**MARKET VECTORS CHINAAMC A-SHARE ETF****SUMMARY INFORMATION****INVESTMENT OBJECTIVE**

Market Vectors ChinaAMC A-Share ETF (the Fund) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the CSI 300 Index\* (the CSI 300 Index).

**FUND FEES AND EXPENSES**

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund (Shares).

**Shareholder Fees** (*fees paid directly from your investment*) None  
**Annual Fund Operating Expenses**  
*(expenses that you pay each year as a percentage of the value of your investment)*

Management Fee	0.50%
Other Expenses	1.19%

Total Annual Fund Operating Expenses <sup>(a)</sup>	1.69%
Fee Waivers and Expense Reimbursement <sup>(a)</sup>	-0.97%

Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement <sup>(a)</sup>	0.72%
--	-------

<sup>(a)</sup> Van Eck Associates Corporation (the Adviser) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.72% of the Fund's average daily net assets per year until at least May 1, 2016. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

**EXPENSE EXAMPLE**

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

**YEAR EXPENSES**

1	\$	74
3	\$	438
5	\$	827
10	\$	1,917

**PORTFOLIO TURNOVER**

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or turns over its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 59% of the average value of its portfolio.

**PRINCIPAL INVESTMENT STRATEGIES**

The Fund normally invests at least 80% of its total assets in securities that comprise the Fund's benchmark index and/or in investments that have economic characteristics that are substantially identical to the economic characteristics of the securities that comprise its benchmark index. The CSI 300 Index is comprised of the largest and most liquid stocks in the Chinese A-share market. As of December 31, 2014, the CSI 300 Index included 300 securities of companies with a market capitalization

\* The CSI  
300 Index

registered  
trademark  
of China  
Securities  
Index Co.,  
Ltd.

## MARKET VECTORS CHINAAMC A-SHARE ETF (continued)

range of between approximately \$1.8 billion and \$286.1 billion and a weighted average market capitalization of \$28.1 billion. These amounts are subject to change. The Fund's 80% investment policy is non-fundamental and may be changed without shareholder approval upon 60 days' prior written notice to shareholders.

The Fund, using a passive or indexing investment approach, attempts to approximate the investment performance of the CSI 300 Index by investing in a portfolio of securities that generally replicates the CSI 300 Index.

The CSI 300 Index is comprised of China A-shares (A-shares). The CSI 300 Index is a modified free-float market capitalization weighted index composed of the largest and most liquid stocks in the Chinese A-share market. Constituent stocks for the CSI 300 Index must have been listed for more than three months (unless the stock's average daily A-share market capitalization since its initial listing ranks among the top 30 of all A-shares) and must not be experiencing obvious abnormal fluctuations or market manipulation.

The Fund will seek to achieve its investment objective by primarily investing directly in A-shares. A-shares are issued by companies incorporated in the People's Republic of China (China or the PRC). A-shares are traded in renminbi (RMB) on the Shenzhen or Shanghai Stock Exchanges. The A-share market in China is made available to domestic PRC investors and foreign investors through the Hong Kong-Shanghai Stock Connect (Stock Connect) program and through licenses obtained under the Renminbi Qualified Foreign Institutional Investor (RQFII) or Qualified Foreign Institutional Investor (QFII) programs. A RQFII or QFII license may be obtained by application to the China Securities Regulatory Commission (CSRC). After obtaining a RQFII or QFII license, the RQFII or QFII would also apply to China's State Administration of Foreign Exchange (SAFE) for a specific aggregate dollar amount investment quota in which the RQFII or QFII can invest in A-shares. Investment companies are not currently within the types of entities that are eligible for a RQFII or QFII license. Because the Fund does not satisfy the criteria to qualify as a RQFII or QFII itself, the Fund intends to invest directly in A-shares via Stock Connect, as described below, or via the A-share quota granted to the Fund's sub-adviser, China Asset Management (Hong Kong) Limited (the Sub-Adviser), by SAFE (RQFII quota). The Sub-Adviser has obtained RQFII status and has been granted an RQFII quota, which the Sub-Adviser will use to invest the portion of the Fund's assets allocated to it by the Adviser in A-shares. At such time that the Sub-Adviser has utilized its entire RQFII quota, the Sub-Adviser may, subject to applicable regulations, apply for an increase of the RQFII quota. Assets not allocated to the Sub-Adviser for investment directly in A-shares will be managed by the Adviser. The Fund may also invest in A-shares listed and traded on the Shanghai Stock Exchange through the Hong Kong-Shanghai Stock Connect (Stock Connect) program. Stock Connect is a securities trading and clearing program between the Shanghai Stock Exchange, the Stock Exchange of Hong Kong Limited (SEHK), China Securities Depository and Clearing Corporation Limited and Hong Kong Securities Clearing Company Limited designed to permit mutual stock market access between mainland China and Hong Kong by allowing investors to trade and settle shares on each market via their local exchanges. Other exchanges in China, including the Shenzhen Stock Exchange, may participate in Stock Connect in the future. Trading through Stock Connect is subject to aggregate investment quotas that limit total purchases and sales through Stock Connect as well as daily quotas that limit the maximum daily net purchases on any particular day. Accordingly, the Fund's direct investments in A-shares will be limited by the quota allocated to the RQFII or QFII and by the aggregate investment quotas, including daily quotas, that limit total purchases and/or sales through Stock Connect.

The Fund may also invest a portion of its assets in swaps, futures contracts and other types of derivative instruments that have economic characteristics that are substantially identical to the economic characteristics of A-shares, including swaps on the CSI 300 Index, swaps on the A-shares which comprise the CSI 300 Index and/or swaps on funds that seek to replicate the performance of the CSI 300 Index or funds that invest in A-shares or the Fund may

invest directly in shares of such funds. The notional values of these swaps, futures contracts and other derivative instruments will count towards the Fund's 80% investment policy and cash and cash equivalents related to the swaps, futures contracts and other derivative instruments will not be counted towards the calculation of total assets. The Fund may also invest in exchange-traded funds (ETFs), including ETFs listed on a Hong Kong or other foreign exchange.

The Fund may concentrate its investments in a particular industry or group of industries to the extent that the CSI 300 Index concentrates in an industry or group of industries. As of December 31, 2014, the CSI 300 Index was concentrated in the financial services sector, and the industrials sector represented a significant portion of the CSI 300 Index.

#### **PRINCIPAL RISKS OF INVESTING IN THE FUND**

**Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund, each of which could significantly and adversely affect the value of an investment in the Fund.**

**Risk of the RQFII Regime and the Fund's Principal Investment Strategy.** Because the Fund will not be able to invest directly in A-shares in excess of the Sub-Adviser's RQFII quota and beyond the limits that may be imposed by Stock Connect, the size of the Fund's direct investment in A-shares may be limited. In addition, the RQFII quota of the Sub-Adviser may be reduced or revoked by the Chinese regulators if, among other things, the Sub-Adviser fails to observe SAFE and other applicable Chinese regulations. The Fund cannot predict what would occur if the RQFII quota of the Sub-Adviser or RQFII quotas generally were reduced or eliminated, although such an occurrence would likely have a material adverse effect on the Fund, including the requirement that the Fund dispose of certain or all of its A-shares holdings, and may adversely affect the willingness and ability of potential swap counterparties to engage in swaps with the Fund linked to the performance of A-shares. These risks are compounded by the fact that, at present, there are only a limited number of firms and potential counterparties that have RQFII or QFII status or are willing and able to enter into swap transactions linked to the performance of A-shares. Therefore, any such reduction or elimination may have a material adverse effect on the ability of the Fund to achieve its investment objective. If the Fund is unable to obtain sufficient exposure to the performance of the CSI 300 Index due to the limited availability of the Sub-Adviser's RQFII quota or other investments that provide exposure to the performance of A-shares, the Fund could, among other things, as a defensive measure limit or suspend creations until the Adviser and/or the Sub-Adviser determine that the requisite exposure to the CSI 300 Index is obtainable. During the period that creations are suspended, the Fund could trade at a significant premium or discount to its net asset value ( NAV ) and could experience substantial redemptions. Alternatively, the Fund could change its investment objective by, for example, seeking to track an alternative index focused on Chinese-related stocks other than A-shares or other appropriate investments, or decide to liquidate the Fund.

The A-share market is volatile with a risk of suspension of trading in a particular security or government intervention. Securities on the A-share market, including securities in the CSI 300 Index, may be suspended from trading without an indication of how long the suspension will last, which may impair the liquidity of such securities. The regulations which regulate investments by RQFIIs in the PRC and the repatriation of capital from RQFII investments are relatively new. The application and interpretation of such investment regulations are therefore relatively untested and there is no certainty as to how they will be applied. The PRC authorities and regulators have been given wide discretion in such investment regulations and there is no precedent or certainty as to how such discretion may be exercised now or in the future. The application and interpretation of such investment regulations may adversely affect the Fund.

Specific rules governing taxes on capital gains derived by RQFIIs and QFIIs from the trading of PRC securities have yet to be announced. In the absence of specific rules, the tax treatment of the Fund's investments in A-shares through the Sub-Adviser's RQFII quota should be governed by the general PRC tax provisions and provisions applicable to RQFIIs. Under these provisions, the Fund is generally subject to a tax of 10% on any dividends, distributions and interest it receives from its investment in PRC securities. In addition, a nonresident enterprise is subject to withholding tax at a rate of 10% on its capital gains. Withholding taxes on dividends, interest and capital gains may be taxed at a reduced rate under an applicable tax treaty, but the application of such treaties for an RQFII acting on behalf of a foreign investor (*i.e.*, the Sub-Adviser on behalf of the Fund) is also uncertain. It is also unclear how China's business tax may apply to activities of an RQFII such as the Sub-Adviser and how such application may be affected by tax treaty provisions. While it is unclear whether this tax will be applied to investments by an RQFII such as the Sub-Adviser or what the methodology for calculating or collecting the tax will be, the PRC's Ministry of Finance announced that, effective November 17, 2014, the corporate income tax for QFIIs and RQFII investments via Stock Connect, with respect to capital gains, will be temporarily lifted for a period of three years. The current PRC tax laws and regulations and interpretations thereof may be revised or amended in the future, including with respect to the possible liability of the Fund for obligations of the Sub-Adviser. Any revision or amendment in tax laws and regulations may adversely affect the Fund. The Fund, prior to December 22, 2014, reserved 10% of its realized and

unrealized gains from its A-share investments to apply towards withholding tax liability with respect to realized and unrealized gains from the Fund's investments in A-shares of land-rich enterprises, which are companies that have greater than 50% of their assets in land or real properties in the PRC. The tax reserve was reflected in the Fund's daily NAV calculations as a deduction from the Fund's NAV. It is expected that the PRC will, in 2015, begin collecting capital gains taxes from QFIIs and RQFIIs for investments realized between November 17, 2009 and November 16, 2014, although no formal announcement has been made. If the PRC begins applying tax rules regarding the taxation of capital gains from A-share investment to RQFIIs, such as the Sub-Adviser, and/or begins collecting capital gains taxes on such investments (whether for the period described above or otherwise), the Fund could be subject to tax liability for any tax payments for which reserves have not been made or that were not previously withheld. The impact of any such tax liability on the Fund's return could be substantial. The Fund may also be liable to the Sub-Adviser for any tax that is imposed on the Sub-Adviser by the PRC with respect to the Fund's investments.

If the Fund's direct investments in A-shares through the Sub-Adviser's RQFII quota become subject to repatriation restrictions, the Fund may be unable to satisfy distribution requirements applicable to regulated investment companies (RICs) under the

**MARKET VECTORS CHINAAMC A-SHARE ETF (continued)**

Internal Revenue Code of 1986, as amended (the Internal Revenue Code), and be subject to income and excise tax at the Fund level. In addition, the Fund could be required to recognize unrealized gains, pay taxes and make distributions before re-qualifying for taxation as a RIC. See the prospectus under Shareholder Information Tax Information Taxes on Distributions for more information. The Fund may elect, for U.S. federal income tax purposes, to treat Chinese taxes (including withholding taxes) paid by the Fund as paid by its shareholders. Even if the Fund is qualified to make that election and does so this treatment will not apply with respect to amounts the Fund reserves in anticipation of the imposition of withholding taxes not currently in effect (as discussed above). If these amounts are used to pay any tax liability of the Fund in a later year, they will be treated as paid by the shareholders in such later year, even if they are imposed with respect to income of an earlier year. See the prospectus under Shareholder Information Tax Information for a further description of this risk.

**Special Risk Considerations of Investing in China and A-shares.** Investing in securities of Chinese companies, including A-shares, involves certain risks and considerations not typically associated with investing in securities of U.S. issuers, including, among others, (i) the small size of the market for Chinese securities and the low volume of trading, resulting in lack of liquidity and in price volatility, (ii) currency devaluations and other currency exchange rate fluctuations or blockage, (iii) the nature and extent of intervention by the Chinese government in the Chinese securities markets, whether such intervention will continue and the impact of such intervention or its discontinuation, (iv) the risk of nationalization or expropriation of assets, (v) the risk that the Chinese government may decide not to continue to support economic reform programs, (vi) limitations on the use of brokers, (vii) higher rates of inflation, (viii) greater political, economic and social uncertainty, (ix) market volatility caused by any potential regional or territorial conflicts or natural disasters, (x) the risk of increased trade tariffs, embargoes and other trade limitations and (xi) custody risks associated with investing via the Stock Connect program or through a RQFII, where due to requirements regarding establishing a custody account in the joint names of the Fund and the Sub-Adviser the Fund's assets may not be as well protected from the claims of creditors than if the Fund had an account in its name only.

The economy of China differs, often unfavorably, from the U.S. economy in such respects as structure, general development, government involvement, wealth distribution, rate of inflation, growth rate, interest rates, allocation of resources and capital reinvestment, among others. The Chinese central government has historically exercised substantial control over virtually every sector of the Chinese economy through administrative regulation and/or state ownership and actions of the Chinese central and local government authorities continue to have a substantial effect on economic conditions in China. In addition, the Chinese government has from time to time taken actions that influence the prices at which certain goods may be sold, encourage companies to invest or concentrate in particular industries, induce mergers between companies in certain industries and induce private companies to publicly offer their securities to increase or continue the rate of economic growth, control the rate of inflation or otherwise regulate economic expansion. It may do so in the future as well, potentially having a significant adverse effect on economic conditions in China.

The Sub-Adviser, as a licensed RQFII, is currently permitted to repatriate RMB daily and is not subject to RMB repatriation restrictions or prior approval. However, there is no assurance that RQFIIs may not be subject to restrictions or prior approval requirements in the future. Any additional restrictions imposed on the Sub-Adviser or RQFIIs generally may have an adverse effect on the Fund's ability to invest directly in A-shares and its ability to meet redemption requests.

The Chinese securities markets are emerging markets characterized by relatively low trading volume, resulting in substantially less liquidity and greater price volatility. Liquidity risks may be more pronounced for the A-share market

than for Chinese securities markets generally because the A-share market is subject to greater government restrictions and control, including trading suspensions as discussed above. Price fluctuations of A-shares are currently limited to either 5% or 10% per trading day. In addition, there is less regulation and monitoring of Chinese securities markets and the activities of investors, brokers and other participants than in the United States. Accounting, auditing and financial reporting standards in China are different from U.S. standards and, therefore, disclosure of certain material information may not be made. In addition, less information may be available to the Fund and other investors than would be the case if the Fund's investments were restricted to securities of U.S. issuers. There is also generally less governmental regulation of the securities industry in China, and less enforcement of regulatory provisions relating thereto, than in the United States. Moreover, it may be more difficult to obtain a judgment in a court outside the United States.

The Chinese government strictly regulates the payment of foreign currency denominated obligations and sets monetary policy. In addition, the Chinese economy is export-driven and highly reliant on trade. Adverse changes to the economic conditions of its primary trading partners, such as the United States, Japan and South Korea, would adversely impact the Chinese economy and the Fund's investments. Moreover, a slowdown in other significant economies of the world, such as the United States, the European Union and certain Asian countries, may adversely affect economic growth in China. An economic downturn in China would adversely impact the Fund's investments.

Emerging markets such as China can experience high rates of inflation, deflation and currency devaluation. The value of the RMB may be subject to a high degree of fluctuation due to, among other things, changes in interest rates, the effects of

monetary policies issued by the PRC, the United States, foreign governments, central banks or supranational entities, the imposition of currency controls or other national or global political or economic developments. The Fund invests a significant portion of its assets in investments denominated in RMB and the income received by the Fund will principally be in RMB. The Fund's exposure to the RMB and changes in value of the RMB versus the U.S. dollar may result in reduced returns for the Fund. Moreover, the Fund may incur costs in connection with conversions between U.S. dollars and RMB. The RMB is currently not a freely convertible currency. The Chinese government places strict regulation on RMB and sets the value of the RMB to levels dependent on the value of the U.S. dollar, but the Chinese government has been under pressure to manage the currency in a less restrictive fashion so that it is less correlated to the U.S. dollar. The Chinese government's imposition of restrictions on the repatriation of RMB out of mainland China may limit the depth of the offshore RMB market and reduce the liquidity of the Fund's investments. There may not be sufficient amounts of RMB for the Fund to be fully invested because the Fund has to convert U.S. dollars received from the purchase of Creation Units (defined herein) into RMB to purchase A-shares. As a result, these restrictions may adversely affect the Fund and its investments.

**Risks of Investing through Stock Connect.** The Fund may invest in A-shares listed and traded on the Shanghai Stock Exchange through Stock Connect, or on such other stock exchanges in China which participate in Stock Connect from time to time or in the future. Trading through Stock Connect is subject to a number of restrictions that may affect the Fund's investments and returns. For example, trading through Stock Connect is subject to aggregate investment quotas that limit total purchases and sales through Stock Connect as well as daily quotas that limit the maximum daily net purchases on any particular day, each of which may restrict or preclude the Fund's ability to invest in Stock Connect A-shares. In addition, investments made through Stock Connect are subject to trading, clearance and settlement procedures that are untested in the PRC, which could pose risks to the Fund. Moreover, Stock Connect A-shares generally may not be sold, purchased or otherwise transferred other than through Stock Connect in accordance with applicable rules. A primary feature of Stock Connect is the application of the home market's laws and rules applicable to investors in A-shares. Therefore, the Fund's investments in Stock Connect A-shares are generally subject to PRC securities regulations and listing rules, among other restrictions. Finally, uncertainties in PRC tax rules governing taxation of income and gains from investments in Stock Connect A-shares could result in unexpected tax liabilities for the Fund. The withholding tax treatment of dividends and capital gains payable to overseas investors currently is unsettled.

The Stock Connect program is a pilot program in its initial stages. Further developments are likely and there can be no assurance as to the program's continued existence or whether future developments regarding the program may restrict or adversely affect the Fund's investments or returns. In addition, the application and interpretation of the laws and regulations of Hong Kong and the PRC, and the rules, policies or guidelines published or applied by relevant regulators and exchanges in respect of the Stock Connect program are uncertain, and they may have a detrimental effect on the Fund's investments and returns.

**Risk of Investing in Swaps.** The Fund may invest in swaps on the CSI 300 Index or on securities comprising the CSI 300 Index. The Fund may also invest in swaps on other funds that track the CSI 300 Index or funds that invest in A-shares. The use of swap agreements entails certain risks, which may be different from, and possibly greater than, the risks associated with investing directly in the underlying asset for the swap agreement. Investments in swaps linked to the performance of A-shares are subject to general risks associated with A-shares and the RQFII/QFII system discussed above in **Risk of the RQFII Regime and the Fund's Principal Investment Strategy.**

Because a swap is an obligation of the counterparty rather than a direct investment in A-shares, the Fund may suffer losses potentially equal to, or greater than, the full value of the swap if the counterparty fails to perform its obligations under the swap as a result of bankruptcy or otherwise. Any loss would result in a reduction in the NAV of the Fund

and may impair the Fund's ability to achieve its investment objective. The counterparty risk associated with the Fund's investments is expected to be greater than most other funds because there are only a limited number of counterparties that are willing and able to enter into swaps on A-shares. In fact, because there are so few potential counterparties, the Fund, subject to applicable law, may enter into swap transactions with as few as one counterparty at any time.

The swaps market is subject to extensive regulation under the Dodd-Frank Wall Street Reform and Consumer Protection Act ( Dodd-Frank Act ) and certain Securities and Exchange Commission ( SEC ) and Commodity Futures Trading Commission ( CFTC ) rules promulgated thereunder. It is possible that developments in the swaps market, including new and additional government regulation, could result in higher Fund costs and expenses and could adversely affect the Fund's ability, among other things, to enter into or to terminate existing swap agreements or to realize amounts to be received under such agreements.

Investments in swaps require the payment of additional ongoing fees to the counterparty to the swap. In addition, the Fund's investments in swaps and other derivative instruments may be less tax-efficient than direct investment in A-shares and may be subject to special U.S. federal income tax rules that could negatively affect the Fund. Investments in swaps and other

**MARKET VECTORS CHINAAMC A-SHARE ETF (continued)**

derivatives may be subject to special U.S. federal income tax rules that could negatively affect the character, timing and amount of income earned by the Fund (*e.g.*, by causing amounts that would be capital gain to be taxed as ordinary income or to be taken into income earlier than would otherwise be necessary). Also, the Fund may be required to periodically adjust its positions in its swaps and derivatives to comply with certain regulatory requirements which may further cause these investments to be less efficient than a direct investment in A-shares. In addition, as further discussed in the Fund's prospectus under **Additional Information About the Fund's Investment Strategies and Risks** **Risks of Investing in the Fund** **Risk of Investing In Swaps** **Tax Risk**, because the application of these special rules may be uncertain, it is possible that the manner in which they are applied by the Fund may be determined to be incorrect and, as a result the Fund may be found to have failed to maintain its qualification as a RIC or to be subject to additional U.S. tax liability.

**Risk of Investing in Futures.** Futures contracts generally provide for the future sale by one party and purchase by another party of a specified instrument, index or commodity at a specified future time and at a specified price. The value of a futures contract tends to increase and decrease in tandem with the value of the underlying instrument. The prices of futures can be highly volatile, using futures can lower total return, can create investment leverage, and the potential loss from futures can exceed the Fund's initial investment in such contracts. Futures contracts involve the risk of mispricing or improper valuation and the risk that changes in the value of a futures contract may not correlate perfectly with the underlying indicator. Even a well-conceived futures transaction may be unsuccessful due to market events. There is also the risk of loss by the Fund of margin deposits in the event of bankruptcy of a broker with whom the Fund has an open position in the futures contract. A liquid secondary market may not always exist for the Fund's futures contract positions at any time.

**Risk of Investing in Other Funds.** The Fund may invest in shares of other funds, including ETFs. As a result, the Fund will indirectly be exposed to the risks of an investment in the underlying funds. As a shareholder in a fund (as with ETFs), the Fund would bear its ratable share of that entity's expenses. At the same time, the Fund would continue to pay its own investment management fees and other expenses. As a result, the Fund and its shareholders will be absorbing duplicate levels of fees with respect to investments in other funds, including ETFs.

**Risk of Investing in Foreign Securities.** Investments in the securities of foreign issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Because certain foreign securities markets may be limited in size, the activity of large traders may have an undue influence on the prices of securities that trade in such markets. Because the Fund may invest in securities denominated in foreign currencies and some of the income received by the Fund may be in foreign currencies, changes in currency exchange rates may negatively impact the Fund's return. The risks of investing in emerging market countries are greater than risks associated with investments in foreign developed countries. The Fund may also invest in depositary receipts which involve similar risks to those associated with investments in foreign securities.

**Risk of Investing in Emerging Market Issuers.** Investments in securities of emerging market issuers are exposed to a number of risks that may make these investments volatile in price or difficult to trade. Political risks may include unstable governments, nationalization, restrictions on foreign ownership, laws that prevent investors from getting their money out of a country and legal systems that do not protect property rights as well as the laws of the United States. Market risks may include economies that concentrate in only a few industries, securities issues that are held by only a few investors, limited trading capacity in local exchanges and the possibility that markets or issues may be

manipulated by foreign nationals who have inside information.

**Risk of Investing in the Financial Services Sector.** To the extent that the CSI 300 Index continues to be concentrated in the financial services sector, the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the financial services sector. Companies in the financial services sector may be subject to extensive government regulation that affects the scope of their activities, the prices they can charge and the amount of capital they must maintain. The profitability of companies in the financial services sector may be adversely affected by increases in interest rates, by loan losses, which usually increase in economic downturns, and by credit rating downgrades. In addition, the financial services sector is undergoing numerous changes, including continuing consolidations, development of new products and structures and changes to its regulatory framework. Furthermore, some companies in the financial services sector perceived as benefitting from government intervention in the past may be subject to future government-imposed restrictions on their businesses or face increased government involvement in their operations. Increased government involvement in the financial services sector, including measures such as taking ownership positions in financial institutions, could result in a dilution of the Fund's investments in financial institutions. Recent developments in the credit markets may cause companies operating in the financial services sector to incur large losses, experience declines in the value of their assets and even cease operations.

**Risk of Investing in the Industrials Sector.** To the extent that the industrials sector continues to represent a significant portion of the CSI 300 Index, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the industrials sector. Companies in the industrials sector may be adversely affected by changes in government regulation, world events and economic conditions. In addition, companies in the industrials sector may be adversely affected by environmental damages, product liability claims and exchange rates.

**Risk of Investing in Medium-Capitalization Companies.** Medium-capitalization companies may be more volatile and more likely than large-capitalization companies to have narrower product lines, fewer financial resources, less management depth and experience and less competitive strength. In addition, these companies often have greater price volatility, lower trading volume and less liquidity than larger more established companies. Returns on investments in securities of medium-capitalization companies could trail the returns on investments in securities of large-capitalization companies.

**Equity Securities Risk.** The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by the Fund participate, or factors relating to specific issuers in which the Fund invests. Equity securities are subordinated to preferred securities and debt in a company's capital structure with respect to priority in right to a share of corporate income, and therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have generally also experienced significantly more volatility in those returns, although under certain market conditions fixed income securities may have comparable or greater price volatility.

**Market Risk.** The prices of the securities in the Fund are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

**Index Tracking Risk.** The Fund's return may not match the return of the CSI 300 Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the CSI 300 Index and incurs costs associated with buying and selling securities and entering into derivatives transactions, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the CSI 300 Index and raising cash to meet redemptions or deploying cash in connection with newly created Creation Units (defined herein). In addition, the Fund may not be able to invest in certain securities included in the CSI 300 Index or invest in them in the exact proportions in which they are represented in the CSI 300 Index, due to legal restrictions or limitations imposed by the Chinese Government, a lack of liquidity on stock exchanges in which such securities trade, potential adverse tax consequences or other regulatory reasons. As discussed above, one or more securities included in the CSI 300 Index may be suspended from trading and such securities would be valued by the CSI 300 Index at the last closing price. The Fund is expected to value these securities and its other investments based on fair value prices. To the extent the Fund calculates its NAV based on fair value prices and the value of the CSI 300 Index is based on securities' closing prices on local foreign markets (i.e., the value of the CSI 300 Index is not based on fair value prices), the Fund's ability to track the CSI 300 Index may be adversely affected. The Fund will be required to remit RMB to settle the purchase of A-shares and repatriate RMB to U.S. dollars to settle redemption orders. In the event such remittance is delayed or disrupted, the Fund will not be able to fully replicate the CSI 300 Index by investing in the relevant A-shares, which may lead to increased tracking error, and may need to rely on borrowings to meet redemptions, which may lead to increased expenses. Moreover, the ability of the Fund to track the CSI 300 Index may be affected by foreign exchange fluctuations as between the U.S. dollar and the RMB to the extent the CSI 300 Index is priced in Chinese RMB and the Fund is priced in U.S. dollars. The Fund may underperform the CSI 300 Index when the value of the U.S. dollar

increases relative to the value of the RMB. Additionally, the terms of the swaps require the payment of the U.S. dollar equivalent of the RMB distributions and dividends received by the QFII, meaning that the Fund is exposed to foreign exchange risk and fluctuations in value between the U.S. dollar and the RMB. For tax efficiency purposes, the Fund may sell certain securities to realize losses causing it to deviate from the performance of the CSI 300 Index. In light of the above factors, the Fund's return may deviate significantly from the return of the CSI 300 Index.

**Replication Management Risk.** An investment in the Fund involves risks similar to those of investing in any fund of equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not actively managed, unless a specific security is removed from the CSI 300 Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. Therefore, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

**Premium/Discount Risk.** Disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares may result in Shares trading at a significant premium or discount to NAV. If a

## MARKET VECTORS CHINAAMC A-SHARE ETF (continued)

shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.

**Risk of Cash Transactions.** Unlike other ETFs, the Fund expects to effect all of its creations and redemptions for cash, rather than in-kind securities. As such, investments in Shares may be less tax-efficient than an investment in a conventional ETF.

**Non-Diversified Risk.** The Fund is classified as a non-diversified investment company under the Investment Company Act of 1940, as amended (the 1940 Act). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds.

**Concentration Risk.** The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the CSI 300 Index concentrates in a particular sector or sectors or industry or group of industries. To the extent that the CSI 300 Index continues to be concentrated in the financial services sector, the Fund will be subject to the risk that economic, political or other conditions that have a negative effect on that sector will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

## PERFORMANCE

The bar chart that follows shows how the Fund performed for the calendar years shown. The table below the bar chart shows the Fund's average annual returns (before and after taxes). The bar chart and table provide an indication of the risks of investing in the Fund by comparing the Fund's performance from year to year and by showing how the Fund's average annual returns for the one year and since inception periods compared with the Fund's benchmark index and a broad measure of market performance. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after income taxes) is not necessarily indicative of how the Fund will perform in the future. Updated performance information is available online at [www.marketvectorsetfs.com](http://www.marketvectorsetfs.com).

### Annual Total Returns(%) Calendar Years

**Best Quarter:** 41.64% 4Q 14

**Worst Quarter:** -15.10% 3Q 11

**Average Annual Total Returns for the Periods Ended December 31, 2014.**

The after-tax returns presented in the table below are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax situation and may differ from those shown below. After-tax returns are not relevant to investors who hold Shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

	<b>Past One Year</b>	<b>Since Inception (10/13/2010)</b>
Market Vectors ChinaAMC A-Share ETF (return before taxes)	49.11%	4.21%
Market Vectors ChinaAMC A-Share ETF (return after taxes on distributions)	49.11%	3.73%
Market Vectors ChinaAMC A-Share ETF (return after taxes on distributions and sale of Fund Shares)	27.80%	3.02%
CSI 300 Index (reflects no deduction for fees, expenses or taxes)	51.95%	6.12%
S&P 500® Index (reflects no deduction for fees, expenses or taxes)	13.69%	16.61%

**PORTFOLIO MANAGEMENT**

**PURCHASE AND SALE OF FUND SHARES**

For important information about the purchase and sale of Fund Shares, tax information and payments to broker-dealers and other financial intermediaries, please turn to Summary Information About Purchases and Sales of Fund Shares, Taxes and Payments to Broker-Dealers and Other Financial Intermediaries on page 17 of this Prospectus.

**MARKET VECTORS CHINAAMC SME-CHINEXT ETF**

**SUMMARY INFORMATION**

**INVESTMENT OBJECTIVE**

Market Vectors ChinaAMC SME-ChiNext ETF (the Fund) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the SME-ChiNext 100 Index (the SME-ChiNext Index).

**FUND FEES AND EXPENSES**

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund (Shares).

**Shareholder Fees** (*fees paid directly from your investment*) None

**Annual Fund Operating Expenses**

(*expenses that you pay each year as a percentage of the value of your investment*)

Management Fee	0.50%
Other Expenses <sup>(a)</sup>	0.16%

Total Annual Fund Operating Expenses 0.66%

<sup>(a)</sup> Other Expenses are based on estimated amounts for the current fiscal year.

**EXPENSE EXAMPLE**

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

**YEAR EXPENSES**

1	\$	67
3	\$	211
5	\$	368
10	\$	822

**PORTFOLIO TURNOVER**

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or turns over its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund

operating expenses or in the example, may affect the Fund's performance. During the period July 23, 2014 (the Fund's commencement of operations) through December 31, 2014, the Fund's portfolio turnover rate was 7%. The Fund's portfolio turnover rate is not annualized.

#### **PRINCIPAL INVESTMENT STRATEGIES**

The Fund normally invests at least 80% of its total assets in securities that comprise the Fund's benchmark index. The SME-ChiNext Index is a modified, free-float adjusted index intended to track the performance of the 100 largest and most liquid stocks listed and trading on the Small and Medium Enterprise (SME) Board and the ChiNext Board of the Shenzhen Stock Exchange. Such companies may include small- and medium-capitalization companies. The SME-ChiNext Index is comprised of China A-shares (A-shares). As of December 31, 2014, the SME-ChiNext Index included 100 securities of companies with a market capitalization range of between approximately \$791.1 million and \$14.7 billion and a weighted average market capitalization of \$4.6 billion. The Fund's 80% investment policy is non-fundamental and may be changed without shareholder approval upon 60 days' prior written notice to shareholders.

The Fund, using a passive or indexing investment approach, attempts to approximate the investment performance of the SME-ChiNext Index by investing in a portfolio of securities that generally replicates the SME-ChiNext Index.

The Fund will seek to achieve its investment objective by primarily investing directly in A-shares. A-shares are issued by companies incorporated in the People's Republic of China ( "China" or the "PRC" ). A-shares are traded in renminbi ( "RMB" ) on the Shenzhen or Shanghai Stock Exchanges. The A-share market in China is made available to domestic PRC investors and certain foreign investors, including principally those that have been approved as a Renminbi Qualified Foreign Institutional Investor ( "RQFII" ) or a Qualified Foreign Institutional Investor ( "QFII" ). A RQFII or QFII license may be obtained by application to the China Securities Regulatory Commission ( "CSRC" ). After obtaining a RQFII or QFII license, the RQFII or QFII would also apply to China's State Administration of Foreign Exchange ( "SAFE" ) for a specific aggregate dollar amount investment quota in which the RQFII or QFII can invest in A-shares. Investment companies are not currently within the types of entities that are eligible for a RQFII or QFII license. Because the Fund does not satisfy the criteria to qualify as a RQFII or QFII itself, the Fund intends to invest directly in A-shares via the A-share quota granted to the Fund's sub-adviser, China Asset Management (Hong Kong) Limited (the "Sub-Adviser" ), by SAFE ( "RQFII quota" ). The Sub-Adviser has obtained RQFII status and has been granted an RQFII quota, which the Sub-Adviser will use to invest the portion of the Fund's assets allocated to it by the Adviser in A-shares. At such time that the Sub-Adviser has utilized its entire RQFII quota, the Sub-Adviser may, subject to applicable regulations, apply for an increase of the RQFII quota. The size of the Fund's direct investment in A-shares will be limited by the size of the RQFII quota of the Sub-Adviser unless the Fund is able to enter into another sub-advisory agreement with another sub-adviser who has an RQFII quota. Assets not allocated to the Sub-Adviser for investment directly in A-shares will be managed by the Adviser for investment through Stock Connect. The Fund may also invest in A-shares listed and traded on the Shanghai Stock Exchange through the Hong Kong Shanghai Stock Connect ( "Stock Connect" ) program. Stock Connect is a securities trading and clearing program between the Shanghai Stock Exchange, the Stock Exchange of Hong Kong Limited ( "SEHK" ), China Securities Depository and Clearing Corporation Limited and Hong Kong Securities Clearing Company Limited designed to permit mutual stock market access between mainland China and Hong Kong by allowing investors to trade and settle shares on each market via their local exchanges. Other exchanges in China, including the Shenzhen Stock Exchange, may participate in Stock Connect in the future. Trading through Stock Connect is subject to aggregate investment quotas that limit total purchases and sales through Stock Connect as well as daily quotas that limit the maximum daily net purchases on any particular day. Accordingly, the Fund's direct investment in A-shares will be limited to the RQFII or QFII quota and by the aggregate investment quotas, including daily quotas, that limit total purchases and/or sales through Stock Connect.

The Fund may concentrate its investments in a particular industry or group of industries to the extent that the SME-ChiNext Index concentrates in an industry or group of industries. As of December 31, 2014, the SME-ChiNext Index was concentrated in the information technology sector, and each of the industrials, consumer discretionary and health care sectors represented a significant portion of the SME-ChiNext Index.

## **PRINCIPAL RISKS OF INVESTING IN THE FUND**

**Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund, each of which could significantly and adversely affect the value of an investment in the Fund.**

**Risk of the RQFII Regime and the Fund's Principal Investment Strategy.** The SME-ChiNext Index is comprised of A-shares. In seeking to replicate the SME-ChiNext Index, the Fund intends to invest directly in A-shares through the Sub-Adviser's RQFII quota and Stock Connect. Because the Fund will not be able to invest directly in A-shares in

excess of the Sub-Adviser's RQFII quota and beyond the limits that may be imposed by Stock Connect, the size of the Fund's direct investment in A-shares may be limited. In addition, the RQFII quota of the Sub-Adviser may be reduced or revoked by the Chinese regulators if, among other things, the Sub-Adviser fails to observe SAFE and other applicable Chinese regulations. The Fund cannot predict what would occur if the RQFII quota of the Sub-Adviser or RQFII quotas generally were reduced or eliminated, although such an occurrence would likely have a material adverse effect on the Fund, including the requirement that the Fund dispose of certain or all of its A-shares holdings, and may adversely affect the willingness and ability of potential swap counterparties to engage in swaps with the Fund linked to the performance of A-shares. These risks are compounded by the fact that, at present, there are only a limited number of firms and potential counterparties that have RQFII or QFII status or are willing and able to enter into swap transactions linked to the performance of A-shares. Therefore, any such reduction or elimination may have a material adverse effect on the ability of the Fund to achieve its investment objective. If the Fund is unable to obtain sufficient exposure to the performance of the SME-ChiNext Index due to the limited availability of the Sub-Adviser's RQFII quota or other investments that provide exposure to the performance of A-shares, the Fund, subject to any necessary regulatory relief, could, among other things, as a defensive measure limit or suspend creations until the Adviser and/or the Sub-Adviser determine that the requisite exposure to the SME-ChiNext Index is

**MARKET VECTORS CHINAAMC SME-CHINEXT ETF (continued)**

obtainable. During the period that creations are suspended, the Fund could trade at a significant premium or discount to its net asset value ( NAV ) and could experience substantial redemptions. Alternatively, the Fund could change its investment objective by, for example, seeking to track an alternative index focused on Chinese-related stocks other than A-shares or other appropriate investments, or decide to liquidate the Fund.

The A-share market is volatile with a risk of suspension of trading in a particular security or government intervention. Securities on the A-share market, including securities in the SME-ChiNext Index, may be suspended from trading without an indication of how long the suspension will last, which may impair the liquidity of such securities. The regulations which regulate investments by RQFIIs in the PRC and the repatriation of capital from RQFII investments are relatively new. The application and interpretation of such investment regulations are therefore relatively untested and there is no certainty as to how they will be applied. The PRC authorities and regulators have been given wide discretion in applying and interpreting such investment regulations and there is no precedent or certainty as to how such discretion may be exercised now or in the future. The application and interpretation of such investment regulations may adversely affect the Fund. In addition, there are custody risks associated with investing through a RQFII, where, due to requirements regarding establishing a custody account in the joint names of the Fund and the Sub-Adviser, the Fund's assets may not be as well protected from the claims of the Sub-Adviser's creditors than if the Fund had an account in its name only.

Specific rules governing taxes on capital gains derived by RQFIIs and QFIIs from the trading of PRC securities have yet to be announced. In the absence of specific rules, the tax treatment of the Fund's investments in A-shares through the Sub-Adviser's RQFII quota should be governed by the general PRC tax provisions and provisions applicable to RQFIIs. Under these provisions, the Fund is generally subject to a tax of 10% on any dividends, distributions and interest it receives from its investment in PRC securities. In addition, a nonresident enterprise is subject to withholding tax at a rate of 10% on its capital gains. Withholding taxes on dividends, interest and capital gains may be taxed at a reduced rate under an applicable tax treaty, but the application of such treaties for an RQFII acting on behalf of a foreign investor (*i.e.*, the Sub-Adviser acting on behalf of the Fund) is also uncertain and would depend upon the approval of PRC tax authorities. It is also unclear how China's business tax may apply to activities of an RQFII such as the Sub-Adviser and how such application may be affected by tax treaty provisions. While it is unclear whether this tax will be applied to investments by an RQFII such as the Sub-Adviser or what the methodology for calculating or collecting the tax will be, the PRC's Ministry of Finance announced that, effective November 17, 2014, the corporate income tax for QFIIs and RQFIIs, with respect to capital gains, will be temporarily lifted for a period of three years. The current PRC tax laws and regulations and interpretations thereof may be revised or amended in the future, including with respect to the possible liability of the Fund for obligations of the Sub-Adviser. Any revision or amendment in tax laws and regulations may adversely affect the Fund. The Fund, prior to December 22, 2014, reserved 10% of its realized and unrealized gains from its A-share investments in land-rich enterprises, which are companies that have greater than 50% of their assets in land or real properties in the PRC, to apply towards withholding tax liability. The tax reserve was reflected in the Fund's daily NAV calculations as a deduction from the Fund's NAV. It is expected that the PRC will, in 2015, begin collecting capital gains taxes from QFIIs and RQFIIs for investments realized between November 17, 2009 and November 16, 2014, although no formal announcement has been made. If the PRC begins applying tax rules regarding the taxation of capital gains from A-share investment to RQFIIs, such as the Sub-Adviser, and/or begins collecting capital gains taxes on such investments (whether for the period described above or otherwise), the Fund could be subject to tax liability for any tax payments for which reserves have not been made or that were not previously withheld. The impact of any such tax liability on the Fund's return could be substantial. The Fund may also be liable to the Sub-Adviser for any tax that is imposed on the Sub-Adviser by the PRC with respect to the Fund's investments.

The Sub-Adviser, as a licensed RQFII, is currently permitted to repatriate RMB daily and is not subject to RMB repatriation restrictions or prior approval. However, there is no assurance that RQFIIs may not be subject to restrictions or prior approval requirements in the future. Any additional restrictions imposed on the Sub-Adviser or RQFIIs generally may have an adverse effect on the Fund's ability to invest directly in A-shares and its ability to meet redemption requests.

If the Fund's direct investments in A-shares through the Sub-Adviser's RQFII quota become subject to repatriation restrictions, the Fund may be unable to satisfy distribution requirements applicable to regulated investment companies (RICs) under the Internal Revenue Code of 1986, as amended (the Internal Revenue Code), and be subject to income and excise tax at the Fund level. In addition, the Fund could be required to recognize unrealized gains, pay taxes and make distributions before re-qualifying for taxation as a RIC. See the prospectus under Shareholder Information Tax Information Taxes on Distributions for more information. The Fund may elect, for U.S. federal income tax purposes, to treat Chinese taxes (including withholding taxes) paid by the Fund as paid by its shareholders. Even if the Fund is qualified to make that election and does so this treatment will not apply with respect to amounts the Fund reserves in anticipation of the imposition of withholding taxes not currently in effect (as discussed above). If these amounts are used to pay any tax liability of the Fund in a later year, they will

be treated as paid by the shareholders in such later year, even if they are imposed with respect to income of an earlier year. See the prospectus under [Shareholder Information](#) [Tax Information](#) for a further description of this risk.

**Special Risk Considerations of Investing in China and A-shares.** Investing in securities of Chinese companies, including A-shares, involves certain risks and considerations not typically associated with investing in securities of U.S. issuers, including, among others, (i) the small size of the market for Chinese securities and the low volume of trading, resulting in lack of liquidity and in price volatility, (ii) currency devaluations and other currency exchange rate fluctuations or blockage, (iii) the nature and extent of intervention by the Chinese government in the Chinese securities markets, whether such intervention will continue and the impact of such intervention or its discontinuation, (iv) the risk of nationalization or expropriation of assets, (v) the risk that the Chinese government may decide not to continue to support economic reform programs, (vi) limitations on the use of brokers, (vii) higher rates of inflation, (viii) greater political, economic and social uncertainty, (ix) market volatility caused by any potential regional or territorial conflicts or natural disasters, (x) the risk of increased trade tariffs, embargoes and other trade limitations and (xi) custody risks associated with investing through a RQFII, where due to requirements regarding establishing a custody account in the joint names of the Fund and the Sub-Adviser the Fund's assets may not be as well protected from the claims of the Sub-Adviser's creditors than if the Fund had an account in its name only.

The economy of China differs, often unfavorably, from the U.S. economy in such respects as structure, general development, government involvement, wealth distribution, rate of inflation, growth rate, interest rates, allocation of resources and capital reinvestment, among others. The Chinese central government has historically exercised substantial control over virtually every sector of the Chinese economy through administrative regulation and/or state ownership and actions of the Chinese central and local government authorities continue to have a substantial effect on economic conditions in China. In addition, the Chinese government has from time to time taken actions that influence the prices at which certain goods may be sold, encourage companies to invest or concentrate in particular industries, induce mergers between companies in certain industries and induce private companies to publicly offer their securities to increase or continue the rate of economic growth, control the rate of inflation or otherwise regulate economic expansion. It may do so in the future as well, potentially having a significant adverse effect on economic conditions in China.

The Chinese securities markets are emerging markets characterized by relatively low trading volume, resulting in substantially less liquidity and greater price volatility. Liquidity risks may be more pronounced for the A-share market than for Chinese securities markets generally because the A-share market is subject to greater government restrictions and control, including trading suspensions as discussed above. Price fluctuations of A-shares are currently limited to either 5% or 10% per trading day. In addition, there is less regulation and monitoring of Chinese securities markets and the activities of investors, brokers and other participants than in the United States. Accounting, auditing and financial reporting standards in China are different from U.S. standards and, therefore, disclosure of certain material information may not be made. In addition, less information may be available to the Fund and other investors than would be the case if the Fund's investments were restricted to securities of U.S. issuers. There is also generally less governmental regulation of the securities industry in China, and less enforcement of regulatory provisions relating thereto, than in the United States. Moreover, it may be more difficult to obtain a judgment in a court outside the United States.

The Chinese government strictly regulates the payment of foreign currency denominated obligations and sets monetary policy. In addition, the Chinese economy is export-driven and highly reliant on trade. Adverse changes to the economic conditions of its primary trading partners, such as the United States, Japan and South Korea, would adversely impact the Chinese economy and the Fund's investments. Moreover, a slowdown in other significant economies of the world, such as the United States, the European Union and certain Asian countries, may adversely

affect economic growth in China. An economic downturn in China would adversely impact the Fund's investments.

Emerging markets such as China can experience high rates of inflation, deflation and currency devaluation. The value of the RMB may be subject to a high degree of fluctuation due to, among other things, changes in interest rates, the effects of monetary policies issued by the PRC, the United States, foreign governments, central banks or supranational entities, the imposition of currency controls or other national or global political or economic developments. The Fund invests a significant portion of its assets in investments denominated in RMB and the income received by the Fund will principally be in RMB. The Fund's exposure to the RMB and changes in value of the RMB versus the U.S. dollar may result in reduced returns for the Fund. Moreover, the Fund may incur costs in connection with conversions between U.S. dollars and RMB. The RMB is currently not a freely convertible currency. The Chinese government places strict regulation on RMB and sets the value of the RMB to levels dependent on the value of the U.S. dollar, but the Chinese government has been under pressure to manage the currency in a less restrictive fashion so that it is less correlated to the U.S. dollar. The Chinese government's imposition of restrictions on the repatriation of RMB out of mainland China may limit the depth of the offshore RMB market and reduce the liquidity of the Fund's investments. There may not be sufficient amounts of RMB for the Fund to be fully invested because the Fund has to convert U.S. dollars received from the purchase of Creation Units (defined herein) into RMB to

**MARKET VECTORS CHINAAMC SME-CHINEXT ETF (continued)**

purchase A-shares. As a result, these restrictions may adversely affect the Fund and its investments and may increase the risk of Index tracking error.

**Risks of Investing through Stock Connect.** The Fund may invest in A-shares listed and traded on the Shanghai Stock Exchange through Stock Connect, or on such other stock exchanges in China which participate in Stock Connect from time to time or in the future. Trading through Stock Connect is subject to a number of restrictions that may affect the Fund's investments and returns. For example, trading through Stock Connect is subject to aggregate investment quotas that limit total purchases and sales through Stock Connect as well as daily quotas that limit the maximum daily net purchases on any particular day, each of which may restrict or preclude the Fund's ability to invest in Stock Connect A-shares. In addition, investments made through Stock Connect are subject to trading, clearance and settlement procedures that are untested in the PRC, which could pose risks to the Fund. Moreover, Stock Connect A-shares generally may not be sold, purchased or otherwise transferred other than through Stock Connect in accordance with applicable rules. A primary feature of Stock Connect is the application of the home market's laws and rules applicable to investors in A-shares. Therefore, the Fund's investments in Stock Connect A-shares are generally subject to PRC securities regulations and listing rules, among other restrictions. Finally, uncertainties in PRC tax rules governing taxation of income and gains from investments in Stock Connect A-shares could result in unexpected tax liabilities for the Fund. The withholding tax treatment of dividends and capital gains payable to overseas investors currently is unsettled.

The Stock Connect program is a pilot program in its initial stages. Further developments are likely and there can be no assurance as to the program's continued existence or whether future developments regarding the program may restrict or adversely affect the Fund's investments or returns. In addition, the application and interpretation of the laws and regulations of Hong Kong and the PRC, and the rules, policies or guidelines published or applied by relevant regulators and exchanges in respect of the Stock Connect program are uncertain, and they may have a detrimental effect on the Fund's investments and returns.

**Risk of Investing in Foreign Securities.** Investments in the securities of foreign issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Because certain foreign securities markets may be limited in size, the activity of large traders may have an undue influence on the prices of securities that trade in such markets. Because the Fund may invest in securities denominated in foreign currencies and some of the income received by the Fund may be in foreign currencies, changes in currency exchange rates may negatively impact the Fund's return. The risks of investing in emerging market countries are greater than risks associated with investments in foreign developed countries. The Fund may also invest in depositary receipts which involve similar risks to those associated with investments in foreign securities.

**Risk of Investing in Emerging Market Issuers.** Investments in securities of emerging market issuers are exposed to a number of risks that may make these investments volatile in price or difficult to trade. Political risks may include unstable governments, nationalization, restrictions on foreign ownership, laws that prevent investors from getting their money out of a country and legal systems that do not protect property rights as well as the laws of the United States. Market risks may include economies that concentrate in only a few industries, securities issues that are held by only a few investors, limited trading capacity in local exchanges and the possibility that markets or issues may be manipulated by foreign nationals who have inside information.

**Risk of Investing in Small- and Medium-Capitalization Companies.** Small- and medium-capitalization companies may be more volatile and more likely than large-capitalization companies to have narrower product lines, fewer financial resources, less management depth and experience and less competitive strength. In addition, these companies often have greater price volatility, lower trading volume and less liquidity than larger more established companies. Returns on investments in securities of small- and medium-capitalization companies could trail the returns on investments in securities of large-capitalization companies.

**Risk of Investing in the Information Technology Sector.** To the extent that the SME-ChiNext Index continues to be concentrated in the information technology sector, the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the information technology sector. Information technology companies face intense competition, both domestically and internationally, which may have an adverse effect on profit margins. Information technology companies may have limited product lines, markets, financial resources or personnel. The products of information technology companies may face product obsolescence due to rapid technological developments and frequent new product introduction, unpredictable changes in growth rates and competition for the services of qualified personnel. Companies in the information technology sector are heavily dependent on patent protection and the expiration of patents may adversely affect the profitability of these companies.

**Risk of Investing in the Consumer Discretionary Sector.** To the extent that the consumer discretionary sector continues to represent a significant portion of the SME-ChiNext Index, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the consumer discretionary sector. Companies engaged in the consumer discretionary sector are subject to fluctuations in supply and demand. These companies may also be adversely affected by changes in consumer spending as a result of world events, political and economic conditions, commodity price volatility, changes in exchange rates, imposition of import controls, increased competition, depletion of resources and labor relations.

**Risk of Investing in the Health Care Sector.** To the extent that the health care sector continues to represent a significant portion of the SME-ChiNext Index, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the health care sector. Companies in the healthcare sector may be affected by extensive government regulation, restrictions on government reimbursement for medical expenses, rising costs of medical products and services, pricing pressure, an increased emphasis on outpatient services, limited number of products, industry innovation, changes in technologies and other market developments. Many healthcare companies are heavily dependent on patent protection and are subject to extensive litigation based on product liability and similar claims.

**Risk of Investing in the Industrials Sector.** To the extent that the industrials sector continues to represent a significant portion of the SME-ChiNext Index, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the industrials sector. Companies in the industrials sector may be adversely affected by changes in government regulation, world events and economic conditions. In addition, companies in the industrials sector may be adversely affected by environmental damages, product liability claims and exchange rates.

**Equity Securities Risk.** The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by the Fund participate, or factors relating to specific issuers in which the Fund invests. Equity securities are subordinated to preferred securities and debt in a company's capital structure with respect to priority in right to a share of corporate income, and therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have generally also experienced significantly more volatility in those returns, although under certain market conditions fixed income securities may have comparable or greater price volatility.

**Market Risk.** The prices of the securities in the Fund are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

**Index Tracking Risk.** The Fund's return may not match the return of the SME-ChiNext Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the SME-ChiNext Index and incurs costs associated with buying and selling securities and entering into derivatives transactions, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the SME-ChiNext Index and raising cash to meet redemptions or deploying cash in connection with newly created Creation Units (defined herein). In addition, the Fund may not be able to invest in certain securities included in the SME-ChiNext Index or invest in them in the exact proportions in which they are represented in the SME-ChiNext Index, due to legal restrictions or limitations imposed by the Chinese Government, a lack of liquidity on stock exchanges in which such securities trade, potential adverse tax consequences or other regulatory reasons. As discussed above, one or more securities included in the SME-ChiNext Index may be suspended from trading and such securities would be valued by the SME-ChiNext

Index at the last closing price. The Fund is expected to value these securities and its other investments based on fair value prices. To the extent the Fund calculates its NAV based on fair value prices and the value of the SME-ChiNext Index is based on securities closing prices on local foreign markets (i.e., the value of the SME-ChiNext Index is not based on fair value prices), the Fund's ability to track the SME-ChiNext Index may be adversely affected. The Fund will be required to remit RMB to settle the purchase of A-shares and repatriate RMB to U.S. dollars to settle redemption orders. In the event such remittance is delayed or disrupted, the Fund will not be able to fully replicate the SME-ChiNext Index by investing in the relevant A-shares, which may lead to increased tracking error, and may need to rely on borrowings to meet redemptions, which may lead to increased expenses. Moreover, the ability of the Fund to track the SME-ChiNext Index may be affected by foreign exchange fluctuations as between the U.S. dollar and the RMB to the extent the SME-ChiNext Index is priced in Chinese RMB and the Fund is priced in U.S. dollars. The Fund may underperform the SME-ChiNext Index when the value of the U.S. dollar increases relative to the value of the RMB. Additionally, to the extent the Fund invests in swaps, the terms of the swaps may require the payment of the U.S. dollar equivalent of the RMB distributions and dividends received by the QFII, meaning that the Fund is exposed to foreign exchange risk and fluctuations in value between the U.S. dollar and the RMB. For tax efficiency purposes, the Fund may sell certain securities to realize losses causing it to deviate from the performance of the SME-ChiNext Index. In light of the above factors, the Fund's return may deviate significantly from the return of the SME-ChiNext Index.

## MARKET VECTORS CHINAAMC SME-CHINEXT ETF (continued)

**Replication Management Risk.** An investment in the Fund involves risks similar to those of investing in any fund of equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not actively managed, unless a specific security is removed from the SME-ChiNext Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. Therefore, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

**Premium/Discount Risk.** Disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares may result in Shares trading at a significant premium or discount to NAV. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.

**Risk of Cash Transactions.** Unlike other ETFs, the Fund expects to effect all of its creations and redemptions for cash, rather than in-kind securities. As such, investments in Shares may be less tax-efficient than an investment in a conventional ETF.

**Non-Diversified Risk.** The Fund is classified as a non-diversified investment company under the Investment Company Act of 1940, as amended (the 1940 Act). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds.

**Concentration Risk.** The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the SME-ChiNext Index concentrates in a particular sector or sectors or industry or group of industries. To the extent that the SME-ChiNext Index continues to be concentrated in the information technology sector, the Fund will be subject to the risk that economic, political or other conditions that have a negative effect on that sector will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

## PERFORMANCE

The Fund commenced operations on July 23, 2014 and therefore does not have a performance history for a full calendar year. The Fund's financial performance for the Fund's first fiscal period is included in the Financial Highlights section of the prospectus. Visit [www.marketvectorsetfs.com](http://www.marketvectorsetfs.com) for current performance figures.

## PORTFOLIO MANAGEMENT

**Investment Adviser.** Van Eck Associates Corporation.

**Investment Sub-Adviser.** China Asset Management (Hong Kong) Limited.

**Portfolio Managers.** The following individuals are jointly and primarily responsible for the day-to-day management of the Fund's portfolio:

**Name Title with Sub-Adviser Date Began Managing the Fund**

Leo Fan Portfolio Manager September 2015

**Name Title with Adviser Date Began Managing the Fund**

Hao-Hung (Peter) Liao Portfolio Manager Since inception

George Chao Portfolio Manager Since inception

**PURCHASE AND SALE OF FUND SHARES**

For important information about the purchase and sale of Fund Shares, tax information and payments to broker-dealers and other financial intermediaries, please turn to Summary Information about Purchases and Sales of Fund Shares, Taxes and Payments to Broker-Dealers and Other Financial Intermediaries on page 17 of this Prospectus.

**SUMMARY INFORMATION ABOUT PURCHASES AND SALES OF FUND SHARES, TAXES AND  
PAYMENTS TO  
BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES**

**PURCHASE AND SALE OF FUND SHARES**

The Funds issue and redeem Shares at NAV only in a large specified number of Shares each called a Creation Unit, or multiples thereof. A Creation Unit consists of 50,000 Shares.

Individual Shares of a Fund may only be purchased and sold in secondary market transactions through brokers. Shares of the Funds are listed on NYSE Arca, Inc. ( NYSE Arca ) and because Shares trade at market prices rather than NAV, Shares of the Funds may trade at a price greater than or less than NAV.

**TAX INFORMATION**

Each Fund's distributions are taxable and will generally be taxed as ordinary income or capital gains.

**PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES**

The Adviser and its related companies may pay broker-dealers or other financial intermediaries (such as a bank) for the sale of the Fund Shares and related services. These payments may create a conflict of interest by influencing your broker-dealer or other intermediary or its employees or associated persons to recommend the Fund over another investment. Ask your financial adviser or visit your financial intermediary's website for more information.

## **ADDITIONAL INFORMATION ABOUT THE FUNDS INVESTMENT STRATEGIES AND RISKS**

### **PRINCIPAL INVESTMENT STRATEGIES**

The Adviser and/or the Sub-Adviser anticipate that, generally, the portion of each Fund for which they are responsible will hold or gain exposure to all of the securities that comprise its Index in proportion to their weightings in such Index. However, under various circumstances, it may not be possible or practicable to purchase all of those securities in those weightings. In these circumstances, a Fund may purchase a sample of securities in its Index. There also may be instances in which the Adviser and/or the Sub-Adviser may choose to underweight or overweight a security in a Fund's Index, purchase securities not in a Fund's Index that the Adviser and/or the Sub-Adviser believe are appropriate to substitute for certain securities in such Index or utilize various combinations of other available investment techniques in seeking to replicate as closely as possible, before fees and expenses, the price and yield performance of the Fund's Index. Each Fund may sell securities that are represented in its Index in anticipation of their removal from such Index or purchase securities not represented in its Index in anticipation of their addition to such Index. Each Fund may also, in order to comply with the tax diversification requirements of the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code"), temporarily invest in securities not included in its Index that are expected to be highly correlated with the securities included in its Index.

Each Fund's assets will be primarily invested in A-shares. Because a Fund does not satisfy the criteria to qualify as a RQFII or QFII itself, the Fund intends to invest directly in A-shares via the Sub-Adviser's RQFII quota and may also invest through Stock Connect. In addition, Market Vectors ChinaAMC A-Share ETF's assets that are not allocated to the Sub-Adviser for investment directly in A-shares will be managed by the Adviser either directly in A-Shares through Stock Connect and/or in swaps, futures contracts and other types of derivative instruments that have economic characteristics that are substantially identical to the economic characteristics of A-shares, including swaps on the CSI 300 Index, swaps on the A-shares which comprise the CSI 300 Index and/or swaps on funds that seek to replicate the performance of the CSI 300 Index or funds that invest in A-shares or Market Vectors ChinaAMC A-Share ETF may invest directly in shares of such funds. The notional values of these swaps, futures contracts and other derivative instruments will count towards Market Vectors ChinaAMC A-Share ETF's 80% investment policy and cash and cash equivalents related to the swaps, futures contracts and other derivative instruments will not be counted towards the calculation of total assets. The Adviser on behalf of Market Vectors ChinaAMC A-Share ETF may also invest, to the extent permitted by the 1940 Act, in other affiliated and unaffiliated funds, such as open-end or closed-end management investment companies, including other ETFs. Assets managed by the Adviser on behalf of Market Vectors ChinaAMC A-Share ETF that are not invested in other funds, including ETFs listed on a Hong Kong or other foreign exchange, swaps and other derivatives will be invested primarily in money market instruments.

Market Vectors ChinaAMC SME-ChiNext ETF's assets will be primarily invested in A-shares. Because Market Vectors ChinaAMC SME-ChiNext ETF does not satisfy the criteria to qualify as a RQFII or QFII itself, Market Vectors ChinaAMC SME-ChiNext ETF intends to invest directly in A-shares via the Sub-Adviser's RQFII quota and may also invest through Stock Connect.

In the event that the Sub-Adviser's RQFII quota is or becomes inadequate or if the Sub-Adviser is unable to maintain its RQFII status or to seek to replicate a Fund's Index through the other means described in this Prospectus, a Fund may retain one or more additional sub-advisers that maintain RQFII licenses and/or the Adviser may obtain a QFII quota and the Adviser or additional sub-adviser(s), on behalf of the Fund, may invest in A-shares and other permitted China securities listed on the Shenzhen and Shanghai Stock Exchanges up to the amount specified in the Adviser's or additional sub-adviser(s)'s QFII or RQFII quota, respectively.

## **ADDITIONAL INVESTMENT STRATEGIES**

Each Fund may invest in securities not included in their respective Index, money market instruments, including repurchase agreements or other funds which invest exclusively in money market instruments, convertible securities, structured notes (notes on which the amount of principal repayment and interest payments are based on the movement of one or more specified factors, such as the movement of a particular stock or stock index), and certain derivatives.

As an additional investment strategy, Market Vectors ChinaAMC SME-ChiNext ETF may also seek to invest a portion of its assets in swaps, futures contracts and other types of derivative instruments that have economic characteristics that are similar to the economic characteristics of A-shares, including swaps on the SME-ChiNext Index, swaps on A-shares which comprise the SME-ChiNext Index and/or swaps on funds that seek to replicate the performance of the SME-ChiNext Index or funds that invest in A-shares or the Market Vectors ChinaAMC SME-ChiNext ETF may invest directly in shares of such funds. In addition, the Funds may invest in B-shares, which are shares of companies incorporated in mainland China that are traded in the mainland B-share markets; China H-shares, which are shares of companies incorporated in mainland China and listed on the Hong Kong Stock Exchange; securities of Red Chip Companies, which are companies with certain minimum proportions of mainland Chinese entity shareholders that are incorporated outside mainland China and listed on the Hong Kong Stock Exchange; and securities of Chinese-related companies, which are companies listed on the Hong Kong Stock Exchange, the Singapore Stock Exchange or other exchanges. Convertible securities, depositary receipts and derivative

instruments such as swaps, options, warrants, futures contracts, currency forwards, structured notes and participation notes may be used by Market Vectors ChinaAMC A-Share ETF in seeking performance that corresponds to the CSI 300 Index, and in managing cash flows, and may count towards compliance with the Fund's 80% policy. Depository receipts may be used by Market Vectors ChinaAMC SME-ChiNext ETF in seeking performance that corresponds to the SME-ChiNext Index, and in managing cash flows, and may count towards compliance with the Fund's 80% policy. A Fund will not invest in money market instruments as part of a temporary defensive strategy to protect against potential stock market declines.

An authorized participant (*i.e.*, a person eligible to place orders with the Distributor (defined below) to create or redeem Creation Units of a Fund) that is not a qualified institutional buyer, as such term is defined under Rule 144A of the Securities Act of 1933, as amended (the Securities Act), will not be able to receive, as part of a redemption, restricted securities eligible for resale under Rule 144A.

## **BORROWING MONEY**

Each Fund may borrow money from a bank up to a limit of one-third of the market value of its assets (including the amount borrowed) from banks as permitted by the 1940 Act). Each Fund intends to enter into a credit facility to borrow money for temporary or emergency purposes, including the funding of shareholder redemption requests, trade settlements and as necessary to distribute to shareholders any income required to maintain the Fund's status as a RIC. To the extent that a Fund borrows money, it will be leveraged; at such times, the Fund will appreciate or depreciate in value more rapidly than its benchmark Index.

## **FUNDAMENTAL AND NON-FUNDAMENTAL POLICIES**

Each Fund's investment objective and each of its other investment policies are non-fundamental policies that may be changed by the Board of Trustees without shareholder approval, except as noted in this Prospectus or the Statement of Additional Information (SAI) under the section entitled Investment Policies and Restrictions Investment Restrictions.

## **LENDING PORTFOLIO SECURITIES**

Each Fund may lend its portfolio securities to brokers, dealers and other financial institutions desiring to borrow securities to complete transactions and for other purposes. In connection with such loans, a Fund receives liquid collateral equal to at least 102% of the value of the portfolio securities being loaned. This collateral is marked-to-market on a daily basis. Although a Fund will receive collateral in connection with all loans of its securities holdings, the Fund would be exposed to a risk of loss should a borrower fail to return the borrowed securities (e.g., the Fund would have to buy replacement securities and the loaned securities may have appreciated beyond the value of the collateral held by the Fund) or become insolvent. A Fund may pay fees to the party arranging the loan of securities. In addition, a Fund will bear the risk of loss of any cash collateral that it invests.

## **RISKS OF INVESTING IN THE FUNDS**

The following section provides additional information regarding the principal risks identified under Principal Risks of Investing in the Fund in each Fund's Summary Information section followed by additional risk information. The risks listed below are applicable to each Fund unless otherwise noted.

**Investors in the Funds should be willing to accept a high degree of volatility in the price of the Funds' Shares and the possibility of significant losses. An investment in the Funds involves a substantial degree of risk. An**

**investment in the Funds is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Funds, each of which could significantly and adversely affect the value of an investment in the Funds.**

**Risk of the RQFII Regime and the Funds Principal Investment Strategies.** Each Fund's respective Index is comprised of A-shares. In seeking to replicate its Index, each Fund intends to invest directly in A-shares through the Sub-Adviser's RQFII quota and Stock Connect. Because the Funds will not be able to invest directly in A-shares in excess of the Sub-Adviser's RQFII quota and beyond the limits that may be imposed by Stock Connect, the size of each Fund's direct investment in A-shares may be limited. In addition, the RQFII quota of the Sub-Adviser may be reduced or revoked by the Chinese regulators if, among other things, the Sub-Adviser fails to observe SAFE and other applicable Chinese regulations. The Funds cannot predict what would occur if the RQFII quota of the Sub-Adviser or RQFII quotas generally were reduced or eliminated, although such an occurrence would likely have a material adverse effect on the Funds, including the requirement that the Funds dispose of certain or all of its A-shares holdings, and may adversely affect the willingness and ability of potential swap counterparties to engage in swaps with the Funds linked to the performance of A-shares. These risks are compounded by the fact that, at present, there are only a limited number of firms and potential counterparties that have RQFII or QFII status or are willing and able to enter into swap transactions linked to the performance of A-shares. Therefore, any such reduction

**ADDITIONAL INFORMATION ABOUT THE FUNDS INVESTMENT STRATEGIES AND RISKS**  
**(continued)**

or elimination may have a material adverse effect on the ability of a Fund to achieve its investment objective. If a Fund is unable to obtain sufficient exposure to the performance of its Index due to the limited availability of the Sub-Adviser's RQFII quota or other investments that provide exposure to the performance of A-shares, the Fund could, subject to any regulatory relief among other things, as a defensive measure limit or suspend creations until the Adviser and/or the Sub-Adviser determine that the requisite exposure to the Index is obtainable. During the period that creations are suspended, a Fund could trade at a significant premium or discount to its NAV and could experience substantial redemptions. Alternatively, a Fund could change its investment objective by, for example, seeking to track an alternative index focused on Chinese-related stocks other than A-shares or other appropriate investments, or decide to liquidate the Fund.

The A-share market may be considered volatile with a risk of suspension of trading in a particular security or government intervention. Securities on the A-share market, including one or more securities in an Index, may be suspended from trading without an indication of how long the suspension will last. The regulations which regulate investments by RQFIIs in the PRC and the repatriation of capital from RQFII investments are relatively new. The application and interpretation of such investment regulations are therefore relatively untested and there is no certainty as to how they will be applied. The PRC authorities and regulators have been given wide discretion in applying and interpreting such investment regulations and there is no precedent or certainty as to how such discretion may be exercised now or in the future. The application and interpretation of such investment regulations may adversely affect a Fund. In addition, because the Sub-Adviser's RQFII quota would be in the name of the Sub-Adviser rather than a Fund, there is a risk that regulatory actions taken against the Sub-Adviser by PRC government authorities may affect the Fund.

Specific rules governing taxes on capital gains derived by RQFIIs and QFIIs from the trading of PRC securities have yet to be announced. In the absence of specific rules, the tax treatment of a Fund's investments in A-shares through the Sub-Adviser's RQFII quota should be governed by the general PRC tax provisions and provisions applicable to RQFIIs. Under these provisions, a Fund is generally subject to a tax of 10% on any dividends, distributions and interest it receives from its investment in PRC securities. In addition, a nonresident enterprise is subject to withholding tax at a rate of 10% on its capital gains. Withholding taxes on dividends, interest and capital gains may be taxed at a reduced rate under an applicable tax treaty, but the application of such treaties for an RQFII acting on behalf of a foreign investor (*i.e.*, the Sub-Adviser acting on behalf of a Fund) is also uncertain. It is also unclear how China's business tax may apply to activities of an RQFII such as the Sub-Adviser and how such application may be affected by tax treaty provisions. While it is unclear whether this tax will be applied to investments by an RQFII such as the Sub-Adviser or what the methodology for calculating or collecting the tax will be, the PRC's Ministry of Finance announced that, effective November 17, 2014, the corporate income tax for QFIIs and RQFIIs, with respect to capital gains, will be temporarily lifted for a period of three years. The current PRC tax laws and regulations and interpretations thereof may be revised or amended in the future, including with respect to the possible liability of the Fund for obligations of the Sub-Adviser. Any revision or amendment in tax laws and regulations may adversely affect the Fund. Each Fund, prior to December 22, 2014, reserved 10% of its realized and unrealized gains from its A-share investments to apply towards withholding tax liability with respect to realized and unrealized gains from the Fund's investments in A-shares of land-rich enterprises, which are companies that have greater than 50% of their assets in land or real properties in the PRC. The tax reserve was reflected in each Fund's daily NAV calculations as a deduction from such Fund's NAV. If the PRC begins applying tax rules regarding the taxation of capital gains from A-shares investment to RQFIIs, such as the Sub-Adviser, and/or begins collecting capital gains taxes on such investments, a Fund could be subject to withholding tax liability. The impact of any such tax liability on a Fund's return could be

substantial. A Fund may also be liable to the Sub-Adviser for any tax that is imposed on the Sub-Adviser by the PRC with respect to the Fund's investments.

If a Fund's direct investments in A-shares through the Sub-Adviser's RQFII quota become subject to repatriation restrictions, the Fund may be unable to satisfy distribution requirements applicable to RICs under the Internal Revenue Code, and be subject to income and excise tax at the Fund level. In addition, a Fund could be required to recognize unrealized gains, pay taxes and make distributions before re-qualifying for taxation as a RIC. See below under Shareholder Information Tax Information Taxes on Distributions for more information. Each Fund may elect, for U.S. federal income tax purposes, to treat Chinese taxes (including withholding taxes) paid by the Fund as paid by its shareholders. Even if a Fund is qualified to make that election and does so this treatment will not apply with respect to amounts the Fund reserves in anticipation of the imposition of withholding taxes not currently in effect (as discussed above). If these amounts are used to pay any tax liability of a Fund in a later year, they will be treated as paid by the shareholders in such later year, even if they are imposed with respect to income of an earlier year. See Shareholder Information Tax Information for a further description of this risk.

**Special Risk Considerations of Investing in China.** Whether each Fund invests directly in China by investing in A-shares in reliance on the Sub-Adviser's RQFII quota or indirectly in China through swaps or other means described in this Prospectus, investments in China involve certain risks and special considerations, including the following:

**Political and Economic Risk.** The economy of China, which has been in a state of transition from a planned economy to a more market oriented economy, differs from the economies of most developed countries in many respects, including the level of government involvement, its state of development, its growth rate, control of foreign exchange, and allocation of resources. Although the majority of productive assets in China are still owned by the PRC government at various levels, in recent years, the PRC government has implemented economic reform measures emphasizing utilization of market forces in the development of the economy of China and a high level of management autonomy. The economy of China has experienced significant growth in the past 30 years, but growth has been uneven both geographically and among various sectors of the economy. Economic growth has also been accompanied by periods of high inflation. The PRC government has implemented various measures from time to time to control inflation and restrain the rate of economic growth.

For more than 30 years, the PRC government has carried out economic reforms to achieve decentralization and utilization of market forces to develop the economy of the PRC. These reforms have resulted in significant economic growth and social progress. There can, however, be no assurance that the PRC government will continue to pursue such economic policies or, if it does, that those policies will continue to be successful. Any such adjustment and modification of those economic policies may have an adverse impact on the securities market in the PRC as well as the underlying securities of a Fund's Index. Further, the PRC government may from time to time adopt corrective measures to control the growth of the PRC economy which may also have an adverse impact on the capital growth and performance of a Fund.

Political changes, social instability and adverse diplomatic developments in the PRC could result in the imposition of additional government restrictions including expropriation of assets, confiscatory taxes or nationalization of some or all of the property held by the issuers of a Fund's A-share investments or contained in a Fund's Index.

The laws, regulations, including the investment regulations allowing RQFIIs (and QFIIs) to invest in A-shares, government policies and political and economic climate in China may change with little or no advance notice. Any such change could adversely affect market conditions and the performance of the Chinese economy and, thus, the value of the A-shares in a Fund's portfolio.

Since 1949, the PRC has been a socialist state controlled by the Communist party. China has only recently opened up to foreign investment and has only begun to permit private economic activity. There is no guarantee that the Chinese government will not revert from its current open-market economy to the economic policy of central planning that it implemented prior to 1978.

The Chinese government continues to be an active participant in many economic sectors through ownership positions and regulation. The allocation of resources in China is subject to a high level of government control. The Chinese government strictly regulates the payment of foreign currency denominated obligations and sets monetary policy. Through its policies, the government may provide preferential treatment to particular industries or companies. The policies set by the government could have a substantial adverse effect on the Chinese economy and a Fund's investments.

The Chinese economy is export-driven and highly reliant on trade, and much of China's growth in recent years has been the result of focused investments in economic sectors intended to produce goods and services for export

purposes. The performance of the Chinese economy may differ favorably or unfavorably from the U.S. economy in such respects as growth of gross domestic product, rate of inflation, currency depreciation, capital reinvestment, resource self-sufficiency and balance of payments position. Adverse changes to the economic conditions of its primary trading partners, such as the United States, Japan and South Korea, would adversely impact the Chinese economy and a Fund's investments. International trade tensions involving China and its trading counterparties may arise from time to time which can result in trade tariffs, embargoes, trade limitations, trade wars and other negative consequences. Such actions and consequences may ultimately result in a significant reduction in international trade, an oversupply of certain manufactured goods, devaluations of existing inventories and potentially the failure of individual companies and/or large segments of China's export industry with a potentially severe negative impact to a Fund.

China has been transitioning to a market economy since the late seventies, reaffirming its economic policy reforms through five-year programs, the latest of which (for 2011 through 2015) was approved in March 2011. Under the economic reforms implemented by the Chinese government, the Chinese economy has experienced tremendous

**ADDITIONAL INFORMATION ABOUT THE FUNDS INVESTMENT STRATEGIES AND RISKS**  
**(continued)**

growth, developing into one of the largest economies in the world. There is no assurance, however, that such growth will be sustained in the future.

Moreover, the current slowdown or any future recessions in other significant economies of the world, such as the United States, the European Union and certain Asian countries, may adversely affect economic growth in China. An economic downturn in China would adversely impact a Fund's investments.

**Inflation.** Economic growth in China has also historically been accompanied by periods of high inflation. Beginning in 2004, the Chinese government commenced the implementation of various measures to control inflation, which included the tightening of the money supply, the raising of interest rates and more stringent control over certain industries. If these measures are not successful, and if inflation were to steadily increase, the performance of the Chinese economy and a Fund's investments could be negatively impacted.

**Tax Changes.** The Chinese system of taxation is not as well settled as that of the United States. In addition, changes in the Chinese tax system may have retroactive effects.

**Nationalization and Expropriation.** After the formation of the Chinese socialist state in 1949, the Chinese government renounced various debt obligations and nationalized private assets without providing any form of compensation. There can be no assurance that the Chinese government will not take similar actions in the future. Accordingly, an investment in a Fund involves a risk of a total loss.

**Hong Kong Policy.** As part of Hong Kong's transition from British to Chinese sovereignty in 1997, China agreed to allow Hong Kong to maintain a high degree of autonomy with regard to its political, legal and economic systems for a period of at least 50 years. China controls matters that relate to defense and foreign affairs. Under the agreement, China does not tax Hong Kong, does not limit the exchange of the Hong Kong dollar for foreign currencies and does not place restrictions on free trade in Hong Kong. However, there is no guarantee that China will continue to honor the agreement, and China may change its policies regarding Hong Kong at any time. Any such change could adversely affect market conditions and the performance of the Chinese economy and, thus, the value of securities in a Fund's portfolio.

**Chinese Securities Markets.** The securities markets in China have a limited operating history and are not as developed as those in the United States. These markets tend to be smaller in size, have less liquidity and historically have had greater volatility than markets in the United States and some other countries. In addition, there is less regulation and monitoring of Chinese securities markets and the activities of investors, brokers and other participants than in the United States. Accordingly, issuers of securities in China are not subject to the same degree of regulation as are U.S. issuers with respect to such matters as insider trading rules, tender offer regulation, stockholder proxy requirements and the requirements mandating timely disclosure of information. Stock markets in China are in the process of change and further development. This may lead to trading volatility, unpredictable trading suspensions, difficulty in the settlement and recording of transactions and difficulty in interpreting and applying the relevant regulations. These risks may be more pronounced for the A-share market than for Chinese securities markets generally because the A-share market is subject to greater government restrictions and control, including trading suspensions, as described in greater detail above.

**Available Disclosure About Chinese Companies.** Disclosure and regulatory standards in emerging market countries, such as China, are in many respects less stringent than U.S. standards. There is substantially less publicly available information about Chinese issuers than there is about U.S. issuers. Therefore, disclosure of certain material information may not be made, and less information may be available to a Fund and other investors than would be the case if a Fund's investments were restricted to securities of U.S. issuers. Chinese issuers are subject to accounting, auditing and financial standards and requirements that differ, in some cases significantly, from those applicable to U.S. issuers. In particular, the assets and profits appearing on the financial statements of a Chinese issuer may not reflect its financial position or results of operations in the way they would be reflected had such financial statements been prepared in accordance with U.S. Generally Accepted Accounting Principles.

**Chinese Corporate and Securities Law.** The regulations on investments and repatriation of capital by QFIIs and RQFIIs are relatively new. As a result, the application and interpretation of such investment regulations are therefore relatively untested. In addition, PRC authorities have broad discretion in this regard. A Fund's rights with respect to its investments in A-shares through Stock Connect or the Sub-Adviser's RQFII quota will not be governed by U.S. law, and instead will be governed by Chinese law. China operates under a civil law system, in which court precedent is not binding. Because there is no binding precedent to interpret existing statutes, there is uncertainty regarding the implementation of existing law.

Legal principles relating to corporate affairs and the validity of corporate procedures, directors' fiduciary duties and liabilities and stockholders' rights often differ from those that may apply in the United States and other countries. Chinese laws providing protection to investors, such as laws regarding the fiduciary duties of officers and directors, are undeveloped and will not provide investors, such as a Fund, with protection in all situations where protection would be provided by comparable law in the United States. China lacks a national set of laws that address all issues that may arise with regard to a foreign investor such as a Fund.

It may therefore be difficult for a Fund to enforce its rights as an investor under Chinese corporate and securities laws, and it may be difficult or impossible for a Fund to obtain a judgment in court. Moreover, as Chinese corporate and securities laws continue to develop, these developments may adversely affect foreign investors, such as a Fund.

**Special Risk Considerations of Investing in A-shares.** Each Fund's investments in A-shares are limited to the Sub-Adviser's RQFII quota amount obtained by the Sub-Adviser in its capacity as RQFII on behalf of the Fund and the market-wide quotas imposed by Stock Connect. In addition, there may be significant restrictions on the repatriation of gains and income related to the Sub-Adviser's RQFII quota that may affect a Fund's ability to satisfy redemption requests. Currently, there are two stock exchanges in mainland China, the Shanghai and Shenzhen Stock Exchanges, and there is one stock exchange in Hong Kong. The Shanghai and Shenzhen Stock Exchanges are supervised by the CSRC and are highly automated with trading and settlement executed electronically. The Shanghai and Shenzhen Stock Exchanges are substantially smaller, less liquid and more volatile than the major securities markets in the United States. In comparison to the mainland Chinese securities markets, the securities markets in Hong Kong are relatively well developed and active.

The Shanghai Stock Exchange commenced trading on December 19, 1990, the Shenzhen Stock Exchange commenced trading on July 3, 1991 and the Hong Kong Stock Exchange commenced trading on April 2, 1986. The Shanghai and Shenzhen Stock Exchanges divide listed shares into two classes: A-shares and B-shares. Companies whose shares are traded on the Shanghai and Shenzhen Stock Exchanges that are incorporated in mainland China may issue both A-shares and B-shares. In China, the A-shares and B-shares of an issuer may only trade on one exchange. A-shares and B-shares may both be listed on either the Shanghai or Shenzhen Stock Exchanges. Both classes represent an ownership interest comparable to a share of common stock and all shares are entitled to substantially the same rights and benefits associated with ownership. A-shares are traded on the Shanghai and Shenzhen Stock Exchanges in RMB.

As of February 28, 2015, the CSRC had granted licenses to 137 RQFIIs and 279 QFIIs bringing total investment quotas to approximately US\$ 194 billion in A-shares and other permitted securities. In addition, Stock Connect provides a market-wide quota of approximately US\$ 39 billion and a daily market-wide quota of approximately US\$ 2 billion. Because restrictions continue to exist and capital therefore cannot flow freely into the A-share market, it is possible that in the event of a market disruption, the liquidity of the A-share market and trading prices of A-shares could be more severely affected than the liquidity and trading prices of markets where securities are freely tradable and capital therefore flows more freely. A Fund cannot predict the nature or duration of such a market disruption or the impact that it may have on the A-share market and the short-term and long-term prospects of its investments in the A-share market.

The Chinese government has in the past taken actions that benefited holders of A-shares. As A-shares become more available to foreign investors, such as a Fund, the Chinese government may be less likely to take action that would benefit holders of A-shares. In addition, there is no guarantee that the Sub-Adviser will continue to maintain its RQFII quota or be able to maintain its RQFII quota or be able to obtain additional RQFII quota if the RQFII quota is reduced or eliminated by SAFE at some point in the future. A Fund cannot predict what would occur if an RQFII quota of the Sub-Adviser were reduced or eliminated, although such an occurrence would likely have a material adverse effect on a

Fund.

From time to time, certain of the companies in which a Fund expects to invest may operate in, or have dealings with, countries subject to sanctions or embargoes imposed by the U.S. Government and the United Nations and/or countries identified by the U.S. Government as state sponsors of terrorism. A company may suffer damage to its reputation if it is identified as a company which operates in, or has dealings with, countries subject to sanctions or embargoes imposed by the U.S. Government and the United Nations and/or countries identified by the U.S. Government as state sponsors of terrorism. As an investor in such companies, a Fund will be indirectly subject to those risks.

**Investment and Repatriation Restrictions.** Investments by a Fund in A-shares through the Sub-Adviser's RQFII quota, other Chinese financial instruments regulated by the CSRC, including warrants and open- and closed-end investment companies, are subject to governmental pre-approval limitations on the quantity that a Fund may purchase or limits on the classes of securities in which a Fund may invest.

The Sub-Adviser, as a licensed RQFII, is currently permitted to repatriate RMB daily and is not subject to RMB repatriation restrictions or prior approval. However, there is no assurance that PRC rules and regulations will not change or that repatriation restrictions will not be imposed in the future. Any additional restrictions imposed on the Sub-Adviser

**ADDITIONAL INFORMATION ABOUT THE FUNDS INVESTMENT STRATEGIES AND RISKS**  
(continued)

or RQFIIs generally may have an adverse effect on a Fund's ability to invest directly in A-shares and its ability to meet redemptions requests.

The Chinese government limits foreign investment in the securities of certain Chinese issuers entirely if foreign investment is banned in respect of the industry in which the relevant Chinese issuers are conducting their business. These restrictions or limitations may have adverse effects on the liquidity and performance of the Fund holdings as compared to the performance of its Index. This may increase the risk of tracking error and may adversely affect a Fund's ability to achieve its investment objective.

**Tax Risk.** For a discussion regarding the tax risks applicable to the Fund's investments in A-shares, please see "Risk of the RQFII Regime and the Funds' Principal Investment Strategies" above.

The sale or transfer by the Sub-Adviser of A-shares or B-shares will be subject to PRC Stamp Duty at a rate of 0.1% on the transacted value. However, the Sub-Adviser will not be subject to PRC Stamp Duty when it acquires A-shares and B-shares.

In the absence of specific guidance, non-PRC investors, including RQFIIs such as the Sub-Adviser, may be potentially subject to PRC business tax at a rate of 5% with respect to the capital gains derived from the trading of A-shares. Existing guidance provides a business tax exemption for QFIIs with respect to their gains derived from the trading of PRC securities, but this business tax exemption does not explicitly apply to RQFIIs. However, in practice, the Chinese tax authorities have not actively enforced the collection of business tax on such gains. A Fund's shareholder's ability to claim a credit for certain Chinese taxes may be limited under general U.S. tax principles.

**Risk of Loss of Favorable U.S. Tax Treatment.** Each Fund intends to distribute annually all or substantially all of its investment company taxable income and net capital gain. However, if a Fund does not repatriate funds associated with direct investment in A-shares on a timely basis, it may be unable to satisfy the distribution requirements required to qualify for the favorable tax treatment otherwise generally afforded to RICs under the Internal Revenue Code. If a Fund fails to qualify for any taxable year as a RIC, the Fund would be treated as a corporation subject to U.S. federal income tax, thereby subjecting any income earned by the Fund to tax at the corporate level currently at a 35% U.S. federal tax rate and, when such income is distributed, to a further tax at the shareholder level to the extent of the Fund's current or accumulated earnings and profits. In addition, the Fund would not be eligible for a deduction for dividends paid to shareholders. In addition, the Fund could be required to recognize unrealized gains, pay taxes and make distributions (any of which could be subject to interest charges) before re-qualifying for taxation as a RIC. See below under "Shareholder Information Tax Information Taxes on Distributions" for more information.

**Tax on Retained Income and Gains.** To the extent a Fund does not distribute to shareholders all of its investment company taxable income and net capital gain in a given year, it will be required to pay U.S. federal income and excise tax on the retained income and gains, thereby reducing the Fund's return. A Fund may elect to treat its net capital gain as having been distributed to shareholders. In that case, shareholders of record on the last day of the Fund's taxable year will be required to include their attributable share of the retained gain in income for the year as a long-term capital gain despite not actually receiving the dividend, and will be entitled to a tax credit or refund for the tax deemed paid on their behalf by the Fund as well as an increase in the basis of their shares to reflect the difference between their attributable share of the gain and the related credit or refund.

**Foreign Exchange Control.** The Chinese government heavily regulates the domestic exchange of foreign currencies within China. Chinese law requires that all domestic transactions must be settled in RMB, places significant restrictions on the remittance of foreign currency and strictly regulates currency exchange from RMB. Under SAFE regulations, Chinese corporations may only purchase foreign currencies through government approved banks. In general, Chinese companies must receive approval from or register with the Chinese government before investing in certain capital account items, including direct investments and loans, and must thereafter maintain separate foreign exchange accounts for the capital items. Foreign investors may only exchange foreign currencies at specially authorized banks after complying with documentation requirements. These restrictions may adversely affect a Fund and its investments. There may not be sufficient amounts of RMB for a Fund to be fully invested because the Fund has to convert U.S. dollars received from the purchase of Creation Units into RMB to purchase RMB denominated investments. It should also be noted that that the PRC government's policies on exchange control and repatriation restrictions are subject to change, and any such change may adversely impact a Fund. There can be no assurance that the RMB exchange rate will not fluctuate widely against the US dollar or any other foreign currency in the future.

**Custody Risks of Investing in A-shares.** Industrial and Commercial Bank of China Limited ( ICBC or the PRC sub-custodian ), which is approved by CSRC and SAFE as a qualified RQFII custodian, has been appointed to provide custody services to the Funds' assets invested in A-shares and investments in the PRC. The PRC sub-custodian

maintains the Funds' RMB deposit accounts and oversees the Funds' investments in A-shares to ensure compliance with the rules and regulations of the CSRC and the People's Bank of China. A-shares that are traded on the Shanghai or Shenzhen Stock Exchange are dealt and held in book-entry form through the China Securities Depository and Clearing Corporation Limited (CSDCC). The securities purchased by the Sub-Adviser, in its capacity as a RQFII, on behalf of a Fund, will be received by the CSDCC as credited to a securities trading account maintained by the PRC sub-custodian in the joint names of the Fund and the Sub-Adviser, and the Fund will pay the cost of the account. The Sub-Adviser may not use the account for any other purpose than for maintaining the Fund's assets. However, given that the securities trading account will be maintained in the joint names of the Sub-Adviser and the Fund, the Fund's assets may not be as well protected as they would be if it were possible for them to be registered and held solely in the name of the Fund. In particular, there is a risk that creditors of the Sub-Adviser may assert that the securities are owned by the Sub-Adviser and not the Fund, and that a court would uphold such an assertion, in which case creditors of the Sub-Adviser could seize assets of the Fund.

Investment via Stock Connect is subject to similar custody risks. Securities purchased by the Fund through Stock Connect will be held via a book entry in an omnibus account in the name of HKSCC, Hong Kong's clearing entity, at CSDCC. The Fund's ownership interest in Stock Connect securities will not be reflected directly in the book entry with CSDCC and will instead only be reflected on the books of its Hong Kong sub-custodian.

Investors should also note that cash deposits in a Fund's account with the PRC sub-custodian will not be segregated from the proprietary assets of the PRC sub-custodian or the assets of its other clients. Therefore, to the extent a Fund's assets are commingled, the cash deposits will be vulnerable in the event of a liquidation or bankruptcy by the PRC sub-custodian. Under such circumstances, a Fund will not have any proprietary rights to the cash deposited in the account, and the Fund will become an unsecured creditor, and would have no priority over the claims of any other unsecured creditors to the assets of the PRC sub-custodian. A Fund may encounter difficulties or delays in recovering such debt, or may not be able to recover it in full or at all, in which case the Fund will suffer losses.

**Use of Brokers.** CSRC and SAFE regulations specify that all securities traded by the Sub-Adviser, as a licensed RQFII, on behalf of a Fund must be executed through one of three specified brokers per exchange. As a result, the Sub-Adviser will have less flexibility to choose among brokers on behalf of a Fund than is typically the case for investment managers.

**Foreign Currency Considerations.** Emerging markets such as China can experience high rates of inflation, deflation and currency devaluation. The value of the RMB may be subject to a high degree of fluctuation due to, among other things, changes in interest rates, the effects of monetary policies issued by the PRC, the United States, foreign governments, central banks or supranational entities, the imposition of currency controls or other national or global political or economic developments. Each Fund invests a significant portion of its assets in investments denominated in RMB and the income received by each Fund will principally be in RMB. A Fund's exposure to the RMB and changes in value of the RMB versus the U.S. dollar may result in reduced returns for the Fund. Moreover, a Fund may incur costs in connection with conversions between U.S. dollars and RMB. The RMB is currently not a freely convertible currency. The value of the RMB is based on a managed floating exchange rate based on market supply and demand with reference to a basket of foreign currencies. The daily trading price of the RMB is allowed to float within a narrow band around the central parity published by the People's Bank of China. The Chinese government's imposition of restrictions on the repatriation of RMB out of mainland China may limit the depth of the offshore RMB market and reduce the liquidity of a Fund's investments. These restrictions as well as any accelerated appreciation or depreciation of RMB may adversely affect a Fund and its investments.

Each Fund's assets are expected to be primarily invested in the A-shares of Chinese issuers and the income received by each Fund will be principally in RMB. Meanwhile, each Fund will compute and expects to distribute its income in U.S. dollars, and the computation of income will be made on the date that the income is earned by the Fund at the foreign exchange rate in effect on that date. Therefore, if the value of the RMB falls relative to the U.S. dollar between the earning of the income and the time at which a Fund converts the RMB to U.S. dollars, the Fund may be required to liquidate certain positions in order to make distributions if the Fund has insufficient cash in U.S. dollars to meet distribution requirements under the Internal Revenue Code. The liquidation of investments, if required, may also have an adverse impact on a Fund's performance.

Furthermore, a Fund may incur costs in connection with conversions between U.S. dollars and RMB. Foreign exchange dealers realize a profit based on the difference between the prices at which they are buying and selling various currencies. Thus, a dealer normally will offer to sell a foreign currency to a Fund at one rate, while offering a lesser rate of exchange should the Fund desire immediately to resell that currency to the dealer. A Fund will conduct its foreign

**ADDITIONAL INFORMATION ABOUT THE FUNDS INVESTMENT STRATEGIES AND RISKS**  
(continued)

currency exchange transactions either on a spot (i.e., cash) basis at the spot rate prevailing in the foreign currency exchange market, or through entering into forward, futures or options contracts to purchase or sell foreign currencies.

RMB can be further categorized into onshore RMB ( CNY ), which can be traded only in the PRC, and offshore RMB ( CNH ), which can be traded outside the PRC. CNY and CNH are traded at different exchange rates and their exchange rates may not move in the same direction. Although there has been a growing amount of RMB held offshore, CNH cannot be freely remitted into the PRC and is subject to certain restrictions, and vice versa. A Fund may also be adversely affected by the exchange rates between CNY and CNH. In addition, there may not be sufficient amounts of RMB for a Fund to be fully invested because the Fund has to convert U.S. dollars received from the purchase of Creation Units into RMB to purchase A-shares, and this may result in settlement delays and increased tracking error. A Fund will be required to remit CNH to settle the purchase of A-shares by the Fund from time to time. In the event such remittance is disrupted, a Fund will not be able to fully replicate its Index by investing in the relevant A-shares, which may lead to increased tracking error. Moreover, the trading and settlement of RMB-denominated securities are recent developments in Hong Kong and there is no assurance that problems will not be encountered with the systems or that other logistical problems will not arise.

Currently, there is no market in China in which the Funds may engage in hedging transactions to minimize RMB foreign exchange risk, and there can be no guarantee that instruments suitable for hedging currency will be available to the Funds in China at any time in the future. In the event that in the future it becomes possible to hedge RMB currency risk in China, a Fund may seek to protect the value of some portion or all of its portfolio holdings against currency risks by engaging in hedging transactions. In that case, such Fund may enter into forward currency exchange contracts and currency futures contracts and options on such futures contracts, as well as purchase put or call options on currencies, in China. Currency hedging would involve special risks, including possible default by the other party to the transaction, illiquidity and, to the extent the Adviser's and/or the Sub-Adviser's view as to certain market movements is incorrect, the risk that the use of hedging could result in losses greater than if they had not been used. The use of currency transactions could result in a Fund's incurring losses as a result of the imposition of exchange controls, exchange rate regulation, suspension of settlements or the inability to deliver or receive a specified currency.

**Disclosure of Interests and Short Swing Profit Rule.** A Fund may be subject to shareholder disclosure of interest regulations promulgated by the CSRC. These regulations currently require a Fund to make certain public disclosures when the Fund and parties acting in concert with the Fund acquire 5% or more of the issued securities of a listed company (which include A-shares and B-shares of the listed company). If the reporting requirement is triggered, a Fund will be required to report information which includes, but is not limited to: (a) information about the Fund and the type and extent of its holdings in the company; (b) a statement of the Fund's purposes for the investment and whether the Fund intends to increase its holdings over the following 12-month period; (c) a statement of the Fund's historical investments in the company over the previous six months; (d) the time of, and other information relating to, the transaction that triggered the Fund's holding in the listed company reaching the 5% reporting threshold; and (e) other information that may be required by the CSRC or the stock exchange. Additional information may be required if a Fund and its concerted parties constitute the largest shareholder or actual controlling shareholder of the listed company. The report must be made to the CSRC, the stock exchange, the invested company, and the CSRC local representative office where the listed company is located. A Fund would also be required to make a public announcement through a media outlet designated by the CSRC. The public announcement must contain the same content as the official report.

The relevant PRC regulations presumptively treat all affiliated investors and investors under common control as parties acting in concert. As such, under a conservative interpretation of these regulations, a Fund may be deemed as a concerted party of other funds managed by the Adviser and its affiliates and/or the Sub-Adviser and its affiliates and therefore may be subject to the risk that the Fund's holdings may be required to be reported in the aggregate with the holdings of such other funds should the aggregate holdings trigger the reporting threshold under the PRC law.

If the 5% shareholding threshold is triggered by a Fund and parties acting in concert with the Fund, the Fund would be required to file its report within three days of the date the threshold is reached. During the time limit for filing the report, a trading freeze applies and the Fund would not be permitted to make subsequent trades in the invested company's securities. Any such trading freeze may negatively impact a Fund's performance, if the Fund would otherwise make trades during that period but is prevented from doing so by the regulation.

Once a Fund and parties acting in concert reach the 5% trading threshold as to any listed company, any subsequent incremental increase or decrease of 5% or more will trigger a further reporting requirement and an additional three-day trading freeze, and also an additional freeze on trading within two days of the Fund's report and announcement of the incremental change. These trading freezes may undermine a Fund's performance as described above. Also, Shanghai Stock Exchange requirements currently require a Fund and parties acting in concert, once they have reached the 5%

threshold, to disclose whenever their shareholding drops below this threshold (even as a result of trading which is less than the 5% incremental change that would trigger a reporting requirement under the relevant CSRC regulation).

CSRC regulations also contain additional disclosure (and tender offer) requirements that apply when an investor and parties acting in concert reach thresholds of 20% and greater than 30% shareholding in a company. Because no single underlying foreign investor investing through a RQFII or QFII (e.g., a Fund) may currently hold more than 10% of the total outstanding shares in one listed company, it is currently unlikely that a Fund's trading would trigger the more detailed reporting or tender offer requirements at the higher thresholds.

Subject to the interpretation of PRC courts and PRC regulators, the operation of the PRC short swing profit rule may be applicable to the trading of a Fund with the result that where the holdings of the Fund (possibly with the holdings of other accounts managed by the Adviser or Sub-Adviser) exceed 5% of the total issued shares of a listed company, the Fund may not reduce its holdings in the company within six months of the last purchase of shares of the company. If a Fund violates the rule, it may be required by the listed company to return any profits realized from such trading to the listed company. In addition, the rule limits the ability of a Fund to repurchase securities of the listed company within six months of such sale. Moreover, under PRC civil procedures, a Fund's assets may be frozen to the extent of the claims made by the company in question. If the operation of the PRC short swing profit rule is triggered as described above, it may greatly impair the performance of a Fund.

**Risks of Investing through Stock Connect.** Each Fund may invest in A-shares listed and traded on the Shanghai Stock Exchange through Stock Connect, or on such other stock exchanges in China which participate in Stock Connect from time to time or in the future. Trading through Stock Connect is subject to a number of restrictions that may affect a Fund's investments and returns. For example, trading through Stock Connect is subject to aggregate investment quotas that limit total purchases and sales through Stock Connect as well as daily quotas that limit the maximum daily net purchases on any particular day, each of which may restrict or preclude the Fund's ability to invest in Stock Connect A-shares. In addition, investments made through Stock Connect are subject to trading, clearance and settlement procedures that are untested in the PRC, which could pose risks to a Fund. Moreover, Stock Connect A-shares generally may not be sold, purchased or otherwise transferred other than through Stock Connect in accordance with applicable rules. A primary feature of Stock Connect is the application of the home market's laws and rules applicable to investors in A-shares. Therefore, a Fund's investments in Stock Connect A-shares are generally subject to PRC securities regulations and listing rules, among other restrictions. Finally, uncertainties in PRC tax rules governing taxation of income and gains from investments in Stock Connect A-shares could result in unexpected tax liabilities for a Fund. The withholding tax treatment of dividends and capital gains payable to overseas investors currently is unsettled.

The Stock Connect program is a pilot program in its initial stages. Further developments are likely and there can be no assurance as to the program's continued existence or whether future developments regarding the program may restrict or adversely affect a Fund's investments or returns. In addition, the application and interpretation of the laws and regulations of Hong Kong and the PRC, and the rules, policies or guidelines published or applied by relevant regulators and exchanges in respect of the Stock Connect program are uncertain, and they may have a detrimental effect on a Fund's investments and returns.

**Risk of Investing in Swaps.** (Market Vectors ChinaAMC A-Share ETF only.) The Fund also expects to invest in swaps and other types of derivative instruments that have economic characteristics that are substantially identical to the economic characteristics of A-shares, including swaps on the CSI 300 Index, swaps on the A-shares which comprise the CSI 300 Index and/or swaps on funds that seek to replicate the performance of the CSI 300 Index or funds that invest in A-shares or the Fund may invest directly in shares of such funds. The use of swap agreements

entails certain risks, which may be different from, and possibly greater than, the risks associated with investing directly in the underlying asset for the swap agreement. These risks include:

**Limited Availability of Swaps.** The Fund's ability to achieve its stated investment objective may depend upon the continuing availability of A-shares and the willingness and ability of potential swap counterparties to engage in swaps with the Fund linked to the performance of A-shares. To the extent that the RQFII or QFII quota of a potential swap counterparty is reduced or eliminated due to actions by the Chinese government or as a result of transactions entered into by the counterparty with other investors, the counterparty's ability to continue to enter into swaps or other derivative transactions with the Fund may be reduced or eliminated, which could have a material adverse effect on the Fund. These risks are compounded by the fact that at present there are only a limited number of potential counterparties willing and able to enter into swap transactions linked to the performance of A-shares. Furthermore, swaps are of limited duration and there is no guarantee that swaps entered into with a counterparty will continue indefinitely. Accordingly, the duration of a swap depends on, among other things, the ability of the Fund to renew the expiration period of the relevant swap at agreed upon terms. In addition, under the current regulations regarding quotas

**ADDITIONAL INFORMATION ABOUT THE FUNDS INVESTMENT STRATEGIES AND RISKS**  
(continued)

of RQFIIs or QFIIs administered by SAFE, RQFIIs and QFIIs are prohibited from transferring or selling their quotas to any third party. However, there is uncertainty over how this prohibition is implemented. Therefore, subject to interpretation by SAFE, QFIIs or RQFIIs may be limited or prohibited from providing the Fund access to RQFII quotas by entering into swap or other derivative transactions, which, in turn, could adversely affect the Fund.

**Counterparty Risk.** Because a swap is an obligation of the counterparty rather than a direct investment in A-shares, the Fund may suffer losses potentially equal to, or greater than, the full value of the swap if the counterparty fails to perform its obligations under the swap as a result of bankruptcy or otherwise. Any loss would result in a reduction in the NAV of the Fund and will likely impair the Fund's ability to achieve its investment objective. The counterparty risk associated with the Fund's investments is expected to be greater than most other funds because there are only a limited number of counterparties that are willing and able to enter into swaps on A-shares. In fact, because there are so few potential counterparties, the Fund, subject to applicable law, may enter into swap transactions with as few as one counterparty at any time.

**Liquidity Risk.** Swap agreements may be subject to liquidity risk, which exists when a particular swap is difficult to purchase or sell. If a swap transaction is particularly large or if the relevant market is illiquid, it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price, which may result in significant losses to the Fund. This is especially true given the limited number of potential counterparties willing and able to enter into swap transactions on A-shares. In addition, a swap transaction may be subject to the Fund's limitation on investments in illiquid securities. Swap agreements may be subject to pricing risk, which exists when a particular swap agreement becomes extraordinarily expensive (or inexpensive) relative to historical prices or the prices of corresponding cash market instruments. The swaps market is subject to extensive regulation under the Dodd-Frank Act and certain SEC and CFTC rules promulgated thereunder. It is possible that developments in the swaps market, including new and additional government regulation, could result in higher Fund costs and expenses and could adversely affect the Fund's ability, among other things, to enter into or to terminate existing swap agreements or to realize amounts to be received under such agreements.

**Tax Risk.** The Fund's investments in swaps and other derivative instruments may be less tax-efficient than a direct investment in A-shares. Investments in swaps and other derivatives may be subject to special U.S. federal income tax rules that could negatively affect the character, timing and amount of income earned by the Fund (e.g., by causing amounts that would be capital gain to be taxed as ordinary income or to be taken into income earlier than would otherwise be necessary). Also, the Fund may be required to periodically adjust its positions in its swaps and derivatives to comply with certain regulatory requirements which may further cause these investments to be less efficient than a direct investment in A-shares. For example, swaps in which the Fund will invest may need to be reset on a regular basis in order to maintain compliance with the 1940 Act or for other reasons, which may increase the likelihood that the Fund will generate short-term capital gains. In addition, because the application of these special rules may be uncertain, it is possible that the manner in which they are applied by the Fund may be determined to be incorrect. In that event, the Fund may be found to have failed to maintain its qualification as a RIC or to be subject to additional U.S. tax liability. Moreover, the Fund may make investments, both directly and through swaps or other derivative positions, in companies classified as passive foreign investment companies for U.S. federal income tax purposes (PFICs). Investments in PFICs are subject to special tax rules which may result in adverse tax consequences to the Fund and its shareholders.

**Risk of Investing in Futures.** (Market Vectors ChinaAMC A-Share ETF only.) Futures contracts generally provide for the future sale by one party and purchase by another party of a specified instrument, index or commodity at a specified future time and at a specified price. The value of a futures contract tends to increase and decrease in tandem with the value of the underlying instrument. The prices of futures can be highly volatile, using futures can lower total return, can create investment leverage, and the potential loss from futures can exceed the Fund's initial investment in such contracts. Futures contracts involve the risk of mispricing or improper valuation and the risk that changes in the value of a futures contract may not correlate perfectly with the underlying indicator. Even a well-conceived futures transaction may be unsuccessful due to market events. There is also the risk of loss by the Fund of margin deposits in the event of bankruptcy of a broker with whom the Fund has an open position in the futures contract. A liquid secondary market may not always exist for the Fund's futures contract positions at any time.

**Risk of Investing in Other Funds.** (Market Vectors ChinaAMC A-Share ETF only.) The Fund may invest in shares of other funds, including ETFs that track the CSI 300 Index. As a result, the Fund will indirectly be exposed to the risks of an investment in the underlying funds. Shares of other funds have many of the same risks as direct investments in common stocks or bonds. In addition, the market value of such funds' shares is expected to rise and fall as the value of the underlying index or bond rises and falls. The market value of such funds' shares may differ from the net asset value of the

particular fund. As a shareholder in a fund (as with ETFs), the Fund would bear its ratable share of that entity's expenses. At the same time, the Fund would continue to pay its own investment management fees and other expenses. As a result, the Fund and its shareholders will be absorbing duplicate levels of fees with respect to investments in other funds, including ETFs. Such fees will not, however, be counted towards the Fund's expense cap.

**Risk of Investing in Foreign Securities.** Investments in the securities of foreign issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Because many foreign securities markets may be limited in size, the prices of securities that trade in such markets may be influenced by large traders. Certain foreign markets that have historically been considered relatively stable may become volatile in response to changed conditions or new developments. Increased interconnectivity of world economies and financial markets increases the possibility that adverse developments and conditions in one country or region will affect the stability of economies and financial markets in other countries or regions. Foreign issuers are often subject to less stringent requirements regarding accounting, auditing, financial reporting and record keeping than are U.S. issuers, and therefore, not all material information may be available or reliable. Securities exchanges or foreign governments may adopt rules or regulations that may negatively impact a Fund's ability to invest in foreign securities or may prevent the Fund from repatriating its investments. The risks of investing in emerging market countries are greater than risks associated with investments in foreign developed countries. In addition, a Fund may not receive shareholder communications or be permitted to vote the securities that it holds, as the issuers may be under no legal obligation to distribute shareholder communications.

In addition, various PRC companies derive their revenues in RMB but have requirements for foreign currency, including for the import of materials, debt service on foreign currency denominated debt, purchases of imported equipment and payment of any cash dividends declared. The existing PRC foreign exchange regulations have significantly reduced government foreign exchange controls for certain transactions, including trade and service related foreign exchange transactions and payment of dividends. However, it is impossible to predict whether the PRC government will continue its existing foreign exchange policy and when the PRC government will allow free conversion of the RMB to foreign currency. Certain foreign exchange transactions, including principal payments in respect of foreign currency-denominated obligations, currently continue to be subject to significant foreign exchange controls and require the approval of SAFE. Since 1994, the conversion of RMB into U.S. dollars has been based on rates set by the People's Bank of China, which are set daily based on the previous day's PRC interbank foreign exchange market rate. It is not possible to predict nor give any assurance of any future stability of the RMB to U.S. dollar exchange rate. Fluctuations in exchange rates may adversely affect the Fund's NAV. Furthermore, because dividends are declared in U.S. dollars and underlying payments are made in RMB, fluctuations in exchange rates may adversely affect dividends paid by a Fund.

A Fund may also invest in shares of foreign investment companies, including Hong Kong-listed ETFs, the shares of which are listed and traded primarily on a foreign securities exchange. A Fund as an investor in a foreign fund may not be afforded the same investor protections that are provided by the U.S. federal securities laws. A Fund's ability to transfer shares of such foreign funds outside of the foreign fund's primary market may be restricted or prohibited.

In addition, a Fund may invest in depositary receipts which involve similar risks to those associated with investments in foreign securities. The issuers of certain depositary receipts are under no obligation to distribute shareholder communications to the holders of such receipts, or to pass through to them any voting rights with respect to the deposited securities.

**Risk of Investing in Emerging Market Issuers.** Investments in securities of emerging market issuers are exposed to a number of risks that may make these investments volatile in price or difficult to trade. Political risks may include unstable governments, nationalization, restrictions on foreign ownership, laws that prevent investors from getting their money out of a country and legal systems that do not protect property rights as well as the laws of the United States. Market risks may include economies that concentrate in only a few industries, securities issues that are held by only a few investors, limited trading capacity in local exchanges and the possibility that markets or issues may be manipulated by foreign nationals who have inside information.

**Risk of Investing in the Financial Services Sector.** (Market Vectors ChinaAMC A-Share ETF only.) To the extent that the CSI 300 Index continues to be concentrated in the financial services sector, the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the financial services sector. Companies in the financial services sector may be subject to extensive government regulation that affects the scope of their activities, the prices they can charge and the amount of capital they must maintain. The profitability of companies in the financial services sector may be adversely affected by increases in interest rates, by loan losses, which usually increase in economic downturns, and by rating downgrades. In addition, the financial services sector is undergoing numerous changes, including continuing consolidations, development of new products and structures and changes to its regulatory framework. Furthermore, some

**ADDITIONAL INFORMATION ABOUT THE FUNDS INVESTMENT STRATEGIES AND RISKS  
(continued)**

companies in the financial services sector perceived as benefitting from government intervention in the past may be subject to future government-imposed restrictions on their businesses or face increased government involvement in their operations. Increased government involvement in the financial services sector, including measures such as taking ownership positions in financial institutions, could result in a dilution of the Fund's investments in financial institutions. Recent developments in the credit markets may cause companies operating in the financial services sector to incur large losses, experience declines in the value of their assets and even cease operations.

**Risk of Investing in the Industrials Sector.** To the extent that the industrials sector continues to represent a significant portion of each Fund's respective Index, each Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the industrials sector. Companies in the industrials sector may be adversely affected by changes in government regulation, world events and economic conditions. In addition, companies in the industrials sector may be adversely affected by environmental damages, product liability claims and exchange rates. The stock prices of companies in the industrials sector are affected by supply and demand both for their specific product or service and for industrial sector products in general. The products of manufacturing companies may face product obsolescence due to rapid technological developments and frequent new product introduction. In addition, the industrials sector may also be adversely affected by changes or trends in commodity prices, which may be influenced or characterized by unpredictable factors.

**Risk of Investing in the Information Technology Sector.** (Market Vectors ChinaAMC SME-ChiNext ETF only.) To the extent that the SME-ChiNext Index continues to be concentrated in the information technology sector, the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the information technology sector. Information technology companies face intense competition, both domestically and internationally, which may have an adverse effect on profit margins. Information technology companies may have limited product lines, markets, financial resources or personnel. The products of information technology companies may face product obsolescence due to rapid technological developments and frequent new product introduction, unpredictable changes in growth rates and competition for the services of qualified personnel. Companies in the information technology sector are heavily dependent on patent protection and the expiration of patents may adversely affect the profitability of these companies.

**Risk of Investing in the Health Care Sector.** (Market Vectors ChinaAMC SME-ChiNext ETF only.) To the extent that the health care sector continues to represent a significant portion of the SME-ChiNext Index, the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the health care sector. Companies in the healthcare sector may be affected by extensive government regulation, restrictions on government reimbursement for medical expenses, rising costs of medical products and services, pricing pressure, an increased emphasis on outpatient services, limited number of products, industry innovation, changes in technologies and other market developments. Many healthcare companies are heavily dependent on patent protection and are subject to extensive litigation based on product liability and similar claims.

**Risk of Investing in the Consumer Discretionary Sector.** To the extent that the consumer discretionary sector continues to represent a significant portion of the each Fund's respective Index, each Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the consumer discretionary sector. Companies engaged in the consumer discretionary sector are subject to fluctuations in supply and demand. These companies may also be adversely affected by changes in consumer spending as a result of world events, political and economic conditions, commodity price volatility, changes in exchange rates, imposition of import controls, increased

competition, depletion of resources and labor relations.

**Risk of Investing in Small- and Medium-Capitalization Companies.** (Market Vectors ChinaAMC SME-ChiNext ETF only.) The Fund may invest in small- and medium-capitalization companies and, therefore will be subject to certain risks associated with small- and medium-capitalization companies. These companies are often subject to less analyst coverage and may be in early and less predictable periods of their corporate existences, with little or no record of profitability. In addition, these companies often have greater price volatility, lower trading volume and less liquidity than larger more established companies. These companies tend to have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources and less competitive strength than large-capitalization companies. Returns on investments in securities of small- and medium-capitalization companies could trail the returns on investments in securities of larger companies.

**Risk of Investing in Medium-Capitalization Companies.** (Market Vectors ChinaAMC A-Share ETF only.) The Fund may invest in medium-capitalization companies and, therefore, will be subject to certain risks associated with medium-capitalization companies. These companies are often subject to less analyst coverage and may be in early and less predictable periods of their corporate existences, with little or no record of profitability. In addition, these companies often have greater price volatility, lower trading volume and less liquidity than larger more established companies. These companies tend to have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service

markets, fewer financial resources and less competitive strength than large-capitalization companies. Returns on investments in securities of medium-capitalization companies could trail the returns on investments in securities of larger companies.

**Equity Securities Risk.** The value of the equity securities held by each Fund may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by a Fund participate, or factors relating to specific issuers in which a Fund invests. For example, an adverse event, such as an unfavorable earnings report, may result in a decline in the value of equity securities of an issuer held by a Fund; the price of the equity securities of an issuer may be particularly sensitive to general movements in the securities markets; or a drop in the securities markets may depress the price of most or all of the equities securities held by a Fund. In addition, the equity securities of an issuer in a Fund's portfolio may decline in price if the issuer fails to make anticipated dividend payments. Equity securities are subordinated to preferred securities and debt in a company's capital structure with respect to priority in right to a share of corporate income, and therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have generally also experienced significantly more volatility in those returns, although under certain market conditions fixed income securities may have comparable or greater price volatility.

**Market Risk.** The prices of the securities in each Fund are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. Overall securities values could decline generally or underperform other investments. An investment in a Fund may lose money.

**Index Tracking Risk.** A Fund's return may not match the return of its Index for a number of reasons. For example, a Fund incurs a number of operating expenses not applicable to its Index and incurs costs and risks associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of its Index and raising cash to meet redemptions or deploying cash in connection with newly created Creation Units, while such costs and risks are not factored into the return of the Index. A Fund may not be fully invested at times, either as a result of cash flows into the Fund or reserves of cash held by the Fund to meet redemptions and pay expenses. To the extent a Fund is unable to invest in A-shares or enter into swaps or other derivatives linked to the performance of its Index or securities comprising its Index, it may enter into swaps or other derivatives linked to the performance of other funds that seek to track the performance of its Index. These funds may trade at a premium or discount to NAV, which may result in additional tracking error for a Fund. Moreover, the ability of a Fund to track its Index may be affected by foreign exchange fluctuations as between the U.S. dollar and the RMB to the extent the Index is priced in Chinese RMB and the Fund is priced in U.S. dollars. A Fund may underperform its Index when the value of the U.S. dollar increases relative to the value of the RMB. For tax efficiency purposes, a Fund may sell certain securities to realize losses causing it to deviate from the performance of its Index.

In addition, a Fund may not be able to invest in certain securities included in its Index, or invest in them in the exact proportions in which they are represented in its Index, due to legal restrictions, limitations imposed by the Chinese government or a lack of liquidity on stock exchanges in which such securities trade, potential adverse tax consequences or other regulatory reasons. Moreover, a Fund may be delayed in purchasing or selling securities included in its Index. A Fund will be required to remit CNH to settle the purchase of A-shares and repatriate CNH to U.S. dollars to settle redemption orders. In the event such remittance or repatriation is delayed or disrupted, a Fund will not be able to fully replicate its Index by investing in the relevant A-shares or may need to rely on borrowings to meet redemptions. These and any other issues a Fund encounters with regard to investment restrictions, trade settlements, currency convertibility (including the cost of borrowing funds, if any) and repatriation may also increase

the index tracking risk.

Relevant PRC laws and regulations may limit the ability of the Adviser and/or potential swap counterparties to acquire A-shares in certain PRC issuers from time to time. In addition, a potential swap counterparty may not be able to acquire A-shares to hedge the swaps in which the Fund invests. In such cases, this may restrict a Fund's ability to invest in certain A-shares and also may restrict the issuance, and therefore the purchase, of swaps linked to these A-shares by a Fund. Furthermore, the tracking error of a Fund may be increased by the overall costs of maintaining the swaps. As a result of such costs the value of the swaps may differ from the price of the A-shares to which such swaps are linked, leading to an increased tracking error.

As discussed above, one or more securities in each Fund's respective Index may be suspended from trading and such securities would be valued by such Index at the last closing price. Each Fund is expected to fair value these securities and its other investments. See Shareholder Information Determination of NAV. The need to comply with the tax diversification and other requirements of the Internal Revenue Code may also impact a Fund's ability to replicate the performance of its Index. In addition, if a Fund utilizes swaps and other derivative instruments, its return may not correlate as well with its Index as would be the case if the Fund purchased all the securities in its Index directly. Actions taken in response to proposed corporate actions could result in increased tracking error.

**ADDITIONAL INFORMATION ABOUT THE FUNDS INVESTMENT STRATEGIES AND RISKS**  
**(continued)**

**Replication Management Risk.** Unlike many investment companies, the Funds are not actively managed. Therefore, unless a specific security is removed from its Index, a Fund generally would not sell a security because the security's issuer is in financial trouble. If a specific security is removed from a Fund's Index, the Fund may be forced to sell such security at an inopportune time or for prices other than at current market values. An investment in a Fund involves risks similar to those of investing in any fund of equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. Each Fund's Index may not contain the appropriate or a diversified mix of securities for any particular economic cycle. The timing of changes in the securities of a Fund's portfolio in seeking to replicate its Index could have a negative effect on the Fund. Unlike with an actively managed fund, the Adviser and/or the Sub-Adviser do not use techniques or defensive strategies designed to lessen the effects of market volatility or to reduce the impact of periods of market decline. This means that, based on market and economic conditions, a Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

**Premium/Discount Risk.** Disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares may result in Shares trading at a significant premium or discount to NAV. The NAV of the Shares will fluctuate with changes in the market value of each Fund's securities holdings. The market prices of Shares will fluctuate in accordance with changes in NAV and supply and demand on NYSE Arca. The Adviser cannot predict whether Shares will trade below, at or above their NAV. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the securities of a Fund's Index trading individually or in the aggregate at any point in time. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.

**Risk of Cash Transactions.** Unlike most other ETFs, each Fund expects to effect all of its creations and redemptions for cash, rather than in-kind securities. As a result, an investment in such Fund may be less tax-efficient than an investment in a more conventional ETF. Other ETFs generally are able to make in-kind redemptions and avoid realizing gains in connection with transactions designed to meet redemption requests. Because these Funds currently intend to effect all or a portion of redemptions, as applicable, for cash, rather than in-kind distributions, they may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds, which involves transaction costs. If a Fund recognizes gain on these sales, this generally will cause the Fund to recognize gain it might not otherwise have recognized if it were to distribute portfolio securities in-kind or to recognize such gain sooner than would otherwise be required. The Funds generally intend to distribute these gains to shareholders to avoid being taxed on this gain at the Fund level and otherwise comply with the special tax rules that apply to it. This strategy may cause shareholders to be subject to tax on gains they would not otherwise be subject to, or at an earlier date than, if they had made an investment in a different ETF. Additionally, transactions may have to be carried out over several days if the securities market is relatively illiquid and may involve considerable transaction fees and taxes.

**Non-Diversified Risk.** Each Fund is a separate investment portfolio of Market Vectors ETF Trust (the Trust), which is an open-end investment company registered under the 1940 Act. Each Fund is classified as a non-diversified investment company under the 1940 Act. As a result, each Fund is subject to the risk that it will be more volatile than a diversified fund because the Fund may invest its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer. As a result, the gains and losses on a single investment may have a greater

impact on a Fund's NAV and may make the Fund more volatile than more diversified funds.

**Concentration Risk.** A Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent that its respective Index concentrates in a particular sector or sectors or industry or group of industries. The securities of many or all of the companies in the same sector or industry may decline in value due to developments adversely affecting such sector or industry. By concentrating its assets in a particular sector or sectors or industry or group of industries, a Fund is subject to the risk that economic, political or other conditions that have a negative effect on that sector or industry will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

#### **ADDITIONAL RISKS**

**Risk of Investing in Swaps.** (Market Vectors ChinaAMC SME-ChiNext ETF only.) For a discussion regarding the risks of investing in swaps applicable to Market Vectors ChinaAMC SME-ChiNext ETF's investments, please see Risk of Investing in Swaps above.

**Risk of Investing in Other Funds.** (Market Vectors ChinaAMC SME-ChiNext ETF only.) The Fund may invest in shares of other funds, including ETFs that track the SME-ChiNext Index. As a result, the Fund will indirectly be exposed to the risks of an investment in the underlying funds. Shares of other funds have many of the same risks as direct investments in common stocks or bonds. In addition, the market value of such funds' shares is expected to rise and fall as the value of the underlying index or investment rises and falls. The market value of such funds' shares may differ from the net asset value of the particular fund. As a shareholder in a fund (as with ETFs), the Fund would bear its ratable share of that entity's expenses. At the same time, the Fund would continue to pay its own investment management fees and other expenses. As a result, the Fund and its shareholders will be absorbing duplicate levels of fees with respect to investments in other funds, including ETFs. Such fees will not, however, be counted towards the Fund's expense cap.

**Risk of Investing in Depositary Receipts.** (Market Vectors ChinaAMC SME-ChiNext ETF only.) Depositary receipts involve similar risks to those associated with investments in foreign securities. Depositary receipts are receipts listed on U.S. exchanges issued by banks or trust companies that entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. The issuers of certain depositary receipts are under no obligation to distribute shareholder communications to the holders of such receipts, or to pass through to them any voting rights with respect to the deposited securities. Investments in depositary receipts may be less liquid than the underlying shares in their primary trading market and, if not included in the Index, may negatively affect the Fund's ability to replicate the performance of the Index. In addition, investments in depositary receipts that are not included in the Fund's Index may increase tracking error.

**Leverage Risk.** To the extent that a Fund borrows money or utilizes certain derivatives, it may be leveraged. Leveraging generally exaggerates the effect on NAV of any increase or decrease in the market value of a Fund's portfolio securities.

**No Guarantee of Active Trading Market.** Certain Funds are recently organized series of an investment company. While Shares are listed on NYSE Arca, there can be no assurance that active trading markets for the Shares will be maintained, especially for recently organized Funds. Further, secondary markets may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods, which could cause a material decline in the Fund's NAV. Van Eck Securities Corporation, the distributor of the Shares (the "Distributor"), does not maintain a secondary market in the Shares. Investors purchasing and selling shares in the secondary market may not experience investment results consistent with those experienced by those authorized participants creating and redeeming directly with a Fund.

**Trading Issues.** Trading in Shares on NYSE Arca may be halted due to market conditions or for reasons that, in the view of NYSE Arca, make trading in Shares inadvisable. In addition, trading in Shares on NYSE Arca is subject to trading halts caused by extraordinary market volatility pursuant to NYSE Arca's circuit breaker rules. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of a Fund will continue to be met or will remain unchanged.

## PORTFOLIO HOLDINGS

A description of each Fund's policies and procedures with respect to the disclosure of the Fund's portfolio securities is available in the Fund's SAI.

**MANAGEMENT OF THE FUNDS**

**Board of Trustees.** The Board of Trustees of Trust has responsibility for the general oversight of the management of the Funds, including general supervision of the Adviser and other service providers, but is not involved in the day-to-day management of the Trust. A list of the Trustees and the Trust officers, and their present positions and principal occupations, is provided in the Funds SAI.

**Investment Adviser and Sub-Adviser.** Under the terms of an investment management agreement between the Trust and Van Eck Associates Corporation with respect to the Funds (the Investment Management Agreement ), Van Eck Associates Corporation serves as the adviser to each Fund and, subject to the supervision of the Board of Trustees, will be responsible for overseeing the day-to-day investment management of each Fund. China Asset Management (Hong Kong) Limited acts as investment sub-adviser to each Fund and, subject to the oversight of the Adviser, will be responsible for the day-to-day investment management of the assets allocated to it by the Adviser. The Sub-Adviser serves as investment sub-adviser to the

## MANAGEMENT OF THE FUNDS (continued)

Funds pursuant to an investment sub-advisory agreement between the Adviser and the Sub-Adviser (each, an Investment Sub-Advisory Agreement ).

As of December 31, 2014, the Adviser managed approximately \$27.87 billion in assets. The Adviser has been an investment adviser since 1955 and also acts as adviser or sub-adviser to other mutual funds, exchange-traded funds, other pooled investment vehicles and separate accounts. The Adviser's principal business address is 666 Third Avenue, 9th Floor, New York, New York 10017.

The Sub-Adviser was established in September 2008 as a wholly owned subsidiary of China Asset Management Co., Ltd. ( ChinaAMC ). The Sub-Adviser has been licensed by Hong Kong Securities and Futures Commission to engage in asset management activities, dealing in securities and advising on securities. As of December 31, 2014, assets under management were approximately \$74.1 billion for ChinaAMC and \$4.74 billion for the Sub-Adviser. The Sub-Adviser currently provides both asset management and advisory services to Hong Kong and overseas clients, including institutional mandates from Taiwan, Japan, Korea, Australia and Germany. The Sub-Adviser's principal place of business is 37F, Bank of China Tower, 1 Garden Road, Central, Hong Kong.

A discussion regarding the Board of Trustees' approval of the Investment Management Agreement is available in the Trust's semi-annual report for the period ended June 30, 2014. A discussion regarding the Board of Trustees' approval of the Investment Sub-Advisory Agreement is available in the Trust's annual report for the year ending December 31, 2014.

For the services provided to each Fund under the Investment Management Agreement, each Fund pays the Adviser monthly fees based on a percentage of each Fund's average daily net assets at the annual rate of 0.50%. From time to time, the Adviser may waive all or a portion of its fee.

Until at least May 1, 2016, the Adviser has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of each Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.72% (with respect to Market Vectors ChinaAMC A-Share ETF) and 0.78% (with respect to Market Vectors ChinaAMC SME-ChiNext ETF) of its average daily net assets per year. Offering costs excluded from the expense caps are: (a) legal fees pertaining to a Fund's Shares offered for sale; (b) SEC and state registration fees; and (c) initial fees paid for Shares of the Fund to be listed on an exchange.

Each Fund is responsible for all of its expenses, including the investment advisory fees, costs of transfer agency, custody, legal, audit and other services, interest, taxes, any distribution fees or expenses, offering fees or expenses and extraordinary expenses. For the services provided and the expenses assumed by the Sub-Adviser pursuant to the Sub-Advisory Agreement, the Adviser (not the Funds) will pay a monthly fee to the Sub-Adviser based on a percentage of the Fund's average daily net assets managed by the Sub-Adviser.

**Manager of Managers Structure.** The Adviser and the Trust may rely on an exemptive order (the Order ) from the SEC that permits the Adviser to enter into investment sub-advisory agreements with unaffiliated sub-advisers without obtaining further shareholder approval. The Adviser, subject to the review and approval of the Board of Trustees, may select sub-advisers for each Fund and supervise, monitor and evaluate the performance of each sub-adviser.

The Order also permits the Adviser, subject to the approval of the Board of Trustees, to replace sub-advisers and amend investment sub-advisory agreements, including fees, without shareholder approval whenever the Adviser and the Board of Trustees believe such action will benefit a Fund and its shareholders. The Adviser thus would have the responsibility (subject to the oversight of the Board of Trustees) to recommend the hiring and replacement of sub-advisers as well as the discretion to terminate any sub-adviser and reallocate a Fund's assets for management among any other sub-adviser(s) and itself. This means that the Adviser would be able to reduce the sub-advisory fees and retain a larger portion of the management fee, or increase the sub-advisory fees and retain a smaller portion of the management fee. The Adviser would compensate each sub-adviser out of its management fee.

**Administrator, Custodian and Transfer Agent.** Van Eck Associates Corporation is the administrator for the Funds (the Administrator), and The Bank of New York Mellon is the custodian of the Funds' assets and provides transfer agency and fund accounting services to the Funds. The Administrator is responsible for certain clerical, recordkeeping and/or bookkeeping services which are provided pursuant to the Investment Management Agreement.

All of the Funds' China A-share assets in the PRC (including onshore PRC cash deposits and its onshore A-shares portfolio) will be held by Industrial and Commercial Bank of China Limited, the PRC sub-custodian. A securities account shall be opened with CSDCC in the joint names of the Sub-Adviser (as the RQFII holder) and a Fund. An RMB cash account shall also be established and maintained with the PRC sub-custodian in the joint names of the Sub-Adviser (as the RQFII holder) and a Fund. The PRC sub-custodian shall, in turn, have a cash clearing account with CSDCC for trade settlement according to applicable regulations.

**Distributor.** Van Eck Securities Corporation is the distributor of the Shares. The Distributor will not distribute Shares in less than Creation Units, and does not maintain a secondary market in the Shares. The Shares are traded in the secondary market.

## PORTFOLIO MANAGERS

Leo Fan joined the Sub-Adviser as a portfolio manager in July 2015. Prior to joining the Sub-Adviser, Mr. Fan worked as a research analyst between 2007 and 2015 at Shenwan Hongyuan (H.K.) Limited, where he participated in building an overseas research department and covered the transportation, infrastructure education and consumption sectors.

Hao-Hung (Peter) Liao has been employed by the Adviser since the summer of 2004. Mr. Chao has been employed by the Adviser since December 2007. Messrs. Liao and Chao also serve as portfolio managers for certain other investment companies advised by the Adviser.

See the Funds' SAI for additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers and their respective ownership of Shares of each Fund.

## SHAREHOLDER INFORMATION

### DETERMINATION OF NAV

The NAV per Share for each Fund is computed by dividing the value of the net assets of the Fund (*i.e.*, the value of its total assets less total liabilities) by the total number of Shares outstanding. Expenses and fees, including the management fee, are accrued daily and taken into account for purposes of determining NAV. The NAV of each Fund is determined each business day as of the close of trading (ordinarily 4:00 p.m. Eastern time) on the New York Stock Exchange ( NYSE ). Any assets or liabilities denominated in currencies other than the U.S. dollar are converted into U.S. dollars at the current market rates on the date of valuation as quoted by one or more sources.

The values of each Fund's portfolio securities are based on the securities' closing prices on local markets when available. Due to the time difference between the United States and certain countries in which a Fund invests, securities on these exchanges may not trade at times when Shares of the Fund will trade. In the absence of a last reported sales price, or if no sales were reported, and for other assets for which market quotes are not readily available, values may be based on quotes obtained from a quotation reporting system, established market makers or by an outside independent pricing service. Prices obtained by an outside independent pricing service may use information provided by market makers or estimates of market values obtained from yield data related to investments or securities with similar characteristics and may use a computerized grid matrix of securities and its evaluations in determining what it believes is the fair value of the portfolio securities. If a market quotation for a security is not readily available or the Adviser believes it does not otherwise accurately reflect the market value of the security at the time a Fund calculates its NAV, the security will be fair valued by the Adviser in accordance with the Trust's valuation policies and procedures approved by the Board of Trustees. Each Fund may use fair value pricing in a variety of circumstances, including but not limited to, situations when the value of a security in the Fund's portfolio has been materially affected by events occurring after the close of the market on which the security is principally traded (such as a corporate action or other news that may materially affect the price of a security) or trading in a security has been suspended or halted. In addition, each Fund that holds foreign equity securities currently expects that it will fair value certain of the foreign equity securities held by the Fund each day the Fund calculates its NAV, except those securities principally traded on exchanges that close at the same time a Fund calculates its NAV. Accordingly, a Fund's NAV is expected to reflect certain portfolio securities' fair values rather than their market prices at the time the exchanges on which they principally trade close. Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security is materially different than the value that could be realized upon the sale of the security. In addition, fair value pricing could result in a difference between the prices used to calculate a Fund's NAV and the prices used by such Fund's Index. This may adversely affect a Fund's ability to track its Index. With respect to securities that are primarily listed on foreign exchanges, the value of a Fund's portfolio securities may change on days when you will not be able to purchase or sell your Shares.

### BUYING AND SELLING EXCHANGE-TRADED SHARES

The Shares of the Funds are listed on NYSE Arca. If you buy or sell Shares in the secondary market, you will incur customary brokerage commissions and charges and may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction. In times of severe market disruption or low trading volume in a Fund's Shares, this spread can increase significantly. It is anticipated that the Shares will trade in the secondary market at prices that may differ to varying degrees from the NAV of the Shares. During periods of disruptions to creations and redemptions or the existence of extreme market volatility, the market prices of Shares are more likely to differ significantly from the Shares' NAV.

The Depository Trust Company ( DTC ) serves as securities depository for the Shares. (The Shares may be held only in book-entry form; stock certificates will not be issued.) DTC, or its nominee, is the record or registered owner of all outstanding Shares. Beneficial ownership of Shares will be shown on the records of DTC or its participants (described below). Beneficial owners of Shares are not entitled to have Shares registered in their names, will not receive or be entitled to receive physical delivery of certificates in definitive form and are not considered the registered holder thereof. Accordingly, to exercise any rights of a holder of Shares, each beneficial owner must rely on the procedures of: (i) DTC; (ii) DTC Participants, *i.e.*, securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC; and (iii) Indirect Participants, *i.e.*, brokers, dealers, banks and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly, through which such beneficial owner holds its interests. The Trust understands that under existing industry practice, in the event the Trust requests any action of holders of Shares, or a beneficial owner desires to take any action that DTC, as the record owner of all outstanding Shares, is entitled to take, DTC would authorize the DTC Participants to take such action and that the DTC Participants would authorize the Indirect Participants and beneficial owners acting through such DTC Participants to take such action and would otherwise act upon the instructions of beneficial owners owning through them. As described above, the Trust recognizes DTC or its nominee as the owner of all Shares for all purposes. For more information, see the section entitled *Book Entry Only System* in the Funds SAI.

The NYSE Arca is open for trading Monday through Friday and is closed on weekends and the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. Because non-U.S. exchanges may be open on days when a Fund does not price its Shares, the value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell a Fund's Shares.

**Market Timing and Related Matters.** The Funds impose no restrictions on the frequency of purchases and redemptions. The Board of Trustees considered the nature of each Fund (*i.e.*, a fund whose shares are expected to trade intra-day), that the Adviser monitors the trading activity of authorized participants for patterns of abusive trading, that the Funds reserve the right to reject orders that may be disruptive to the management of or otherwise not in the Funds' best interests, and that each Fund fair values certain of its securities. Given this structure, the Board of Trustees determined that it is not necessary to impose restrictions on the frequency of purchases and redemptions for the Funds at the present time.

## DISTRIBUTIONS

**Net Investment Income and Capital Gains.** As a shareholder of a Fund, you are entitled to your share of such Fund's distributions of net investment income and net realized capital gains on its investments. Each Fund pays out substantially all of its net earnings to its shareholders as distributions.

Each Fund typically earns income dividends from stocks and interest from debt securities. These amounts, net of expenses, are typically passed along to Fund shareholders as dividends from net investment income. Each Fund realizes capital gains or losses whenever it sells securities. Net capital gains are distributed to shareholders as capital gain distributions.

Net investment income, if any, and net capital gains, if any, are typically distributed to shareholders at least annually. Dividends may be declared and paid more frequently to improve index tracking or to comply with the distribution requirements of the Internal Revenue Code. In addition, a Fund may determine to distribute at least annually amounts representing the full dividend yield net of expenses on the underlying investment securities, as if the Fund owned the underlying investment securities for the entire dividend period, in which case some portion of each distribution may result in a return of capital, which, for tax purposes, is treated as a return of your investment in Shares. Record shareholders will be notified regarding the portion of the distribution which represents a return of capital.

Distributions in cash may be reinvested automatically in additional Shares of a Fund only if the broker through which you purchased Shares makes such option available.

## TAX INFORMATION

As with any investment, you should consider how your Fund investment will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in a Fund, including the possible application of foreign, state and local taxes. Unless your investment in a Fund is through a tax-exempt entity or tax-deferred retirement account, such as a 401(k) plan, you need to be aware of the possible tax consequences when: (i) the Fund makes distributions, (ii) you sell Shares in the secondary market or (iii) you create or redeem Creation Units.

**Taxes on Distributions.** As noted above, each Fund expects to distribute net investment income at least annually, and any net realized long-term or short-term capital gains annually. Each Fund may also pay a special distribution at any

time to comply with U.S. federal tax requirements.

If a Fund fails to distribute on a timely basis with respect to each taxable year at least 90% of its investment company taxable income and its net tax-exempt interest income, the Fund would fail to qualify for the special tax treatment applicable to RICs. In such a case, a Fund would be subject to U.S. federal income tax at regular corporate rates on its taxable income, including its net capital gain, even if such income were distributed to its shareholders, and all distributions out of earnings and profits would be taxed to shareholders as ordinary dividend income. Such distributions generally would be eligible for the dividends-received deduction in the case of corporate shareholders and may be eligible to be qualified dividend income for non-corporate shareholders. In addition, a Fund could be required to recognize unrealized gains, pay taxes and make distributions (any of which could be subject to interest charges) before re-qualifying for taxation as a RIC. Additionally, to the extent a Fund does not distribute to shareholders all of its investment company taxable income and net capital gain in a given year, it will be required to pay U.S. federal income tax on the retained income and gains, thereby reducing the Fund's return.

A Fund will be subject to a 4% excise tax on certain undistributed income if it does not distribute to its shareholders in each calendar year in an amount at least equal to the sum of 98% of its ordinary income (taking into account certain deferrals and elections) for the calendar year, 98.2% of its capital gain net income for the twelve months ended October 31 of such year and 100% of any undistributed amounts from the prior years. Although a Fund generally intends to declare and distribute

## SHAREHOLDER INFORMATION (continued)

dividends and distributions in the amounts and at the times necessary to avoid the application of this 4% excise tax, the Fund may elect to retain a portion of its income and gains, and in such a case, the Fund may be subject to excise tax.

In general, your distributions are subject to U.S. federal income tax when they are paid, whether you take them in cash or reinvest them in a Fund. Distributions of net investment income, including any net short-term gains, if any, are generally taxable as ordinary income. Whether distributions of capital gains represent long-term or short-term capital gains is determined by how long a Fund owned the investments that generated them, rather than how long you have owned your Shares. Distributions of net short-term capital gains in excess of net long-term capital losses, if any, are generally taxable as ordinary income. Distributions of net long-term capital gains in excess of net short-term capital losses, if any, that are reported as capital gain dividends are generally taxable as long-term capital gains. After 2012, long-term capital gains of non-corporate shareholders are generally taxable at a maximum rate of 15% or 20%, depending on whether the shareholder's income exceeds certain threshold amounts.

The Funds may receive dividends, the distribution of which the Fund may designate as qualified dividends. In the event that a Fund receives such a dividend and designates the distribution of such dividend as a qualified dividend, the dividend may be taxed at the maximum capital gains rates, provided holding period and other requirements are met at both the shareholder and the Fund level.

Distributions in excess of a Fund's current and accumulated earnings and profits are treated as a tax-free return of your investment to the extent of your basis in the Shares, and generally as capital gain thereafter. A return of capital, which for tax purposes is treated as a return of your investment, reduces your basis in Shares, thus reducing any loss or increasing any gain on a subsequent taxable disposition of Shares. A distribution will reduce a Fund's NAV per Share and may be taxable to you as ordinary income or capital gain even though, from an economic standpoint, the distribution may constitute a return of capital.

Special tax rules may change the normal treatment of gains and losses recognized by a Fund if the Fund makes certain investments such as investments in structured notes, swaps, options and futures transactions. Those special tax rules can negatively affect the character, timing and amount of income earned by a Fund (*e.g.*, by causing amounts that would be capital gain to be taxed as ordinary income or to be taken into income earlier than would otherwise be necessary). Each intends to invest in swaps and other derivative instruments that are linked to the performance of A-shares. The U.S. tax treatment of such investments may generally be less efficient than a direct investment in A-shares. Furthermore, a Fund may be required to periodically adjust its positions in these swaps or derivatives to comply with certain regulatory requirements which may further cause these investments to be less efficient than a direct investment in A-shares. In addition, because the application of these special rules may be uncertain, it is possible that the manner in which they are applied by a Fund may be determined to be incorrect. In that event, a Fund may be found to have failed to maintain its qualification as a RIC or to be subject to additional U.S. tax liability.

Each Fund may make investments, both directly and through swaps or other derivative positions, in companies classified as PFICs for U.S. federal income tax purposes. Investments in PFICs are subject to special tax rules which may result in adverse tax consequences to the Fund and its shareholders. Each Fund generally intends to elect to mark to market these investments at the end of each taxable year. By making this election, a Fund will recognize as ordinary income any increase in the value of such shares as of the close of the taxable year over their adjusted basis and as ordinary loss any decrease in such investment (but only to the extent of prior income from such investment under the mark to market rules). Gains realized with respect to a disposition of a PFIC that a Fund has elected to mark to market

will be ordinary income. By making the mark to market election, a Fund may recognize income in excess of the distributions that it receives from its investments. Accordingly, a Fund may need to borrow money or dispose of some of its investments in order to meet its distribution requirements. If a Fund does not make the mark to market election with respect to an investment in a PFIC, the Fund could become subject to U.S. federal income tax with respect to certain distributions from, and gain on the dispositions of, the PFIC which cannot be avoided by distributing such amounts to the Fund's shareholders.

Dividends, interest and gains from non-U.S. investments of a Fund may give rise to withholding and other taxes imposed by foreign countries. Tax conventions between certain countries and the United States may, in some cases, reduce or eliminate such taxes.

If more than 50% of a Fund's total assets at the end of its taxable year consist of foreign securities, the Fund may elect to pass through to its investors certain foreign income taxes paid by the Fund, with the result that each investor will (i) include in gross income, as an additional dividend, even though not actually received, the investor's pro rata share of the Fund's foreign income taxes, and (ii) either deduct (in calculating U.S. taxable income) or credit (in calculating U.S. federal income), subject to certain holding period and other limitations, the investor's pro rata share of the Fund's foreign income taxes. This treatment will not apply with respect to amounts a Fund reserves in anticipation of the imposition of Chinese withholding

taxes not currently in effect (if any). If these amounts are used to pay any tax liability of a Fund in a later year, they will be treated as paid by the shareholders in such later year, even if they are imposed with respect to income of an earlier year. It is expected that more than 50% of each Fund's assets will consist of foreign securities.

**Backup Withholding.** Each Fund may be required to withhold a percentage of your distributions and proceeds if you have not provided a taxpayer identification number or social security number or otherwise established a basis for exemption from backup withholding. The backup withholding rate for individuals is currently 28%. This is not an additional tax and may be refunded, or credited against your U.S. federal income tax liability, provided certain required information is furnished to the Internal Revenue Service.

**Taxes on the Sale or Cash Redemption of Exchange Listed Shares.** Currently, any capital gain or loss realized upon a sale of Shares is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as a short term capital gain or loss if held for one year or less. However, any capital loss on a sale of Shares held for six months or less is treated as long-term capital loss to the extent that capital gain dividends were paid with respect to such Shares. The ability to deduct capital losses may be limited. A redemption of a shareholder's Fund Shares for cash is normally treated as a sale for tax purposes.

**Taxes on In-Kind Creations and In-Kind Redemptions of Creation Units.** To the extent a person exchanges securities or securities and cash for Creation Units, such person generally will recognize a gain or loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time of exchange and the sum of the exchanger's aggregate basis in the securities surrendered and the amount of any cash paid for such Creation Units. A person who exchanges Creation Units for securities or securities and cash will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of the securities received and the amount of any cash received for such Creation Units. The Internal Revenue Service, however, may assert that a loss realized upon an exchange of primarily securities for Creation Units cannot be deducted currently under the rules governing wash sales, or on the basis that there has been no significant change in economic position. Persons exchanging primarily securities for Creation Units or redeeming Creation Units should consult their own tax adviser with respect to whether wash sale rules apply and when a loss might be deductible and the tax treatment of any creation or redemption transaction.

Under current U.S. federal income tax laws, any capital gain or loss realized upon a redemption (or creation) of Creation Units is generally treated as long-term capital gain or loss if the Shares (or securities surrendered) have been held for more than one year and as a short-term capital gain or loss if the Shares (or securities surrendered) have been held for one year or less.

If you create or redeem Creation Units, you will be sent a confirmation statement showing how many Shares you created or sold and at what price.

**Medicare Tax.** An additional 3.8% Medicare tax will be imposed on certain net investment income (including ordinary dividends and capital gain distributions received from a Fund and net gains from redemptions or other taxable dispositions of Fund Shares) of U.S. individuals, estates and trusts to the extent that such person's modified adjusted gross income (in the case of an individual) or adjusted gross income (in the case of an estate or trust) exceeds certain threshold amounts.

**Non-U.S. Shareholders.** If you are not a citizen or resident alien of the United States, a Fund's ordinary income dividends (which include distributions of net short-term capital gains) will generally be subject to a 30% U.S. withholding tax, unless a lower treaty rate applies or unless such income is effectively connected with a U.S. trade or

business.

As part of the Foreign Account Tax Compliance Act, ( FATCA ), a Fund may be required to impose a 30% withholding tax on certain types of U.S. sourced income (e.g., dividends, interest, and other types of passive income) paid effective July 1, 2014, and proceeds from the sale or other disposition of property producing U.S. sourced income paid effective January 1, 2017 to (i) foreign financial institutions ( FFI s ), including non-U.S. investment funds, unless they agree to collect and disclose to the Internal Revenue Service ( IRS ) information regarding their direct and indirect U.S. account holders and (ii) certain nonfinancial foreign entities ( NFFE s ), unless they certify certain information regarding their direct and indirect U.S. owners. To avoid possible withholding, FFI s will need to enter into agreements with the IRS which state that they will provide the IRS information, including the names, account numbers and balances, addresses and taxpayer identification numbers of U.S. account holders and comply with due diligence procedures with respect to the identification of U.S. accounts as well as agree to withhold tax on certain types of withholdable payments made to non-compliant foreign financial institutions or to applicable foreign account holders who fail to provide the required information to the IRS, or similar account information and required documentation to a local revenue authority, should an applicable intergovernmental agreement be implemented. NFFE s will need to provide certain information regarding each substantial U.S. owner or certifications of no substantial U.S. ownership, unless certain exceptions apply, or agree to provide certain information to the IRS.

While final FATCA rules have not been finalized, a Fund may be subject to the FATCA withholding obligation, and also will be required to perform due diligence reviews to classify foreign entity investors for FATCA purposes. Investors are required to

**SHAREHOLDER INFORMATION (continued)**

agree to provide information necessary to allow a Fund to comply with the FATCA rules. If a Fund is required to withhold amounts from payments pursuant to FATCA, investors will receive distributions that are reduced by such withholding amounts.

Non-U.S. shareholders are advised to consult their tax advisors with respect to the particular tax consequences to them of an investment in the Funds, including the possible applicability of the U.S. estate tax.

The foregoing discussion summarizes some of the consequences under current U.S. federal income tax law of an investment in a Fund. It is not a substitute for personal tax advice. Consult your own tax advisor about the potential tax consequences of an investment in a Fund under all applicable tax laws.

**INDEX PROVIDERS**

The CSI 300 Index is published by China Securities Index Co., Ltd. and the SME-ChiNext Index is published by the Shenzhen Securities Information Co., Ltd, which is a subsidiary of the Shenzhen Stock Exchange (each an Index Provider and together the Index Providers ). The Index Providers do not sponsor, endorse, or promote the Funds and bear no liability with respect to the Funds or any security.

## CSI 300 INDEX

The CSI 300 Index is a modified free-float market capitalization weighted index comprised of the largest and most liquid stocks in the Chinese A-share market. Constituent stocks for the CSI 300 Index must have been listed for more than three months (unless the stock's average daily A-share market capitalization since its initial listing ranks among the top 30 of all A-shares) and must not be experiencing what the Index Provider believes to be obvious abnormal fluctuations or market manipulation.

As of December 31, 2014, the CSI 300 Index included 300 securities of companies with a market capitalization range of \$1.8 billion to \$286.1 billion and a weighted average market capitalization of \$28.1 billion. These amounts are subject to change.

When selecting constituent stocks for the CSI 300 Index, the Index Provider: (1) calculates the daily average trading value and daily average total market capitalization during the most recent year (or in case of new issue, during the time since its initial listing) for all the stocks in the stock universe; (2) ranks the stocks in the stock universe in descending order according to their average daily trading values, and excludes the bottom 50%; and (3) ranks the remaining stocks in descending order according to their average daily market capitalization and selects those which rank in the top 300 according to their average daily market capitalization as constituent stocks of the CSI 300 Index.

The weighting of a company in the CSI 300 Index is intended to be a reflection of the current importance of that company in the market as a whole. Stocks are selected and weighted according to market capitalization. A company is heavily weighted in the CSI 300 Index if it has a relatively larger free-float market capitalization than the rest of the constituents in the CSI 300 Index. The constituents of the CSI 300 Index are frequently reviewed by the Index Provider to ensure that the CSI 300 Index continues to reflect the state and structure of the underlying market it measures. The CSI 300 Index is calculated in real time and is published every six seconds. Index performance data is converted from RMB into U.S. dollars. The composition of the CSI 300 Index is reviewed semi-annually every January and July.

## **SME-CHINEXT 100 INDEX**

The SME-ChiNext Index is a modified, free-float adjusted index intended to track the performance of the 100 largest and most liquid stocks listed and trading on the Small and Medium Enterprise ( SME ) Board and the ChiNext Board of the Shenzhen Stock Exchange. The SME-ChiNext Index is comprised of A-shares.

As of December 31, 2014, the SME-ChiNext Index included 100 securities of companies with a market capitalization range of between approximately \$791.1 million and \$14.7 billion and a weighted average market capitalization of \$4.6 billion. These amounts are subject to change.

When selecting constituent stocks for the SME-ChiNext Index, the Index Provider: (1) calculates the average total market capitalization, free-float market capitalization, and average turnover during the previous six months for all the stocks in the stock universe; (2) ranks the stocks in the stock universe in descending order according to a 1:1:1 weighted average of the above three measures; and (3) selects those which rank in the top 100 as constituent stocks of the SME-ChiNext Index. The weighting of a company in the SME-ChiNext Index is intended to be a reflection of the current representativeness of that company in the market as a whole. The weight of any single constituent in the SME-ChiNext Index shall not exceed 10%.

The constituents of the SME-ChiNext Index are frequently reviewed by the Index Provider to ensure that the SME-ChiNext Index continues to reflect the state and structure of the underlying market it measures. The periodic reviews are implemented semi-annually on the first trading day in January and July every year. Announcements of the constituent review are usually published on the first trading day of the second integral trading weeks of the month prior to the implementation of the review. Index performance data is converted from RMB into U.S. dollars.

## LICENSE AGREEMENTS AND DISCLAIMERS

The Adviser has entered into a licensing agreement with the Index Providers to use each Fund's respective Index. Each Fund is entitled to use its respective Index pursuant to a sub-licensing arrangement with the Adviser.

Market Vectors ChinaAMC A-Share ETF is neither sponsored nor promoted, distributed or in any other manner supported by the Index Provider. The CSI 300 Index is compiled and calculated by the Index Provider. The Index Provider will apply all necessary means to ensure the accuracy of the CSI 300 Index. However, neither the Index Provider nor the Shanghai Stock Exchange nor the Shenzhen Stock Exchange shall be liable (whether in negligence or otherwise) to any person for any error in the CSI 300 Index and neither the Index Provider nor the Shanghai Stock Exchange nor the Shenzhen Stock Exchange shall be under any obligation to advise any person of any error therein. All copyright in CSI 300 Index values and constituent list vests in the Index Provider. Neither the publication of the CSI 300 Index by the Index Provider nor the granting of a license regarding the Index as well as the Index Trademark for the utilization in connection with Market Vectors ChinaAMC A-Share ETF, which derived from the Index, represents a recommendation by the Index Provider for a capital investment or contains in any manner a warranty or opinion by the Index Provider with respect to the attractiveness on an investment in Market Vectors ChinaAMC A-Share ETF.

Shares of Market Vectors ChinaAMC SME-ChiNext ETF are not sponsored, endorsed, sold or promoted by the Index Provider. The Index Provider makes no representation or warranty, express or implied, to the owners of the Shares of Market Vectors ChinaAMC SME-ChiNext ETF or any member of the public regarding the advisability of investing in securities generally or in the Shares of Market Vectors ChinaAMC SME-ChiNext ETF particularly or the ability of the SME-ChiNext Index to track the performance of the securities markets. The SME-ChiNext Index is determined and composed by the Index Provider without regard to the Adviser or the Shares of Market Vectors ChinaAMC SME-ChiNext ETF. The Index Provider has no obligation to take the needs of the Adviser or the owners of the Shares of Market Vectors ChinaAMC SME-ChiNext ETF into consideration in determining or composing the SME-ChiNext Index. The Index Provider is not responsible for and has not participated in the determination of the timing of, prices at, or quantities of the Shares of Market Vectors ChinaAMC SME-ChiNext ETF to be issued or in the determination or calculation of the equation by which the Shares of Market Vectors ChinaAMC SME-ChiNext ETF are to be converted into cash. The Index Provider has no obligation or liability in connection with the administration, marketing or trading of the Shares of Market Vectors ChinaAMC SME-ChiNext ETF.

THE INDEX PROVIDER DOES NOT GUARANTEE THE ACCURACY AND/OR THE COMPLETENESS OF THE SME-CHINEXT INDEX OR ANY DATA INCLUDED THEREIN AND THE INDEX PROVIDER SHALL HAVE NO LIABILITY FOR ANY ERRORS, OMISSIONS, OR INTERRUPTIONS THEREIN. THE INDEX PROVIDER MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ADVISER, OWNERS OF THE SHARES OF MARKET VECTORS CHINAAMC SME-CHINEXT ETF, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE SME-CHINEXT INDEX OR ANY DATA INCLUDED THEREIN. THE INDEX PROVIDER MAKES NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIMS ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THE SME-CHINEXT INDEX OR ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL THE INDEX PROVIDER HAVE ANY LIABILITY FOR ANY SPECIAL, PUNITIVE, INDIRECT, OR CONSEQUENTIAL DAMAGES (INCLUDING LOST PROFITS), EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

## FINANCIAL HIGHLIGHTS

The financial highlights tables which follow are intended to help you understand the Funds' financial performance for the past five years or as indicated. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in a Fund (assuming reinvestment of all dividends and distributions). This information has been audited by Ernst & Young LLP, the Trust's independent registered public accounting firm, whose report, along with the Funds' financial statements, are included in the Funds' Annual Report, which is available upon request.

## FINANCIAL HIGHLIGHTS

For a share outstanding throughout each period:

	ChinaAMC A-Share ETF For the Year Ended December 31,				For the Period October 13, 2010(a) through December 31, 2010
	2014	2013	2012	2011	2010
Net asset value, beginning of period	\$ 30.89	\$ 33.17	\$ 30.28	\$ 38.81	\$ 40.75
Income from investment operations:					
Net investment income (loss)	0.32(f)	(0.40)	(e)	(0.27)	(0.07)

**ChinaAMC SME-ChiNext  
ETF  
For the Period  
July 23,  
2014 (a) through  
December 31,  
2014**

Net asset value, beginning of period	\$ 24.68
Income from investment operations:	
Net investment loss	(0.05)
Net realized and unrealized gain on investments	3.97
Total from investment operations	3.92
Net asset value, end of period	\$ 28.60
Total return (b)	15.88%(d)

**Ratios/Supplemental Data**

Net assets, end of period (000 s)	\$ 21,451
Ratio of gross expenses to average net assets	1.48%(c)
Ratio of net expenses to average net assets	0.78%(c)
Ratio of net expenses, excluding interest expense, to average net assets	0.78%(c)
Ratio of net investment loss to average net assets	(0.73)(c)
Portfolio turnover rate	7%(d)

(a) Commencement of operations

(b) Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of any dividends and distributions at net asset value on the dividend/distributions payment date and a redemption at the net asset value on the last day of the period. The return does not reflect deduction of taxes that a shareholder would pay on Fund dividends/distributions or the redemption of Fund shares.

(c) Annualized

(d) Not Annualized

(e) Amount represents less than \$0.005 per share

(f) Calculated based upon average shares outstanding.

## **PREMIUM/DISCOUNT INFORMATION**

Information regarding how often the Shares of a Fund traded on NYSE Arca at a price above (*i.e.*, at a premium) or below (*i.e.*, at a discount) the NAV of the Fund during the past four calendar quarters, as applicable, can be found at [www.marketvectorsetfs.com](http://www.marketvectorsetfs.com).

## **GENERAL INFORMATION**

### **CONTINUOUS OFFERING**

The method by which Creation Units are created and traded may raise certain issues under applicable securities laws. Because new Creation Units are issued and sold by the Trust on an ongoing basis, a distribution, as such term is used in the Securities Act, may occur at any point. Broker dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery and liability provisions of the Securities Act.

For example, a broker dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares, and sells such Shares directly to customers, or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a categorization as an underwriter.

Broker dealers who are not underwriters but are participating in a distribution (as contrasted to ordinary secondary trading transactions), and thus dealing with Shares that are part of an unsold allotment within the meaning of Section 4(3)(C) of the Securities Act, would be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker dealer firms should note that dealers who are not underwriters but are participating in a distribution (as contrasted with ordinary secondary market transactions) and thus dealing with the Shares that are part of an overallotment within the meaning of Section 4(3)(A) of the Securities Act would be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act. Firms that incur a prospectus delivery obligation with respect to Shares are reminded that, under Rule 153 of the Securities Act, a prospectus delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with a sale on NYSE Arca is satisfied by the fact that the prospectus is available at NYSE Arca upon request. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

In addition, certain affiliates of the Funds and the Adviser may purchase and resell Fund shares pursuant to this Prospectus.

## **OTHER INFORMATION**

The Trust was organized as a Delaware statutory trust on March 15, 2001. Its Declaration of Trust currently permits the Trust to issue an unlimited number of Shares of beneficial interest. If shareholders are required to vote on any matters, each Share outstanding would be entitled to one vote. Annual meetings of shareholders will not be held except as required by the 1940 Act and other applicable law. See the Funds' SAI for more information concerning the Trust's form of organization. Section 12(d)(1) of the 1940 Act restricts investments by investment companies in the securities of other investment companies, including Shares of the Funds. Registered investment companies are permitted to invest in the Funds beyond the limits set forth in Section 12(d)(1) subject to certain terms and conditions set forth in an SEC exemptive order issued to the Trust, including that such investment companies enter into an agreement with the Funds.

Dechert LLP serves as counsel to the Trust, including the Funds. Ernst & Young LLP serves as the Trust's independent registered public accounting firm and will audit the Funds' financial statements annually.

### **ADDITIONAL INFORMATION**

This Prospectus does not contain all the information included in the Registration Statement filed with the SEC with respect to the Funds' Shares. Information about the Funds can be reviewed and copied at the SEC's Public Reference Room and information on the operation of the Public Reference Room may be obtained by calling the SEC at 1.202.551.8090. The Funds' Registration Statement, including this Prospectus, the Funds' SAI and the exhibits may be examined at the offices of the SEC (100 F Street, NE, Washington, DC 20549) or on the EDGAR database at the SEC's website (<http://www.sec.gov>), and copies may be obtained, after paying a duplicating fee, by electronic request at the following email address: [publicinfo@sec.gov](mailto:publicinfo@sec.gov), or by writing the SEC's Public Reference Section, Washington, DC 20549-1520. These documents and

other information concerning the Trust also may be inspected at the offices of NYSE Arca (20 Broad Street, New York, New York 10005).

The SAI for the Funds, which has been filed with the SEC, provides more information about the Funds. The SAI for the Funds is incorporated herein by reference and is legally part of this Prospectus. Additional information about the Funds' investments is available in each Fund's annual and semi-annual reports to shareholders. In each Fund's annual report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal year. The SAI and the Funds' annual and semi-annual reports may be obtained without charge by writing to the Funds at Van Eck Securities Corporation, the Funds' distributor, at 666 Third Avenue, New York, New York 10017 or by calling the distributor at the following number: Investor Information: 800.826.2333.

Shareholder inquiries may be directed to the Funds in writing to 666 Third Avenue, 9th Floor, New York, New York 10017 or by calling 800.826.2333.

The Funds' SAI is available at [www.vaneck.com](http://www.vaneck.com).

(Investment Company Act file no. 811-10325)

For more detailed information about the Funds, see the SAI dated May 1, 2015, which is incorporated by reference into this Prospectus. Additional information about the Funds' investments is available in each Fund's annual and semi-annual reports to shareholders. In each Fund's annual report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal year.

Call Van Eck at 800.826.2333 to request, free of charge, the annual or semi-annual reports, the SAI, or other information about the Funds or to make shareholder inquiries. You may also obtain the SAI or a Fund's annual or semi-annual reports by visiting the Van Eck website at [www.vaneck.com](http://www.vaneck.com).

Information about the Funds (including the SAI) can also be reviewed and copied at the SEC Public Reference Room in Washington, D.C. Information about the operation of the Public Reference Room may be obtained by calling 202.551.8090.

Reports and other information about the Funds are available on the EDGAR Database on the SEC's internet site at <http://www.sec.gov>. In addition, copies of this information may be obtained, after paying a duplicating fee, by electronic request at the following email address: [publicinfo@sec.gov](mailto:publicinfo@sec.gov), or by writing the SEC's Public Reference Section, Washington, DC 20549-0102.

## GENERAL DESCRIPTION OF THE TRUST

The Trust is an open-end management investment company. The Trust currently consists of 55 investment portfolios. This SAI relates to 26 investment portfolios, Market Vectors Africa Index ETF, Market Vectors Agribusiness ETF, Market Vectors Brazil Small-Cap ETF, Market Vectors ChinaAMC A-Share ETF<sup>1</sup>, Market Vectors ChinaAMC SME-ChiNext ETF, Market Vectors Coal ETF, Market Vectors Egypt Index ETF, Market Vectors Global Alternative Energy ETF, Market Vectors Gold Miners ETF, Market Vectors Gulf States Index ETF, Market Vectors India Small-Cap Index ETF, Market Vectors Indonesia Index ETF, Market Vectors Indonesia Small-Cap ETF, Market Vectors Israel ETF, Market Vectors Junior Gold Miners ETF, Market Vectors Natural Resources ETF<sup>2</sup>, Market Vectors Oil Services ETF, Market Vectors Poland ETF, Market Vectors Rare Earth/Strategic Metals ETF, Market Vectors Russia ETF, Market Vectors Russia Small-Cap ETF, Market Vectors Solar Energy ETF, Market Vectors Steel ETF, Market Vectors Unconventional Oil & Gas ETF, Market Vectors Uranium+Nuclear Energy ETF and Market Vectors Vietnam ETF (each, a “Fund” and, together, the “Funds”). Each Fund is classified as a non-diversified management investment company under the Investment Company Act of 1940, as amended (“1940 Act”), and, as a result, is not required to meet certain diversification requirements under the 1940 Act. The Trust was organized as a Delaware statutory trust on March 15, 2001. The shares of each Fund are referred to herein as “Shares.”

The Funds offer and issue Shares at their net asset value (“NAV”) only in aggregations of a specified number of Shares (each, a “Creation Unit”). Similarly, Shares are redeemable by the Funds only in Creation Units, and generally (except for Market Vectors Africa Index ETF, Market Vectors Agribusiness ETF, Market Vectors Brazil Small-Cap ETF, Market Vectors ChinaAMC A-Share ETF, Market Vectors ChinaAMC SME-ChiNext ETF, Market Vectors Egypt Index ETF, Market Vectors Global Alternative Energy ETF, Market Vectors Gulf States Index ETF, Market Vectors India Small-Cap Index ETF, Market Vectors Natural Resources ETF, Market Vectors Rare Earth/Strategic Metals ETF, Market Vectors Russia ETF, Market Vectors Russia Small-Cap ETF, Market Vectors Solar Energy ETF and Market Vectors Vietnam ETF) in exchange for specified securities held by each Fund and a specified cash payment. Creation Units of Market Vectors Africa Index ETF, Market Vectors Agribusiness ETF, Market Vectors Brazil Small-Cap ETF, Market Vectors ChinaAMC A-Share ETF, Market Vectors ChinaAMC SME-ChiNext ETF, Market Vectors Egypt Index ETF, Market Vectors Global Alternative Energy ETF, Market Vectors Gulf States Index ETF, Market Vectors India Small-Cap Index ETF, Market Vectors Natural Resources ETF, Market Vectors Rare Earth/Strategic Metals ETF, Market Vectors Russia ETF, Market Vectors Russia Small-Cap ETF, Market Vectors Solar Energy ETF and Market Vectors Vietnam ETF are issued and redeemed partially or principally for cash. The Shares of the Funds are listed on NYSE Arca, Inc. (“NYSE Arca” or the “Exchange”), and trade in the secondary market at market prices that may differ from the Shares’ NAV. A Creation Unit consists of 50,000 Shares. The Trust reserves the right to permit or require a “cash” option for creations and redemptions of Shares (subject to applicable legal requirements).

<sup>1</sup> Prior to January 7, 2014, the Fund’s name was Market Vectors China ETF.

<sup>2</sup> Prior to May 1, 2014, the Fund’s name was Market Vectors RVE Hard Assets Producers ETF.

## INVESTMENT POLICIES AND RESTRICTIONS

### General

The Market Vectors India Small-Cap Index ETF seeks to achieve its investment objective by investing substantially all of its assets in a wholly-owned subsidiary in Mauritius, SCIF Mauritius, a private company limited by shares incorporated in Mauritius (the “Subsidiary”), that has the same investment objective as the Fund. Because the investment characteristics of Market Vectors India Small-Cap Index ETF will correspond directly to those of the Subsidiary (which is managed by and its decisions are taken by its independent Board of Directors), the following applies to both Market Vectors India Small-Cap Index ETF and the Subsidiary, as applicable, and except where otherwise indicated, this SAI uses the term “Fund” when referring to Market Vectors India Small-Cap Index ETF to mean Market Vectors India Small-Cap Index ETF and/or the Subsidiary, as applicable.

### Repurchase Agreements

The Funds may invest in repurchase agreements with commercial banks, brokers or dealers to generate income from their excess cash balances and to invest securities lending cash collateral. A repurchase agreement is an agreement under which a Fund acquires a money market instrument (generally a security issued by the U.S. Government or an agency thereof, a banker’s acceptance or a certificate of deposit) from a seller, subject to resale to the seller at an agreed upon price and date (normally, the next business day). A repurchase agreement may be considered a loan collateralized by securities. The resale price reflects an agreed upon interest rate effective for the period the instrument is held by a Fund and is unrelated to the interest rate on the underlying instrument.

In these repurchase agreement transactions, the securities acquired by a Fund (including accrued interest earned thereon) must have a total value at least equal to the value of the repurchase agreement and are held by the Trust’s custodian bank until repurchased. In addition, the Trust’s Board of Trustees (“Board” or “Trustees”) has established guidelines and standards for review of the creditworthiness of any bank, broker or dealer counterparty to a repurchase agreement with each Fund. No more than an aggregate of 15% of each Fund’s net assets will be invested in repurchase agreements having maturities longer than seven days.

The use of repurchase agreements involves certain risks. For example, if the other party to the agreement defaults on its obligation to repurchase the underlying security at a time when the value of the security has declined, the Funds may incur a loss upon disposition of the security. If the other party to the agreement becomes insolvent and subject to liquidation or reorganization under the Bankruptcy Code or other laws, a court may determine that the underlying security is collateral not within the control of a Fund and, therefore, the Fund may incur delays in disposing of the security and/or may not be able to substantiate its interest in the underlying security and may be deemed an unsecured creditor of the other party to the agreement.

## Futures Contracts and Options

Futures contracts generally provide for the future sale by one party and purchase by another party of a specified instrument, index or commodity at a specified future time and at a specified price. Stock index futures contracts are settled daily with a payment by one party to the other of a cash amount based on the difference between the level of the stock index specified in the contract from one day to the next. Futures contracts are standardized as to maturity date and underlying instrument and are traded on futures exchanges. The Funds may use futures contracts and options on futures contracts based on other indexes

or combinations of indexes that Van Eck Associates Corporation (the “Adviser”) believes to be representative of each Fund’s respective benchmark index (each, an “Index”).

An option is a contract that provides the holder the right to buy or sell shares or other assets at a fixed price, within a specified period of time. An American call option gives the option holder the right to buy the underlying security from the option writer at the option exercise price at any time prior to the expiration of the option. A European call option gives the option holder the right to buy the underlying security from the option writer only on the option expiration date. An American put option gives the option holder the right to sell the underlying security to the option writer at the option exercise price at any time prior to the expiration of the option. A European put option gives the option holder the right to sell the underlying security to the option writer at the option exercise price only on the option expiration date.

Although futures contracts (other than cash settled futures contracts including most stock index futures contracts) by their terms call for actual delivery or acceptance of the underlying instrument or commodity, in most cases the contracts are closed out before the maturity date without the making or taking of delivery. Closing out an open futures position is done by taking an opposite position (buying the same contract which was previously sold or selling the same contract previously purchased) in an identical contract to terminate the position. Brokerage commissions are incurred when a futures contract position is opened or closed.

Futures traders are required to make a good faith margin deposit in cash or government securities with a broker or custodian to initiate and maintain open positions in futures contracts. A margin deposit is intended to assure completion of the contract (delivery or acceptance of the underlying instrument or commodity or payment of the cash settlement amount) if it is not terminated prior to the specified delivery date. Brokers may establish deposit requirements that are higher than the exchange minimums. Futures contracts are customarily purchased and sold on margin deposits which may range upward from less than 5% of the value of the contract being traded.

After a futures contract position is opened, the value of the contract is marked-to-market daily. If the futures contract price changes to the extent that the margin on deposit does not satisfy margin requirements, payment of additional “variation” margin will be required.

Conversely, a change in the contract value may reduce the required margin, resulting in a repayment of excess margin to the contract holder. Variation margin payments are made to and from the futures broker for as long as the contract remains open. The Funds expect to earn interest income on their margin deposits.

The Funds may use futures contracts and options thereon, together with positions in cash and money market instruments, to simulate full investment in each Fund’s respective Index. Under such circumstances, the Adviser may seek to utilize other instruments that it believes to be correlated to each Fund’s respective Index components or a subset of the components. Liquid futures contracts may not be currently available for the Index of each Fund.

Positions in futures contracts and options may be closed out only on an exchange that provides a secondary market therefor. However, there can be no assurance that a liquid secondary market will exist for any particular futures contract or option at any specific time. Thus, it may not be possible to close a futures or options position. In the event of adverse price movements, the Funds would continue to be required to make daily cash payments to maintain its required margin. In such situations, if a Fund has insufficient cash, it may have to sell portfolio securities to meet daily margin requirements at a time when

3

it may be disadvantageous to do so. In addition, the Funds may be required to make delivery of the instruments underlying futures contracts they have sold.

The Funds will seek to minimize the risk that they will be unable to close out a futures or options contract by only entering into futures and options for which there appears to be a liquid secondary market.

The risk of loss in trading futures contracts or uncovered call options in some strategies (*e.g.*, selling uncovered stock index futures contracts) is potentially unlimited. The Funds do not plan to use futures and options contracts in this way. The risk of a futures position may still be large as traditionally measured due to the low margin deposits required. In many cases, a relatively small price movement in a futures contract may result in immediate and substantial loss or gain to the investor relative to the size of a required margin deposit.

Utilization of futures transactions by the Funds involves the risk of imperfect or even negative correlation to each Fund's respective Index if the index underlying the futures contracts differs from the Index. There is also the risk of loss by the Funds of margin deposits in the event of bankruptcy of a broker with whom a Fund has an open position in the futures contract or option.

Certain financial futures exchanges limit the amount of fluctuation permitted in futures contract prices during a single trading day. The daily limit establishes the maximum amount that the price of a futures contract may vary either up or down from the previous day's settlement price at the end of a trading session. Once the daily limit has been reached in a particular type of contract, no trades may be made on that day at a price beyond that limit. The daily limit governs only price movement during a particular trading day and therefore does not limit potential losses, because the limit may prevent the liquidation of unfavorable positions. Futures contract prices have occasionally moved to the daily limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of future positions and subjecting some futures traders to substantial losses.

Except as otherwise specified in the Funds' Prospectus or this SAI, there are no limitations on the extent to which the Funds may engage in transactions involving futures and options thereon. With respect to Market Vectors India Small-Cap ETF, under applicable Indian securities regulations, there are position limits on foreign institutional investor ("FII") investments in index futures and index futures contracts on a particular underlying index. The SEBI (Foreign Institutional Investors) Regulations, 1995 ("FII Regulations") have been replaced by the SEBI (Foreign Portfolio Investors) Regulations, 2014 ("FPI Regulations"). However, under the FPI regulations, the Fund may continue to buy, sell or deal in securities till the expiry of its current FII registration and shall be converted to an FPI upon payment of the FPI registration fee. The Funds will take steps to prevent their futures positions from "leveraging" their securities holdings. When a Fund has a long futures position, it will maintain with its custodian bank, cash or liquid securities having a value equal to the notional value of the contract (less any margin deposited in connection with the position). When a Fund has a short futures position, as part of a complex stock replication strategy the Fund will maintain with its custodian bank assets substantially identical to those underlying the contract or cash and liquid securities (or a combination of the foregoing) having a value equal to the net obligation of the Fund under the contract (less the value of any margin deposits in connection with the position).

## Swaps

Over-the-counter (“OTC”) swap agreements are contracts between parties in which one party agrees to make payments to the other party based on the change in market value or level of a specified index or asset. In return, the other party agrees to make payments to the first party based on the return of a different specified index or asset, usually a rate interest. Although OTC swap agreements entail the risk

4

that a party will default on its payment obligations thereunder, each Fund seeks to reduce this risk generally by receiving (or paying) collateral daily and entering into agreements that involve payments no less frequently than quarterly. The net amount of the excess, if any, of a Fund's obligations over its entitlements with respect to each swap is accrued on a daily basis and an amount of cash or highly liquid securities having an aggregate value at least equal to the accrued excess is maintained in an account at the Trust's custodian bank.

The use of such swap agreements involves certain risks. For example, if the counterparty under an OTC swap agreement defaults on its obligation to make payments due from it as a result of its bankruptcy or otherwise, the Funds may lose such payments altogether or collect only a portion thereof, which collection could involve costs or delays.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") and related regulatory developments require the clearing and exchange-trading of certain standardized OTC derivative instruments that the Commodity Futures Trading Commission ("CFTC") and Securities and Exchange Commission ("SEC") defined as "swaps" and "security-based swaps," respectively. Mandatory exchange-trading and clearing is occurring on a phased-in basis based on the type of market participant and CFTC approval of contracts for central clearing and exchange trading. In a cleared swap, a Fund's ultimate counterparty is a central clearinghouse rather than a swap dealer, bank or other financial institution. A Fund enters into cleared swaps through an executing broker. Such transactions are then submitted for clearing and, if cleared, will be held at regulated futures commission merchants ("FCMs") that are members of the clearinghouse that serves as the central counterparty. When a Fund enters into a cleared swap, it must deliver to the central counterparty (via an FCM) an amount referred to as "initial margin." Initial margin requirements are determined by the central counterparty, but an FCM may require additional initial margin above the amount required by the central counterparty. During the term of the swap agreement, a "variation margin" amount may also be required to be paid by a Fund or may be received by the Fund in accordance with margin controls set for such accounts, depending upon changes in the price of the underlying reference asset subject to the swap agreement. At the conclusion of the term of the swap agreement, if a Fund has a loss equal to or greater than the margin amount, the margin amount is paid to the FCM along with any loss in excess of the margin amount. If a Fund has a loss of less than the margin amount, the excess margin is returned to the Fund. If a Fund has a gain, the full margin amount and the amount of the gain is paid to the Fund.

Central clearing is designed to reduce counterparty credit risk compared to uncleared swaps because central clearing interposes the central clearinghouse as the counterparty to each participant's swap, but it does not eliminate those risks completely. There is also a risk of loss by a Fund of the initial and variation margin deposits in the event of bankruptcy of the FCM with which the Fund has an open position in a swap contract. The assets of a Fund may not be fully protected in the event of the bankruptcy of the FCM or central counterparty because the Fund might be limited to recovering only a pro rata share of all available funds and margin segregated on behalf of an FCM's customers or central counterparty's clearing members. If the FCM does not provide accurate reporting, a Fund is also subject to the risk that the FCM could use the Fund's assets, which are held in an omnibus account with assets belonging to the FCM's other customers, to satisfy its own financial obligations or the payment obligations of another customer to the central counterparty. Certain swaps have begun trading on exchanges called swap execution facilities. Exchange-trading is expected to increase liquidity of swaps trading.

In addition, with respect to cleared swaps, a Fund may not be able to obtain as favorable terms as it would be able to negotiate for an uncleared swap. In addition, an FCM may unilaterally impose position limits or additional margin

requirements for certain types of swaps in which a Fund may invest. Central counterparties and FCMs generally can require termination of existing cleared swap transactions

5

at any time, and can also require increases in margin above the margin that is required at the initiation of the swap agreement. Margin requirements for cleared swaps vary on a number of factors, and the margin required under the rules of the clearinghouse and FCM may be in excess of the collateral required to be posted by a Fund to support its obligations under a similar uncleared swap. However, regulators are expected to adopt rules imposing certain margin requirements, including minimums, on uncleared swaps in the near future, which could change this comparison.

The Funds are also subject to the risk that, after entering into a cleared swap with an executing broker, no FCM or central counterparty is willing or able to clear the transaction. In such an event, the central counterparty would void the trade. Before a Fund can enter into a new trade, market conditions may become less favorable to the Fund.

The Adviser will continue to monitor developments regarding trading and execution of cleared swaps on exchanges, particularly to the extent regulatory changes affect a Fund's ability to enter into swap agreements and the costs and risks associated with such investments.

#### Warrants and Subscription Rights

Warrants are equity securities in the form of options issued by a corporation which give the holder the right, but not the obligation, to purchase stock, usually at a price that is higher than the market price at the time the warrant is issued. A purchaser takes the risk that the warrant may expire worthless because the market price of the common stock fails to rise above the price set by the warrant.

#### Currency Forwards

A currency forward transaction is a contract to buy or sell a specified quantity of currency at a specified date in the future at a specified price which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. Currency forward contracts may be used to increase or reduce exposure to currency price movements.

The use of currency forward transactions involves certain risks. For example, if the counterparty under the contract defaults on its obligation to make payments due from it as a result of its bankruptcy or otherwise, a Fund may lose such payments altogether or collect only a portion thereof, which collection could involve costs or delays.

#### Convertible Securities

A convertible security is a bond, debenture, note, preferred stock, right, warrant or other security that may be converted into or exchanged for a prescribed amount of common stock or other security of the same or a different issuer or into cash within a particular period of time at a specified price or formula. A convertible security generally entitles the holder to receive interest paid or accrued on debt securities or the dividend paid on preferred stock until the convertible security matures or is redeemed, converted or exchanged. Before conversion, convertible securities generally have characteristics similar to both debt and equity securities. The value of convertible securities tends to decline as interest rates rise and, because of the conversion feature, tends to vary with fluctuations in the market value of the underlying securities. Convertible securities ordinarily provide a stream of income with generally higher yields than those of common stock of the same or similar issuers. Convertible securities generally rank senior to common stock in a corporation's capital structure but are usually subordinated to comparable nonconvertible securities. Convertible securities generally do not participate directly in any dividend increases or decreases of the underlying securities although the market prices of convertible securities may be affected by any dividend changes or other changes in the underlying securities.

## Structured Notes

A structured note is a derivative security for which the amount of principal repayment and/or interest payments is based on the movement of one or more “factors.” These factors include, but are not limited to, currency exchange rates, interest rates (such as the prime lending rate or LIBOR), referenced bonds and stock indices. Some of these factors may or may not correlate to the total rate of return on one or more underlying instruments referenced in such notes. Investments in structured notes involve risks including interest rate risk, credit risk and market risk. Depending on the factor(s) used and the use of multipliers or deflators, changes in interest rates and movement of such factor(s) may cause significant price fluctuations. Structured notes may be less liquid than other types of securities and more volatile than the reference factor underlying the note.

## Participation Notes

*All Funds.* Participation notes (“P-Notes”) are issued by banks or broker-dealers and are designed to offer a return linked to the performance of a particular underlying equity security or market. P-Notes can have the characteristics or take the form of various instruments, including, but not limited to, certificates or warrants. The holder of a P-Note that is linked to a particular underlying security is entitled to receive any dividends paid in connection with the underlying security. However, the holder of a P-Note generally does not receive voting rights as it would if it directly owned the underlying security. P-Notes constitute direct, general and unsecured contractual obligations of the banks or broker-dealers that issue them, which therefore subject a Fund to counterparty risk, as discussed below. Investments in P-Notes involve certain risks in addition to those associated with a direct investment in the underlying foreign securities or foreign securities markets whose return they seek to replicate. For instance, there can be no assurance that the trading price of a P-Note will equal the value of the underlying foreign security or foreign securities market that it seeks to replicate. As the purchaser of a P-Note, a Fund is relying on the creditworthiness of the counterparty issuing the P-Note and has no rights under a P-Note against the issuer of the underlying security. Therefore, if such counterparty were to become insolvent, a Fund would lose its investment. The risk that a Fund may lose its investments due to the insolvency of a single counterparty may be amplified to the extent the Fund purchases P-Notes issued by one issuer or a small number of issuers. P-Notes also include transaction costs in addition to those applicable to a direct investment in securities. In addition, a Fund’s use of P-Notes may cause the Fund’s performance to deviate from the performance of the portion of the Fund’s Index to which the Fund is gaining exposure through the use of P-Notes.

Due to liquidity and transfer restrictions, the secondary markets on which P-Notes are traded may be less liquid than the markets for other securities, which may lead to the absence of readily available market quotations for securities in a Fund’s portfolio and may cause the value of the P-Notes to decline. The ability of a Fund to value its securities becomes more difficult and the Adviser’s judgment in the application of fair value procedures may play a greater role in the valuation of a Fund’s securities due to reduced availability of reliable objective pricing data. Consequently, while such determinations will be made in good faith, it may nevertheless be more difficult for a Fund to accurately assign a daily value to such securities.

*Market Vectors India Small-Cap Index ETF only.* P-Notes eligible for investment by the Fund must be issued by banks or broker-dealers that are registered with the Securities and Exchange Board of India (“SEBI”) as a FII or an eligible FPI. Under the FPI Regulations, subject to certain other conditions being met, P-Notes and / or offshore derivative instruments can be issued only to persons who are regulated by an appropriate foreign regulatory authority subject to compliance with ‘know-your-client’ norms.

FPIs shall have to fully disclose to SEBI, any information concerning the terms of and parties to ODIs entered into by it relating to any securities listed or proposed to be listed in any stock exchange in India. On November 24, 2014, SEBI issued a circular (“Circular”) aligning the conditions for subscription of offshore derivative instruments (“ODIs”) to those applicable to FPIs. The Circular makes the ODI subscription more restrictive.

As per the Circular, read with the FPI Regulations, to be eligible to subscribe to ODI positions, the subscriber should be regulated by an IOSCO member regulator or in case of banks subscribing to ODIs, such bank should be regulated by a BIS member regulator.

It states that an FPI can issue ODIs only to those subscribers who meet certain eligibility criteria mentioned under regulation 4 of the FPI Regulations (which deals with eligibility criteria for an applicant to obtain registration as an FPI) in addition to meeting the eligibility criteria mentioned under regulation 22 of the FPI Regulations. Accordingly, ODIs can now only be issued to those persons who (a) are regulated by an ‘appropriate foreign regulatory authority’; (b) are not resident of a jurisdiction that has been identified by Financial Action Task force (“FATF”) as having strategic Anti-Money Laundering deficiencies; (c) do not have ‘opaque’ structures (i.e. protected cell companies (“PCCs”) / segregated portfolio companies (“SPCs”) or equivalent structural alternatives); and (d) comply with ‘know your client’ norms.

The Circular further requires that multiple FPI and ODI subscriptions belonging to the same investor group would be clubbed together for calculating the below 10% investment limit.

The existing ODI positions will not be affected by the Circular until the expiry of such ODI contracts. However, the Circular specifies that there will not be a rollover of existing ODI positions and for any new ODI positions, new contracts will have to be entered into, in consonance with the rules specified in the Circular.

#### SEBI Takeover Regulations (Market Vectors India Small-Cap Index ETF Only)

Under the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011 (“Takeover Code”), any acquirer who holds, together with persons acting in concert with him, 5% or more of the shares or voting rights of a listed public Indian company, is required to notify the company and the stock exchanges on which the shares of such company are listed about its holding within the prescribed time period. Furthermore, any acquirer who holds, together with persons acting in concert with him, 5% or more of shares or voting rights is required to inform the company and the stock exchange about any change in its holding by 2% or more of the shares or voting rights in the target company.

Upon the acquisition of 25% or more of shares or voting rights or an acquisition of control of the company, whether directly or indirectly, the acquirer is required to make an open offer to the other shareholders offering to purchase at least 26% of all the outstanding shares of the company at an offer price as determined pursuant to the provisions of the Takeover Code (“Open Offer”). Further, under the provisions of the Takeover Code, any existing shareholder of a listed public Indian company, holding 25% or more but less than 75% of the shares of the company, is entitled to acquire up to 5% voting rights of the company, in any financial year ending March 31 without making a public offer for such an

acquisition.

There are certain exemptions under the Takeover Code from the public offer provisions in certain specific instances such as an *inter se* transfer of shares amongst the persons named as promoters in the shareholding pattern filed by the target company in terms of the listing agreement or the Takeover Code for not less than three years prior to the proposed acquisition and transfer of shares pursuant to

8

arrangement involving the target company as a transferor company or as a transferee company, or reconstruction of the target company, including amalgamation, merger or demerger, pursuant to an order of a court or a competent authority under any law or regulation, Indian or foreign. The Subsidiary may invest through subscription of shares under the preferential route or purchase of shares from existing promoters or shareholders in which case, it would be required to comply with the public offer provisions of the Takeover Code if the post-acquisition holding of the Subsidiary is in excess of the prescribed thresholds.

#### Future Developments

The Funds may take advantage of opportunities in the area of options, futures contracts, options on futures contracts, options on the Funds, warrants, swaps and any other investments which are not presently contemplated for use or which are not currently available, but which may be developed, to the extent such investments are considered suitable for a Fund by the Adviser or the Sub-Adviser (as defined below).

#### Investment Restrictions

The Board and the Board of Directors of the Subsidiary (to the extent that such restrictions are applicable to the Market Vectors India Small-Cap Index ETF) have adopted the following investment restrictions as fundamental policies with respect to each Fund and the Subsidiary, respectively. These restrictions cannot be changed without the approval of the holders of a majority of each Fund's outstanding voting securities. For purposes of the 1940 Act, a majority of the outstanding voting securities of a Fund means the vote, at an annual or a special meeting of the security holders of the Trust, of the lesser of (1) 67% or more of the voting securities of the Fund present at such meeting, if the holders of more than 50% of the outstanding voting securities of the Fund are present or represented by proxy, or (2) more than 50% of the outstanding voting securities of the Fund. Similar voting requirements apply with respect to a change in the fundamental investment policies of the Subsidiary. If Market Vectors India Small-Cap Index ETF, as an investor in the Subsidiary, is requested to vote on a change in the fundamental investment policies of the Subsidiary, the Fund will either call a meeting of its shareholders and will vote its shares in the Subsidiary in accordance with instructions it receives from its shareholders or otherwise vote as required under the 1940 Act. Under these restrictions:

Each Fund may not make loans, except that the Fund may (i) lend portfolio securities, (ii) enter into repurchase agreements, (iii) purchase all or a portion of an issue of debt securities, bank loan or participation interests, bank certificates of deposit, bankers' acceptances, debentures or other securities, whether or not the purchase is made upon the original issuance of the securities and (iv) participate in an interfund lending program with other registered investment companies;

2. Each Fund may not borrow money, except as permitted under the 1940 Act, and as interpreted or modified by regulation from time to time;

Edgar Filing: MARKET VECTORS ETF TRUST - Form 497

3. Each Fund may not issue senior securities, except as permitted under the 1940 Act, and as interpreted or modified by regulation from time to time;

4. Each Fund (except Market Vectors ChinaAMC SME-ChiNext ETF, Market Vectors Egypt Index ETF, Market Vectors India Small-Cap Index ETF, Market Vectors Indonesia Small-Cap ETF, Market Vectors Israel ETF, Market Vectors Junior Gold Miners ETF, Market Vectors Oil Services ETF, Market Vectors Poland ETF, Market Vectors Rare Earth/Strategic Metals ETF and Market Vectors Russia Small-Cap ETF and Market

9

Vectors Unconventional Oil & Gas ETF) may not purchase a security (other than obligations of the U.S. Government, its agencies or instrumentalities) if, as a result, 25% or more of its total assets would be invested in a single issuer;

5. Each Fund may not purchase or sell real estate, except that the Fund may (i) invest in securities of issuers that invest in real estate or interests therein; (ii) invest in mortgage-related securities and other securities that are secured by real estate or interests therein; and (iii) hold and sell real estate acquired by the Fund as a result of the ownership of securities;

6. Each Fund may not engage in the business of underwriting securities issued by others, except to the extent that the Fund may be considered an underwriter within the meaning of the Securities Act of 1933, as amended (the “Securities Act”), in the disposition of restricted securities or in connection with its investments in other investment companies;

7. Each Fund may not purchase or sell commodities, unless acquired as a result of owning securities or other instruments, but it may purchase, sell or enter into financial options and futures, forward and spot currency contracts, swap transactions and other financial contracts or derivative instruments and may invest in securities or other instruments backed by commodities. In addition, Market Vectors Gold Miners ETF may invest up to 25% of its total assets in gold and silver coins, which are legal tender in the country of issue and gold and silver bullion, and palladium and platinum group metals bullion; or

8. Each Fund, except Market Vectors Oil Services ETF and Market Vectors Unconventional Oil & Gas ETF, may not purchase any security if, as a result of that purchase, 25% or more of its total assets would be invested in securities of issuers having their principal business activities in the same industry except that the Fund may invest 25% or more of the value of its total assets in securities of issuers in any one industry or group of industries if the index that the Fund replicates concentrates in an industry or group of industries. With respect to each of Market Vectors Oil Services ETF and Market Vectors Unconventional Oil & Gas ETF, the Fund may not purchase any security if, as a result of that purchase, 25% or more of its total assets would be invested in securities of issuers having their principal business activities in the same industry except that the Fund will invest 25% or more of the value of its total assets in securities of issuers in any one industry or group of industries if the index that the Fund replicates concentrates in an industry or group of industries. This limit does not apply to securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities.

In addition to the investment restrictions adopted as fundamental policies as set forth above, each Fund observes the following restrictions, which may be changed by the Board without a shareholder vote.

1. Each Fund will not invest in securities which are “illiquid” securities, including repurchase agreements maturing in more than seven days and options traded over-the-counter, if the result is that more than 15% of a Fund’s net assets would be invested in such securities.

2. Each Fund will not make short sales of securities.

3. Each Fund will not purchase any security on margin, except for such short-term loans as are necessary for clearance of securities transactions. The deposit or payment by a Fund
- 10

or initial or variation margin in connection with futures contracts or related options thereon is not considered the purchase of a security on margin.

4. Each Fund (except Market Vectors ChinaAMC SME-ChiNext ETF) will not participate in a joint or joint-and-several basis in any trading account in securities, although transactions for the Funds and any other account under common or affiliated management may be combined or allocated between the Fund and such account.

5. Each Fund will not purchase securities of open-end or closed-end investment companies except in compliance with the 1940 Act, although the Fund may not acquire any securities of registered open-end investment companies or registered unit investment trusts in reliance on Sections 12(d)(1)(F) or 12(d)(1)(G) of the 1940 Act.

In addition to the fundamental and non-fundamental investment restrictions set forth above, each of Market Vectors Agribusiness ETF, Market Vectors Brazil Small-Cap ETF, Market Vectors Coal ETF, Market Vectors Gold Miners ETF, Market Vectors Indonesia Index ETF, Market Vectors Junior Gold Miners ETF, Market Vectors Natural Resources ETF, Market Vectors Oil Services ETF, Market Vectors Rare Earth/Strategic Metals ETF, Market Vectors Russia ETF and Market Vectors Steel ETF observes the following additional restrictions, which may be changed by the Board without a shareholder vote: under normal market conditions (i) any borrowings by the Fund will be on a temporary basis and will not exceed 10% of the Fund's net assets; and (ii) the Fund's investments in the securities of other pooled investment vehicles will not exceed 10% of the Fund's net assets. For purposes of restriction (ii), real estate investment trusts are not considered to be pooled investment vehicles.

If a percentage limitation is adhered to at the time of investment or contract, a later increase or decrease in percentage resulting from any change in value or total or net assets will not result in a violation of such restriction, except that the percentage limitations with respect to the borrowing of money and illiquid securities described above in fundamental restriction 2 and non-fundamental restriction 1, respectively, will be continuously complied with.

Each Fund may invest in securities not included in its respective Index, money market instruments or funds which reinvest exclusively in money market instruments, in stocks that are in the relevant market but not the Fund's respective Index, and/or in combinations of certain stock index futures contracts, options on such futures contracts, stock options, stock index options, options on the Shares, and stock index swaps and swaptions, each with a view towards providing each Fund with exposure to the securities in its respective Index. These investments may be made to invest uncommitted cash balances or, in limited circumstances, to assist in meeting shareholder redemptions of Creation Units. Each Fund will not invest in money market instruments as part of a temporary defensive strategy to protect against potential stock market declines.

The Adviser is registered as an FII with the SEBI, and the Subsidiary is registered as a sub-account with the SEBI in order to obtain certain benefits relating to the Market Vectors India Small-Cap Index ETF's ability to make and dispose of investments. The FII Regulations have been replaced by the FPI Regulations. However, under the FPI regulations, the Subsidiary may continue to buy, sell or deal in securities until the expiry of its current sub-account registration and shall be converted to an FPI upon payment of the FPI registration fee.

Investments under the FPI Regulations and Foreign Exchange Management (transfer or issue of security by a person resident outside India) Regulations, 2000 are permitted only in the following:

securities in the primary and secondary markets including shares, debentures (please note the exception with regards to non-convertible debentures/bonds set out in (b) below) and

11

warrants (as per the applicable Consolidated Foreign Direct Investment Policy) of companies unlisted, listed or to be listed on a recognized stock exchange in India;

primary issues of non-convertible debentures/ bonds with a minimum residual maturity of three years provided such non-convertible debentures/ bonds are committed to be listed within 15 days of such investment. In the event of such non-convertible debentures/ bonds issued not being listed within 15 days of issuance, for any reason, then the FPI shall immediately dispose of those non-convertible debentures/ bonds either by way of sale to a third party or to the issuer and the terms of offer to FPIs should contain a clause that the issuer of such debt securities shall immediately redeem/buyback those securities from the FPIs in such an eventuality;

units of schemes floated by domestic mutual funds including Unit Trust of India, whether listed on a recognized stock exchange in India or not or units of a scheme floated by a Collective Investment Scheme;

dated government securities;

derivatives traded on a recognized stock exchange;

commercial paper;

security receipts of asset reconstruction companies issued by an Indian company (sub-accounts cannot invest in security receipts) provided that the total holdings of all eligible investors put together shall not exceed 74% of the paid up value of each tranche of scheme of security receipts issued by the asset reconstruction companies;

Indian Depository Receipts;

Rupee denominated credit enhanced bonds;

Perpetual debt instruments eligible for inclusion as Tier I capital and debt capital instruments as upper Tier II capital issued by banks in India to augment their capital (Tier I capital and Tier II capital as defined by Reserve Bank of India (RBI) and modified from time to time) provided that the investment all eligible investors in perpetual debt instruments (Tier I) shall not exceed an aggregate ceiling of 49% of each issue and investment by an individual FPI shall not exceed the limit of 10% of each issue;

Listed and unlisted non-convertible debentures / bonds issued by an Indian company in the infrastructure sector, where 'infrastructure' is defined in terms of the extant External Commercial Borrowings (ECB) guidelines;

Non-convertible debentures or bonds issued by Non-banking financial companies categorized as Infrastructure Finance Companies (IFCs) by the RBI; and

Rupee denominated bonds or units issued by infrastructure debt funds.

Further, FIIs and FPIs are allowed to engage in delivery based trading and short selling in compliance with the short selling and securities borrowing and lending framework laid down by SEBI, and also in a manner consistent with the procedures laid down by the respective stock exchanges including execution of trades involving derivatives on a recognized stock exchange. FPIs are allowed to

tender their shares in case of an open offer following the takeover bid by an acquirer. FIIs/FPIs are allowed to tender their shares in case of an open offer following the takeover bid by an acquirer.

FIIs/ FPIs which have issued derivative instruments based on underlying Indian securities such as P-Notes and any other equivalent instrument are required to make a monthly disclosure to the SEBI as regards the details of the instrument as well as the ultimate investor in such instruments.

The extent to which percentage positions may be taken in index options and index futures by the Subsidiary would be restricted to the limits prescribed by applicable regulators from time to time. Separately, following are the regulatory positions that the Adviser (as an FII) and the Subsidiary (as a sub-account) would have to observe under the applicable provisions of the securities laws of India:

The ownership restrictions applicable to FIIs/ sub-accounts and FPIs are as follows:

The aggregate FII/sub-accounts/FPI holding in any Indian company cannot exceed 24% of the entire paid-up share capital of that company which limit can be further extended to the applicable foreign investment limit in a specific sector if the directors and the shareholders of a company pass a special resolution to that effect. Currently, barring a few sectors such as telecom services and banking, foreign investment up to 100% is permitted in most sectors.

The aggregate holding of a single FPI or an investor group in an Indian company must be less than 10 per cent of the issued capital of such Indian company. An investor group is constituted where the same set of beneficial owners invest through multiple entities in which case the investment limits of all such entities shall be clubbed at the investment limit applicable to a single FPI. All entities having direct or indirect common shareholding / beneficial ownership / beneficial interest of more than 50% shall be considered as belonging to the same investor group.

As per a recent circular issued by SEBI on conditions on issuance of offshore derivative instruments (“ODIs”) under the FPI Regulations, in case of an ultimate beneficial owner who has direct or indirect common shareholding/ beneficial ownership/beneficial interest, of more than 50% in an FPI and an ODI subscriber entity or two or more ODI subscribers, the participation through ODIs would be clubbed with the direct holding of FPIs or the other concerned ODI subscriber(s) while determining whether the above investment cap in an Indian company has been triggered.

In addition, currently the overall limit for FIIs/sub-accounts/FPIs registered with SEBI for investing in corporate debt market is \$51 billion (including sub-limit of \$2 billion for investment in commercial papers by eligible investors and sub-limit of \$5 billion for credit-enhanced bonds).

The aggregate debt investments by FIIs/sub-accounts/FPIs in government securities and treasury bills are capped at \$30 billion (including sub-limit of \$25 billion for eligible investors in dated government securities and \$5 billion for

FII/FPIs registered with SEBI as sovereign wealth funds, multilateral agencies, endowment funds, insurance funds, pension funds and foreign central banks in dated government securities of one year maturity or more).

Further, by way of a SEBI circular, foreign portfolio investors are allowed to participate in the exchange traded currency derivative segment to the extent of their Indian rupee exposure in India, subject to conditions and restrictions under applicable law. FPIs may take long as well as short positions in the permitted currency pairs up to US\$ 10 million without having to establish the existence of any underlying exposure. To take long positions beyond the prescribed limit, foreign portfolio investors shall be required to have an underlying exposure in Indian debt or equity securities, including units of equity/debt mutual funds.

The RBI and SEBI by way of separate circulars dated February 3, 2015 have restricted the ability of FPIs to invest in debt securities having a residual maturity of less than 3 years. In addition, FPIs cannot invest in debt securities with residual maturity of more than 3 years but having optionality clauses exercisable within 3 years.

## SPECIAL CONSIDERATIONS AND RISKS

A discussion of the risks associated with an investment in each Fund is contained in each Fund's Prospectus under the headings "Summary Information—Principal Risks of Investing in the Fund" with respect to the applicable Fund, and "Additional Information About the Funds' Investment Strategies and Risks—Risks of Investing in the Funds." The discussion below supplements, and should be read in conjunction with, such sections of each Fund's Prospectus.

### General

Investment in each Fund should be made with an understanding that the value of the Fund's portfolio securities may fluctuate in accordance with changes in the financial condition of the issuers of the portfolio securities, the value of securities generally and other factors.

An investment in each Fund should also be made with an understanding of the risks inherent in an investment in equity securities, including the risk that the financial condition of issuers may become impaired or that the general condition of the stock market may deteriorate (either of which may cause a decrease in the value of the portfolio securities and thus in the value of Shares). Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. These investor perceptions are based on various and unpredictable factors, including expectations regarding government, economic, monetary and fiscal policies, inflation and interest rates, economic expansion or contraction, and global or regional political, economic and banking crises.

Holders of common stocks incur more risk than holders of preferred stocks and debt obligations because common stockholders, as owners of the issuer, have generally inferior rights to receive payments from the issuer in comparison with the rights of creditors of, or holders of debt obligations or preferred stocks issued by, the issuer. Further, unlike debt securities which typically have a stated principal amount payable at maturity (whose value, however, will be subject to market fluctuations prior thereto), or preferred stocks which typically have a liquidation preference and which may have stated optional or mandatory redemption provisions, common stocks have neither a fixed principal amount nor a maturity. Common stock values are subject to market fluctuations as long as the common stock remains outstanding.

In the event that the securities in a Fund's Index are not listed on a national securities exchange, the principal trading market for some may be in the over-the-counter market. The existence of a liquid trading market for certain securities may depend on whether dealers will make a market in such securities. There can be no assurance that a market will be made or maintained or that any such market will be or remain liquid. The price at which securities may be sold and the value of a Fund's Shares will be adversely affected if trading markets for the Fund's portfolio securities are limited or absent or if bid/ask spreads are wide.

The Funds are not actively managed by traditional methods, and therefore the adverse financial condition of any one issuer will not result in the elimination of its securities from the securities held by a Fund unless the securities of such issuer are removed from its respective Index.

An investment in each Fund should also be made with an understanding that the Fund will not be able to replicate exactly the performance of its respective Index because the total return generated by the securities will be reduced by transaction costs incurred in adjusting the actual balance of the securities and other Fund expenses, whereas such transaction costs and expenses are not included in the calculation of its respective Index. It is also possible that for periods of time, a Fund may not fully replicate the

performance of its respective Index due to the temporary unavailability of certain Index securities in the secondary market or due to other extraordinary circumstances. Such events are unlikely to continue for an extended period of time because a Fund is required to correct such imbalances by means of adjusting the composition of the securities. It is also possible that the composition of a Fund may not exactly replicate the composition of its respective Index if the Fund has to adjust its portfolio holdings in order to continue to qualify as a “regulated investment company” under the U.S. Internal Revenue Code of 1986, as amended (the “Internal Revenue Code”).

Regulatory developments affecting the exchange-traded and OTC derivatives markets may impair a Fund’s ability to manage or hedge its investment portfolio through the use of derivatives. The Dodd-Frank Act and the rules promulgated thereunder may limit the ability of the Funds to enter into one or more exchange-traded or OTC derivatives transactions.

The Trust, on behalf of the Funds, has filed a notice of eligibility with the National Futures Association claiming an exclusion from the definition of the term “commodity pool operator” (“CPO”) pursuant to CFTC Regulation 4.5, as promulgated under the Commodity Exchange Act (“CEA”), with respect to the Funds’ operations. Therefore, neither the Funds nor the Adviser (with respect to the Funds) is subject to registration or regulation as a commodity pool or CPO under the CEA. If a Fund becomes subject to these requirements, a Fund may incur additional compliance and other expenses.

Each Fund’s use of derivatives may also be limited by the requirements of the Internal Revenue Code for qualification as a regulated investment company for U.S. federal income tax purposes.

With respect to investments in swap transactions, commodity futures, commodity options or certain other derivatives used for purposes other than bona fide hedging purposes, an investment company must meet one of the following tests under the amended regulations in order to claim an exemption from being considered a “commodity pool” or CPO. First, the aggregate initial margin and premiums required to establish an investment company’s positions in such investments may not exceed five percent (5%) of the liquidation value of the investment company’s portfolio (after accounting for unrealized profits and unrealized losses on any such investments). Alternatively, the aggregate net notional value of such instruments, determined at the time of the most recent position established, may not exceed one hundred percent (100%) of the liquidation value of the investment company’s portfolio (after accounting for unrealized profits and unrealized losses on any such positions). In addition to meeting one of the foregoing trading limitations, the investment company may not market itself as a commodity pool or otherwise as a vehicle for trading in the commodity futures, commodity options or swaps and derivatives markets. In the event that the Adviser is required to register as a CPO, the disclosure and operations of the Funds would need to comply with all applicable CFTC regulations. Compliance with these additional registration and regulatory requirements would increase operational expenses. Other potentially adverse regulatory initiatives could also develop.

Shares are subject to the risks of an investment in a portfolio of equity securities in an economic sector or industry in which each Fund’s Index is highly concentrated. In addition, because it is the policy of each Fund to generally invest in the securities that comprise its respective Index, the portfolio of securities held by such Fund (“Fund Securities”) also will be concentrated in that economic sector or industry.

U.S. Federal Tax Treatment of Futures Contracts

Each Fund may be required for federal income tax purposes to mark-to-market and recognize as income for each taxable year their net unrealized gains and losses on certain futures contracts as of the end of the year as well as those actually realized during the year. Gain or loss from futures contracts

15

required to be marked-to-market will be 60% long-term and 40% short-term capital gain or loss. Application of this rule may alter the timing and character of distributions to shareholders. Each Fund may be required to defer the recognition of losses on futures contracts to the extent of any unrecognized gains on related positions held by the Fund.

In order for a Fund to continue to qualify for U.S. federal income tax treatment as a regulated investment company, at least 90% of its gross income for a taxable year must be derived from qualifying income, i.e., dividends, interest, income derived from loans of securities, gains from the sale of securities or of foreign currencies or other income derived with respect to the Fund's business of investing in securities. It is anticipated that any net gain realized from the closing out of futures contracts will be considered gain from the sale of securities and therefore will be qualifying income for purposes of the 90% requirement.

Each Fund distributes to shareholders annually any net capital gains which have been recognized for U.S. federal income tax purposes (including unrealized gains at the end of the Fund's fiscal year) on futures transactions. Such distributions are combined with distributions of capital gains realized on a Fund's other investments and shareholders are advised on the nature of the distributions.

#### Risks Relating to Market Vectors India Small-Cap Index ETF

*Tax Risks.* The taxation of income and capital gains of the Market Vectors India Small-Cap Index ETF is subject to the fiscal laws and practices of different jurisdictions. Any of those jurisdictions may change their fiscal laws and practices (or interpretation thereof) and enforcement policies, possibly with retroactive effect. The Market Vectors India Small-Cap Index ETF's investment in the Subsidiary involves certain tax risks. Changes to the Double Taxation Avoidance Agreement between Mauritius and India (or its interpretation) may adversely affect the ability of the Subsidiary to realize efficiently income or capital gains. Consequently, it is possible that Subsidiary may face unfavorable tax treatment, which may materially adversely affect the value of its investments or the feasibility of making investments in India.

The Subsidiary is a wholly-owned subsidiary of the Trust in Mauritius and obtains benefits from favorable tax treatment by the Indian government pursuant to a taxation treaty between India and Mauritius. The following tax risks are relevant in this regard.

*Indirect Transfer Risk:* Where Shares are sold by investors/redeemed by the Fund, gains from such transfer could be subject to tax in India if certain thresholds are met. For more information about this issue, please see "Indian Tax Status" of this SAI.

*Exposure to Permanent Establishment ("PE"):* There is a risk that the Indian tax authorities may claim that the Subsidiary or the Advisor has a PE in India in light of factors like presence of an investment advisor in India, etc. If

the Fund and/or the Adviser is considered to have a PE in India, then the net profits of the Subsidiary (to the extent attributable to the PE) would be subject to taxation in India at 40% (excluding surcharge and cess). Therefore, in such a case, the benefits of the India/Mauritius Double Tax Avoidance Treaty with regards to the capital gains tax exemption would not be available to the Subsidiary.

*Introduction of General Anti-Avoidance Rules (“GAAR”) in India:* The general anti-avoidance provision (“GAAR”) in the ITA, which is slated to be effective from April 1, 2015. However, based on changes proposed in the Finance Bill 2015, the date from which GAAR will be effective is expected to be deferred to April 1, 2017. GAAR empowers the tax authorities to investigate and declare any an arrangement as an “impermissible avoidance

arrangement” and consequently, the authorities can disregard entities in a structure, reallocate income and expenditure between parties to the arrangement, alter the tax residence of such entities and the legal *situs* of assets involved, treat debt as equity and vice versa. The tax authorities may also deny benefits conferred under an applicable tax treaty. An ‘impermissible avoidance arrangement’ is an arrangement entered into with the main purpose of obtaining a tax benefit and satisfying one or more of the following: (a) non-arm’s length dealings; (b) misuse or abuse of the provisions of the domestic income tax provisions; (c) lack of commercial substance; and (d) arrangement similar to that employed for non-bona fide purposes.

Factors like period of time for which the arrangement had existed; the fact of payment of taxes by the assessee; and the fact that an exit route was provided by the arrangement, would be relevant but not sufficient to determine whether the arrangement lacks commercial substance. Further, an arrangement shall also be deemed to be lacking commercial substance if it does not have a significant effect upon the business risks, or net cash flows of any party to the arrangement apart from any effect attributable to the tax benefit that would be obtained.

Therefore, if the Indian Tax authorities deem the Fund’s structure to be an “impermissible avoidance arrangement”, then the Subsidiary may not be able to claim benefits under the Treaty. Inability of the Subsidiary to claim the tax benefits under the Treaty could have an adverse impact on the tax liabilities of the Subsidiary, and would likely have an adverse impact on the returns to the Fund.

*Renegotiation of the India-Mauritius Double Taxation Treaty* (the “Treaty”): The Supreme Court of India has upheld the validity of the Treaty; however, there can be no assurance that any future challenge will result in a favorable outcome. In recent years, there have been press reports that the treaty may be re-negotiated. There can be no assurance that the terms of the Treaty will not be subject to re-negotiation in the future or subject to a different interpretation or that the Subsidiary will continue to be deemed a tax resident by Mauritius, allowing it favorable tax treatment. Any change in the provisions of the Treaty or in its applicability to the Subsidiary could result in the imposition of withholding and other taxes on the Subsidiary by India, which would reduce the return to the Fund on its investments.

*Applicability of Minimum Alternate Tax (“MAT”)*: As per the ITA, if the tax payable by any company is less than 18.5% of its book profits, it is subject to payment of MAT at 18.5% of its ‘book profits’ (plus surcharge and cess). In the context of the Subsidiary, it may be noted that long-term capital gains on the sale of listed shares (which are normally exempt from income tax) are included in the definition of ‘book profits’ for the purposes of MAT calculation. Courts have traditionally held that MAT is not applicable to companies incorporated and resident outside India. However, there have been certain decisions by the Authority for Advance Rulings holding that MAT is applicable to foreign companies. Further, the Finance Bill, 2015 has proposed that, if capital gains arising on transactions in securities (other than short-term capital gains arising on transactions on which STT is not payable) to an FPI has been credited by the FPI to its profit and loss account, then such amount is to be excluded from the computation of ‘book profits’. Therefore, there is a growing concern with respect to taxation of capital gains earned by FPIs prior to April 1, 2015 (the date from the which MAT-related amendments under the Finance Bill, 2015 is expected to be brought into force), particularly in light of news reports on tax notices being issued to India-focused funds.

*Limitations on the Subsidiary's Ability to Make Distributions or Pay Redemption Proceeds to the Fund.* The Subsidiary is regulated by the Mauritius Financial Services Commission ("FSC") which has issued a Category 1 Global Business License to the Subsidiary to conduct the business of "investment holding" under the Financial Services Act 2007 (the "Financial Services Act"). Pursuant to the Mauritius Companies Act 2001 (the "Companies Act"), the Subsidiary can only make a distribution or pay the redemption proceeds upon a redemption of shares if it satisfies the solvency test prescribed under the Companies Act immediately after such distribution or redemption. Consequently, the stated capital of the Subsidiary must be taken into account and a positive net balance is required. In addition, the Subsidiary may only pay dividends out of retained earnings after having made good any accumulated losses at the beginning of the accounting period. The above limitations may adversely affect the ability of the Subsidiary and the Market Vectors India Small-Cap Index ETF to make distributions or pay the redemption proceeds to the investors. If Market Vectors India Small-Cap Index ETF's ability to make distributions is adversely affected, Market Vectors India Small-Cap Index ETF may be unable to satisfy distribution requirements applicable to regulated investment companies under the Internal Revenue Code, and be subject to income and/or excise tax at the Fund level. See "Taxes".

**RQFII Program Risk** (Market Vectors ChinaAMC A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF Only)

The Adviser allocates a portion of Market Vectors ChinaAMC A-Share ETF's and Market Vectors ChinaAMC SME-ChiNext ETF's assets to an unaffiliated sub-adviser with an RQFII license (a "sub-adviser") for purposes of investing in A-shares. China Asset Management (Hong Kong) Limited (the "Sub-Adviser") currently acts as Market Vectors ChinaAMC A-Share ETF's and Market Vectors ChinaAMC SME-ChiNext ETF's sub-adviser for this purpose. The RQFII regulations provide that the size of a RQFII's quota may be reduced or cancelled by SAFE if the RQFII is unable to use its RQFII quota effectively within one year after the quota is granted. Pursuant to PRC and RQFII regulations, SAFE is vested with the power to impose regulatory sanctions if the Sub-Adviser, in its capacity as RQFII, or the PRC sub-custodian violates any provision of the RQFII regulations. Any such violations could result in the revocation of the Sub-Adviser's quota or other regulatory sanctions and may adversely impact the portion of the Sub-Adviser's quota granted with respect to Market Vectors ChinaAMC A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF.

If SAFE reduces the Sub-Adviser's quota, it may affect Market Vectors ChinaAMC A-Share ETF's or Market Vectors ChinaAMC SME-ChiNext ETF's ability to effectively pursue its investment strategy. In addition, the Sub-Adviser's RQFII status could be suspended or revoked. There can be no assurance that the Sub-Adviser will continue to maintain its RQFII status or be able to acquire additional RQFII quota. In the event the Sub-Adviser is unable to maintain its RQFII status or its RQFII quota becomes inadequate, and the Adviser is not able to retain an additional sub-adviser with an RQFII quota, Market Vectors ChinaAMC A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF may be unable to gain exposure to A-shares through other means described in the Prospectus. In such event it is possible that the trading price of Market Vectors ChinaAMC A-Share ETF's and Market Vectors ChinaAMC SME-ChiNext ETF's Shares on the Exchange will be at a significant premium to the NAV (which may also increase tracking error of the Fund).

The current RQFII regulations include rules on investment restrictions applicable to Market Vectors ChinaAMC A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF. Transaction sizes for RQFIIs are relatively large (with the corresponding heightened risk of exposure to decreased market liquidity and significant price volatility

leading to possible adverse effects on the timing and pricing of acquisition or disposal of securities).

18

The regulations which regulate investments by RQFIIs in the PRC and the repatriation of capital from RQFII investments are relatively new. The application and interpretation of such investment regulations are therefore relatively untested and there is no certainty as to how they will be applied as the PRC authorities and regulators have been given wide discretion in such investment regulations and there is no precedent or certainty as to how such discretion may be exercised now or in the future. The future application and/or interpretation of such regulations may create difficulties with respect to the manner in which Market Vectors ChinaAMC A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF seek to invest in A-shares in furtherance of its investment objective.

### **Concentration Considerations**

To the extent that a Fund's investments are concentrated in a particular sector or sectors or industry or group of industries, the Fund will be subject to the risk that economic, political or other conditions that have a negative effect on that sector or industry will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries. The securities of state and municipal governments and their political subdivisions are not considered to be issued by members of any industry.

### **Cyber Security**

The Funds, their service providers, the NYSE Arca and Authorized Participants (defined below) are susceptible to cyber security risks that include, among other things, theft, unauthorized monitoring, release, misuse, loss, destruction or corruption of confidential and highly restricted data; denial of service attacks; unauthorized access to relevant systems, compromises to networks or devices that the Funds and their service providers use to service the Funds' operations; or operational disruption or failures in the physical infrastructure or operating systems that support the Funds and their service providers. Cyber attacks against or security breakdowns of the Funds, their service providers, the NYSE Arca or Authorized Participants may adversely impact the Funds and their shareholders, potentially resulting in, among other things, financial losses; the inability of Fund shareholders to transact business and the Funds to process transactions; inability to calculate the Funds' NAVs; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs; and/or additional compliance costs. The Funds may incur additional costs for cyber security risk management and remediation purposes. In addition, cyber security risks may also impact issuers of securities in which the Funds invest, which may cause the Funds' investment in such issuers to lose value. There can be no assurance that the Funds, their service providers, the NYSE Arca or Authorized Participants will not suffer losses relating to cyber attacks or other information security breaches in the future.

## EXCHANGE LISTING AND TRADING

A discussion of exchange listing and trading matters associated with an investment in each Fund is contained in each Fund's Prospectus under the headings "Summary Information—Principal Risks of Investing in the Fund" with respect to the applicable Fund, "Additional Information About the Funds' Investment Strategies and Risks—Risks of Investing in the Funds," "Shareholder Information—Determination of NAV" and "Shareholder Information—Buying and Selling Exchange-Traded Shares." The discussion below supplements, and should be read in conjunction with, such sections of the Funds' Prospectus.

The Shares of each Fund are traded in the secondary market at prices that may differ to some degree from their NAV. The Exchange may but is not required to remove the Shares of the Funds from listing if: (1) following the initial twelve-month period beginning upon the commencement of trading of the Funds, there are fewer than 50 beneficial holders of the Shares for 30 or more consecutive trading days, (2) the value of a Fund's respective Index or portfolio of securities on which the Fund is based is no longer calculated or available or (3) such other event shall occur or condition exists that, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. In addition, the Exchange will remove the Shares from listing and trading upon termination of the Trust. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of Shares of the Funds will continue to be met.

As in the case of other securities traded on the Exchange, brokers' commissions on transactions will be based on negotiated commission rates at customary levels.

In order to provide investors with a basis to gauge whether the market price of the Shares on the Exchange is approximately consistent with the current value of the assets of the Funds on a per Share basis, an updated Indicative Per Share Portfolio Value is disseminated intra-day through the facilities of the Consolidated Tape Association's Network B. Indicative Per Share Portfolio Values are disseminated every 15 seconds during regular Exchange trading hours based on the most recently reported prices of Fund Securities. As the respective international local markets close, the Indicative Per Share Portfolio Value will continue to be updated for foreign exchange rates for the remainder of the U.S. trading day at the prescribed 15 second interval. The Funds are not involved in or responsible for the calculation or dissemination of the Indicative Per Share Portfolio Value and make no warranty as to the accuracy of the Indicative Per Share Portfolio Value.

## BOARD OF TRUSTEES OF THE TRUST

### Trustees and Officers of the Trust

The Board of the Trust consists of five Trustees, four of whom are not “interested persons” (as defined in the 1940 Act), of the Trust (the “Independent Trustees”). Mr. David H. Chow, an Independent Trustee, serves as Chairman of the Board. The Board is responsible for overseeing the management and operations of the Trust, including general supervision of the duties performed by the Adviser and other service providers to the Trust. The Adviser is responsible for the day-to-day administration and business affairs of the Trust.

The Board believes that each Trustee’s experience, qualifications, attributes or skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that the Board possesses the requisite skills and attributes to carry out its oversight responsibilities with respect to the Trust. The Board believes that the Trustees’ ability to review, critically evaluate, question and discuss information provided to them, to interact effectively with the Adviser, other service providers, counsel and independent auditors, and to exercise effective business judgment in the performance of their duties, support this conclusion. The Board also has considered the following experience, qualifications, attributes and/or skills, among others, of its members in reaching its conclusion: such person’s character and integrity; length of service as a board member of the Trust; such person’s willingness to serve and willingness and ability to commit the time necessary to perform the duties of a Trustee; and as to each Trustee other than Mr. van Eck, his status as not being an “interested person” (as defined in the 1940 Act) of the Trust. In addition, the following specific experience, qualifications, attributes and/or skills apply as to each Trustee: Mr. Chow, significant business and financial experience, particularly in the investment management industry, experience with trading and markets through his involvement with the Pacific Stock Exchange, and service as a chief executive officer, board member, partner or executive officer of various businesses and non-profit organizations; Mr. Short, business and financial experience, particularly in the investment management industry, and service as a president, board member or executive officer of various businesses; Mr. Sidebottom, business and financial experience, particularly in the investment management industry, and service as partner and/or executive officer of various businesses; Mr. Stamberger, business and financial experience and service as the president and chief executive officer of SmartBrief Inc., a media company; and Mr. van Eck, business and financial experience, particularly in the investment management industry, and service as a president, executive officer and/or board member of various businesses, including the Adviser, Van Eck Securities Corporation, and Van Eck Absolute Return Advisers Corporation. References to the experience, qualifications, attributes and skills of Trustees are pursuant to requirements of the SEC, do not constitute holding out of the Board or any Trustee as having any special expertise or experience, and shall not impose any greater responsibility or liability on any such person or on the Board by reason thereof.

The Trustees of the Trust, their addresses, positions with the Trust, year of birth, term of office and length of time served, principal occupations during the past five years, the number of portfolios in the Fund Complex overseen by each Trustee and other directorships, if any, held by the Trustees, are set forth below.

<b>Officer's Name, Address<sup>1</sup> and Year of Birth</b>	<b>Position(s) Held with the Trust</b>	<b>Term of Office<sup>2</sup> and Length of Time Served</b>	<b>Principal Occupation(s) During The Past Five Years</b>
Janet Squitieri, 1961	Chief Compliance Officer	Since September 2013	Vice President, Global Head of Compliance of the Adviser, VESC and VEARA (since September 2013); Chief Compliance Officer and Senior Vice President North America of HSBC Global Asset Management NA (August 2010 – September 2013); Chief Compliance Officer North America of Babcock & Brown LP (July 2008 - June 2010).

<sup>1</sup>The address for each Officer is 666 Third Avenue, 9th Floor, New York, New York 10017.

<sup>2</sup>Officers are elected yearly by the Trustees.

The Board of the Trust met six times during the fiscal year ended December 31, 2014.

The Board has an Audit Committee consisting of four Trustees who are Independent Trustees. Messrs. Chow, Short, Sidebottom and Stamberger currently serve as members of the Audit Committee and each of Messrs. Chow, Short and Stamberger has been designated as an “audit committee financial expert” as defined under Item 407 of Regulation S-K of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Mr. Short is the Chairman of the Audit Committee. The Audit Committee has the responsibility, among other things, to: (i) oversee the accounting and financial reporting processes of the Trust and its internal control over financial reporting; (ii) oversee the quality and integrity of the Trust’s financial statements and the independent audit thereof; (iii) oversee or, as appropriate, assist the Board’s oversight of the Trust’s compliance with legal and regulatory requirements that relate to the Trust’s accounting and financial reporting, internal control over financial reporting and independent audit; (iv) approve prior to appointment the engagement of the Trust’s independent registered public accounting firm and, in connection therewith, to review and evaluate the qualifications, independence and performance of the Trust’s independent registered public accounting firm; and (v) act as a liaison between the Trust’s independent registered public accounting firm and the full Board. The Audit Committee met four times during the fiscal year ended December 31, 2014.

The Board also has a Nominating and Corporate Governance Committee consisting of four Independent Trustees. Messrs. Chow, Short, Sidebottom and Stamberger currently serve as members of the Nominating and Corporate Governance Committee. Mr. Stamberger is the Chairman of the Nominating and Corporate Governance Committee. The Nominating and Corporate Governance Committee has the responsibility, among other things, to: (i) evaluate, as necessary, the composition of the Board, its committees and sub-committees and make such recommendations to the Board as deemed appropriate by the Committee; (ii) review and define Independent Trustee qualifications; (iii) review the qualifications of individuals serving as Trustees on the Board and its committees; (iv) evaluate, recommend and nominate qualified individuals for election or appointment as members of the Board and recommend the appointment of members and chairs of each Board committee and subcommittee; and (v) review and assess, from time to time, the performance of the committees and subcommittees of the Board and report the results to the Board. The Nominating and Corporate Governance Committee did not meet during the fiscal year ended December 31, 2014.

The Board has determined that its leadership structure is appropriate given the business and nature of the Trust. In connection with its determination, the Board considered that the Chairman of the Board is an Independent Trustee. The Chairman of the Board can play an important role in setting the

27

agenda of the Board and also serves as a key point person for dealings between management and the other Independent Trustees. The Independent Trustees believe that the Chairman's independence facilitates meaningful dialogue between the Adviser and the Independent Trustees. The Board also considered that the Chairman of each Board committee is an Independent Trustee, which yields similar benefits with respect to the functions and activities of the various Board committees. The Independent Trustees also regularly meet outside the presence of management and are advised by independent legal counsel. The Board has determined that its committees help ensure that the Trust has effective and independent governance and oversight. The Board also believes that its leadership structure facilitates the orderly and efficient flow of information to the Independent Trustees from management of the Trust, including the Adviser. The Board reviews its structure on an annual basis.

As an integral part of its responsibility for oversight of the Trust in the interests of shareholders, the Board, as a general matter, oversees risk management of the Trust's investment programs and business affairs. The function of the Board with respect to risk management is one of oversight and not active involvement in, or coordination of, day-to-day risk management activities for the Trust. The Board recognizes that not all risks that may affect the Trust can be identified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve the Trust's goals, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, reports received by the Trustees that may relate to risk management matters are typically summaries of the relevant information.

The Board exercises oversight of the risk management process primarily through the Audit Committee, and through oversight by the Board itself. The Trust faces a number of risks, such as investment-related and compliance risks. The Adviser's personnel seek to identify and address risks, i.e., events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the Trust. Under the overall supervision of the Board or the applicable Committee of the Board, the Trust, the Adviser, and the affiliates of the Adviser employ a variety of processes, procedures and controls to identify such possible events or circumstances, to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Different processes, procedures and controls are employed with respect to different types of risks. Various personnel, including the Trust's Chief Compliance Officer, as well as various personnel of the Adviser and other service providers such as the Trust's independent accountants, may report to the Audit Committee and/or to the Board with respect to various aspects of risk management, as well as events and circumstances that have arisen and responses thereto.

The officers and Trustees of the Trust, in the aggregate, own less than 1% of the Shares of each Fund as of March 31, 2015.

The general management of the Subsidiary is the responsibility of its Board of Directors, a majority of which are also Trustees of the Trust.

For each Trustee, the dollar range of equity securities beneficially owned (including ownership through the Trust's Deferred Compensation Plan) by the Trustee in the Trust and in all registered investment companies advised by the

Adviser (“Family of Investment Companies”) that are overseen by the Trustee is shown below.

As to each Independent Trustee and his immediate family members, no person owned beneficially or of record securities in an investment manager or principal underwriter of the Funds, or a person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with the investment manager or principal underwriter of the Funds.

#### Remuneration of Trustees

The Trust pays each Independent Trustee an annual retainer of \$80,000, a per meeting fee of \$15,000 for scheduled quarterly meetings of the Board and each special meeting of the Board and a per meeting fee of \$7,500 for telephonic meetings. The Trust pays the Chairman of the Board an annual retainer of \$45,500, the Chairman of the Audit Committee an annual retainer of \$19,500 and the Chairman of the Governance Committee an annual retainer of \$13,000. The Trust also reimburses each Trustee for travel and other out-of-pocket expenses incurred in attending such meetings. No pension or retirement benefits are accrued as part of Trustee compensation.

## Edgar Filing: MARKET VECTORS ETF TRUST - Form 497

The table below shows the compensation paid to the Trustees by the Trust for the fiscal year ended December 31, 2014. Annual Trustee fees may be reviewed periodically and changed by the Trust's Board.

Name of Trustee	Aggregate Compensation From the Trust	Deferred Compensation From the Trust	<b>Pension or Retirement Benefits Accrued as Part of the Trust's Expenses<sup>(2)</sup></b>	Estimated Annual Benefits Upon Retirement	<b>Total Compensation From the Trust and the Fund Complex<sup>(1)</sup> Paid to Trustee<sup>(2)</sup></b>

Jan F. van Eck <sup>(3)</sup>	\$ 0	\$ 0	N/A	N/A	\$0

(1) The "Fund Complex" consists of Van Eck Funds, Van Eck VIP Trust and the Trust.

(2) Because the funds of the Fund Complex have different fiscal year ends, the amounts shown are presented on a calendar year basis.

(3) "Interested person" under the 1940 Act.

### PORTFOLIO HOLDINGS DISCLOSURE

Each Fund's portfolio holdings are publicly disseminated each day the Fund is open for business through financial reporting and news services, including publicly accessible Internet web sites. In addition, a basket composition file, which includes the security names and share quantities to deliver in exchange for Creation Units, together with estimates and actual cash components is publicly disseminated daily prior to the opening of the Exchange via the National Securities Clearing Corporation (the "NSCC"), a clearing agency that is registered with the SEC. The basket represents one Creation Unit of each Fund. The Trust, Adviser, Custodian and Distributor will not disseminate non-public information concerning the Trust.

### QUARTERLY PORTFOLIO SCHEDULE

The Trust is required to disclose, after its first and third fiscal quarters, the complete schedule of the Funds' portfolio holdings with the SEC on Form N-Q. Form N-Q for the Funds is available on the SEC's website at <http://www.sec.gov>. The Funds' Form N-Q may also be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. and information on the operation of the Public Reference Room may be obtained by calling 202.551.8090. The Funds' Form N-Q is available through the Funds' website, at [www.vaneck.com](http://www.vaneck.com) or by writing to 666 Third Avenue, 9th Floor, New York, New York 10017.

POTENTIAL CONFLICTS OF INTEREST

The Adviser (and its principals, affiliates or employees) may serve as investment adviser to other client accounts and conduct investment activities for their own accounts. Such “Other Clients” may have investment objectives or may implement investment strategies similar to those of the Funds, or may track the same index a Fund tracks. When the Adviser implements investment strategies for Other Clients that are similar or directly contrary to the positions taken by a Fund, the prices of the Fund’s securities may be negatively affected. For example, when purchase or sales orders for a Fund are aggregated with those of other Funds and/or Other Clients and allocated among them, the price that the Fund pays or receives may be more in the case of a purchase or less in a sale than if the Adviser served as adviser to only the Fund. When Other Clients are selling a security that a Fund owns, the price of that security may decline as a result of the sales. The compensation that the Adviser receives from Other Clients may be higher than the

compensation paid by a Fund to the Adviser. The Adviser has implemented procedures to monitor trading across the Funds and its Other Clients.

## CODE OF ETHICS

The Funds, the Adviser, the Sub-Adviser (with respect to Market Vectors ChinaAMC A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF) and the Distributor have each adopted a Code of Ethics pursuant to Rule 17j-1 under the 1940 Act (“Rule 17j-1”). Such Codes of Ethics require, among other things, that “access persons” (as defined in Rule 17j-1) conduct personal securities transactions in a manner that avoids any actual or potential conflict of interest or any abuse of a position of trust and responsibility. The Codes of Ethics allow such access persons to invest in securities that may be purchased and held by a Fund, provided such investments are done consistently with the provisions of the Codes of Ethics.

## PROXY VOTING POLICIES AND PROCEDURES

The Funds’ proxy voting record is available upon request and on the SEC’s website at <http://www.sec.gov>. Proxies for each Fund’s portfolio securities are voted in accordance with the Adviser’s proxy voting policies and procedures, which are set forth in Appendix A to this SAI.

The Trust is required to disclose annually each Fund’s complete proxy voting record on Form N-PX covering the period July 1 through June 30 and file it with the SEC no later than August 31. Form N-PX for the Funds is available through the Funds’ website, at [www.vaneck.com](http://www.vaneck.com), or by writing to 666 Third Avenue, 9th Floor, New York, New York 10017. The Funds’ Form N-PX is also available on the SEC’s website at [www.sec.gov](http://www.sec.gov).

## MANAGEMENT

The following information supplements and should be read in conjunction with the section in the Prospectus entitled “Management of the Funds.”

### Investment Adviser and Sub-Adviser

*All Funds except Market Vectors ChinaAMC A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF.* Van Eck Associates Corporation acts as investment adviser to the Trust and, subject to the general supervision of the Board, is responsible for the day-to-day investment management of the Funds. The Adviser is a private company with headquarters in New York and manages numerous pooled investment vehicles and separate accounts.

The Adviser serves as investment adviser to Market Vectors Gold Miners ETF pursuant to the Investment Management Agreement between Market Vectors Gold Miners ETF and the Adviser (the “Gold Miners Investment Management Agreement”) and also serves as investment adviser to each of the other Funds pursuant to an investment management agreement between the Trust and the Adviser (the “Trust Investment Management Agreement” and, together with the Gold Miners Investment Management Agreement, the “Investment Management Agreement”). Under the Investment Management Agreement, the Adviser, subject to the supervision of the Board and in conformity with the stated investment policies of each Fund, manages the investment of the Funds’ assets. The Adviser is responsible for placing purchase and sale orders and providing continuous supervision of the investment portfolio of the Funds. All investment decisions relating to the Market Vectors India Small-Cap Index ETF will be made outside of India.

*Market Vectors ChinaAMC A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF.* Van Eck Associates Corporation acts as investment adviser to the Trust and, subject to the general supervision of the Board, is responsible for overseeing the activities of the Sub-Adviser and for the day-to-day investment management of Market Vectors ChinaAMC A-Share ETF’s and Market Vectors ChinaAMC SME-ChiNext ETF’s assets allocated to it. China Asset Management (Hong Kong) Limited acts as investment sub-adviser to the Trust and, subject to the oversight of the Adviser, is responsible for the day-to-day investment management of Market Vectors ChinaAMC A-Share ETF’s and Market Vectors ChinaAMC SME-ChiNext ETF’s assets allocated to it.

The Adviser serves as investment adviser to each of Market Vectors ChinaAMC A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF pursuant to an Investment Management Agreement. Under the Investment Management Agreement, the Adviser, subject to the supervision of the Board and in conformity with the stated investment policies of Market Vectors ChinaAMC A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF, manages and administers the Trust and oversees the Sub-Adviser with respect to the duties it has delegated to the Sub-Adviser regarding the investment and reinvestment of Market Vectors ChinaAMC A-Share ETF’s and Market Vectors ChinaAMC SME-ChiNext ETF’s assets, respectively. The Sub-Adviser serves as investment subadviser to Market Vectors ChinaAMC A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF pursuant to investment subadvisory agreements between the Adviser and the Sub-Adviser (the “Investment Subadvisory Agreements”). The

Sub-Adviser is responsible for placing purchase and sale orders and providing continuous supervision of Market Vectors ChinaAMC A-Share ETF's and Market Vectors ChinaAMC SME-ChiNext ETF's assets allocated to it.

*Indemnification.* With respect to Market Vectors ChinaAMC A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF, pursuant to the Investment Management Agreement, the Trust has agreed to indemnify the Adviser for certain liabilities, including certain liabilities arising under the federal

securities laws, unless such loss or liability results from willful misfeasance, bad faith or gross negligence in the performance of its duties or the reckless disregard of its obligations and duties. Pursuant to the Investment Subadvisory Agreement, the Adviser has agreed to indemnify the Sub-Adviser for certain liabilities, including certain liabilities arising under the federal securities laws, unless such loss or liability results from willful misfeasance or gross negligence in the performance of its duties or the reckless disregard of its obligations and duties.

*Compensation.* As compensation for its services under each Investment Management Agreement, the Adviser is paid a monthly fee based on a percentage of each applicable Fund's average daily net assets at the annual rate of 0.35% for Market Vectors Oil Services ETF and 0.50% for each other Fund. From time to time, the Adviser may waive all or a portion of its fees. Until at least May 1, 2016, the Adviser has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of each Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.35% (with respect to Market Vectors Oil Services ETF), 0.49% (with respect to Market Vectors Natural Resources ETF), 0.53% (with respect to Market Vectors Gold Miners ETF), 0.54% (with respect to Market Vectors Unconventional Oil & Gas ETF), 0.55% (with respect to Market Vectors Steel ETF), 0.56% (with respect to Market Vectors Agribusiness ETF and Market Vectors Junior Gold Miners ETF), 0.57% (with respect to Market Vectors Rare Earth/Strategic Metals ETF and Market Vectors Indonesia Index ETF), 0.59% (with respect to Market Vectors Brazil Small-Cap ETF, Market Vectors Coal ETF and Market Vectors Israel ETF), 0.60% (with respect to Market Vectors Poland ETF and Market Vectors Uranium+Nuclear Energy ETF), 0.61% (with respect to Market Vectors Indonesia Small-Cap ETF), 0.62% (with respect to Market Vectors Global Alternative Energy ETF and Market Vectors Russia ETF), 0.65% (with respect to Market Vectors Solar Energy ETF), 0.67% (with respect to Market Vectors Russia Small-Cap ETF), 0.72% (with respect to Market Vectors ChinaAMC A-Share ETF), 0.76% (with respect to Market Vectors Vietnam ETF), 0.78% (with respect to Market Vectors Africa Index ETF and Market Vectors ChinaAMC SME-ChiNext ETF), 0.85% (with respect to Market Vectors India Small-Cap Index ETF), 0.94% (with respect to Market Vectors Egypt Index ETF) and 0.98% (with respect to Market Vectors Gulf States Index ETF) of its average daily net assets per year. From time to time, the Adviser may waive all or a portion of its fees. Offering costs excluded from the expense caps are: (a) legal fees pertaining to a Fund's Shares offered for sale; (b) SEC and state registration fees; and (c) initial fees paid for Shares of a Fund to be listed on an exchange.

With respect to Market Vectors ChinaAMC A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF, for the services provided and the expenses assumed by the Sub-Adviser pursuant to the Sub-Advisory Agreements, the Adviser (not Market Vectors ChinaAMC A-Share ETF or Market Vectors ChinaAMC SME-ChiNext ETF) will pay a monthly fee to the Sub-Adviser based on a percentage of Market Vectors ChinaAMC A-Share ETF's and Market Vectors ChinaAMC SME-ChiNext ETF average daily net assets managed by the Sub-Adviser.

The management fees paid by each Fund and the expenses waived or assumed by the Adviser during the Funds' fiscal years ended December 31, 2012, 2013 and 2014, as applicable, or, if the Fund has not been in existence for a full fiscal year, since the commencement of operations of that Fund are set forth in the chart below.

*Term.* Each Investment Management Agreement is subject to annual approval by (1) the Board or (2) a vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of each Fund,

*provided* that in either event such continuance also is approved by a majority of the Board who are not interested persons (as defined in the 1940 Act) of the Trust by a vote cast in person at a meeting called for the purpose of voting on such approval. Each Investment Management Agreement is terminable without penalty, on 60 days notice, by the Board or by a vote of the holders of a majority (as defined in the 1940 Act) of a Fund's outstanding voting securities. Each Investment Management Agreement is also terminable upon 60 days' notice by the Adviser and will terminate automatically in the event of its assignment (as defined in the 1940 Act). The Investment Subadvisory Agreements terminate automatically upon assignment and are terminable at any time without penalty as to Market Vectors ChinaAMC A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF by the Board, or by vote of the holders of a majority of the Fund's outstanding voting securities on 60 days' written notice to the Sub-Adviser, by the Adviser on 60 days' written notice (with respect to Market Vectors ChinaAMC A-Share ETF) and six (6) months' written notice (with respect to Market Vectors ChinaAMC SME-ChiNext ETF) to the Sub-Adviser or by the Sub-Adviser on 60 days' written notice (with respect to Market Vectors ChinaAMC A-Share ETF) and six (6) months' written notice (with respect to Market Vectors ChinaAMC SME-ChiNext ETF) to the Adviser and the Trust.

*Subsidiary Investment Management Agreement.* The Adviser provides an investment program for the Subsidiary and manages the investment of the Subsidiary's assets under the overall supervision of the Board of Directors of the Subsidiary. Pursuant to a management agreement between the Adviser and the Subsidiary (the "Subsidiary Investment Management Agreement"), the Adviser does not receive any fees from the Subsidiary. The Subsidiary Investment Management Agreement continues in effect only if approved annually by the Board of Directors of the Subsidiary.

The Subsidiary Investment Management Agreement terminates automatically upon assignment and is terminable at any time without penalty as to the Subsidiary by the Board of Directors of the Subsidiary, the Trust's Independent Trustees or by vote of the holders of a majority of the Subsidiary's outstanding voting securities on 60 days' written notice to the Adviser, or by the Adviser on 60 days' written notice to the Subsidiary. Pursuant to the Subsidiary Investment Management Agreement, the Adviser will not be liable for any error of judgment or mistake of law or for any loss suffered by the Subsidiary in connection with the performance of the Subsidiary Investment Agreement, except a loss resulting from willful misfeasance, bad faith, fraud or gross negligence on the part of the Adviser in the performance of its duties or from reckless disregard of its duties and obligations thereunder.

#### The Administrator

Van Eck Associates Corporation also serves as administrator for the Trust pursuant to each Investment Management Agreement. Under each Investment Management Agreement, the Adviser is obligated on a continuous basis to provide such administrative services as the Board of the Trust reasonably deems necessary for the proper administration of the Trust and the Funds. The Adviser will generally assist in all aspects of the Trust's and the Funds' operations; supply and maintain office facilities, statistical and research data, data processing services, clerical, accounting (only with respect to Market Vectors Gold Miners ETF), bookkeeping and record keeping services (including without limitation the maintenance of such books and records as are required under the 1940 Act and the rules thereunder, except as maintained by other agents), internal auditing, executive and administrative services, and stationery and office supplies; prepare reports to shareholders or investors; prepare and file tax returns; supply financial information and supporting data for reports to and filings with the SEC and various state Blue Sky authorities; supply supporting documentation for meetings of the Board; provide monitoring reports and assistance regarding compliance with the Declaration of Trust, by-laws, investment objectives and policies and with federal and

state securities laws; arrange for appropriate insurance coverage; calculate NAVs, net income and realized capital gains or losses; and negotiate arrangements with, and supervise and coordinate the activities of, agents and others to supply services.

#### Mauritius Administrator

Cim Fund Services Ltd., located at Rogers House, 5 President John Kennedy St., Port-Louis, Mauritius, serves as the Subsidiary's Mauritius administrator. The Subsidiary pays Cim Fund Services Ltd. a fee for its services and for preparing management accounts; acting as registrar in relation to the shares of the Subsidiary; organizing board and shareholder meetings and keeping minutes and the statutory books and records of the Subsidiary in order to comply with requirements of the Mauritian Company Law and the Financial Services Commission of Mauritius; preparing and filing certain regulatory filings; and providing taxation and regulatory advisory services. The Subsidiary also reimburses Cim Fund Services Ltd. for all reasonable out-of-pocket expenses reasonably incurred by it in the performance of its duties.

#### Custodian and Transfer Agent

The Bank of New York Mellon ("The Bank of New York"), located at 101 Barclay Street, New York, New York 10286, serves as custodian for the Funds and the Subsidiary pursuant to a Custodian Agreement. As Custodian, The Bank of New York holds the Funds' and the Subsidiary's assets. The Bank of New York serves as the Funds' transfer agent (in such capacity, the "Transfer Agent") pursuant to a Transfer Agency Agreement. The Bank of New York may be reimbursed by the Funds for its out-of-pocket expenses. In addition, The Bank of New York provides various accounting services to each of the Funds, except for Market Vectors Gold Miners ETF, pursuant to a fund accounting agreement. The Adviser pays a portion of the fee that it receives from Market Vectors Gold Miners ETF to The Bank of New York for providing fund accounting services to Market Vectors Gold Miners ETF.

#### The Distributor

Van Eck Securities Corporation (the "Distributor") is the principal underwriter and distributor of Shares. Its principal address is 666 Third Avenue, New York, New York 10017 and investor information can be obtained by calling 1-800-826-2333. The Distributor has entered into an agreement with the Trust which will continue from its effective date unless terminated by either party upon 60 days' prior written notice to the other party by the Trust and the Adviser, or by the Distributor, or until termination of the Trust or each Fund offering its Shares, and which is renewable annually thereafter (the "Distribution Agreement"), pursuant to which it distributes Shares. Shares will be continuously offered for sale by the Trust through the Distributor only in Creation Units, as described below under "Creation and Redemption of Creation Units—Procedures for Creation of Creation Units." Shares in less than Creation Units are not distributed by the Distributor. The Distributor will deliver a prospectus to persons purchasing Shares in Creation Units and will maintain records of both orders placed with it and confirmations of acceptance furnished by it. The Distributor is a broker-dealer registered under the Exchange Act and a member of the Financial Industry Regulatory Authority ("FINRA"). The Distributor has no role in determining the investment policies of the Trust or which securities are to be purchased or sold by the Trust.

The Distributor may also enter into sales and investor services agreements with broker-dealers or other persons that are Participating Parties and DTC Participants (as defined below) to provide distribution assistance, including broker-dealer and shareholder support and educational and promotional services but must pay such broker-dealers or other persons, out of its own assets.

The Distribution Agreement provides that it may be terminated at any time, without the payment of any penalty: (i) by vote of a majority of the Independent Trustees or (ii) by vote of a majority (as defined in the 1940 Act) of the outstanding voting securities of the Funds, on at least 60 days written notice to the Distributor. The Distribution Agreement is also terminable upon 60 days notice by the Distributor and will terminate automatically in the event of its assignment (as defined in the 1940 Act).

## Affiliated Index Provider

The Market Vectors® Africa Index (the “Africa Index”), Market Vectors® Global Agribusiness Index (the “Agribusiness Index”), Market Vectors® Brazil Small-Cap Index (the “Brazil Small-Cap Index”), Market Vectors® Global Coal Index (the “Coal Index”), Market Vectors® Egypt Index (the “Egypt Index”), Market Vectors® Gulf States Index (the “Gulf States Index”), Market Vectors® India Small-Cap Index (the “India Small-Cap Index”), Market Vectors® Indonesia Index (the “Indonesia Index”), Market Vectors® Indonesia Small-Cap Index (the “Indonesia Small-Cap Index”), Market Vectors® Global Junior Gold Miners Index (the “Junior Gold Miners Index”), Market Vectors® Global Rare Earth/Strategic Metals Index (the “Rare Earth/Strategic Metals Index”), Market Vectors® US Listed Oil Services 25 Index (the “Oil Services Index”), Market Vectors® Poland Index (the “Poland Index”), Market Vectors® Global Solar Energy Index (the “Solar Energy Index”), Market Vectors® Global Unconventional Oil & Gas Index (the “Oil & Gas Index”), Market Vectors® Russia Index (the “Russia Index”), Market Vectors® Russia Small-Cap Index (the “Russia Small-Cap Index”), Market Vectors® Global Uranium & Nuclear Energy Index (the “Nuclear Energy Index”) and Market Vectors® Vietnam Index (the “Vietnam Index”) are published by MVIS (the “Index Provider”), which is a wholly-owned subsidiary of the Adviser. In order to minimize any potential for conflicts caused by the fact that the Adviser or its affiliates act as the Index Provider to a Fund that tracks an MVIS Index, the Index Provider has retained Solactive AG, an unaffiliated third party (the “Calculation Agent”), to calculate the MVIS Indices. The Calculation Agent, using a rules-based methodology, will calculate, maintain and disseminate each of the MVIS Indices on a daily basis. The Index Provider will monitor the results produced by the Calculation Agent to help ensure that the MVIS Indices are being calculated in accordance with the applicable rules-based methodology. In addition, the Adviser and MVIS have established policies and procedures designed to prevent non-public information about pending changes to an MVIS Index from being used or disseminated in an improper manner. Furthermore, the Adviser and the Index Provider have established policies and procedures designed to prevent improper use and dissemination of non-public information about Market Vectors Africa Index ETF, Market Vectors Agribusiness ETF’s, Market Vectors Brazil Small-Cap ETF’s, Market Vectors Coal ETF’s, Market Vectors Egypt Index ETF’s, Market Vectors Gulf States Index ETF’s, Market Vectors India Small-Cap Index ETF’s, Market Vectors Indonesia Index ETF’s, Market Vectors Indonesia Small-Cap ETF’s, Market Vectors Junior Gold Miners ETF’s, Market Vectors Oil Services ETF’s, Market Vectors Poland ETF’s, Market Vectors Rare Earth/Strategic Metals ETF’s, Market Vectors Russia ETF’s, Market Vectors Russia Small-Cap ETF’s, Market Vectors Solar Energy ETF’s, Market Vectors Unconventional Oil & Gas ETF’s, Market Vectors Uranium+Nuclear Energy ETF’s and Market Vectors Vietnam ETF’s portfolio managers from having any influence on the construction of the applicable MVIS Index’s methodology

## Other Accounts Managed by the Portfolio Managers

Van Eck Associates Corporation

As of the date indicated below, Messrs. Liao and Chao managed the following other accounts:

Edgar Filing: MARKET VECTORS ETF TRUST - Form 497

Other Accounts Managed (As of December 31, 2014)				Accounts with respect to which the advisory fee is based on the performance of the account	
Name of Portfolio Manager	Category of Account	Number of Accounts in Category	Total Assets in Accounts in Category	Number of Accounts in Category	Total Assets in Accounts in Category
Hao-Hung (Peter) Liao	Registered investment companies	15	\$2.98 billion	0	\$0
	Other pooled investment vehicles	0	\$0	0	\$0
	Other accounts	0	\$0	0	\$0
George Chao	Registered investment companies	15	\$2.98 billion	0	\$0
	Other pooled investment vehicles	0	\$0	0	\$0
	Other accounts	0	\$0	0	\$0

Although the funds in the Trust that are managed by Messrs. Liao and Chao may have different investment strategies, each has an investment objective of seeking to replicate, before fees and expenses, its respective underlying index. The Adviser does not believe that management of the various accounts presents a material conflict of interest for Messrs. Liao and Chao or the Adviser.

China Asset Management (Hong Kong) Limited (relating to Market Vectors ChinaAMC-A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF only)

As of the date indicated below, Mr. Fan managed the following other accounts:

Other Accounts Managed (As of December 31, 2015)				Accounts with respect to which the advisory fee is based on the performance of the account	
Name of Portfolio Manager	Category of Account	Number of Accounts in Category	Total Assets in Accounts in Category	Number of Accounts in Category	Total Assets in Accounts in Category
Leo Fan	Registered investment companies	0	\$0	0	\$0
	Other pooled investment vehicles	2	\$1.58 billion	0	\$0
	Other accounts	0	\$0	0	\$0

Mr. Fan manages other funds and mandates, including certain ETFs that have similar investment strategies to Market Vectors ChinaAMC A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF, which may create conflicts of interest with respect to portfolio management decisions and execution. Mr. Fan expects to manage Market Vectors ChinaAMC A-Share ETF, Market Vectors ChinaAMC SME-ChiNext ETF and the ETFs that have similar investment strategies to the Fund in accordance with his duties with respect to portfolio management decisions and execution.

## Portfolio Manager Compensation

Van Eck Associates Corporation

The portfolio managers are paid a fixed base salary and a bonus. The bonus is based upon the quality of investment analysis and the management of the funds. The quality of management of the funds includes issues of replication, rebalancing, portfolio monitoring and efficient operation, among other factors. Portfolio managers who oversee accounts with significantly different fee structures are generally compensated by discretionary bonus rather than a set formula to help reduce potential conflicts of interest. At times, the Adviser and its affiliates manage accounts with incentive fees. The portfolio managers may serve as portfolio managers to other clients. Such “Other Clients” may have investment objectives or may implement investment strategies similar to those of the Funds, or may track the same index a Fund tracks. When the portfolio managers implement investment strategies for Other Clients that are similar or directly contrary to the positions taken by a Fund, the prices of the Fund’s securities may be negatively affected. The compensation that a Fund’s portfolio manager receives for managing other client accounts may be higher than the compensation the portfolio manager receives for managing the Fund. The Adviser has implemented procedures to monitor trading across funds and its Other Clients

China Asset Management (Hong Kong) Limited (relating to Market Vectors ChinaAMC-A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF only)

The portfolio manager employed by the Sub-Adviser is paid a base salary and performance-based compensation. The portfolio manager is evaluated from an investment performance perspective, typically over a three year period, and from a peer evaluation that is completed by the Sub-Adviser’s whole investment team (including other fund managers and analysts).

## Portfolio Manager Share Ownership

## BROKERAGE TRANSACTIONS

When selecting brokers and dealers to handle the purchase and sale of portfolio securities, the Adviser and the Sub-Adviser (with respect to Market Vectors ChinaAMC A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF) look for prompt execution of the order at a favorable price. Generally, the Adviser and the Sub-Adviser (with respect to Market Vectors ChinaAMC A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF) work with recognized dealers in these securities, except when a better price and execution of the order can be obtained elsewhere. The Funds will not deal with affiliates in principal transactions unless permitted by exemptive order or applicable rule or regulation. The Adviser and the Sub-Adviser (with respect to Market Vectors ChinaAMC A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF) owe a duty to each of their clients to seek best execution on trades effected. Since the investment objective of each Fund is investment performance that corresponds to that of an Index, the Adviser and the Sub-Adviser (with respect to Market Vectors ChinaAMC A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF) do not intend to select brokers and dealers for the purpose of receiving research services in addition to a favorable price and prompt execution either from that broker or an unaffiliated third party.

The Adviser assumes general supervision over placing orders on behalf of each Fund's assets for the purchase or sale of portfolio securities. If purchases or sales of portfolio securities of a Fund's assets allocated to itself and one or more other investment companies or clients supervised by the Adviser are considered at or about the same time, transactions in such securities are allocated among the several investment companies and clients in a manner deemed equitable to all by the Adviser. In some cases, this procedure could have a detrimental effect on the price or volume of the security so far as a Fund is concerned. However, in other cases, it is possible that the ability to participate in volume transactions and to negotiate lower brokerage commissions will be beneficial to a Fund. The primary consideration is best execution.

The Sub-Adviser oversees placing orders on behalf of Market Vectors ChinaAMC A-Share ETF's and Market Vectors ChinaAMC SME-ChiNext ETF's assets allocated to it for the purchase or sale of portfolio securities. If purchases or sales of portfolio securities of Market Vectors ChinaAMC A-Share ETF's or Market Vectors ChinaAMC SME-ChiNext ETF's assets allocated to it and one or more other investment companies or clients supervised by the Sub-Adviser are considered at or about the same time, transactions in such securities will be made among the several investment companies and clients in a manner deemed appropriate by the Sub-Adviser consistent with its duty to seek best execution.

Portfolio turnover may vary from year to year, as well as within a year. High turnover rates are likely to result in comparatively greater brokerage expenses and taxable distributions. The overall reasonableness of brokerage commissions is evaluated by the Adviser based upon its knowledge of available information as to the general level of commissions paid by other institutional investors for comparable services.

The aggregate brokerage commissions paid by each Fund during the Fund's fiscal years ended December 31, 2012, 2013 and 2014, as applicable, or, if the Fund has not been in existence for a full fiscal year, since the commencement of operations of that Fund are set forth in the chart below.

Edgar Filing: MARKET VECTORS ETF TRUST - Form 497

BOOK ENTRY ONLY SYSTEM

The following information supplements and should be read in conjunction with the section in each Fund's Prospectus entitled "Shareholder Information—Buying and Selling Exchange-Traded Shares."

The Depository Trust Company ("DTC") acts as securities depository for the Shares. Shares of the Funds are represented by securities registered in the name of DTC or its nominee and deposited with, or on behalf of, DTC. Certificates will not be issued for Shares.

DTC, a limited-purpose trust company, was created to hold securities of its participants (the "DTC Participants") and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC. More specifically, DTC is owned by a number of its DTC Participants and by the New York Stock Exchange ("NYSE") and FINRA. Access to the DTC system is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (the "Indirect Participants").

Beneficial ownership of Shares is limited to DTC Participants, Indirect Participants and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in Shares (owners of such beneficial interests are referred to herein as "Beneficial Owners") is shown on, and the transfer of ownership is effected only through, records maintained by DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase of Shares.

Conveyance of all notices, statements and other communications to Beneficial Owners is effected as follows. Pursuant to the Depository Agreement between the Trust and DTC, DTC is required to make available to the Trust upon request and for a fee to be charged to the Trust a listing of the Shares holdings of each DTC Participant. The Trust shall inquire of each such DTC Participant as to the number of Beneficial Owners holding Shares, directly or indirectly, through such DTC Participant. The Trust shall provide each such DTC Participant with copies of such notice, statement or other communication, in such form, number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners. In addition, the Trust shall pay to each such DTC Participant a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements.

Share distributions shall be made to DTC or its nominee, Cede & Co., as the registered holder of all Shares. DTC or its nominee, upon receipt of any such distributions, shall credit immediately DTC Participants' accounts with payments

in amounts proportionate to their respective beneficial interests in Shares as shown on the records of DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of Shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a “street name,” and will be the responsibility of such DTC Participants.

The Trust has no responsibility or liability for any aspects of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in such Shares, or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests or for any other aspect of the relationship between DTC and the DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants.

DTC may determine to discontinue providing its service with respect to the Shares at any time by giving reasonable notice to the Trust and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Trust shall take action either to find a replacement for DTC to perform its functions at a comparable cost or, if such a replacement is unavailable, to issue and deliver printed certificates representing ownership of Shares, unless the Trust makes other arrangements with respect thereto satisfactory to the Exchange.

## CREATION AND REDEMPTION OF CREATION UNITS

### General

The Funds issue and sell Shares only in Creation Units on a continuous basis through the Distributor, without an initial sales load, at their NAV next determined after receipt, on any Business Day (as defined herein), of an order in proper form. An Authorized Participant (defined below) that is not a “qualified institutional buyer,” as such term is defined under Rule 144A of the Securities Act of 1933, will not be able to receive, as part of a redemption, restricted securities eligible for resale under Rule 144A.

A “Business Day” with respect to the Funds is any day on which the NYSE is open for business. As of the date of the Prospectus, the NYSE observes the following holidays: New Year’s Day, Martin Luther King, Jr. Day, President’s Day (Washington’s Birthday), Good Friday, Memorial Day (observed), Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

### Fund Deposit

The consideration for a purchase of Creation Units of a Fund (except Market Vectors Africa Index ETF, Market Vectors Agribusiness ETF, Market Vectors Brazil Small-Cap ETF, Market Vectors ChinaAMC A-Share ETF, Market Vectors ChinaAMC SME-ChiNext ETF, Market Vectors Egypt Index ETF, Market Vectors Global Alternative Energy ETF, Market Vectors Gulf States Index ETF, Market Vectors India Small-Cap Index ETF, Market Vectors Natural Resources ETF, Market Vectors Rare Earth/Strategic Metals ETF, Market Vectors Russia ETF, Market Vectors Russia Small-Cap ETF, Market Vectors Solar Energy ETF and Market Vectors Vietnam ETF) generally consists of the in-kind deposit of a designated portfolio of equity securities (the “Deposit Securities”) that comprise a Fund’s Index and an amount of cash computed as described below (the “Cash Component”) or, as permitted or required by the Fund, of cash. The Cash Component together with the Deposit Securities, as applicable, are referred to as the “Fund Deposit,” which represents the minimum initial and subsequent investment amount for Shares. Due to various legal and operational constraints in certain countries in which Market Vectors Africa Index ETF, Market Vectors Agribusiness ETF, Market Vectors Brazil Small-Cap ETF, Market Vectors ChinaAMC A-Share ETF, Market Vectors ChinaAMC SME-ChiNext ETF, Market Vectors Egypt Index ETF, Market Vectors Global Alternative Energy ETF, Market Vectors Gulf States Index ETF, Market Vectors India Small-Cap Index ETF, Market Vectors Natural Resources ETF, Market Vectors Rare Earth/Strategic Metals ETF, Market Vectors Russia ETF, Market Vectors Russia Small-Cap ETF, Market Vectors Solar Energy ETF and Market Vectors Vietnam ETF invest, Creation Units of these Funds are issued partially or principally for cash. The Cash Component represents the difference between the NAV of a Creation Unit and the market value of Deposit Securities and may include a Dividend Equivalent Payment. The “Dividend Equivalent Payment” enables each Fund to make a complete distribution of dividends on the next dividend payment date, and is an amount equal, on a per Creation Unit basis, to the dividends on all the securities held by the Fund (“Fund Securities”) with ex-dividend dates within the accumulation period for such distribution (the “Accumulation Period”), net of expenses and liabilities for such period, as if all of the Fund Securities had been held by the Trust for the entire Accumulation Period. The Accumulation Period begins on the ex-dividend date for each Fund and ends on the next ex-dividend date.

The Administrator, through the NSCC, makes available on each Business Day, immediately prior to the opening of business on the Exchange (currently 9:30 a.m. Eastern time), the list of the names and the required number of shares of each Deposit Security to be included in the current Fund Deposit (based on information at the end of the previous Business Day) as well as the Cash Component for each Fund. Such Fund Deposit is applicable, subject to any adjustments as described below, in order to effect

creations of Creation Units of each Fund until such time as the next-announced Fund Deposit composition is made available.

The identity and number of shares of the Deposit Securities required for a Fund Deposit for each Fund changes as rebalancing adjustments and corporate action events are reflected from time to time by the Adviser with a view to the investment objective of the applicable Fund. The composition of the Deposit Securities may also change in response to adjustments to the weighting or composition of the securities constituting each Fund's respective Index. In addition, the Trust reserves the right to accept a basket of securities or cash that differs from Deposit Securities or to permit or require the substitution of an amount of cash (*i.e.*, a "cash in lieu" amount) to be added to the Cash Component to replace any Deposit Security which may, among other reasons, not be available in sufficient quantity for delivery, not be permitted to be re-registered in the name of the Trust as a result of an in-kind creation order pursuant to local law or market convention or which may not be eligible for transfer through the Clearing Process (described below), or which may not be eligible for trading by a Participating Party (defined below). In light of the foregoing, in order to seek to replicate the in-kind creation order process, the Trust expects to purchase the Deposit Securities represented by the cash in lieu amount in the secondary market ("Market Purchases"). In such cases where the Trust makes Market Purchases because a Deposit Security may not be permitted to be re-registered in the name of the Trust as a result of an in-kind creation order pursuant to local law or market convention, or for other reasons, the Authorized Participant will reimburse the Trust for, among other things, any difference between the market value at which the securities were purchased by the Trust and the cash in lieu amount (which amount, at the Adviser's discretion, may be capped), applicable registration fees and taxes. Brokerage commissions incurred in connection with the Trust's acquisition of Deposit Securities will be at the expense of each Fund and will affect the value of all Shares of the Fund but the Adviser may adjust the transaction fee to the extent the composition of the Deposit Securities changes or cash in lieu is added to the Cash Component to protect ongoing shareholders. The adjustments described above will reflect changes, known to the Adviser on the date of announcement to be in effect by the time of delivery of the Fund Deposit, in the composition of the relevant Index or resulting from stock splits and other corporate actions.

In addition to the list of names and numbers of securities constituting the current Deposit Securities of a Fund Deposit, the Administrator, through the NSCC, also makes available (i) on each Business Day, the Dividend Equivalent Payment, if any, and the estimated Cash Component effective through and including the previous Business Day, per outstanding Shares of the Fund, and (ii) on a continuous basis throughout the day, the Indicative Per Share Portfolio Value.

#### Procedures for Creation of Creation Units

To be eligible to place orders with the Distributor to create Creation Units of the Funds, an entity or person either must be (1) a "Participating Party," *i.e.*, a broker-dealer or other participant in the Clearing Process through the Continuous Net Settlement System of the NSCC; or (2) a DTC Participant (see "Book Entry Only System"); and, in either case, must have executed an agreement with the Distributor and the Transfer Agent (as it may be amended from time to time in accordance with its terms) ("Participant Agreement") (discussed below). A Participating Party and DTC Participant are collectively referred to as an "Authorized Participant." All Creation Units of the Funds, however created, will be entered on the records of the Depository in the name of Cede & Co. for the account of a DTC Participant.

Edgar Filing: MARKET VECTORS ETF TRUST - Form 497

All orders to create Creation Units must be placed in multiples of 50,000 Shares of each Fund (*i.e.*, a Creation Unit). All orders to create Creation Units, whether through the Clearing Process or outside the Clearing Process, must be received by the Distributor no later than the closing time of the regular trading session on NYSE Arca (“Closing Time”) (ordinarily 4:00 p.m. Eastern time) on the date such order is placed in order for creation of Creation Units to be effected based on the NAV of a Fund as

determined on such date. A “Custom Order” may be placed by an Authorized Participant in the event that the Trust permits or requires the substitution of an amount of cash to be added to the Cash Component to replace any Deposit Security which may not be available in sufficient quantity for delivery or which may not be eligible for trading by such Authorized Participant or the investor for which it is acting, or other relevant reason. The Business Day on which a creation order (or order to redeem as discussed below) is placed is herein referred to as the “Transmittal Date.” Orders must be transmitted by telephone or other transmission method acceptable to the Distributor pursuant to procedures set forth in the Participant Agreement, as described below (see “—Placement of Creation Orders Using Clearing Process”). Severe economic or market disruptions or changes, or telephone or other communication failure, may impede the ability to reach the Distributor, a Participating Party or a DTC Participant.

In connection with all orders to create Creation Units for Market Vectors ChinaAMC A-Share ETF and Market Vectors ChinaAMC SME-ChiNext ETF only, the Authorized Participant will be required to post collateral with the Trust consisting of cash in an amount up to 15% of the net asset value of Market Vectors ChinaAMC A-Share ETF’s and Market Vectors ChinaAMC SME-ChiNext ETF’s shares, respectively, included in the order. The cash collateral will be used to cover creation transaction fees and as collateral for securities which were not available for purchase. The Trust will return any unused portion of the collateral to the Authorized Participant.

Creation Units may be created in advance of the receipt by the Trust of all or a portion of the Fund Deposit. In such cases, the Authorized Participant will remain liable for the full deposit of the missing portion(s) of the Fund Deposit and will be required to post collateral with the Trust consisting of cash at least equal to a percentage of the marked-to-market value of such missing portion(s) that is specified in the Participant Agreement. The Trust may use such collateral to buy the missing portion(s) of the Fund Deposit at any time and will subject such Authorized Participant to liability for any shortfall between the cost to the Trust of purchasing such securities and the value of such collateral. The Trust will have no liability for any such shortfall. The Trust will return any unused portion of the collateral to the Authorized Participant once the entire Fund Deposit has been properly received by the Distributor and deposited into the Trust.

Orders to create Creation Units of the Funds shall be placed with a Participating Party or DTC Participant, as applicable, in the form required by such Participating Party or DTC Participant. Investors should be aware that their particular broker may not have executed a Participant Agreement, and that, therefore, orders to create Creation Units of the Funds may have to be placed by the investor’s broker through a Participating Party or a DTC Participant who has executed a Participant Agreement. At any given time there may be only a limited number of broker-dealers that have executed a Participant Agreement. Those placing orders to create Creation Units of the Funds through the Clearing Process should afford sufficient time to permit proper submission of the order to the Distributor prior to the Closing Time on the Transmittal Date.

Orders for creation that are effected outside the Clearing Process are likely to require transmittal by the DTC Participant earlier on the Transmittal Date than orders effected using the Clearing Process. Those persons placing orders outside the Clearing Process should ascertain the deadlines applicable to DTC and the Federal Reserve Bank wire system by contacting the operations department of the broker or depository institution effectuating such transfer of Deposit Securities and Cash Component.

Orders to create Creation Units of a Fund may be placed through the Clearing Process utilizing procedures applicable to domestic funds for domestic securities (“Domestic Funds”) (see “—Placement of Creation Orders Using Clearing Process”) or outside the Clearing Process utilizing the procedures applicable to either Domestic Funds or foreign funds for foreign securities (“Foreign Funds”) (see “—Placement of Creation Orders Outside Clearing Process—Domestic Funds” and “—Placement of

Creation Orders Outside Clearing Process—Foreign Funds”). In the event that a Fund includes both domestic and foreign securities, the time for submitting orders is as stated in the “Placement of Creation Orders Outside Clearing Process—Foreign Funds” and “Placement of Redemption Orders Outside Clearing Process—Foreign Funds” sections below shall operate.

#### Placement of Creation Orders Using Clearing Process

Fund Deposits created through the Clearing Process, if available, must be delivered through a Participating Party that has executed a Participant Agreement.

The Participant Agreement authorizes the Distributor to transmit to NSCC on behalf of the Participating Party such trade instructions as are necessary to effect the Participating Party’s creation order. Pursuant to such trade instructions from the Distributor to NSCC, the Participating Party agrees to transfer the requisite Deposit Securities (or contracts to purchase such Deposit Securities that are expected to be delivered in a “regular way” manner by the third (3rd) Business Day) and the Cash Component to the Trust, together with such additional information as may be required by the Distributor. An order to create Creation Units of the Funds through the Clearing Process is deemed received by the Distributor on the Transmittal Date if (i) such order is received by the Distributor not later than the Closing Time on such Transmittal Date and (ii) all other procedures set forth in the Participant Agreement are properly followed.

#### Placement of Creation Orders Outside Clearing Process—Domestic Funds

Fund Deposits created outside the Clearing Process must be delivered through a DTC Participant that has executed a Participant Agreement. A DTC Participant who wishes to place an order creating Creation Units of the Funds to be effected outside the Clearing Process need not be a Participating Party, but such orders must state that the DTC Participant is not using the Clearing Process and that the creation of Creation Units will instead be effected through a transfer of securities and cash. The Fund Deposit transfer must be ordered by the DTC Participant in a timely fashion so as to ensure the delivery of the requisite number of Deposit Securities through DTC to the account of the Trust by no later than 11:00 a.m. Eastern time, of the next Business Day immediately following the Transmittal Date. All questions as to the number of Deposit Securities to be delivered, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities, will be determined by the Trust, whose determination shall be final and binding. The cash equal to the Cash Component must be transferred directly to the Distributor through the Federal Reserve wire system in a timely manner so as to be received by the Distributor no later than 2:00 p.m. Eastern time, on the next Business Day immediately following the Transmittal Date. An order to create Creation Units of a Fund outside the Clearing Process is deemed received by the Distributor on the Transmittal Date if (i) such order is received by the Distributor not later than the Closing Time on such Transmittal Date; and (ii) all other procedures set forth in the Participant Agreement are properly followed. However, if the Distributor does not receive both the requisite Deposit Securities and the Cash Component in a timely fashion on the next Business Day immediately following the Transmittal Date, such order will be cancelled. Upon written notice to the Distributor, such cancelled order may be resubmitted the following Business Day using the Fund Deposit as newly constituted to reflect the current NAV of the applicable Fund. The delivery of Creation Units so created will occur no later than the third (3rd) Business Day following the day on which the creation order is deemed received by the Distributor.

Additional transaction fees may be imposed with respect to transactions effected outside the Clearing Process (through a DTC participant) and in circumstances in which any cash can be used in lieu of Deposit Securities to create Creation Units. (See “Creation Transaction Fee” section below.)

Placement of Creation Orders Outside Clearing Process—Foreign Funds

The Distributor will inform the Transfer Agent, the Adviser and the Custodian upon receipt of a Creation Order. The Custodian will then provide such information to the appropriate subcustodian. The Custodian will cause the subcustodian of such Fund to maintain an account into which the Deposit Securities (or the cash value of all or part of such securities, in the case of a permitted or required cash purchase or “cash in lieu” amount) will be delivered. Deposit Securities must be delivered to an account maintained at the applicable local custodian. The Trust must also receive, on or before the contractual settlement date, immediately available or same day funds estimated by the Custodian to be sufficient to pay the Cash Component next determined after receipt in proper form of the purchase order, together with the creation transaction fee described below.

Once the Transfer Agent has accepted a creation order, the Transfer Agent will confirm the issuance of a Creation Unit of a Fund against receipt of payment, at such NAV as will have been calculated after receipt in proper form of such order. The Transfer Agent will then transmit a confirmation of acceptance of such order.

Creation Units will not be issued until the transfer of good title to the Trust of the Deposit Securities and the payment of the Cash Component have been completed. When the subcustodian has confirmed to the Custodian that the required Deposit Securities (or the cash value thereof) have been delivered to the account of the relevant subcustodian, the Distributor and the Adviser will be notified of such delivery and the Transfer Agent will issue and cause the delivery of the Creation Units.

Acceptance of Creation Orders

The Trust reserves the absolute right to reject a creation order transmitted to it by the Distributor if, for any reason, (a) the order is not in proper form; (b) the creator or creators, upon obtaining the Shares, would own 80% or more of the currently outstanding Shares of a Fund; (c) the Deposit Securities delivered are not as specified by the Administrator, as described above; (d) the acceptance of the Deposit Securities would have certain adverse tax consequences to a Fund; (e) the acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful; (f) the acceptance of the Fund Deposit would otherwise, in the discretion of the Trust or the Adviser, have an adverse effect on the Trust or the rights of beneficial owners; or (g) in the event that circumstances outside the control of the Trust, the Distributor and the Adviser make it for all practical purposes impossible to process creation orders. Examples of such circumstances include, without limitation, acts of God or public service or utility problems such as earthquakes, fires, floods, extreme weather conditions and power outages resulting in telephone, telecopy and computer failures; wars; civil or military disturbances, including acts of civil or military authority or governmental actions; terrorism; sabotage; epidemics; riots; labor disputes; market conditions or activities causing trading halts; systems failures involving computer or other information systems affecting the Trust, the Adviser, the Distributor, DTC, the NSCC or any other participant in the creation process, and similar extraordinary events. The Transfer Agent will notify a prospective creator of its rejection of the order of such person. The Trust, the Custodian, any subcustodian, the Distributor and the Transfer Agent are under no duty, however, to give notification of any defects or irregularities in the delivery of Fund Deposits to Authorized Participants nor shall either of them incur any liability to Authorized Participants for the failure to give any such notification.

All questions as to the number of shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Trust, and the Trust's determination shall be final and binding.

52

## Creation Transaction Fee

A fixed creation transaction fee of \$1,000 (\$500 with respect to Market Vectors Gold Miners ETF, Market Vectors Oil Services ETF and Market Vectors Solar Energy ETF, \$4,200 with respect to Market Vectors ChinaAMC A-Share ETF and \$2,200 with respect to Market Vectors ChinaAMC SME-ChiNext ETF) payable to the Custodian is imposed on each creation transaction regardless of the number of Creation Units purchased in the transaction. In addition, a variable charge for cash creations or for creations outside the Clearing Process currently of up to four times the basic creation transaction fee may be imposed. In the case of cash creations or where the Trust permits or requires a creator to substitute cash in lieu of depositing a portion of the Deposit Securities, the creator may be assessed an additional variable charge to compensate the Funds for the costs associated with purchasing the applicable securities. (See “Fund Deposit” section above.) As a result, in order to seek to replicate the in-kind creation order process, the Trust expects to purchase, in the secondary market or otherwise gain exposure to, the portfolio securities that could have been delivered as a result of an in-kind creation order pursuant to local law or market convention, or for other reasons (“Market Purchases”). In such cases where the Trust makes Market Purchases, the Authorized Participant will reimburse the Trust for, among other things, any difference between the market value at which the securities and/or financial instruments were purchased by the Trust and the cash in lieu amount (which amount, at the Adviser’s discretion, may be capped), the costs associated with Market Vectors ChinaAMC A-Share ETF’s and Market Vectors ChinaAMC SME-ChiNext ETF’s swap transactions, applicable registration fees, brokerage commissions and certain taxes. The Adviser may adjust the transaction fee to the extent the composition of the creation securities changes or cash in lieu is added to the Cash Component to protect ongoing shareholders. Creators of Creation Units are responsible for the costs of transferring the securities constituting the Deposit Securities to the account of the Trust.

## Redemption of Creation Units

Shares may be redeemed only in Creation Units at their NAV next determined after receipt of a redemption request in proper form by the Distributor, only on a Business Day and only through a Participating Party or DTC Participant who has executed a Participant Agreement. **The Trust will not redeem Shares in amounts less than Creation Units.** Beneficial Owners also may sell Shares in the secondary market, but must accumulate enough Shares to constitute a Creation Unit in order to have such Shares redeemed by the Trust. There can be no assurance, however, that there will be sufficient liquidity in the public trading market at any time to permit assembly of a Creation Unit. Investors should expect to incur brokerage and other costs in connection with assembling a sufficient number of Shares to constitute a redeemable Creation Unit. See, with respect to each Fund, the section entitled “Summary Information—Principal Risks of Investing in the Funds” and “Additional Information About the Funds’ Investment Strategies and Risks—Risks of Investing in the Funds” in the Prospectus.

The Administrator, through NSCC, makes available immediately prior to the opening of business on the Exchange (currently 9:30 a.m. Eastern time) on each day that the Exchange is open for business, the Fund Securities that will be applicable (subject to possible amendment or correction) to redemption requests received in proper form (as defined below) on that day. If the Trust determines, based on information available to the Trust when a redemption request is submitted by an Authorized Participant, that (i) the short interest of a Fund in the marketplace is greater than or equal to 100% and (ii) the orders in the aggregate from all Authorized Participants redeeming Fund Shares on a Business Day represent 25% or more of the outstanding Shares of a Fund, such Authorized Participant will be required to verify to the Trust the accuracy of its representations that are deemed to have been made by submitting a request for

redemption. If, after receiving notice of the verification requirement, the Authorized Participant does not verify the accuracy of its representations that are deemed to have been made by submitting a request for redemption in accordance with this requirement, its redemption request will be considered not to have

been received in proper form. Unless cash redemptions are permitted or required for a Fund, the redemption proceeds for a Creation Unit generally consist of Fund Securities as announced by the Administrator on the Business Day of the request for redemption, plus cash in an amount equal to the difference between the NAV of the Shares being redeemed, as next determined after a receipt of a request in proper form, and the value of the Fund Securities, less the redemption transaction fee and variable fees described below. Should the Fund Securities have a value greater than the NAV of the Shares being redeemed, a compensating cash payment to the Trust equal to the differential plus the applicable redemption transaction fee will be required to be arranged for by or on behalf of the redeeming shareholder. Each Fund reserves the right to honor a redemption request by delivering a basket of securities or cash that differs from the Fund Securities.

#### Redemption Transaction Fee

The basic redemption transaction fee of \$1,000 (\$500 with respect to Market Vectors Gold Miners ETF, Market Vectors Oil Services ETF and Market Vectors Solar Energy ETF, \$4,200 with respect to Market Vectors ChinaAMC A-Share ETF and \$2,200 with respect to Market Vectors ChinaAMC SME-ChiNext ETF) is the same no matter how many Creation Units are being redeemed pursuant to any one redemption request. An additional charge up to four times the redemption transaction fee will be charged with respect to cash redemptions or redemptions outside of the Clearing Process. An additional variable charge for cash redemptions or partial cash redemptions (when cash redemptions are permitted or required for a Fund) may also be imposed to compensate each applicable Fund for the costs associated with selling the applicable securities. As a result, in order to seek to replicate the in-kind redemption order process, the Trust expects to sell, in the secondary market, the portfolio securities or settle any financial instruments that may not be permitted to be re-registered in the name of the Participating Party as a result of an in-kind redemption order pursuant to local law or market convention, or for other reasons (“Market Sales”). In such cases where the Trust makes Market Sales, the Authorized Participant will reimburse the Trust for, among other things, any difference between the market value at which the securities and/or financial instruments were sold or settled by the Trust and the cash in lieu amount (which amount, at the Adviser’s discretion, may be capped), the costs associated with Market Vectors ChinaAMC A-Share ETF’s and Market Vectors ChinaAMC SME-ChiNext ETF’s swap transactions, applicable registration fees, brokerage commissions and certain taxes (“Transaction Costs”). The Adviser may adjust the transaction fee to the extent the composition of the redemption securities changes or cash in lieu is added to the Cash Component to protect ongoing shareholders. In no event will fees charged by a Fund in connection with a redemption exceed 2% of the value of each Creation Unit. Investors who use the services of a broker or other such intermediary may be charged a fee for such services. To the extent a Fund cannot recoup the amount of Transaction Costs incurred in connection with a redemption from the redeeming shareholder because of the 2% cap or otherwise, those Transaction Costs will be borne by the Fund’s remaining shareholders and negatively affect the Fund’s performance.

#### Placement of Redemption Orders Using Clearing Process

Orders to redeem Creation Units of a Fund through the Clearing Process, if available, must be delivered through a Participating Party that has executed the Participant Agreement. An order to redeem Creation Units of a Fund using the Clearing Process is deemed received on the Transmittal Date if (i) such order is received by the Distributor not later than 4:00 p.m. Eastern time on such Transmittal Date; and (ii) all other procedures set forth in the Participant Agreement are properly followed; such order will be effected based on the NAV of the applicable Fund as next

determined. An order to redeem Creation Units of a Fund using the Clearing Process made in proper form but received by the Fund after 4:00 p.m. Eastern time, will be deemed received on the next Business Day immediately following the Transmittal Date. The requisite Fund Securities (or contracts to purchase such Fund Securities which are expected to be delivered in a “regular way” manner) and the applicable cash payment will be transferred

by the third (3rd) Business Day following the date on which such request for redemption is deemed received.

#### Placement of Redemption Orders Outside Clearing Process—Domestic Funds

Orders to redeem Creation Units of a Fund outside the Clearing Process must be delivered through a DTC Participant that has executed the Participant Agreement. A DTC Participant who wishes to place an order for redemption of Creation Units of a Fund to be effected outside the Clearing Process need not be a Participating Party, but such orders must state that the DTC Participant is not using the Clearing Process and that redemption of Creation Units of the Fund will instead be effected through transfer of Creation Units of the Fund directly through DTC. An order to redeem Creation Units of a Fund outside the Clearing Process is deemed received by the Administrator on the Transmittal Date if (i) such order is received by the Administrator not later than 4:00 p.m. Eastern time on such Transmittal Date; (ii) such order is preceded or accompanied by the requisite number of Shares of Creation Units specified in such order, which delivery must be made through DTC to the Administrator no later than 11:00 a.m. Eastern time, on such Transmittal Date (the “DTC Cut-Off-Time”); and (iii) all other procedures set forth in the Participant Agreement are properly followed.

After the Administrator has deemed an order for redemption outside the Clearing Process received, the Administrator will initiate procedures to transfer the requisite Fund Securities (or contracts to purchase such Fund Securities) which are expected to be delivered within three Business Days and the cash redemption payment to the redeeming Beneficial Owner by the third Business Day following the Transmittal Date on which such redemption order is deemed received by the Administrator. An additional variable redemption transaction fee of up to four times the basic transaction fee is applicable to redemptions outside the Clearing Process.

#### Placement of Redemption Orders Outside Clearing Process—Foreign Funds

Arrangements satisfactory to the Trust must be in place for the Participating Party to transfer the Creation Units through DTC on or before the settlement date. Redemptions of Shares for Fund Securities will be subject to compliance with applicable U.S. federal and state securities laws and a Fund (whether or not it otherwise permits or requires cash redemptions) reserves the right to redeem Creation Units for cash to the extent that the Fund could not lawfully deliver specific Fund Securities upon redemptions or could not do so without first registering the Deposit Securities under such laws.

In connection with taking delivery of Shares for Fund Securities upon redemption of Creation Units, a redeeming shareholder or entity acting on behalf of a redeeming shareholder must maintain appropriate custody arrangements with a qualified broker-dealer, bank or other custody providers in each jurisdiction in which any of the Fund Securities are customarily traded, to which account such Fund Securities will be delivered. If neither the redeeming shareholder nor the entity acting on behalf of a redeeming shareholder has appropriate arrangements to take delivery of the Fund Securities in the applicable foreign jurisdiction and it is not possible to make other such arrangements, or if it is not possible to effect deliveries of the Fund Securities in such jurisdictions, the Trust may, in its discretion, exercise its

option to redeem such Shares in cash, and the redeeming shareholder will be required to receive its redemption proceeds in cash.

Deliveries of redemption proceeds generally will be made within three business days. Due to the schedule of holidays in certain countries or for other reasons, however, the delivery of redemption proceeds may take longer than three business days after the day on which the redemption request is received in proper form. In such cases, the local market settlement procedures will not commence until the end of the local holiday periods.

## Edgar Filing: MARKET VECTORS ETF TRUST - Form 497

The Market Vectors India Small-Cap Index ETF generally intends to effect creation transactions of Creation Units on the Business Day after the trade date (“T+1”) and settle redemption transactions of cash on the fourth Business Day following the trade date (“T+4”). The Fund may effect deliveries of Creation Units and redemption cash on a basis other than T+1 or T+4, as the case may be, in order to accommodate local holiday schedules, to account for different treatment among foreign and U.S. markets of dividend record dates and ex-dividend dates or under certain other circumstances. If in-kind creations are permitted or required by the Fund, the ability of the Trust to effect in-kind creations and redemptions within T+1 and T+4, respectively, of receipt of an order in good form is subject to, among other things, the condition that, within the time period from the date of the order to the date of delivery of the securities, there are no days that are holidays in the applicable foreign market.

For every occurrence of one or more intervening holidays in the applicable non-U.S. market that are not holidays observed in the U.S. equity market, the redemption settlement cycle may be extended by the number of such intervening holidays. In addition to holidays, other unforeseeable closings in a non-U.S. market due to emergencies may also prevent the Foreign Funds from delivering securities within the normal settlement period.

The securities delivery cycles currently practicable for transferring portfolio securities to redeeming investors, coupled with non-U.S. market holiday schedules, will require a delivery process longer than seven calendar days, in certain circumstances. The holidays applicable to the Foreign Funds during such periods are listed below, as are instances where more than seven days will be needed to deliver redemption proceeds. Although certain holidays may occur on different dates in subsequent years, the number of days required to deliver redemption proceeds in any given year is not expected to exceed the maximum number of days listed below for the Foreign Fund. The proclamation of new holidays, the treatment by market participants of certain days as “informal holidays” (e.g., days on which no or limited securities transactions occur, as a result of substantially shortened trading hours), the elimination of existing holidays, or changes in local securities delivery practices, could affect the information set forth herein at some time in the future.

In calendar years 2015 and 2016, the dates of regular holidays affecting the relevant securities markets in which the Foreign Funds invest are as follows (please note these holiday schedules are subject to potential changes in the relevant securities markets):
