Enhanced Buffered Jump Securities Based on the Value of the Russell 2000® Index due April 30, 2024

Fully and Unconditionally Guaranteed by Morgan Stanley

Principal at Risk Securities

The Enhanced Buffered Jump Securities, which we refer to as the securities, are unsecured obligations of Morgan Stanley Finance LLC ("MSFL") and are fully and unconditionally guaranteed by Morgan Stanley. The securities will pay no interest but will instead pay an amount in cash at maturity that may be greater than or less than the stated principal amount depending on the closing value of the underlying index **on the valuation date**. If the closing value of the underlying index on the valuation date is **at or above** 85% of the initial index value, which we refer to as the downside threshold value, you will receive, in addition to the principal amount, a minimum of the upside payment of at least $205.00 per security (to be determined on the pricing date). If the underlying index appreciates by more than at least 20.50% (to be determined on the pricing date) over the term of the securities, you will receive for each security you hold at maturity the stated principal amount plus an amount based on the percentage increase of the underlying index, subject to the maximum payment at maturity. However, if the closing value of the underlying index on the valuation date is **below** 85% of the initial index value, you will be exposed to the decline in the level of the underlying index beyond the buffer amount of 15%, and you will lose some or a significant portion of your initial investment. These long-dated securities are for investors who seek an equity index-based return and who are willing to risk their principal and forgo current income and returns above the maximum payment at maturity in exchange for the potential to receive the minimum upside return if the final index value is at or above the downside threshold value. **The payment at maturity may be significantly less than the stated principal amount, and you could lose up to 85% of your investment.** The securities are notes issued as part of MSFL's Series A Global Medium-Term Notes program.

All payments are subject to our credit risk. If we default on our obligations, you could lose some or all of your investment. These securities are not secured obligations and you will not have any security interest in, or otherwise have any access to, any underlying reference asset or assets.

SUMMARY TERMS

Issuer:	Morgan Stanley Finance LLC
Guarantor:	Morgan Stanley

Aggregate principal amount:	$
Stated principal amount:	$1,000 per security
Issue price:	$1,000 per security (see "Commissions and issue price" below)
Pricing date:	April 25, 2019
Original issue date:	April 30, 2019 (3 business days after the pricing date)
Maturity date:	April 30, 2024
Underlying index:	Russell 2000® Index
Payment at maturity:	If the final index value is **at or above** the downside threshold value: $1,000 + the *greater* of (i) $1,000 × the index percent change and (ii) the upside payment In no event will the payment at maturity exceed the maximum payment at maturity. If the final index value is **below** the downside threshold value: $1,000 × (index performance factor + buffer amount) *In this scenario, the payment at maturity will be less than the stated principal amount, subject to the minimum payment at maturity of $150 per security.*
Upside payment:	At least $205.00 per security (20.50% of the stated principal amount). The actual upside payment will be set on the pricing date.
Index percent change:	(final index value – initial index value) / initial index value
Index performance factor:	final index value / initial index value
Initial index value:	, which is the index closing value on the pricing date
Final index value:	The index closing value on the valuation date
Buffer amount:	15%
Downside threshold value:	, which is 85% of the initial index value
Maximum payment at maturity:	$1,500 per security (150% of the stated principal amount)
Minimum payment at maturity:	$150 per security
Valuation date:	April 25, 2024, subject to postponement for non-index business days and certain market disruption events
CUSIP / ISIN:	61768D4J1 / US61768D4J16
Listing:	The securities will not be listed on any securities exchange.
Agent:	Morgan Stanley & Co. LLC ("MS & Co."), an affiliate of MSFL and a wholly owned subsidiary of Morgan Stanley. See "Supplemental information regarding plan of distribution; conflicts of interest."
Estimated value on the pricing date:	Approximately $942.60 per security, or within $30.00 of that estimate. See "Investment Summary" beginning on page 2.

Commissions and issue price:	**Price to public**[(1)]	**Agent's commissions**[(2)]	**Proceeds to us**[(3)]
Per security	$1,000	$	$
Total	$	$	$

(1)

The price to public for investors purchasing the securities in the fee-based advisory accounts will be $975.00 per security.

(2) *Selected dealers and their financial advisors will collectively receive from the agent, MS & Co., a fixed sales commission of $ for each security they sell; provided that dealers selling to investors purchasing the securities in fee-based advisory accounts will receive a sales commission of $ per security. See "Supplemental information regarding plan of distribution; conflicts of interest." For additional information, see "Plan of Distribution (Conflicts of Interest)" in the accompanying product supplement.*

(3) *See "Use of proceeds and hedging" on page 18.*

The securities involve risks not associated with an investment in ordinary debt securities. See "Risk Factors" beginning on page 10.

The Securities and Exchange Commission and state securities regulators have not approved or disapproved these securities, or determined if this document or the accompanying product supplement, index supplement and prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The securities are not deposits or savings accounts and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency or instrumentality, nor are they obligations of, or guaranteed by, a bank.

You should read this document together with the related product supplement, index supplement and prospectus, each of which can be accessed via the hyperlinks below. Please also see "Additional Terms of the Securities" and "Additional Information About the Securities" at the end of this document.

References to "we," "us" and "our" refer to Morgan Stanley or MSFL, or Morgan Stanley and MSFL collectively, as the context requires.

Enhanced Buffered Jump Securities Based on the Value of the Russell 2000® Index due April 30, 2024

Principal at Risk Securities

Investment Summary

Enhanced Buffered Jump Securities

Principal at Risk Securities

Enhanced Buffered Jump Securities Based on the Value of the Russell 2000® Index due April 30, 2024 (the "securities") can be used:

- As an alternative to direct exposure to the underlying index that provides a minimum positive return of at least 20.50% (to be determined on the pricing date) if the underlying index has appreciated or has not depreciated by more than 15% over the term of the securities and offers 1-to-1 participation in the index appreciation of greater than 20.50%, subject to the maximum payment at maturity;
- To enhance returns and potentially outperform the underlying index in a moderately bullish scenario;
- To obtain a buffer against a specified level of negative performance of the underlying index.

The securities are exposed to the performance of the Russell 2000® Index, but provide a minimum upside payment payable at maturity if the index closing value on the valuation date is at or above the downside threshold value. However, if the final index value is less than the downside threshold value, the securities are exposed on a 1:1 basis to the percentage decline in the index value beyond the buffer amount of 15%. Accordingly, 85% of your principal is at risk.

Maturity:	5 years
Upside payment:	At least $205.00 per security (20.50% of the stated principal amount). The actual upside payment will be set on the pricing date.
Downside threshold value:	85% of the initial index value
Buffer amount:	15%

Maximum payment at maturity:	$1,500 per security (150% of the stated principal amount)
Minimum payment at maturity:	$150 per security. You could lose up to 85% of the stated principal amount of the securities.
Interest:	None

The original issue price of each security is $1,000. This price includes costs associated with issuing, selling, structuring and hedging the securities, which are borne by you, and, consequently, the estimated value of the securities on the pricing date will be less than $1,000. We estimate that the value of each security on the pricing date will be approximately $942.60, or within $30.00 of that estimate. Our estimate of the value of the securities as determined on the pricing date will be set forth in the final pricing supplement.

What goes into the estimated value on the pricing date?

In valuing the securities on the pricing date, we take into account that the securities comprise both a debt component and a performance-based component linked to the underlying index. The estimated value of the securities is determined using our own pricing and valuation models, market inputs and assumptions relating to the underlying index, instruments based on the underlying index, volatility and other factors including current and expected interest rates, as well as an interest rate related to our secondary market credit spread, which is the implied interest rate at which our conventional fixed rate debt trades in the secondary market.

What determines the economic terms of the securities?

In determining the economic terms of the securities, including the upside payment, the maximum payment at maturity, the downside threshold value, the buffer amount and the minimum payment at maturity, we use an internal funding rate, which is likely to be lower than our secondary market credit spreads and therefore advantageous to us. If the issuing, selling, structuring and hedging costs borne by you were lower or if the internal funding rate were higher, one or more of the economic terms of the securities would be more favorable to you.

What is the relationship between the estimated value on the pricing date and the secondary market price of the securities?

The price at which MS & Co. purchases the securities in the secondary market, absent changes in market conditions, including those related to the underlying index, may vary from, and be lower than, the estimated value on the pricing date, because the secondary market price takes into account our secondary market credit spread as well as the bid-offer spread that MS & Co. would charge in a secondary market transaction of this type and other factors. However, because the costs associated with issuing, selling, structuring and hedging the securities are not fully deducted upon issuance, for a period of up to 6 months following the issue date, to the extent that MS & Co. may buy or sell the securities in the secondary market, absent changes in market conditions, including those related to the underlying index, and to our secondary market credit spreads, it would do so based on values higher than the estimated value. We expect that those higher values will also be reflected in your brokerage account statements.

MS & Co. may, but is not obligated to, make a market in the securities, and, if it once chooses to make a market, may cease doing so at any time.

Morgan Stanley Finance LLC

Enhanced Buffered Jump Securities Based on the Value of the Russell 2000® Index due April 30, 2024

Principal at Risk Securities

Key Investment Rationale

This 5-year investment offers a minimum positive return of at least 20.50% if the final index value is *greater than or equal to* 85% of the initial index value, which we refer to as the downside threshold value, and 1-to-1 participation in the index appreciation of greater than 20.50%, subject to the maximum payment at maturity. The actual upside payment will be set on the pricing date. However, if the final index value is *less than* the downside threshold value, the payment at maturity will be less, and possibly significantly less, than the stated principal amount of the securities. You could lose up to 85% of the stated principal amount of the securities.

Upside Scenario	The final index value is *at or above* the downside threshold value, and, at maturity, the securities pay the stated principal amount of $1,000 *plus* the *greater* of (i) $1,000 *times* the index percent change and (ii) the upside payment of at least $205.00 per security. In no event will the payment at maturity exceed the maximum payment at maturity of $1,500 per security. The actual upside payment will be set on the pricing date.
Downside Scenario	The final index value is *below* the downside threshold value, and, at maturity, the securities pay less than the stated principal amount by an amount proportionate to the decline in the final index value from the initial index value beyond the buffer amount of 15%, subject to the minimum payment at maturity of $150 per security (e.g., a 50% decline in the index will result in a payment at maturity of $650 per security).

Principal at Risk Securities

Hypothetical Payment on the Securities at Maturity

Payoff Diagram

The payoff diagram below illustrates the payment at maturity on the securities based on the following terms:

Stated principal amount:	$1,000
Downside threshold value:	85% of the initial index value
Buffer amount:	15%
Hypothetical upside payment:	$205.00 per security (20.50% of the stated principal amount). The actual upside payment will be set on the pricing date.
Maximum payment at maturity:	$1,500

Payoff Diagram for the Securities

How it works

§ **Upside Scenario.** If the final index value is greater than or equal to the downside threshold value, the investor would receive $1,000 *plus* the greater of (i) $1,000 *times* the index percent change and (ii) the hypothetical upside payment of $205.00 per security. In no event will the payment at maturity exceed the maximum payment at maturity. Under the hypothetical terms of the securities, an investor would receive a payment at maturity of $1,205 per security if the final index value has remained unchanged or has increased by no more than 20.50% from the initial index value, and would receive $1,000 plus an amount that represents a 1-to-1 participation in the appreciation of the underlying index, subject to the maximum payment at maturity, if the final index value has increased from the initial index by more than 20.50%.

§ **Downside Scenario.** If the final index value is below the downside threshold value, the payment at maturity would be less than the stated principal amount of $1,000 by an amount that is proportionate to the decline in the final index value

Morgan Stanley Finance LLC

Enhanced Buffered Jump Securities Based on the Value of the Russell 2000® Index due April 30, 2024

Principal at Risk Securities

from the initial index value beyond the buffer amount of 15%. In this scenario, the investor would lose some or a significant portion of the amount invested in the securities. For example, if the final index value declines by 40% from the initial index value, the payment at maturity would be $750 per security (75% of the stated principal amount).

Hypothetical Examples

The following table and examples illustrate the return on the securities and the payment at maturity for a range of hypothetical percentage changes in the final index value from the initial index value, depending on whether or not the final index value is below the downside threshold value. They are based on the following values:

Stated principal amount:	$1,000
Hypothetical initial index value:	1,600
Hypothetical downside threshold value:	1,360 (85% of the hypothetical initial index value)
Buffer amount:	15%
Hypothetical upside payment:	$205.00 per security
Maximum payment at maturity:	$1,500

Final index value	**Underlying index return**	**Return on securities**	**Payment at maturity (per $1,000 security)**
3,200	100%	50.00%	$1,500
3,040	90%	50.00%	$1,500
2,880	80%	50.00%	$1,500
2,720	70%	50.00%	$1,500
2,560	60%	50.00%	$1,500
2,400	50%	50.00%	$1,500
2,320	45%	45.00%	$1,450
2,240	40%	40.00%	$1,400
2,080	30%	30.00%	$1,300
1,928	20.50%	20.50%	$1,205
1,920	20%	20.50%	$1,205
1,840	15%	20.50%	$1,205
1,760	10%	20.50%	$1,205
1,680	5%	20.50%	$1,205
1,600	0%	20.50%	$1,205
1,520	-5%	20.50%	$1,205
1,440	-10%	20.50%	$1,205
1,360	-15%	20.50%	$1,205
1,344	-16%	-1.00%	$990
1,280	-20%	-5.00%	$950
1,120	-30%	-15.00%	$850
960	-40%	-25.00%	$750

800	-50%	-35.00%	$650
640	-60%	-45.00%	$550
480	-70%	-55.00%	$450
320	-80%	-65.00%	$350
160	-90%	-75.00%	$250
0	-100%	-85.00%	$150

Morgan Stanley Finance LLC

Enhanced Buffered Jump Securities Based on the Value of the Russell 2000® Index due April 30, 2024

Principal at Risk Securities

EXAMPLE 1: The final index value is above the downside threshold value and has increased from the initial index value by 60%. Your return will be equal to the maximum payment at maturity, and you do not participate in the full appreciation of the underlying index.

Hypothetical final index value	=	2,560
Payment at maturity	=	Maximum payment at maturity
	=	$1,500.00

Payment at maturity = $1,500.00 per security

EXAMPLE 2: The final index value is above the downside threshold value and has increased from the initial index value by 40%. You participate in the appreciation of the underlying index.

Hypothetical final index value	=	2,240
Index performance factor	=	final index value / initial index value
	=	2,240 / 1,600
	=	140%
Payment at maturity	=	$1,000 × (index performance factor)
	=	$1,000 x (140%) =
	=	$1,400.00

Payment at maturity = $1,400.00 per security

EXAMPLE 3: The final index value is above the downside threshold value and has increased from the initial index value by 20%. Your return will be equal to the upside payment.

Hypothetical final index value	=	1,920
Payment at maturity	=	stated principal amount + upside payment
	=	

$1,000.00 + $205.00

Payment at maturity = $1,205.00 per security

EXAMPLE 4: The final index value has declined from the initial index value by 5% but is greater than the downside threshold value. You receive the stated principal amount plus the upside payment.

Hypothetical final index value	=	1,520
Payment at maturity	=	stated principal amount + upside payment
	=	$1,000 + $205.00
	=	$1,205.00

Payment at maturity = $1,205.00 per security

EXAMPLE 5: The final index value has declined from the initial index value by 50% and is below the downside threshold value. You are exposed to the decline in the final index value from the initial index value beyond the buffer amount of 15%.

Hypothetical final index value	=	800
Index performance factor	=	final index value / initial index value
		800 / 1,600
	=	50%
Payment at maturity	=	$1,000 × (index performance factor + 15%)

Morgan Stanley Finance LLC

Enhanced Buffered Jump Securities Based on the Value of the Russell 2000® Index due April 30, 2024

Principal at Risk Securities

$1,000 x (50% +15%)
=
= $1,000 x (65%)
=$650
Payment at maturity = $650.00 per security

If the final index value is less than the downside threshold value, you will lose some or a significant portion of your investment in an amount proportionate to the decline in the final index value from the initial index value beyond the buffer amount of 15%. You could lose up to 85% of your investment.

Morgan Stanley Finance LLC

Enhanced Buffered Jump Securities Based on the Value of the Russell 2000® Index due April 30, 2024

Principal at Risk Securities

Risk Factors

The following is a non-exhaustive list of certain key risk factors for investors in the securities. For further discussion of these and other risks, you should read the section entitled "Risk Factors" in the accompanying product supplement for Jump Securities, index supplement and prospectus. You should also consult with your investment, legal, tax, accounting and other advisers in connection with your investment in the securities.

§ **The securities do not pay interest and provide for the minimum payment at maturity of only 15% of your principal.** The terms of the securities differ from those of ordinary debt securities in that the securities do not pay interest and provide for the minimum return of only 15% of the principal amount at maturity. If the final index value is *less than* the downside threshold value, the payout at maturity will be an amount in cash that is less than the $1,000 stated principal amount of each security, reflecting the negative performance of the underlying index over the term of the securities beyond the buffer amount of 15%. **You could lose up to 85% of the stated principal amount of the securities.**

§ **The appreciation potential of the securities is limited by the maximum payment at maturity.** The appreciation potential of the securities is limited by the maximum payment at maturity of $1,500 per security, or 150% of the stated principal amount. Because the payment at maturity will be limited to 150% of the stated principal amount for the securities, any increase in the level of the index beyond 150% of the initial index value will not further increase the return on the securities.

§ **You will not benefit from the upside payment if the final index value is below the downside threshold value.** If the final index value is less than the downside threshold value, the payment at maturity will depend solely on the closing value of the underlying index on the valuation date, and, accordingly, you will lose the benefit of the limited protection against the loss of principal based on the upside payment. Instead, under these circumstances, you will be exposed on a 1-to-1 basis to the decline in the closing value of the underlying index beyond the buffer amount of 15%, and you will lose some or a significant portion of your investment.

§ **The market price of the securities will be influenced by many unpredictable factors.** Several factors, many of which are beyond our control, will influence the value of the securities in the secondary market and the price at which MS & Co. may be willing to purchase or sell the securities in the secondary market, including: the value (including whether the value is below the downside threshold value), volatility (frequency and magnitude of changes in value) and dividend yield of the underlying index, interest and yield rates in the market, time remaining to maturity, geopolitical conditions and economic, financial, political and regulatory or judicial events and any actual or anticipated changes in our credit ratings or credit spreads. Generally, the longer the time remaining to maturity, the more the market price of the securities will be affected by the other factors described above. You may receive less,

and possibly significantly less, than the stated principal amount per security if you try to sell your securities prior to maturity.

§ **The securities are linked to the Russell 2000® Index and are subject to risks associated with small-capitalization companies.** The Russell 2000® Index consists of stocks issued by companies with relatively small market capitalization. These companies often have greater stock price volatility, lower trading volume and less liquidity than large-capitalization companies and therefore the underlying index may be more volatile than indices that consist of stocks issued by large-capitalization companies. Stock prices of small-capitalization companies are also more vulnerable than those of large-capitalization companies to adverse business and economic developments, and the stocks of small-capitalization companies may be thinly traded. In addition, small capitalization companies are typically less well-established and less stable financially than large-capitalization companies and may depend on a small number of key personnel, making them more vulnerable to loss of personnel. Such companies tend to have smaller revenues, less diverse product lines, smaller shares of their product or service markets, fewer financial resources and less competitive strengths than large-capitalization companies and are more susceptible to adverse developments related to their products.

§ **The securities are subject to our credit risk, and any actual or anticipated changes to our credit ratings or credit spreads may adversely affect the market value of the securities.** You are dependent on our ability to pay all amounts due on the securities at maturity and therefore you are subject to our credit risk. If we default on our obligations under the securities, your investment would be at risk and you could lose some or all of your investment. As a result, the market value of the securities prior to maturity will be affected by changes in the market's view of our creditworthiness. Any actual or

Morgan Stanley Finance LLC

Enhanced Buffered Jump Securities Based on the Value of the Russell 2000® Index due April 30, 2024

Principal at Risk Securities

anticipated decline in our credit ratings or increase in the credit spreads charged by the market for taking our credit risk is likely to adversely affect the market value of the securities.

§ **As a finance subsidiary, MSFL has no independent operations and will have no independent assets.** As a finance subsidiary, MSFL has no independent operations beyond the issuance and administration of its securities and will have no independent assets available for distributions to holders of MSFL securities if they make claims in respect of such securities in a bankruptcy, resolution or similar proceeding. Accordingly, any recoveries by such holders will be limited to those available under the related guarantee by Morgan Stanley and that guarantee will rank *pari passu* with all other unsecured, unsubordinated obligations of Morgan Stanley. Holders will have recourse only to a single claim against Morgan Stanley and its assets under the guarantee. Holders of securities issued by MSFL should accordingly assume that in any such proceedings they would not have any priority over and should be treated *pari passu* with the claims of other unsecured, unsubordinated creditors of Morgan Stanley, including holders of Morgan Stanley-issued securities.

§ **The amount payable on the securities is not linked to the value of the underlying index at any time other than the valuation date**. The final index value will be based on the index closing value on the valuation date, subject to postponement for non-index business days and certain market disruption events. Even if the value of the underlying index appreciates prior to the valuation date but then drops by the valuation date to be below the downside threshold value, the payment at maturity will be significantly less than it would have been had the payment at maturity been linked to the value of the underlying index prior to such drop. Although the actual value of the underlying index on the maturity date or at other times during the term of the securities may be higher than the final index value, the payment at maturity will be based solely on the index closing value on the valuation date.

§ **The securities will not be listed on any securities exchange and secondary trading may be limited**. The securities will not be listed on any securities exchange. Therefore, there may be little or no secondary market for the securities. MS & Co. may, but is not obligated to, make a market in the securities and, if it once chooses to make a market, may cease doing so at any time. When it does make a market, it will generally do so for transactions of routine secondary market size at prices based on its estimate of the current value of the securities, taking into account its bid/offer spread, our credit spreads, market volatility, the notional size of the proposed sale, the cost of unwinding any related hedging positions, the time remaining to maturity and the likelihood that it will be able to resell the securities. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the securities easily. Since other broker-dealers may not participate significantly in the secondary market for the securities, the price at which you may be able to trade your securities is likely to depend on the price, if any, at which MS & Co. is willing to transact. If, at any time, MS & Co. were to cease making a market in the securities, it is likely that there would be no secondary market for the securities. Accordingly, you should be willing to hold your securities to maturity.

§

Investing in the securities is not equivalent to investing in the underlying index. Investing in the securities is not equivalent to investing in the underlying index or its component stocks. Investors in the securities will not have voting rights or rights to receive dividends or other distributions or any other rights with respect to stocks that constitute the underlying index.

§ **Adjustments to the underlying index could adversely affect the value of the securities.** The publisher of the underlying index can add, delete or substitute the stocks constituting the underlying index, and can make other methodological changes required by certain events relating to the underlying stocks, such as stock dividends, stock splits, spin-offs, rights offerings and extraordinary dividends, that could change the value of the underlying index. Any of these actions could adversely affect the value of the securities. The publisher of the underlying index may discontinue or suspend calculation or publication of the underlying index at any time. In these circumstances, MS & Co., as the calculation agent, will have the sole discretion to substitute a successor index that is comparable to the discontinued index. MS & Co. could have an economic interest that is different than that of investors in the securities insofar as, for example, MS & Co. is permitted to consider indices that are calculated and published by MS & Co. or any of its affiliates. If MS & Co. determines that there is no appropriate successor index, the payout on the securities at maturity will be an amount based on the closing prices on the valuation date of the stocks underlying the discontinued index at the time of such discontinuance, without rebalancing or substitution, computed by the calculation agent in accordance with the formula for calculating the underlying index last in effect prior to the discontinuance of the underlying index.

Morgan Stanley Finance LLC

Enhanced Buffered Jump Securities Based on the Value of the Russell 2000® Index due April 30, 2024

Principal at Risk Securities

§ **The rate we are willing to pay for securities of this type, maturity and issuance size is likely to be lower than the rate implied by our secondary market credit spreads and advantageous to us. Both the lower rate and the inclusion of costs associated with issuing, selling, structuring and hedging the securities in the original issue price reduce the economic terms of the securities, cause the estimated value of the securities to be less than the original issue price and will adversely affect secondary market prices.** Assuming no change in market conditions or any other relevant factors, the prices, if any, at which dealers, including MS & Co., may be willing to purchase the securities in secondary market transactions will likely be significantly lower than the original issue price, because secondary market prices will exclude the issuing, selling, structuring and hedging-related costs that are included in the original issue price and borne by you and because the secondary market prices will reflect our secondary market credit spreads and the bid-offer spread that any dealer would charge in a secondary market transaction of this type as well as other factors.

The inclusion of the costs of issuing, selling, structuring and hedging the securities in the original issue price and the lower rate we are willing to pay as issuer make the economic terms of the securities less favorable to you than they otherwise would be.

However, because the costs associated with issuing, selling, structuring and hedging the securities are not fully deducted upon issuance, for a period of up to 6 months following the issue date, to the extent that MS & Co. may buy or sell the securities in the secondary market, absent changes in market conditions, including those related to the underlying index, and to our secondary market credit spreads, it would do so based on values higher than the estimated value, and we expect that those higher values will also be reflected in your brokerage account statements.

§ **The estimated value of the securities is determined by reference to our pricing and valuation models, which may differ from those of other dealers and is not a maximum or minimum secondary market price.** These pricing and valuation models are proprietary and rely in part on subjective views of certain market inputs and certain assumptions about future events, which may prove to be incorrect. As a result, because there is no market-standard way to value these types of securities, our models may yield a higher estimated value of the securities than those generated by others, including other dealers in the market, if they attempted to value the securities. In addition, the estimated value on the pricing date does not represent a minimum or maximum price at which dealers, including MS & Co., would be willing to purchase your securities in the secondary market (if any exists) at any time. The value of your securities at any time after the date of this document will vary based on many factors that cannot be predicted with accuracy, including our creditworthiness and changes in market conditions. See also "The market price of the securities will be influenced by many unpredictable factors" above.

§ **Hedging and trading activity by our affiliates could potentially adversely affect the value of the securities.** One or more of our affiliates and/or third-party dealers expect to carry out hedging activities related to the securities (and possibly to other instruments linked to the underlying index or its component stocks), including trading in the stocks

that constitute the underlying index as well as in other instruments related to the underlying index. As a result, these entities may be unwinding or adjusting hedge positions during the term of the securities, and the hedging strategy may involve greater and more frequent dynamic adjustments to the hedge as the valuation date approaches. Some of our affiliates also trade the stocks that constitute the underlying index and other financial instruments related to the underlying index on a regular basis as part of their general broker-dealer and other businesses. Any of these hedging or trading activities on or prior to the pricing date could potentially increase the initial index value, and, therefore, could increase the level at or above which the index must close on the valuation date so that investors do not suffer a loss on their initial investment in the securities. Additionally, such hedging or trading activities during the term of the securities, including on the valuation date, could adversely affect the final index value, and, accordingly, the amount of cash an investor will receive at maturity.

§ **The calculation agent, which is a subsidiary of Morgan Stanley and an affiliate of MSFL, will make determinations with respect to the securities.** As calculation agent, MS & Co. will determine the initial index value, the downside threshold value, the final index value, the index percent change or the index performance factor, as applicable, and whether the final index value is below the downside threshold value, and will calculate the amount of cash you will receive at maturity. Moreover, certain determinations made by MS & Co., in its capacity as calculation agent, may require it to exercise discretion and make subjective judgments, such as with respect to the occurrence or non-occurrence of market disruption events and the selection of a successor index or calculation of the index closing value in the event of a market disruption event or discontinuance of the underlying index. These potentially subjective determinations may adversely affect the payout to you at maturity. For further information regarding these types of determinations, see “Description of

Principal at Risk Securities

Securities—Postponement of Valuation Date(s),” “—Discontinuance of Any Underlying Index or Basket Index; Alteration of Method of Calculation,” “—Alternate Exchange Calculation in case of an Event of Default” and “—Calculation Agent and Calculations” in the accompanying product supplement. In addition, MS & Co. has determined the estimated value of the securities on the pricing date.

§ **The U.S. federal income tax consequences of an investment in the securities are uncertain.** Please read the discussion under “Additional Information—Tax considerations” in this document and the discussion under “United States Federal Taxation” in the accompanying product supplement for Jump Securities (together, the “Tax Disclosure Sections”) concerning the U.S. federal income tax consequences of an investment in the securities. If the Internal Revenue Service (the “IRS”) were successful in asserting an alternative treatment, the timing and character of income on the securities might differ significantly from the tax treatment described in the Tax Disclosure Sections. For example, under one possible treatment, the IRS could seek to recharacterize the securities as debt instruments. In that event, U.S. Holders would be required to accrue into income original issue discount on the securities every year at a “comparable yield” determined at the time of issuance and recognize all income and gain in respect of the securities as ordinary income. Additionally, as discussed under “United States Federal Taxation—FATCA” in the accompanying product supplement for Jump Securities, the withholding rules commonly referred to as “FATCA” would apply to the securities if they were recharacterized as debt instruments. However, recently proposed regulations (the preamble to which specifies that taxpayers are permitted to rely on them pending finalization) eliminate the withholding requirement on payments of gross proceeds of a taxable disposition. The risk that financial instruments providing for buffers, triggers or similar downside protection features, such as the securities, would be recharacterized as debt is greater than the risk of recharacterization for comparable financial instruments that do not have such features. We do not plan to request a ruling from the IRS regarding the tax treatment of the securities, and the IRS or a court may not agree with the tax treatment described in the Tax Disclosure Sections.

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. investors should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” rule, which very generally can operate to recharacterize certain long-term capital gain as ordinary income and impose an interest charge. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, possibly with retroactive effect. Both U.S. and Non-U.S. Holders should consult their tax advisers regarding the U.S. federal income tax consequences of an investment in the securities, including possible alternative treatments, the issues presented by this notice and any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

The Russell 2000® Index Overview

The Russell 2000® Index is an index calculated, published and disseminated by FTSE Russell, and measures the composite price performance of stocks of 2,000 companies incorporated in the U.S. and its territories. All 2,000 stocks are traded on a major U.S. exchange and are the 2,000 smallest securities that form the Russell 3000® Index. The Russell 3000® Index is composed of the 3,000 largest U.S. companies as determined by market capitalization and represents approximately 98% of the U.S. equity market. The Russell 2000® Index consists of the smallest 2,000 companies included in the Russell 3000® Index and represents a small portion of the total market capitalization of the Russell 3000® Index. The Russell 2000® Index is designed to track the performance of the small capitalization segment of the U.S. equity market. For additional information about the Russell 2000® Index, see the information set forth under "Russell 2000® Index" in the accompanying index supplement.

Information as of market close on March 22, 2019:

Bloomberg Ticker Symbol:	RTY
Current Index Value:	1,505.923
52 Weeks Ago:	1,543.717
52 Week High (on 8/31/2018)	1,740.753
52 Week Low (on 12/24/2018):	1,266.925

The following graph sets forth the daily closing values of the underlying index for the period from January 1, 2014 through March 22, 2019. The related table sets forth the published high and low closing values, as well as end-of-quarter closing values, of the underlying index for each quarter in the same period. The closing value of the underlying index on March 22, 2019 was 1,505.923. We obtained the information in the table and graph below from Bloomberg Financial Markets, without independent verification. The underlying index has at times experienced periods of high volatility, and you should not take the historical values of the underlying index as an indication of its future performance.

Additional Terms of the Securities

Please read this information in conjunction with the summary terms on the front cover of this document.

Additional Terms:

If the terms described herein are inconsistent with those described in the accompanying product supplement, index supplement or prospectus, the terms described herein shall control.

Denominations:	$1,000 per security and integral multiples thereof
Interest:	None
Underlying index publisher:	FTSE Russell or any successor thereof
Postponement of maturity date:	If the scheduled valuation date is not an index business day or if a market disruption event occurs on that day so that the valuation date is postponed and falls less than two business days prior to the scheduled maturity date, the maturity date of the securities will be postponed to the second business day following that valuation date as postponed.
Index closing value:	The index closing value on any index business day shall be determined by the calculation agent and shall equal the closing value of the underlying index or any successor index reported by Bloomberg Financial Services, or any successor reporting service the calculation agent may select, on such index business day. In certain circumstances, the index closing value for the underlying index will be based on the alternate calculation of the underlying index as described under “Discontinuance of Any Underlying Index or Basket Index; Alteration of Method of Calculation” in the accompanying product supplement. The closing value of the underlying index reported by Bloomberg Financial Services may be lower or higher than the official closing value of the underlying index published by the underlying index publisher.
Trustee:	The Bank of New York Mellon
Calculation agent:	MS & Co.
Issuer notice to registered security holders, the trustee and the depositary:	In the event that the maturity date is postponed due to postponement of the valuation date, the issuer shall give notice of such postponement and, once it has been determined, of the date to which the maturity date has been rescheduled (i) to each registered holder of the securities by mailing notice of such postponement by first class mail, postage prepaid, to such registered holder’s last address as it shall appear upon the registry books, (ii) to the trustee by facsimile confirmed by mailing such notice to the trustee by first class mail, postage prepaid, at its New York office and (iii) to The Depository Trust Company (the “depositary”) by telephone or facsimile, confirmed by mailing such notice to the depositary by first class mail, postage prepaid. Any notice that is mailed to a registered holder of the securities in the manner herein provided shall be conclusively presumed to have been duly given to such registered holder, whether or not such registered holder receives the notice. The issuer shall give such notice as promptly as possible, and in no case later than (i) with respect to notice of postponement of the maturity date,

the business day immediately preceding the scheduled maturity date and (ii) with respect to notice of the date to which the maturity date has been rescheduled, the business day immediately following the actual valuation date.

The issuer shall, or shall cause the calculation agent to, (i) provide written notice to the trustee, on which notice the trustee may conclusively rely, and to the depositary of the amount of cash to be delivered, if any, with respect to the securities, on or prior to 10:30 a.m. (New York City time) on the business day preceding the maturity date, and (ii) deliver the aggregate cash amount due, if any, with respect to the securities to the trustee for delivery to the depositary, as holder of the securities, on the maturity date.

Additional Information About the Securities

Additional Information:

Minimum ticketing size:	$1,000 / 1 security
Tax considerations:	Although there is uncertainty regarding the U.S. federal income tax consequences of an investment in the securities due to the lack of governing authority, in the opinion of our counsel, Davis Polk & Wardwell LLP, under current law, and based on current market conditions, a security should be treated as a single financial contract that is an "open transaction" for U.S. federal income tax purposes. However, because our counsel's opinion is based in part on market conditions as of the date of this document, it is subject to confirmation on the pricing date. Assuming this treatment of the securities is respected and subject to the discussion in "United States Federal Taxation" in the accompanying product supplement for Jump Securities, the following U.S. federal income tax consequences should result based on current law: § A U.S. Holder should not be required to recognize taxable income over the term of the securities prior to settlement, other than pursuant to a sale or exchange. § Upon sale, exchange or settlement of the securities, a U.S. Holder should recognize gain or loss equal to the difference between the amount realized and the U.S. Holder's tax basis in the securities. Such gain or loss should be long-term capital gain or loss if the investor has held the securities for more than one year, and short-term capital gain or loss otherwise. In 2007, the U.S. Treasury Department and the Internal Revenue Service (the "IRS") released a notice requesting comments on the U.S. federal income tax treatment of "prepaid forward contracts" and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. investors should be subject to withholding tax; and whether these instruments are or should be subject to the "constructive ownership" rule, which very generally can operate to recharacterize certain long-term capital gain as ordinary income and impose an interest charge. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, possibly with retroactive effect. As discussed in the accompanying product supplement for Jump Securities, Section 871(m) of the Internal Revenue Code of 1986, as amended, and Treasury regulations promulgated thereunder ("Section 871(m)") generally impose a 30% (or a lower applicable treaty rate) withholding tax on

dividend equivalents paid or deemed paid to Non-U.S. Holders with respect to certain financial instruments linked to U.S. equities or indices that include U.S. equities (each, an "Underlying Security"). Subject to certain exceptions, Section 871(m) generally applies to securities that substantially replicate the economic performance of one or more Underlying Securities, as determined based on tests set forth in the applicable Treasury regulations (a "Specified Security"). However, pursuant to an IRS notice, Section 871(m) will not apply to securities issued before January 1, 2021 that do not have a delta of one with respect to any Underlying Security. Based on the terms of the securities and current market conditions, we expect that the securities will not have a delta of one with respect to any Underlying Security on the pricing date. However, we will provide an updated determination in the final pricing supplement. Assuming that the securities do not have a delta of one with respect to any Underlying Security, our counsel is of the opinion that the securities should not be Specified Securities and, therefore, should not be subject to Section 871(m).

Our determination is not binding on the IRS, and the IRS may disagree with this determination. Section 871(m) is complex and its application may depend on your particular circumstances, including whether you enter into other transactions with respect to an Underlying Security. If withholding is required, we will not be required to pay any additional amounts with respect to the amounts so withheld. You should consult your tax adviser regarding the potential application of Section 871(m) to

the securities.

Both U.S. and non-U.S. investors considering an investment in the securities should read the discussion under "Risk Factors" in this document and the discussion under "United States Federal Taxation" in the accompanying product supplement for Jump Securities and consult their tax advisers regarding all aspects of the U.S. federal income tax consequences of an investment in the securities, including possible alternative treatments, the issues presented by the aforementioned notice and any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

The discussion in the preceding paragraphs under "Tax considerations" and the discussion contained in the section entitled "United States Federal Taxation" in the accompanying product supplement for Jump Securities, insofar as they purport to describe provisions of U.S. federal income tax laws or legal conclusions with respect thereto, constitute the full opinion of Davis Polk & Wardwell LLP regarding the material U.S. federal tax consequences of an investment in the securities.

Use of proceeds and hedging: The proceeds from the sale of the securities will be used by us for general corporate purposes. We will receive, in aggregate, $1,000 per security issued, because, when we enter into hedging transactions in order to meet our obligations under the securities, our hedging counterparty will reimburse the cost of the agent's commissions. The costs of the securities borne by you and described beginning on page 2 above comprise the agent's commissions and the cost of issuing, structuring and hedging the securities.

On or prior to the pricing date, we will hedge our anticipated exposure in connection with the securities, by entering into hedging transactions with our affiliates and/or third party dealers. We expect our hedging counterparties to take positions in the stocks constituting the underlying index, futures or options contracts listed on major securities markets on the underlying index or its component stocks, or positions in any other available securities or instruments that they may wish to use in connection with such hedging. Such purchase activity could potentially increase the closing value of the underlying index on the pricing date, and accordingly, the value at or above which the underlying index must close on the valuation date so that investors do not suffer a loss on their initial investment in the securities. In addition, through our affiliates, we are likely to modify our hedge position throughout the term of the securities, including on the valuation date, by purchasing and selling the stocks constituting the underlying index, futures or options contracts on the underlying index or its component stocks listed on major securities markets or positions in any other

available securities or instruments that we may wish to use in connection with such hedging activities. As a result, these entities may be unwinding or adjusting hedge positions during the term of the securities, and the hedging strategy may involve greater and more frequent dynamic adjustments to the hedge as the valuation date approaches. We cannot give any assurance that our hedging activities will not affect the value of the underlying index and, therefore, adversely affect the value of the securities or the payment you will receive at maturity. For further information on our use of proceeds and hedging, see "Use of Proceeds and Hedging" in the accompanying product supplement for Jump Securities.

Each fiduciary of a pension, profit-sharing or other employee benefit plan subject to Title I of the Employee Retirement Income Security Act of 1974, as amended ("ERISA") (a "Plan"), should consider the fiduciary standards of ERISA in the context of the Plan's particular circumstances before authorizing an investment in the securities. Accordingly, among other factors, the fiduciary should consider whether the investment would satisfy the prudence and diversification requirements of ERISA and would be consistent with the documents and instruments governing the Plan.

Benefit plan investor considerations:

In addition, we and certain of our affiliates, including MS & Co., may each be considered a "party in interest" within the meaning of ERISA, or a "disqualified person" within the meaning of the Internal Revenue Code of 1986, as amended (the "Code"), with respect to many Plans, as well as many individual retirement accounts and Keogh plans (such accounts and plans, together with other plans, accounts and arrangements subject to Section 4975 of the Code, also "Plans"). ERISA Section 406 and Code Section 4975 generally prohibit transactions between Plans and parties in interest or disqualified persons. Prohibited transactions within the meaning of ERISA or the Code would likely arise, for example, if the securities are acquired by or with the assets of a Plan with respect to which MS & Co. or any of its affiliates is a service provider or other party in interest, unless the securities are acquired pursuant to an exemption from the "prohibited transaction" rules. A violation of these "prohibited transaction" rules could result in an excise tax or other liabilities under ERISA and/or

Section 4975 of the Code for those persons, unless exemptive relief is available under an applicable statutory or administrative exemption.

The U.S. Department of Labor has issued five prohibited transaction class exemptions (“PTCEs”) that may provide exemptive relief for direct or indirect prohibited transactions resulting from the purchase or holding of the securities. Those class exemptions are PTCE 96-23 (for certain transactions determined by in-house asset managers), PTCE 95-60 (for certain transactions involving insurance company general accounts), PTCE 91-38 (for certain transactions involving bank collective investment funds), PTCE 90-1 (for certain transactions involving insurance company separate accounts) and PTCE 84-14 (for certain transactions determined by independent qualified professional asset managers). In addition, ERISA Section 408(b)(17) and Code Section 4975(d)(20) of the Code provide an exemption for the purchase and sale of securities and the related lending transactions, provided that neither the issuer of the securities nor any of its affiliates has or exercises any discretionary authority or control or renders any investment advice with respect to the assets of the Plan involved in the transaction and provided further that the Plan pays no more, and receives no less, than “adequate consideration” in connection with the transaction (the so-called “service provider” exemption). There can be no assurance that any of these class or statutory exemptions will be available with respect to transactions involving the securities.

Because we may be considered a party in interest with respect to many Plans, the securities may not be purchased, held or disposed of by any Plan, any entity whose underlying assets include “plan assets” by reason of any Plan’s investment in the entity (a “Plan Asset Entity”) or any person investing “plan assets” of any Plan, unless such purchase, holding or disposition is eligible for exemptive relief, including relief available under PTCEs 96-23, 95-60, 91-38, 90-1, 84-14 or the service provider exemption or such purchase, holding or disposition is otherwise not prohibited. Any purchaser, including any fiduciary purchasing on behalf of a Plan, transferee or holder of the securities will be deemed to have represented, in its corporate and its fiduciary capacity, by its purchase and holding of the securities that either (a) it is not a Plan or a Plan Asset Entity and is not purchasing such securities on behalf of or with “plan assets” of any Plan or with any assets of a governmental, non-U.S. or church plan that is subject to any federal, state, local or non-U.S. law that is substantially similar to the provisions of Section 406 of ERISA or Section 4975 of the Code (“Similar Law”) or (b) its purchase, holding and disposition of these securities will not constitute or result in a non-exempt prohibited transaction under Section 406 of ERISA or Section 4975 of the Code or violate any Similar Law.

Due to the complexity of these rules and the penalties that may be imposed upon persons involved in non-exempt prohibited transactions, it is particularly important that fiduciaries or other persons considering purchasing the securities on behalf of or with “plan assets” of any Plan consult with their counsel regarding the availability of exemptive relief.

The securities are contractual financial instruments. The financial exposure provided by the securities is not a substitute or proxy for, and is not intended as a substitute or proxy for, individualized investment management or advice for the benefit of any purchaser or holder of the securities. The securities have not been designed and will not be administered in a manner intended to reflect the individualized needs and objectives of any purchaser or holder of the securities.

Each purchaser or holder of any securities acknowledges and agrees that:

(i) the purchaser or holder or its fiduciary has made and shall make all investment decisions for the purchaser or holder and the purchaser or holder has not relied and shall not rely in any way upon us or our affiliates to act as a fiduciary or adviser of the purchaser or holder with respect to (A) the design and terms of the securities, (B) the purchaser or holder's investment in the securities, or (C) the exercise of or failure to exercise any rights we have under or with respect to the securities;

(ii) we and our affiliates have acted and will act solely for our own account in connection with (A) all transactions relating to the securities and (B) all hedging transactions in connection with our obligations under the securities;

(iii) any and all assets and positions relating to hedging transactions by us or our affiliates are assets and positions of those entities and are not assets and positions held for the benefit of

the purchaser or holder;

(iv) our interests are adverse to the interests of the purchaser or holder; and

(v) neither we nor any of our affiliates is a fiduciary or adviser of the purchaser or holder in connection with any such assets, positions or transactions, and any information that we or any of our affiliates may provide is not intended to be impartial investment advice.

Each purchaser and holder of the securities has exclusive responsibility for ensuring that its purchase, holding and disposition of the securities do not violate the prohibited transaction rules of ERISA or the Code or any Similar Law. The sale of any securities to any Plan or plan subject to Similar Law is in no respect a representation by us or any of our affiliates or representatives that such an investment meets all relevant legal requirements with respect to investments by plans generally or any particular plan, or that such an investment is appropriate for plans generally or any particular plan. In this regard, neither this discussion nor anything provided in this document is or is intended to be investment advice directed at any potential Plan purchaser or at Plan purchasers generally and such purchasers of these securities should consult and rely on their own counsel and advisers as to whether an investment in these securities is suitable.

However, individual retirement accounts, individual retirement annuities and Keogh plans, as well as employee benefit plans that permit participants to direct the investment of their accounts, will not be permitted to purchase or hold the securities if the account, plan or annuity is for the benefit of an employee of Morgan Stanley or Morgan Stanley Wealth Management or a family member and the employee receives any compensation (such as, for example, an addition to bonus) based on the purchase of the securities by the account, plan or annuity.

Additional considerations:	Client accounts over which Morgan Stanley, Morgan Stanley Wealth Management or any of their respective subsidiaries have investment discretion are not permitted to purchase the securities, either directly or indirectly.
Supplemental information regarding plan of distribution; conflicts of	Selected dealers, which may include our affiliates, and their financial advisors will collectively receive from the agent a fixed sales commission of $ for each security they sell; provided that dealers selling to investors purchasing the securities in fee-based advisory accounts will receive a sales commission of $ per security.

interest:

MS & Co. is an affiliate of MSFL and a wholly owned subsidiary of Morgan Stanley, and it and other affiliates of ours expect to make a profit by selling, structuring and, when applicable, hedging the securities. When MS & Co. prices this offering of securities, it will determine the economic terms of the securities, including the upside payment, such that for each security the estimated value on the pricing date will be no lower than the minimum level described in "Investment Summary" beginning on page 2.

MS & Co. will conduct this offering in compliance with the requirements of FINRA Rule 5121 of the Financial Industry Regulatory Authority, Inc., which is commonly referred to as FINRA, regarding a FINRA member firm's distribution of the securities of an affiliate and related conflicts of interest. MS & Co. or any of our other affiliates may not make sales in this offering to any discretionary account. See "Plan of Distribution (Conflicts of Interest)" and "Use of Proceeds and Hedging" in the accompanying product supplement for Jump Securities.

Contact:	Morgan Stanley Wealth Management clients may contact their local Morgan Stanley branch office or Morgan Stanley's principal executive offices at 1585 Broadway, New York, New York 10036 (telephone number (866) 477-4776). All other clients may contact their local brokerage representative. Third-party distributors may contact Morgan Stanley Structured Investment Sales at (800) 233-1087.
Where you can find more information:	Morgan Stanley and MSFL have filed a registration statement (including a prospectus, as supplemented by the product supplement for Jump Securities and the index supplement) with the Securities and Exchange Commission, or SEC, for the offering to which this communication relates. You should read the prospectus in that registration statement, the product supplement for Jump Securities, the index supplement and any other documents relating to this offering that Morgan Stanley and MSFL have filed with the SEC for more complete information about Morgan Stanley, MSFL and this offering. You may get these documents without cost by visiting EDGAR on the SEC web site at.www.sec.gov. Alternatively, Morgan Stanley or MSFL, any underwriter or any dealer participating in the offering will arrange to send you the prospectus, the product supplement for Jump Securities and the index supplement if you so request by calling toll-free 800-584-6837.

You may access these documents on the SEC web site at www.sec.gov as follows:
