(unaudited)

Dear Shareholder:

China continues to be an important area of focus for us, as it has become an important part of the world economy and as it currently offers interesting investment opportunities as well.

Together with continued liberalization within the country, the government has also moved to provide access to local markets to those outside the country. In November, the Shanghai-Hong Kong Stock Connect program was launched, which began providing access to over 550 A-share stocks not previously available to investors outside the mainland.

The Chinese government appears also to recognize that small, non-government-backed firms, so important when it comes to fostering innovation, often struggle to access capital because large banks generally do not offer them financing.¹ As such, the Small and Medium Enterprise (SME) and ChiNext Boards were established (the former under the Shenzhen Stock Exchange (SZSE) and the latter as a wholly owned but independent arm of the SZSE), to help promote private innovation in the public markets.² As of December 31, 2014, a total of 732 companies were listed on the SME Board with a combined market value of \$823.52 billion, while 406 companies traded on the ChiNext Board with a combined market value of \$352.43 billion.³

According to the World Trade Organization, at the start of 2014, SMEs in China were contributing 60% of the country's GDP and 75% of its urban employment opportunities⁴ In addition, we are seeing the information technology, consumer discretionary and staples, and health care sectors becoming the drivers of what has been called China's "New Economy".

Contributions of SMEs in China:

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSR

On July 23 this year, we were excited to announce the launch of the Market Vectors ChinaAMC SME-ChiNext ETF (NYSE Arca: CNXT), a new fund which seeks to provide not only exposure primarily to China's market for innovative, non-government owned companies, but also to the very sectors that are increasingly recognized as underpinning the growth of China's New Economy. CNXT gives investors a liquid, transparent way to gain access to some of these growing companies.

Market Vectors continues to be an industry leader in offering single-country and region-specific equity ETFs. When performance varies so widely between countries and regions, it is all the more important to be able to select your focus. The suite of Market Vectors country and regional ETFs give you the flexibility to do just that, and we at Van Eck Global also continue to look for ways to enhance your access to the markets you choose and to seek out and evaluate the most attractive opportunities for you as a shareholder in the international space.

Please stay in touch with us through our website (<http://www.marketvectorsetfs.com>) on which we offer videos, email subscriptions and educational literature, all of which are designed to keep you up to date with your investments in Market Vectors ETFs.

Management Discussion (unaudited)

The performance of funds in the suite of Market Vectors International ETFs was predominantly positive during the 12 month period. Eight funds, from a total of 13 that traded for the entire period under review, posted positive total returns. The top two performing funds, each returning more than 40% over the 12 month period, were Market Vectors ChinaAMC A-Share ETF (NYSE Arca: PEK) (+49.11%) and Market Vectors India Small-Cap Index ETF (NYSE Arca: SCIF) (+43.65%). Five funds reported negative performance over the period: Market Vectors Africa Index ETF (NYSE Arca: AFK) (-12.86%), Market Vectors Brazil Small-Cap ETF (NYSE Arca: BRF) (-25.19%), Market Vectors Poland ETF (NYSE Arca: PLND) (-16.90%), Market Vectors Russia ETF (NYSE Arca: RSX) (-44.95%), and Market Vectors Russia Small-Cap ETF (NYSE Arca: RSXJ) (-52.67%).

January 1 through December 31, 2014

Market Vectors International ETFs Total Return

Note: Market Vectors ChinaAMC SME-ChiNext ETF (NYSE Arca: CNXT) is not included above as it was launched on July 23, 2014.

Source: Van Eck Global. Returns based on each Fund's net asset value (NAV). The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Funds reflects temporary waivers of expenses and/or fees. Had the Funds incurred all expenses, investment returns would have been reduced. Investment return and value of the shares of the Funds will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than performance data quoted.

Country/Regional Overviews

Africa

The energy sector was the greatest detractor from performance for the 12 month period. The consumer discretionary, health care, financial, and telecommunication services sectors all provided small positive contributions to overall

performance. Large- and mid-cap companies were the greatest detractors from performance, with mid-caps detracting significantly more than the large-cap grouping of companies. Geographically, South Africa and Egypt were the two most significant contributors to return, and Nigeria detracted the most from performance.

Brazil

Though the first half of 2014 was a challenging one for Brazil, the Fund recorded modest positive performance for the six month period. The second half of the year, however, proved to be even more challenging, with the Fund recording a significant negative return for the entire 12 month period. Uncertainties surrounding the outcome of the elections were finally dispelled when President Dilma Rousseff, following a second round run-off, was reelected¹ on

MARKET VECTORS INTERNATIONAL ETFs

(unaudited)

October 26 with a narrow victory over Aécio Neves. Prospects of any much-needed economic reforms and budget cuts before the end of the year never materialized. No sector except healthcare, and then only minimally, contributed positively to return over the 12 month period. The consumer discretionary, financial, and industrial sectors were the three greatest detractors from performance.

China

2014 saw the government pass numerous reforms to provide necessary adjustments to the economy and attempt to spur growth through various measures, including a surprising interest rate reduction in November which represented the first such cut in over two years. More broadly, the government continued to undertake measures to move the economy away from one driven primarily by investment to one powered by domestic consumption. Quarterly GDP growth consistently fell below the government's 7.5% target, and by the end of the year, it was generally accepted that 7.0% growth in 2015 will have to serve as the "new normal". The A-share equity market, while extremely sluggish during the first half of 2014, finally began to pick up during the second half of year, driven by anticipation of the Shanghai-Hong Kong Stock Connect program, which began providing access to over 550 A-share stocks not previously available to investors outside the mainland in November, as well as by the aforementioned interest rate cut.

Performance of the Market Vectors ChinaAMC A-Share ETF during the first week in January 2014 was primarily derived from swap contracts on the CSI 300 Index[†](CSI 300). The Fund began direct investment in the A-share constituents of the CSI 300 on January 8, 2014 and eliminated the majority of its exposure previously achieved through swap contracts. Contracts outstanding as of December 31, 2014 are presented in the Fund's Schedule of Investments. All sectors contributed positively to performance during the period under review. The vast majority of returns came from companies in the financial sector, followed by industrial companies. However, while still positive, the telecommunications services and health care sectors only contributed minimally.

The Market Vectors ChinaAMC SME-ChiNext ETF traded for a little more than five months. During this period, the industrial, financial, and information technology were the largest contributors to performance. The energy sector, however, posted a small negative return for this period.

Egypt

With his landslide victory at the end of May, newly elected President Abdel Fattah al-Sisi, the country's former army chief, won a firm enough mandate to tackle the country's economic woes. As early as June 24, in a speech in Cairo, he

was seeking to forewarn Egyptians of austerity measures² to come. At the end of November, an IMF official was reported as saying that the country's economy had started to recover after four years of slow activity³ Each sector in the domestic market, except the consumer staples and energy sectors, contributed to a positive return for the year. The financial sector was by far the greatest contributor to performance. In addition to having the highest average weighting, small-cap companies also made the most significant contribution to return. Regardless of the significant average weighting of mid-cap companies, their contribution to return lagged far behind those of both their larger and smaller peers.

Gulf States

Anchored on solid growth of 3.7% in 2013 and budget surpluses,⁴ the GCC economies enjoyed a healthy first half to 2014. The second half of the year, however, was somewhat more challenging for the Gulf States, caught as they were between the Scylla of falling oil prices and the Charybdis of regional conflict.⁵ However, the Fund still ended the year posting a positive return for the 12 month period. With tensions high in the Middle East and in an attempt to shore up unity among GCC members, in mid-November Saudi's 90-year old King Abdullah engineered reconciliation between council members and Qatar, which it had accused, among other things, of supporting Islamist militants both in Syria and elsewhere.⁶ Geographically, the United Arab Emirates, with the greatest average country weighting, contributed most significantly to performance, followed by Qatar and Oman—in that order. In terms of sector, financial stocks were the greatest contributors, with industrial and telecommunication services stocks providing the only other significant contributions. Large-cap stocks contributed to performance, while mid- and small-cap stocks detracted from performance.

4

India

Following a somewhat lackluster first quarter and Narendra Modi's election as India's new prime minister, the performance of smaller companies strengthened firmly toward the end of the first half of the year. At 5.5% for the half of the year, economic growth was higher than the 4.9% figure for the same period last year.⁷ The third quarter of the year, though, brought with it a slowdown in growth, with the Indian economy only expanding 5.3%, in contrast with 5.7% during the previous quarter.⁸ However, since his election in May, Mr. Modi has demonstrated his pro-business stance in a number of different ways, not least by permitting more foreign investment in various of the country's industrial sectors, including defense.⁹ After the Market Vectors ChinaAMC A-Share ETF, the Fund posted the highest total return of any in the Market Vectors suite of international funds. All sectors, except three, contributed positively to return. The consumer discretionary, industrial, and financial sectors were the greatest contributors to performance. While posting negative returns, the detraction from performance of each of the consumer staples, energy, and telecommunication services sectors was minimal.

Indonesia

Indonesia was another country with an election cycle in 2014. The presidential race was won by the governor of Jakarta, Joko Widodo, who beat Prabowo Subianto, a former army general. Faced with a moribund economy and a potentially widening current account deficit,¹⁰ action sooner rather than later was required of the president. As a first step, fuel prices (heavily subsidized) were raised 30% on November 18, while, on the same day, Bank Indonesia increased its benchmark interest rate by 25 bps to 7.75%. At the same time, the bank reconfirmed its intention, in the near term, to focus on economic stability over growth.¹¹ For medium- and large-cap names, there were positive contributions to return across all sectors except for energy, with financial stocks providing by far the most significant contribution to performance. Among small-cap stocks, three sectors contributed positively to return. The telecommunication services and financial sectors were the two greatest contributors to performance. Consumer discretionary stocks provided a lesser, but still positive, contribution to performance. Negative returns from small-cap energy companies in particular detracted most from performance.

Israel

After a promising first half year—two quarters of economic growth—and an annual growth rate of 3.0%, third quarter figures reflected the high toll Israel's 50-day war in Gaza³ took on its economic health: the economy contracted, for the first time in five years, by approximately 0.4%.¹⁴ Current Prime Minister Benjamin Netanyahu's decision to hold early elections in March 2015 is being seen by many as more of a hindrance than a help in efforts to revive the country's slowing economy!¹⁵ Over the 12 month period, health care and information technology stocks, constituting the two sectors with the highest individual average weightings, were the Fund's most significant contributors to performance. The energy and financial sectors were the greatest detractors from performance. While large-cap stocks

contributed positively to performance, small-cap stocks detracted significantly.

Poland

Poland continues to be the EU's largest emerging economy!⁶ In the context of economic stagnation in the Eurozone, the country's performance in the latter half of 2014 was robust. In the third quarter, its economy grew, in annual terms, by 3.3%—better than expected—and continued to benefit from relatively low private and public debt. Despite this strength, however, with the fluid situation in Ukraine and slow economic growth in other EU countries, the outlook for Poland remains uncertain. Polish stocks slid over the last quarter of the year, in particular, in December. No sector performed positively over the 12 month period, with the financial, materials, and consumer staples sectors detracting most from performance. However, the negative returns from information technology and consumer discretionary sectors detracted only minimally from performance.

Russia

The consequences of Russia's involvement in Ukraine, in the form of European and U.S. sanctions, together with the drop in oil prices during the year, took a heavy toll on the country's economy in 2014. From earlier expectations of 1.2% growth in 2015 (0.5% in 2014), by early December 2014, the Russian Economy Ministry saw the country's GDP contracting by 0.8% in 2015.¹⁸ After a rough period in March and April, both the small- and large-cap funds saw a considerable improvement in performance through May and June. From early July,

MARKET VECTORS INTERNATIONAL ETFs

(unaudited)

however, it was downhill through to the end of the year. No sector contributed a positive return to the large-cap fund, with energy and telecommunication services serving as the two worst performing sectors. In the small-cap fund, companies in the utilities sector, closely followed by those in the financial sector, detracted most from performance. As with the large-cap fund, no sector performed positively.

Vietnam

With stability restored once again on May 18, 2014, following a number of deaths during violent riots against both foreign- and, particularly, Chinese-owned factories in the provinces, Vietnamese companies posted gains through the beginning of September. Thereafter, however, their stocks declined, albeit haltingly, until late December. This was despite moves by the government at the end of November to open up the property market to foreigners.¹⁹ A forecast of economic growth in 2014 from the World Bank in early December revised growth upward from 5.4% to 5.6%.²⁰ This did not, however, prevent the Fund posting a positive return for the 12 month period. With an average weighting of approximately 49%, small-cap companies made by far the greatest contribution to return. The energy, consumer discretionary, and financial sectors were the three most significant contributors to return. However, the consumer staples and materials sectors both detracted from performance.

All indices are unmanaged and include the reinvestment of all dividends, but do not reflect the payment of transaction costs, advisory fees or expenses that are associated with an investment in the fund. MARKET VECTORS AFRICA INDEX ETF

PERFORMANCE COMPARISON

December 31, 2014 (unaudited)

**Hypothetical Growth of
\$10,000 (Since
Inception)**

This chart shows the value of a hypothetical \$10,000 investment in the Fund at NAV and at Share Price over the past 10 fiscal year periods or since inception (for funds lacking 10-year records). The result is compared with the Fund's benchmark.

Total Return	Share Price¹	NAV	MVAFKTR²
One Year	(13.68)%	(12.86)%	(11.10)%
Five Years	0.92 %	1.31 %	2.44 %
Life* (annualized)	(4.33)%	(4.18)%	(2.77)%
Life* (cumulative)	(24.92)%	(24.16)%	(16.64)%

* since 7/10/08

Index data prior to June 21, 2013 reflects that of the Dow Jones Africa Titans 50 IndexSM. From June 21, 2013, forward, the index data reflects that of the Market Vectors[®] GDP Africa Index (MVAFKTR). All Index history reflects a blend of the performance of the aforementioned Indexes.

Commencement date for the Market Vectors Africa Index ETF was 7/10/08.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (7/10/08) to the first day of secondary market trading in shares of the Fund (7/14/08), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888. MKT.VCTR or by visiting marketvectorsetfs.com.

Gross Expense Ratio 0.80% / Net Expense Ratio 0.80%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.78% of the Fund's average daily net assets per year until at least May 1, 2015. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units

MARKET VECTORS AFRICA INDEX ETF

PERFORMANCE COMPARISON

December 31, 2014 (unaudited)

are issued and redeemed principally in cash. Shares may trade at a premium or discount to their NAV in the secondary market.

The “Net Asset Value” (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF’s intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

²Market Vectors[®] GDP Africa Index (MVAFKTR) tracks the performance of the largest and most liquid companies in Africa. The weighting of a country in the index is determined by the size of its gross domestic product.

Market Vectors GDP Africa Index (the “Index”) is the exclusive property of Market Vectors Index Solutions GmbH (a wholly owned subsidiary of the Adviser), which has contracted with Solactive AG to maintain and calculate the Index. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards Market Vectors Index Solutions GmbH, Solactive AG has no obligation to point out errors in the Index to third parties. Market Vectors Africa Index ETF (the “Fund”) is not sponsored, endorsed, sold or promoted by Market Vectors Index Solutions GmbH and Market Vectors Index Solutions GmbH makes no representation regarding the advisability of investing in the Fund.

MARKET VECTORS BRAZIL SMALL-CAP ETF

PERFORMANCE COMPARISON

December 31, 2014 (unaudited)

**Hypothetical Growth of
\$10,000 (Since
Inception)**

This chart shows the value of a hypothetical \$10,000 investment in the Fund at NAV and at Share Price over the past 10 year periods or since inception (for funds lacking 10-year records). The result is compared with the Fund's benchmark.

Total Return	Share Price ¹	NAV	MVBRFTR ²
One Year	(25.75)%	(25.19)%	(24.73)%
Five Years	(11.03)%	(10.52)%	(9.79)%
Life* (annualized)	2.09 %	2.23 %	2.90 %
Life* (cumulative)	12.38 %	13.24 %	17.49 %

* since 5/12/09

Commencement date for the Market Vectors Brazil Small-Cap ETF was 5/12/09.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement,¹ for the period from commencement (5/12/09) to the first day of secondary market trading in shares of the Fund (5/14/09), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting marketvectorsetfs.com.

Gross Expense Ratio 0.66% / Net Expense Ratio 0.60%

Van Eck Associates Corporation (the “Adviser”) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.59% of the Fund’s average daily net assets per year until at least May 1, 2015. During such time, the expense limitation is expected to continue until the Fund’s Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called “creation units” and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in cash. Shares may trade at a premium or discount to their NAV in the secondary market.

The “Net Asset Value” (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF’s intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

MARKET VECTORS BRAZIL SMALL-CAP ETF

PERFORMANCE COMPARISON

December 31, 2014 (unaudited)

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Market Vectors® Brazil Small-Cap Index (MVBRFTR) is a rules-based, modified market capitalization-weighted, float-adjusted index comprised of publicly traded small-capitalization companies that are domiciled and primarily listed on an exchange in Brazil, or that generate at least 50% of their revenues in Brazil.

Market Vectors Brazil Small-Cap Index (the “Index”) is the exclusive property of Market Vectors Index Solutions GmbH (a wholly owned subsidiary of the Adviser), which has contracted with Solactive AG to maintain and calculate the Index. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards Market Vectors Index Solutions GmbH, Solactive AG has no obligation to point out errors in the Index to third parties. Market Vectors Brazil Small-Cap ETF (the “Fund”) is not sponsored, endorsed, sold or promoted by Market Vectors Index Solutions GmbH and Market Vectors Index Solutions GmbH makes no representation regarding the advisability of investing in the Fund.

Index data prior to June 21, 2013 reflects that of the Dow Jones GCC Titans 40 IndexSM. From June 21, 2013, forward, the index data reflects that of the Market Vectors[®] GDP GCC Index (MVMESTR). All Index history reflects a blend of the performance of the aforementioned Indexes.

Commencement date for the Market Vectors Gulf States Index ETF was 7/22/08.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (7/22/08) to the first day of secondary market trading in shares of the Fund (7/24/08), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted.

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSR

Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting marketvectorsetfs.com.

Gross Expense Ratio 2.07% / Net Expense Ratio 0.99%

Van Eck Associates Corporation (the “Adviser”) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.98% of the Fund’s average daily net assets per year until at least May 1, 2015. During such time, the expense limitation is expected to continue until the Fund’s Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called “creation units” and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in cash. Shares may trade at a premium or discount to their NAV in the secondary market.

The “Net Asset Value” (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the

BlueStar Israel Global Index™ (BLSNTR) is a rules-based index intended to track the overall performance of publicly traded companies that are generally considered by the Indexer to be Israeli and Israeli linked companies. It primarily includes the largest and the most liquid companies, as well as mid-cap and small-cap companies that display sufficient liquidity.

The BlueStar Israel Global Index™ (the “Index”) is the exclusive property and a trademark of BlueStar Global Investors LLC and has been licensed for use for certain purposes by Van Eck Associates Corporation for Market Vectors Israel ETF (the “Fund”) based on the Index. The Fund is not sponsored, endorsed, sold or promoted by BlueStar Global Investors LLC, and BlueStar Global Investors LLC makes no representation regarding the advisability of trading in the Fund.

MARKET VECTORS POLAND ETF

PERFORMANCE COMPARISON

December 31, 2014 (unaudited)

**Hypothetical Growth of
\$10,000 (Since
Inception)**

This chart shows the value of a hypothetical \$10,000 investment in the Fund at NAV and at Share Price over the past 10 fiscal year periods or since inception (for funds lacking 10-year records). The result is compared with the Fund's benchmark.

Total Return	Share Price¹	NAV	MVPLNDTR²
One Year	(17.46)%	(16.90)%	(16.32)%
Five Years	(2.57)%	(2.54)%	(2.12)%
Life* (annualized)	(2.91)%	(2.98)%	(2.51)%
Life* (cumulative)	(13.96)%	(14.32)%	(12.15)%

* since 11/24/09

Commencement date for the Market Vectors Poland ETF was 11/24/09.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (11/24/09) to the first day of secondary market trading in shares of the Fund (11/25/09), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting marketvectorsetfs.com.

Gross Expense Ratio 0.99% / Net Expense Ratio 0.60%

Van Eck Associates Corporation (the “Adviser”) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.60% of the Fund’s average daily net assets per year until at least May 1, 2015. During such time, the expense limitation is expected to continue until the Fund’s Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called “creation units” and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The “Net Asset Value” (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF’s intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

MARKET VECTORS POLAND ETF

PERFORMANCE COMPARISON

December 31, 2014 (unaudited)

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Market Vectors® Poland Index (MVPLNDTR) is a rules-based, modified market capitalization-weighted, float-adjusted index comprised of publicly traded companies that are domiciled and primarily listed in Poland, or that generate at least 50% of their revenues in Poland.

Market Vectors Poland Index (the “Index”) is the exclusive property of Market Vectors Index Solutions GmbH (a wholly owned subsidiary of the Adviser), which has contracted with Solactive AG to maintain and calculate the Index. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards Market Vectors Index Solutions GmbH, Solactive AG has no obligation to point out errors in the Index to third parties. Market Vectors Poland ETF (the “Fund”) is not sponsored, endorsed, sold or promoted by Market Vectors Index Solutions GmbH and Market Vectors Index Solutions GmbH makes no representation regarding the advisability of investing in the Fund.

MARKET VECTORS ETF TRUST

EXPLANATION OF EXPENSES

(unaudited)

Hypothetical \$1,000 investment at beginning of period

As a shareholder of a Fund, you incur operating expenses, including management fees and other Fund expenses. This disclosure is intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The disclosure is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, July 1, 2014 to December 31, 2014.

Actual Expenses

The first line in the table below provides information about account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period."

Hypothetical Example for Comparison Purposes

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on your Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as program fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Expenses are equal to the Fund's annualized expense ratio (for the six months ended December 31, 2014)

* multiplied by the average account value over the period, multiplied by the number of days in the most recent fiscal half year divided by the number of days in the fiscal year (to reflect the one-half year period).

** Assumes annual return of 5% before expenses

Expenses are equal to the Fund's annualized expense ratio (for the period from July 23, 2014 (commencement of operations) to December 31, 2014) multiplied by the average account value over the period, multiplied by the number of days in the most recent fiscal half year divided by the number of days in the fiscal year (to reflect the one-half year period).

During the year ended December 31, 2014, transfers of securities from Level 1 to Level 2 were \$15,712,004 and transfers from Level 2 to Level 1 were \$6,831,399. These transfers resulted primarily from changes in certain foreign

securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

The following table reconciles the valuation of the Fund's Level 3 investment securities and related transactions during the year ended December 31, 2014:

	Real Estate Investment Trusts Nigeria
Balance as of December 31, 2013	\$ 519
Realized gain (loss)	—
Net change in unrealized appreciation (depreciation)	117
Purchases	—
Sales	—
Transfers in and/or out of level 3	—
Balance as of December 31, 2014	\$ 636

During the year ended December 31, 2014, transfers of securities from Level 1 to Level 2 were \$2,301,647. These transfers resulted primarily from changes in securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

During the year ended December 31, 2014, transfers of securities from Level 2 to Level 1 were \$1,928,200. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by the pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.
