**ENCLOSURES:**

Dassault Systemes S.A. is furnishing under cover of Form 6-K a press release dated November 17, 2004, announcing that  
Microsoft and Dassault Systemes have formed a strategic alliance. Customers will benefit from DS 3D collaborative solutions and  
PLM taking advantage of the Microsoft Platform.

---

ENCLOSURES:

## Microsoft and Dassault Systèmes Form Strategic Alliance

### ***Customers to benefit from DS 3D collaborative solutions and PLM taking advantage of the Microsoft platform***

**REDMOND, Wash., U.S., and PARIS, France Nov. 17, 2004** Microsoft Corp. and Dassault Systèmes (DS) (Nasdaq DASTY, Euronext Paris: #13065, DSY.PA) today announced a multiyear, global strategic alliance to deliver Dassault Systèmes product lifecycle management (V5 PLM) and 3D design solutions to companies of all sizes taking advantage of the Microsoft® software platform.

Dassault Systèmes software enables companies to simulate products virtually in 3D from conception to maintenance across the extended enterprise, reducing the time and cost to develop products and increasing innovation. By capitalizing on the Microsoft platform, the companies intend to deliver greater customer value through solutions that are easy to use, deploy and maintain with reduced ownership and integration costs. This alliance enables a far broader set of customers to realize the benefits of 3D collaboration and PLM.

The alliance brings together Dassault Systèmes strength in 3D software with Microsoft's platform, which includes Web services development via Microsoft .NET, real-time collaboration, and both the Windows® client and Windows Server operating systems. Dassault Systèmes V5 PLM and 3D collaborative solutions, which currently run on both the Windows client and Windows Server platforms, will leverage the Microsoft platform across a broad range of current and future Microsoft products.

Microsoft and Dassault Systèmes share a common vision of democratizing 3D and making PLM more pervasive, said Bernard Charlès, president and CEO of Dassault Systèmes. This alliance focuses on innovation to deliver an easy-to-use 3D global collaborative environment to create, simulate, manufacture and service any physical goods.

Dassault Systèmes industry-leading PLM solutions include CATIA, DELMIA, ENOVIA, and SMARTEAM; its 3D design solutions include the SolidWorks product line. The alliance will result in the integration of these solutions with Microsoft .NET, SQL Server, BizTalk® Server, SharePoint® Portal Server, Windows Longhorn and Windows XP 64-bit Edition.

We are delighted to bring together the full power and reach of the Microsoft platform with Dassault Systèmes collaborative solutions, said Bill Gates, chairman and chief software architect at Microsoft. The winning combination of Microsoft .NET and Dassault Systèmes promises to make product lifecycle management accessible and affordable to a whole new set of customers in the manufacturing value chain.

Microsoft and Dassault Systèmes have also agreed to explore opportunities to work together to encourage broad market adoption of XML for 3D applications across the design and graphics industry. The two companies will work with industry associations, other PLM software vendors, and 3D graphics technology companies to advance interoperability using common XML-based technologies.

---

The companies will also explore opportunities to work toward delivering fully integrated products in the field of automation. Through its DELMIA Automation product line, Dassault Systèmes enables companies to digitally define, control, and monitor the automated systems that control the factory floor.

*A rebroadcast of the press conference to be held in Paris today will be available for viewing on Dassault Systèmes web site as of Thursday, Nov. 18, at 1pm Paris time (Central European Time).*

###

#### **About Dassault Systèmes**

As world leader in PLM (Product Lifecycle Management) solutions, the Dassault Systèmes group brings value to more than 70,000 customers in 80 countries. A pioneer in the 3D software market since 1981, Dassault Systèmes develops and markets PLM application software and services that
