Form 20-F  
April 30, 2007

---

UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549  
FORM 20-F

(Mark One)

- REGISTRATION STATEMENT PURSUANT TO SECTION 12(b) OR (g)  
OF THE SECURITIES EXCHANGE ACT OF 1934  
OR
- ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE  
SECURITIES EXCHANGE ACT OF 1934  
For the fiscal year ended December 31, 2006  
OR
- TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE  
SECURITIES EXCHANGE ACT OF 1934  
For the transition period from \_\_\_\_\_ to \_\_\_\_\_  
OR
- SHELL COMPANY REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE SECURITIES  
EXCHANGE ACT OF 1934

Date of event requiring this shell company report \_\_\_\_\_

Commission file number 0-30628

Alvarion Ltd.

(Exact name of Registrant as specified in its charter)

Israel

(Jurisdiction of incorporation or organization)

21A HaBarzel Street, Tel Aviv 69710, Israel

(Address of principal executive offices)

Securities registered or to be registered pursuant to Section 12(b) of the Act.

Ordinary Shares, NIS 0.01 par value per share

(Title of Class)

Securities registered or to be registered pursuant to Section 12(g) of the Act.

Title of each class

Name of each exchange on which registered

None

None

**Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act.**  
**None**

---

**(Title of Class)**

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

---

**61,629,211 Ordinary Shares, NIS 0.01 par value per share (as of December 31, 2006)**

Indicate by check mark if the registrant is a well known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months

(or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 in the Exchange Act. (Check one).

Large Accelerated Filer  Accelerated Filer  Non-Accelerated Filer

Indicate by check mark which financial statement item the registrant has elected to follow.

Item 17 Item 18

If this is an annual report indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act,

Yes No

(APPLICABLE ONLY TO ISSUERS INVOLVED IN BANKRUPTCY PROCEEDINGS DURING THE PAST FIVE YEARS)

Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Sections 12, 13 or 15(d) of the Securities Exchange Act of 1934, subsequent to the distribution of securities under a plan confirmed by a court.

Yes No

---

## INTRODUCTION

We concentrate our resources on a single line of business - wireless broadband. With more than 3 million units deployed in approximately 150 countries, we believe we are the worldwide leader in providing wireless broadband access systems. We supply top tier carriers, ISPs and private network operators with solutions based on the WiMAX standard as well as other wireless broadband solutions. Currently, our business is mainly focused on solutions based on the WiMAX standard that are used for primary wireless broadband access. In addition, we continue to sell our non-WiMAX products. These solutions provide high-speed wireless “last mile” connection to the internet for homes and businesses in both developed and emerging regions. Our strategy is to leverage our experience and leadership in both non-standard broadband wireless access (BWA) and current WiMAX markets, combined with our brand strength, broad customer base and innovative technology in order to play an important role in the WiMAX-based mobile broadband market as well.

We were incorporated in September 1992 under the laws of the State of Israel. Since our inception, we have devoted substantially all of our resources to the design, development, manufacturing and marketing of wireless products. On August 1, 2001, Floware Wireless Systems Ltd., a company incorporated under the laws of the State of Israel, or Floware, merged with and into us. As a result of the merger we continued as the surviving company and Floware’s separate existence ceased. Upon the closing of the merger, we changed our name from BreezeCOM Ltd. to Alvarion Ltd. On April 1, 2003, we acquired most of the assets and the assumption of related liabilities of InnoWave Wireless Systems Ltd. In December 2004, we completed the amalgamation of interWAVE Communications International Ltd., and most of the InterWAVE operations became our Cellular Mobile business unit. In November 2006, we sold our Cellular Mobile business unit (“CMU”) to LGC Wireless, Inc. (“LGC”), a privately-held supplier of wireless networking solutions. See Item 5.A. - "Operating and Financial Review and Prospects - Operating Results".

Except for historical information contained herein, the statements contained in this annual report are forward-looking statements, within the meaning of the Private Securities Litigation Reform Act of 1995 with respect to our business, financial condition and results of operations. Actual results could differ materially from those anticipated in these forward-looking statements as a result of various factors, including all or any of the risks discussed in “Item 3--Key Information--Risk Factors” and elsewhere in this annual report.

We urge you to consider that statements which use the terms “believe,” “expect,” “plan,” “intend,” “estimate,” “anticipate,” “p” and similar expressions in the affirmative and the negative are intended to identify forward-looking statements. These statements reflect our current views with respect to future events and are based on current assumptions, expectations, estimates and projections and are subject to risks and uncertainties. Except as required by applicable law, including the securities laws of the United States, we do not undertake any obligation nor intend to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

As used in this annual report, the terms “we,” “us,” “our,” “our company,” and “Alvarion” mean Alvarion Ltd., and its subsidiaries, unless otherwise indicated. ALVARION, ALVARION & Design, WE’RE ON YOUR WAVELENGTH, BreezeCOM, BreezeLINK, BreezeMAX, BreezeACCESS, BreezeNET, BreezeLITE, BreezePHONE, WALKair, WALKnet, EASYBRIDGE, 4Motion, OPEN, OPEN WiMAX, BreezeACCESS Wi2, InnoWave Wireless Systems (Design), INTERWAVE, INTERWAVE & Design, INTERWAVE COMMUNICATIONS, WAVENET, WaveGain,

MULTIPOINT NETWORKS, are trademarks or registered trademarks of Alvarion. All other trademarks and trade names appearing in this annual report are owned by their respective holders.

**ITEM 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISERS**

Not applicable.

**ITEM 2. OFFER STATISTICS AND EXPECTED TIMETABLE**

Not applicable.

**ITEM 3. KEY INFORMATION****A. SELECTED FINANCIAL DATA**

We have derived the following selected consolidated financial data presented below as of December 31, 2005 and 2006 and for each of the years ended December 31, 2004, 2005 and 2006 from our audited consolidated financial statements and related notes included in this annual report. The consolidated financial data for the year ended December 31, 2003 include the results of operations of the assets and assumed liabilities of the InnoWave business from April 1, 2003. The consolidated financial data for the year ended December 31, 2004 include the results of operations of the former interWAVE Communications International business, referred to as the Cellular Mobile Unit, from December 9, 2004. Following the sale of net assets of the Cellular Mobile Unit, or CMU, on November 21, 2006, the results of the CMU activities for the years ended December 31, 2004, 2005 and 2006 were reclassified to one line item in the statement of operations as "Loss from discontinued operations" below the results from continuing operations. We have derived the selected consolidated financial data as of December 31, 2002, 2003 and 2004 and for each of the years ended December 31, 2002 and 2003 from our audited consolidated financial statements and related notes not included in this annual report. We prepare our consolidated financial statements in accordance with accounting principles generally accepted in the United States, or U.S. GAAP. You should read the selected consolidated financial data together with the section of this annual report entitled "Item 5--Operating and Financial Review and Prospects" and our consolidated financial statements and related notes included elsewhere in this annual report.

## B. CAPITALIZATION AND INDEBTEDNESS

Not applicable.

## C. REASONS FOR THE OFFER AND USE OF PROCEEDS

Not applicable.

## D. RISK FACTORS

*Our business, financial condition and results of operations could be seriously harmed due to any of the following risks, among others. If we do not successfully address the risks to which we are subject, we could experience a material adverse effect on our business, results of operations and financial condition and our share price may decline.*

*We cannot assure you that we will successfully address any of these risks.*

**Risks Related to Our Business and Our Industry**

We have incurred losses in the past, we may incur losses in the near term and may **continue to** incur losses in the future.

We incurred an operating loss from continuing operations and a net loss in 2006 of approximately \$(8.4) million and \$(40.8) million, respectively. In 2005, our operating profit from continuing operations and net loss were approximately \$1.9 million and \$(12.6) million, respectively. In 2004, our operating profit from continuing operations and net income were approximately \$9.3 million and \$0.9 million, respectively. We may incur operating and net losses in the near term and we may continue to incur losses in the future. Continuing losses could have a material adverse effect on our business, financial condition and results of operations and the value and market price of our ordinary shares.

Adverse **conditions** in the telecommunications industry and in the telecommunications equipment market may **decrease** demand for our products and may harm our business, financial condition and results of operations.

Our systems are used by telecom carriers and service providers. Some carriers and service providers using wireless broadband are emerging companies with unproven business models. Adverse market conditions in the last couple of years caused our customers and potential customers to be conservative in their spending, and this could continue in the future. The markets that we participate in may not grow as we expect or at all. While our goal is to increase our sales by expanding the number of carrier customers that we address, there can be no assurance that we will succeed in doing so. The number of carriers and service providers who are our potential customers is relatively small and may not grow because of the limited number of licenses granted in each country and the substantial comparative capital requirements involved in establishing networks. As a result, our revenues may decline and increase our losses.

New markets we attempt to penetrate may not become substantial commercial markets. In addition, if we do not maintain or increase the share we expect of the wireless broadband equipment market, our business will suffer.

The mobile market and any new markets we attempt to penetrate may not become substantial commercial markets or may not evolve in a manner that will enable our products to achieve market acceptance.

In addition, in order to maintain or increase the share we expect of the markets we participate in, we must:

- sustain our attained technology position in designing, developing, and manufacturing broadband wireless access products;
- develop and cultivate additional sales channels, including original equipment manufacturer, or OEM agreements, regional local partners or other strategic arrangements with leading manufacturers of access equipment to market our wireless broadband products to prospective customers, such as local exchange carriers, cellular operators, Internet and application service providers, municipalities and local telephone companies;
- effectively establish and support relationships with customers, including local exchange carriers, internet and application service providers, public fixed or mobile telephone service providers and private network operators sometimes offered on special commercial terms; and
- effectively develop and market our OPEN WiMAX strategy in our broadband mobile solution together with our current and potential partners.

Our efforts in these markets may not succeed.

**Intense competition in the markets for our products may have an adverse effect on our sales and profitability.**

Many companies compete with us in the wireless broadband equipment market in which we sell our products. We expect that competition from large vendors as well as new market vendors will increase in the future, including both with respect to products that we currently offer and products that we intend to introduce in the future. As the market transitions toward standardization, it increasingly becomes more challenging for us to compete. In addition, some, or all, of the systems integrators and other strategic partners to which we sell our wireless broadband products could develop the capability to manufacture systems similar to our wireless broadband products. We expect our competitors to continue to improve the performance of their current products and to introduce new products or new technologies that may supplant or provide lower cost alternatives to our products or products with better performance. We are also facing additional and new competition from large telecommunications equipment vendors, such as Samsung, Motorola, Alcatel-Lucent, Nortel and Nokia and we expect this competition to grow, especially with respect to the mobile WiMAX based products. Tier 1 operators, such as Sprint Nextel, may prefer to purchase products from these large vendors.

There has been a trend towards consolidation in the telecommunications equipment market. This trend may continue in the future and result in larger competitors with enhanced resources, financial and otherwise. This may intensify the competitive nature of the markets in which we operate. Furthermore, this consolidation process, such as the mergers of Nokia and Siemens and Alcatel and Lucent, limits and may further reduce the potential variety of our customers.

In addition, as the market grows, we may face competition from aggressive start-ups in different markets. We expect that we will also face competition from alternative wireline and wireless technologies including copper wires, fiber-optic cable, digital subscriber lines, or DSL, cable modems, satellite, Wi-Fi and other broadband access technologies.

We expect these competitors to continue to improve their technologies and products which may cause us to lose some of our customers or prevent us from penetrating into new markets. Some of our existing and potential competitors, including large competitors arising from the continued consolidation in the telecommunications equipment market, have substantially greater resources including: financial, technological, manufacturing and marketing and distribution capabilities, and enjoy greater market recognition than we do. We may not be able to differentiate our products from those of our competitors, successfully develop or introduce new products that are less costly or offer better performance than those of our competitors or offer our customers payment or other commercial terms as favorable as those offered by our competitors. In addition, we may not be able to offer our products as part of integrated systems or solutions to the same extent as our competitors. A failure to accomplish one or more of these objectives could materially adversely affect our sales and profitability, harming our financial condition and results of operations.

**Standardization and increased competition may have an adverse effect on our operations.**

Standardization of product features may increase the number of competitive product offerings. Furthermore, our competitors may also attempt to influence the adoption of standards that are not compatible with our products. Standardization also results in lower average selling prices. Increased competition, direct and indirect, has resulted in, and is likely to continue to result in, reductions of average selling prices, shorter product life cycles, reduced gross margins, longer sales cycles and loss of market share and, consequently, could adversely affect our sales and profitability.

**Existing and potential industry standards may have a negative impact on our business.**

We have developed and continue to develop our products with a view to compliance with existing standards and anticipated future standards. We expended, and intend to continue to expend, substantial resources in developing products and product features that are designed to conform to such standards. In addition, although we developed our products with a view to compliance with existing standards and anticipated compliance with future standards, we may not be able to introduce on a timely basis products that comply with industry standards.

Certain standards on which we base our products and technology (such as IEEE 802.16d-2004 and IEEE 802.16e-2005) may not continue to be or will not be broadly adopted which could significantly limit our market opportunity and harm our business. In addition, our focus on anticipated future standards, including the IEEE 802.16e-2005 certified standard, may lead to delays in introducing products designed for current standards.

Our strategy of seeking to anticipate and comply with industry standards is subject to the following additional risks, among others:

- the standards ultimately adopted by the industry may vary from those anticipated by us, causing our products (which were designed to meet anticipated standards) to fail to comply with established standards;
- even if our products do comply with established standards, these standards are not mandatory and consumers may prefer to purchase products that do not comply with them or that comply with new or competing standards;
- product standardization may have the effect of lowering barriers to entry in the markets in which we seek to sell our products, by diminishing product differentiation and causing competition to be based upon criteria such as the relative size and marketing skills of competitors in which we believe we have less of a competitive advantage than on the basis of product differentiation; and
- the market transition to product standardization could significantly delay the time we recognize revenue, shifting from the date of shipping of existing products to the date of achievement of product certification and fulfillment of all revenue recognition criteria.

These risks, among others, may harm our sales and, consequently, our results of operations.

**Our products under development, including our 802.16e-2005 standards compliant WiMAX certified products, may not be available on our planned timetable. If customers refrain from buying our current products in order to wait for such products, our business will suffer.**

In 2005 and 2006, we experienced delays in orders for, and decreasing revenues from both non WiMAX products and products based on IEEE802.16d standards. These delays were primarily due to the market transition to WiMAX certified products based on 802.16e Time Division Duplex, or TDD, systems. We may continue to suffer from the market transition to 802.16e-2005 WiMAX certified products or to any other new WiMAX standards as customers continue to slow or cease their purchases of our commercially available products in order to wait for such products. If such products are not available on our planned timetable, our customers may seek other providers to fulfill their wireless needs and our revenues could decrease.

**Some of our standards-compliant WiMAX ready products may not receive the certification that we expect, which may affect our future business.**

We rely on WiMAX technology. Products based on this technology may not receive certification in the time frame we expect, or at all, and may therefore not achieve the wide acceptance that we are seeking. Market

changes could render this technology obsolete or subject to intense competition by alternative technologies. This may harm the sales of our standards compliant products, and consequently, our results of operations.

Rapid technological change may have an adverse effect on the market acceptance for our products and may adversely affect our results of operations.

The markets for our products and the technologies utilized in the industry in which we operate evolve rapidly. We rely on key technologies, including wireless LAN, wireless packet data, orthogonal frequency division multiplexing, or OFDM, time division multiplexing, modem and radio technologies and other technologies, which we have been selling for several years, as well as WiMAX and other technologies. These technologies may be replaced with alternative technologies or may otherwise not achieve the wide acceptance that we are seeking. In particular, there is a substantial risk that the wireless broadband technologies underlying our products may not achieve market acceptance for use in access applications. In addition, the introduction of WiMAX certified products may not increase the demand for wireless broadband solutions. These may adversely affect our results of operations.

Market changes could render our products and technologies obsolete or subject them to intense competition by alternative products or technologies or by improvements in existing products or technologies. For example, the wireless broadband equipment market may stop growing as a result of the deployment of alternative technologies, that are constantly improving, such as DSL, cable modem, fiber optic, coaxial cable, satellite systems, Wi-Fi technology, third or fourth generation cellular systems or otherwise. New or enhanced products developed by other companies may be technologically superior to our products, and limit our target markets, or render our products obsolete and this may adversely affect our results of operations.

The success of our technology depends on the following factors, among others:

- acceptance of new and innovative technologies;
- acceptance of standards for wireless broadband products;
- timely availability and maturity of technology from technology suppliers, such as Intel;
- capacity to handle growing demands for faster transmission of increasing amounts of data and voice;
- cost-effectiveness and performance compared to other fixes and other broadband wireless technologies;
- reliability and security;
- suitability for a sufficient number of geographic regions;
- the availability of sufficient frequencies and site locations for carriers to deploy and install products at commercially reasonable rates; and
- safety and environmental concerns regarding wireless broadband transmissions.

**We may experience difficulties or delays in the introduction of new or enhanced products, which could result in reduced sales, unexpected expenses or delays in the launch of new or enhanced products.**

The development of new or enhanced products is a complex and uncertain process. We are engaged in the development of very advanced technologies. We may experience design, manufacturing, marketing and other difficulties that could delay or prevent our development, introduction or marketing of new products or product

enhancements and intensified competition. The difficulties could result in reduced sales, unexpected expenses or delays in the launch of new or enhanced products or inability to timely introduce to the market the appropriate products, all which may adversely affect our results of operations.

**We face a number of risks relating to the sale of our Cellular Mobile Unit, or CMU, in 2006, which may adversely affect our financial results.**

In November 2006, we completed the sale of substantially all the assets comprising our CMU business to LGC Wireless, Inc., or LGC, in exchange for promissory and convertible notes, or LGC Notes, due December 31, 2007 and 2008 and the assumption of certain liabilities.

Because we did not receive any cash at the time the transaction was completed, and the consideration for the sale of the assets was in the form of the LGC Notes due December 31, 2007 and 2008, we may not eventually realize all or a portion of the proceeds from the sale of the CMU business.

**Our recent collaboration with Accton Technology Corporation to form Accton Wireless Broadband (AWB) may not achieve our expectations to build our market position in the WiMAX Consumer Electronic Devices market.**

We have recently collaborated with Accton Technology Corporation to form Accton Wireless Broadband (AWB) to develop mass market WiMAX Consumer Electronic Devices. These efforts may not result in the anticipated product capabilities in a timely fashion or at all, or in achieving market acceptance and may prevent us from maintaining or expanding our position in the WiMAX Customer Premise Equipment market. Each of these outcomes could have a material adverse effect on our results of operations.

**We engaged and may continue to engage in mergers and acquisitions which could harm our business, results of operations and financial condition, and dilute our shareholders' equity.**

We have pursued, and will continue to pursue, growth opportunities through internal development and acquisition of complementary businesses, products and technologies. We are unable to predict whether or when any other prospective acquisition will be completed. The process of integrating an acquired business may be prolonged due to unforeseen difficulties and may require a disproportionate amount of our resources and management's attention. We cannot assure you that we will be able to successfully identify suitable acquisition candidates, complete acquisitions, integrate acquired businesses into our operations, or expand into new markets. Further, once integrated, acquisitions may not achieve comparable levels of revenues, profitability or productivity as our existing business or otherwise perform as expected. The occurrence of any of these events could harm our business, financial condition or results of operations. Past and future acquisitions may require substantial capital resources, which may require us to seek additional debt or equity financing. Past and future acquisitions by us could result in the following, any of which could seriously harm our results of operations or the price of our ordinary shares:

- issuance of equity securities that would dilute our current shareholders' percentages of ownership;
  - large write-offs;
  - the incurrence of debt and contingent liabilities;
- difficulties in the assimilation and integration of operations, personnel, technologies, products and information systems of the acquired companies;
  - diversion of management's attention from other business concerns;
  - contractual disputes;
- risks of entering geographic and business markets in which we have no or only limited prior experience;

- potential loss of key employees of acquired organizations; and
- potential effects on our cash reserve.

**We have experienced in the past, and may experience in the future, quarterly and annual fluctuations in our results of operations. This may cause volatility in the market price of our ordinary shares.**

We have experienced, and may continue to experience, significant fluctuations in our quarterly and annual results of operations. Any fluctuations may cause our results of operations to fall below the expectations of securities analysts and investors. This would likely affect the market price of our ordinary shares.

Our quarterly and annual results of operations may vary significantly in the future for a variety of reasons, many of which are outside of our control, including the following:

- the uneven pace of spectrum licensing to carriers and service providers;
  - adoption of new standards in our industry;
- the size and timing of orders and the timing of large scale deployments;
  - the fulfillment of all revenue recognition criteria;
- customer deferral of orders in anticipation of new products, product features or price reductions;
- the timing of our product introductions or enhancements or those of our competitors or of providers of complementary products;
- the purchasing patterns of our customers and end-users, as well as the budget cycles of customers for our products;
- seasonality, including the relatively low level of general business activity at the beginning of each fiscal year and during the summer months in Europe and the winter months in South America and in the United States;
  - disruption in, or changes in the quality of, our sources of supply;
    - changes in the mix of products sold by us;
- the extensive marketing and organizational efforts that carriers are required to make to develop their subscriber base following the deployment of the network infrastructure, creating a gap between the time carriers purchase base stations for network infrastructure deployment and the time they purchase terminal stations for connection of subscribers to the network;
  - mergers or acquisitions, by us, our competitors and exiting and potential customers, if any;
    - one-time charges such as asset impairment and restructuring;
    - fluctuations in the exchange rate of the NIS against the dollar;
      - adoption of new financial accounting standards; and
- general economic conditions, including the changing economic conditions in the United States and worldwide.

Our customers ordinarily require the delivery of products promptly after their orders are accepted. Our business usually does not have a significant backlog of accepted orders. Consequently, revenues in any quarter depend on orders received and accepted in that quarter. The deferral of the placing and acceptance of any large order from one quarter to another could materially adversely affect our results of operations for the previous quarter. If revenues from our business in any quarter remain in the same level or decline in comparison to any previous quarter, our results of operations could be harmed.

In addition, our operating expenses may increase significantly. If revenues in any quarter do not increase correspondingly or if we do not reduce our expenses in a timely manner in response to lower level or declining revenues, our results of operations for that quarter would be materially adversely affected. Because of the variations that we have experienced in our quarterly results of operations, we do not believe quarter-to-quarter comparisons of our results of operations are necessarily meaningful and you should not rely on results of operations in any particular quarter as an indication of future performance.

**Our products have long and unpredictable sales cycles. This could adversely impact our revenues and net income.**

The sales cycle for most of our products encompasses significant technical evaluation and testing by each potential purchaser and a commitment of significant cash and other resources. The sales cycle can extend for as long as one year from initial contact with a carrier to receipt of a purchase order. This time frame may be extended due to, among other reasons, a carrier's need to obtain financing to purchase systems incorporating our products, the regulatory authorization of competition in local services, delays in the licensing of spectrum for these services and other regulatory hurdles.

As a result of the length of this sales cycle, revenues from our products may fluctuate from quarter to quarter and fail to correspond with associated expenses, which are largely based on anticipated revenues. In addition, the delays inherent in the sales cycle of our products raise additional risks of customers canceling or changing their product plans. Our revenues will be adversely affected if a significant customer, or significant potential customer, reduces, delays or cancels orders during the sales cycle of the products or chooses not to deploy networks incorporating our products. Any such fluctuation in revenue or cancellation of orders could affect the market price of our ordinary shares.

**We may fail to deliver "turn-key" solutions to our customers**

Recently, we experienced an increase demand from existing and potential customers to provide a complete operational or "turn key" solution for their deployment needs where we are responsible for third party deliverables. These solutions require us to integrate sub-contractors' technologies, equipment and services. Relying on these third-parties increases our liabilities towards these customers. If we or any of our subcontractors fail to fully comply with the customers' requirements, it may adversely affect our results of operations.

If we are unable to attain and/or retain large customers our revenues may be adversely affected.

In 2004, 2005 and 2006, 30.8%, 5.7% and 2.0% of our sales were to a Latin American operator respectively. In 2005, sales to our Latin American customer decreased significantly due to the nearing completion of a large deployment. Our reliance on this large customer adversely affected our results of operations in 2005. If we are unable to attain and/or retain other large customers our revenues may be adversely affected.

Our business is dependent upon the success of distributors who are under no obligation to purchase our products.

A significant portion of our revenues is derived from sales to independent distributors. These distributors then resell the products to others, who further resell those products to end-users. Changes in the distribution and sales channels of our products, a loss of a major distributor, or our inability to establish effective distribution and sales channels for new products may impact our ability to sell our products and result in a loss of revenues. We are dependent upon the acceptance of our products by the market through our distributors' efforts in marketing and sales. In some cases, arrangements with our distributors do not prevent them from selling competitive products and those arrangements do not contain minimum sales or marketing performance requirements. These distributors

may not give a high priority to marketing and supporting our products. Changes in the financial condition, business or marketing strategies of these distributors could have a material adverse effect on our results of operations. Any of these changes could occur suddenly and rapidly.

**We are dependent upon the success of our direct sales efforts.**

Direct sales accounted for a total of approximately 52% of our sales in 2004, 48% of our sales in 2005 and 40% of our sales in 2006. Direct sales customers are not under any obligation to purchase our products. Some of these customers do not have long business histories and have encountered, and may continue to encounter, financial difficulty, including difficulty in obtaining credit to purchase our products. These customers typically purchase our products and solutions on a project-by-project basis, so that continuity of purchases by these customers is not assured. We do not necessarily retain sales personnel with carrier sales or project sales and management expertise. We may also face difficulties locating and retaining carrier customers who purchase directly from us. If we are unable to effectively continue our direct sales efforts of our products, our results of operations could be materially adversely affected. Any such change could occur suddenly and rapidly.

Our business depends in part on original equipment manufacturers and systems integrators.

The success of the sales of our wireless broadband products currently depends in part on existing relationships with OEMs or other system integrators. A portion of our systems is sold to and through telecommunications systems integrators for integration into their systems, rather than directly to carriers. The sale of our wireless broadband products depends in part on the OEMs' and systems integrators' active marketing and sales efforts as well as the quality of their integration efforts and post-sales support. Sales through the OEM and system integrator channels exposes this business to a number of risks, each of which could result in a reduction in the sales of our wireless broadband products.

We face the risks of termination of these relationships, or consolidation of some of these OEMs and system integrators or financial problems they might face, as well as the promotion of competing products or emphasis on alternative technologies by these OEMs and systems integrators turning them into competitors rather than our partners, all that may result in decline in the purchase of our products. In addition, our efforts to increase sales may suffer from the lack of brand visibility resulting from OEMs' and systems integrators' integration of these products into more comprehensive systems. If any of these risks materializes, we will need to develop alternative methods of marketing these products. Until we do so, sales of our wireless broadband products may decline.

If our DSOs (**Days Sales Outstanding**) increase and our revenues decrease we may suffer from a cash shortfall.

In 2004, 2005 and 2006 our DSOs were 51, 73 and 69, respectively. Excluding the large Latin American customer the DSOs in 2004, 2005 and 2006 were 73, 77 and 70, respectively. We may experience an increase in DSOs and a decline in revenues in the future, resulting in a cash shortfall.

We may experience a decrease in our gross margin levels in the future, **which may adversely affect our financial results.**

We believe that due to several market developments, including increased competition in regions in which we currently operate, the transition in the market demand of some of our existing and potential products and the mix of our products, such as Customer Premise Equipment, or CPEs, to commodities and the entry of new large operators into developed regions, our gross margin will decline overtime from its 2006 rate of 50.5%. If we are

unable to maintain or otherwise increase this gross margin level, it will negatively affect our profitability and results of operations.

**Our products are complex and may have errors or defects that are detected only after deployment in complex networks.**

Some of our products are highly complex and are designed to be deployed in complex networks. Although our products are tested during manufacturing and prior to deployment, our customers may discover errors after the products have been fully deployed. If we are unable to fix errors or other problems that may be identified in full deployment, we could experience:

- costs associated with the remediation of any problems;
  - loss of or delay in revenues;
    - loss of customers;
- failure to achieve market acceptance and loss of market share;
  - diversion of deployment resources;
- diversion of research and development resources to fix errors in the field;
  - increased service and warranty costs;
- legal actions or demands for compensation by our customers; and
  - increased insurance costs.

In addition, our products often are integrated with other network components. There may be incompatibilities between these components and our products that could significantly harm the service provider or its subscribers. Product problems in the field could require us to incur costs or divert resources to remedy the problems and subject us to liability for damages caused by the problems or delay in research and development projects because of the diversion of resources. These problems could also harm our reputation and competitive position in the industry.

**We could be subject to warranty claims and product recalls, which could be very expensive and harm our financial condition.**

Products like ours sometimes contain undetected errors. These errors can cause delays in product introductions or require design modifications. In addition, we are dependent on unaffiliated suppliers for key components incorporated into our products. Defects in systems in which our products are deployed, whether resulting from faults in our products or products supplied by others, from faulty installation or from any other cause, may result in customer dissatisfaction. We are continually marketing several new products. The risk of errors in these new products, as in any new product, may be greater than the risk of errors in established products. The warranties for our products permit customers to return for repair, within a period ranging from 12 to 36 months of purchase, any defective products. Any failure of a system in which our products are deployed (whether or not these products are the cause), any product recall and any associated negative publicity could result in the loss of, or delay in, market acceptance of our products and harm our business, financial condition and results of operations. Although we attempt to limit our liability for product defects to product replacements, we may not be successful, and customers may sue us or claim liability for the defective products. A successful product liability claim could result in substantial cost and divert management's

attention and resources, which would have a negative impact on our financial condition and results of operations.

**We must be able to manage expenses and inventory risks associated with meeting the demand of our customers.**

To ensure that we are able to meet customer demand for our products, we place orders with our subcontractors and suppliers based on our estimates of future sales. If actual sales differ materially from these estimates, our inventory levels may be too high, and inventory may become obsolete and/or over-stated on our balance sheet. This would require us to write off inventory, which could adversely affect our results of operations. In 2004, 2005 and 2006, we wrote off inventory in the amounts of \$11.4 million, \$7.3 million and \$9.5 million, respectively.

**We depend on a number of manufacturing subcontractors with limited manufacturing capacity, and these manufacturers may be unable to fill our orders on a timely basis or with the quality specifications we require. As a result, we may not meet our customers' demands, harming our business and results of operations.**

We currently depend on a number of contract manufacturers with limited manufacturing capacity to manufacture our products. The assembly of certain of our finished products, the manufacture of custom printed circuit boards utilized in electronic subassemblies and related services are also performed by these independent subcontractors. In addition, we rely on third-party "turn-key" manufacturers to manufacture certain sub-systems for our products.

Reliance on third party manufacturers exposes us to significant risks, including risks resulting from:

- potential lack of manufacturing capacity;
- limited control over delivery schedules;
  - quality assurance and control;
- manufacturing yields and production costs;
- voluntary or involuntary termination of their relationship with us;
- difficulty in, and timeliness of, substituting any of our contract manufacturers, which could take as long as six months or more;
  - the economic and political conditions in their environment; and
    - their financial strength.

If the operations of our contract manufacturers are halted, even temporarily, or if they are unable to operate at full capacity for an extended period of time, we may experience business interruption, increased costs, loss of goodwill and loss of customers.

We are required to place manufacturing orders well in advance of the time we expect to sell products, and this may result in us ordering greater or lesser amount of these products than required. Because we outsource the manufacture of several of our products, we are required to place manufacturing orders well in advance of the time when we expect to sell these products. In the event that we order the manufacture of a greater or lesser amount of these products than we may be required to purchase the surplus products or to forego or delay the sale or delivery of the products that we did not order in advance. In either case, our business and results of operations may be adversely affected. Any of these risks could result in manufacturing delays or increases in manufacturing costs and expenses. For example, in 2005 and 2006, as a result of an over-estimation of our sales, we recorded in our balance sheet an allowance for irrevocable inventory purchase commitments in an aggregate amount of approximately \$2.4 million and \$2.6 million,

respectively. If we experience manufacturing delays, we could lose orders for our

products and, as a result, lose customers. There may be an adverse affect on our profitability and consequently on our results of operations, if we incur increased costs.

**Our dependence on limited sources for key components of our products may lead to disruptions in the delivery and cost of our products, harming our business and results of operations.**

We currently obtain key components for our products from a limited number of suppliers, and in some instances from a single supplier. In addition, some of the components that we purchase from single suppliers are custom-made. Although we believe that we can replace any single supplier and obtain key components of comparable quality and price from alternative suppliers, we cannot assure that we will not experience disruptions in the delivery and cost of our products. We do not have long-term supply contracts with most of these suppliers. In addition, there is global demand for some electrical components that are used in our systems and that are supplied by relatively few suppliers. This presents the following risks:

- delays in delivery or shortages of components, especially for custom-made components or components with long delivery lead times, could interrupt and delay manufacturing and result in cancellations of orders for our products;
- suppliers could increase component prices significantly and with immediate effect on the manufacturing costs for our products;
  - we may not be able to develop alternative sources for product components;
- suppliers could discontinue the manufacture or supply of components used in our products which may require us to modify our products and which may cause delays in product shipments, increased manufacturing costs and increased product prices;
  - we may be required to hold more inventory for longer periods of time than we otherwise might in order to avoid problems from shortages or discontinuance; and
- due to the political situation in the Middle East, we may not be able to import necessary components.

In the past, we experienced delays and shortages in the supply of components on more than one occasion. We may experience such delays in the future, harming our business and results of operations.

**Regulation, by governments or other public bodies, may increase our costs of doing business, limit our potential markets or require changes to our products that may be difficult and costly.**

Our business is premised on the availability of certain radio frequencies for two-way broadband communications. Radio frequencies are subject to extensive regulation under the laws of each country and international treaties. Each country has different regulation and regulatory processes for wireless communications equipment and uses of radio frequencies. In addition, there are regulatory bodies that act to harmonize spectrum among countries, a factor that may influence our products that operate in a particular frequency.

In the United States, our products are subject to the Federal Communications Commission, or FCC, rules and regulations. In other countries, our products are subject to national or regional radio authority rules and regulations. Current FCC regulations permit license-free operation in FCC-certified bands in the radio spectrum in the United States. In other countries the situation varies as to the spectrum, if any, that may be used without a license and as to the permitted purposes of such use. Some of our products operate in license-free bands, while others operate in licensed bands. The regulatory environment in which we operate is subject to significant change, the results and

timing of which are uncertain.

In many countries the unavailability of radio frequencies for two-way broadband communications has inhibited the growth of these networks. The process of establishing new regulations for wireless broadband

frequencies and allocating these frequencies to operators is complex and lengthy. The regulation of frequency licensing began during 1999 in many countries in Europe and South America and continues in many countries in these and other regions. However, this frequency licensing regulation process may suffer from delays that may postpone the commercial deployment of products that operate in licensed bands in any country that experiences this delay.

Our current customers that commercially deploy our licensed band products have already been granted appropriate frequency licenses for their network operation. In some cases, the continued validity of these licenses may be conditional on the licensee complying with various conditions. Since WiMAX technologies evolve and enable new applications, such as mobile services, in countries that have already allocated spectrum, governments may delay the granting of other spectrum for mobile WiMAX or the usage of the spectrum for new application such as mobile WiMAX. Some countries still lag in the allocation of broadband wireless licenses, and this situation may continue in the allocation for spectrum for use by WiMAX mobile services. In addition to regulation of available frequencies, our products must conform to a variety of national and international regulations that require compliance with administrative and technical requirements as a condition to the operation of marketing or devices that emit radio frequency energy. These requirements were established, among other things, to avoid interference among users of radio frequencies and permit interconnection of equipment.

The regulatory environment in which we sell our products subjects us to several risks, including the following:

- Our customers may not be able to obtain sufficient frequencies for their planned uses of our wireless broadband products.
- Failure by the regulatory authorities to allocate suitable and sufficient radio frequencies in a timely manner could deter potential customers from ordering our wireless broadband products. Also, licenses to use certain frequencies and other regulations may include terms, which affect the desirability of using our products and the ability of our customers to grow.
- If our products operate in the license-free bands, FCC rules and similar rules in other countries require operators of radio frequency devices, such as our products, to cease operation of a device if its operation causes interference with authorized users of the spectrum and to accept interference caused by other users.
- If the use of our products interferes with authorized users, or if users of our products experience interference from other users, market acceptance of our products could be adversely affected.
- Regulatory changes, including changes in the allocation of available frequency spectrum, may significantly impact our operations by rendering our current products obsolete or non-compliant, or by restricting the applications and markets served by our products.
- Regulatory changes and restrictions imposed due to environmental concerns, such as restrictions imposed on the location of outdoor antennas.
- We may not be able to comply with all applicable regulations in each of the countries where our products are sold and we may need to modify our products to meet local regulations.

In addition, we are subject to export control laws and regulations with respect to all of our products and technology. We are subject to the risk that more stringent export control requirements could be imposed in the future on product classes that include products exported by us.

We may also be subject to certain European directives like the WEEE (Waste Electrical and Electronical Equipment) and the ROHS (Restriction of Hazardous Substances in Electrical and Electronic Equipment).

**Our proprietary technology is difficult to protect and unauthorized use of it by third parties may impair our ability to compete effectively.**

Our success and ability to compete will depend, to a large extent, on maintaining our proprietary rights and the rights that we currently license or will license in the future from third parties. We rely primarily on a combination of patents, trademark, trade secret and copyright law and on confidentiality, non-disclosure and assignment-of-inventions agreements to protect our proprietary technology. We have obtained several patents and have several patent applications pending that are associated with our products. We also have several trademark registrations associated with our name and some of our products.

These measures may not be adequate to protect our technology from third-party infringement. Our competitors may independently develop technologies that are substantially equivalent or superior to our technology. Third party patent applications filed earlier may block our patent applications or receive broader claim coverage. In addition, any patents issued to us, if issued at all, may not provide us with significant commercial protection. Third parties may also invalidate, circumvent, challenge or design around our patents or trade secrets, and our proprietary technology may otherwise become known or similar technology may be independently developed by competitors. Additionally, our products may be sold in foreign countries that provide less protection to intellectual property than that provided under U.S. or Israeli laws. Failure to successfully protect our intellectual property from infringement may damage our ability to compete effectively and harm our results of operations.

**We could become subject to litigation regarding intellectual property rights, which could seriously harm our business.**

Third parties have in the past asserted against us, and may in the future assert against us, infringement claims or claims that we have infringed a patent, trademark or other proprietary right belonging to them. As the Broadband Wireless Access market transitions toward standardization, we are more exposed to intellectual property litigation by third parties who claim to hold intellectual property rights related to such standards. In addition, based on the size and sophistication of our competitors and the history of rapid technological change in our industry, we anticipate that several competitors may have intellectual property rights that could relate to our products. Therefore, we may need to litigate to defend against claims of infringement or to determine the validity or scope of the proprietary rights of others. Similarly, we may need to litigate to enforce or uphold the validity of our patent, trademarks and other intellectual property rights. Other actions may involve ownership disputes over our intellectual property or the misappropriation of our trade secrets or proprietary technology. As a result of these actions, we may have to seek licenses to a third party's intellectual property rights, which may not be able to be successfully integrated into our products. These licenses may not be available to us on reasonable terms or at all. In addition, if we decide to litigate these claims, the litigation could be expensive and time consuming and could result in court orders preventing us from selling our then-current products or from operating our business. Any infringement claim, even if not meritorious, could result in the expenditure of significant financial and managerial resources and harm our business, financial condition and results of operations.

**If we are unable to maintain licenses to use certain technologies, we may not be able to develop and sell our products.**

We license certain technologies from others for use in connection with some of our technologies. The loss of these licenses could impair our ability to develop and market our products. If we are unable to obtain or maintain the licenses that we need, we may be unable to develop and market our products or processes, or we may need to obtain substitute technologies of lower quality or performance characteristics or at greater cost. We cannot assure you that we can maintain these licenses or obtain additional licenses, if we need them in the future, on commercially reasonable terms or at all.

**Our failure to manage growth effectively could impair our business, financial condition and results of operations.**

Our acquisition of most of the assets and assumed liabilities of InnoWave and our amalgamation with interWAVE have significantly strained our management, operational and financial resources. Any future growth, including through mergers and acquisitions, may increase the strain on our management, operational and financial resources. If we do not succeed in managing future growth effectively, we may not be able to meet the demand, if any, for our products and we may lose sales or customers, harming our business, financial condition and results of operations

**We depend on key personnel.**

Our future success depends, in part, on the continued service of key personnel. We have recently experienced changes in several senior management personnel positions. We believe we were able to retain qualified replacement for such positions. However, there is no assurance that the new senior management personnel will provide the same or a better level of service to us. In addition, if one or more of our key technical, sales or senior management personnel terminates his or her employment and we are unable to retain a qualified replacement, our business and results of operations could be harmed.

**Our ability to achieve our strategic, operational and financial goals depends on our ability to hire, train and retain qualified employees.**

Our success depends in large part on the continued contributions of our managerial, technical, and sales and marketing personnel. Our employees are employed "at will". This means that our employees are not obligated to remain employed by us for any specific period.

The process of hiring, training and successfully integrating qualified personnel into our operations is a lengthy and expensive one. The market for the qualified personnel we require is very competitive. Although we did not increase significantly the number of our employees, we are experiencing large growth in manpower. Our failure to hire and retain qualified employees could cause our revenues to decline and impair our ability to achieve our strategic, operational and financial goals.

**We may be classified as a passive foreign investment company.**

As a result of the combination of our substantial holdings of cash, cash equivalents and securities and the decline in the market price of our ordinary shares from its historical highs, there is a risk that we could be classified as a passive foreign investment company, or PFIC, for United States federal income tax purposes. Based upon our market capitalization during 2004, 2005 and 2006 and each year prior to 2001, we do not believe that we were a PFIC for any such year and, based upon our valuation of our assets as of the end of each quarter of 2002 and 2003 and an independent valuation of our assets as of the end of each quarter of 2001, we do not believe that we were a PFIC for 2001, 2002 or 2003 despite the relatively low market price of our ordinary shares during some of those years. We cannot assure you, however, that the United States Internal Revenue Service or the courts would agree with our conclusion if they were to consider our situation. There is no assurance that we will not become a PFIC in 2007 or in subsequent years. If we were classified as a PFIC, U.S. taxpayers that own our ordinary shares at any time during a taxable year for which we were a PFIC would be subject to additional taxes upon certain distributions by us or upon gains recognized after a sale or disposition of our ordinary shares unless they appropriately elect to treat us as a "qualified electing fund" or to make a "mark to market election" under the U.S. Internal Revenue Code. This could also adversely affect the market price of our ordinary shares. See the discussion

at "Taxation - United States Federal Income Tax Considerations With Respect to the Acquisition, Ownership and Disposition of our Ordinary Shares - Passive Foreign Investment Company Status".

**We are exposed to additional costs and risks associated with complying with increasing and new regulation of corporate governance and disclosure standards.**

As a public company, we spend an increased amount of management time and resources to comply with changing laws, regulations and standards relating to corporate governance and public disclosure, including the Sarbanes-Oxley Act of 2002, new Securities and Exchange Commission regulations and NASDAQ National Market rules. In connection with our compliance with Section 404 and the other applicable provisions of the Sarbanes-Oxley Act of 2002, our management and other personnel devote a substantial amount of time, and may need to hire additional accounting and financial staff, to assure that we comply with these requirements. Compliance may also make some of our activities more time-consuming and costly. For example, we expect these rules and regulations to make it more difficult and more expensive for us to obtain director and other liability insurance, and we may be required to incur substantial costs to maintain current levels of coverage. The additional management attention and costs relating to compliance with the Sarbanes-Oxley Act could materially and adversely affect our growth and financial results.

**The trading price of our ordinary shares is subject to volatility.**

The trading price of our ordinary shares has experienced significant volatility in the past and may continue to do so in the future. Since our initial public offering in March 2000, the sales prices of our ordinary shares on the NASDAQ Global Market have ranged from a high of \$53.12 to a low of \$1.55. -On April 25, 2007, the last sale price of our ordinary shares on the NASDAQ Global Market was \$8.48. We may continue to experience significant volatility in the future, based on the following factors, among others:

- our prospects;
- actual or anticipated fluctuations in our sales and results of operations;
- variations between our actual or anticipated results of operations and the published expectations of analysts;
- general conditions in the wireless broadband products industry and general conditions in the telecommunications equipment industry;
- announcements by us or our competitors of significant technical innovations, acquisitions, strategic partnerships, joint ventures and capital commitments;
- introduction of technologies or product enhancements or new industry substitute standards that reduce the need for our products;
- general economic and political conditions, particularly in the United States and in South America on our operations and results; and
- departures of key personnel.

**We are defendants in securities class action litigation, which requires extensive management attention and resources and can be expensive, lengthy and disruptive.**

We are the defendants in a few lawsuits, including securities class action litigation as noted in “Item 8 - Financial Information” under the caption “Legal proceedings”. Legal proceedings can be expensive, lengthy and disruptive to normal business operations, and can require extensive management attention and resources, regardless of their merit. Moreover, we cannot predict the results of legal proceedings, and an unfavorable

resolution of a lawsuit or proceeding could materially adversely affect our business, results of operations and financial condition.

**Operating in international markets exposes us to risks, which could cause our sales to decline and our operations to suffer.**

While we are headquartered in Israel, approximately 99% of our sales in 2004, 2005 and 2006 were generated elsewhere around the world. Our products are marketed internationally and we are therefore subject to certain risks associated with international sales, including, but not limited to:

- trade restrictions, tariffs and export license requirements, which may restrict our ability to export our products or make them less price-competitive;
- currency fluctuations;
- greater difficulty in safeguarding intellectual property; and
- difficulties in managing overseas subsidiaries and international operations.

We may encounter significant difficulties with the sale of our products in international markets as a result of one or more of these factors.

**There may be health and safety risks relating to wireless products.**

In recent years, there has been publicity regarding the potentially negative direct and indirect health and safety effects of electromagnetic emissions from cellular telephones and other wireless equipment sources, including allegations that these emissions may cause cancer. Our wireless communications products emit electromagnetic radiation. Health and safety issues related to our products may arise that could lead to litigation or other actions against us or to additional regulation of our products. We may be required to modify our technology and may not be able to do so. We may also be required to pay damages that may reduce our profitability and adversely affect our financial condition. Even if these concerns prove to be baseless, the resulting negative publicity could affect our ability to market these products and, in turn, could harm our business and results of operations.

**Terrorist attacks, or the threat of such attacks, may negatively impact the global economy which may materially adversely affect our business, financial condition and results of operation and may cause our share price to decline.**

The financial, political, economic and other uncertainties following terrorist attacks throughout the world have led to a worsening of the global economy. As a result, many of our customers and potential customers have become much more cautious in setting their capital expenditure budgets, thereby restricting their telecommunications procurement. Uncertainties related to the threat of terrorism have had a negative effect on global economy, causing businesses to continue slowing spending on telecommunications products and services and further lengthen already long sales cycles. Any escalation of these threats or similar future events may disrupt our operations or those of our customers, distributors and suppliers, which could adversely affect our business, financial condition and results of operations.

### **Risks Relating to Our Location in Israel**

#### **Conducting business in Israel entails special risks.**

We are incorporated under Israeli law and our principal offices and the majority of our manufacturing and research and development facilities are located in the State of Israel. Political, economic and military conditions in Israel directly affect our operations. We could be harmed by any major hostilities involving Israel, the interruption or curtailment of trade between Israel and its trading partners or a significant downturn in the economic or financial condition of Israel. In the event of war, we and our Israeli subcontractors and suppliers may cease operations which may cause delays in the development, manufacturing or shipment of our products. Due to the volatile security situation in Israel, our insurance carrier no longer insures our facilities and assets for damage or loss resulting from terrorist incidents. Additionally, several countries still restrict business with Israel and with Israeli companies. We could be adversely affected by the continuation or deterioration of Israel's conflict with the Palestinians or from restrictive laws or policies directed towards Israel or Israeli businesses.

In addition, many of our male employees in Israel, including members of senior management, are obligated to perform one month (in some cases more) of annual military reserve duty until they reach age 45 and, in the event of a military conflict, could be called to active duty. Our operations could be disrupted by the absence of a significant number of our employees related to military service or the absence for extended periods of military service of one or more of our key employees. A disruption could materially adversely affect our business, operating results and financial condition.

#### **We currently benefit from government programs and tax benefits that may be discontinued or reduced.**

We have received grants from the Government of Israel through the Office of the Chief Scientist of the Ministry of Industry, Trade and Labor, or OCS, for the financing of a portion of our research and development expenditures in Israel, pursuant to the provisions of The Encouragement of Industrial Research and Development Law, 1984, referred to as the Research and Development Law. Pursuant to our current arrangement with the OCS, it will finance up to 20% of our research and development expenses by reimbursing us for up to 50% of the approved expenses related to our generic research and development projects. In addition, we obtain other grants from the OCS to partially fund certain other research and development projects. These programs currently restrict our ability to manufacture particular products or transfer particular technology outside of Israel. The Research and Development Law and related regulation permits the OCS to approve the transfer of manufacturing rights outside Israel subject to an approval of the research committee and in exchange for payment of higher royalties, for royalties bearing programs. Under the programs we need to comply with certain conditions. If we fail to comply with these conditions, the benefits received could be canceled and we could be required to refund any payments previously received under these programs or pay additional amounts with respect to the grants received under these programs. The Government of Israel has reduced the benefits available under these programs in recent years, and these programs may be discontinued or curtailed in the future. If the Government of Israel discontinues or modifies these programs and potential tax benefits, our business, financial condition and results of operations could be materially adversely affected.

In addition, we have been granted "Approved Enterprise" status under the Law for the Encouragement of Capital Investments, 1959 ("Investment Law") for our production facilities in Israel. Such status enables us to obtain certain tax relief for a definitive period upon compliance with the Investment Law regulations. On April 1, 2005, an amendment to the Investment Law came into effect which significantly changed the provisions of the Investment Law. The amendment revised the criteria for investments qualified to receive tax benefits. An eligible investment program under the amendment will qualify for benefits as a Privileged Enterprise (rather than the previous terminology of Approved Enterprise). Among other things the amendment provides tax benefits to both

local and foreign investors and simplifies the approval process. However, the amendment provides that terms and benefits included in any certificate of approval granted prior to December 31, 2004 will remain subject to the provisions of the law as they were on the date of such approval. We believe that we are currently in compliance with these requirements. However, if we fail to comply with these conditions in the future, the tax benefits received could be canceled and we could be required to pay increased taxes in the future. We could also be required to refund tax benefits, with interest and adjustments for inflation based on the Israeli consumer price index.

We currently contemplate that a portion of our products will be manufactured outside of Israel. This could materially reduce the tax benefits to which we would otherwise be entitled. We cannot assure you that the Israeli tax authorities will not adversely modify the tax benefits that we could have enjoyed prior to these events.

**We could be adversely affected if the rate of inflation in Israel exceeds the rate of devaluation of the New Israeli Shekel against the dollar.**

Substantially all of our revenues are generated in U.S. dollars. A significant portion of our expenses, primarily labor and subcontractor expenses, is incurred in New Israeli Shekels, or NIS. As a result, we are exposed to the risk that the rate of inflation in Israel will exceed the rate of devaluation of the NIS in relation to the dollar, that the timing of this devaluation lags behind inflation in Israel, or that the NIS may increase in value relative to the dollar. If the dollar costs of our operations in Israel increase, our dollar-measured results of operations will be adversely affected. In 2006, the value of the dollar decreased in relation to the NIS by 8.2%, and the inflation rate in Israel was (0.1)%. If this trend continues, it will adversely affect our result of operations.

**Provisions of Israeli law and our articles of association may delay, prevent or make difficult a merger or an acquisition of us, which could prevent a change of control and therefore depress the market price of our ordinary shares.**

Our articles of association contain certain provisions that may delay or prevent a change of control, including a classified board of directors. In addition, Israeli corporate law regulates acquisitions of shares through tender offers and mergers, requires special approvals for transactions involving directors, officers or significant shareholders, and regulates other matters that may be relevant to these types of transactions. These provisions of Israeli law could have the effect of delaying or preventing a change in control and may make it more difficult for a third party to acquire us, even if doing so would be beneficial to our shareholders, and may limit the price that investors may be willing to pay in the future for our ordinary shares. Furthermore, Israeli tax considerations may make potential acquisition transactions unappealing to us or to some of our shareholders. For example, Israeli tax law may subject a shareholder who exchanges his or her ordinary shares for shares in a foreign corporation to taxation before disposition of the investment in the foreign corporation.

**It may be difficult to effect service of process and enforce U. S. judgments against our directors and officers in Israel or assert U.S. securities laws claims in Israel.**

We are incorporated in Israel. Our executive officers and some of the directors are not residents of the United States, and a substantial portion of our assets and the assets of these persons are located outside the United States. Therefore, it may be difficult to obtain a judgment in the United States or collect or get an Israeli court to enforce a judgment obtained in the United States against us or any of those persons. Furthermore, it may be difficult to assert U.S. securities law claims in original actions instituted in Israel.

## **ITEM 4. INFORMATION ON THE COMPANY**

### **A. HISTORY AND DEVELOPMENT OF THE COMPANY**

We were incorporated in September 1992 under the laws of the State of Israel. Since our inception, we have devoted substantially all of our resources to the design, development, manufacturing and marketing of wireless products.

On August 1, 2001, Floware merged with and into us. As a result of the merger we continued as the surviving company and Floware's separate existence ceased. Upon the closing of the merger, we changed our name from BreezeCOM Ltd. to Alvarion Ltd. On April 1, 2003, we completed an acquisition of most of the assets and the assumption of related liabilities of InnoWave Wireless Systems Ltd. In December 2004, we completed the amalgamation of interWAVE Communications International Ltd., and the InterWAVE operations became our Cellular Mobile business unit ("CMU").

In November 2006, we completed the sale of our CMU to LGC Wireless, Inc. ("LGC"), a privately-held supplier of wireless networking solutions. See Item 5.A. - "Operating and Financial Review and Prospects - Operating Results".

Our principal executive offices are located at 21A HaBarzel Street, Tel Aviv 69710, Israel and our telephone number is 972-3-645-6262. In 1995, we established a wholly-owned subsidiary in the United States, Alvarion, Inc., a Delaware corporation. Alvarion, Inc. is located at 2495 Leghorn Street, Mountain View, CA, 94043 and its telephone number is 650-314-2500. Alvarion, Inc. serves as our agent for service of process.

We also have several wholly owned subsidiaries worldwide handling local support, promotion, manufacturing and developing activities. For a discussion of our capital expenditures and divestitures, see "Item 5B--Operating and Financial Review and Prospects--Liquidity and Capital Resources".

### **B. BUSINESS OVERVIEW**

#### **General.**

We concentrate our resources on a single line of business - wireless broadband. As a wireless broadband pioneer, we have been driving and delivering innovations for more than 10 years, from core technology developments to creating and promoting industry standards. Leveraging our key roles in the IEEE and HiperMAN standards committees and experience in deploying OFDM-based systems, we have been in the forefront of the WiMAX Forum™ in its focus on increasing the widespread adoption of standards-based products in the wireless broadband market and leading the entire industry to mobile WiMAX solutions. The WiMAX standard is the outcome of the standardization work done by the WiMAX Forum™, widely based on the IEEE 802.16 standard working group.

Our primary focus is to provide solutions based on the WiMAX standard that are used for primary wireless broadband access. These solutions provide high-speed wireless "last mile" connection to the internet for homes and businesses in both developed and emerging regions. We also continue to sell our non-WiMAX products in the short and mid term. With more than 3 million units deployed in approximately 150 countries, we believe we are the worldwide leader in providing wireless broadband access systems. We supply top tier carriers, Internet Service Providers, or ISP, and private network operators with solutions based on the WiMAX standard as well as other wireless broadband solutions.

We are also targeting the nascent Personal Broadband equipment market. Personal Broadband is always-on, all IP-based, high-speed internet access, enabling subscribers to use various mobile electronic devices to take their broadband connection with them anywhere and enjoy mobile services and applications at broadband speeds above 1Mbps. Our strategy is to leverage our experience and leadership in both non-standard broadband wireless access (BWA) and current WiMAX markets, combined with our brand strength, broad customer base and innovative technology in order to play an important role in the WiMAX-based mobile broadband market as well.

Our products cover the full range of frequency bands targeting fixed, nomadic and mobile applications, including, business and residential broadband access, corporate VPNs, toll quality telephony, mobile base station feeding, hotspot coverage extension, community interconnection, public safety communications and, in the future, personal broadband services.

## **INDUSTRY DYNAMICS**

### **Our Existing Market: WiMAX and Wireless Broadband Demand for Primary Broadband Access Services**

#### ***The Early Demand for Wireless Broadband***

In the late nineties, both consumers and businesses began to demand broadband - or high-speed Internet data services accelerating the establishment of DSL and cable-based broadband networks (wired broadband infrastructure). These networks involved high investment costs, so the access network infrastructure was not established everywhere the demand for broadband existed. Wireless broadband networks stepped in to meet this un-served need for broadband services, and this has been the primary application of wireless broadband networks. This market exists primarily in the rural and suburban areas in developed countries and in more developed areas in developing countries. By bridging the “digital divide”, or providing both broadband and basic telephony services in areas where telecommunications infrastructure is poor or does not exist, wireless broadband grew to comprise more than 5% of the world’s broadband networks.

#### ***The Evolution of Wireless Broadband***

The wireless broadband market has grown over the last decade due to the acceptance of wireless equipment as a high performance, cost-efficient alternative to wireline infrastructure for broadband connectivity.

In developed countries, government financial support has encouraged operators to complete broadband coverage in rural and suburban areas with low-density populations where the business model for wired infrastructure is less attractive. In developing countries, government financial support is provided to encourage operators to offer basic telephony services and internet access based on wireless broadband to meet the demand, mainly in urban and suburban areas.

#### ***Government Deregulation Creates Demand***

Global telecom deregulation is opening up the telecommunications/Internet access industries to competition by new players. Unlike the built-in delivery systems of wireline infrastructure, wireless technology requires the use of frequencies contained within a given spectrum to transfer voice and data. Usually, governments allocate a specific range of that spectrum, either licensed or unlicensed bands, to incumbent and innovative challengers, competitive carriers, as well as to cellular operators, ISPs and other service providers, enabling them to launch a variety of broadband initiatives based exclusively on wireless networking solutions. During 2006, additional licensed and unlicensed spectrums were added in many regions around the world. Increased availability of licensed and unlicensed spectrums enables operators to address increasing demand for wireless broadband.

***Additional Factors in the Widespread Adoption of Wireless Broadband***

Over the last few years, wireless broadband networks have increasingly grown in popularity, due in part to unmet demand from wired infrastructure, but also because of the following factors:

- Competition among various types of telecommunications players to offer multiple services using a single network;
  - Growing trend of public access providers to build municipalities' own infrastructures
- Rapid progression of standardization by international bodies, such as the WiMAX Forum™, combined with the wide adoption of these standards by equipment vendors and carriers; and
- The attractive business model that is offered to operators by using high performance standardized and interoperable products.

***WiMAX Technology, Applications and Industry Advantages***

WiMAX stands for Worldwide Interoperability for Microwave Access, a technology based on the IEEE 802.16 air interface standard and the ETSI HiperMAN wireless metropolitan area network (MAN) standard. WiMAX is the worldwide standard for wireless broadband access and personal mobile broadband applications. Solutions based on WiMAX technology enable fixed-line, cable, and mobile operators and new challengers to compete with each other in the anticipated market for higher Average Revenue Per User, or ARPU, services. WiMAX technology has the capacity to deliver sufficient bandwidth to enable value-added applications, including live video broadcasting, high-speed data, toll-quality voice and multimedia content. Most importantly, the WiMAX (IEEE-802.16) standard was developed based on the concept of an "all IP Network". A complete set of IP-based functions and interfaces allow for high quality service delivery, while keeping end-to-end QoS (Quality of Service), and minimizes investment and operating costs for operators with its distributed architecture and efficient, packet-based air interface.

The technical advantages of WiMAX over other mobile technologies, especially in spectral efficiency that increases the capacity and reduces the cost per subscriber and advanced QoS, non line-of-sight capabilities and smart antennas, are being proven now in the lab and in the field. This technology offers a full set of chargeable, differential, premium multimedia, data and voice services in various wireless fashions: fixed, portable and mobile to increase revenue and reduce subscriber churn rates.

The WiMAX standards are defined by the WiMAX Forum™. The WiMAX Forum™ is a non-profit organization focused on increasing the widespread adoption of standards-based products in the wireless broadband market and leading the industry to mobile WiMAX solutions. The WiMAX Forum™ members work to promote the interoperability of multiple vendors' products in the wireless broadband market. Since its establishment, the WiMAX Forum™ members, working together with the IEEE, have established the first of the standards on which fixed wireless broadband systems will operate (the IEEE 802.16-2004 standard). This standard fully supports all fixed and nomadic broadband wireless applications.

The WiMAX Forum™ defines the following types of access to a wireless network:

- Fixed access, at a single stationary location for the duration of the network subscription;
- Nomadic access, at multiple stationary locations, enabling the user to relocate between sessions;
- Portability, at multiple locations at walking speed, within a limited network coverage area, with hard handoffs between cells;

- Simple mobility, at multiple locations at low vehicular speed, within network coverage area, with hard handoffs between cells, enabling non-real time applications; and

- Full mobility, at multiple locations at high vehicular speed, within network coverage area, with guaranteed handoffs between cells, enabling service continuity for all applications.

***Our Developing Market: The WiMAX Demand for Personal Broadband***

We envision a new generation of Personal Broadband networks and services which would enable subscribers to take their broadband connection with them anywhere and extend their mobile services to broadband speeds above 1Mbps. Personal Broadband would reside at the intersection of the fixed and mobile broadband worlds, offering subscribers a unique combination of high speed broadband and mobile services that are available anywhere. Personal Broadband would be always-on, high-speed and all IP-based, providing direct access to the mobile internet and creating a dynamic market for various services and applications.

Personal Broadband capabilities are anticipated to be embedded in a wide range of computing, telephony and consumer electronics devices to optimize personal and professional productivity. Business applications once reserved for the office environment and media content previously available only through a residential broadband connection are predicted to be available anywhere. These new personal broadband capabilities would enhance traditional service provider business models and create opportunities for new entrants to penetrate the market with alternative business strategies.

However, for this next service level of Personal Broadband services to be adopted by consumers and businesses, the technology must offer tight security, diverse innovative applications, reliability, high quality of service and broadband data speeds.

To differentiate themselves and target customers with the highest ARPU operators are interested in providing what may be characterized as “DSL on the move”. So far, no technology has been able to technically or economically support this type of services which would be targeted initially to highly developed, metropolitan areas.

We believe that WiMAX is currently the technology that is the most advanced and best suited to cost-effectively meet the requirements of Personal Broadband. WiMAX solutions, in addition to being standards-based, benefit from the open architecture of an all-IP network. Legacy wireline and wireless technologies are indeed standard but not totally IP-based with an open architecture, as is WiMAX. The WiMAX industry, in contrast to other telecom standards and technologies, leverages the capabilities of the consumer electronics market such as IP innovation, creativity, low cost and advanced services. Alvarion is aiming to be at the center of this dynamic via its position as a member of the WiMAX Forum™ and via its go-to-market strategy and business relationships with various partners.

**COMPANY STRENGTHS**

For more than ten years, our primary business activity has been focused on fulfilling the growing demand for Primary Broadband access by providing solutions and services to build wireless broadband networks. In addition, we have deployed fixed wireless broadband systems for additional applications, such as toll quality telephony, mobile base station feeding, hotspot coverage extension, municipal and community interconnection, and public safety communications. We believe we are the largest vendor with a single business focus in broadband wireless access equipment and enjoy a strong brand identity. We have a broad customer base, with over 200 WiMAX trials or commercial deployments, with product offerings, which we believe are the most extensive offered.

### ***Our Wireless Broadband Experience Enables Us to Leverage the Potential of WiMAX***

Our Wireless Broadband experience enabled us to identify the potential of WiMAX in early 2002, ahead of most equipment vendors. As a result of this experience and early strategic decisions, by 2006, we led the market in the number of deployed WiMAX-based networks. We have been at the forefront of developments with WiMAX technology since its inception, at a company and industry level. Examples of our active involvement include major roles in the standardization process through our work in the WiMAX Forum™ as a charter board member and chairing key working committees. In addition, our employees are active in other related technology organizations (e.g., Wireless Communications Association, IEEE 802.16, ETSI BRAN-HiperMAN standards).

### ***Our Mobile Experience***

In addition to our wireless broadband and WiMAX experience and expertise, we gained expertise in mobility by acquiring interWAVE Communications International at the close of 2004. Through this acquisition we acquired the know-how to build end-to-end cellular mobile solutions, which together with our experience and expertise of wireless technologies has assisted us in gaining the essential experience in the development of mobile WiMAX solutions.

### ***Single Evolving WiMAX Platform***

We believe that we hold a distinct advantage in this nascent market for Personal Broadband services. Our WiMAX platform was designed from the ground up according to the IEEE 802.16 standard to provide operators with a continuous path from fixed to portable and mobile networks, while preserving their investment and optimizing their business models with innovative service offerings

## **STRATEGY FOR GROWTH**

Our strategy for future growth is focused on providing complete end-to-end broadband wireless solutions, maintaining our current leadership position in existing markets and growing along with the market for fixed and nomadic applications, while also leveraging our strengths to become a significant participant in the personal broadband market.

### **Opportunities for providing Personal Broadband Solutions based on OPEN Architecture**

The developing demand for Personal Broadband services has caused us to expand our focus to include a new set of users, both in terms of socio-economic groups and geographic markets. It also leads us to target a different type of telecom operators. With our experience and knowledge of wireless technologies, we believe that WiMAX technology will be the one that best satisfies Personal Broadband needs. In addition to its high technical capacities, the interoperability and standardization of WiMAX-based products and networks are expected to offer lower-cost, volume-produced standard chips and systems. We believe that in turn, these low costs will be passed on to users, encouraging service adoption for Personal Broadband services.

Our goal is to become a major global vendor of Personal Broadband solutions by being at the forefront of exploiting the benefits of open architecture characteristics of WiMAX to create a new operator-centric model based on best-of-breed solutions from a host of Open Personal Networks, or OPEN WiMAX ecosystem partners.

### **The WiMAX transformation to OPEN Architecture**

The dynamics of WiMAX create an all-IP open architecture, removing barriers to entry and fostering rapid innovation. Designed from the start as an open standardized interoperable technology, OPEN WiMAX enables a complete eco system including core network equipment, consumer electronics, service offerings and the end user

experience. This new strategy enables communication service providers to choose the combination of vendors and partners that best fit their specific requirements.

OPEN WiMAX is designed to enable multi telecom vendors to build a best of breed telecom access network in an open standard architecture. It creates a telecom operator centric offering/concept/culture as opposed to a vendor-centric approach historically used in large telecom projects.

OPEN WiMAX is open to innovation and intended to enable offering of mass-market consumer electronics combined with low cost and economies-of-scale. It is highly scalable and suitable for large, medium, or small deployments which assist operators to optimize WiMAX network deployment costs, fit the expenditures to the desired services-centric network both in terms of capital expenditures and operating expenses during the operation of the network. This 'mix and match' multi-vendor approach may promote competition, which drives prices down and enhances the product offering. Innovative products and services for WiMAX such as mobile TV and mobile gaming for personal use and Virtual Private Network and File Transfer for business use, enable vendors to distinguish themselves from the competition.

We believe that pure players, each an expert in its own field, will team together to create best of breed offering. We believe that adopting our OPEN WiMAX strategy, provides us with a competitive advantage over large telecom vendors, as we offer a one best-of-breed stop-shop.

Our OPEN WiMAX solution empowers service providers to choose best of breed products, whether best-in-class or simply the best-fit solution. As one example of our expanding ecosystem, in January 2007 we formed Accton Wireless Broadband, or AWB, together with Accton Technology Corporation of Taiwan, to develop mass market cost effective WiMAX consumer electronic devices in order to complement our WiMAX offerings while facilitating the availability of WiMAX- based Personal Broadband services. This cooperation is planned to augment Alvarion's 4Motion™, our OPEN WiMAX solution, in order to include a variety of industry-standards, WiMAX enabled devices and customer-premise equipment while enhancing the number and types of self-installable and outdoor WiMAX subscriber units. See "WiMAX and Wireless Broadband Solutions - 4Motion™ Solutions".

## **PRODUCTS:**

### ***BreezeMAX - our WiMAX Solutions for fixed, nomadic and mobile applications***

Our WiMAX-based BreezeMAX platform is designed from the ground up according to the IEEE 802.16 standard. BreezeMAX features advanced OFDM technology to support non-line-of-sight (NLOS) operation, adaptive modulation up to QAM64, and the highest spectral efficiency available. Currently operating in the 2.3, 2.5, 3.3, 3.5 and 3.6 GHz licensed frequency bands, BreezeMAX addresses the immediate customer demand for cost-effective, next generation broadband wireless systems with a platform designed around the implementation of the IEEE 802.16 and HiperMAN standards by the WiMAX Forum™. Its carrier-class design supports broadband speeds and quality of service (QoS) to enable carriers to offer quadruple play broadband services to thousands of subscribers in a single base station.

BreezeMAX has quickly become a popular solution for operators offering fixed high-bandwidth, IP-based voice and data services to evolve their networks to industry standard solutions with improved CPE (Customer Premise Equipment) economics. Recently, the platform was enhanced with an offering of primary voice services, while allowing the operator to leverage legacy voice infrastructure. The system's feature set and cost-effective and versatile subscriber units make BreezeMAX a preferred broadband wireless solution for service providers who are interested in improving their business model.

In July 2003, Intel Corporation announced its intention to develop an IEEE 802.16d-compliant silicon chip and by September 2005, we developed the subscriber unit that uses that chip. In June 2006, we introduced

BreezeMAX Si, a self-installable, indoor WiMAX customer premises equipment (CPE) based on the IEEE 802.16-2004 standard and using the Intel® PRO/Wireless 5116 broadband interface (WiMAX chip). The commercially available BreezeMAX PRO CPE was the world's first subscriber unit that integrated the Intel® PRO/Wireless 5116 broadband interface and marked an important step for the industry moving toward the widespread adoption of WiMAX standard products. The BreezeMAX Si opens the door for anticipated Personal Broadband and primary broadband WiMAX standard-based solutions to become nomadic and quickly deployed with a plug-and-play installation. In addition, it enables centrally provisioned, portable connectivity for subscribers to use the CPE in various points within the network coverage and re-connect to the service after moving from one location to another.

BreezeMAX's first generation was designed according to the IEEE 802.16-2004 standard, partially certified by the WiMAX Forum™ during 2006 for fixed and nomadic networks, for both Bases Stations and CPEs. Our -new BreezeMAX platform under development is expected to provide support for fixed, nomadic and mobile WiMAX and is being designed according to the IEEE 802.16e-2005 standard for portable and mobile networks. We intend to have BreezeMAX certified according to the evaluation standards and timetable set by the WiMAX Forum™ for 802.16-2005(e).

IEEE 802.16e-2005 compliant technology enables portable and mobile networks to be IP based, with a focus on open standards, end-users and consumer devices. Portable access is defined according to the WiMAX Forum™ to apply to handsets, PDA, laptop PCMCIA (Personal Computer Memory Card International Association) or mini cards at multiple locations, at least at walking speed and enables a hard handoff of devices, in which the subscriber terminal is disconnected from one base station before connecting to the next base station. Mobile access ranges in scope from low to high vehicular speeds, but adds PDAs and smart-phone devices, multiple locations and enables a soft handoff, in which the subscriber maintains a simultaneous connection with two or more base stations for a seamless handoff to the base station with the highest quality connection. Both consumer and business users have driven the demand for this technology that has resulted from the convergence of fixed broadband networks and mobile voice networks towards mobile broadband communications.

#### *4Motion Solutions*

Our WiMAX solution, called 4Motion was introduced to the market during the second half of 2006 and is planned to be commercially available in the second half of 2007. This target is planned to coincide with the availability of mobile OPEN WiMAX, our Personal Broadband -enabled devices, that utilize chips currently at the end of the development phase. 4Motion™ is a complete WiMAX 802.16e-2005 solution portfolio being developed in conjunction with leading providers of core network and IP technology, devices and integration services. 4Motion is expected to offer open, end-to-end, carrier-class, scalable and cost-effective mobile data solutions that deliver true Personal Broadband services of several Mbps per subscriber or more with full quality of service (QoS) capabilities that enable various applications, anytime, anywhere. Compliance with 802.16e-2005 standards and OPEN WiMAX, our 4motion™ solution is expected to give the operators the flexibility to choose Best of Breed multi-vendor partners to add third party IP services, while controlling costs.

The 4Motion™ solution includes Radio Access Network, or RAN, which is based on Alvarion's BreezeMAX product and is comprises of third parties' core network, radio and IP networking elements and end-user devices.

4Motion™ will enable a wide range of deployment scenarios such as: personal mobile and fixed broadband, Wireless DSL, Residential and business quadruple-play and Municipal, public safety and video surveillance.

4Motion™ will support broadband services for both business and personal services such as mobile TV, online gaming, instant messaging (IM), voice (VoIP), video conferencing, internet browsing, mobile applications, location-based services (LBS), virtual private networks (VPN) and file transfers (FTP).

***Our Wireless Broadband Access Solutions (Non-WiMAX)***

Although our primary focus is to provide solutions based on the WiMAX standard that are used for primary wireless broadband access, we also continue to sell our non-WiMAX products in the short and mid term. We provide a broad range of integrated fixed wireless broadband solutions, addressing different markets and frequency bands, designed to address the various business models of carriers, service providers and private network operators. Our products are usually used in a point-to-multipoint architecture and address a wide scope of end-user profiles, including residential, small office/ home office (SOHO), small/ medium enterprises (SME), multi-tenant/multi-dwelling units (MTU/MDU), and large enterprises (corporate). Our products operate in licensed and license-free bands, ranging from 2.3 GHz to 28 GHz and comply with various industry standards. Our core technologies include spread spectrum radio, linear radio, digital signal processing, modems, MAC (media access control), IP-based mobile switches, networking protocols and very large systems integration, or VLSI.

Fixed wireless broadband solutions are based on OFDM (Orthogonal Frequency Division Multiplexing) technology with non-line-of-sight (NLOS) capabilities, creating more possibilities to cover a wireless access network.

We offer applications in which access to the end-user is provided by wireless broadband systems. These access applications can be utilized by telecom operators, service providers and regional carriers based on the needs of their regions of operation. Fixed wireless broadband solutions are implemented in a modular infrastructure, enabling swift, cost-effective roll-out as needed. Sectorized base stations are deployed to provide radio coverage to the targeted area, and frequency channels are reused in non-adjacent base station sectors, making the most efficient use of the available spectrum. Base stations are connected to the operator's central office, or point-of-presence, using wired or wireless point-to-point solutions. End users are provided with customer premises equipment, or CPE, typically consisting of an outdoor unit with a radio and an antenna connected to an indoor unit or indoor self-installed unit, which present voice and data interfaces to the customer network. The entire wireless broadband network is connected to the carrier backbone.

***BreezeACCESS Products (BreezeACCESS II, XL, VL, OFDM)***

BreezeACCESS enables fixed high-speed data and voice, point-to-multipoint wireless broadband applications. BreezeACCESS access products operate in several frequency bands to meet the needs of service providers and telecom operators worldwide. The BreezeACCESS product family consists of base stations, including access units and controllers, and subscriber units, which operate optimally when connected to computers or computer networks utilizing the Internet Protocol. The subscriber units include subscriber units for data applications and subscriber units for data and telephony applications. BreezeACCESS is modular in design, allowing for a low initial investment, and is scalable for future growth.

BreezeACCESS OFDM products support fixed higher speed wireless broadband access products currently in the licensed 3.5 GHz band, and provide gross data rates of up to 12 Mbps.

BreezeACCESS VL, OFDM-based fixed products operate in the 4.9, 5.2, 5.3, 5.4, 5.7 GHz bands, which are mostly unlicensed, and provide gross data rates of up to 54 Mbps. BreezeACCESS Wi<sup>2</sup>, which is planned to become available in 2007, combines the advantages of WiFi access with the capabilities of BreezeACCESS VL systems to provide cost-effective solutions for personal broadband services today. With its design, BreezeACCESS Wi<sup>2</sup> gateway solutions can be deployed almost anywhere to provide broadband mobility to standard IEEE 802.11 b/g end user devices such as laptops, PDAs, smart-phones and portable gaming devices. BreezeACCESS Wi<sup>2</sup>

solutions are ideal for operators, municipalities and communities looking to build metropolitan broadband networks or to integrate WiFi hot zone capabilities into their existing broadband wireless access networks. This solution provides Personal Broadband services ranging from public Internet access to public safety and Intranet applications

OFDM technology, on which BreezeACCESS OFDM and BreezeACCESS VL are based, enable higher data rates, up to 12 Mbps in the case of BreezeACCESS OFDM, and up to 54 Mbps in the case of BreezeACCESS VL, by utilizing the available radio spectrum in an efficient manner. In addition, OFDM technology enables NLOS operation with robust resistance to interference. OFDM based products enable carriers to use the technology in applications where a high data rate is required, including serving medium to large enterprises and high-speed backbone applications. The BreezeACCESS VL OFDM-based system, which utilizes our proprietary air protocol and broad set of features along with a high power radio, uses our “open platform” architecture and may be used with other BreezeACCESS band versions (BreezeACCESS II, XL, V or OFDM), giving operators the flexibility to use one band for service provisioning to residential, SOHO and SME customers, while reserving high bandwidth for large enterprises and MTUs. It is intended to become our service provider solution in all 5 GHz bands.

BreezeACCESS wireless DSL products include BreezeACCESS II, BreezeACCESS XL, BreezeACCESS VL and BreezeACCESS OFDM.

BreezeACCESS II products operate in the unlicensed 2.4 GHz ISM band, and provide gross data rates of up to 3 Mbps.

*BreezeNET Products - BreezeNET (BreezeNET DS.11, PRO.11, BreezeNET B)*

Our BreezeNET products are designed to provide highly reliable, building-to-building bridging solutions, support mobile connectivity, and provide individuals or small groups of users with wireless access to a LAN. BreezeNET products consist of three product families: BreezeNET DS.11, BreezeNET PRO.11, and BreezeNET B.

BreezeNET DS.11 products utilize direct sequence spread spectrum (DSSS), radio technology and are compliant with the IEEE 802.11b wireless LAN standard. DSSS products provide data rates of up to 11 Mbps and are most suitable for low user density applications where high data rates are of prime importance. BreezeNET DS.11 outdoor bridging products, operating in the unlicensed 2.4 GHz band, feature indoor/outdoor architecture with an indoor interface unit and an outdoor radio unit. The indoor/outdoor architecture enables lower cost installations, while supporting reliable building-to-building high data rate bridging over long distances.

BreezeNET PRO.11 products utilize frequency hopping spread spectrum, or FHSS, radio technology and are compliant with the IEEE 802.11 Wireless LAN standard. FHSS products provide data rates of up to 3 Mbps and allow point-to-multipoint installations with a large number of wireless users. BreezeNET PRO.11 products, operating in the unlicensed 2.4 GHz band, include indoor solutions and outdoor wireless connectivity solutions most suitable for building-to-building bridging and applications characterized by high user density, and high-speed mobility in harsh radio environments.

BreezeNET B products function as a wireless bridge system that provides high-capacity, high-speed point-to-point connectivity. The BreezeNET B system operates in the unlicensed 5GHz band and enables operation in near and non-line-of-sight environments such as buildings, foliage or ridgelines. The system also features adaptive modulation for automatic selection of modulation schemes to maximize data rate and improve spectral efficiency. BreezeNET B supports security sensitive applications through optional use of authentication and/or data encryption. The system supports Virtual Local Networks, or VLANs, enabling secure operation, and VPN services, allowing tele-workers or remote offices to conveniently access their enterprise network.

### *MGW and eMGW Products*

The MultiGain Wireless (MGW) and enhanced MultiGain (eMGW) solutions are cost effective, rapidly deployable, point-to-multipoint fixed wireless access systems that provide data and voice services for both residential and small business users, mainly in suburban and rural environments. Utilizing radio links instead of copper lines to bridge the last mile, the MGW and eMGW products enable rapid deployment of quality services to residential or SOHO customers. The products ensure the optimal utilization of the available spectrum and minimum interference, regardless of topography.

eMGW is a point-to-multipoint fixed wireless access system that provides fast Internet access, corporate access and carrier-class telephony in a single system. It also enables LAN-to-LAN connectivity over IP-VPN tunnels for businesses, fax (G3) and dial-up modem (v.92/56Kbps) services for residential subscribers and leased line services. It operates in a broad range of licensed and unlicensed (ISM) bands, from 1.5 to 5.7 GHz. eMGW provides coverage of up to 25 kilometers in very challenging environments and operates in NLOS installation scenarios. The eMGW is the optimal price / performance fixed wireless access system for operators who need to: provide coverage to subscribers in green fields; upgrade existing networks with advanced data services; and provide wireless DSL services in low and medium subscriber density areas.

eMGW, which has a scalable and modular architecture, is comprised of an indoor base station controller, an outdoor base station radio, an indoor subscriber interface and an outdoor subscriber terminal. It also includes a network planning tool and a network management system featuring fault, configuration, performance and security management.

eMGW is based on our frequency hopping CDMA (Code Division Multiple Access) technology and utilizes our innovative “hybrid switching” transmission technology, combining circuit switching for toll quality voice and packet switching for fast data services, optimizing the utilization of spectrum resources. This “hybrid switching” concept provides a solution for the economic and technological challenges facing network operators today.

MGW is a point-to-multipoint fixed wireless access system that supports a variety of services, including toll quality voice, high-speed voice band data and ISDN-BRI, primarily for urban, suburban and rural environments. MGW’s scalable architecture enables low initial investment, with incremental growth based on subscriber demand. It is well suited for both new operators entering the market and incumbent operators in areas where copper infrastructure is already saturated or is difficult to install, such as new housing areas, historical sites or temporary installations. Based on our frequency hopping CDMA technology, MGW supports a broad range of frequency bands, from 800MHz to 3.8 GHz, and provides coverage of over 25 kilometers in line of sight, or LOS, conditions. Hundreds of thousands of MGW lines have already been successfully installed in over 60 countries.

### *WALKair Products*

The *WALKair* system is a Wireless Broadband system that enables carriers to provide high-speed Internet access, other data services and voice services primarily to SMEs. *WALKair*’s high spectral efficiency, dynamic bandwidth allocation, effective frequency reuse plan and high coverage capacity enable carriers to connect last-mile business subscribers to their network in an efficient and cost-effective manner.

Our *WALKair* products consist of *WALKair* 1000 that operates in the 3.5, 10.5 and 26 GHz licensed bands, and *WALKair* 3000 that operates in the 26 and 28 GHz band.

*WALKair* products are based on time division multiplexing, or TDM, technology. *WALKair* systems support a complement of value-added classes of services including VPN, Virtual LAN, or VLAN, and QoS, based on per-user allocation of committed data rate and maximum data rate.

*WALKair 3000* accommodates carriers' requirements for broader bandwidth, primarily driven by the growing use of data-intensive Internet applications. It also enables carriers to efficiently connect multiple subscribers in multi-tenant buildings by a single terminal station. *WALKair 3000* supports significantly broader bandwidth for each customer and increased capacity for each cell, increasing the peak speed of transmission of each terminal station to up to 36 Mbps. *WALKair 3000* integrates smoothly with *WALKair 1000*. This enables carriers to deploy both systems on the same base station, serving a variety of subscribers with different needs for communication services, within the same cell.

Integrating our *WALKair 1000* and *WALKair 3000* technologies in the same base station, *Alvarix* allows operators to benefit from low deployment costs without limiting the ability to upgrade each customer when appropriate. For a low-cost entry solution, operators can deploy *WALKair 1000* along with differentiated data service. When higher speed and capacity is required, *WALKair 3000* can be deployed on the same base station to deliver high-end data services with premium QoS capabilities. This pay-as-you-grow approach allows operators to improve their infrastructure price-performance.

### ***Network Management Solutions for both WiMAX and Non-WiMAX Wireless Broadband***

We provide advanced management applications for our wireless solutions. Our network management applications are equipped with graphics-based user interfaces and provide a set of tools for configuring, monitoring and effectively managing our wireless broadband networks. Our flagship carrier-class Network Management System is the *AlvariSTAR*, fully compliant with Telecommunications Management Network (TMN) standards and simplifies network deployment and maintenance for networks of every scale. *AlvariSTAR* can be used to manage multiple Alvarion solutions, including *BreezeMAX*, *4Motion*, *BreezeACCESS VL*, *BreezeNET Band WALKair* networks.

Our full portfolio of network management products include:

- *AlvariSTAR*, which configures, monitors and manages our *BreezeMAX*, *4Motion*, *BreezeACCESS* and *WALKair* products;
  - *BreezeMANAGE*, which configures, monitors and manages our *BreezeACCESS* products;
    - *WALKnet*, which configures, monitors and manages our *WALKair* products;
  - *BreezeVIEW*, which configures, monitors and manages our *BreezeNET* products; and
    - *IMS*, which configures, monitors and manages our eMGW product.

*BreezeMANAGE*, *WALKnet*, *BreezeVIEW*, *AlvariSTAR*, and *IMS* are multi-platform simple network management protocol, or SNMP, applications. Using standard and private SNMP agents incorporated in the products, these applications, operating under the HP Open View network management platform, enable configuring, managing faults and monitoring performance of all system components from a central management station.

### ***Accessories Offered by Alvarion***

In order to support our products and provide comprehensive solutions to our customers, we provide a family of accessories designed to extend the range of our *BreezeMAX*, *4Motion*, *BreezeACCESS*, *WALKair* and *BreezeNET* solutions. These accessories include antennas, cables, surge arrestors, amplifiers and other components. We also offer various configuration and monitoring tools in addition to the *BreezeMANAGE*,

WALKnet and BreezeVIEW network management applications for our BreezeACCESS, WALKair and BreezeACCESS products.

### *Our Geographic Markets*

Until now our network installations have been typically found in the following geographic markets:

Within developed countries (including countries with overall high levels of economic prosperity), there are rural or suburban regions with low-density populations, often extending over vast distances that have limited telecommunications infrastructures. Wireless broadband has made inroads in these areas due to the business opportunities, robust equipment, extensive coverage and non line-of-sight capabilities. In addition, government assistance in 'closing the digital divide' in these countries, also serves as an incentive for alternative operators to consider wireless systems to provide broadband services. Examples of these locations have been identified in the U.S., Western and Eastern Europe, Asia Pacific and South America.

We believe that wireless broadband service providers have found that deploying wireless broadband and new WiMAX solutions in developing countries (where telecommunication coverage is lacking due to poor infrastructure) have enabled such providers to afford major networks to provide broadband and telephony services. Within this group are countries where basic voice services remain scarce, that look to our toll quality voice networks to fill the gap and provide telephony service. Examples of these locations have been identified in Africa, CIS (Commonwealth of Independent States, former USSR), Latin America and Asia Pacific.

In 2006, the industry showed signs of early benefits of WiMAX and a growing interest in Personal Broadband. We are increasing our sales and marketing efforts in certain regions in developed countries by offering our nomadic and portable solutions and intend to offer Personal Broadband and mobile applications in high-density areas.

We hope to continue to benefit from the expected evolution of WiMAX, building from nomadic and portable, to mobile services, enabling us to penetrate the high end, metropolitan consumer and business user groups.

### *Geographic breakdown of revenue*

	2004		2005		2006	
	In thousands					
North America	\$ 33,316	16.7%	\$ 29,564	16.7%	\$ 25,047	13.8%
Latin America	77,747	38.9%	32,946	18.6%	30,857	17.0%
Europe, Middle East and Africa	79,838	39.8%	102,685	58.0%	111,959	61.6%
Asia Pacific	9,150	4.6%	11,732	6.7%	13,731	7.6%
	\$ 200,051	100.0%	\$ 176,927	100.0%	\$ 181,594	100.0%

### **Our Target Customers**

*Tier One and Two and Cellular Operators*

Tier one and tier two carriers - both Fixed Network Operators (FNOs) and Mobile Network Operators (MNOs) - form the largest and most established telecom operators, with nationwide or global presence, serving tens of million of users. These carriers are a primary focus for our WiMAX equipment since they have a strong strategic interest in deploying WiMAX in their network. Tier one and two carriers are looking for the technology

to keep them at the front line of their own country and to expand quickly into neighboring countries as well. Some examples of this group include , Telkom South Africa Ltd., Cable & Wireless International, Sviаз Invest ,Nippon Telegraph and Telephone West Corporation (NTT West), Bharti Tele-Ventures Limited (Airtel Enterprise Services) and Telefonos de Mexico S.A. de C.V. Traditionally, these operators take a relatively long time to shift to new technologies, although many of them are involved in trials with our WiMAX equipment.

In addition, cellular operators are able to leverage their infrastructure, radio base-station sites and customer base, together with their marketing, billing systems and customer support investments, to offer media centric, Personal Broadband service and competitive broadband Internet access services to their existing or new customer base. Some examples of this group include , Orange, Vodafone , TMobile, Cegetel, Megafone, Meditel, MTN, China Mobile, and Entel (Chile).

#### *CLECs, Service Providers, & Regional Carriers*

As competitive local exchange carriers (CLECs) seek to compete effectively with the incumbent local exchange carriers (ILECs), wireless broadband has emerged as an attractive, cost-effective last-mile alternative to wired access solutions. CLECs are deploying our products to provide voice and broadband services in rural and suburban areas where wireline infrastructure does not exist or does not support the demand. In addition, in the areas of landline infrastructure in developed countries, wireless broadband systems offer carriers the ability to reach otherwise inaccessible customers, while providing increased bandwidth flexibility and service differentiation.

CLECs have constituted the primary focus for our fixed wireless access product line and have increasingly exhibited an interest in WiMAX. The reduced installation costs, rapid roll-out potential and modular architecture, coupled with their high network capacity and coverage and enhanced service options, present an attractive alternative to service providers and regional carriers seeking to supply their customers with reliable comprehensive data and voice solutions. Examples of these operators include Euskaltel, Finnet, TDS, Airzed, Czech on line, Altitude and Peterstar. Innovative Challengers

Similar to the group of CLECs, service providers and regional carriers, is a group of broadband providers who are building their business model primarily on WiMAX solutions. This group, innovative challengers, as we call them, is expected to constitute a greater portion of our core market for our future WiMAX products. Some examples of carriers falling in this category include Free (France), Iberbanda (Spain), a subsidiary of Telefonica de Espana, eMobile (Japan), WorldMAX (Holland), Irish Broadband, and Ertach (Argentina). This group is expected to become early adopters of WiMAX portable and mobile services.

#### *Government, Municipalities and Communities, & Private Network Operators*

Private and government sectors that operate private, closed loop networks are in constant need of deploying technologies to support their operational requirements. Examples of such requirements are enterprises that require leased line replacement for cost effective connectivity to provide VoIP and data services; metropolitan area networks for broadband connectivity; and cost-effective access within communities, municipalities and educational institutions. Another area, which has leveraged broadband wireless very effectively, has been public safety and municipal applications. Government authorities and private bodies with government sponsored funds have begun to deploy broadband wireless systems to support remote video surveillance, traffic flow management, back-up for disaster recovery, leased line replacement, various forms of backhaul, and other public safety uses. Examples may be found in various U.S communities like Lexena, Kansas and Corpus Christi, Texas, and many others in the Silicon Valley.

*2006 Partial Customer List for WiMAX and other fixed wireless broadband systems*

Telecom carriers and service providers using our products include, among others:

- AIRCEL
- ALCATEL SHANGHAI BELL COMPANY
  - ALLTEL, USA
  - ALTITUDE TELECOM, FRANCE
  - AXTEL MEXICO, MEXICO
- BHARTI TELE-VENTURES LIMITED ( AIRTEL ENTERPRISE SERVICES)
  - CABLE & WIRELESS, Worldwide
    - DIGITAL BRIDGE, USA
    - ENFORTA, RUSSIA
    - ENTEL CHILE SA, CHILE
  - ERTACH SA (formerly MILLICOM), ARGENTINA
    - FINNET GROUP, FINLAND
    - FRANCE TELECOM, FRANCE
    - GHANA TELECOM, GHANA
    - IBERBANDA, S.A, SPAIN
  - IRISH BROADBAND INTERNET, IRELAND
- JSC COMSTAR - UNITED TELESYSTEMS, RUSSIA
  - MEGAFONE, RUSSIA
  - MOSSEL JAMAICA LIMITED, JAMAICA
    - MTN UGANDA, UGANDA
    - NETIA SA, POLAND
  - ORANGE ROMANIA S.A., ROMANIA
    - SOVINTEL, RUSSIA
  - TELEFONICA CELULAR DEL PARAGUAY
  - TELEFONOS DE MEXICO S.A., MEXICO
    - TELEKOM SERBIA, SERBIA
- TELKOM SOUTH AFRICA LTD., SOUTH AFRICA
  - TELMEX PERU S.A., PERU
  - TPSA POLAND, POLAND
- TRANS TELEKOMUNIKACJA POLSKA S.A., BULGARY
  - VODAFONE ROMANIA S.A, ROMANIA

## **TECHNOLOGIES UNDERLYING OUR PRODUCTS**

We use internally developed core technologies and continue to invest heavily in augmenting our expertise in networking, radio and digital signal processing, or DSP, modem technologies. We also participate as active members in international standards committees.

### ***Networking Technology***

To support the OPEN WiMAX concept and our 4Motion solution as well as our BreezeMAX and other products, we have developed or otherwise acquired, and continue to invest in, networking expertise in the areas of IP Access Mobile IP that is particularly adapted for mobile WiMAX networks, Access Service Networks Gate Ways (ASN-GW), PPPoE (Point-to-Point Protocol Over Ethernet) tunneling, Virtual Private Networks (VPN) and

Voice over IP (VoIP), based on industry standards such as H.323, SIP and MGCP, and other Internet standards and protocols. We have also developed, and are continuing to develop, know-how to satisfy market requirements with respect to quality of service, classes of services, committed information rate, maximum information rate, virtual LAN management and prioritization. We are developing access technology based on the IEEE 802.16-2004 (16d) and 802.16-2005 (16e) standards for further improved support of these needs. We have also developed a network management system that provides network surveillance, monitoring and configuration capabilities for all the family products.

The PSTN FWA MGW system was extended to provide additional data services to wireless subscribers. The eMGW system was especially designed to support the modern wholesale network model for carriers. PPPoE, remote and local DHCP network tools give to the network access provider the ability for fast and inexpensive IP network configuration and interfacing to the billing systems.

### ***Radio Technology***

We have in-house radio development capabilities to address the diversified frequency bands and modulation methods of our products. The frequency bands include, among others, 900 MHz, 2.4 GHz, 2.3, 2.5-2.7 GHz, or MMDS, 3.3-3.8 GHz, 4.9-6 GHz, 10.5 GHz and 26 and 28 GHz. The modulation methods include Frequency Hopping Spread Spectrum, or FHSS, Gaussian Frequency Shift Keying, or GFSK, Direct Sequence Spread Spectrum, or DSSS, Single Carrier QAM and OFDM, OFDMA. Our products include both Time Division Duplex, or TDD, radios and Frequency Division Duplex, or FDD, radios.

Our radio teams specialize in low cost, mass-production oriented radio design. The system level capability is software assisted radio auto-calibration, which allows for reduced manufacturing costs and compensates for components' parameter spread and instability, temperature related changes and aging of components.

Our internal radio expertise enables us to attract customers by addressing promptly new needs such as new frequency bands.

### ***Digital Signal Processing (DSP) Modem Technology***

We maintain strong expertise in DSP and in modem design. Our capabilities include a hardware oriented design, as well as programmable DSP oriented design. Our modem design hinges on the Software Defined Radio paradigm. The extensive configurability of our base station modems, through FPGA (Field Programmable Gate-Array) and DSP reprogramming, allow us to readily introduce advanced features to our products and to follow amendments to emerging standards, including capability to upgrade deployed networks by pure s/w download. Similarly our CPE designs allow for upgradeability through over the air s/w download, simplifying our customer's operations.

We have developed the BreezeMAX base station platform, which is designed to support the WiMAX (IEEE 802.16 and HIPERMAN) air interface specification. The platform supports the multiple antenna elements per sector to exploit the smart-antenna signal processing techniques for improved coverage and network capacity. The programmable DSP-based architecture of the BreezeMAX platform enables us to support the IEEE 802.16-2004 standard, as well as the IEEE 802.16e-2005 standard for broadband mobile, while enjoying the benefits of OFDMA and smart-antenna processing. The base station architecture and capabilities is closely aligned and synchronized with the CPE ASICs and reference design developed by Intel resulting from our collaboration, which began in 2003, to assure optimum performance in future WiMAX deployments.

We have developed mixed signal ASICs containing DSP cores. Inclusion on-chip of analog-digital converters is instrumental to both cost reduction and power consumption reduction. First generation ASIC supports our IEEE

802.11-based FH-GFSK products, with the above-standard capability of delivering 3 Mbps, with

automatic fall back to 2 Mbps and 1 Mbps as necessary. Our second generation ASIC is optimized for OFDM modulation, as used by the IEEE 802.11a/g standards and the recently approved IEEE 802.16a standard. This ASIC is based on a proprietary programmable “very long instruction word” DSP architecture. The programmable architecture allows us to implement numerous beyond-standard capabilities, such as OFDMA extensions to the baseline OFDM mode. This system-on-a-chip ASIC will serve as a key component of our BreezeACCESS-OFDM products. Additional ASIC developed in-house supports our WALKair products, with a full duplex point-to-multipoint single carrier trellis-coded 64QAM modem. An ASIC was developed for the eMGW product to reduce the product’s costs.

The FWA eMGW system was designed to provide data services to wireless subscribers on top of voice services. The subscriber unit is based on our ASIC implementing functions of the PHY and MAC layers of the air interface. The eMGW base station design includes Voice echo canceling and Fax/modem detection algorithm to support high spectrum efficiency while ensuring toll quality voice.

### *Participation in International Standards Committees*

As part of our strategy to become a technological leader and influence the industry in specific areas, we have, since our inception, been active members in standardization committees.

We are a principal founder of the WiMAX Forum™, a non-profit organization whose members work to promote adoption of the IEEE 802.16 OFDM/OFDMA standard, and to certify interoperability of compliant equipment. Our representative on the board of directors of the WiMAX Forum™ is Dr. Mohammad Shakouri, Vice President of Business Development at Alvarion, who holds the position of Vice Chair of the WiMAX Forum™, and chairs the Marketing Working Group. For a more detailed description of the WiMAX Forum™, please see "Item 4B - Business Overview - General - WiMAX Technology, Applications and Industry Advantages".

The scope of the IEEE 802.16-based standard is the Wireless MAN (Metropolitan Area Network), supporting larger range fixed/nomadic/mobile broadband access networks with more performance and dedicated high-end services. Our engineers actively participate in the technical group for defining inter-operability profiles and tests. Our representative, Dr. Vladimir Yanover, holds the position of co-chair of WiMAX Forum™’s Technical Working Group (TWG), responsible for defining the interoperability profiles and the interoperability and conformance tests for the IEEE802.16e-2005 standard.

We actively participate in the IEEE 802.16’s Broadband Wireless Access work group. Similarly, we are part of the WiMAX Forum™’s groups to define and improve the OFDM/OFDMA mode, for both fixed and mobile broadband applications and to improve the IEEE 802.16 standard ability to increase its market print in license-exempt applications.

Mariana Goldhamer, Director for Strategic Technologies at Alvarion, is Chair of IEEE 802.16h, targeting Improved Coexistence in License-Exempt deployment. She is also ETSI BRAN (Broadband Radio Access Networks) Vice-Chair and HiperMAN Chair. ETSI HiperMAN has adopted the IEEE 802.16 OFDM mode and has recently embraced the OFDMA mode. Ms. Goldhamer is acting to harmonize the IEEE and ETSI standards to create a worldwide broadband standard for converged Fixed-Mobile applications.

We have participated in the IEEE 802.11 wireless LAN work group, being the driving force behind increasing the data rate of the frequency hopping modem. Naftali Chayat, our Chief Scientist, chaired the IEEE 802.11a task group, which is the first OFDM based high-data rate wireless LAN standard.

We are very active in the international regulatory arena, including ITU-R, to promote the WiMAX policy in the regulatory domain and secure the spectrum for broadband fixed/mobile deployment.

## **SALES, MARKETING AND SUPPORT OF OUR PRODUCTS**

We market our products through an extensive network of more than 220 active partners. These include original equipment manufacturers (OEM), local partners in various geographic regions, system integrator partners, solution partners, national and local distributors, systems integrators and resellers. Our distributor partners in turn sell to resellers, including value-added resellers and systems integrators, and to end-users. We also market our products directly to large operators.

We currently sell and distribute our products in more than 150 countries worldwide. The use of different types of marketing channels through our partnership network enables us to market our products to many different markets and to meet the differing needs of our customers.

Our products are aimed at the WiMAX and other wireless broadband and wireless voice markets. We sell in these markets through OEM agreements or other strategic partner arrangements with leading telecommunications suppliers, direct sales as well as indirectly through our distribution channels, which market primarily to smaller Internet service providers and operators. Additionally, to achieve broad and rapid market penetration, we cultivate direct relationships with communication service providers. By doing so, we believe that we are better able to understand the needs of new operators, such as innovative challengers, Tier 1 and global operators, and are better able to identify and anticipate trends in the WiMAX and wireless broadband market.

We have strategic relationships with major telecommunications equipment manufacturers, such as Siemens, Alcatel-Lucent, Nera and global system integrators, such as IBM. Pursuant to arrangements entered into with these partners, they are permitted to distribute our products on either a regional or worldwide basis under private labels. We are seeking additional strategic relationships with international partners, strong local partners and other key companies to increase our exposure and establish ourselves as a supplier to markets and end-user segments that are not reached by our present distribution channels.

We have strong relationships with leading incumbents and leading telecom operators to whom we sell our solutions directly.

A distributor of our products is typically a data communications or a telecommunications marketing organization, or both, with the capability to add value with training and first-tier support to resellers and systems integrators.

We operate in various regions. Our subsidiaries and representative offices, located throughout North America, South America, Europe, Africa and Asia, support our international marketing network.

We derive our revenues from different geographical regions. For a more detailed discussion regarding the allocation of our revenues by geographical regions based on the location of our customers, see “Item 5A--Operating and Financial Review and Prospects--Operating Results.”

We conduct a wide range of marketing activities aimed at generating name recognition and awareness of our brands throughout the telecommunications industry and community, as well as identifying leads for distributors and other resellers. These activities include public relations, participation in trade shows and exhibitions, advertising programs, public speaking at industry forums and maintaining a website.

We maintain a highly trained global technical support team that participates in providing customer support to customers who have purchased our products. This includes local support by distributors' and systems integrators' personnel trained by our support team, support through help desks and the provision of detailed technical information on our website, expert technical support for resolution of more difficult problems, as well as participation in pre- and post-sales activities conducted by our distribution channels with large accounts and key end-users.

We organize technical seminars covering general technologies, as well as specific products and applications. We also have qualification programs to advance the technical knowledge of our distributors and their ability to sell and support our products. The seminars are held in various countries and in different languages according to need.

## **MANUFACTURING OPERATIONS AND SUPPLIERS**

We currently subcontract most of the manufacturing of our products. We have a pre-qualification process for our contract manufacturers, which includes the examination of the technological skills, production capacity and quality assurance ability of each contract manufacturer. Our manufacturing capacity planning is based on rolling marketing forecasts done on a monthly basis. The forecasts provided to the sub-contractors are based on internal company forecasts, and are up to six months. We purchase our raw materials from several suppliers.

Our products are currently manufactured primarily by several contract manufacturers located in Israel, the Philippines and Taiwan. We perform our quality assurance, final assembly and testing operations of our products at our facilities in Tel Aviv, Omer, and in our leased premises at some of our subcontractors' facilities in Israel. We have processes in place for the ongoing performance of quality assurance at our own facilities and at our subcontractors' facilities. Equipment owned by us and used for final assembly and testing is located at our facilities in Tel-Aviv, Omer and in our leased premises at the facilities of some of our subcontractors in Israel as part of our Approved Enterprise programs.

We monitor quality with respect to each major stage of the production process, including the selection of components and subassembly suppliers, warehouse procedures, assembly of goods, final testing and packaging and shipping. Our packaging and shipping activities are conducted primarily at our Tel Aviv and Omer facilities.

All our manufacturing locations in Israel and in the Philippines are ISO 9001 certified, which verifies that our manufacturing processes adhere to established standards. We require that our Israel based contract manufacturers be ISO 9002 certified. Our contract manufacturers are ISO 9002 certified. Our Tel Aviv and Omer locations are ISO 14000 certified.

## **PROPRIETARY RIGHTS**

In order to protect our proprietary rights in our products and technologies, we rely primarily upon a combination of patents, trademark, trade secret, and copyright law as well as confidentiality, non-disclosure and assignment of inventions agreements. We have 59 patents issued by patent offices in several countries, with 40 pending patent applications.

We have trademark registrations in Israel, United States, the European Union and many other countries. In addition, we have typically entered into nondisclosure, confidentiality and assignment of inventions agreements with our employees, consultants and with some of our suppliers and customers who have access to sensitive information. We cannot assure you that the steps taken by us to protect our proprietary rights will be adequate to prevent misappropriation of our technology or independent development and/or the sale by others of products with features based upon, or otherwise similar to, those of our products.

Given the rapid pace of technological development in the communications industry, we also cannot assure you that our products may not be adjudicated as infringing on existing or future proprietary rights of others. Although we believe that our technology has been independently developed and that none of our intellectual property infringes on the rights of others, we cannot assure you that third parties will not assert infringement claims against us or seek an injunction on the sale of any of our products in the future. If an infringement were found to exist, we may attempt to acquire the requisite licenses or rights to use such technology or intellectual property or to design around such intellectual property. However, we cannot assure you that such licenses or rights could be obtained on terms that would not have a material adverse effect on us, if at all.

We license certain technologies from others for use in connection with some of our technologies. The loss of these licenses could impair our ability to develop and market our products. If we are unable to obtain or maintain the licenses that we need, we may be unable to develop and market our products or processes, or we may need to obtain substitute technologies of lower quality or performance characteristics or at greater cost.

### **THE COMPETITIVE ENVIRONMENT IN WHICH WE OPERATE**

The markets for our products are very competitive and we expect that competition will increase in the future when the personal broadband WiMAX market matures, both with respect to products that we are currently offering, and with respect to products that we are developing. We also expect more competition in this market in light of announcements by large telecom equipment vendors that they intend to serve this market. We believe the principle competitive factors in the markets for our products include: price and price/performance ratio;

- technology;
- regulation and product certifications;
- ability to support new industry standards;
  - product time to market;
  - brand strength and sales channels;
- integration and financing capabilities; and
  - quality of service.

Companies that are engaged in the manufacture and sale, or the development, of products that compete with our wireless broadband products include Airspan Inc, Alcatel-Lucent, Aperto Networks, Ericsson, IP Wireless, Motorola, Navini, Nortel, Terabeam, Inc., Redline, Samsung, Siemens, SR Telecom and ZTE. Other vendor members of the WiMAX Forum™ may become our competitors.

Our products also compete with alternative telecommunications transmission media, including leased lines, copper wire, fiber-optic cable, cable modems, television modems ,3G and LTE cellular technologies and satellite.

Some of our existing and potential competitors, including large competitors arising from the continued consolidation in the telecommunications equipment market, have substantially greater resources including financial, technological, manufacturing and marketing and distribution capabilities, and enjoy greater recognition than we do.

Increased competition in our market results in price reductions, new alliances, shorter product life cycles, reduced gross margins, longer sales cycles and loss of market shares, which could harm the results of our operations. We have designed and engineered our products to minimize costs, maximize margins and improve competitiveness. However we cannot assure you that we will be able to compete successfully against current or future competitors.

## **GOVERNMENT REGULATION**

Our business is premised on the availability of certain radio frequencies for two-way broadband communications. Radio frequencies are subject to extensive regulation under the laws of each country and international treaties. Each country has different regulation and regulatory processes for wireless communications equipment and uses of radio frequencies. In the United States, our products are subject to FCC rules and regulations. In other countries, our products are subject to national or regional radio authority rules and regulations. Current FCC regulations permit license-free operation in FCC-certified bands in the radio spectrum in the United States. In other countries the situation varies as to the spectrum, if any, that may be used without a license and as to the permitted purposes of such use. Some of our products operate in license-exempt bands, while others operate in licensed bands. The regulatory environment in which we operate is subject to significant change, the results and timing of which are uncertain.

In many countries, the unavailability of radio frequencies for two-way broadband communications has inhibited the growth of these networks. The process of establishing new regulations for Wireless Broadband frequencies and allocating these frequencies to operators is complex and lengthy. The regulation of frequency licensing began during 1999 in many countries in Europe and South America and continues in many countries in these and other regions. Licensed blocks in 2.3, 2.5, 3.3, 3.5, 3.6 GHz were released in some countries. However, this frequency licensing regulation process may suffer from delays that may postpone commercial deployment of products that operate in licensed bands in any country that experiences this delay. Our current customers that commercially deploy our licensed band products have already been granted appropriate frequency licenses for their network operation. In some cases, the continued validity of these licenses may be conditional on the licensee complying with various conditions.

There is a trend to release more license-exempt bands. For example, in the United States, FCC rules were modified to include an additional 255MHz of spectrum, though actual use of this allocation is not permitted until a technical issue is resolved between the NTIA (which manages government-used spectrum) and the FCC (which manages commercial and public spectrum). In Europe, the process is slower. We see potential for new markets in rural areas and developing countries, created by the availability of licensed-exempt spectrum in 5GHz.

In addition to regulation of available frequencies, our products must conform to a variety of national and international regulations that require compliance with administrative and technical requirements as a condition to marketing devices that emit radio frequency energy. These requirements were established, among other things, to avoid interference among users of radio frequencies and to permit the interconnection of equipment.

We are subject to export control laws and regulations with respect to all of our products and technology. In addition, Israeli law requires us to obtain a government license to engage in research and development, and export, of the encryption technology incorporated in some of our products. We currently have the required licenses to utilize the encryption technology in our products.

### **C. ORGANIZATIONAL STRUCTURE**

The following is a list of our significant subsidiaries, each of which is wholly-owned:

- Alvarion, Inc., incorporated under the laws of Delaware, United States;
- Alvarion Mobile, Inc., incorporated under the laws of Delaware, United States, is a wholly owned subsidiary of Alvarion Inc.;
- interWAVE Communications Inc., incorporated under the laws of Delaware, United States, is a wholly owned subsidiary of Alvarion Mobile, Inc.;

Edgar Filing: ALVARION LTD - Form 20-F

- Alvarion UK LTD., incorporated under the laws of England;
- Alvarion SARL\*, incorporated under the laws of France;
- Alvarion SRL, incorporated under the laws of Romania;
- Alvarion Asia Pacific Ltd., incorporated under the laws of Hong Kong;
- Alvarion do Brasil LTDA, incorporated under the laws of Brazil;
- Alvarion Uruguay SA, incorporated under the laws of Uruguay;
- Alvarion Japan KK, incorporated under the laws of Japan;
- Alvarion Israel (2003) Ltd., incorporated under the laws the State of Israel;
- Alvarion Spain, S.L, incorporated under the laws of Spain;
- Tadipol-ECI Sp.z o.o.,\*\* incorporated under the laws of Poland;
- Alvarion Telsiz Sistemleri Ticaret A.Ş.\*\*\*, incorporated under the laws of Turkey;
- Alvarion de Mexico S.A de C.V, incorporated under the laws of Mexico;
- interWAVE Communications Ireland Limited, incorporated under the laws of Ireland;
- interWAVE Communications International SA, incorporated under the laws of France;
- interWAVE Communications (Shenzen) Co., Ltd., incorporated under the laws of China;
- Advance Communication Inc. incorporated under the laws of Delaware, United States;
- Microcellular San Diego incorporated under the laws of California, United States;
- Wireless Inc. incorporated under the laws of Delaware, United States;
- Interwave Communications incorporated under the laws of Holland;
- Alvarion Philippines incorporated under the laws of Philippines;
- Kermadec Telecom B.V. incorporated under the laws of Holland;
- Alvarion GmbH incorporated under the laws of Germany; and
- Alvarion Singapore PTE LTD., incorporated under the laws of Singapore.

\*Alvarion SARL is a wholly-owned subsidiary of Alvarion UK LTD. In addition, we have representative offices in China, Italy, Russia, the Philippines, Japan, South Africa, Spain, Czech Republic and Singapore.

\*\* Alvarion Telsiz Sistemleri Ticaret A. S. and Alvarion - Tadipol - ECI Sp.zoo are wholly owned subsidiaries of Kermadec Telecom B.V.

**D. PROPERTY, PLANTS AND EQUIPMENT**

We do not own any real estate. On December 31, 2006, we leased an aggregate of approximately 235,000 square feet in Israel for annual lease payments (including management fees) of approximately \$2.8 million and incur annual parking expenses in connection with this lease of approximately \$0.4 million. These premises consist mainly of our corporate headquarters and two separate warehouses located in Israel. We have been occupying our main premises since April 2001, which serves as our corporate headquarters, as well as the site at which we conduct our main research and development activities and some quality assurance, final assembly and testing operations. Our main lease expires in the year 2011. We also lease approximately 17,250 square feet of office facilities in Mountain View California, at an annual rent of approximately \$0.2 million. These premises serve as the corporate headquarters of our U.S. subsidiary, Alvarion Inc, and as our principal sales and marketing office in North America. In addition, we lease office space for the operation of our facilities in France, Romania, China, Hong Kong, Uruguay, Japan, Brazil, Mexico, Philippines, Poland, Russia, Singapore, Italy and Spain.

We believe that the facilities we currently lease are adequate for our current requirements.

**ITEM 4A. UNRESOLVED STAFF COMMENTS**

Not applicable

## **ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS**

The following discussion of our financial condition and results of operations should be read together with our consolidated financial statements and the related notes included elsewhere in this annual report. This discussion contains forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, including, but not limited to, those set forth in “Item 3--Key Information--Risk Factors.”

### **A. OPERATING RESULTS**

#### **Overview**

We are a leading provider of WiMAX and non-WiMAX wireless broadband systems. We supply carriers, ISPs and private network operators with WiMAX (Worldwide Interoperability for Microwave Access) and other wireless broadband solutions. Our solutions are designed to cover the full range of frequency bands with fixed, portable and mobile applications, to enable the delivery of Personal Broadband services, business and residential broadband access, corporate VPNs (Virtual Private Network), toll quality telephony, mobile base station feeding, hotspot coverage extension, community interconnection and public safety communications.

We believe we will see demand in the consumer and business/government segments for bandwidth-intensive applications (video, data and voice) in the anticipated mobile environment. Our vision is to deliver Personal Broadband networks, which will combine broadband and mobility to subscribers by being at the forefront of exploiting the benefits of OPEN architecture characteristics of WiMAX.

We believe that one of our key challenges is to successfully manage the transition from our non-WiMAX to WiMAX products and from one WiMAX solution to another. This challenge also includes leveraging our experience and leadership in both non-standard BWA and current WiMAX markets, combined with our brand strength, broad customer base and innovative technology in order to play an important role in the WiMAX-based mobile broadband market as well. Other key challenges are to become a major player in the Personal Broadband equipment market and establish our OPEN WiMAX strategy as a new strategy, which enables communication service providers to choose the combination of vendors and partners that best fit their specific requirements.

As a wireless broadband pioneer, we have been driving and delivering innovations for more than 10 years from core technology development to creating and promoting industry standards. Leveraging our key roles in the IEEE and HiperMAN (Metropolitan Area Network) standards committees and experience in deploying OFDM (Orthogonal Frequency Division Multiplexing)-based systems, we have been in the forefront of the WiMAX Forum™ in its focus on increasing the widespread adoption of standards-based products in the wireless broadband market and leading the entire industry to mobile WiMAX solutions.

Our solutions are usually used in a point-to-multipoint architecture and address a wide scope of end-user profiles, from the consumers, residential and small office, home office, or SOHO, markets, through small and medium enterprises, or SMEs, and multi-tenant units/multi-dwelling units.

Our products operate in licensed and license-free bands, ranging from 450 MHz to 28 GHz and comply with various industry standards. Our core technologies include spread spectrum radio, linear radio, digital signal processing, modems, MAC, IP-based mobile switches, compact mobile networks, networking protocols and very large systems integration, or VLSI. We have intellectual property in these technologies.

On August 1, 2001 we acquired Floware Wireless Communication Ltd. Upon the closing of the acquisition, we changed our name from BreezeCOM Ltd. to Alvarion Ltd. We have consolidated the results of Floware's business in our financial statements from August 1, 2001.

On April 1, 2003 we acquired certain assets and assumed liabilities of InnoWave Ltd. We have consolidated the results of InnoWave's business in our financial statements from April 1, 2003.

On December 9, 2004, we acquired, through a cash merger, InterWAVE, a provider of compact mobile network equipment and services, which strengthened our know-how in mobility and expanded our served market to include the mobile equipment market. Most of InterWAVE's operations were reported under the CMU business.

On November 21, 2006, we sold substantially all of the assets and certain liabilities related to our CMU business, to LGC Wireless Inc ("LGC"), a privately held US company. The CMU business is classified as discontinued operations.

### **2006 Highlights**

In 2006 we continued to focus strategically on our main businesses, broadband wireless access and WiMAX solutions. We believe that a variety of our achievements in 2006 will enable us to continue to improve our long term performance and to meet our Broadband Wireless and WiMAX technical, financial and strategic objectives.

During 2006 we focused on expanding the breadth of our customer base, and received orders from a variety of incumbents and other customers from around the world. We accomplished several strategic and financial milestones including:

- Converting operators from trials and smaller scale deployments to larger scale commercial deployments with repeated customers such as Iberbanda, a subsidiary of Telefonica de Espana, Netia in Poland, and Telecom South Africa using our WiMAX solution.
- Completing the development of a WiMAX solution in a wide range of frequencies and applications and reaching progress in our WiMAX mobile solutions development road map.
- Developing our go-to-market strategy, our new OPEN™ WiMAX strategy, based on a variety of strategic partnerships with:
  - Premier technical partners including Intel, collaboration with Cisco for core network components, and our cooperation with Accton, a Taiwanese manufacturer, that will work with us to produce customer premises units and PC cards to complement our 4Motion personal broadband solution.
  - We have been developing relationships with strong local partners in key geographies and expanding our already extensive network of distributors both geographically and within key vertical markets.

The breadth of our WiMAX customer base is one of our major achievements this year. Working with a number of different operators provides us with a greater understanding of our customers' application requirements and plants the seeds for our future growth. We believe the importance of these new partners and others will become more visible over the next year or two.

In 2006 and onwards, one of our key challenges is to successfully manage the transition from our non-WiMAX to WiMAX products and from one WiMAX solution to the other. During the year, we experienced delays in orders for our non-WiMAX products, and low revenue growth (approximately 3% over 2005) due to the continuing market transition to WiMAX based products. This trend may continue as customers may continue to

delay orders for our products until the introduction of our additional new WiMAX products. In addition we continued to increase our investments on our WiMAX solutions in particular mobile WiMAX products and as a result increased our overall operating expenses by approximately 22%. The increase in our operating expenses was partially offset by the continuing improvement in our gross margins of approximately 3% mainly due to the continued implementation of operational efficiency measures and cost reduction programs, including improvement in manufacturing processes and in the terms with our subcontractors, and due to the utilization of previously written-off inventory, as well as the change in the mix of our revenues by products.

During 2006 we continued to experience challenges in our CMU business and were not satisfied with the performance of this unit. Consequently, during the fourth quarter, we completed the sale of substantially all of the assets of the CMU business and the assumption of certain liabilities of that unit. The transaction enables us to focus all of our resources and attention on our WiMAX initiatives. Hence, results of the CMU are classified under U.S. GAAP as discontinued operations and are not included in the results from continuing operations for all periods.

Our net loss in 2006 increased significantly by \$28.1 million to approximately \$40.8 million. This increase was primarily a result of the net loss from discontinued operations of approximately \$36.2 million, which increased by \$19.1 million in 2006, and the effect of the adoption of SFAS 123(R) of approximately \$6.5 million which was a portion of the \$18.2 million increase in our operating expenses over 2005. These amounts were partially offset by a \$7.9 million increase in gross profit over our 2005 gross profit.

### **Critical Accounting Principles**

Our financial statements are prepared in accordance with generally accepted accounting principles in the United States, and audited in accordance with standards of the Public Company Accounting Oversight Board (United States). A discussion of the significant accounting policies which we follow in preparing our financial statements is set forth in Note 2 to our consolidated financial statements included in Part III of this annual report. In preparing our financial statements, we must make estimates and assumptions as to certain matters, including, for example, the amount of new materials and components that we will require to satisfy the demand for our products based on our sales estimates and the period of time that will elapse before our products become obsolete. While we endeavor diligently to assure that our estimates and assumptions have a reasonable basis and reflect our best assessment as to the future circumstances which we anticipate, actual results may differ from the results estimated or assumed and the differences may be substantial as to require subsequent write-offs, write-downs or other adjustments to past results or current valuations.

The following is a summary of certain critical principles, which have a substantial impact upon our financial statements and which we believe are most important to keep in mind in assessing our financial condition and operating results:

*Discontinued Operations.* On November 21, 2006, we signed an agreement to sell substantially all of the assets and assign certain liabilities related to the Cellular Mobile unit ("CMU"). At closing, we recognized such transaction as a divestiture of operations and therefore the results of the CMU activities for all reported periods were reclassified into one-line item in the statement of operations below the results from continuing operations under the "Loss from discontinued operations". The assets and liabilities related to the CMU as at December 31, 2005 and 2006 were reclassified in our balance sheets as assets and liabilities from discontinued operations, respectively. In addition, the cash flow of the CMU was also disclosed separately in our statements of cash flows for 2004, 2005 and 2006.

*Revenue Recognition.* We generate revenues from selling our products indirectly through distributors and OEMs as well as directly to end-users.

Revenues are recognized in accordance with Staff Accounting Bulletin No. 104 “Revenue Recognition in Financial Statements” and Emerging Issues Task Force No. 00-21, “Revenue Arrangements with Multiple Deliverables”, when the following criteria are met: persuasive evidence of an arrangement exists, delivery has occurred, the seller’s price to the buyer is fixed or determinable, no further obligation exists and collection is reasonably assured.

We generally do not grant a right of return. However, we have granted to certain distributors limited rights of return on unsold products. Product revenues on shipments to these distributors are deferred until the distributors resell our products to their customers, provided that all other revenue recognition criteria are met.

In cases in which we are obligated to perform post delivery installation services, revenues are recognized upon completion of the installation.

In transactions; where a customer’s contractual terms include a provision for customer acceptance, revenues are recognized either when such acceptance has been obtained or the acceptance provision has lapsed.

*Accounts Receivable.* We are required to assess the collectability of our accounts receivable balances. Generally we do not require collateral, however under certain circumstances we require letters of credit, other collateral, additional guarantees or advance payments. A considerable amount of judgment is required in assessing the ultimate realization of these receivables including, but not limited to, the current credit-worthiness of each customer. We regularly review the amounts due and related allowance by considering factors such as historical experience, credit quality, age of the accounts receivable balances, and current economic conditions that may affect a customer’s ability to pay. For certain accounts receivable balances, we are also covered by foreign trade risk insurance. To date, we have not experienced material losses on the ongoing credit evaluations of our customers. Should we consider it necessary to increase the level of provision for doubtful accounts, required for a particular customer, then additional charges will be recorded in the future.

*Inventory Valuation.* Our policy for valuation of inventory and commitments to purchase inventory, including the determination of obsolete or excess inventory, requires us to perform a detailed assessment of inventory at each balance sheet date which includes a review of, among other factors, an estimate of future demand for products within specific time frames, valuation of existing inventory, as well as product lifecycle and product development plans. The business environment in which we operate, the wide range of products that we offer and the sales-cycles we experience all contribute to the exercise of judgment relating to maintaining, utilizing and writing-off inventory. The estimates of future demand that we use in the valuation of inventory are the basis for our revenue forecast, which is also consistent with our short-term manufacturing plan. Inventory reserves are also provided to cover risks arising from non-moving items. We write down our inventory for estimated obsolescence or unmarketable inventory equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future demand and market conditions. We may be required to record additional inventory write-downs if actual market conditions are less favorable than those projected by our management.

Note 2g to our financial statements describes the write-offs and provisions which we made and recorded in 2004, 2005 and 2006 to reflect the decline from our expectations in the value of inventory, which had become excessive, unmarketable or otherwise obsolete or the inventory of new materials and components which we had purchased or committed to purchase in anticipation of forecasted sales which we did not consummate. In addition, changes in demand, which result in increased demand for our products may lead to utilization of our previously written-off products. Note 2g to our financial statements describes the effect of the utilization of the related products of our prior years’ written-off components, which are reflected in our revenues without additional cost in the cost of sales in the period the inventory was utilized.

If there were to be a sudden and significant decrease in demand for our products, or if there were a higher incidence of inventory obsolescence because of rapidly changing technology and customer requirements, we could be required to increase our inventory allowances and our gross margin could be adversely affected. In addition, if the demand for our products increases beyond our expectations following a write-off of inventory, we may need to further utilize our previously written-down inventory. Such utilization may contribute to our gross margin in future periods. Inventory management remains an area of management focus as we balance the need to maintain strategic inventory levels to ensure competitive lead times against the risk of inventory obsolescence because of rapidly changing technology and customer requirements.

*Intangible assets.* As a result of the acquisition of InterWAVE in 2004, InnoWave in 2003 and our merger with Floware in 2001, our balance sheet as of December 31, 2006 and 2005 includes acquired intangible assets, such as goodwill, current technology, customer relations and trade names, which totaled approximately \$61.2 million and \$63.9 million, respectively. In the course of the analysis and valuation of intangible assets, we use financial and other information, including financial projections and valuations provided by third parties. Although we evaluate our intangible assets when there is an indication of impairment, our projections are based on the information available at the respective valuation dates, and may differ from actual results. As a result of the sale of substantially all of the assets and the assignment of certain liabilities of the CMU, the intangible assets related to the acquisition of interWAVE that were allocated to the CMU activity in 2005, were classified in our balance sheet as assets from discontinued operations.

*Goodwill.* In accordance with Statement of Financial Accounting Standards No. 142, “Goodwill and Other Intangible Assets”, (“SFAS No.142”), goodwill acquired in a business combination that closes on or after July 1, 2001 is deemed to have indefinite life and will not be amortized. SFAS 142 requires goodwill to be tested for impairment on adoption and at least annually thereafter or between annual tests in certain circumstances, and impaired, rather than being amortized as previous accounting standards required. As of December 31, 2006 we had total goodwill of \$57.1 million on our balance sheet. Goodwill is tested for impairment by comparing the fair value of the reporting unit with its carrying value. The fair value was determined based on our management’s future operations projections, using discounted cash flows and market approach and market multiples valuation methods. During 2006, before the sale of the CMU business, we identified indications of impairment of goodwill of \$23.4 million related to this unit. This charge is included in the results of discontinued operations. There was no indication of impairment related to our continuing operations. In assessing the recoverability of our goodwill and other intangible assets, we must make assumptions regarding the estimated future cash flows and other factors to determine the fair value of the respective assets. If these estimates or their related assumptions change in the future, we may be required to record impairment charges for these assets.

*Current Technology.* Current technology represents proprietary “know how”, patents, or any other relevant intellectual property that is technologically feasible as of the valuation date. Usually, current technology can be easily identified as existing products generating revenues on a current basis. As of December 31, 2006, the amounts allocated to current technology from the InnoWave acquisition and the Floware merger totaled \$0.5 million and \$3.6 million, respectively. In accordance with Statement of Financial Accounting Standards No. 144, “Accounting for the Impairment of Long-Lived Assets”, (“SFAS No. 144”), the value of the current technology as of December 31, 2006 and 2005, has also been reviewed and it was determined that no indicators for impairment existed. The acquired current technology is amortized using the straight-line method, over 7 years, 4.75 years and 7.75 depending on the respective product’s amortization schedules.

*Warranties.* We provide for the estimated cost of product warranties at the time the product is shipped. Our products sold are covered by a warranty for periods ranging from one year to three years. We accrue a warranty reserve for estimated costs to provide warranty services. Our estimate of costs to service the warranty obligations is based on historical experience and expectation of future conditions. We accrue for warranty costs as part of our cost of sales based on associated material costs and technical support labor costs. Material cost is

primarily estimated based upon historical trends in the volume of product returns within the warranty period and the cost to repair or replace the equipment. Technical support labor cost is primarily estimated based upon historical trends in the rate of customer calls and the cost to support the customer calls within the warranty period. To the extent we experience increased warranty claim activity or increased costs associated with servicing those claims, our warranty accrual will increase, resulting in decreased gross profit.

*Stock-Based Compensation Expense.* On January 1, 2006, we adopted FASB Statement No. 123 (Revised 2004), Share-Based Payment, or SFAS 123(R), which requires the measurement and recognition of compensation expense for all share-based payment awards made to our employees and directors including employee stock options which are based on estimated fair values. Stock-based compensation expense recognized under SFAS 123(R) for 2006 was \$6.9 million. For fiscal 2005 and fiscal 2004, stock-based compensation expense of \$563,000 and \$60,000, respectively had been recognized under previous accounting standards. See Note 2m to our Consolidated Financial Statements for additional information.

Upon adoption of SFAS 123(R), we began estimating the value of employee stock options on the date of grant using a Black-Scholes model. Prior to the adoption of SFAS 123(R), the value of each employee stock option was estimated on the date of grant using the intrinsic value method in accordance with APB No. 25 and the Black-Scholes model for the purpose of the pro forma financial information provided in the notes to the financial statement in accordance with SFAS 123.

The determination of fair value of stock options awards on the date of grant is affected by several factors including our stock price, our stock price volatility, risk-free interest rate, expected dividends and employee stock option exercise behaviors. If such factors change and we employ different assumptions in the application of SFAS 123(R) in future periods, the compensation expense that we record under SFAS 123(R) may differ significantly from what we have recorded in the current period.

*Deferred Taxes.* We record a valuation allowance to reduce our deferred tax assets to the amount that is more likely than not to be realized. While we have considered future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for the valuation allowance, in the event we were to determine that we would be able to realize our deferred tax assets in the future in excess of our net recorded amount, an adjustment to the deferred tax asset would increase income in the period such determination was made. Likewise, should we determine that we would not be able to realize all or part of our net deferred tax asset in the future, an adjustment to the deferred tax asset would be charged to income in the period such determination was made. Our estimates for estimated future tax rates could be adversely affected by earnings being lower than anticipated in countries where we have different statutory rates, changes in the valuation of our deferred tax assets or liabilities, or changes in tax laws or interpretations thereof. In addition, we are subject to the continuous examination of our tax returns by the local tax authorities in each country that we have established corporations. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for deferred taxes.

### **Contingencies and Other Accrued Expenses**

We are from time to time involved in legal proceedings and other claims. We are required to assess the likelihood of any adverse judgments or outcomes to these matters, as well as potential ranges of probable losses. We have not made any material changes in the accounting methodology used to establish our self-insured liabilities during the past three fiscal years. A determination of the amount of reserves required, if any, for any contingencies and accruals is made after careful analysis of each individual issue. The required reserves may change due to future developments, such as a change in the settlement strategy in dealing with any contingencies, which may

result in higher net loss. If actual results are not consistent with our assumptions and judgments, we may be exposed to gains or losses that could be material.

### Results of Operations

The following table presents our total revenues attributed to the geographical regions based on the location of our customers for the years ended December 31, 2004, 2005 and 2006.

	2004		2005		2006	
	Total revenues In thousands	Percentage Of sales	Total revenues In thousands	Percentage Of sales	Total revenues In thousands	Percentage Of sales
Israel	\$ 2,268	1.1%	\$ 1,271	0.7%	\$ 863	0.5%
United States (including Canada)	33,316	16.7%	29,564	16.7%	25,047	13.8%
Europe (without R u s s i a , Romania, Italy and Spain)	24,845	12.4%	40,341	22.8%	39,903	22.0%
Russia	13,794	6.9%	11,278	6.4%	9,517	5.2%
Mexico	64,005	32.0%	14,790	8.4%	8,023	4.4%
Africa	18,285	9.1%	25,924	14.7%	22,904	12.6%
Spain	8,678	4.3%	10,678	6.0%	14,563	8.0%
Asia	9,150	4.6%	11,732	6.6%	13,731	7.6%
Latin America (with out Mexico)	13,742	6.9%	18,156	10.3%	22,834	12.6%
Italy	4,998	2.5%	6,565	3.7%	10,771	5.9%
Romania	6,970	3.5%	6,628	3.7%	13,438	7.4%
	\$ 200,051	100.0%	\$ 176,927	100.0%	\$ 181,594	100%

The following table sets forth, for the periods indicated, selected items from our consolidated statement of operations in U.S. dollars in thousands and as a percentage of total sales:

	<b>Year Ended December 31,</b>		
	<b>2004</b>	<b>2005</b>	<b>2006</b>
		(In thousands)	
Sales	\$ 200,051	\$ 176,927	\$ 181,594

Loss from discontinued operations, net	(6.1)	(9.6)	(19.9)
Net income (loss)	0.4%	(7.1%)	(22.4%)

**Year Ended December 31, 2006 Compared with Year Ended December 31, 2005**

*On November 21, 2006, we sold substantially all of the assets and certain liabilities related to the CMU, representing the majority of former interWAVE business, to LGC. Pursuant to the terms of the sale agreement, LGC issued to us promissory notes and a convertible note. At closing, we recognized such transaction as a divestiture of operations and therefore the results of the CMU activities for all reported periods were presented in one-line item in the statement of operations below the results from continuing operations under the "Loss from discontinued operations". The assets and liabilities of the CMU business as of December 31, 2005 and 2006 are presented separately in our balance sheets as assets and liabilities from discontinued operations, respectively. The results of the CMU operations are presented as discontinued operations for all periods presented. In addition, the cash flow of the CMU was also disclosed separately in our statements of cash flows for 2004, 2005 and 2006. Note 1d to our financial statements further describes this transaction.*

*Sales.* Sales in 2006 were approximately \$181.6 million, an increase of approximately 2.7% compared with sales of approximately \$176.9 million in 2005. In 2006, BreezeMAX revenues totaled approximately \$72 million, or 40% of total revenue, compared with approximately \$30 million or 17% of revenue in 2005. The increase of our total sales in 2006 derived mainly from the increase of the BreezeMAX revenues, a result of the market transition from non-WiMAX to WiMAX based solutions, which was offset by a decrease in our non-WiMAX broadband wireless products.

Sales in Europe, Middle East and Africa reached approximately 62% of our sales in 2006, which represents an increase over 2005 sales of approximately 4% in this region. This increase is mainly attributed to the fact that some trials and small-scale WiMAX deployments emerged into larger scale commercial deployments by innovative challengers and incumbents. In addition we experienced continued progress in the spectrum allocation process in this region and the adoption of our broadband wireless products by well-capitalized independent operators. Sales in Central and Latin America accounted for 17% of our sales in 2006 compared to 19% of our sales in 2005 in this region, which represents a decrease of approximately 2% in percentage of total sales mainly due to the completion of a large scale deployment at the beginning of 2005. Sales in North America accounted for approximately 14% of our sales in 2006, compared to approximately 17% in 2005 in this region. Sales in Asia Pacific accounted for approximately 8% of our sales in 2006 compared to approximately 7% in 2005 in this region.

*Cost of sales.* Cost of sales consists primarily of cost of components, cost of product manufacturing and assembly, labor, overhead and other costs associated with production. Cost of sales was approximately \$80.4 million in 2006, a decrease of approximately 6.3% compared with cost of sales of approximately \$85.8 million in 2005. Cost of sales as a percentage of sales decreased to approximately 44.3% in 2006 from approximately 48.5% in 2005. This decrease is primarily attributable to a reduction in the fixed expenses, including lease, municipality taxes and payroll expenses, cost reduction programs, as well as the change in the mix of our revenues by products.

*Write-off of excess inventory and provision for inventory purchase commitments.* We periodically assess our inventories valuation in accordance with obsolete and slow moving items based on revenues forecasts and technological obsolescence. Should inventories on-hand exceed our estimates or become obsolete, for example, due to the transition in demand from non-WiMAX to WiMAX products, it would be written-down or written-off. This would result in a charge to our statement of operations and a corresponding reduction in our inventory and shareholders' equity. Changes in demand for our products and in our estimates for demand create changes in provisions for obsolete inventory. As part of our ordinary course of business we evaluate, on a quarterly basis, our actual inventory needs versus our sales projections and write-off excess inventory and un-cancelable purchase commitments from our suppliers and subcontractors. In 2006, we recorded charges related to the write-off of excess inventory and accrued a provision for inventory purchase commitments of new materials and components which we had purchased or committed to purchase in anticipation of forecasted sales, which we did not consummate in the aggregate amount of approximately \$9.5 million, compared to approximately \$7.3 million in 2005.

*Inventory utilization.* In response to the market condition in 2001 and after evaluating industry trends, we performed an inventory evaluation model designed to align our inventory levels to the market conditions and anticipated customer demand. On April 1, 2003, as part of InnoWave's acquisition, we also acquired its inventory, which was recorded at fair value on the date of acquisition. As a result of the change in trends and the increase in 2003 and thereafter of the overall worldwide demand for broadband access solutions the demand for our broadband wireless products increased as well. Consequently, the demand for part of the related products of our prior years' written-off components increased significantly and we began utilizing part of them. In 2006 and 2005, approximately \$3.6 million and \$4.2 million, respectively, of inventory previously written-off consistent with our inventory evaluation model was used as products' components in our regular production course and were sold as finished goods to end users. The sales of these related manufactured products were reflected in our revenues without additional cost in the cost of sales in the period the inventory was utilized. This inventory utilization increased our gross profit in 2006 and 2005 by 2.0% and 2.4% of sales, respectively.

If there was to be a sudden and significant decrease in demand for our products, or if there was a higher incidence of inventory obsolescence because of rapidly changing technology and customer requirements, we could be required to increase our write-off of excess inventory allowances, and our gross margin could be adversely affected. Inventory management remains an area of focus as we balance the need to maintain strategic inventory levels to ensure competitive lead times compared with the risk of inventory obsolescence. However, if the demand for our products increases beyond our expectations following write-down of inventory we may further utilize our written down inventory. Such utilization may contribute to our gross margin in future periods. We cannot predict the likelihood of utilizing previously written-off inventory in future operations.

*Research and development expenses, net.* Gross research and development expenses consist primarily of employee salaries, development-related raw materials and subcontractors, and other related costs. Gross research and development expenses were approximately \$42 million in 2006, an increase of approximately 28.4% compared with gross research and development expenses of approximately \$32.7 million in 2005. This increase is primarily attributable to an increase of approximately 15% in our headcount in 2006 as part of the intense investment in our WiMAX development initiative. In addition, costs increased due to the adoption of Statement of Financial Accounting Standards No. 123 (revised 2004), "Share-Based Payment" ("SFAS 123(R)") which required the measurement and recognition of compensation expense of approximately \$1.41 million based on estimated fair values for all share-based payment awards. Gross research and development, as a percentage of sales increased to 23.2% in 2006 from 18.5% in 2005, primarily as a result of the increase in R&D expenses. Grants from the Government of Israel and other jurisdictions for funding approved research and development projects totaled approximately \$3.2 million in 2006 and \$3.1 million in 2005. Research and development expenses, net, were approximately \$38.8 million in 2006, compared with approximately \$29.7 million in 2005.

*Selling and marketing expenses.* Selling and marketing expenses consist primarily of costs relating to compensation attributable to employees engaged in selling and marketing activities, promotion, advertising, trade shows and exhibitions, travel and related expenses. Selling and marketing expenses were approximately \$44.9 million in 2006, an increase of approximately 12.5% compared with selling and marketing expenses of approximately \$39.9 million in 2005. This increase is primarily attributable to the increase in headcount and related expenses, increased efforts to market our WiMAX solutions and to the recognition of compensation expense of approximately \$1.42 million related to the adoption of SFAS 123(R). Selling and marketing expenses as a percentage of sales increased to 24.7% in 2006 from 22.6% in 2005.

*General and administrative expenses.* General and administrative expenses consist primarily of compensation costs for administration, finance and general management personnel, office maintenance, insurance costs, professional fee costs and other administrative costs. General and administrative expenses were approximately \$13.7 million in 2006, an increase of approximately 42.7% compared with general and administrative expenses of approximately \$9.6 million in 2005. This increase is primarily attributable to the recognition of compensation expense of approximately \$3.1 million related to the adoption of SFAS 123(R). General and administrative expenses as a percentage of sales increased to 7.5% in 2006 from 5.4% in 2005.

*Amortization of intangibles assets.* As a result of the merger with Floware, we acquired an identifiable intangible asset, which was defined as current technology with an aggregate value of \$16.8 million. This amount is being amortized over the useful life of the asset, which is 7 years. As a result of the acquisition of InnoWave, we acquired other acquisition-related intangibles such as current technology and customer relations with an aggregate value of \$1.6 million, which is amortized over the useful life of these assets, which range between 3.75 to 7.75 years. Amortization charges of approximately \$2.7 million for all of these acquisition-related intangibles were recorded in 2006 and in 2005.

*Financial income, net.* Financial income, net, was approximately \$3.8 million in 2006, an increase of approximately 48.8%, compared with financial income, net, of approximately \$2.6 million in 2005. The increase in financial income is attributed mainly to the increase in the dollar interest rate leading to higher yields on investments compared to the previous year.

*Operating income (loss) from continuing operations.* In 2006, we experienced an operating loss of \$(8.4) million, compared with operating income of \$1.9 million in 2005. Our operating loss as a percentage of sales was (4.6)% in 2006 compared with operating income of 1.1% in 2005.

*Loss from discontinued operation.* The loss from discontinued operation for the year ended December 31, 2006 and 2005 includes the activities of the CMU operations. The loss from discontinued operations in 2006 was \$(36.2) million compared with a loss of \$ (17.0) million in 2005. This increase consisted of the impairment of goodwill, which amounted to \$(23.4) million, the loss of the discontinued operations, which amounted to \$(7.6) million, and the loss from the sale of CMU operations, which amounted to \$(5.2) million.

*Net income (loss).* In 2006, net loss was approximately \$(40.8) million, compared with a net loss of approximately \$(12.6) million in 2005.

**Year Ended December 31, 2005 Compared with Year Ended December 31, 2004**

*The results of the CMU activities for all reported periods were reclassified into one-line item in the statement of operations below the results from continuing operations and under the "Loss from discontinued operations."*

*Sales.* Sales in 2005 were approximately \$176.9 million, a decrease of approximately 11.6% compared with sales of approximately \$200 million in 2004. In 2005, we experienced delays in sales of our non-WiMAX products due to the market transition to WiMAX certified products.

In 2004 and 2005, 30.8% and 5.7% of our sales were to a Latin American operator, respectively. For 2005, sales to our Latin American customer decreased significantly due to the nearing completion of a large project. Partly as a result, our revenue decreased in 2005. Excluding the impact of the large customer, our sales increased approximately 20% in 2005 compared with 2004, reflecting broad-based demand for wireless broadband solutions, including the BreezeMAX product, our WiMAX based platform. Sales in Europe, Middle East and Africa reached 58% of our sales in 2005 reflecting an increase of 29% over 2004 sales in this region, attributed mainly to the progress in the spectrum allocation process and the early adoption of our broadband wireless products by well-capitalized independent operators. Sales in Central and Latin America accounted for 19% of our sales in 2005 a decrease of 58% (in dollar value) over 2004 in this region, related mainly to the decrease in deployment of a single large customer. During 2003 we received a large order from a Latin American customer. Initial deployment of this order began in 2003 and the majority was deployed during 2004, with the remainder in 2005. Toward the end of 2005 we received a small additional order from this customer, to be deployed in 2006.

*Cost of sales.* Cost of sales was approximately \$85.8 million in 2005, a decrease of approximately 15.1% compared with cost of sales of approximately \$101.1 million in 2004. Cost of sales as a percentage of sales decreased to approximately 48.5% in 2005 from approximately 50.6% in 2004, primarily attributable to the continued implementation of operational efficiency measures and cost reduction programs, including improvement in manufacturing processes and improvement of the terms with our subcontractors, which we implemented during 2005.

*Write-off of excess inventory and provision for inventory purchase commitments.* In 2005, we recorded charges related to the write-off of excess inventory and accrued a provision for inventory purchase commitments of new materials and components which we had purchased or committed to purchase in anticipation of forecasted sales which we did not consummate in the aggregate amount of approximately \$7.3 million compared to approximately \$11.4 million in 2004.

*Inventory utilization.* In 2005 and 2004, approximately \$4.2 million and \$5.6 million, respectively, of inventory previously written-off was used as products' components in our regular production course and were sold as finished goods to end users. The sales of these related manufactured products were reflected in our revenues without additional cost in the cost of sales in the period the inventory was utilized. This inventory utilization increased our gross profit in 2005 and 2004 by 2.4% and 2.7% of sales, respectively.

*Research and development expenses, net.* Gross research and development expenses were approximately \$32.8 million in 2005, an increase of approximately 5.1% compared with gross research and development expenses of approximately \$31.2 million in 2004. Gross research and development, as a percentage of sales increased to 18.5% in 2005 from 15.6% in 2004, primarily as a result of increased investment in our WiMAX solutions as well as the decrease in our revenues. Grants from the Government of Israel and other jurisdictions for funding approved research and development projects totaled approximately \$3.1 million in 2005 and \$3.9 million in 2004. Research and development expenses, net, were approximately \$29.7 million in 2005, compared with approximately \$27.3 million in 2004.

*Selling and marketing expenses.* Selling and marketing expenses were approximately \$39.9 million in 2005, an increase of approximately 3.1% compared with selling and marketing expenses of approximately \$38.7 million in 2004 primarily as a result of increased marketing efforts. Selling and marketing expenses as a percentage of sales increased to 22.6% in 2005 from 19.4% in 2004.

*General and administrative expenses.* General and administrative expenses were approximately \$9.6 million in 2005, an increase of approximately 3.2% compared with general and administrative expenses of approximately \$9.3 million in 2004. General and administrative expenses as a percentage of sales increased to 5.4% in 2005 from 4.7% in 2004.

*Amortization of intangibles assets.* As a result of the merger with Floware, we acquired current technology with an aggregate value of \$16.8 million. This amount is being amortized over 7 years, the useful life of the asset. As a result of the acquisition of InnoWave, we acquired current technology and customer relations with an aggregate value of \$1.6 million, which is amortized over the useful life of these assets, which ranges between 3.75 to 7.75 years. Amortization charges of \$2.7 million for all of these acquisition-related intangibles were recorded in 2005 and in 2004.

*Financial income, net.* Financial income, net, was approximately \$2.6 million in 2005, a decrease of approximately 33%, compared with financial income, net, of approximately \$3.8 million in 2004. The decrease in financial income is attributed mainly to a decrease in our cash, cash equivalents, short term and long term marketable securities and deposits of approximately \$50 million used in the interWAVE acquisition.

*Operating income.* In 2005, we experienced operating income of \$ 1.9 million, compared with operating income of \$9.3 million in 2004. Our operating income in 2005 as a percentage of sales decreased to 1.1% in 2005 compared with 4.6% in 2004.

*Loss from discontinued operation.* The Loss from discontinued operation for the year ended December 31, 2005 include the activities of CMU operations for the entire year whereas the loss from discontinued operation of the year ended December 31, 2004 includes CMU operations from December 9, 2004, the date we first consolidated former interWAVE operations, through December 31, 2004. The loss from discontinued operations in 2005 was \$ (17.0) million compared with a loss of \$ (12.3) million in the three-week period in 2004 that includes in-process research and development write-off which amounted to approximately \$11 million in respect of the acquisition of interWAVE.

*Net income (loss).* In 2005, net loss was approximately \$(12.6) million, compared with net income of approximately \$0.9 million in 2004.

### **Impact of Inflation and Currency Fluctuations**

The dollar cost of our operations is influenced by the extent to which inflation in Israel is offset by a devaluation of the NIS in relation to the dollar. The majority of our sales, and most of our expenses, are denominated in dollars. However, a portion of our expenses, primarily labor expenses is denominated in NIS unlinked to the dollar. Inflation in Israel will have the effect of increasing the cost in dollars of these expenses unless offset on a timely basis by a devaluation of the NIS in relation to the dollar . Yet the devaluation of the NIS against the dollar will have the effect of decreased dollar cost of our operations in Israel. Because exchange rates between the NIS and the dollar fluctuate continuously, albeit with a historically declining trend in the value of the NIS, exchange rate fluctuations will have an impact on our profitability and period-to-period comparisons of our results of operations. In 2006, the valuation of the NIS against the dollar exceeded the rate of inflation in Israel and we have experienced an increase in the dollar cost of our operations in Israel.

To protect against exchange rate fluctuations, we have instituted several foreign currency hedging programs. These hedging activities consist of cash flow hedges of anticipated NIS payroll and forward exchange contracts to hedge certain trade payables payments in NIS. The cash flow hedges were all effective. These activities are all effective as hedges of these expenses. Please see "Item 11--Qualitative and Quantitative Market Risks".

For a discussion of certain policies or factors relating to our being an Israeli company and our location in Israel, please see "Item 3--Key Information--Risk Factors--Risks Relating to our Location in Israel."

## **B. LIQUIDITY AND CAPITAL RESOURCES**

The following sections discuss the effects of changes in our balance sheets, cash flows, and commitments on our liquidity and capital resources.

### **Balance Sheet and Cash Flows**

Total cash, cash equivalents, short term and long term marketable securities and deposits were \$118.4 million as of December 31, 2006, an increase of approximately \$4.1 million or 3.6% from \$114.3 million at December 31, 2005.

Our continuing operating activities provided cash of approximately \$16.6 million, \$7.2 million and \$26.0 million in 2006, 2005 and 2004, respectively. The positive cash flow in 2006 resulted from an increase in other accounts payable and a decrease in trade receivables partially offset by our net loss in this period together with a decrease in trade payables. The cash flows provided in 2005 resulted from our net income from continuing operations together with an increase in trade payables together with the decrease in inventories that were partially offset by the increase of trade receivables and a decrease in other account payables. The cash flows provided in 2004 resulted from our net income from continuing operations in this period together with an increase in other accounts payable partially offset by a decrease in trade payables and an increase in trade receivables.

Our continuing investing activities result mainly from investments in bank deposits, marketable securities and fixed assets. We used cash of approximately \$9.2 million in 2006, provided cash of approximately \$36.8 million in 2005 and used cash of approximately \$5.6 million in 2004. Capital expenditures were approximately \$4.8 million, \$3.3 million, and \$3.4 million in 2006, 2005 and 2004 respectively. These expenditures principally financed the purchase of research and development equipment and manufacturing equipment.

Net cash provided by continuing financing activities totaled approximately \$3.3 million, \$1.8 million and \$8.1 million in 2006, 2005 and 2004, respectively. In 2006, the amount of cash provided was attributable primarily to proceeds from the issuance of shares in connection with the exercise of employees' options in the amount of approximately \$5.0 million partially offset by repayment of maturities of a long term loan of \$1.7 million. In 2005, the amount of cash provided was attributable primarily to proceeds from the issuance of shares in connection with the exercise of warrants and employees' options in the amount of approximately \$3.5 million, partially offset by repayment of maturities of a long term loan of \$1.7 million. In 2004 the amount of cash provided was attributable primarily to proceeds from the issuance of shares in the amount of approximately \$9.8 million, partially offset by repayment of maturities of a long term loan of \$1.8 million.

We expect that cash provided or used by continuing operations may fluctuate in future periods as a result of a number of factors, including fluctuations in our operating results, shipment timing, accounts receivable collections, inventory management, and the timing of other payments and investments.

We have historically met our financial requirements primarily through the sale of equity securities, including our initial public offering and follow-on public offering, and through research and development and marketing grants from the government of Israel, bank borrowings and cash generated from operations and from the exercise of warrants and options. We raised approximately \$107 million from the sale of 5,750,000 ordinary shares in our initial public offering in March 2000 and approximately \$73 million from the sale of 2,150,000 ordinary shares in our July 2000 follow-on offering. We also obtained approximately \$55.5 million in cash and cash equivalents, marketable securities and deposits as a result of our merger with Floware in 2001 and approximately \$36.5 million was received and accrued as financial income from 2000 through 2006.

*Accounts Receivable, Net.* Accounts receivable, net was \$34.3 million and \$35.4 million as of December 31, 2006 and 2005, respectively. Days sales outstanding (“DSO”) in receivables as of December 31, 2006 and December 31, 2005 were 69 and 73 days, respectively. The decrease in DSO’s in 2006 is primarily a result of the improved payment terms and intense collection of accounts receivable. During the year 2005, we sold trade receivables in a total amount of \$13.5 million. We did not sell trade receivables during 2006.

*Inventories.* Inventories were \$30.5 million as of December 31, 2006, compare to \$30.6 million at December 31, 2005. Inventories consist of raw materials, work in process and finished goods and inventories at customers which are not recognized as revenues yet. As a result of the foregoing, inventory turns were approximately 2.6 times in fiscal 2006 and 2.8 times in 2005. Inventory management remains an area of focus as we balance the need to maintain strategic inventory levels to ensure competitive lead times against the risk of inventory obsolescence because of rapidly changing technology and customer requirements. We are focusing our operational efforts to increase inventory turns to enhance our responsiveness to future customers’ needs and market changes.

## **WORKING CAPITAL**

Our working capital from continuing operations was approximately \$100.6 million as of December 31, 2006, compared to \$107.2 million as of December 31, 2005 and \$67.4 million as of December 31, 2004. The decrease in working capital from December 31, 2005 to December 31, 2006 is primarily attributable to the increase in other accounts payable and accrued expenses. The increase in working capital from December 31, 2004 to December 31, 2005 is attributable to an increase in our cash and cash equivalents and our marketable securities balances, and change in the mix of our cash and cash equivalents, long-term bank deposits and marketable securities that had partially moved from long term to short term, and to an increase in trade receivables

## **Commitments**

*Long term debt.* During 2003, we entered into a long-term loan agreement for approximately \$7.0 million with a bank designated for the settlement of a portion of our OCS royalty payment obligations. The loan is linked to the US dollar and is payable in four equal annual installments carrying variable interest. As of December 31, 2006 the balance of the long-term loan was approximately \$1.7 million. The loan is secured by a back-to-back lien of a bank deposit.

*Leases.* We lease office space in several worldwide locations. Rent expense totaled \$5.1 million, \$4.6 million and \$4.5 million in 2006, 2005 and 2004, respectively. We also lease various motor vehicles under operating lease agreements, which expire in 2009. Motor vehicles leasing expenses for the year ended December 31, 2006 were \$2.3 million, for the year ended December 31, 2005 were \$2.2 million and for the year ended December 31, 2004 were \$2.1 million.

Future annual minimum lease payments under all non-cancelable operating leases as of December 31, 2006 were as follows (in thousands):

	<b>Rental of premises</b>	<b>Lease of motor vehicles</b>
2007	\$ 3,936	\$ 2,479
2008	3,338	1,447
2009	3,169	567
2010	3,008	-
2011	752	-
	\$ 14,203	\$ 4,493

*Royalties.* During 2005, we recorded royalty-bearing grants from the OCS for the support of research and development activities aggregating to \$52,000 for certain of our research and development projects. We are obligated to pay royalties to the OCS, amounting to 3%-5% of the sales of the products and other related revenues generated from such projects, up to 100% of the grants received, linked to the U.S. dollar. The obligation to pay these royalties is contingent upon actual sales of the products, and in the absence of such sales, no payment is required. We did not receive royalty-bearing grants from the OCS during 2006.

During 2006, we paid or accrued royalties to the OCS in the amount of \$0.7 million. As of December 31, 2006, the aggregate contingent liability to the OCS amounted to \$5.6 million.

The following table of our material contractual obligations as of December 31, 2006, summarizes the aggregate effect that these obligations are expected to have on our cash flows in the periods indicated:

	<b>Payments due by period</b>				
	<b>Total</b>	<b>Less than 1 year</b>	<b>During the second and third years</b>	<b>3-5 years</b>	<b>More than 5 years</b>
Maturity of Long-Term Debt	\$ 1,749	\$1,749	--	--	--
Rental Lease Obligations	\$14,203	\$ 3,936	\$ 6,507	\$ 3,760	--
Motor vehicle Leases	\$ 4,493	\$ 2,479	\$ 2,014	--	--

*Treasury stock.* Through December 31, 2002, we resolved to implement a share buyback plan under which the total amount to be paid for the repurchase of shares, shall not exceed \$9 million dollars. As of December 31, 2006, we had purchased 3,796,773 shares at a weighted average price per share of approximately \$2.07 per share. We did not buy back shares during 2005 or 2006.

## **FUTURE NEEDS**

We believe our cash balances and investments and governmental research and development grants will satisfy our working capital needs, capital expenditures, investment requirements, stock repurchases, commitments, future customer financings, and other liquidity requirements associated with our existing operations through at least the next twelve months. We believe that the most strategic uses of our cash resources include working capital, strategic investments to gain access to new technologies, acquisitions, financing activities, and repurchase of shares. There are no transactions, arrangements, and other relationships with unconsolidated entities or other persons that are reasonably likely to materially affect liquidity or the availability of our requirements for capital resources. However, if our operations do not generate cash to the extent currently anticipated by us, or if we grow more rapidly than currently anticipated, it is possible that we will require more funds than anticipated. We expect that these sources will continue to finance our operations in the long term, and will be complemented, if required, by private or public financing.

## **Effective Corporate Tax Rate**

Income derived by Alvarion Ltd. is generally subject to the regular Israeli corporate tax rate, which was 31% in 2006 and is progressively being reduced to a rate of 25% in 2010. However, as detailed below, income derived in Israel from certain "Approved Enterprises" will enjoy certain tax benefits for a specific definitive period. The allocation of income derived from approved enterprises is dependent upon compliance of certain requirements with the Investment Law.

Our manufacturing facilities in Tel Aviv and Nazareth have been granted "Approved Enterprise" status under the Law for the Encouragement of Capital Investments, 1959, as amended, or the Investment Law, and, consequently, are eligible, subject to compliance with specified requirements, for tax benefits beginning when such facilities first generate taxable income.

According to the provision of the law, we have elected the "alternative benefits" track provisions of the Investment Law, pursuant to which we have waived our right to grants and instead receive a tax benefit on undistributed income derived from the "Approved Enterprise" program. The tax benefits under the Investment Law may not be available with respect to income derived from products manufactured outside of Israel or manufactured in Israel but outside of the Approved Enterprises mentioned above and may be affected by the current location of our facilities in Israel. The relative portion of taxable income that should be allocated to each Approved Enterprise and expansion is subject to the fulfillment of covenants with the tax authorities.

On September 6, 1995, our production facilities in Tel Aviv were granted Approved Enterprise status. Subject to compliance with applicable requirements, the income derived from the Tel Aviv Approved Enterprise will be tax-exempt for a period of four years and will enjoy a reduced tax rate of 10% to 25% for the following six years. The actual number of years and tax rate depends upon the percentage of the non-Israeli holders of our share capital. On December 31, 1997, our production facilities in Nazareth were granted Approved Enterprise status. Subject to compliance with applicable requirements, the income derived from the Nazareth Approved Enterprise is tax exempt for a period of ten years.

The periods of tax benefits with respect to each of the Tel Aviv and Nazareth Approved Enterprises will commence with the first year in which we earn our taxable income and exhaust our accumulated tax loss carry forwards. The period of tax benefits for the Approved Enterprises are subject to limits of the earlier of 12 years from the commencement of production or 14 years from receiving the approval. The period of benefits for the Tel Aviv Approved Enterprise and for the Nazareth plan has not yet commenced.

In 1997, Floware submitted a request for Approved Enterprise status of its production facility in Or Yehuda. This request was approved. After the merger, Floware's enterprise was relocated into our facilities in Tel-Aviv. The income derived from this Approved Enterprise will be tax-exempt for a period of two years and will thereafter enjoy a reduced tax rate between 10% and 25% for an additional period of five to eight years. The actual number of years and tax rate depends upon the percentage of the non-Israeli holders of our share capital. The period of benefits will commence with the first year that we earn taxable income.

In 2000, we received approval of our application for an expansion of our Approved Enterprise status with respect to our Nazareth facility. This expansion will include, among other things, our Carmiel facility, which during 2004 was relocated to Migdal Ha-emek. The income derived from this Approved Enterprise will be tax-exempt for a period of ten years. The relative portion of taxable income that should be exempt for a ten year period is subject to final covenants with the tax authorities. The ten-year period of benefits will commence with the first year in which we earn taxable income.

InnoWave was granted an "Approved Enterprise" status for its 1997 plan regarding the production facility in Omer. During 1999, InnoWave's request for an expansion was approved.

During 2003, we applied for the assignment of former InnoWave's "Approved Enterprise" status to Alvarion. Such approval was obtained. The income derived from this Approved Enterprise will be tax-exempt for a period of ten years. The relative portion of taxable income that should be exempt for a ten year period is subject to final covenants with the tax authorities. The ten-year period of benefits will commence with the first year in which we earn taxable income.

In order to maintain eligibility for the above programs and benefits following the Floware merger and InnoWave acquisition, we must meet specified conditions stipulated by the Investment Law, regulations published there under and the letters of approval for the specific investments in "Approved Enterprises". In the event of failure to comply with these conditions, any benefits which were previously granted may be canceled and we may be required to refund the amount of the benefits, in whole or in part, including interest.

If these retained tax-exempt profits are distributed they would be taxed at the corporate tax rate applicable to such profits as if we had not elected the alternative system of benefits, currently between 10%-25% for an "Approved Enterprise". As of December 31, 2006, our accumulated deficit does not include tax-exempt profits earned by our "Approved Enterprise".

On April 1, 2005, an amendment to the Investment Law came into effect ("the Amendment") and, has significantly changed the provisions of the Investment Law. The Amendment limits the scope of enterprises, which may be approved by the Investment Center by setting criteria for the approval of a facility as an Privileged Enterprise such as provision generally requiring that at least 25% of the Privileged Enterprise's income will be derived from export. Additionally, the Amendment enacted major changes in the manner in which tax benefits are awarded under the Investment Law so that companies no longer require Investment Center approval in order to qualify for tax benefits. However, the Amendment provides that terms and benefits included in any certificate of approval already granted will remain subject to the provisions of the law as they were on the date of such approval.

Under the Amendment, in June 2005, we submitted an expansion request for additional "Approved Enterprise" approval regarding its production facilities in Nazareth, Migdal Haemek, Omer and Tel-Aviv. A portion of the income derived from this "Approved Enterprise" will be tax-exempt for a period of 10 years and the rest will be taxed at a reduced rate of 10% to 25% (depending on the percentage of foreign investment in the Company). The 10-year period of benefits will commence with the first year in which Alvarion Ltd. earns taxable income. Our expansion request has not yet been approved.

As of December 31, 2006, in the Israeli company we had available tax loss carryforwards amounting to approximately \$84 million, which may be carried forward, in order to offset taxable income in the future, for an indefinite period. In addition, the incurred net tax operating loss carryforwards in a total amount of \$69 million of BreezeCOM and Floware at the effective time of the merger can be carried forward to subsequent years and may be set off against our taxable income beginning with the tax year immediately following the merger. This set off is limited per each calendar year to the lesser of:

- 20% of the aggregate net tax operating losses of the merging companies prior to the effective time of the merger; and
- 50% of the combined company's taxable income in the relevant tax year before the set off of losses from preceding years.

These restrictions, with several modifications, also apply to the set off of capital losses of the merging companies against capital gains of the combined company.

As a result, we do not anticipate being subject to corporate income tax in Israel until at least 2008.

As of December 31, 2006, the state and the U.S. federal tax losses carryforward of our U.S. subsidiary, amounted to approximately \$39 million and \$47.5 million, respectively. These losses are available to offset against any future U.S. taxable income of our U.S. subsidiary and will expire in the years 2011 and 2026, respectively.

Utilization of U.S. net operating losses may be subject to substantial annual limitations due to the "change in ownership" provisions ("annual limitations") of the Internal Revenue Code of 1986 and similar state provisions. The annual limitation may result in the expiration of net operating losses before utilization.

### **Reduction in corporate tax rate**

On July 25, 2005 the Israeli parliament passed the Law for the Amendment of the Income Tax Ordinance (No.147 and Temporary Order) - 2005 (hereinafter - the Amendment).

Inter alia, the Amendment provides for a gradual reduction in the statutory company tax rate in the following manner: in 2006 the tax rate was 31%, in 2007 the tax rate will be 29%, in 2008 the tax rate will be 27%, in 2009 the tax rate will be 26% and from 2010 onward the tax rate will be 25%. Furthermore, as from 2010, upon reduction of the company tax rate to 25%, real capital gains will be subject to tax of 25%.

Because we have more than one "Approved Enterprise," our effective tax rate in Israel will be a weighted combination of the various applicable tax rates. We are likely to be unable to take advantage of all tax benefits in Israel for an Approved Enterprise, which would otherwise be available to us because a portion of our operations may be considered by the Israeli tax authorities as generated in areas that are defined as non-Approved Enterprise areas. In addition, because the tax authorities customarily review and reassess existing tax benefits granted to merging companies, and we have yet to finalize the status of our tax benefits following the Floware merger and the InnoWave acquisition, we cannot assure you that the tax authorities will not modify the tax benefits that we enjoyed prior to these transactions.

Our effective corporate tax rate may substantially exceed the Israeli tax rate. Our Brazilian, French, German, Singapore, Hong Kong, Japanese, Romanian, U.K., Uruguayan, Polish, Dutch, Turkish, Mexican, Ireland, China, Philippines and U.S. subsidiaries will generally each be subject to applicable federal, state, local and foreign taxation, and we may also be subject to taxation in other jurisdictions where we own assets, have employees or conduct activities. Because of the complexity of these local tax provisions, it is not possible to anticipate the actual combined effective corporate tax rate that will apply to us.

### **Government Grants**

Under an arrangement entered during 2003 with the Office of the Chief Scientist in Israel's Ministry of Industry and Trade ("the OCS"), the company settled its liability for the amount due of approximately \$8.5 million. The repayment to the OCS can be made over a period of five years from the date of settlement. The liability is linked to Israel's Consumer Price Index ("CPI") and bears annual interest of 4%.

This arrangement enables us to participate in new OCS programs under which we will be eligible to receive grants for research and development projects without any royalty repayment obligations excluding OCS programs grants resulting from InnoWave's former operations which were not included in this arrangement.

In addition to these grants, we obtain grants from the OCS to fund certain other research and development projects as part of our participation in the Magnet Consortium. These grants do not bear any royalty repayment obligations.

### **Recently issued accounting standards**

In July 2006, the FASB issued FASB Interpretation No. 48 "Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement No. 109" ("FIN 48"). FIN 48 clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 utilizes a two-step approach for evaluating tax positions. Recognition (step one) occurs when an enterprise concludes that a tax position, based solely on its technical merits, is more-likely-than-not to be sustained upon examination. Measurement (step two) is only addressed if step one has been satisfied (i.e., the position is more-likely-than-not to be sustained). Under step two, the tax benefit is measured as the largest amount of benefit, determined on a cumulative probability basis that is more-likely-than-not to be realized upon ultimate settlement.

FIN 48 applies to all tax positions related to income taxes subject to the Financial Accounting Standard Board Statement No. 109, "Accounting for income taxes" ("FAS 109"). This includes tax positions considered to be routine as well as those with a high degree of uncertainty.

FIN 48 has expanded disclosure requirements, which include a tabular roll forward of the beginning and ending aggregate unrecognized tax benefits as well as specific detail related to tax uncertainties for which it is reasonably possible the amount of unrecognized tax benefit will significantly increase or decrease within twelve months. These disclosures are required at each annual reporting period unless a significant change occurs in an interim period.

FIN 48 is effective for fiscal years beginning after December 15, 2006. The cumulative effect of applying FIN 48 will be reported as an adjustment to the opening balance of retained earnings. We are still valuating the potential impact of FIN 48 on our financial position and results of operations. We are currently assessing the impact FIN 48 will have on our financial statements.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements ("SFAS No. 157"). This statement provides a single definition of fair value, establishes a framework for measuring fair value, and expands disclosures concerning fair value. Previously, different definitions of fair value were contained in various accounting pronouncements creating inconsistencies in measurement and disclosures. SFAS No. 157 applies under those previously issued pronouncements that prescribe fair value as the relevant measure of value, except SFAS No. 123(R) and related interpretations.

The statement does not apply to accounting standard that require or permit measurement similar to fair value but are not intended to measure fair value. This pronouncement is effective for fiscal years beginning after November 15, 2007. We do not anticipate any material impact on our consolidated financial statements upon the adoption of this standard.

In February, 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities" ("SFAS No. 159"). SFAS No. 159 permits entities to choose to measure many financial assets and financial liabilities at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. We are currently assessing the impact of SFAS No.159 on our consolidated financial position and results of operations.

#### **C. RESEARCH AND DEVELOPMENT, PATENTS AND LICENSES**

Our product development plans are market-driven and address the major, fast-moving trends that influence the wireless industry. We believe that our future success will depend upon our ability to maintain technological competitiveness, to enhance our existing products and to introduce on a timely basis new commercially viable products addressing the demands of the broadband wireless access market. Accordingly, we devote, and intend to continue to devote, a significant portion of our personnel and financial resources to research and development. As part of the product development process, we seek to maintain close relationships with current and potential distributors, other resellers and end-users, strategic partners and leaders in industry segments in which we operate to identify market needs and define appropriate product specifications.

As of December 31, 2006, our research and development staff consisted of 382 full time employees. Our research and development is conducted at our facilities in Israel, Romania, and Spain. We occasionally use independent subcontractors for portions of our development projects.

Our gross research and development expenses were approximately \$31.2 million or 15.6% of sales in 2004, \$32.8 million or 18.5% of sales in 2005 and \$42 million or 23% of sales in 2006. The Government of Israel and other jurisdictions for funding approved research and development projects reimbursed us for approximately \$3.9 million in 2004, \$3.1 million in 2005 and \$3.2 million in 2006.

#### **D. TREND INFORMATION**

See the overview section of "Operating and Financial Review and Prospects - Operating Results" above.

**E. OFF-BALANCE SHEET ARRANGEMENTS**

Not applicable.

**F. TABULAR DISCLOSURE OF CONTRACTUAL OBLIGATIONS**

Included under Section B of this Item 5.

**ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES****A. DIRECTORS AND SENIOR MANAGEMENT**

The following table lists the name, age, and position of each of our directors and executive officers:

<b>Name</b>	<b>Age</b>	<b>Position</b>
Anthony Maher	61	Chairman of the board of directors (1)(4)
Dr. Meir Barel	56	Vice Chairman of the board of directors (4)
Oded Eran	51	Director (1)(3)
Benny Hanigal	56	Director
Professor Raphael Amit	59	Director(1)(2)(3)(4)
Robin Hacke	47	Director (1)(2)(3)
Amnon Yacoby	57	Director
Dr. David Kettler	64	Director (4)
Zvi Slonimsky	57	Director
Tzvi Friedman	45	Chief Executive Officer, President and Director
Dafna Gruber	42	Chief Financial Officer (5)
Efrat Makov	39	Chief Financial Officer Designate (5)
Uzi Brier	48	President, Broadband Mobile unit
Rudy Leser	42	Corporate Vice President, Strategy & Marketing
Avi Mazaltov	45	President, Operations and Infrastructure Division
Avi Wellingstein	46	President of the Customers' Business Division
Avinoam Barak	44	President of the Broadband Wireless Access Division
Haim Srur	42	Corporate Vice President of Human Resources
Amir Tirosh	38	Corporate Vice President of Corporate Development
Greg Daily	43	President, Alvarion, Inc.

- (1) "Independent Director" under rules of the Securities and Exchange Commission and NASDAQ Marketplace Rules (see explanation below)
- (2) "External Director" within the meaning of the Israeli Companies Law (see explanation below)
- (3) Member of our Audit Committee.
- (4) Member of our Compensation, Nominating and Corporate Governance Committee.
- (5) On April 30, 2007, Ms. Gruber is scheduled to step down as Chief Financial Officer and Ms. Makov is scheduled to assume the office of Chief Financial Officer.

**Mr. Anthony Maher** has served as the chairman of our board of directors since March 2004. He was a member of Floware's board of directors from 1997 and until its merger with us and has, since the merger, served as a member of our board of directors. Until January 2002, Mr. Maher was a Member of the Executive Management Board of the Information and Communication Networks Group of Siemens AG. Since 1978, Mr. Maher has held various

engineering, marketing and managerial positions at Siemens. Prior to that, he was employed by Bell Telephone Laboratories in Naperville, Illinois, contributing to hardware and software design, as well as System engineering. Mr. Maher also serves as director of Adva Optical Networks, Inc., Wavecom Communications, Broadlight and Xtellus Inc. Mr. Maher holds M.Sc. and B.Sc. degrees in Electrical Engineering and Physics from the University of Illinois.

**Dr. Meir Barel** served as the chairman of the board of directors of Floware from its inception until its merger with us in August 2001, and has, since the merger, served as vice chairman of our board of directors. Dr. Barel also served as a director of BreezeCOM between 1994 and 2000. Dr. Barel is the founder and managing partner of Star Venture Management, a venture capital company, which was founded in 1992. From 1988 to 1992, Dr. Barel was a managing director of TVM Techno Venture Management, Munich. Prior to 1986, Dr. Barel served in various German and Israeli companies involved in factory automation, computer design and data communication. Dr. Barel received a doctorate in Electrical Engineering from the Data Communication Department of the Technical University of Aachen, Germany.

**Mr. Oded Eran** has served as a member of our board of directors since September 2003. Mr. Eran is a corporate lawyer, who has been a member of the Israeli law firm of Goldfarb, Levy, Eran, Meiri & Co. since 1986. From 1983 to 1986 Mr. Eran was an associate lawyer at the New York law firm of Kronish, Lieb, Weiner & Hellman. Mr. Eran is a member of the Israeli Bar (1981) and the New York Bar (1984). He holds LLB and LLM degrees from the Tel Aviv University Faculty of Law.

**Mr. Benny Hanigal** has served as a member of our board of directors since our inception and served as chairman of our board of directors until February 1999. Since August 2001, Mr. Hanigal has been a partner in Sequoia Capital Venture Fund. In 1985, Mr. Hanigal founded Lannet Ltd., of which Mr. Hanigal served as President and Chief Executive Officer until 1995. In 1995, Lannet was acquired by Madge Networks N.V., which thereafter employed Mr. Hanigal until he left in June 1997. From January 1998 until 2001, Mr. Hanigal served as a managing director of a company that manages one of the Star funds. Mr. Hanigal has a B.Sc. degree in Electrical Engineering from the Technion.

**Professor Raphael Amit** has served as one of our external directors since September 2003. He serves on the audit and on the Compensation Nominating and Governance committees. Prior to joining the Alvarion Board, Professor Amit served as Chairman of the Board of Directors of Creo Products Inc (NASDAQ: CREO until May 2005) and a member of the Audit committee and the compensation, nominating, and Governance committee. Professor Amit has been the Robert B. Goergen Professor of Entrepreneurship and a Professor of Management at the Wharton School of the University of Pennsylvania since July 1999. Professor Amit also serves as the Academic Director of Wharton's Goergen Entrepreneurial Management Programs. Prior thereto, Professor Amit was the Peter Wall Distinguished Professor at the Faculty of Commerce and Business Administration, University of British Columbia (UBC), where he was the founding director of the W. Maurice Young Entrepreneurship and Venture Capital Research Center. From 1983 to 1990, Professor Amit served on the faculty of the J.L. Kellogg Graduate School of Management at Northwestern University, where he received the J.L. Kellogg Research Professorship and the Richard M. Paget Research Chair in Business Policy. Professor Amit holds B.A. and M.A. degrees in Economics from the Hebrew University and a Ph.D. in Management from the Northwestern University's J.L. Kellogg Graduate School of Management. Professor Amit serves on the editorial boards of the Strategic Management Journal and The European Journal of Management. Professor Amit has served as a consultant to a broad range of organizations in North America and Europe on strategic, entrepreneurial management and new venture formation issues.

**Ms. Robin Hacke** was appointed as one of our external directors upon our merger with Floware in August 2001. Ms. Hacke served as a member of Floware's board of directors from its initial public offering in August 2000 and was appointed as an external director of Floware in December 2000. Since August 2003, Ms. Hacke has been the Managing Director of Pentaport Venture Advisors Inc., a company that advises investment companies, including Portview Communications Partners LP. From January 2003 to July 2003, Ms. Hacke served as Managing Director of Triport Advisors Ltd., a company founded by Ms. Hacke that provides advisory services to investment companies including Portview Communications Partners. From 1990 to 2002, Ms. Hacke served as the Chief Executive Officer of HK Catalyst Strategy and Finance Ltd., a company that Ms. Hacke founded that provided advisory services to investment companies and high-tech enterprises. From 1986 to 1990, Ms. Hacke

held various management positions at Aitech Ltd., an Israeli start-up company. Prior to that, Ms. Hacke was an investment banker at Shearson Lehman Brothers in New York. Ms. Hacke is a member of the board of directors of several privately held companies, including Aternity Inc. Ms. Hacke holds an A.B. magna cum laude degree from Harvard-Radcliffe College and an MBA degree from Harvard Business School.

**Mr. Amnon Yacoby** has served as a member of our board of directors since our merger with Floware in August 2001. Mr. Yacoby founded Floware and served as its Chief Executive Officer and as a member of its board of directors until its merger with us. Following our merger with Floware until the end of 2001, Mr. Yacoby served as our co-Chief Executive Officer. In 2004, Mr. Yacoby founded Aternity, Inc. and serves as its Chairman and CEO. In 1987, Mr. Yacoby founded RAD Network Devices Ltd., a developer of data networking devices, and served as its president and Chief Executive Officer until 1995. From 1972 to 1986, he served in the Israel Defense Forces' Electronic Research Department in various positions, most recently as head of the department. He twice received the Israel Security Award. Mr. Yacoby holds B.Sc. and M.Sc. degrees in Electrical Engineering from the Technion.

**Dr. David Kettler** joined as a member of our board of directors in May 2004. He provides consulting on telecom and information technology through DAK Solutions, LLC in Atlanta. Previously, Dr. Kettler served as the BellSouth Vice President in charge of the Science & Technology organization and Chief Architect for the BellSouth Network until his retirement at the end of 2000. Prior to BellSouth, Dr. Kettler spent over 15 years at AT&T Bell Laboratories and in Strategic Planning at AT&T Corporate Headquarters. After his retirement from BellSouth he served a few years as Managing Director and General Partner of H.I.G. Capital Management. He has actively contributed to Computer Science & Telecommunications Board Committee Reports on the Internet and Broadband. Dr. Kettler also serves on the College of Computing Advisory Board of Georgia Institute of Technology and numerous research and economic development steering committees. He has proactively engaged university/industry activities, led numerous consortia projects and facilitated the technology transfer from research laboratories toward commercialization. Dr. Kettler is an IEEE Fellow. He earned his BEE, MSEE, and Ph.D.EE from the University of Virginia and is past Chairman of the ECE Industrial Advisory Board and the School of Engineering and Applied Sciences Academic Board.

**Mr. Zvi Slonimsky** became a member of our board of directors and served as our co-Chief Executive Officer following our merger with Floware in August 2001. Mr. Slonimsky is the chairman of Teledata, and New Era Biotech and board member of Sequans. He also provides telecom and information technology consultant through EIR ZS in Tel Aviv. From 2002 to 2005 he served as our sole Chief Executive Officer. Prior thereto he served as our President and Chief Operating Officer since May 1999. Mr. Slonimsky had been President and Chief Executive Officer of MTS Ltd., a company supplying add-on software to PBXs, since its inception in December 1995 as a spin off from C. Mer Industries until 1999. Mr. Slonimsky joined C. Mer in November 1992 as Vice President of its products division. Before joining C. Mer, he was the General Manager of Sorek Technology Center from September 1991 to November 1992. From 1989 to 1991, Mr. Slonimsky was the General Manager of DSPG Ltd., the Israeli-based subsidiary of DSPG, Inc. Prior to DSPG, he held various management positions in Tadiran Ltd., an Israeli communication equipment manufacturer. Mr. Slonimsky holds the B.Sc. and M.Sc. degrees in Electrical Engineering from the Technion and a M.B.A. degree from Tel-Aviv University.

**Mr. Tzvi Friedman** was appointed Alvarion's CEO and President in October 2005 and has been our director since July 2005. He joined Floware in October 2000 as its President and Chief Operating Officer and served in this capacity in Alvarion since our merger with Floware. From 1998 to 2000, Mr. Friedman served as Corporate Vice President and General Manager of the DCME division at ECI Telecom. From 1992 to 1996, Mr. Friedman served as vice president Marketing and Sales of ECI Telecom's SDH division. Mr. Friedman holds a B.Sc.E.E. summa cum laude in Electrical Engineering, a M.Sc.E.E. cum laude in Electrical Engineering from Tel Aviv University and a Sloan Program M.Sc.M. in Management from the London Business School.

**Ms. Dafna Gruber** has been our Chief Financial Officer since 1997 and was our controller from 1996 to 1997. From 1993 to 1996, Ms. Gruber was a controller at Lannet, a worldwide leading data communications company subsequently acquired by Lucent. Ms. Gruber is a certified public accountant in Israel since 1991 and holds a B.A. degree in Accounting and Economics from Tel Aviv University

**Ms. Efrat Makov** Joined Alvarion on March 1, 2007. Ms. Makov will assume the Chief Financial Officer responsibilities in late April, 2007. Ms. Makov has held management positions with three Israeli-based NASDAQ-listed companies, most recently as Chief Financial Officer at Aladdin Knowledge Systems Ltd. where she was responsible for the finance, operations, information systems and human resources functions from September 2005 through January 2007. From September 2002 through August 2005, she served as Corporate Controller and Vice President of Finance at Check Point Software Technologies Ltd. and from August 2000 through August 2002, as the Director of Finance for NUR Macroprinters Ltd. Prior to that, Ms. Makov spent seven years in public accounting with Arthur Andersen in New York, London and Tel Aviv. Ms. Makov is a Certified Public Accountant in Israel and the United States and holds a B.A. in Accounting and Economics from Tel Aviv University.

**Mr. Uzi Brier** joined Alvarion in July 2006 as President of the Broadband Mobile Unit. Most recently, Mr. Breier served as CEO of Optibase. Prior to Optibase, he served as CEO of Emblaze Semiconductor (part of the Emblaze Group). He also served as CEO of Ayeca and various senior positions at Flextronics and National Semiconductor in Israel and the United States. Mr. Breier holds two bachelors of science degrees in computer science and industrial engineering, both from New York Institute of Technology, as well as an MBA from San Jose State, completing all three with honors.

**Mr. Rudy Leser** was appointed our Corporate VP Strategy and Marketing in January 2006. Mr. Leser joined us in August 2000 upon the merger with Floware. Mr. Leser served as Floware's VP Strategy and Product Management and in January 2002 was appointed as our Vice President of Marketing. Mr. Leser joined Floware in August 2000 as Vice President of Business Development. Prior to joining Floware, Mr. Leser held various positions in the fields of marketing including strategic marketing director at Metalink. Mr. Leser holds the B.Sc. and M.Sc. degrees in Aerospace Engineering from the Technion Israel Institute for Technology.

**Mr. Avi Mazaltov** was appointed President, Operations and Infrastructure Division in January 2006. Mr. Mazaltov joined the company as Vice President of Operations in June 2002. Prior to joining Alvarion, Mr. Mazaltov held several positions at Teva Pharmaceuticals, including Pharmaceuticals Plant Manager and Solid Dosage Global Operations Director. Prior thereto Mr. Mazaltov held the position of Supply Chain Director at TFL, a subsidiary of Tadiran Ltd. Mr. Mazaltov has a B.Sc. degree in Industrial Engineering and Management from Ben-Gurion University.

**Mr. Avi Wellingstein** joined Alvarion in January 2006, as President of the Customers' Business Division. Prior to joining Alvarion, Mr. Wellingstein led the Comverse InSight Open Services Environment group as Vice President and Chief Commercial Officer, responsible for its worldwide business. His previous positions at Comverse included Corporate VP and Chief Procurement Officer. Before joining Comverse, Mr. Wellingstein filled the role of Vice President of Sales and Marketing of Orbotech Pacific. Mr. Wellingstein earned a B.Sc. degree in Engineering and an MBA in Information Technology and Marketing from Tel-Aviv University.

**Mr. Avinoam Barak** joined Alvarion at the end of 2005, and was appointed President of the Broadband Wireless Access Division in January 2006. In the 5 years prior to joining Alvarion, Mr. Barak served as General Manager of the Networking Business Unit in Radvision. Prior to joining Radvision, he served as a Communication Systems Business Unit Manager at MLM, a division of Israel Aircraft Industries, as well as various senior engineering and project management positions. Mr. Barak earned a B.Sc. degree in Computer Engineering from

the Technion Israel Institute for Technology, and an MBA in Information Systems and Finance from Bar Ilan University.

**Mr. Haim Srur** was appointed Vice President of Human Resources following our merger with Floware in August 2001. Prior thereto Mr. Srur served as Floware's VP Human Resources since December 2000. Prior to joining Floware Mr. Srur held the position of Human Resources Director of the R&D and Operations Divisions at Teva Pharmaceutical Industries. Prior to joining Teva, he worked as an independent consultant in human resources and organizational management to start-up companies. Mr. Srur holds a Masters degree in Organizational Sociology from Bar-Ilan University, Israel.

**Mr. Amir Tirosch** joined the Alvarion management team as Corporate VP of Corporate Development at the beginning of 2007, bringing with him over 10 years of experience in management and business development. Most recently, Mr. Tirosch served as the Corporate Vice President and General Manager of the Embedded Business Unit in M-Systems and as the Corporate Vice President of Corporate Business Development, leading all M&A, investment and strategic agreements of the company. Prior to M-Systems, Mr. Tirosch served as the Director of Corporate Business Development at Teva Pharmaceutical. Mr. Tirosch holds a Bachelors of Science degree in Industrial Management Engineering from the Technion Israel Institute of Technology and an MBA from Tel Aviv University.

**Greg Daily** joined Alvarion, Inc., Alvarion's North American subsidiary, in January 2006 and was named President in August 2006. Prior to Mr. Daily's current position, he was leading venture-backed private companies in general management and executive sales roles. He was most recently President and CEO of Pedestal Networks. Prior to Pedestal he worked for ten years at ADC Telecommunications, serving in various positions including General Manager of Transport Products division, General Manager of its Optical Networking Group, Group Vice-President of North American Sales and other sales management positions. Mr. Daily holds both Master and Bachelor of Science degrees in engineering management and electrical engineering from the University of Missouri at Rolla and is a graduate of the executive development program at the J.L. Kellogg Graduate School of Management at Northwestern University.

The terms of Messrs. Kettler, Slonimsky and Yacoby expire at our 2007 annual general meeting, the terms of Messrs. Friedman and Hanigel expire at our 2008 annual general meeting and the terms of Messrs. Maher, Barel and Eran expire at our 2009 annual general meeting. The terms of our external directors, Professor Amit and Ms. Hacke, expire in September 2009 and August 2007, respectively.

There are no family relationships between any of our directors and executive officers.

## **B. COMPENSATION OF DIRECTORS AND OFFICERS**

The aggregate direct labor costs associated with all of our directors and executive officers as a group (20 persons) for the year ended December 31, 2006 (including persons who served as directors or executive officers for only a portion of 2006, and whether or not serving as such as of December 31, 2006) was approximately \$3,534,000. This amount includes approximately \$ 300,400 which was set aside or accrued to provide pension, retirement, social security or similar benefits. The amount does not include amounts expended by us for vehicles made available to our officers, expenses, including business travel, professional and business association dues and expenses, reimbursements to directors and officers and other fringe benefits commonly reimbursed or paid by companies in Israel. Our directors who are not officers received an aggregate of approximately \$ 287,000 in compensation in 2006.

From time to time we grant options and awards under our equity incentive plans (described below) to our executive officers and directors.

Option grants to directors (including the chairman of our board of directors) who are not executive officers are made pursuant to an automatic option grant program. Each non-employee director who is elected or re-elected to our board of directors is granted upon his or her election or re-election, an option to purchase 10,000 ordinary shares per each year of the term for which he or she is elected or re-elected. The options vest in equal quarterly installments over the term of election or re-election, commencing at the end of the third month following the date of election or re-election. All options to our non-employee directors pursuant to the automatic option grant program are granted at an exercise price equal to 100% of the closing price of the ordinary shares on the NASDAQ Global Market on the on the last trading day immediately preceding the date of the election or re-election.

During 2006, we granted all of our directors and executive officers as a group (20 persons) options to purchase an aggregate of 460,000 of our ordinary shares at exercise prices ranging from \$5.37 to \$8.72, with expiration dates ranging from May 2012 to January 2016.

As of December 31, 2006, our directors and executive officers held outstanding options to purchase an aggregate of 4,697,330 ordinary shares, at exercise prices ranging from \$1.9 to \$15.4, with expiration dates ranging from January 2009 to January 2016.

## **C. BOARD PRACTICES**

### **Appointment of Directors and Terms of Officers**

Our board of directors currently consists of ten members. Under our articles of association, the board is to consist of between four and ten members. Our directors are elected by our shareholders at an annual general shareholders meeting. Our directors generally commence the terms of their office at the close of the annual general shareholders meeting at which they are elected and, other than our external directors, serve in office until the close of the third annual general shareholders' meeting following the meeting at which they are elected, and may be re-elected by the shareholders. Annual general shareholders' meetings are required to be held at least once every calendar year, but not more than fifteen months after the last preceding annual general shareholders' meeting. Until the next annual general shareholders' meeting, shareholders may elect new directors to fill vacancies in, or increase the number of the members of the board of directors in a special meeting of the shareholders. Our board of directors may appoint any person as a director temporarily to fill any vacancy created in the board of directors, except for vacancies of an external director. The terms of office of the directors, including compensation, must be approved, under the Israeli Companies Law, by the audit committee, the board of directors and the shareholders. The appointment and terms of office of all our executive officers are determined by our board of directors, the Compensation Nominating and Corporate Governance Committee or our CEO.

### **Service Contracts of Directors**

None of our directors has the right to receive any benefit upon termination of his or her office or any service contract he or she may have with us.

### **External Directors**

We are subject to the provisions of the Israeli Companies Law. Under the Israeli Companies Law, companies incorporated under the laws of Israel whose shares have been offered to the public in or outside of Israel are required to appoint a minimum of two directors who qualify as external directors under the Israeli Companies Law. At least one of the external directors is required to have "financial and accounting expertise"

(unless another member of the audit committee, who is an independent director under the NASDAQ Marketplace Rules, has "financial and accounting expertise") and any other external director must have "accounting and financial expertise" or "professional qualification," as such terms are defined by regulations promulgated under the Israeli Companies Law. This requirement does not apply to external directors appointed prior to January 2006. A person may not be appointed as an external director if the person or the person's relative, partner, employer or any entity under the person's control, has, as of the date of the person's appointment as external director, or had, during the preceding two years, any affiliation with the company, any entity controlling the company or any entity controlled by the company or by this controlling entity. The term affiliation includes:

- an employment relationship;
- a business or professional relationship maintained on a regular basis;
- control; and
- service as an office holder.

A person may not serve as an external director if that person's position or other business creates, or may create, a conflict of interest with the person's responsibilities as an external director or may adversely impact such person's ability to serve as an external director. Under the Israeli Companies Law, each committee of a company's board of directors is required to include at least one external director, except for the audit committee which requires that all external directors be members of such committee. The term of office of an external director is three years and may be extended for additional three year terms. The external directors must be elected by the majority of the shareholders in a general meeting, provided that either the shares voting in favor of the external director's election includes at least one-third of the shares of non-controlling shareholders or the total shares of non-controlling shareholders voted against the election does not represent more than one percent of the total voting rights in the company. Until the lapse of two years from his or her termination of office, a company may not engage a former external director to serve as an office holder and may not employ or receive professional services from that person, either directly or indirectly, including through an entity controlled by that person.

Currently Ms. Robin Hacke and Professor Raphael Amit qualify as our external directors under the Israeli Companies Law. Ms. Hacke's term will expire in August 2007, and Professor Amit's term will expire in September 2009. We have appointed the external directors to the committees of our board of directors as required by law.

### **Audit Committee**

Pursuant to the Israeli Companies Law, the board of directors of a public company must appoint an audit committee. The responsibilities of the audit committee include monitoring the management of the company's business and suggesting appropriate courses of action, as well as approving related party transactions, reviewing and recommending on board members compensation and other matters as required by law. The audit committee must be comprised of at least three directors, including all of the external directors. The audit committee may not include the chairman of the board, any director employed by the company or providing to the company services on a regular basis, or a controlling shareholder or his relative. Our audit committee assists the board of directors in fulfilling its responsibilities to ensure the integrity of our financial reports, serves as an independent and objective monitor of our financial reporting process and internal controls systems, including the activities of our independent auditor and internal audit function, and provides an open avenue of communication between the board of directors and the independent auditors, internal auditor and financial and executive management.

The members of our audit committee are Professor Amit, Ms. Hacke and Mr. Eran, each of whom is an independent director under the requirements of the Securities and Exchange Commission and NASDAQ. Professor Amit qualifies

as a financial expert for purposes of the rules of the Securities and Exchange Commission. As stated above, Ms. Hacke and Professor Amit qualify as external directors under the Israeli Companies Law.

### **Compensation, Nominating and Corporate Governance Committee**

The compensation, nominating and corporate governance committee of our board of directors, which consists of Mr. Maher, Dr. Barel, Professor Amit, and Dr. Kettler, assists the board of directors in carrying out its responsibilities relating to compensation of our top executive officers, including our Chief Financial Officer and Chief Executive Officer, and the setting of their respective goals, and in administering our share option plans and other issues relating to employee compensation. Our compensation, nominating and corporate governance committee is also responsible for recommending to the board of directors nominees for board membership and for reviewing and advising the board of directors on corporate governance issues.

### **Internal Auditor**

The Israeli Companies Law also requires the board of directors of a public company to appoint an internal auditor recommended by the audit committee. The role of the internal auditor is to examine, among other things, whether the company's acts comply with applicable law and orderly business procedure. The internal auditor may be an employee of the company but may not be an interested party or office holder, or a relative of any interested party or office holder, and may not be a member of the company's independent accounting firm or its representative. Our current internal auditor, Mr. Eyal Weitzman, has served in such role since February 2006.

### **Fiduciary Duties of Office Holders; Approval of Specified Related Party Transactions Under Israeli Law**

The Israeli Companies Law codifies the fiduciary duties that office holders, including directors and executive officers, owe to a company. An office holder's fiduciary duties consist of a duty of care and a duty of loyalty. The duty of care requires an office holder to act with the level of skill with which a reasonable office holder in the same position would have acted under the same circumstances. The office holder's duty of care includes a duty to use reasonable means to obtain information on the advisability of a given action brought for his approval or performed by him by virtue of his position, and all other significant information pertaining to those actions. The duty of loyalty requires an office holder to act in good faith and for the company's benefit, and includes avoiding any conflict of interest between the office holder's position in the company and any other position held by him or his personal affairs, avoiding any competition with the company, avoiding exploiting any business opportunity of the company in order to receive personal advantage for himself or others, and disclosing to the company any information or documents relating to the company's affairs that the office holder has received as a result of his position as an office holder. Each person listed in the table under "Directors and Senior Management" above is deemed to be an office holder under the Israeli Companies Law. Under the Israeli Companies Law, all arrangements as to compensation of office holders who are not directors require approval of the board of directors and, with respect to indemnification and insurance of these office holders, also require audit committee approval. Arrangements regarding the compensation of directors, as well as indemnification and/or insurance for directors, require each of the audit committee, board of directors and shareholder approvals.

### **Disclosure of Personal Interest**

The Israeli Companies Law requires that an office holder of a company promptly disclose any personal interest that he or she may have and all related material information known to him or her, in connection with any existing or proposed transaction by the company. This would include disclosure of a personal interest of the office holder's spouse, siblings, parents, grandparents, descendants, spouse's descendants, and their spouses, as well as of any corporation in which the office holder or his or her relative is a 5% or greater shareholder, director or general manager or in which he or she or his or her relative has the right to appoint at least one director or the general manager, but does not include a personal interest arising solely from the holding itself of shares of the company. Disclosure is not required if the transaction is not an extraordinary transaction, that is, a transaction other than in the ordinary course of business, otherwise than on market terms, or likely to have a material impact on the

company's profitability, assets or liabilities, and in which the office holder's personal interest results solely from the personal interest of his or her relative. Once the office holder complies with his or her disclosure requirement, if the transaction is not an extraordinary transaction, the Israeli Companies Law provides that only the approval of the board of directors is required unless the articles of association provide otherwise. Approval of these types of transactions is conditioned on the transaction not being adverse to the company's interest. If the transaction is an extraordinary transaction, then, in addition to any approval stipulated by the articles of association, it also must be approved by the company's audit committee and then by the board of directors. A director, who has a personal interest in a matter that is considered at a meeting of the board of directors or the audit committee, may generally not be present at this meeting or vote on this matter. However, a director may be present at a meeting of the board of directors or audit committee and participate in the vote despite having a personal interest in the transaction under consideration, if most of the directors or most of the members of the audit committee, as the case may be, have a personal interest in the transaction. If most of the directors have a personal interest in a transaction, the transaction also requires shareholders' approval.

### **Disclosure of Personal Interests of a Controlling Shareholder**

The Israeli Companies Law applies the same disclosure requirements to a controlling shareholder of a public company. A controlling shareholder is a shareholder who has the ability to direct the activities of a company, and may include a shareholder that holds 25% or more of the voting rights if no other shareholder owns more than 50% of the voting rights in the company. Subject to exceptions specified in regulations promulgated under the Israeli Companies Law, extraordinary transactions with a controlling shareholder or in which a controlling shareholder has a personal interest, and the terms of compensation of a controlling shareholder or his or her relative who is an office holder or employee, require the approval of the audit committee, the board of directors and a majority of the shareholders of the company in a general meeting, provided that either such majority include at least one-third of the shareholders who have no personal interest in the transaction and are present at the meeting, or the total shareholdings of those who have no personal interest in the transaction that vote against the transaction does not represent more than one percent of the total voting rights in the company. For information concerning the direct and indirect personal interests of certain of our office holders and principal shareholders in certain transactions with us, see "Item 7--Major Shareholders and Related Party Transactions--Related Party Transactions."

### **Duties of Shareholders**

In addition, under the Israeli Companies Law each shareholder has a duty to act in good faith in exercising his or her rights and fulfilling his or her obligations toward the company and other shareholders and to refrain from abusing any power he or she has in the company, such as in shareholder votes. In addition, certain shareholders have a duty of fairness toward the company, although such duty is not defined in the Israeli Companies Law. These shareholders include any controlling shareholder, any shareholder who knows that it possesses the power to determine the outcome of a shareholder vote and any shareholder who, pursuant to the provisions of the articles of association, has the power to appoint or to prevent the appointment of an office holder or any other power in regard to the company.

### **Exculpation, Insurance and Indemnification of Directors and Officers**

Our articles of association provide that, to the extent permitted by the Israeli Companies Law, we may indemnify our office holders for the following liabilities or expenses incurred by an office holder as a result of an act done by him/her in his/her capacity as an office holder: a financial liability imposed on him or her in favor of another person by a court judgment, including a settlement, judgment or an arbitrator's award approved by a court; reasonable costs of litigation, including attorney's fees, expended by our office holders as a result of an investigation or proceeding instituted against the office holders by a competent authority, provided that such

investigation or proceeding was concluded without the filing of an indictment against the office holders or the imposition of any financial liability in lieu of criminal proceedings, or was concluded without the filing of an indictment against the office holders and a financial liability was imposed on the office holders in lieu of criminal proceedings with respect to a criminal offense in which proof of criminal intent is not required; reasonable litigation expenses, including attorneys' fees, expended by an office holder or charged to him or her by a court, in a proceeding filed against him or her by the company or on its behalf or by another person, or in a criminal charge from which he or she was acquitted, or in a criminal charge of which he was convicted of a crime which does not require a finding of criminal intent.

The Israeli Companies Law and our articles of association provide that, subject to certain limitations, we may undertake to indemnify an office holder of the company retrospectively, and may also undertake in advance to indemnify an office holder of the company, provided the undertaking is limited to events which the Board believes can be anticipated at the time of such undertaking, in light of the company's activities as conducted at such time and is in an amount or based on criteria that the Board determines is reasonable under the circumstances and, provided, further, that such undertaking lists the events which the Board believes can be anticipated in light of the company's activities as conducted at such time, and the amount or based on criteria that the board determines is reasonable under the circumstances.

Our articles of association provide that, to the extent permitted by the Israeli Companies Law, we may obtain insurance to cover any liabilities imposed on our office holders as a result of an act done by him in his capacity as an office holder, in any of the following:

- a breach of his duty of care to us or to another person;
- a breach of his duty of loyalty to us, provided that he acted in good faith and had reasonable grounds to assume that his act would not harm us; or
- financial liability imposed upon him in favor of another person.

In addition, our articles of association provide that, to the extent permitted by the Israeli Companies Law, we may exculpate an office holder in advance from liability, in whole or in part, for damages resulting from a breach of his duty of care to us.

These provisions are specifically limited in their scope by the Israeli Companies Law, which provides that a company may indemnify or insure an office holder against a breach of duty of loyalty only to the extent that the office holder acted in good faith and had reasonable grounds to assume that the action would not prejudice the company. In addition, a company may not indemnify, insure or exculpate an office holder against a breach of duty of care if committed intentionally or recklessly (excluding mere negligence), or committed with the intent to derive an unlawful personal gain, or for a fine or forfeit levied against the office holder in connection with a criminal offense.

We have obtained directors and officers liability insurance for the benefit of our office holders.

Following approval by our audit committee, board of directors and shareholders, in 2001, 2004 and 2005, we entered into agreements with our office holders under which we undertook to indemnify and exculpate our office holders. In connection with our merger with Floware, we have also assumed similar agreements entered into between Floware and its officer holders. The indemnification agreements provide that we will indemnify an office holder for any expenses incurred by the office holder in connection with any claims (as these terms are defined in the agreements) that fall within one or more categories of indemnifiable events listed in the agreements, related to any act or omission of the office holder while serving as an office holder of our company (or serving or having served, at our request, as an employee, consultant, office holder or agent of any subsidiary of our company, or any

other corporation or partnership). In addition, under these agreements, we exempt and release our office holders from any and all liability to us related to any breach by them of their duty of care to us, to the maximum extent permitted by law.

#### **D. EMPLOYEES**

As of December 31, 2006, we had 941 employees of which 382 were engaged in research and development, 242 in operations, 241 in sales and marketing and 76 in administration and management. Of our full-time employees, as of December 31, 2006, 645 were located in Israel, 66 in the United States and 230 at our other branch offices, listed in Item 4C - Information on the Company - 'Organizational Structure'.

We consider our relations with our employees to be good and have never experienced any strikes or work stoppages. Substantially all of our employees have employment agreements and none are represented by a labor union.

We are subject to labor laws and regulations in Israel and in other countries where our employees are located. Although our Israeli employees are not parties to any collective bargaining agreement, we are subject to certain provisions of collective bargaining agreements among the Government of Israel, the General Federation of Labor in Israel and the Coordinating Bureau of Economic Organizations, including the Industrialists' Association, that are applicable to our Israeli employees by virtue of expansion orders of the Israeli Ministry of Labor and Welfare. Israeli labor laws are applicable to all of our employees in Israel. Those provisions and laws principally concern the length of the work day, minimum daily wages for workers, procedures for dismissing employees, determination of severance pay and other conditions of employment.

We contribute funds on behalf of our employees to an individual insurance policy known as Managers' Insurance. This policy provides a combination of savings plan, insurance and severance pay benefits to the insured employee. It provides for payments to the employee upon retirement or death and secures a substantial portion of the severance pay, if any, to which the employee is legally entitled upon termination of employment. Each participating employee contributes an amount equal to 5% of such employee's base salary, and we contribute between 13.3% and 15.8% of the employee's base salary. Full-time employees who are not insured in this way are entitled to a pension fund to which the employee contributes an amount ranging from 5% to 5.5% of such employee's base salary, and we contribute an amount ranging from 5% to 14.33% of the employee's base salary, or alternatively, to a savings account, to which the employee and the employer each make a monthly contribution of 5% of the employee's base salary. We also provide our employees with an Education Fund, to which each participating employee contributes an amount equal to 2.5% of the employee's base salary, and we contribute an amount of up to 7.5% of the employee's base salary. We also provide our employees with additional health insurance coverage for instances of severe illnesses.

Like all Israeli employers we are required to provide salary increases as partial compensation for increases in the Israeli consumer price index. The specific formula for such increases varies according to agreements reached among the Government of Israel, the Manufacturers' Association and the General Federation of Labor in Israel. Employees and employers also are required to pay predetermined sums, which include a contribution to provide a range of social security benefits.

#### **Management Employment Agreements**

We maintain written employment agreements with substantially all of our key employees. These agreements provide, among other matters, for monthly salaries, our contributions to Managers' Insurance and an Education Fund and severance benefits. All of our agreements with our key employees are subject to termination by either party upon the delivery of notice of termination as provided therein.

**E. SHARE OWNERSHIP**

The following table sets forth certain information as of April 1, 2007 for (i) each of our executive officers and directors that beneficially owns more than 1% of our outstanding ordinary shares, and (ii) our executive officers and directors as a group. The information in the table below is based on 61,919,561 ordinary shares outstanding as of April 1, 2007. Each of our outstanding ordinary shares has identical rights in all respects.

Name	Number of Ordinary Shares (1)	Percentage of Outstanding Ordinary Shares
Amnon Yacoby (2)	838,157	1.35%
Mr. Tzvika Friedman (3)	715,315	1.14%
All directors and executive officers as a group (20 Persons) (4)	3,711,696	5.73%

· The number of ordinary shares beneficially owned includes the shares issuable pursuant to options are exercisable within 60 days of April 1, 2007.

- (1) Shares issuable pursuant to such options are deemed outstanding for computing the percentage of the person holding such options or restricted share units but are not outstanding for computing the percentage of any other person.
- (2) Based on information provided by Mr. Yacoby and other information available to us. Includes options to purchase 152,030 of our ordinary shares which are exercisable within 60 days of April 1, 2007.
- (3) Consist of options to purchase 715,315 of our ordinary shares which are exercisable within 60 days of April 1, 2007.
- (4) Includes options to purchase 2,904,281 of our ordinary shares which are exercisable within 60 days of April 1, 2007.

None of our other directors and executive officers listed in Item 6.A held more than 1% of our outstanding shares as of April 1, 2007.

As of April 1, 2007, our directors and executive officers listed in Item 6.A above, as a group, held 4,434,530 options to purchase of our ordinary shares at a weighted average exercise price of \$6.91 with expiration dates ranging from January 2009 to January 2016. The voting rights of our directors and executive officers do not differ from the voting rights of other holders of our ordinary shares.

**Equity Incentive Plans**

As of December 31, 2006 a total of 26,498,651 ordinary shares have been reserved for issuance upon exercise of options granted to our employees, officers, directors and consultants pursuant to our share option plans. These ordinary shares have been reserved pursuant to our 2006 Global Share Based Incentive Plan, or 2006 Plan,

2002 Global Share Option Plan, or the 2002 Plan, Key Employee Share Incentive Plan (1994), as amended, Key Employee Share Incentive Plan (1996), Key Employee Share Incentive Plan (1997), 1999 U.S. Stock Option Plan, interWAVE's 1994 Stock Option Plan, interWAVE 1999 Stock Option Plan and Floware's Key Employee Share Incentive Plan (1996).

Options granted under the share option plans usually vest over a period of four years.

As of December 31, 2006, options to purchase 10,420,697 of our ordinary shares were outstanding under the share option plans, including options issued pursuant to the terms of the Floware merger and interWAVE amalgamation, at a weighted average exercise price of \$8.27 per share. Unless a shorter period is specified in the notice of grant or unless the applicable share option plan has an earlier termination date, each of the 10,420,697 options outstanding expire between six and ten years from the date of grant. As of December 31, 2006, options to purchase 1,917,214 of our ordinary shares were available for issuance under the share option plans,

As of December 28, 2005, 1,834,452 unvested out-of-the-money options with an exercise price higher than \$10 per share and related to the vesting period from January 1, 2006 through January 1, 2007 had been accelerated. The options were accelerated to reduce the expense impact in 2006 and beyond of a new accounting standard for stock based compensation. Because we have accounted for stock based compensation prior to January 1<sup>st</sup>, 2006 using the intrinsic value method prescribed in Accounting Principles Board (APB) No. 25, and because these options were priced above current market, the acceleration of vesting of these options did not require accounting recognition in our financial statements. However, the impact of the vesting acceleration on pro forma stock based compensation required to be disclosed in the financial statement footnotes under the provisions of SFAS No. 123, was an increase in compensation cost by approximately \$5.2 million (see note 2m to our financial statements).

In 2006, our board of directors, based on the recommendation of our Compensation Nominating and Corporate Governance Committee, adopted the 2006 Plan. Under the 2006 Plan, we may grant restricted share units, restricted shares, options and other equity awards to employees, directors, consultants, advisers and service providers of our company and its subsidiaries. Pursuant to the 2006 Plan, 1,500,000 ordinary shares were initially reserved for issuance upon the exercise of awards is granted under the 2006 Plan. The number of ordinary shares available for issuance under the 2006 Plan shall be reset annually on April 1 of each year to equal 4% of our total outstanding shares as of such reset date. As of December 31, 2006, options to purchase 1,313,567 of our ordinary shares were outstanding under the 2006 Plan.

The 2006 Plan was approved solely by our board of directors pursuant to NASDAQ rules permitting foreign private issuers to follow home country rules in such matters. According to Israeli Company Law, incentive plans as well as their underlying pool do not require shareholders' approval, with the exclusion of grants to board members, which requires shareholders' approval. At the same time the new plan was approved by our board of directors, the board set new guidelines for awarding options that take into consideration factors like option-related expensing requirements, potential dilution, employee retention as well as generally accepted guidelines and practices in the United States. The number of eligible employees was reduced significantly and actual grants to each employee were reduced compared to prior guidelines.

In connection with our acquisition of interWAVE, we assumed interWAVE's 1994 Stock Option Plan and 1999 Stock Option Plan (the options under which are referred to as the assumed options). Each assumed option to purchase interWAVE ordinary shares outstanding pursuant to interWAVE's Employee Stock Option Plan was converted into an option to purchase, on the same terms and conditions as applied to the interWAVE option, to a number of our ordinary shares equal to the number of interWAVE ordinary shares that the holder of such interWAVE option was entitled to acquire, multiplied by 0.2978056 ("the ratio"), at an exercise price per share equal to the former exercise price per share under the interWAVE option, divided by 0.2978. This ratio reflects the quotient obtained by dividing the per share consideration of interWAVE by our share price. For these purposes,

our share price means the average closing price of our ordinary shares on the NASDAQ over the five trading days up to and including the second trading day preceding the closing. Effective upon the closing of the acquisition of interWAVE, 25% of the unvested portion of any assumed interWAVE options accelerated and the remaining unvested options continued to vest according to the original vesting schedule. In connection with this, outstanding assumed options to purchase interWAVE ordinary shares were converted into options to purchase approximately 423,156 of our ordinary shares.

In addition, in connection with our merger with Floware, each option to purchase Floware ordinary shares outstanding pursuant to Floware's Employee Stock Option Plan was converted into an option to purchase, on the same terms and conditions as applied to the Floware option (subject to any applicable accelerated vesting or other provisions as were triggered in connection with the merger), a number of Alvarion ordinary shares equal to the number of Floware ordinary shares that the holder of such Floware option was entitled to acquire, multiplied by 0.767 (the exchange ratio in the merger), at an exercise price per share equal to the former exercise price per share under the Floware option, divided by 0.767. In connection with the merger, outstanding options to purchase Floware ordinary shares were converted into options to purchase approximately 5,230,469 of our ordinary shares.

The share option plans are administered by the board of directors which designates the optionees, dates of grant, vesting period and the exercise price of options. Each grantee is responsible for all personal tax consequences of the grant and exercise the options. Unless otherwise approved by our board of directors, employees usually may exercise vested options granted under the share option plans for a period of three months following the date of termination of their employment with us or any of our subsidiaries and options that have not vested on the date of termination expire. Under Israeli law, the issuance of options must be approved by our board of directors and issuance of options to directors must be approved by the shareholders.

**ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS**

**A. MAJOR SHAREHOLDERS**

As of April 1, 2007, we do not know of any person or entity who beneficially owns more than 5% of our outstanding ordinary shares.

Based on a review of the information provided to us by our transfer agent, as of April 1, 2007, there were 67 holders of record of our ordinary shares, including 61 holders of record with a United States mailing address, including banks, brokers and nominees. As of April 1, 2007, these 61 holders of record held approximately 59,412,731 ordinary shares representing approximately 96% of the aggregate 61,919,561 ordinary shares outstanding as of such date. Because these holders of record include banks, brokers and nominees (including one U.S. nominee company, CEDE & Co., which held approximately 96% of our outstanding ordinary shares as of such date), the beneficial owners of these ordinary shares may include persons who reside outside the United States.

To the best of our knowledge, we are not directly or indirectly owned or controlled by another corporation, by any foreign government or by any other natural or legal person or persons severally or jointly and currently there are no arrangements that may, at a subsequent date, result in a change in our control.

**B. RELATED PARTY TRANSACTIONS**

None.

**C. INTERESTS OF EXPERTS AND COUNSEL**

Not applicable.

## **ITEM 8. FINANCIAL INFORMATION**

### **A. CONSOLIDATED STATEMENTS AND OTHER FINANCIAL INFORMATION**

The Financial Statements required by this item are found at the end of this annual report, beginning on page F-1.

#### **Legal Proceedings**

On November 21, 2001, a purported Class Action (the "Action") lawsuit was filed against interWAVE, certain of its former officers and directors, and certain of the underwriters for interWAVE's initial public offering ("IPO"). On April 19, 2002, plaintiffs filed an amended complaint. The amended complaint alleges that the prospectus from interWAVE's IPO failed to disclose certain alleged improper actions by various underwriters for the offering, in violation of the Securities Act of 1933 and the Securities Exchange Act of 1934. Similar complaints have been filed concerning more than 300 other IPOs; all of these cases have been coordinated as In re Initial Public Offering Securities Litigation, 21 MC 92. On October 8, 2002, the Court entered an Order of Dismissal as to all of the individual defendants in the IPO litigation, without prejudice. A stipulation of Settlement (the "Settlement") has been submitted to the Court. On August 31, 2005, the Court granted preliminary approval of the Settlement. Under the Settlement, all claims against interWAVE would be dismissed in exchange for contingent payment guarantee by the insurance companies responsible for insuring interWAVE as an issuer. The settlement remains subject to certain conditions, including final Court approval. On April 24, 2006, the Court held a fairness hearing in connection with the motion for final approval of the Settlement. The Court has not yet issued a ruling on the motion for final approval. On December 5, 2006, the Court of Appeals for the Second Circuit reversed the Court's October 2004 order certifying a class in six test cases that were selected by the underwriter defendants and plaintiffs in the coordinated proceeding. interWAVE is not one of the test cases and it is unclear what impact, if any, this will have on interWAVE's case. If the Settlement is not achieved, the Company believes that it has meritorious defenses and intends to defend the Action vigorously. However, the litigation results can not be predicted at this point.

On January 19 and February 2, 2007, purported securities class action lawsuits were filed in the United States District Court for the Northern District of California, and on February 13 and March 9, 2007, purported securities class action lawsuits were filed in the United States District Court for the Southern District of New York. The four complaints are substantially identical. Each complaint names the Company as a defendant. The first three complaints also name as defendants one of the Company's officers and two of its directors, while the fourth complaint names two officers and only one director. Each complaint generally alleges violations of certain U.S. federal securities laws and seeks unspecified damages on behalf of a class of purchasers of Alvarion ordinary shares between November 3, 2004 and May 12, 2006. The plaintiffs allege, among other things, that the defendants made false and misleading statements concerning Alvarion's business prospects, purportedly violating Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 promulgated thereunder. The Company anticipates that these four complaints will be consolidated. The Company has not responded to the Complaints, and does not expect to respond until the Court appoints a lead plaintiff and the appointed lead plaintiff files a Consolidated Amended Complaint, which the Company anticipates will occur in the second or third quarter of 2007. The Company believes that it has meritorious defenses to the claims and intends to defend the action vigorously.

A lawsuit was filed by a former customer of interWAVE on December 8, 2004, for compensatory damages with respect to certain alleged damages caused by interWAVE actions in the amount of approximately \$4 million.

This claim has been dismissed on March 2006, following a settlement agreement according to which we paid back the \$3.1 million to the former customer.

Except as otherwise disclosed in this annual report, we are not a party to any material litigation or arbitration, either in Israel or any other jurisdiction, and we are not aware of any pending or threatened litigation or arbitration that would have a material adverse effect on our business, financial condition or results of operations.

### **Export Sales**

Export sales constitute a significant portion of our sales. In 2006, export sales were approximately \$180.7 million constituting approximately 99% of our total sales. For a more detailed discussion regarding the allocation of our revenues by geographic regions based on the location of our customers, see “Item 5--Operating and Financial Review and Prospects--Operating Results.”

### **Dividend Policy**

We have never declared or paid any cash dividend on our ordinary shares. We do not anticipate paying any cash dividend on our ordinary shares in the foreseeable future. We currently intend to retain all future earnings to finance operations and expand our business.

### **B. SIGNIFICANT CHANGES**

Except as otherwise disclosed in this annual report, no significant change has occurred since December 31, 2006.

**ITEM 9. THE OFFER AND LISTING****A. OFFER AND LISTING DETAILS**

The following table sets forth the high and low sales prices for our ordinary shares as reported by the NASDAQ Global Market in US\$ and as reported by the Tel Aviv Stock Exchange, in NIS, for each of the last five years.

<b><u>Year</u></b>	<b>NASDAQ Global Market</b>		<b>Tel Aviv Stock Exchange</b>	
	<b><u>High</u></b>	<b><u>Low</u></b>	<b><u>High</u></b>	<b><u>Low</u></b>
2002	\$4.05	\$ 1.64	NIS 18.04	NIS 8.54
2003	\$11.75	\$ 1.84	NIS 51.10	NIS 8.69
2004	\$17.15	\$ 8.50	NIS 74.30	NIS 41.47
2005	\$14.23	\$ 7.26	NIS 60.79	NIS 34.38
2006	\$10.96	\$ 4.92	NIS 49.71	NIS 22.46

The following table sets forth, for each of the full financial quarters in the years indicated, the high and low sales price for our ordinary shares as reported by the NASDAQ Global Market and as reported by the Tel Aviv Stock Exchange, in NIS:

<b><u>2005</u></b>	<b>NASDAQ Global Market</b>		<b>Tel Aviv Stock Exchange</b>	
	<b><u>High</u></b>	<b><u>Low</u></b>	<b><u>High</u></b>	<b><u>Low</u></b>
First Quarter	\$14.23	\$ 8.90	NIS 60.79	NIS 39.67
Second Quarter	\$11.82	\$ 7.87	NIS 52.39	NIS 36.26
Third Quarter	\$11.82	\$ 7.90	NIS 51.88	NIS 36.71
Fourth Quarter	\$9.51	\$ 7.26	NIS 44.16	NIS 34.38
<b><u>2006</u></b>	<b><u>High</u></b>	<b><u>Low</u></b>	<b><u>High</u></b>	<b><u>Low</u></b>
First Quarter	\$10.96	\$ 8.70	NIS 49.71	NIS 40.28
Second Quarter	\$9.23	\$ 5.94	NIS 42.95	NIS 27.19
Third Quarter	\$7.45	\$ 4.92	NIS 31.48	NIS 22.46
Fourth Quarter	\$7.80	\$ 6.18	NIS 33.19	NIS 26.83

The following table sets forth the high and low sales price for our ordinary shares as reported by the NASDAQ Global Market and the Tel Aviv Stock Exchange, in NIS, for the most recent six months:

<b><u>Month</u></b>	<b>NASDAQ Global Market</b>		<b>Tel Aviv Stock Exchange</b>	
	<b><u>High</u></b>	<b><u>Low</u></b>	<b><u>High</u></b>	<b><u>Low</u></b>
October 2006	\$ 7.75	\$ 6.18	NIS 33.50	NIS 26.60
November 2006	\$ 7.80	\$ 6.81	NIS 33.19	NIS 26.83
December 2006	\$ 7.29	\$ 6.50	NIS 30.43	NIS 27.28
January 2007	\$ 7.10	\$ 6.03	NIS 29.84	NIS 26.71

<u>Month</u>	<u>NASDAQ Global Market</u>		<u>Tel Aviv Stock Exchange</u>	
	<u>High</u>	<u>Low</u>	<u>High</u>	<u>Low</u>
	February 2007	\$ 8.49	\$ 6.38	NIS 35.61
March 2007	\$ 8.40	\$ 7.30	NIS 33.97	NIS 30.77
April 2007 (through April 25, 2007)	\$8.70	\$7.80	NIS 35.22	NIS 32.55

As of April 26, 2007, the exchange rate of the NIS to the US\$ was \$1 to NIS 4.014.

#### **B. PLAN OF DISTRIBUTION**

Not applicable.

#### **C. MARKETS**

Our ordinary shares began trading on the NASDAQ Global Market on March 23, 2000 under the symbol "BRZE." Prior to that date, there was no market for our ordinary shares. On August 1, 2001, upon the completion of our merger with Floware and the change of our name to Alvarion Ltd., our symbol was changed to "ALVR." On August 1, 2001, our ordinary shares also began to trade on the Tel Aviv Stock Exchange.

#### **D. SELLING SHAREHOLDERS**

#### **E. DILUTION**

Not applicable.

#### **F. EXPENSES OF THE ISSUE**

Not applicable.

**ITEM 10. ADDITIONAL INFORMATION**

**A. SHARE CAPITAL**

Not applicable.

**B. MEMORANDUM AND ARTICLES OF ASSOCIATION**

We are registered under the Israel Companies Law as a public company with the name Alvarion Ltd. and registration number 51-172231-6.

The following is a summary description of certain provisions of our memorandum of association and articles of association:

Our articles of association permit us to engage in any lawful business. Our purpose is to operate in accordance with business considerations to generate profits (provided, however, that we may donate reasonable amounts to worthy causes, as our board of directors may determine in its discretion, even if such donations are not within the framework of business considerations).

Our articles of association permit us to enter into a business transaction with any of the directors of our company or enter into a business transaction with a third party in which a director has a personal interest, subject to compliance with the Israeli Companies Law. See “Item 6--Directors, Senior Management and Employees--Board Practices.”

Directors who do not hold other positions in our company and who are not external directors may not receive any compensation from our company, unless such compensation is approved by our shareholders, subject to applicable law.

Our board of directors may, from time to time, in its discretion, cause us to borrow or secure the payment of any sum or sums of money for our purposes, on such terms and conditions as it deems appropriate.

Our authorized share capital consists of 85,080,000 ordinary shares, par value NIS 0.01 per share.

Shareholders are entitled to receive dividends or bonus shares, upon the recommendation of our board of directors and resolution of our shareholders. The shareholders entitled to receive dividends or bonus shares are those who are registered in the shareholders register on the date of the resolution approving the distribution or allotment, or on such later date, as may be determined in such resolution. Any right to a declared dividend by us to our shareholders terminates after seven years from our declaration of the dividend if such dividend has not been claimed by the shareholder within such time. After seven years the unclaimed dividend will revert back to us.

Every shareholder has one vote for each share held by such shareholder of record. With certain exceptions, no shareholder is entitled to vote at any general meeting (or be counted as a part of the lawful quorum thereat), unless all calls and other sums then payable in respect of his shares have been paid.

A shareholder seeking to vote with respect to a resolution that requires that the majority of such resolution's adoption include at least a certain percentage of all those not having a personal interest (as defined in the Israeli Companies Law) in it, must notify us at least two business days prior to the date of the general meeting,

whether or not he has a personal interest in the resolution, as a condition for his right to vote and be counted with respect to such resolution.

Upon our liquidation, the liquidator, with the approval of a general meeting of the shareholders, may distribute all or part of the property to our shareholders, and may deposit any part of such property with trustees in favor of the shareholders, as deemed appropriate by the liquidator.

Rights attached to our ordinary shares, may be modified or abrogated by a resolution adopted at a general meeting of the shareholders by more than 50% of the issued shares of such a class, or an “ordinary majority,” other than certain rights relating to the election of directors that may be modified or abrogated only with the approval of more than 75% of the shareholders who are entitled to vote at the meeting.

An annual general meeting of our shareholders, or “annual meeting,” must be held once in every calendar year, within a period of not more than 15 months from the preceding annual meeting, either within or outside of Israel. All general meetings of our shareholders other than annual meetings are called “extraordinary meetings.” Our board of directors has discretion over when to convene an extraordinary meeting. However, our board of directors must convene an extraordinary meeting upon demand by the lesser number of: (i) any two directors of our company; or a quarter of the directors of our company, whichever is lower; or (ii) upon the demand of one or more shareholders holding alone or together at least (A) five percent of the issued share capital of our company and one percent of the voting rights or (B) five percent of the voting rights. Our board of directors, upon demand to convene an extraordinary meeting, is required to announce the convening of the general meeting within 21 days from the receipt of the demand, provided, however, that the date fixed for the extraordinary meeting may not be more than 35 days from the publication date of the announcement of the extraordinary meeting, or such other period as may be permitted by the Israeli Companies Law or the regulations thereunder.

Directors, other than external directors, are elected, unless specifically determined otherwise, until the third annual general shareholders’ meeting following the meeting at which such directors were elected. Any director may be removed from his office by way of a resolution adopted by the vote of the holders of 75% of the voting power represented at a meeting.

The shareholders who are entitled to participate and vote at a general meeting are those shareholders who are registered in our shareholders register on the date determined by our board of directors, provided that such date not be more than 40 days, nor less than 21 days, prior to the date of the general meeting, except as otherwise permitted by the regulations under the Israeli Companies Law. Shareholders entitled to attend a general meeting are entitled to receive notice of such meeting at least 21 days prior to the date fixed for such meeting, unless a shorter period is permitted by law.

There are no limitations imposed by our Articles of Association or the Israeli Companies Law on the right to own our shares including the rights of non-resident or foreign shareholders to hold or exercise voting rights of our shares, except with respect to subjects of countries which are in a state of war with Israel.

Certain provisions of Israeli corporate and tax law may have the effect of delaying, preventing or making more difficult a merger or other acquisition of our company, as detailed in “Item 3--Key Information--Risk Factors--Risks Relating to Our Location in Israel”. Provisions of Israeli law may delay, prevent or make difficult a merger with or an acquisition of us, which could prevent a change of control and therefore depress the market price of our ordinary shares.

The information contained under the heading “Description of Ordinary Shares” in our Registration Statement on Form F-1 (Registration Number 333-11572) is incorporated herein by reference.

Our transfer agent and registrar is the American Stock Transfer & Trust Co. at address 59 Maiden Lane, New York, NY 10038.

### **C. MATERIAL CONTRACTS**

On November 21, 2006, we entered into an agreement with LGC Wireless, Inc. to sell substantially all the assets comprising our CMU business to LGC Wireless, Inc. in exchange for promissory and convertible notes and the assumption of certain liabilities. The notes are due on December 31, 2007 and 2008 and are in the aggregate amount of \$15.0 million.

Except as otherwise disclosed in this annual report, we did not enter into any other material contracts.

### **D. EXCHANGE CONTROLS**

Israeli law and regulations do not impose any material foreign exchange restrictions on non-Israeli holders of our ordinary shares.

Dividends, if any, paid to our shareholders, and any amounts payable upon our dissolution, liquidation or winding up, as well as the proceeds of any sale in Israel of our ordinary shares to an Israeli resident, may be paid in non-Israeli currency or, if paid in Israeli currency, may be converted into freely repatriable U.S. dollars at the rate of exchange prevailing at the time of conversion.

However legislation remains in effect pursuant to which currency controls can be imposed by administrative action at any time.

### **E. TAXATION**

#### **General**

The following is a discussion of Israeli and United States tax consequences material to our shareholders. To the extent that the discussion is based on new tax legislation that has not been subject to judicial or administrative interpretation, the views expressed in the discussion might not be accepted by the tax authorities in question. The discussion is not intended, and should not be construed, as legal or professional tax advice and does not exhaust all possible tax considerations.

Holders of our ordinary shares should consult their own tax advisors as to the United States, Israeli or other tax consequences of the purchase, ownership and disposition of ordinary shares, including, in particular, the effect of any foreign, state or local taxes.

## **Israeli Taxation**

The following is a summary of the principal tax laws applicable to companies in Israel, with special reference to their effect on us, and certain Israeli Government programs benefiting us. This section also contains a discussion of certain Israeli tax consequences to persons acquiring ordinary shares. This summary does not discuss all the acts of Israeli tax law that may be relevant to a particular investor in light of his or her personal investment circumstances or to certain types of investors subject to special treatment under Israeli law, such as traders in securities or persons that own, directly or indirectly, 10% or more of our outstanding voting share capital. To the extent that the discussion is based on new tax legislation which has not been subject to judicial or administrative interpretation, there can be no assurance that the views expressed in this discussion will be accepted by the tax authorities. This discussion should not be construed as legal or professional tax advice and is not exhaustive of all possible tax considerations.

Potential investors are urged to consult their own tax advisors as to the Israeli or other tax consequences of the purchase, ownership and disposition of ordinary shares, including, in particular, the effect of any foreign, state or local taxes.

## **General Corporate Tax Structure**

Generally, Israeli companies are subject to corporate tax at the rate of 31% on taxable income and are subject to real capital gains tax at a rate of 25% on capital gains (other than gains derived from the sale of listed securities that are taxed at the prevailing corporate tax rates) derived after January 1, 2003. The corporate tax rate was reduced in June 2004, from 36% to 35% for the 2004 tax year, 34% for the 2005 tax year, 31% for the 2006 tax year, 29% for the 2007 tax year, 27% for the 2008 tax year, 26% for the 2009 tax year and 25% for the 2010 tax year and thereafter. However, the effective tax rate payable by a company that derives income from an approved enterprise (as discussed below) may be considerably less.

## ***Tax Benefits under the Law for the Encouragement of Industry (Taxes), 1969***

We currently qualify as an “Industrial Company” pursuant to the Law for the Encouragement of Industry (Taxes), 1969 (the “Industry Encouragement Law”). A company qualifies as an “Industrial Company” if it is resident in Israel and at least 90% of its income in a given tax year, determined in NIS (exclusive of income from certain specified sources), is derived from Industrial Enterprises owned by that company. An “Industrial Enterprise” is defined as an enterprise whose major activity in a particular tax year is industrial manufacturing activity. Industrial Companies are entitled to the following preferred corporate tax benefits, among others:

- Deduction of purchases of know-how and patents over an eight-year period for tax purposes;
- Right to elect, under specified conditions, to file a consolidated tax return with additional related Israeli Industrial Companies;
  - Accelerated depreciation rates on equipment and buildings; and
- Deductions over a three-year period of expenses involved with the issuance and listing of shares on the Tel Aviv Stock Exchange or, on or after January 1, 2003, on a recognized stock market outside of Israel.

Eligibility for benefits under the Industry Encouragement Law is not contingent upon the approval of any Government agency. No assurance can be given that we will continue to qualify as an Industrial Company, or will be able to avail us of any benefits under the Industry Encouragement Law in the future.

## **Law for the Encouragement of Capital Investments, 1959**

### *Tax benefits prior March 2005 Amendment*

The Law for Encouragement of Capital Investments, 1959, which is referred to below as the Capital Investments Law, provides that capital investments in a production facility or other eligible assets may, upon application to the Israeli Investment Center of the Ministry of Industry and Commerce, be designated as an "Approved Enterprise." Each certificate of approval for an Approved Enterprise relates to a specific investment program in the Approved Enterprise, delineated both by the financial scope of the investment and by the physical characteristics of the facility or the asset. An Approved Enterprise is entitled to certain benefits, including Israeli Government cash grants, state-guaranteed loans and tax benefits.

### **Tax Benefits**

Taxable income derived from an Approved Enterprise under the Capital Investments Law grants program is subject to a reduced corporate tax rate of 25%. That income is eligible for further reductions in tax rates depending on the percentage of the foreign investment in our share capital. The tax rate is 20% if the foreign investment is 49% or more but less than 74%, 15% if the foreign investment is 74% or more but less than 90%, and 10% if the foreign investment is 90% or more. The lowest level of foreign investment during the year will be used to determine the relevant tax rate for that year. These tax benefits are granted for a limited period not exceeding seven years, or 10 years for a company whose foreign investment level exceeds 25%, from the first year in which the Approved Enterprise has taxable income, after the year in which production commenced (as determined by the Israeli Investment Center of the Ministry of Industry and Commerce, or the Investment Center). The period of benefits may in no event, however, exceed the lesser of 12 years from the year in which the production commenced (as determined by the Investment Center) or 14 years from the year of receipt of Approved Enterprise status.

An Approved Enterprise may elect to forego any entitlement to the grants otherwise available under the Capital Investments Law and, in lieu of the foregoing, may participate in an Alternative Benefits Program. Under the Alternative Benefits Program, a company's undistributed income derived from an Approved Enterprise will be exempt from company tax for a period of between two and ten years from the first year of taxable income, depending on the geographic location of the Approved Enterprise within Israel, and the company will be eligible for a reduced tax rate of 10%-25% for the remainder of the benefits period. There can be no assurance that the current benefit programs will continue to be available or that we will continue to qualify for benefits under the current programs.

### *Tax benefits Subsequent to the March 2005 Amendment*

In March 2005, the government of Israel passed an amendment to the Investment Law in which it revised the criteria for investments qualified to receive tax benefits as an Approved Enterprise. Among other things, companies that meet the criteria of the alternate package of tax benefits will receive those benefits without prior approval. We believe that our capital investments qualify to receive tax benefits as an Approved Enterprise, however no assurance can be given that such investments will be approved as in fact qualifying for such tax benefits by the Israeli tax authorities. Additionally, no assurance can be given that we will, in the future, be eligible to receive additional tax benefits under this law. See "Risk Factors, and specifically - *" if we fail to comply with these conditions in the future, the tax benefits received could be canceled and we could be required to pay increased taxes in the future. We could also be required to refund tax benefits, with interest and adjustments for inflation based on the Israeli consumer price index" and "We currently contemplate that a portion of our products will be manufactured outside of Israel. This could materially reduce the tax benefits to which we would otherwise*

*be entitled. We cannot assure you that the Israeli tax authorities will not adversely modify the tax benefits that we could have enjoyed prior to these events.*” for a discussion of the risks our business and prospects for growth face in connection with Tax benefits under Israeli law.

We currently have Approved Enterprise programs under the Capital Investments Law, which to our belief, entitle us to certain tax benefits. The tax benefit period for these programs has not yet commenced. We have elected the Alternative Benefits Program which provides for the waiver of grants in return for tax exemption. Accordingly, our income is tax exempt for a period of two years commencing with the year we first earn taxable income relating to each expansion program, and is subject to corporate taxes at the reduced rate of 10% to 25%, for an additional period of five years to eight years, depending on the percentage of the company’s ordinary shares held by foreign shareholders in each taxable year. The exact rate reduction is based on the percentage of foreign ownership in each tax year. See note 12 to our consolidated financial statements. A company that has elected to participate in the Alternative Benefits Program and that subsequently pays a dividend out of the income derived from the Approved Enterprise during the tax exemption period will be subject to corporate tax in respect of the gross amount distributed, including withholding tax thereon, at the rate that would have been applicable had the company not elected the Alternative Benefits Program, ranging from 10% to 25%. The dividend recipient is subject to withholding tax at the reduced rate of 15%, applicable to dividends from Approved Enterprises if the dividend is distributed within 12 years after the benefits period. The withholding tax rate will be 25% after such period. In the case of a company with over 25% foreign investment level, as defined by law, the 12-year limitation on reduced withholding tax on dividends does not apply. This tax should be withheld by the company at the source, regardless of whether the dividend is converted into foreign currency. See “Withholdings and Capital Gains Taxes Applicable to Non-Israeli Shareholders.”

From time to time, the Israeli Government has discussed reducing the benefits available to companies under the Capital Investments Law. The termination or substantial reduction of any of the benefits available under the Capital Investments Law could materially impact the cost of our future investments.

The benefits available to an Approved Enterprise are conditional upon the fulfillment of certain conditions stipulated in the Capital Investments Law and its regulations and the criteria set forth in the specific certificate of approval, as described above. In the event that these conditions are violated, in whole or in part, we would be required to refund the amount of tax benefits, together with linkage differences to the Israeli CPI and interest. We believe that our Approved Enterprise programs operate in compliance with all such conditions and criteria.

#### **Foreign investor’s Company (“FIC”)**

A company that has an approved enterprise program is eligible for further tax benefits if it qualifies as a foreign investors’ company. A foreign investors company is a company of which more than 25% of its share capital and combined share and loan capital is owned by non-Israeli residents. A company that qualifies as a foreign investors’ company and has an approved enterprise program is eligible for tax benefits for a ten-year benefit period. As specified above, depending on the geographic location of the approved enterprise within Israel, income derived from the approved enterprise program may be entitled to the following:

- Exemption from tax on its undistributed income up to ten years.

- An additional period of reduced corporate tax liability at rates ranging between 10% and 25%, depending on the level of foreign (i.e., non-Israeli) ownership of our shares.
- The twelve years limitation period for reduced tax rate of 15% on dividend from the approved enterprise does not apply to Foreign Investor's Company.

#### Measurement of Taxable Income

Results for tax purposes are measured in real terms, in accordance with the changes in the Israeli Consumer Price Index, or changes in exchange rate of the NIS against the dollar, for a "foreign investors" company. Until taxable year 2002, we measured our results for tax purposes in accordance with changes in the Israeli consumer price index. Commencing with taxable year 2003, we have elected to measure our results for tax purposes on the basis of the changes in the exchange rate of NIS against the dollar.

#### Tax Benefits of Research and Development

Israeli tax law permits, under certain conditions, a tax deduction in the year incurred for expenditures, including capital expenditures, in scientific research and development projects, if the expenditures are approved by the relevant government ministry, determined by the field of research, and if the research and development is for the promotion of the enterprise and is carried out by, or on behalf of, a company seeking such deduction. Expenditures not so approved are deductible over a three year period; however, expenditures made out of proceeds made available to us through government grants are not deductible.

#### Withholding and Capital Gains Taxes Applicable to Non-Israeli Shareholders

Nonresidents of Israel are subject to income tax on income accrued or derived from sources in Israel. These sources of income include passive income such as dividends, royalties and interest, as well as non-passive income from services rendered in Israel. We are generally required to withhold income tax at the rate of 25% on all distributions of dividends, although, with respect to U.S. taxpayers, if the dividend recipient holds 10% or more of our voting stock for a certain period prior to the declaration and payment of the dividend, we are only required to withhold at a 12.5% rate. Notwithstanding the foregoing, with regard to dividends generated by an Approved Enterprise, we are required to withhold income tax at the rate of 15%.

Israeli law generally imposes a capital gains tax on the sale of publicly traded securities. Pursuant to changes made to the Israeli Income Tax Ordinance in January 2006, capital gains on the sale of our ordinary shares will be subject to Israeli capital gains tax, generally at a rate of 20% unless the holder holds 10% or more of our voting power during the 12 months preceding the sale, in which case it will be subject to a 25% capital gains tax. However, as of January 1, 2003, nonresidents of Israel are exempt from capital gains tax in relation to the sale of our ordinary shares for so long as (a) our ordinary shares are listed for trading on a stock exchange outside of Israel, (b) the capital gains are not accrued or derived by the nonresident shareholder's permanent enterprise in Israel, (c) the ordinary shares in relation to which the capital gains are accrued or derived were acquired by the nonresident shareholder after the initial listing of the ordinary shares on a stock exchange outside of Israel, and (d) neither the shareholder nor the particular capital gain is otherwise subject to certain sections of the Israeli Income Tax Ordinance. As of January 1, 2003, nonresidents of Israel are also exempt from Israeli capital gains tax resulting from the sale of securities on the Tel Aviv Stock Exchange; provided that the capital gains are not accrued or derived by the nonresident shareholder's permanent enterprise in Israel.

In addition, under the income tax treaty between the United States and Israel, a United States resident holder of ordinary shares which are not listed for trading on a stock exchange outside of Israel will be exempt from

Israeli capital gains tax on the sale, exchange or other disposition of such ordinary shares unless the holder owns, directly or indirectly, 10% or more of our voting power during the 12 months preceding such sale, exchange or other disposition.

A nonresident of Israel who receives interest, dividend or royalty income derived from or accrued in Israel, from which tax was withheld at the source, is generally exempt from the duty to file tax returns in Israel with respect to such income, provided such income was not derived from a business conducted in Israel by the taxpayer.

Israel presently has no estate or gift tax.

### **United States Federal Income Tax Considerations with Respect to the Acquisition, Ownership and Disposition of Our Ordinary Shares**

The following is a discussion of certain United States federal income tax consequences applicable to “U.S. Holders” (as defined below) who beneficially own our ordinary shares. The discussion is based on the Internal Revenue Code of 1986, as amended, or the Code, applicable U.S. Treasury Regulations promulgated thereunder, and existing administrative rulings and court decisions in effect as of the date of this annual report, all of which are subject to change at any time, possibly with retroactive effect. For purposes of this discussion, it is assumed that U.S. Holders of our ordinary shares hold such stock as a capital asset within the meaning of Section 1221 of the Code, that is, generally for investment. This discussion does not address all aspects of United States federal income taxation that may be relevant to a particular U.S. Holder of our ordinary shares in light of his or her circumstances or to a U.S. Holder of our ordinary shares subject to special treatment under United States federal income tax law, including, without limitation:

- banks, other financial institutions, “financial services entities,” insurance companies or mutual funds;
- broker-dealers, including dealers in securities or currencies, or taxpayers that elect to apply a mark-to-market method of accounting;
- shareholders who hold our ordinary shares as part of a hedge, straddle, or other risk reduction, constructive sale or conversion transaction;
  - tax-exempt entities;
  - persons who have a functional currency other than the U.S. dollar;
  - taxpayers that are subject to the alternative minimum tax provisions of the Code;
- persons who have owned at any time or who own, directly, indirectly, constructively or by attribution, ten percent or more of the total voting power of our share capital;
  - grantor trusts;
  - certain expatriates or former long-term residents of the United States; and
- shareholders who acquired our ordinary shares pursuant to the exercise of an employee stock option or right or otherwise as compensation.

In addition, not discussed is the application of : (i) foreign, state or local tax laws on the ownership or disposition of our ordinary shares; (ii) United States federal and state estate and/or gift taxation; or (iii) the alternative minimum tax.

If a partnership (or any entity treated as a partnership for U.S. Federal Income Tax purposes) holds ordinary shares, the tax treatment of the partnership and a partner in such partnership will generally depend on the activities of the partnership. Such a partner or partnership should consult its tax advisor as to its tax consequences.

As used in this section, the term “U.S. Holder” refers to any beneficial owner of our ordinary shares that is any of the following:

- an individual who is a citizen or resident of the United States for United States federal income tax purposes;
- a corporation (or other entity treated as a corporation for United States federal income tax purposes) created or organized in the United States or under the laws of the United States, any State or political jurisdiction thereof, or the District of Columbia;
- an estate the income of which is includible in gross income for United States federal income tax purposes regardless of its source;
- a trust (i) if a court within the United States is able to exercise primary supervision over the administration of the trust and one or more United States persons have the authority to control all of such trust’s substantial decisions; or (ii) that has in effect a valid election under applicable U.S. Treasury Regulations to be treated as a U.S. person.

Certain aspects of U.S. federal income tax relevant to a holder of our ordinary shares that is not a U.S. Holder (a “Non-U.S. Holder”) are also discussed below.

**Each holder of our ordinary shares is advised to consult his or her own tax advisor with respect to the specific tax consequences to him or her of purchasing, holding or disposing of our ordinary shares, including the applicability and effect of federal, state, local and foreign income and other tax laws to his or her particular circumstances.**

#### *Distributions*

Subject to the discussion below under the heading “Passive Foreign Investment Company Status,” to the extent paid out of our current or accumulated earnings and profits, as determined under United States federal income tax principles, a distribution made with respect to our ordinary shares (including the amount of any non-U.S. withholding tax thereon) will be includible for United States federal income tax purposes in the income of a U.S. Holder as a taxable dividend. Dividends that are received by U.S. Holders that are individuals, estates or trusts will be taxed at the rate applicable to long-term capital gains (a maximum rate of 15%), provided that such dividends meet the requirement of “qualified dividend income” as defined by the Code. Dividends that fail to meet such requirements, and dividends received by corporate U.S. Holders, are taxed at ordinary income rates. No dividend received by a U.S. Holder will be a qualified dividend (1) if the U.S. Holder held the ordinary share with respect to which the dividend was paid for less than 61 days during the 121-day period beginning on the date that is 60 days before the ex-dividend date with respect to such dividend, excluding for this purpose, under the rules of Code section 246(c), any period during which the U.S. Holder has an option to sell, is under a contractual obligation to sell, has made and not closed a short sale of, is the grantor of a deep-in-the-money or otherwise nonqualified option to buy, or has otherwise diminished its risk of loss by holding other positions with respect to, such ordinary share (or substantially identical securities) or (2) to the extent that the U.S. Holder is under an obligation (pursuant to a short sale or otherwise) to make related payments with respect to positions in property substantially similar or related to the ordinary share with respect to which the dividend is paid. If we were to be a “passive foreign investment company” (as such term is defined in the Code), or PFIC, for any year, dividends paid on our ordinary shares in such year or in the following year would not be qualified dividends. In addition, a non-corporate U.S. Holder will be able to take a qualified dividend into account in determining its deductible investment interest (which is generally limited to its net investment income) only if it elects to do so; in such case the dividend will be taxed at ordinary income rates.

To the extent that a distribution exceeds our earnings and profits and provided that we were not a PFIC, such distribution will be treated as a non-taxable return of capital to the extent of the U.S. Holder's adjusted basis in our ordinary shares and thereafter as taxable capital gain. Dividends paid by us generally will not be eligible for the dividends received deduction allowed to corporations under the Code. Dividends paid in a currency other than the U.S. dollar will be includible in income of a U.S. Holder in a U.S. dollar amount based on the spot rate of exchange on the date the distribution is included in income, without reduction for any non-U.S. taxes withheld at source, regardless of whether the payment is in fact converted into U.S. dollars on such date. A U.S. Holder who receives a foreign currency distribution and converts the foreign currency into U.S. dollars subsequent to receipt will have foreign exchange gain or loss, based on any appreciation or depreciation in the value of the foreign currency against the U.S. dollar, which will generally be U.S. source ordinary income or loss.

Subject to certain conditions and limitations set forth in the Code (including certain holding period requirements), U.S. Holders generally will be able to elect to claim a credit against their United States federal income tax liability for any non-U.S. withholding tax deducted from dividends received in respect of our ordinary shares. For purposes of calculating the foreign tax credit, dividends paid on our ordinary shares generally will be treated as income from sources outside the United States and constitute foreign source "passive income" for U.S. foreign tax purposes (or in the case of a financial services entity, "financial services income" (and for tax years beginning after December 31, 2006, as "general category income")). In lieu of claiming a tax credit, U.S. Holders may instead claim a deduction for foreign taxes withheld, subject to certain limitations.

**The rules relating to the determination of the amount of foreign income taxes that may be claimed as foreign tax credits are complex and U.S. Holders should consult their tax advisors to determine whether and to what extent a credit would be available.**

#### *Disposition of the Ordinary Shares*

Subject to the discussion below under the heading "Passive Foreign Investment Company Status," upon the sale, exchange or other disposition of our ordinary shares, a U.S. Holder generally will recognize gain or loss for United States federal income tax purposes in an amount equal to the difference between the U.S. dollar value of the amount realized on the disposition of our ordinary shares and the U.S. Holder's adjusted tax basis in our ordinary shares, which is usually the U.S. dollar cost of the ordinary shares. Such gain or loss generally will be long-term capital gain or loss if our ordinary shares have been held for more than one year on the date of the disposition. Non-corporate U.S. Holders are currently subject to a reduced rate of taxation on long-term capital gains (15% for taxable years beginning on or before December 31, 2010). The deductibility of a capital loss recognized on the sale or exchange of ordinary shares is subject to limitations. Any gain or loss generally will be treated as United States source income or loss for United States foreign tax credit purposes. In addition, a U.S. Holder who receives foreign currency upon the sale or exchange of our ordinary shares and converts the foreign currency into U.S. dollars subsequent to receipt will have foreign exchange gain or loss, based on any appreciation or depreciation in the value of the foreign currency against the U.S. dollar, which will generally be United States source ordinary income or loss.

#### *Passive Foreign Investment Company Status*

Generally a non-U.S. corporation is treated as a PFIC for United States federal income tax purposes if either:

- 75% or more of its gross income (including the pro rata share of gross income of any company (U.S. or foreign) of which such corporation is considered to own 25% or more of the ordinary shares by value) for the taxable year is passive income; or

- 50% or more of its gross assets (including its pro rata share of the assets of any company in which such corporation is considered to own 25% or more of the ordinary shares by value) during the taxable year computed on a quarterly average basis produce or are held for the production of passive income.

As a result of the combination of our substantial holdings of cash, cash equivalents and securities and the decline in the market price of our ordinary shares from its historical highs, there is a risk that we could be classified as a PFIC, for United States federal income tax purposes. Based upon our market capitalization during 2004, 2005 and 2006 and each year prior to 2001, we do not believe that we were a PFIC for any such year and an independent valuation of our assets as of the end of each quarter of 2001 and based upon our valuation of our assets for 2002 and 2003, we do not believe that we were a PFIC for 2001, 2002 or 2003 despite the relatively low market price of our ordinary shares during much of those years. We cannot assure you, however, that the United States Internal Revenue Service ("IRS") or the courts would agree with our conclusion if they were to consider our situation. There is no assurance that we will not become a PFIC in a subsequent year.

If we were deemed to be a PFIC for any taxable year during which a U.S. Holder held our shares and such holder failed to make either a "QEF election" or a "mark-to-market election" (as described below) for the first taxable year during which we were a PFIC and the U.S. Holder held our shares:

- gain recognized (including gain deemed recognized if our ordinary shares are used as security for a loan) by the U.S. Holder upon the disposition of, as well as income recognized upon receiving certain "excess distributions" in respect of, our ordinary shares would be taxable as ordinary income;
- the U.S. Holder would be required to allocate such distribution and/or disposition gain ratably over such holder's entire holding period for our ordinary shares; the U.S. Holder's income for the current taxable year would include (as ordinary income) amounts allocated to the current year, i.e., the year of the distribution or disposition, and to any period prior to the first day of the first taxable year for which we were a PFIC;
- the amount allocated to each year other than (i) the year of the distribution or disposition and (ii) any year prior to our becoming a PFIC, would be subject to tax at the highest individual or corporate marginal tax rate, as applicable, in effect for that year, and an interest charge would be imposed with respect to the resulting tax liability;
- the U.S. Holder would be required to file an annual return on IRS Form 8621 regarding distributions received in respect of, and gain recognized on dispositions of, our ordinary shares; and
- any U.S. Holder who acquired our ordinary shares upon the death of a U.S. Holder would not receive a step-up of the income tax basis to fair market value for such shares. Instead, such U.S. Holder would have a tax basis equal to the decedent's basis, if lower than the fair market value.

Although a determination as to a non-U.S. corporation's PFIC status is made annually, an initial determination that a non U.S. corporation is a PFIC for any taxable year generally will cause the above-described consequences to apply for all future years to U.S. Holders who held shares in the corporation at any time during a year when the corporation was a PFIC and who made neither a QEF election nor a mark-to-market election (as discussed below) with respect to such shares with their tax return for the year that included the last day of the corporation's first taxable year as a PFIC. This will be true even if the corporation ceases to be a PFIC in later years. However, with respect to a PFIC during the U.S. Holder's holding period that does not make any distributions or deemed distributions, the above tax treatment would apply only to U.S. Holders who realize gain on their disposition of shares in the PFIC.

Generally, if a U.S. Holder makes a valid QEF election with respect to our ordinary shares:

- the U.S. Holder would be required for each taxable year for which we are a PFIC to include in income such holder's pro-rata share of our: (i) ordinary earnings as ordinary income and (ii) net capital gain as long-term capital gain, in each case computed under U.S. federal income tax principles, even if such earnings or gains have not been distributed, unless the shareholder makes an election to defer this tax liability and pays an interest charge;
- the U.S. Holder would not be required under these rules to include any amount in income for any taxable year during which we do not have ordinary earnings or net capital gain; and
- the U.S. Holder would not be required under these rules to include any amount in income for any taxable year for which we are not a PFIC.

The QEF election is made on a shareholder-by-shareholder basis. Thus, any U.S. Holder of our ordinary shares can make its own decision whether to make a QEF election. A QEF election applies to all of our ordinary shares held or subsequently acquired by an electing U.S. Holder and can be revoked only with the consent of the IRS. A shareholder makes a QEF election by attaching a completed IRS Form 8621, using the information provided in the PFIC annual information statement, to a timely filed U.S. federal income tax return. In order to permit our shareholders to make a QEF election, we must supply them with certain information. We will supply U.S. Holders with the information needed to report income and gain pursuant to the QEF election in the event that we are classified as a PFIC for any taxable year and will supply such additional information as the IRS may require in order to enable U.S. Holders to make the QEF election. It should be noted that U.S. Holders may not make a QEF election with respect to warrants or rights to acquire our ordinary shares. Under certain circumstances, a U.S. Holder that has not made a timely QEF election may obtain treatment similar to that afforded a shareholder who has made a timely QEF election. A U.S. Holder, may make an election in a year subsequent to the first year during the U.S. Holder's holding period that we are classified as a PFIC to treat such holder's interest in our company as subject to a deemed sale of its PFIC stock on the first day of the first QEF year for an amount equal to its fair market value and recognizing gain, but not loss, on such deemed sale in accordance with the general PFIC rules, including the interest charge provisions, described above and thereafter treating such interest in our company as an interest in a QEF. In addition, under certain circumstances U.S. Holders may make a retroactive QEF election, but may be required to file a timely protective statement to preserve their ability to make a retroactive QEF election. U.S. Holders should consult their tax advisors regarding the advisability of filing a protective statement.

Alternatively, a U.S. Holder of shares in a PFIC can elect to mark the shares to market annually recognizing as ordinary income or loss each year the shares are held, as well as on the disposition of the shares, an amount equal to the difference between the shareholder's adjusted tax basis in the PFIC stock and its fair market value. Under current law, U.S. Holders may not mark a mark-to-market election with respect warrants or rights to acquire our ordinary shares. Ordinary loss generally is recognized only to the extent of net mark-to-market gains previously included in income by the U.S. Holder under the election in prior taxable years. As with the QEF election, a U.S. Holder who makes a mark-to-market election would not be subject to the deemed ratable allocations of gain, distributions and interest charges (described above). A mark-to-market election applies for so long as our ordinary shares are "marketable stock" (e.g. "regulatory traded" on the NASDAQ Global Market) and is irrevocable without obtaining the consent of the IRS and would continue to apply even in years that we were no longer a PFIC. However, under Treasury Regulations, a U.S. Holder who makes a mark-to-market election would not include mark-to-market gain or loss for any taxable year in which we are not a PFIC.

The PFIC rules described above are complex. U.S. Holders of our ordinary shares (or warrants or rights to acquire our ordinary shares) are urged to consult their tax advisors about the PFIC rules, including the advisability, procedure and timing of making a QEF or mark-to-market election, in connection with their holding of our ordinary shares.

*Tax Consequences for Non-U.S. Holders of Our Ordinary Shares*

Except as described in “Information Reporting and Backup Withholding” below, a Non-U.S. Holder of our ordinary shares will not be subject to U.S. federal income or withholding tax on the payment of dividends on, and the proceeds from the disposition of, our ordinary shares, unless:

- such item is effectively connected with the conduct by the Non-U.S. Holder of a trade or business in the United States and, in the case of a resident of a country which has a treaty with the United States, such item is attributable to a permanent establishment or, in the case of an individual, a fixed place of business, in the United States, or
- the Non-U.S. Holder is an individual who holds our ordinary shares as a capital asset and is present in the United States for 183 days or more in the taxable year of the disposition and certain other conditions are met..

*Information Reporting and Backup Withholding*

U.S. Holders generally are subject to information reporting requirements and backup withholding (currently at a rate of 28%) with respect to dividends paid in the United States on, and the proceeds from the disposition of, our ordinary shares, unless they:

- furnish a correct taxpayer identification number and certify that they are not subject to backup withholding on an IRS Form W-9; or
  - provide proof that they are otherwise exempt from backup withholding.

Non-U.S. Holders generally are not subject to information reporting or backup withholding with respect to dividends paid on, or upon the disposition of, our ordinary shares, provided that such Non-U.S. Holder provides a taxpayer identification number, certifies to its foreign status, or otherwise establishes an exemption.

Backup withholding is not an additional tax. The amount of any backup withholding is allowable as a credit against the U.S. or Non-U.S. Holder’s United States federal income tax liability, provided that such holder provides the requisite information to the IRS.

**F. DIVIDENDS AND PAYING AGENTS**

Not applicable.

**G. STATEMENT BY EXPERTS**

Not applicable.

**H. DOCUMENTS ON DISPLAY**

We are subject to the informational requirements of the Securities Exchange Act of 1934, as amended, applicable to foreign private issuers and fulfill the obligation with respect to such requirements by filing reports with the Securities and Exchange Commission. As a foreign private issuer, we are exempt from the rules under the Exchange Act prescribing the furnishing and content of proxy statements, and our officers, directors and principal shareholders are exempt from the reporting and “short-swing” profit recovery provisions contained in Section 16 of the Exchange Act. In addition, we are not required under the Exchange Act to file periodic reports and financial statements with the Securities and Exchange Commission as frequently or as promptly as United States companies whose securities are registered under the Exchange Act. However, we file with the Securities and Exchange Commission an annual report on Form 20-F containing financial statements audited by an independent accounting firm. We also furnish quarterly reports on Form 6-K containing unaudited financial information after the end of each of the first three quarters. You may read and copy any document we file with the Securities and Exchange Commission without charge at the Securities and Exchange Commission’s public reference room at 100 F Street, N.E., Washington, D.C. 20549. Copies of such material may be obtained by mail from the Public Reference Branch of the Securities and Exchange Commission at such address, at prescribed rates. Please call the Securities and Exchange Commission at 1-800-SEC-0330 for further information on the public reference room. A copy of each report submitted in accordance with applicable United States law is also available for public review at our principal executive offices.

In addition, the Securities and Exchange Commission maintains an Internet website at <http://www.sec.gov> that contains reports, proxy statements, information statements and other material that are filed through the Securities and Exchange Commission’s Electronic Data Gathering, Analysis and Retrieval, or EDGAR, system. We began filing our reports through the EDGAR system in November 2002.

The Israeli Securities Authority maintains an Internet website at <http://www.isa.gov.il> that contains reports proxy statements, information statements and other material that are filed through the electronic disclosure system (MAGNA). We began filing our reports through the MAGNA system in August 2003.

**I. SUBSIDIARY INFORMATION**

Not applicable.

**ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

We are exposed to financial market risk associated with changes in foreign currency exchange rates. To mitigate these risks, we use derivative financial instruments. The majority of our revenues and expenses are generated in U.S. dollars. A portion of our expenses, however, is denominated in NIS. In order to protect ourselves against the volatility of future cash flows caused by changes in foreign exchange rates, we use currency forward contracts and put and call options. We hedge the majority of our forecasted expenses denominated in NIS. During the year ended December 31, 2006 we recognized gains of \$879,000 as a result of these derivatives. All amounts have been included in salary expenses in the statement of operations. Our hedging program reduces, but does not eliminate, the impact of foreign currency rate movements. We have, based on our past experience, concluded that there is no material foreign exchange rate exposure.

Our investment portfolio includes held to maturity marketable securities. The contractual cash flows of these investments are either guaranteed by the U.S. government or an agency of the U.S. government or were issued by highly rated corporations. Since we generally do not intend to sell these securities before their maturity date, we do not attempt to reduce our exposure to changes in interest rates.

**ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES**

Not applicable.

## PART II

### ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES

Not applicable.

### ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

A. to D. Not applicable.

#### E. USE OF PROCEEDS

The effective date of the registration statement (No. 333-11572) for our initial public offering of our ordinary shares, par value NIS 0.01 per share, was March 22, 2000. The offering commenced on March 23, 2000, and terminated after the sale of all the securities registered. The managing underwriter of the offering was CIBC World Markets. We registered 5,750,000 ordinary shares in the offering, including shares issued pursuant to the exercise of the underwriter's over-allotment option. We sold all of the 5,750,000 ordinary shares at an aggregate offering price of \$115 million (\$20.00 per share). Under the terms of the offering, we incurred underwriting discounts of approximately \$8 million. We also incurred other expenses of approximately \$3.2 million in connection with the offering. None of the expenses consisted of amounts paid directly or indirectly to any of our directors, officers, general partners or their associates, any persons owning 10% or more of any class of our equity securities, or any of our affiliates. The net proceeds that we received as a result of the offering were approximately \$104 million. None of the net proceeds was paid, directly or indirectly, to any of our directors or officers, or their associates, any persons owning 10% or more of any class of our equity securities, or any of our affiliates. From March 23, 2000 to December 31, 2006 the net offering proceeds were used to finance the continued growth including acquisitions of our business and for general corporate purposes.

### ITEM 15. CONTROLS AND PROCEDURES

**(a) Disclosure Controls and Procedures.** Our chief executive officer and chief financial officer, after evaluating the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended) as of December 31, 2006, have concluded that, as of such date, our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our chief executive officer and chief financial officer, to allow timely decisions regarding required disclosure and is recorded, processed, summarized and reported within the periods specified by the SEC's rules and forms.

**(b) Management's Annual Report on Internal Control Over Financial Reporting.** Our management, under the supervision of our Chief Executive Officer and Chief Financial Officer, is responsible for establishing and maintaining adequate internal control over our financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act of 1934, as amended. The Company's internal control over financial reporting is designed to provide reasonable assurance to the Company's management and Board of Directors regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Internal control over financial reporting includes policies and procedures that:

- pertain to the maintenance of our records that in reasonable detail accurately and fairly reflect our transactions and asset dispositions;

- provide reasonable assurance that our transactions are recorded as necessary to permit the preparation of our financial statements in accordance with generally accepted accounting principles;
- provide reasonable assurance that our receipts and expenditures are made only in accordance with authorizations of our management and Board of Directors (as appropriate); and
  - provide reasonable assurance regarding the prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our financial statements.

Due to its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. In addition, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2006 based on the framework for Internal Control-Integrated Framework set forth by The Committee of Sponsoring Organizations of the Treadway Commission. Based on our assessment, our management concluded that the Company's internal control over financial reporting were effective as of December 31, 2006.

This Annual Report does not include an attestation report of our registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by our registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit us to provide only management's report in this Annual Report.

**(c) Changes in Internal Control Over Financial Reporting.** There were no changes in our internal controls over financial reporting identified with the evaluation thereof that occurred during the period covered by this annual report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

#### **ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT**

Our board of directors has determined that Professor Amit, a member of our audit committee, is qualified as an "audit committee financial expert" and is "independent", each as defined in the applicable regulations.

#### **ITEM 16B. CODE OF ETHICS AND CODE OF CONDUCT**

In 2003 we adopted a Code of Ethics that applies to our CEO, CFO and all other senior officers. This Code of Ethics was filed as an exhibit to our 2003 Annual Report.

#### **ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES**

The following is a summary of the fees billed to us for audit, audit related and non-audit services provided by Kost, Forer, Gabbay & Kasierer to us for the years ended December 31, 2005 and December 31, 2006:

<u>Fee Category</u>	<u>2005 Fees</u>	<u>2006 Fees</u>
Audit Fees	\$191,000	\$224,000
Audit-Related Fees	\$18,864	\$15,000
Tax Fees	<u>\$69,645</u>	<u>\$113,263</u>
Total Fees	\$279,509	\$352,263

*Audit Fees:* Consists of the aggregate fees billed for professional services rendered for the audit of our annual financial statements and services that are normally provided by Kost, Forer, Gabbay & Kasierer in connection with statutory and regulatory filings or engagements.

*Audit Related Fees:* Consists of the aggregate fees billed for assurance and related services that are reasonably related to the performance of the audit or review of our financial statements and are not reported under "Audit Fees".

*Tax Fees:* Consists of the aggregate fees billed for professional services rendered for tax compliance, tax advice and tax planning. These services include assistance regarding international and Israeli tax services.

*All Other Fees:* Consists of the aggregate fees billed for products and services other than the services reported above. We did not have such services in 2006 and 2005.

Our Audit Committee has adopted a policy for pre-approval of audit and non-audit services. Under the policy, the Audit Committee Proposed services either may be pre-approved without consideration of specific case-by-case services by the Audit Committee ("general pre-approval") or they may require the specific pre-approval of the Audit Committee ("specific pre-approval"). The Audit Committee employs a combination of these two approaches. Unless a type of service has received general pre-approval, it will require specific pre-approval by the Audit Committee if it is to be provided by the independent auditor. The term of any general pre-approval is 12 months from the date of pre-approval, unless the Audit Committee considers a different period and states otherwise. The Audit Committee reviews annually and pre-approves the services that may be provided by the independent auditor without obtaining specific pre-approval from the Audit Committee. The Audit Committee adds to or subtracts from the list of general pre-approved services from time to time, based on subsequent determinations. Pre-approval fee levels or budgeted amounts for all services to be provided by the independent auditor are to be established annually by the Audit Committee. Any proposed services exceeding these levels or amounts require specific pre-approval by the Audit Committee.

#### **ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES**

Not applicable.

#### **ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS**

Not applicable.

**PART III**

ITEM 17. FINANCIAL STATEMENTS

We have responded to Item 18 in lieu of this item.

ITEM 18. FINANCIAL STATEMENTS

The financial statements required by this item are found at the end of this annual report, beginning on page F-1.

ITEM 19. EXHIBITS

The exhibits filed with or incorporated into this annual report are listed on the index of exhibits below.

Exhibit No. Description

- 1.1 Memorandum of Association (English translation accompanied by Hebrew original) (1)
- 1.2 Articles of Association (1)
- 1.3 Certificate of Name Change (English translation accompanied by Hebrew original) (2)
- 2.1 Form of Ordinary Share Certificate (3)
- 2.2 Form of Warrant (1)
- 4.1 Lease Agreement, dated April 16, 2000, between the Registrant and Bet Dror Ltd. And Ziviel Investments Ltd. (English summary accompanied by Hebrew original) (1)
- 4.2 Form of Indemnity Agreement for Directors and Executive Officers
- 4.3 Addendum, dated September 2000, to Lease Agreement between the Registrant and Bet Dror Ltd. and Ziviel Investments Ltd. (English summary accompanied by Hebrew original) (4)
- 4.4 Sublease Agreement, dated July 5, 2001, between Floware Wireless Systems Ltd. and Ceragon Networks Ltd. (English summary accompanied by Hebrew original) (4)
- 8 Subsidiaries of Alvarion Ltd.\*
- 10.1 Consent of Kost, Forer, Gabay & Kasierer\*
- 11 Code of Conduct (5)
- 12.1 Certification of Chief Executive Officer required by Rules 13a-14(a) and Rule 15d-14(a) under the Securities Exchange Act of 1934, as amended \*
- 12.2 Certification of Chief Financial Officer required by Rules 13a-14(a) and Rule 15d-14(a) under the Securities Exchange Act of 1934, as amended \*
- 13.1 Certification of the Chief Executive Officer pursuant to 18 U.S.C Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 \*
- 13.2 Certification of the Chief Financial Officer pursuant to 18 U.S.C Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 \*

---

\* Filed herewith

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

**To the Shareholders of**

**ALVARION LTD. AND ITS SUBSIDIARIES**

We have audited the accompanying consolidated balance sheets of Alvarion Ltd. ("the Company") and its subsidiaries as of December 31, 2005 and 2006, and the related consolidated statements of operations, changes in shareholders' equity and cash flows for each of the three years in the period ended December 31, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purposes of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 2m to the consolidated financial statement, in 2006 the company adopted Statement Financial Accounting Standards Board No. 123 (Revised 2004), "Share-Based Payment".

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company and its subsidiaries at December 31, 2005 and 2006, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2006, in conformity with accounting principles generally accepted in the United States.

Tel-Aviv, Israel

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

**U.S. dollars in thousands, except share data****NOTE 1:-****GENERAL**

a. Alvarion Ltd. together with its worldwide subsidiaries ("the Company") is a provider of wireless broadband systems. The Company mainly focused on solutions based on the WiMAX standard for primary wireless broadband access (high-speed wireless "last mile" connection to the internet for homes and businesses) in both developed and emerging regions. The Company supplies top tier carriers, ISPs and private network operators with solutions based on the WiMAX standard as well as other wireless broadband solutions.

As for geographic markets and major customers, see Note 13.

b. Alvarion Ltd. has wholly-owned active subsidiaries: in the United States, France, Romania, Brazil, Hong-Kong, Singapore, Japan, Mexico, Poland, Israel, Uruguay, China, Ireland, Spain and Philippines primarily engaged in marketing, pre-sales, sales and developing activities.

c. Acquisition of InnoWave Wireless Systems:

On April 1, 2003, the Company entered into an asset purchase agreement pursuant to the terms of which the Company acquired certain assets and assumed certain liabilities of InnoWave Wireless Systems Ltd. ("InnoWave") for an aggregate purchase price of \$ 9,428. The purchase price consists of a cash payment of \$ 9,100, fair value of \$ 78 related to a warrant issued to the selling company ("ECI") to purchase 200,000 Ordinary shares of the Company and \$ 250 acquisition related costs.

d. Acquisition of interWAVE Communications International, Ltd. and discontinued operations:

On December 9, 2004, the Company entered into amalgamation agreement with interWAVE Communications International, Ltd. ("interWAVE") a publicly traded company pursuant to the terms of which the Company acquired interWAVE for an aggregate purchase price of \$ 50,783. The purchase price consists of a cash payment of \$ 47,688, fair value of \$ 1,651 in exchange for their previously held options and \$ 1,444 acquisition related costs.

On November 21, 2006, the Company signed an agreement to sell substantially all of the assets and certain liabilities related to the Cellular Mobile Unit ("CMU"), representing the majority of former interWAVE business, to LGC Wireless Inc ("LGC"), a privately held U.S. company, pursuant to the terms of which LGC issued to Alvarion Promissory Notes ("the Promissory Notes") in the amount of \$ 7,920 and a Convertible Note ("the Convertible Note", and together with the Promissory Note, "the Notes") at the amount of \$ 6,930.

The Promissory Notes bear simple interest at the rate of 8% per annum, payable annually. 50% of the principal amounts and any accrued but unpaid interest thereon will be due and payable on December 31, 2007 and the remaining principal and any and all accrued but unpaid interest will be due and payable on December 31, 2008. The Promissory Notes are secured by the assets sold in the transaction.

**ALVARION LTD. AND ITS SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

U.S. dollars in thousands

**NOTE 1:-****GENERAL (Cont.)**

The Convertible Note bears simple interest at the rate of 8% per annum, payable annually. The principal and any accrued but unpaid interest will be due and payable on December 31, 2007. The parties shall have the right to convert the outstanding principal on the Convertible Note, at any date beginning six months following the closing and ending on the date of maturity, into LGC's Common shares; the outstanding principal on the Convertible Note would automatically convert into LGC's Common shares upon an LGC Initial Public Offering or a change of control in LGC.

At closing, 10% of the principal amount of the Notes ("the Escrow Amount") is held in an Escrow account ("the Escrow Account"). The Escrow Account shall exist until the termination of the 24-month period following the Closing Date.

The transaction was treated as a non-monetary transaction and the consideration was recorded at its fair value, valued at \$ 6,868.

The transaction was accounted for as discontinued operation in accordance with Statement of Financial Accounting Standard No 144, "Accounting for the Impairment or Disposal of Long Lived Assets" (SFAS 144) and EITF No. 03-13 "Applying the Conditions in Paragraph 42 of FASB Statement No. 144 in Determining Whether to Report Discontinued Operations".

The assets and liabilities of the CMU as of December 31, 2005 and 2006 are presented separately in the Company's balance sheets as assets and liabilities from discontinued operations, respectively. The results of the CMU operations are presented as discontinued operations for all periods presented. The cash flow of the CMU was also disclosed separately in the statement of cash flows for 2004, 2005, and 2006. The Company expects to collect over 2007 and 2008 certain amounts in reference to the former sale of CMU equipment and services, which occurred before the sale of the CMU.

Assets and liabilities of the discontinued segment:
