 31, 2004 were reduced \$30.7 million on a pre-tax basis by its adoption of SAB No. 105.

Emerging Issues Task Force ("EITF") Issue No. 03-1, "The Meaning of Other-Than-Temporary Impairment and its Application to Certain Investments" was ratified by the FASB in March 2004. This EITF addresses how to determine the meaning of other-than-temporary impairment and its application to investments classified as either available for sale or held to maturity under SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities" (including individual securities and investments in mutual funds), and investments accounted for under the cost method or the equity method. In September 2004, the FASB delayed the effective date of the portion of this EITF that relates to measuring and recognizing other-than-temporary impairment until implementation guidance is finalized. This delay does not suspend the requirement to recognize other-than-temporary impairment required by existing accounting literature.

NOTE 2 - ACCOUNTS RECEIVABLE AND SERVICING ADVANCES

The following table presents the Company's accounts receivable and servicing advances as of December 31, 2004 and 2003:

(In thousands)

Accrued interest on mortgage-backed securities and derivatives	\$ 4
Loan sales receivables	2
Foreclosure advances	1
Tax and insurance advances	
Accrued interest on mortgage loans held for sale	
Other	1
Accounts receivable and servicing advances	\$11

F-10

NOTE 3 - MORTGAGE-BACKED SECURITIES

The following table presents the Company's mortgage-backed securities as of December 31, 2004 and 2003:

(In thousands)	December 31,	
	Trading Securities	Securities Available for
Adjusted cost	\$ 1,811,214	\$ 4,220,35
Gross unrealized gains	5,524	10,80
Gross unrealized losses	(10,812)	(20,22
Fair value	\$ 1,805,926	\$ 4,210,94

(In thousands)	December 31,	
	Trading Securities	Securities Available for
Adjusted cost	\$ 476,541	\$ 1,282,52
Gross unrealized gains	3,382	1,96
Gross unrealized losses	(110)	(67
Fair value	\$ 479,813	\$ 1,283,81

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

During 2004, the Company sold \$3.6 billion of mortgage-backed securities, excluding securities sold contemporaneously with the execution of securitization transactions, and realized \$24.5 million in gains and \$15.0 million in losses. Of the mortgage-backed securities sold, \$2.0 billion were created by the Company's securitizations and \$1.6 billion were market-purchased. During 2004, the Company securitized and held in its portfolio \$1.9 billion of mortgage-backed securities.

The Company's mortgage-backed securities held at December 31, 2004 are primarily either agency obligations or are rated AAA or AA by Standard & Poor's.

The Company's available for sale mortgage-backed securities with gross unrealized losses at December 31, 2004 have been in an unrealized loss position for less than 12 months.

The Company has credit exposure on loans it has securitized privately. The following table summarizes the loan delinquency information as of December 31, 2004 and 2003:

F-11

December 31, 2004

(Dollars in thousands)

Delinquency Status	Loan Count	Loan Balance	Percentage of Total Portfolio
60 to 89 days	6	\$ 2,018	0.05%
90 and greater days	2	418	0.01%
Foreclosure	48	13,666	0.35%
	56	\$ 16,102	0.41%

December 31, 2003

(Dollars in thousands)

Delinquency Status	Loan Count	Loan Balance	Percentage of Total Portfolio
60 to 89 days	1	\$ 692	0.13%
	1	\$ 692	0.13%

As of December 31, 2004, the fair value of residual assets from securitizations

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

reported in mortgage-backed securities was \$108.0 million. The significant assumptions used in estimating the fair value of residual cash flows as of December 31, 2004 were as follows:

	December 31, 2004

Weighted average prepayment speed (CPR)	27.27%
Weighted average discount rate	17.83%
Weighted average default rate	0.49%

The table below illustrates hypothetical fair values of the Company's residual assets as of December 31, 2004 caused by assumed immediate adverse changes to the key assumptions used by the Company to determine fair value (dollars in thousands):

These sensitivities are hypothetical, are presented for illustrative purposes only, and should be used with caution.

Fair value of residual assets as of December 31, 2004	\$ 107,965
---	------------

	Fair Value

Prepayment speed:	
Impact of adverse 10% change	\$ 102,25
Impact of adverse 20% change	97,25
Discount rate:	
Impact of adverse 10% change	104,37
Impact of adverse 20% change	101,07
Default rate:	
Impact of adverse 10% change	107,22
Impact of adverse 20% change	106,48

F-12

NOTE 4 - MORTGAGE LOANS HELD FOR SALE, NET

The following table presents the Company's mortgage loans held for sale, net, as of December 31, 2004 and 2003:

December 31,

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

(In thousands)	2004

Mortgage loans held for sale	\$ 4,815,749
SFAS No. 133 basis adjustments	40
Deferred origination costs, net	37,605

Mortgage loans held for sale, net	\$ 4,853,394
	=====

During 2004, the Company securitized mortgage loans totaling \$9.3 billion, of which \$1.9 billion were considered sales under Generally Accepted Accounting Principles ("GAAP"), and realized \$40.1 million in gains. Of the \$9.3 billion securitized, \$3.5 billion were considered a financing with no gain recognized in the year ended December 31, 2004.

NOTE 5 - DERIVATIVE ASSETS AND LIABILITIES

The following table presents the Company's derivative assets and liabilities as of December 31, 2004 and 2003:

(In thousands)	December 31, 2004

Derivative Assets	
Interest rate lock commitments	\$ 12,025
Interest rate swaps	9,192
Interest rate caps - free standing derivatives	1,459
Interest rate swaps - free standing derivatives	2,127

Derivative assets	\$ 24,803
	=====
Derivative Liabilities	
Forward delivery contracts - Loan commitments	\$ 896
Forward delivery contracts - Loans held for sale	964
Interest rate swaps	--

Derivative liabilities	\$ 1,860
	=====

As of December 31, 2004, the notional amount of forward delivery contracts and interest rate swap agreements amounted to approximately \$954 million and \$3.4 billion, respectively.

At December 31, 2003, the notional amount of forward delivery contracts and interest rate swap agreements amounted to approximately \$1.6 billion and \$755 million, respectively.

During 2004, the Company realized \$3.4 million in losses on sales of interest

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

rate swap agreements associated with its securitizations of mortgage loans. These losses are recorded in gain on sales of mortgage-backed securities and derivatives in the consolidated statements of income.

During 2004, the Company realized \$6.1 million in losses on sales of interest rate swap agreements associated with its sales of mortgage-backed securities. These losses are recorded in gain on sales of mortgage-backed securities and derivatives in the consolidated statements of income.

The forward delivery contracts have a high correlation to the price movement of the loans being hedged. The ineffectiveness in hedging loans held for sale recorded on the consolidated balance sheets was insignificant as of December 31, 2004 and December 31, 2003.

As of December 31, 2004, the unrealized loss on interest rate swap agreements relating to cash flow hedges recorded in accumulated other comprehensive loss was a loss of \$29.9 million. The Company estimates that \$11.7 million of this unrealized loss will be reclassified from accumulated other comprehensive loss to interest expense for the year ended December 31, 2005.

F-13

NOTE 6 - MORTGAGE SERVICING RIGHTS, NET

The following table presents the activity in the Company's mortgage servicing rights, net, for the years ended December 31, 2004, 2003 and 2002:

Estimated Amortization Expense

Year ended December 31, 2005	\$ 31,499
Year ended December 31, 2006	24,506
Year ended December 31, 2007	18,522
Year ended December 31, 2008	14,636
Year ended December 31, 2009	11,940
Thereafter	62,271

On a quarterly basis, the Company reviews MSR for impairment based on risk strata. The MSR are stratified based on the predominant risk characteristics of the underlying loans. The Company's predominant risk characteristic is interest rate. A valuation allowance is recognized for MSR that have an amortized balance in excess of the estimated fair value for the individual risk stratification.

The estimated fair value of MSR is determined by obtaining a market valuation from an independent MSR broker. To determine the market value of MSR, the MSR broker uses a valuation model which incorporates assumptions relating to the estimate of the cost of servicing the loan, a discount rate, a float value, an inflation rate, ancillary income per loan, prepayment speeds and default rates that market participants use for similar MSR. Market assumptions are held constant over the life of the portfolio.

F-14

The significant assumptions used in estimating the fair value of MSR at December 31, 2004 and December 31, 2003 were as follows:

	December 31, 2004

Weighted-average prepayment speed (PSA)	316
Weighted-average discount rate	10.37%
Weighted-average default rate	2.76%

The table below illustrates hypothetical fair values of the Company's MSR at December 31, 2004 caused by assumed immediate adverse changes to the key assumptions used by the Company to determine fair value (dollars in thousands):

Fair value of MSR at December 31, 2004	\$ 152,467
--	------------

Fair Value

Change in Fa

Prepayment speed:

Impact of adverse 10% change	\$ 147,063
Impact of adverse 20% change	141,903

Discount rate:

Impact of adverse 10% change	150,319
Impact of adverse 20% change	148,120

Default rate:

Impact of adverse 10% change	152,432
Impact of adverse 20% change	152,396

These sensitivities are hypothetical, are presented for illustrative purposes only, and should be used with caution.

The following table presents certain information regarding the Company's servicing portfolio of loans serviced for others at December 31, 2004 and 2003:

Earnouts from previous acquisitions	7,432	--
Balance at December 31, 2004	\$ 66,037	\$ 24,840

As of December 31, 2004, the Company completed a goodwill impairment test by comparing the fair value of goodwill with its carrying value and did not recognize impairment.

F-16

NOTE 9 - WAREHOUSE LINES OF CREDIT, REVERSE REPURCHASE AGREEMENTS AND COMMERCIAL PAPER

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

Warehouse Lines of Credit

To originate a mortgage loan, the Company draws against a \$2.0 billion Secured Liquidity Note Program, a \$1.2 billion pre-purchase facility with UBS Real Estate Securities Inc. ("UBS"), a \$600 million bank syndicated facility led by Bank of America (which includes a \$150.0 million term loan facility which the Company uses to finance its MSR's), a \$450 million facility with CDC Mortgage Capital Inc. ("CDC"), a facility of \$350 million with Morgan Stanley Bank ("Morgan Stanley"), a facility of \$250 million with Lehman Brothers, a facility of \$500 million with Bear Stearns and a facility of \$250 million with Calyon New York Branch ("Calyon"). The Bank of America, CDC, Morgan Stanley and Calyon facilities are committed facilities. In addition, the Company has a gestation facility with Greenwich Capital Financial Products, Inc. ("Greenwich"). The interest rate on outstanding balances fluctuates daily based on a spread to the LIBOR and interest is paid monthly.

The facilities are secured by mortgage loans and other assets of the Company. The facilities contain various covenants pertaining to maintenance of net worth, working capital and maximum leverage. At December 31, 2004, the Company was in compliance with respect to the loan covenants.

Included within the Bank of America line of credit, the Company has a working capital sub-limit that allows for borrowings up to \$50 million at a rate based on a spread to the LIBOR that may be adjusted for earnings on compensating balances on deposit at creditors' banks. As of December 31, 2004, borrowings under the working capital line of credit were \$25.5 million.

The following table presents the Company's warehouse lines of credit as of December 31, 2004 and December 31, 2003:

(Dollars in thousands)	December 31, 2004		December 31,
	Outstanding Balance	Weighted Average Rate	Outstandi Balance
Calyon	\$ 249,540	3.05%	\$

Greenwich	33,400	2.89	
Morgan Stanley	540	3.06	
RFC	--	--	
UBS	--	--	
Warehouse lines of credit	\$ 735,783	3.13%	\$ 1

Reverse Repurchase Agreements

The Company has arrangements to enter into reverse repurchase agreements, a form of collateralized short-term borrowing, with thirteen different financial institutions and on December 31, 2004 had borrowed funds from nine of these

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

firms. Because the Company borrows money under these agreements based on the fair value of its mortgage-backed securities, and because changes in interest rates can negatively impact the valuation of mortgage-backed securities, the Company's borrowing ability under these agreements could be limited and lenders could initiate margin calls in the event interest rates change or the value of the Company's mortgage-backed securities declines for other reasons.

As of December 31, 2004, the Company had \$7.1 billion of reverse repurchase agreements outstanding with a weighted-average borrowing rate of 2.13% and a weighted-average remaining maturity of three months. As of December 31, 2003, the Company had \$1.3 billion of reverse repurchase agreements outstanding with a weighted-average borrowing rate of 1.26% and a weighted-average remaining maturity of seven months.

F-17

As of December 31, 2004 and 2003, the Company's reverse repurchase agreements had the following remaining maturities:

	December 31, 2004	December 31, 2003

(In thousands)		
Within 30 days	\$ 3,617,325	\$ 184,3
31 to 89 days	2,050,529	
90 to 365 days	1,403,314	1,160,0
	-----	-----
Reverse repurchase agreements	\$ 7,071,168	\$ 1,344,3
	=====	=====

The Company's average reverse repurchase agreements outstanding were \$5.0 billion and \$47.1 million for the years ended December 31, 2004 and 2003, respectively.

Commercial Paper

In May 2004, the Company formed a wholly owned special purpose entity for the purpose of issuing commercial paper in the form of short-term Secured Liquidity Notes ("SLNs") to finance certain portions of the Company's mortgage loans held for sale. The special purpose entity allows for issuance of short-term notes with maturities of up to 180 days, extendable up to 300 days. The SLNs bear interest at prevailing money market rates approximating the LIBOR. The SLN program capacity, based on aggregate commitments of underlying credit enhancers, was \$2.0 billion at December 31, 2004.

As of December 31, 2004, the Company had \$529.8 million of SLNs outstanding, with an average interest cost of 2.51%. The SLNs were collateralized by loans held for sale and cash with a balance of \$550.0 million as of December 31, 2004.

At December 31, 2004, the Company's commercial paper had the following remaining

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

maturities:

	December 31, 2004

NOTE 10 - COLLATERALIZED DEBT OBLIGATIONS

In December of 2004, the Company transferred \$3.5 billion of its mortgage loans held for sale to American Home Mortgage Investment Trust 2004-4 ("the Trust") in a securitization transaction. This securitization transaction was accounted for as a financing of the mortgage loans held for sale. The Company financed the transaction by issuing \$2.0 billion of collateralized debt obligations, which were collateralized by loans held for sale transferred to the Trust. As of December 31, 2004, the collateralized debt obligations had a balance of \$2.0 billion and an effective interest cost of 3.16%. As of December 31, 2004, the collateralized debt obligations were collateralized by mortgage loans held for sale of \$2.0 billion.

NOTE 11 - NOTES PAYABLE

Notes payable primarily consist of amounts borrowed under a term loan facility with a bank syndicate led by Bank of America. Under the terms of this facility, the Company may borrow the lesser of 70% of the value of its MSR's or \$150.0 million. As of December 31, 2004, borrowings under the term loan were \$108.6 million. This term loan expires on December 14, 2005. Interest is based on a spread to the LIBOR and may be adjusted for earnings on compensating balances. At December 31, 2004, the interest rate was 4.41%.

Included in notes payable are a mortgage note of \$26.2 million on an office building located in Melville, New York which was purchased during 2003 at a rate of 5.8% and a mortgage note of \$1.0 million on an office building located in Mount Prospect, Illinois at a rate of 7.5%.

F-18

The following table presents the Company's notes payable as of December 31, 2004 and 2003:

	=====

NOTE 12 - COMMON STOCK AND PREFERRED STOCK

In March 2004, the Company issued an aggregate of 14,375,000 shares of its common stock, par value \$0.01 per share, ("Common Stock"), at a price of \$25 per share, which included the exercise of the underwriters' option to purchase 1,875,000 additional shares of Common Stock to cover over-allotments. The total proceeds to the Company, including proceeds from the exercise of the over-allotment option, were \$359.3 million, before underwriting discounts, commissions and other offering expenses.

In July 2004, the Company issued 2,150,000 shares of 9.75% Series A Cumulative Redeemable Preferred Stock ("Series A Preferred Stock") at a price of \$25 per share. The total number of shares of Series A Preferred Stock issued includes: 1,400,000 shares of Series A Preferred Stock issued in an underwritten public offering (the "Series A Initial Offering"), which closed on July 7, 2004; 100,000 shares of Series A Preferred Stock issued in connection with the underwriters' election to purchase a portion of the shares of Series A Preferred Stock offered to them in connection with the Series A Initial Offering to cover over-allotments, which closed on July 12, 2004; and 650,000 shares of Series A Preferred Stock issued and sold to the underwriters in connection with a subsequent public offering of Series A Preferred Stock, which closed on July 20, 2004. The total proceeds from both offerings to the Company were \$53.8 million before underwriting discounts, commissions and other offering expenses. On or after July 7, 2009, the Company may, at its option, redeem the Series A Preferred Stock, in whole or part, at any time and from time to time, for cash at a price of \$25.00 per share, plus accumulated or unpaid dividends (whether or not declared), if any, to the date of redemption.

In December 2004, the Company issued 3,450,000 shares of 9.25% Series B Cumulative Redeemable Preferred Stock ("Series B Preferred Stock") at a price of \$25 per share. The total number of shares of Series B Preferred Stock issued includes: 3,000,000 shares of Series B Preferred Stock issued in an underwritten public offering (the "Series B Initial Offering"), which closed on December 15, 2004; and 450,000 shares of Series B Preferred Stock issued in connection with the underwriters' election to purchase all of the shares of Series B Preferred Stock offered to them in connection with the Series B Initial Offering to cover over-allotments, which closed on December 23, 2004. The total proceeds to the Company were \$86.3 million before underwriting discounts, commissions and other offering expenses. On or after December 15, 2009, the Company may, at its option, redeem the Series B Preferred Stock, in whole or part, at any time and from time to time, for cash at a price of \$25.00 per share, plus accumulated or unpaid dividends (whether or not declared), if any, to the date of redemption.

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

Under our charter, our Board of Directors is authorized to issue 110,000,000 shares of stock, of which up to 100,000,000 shares may be common stock and up to 10,000,000 shares may be preferred stock. As of December 31, 2004, there were 40,288,077 shares of common stock issued and outstanding, 2,150,000 shares of our Series A Preferred Stock issued and outstanding and 3,450,000 shares of our Series B Preferred Stock issued and outstanding.

F-19

During the year ended December 31, 2004, the Company declared dividends totaling \$92.3 million, or \$2.43 per common share, of which \$26.6 million was paid on January 25, 2005. During the year ended December 31, 2003, the Company declared dividends totaling \$20.9 million, or \$0.91 per common share, of which \$13.9 million was paid on January 16, 2004.

During the year ended December 31, 2004, the Company declared dividends totaling \$3.0 million, or \$1.376005 per Series A Preferred share, of which \$1.3 million was paid on January 31, 2005.

During the year ended December 31, 2004, the Company declared dividends totaling \$1.0 million, or \$0.298387 per Series B Preferred share, all of which was paid on January 31, 2005.

NOTE 13 - OTHER NON-INTEREST INCOME AND OTHER NON-INTEREST EXPENSES

The following table summarizes the significant components of the Company's other non-interest income and other non-interest expenses for the years ended December 31, 2004, 2003 and 2002:

(In thousands)	2004	Year Ended December 31, 2003

Other non-interest expenses	\$ 22,216	\$ 21,8
	=====	=====

NOTE 14 - INCOME TAXES

AHM Investment, with the filing of its initial federal income tax return for the 2003 tax year, has elected to be taxed as a real estate investment trust ("REIT") for federal income tax purposes. In brief, if AHM Investment meets certain detailed conditions imposed by the REIT provisions of the Internal Revenue Code of 1986, as amended (the "Code") including a requirement that it invest primarily in qualifying REIT assets (which generally include real estate and mortgage loans) and a requirement that it satisfy certain income tests, it will not be taxed at the corporate level on the taxable income that it currently distributes to its stockholders. Therefore, to this extent, AHM Investment's stockholders will avoid double taxation, at the corporate level and then again at the stockholder level, when the income is distributed, that they would otherwise experience if AHM Investment failed to qualify as a REIT.

If AHM Investment does not qualify as a REIT in any given year, it would be subject to federal income tax as a corporation for the year of the disqualification and for each of the following four years. This disqualification would result in federal income tax, which would reduce the amount of the after-tax cash available for distribution to its shareholders. AHM Investment believes that it has satisfied the requirements for qualification as a REIT since the year ended December 31, 2003. AHM Investment intends at all times to continue to comply with the requirements for qualification as a REIT under the Code.

On August 14, 2003, AHM Investment formed American Home Mortgage Acceptance, Inc ("AHM Acceptance"). AHM Acceptance is a qualified REIT subsidiary and, as such, is disregarded for Federal income tax. As a disregarded entity, the taxable income of AHM Acceptance is deemed to be income of AHM Investment.

F-20

Effective December 3, 2003, as a result of a corporate reorganization, AHM Investment became the parent corporation of AHM Holdings. As of this date, AHM Holdings and each of its subsidiaries elected to be treated as taxable REIT subsidiaries and, as such, continue to be subject to both federal, state, and local corporate income tax.

A reconciliation of the statutory income tax provision to the effective income tax provision is as follows:

	Year Ended December 31,			
	----- 2004 -----		----- 2003 -----	
	(Dollars in thousands)			
Tax provision at statutory rate	\$ 17,268	35.0%	\$ 42,706	35.0%

Net deferred tax liabilities	\$ 54,342
	=====

Effective June 13, 2002, AHM Holdings acquired all of the outstanding stock of American Home Mortgage Servicing, Inc. ("AHM Servicing") (formerly known as Columbia National, Incorporated). The acquisition was accounted for under the purchase method of accounting for financial statement purposes. For federal income tax purposes, the historical basis of the assets and liabilities were carried over to AHM Holdings. AHM Servicing has approximately \$40 million of separate company net operating loss carryforwards which begin to expire in 2008. In addition, AHM Holdings has approximately \$40 million of net operating loss carryforwards which begin to expire in 2024.

At December 31, 2004 and 2003, no valuation allowance has been established against deferred tax assets as it is more likely than not that the deferred tax assets will be realized.

The Company has been audited by various state tax jurisdictions which have settled with a no change decision. In addition, the Company is currently under examination by other tax jurisdictions which the Company expects to result in no material assessment. The Company regularly assesses the likelihood of additional assessments in each of the tax jurisdictions in the calculation of its provision and maintains an appropriate reserve as needed.

F-22

NOTE 15 - EARNINGS PER SHARE

NOTE 16 - STOCK OPTION PLANS

In 1999, the Company established the 1999 Omnibus Stock Incentive Plan, as amended (the "Plan"). Pursuant to the Plan, eligible employees, officers and directors are offered the opportunity to acquire the Company's common stock through the grant of options and the award of restricted stock under the Plan. The total number of shares that may be optioned or awarded under the Plan is 3,000,000 shares of common stock. The Plan provides for the granting of options at the fair market value at the date of grant. The options issued primarily vest 50% on the two-year anniversary from the grant date and 50% on the three-year anniversary of the grant date, and expire ten years from the grant date.

As of December 31, 2004, the Company has awarded 217,120 shares of restricted stock under the Plan. During the years ended December 31, 2004, 2003 and 2002, the Company recognized compensation expense of \$769 thousand, \$537 thousand and \$213 thousand, respectively, relating to shares of restricted stock. At December 31, 2004, 133,463 shares are vested. In general, unvested restricted stock is forfeited upon the recipient's termination of employment.

F-23

=====			=====

For options granted under the Plan, there was no intrinsic value of the options when granted, as the exercise price was equal to the quoted market price at the grant date. No compensation cost has been recognized for the years ended December 31, 2004, 2003 and 2002.

Pursuant to the terms of the Company's merger with Apex, which was consummated on December 3, 2003 (following the approval of the Company's stockholders at a special meeting held on November 21, 2003), the Company assumed the Amended and Restated 1997 Stock Option Plan of Apex (the "Apex Plan"). Prior to December 3, 2003, the effective date of the merger with Apex, Apex caused all unvested options granted under the Apex Plan to become vested and exercisable, and each option granted under the Apex Plan that was not exercised as of December 3, 2003 was terminated and not assumed by the Company.

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

Prior to the Apex merger, an aggregate of one million shares of common stock were available for issuance upon exercise of stock options granted under the Apex Plan. As of the effective date of the merger, Apex had granted options to purchase 791,000 shares of common stock, which options were either (i) previously caused to become vested and exercised or (ii) unexercised as of the effective date of the merger, and therefore terminated and not assumed by the Company. Accordingly, options to purchase an aggregate of 209,000 shares of the Company's common stock remain available for grant under the Apex Plan.

F-24

The weighted-average fair value per share of options granted during 2004, 2003 and 2002 was \$4.60, \$4.81 and \$4.08, respectively. The fair value of the options granted is estimated using the Black-Scholes option-pricing model with the following weighted-average assumptions used for the grants:

	Year Ended December 31,	
	2004	2003
Dividend yield	8.5 %	3.0 %
Expected volatility	40.2 %	51.0 %
Risk-free interest rate	5.0 %	5.0 %
Expected life	3 years	3 years

NOTE 17 - COMMITMENTS AND CONTINGENCIES

Loans Sold to Investors - Generally, the Company is not exposed to significant credit risk on its loans sold to investors. In the normal course of business, the Company is obligated to repurchase loans which are subsequently unable to be sold through normal investor channels. Management believes this is a rare occurrence and that the Company can usually sell the loans directly to a permanent investor.

Loan Funding and Delivery Commitments - At December 31, 2004 and 2003, the Company had commitments to fund loans approximating \$6.2 billion and \$4.0 billion, respectively. At December 31, 2004 and 2003, the Company had commitments to fund loans with agreed upon rates approximating \$1.9 billion and \$1.3 billion, respectively. The Company hedges the interest rate risk of such commitments primarily with mandatory delivery commitments, which totaled \$379.9 million and \$477.9 million at December 31, 2004 and 2003, respectively. The remaining commitments to fund loans with agreed-upon rates are anticipated to be sold through "best-efforts" and investor programs. The Company does not anticipate any material losses from such sales.

Net Worth Requirements - The Company's subsidiaries are required to maintain certain specified levels of minimum net worth to maintain their approved status with Fannie Mae, the Federal Home Loan Mortgage Corporation, the U.S. Department of Housing and Urban Development and other investors. At December 31, 2004, the highest minimum net worth requirement applicable to each subsidiary was \$1.0 million.

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

Outstanding Litigation - The Company is involved in litigation arising in the normal course of business. Although the amount of any ultimate liability arising from these matters cannot presently be determined, the Company does not anticipate that any such liability will have a material effect on the Company's consolidated financial position or results of operations.

Mortgage Reinsurance - One of the Company's captive reinsurance subsidiaries, Melville Reinsurance Corp. ("MRC"), has entered mortgage reinsurance agreements with a primary mortgage insurance company. Under this agreement, MRC absorbs mortgage insurance losses in excess of a specified percentage of loss retained by the primary mortgage insurer in exchange for a portion of the primary mortgage insurer's insurance premium. Approximately \$813.1 million of the Company's conventional servicing portfolio is covered by this mortgage reinsurance agreement. Each annual book of business has a maximum life of 10 years and the maximum exposure is the amount of assets held in the trust on behalf of MRC. At December 31, 2004, those assets totaled \$1.6 million. No reserve has been recorded and management believes no reserve is required based upon loss experience.

The Company's other captive reinsurance subsidiary, CNI Reinsurance, Ltd. ("CNIRE"), has entered mortgage reinsurance agreements with four primary mortgage insurance companies. Under these agreements, CNIRE absorbs mortgage insurance losses in excess of a specified percentage of the principal balance of a pool of loans, subject to a cap, in exchange for a portion of the pool's mortgage insurance premium. Approximately \$380.8 million of the conventional servicing portfolio is covered by such mortgage reinsurance agreements. Each annual book of business has a maximum life of ten years and the maximum exposure is the amount of assets held in the trust on behalf of CNIRE. At December 31, 2004, those assets totaled \$4.4 million. No reserve has been recorded and management believes no reserve is required based upon loss experience.

NOTE 18 - OPERATING LEASES

Certain of the Company's facilities and equipment are leased under short-term lease agreements expiring at various dates through December 2012. All such leases are accounted for as operating leases. Total rental expense for premises and equipment, which is included in occupancy and equipment expense within the consolidated financial statements, amounted to \$24.7 million, \$18.5 million and \$10.1 million for the years ended December 31, 2004, 2003 and 2002, respectively.

F-25

The Company's obligations under noncancelable operating leases which have an initial term of more than one year as of December 31, 2004 are as follows (in thousands):

2005	\$ 21,793
2006	17,963
2007	14,512
2008	10,050
2009	5,099
Thereafter	1,287

Total	\$ 70,704
	=====

NOTE 19 - CONCENTRATIONS OF CREDIT RISK

Loan concentrations are considered to exist when there are amounts loaned to a multiple number of borrowers with similar characteristics, which would cause their ability to meet contractual obligations to be similarly impacted by economic or other conditions. In management's opinion, at December 31, 2004 and 2003, there were no significant concentrations of credit risk within loans held for sale.

The Company had originations of loans during the year ended December 31, 2004, exceeding 5% of total originations as follows:

California	23.9 %
Illinois	15.3
Maryland	6.3
Virginia	5.2

In 2004, three institutions that bought the most loans from the Company accounted for 70% of the Company's total loan sales.

NOTE 20 - FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value estimates are made as of a specific point in time based on estimates using present value or other valuation techniques. These techniques involve uncertainties and are significantly affected by the assumptions used and the judgments made regarding risk characteristics of various financial instruments, discount rates, estimates of future cash flows, future expected loss experience and other factors.

Changes in assumptions could significantly affect these estimates and the resulting fair values. Derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in an immediate sale of the instrument. Also, because of differences in methodologies and assumptions used to estimate fair values, the Company's fair values should not be compared to those of other companies.

Fair value estimates are based on existing financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the Company.

The carrying values of the following assets and liabilities all approximate their fair values due to their short-term nature, terms of repayment or interest rate associated with the asset or liability:

- o Cash and cash equivalents;
- o Accounts receivable and servicing advances;
- o Warehouse lines of credit;
- o Commercial paper;
- o Drafts payable; and

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

- o Payable for mortgage-backed securities purchased.

The following describes the methods and assumptions used by the Company in estimating fair values of other financial instruments:

- a. Mortgage-Backed Securities - Fair value is based on published market valuations or price quotations provided by securities dealers.
- b. Mortgage Loans Held for Sale, net - Fair value is estimated using the quoted market prices for securities backed by similar types of loans and current investor or dealer commitments to purchase loans.
- c. Mortgage Servicing Rights, net - The estimated fair value of MSRs is determined by obtaining a market valuation from one of the primary MSR brokers. To determine the market value of MSRs, the MSR broker uses a valuation model which incorporates assumptions relating to the estimate of the cost of servicing per loan, a discount rate, a float value, an inflation rate, ancillary income per loan, prepayment speeds and default rates that market participants use for similar servicing rights.
- d. Derivative Assets - Derivative assets includes IRLCs. Fair value of IRLCs is estimated using the fees and rates currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the creditworthiness of the counterparties, and includes the value of MSRs. Fair value also considers the difference between current levels of interest rates and the committed rates.
- e. Notes Payable - Fair market value is estimated based on the maturity and interest rate of the related debt instruments. Carrying amount estimates fair market value.
- f. Reverse Repurchase Agreements - Fair market value is estimated based on the maturity and interest rate of the related debt instruments.
- g. Collateralized Debt Obligations - Fair market value is estimated based on the maturity and interest rate of the related debt instruments. Carrying amount estimates fair market value.
- h. Derivative Liabilities - Derivative liabilities includes forward delivery commitments, interest rate swaps and option contracts to buy securities. The fair value is estimated using current market prices from dealers or brokers.

F-27

The following tables set forth information about financial instruments and other selected assets, except for those noted above for which the carrying value approximates fair value.

NOTE 22 - ACQUISITIONS

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

Acquisition of Certain Home Loan Centers of Washington Mutual, Inc.

On August 2, 2004, the Company acquired certain residential mortgage home loan centers and associated satellite offices that Washington Mutual, Inc. and its subsidiaries (collectively, "Washington Mutual") previously slated for closure in 18 states. The Company hired 498 employees who support these home loan centers and associated satellite offices with the vast majority being sales professionals focused on retail loan originations. The purchase price was insignificant to the Company's consolidated financial statements.

Under the terms of the acquisition, the Company assumed Washington Mutual's lease obligations and purchased certain fixed assets in the acquired offices. The acquisition was funded from current cash reserves.

F-31

Apex Mortgage Capital, Inc.

On December 3, 2003, AHM Investment completed its merger with Apex, a Maryland corporation that operated and elected to be treated as a REIT for federal income tax purposes. Immediately prior to the merger, under the terms of the reorganization agreement between AHM Holdings and AHM Investment, AHM Holdings reorganized through a reverse triangular merger that caused AHM Investment to become AHM Holdings' parent. AHM Investment issued 7,691,682 shares to former Apex stockholders in the merger valued at \$177.3 million.

The following table summarizes the fair value of the assets acquired and liabilities assumed as of the date of the acquisition:

(In thousands)	December 3, 2003
Cash	\$ 6,454
Securities - trading	5,182
Securities - available for sale	511,827
Accounts receivable	3,694
Other assets	20
Total assets acquired	527,177
Reverse repurchase agreements	329,650
Payable for securities purchased	40,250
Other liabilities	4,792
Total liabilities assumed	374,692
Net assets acquired	152,485
Shares issued	177,325
Goodwill	\$ 24,840

The goodwill which resulted from the acquisition of Apex is not deductible for tax purposes.

The following table summarizes the required disclosures of the pro forma combined entity, as if the acquisition occurred on January 1, 2002:

	Year Ended December
(In thousands, except per share amounts)	----- 2003 -----
Revenue	\$ 347,047
Income before income taxes and minority interest	24,789
Net income before cumulative effect of change in accounting principle	(24,401)
Earnings per share - basic	\$ (0.96) =====
Earnings per share - diluted	\$ (0.95) =====

Valley Bancorp, Inc.

In August 2001, AHM Holdings entered into an agreement to acquire Valley Bancorp, Inc. ("Valley Bancorp") and its wholly-owned subsidiary, Valley Bank of Maryland, a federal savings bank located in suburban Baltimore, Maryland. In 2004, subsequent to the merger with Apex and internal reorganization, AHM Investment, as successor in interest to AHM Holdings, entered into an amended and restated agreement and plan of reorganization with Valley Bancorp. Under the terms of the definitive agreement, the Company will pay \$46 for

F-32

each share of Valley Bancorp common stock outstanding, and will pay in cash to the holders of Valley Bancorp stock options the difference between \$46 and the exercise price of such options, or an aggregate of approximately \$6.3 million. The acquisition agreement between AHM Investment and Valley Bancorp has been extended through July 31, 2005. This transaction is subject to regulatory approval and no assurance can be given that such approval will be obtained or that the acquisition agreement with Valley Bancorp will be further extended if necessary.

NOTE 23 - SEGMENTS AND RELATED INFORMATION

The Company has three segments, the Mortgage-Backed Securities Holdings Segment, the Loan Origination Segment, and the Loan Servicing Segment. The Mortgage-Backed Securities Holdings Segment primarily earns net interest income from holding mortgage-backed securities created through the securitization of loans originated by the Loan Origination Segment and mortgage-backed securities purchased in the capital markets. The Loan Origination Segment originates mortgage loans through the Company's retail and internet branches and loans sourced through mortgage brokers (wholesale channel). The Loan Servicing Segment includes investments in mortgage servicing rights as well as servicing operations primarily for other financial institutions.

(1) The operating results for the quarter ended December 31, 2004 have been restated to give effect to the restatement described in Note 25.

F-37

NOTE 25 - RESTATEMENT OF CONSOLIDATED FINANCIAL STATEMENTS

Subsequent to the issuance of the Company's financial statements for the year ended December 31, 2004, the Company determined it had not applied the proper accounting treatment pursuant to the provisions of Statement of Financial Accounting Standards No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities," for a securitization transaction in December of 2004. The consolidated financial statements for the year ended December 31, 2004 have been restated from the amounts previously reported to correct the accounting for the securitization transaction.

The Company improperly recorded \$73.3 million of income before income taxes, consisting of \$40.7 million of gain on securitization of mortgage loans and \$32.6 million of unrealized gain on mortgage-backed securities. Had the

Edgar Filing: AMERICAN HOME MORTGAGE INVESTMENT CORP - Form 10-K/A

transaction been accounted for properly as a financing, no gain on securitization of mortgage loans and unrealized gain on mortgage-backed securities would have been recorded. In addition, the Company improperly reported \$1.6 billion of mortgage-backed securities, \$40.5 million of MSR, and did not properly report \$3.6 billion of mortgage loans held for sale and \$2.0 billion of collateralized debt obligations.

Subsequent to the securitization, the Company improperly recorded an unrealized gain of \$1.2 million and \$2.3 million of interest income relating to the \$1.6 billion of mortgage-backed backed securities that had been improperly recorded as an asset. In addition, subsequent to the securitization, the Company did not record \$4.4 million of interest income relating to \$3.6 billion of mortgage loans held for sale and \$1.8 million of interest expense relating to \$2.0 billion of collateralized debt obligations which would have been recognized had the transaction been properly recorded as a financing. Subsequent to the securitization, the Company improperly recorded \$2.7 million of impairment provision of MSR relating to \$40.5 million of MSR.

The Company improperly classified cash flows related to certain origination, securitization and mortgage-backed securities holding activities as cash flows from investing activities rather than cash flows from operating activities. As a result, adjustments were recorded to properly classify sources and uses of cash in operating and investing activities with the most significant adjustment to properly classify cash used for origination of mortgage loans held for securitization of approximately \$9.5 billion and cash proceeds from securitization of mortgage loans of approximately \$9.1 billion from cash flows from investing activities to cash flows from operating activities for the year ended December 31, 2004. Adjustments were recorded to properly classify sources and uses of cash in operating and investing activities totaling \$584 million from cash flows from investing activities to cash flows from operating activities for the year ended December 31, 2003.
