Nicholas-Applegate Convertible & Income Funds Letter to Shareholders

April 17, 2006

Dear Shareholder:

We are pleased to provide you with the annual report for Nicholas-Applegate Convertible & Income Fund and Nicholas-Applegate Convertible & Income Fund II (the "Funds") for the fiscal periods ended February 28, 2006. Please note that Nicholas-Applegate Convertible & Income Fund II changed its fiscal year-end from June 30 to February 28. Accordingly, the accompanying financial statements cover the eight-month period from July 1, 2005 to February 28, 2006.

The convertible market finished the twelve-month period ended February 28, 2006 on a positive note, as the Merrill Lynch All-Convertible Index increased 11.60%. For this period, the convertible market outperformed the Dow Jones Industrial Average but lagged both the S&P 500 Index and NASDAQ Composite Index. U.S. debt markets, as represented by the Lehman Brothers Aggregate Bond Index, produced positive, though modest, returns during the twelve-month period.

In this environment, Nicholas-Applegate Convertible & Income had a net asset value and market price return of 5.44% and 14.30%, respectively, for the reporting period. Nicholas-Applegate Convertible & Income II had a net asset value and market price return of 9.90% and 12.10%, respectively, for the eight-month period. Careful security selection was a key driver of the Funds' performance. In the convertible portion of the portfolios, top performers were companies with improving operating statistics and those exceeding expectations, while exposure to automotive and transport issues proved to be a drag on performance. In the high-yield portion of the portfolios, upgrades exceeded downgrades across many industries, which was a positive for performance. Some of the more duration-sensitive holdings, however, detracted from performance as interest rates rose slightly over the reporting period.

Please review the following pages for more information on the Funds. Nicholas-Applegate Convertible & Income Funds Notes to Financial Statements

February 28, 2006

1. Organization and Significant Accounting Policies

Nicholas-Applegate Convertible & Income Fund (the "Convertible & Income") and Nicholas-Applegate Convertible & Income Fund II (the "Convertible & Income II"), collectively referred to as the "Funds", were organized as Massachusetts business trusts on January 17, 2003 and April 22, 2003, respectively. In December 2005, Convertible & Income II changed its fiscal year end from June 30 to February 28. Accordingly, the financial statements of this Fund cover the eight-month period from July 1, 2005 through February 28, 2006. Prior to commencing operations on March 31, 2003, and July 31, 2003, respectively, the Funds had no operations other than matters relating to their organization and registration as diversified, closed-end management investment companies under the Investment Company Act of 1940 and the rules and regulations there under, as amended. Allianz Global Investors Fund Management LLC (the "Investment Manager"), serves as the Funds' Investment Manager and is an indirect wholly-owned subsidiary of Allianz Global Investors of America L.P. (the "Allianz Global"). Allianz Global is an indirect, majority-owned subsidiary of Allianz AG. The Funds have an unlimited amount of \$0.00001 par value common stock authorized.

The Funds' investment objective is to provide total return through a combination of capital appreciation and high current income. The Funds attempt to achieve this objective by investing in a portfolio of convertible securities and non-convertible income-producing securities.

The preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from these estimates.

In the normal course of business, the Funds enter into contracts that contain a variety of representations which provide general indemnifications. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet been asserted. However, the Funds expect the risk of any loss to be remote.

The following is a summary of significant accounting policies followed by the Funds.

(a) Valuation of Investments

Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Portfolio securities and other financial instruments for which market quotations are not readily available or if a development/event occurs that may significantly impact the value of a security, may be fair-valued, in good faith, pursuant to guidelines established by the Board of Trustees. The Funds' investments are valued daily by an independent pricing service or dealer quotations, using the last sale price on the exchange that is the primary market for such securities, or the last quoted bid price on corporate bonds and notes or the last quoted mean price on convertible securities for which the over-the-counter market is the primary market or for listed securities in which there were no sales. Independent pricing services use information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Short-term investments maturing in 60 days or less are valued at amortized cost, if their original term to maturity was 60 days or less, or by amortizing their value on the 61st day prior to maturity, if the original term to maturity exceeded 60 days. The prices used by the Funds to value securities may differ from the value that would be realized if the securities were sold and the differences could be material to the financial statements. The Funds' net asset values are determined daily as of the close of regular trading (normally, 4:00 p.m. Eastern time) on the New York Stock Exchange (the "NYSE") on each day the NYSE is open for business.

(b) Investment Transactions and Investment Income

Investment transactions are accounted for on the trade date. Realized gains and losses on investments are determined on the identified cost basis. Interest income is recorded on an accrual basis. Discounts or premiums on corporate bonds and notes purchased are accreted or amortized to interest income over the lives of the respective securities using the effective interest method. Dividend income is recorded on the ex-dividend date.

(c) Federal Income Taxes

The Funds intend to comply with the requirements of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies. Accordingly, no provision for U.S. federal income taxes is required.

(d) Dividends and Distributions-Common Stock

The Funds declare dividends from net investment income monthly to common shareholders. Distributions of net realized capital gains, if any, are paid at least annually. The Funds record dividends and distributions to its shareholders on the ex-dividend date. The amount of dividends and distributions from net investment income and net realized capital gains

1. Organization and Significant Accounting Policies (continued)

(d) Dividends and Distributions-Common Stock (continued) are determined in accordance with federal income tax regulations, which may differ from generally accepted accounting principles. These "book-tax" differences are considered either temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal income tax treatment; temporary differences do not require reclassification. With respect to Convertible & Income, for the fiscal year ended February 28, 2006, permanent differences are primarily attributable to the differing treatment of convertible preferred securities, interest rate cap premium amortization and periodic payments, consent payments, premium amortization and non-deductible excise tax. These adjustments were a decrease to dividends in excess of net investment income of \$31,874,020, a decrease to paid-in capital of \$218,991 and a decrease to net realized gains of \$31,655,029. For Convertible & Income II, for the fiscal period July 1, 2005 through February 28, 2006, permanent differences are primarily attributable to the differing treatment of convertible preferred securities, interest rate cap premium amortization and periodic payments, consent payments, premium amortization and non-deductible excise tax. These adjustments were to an increase to undistributed net investment income of \$5,732,175, a decrease to paid-in capital of \$88,200 and a decrease to net realized gains of \$5,643,975. To the extent dividends and/or distributions exceed current and accumulated earnings and profits for federal income tax purposes, they are reported as dividends and/or distributions of paid-in capital in excess of par.

(e) Credit-Linked Trust Certificates

Credit-linked trust certificates are investments in a limited purpose trust or other vehicle formed under state law which, in turn, invests in a basket of derivative instruments, such as credit default swaps, interest rate swaps and other securities, in order to provide exposure to the high yield or another fixed income market.

Similar to an investment in a bond, investments in these credit-linked trust certificates represent the right to receive periodic income payments (in the form of distributions) and payment of principal at the end of the term of the certificate. However, these payments are conditioned on the trusts' receipt of payments from, and the trusts' potential obligations to, the counterparties to the derivative instruments and other securities in which the trusts invest in.

(f) Interest Rate Caps

In an interest rate cap, one party pays a fee while the other party pays the excess, if any, of a floating rate over a specified fixed rate. Interest rate caps are intended to manage the Funds' exposure to changes in short-term interest rates and hedge the Auction Preferred Shares. Owning interest rate caps reduces the Funds' duration, making it less sensitive to changes in interest rates from a market value perspective. The effect on income involves protection from rising short-term rates, which the Funds experience primarily in the form of leverage. The Funds are exposed to credit loss in the event of non-performance by the other party to the interest rate cap. Premiums paid by the Funds are recognized as an asset and amortized into realized loss over the life of the interest rate cap. Changes in the value of the interest rate cap is recognized as unrealized appreciation or depreciation. Periodic payments received during periods the floating rate exceeds the specified fixed rate are recognized into realized gain.

(g) Concentration of Risk

It is the Funds' policy to invest a significant portion of its assets in convertible securities. Although convertible securities do derive part of their value from that of the securities into which they are convertible, they are not considered derivative financial instruments. However, certain of the Funds' investments include features which render them more sensitive to price changes in their underlying securities. Consequently, this exposes the Funds to greater downside risk than traditional convertible securities, but still less than that of the underlying common stock.

2. Investment Manager/Sub-Adviser

The Funds have entered into Investment Management Agreements (the "Agreements") with the Investment Manager. Subject to the supervision of the Funds' Boards of Trustees, the Investment Manager is responsible for managing, either directly or through others selected by it, the Funds' investment activities, business affairs and administrative matters. Pursuant to the Agreements, the Funds pay the Investment Manager an annual fee, payable monthly, at the annual rate of 0.70% of the Funds' average daily total managed assets. Total managed assets refer to the total assets of each Fund's (including assets attributable to any Preferred Shares and borrowings that may be outstanding) minus accrued liabilities (other than liabilities representing borrowings).

February 28, 2006

2. Investment Manager/Sub-Adviser (continued)

The Investment Manager has retained its affiliate, Nicholas-Applegate Capital Management LLC (the "Sub-Adviser"), to manage the Funds' investments. Subject to the supervision of the Investment Manager, the Sub-Adviser is responsible for making all of the Funds' investment decisions. For its services pursuant to Sub-Advisory agreements, the Investment Manager and not the Funds, pay the Sub-Adviser a monthly fee.

7. Legal Proceedings

In June and September 2004, the Investment Manager, certain of its affiliates (Allianz Global Investors Distributors LLC and PEA Capital LLC) and Allianz Global, agreed to settle, without admitting or denying the allegations, claims brought by the Securities and Exchange Commission (the "Commission"), the New Jersey Attorney General and the California Attorney General alleging violations of federal and state securities laws with respect to certain open-end funds for which the Investment Manager serves as investment adviser. Two settlements (with the Commission and New Jersey) related to an alleged "market timing" arrangement in certain open-end funds sub-advised by PEA Capital. Two settlements (with the Commission and California) related to the alleged use of cash and fund portfolio commissions to finance "shelf-space" arrangements with broker-dealers for open-end funds. The Investment Manager and its affiliates agreed to pay a total of \$68 million to settle the claims related to market timing and \$20.6 million to settle the claims related to shelf space. The settling parties also agreed to make certain corporate governance changes. None of the settlements allege that any inappropriate activity took place with respect to the Funds.

Since February 2004, the Investment Manager and certain of its affiliates and their employees have been named as defendants in a number of pending lawsuits concerning "market timing," and "revenue sharing/shelf space/directed brokerage," which allege the same or similar conduct underlying the regulatory settlements discussed above. The market timing lawsuits have been consolidated in a Multi-District Litigation in the United States District Court for the District of Maryland, and the revenue sharing/shelf space/directed brokerage lawsuits have been consolidated in the United States District Court for the District of Connecticut. An additional market timing lawsuit filed by the Attorney General of West Virginia against a number of fund companies, including the Investment Manager and two of its affiliates, has also been transferred to the Multi-District Litigation in Maryland. Any potential resolution of these matters may include, but not be limited to, judgments or settlements for damages against the Investment Manager or its affiliates or related injunctions. The Investment Manager believes that other similar lawsuits may be filed in federal or state courts in the future.

Under Section 9(a) of the Investment Company Act of 1940, if any of the various regulatory proceedings or lawsuits were to result in a court injunction against the Investment Manager, Allianz Global and/or their affiliates, they and their affiliates would, in the absence of exemptive relief granted by the Commission, be barred from serving as an investment adviser/sub-adviser or principal underwriter for any registered investment company, including the Funds. In connection with an inquiry from the Commission concerning the status of the New Jersey settlement referenced above with regard to any implications under Section 9(a), the Investment Manager and certain of its affiliates, including the Investment Adviser, (together, the "Applicants") have sought exemptive relief from the Commission under Section 9(c) of the 1940 Act. The Commission has granted the Applicants a temporary exemption from the provisions of Section 9(a) with respect to the New Jersey settlement until the earlier of (i) September 13, 2006 and (ii) the date on which the Commission takes final action on their application for a permanent exemptive order. There is no assurance that the Commission will issue a permanent order. If a court injunction were to be issued against the Investment Manager or the Affiliates with respect to any of the other matters referenced above, the Investment Manager or the affiliates would, in turn, seek similar exemptive relief under Section 9(c) with respect to that matter, although there is no assurance that such exemptive relief would be granted.

The foregoing speaks only as of the date hereof.

Nicholas-Applegate Convertible & Income Funds Dividend Reinvestment Plan (unaudited)

Pursuant to the Funds' Dividend Reinvestment Plan (the "Plan"), all Common Shareholders whose shares are registered in their own names will have all dividends, including any capital gain dividends, reinvested automatically in additional Common Shares by PFPC Inc., as agent for the Common Shareholders (the "Plan Agent"), unless the shareholder elects to receive cash. An election to receive cash may be revoked or reinstated at the option of the shareholder. In the case of record shareholders such as banks, brokers or other nominees that hold Common Shares for others who are the beneficial owners, the Plan Agent will administer the Plan on the basis of the number of Common Shares certified from time to time by the record shareholder as representing the total amount registered in such shareholder's name and held for the account of beneficial owners who are to participate in the Plan. Shareholders whose shares are held in the name of a bank, broker or nominee should contact the bank, broker or nominee for details. All distributions to investors who elect not to participate in the Plan (or whose broker or nominee elects not to participate on the investor's behalf), will be paid cash by check mailed, in the case of direct shareholder, to the record holder by PFPC Inc., as the Fund's dividend disbursement agent.

Unless you (or your broker or nominee) elects not to participate in the Plan, the number of Common Shares you will receive will be determined as follows:

- (1) If Common Shares are trading at or above net asset value on the payment date, the Fund will issue new shares at the greater of (i) the net asset value per Common Share on the payment date or (ii) 95% of the market price per Common Share on the payment date; or
- (2) If Common Shares are trading below net asset value (minus estimated brokerage commissions that would be incurred upon the purchase of Common Shares on the open market) on the payment date, the Plan Agent will receive the dividend or distribution in cash and will purchase Common Shares in the open market, on the New York Stock Exchange or elsewhere, for the participants' accounts. It is possible that the market price for the Common Shares may increase before the Plan Agent has completed its purchases. Therefore, the average purchase price per share paid by the Plan Agent may exceed the market price on the payment date, resulting in the purchase of fewer shares than if the dividend or distribution had been paid in Common Shares issued by the Fund. The Plan Agent will use all dividends and distributions received in cash to purchase Common Shares in the open market on or shortly after the payment date, but in no event later than the ex-dividend date for the next distribution. Interest will not be paid on any uninvested cash payments.

You may withdraw from the Plan at any time by giving notice to the Plan Agent. If you withdraw or the Plan is terminated, you will receive a certificate for each whole share in your account under the Plan and you will receive a cash payment for any fraction of a share in your account. If you wish, the Plan Agent will sell your shares and send you the proceeds, minus brokerage commissions.

The Plan Agent maintains all shareholders' accounts in the Plan and gives written confirmation of all transactions in the accounts, including information you may need for tax records. The Plan Agent will also furnish each person who buys Common Shares with written instructions detailing the procedures for electing not to participate in the Plan and to instead receive distributions in cash. Common Shares in your account will be held by the Plan Agent in non-certificated form. Any proxy you receive will include all Common Shares you have received under the Plan.

There is no brokerage charge for reinvestment of your dividends or distributions in Common Shares. However, all participants will pay a pro rata share of brokerage commissions incurred by the Plan Agent when it makes open market purchases.

Automatically reinvested dividends and distributions are taxed in the same manner as cash dividends and distributions.

The Funds and the Plan Agent reserve the right to amend or terminate the Plan. There is no direct service charge to participants in the Plan; however, the Funds reserve the right to amend the Plan to include a service charge payable by the participants. Additional information about the Plan may be obtained from the Funds' shareholder servicing agent, PFPC Inc., P.O. Box 43027, Providence, RI 02940-3027, telephone number (800) 331-1710.

ITEM 6. SCHEDULE OF INVESTMENTS Schedule of Investments is included as part of the report to shareholders filed under Item 1 of this form.

ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

Allianz Global Investors and Nicholas-Applegate

Description of Proxy Voting Policy and Procedures

The Registrants and its Board of Trustees have delegated to Allianz Global Investors Fund Management LLC (["Allianz Global Investors"]), and Allianz Global Investors has in turn delegated to the sub-adviser, responsibility for voting any proxies relating to portfolio securities held by the Registrants in accordance with the sub-advisers' proxy voting policies and procedures.

Each of Allianz Global Investors and Nicholas-Applegate Capital Management LLC (["Nicholas Applegate"]) (for purposes of this description, each a "Company") typically votes proxies as part of its discretionary authority to manage accounts (except as provided below with respect to Allianz Global Investors' registered investment company clients), unless the client has explicitly reserved the authority for itself. When voting proxies, each Company's primary objective is to make voting decisions solely in the best economic interests of its clients. Each Company will act in a manner that it deems prudent and diligent and which is intended to enhance the economic value of the underlying portfolio securities held in its clients' accounts.

Each Company has adopted written Proxy Voting Policies and Procedures (the "Proxy Guidelines") that are reasonably designed to ensure that such Company is voting in the best interest of its clients. The Proxy Guidelines reflect each Company's general voting positions on specific corporate governance issues and corporate actions. Some issues may require a case by case analysis prior to voting and may result in a vote being cast that will deviate from the Proxy Guidelines. Upon receipt of a client's written request, a Company may also vote proxies for that client's account in a particular manner that may differ from the Proxy Guidelines. Deviation from a Company's Proxy Guidelines will be documented and maintained in accordance with Rule 204-2 under the Investment Advisers Act of 1940.

In accordance with the Proxy Guidelines, a Company may review additional criteria associated with voting proxies and evaluate the expected benefit to its clients when making an overall determination on how or whether to vote the proxy. A Company may vote proxies individually for an account or aggregate and record votes across a group of accounts, strategy or product. In addition, a Company may refrain from voting a proxy on behalf of its clients' accounts due to de-minimis holdings, impact on the portfolio, items relating to foreign issuers, timing issues related to the opening/closing of accounts and contractual arrangements with clients and/or their authorized delegate. For example, a Company may refrain from voting a proxy of a foreign issuer due to logistical considerations that may have a detrimental effect on a Company's ability to vote the proxy. These issues may include, but are not limited to: (i) proxy statements and ballots being written in a foreign language, (ii) untimely notice of a shareholder meeting, (iii) requirements to vote proxies in person, (iv) restrictions on a foreigner's ability to exercise votes, (v) restrictions on the sale of securities for a period of time in proximity to the shareholder meeting, or (vi) requirements to provide local agents with power of attorney to facilitate the voting instructions. Such proxies are voted on a best-efforts basis.

To assist in the proxy voting process, a Company may retain an independent third party service provider to assist in providing research, analysis and voting recommendations on corporate governance issues and corporate actions as well as assist in the administrative process. The services provided offer a variety of proxy-related services to assist in a Company's handling of proxy voting responsibilities.

Conflicts of Interest. A Company may have conflicts of interest that can affect how it votes its clients' proxies. For example, a Company or an affiliate may manage a pension plan whose management is sponsoring a proxy proposal. The Proxy Guidelines are designed to prevent material conflicts of interest from affecting the manner in which a Company votes its clients' proxies. In order to ensure that all material conflicts of interest are addressed appropriately while carrying out its obligation to vote proxies, the Chief Investment Officer of the relevant Company may designate an employee or a proxy committee to be responsible for addressing how the Company resolves such material conflicts of interest with its clients.

Registered Investment Companies for which Allianz Global Investors Serves as Adviser. With respect to registered investment companies (["funds"]) for which Allianz Global Investors serves as investment adviser, it is the policy of Allianz Global Investors that proxies should be voted in the interest of the shareholders of the applicable fund, as determined by those who are in the best position to make this determination. Allianz Global Investors believes that the firms and/or persons purchasing and selling securities for the funds and analyzing the performance of the funds' securities are in the best position and have the information necessary to vote proxies in the best interests of the funds and their shareholders, including in situations where conflicts of interest may arise between the interests of shareholders, on one hand, and the interests of the investment adviser, a sub-adviser and/or any other affiliated person of the fund, on the other. Accordingly, Allianz Global Investor's policy is to delegate proxy voting responsibility to those entities with portfolio management responsibility for the funds.

Edgar Filing: NICHOLAS APPLGATE CONVERTIBLE & INCOME FUND II - Form N-CSR

Like other investment professionals with multiple clients, a Portfolio Manager for a Fund may face certain potential conflicts of interest in connection with managing both the Fund and other accounts at the same time. The paragraphs below describe some of these potential conflicts, which the Investment Adviser believes are faced by investment professionals at most major financial firms.

The Investment Adviser and the Trustees have adopted compliance policies and procedures that attempt to address certain of these potential conflicts. The management of accounts with different advisory fee rates and/or fee structures, including accounts that pay advisory fees based on account performance (□performance fee accounts□), may raise potential conflicts of interest by creating an incentive to favor higher-fee accounts. These potential conflicts may include, among others:

- The most attractive investments could be allocated to higher-fee accounts or performance fee accounts.
- The trading of higher-fee accounts could be favored as to timing and/or execution price. For example, higher-fee accounts could be permitted to sell securities earlier than other accounts when a prompt sale is desirable or to buy securities at an earlier and more opportune time.
- The investment management team could focus their time and efforts primarily on higher-fee accounts due to a personal stake in compensation.

A potential conflict of interest may arise when a Fund and other accounts purchase or sell the same securities. On occasions when a Portfolio Manager considers the purchase or sale of a security to be in the best interests of a Fund as well as other accounts, the Investment Adviser's trading desk may, to the extent permitted by applicable laws and regulations, aggregate the securities to be sold or purchased in order to obtain the best execution and lower brokerage commissions, if any. Aggregation of trades may create the potential for unfairness to a Fund or another account if one account is favored over another in allocating the securities purchased or sold□for example, by allocating a disproportionate amount of a security that is likely to increase in value to a favored account.

□Cross trades,□ in which one Investment Adviser account sells a particular security to another account (potentially saving transaction costs for both accounts), may also pose a potential conflict of interest. Cross trades may be seen to involve a potential conflict of interest if, for example, one account is permitted to sell a security to another account at a higher price than an independent third party would pay. The Investment Adviser and the Board of Trustees have adopted compliance procedures that provide that any transactions between the Funds and another Investment Adviser-advised account are to be made at an independent current market price, as required by law.

Another potential conflict of interest may arise based on the different investment objectives and strategies of a Fund and other accounts. For example, another account may have a shorter-term investment horizon or different investment objectives, policies or restrictions than a Fund. Depending on another account's objectives or other factors, a Portfolio Manager may give advice and make decisions that may differ from advice given, or the timing or nature of decisions made, with respect to a Fund. In addition, investment decisions are the product of many factors to basic suitability for the particular account involved. Thus, a particular security may be bought or sold for certain accounts even though it could have been bought or sold for other accounts at the same time. More rarely, a particular security may be bought for one or more accounts managed by a Portfolio Manager when one or more other accounts are selling the security (including short sales). There may be circumstances when purchases or sales of portfolio securities for one or more accounts may have an adverse effect on other accounts.

A Fund's Portfolio Manager who is responsible for managing multiple funds and/or accounts may devote unequal time and attention to the management of those funds and/or accounts. As a result, the Portfolio Manager may not be able to formulate as complete a strategy or identify equally attractive investment opportunities for each of those accounts as might be the case if he or she were to devote substantially more attention to the management of a single fund. The effects of this potential conflict may be more pronounced where funds and/or accounts overseen by a particular Portfolio Manager have different investment strategies. A Fund's Portfolio Manager(s) may be able to select or influence the selection of the brokers and dealers that are used to execute securities transactions for the Funds. In addition to executing trades, some brokers and dealers provide Portfolio Managers with brokerage and research services (as those terms are defined in Section 28(e) of the Securities Exchange Act of 1934), which may result in the payment of higher brokerage fees than might have otherwise be available. These services may be more beneficial to certain funds or accounts than to others. Although the payment of brokerage commissions is subject to the requirement that the Portfolio Manager determine in good faith that the commissions are reasonable in relation to the value of the brokerage and research services provided to the Fund, a Portfolio Manager's decision as to the selection of brokers and dealers could yield disproportionate costs and benefits among the Funds and/or accounts that he or she manages. See "Portfolio Transactions and Brokerage".

A Fund's Portfolio Manager(s) may also face other potential conflicts of interest in managing a Fund, and the description above is not a complete description of every conflict that could be deemed to exist in managing both the Funds and other accounts. In addition, a Fund's Portfolio Manager may also manage other accounts (including their personal assets or the assets of family members) in their personal capacity. The management of these accounts may also involve certain of the potential conflicts described above. The Investment Adviser's investment personnel, including each Fund's Portfolio Manager, are subject to restrictions on engaging in personal securities transactions pursuant to the Codes of Ethics adopted by the Investment Adviser and the Funds, which contain provisions and requirements designed to identify and address certain conflicts of interest between personal investment activities and the interests of the Funds.

(a) (3) As of February 28, 2006, the following explains the compensation structure of each individual that shares primary responsibility for day-to-day portfolio management of the Funds (for the purposes of this section, "Portfolio Managers"):

Base Salary. Each Portfolio Manager is paid a fixed base salary set at a competitive level, taking into consideration the Portfolio Manager's experience and responsibilities, as determined by the Investment Adviser.

Annual Bonus, Profit Sharing Opportunity, and Long-Term Cash Bonus Plan . Each Portfolio Manager's compensation is directly affected by the performance, on a pre-tax basis, of the individual portfolios he or she manages, including each Fund; as well as the performance of the individual's portfolio management team and the overall success of the firm.

Approximately 75% of an investment professional's performance bonus is based on one- and three-year annualized performance of client accounts, with greater weight placed on three-year performance. Relative performance to the benchmark is approximately half of the calculation and the product's peer ranking in institutional consultant universes determines the other half. The

remaining 25% of the performance bonus is based on a qualitative review and firm profitability. In the qualitative review, team members are evaluated based on the consistency of their implementation of the investment process. Lead portfolio managers evaluate the members of their teams. The Chief Investment Officer evaluates the lead portfolio managers.

Investment teams have a profit-sharing plan which represents approximately 25% of the total bonus. Each team receives a pool which is based on the pre-tax profit of their product. All team members are eligible. Allocations are decided between the Chief Investment Officer and lead portfolio managers of the teams. The share of pre-tax profit increases with increasing profitability. This structure, together with the bonus based on investment performance, fully aligns the team with client interests.

A Long-Term Cash Bonus Plan was established to provide long-term incentives and rewards to certain key staff and executives of Nicholas-Applegate and the other Allianz Global Investors companies to promote their long-term growth and profitability. The Plan provides awards that are valued based on the operating earnings growth of the worldwide Allianz Global Investors group of companies, as well as the target achievement of Nicholas-Applegate's average operating earnings on a three-year basis. The Plan provides a link between longer term company performance and participant pay, further motivating participants to make a long-term commitment to the company's success.

(a)(4) As of February 28, 2006, none of the Portfolio Managers beneficially own any of the shares issued by the Funds.
