INFORMATION REGARDING FORWARD-LOOKING DISCLOSURE

This quarterly report on Form 10-Q contains forward-looking statements. Statements in this report that are not historical facts, including statements about management's beliefs and expectations, constitute forward-looking statements. These statements are based on current plans, estimates and projections, and are subject to change based on a number of factors, including those outlined under Item 1A, Risk Factors, in our 2006 Annual Report on Form 10-K and in this report. Forward-looking statements speak only as of the date they are made, and we undertake no obligation to update publicly any of them in light of new information or future events.

Forward-looking statements involve inherent risks and uncertainties. A number of important factors could cause actual results to differ materially from those contained in any forward-looking statement. Such factors include, but are not limited to, the following:

Edgar Filing: INTERPUBLIC GROUP OF COMPANIES, INC. - Form 10-Q

risks arising from material weaknesses in our internal control over financial reporting, including material weaknesses in our control environment;

our ability to attract new clients and retain existing clients;

our ability to retain and attract key employees;

risks associated with assumptions we make in connection with our critical accounting estimates;

potential adverse effects if we are required to recognize impairment charges or other adverse accounting-related developments;

potential adverse developments in connection with the ongoing Securities and Exchange Commission (SEC) investigation;

potential downgrades in the credit ratings of our securities;

Table of Contents

risks associated with the effects of global, national and regional economic and political conditions, including fluctuations in economic growth rates, interest rates and currency exchange rates; and

developments from changes in the regulatory and legal environment for advertising and marketing and communications services companies around the world.

Investors should carefully consider these factors and the additional risk factors outlined in more detail under Item 1A, Risk Factors, in our 2006 Annual Report on Form 10-K and in this report.

Note 1: Basis of Presentation

The unaudited consolidated financial statements have been prepared by The Interpublic Group of Companies, Inc. (together with its subsidiaries, the Company, Interpublic, we, us or our) pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC or the Commission) and, in the opinion of management, include all adjustments of a normal and recurring nature necessary for a fair statement of the Consolidated Statements of Operations, Condensed Consolidated Balance Sheets, Consolidated Statements of Cash Flows and Consolidated Statements of Comprehensive Income (Loss) for each period presented. Certain reclassifications have been made to prior periods to conform to the current period presentation. The consolidated results for interim periods are not necessarily indicative of results for the full year, as historically our consolidated revenue is lower in the first half of the year than in the second half. These financial results should be read in conjunction with our 2006 Annual Report on Form 10-K.

Starting with the first quarter of 2007 we have included our \$400.0 4.50% Convertible Senior Notes due 2023 in short-term debt because holders of this debt may require us to repurchase these Notes on March 15, 2008 for cash at par.

Note 2: Restructuring and Other Reorganization-Related (Reversals) Charges

The components of restructuring and other reorganization-related (reversals) charges are as follows:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2007	2006	2007	2006
Other reorganization-related charges (reversals)	\$	\$ 6.3	\$ (0.2)	\$ 6.3
Restructuring (reversals) charges:				
Lease termination and other exit costs	(5.1)		(5.0)	0.4
Severance and termination costs	(0.1)		(0.6)	
	(5.2)		(5.6)	0.4
Total	\$ (5.2)	\$ 6.3	\$ (5.8)	\$ 6.7

Restructuring (reversals) charges relate to the 2003 and 2001 restructuring programs. For the three and six months ended June 30, 2007, net reversals primarily consist of reversals due to the utilization of previously vacated property by an agency at Draftfcb and adjustments to estimates primarily relating to our severance and lease termination costs. Net restructuring reversals for the three months ended June 30, 2007 was comprised of net reversals of \$5.1 at Integrated Agency Networks (IAN) and \$0.1 at Constituency Management Group (CMG). For the six months ended June 30, 2007, net restructuring reversals was comprised of \$4.9 at IAN and \$0.7 at CMG.

A rollforward of the remaining liability for the 2003 and 2001 restructuring program is as follows:

	2003 Program	2001 Program	Total
Liability at December 31, 2006	\$ 12.6	\$ 19.2	\$ 31.8
Net reversals and adjustments	(0.8)	(4.8)	(5.6)

Note 3: Acquisitions

During the six months ended June 30, 2007, we made three acquisitions: a) a full-service advertising agency in Latin America, b) Reprise Media, which is a full-service search engine marketing firm in North America, and c) the remaining interests in a full-service advertising agency in India in which we previously held a 49% interest. Total cash consideration for these acquisitions was \$80.2. There is a contingent purchase obligation for the remaining equity interests in Reprise Media, which is based on future financial performance. If the contingent obligation is met and consideration for these interests is determinable and distributable, we will record the fair value of this consideration as additional goodwill.

For companies acquired during the first half of 2007, we made estimates of the fair values of the assets and liabilities for consolidation. The purchase price in excess of the estimated fair value of the tangible net assets acquired was allocated to goodwill and identifiable intangible assets. These acquisitions do not have significant amounts of tangible assets, therefore a substantial portion of the total consideration has been allocated to goodwill and identifiable intangible assets (approximately \$65.0). We are in the process of obtaining final third-party valuations for the intangible assets acquired in India, and adjustments could be made to the preliminary values assigned to the assets and liabilities acquired that would primarily be offset by a change in goodwill. All acquisitions during the first half of 2007 are included in the IAN operating segment. Pro forma information, as required by Statement of Financial Accounting Standards (SFAS) No. 141, *Business Combinations*, related to these acquisitions is not presented because the impact of these acquisitions, either individually or in the aggregate, on the Company's consolidated results of operations is not significant.

During the three months ended June 30, 2007 and 2006, we made payments in the form of our common stock related to acquisitions initiated in prior years of \$0.3 and \$5.0, respectively. During the six months ended June 30, 2007 and 2006, we made payments in the form of our common stock related to acquisitions initiated in prior years of \$0.3 and \$5.1, respectively.

Details of cash paid for current and prior years' acquisitions are as follows:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2007	2006	2007	2006
Cash paid for current year acquisitions	\$ 74.3	\$	\$ 80.2	\$

2004 Restatement Liabilities

As part of the restatement set forth in the 2004 Annual Report on Form 10-K filed in September 2005 (the 2004 Restatement), we recognized liabilities related to vendor discounts and credits where we had a contractual or legal obligation to rebate such amounts to our clients or vendors. Reductions to these liabilities are primarily achieved through settlements with clients and vendors, but also may occur if the applicable statute of limitations has lapsed. For the six months ended June 30, 2007, we satisfied \$16.9 of these liabilities through cash payments of \$5.3 and reductions of certain client receivables of \$11.6. Also, as part of the 2004 Restatement, we recognized liabilities related to internal investigations and international compensation arrangements. A summary of these and the vendor discounts and credits liabilities, which are primarily included in accounts payable, is as follows:

	June 30, 2007	December 31, 2006
Vendor discounts and credits	\$ 189.6	\$ 211.2

Sale of businesses and investments During the three months ended June 30, 2007, we sold several businesses within Draftfcb and Lowe Worldwide for a loss of approximately \$10.0, partially offset by the sale of our remaining ownership interests in two agencies for a gain of \$2.8.

During the three months ended June 30, 2006, we sold an investment located in Asia Pacific for a gain of \$18.4. In addition, during the six months ended June 30, 2006 we sold our remaining ownership interest in an agency within Lowe Worldwide, for a gain of \$2.5.

Vendor discounts and credit adjustments We are in the process of settling our liabilities related to vendor discounts and credits primarily established as part of the 2004 Restatement. These adjustments reflect the reversal of certain liabilities as a result of settlements with clients and vendors or where the statute of limitations has lapsed.

Note 5: Earnings (Loss) Per Share

Earnings (loss) per basic common share equals net income (loss) applicable to common stockholders divided by the weighted average number of common shares outstanding for the applicable period. Earnings (loss) per diluted common share reflects the assumed conversion of all dilutive securities.

^(a) Pursuant to Emerging Issues Task Force (EITF) Issue No. 03-6, *Participating Securities and the Two-Class Method Under FASB Statement No. 128* (EITF 03-6), net income for purposes of calculating basic

earnings per share is adjusted based on an earnings allocation formula that attributes earnings to participating securities and common stock according to dividends declared and participation rights in undistributed earnings. For 2007, participating securities consist of the 4.50% Convertible Senior Notes and for 2006 participating securities consist of the 4.50% Convertible Senior Notes and the Series A Mandatory Convertible Preferred Stock. Our participating securities have no impact on our net loss applicable to common stockholders for the six months ended June 30, 2007 and 2006 as there are no earnings distributable to common stockholders after deducting preferred stock dividends.

Basic and diluted shares outstanding and loss per share are equal for the six months ended June 30, 2007 and 2006 because our potentially dilutive securities are antidilutive as a result of the net loss applicable to common stockholders in each period.

(1) These options are outstanding at the end of the respective periods. In any period in which the exercise price is less than the average market price, these options have the potential to be dilutive and application of the treasury stock method would reduce this amount.

(2) The potential dilutive impact of the warrants is based upon the difference between the market price of one share of our common stock and the stated exercise prices of the warrants.

There were an additional 8.1 and 10.6 of outstanding stock options to purchase common shares for the three and six months ended June 30, 2007, respectively, with exercise prices less than the average market price for the respective period. However, these options are not included in the table above presenting the potential shares excluded from diluted earnings (loss) per share due to the application of the treasury stock method and the rules related to stock-based compensation arrangements.

Note 6: Taxes

For the three and six months ended June 30, 2007, the difference between the effective tax rate and the statutory rate of 35% is primarily due to state and local taxes, losses incurred in non-U.S. jurisdictions that receive no corresponding

tax benefit and the recognition of previously unrecognized tax benefits. The improvement in the effective tax rate as compared to the six months ended June 30, 2006 is primarily attributable to the recognition of previously unrecognized tax benefits and a reduction in the losses incurred in non-U.S. jurisdictions that receive no benefit.

We adopted the provisions of Financial Accounting Standards Board (FASB) Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, (FIN 48) on January 1, 2007. As a result of the implementation of FIN 48, we recorded a \$9.5 increase in the net liability for unrecognized tax positions, which was recorded as an adjustment to retained earnings effective January 1, 2007. The total amount of

unrecognized tax benefits at January 1, 2007 was \$271.8, including \$242.6 of tax benefits that, if recognized, would impact the effective tax rate and \$29.2 of tax benefits that, if recognized, would result in adjustments to other tax accounts, primarily deferred taxes. The total amount of accrued interest and penalties at January 1, 2007 was \$30.2. In accordance with our accounting policy, interest and penalties accrued on unrecognized tax benefits are classified as income taxes in the statement of operations. We have not elected to change this classification with the adoption of FIN 48.

The total unrecognized tax benefits at June 30, 2007 were \$185.4, including \$145.0 of tax benefits that, if recognized, would impact the effective tax rate. The gross amount of increases in unrecognized tax benefits during the three and six months ended June 30, 2007 was \$5.0 and \$18.2, respectively, primarily attributable to current-period international tax exposures. The gross amount of decreases in unrecognized tax benefits during the three and six months ended June 30, 2007 was \$102.6 and \$104.6, respectively, primarily attributable to settlements of prior-year tax examinations.

With respect to all tax years open to examination by U.S. federal and various state, local, and non-U.S. tax authorities, we currently anticipate that the total unrecognized tax benefits will decrease by an amount between \$80.0 and \$90.0 in the next twelve months, a portion of which will affect the effective tax rate, primarily as a result of the settlement of tax examinations and the lapsing of statutes of limitation. This net decrease is related to various items of income and expense, including transfer pricing adjustments, restatement adjustments and thin capitalization adjustments. In 2006, the IRS completed its field audit of the years 1997 through 2002 and has proposed additions to our taxable income. We have appealed a number of these proposed additions and expect to complete our discussions with the IRS in the next twelve months.

On May 1, 2007, the IRS completed its examination of our 2003 and 2004 income tax returns and proposed a number of adjustments to our taxable income. We have appealed a number of these items. In addition, during the second quarter of 2007, there were net reversals of tax reserves, primarily related to previously unrecognized tax benefits related to various items of income and expense, including approximately \$80.0 for certain worthless securities deductions associated with investments in consolidated subsidiaries, which was a result of the completion of a tax examination.

We have various tax years under examination by tax authorities in various countries, such as the United Kingdom, and in various states, such as New York, in which we have significant business operations. It is not yet known whether these examinations will, in the aggregate, result in our paying additional taxes. We have established tax reserves that we believe to be adequate in relation to the potential for additional assessments in each of the jurisdictions in which we are subject to taxation. We regularly assess the likelihood of additional tax assessments in those jurisdictions and adjust our reserves as additional information or events require.

With limited exceptions, we are no longer subject to U.S. income tax audits for years prior to 1997, state and local income tax audits for years prior to 1999, or non-U.S. income tax audits for years prior to 2000.

During the three and six months ended June 30, 2007, we made contributions of \$11.3 and \$16.6, respectively, to our foreign pension plans. For the remainder of 2007, we expect to contribute an additional \$12.0 to our foreign pension plans. We do not anticipate making contributions to our domestic pension plans.

Note 8: Stock-Based Compensation

During the six months ended June 30, 2007 we granted the following stock-based compensation awards under our 2006 performance incentive plan:

	Six Months Ended June 30, 2007	
	Awards	Weighted-Average Grant-Date Fair Value (per award)
Stock Options	2.5	\$ 4.90
Stock-Settled Awards	4.6	\$ 11.82

Stock-settled awards include restricted stock and restricted stock units (RSUs) expected to be settled in stock. Cash-settled awards include RSUs expected to be settled in cash. As of December 31, 2006, all of our RSUs granted were expected to be settled in cash. During the six months ended June 30, 2007, we granted RSUs that we expect to settle in stock in addition to RSUs that we expect to settle in cash. We adjust our fair value measurement for RSUs that are expected to be settled in cash quarterly based on our share price and we amortize stock-based compensation expense related to these awards over the vesting period based upon the quarterly-adjusted fair value. RSUs that are expected to be settled in stock and restricted stock are amortized over the vesting period based on the grant date fair value of the awards.

See Note 14 to the consolidated financial statements in our 2006 Annual Report on Form 10-K for additional information regarding general terms and methods of valuation for stock options, restricted stock awards, performance-based awards, and restricted stock units.

The Interpublic Group of Companies Employee Stock Purchase Plan (2006) (the 2006 Plan) became active April 1, 2007. Under the 2006 Plan, eligible employees may purchase our common stock through payroll deductions not exceeding 10% of their base compensation or 900 (actual amount) shares each offering period. The price an employee pays for a share of common stock under the 2006 Plan is 90% of the lesser of the average market price of a share on the first business day of the offering period or the average market price of a share on the last business day of the offering period of three months. An aggregate of 15.0 shares are reserved for issuance under the 2006 Plan, of which 0.1 shares were issued for the three months ended June 30, 2007. Total compensation expense associated with the issued shares was \$0.2 for the three months ended June 30, 2007.

Note 10: Commitments and Contingencies***SEC Investigation***

The SEC opened a formal investigation in response to the restatement we first announced in August 2002, and the investigation expanded to encompass the 2004 Restatement. We have also responded to inquiries from the SEC staff concerning the restatement of the first three quarters of 2005 that we made in our 2005 Annual Report on Form 10-K. We continue to cooperate with the investigation. We expect that the investigation will result in monetary liability, but as settlement discussions have not yet commenced, we cannot reasonably estimate the amount, range of amounts or timing of a resolution. Accordingly, we have not yet established any provision relating to these matters.

The SEC staff has informed us that it intends to seek approval from the Commission to enter into settlement discussions with us and, failing a settlement, to commence an action charging the Company with various violations of the federal securities laws. In that connection, and as previously disclosed by the Company in a current report on Form 8-K filed June 14, 2007, the staff has sent the Company a Wells notice, which invites us to make a responsive submission before the staff makes a final determination concerning its recommendation to the Commission. We expect to discuss settlement with the staff once the Commission authorizes the staff to engage in such discussions. We cannot at this time predict what the Commission will authorize or the outcome of any settlement negotiations.

Other Legal Matters

We are or have been involved in other legal and administrative proceedings of various types. While any litigation contains an element of uncertainty, we do not believe that the outcome of such proceedings or claims will have a material adverse effect on our financial condition.

Guarantees

As discussed in our 2006 Annual Report on Form 10-K, we have contingent obligations under guarantees of certain obligations of our subsidiaries relating principally to credit facilities, guarantees of certain media payables and operating leases of certain subsidiaries. As of June 30, 2007 there have been no material changes to these guarantees.

Note 11: Recent Accounting Standards

In June 2007, the EITF ratified EITF Issue No. 06-11, *Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards* (EITF 06-11). Under EITF 06-11 a realized tax benefit from dividends or

(Unaudited)

dividend equivalents that are charged to retained earnings and paid to employees for equity classified non-vested equity shares, non-vested equity share units, and outstanding share options should be recognized as an increase to additional paid-in-capital. EITF 06-11 is effective, prospectively, for fiscal years beginning after December 15, 2007. We do not expect the adoption of EITF 06-11 to have a material impact on our Consolidated Financial Statements.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS No. 159), which permits an entity to measure certain financial assets and financial liabilities at fair value. Under SFAS No. 159, entities that elect the fair value option will report unrealized gains and losses in earnings at each subsequent reporting date. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. We are currently evaluating the potential impact of SFAS No. 159 on our Consolidated Financial Statements.

In January 2007 we adopted FIN 48. See Note 6 for further information.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS No. 157), which defines fair value, establishes a framework for measuring fair value in U.S. GAAP, and expands disclosures about fair value measurements. Under the standard, fair value refers to the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the market in which the reporting entity transacts. The standard clarifies the principle that fair value should be based on the assumptions market participants would use when pricing the asset or liability. In support of this principle, the standard establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. The fair value hierarchy gives the highest priority to quoted prices in active markets and the lowest priority to unobservable data, for example, the reporting entity's own data. Under the standard, fair value measurements would be separately disclosed by level within the fair value hierarchy. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007. We are currently evaluating the potential impact of SFAS No. 157 on our Consolidated Financial Statements.

The adoption of the following accounting pronouncements during 2007 did not have a material impact on our Consolidated Financial Statements:

SFAS No. 155, *Accounting for Certain Hybrid Financial Instruments*

EITF Issue No. 05-1, *Accounting for the Conversion of an Instrument That Becomes Convertible Upon the Issuer's Exercise of a Call Option*

EITF Issue No. 06-3, *How Taxes Collected from Customers and Remitted to Governmental Authorities Should be Presented in the Income Statement (That is, Gross versus Net Presentation)*

EITF Issue No. 06-5, *Accounting for Purchases of Life Insurance - Determining the Amount That Could Be Realized in Accordance with FASB Technical Bulletin No. 85-4, Accounting for Purchases of Life Insurance*

EITF Issue No. 06-6, *Debtor's Accounting for a Modification (or Exchange) of Convertible Debt Instruments*

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) is intended to help you understand The Interpublic Group of Companies, Inc. and subsidiaries (the Company , Interpublic , we , us or our). MD&A should be read in conjunction with our financial statements and the accompanying notes. Our MD&A includes the following sections:

EXECUTIVE SUMMARY provides an overview of our results of operations and liquidity.

RESULTS OF OPERATIONS provides an analysis of the consolidated and segment results of operations for the periods presented.

LIQUIDITY AND CAPITAL RESOURCES provides an overview of our cash flows and financing activities.

INTERNAL CONTROL OVER FINANCIAL REPORTING, by reference to our 2006 Annual Report on Form 10-K, provides a description of the status of our compliance with Section 404 of the Sarbanes-Oxley Act of 2002.

CRITICAL ACCOUNTING ESTIMATES provides an update to the discussion of our accounting policies that require critical judgment, assumptions and estimates in our 2006 Annual Report on Form 10-K.

RECENT ACCOUNTING STANDARDS, by reference to Note 11 to the unaudited Consolidated Financial Statements, provides a discussion of accounting standards that we have not yet been required to implement, but which may affect us in the future, as well as those accounting standards that have been adopted during 2007.

EXECUTIVE SUMMARY

We are one of the world's largest advertising and marketing services companies, comprised of communication agencies around the world that deliver custom marketing solutions on behalf of our clients. These agencies cover the spectrum of marketing disciplines and specialties, from traditional services such as consumer advertising and direct marketing, to emerging services such as mobile and search engine marketing. To meet the challenge of an increasingly complex consumer culture, we create customized marketing solutions for each of our clients. These solutions vary from project-based work between one agency and its client to long-term, fully-integrated campaigns involving several of our companies working on behalf of a client. Furthermore, our agencies cover all major markets geographically and can operate in a single region or align work globally across many markets.

Our strategy is focused on improving our organic revenue growth and operating income. We are working to achieve a level of organic revenue growth comparable to industry peers and double-digit operating margins by 2008. We analyze period-to-period changes in our operating performance by determining the portion of the change that is attributable to foreign currency rates and the change attributable to the net effect of acquisitions and divestitures, with the remainder considered the organic change. For purposes of analyzing this change, acquisitions and divestitures are treated as if they occurred on the first day of the quarter during which the transaction occurred.

Although the U.S. Dollar is our functional currency for reporting purposes, a substantial portion of our revenues is generated in foreign currencies. Therefore, our reported results are affected by fluctuations in the currencies our

international businesses are conducted in, principally the Euro and Pound Sterling. During the three and six months ended June 30, 2007, the U.S. Dollar was weaker against both of these currencies as

compared to the respective periods in 2006. As a result, the net effect of foreign currency changes from the comparable prior-year periods was an increase in revenues and operating expenses in 2007.

As discussed in more detail in this MD&A:

Total revenue increased 7.8% and 5.3% for the three and six months ended June 30, 2007, respectively.

Organic revenue increase was 6.6% and 4.3% for the three and six months ended June 30, 2007, respectively, due to higher revenue from existing clients and net client wins.

Operating margin was 8.8% and 0.7% for the three and six months ended June 30, 2007, compared to 5.0% and (2.9%) for the three and six months ended June 30, 2006. Salaries and related expenses as a percentage of revenue was 61.1% and 66.4% for the three and six months ended June 30, 2007, compared with 61.7% and 66.3% for the three and six months ended June 30, 2006. Office and general expenses as a percentage of revenue was 30.4% and 33.1% for the three and six months ended June 30, 2007, compared with 32.9% and 36.4% for the three and six months ended June 30, 2006.

Operating expenses increased by \$51.1 and \$47.8 for the three and six months ended June 30, 2007, primarily due to higher salaries and related expenses.

Total salaries and related expenses increased 6.8% and 5.4% for the three and six months ended June 30, 2007. The organic increase was 5.5% and 4.2% for the three and six months ended June 30, 2007.

Total office and general expenses decreased 0.4% and 4.1% for the three and six months ended June 30, 2007. The organic decrease was 0.7% and 4.4% for the three and six months ended June 30, 2007.

During the second quarter of 2007, there were net reversals of tax reserves, primarily related to previously unrecognized tax benefits related to various items of income and expense, including approximately \$80.0 for certain worthless securities deductions, which was a result of the completion of a tax examination.

(Unaudited)

During the second quarter of 2007, revenue increased \$119.8, or \$101.9 on an organic basis, due to domestic organic revenue growth and changes in foreign currency exchange rates at both the Integrated Agency Networks (IAN) and Constituency Management Group (CMG) segments. Domestic organic growth was primarily driven by expanding business with existing clients, winning new business in advertising, public relations and sports marketing disciplines, and the completion of several projects within the events marketing business. The international organic increase was driven by higher revenue from existing clients, primarily in the Asia Pacific region at IAN and CMG, partially offset by decreased spending from existing clients in Continental Europe.

The components of the change in consolidated revenue for the first half of 2007 were as follows:

	Components of Change						
	Six Months Ended June 30, 2006	Net			Six Months Ended June 30, 2007	Change	
		Foreign Currency	Acquisitions/ Divestitures)	Organic		Organic	Total
Consolidated	\$ 2,859.9	72.3	(43.4)	123.0	\$ 3,011.8	4.3%	5.3%
Domestic	1,642.9		(5.3)	125.2	1,762.8	7.6%	7.3%
International	1,217.0	72.3	(38.1)	(2.2)	1,249.0	(0.2)%	2.6%
United Kingdom	264.3	27.3	(20.4)	6.2	277.4	2.3%	5.0%
Continental Europe	465.0	37.6	(11.1)	(21.8)	469.7	(4.7)%	1.0%
Latin America	126.3	4.6	(1.8)	0.5	129.6	0.4%	2.6%
Asia Pacific	220.3	6.6	(3.5)	11.6	235.0	5.3%	6.7%
Other	141.1	(3.8)	(1.3)	1.3	137.3	0.9%	(2.7)%

During the first half of 2007, revenue increased \$151.9, or \$123.0 on an organic basis, due to domestic organic revenue growth and changes in foreign currency exchange rates at both IAN and CMG, partially offset by net divestitures, primarily at IAN. Domestic organic growth was driven by factors similar to those noted above for the second quarter of 2007. The international organic decrease was driven by lower revenue from existing clients, primarily in the Continental Europe region at IAN and CMG, partially offset by increases primarily related to higher revenue from existing clients in the Asia Pacific region at IAN.

Refer to the segment discussion later in this MD&A for more detailed information on changes in revenue by segment.

Six months ended June 30,	1,895.8	49.7	(25.8)	78.8	1,998.5	4.2%	5.4%	

During the second quarter of 2007, salaries and related expenses increased \$64.6, or \$52.4 on an organic basis, primarily due to an increase in base salaries, benefits and temporary help of \$44.8 and an increase in cash bonus accruals and long-term incentive stock compensation expense of \$8.5. Changes in foreign currency rates impact our base salaries and benefits since a large portion of our workforce is located outside of the United States. Excluding the effect of foreign currency and net divestitures, base salaries, benefits and temporary help grew on an organic basis by approximately \$34.0 primarily to support growth in certain of our businesses and because of normal annual merit increases. Cash bonus accruals and long-term incentive stock compensation expense increased primarily due to improved operating performance in 2007 compared to 2006. Changes can occur in both short-term and long-term compensation awards based on projected results and could impact trends between various periods in the future.

During the first half of 2007, salaries and related expenses increased \$102.7, or \$78.8 on an organic basis, mostly for the same reasons as noted above for the second quarter. Base salaries, benefits and temporary help increased by \$72.4 and cash bonus accruals and long-term incentive stock compensation expense increased by \$25.8. Excluding the effect of foreign currency and net divestitures, base salaries, benefits and temporary help grew on an organic basis by approximately \$52.0. Long-term stock compensation incentive expense also increased due to the effect of equity-based awards granted in June 2006 and an accrual related to a one-time performance-based equity award granted in 2006 to certain executives that primarily affected the first quarter of 2007. This award is tied to our financial performance for the 2006-2008 period and the performance targets required for this award are significantly higher than for other grants under our current performance incentive plan.

Six months ended June 30,	1,040.1	27.3	(24.4)	(45.3)	997.7	(4.4)%	(4.1)%

Office and general expenses for the second quarter of 2007 decreased slightly primarily due to net divestitures and continued reductions in professional fees, partially offset by an increase in production expenses and the net effect of foreign currency changes. The decrease in professional fees was mainly attributable to reduced costs associated with projects related to financial and compliance matters, including internal control compliance, legal consultation and certain accounting projects, primarily at Corporate. The increase in production expenses primarily related to the pass-through costs involved in the completion of several projects at CMG.

Office and general expenses for the first half of 2007 decreased for reasons similar to those noted above for the second quarter. We expect professional fees to continue to decrease in 2007 compared to 2006.

Restructuring and Other Reorganization-Related (Reversals) Charges

For the three and six months ended June 30, 2007, net reversals primarily consist of reversals due to the utilization of previously vacated property by an agency at Draftfcb and adjustments to estimates primarily relating to our severance and lease termination costs.

Other income	8.0	24.3	6.5	24.9
Total	\$ (20.8)	\$ (1.3)	\$ (48.8)	\$ (20.9)

The increase in net interest expense during the second quarter of 2007 is largely due to a rise in interest rates and an increase in short term debt balances at some of our operations outside the U.S. The increase in net interest expense in the first half of 2007 is due to both cash and non-cash items. The cash portion of the increase was largely due to a rise in interest rates and increased short term debt balances at some of our operations outside the U.S., partially offset by increased interest income. The non-cash portion is largely attributable to amortization of issuance costs and deferred warrant costs incurred as a result of the ELF Financing transaction completed in June 2006 partially offset by reductions in interest expense associated with our long-term debt as a result of our debt exchanges that took place in the fourth quarter of 2006.

Sale of businesses and investments During the three months ended June 30, 2007, we sold several businesses within Draftfcb and Lowe for a loss of approximately \$10.0, partially offset by the sale of our remaining ownership interests in two agencies for a gain of \$2.8.

During the three months ended June 30, 2006, we sold an investment located in Asia Pacific for a gain of \$18.4. In addition, during the six months ended June 30, 2006 we sold our remaining ownership interest in an agency within Lowe Worldwide, for a gain of \$2.5.

Vendor discounts and credit adjustments We are in the process of settling our liabilities related to vendor discounts and credits primarily established as part of the 2004 Restatement. These adjustments reflect the reversal of certain liabilities as a result of settlements with clients and vendors or where the statute of limitations has lapsed.

INCOME TAXES

(Benefit of) provision for income taxes	(11.4)	5.0	(37.1)	(3.8)

For the three and six months ended June 30, 2007, the difference between the effective tax rate and the statutory rate of 35% is primarily due to state and local taxes, losses incurred in non-U.S. jurisdictions that receive no corresponding tax benefit and the recognition of previously unrecognized tax benefits. During the second quarter of 2007, there were net reversals of tax reserves, primarily related to previously unrecognized tax benefits, including approximately \$80.0 for certain worthless securities deductions associated with investments in consolidated subsidiaries, which was a result of the completion of a tax examination. The improvement in the effective tax rate as compared to the six months

ended June 30, 2006 is primarily attributable to the recognition of previously unrecognized tax benefits and a reduction in the losses incurred in non-U.S. jurisdictions that receive no benefit.

International	579.7	34.5	(13.7)	7.4	607.9	1.3%	4.9%

The revenue increase in the second quarter of 2007 was a result of organic increases and changes in foreign currency exchange rates, partially offset by net divestitures, primarily from the sale of several businesses at Draftfcb in the current and prior year. The domestic increase was a result of higher revenue from existing clients and net client wins, primarily at McCann Worldgroup and Draftfcb, and at two of our independent agencies, Hill Holliday and Deutsch. International revenues increased as the second quarter of 2007 benefited from the favorable effect of changes in foreign currency exchange rates and an organic increase due to higher revenue from existing clients at Lowe Worldwide in the Asia Pacific region and at Draftfcb in the Latin America region. This increase was partially offset by net divestitures of businesses, primarily at Draftfcb, and a decrease in spending by existing clients in Europe, primarily at McCann Worldgroup.

The revenue increase in the first half of 2007 was a result of organic increases and changes in foreign currency exchange rates, partially offset by net divestitures, primarily from the sale of several businesses at Draftfcb in current and prior year. The domestic increase was mostly organic as a result of higher revenue from existing clients and net client wins, primarily at McCann Worldgroup and Hill Holliday, one of our independent agencies. International revenues increased as the first half of 2007 benefited from the favorable effect of changes in foreign currency exchange rates. This was partially offset by a decrease at Draftfcb related to net divestitures of businesses and lower client spending in Europe and at McCann Worldgroup related to lower client spending in Latin America.

Operating income increased during the first half of 2007 due to an increase in revenue of \$106.7 and a decrease in office and general expenses, partially offset by an increase in salaries and related expenses. Salaries and related expenses increased due to factors similar to those noted above for the second quarter.

International	85.8	6.1	(5.6)	1.7	88.0	2.0%	2.6%

Revenue growth in the second quarter of 2007 was primarily a result of higher domestic revenue in the events marketing, public relations and sports marketing businesses. The domestic organic revenue increase was primarily due to the events marketing business completing several long-term projects during the quarter, and expanding business with existing clients in the public relations and sports marketing businesses. Revenues in the events marketing business can fluctuate due to the timing of completing long-term projects, as revenue is typically recognized when the project is complete. Furthermore, we generally act as principal for these projects and as such record the gross amount billed to the client as revenue and the related costs incurred as pass-through costs in office and general expenses. International revenues increased slightly primarily due to changes in foreign exchange rates and increased client spending across all disciplines in the Asia Pacific region, partially offset in Europe primarily due to project-based events that did not recur in the second quarter of 2007 and lower client spending. International revenues also declined due to a divestiture of a sports marketing business in 2006.

Operating income for the second quarter of 2007 increased primarily as a result of an increase in revenues of \$35.5, partially offset by increases in office and general expenses and salaries and related expenses. Higher salaries and related expenses primarily related to the hiring of additional staff in the public relations businesses to support their revenue growth. Office and general expenses increased primarily due to production expenses related to the completion of several projects in the events marketing business.

Operating income for the first half of 2007 increased slightly primarily as a result of an increase in revenues of \$45.2, partially offset by increases in salaries and related expenses and office and general expenses. Corporate and other expenses for the second quarter of 2007 decreased compared to prior year primarily due to reduced professional fees and higher amounts allocated to operating divisions, partially offset by increased salaries and related expenses. Lower professional fees were primarily attributable to reduced costs associated with projects related to financial and compliance matters, including internal control compliance, legal consultation and certain accounting projects. Amounts allocated to operating divisions increased primarily due to the implementation of new information technology-related projects and the charging of shared service and technology expenses. Salaries and related expenses increased due to higher accruals for long-term incentive compensation and cash bonus awards and higher headcount due to the transfer of employees from the agency level to support our technology and regional corporate initiatives.

Corporate and other expenses for the first half of 2007 decreased compared to prior year for the same reasons as noted above for the second quarter. In addition, salaries and related expenses increased due to a one-time performance-based equity award granted in 2006 to a limited number of senior executives.

LIQUIDITY AND CAPITAL RESOURCES***CASH FLOW OVERVIEW***

Cash, cash equivalents and marketable securities decreased by \$476.4 to \$1,480.7 during the first half of 2007 primarily due to working capital usage, which is seasonally typical. Of this change, marketable securities increased by \$258.8, primarily as a result of our net purchases of auction rate securities in the first half of 2007. A summary of our cash flow activities is as follows:

	Six Months Ended June 30,	
	2007	2006
Net cash used in operating activities	\$ (338.7)	\$ (511.4)
Net cash used in investing activities	(389.1)	(330.7)
Net cash used in financing activities	(16.5)	(108.9)

Operating Activities

During the first half of 2007, we used working capital of \$415.6. Working capital reflects changes in accounts receivable, expenditures billable to clients, prepaid expenses and other current assets, accounts payable and accrued liabilities. During the first half of 2007, reductions in accounts payable of \$214.1 and accrued liabilities of \$294.4 were partially offset by a reduction in accounts receivable of \$147.8. The reduction in accrued liabilities was primarily related to payment of cash incentive awards earned during 2006. While employee incentive awards are accrued throughout the year, they are paid during the first quarter of the subsequent year.

The timing of media buying on behalf of our clients affects our working capital and operating cash flow. In most of our businesses, we collect funds from our clients that we use, on their behalf, to pay production costs and media costs. The amounts involved substantially exceed our revenues, and primarily affect the level of accounts receivable, expenditures billable to clients, accounts payable and accrued media and production liabilities. Our assets include both cash received and accounts receivable from clients for these pass-through arrangements, while our liabilities include amounts owed on behalf of clients to media and production suppliers. Generally, we pay production and media charges after we have received funds from our clients, and our risk from client nonpayment has historically not been significant.

The net income of \$11.1 during the first half of 2007 includes non-cash items that are not expected to generate cash or require the use of cash. Net non-cash expense items of \$74.2 primarily include the deferred income tax benefit, depreciation of fixed assets and the amortization of intangible assets, restricted stock awards and non-cash compensation.

Investing Activities

Cash used in investing activities during the first half of 2007 primarily reflects net purchases of short-term marketable securities, acquisitions and capital expenditures. Net purchases of marketable securities were from purchases of auction rate securities, which are classified as short-term marketable securities based upon our evaluation of the maturity dates associated with the underlying bonds. The cash flows attributable to short-term marketable securities vary from one period to another because of changes in the maturity profile of our treasury investments.

Payments for acquisitions relate to purchases of agencies and deferred payments on prior acquisitions. During the six months ended June 30, 2007, we made three acquisitions: a) a full-service advertising agency in Latin America, b) Reprise Media, which is a full-service search engine marketing firm in North America,

and c) the remaining interests in a full-service advertising agency in India in which we previously held a 49% interest. Total cash consideration for these acquisitions was \$80.2. Subsequent to June 30, 2007, we acquired the remaining interests in another one of our businesses in India.

Capital expenditures of \$66.5 primarily related to leasehold improvements and computer hardware.

Financing Activities

Cash used in financing activities during the first half of 2007 primarily reflects dividend payments of \$13.8 on our Series B Preferred Stock and distributions to minority interests, partially offset by short-term borrowings.

LIQUIDITY OUTLOOK

We expect our cash and cash equivalents and marketable securities to be sufficient to meet our anticipated operating requirements at a minimum for the next twelve months.

We believe that a conservative approach to liquidity is appropriate for our Company, in view of the cash requirements resulting from, among other things, high professional fees, liabilities to our clients for vendor discounts and credits, any potential penalties or fines that may have to be paid in connection with the ongoing SEC investigation, the normal cash variability inherent in our operations and other unanticipated requirements. In addition, until our margins consistently improve in connection with our turnaround, cash generation from operations could be challenged in certain periods.

A reduction in our liquidity in future periods as a result of the above items or other business objectives could lead us to seek new or additional sources of liquidity to fund our working capital needs. From time to time we evaluate market conditions and financing alternatives for opportunities to raise additional financing or otherwise improve our liquidity profile and enhance our financial flexibility. There can be no guarantee that we would be able to access new sources of liquidity on commercially reasonable terms, or at all.

Funding Requirements

Our most significant funding requirements include: our operations, non-cancelable operating lease obligations, capital expenditures, payments related to vendor discounts and credits, debt service, preferred stock dividends, contributions to pension and postretirement plans, acquisitions and taxes.

On March 15, 2008 holders of our \$400.0 4.50% Convertible Senior Notes due 2023 may require us to repurchase these Notes for cash at par. The remainder of our debt profile is primarily long-term, with maturities scheduled from 2009 to 2023.

Of the liabilities recognized as part of the 2004 Restatement, we estimate that we will pay approximately \$100.0 related to vendor discounts and credits, internal investigations and international compensation arrangements over the next 12 months.

Our Series B Preferred Stock provides for a quarterly dividend of \$13.125 per share, or \$6.9. We have not paid any dividends on our common stock since December of 2002.

We continue to evaluate strategic opportunities to grow the business and increase our ownership interests in current investments, particularly to develop the digital and marketing services components of our business and to expand our presence in key markets, including Brazil, Russia, India and China.

We have various tax years under examination in various countries in which we have significant business operations. We do not know whether these examinations will, in the aggregate, result in our paying additional income taxes, which we believe are adequately reserved for.

FINANCING AND SOURCES OF FUNDS

Substantially all of our operating cash flow is generated by our agencies. Our liquid assets are held primarily at the holding company level, and to a lesser extent at our largest subsidiaries.

In recent years, we have obtained long-term financing in the capital markets by issuing debt securities, convertible debt securities and convertible preferred stock. We have also used borrowing facilities to provide us with liquidity for working capital needs. In connection with the ELF Financing, we have two series of equity warrants outstanding and have entered into call spread transactions in connection with one of the series of equity warrants.

Credit Facilities

Our principal credit facility is our \$750.0 Three-Year Credit Agreement (the "Credit Agreement"), which we can utilize for cash advances and for letters of credit up to \$600.0. This is a revolving facility under which amounts borrowed may be repaid and borrowed again, and the aggregate available amount of letters of credit may decrease or increase, subject to the overall limit of \$750.0 and the \$600.0 limit on letters of credit. We have not drawn on the Credit Agreement or our previous committed credit agreements since late 2003.

In addition to the Credit Agreement, we have uncommitted credit facilities with various banks that permit borrowings at variable interest rates. We use our uncommitted credit lines for working capital needs at some of our operations outside the United States and the amount outstanding as of June 30, 2007 was \$90.0. If we lose access to these credit lines we would have to provide funding directly to some overseas operations. The weighted-average interest rate on this outstanding balance was approximately 6%.

Letters of Credit

We are required from time to time to post letters of credit, primarily to support our commitments, or those of our subsidiaries, to purchase media placements, mostly in locations outside the United States, or to satisfy other obligations. These letters of credit are generally backed by letters of credit issued under the Credit Agreement. As of June 30, 2007, the aggregate amount of outstanding letters of credit issued for our account under the Credit Agreement was \$222.9. These letters of credit have historically not been drawn upon.

Cash Pooling

We aggregate our net domestic cash position on a daily basis. Outside the United States, we use cash pooling arrangements with banks to help manage our liquidity requirements. In these pooling arrangements, several Interpublic agencies agree with a single bank that the cash balances of any of the agencies with the bank will be subject to a full right of setoff against amounts the other agencies owe the bank, and the bank provides overdrafts as long as the net balance for all the agencies does not exceed an agreed-upon level. Typically each agency pays interest on outstanding overdrafts and receives interest on cash balances. Our consolidated balance sheets reflect cash net of

overdrafts for each pooling arrangement. As of June 30, 2007 a gross amount of approximately \$1,039.2 in cash was netted against an equal gross amount of overdrafts under pooling arrangements.

CREDIT AGENCY RATINGS

Our long-term debt credit ratings as of June 30, 2007 were Ba3 with stable outlook, B with positive outlook and BB- with stable outlook, as reported by Moody's Investors Service, Standard & Poor's and Fitch Ratings, respectively. A downgrade in our credit ratings could adversely affect our ability to access capital and could result in more stringent covenants and higher interest rates under the terms of any new indebtedness.

INTERNAL CONTROL OVER FINANCIAL REPORTING

Our internal control over financial reporting is described in detail in Management's Assessment of Internal Control Over Financial Reporting located in Item 8, Financial Statements and Supplementary Data, and in Item 9A, Controls and Procedures, in our 2006 Annual Report on Form 10-K.

CRITICAL ACCOUNTING ESTIMATES

Our significant accounting policies are described in Note 1 to the Consolidated Financial Statements for the year ended December 31, 2006 included in our 2006 Annual Report on Form 10-K. As summarized in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, in our 2006 Annual Report on Form 10-K, we believe that certain of these policies are critical because they are important to the presentation of our financial condition and results of operations and they require management's most difficult, subjective or complex judgments, often as a result of the need to estimate the effect of matters that are inherently uncertain. We base our estimates on historical experience and on other factors that we consider reasonable under the circumstances. Estimation methodologies are applied consistently from year to year, and there have been no significant changes in the application of critical accounting estimates since December 31, 2006 except as noted below in regards to income taxes. Actual results may differ from these estimates under different assumptions or conditions.

On January 1, 2007 we adopted FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, (FIN 48) which prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position that an entity takes or expects to take in a tax return. Additionally, FIN 48 provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. The assessment of recognition and measurement requires critical estimates and the use of complex judgments. We evaluate our tax positions using a more likely than not recognition threshold and then we apply a measurement assessment to those positions that meet the recognition threshold.

RECENT ACCOUNTING STANDARDS

Please refer to Note 11 to our unaudited Consolidated Financial Statements for a discussion of recent accounting standards that we have not yet been required to implement, but which may affect us in the future, as well as those accounting standards that have been adopted during 2007.

Item 3. *Quantitative and Qualitative Disclosures about Market Risk*

There has been no significant change in our exposure to market risk during the six months ended June 30, 2007. For a discussion of our exposure to market risk, refer to Item 7A, Quantitative and Qualitative Disclosures About Market Risk, in our 2006 Annual Report on Form 10-K.

Item 4. *Controls and Procedures*

Disclosure Controls and Procedures

We have carried out an evaluation under the supervision of, and with the participation of, our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of June 30, 2007. We continue to have numerous material weaknesses in our internal control over financial reporting as noted in Management's Assessment of Internal Control over Financial Reporting located in Item 8, Financial Statements and Supplementary Data, in our 2006 Annual Report on Form 10-K. Based on an evaluation of these material weaknesses, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures are not effective to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported, within the time periods specified in the applicable rules and forms, and that it is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives.

Changes in internal control over financial reporting

There has been no change in internal control over financial reporting in the quarter ended June 30, 2007 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting. We are continuing to implement the remedial actions outlined in Ongoing Remediation of Material Weaknesses in Internal Control over Financial Reporting as of December 31, 2006 located in Item 8, Financial Statements and Supplementary Data, in our 2006 Annual Report on Form 10-K.

PART II OTHER INFORMATION

Item 1. *Legal Proceedings*

Information about our legal proceedings is set forth in Note 10 to the unaudited consolidated financial statements included in this report.

Item 1A. *Risk Factors*

In the second quarter of 2007, there have been no material changes in the risk factors we have previously disclosed. See Item 1A, Risk Factors, in our 2006 Annual Report on Form 10-K. The following risk factor has been updated to reflect recent communications with the SEC, as previously disclosed by the Company in a current report on Form 8-K filed June 14, 2007.

The ongoing SEC investigation regarding our accounting restatements could adversely affect us.

The SEC opened a formal investigation in response to the restatement we first announced in August 2002, and the investigation expanded to encompass the 2004 Restatement. We have also responded to inquiries from the SEC staff concerning the restatement of the first three quarters of 2005 that we made in our 2005 Annual Report on Form 10-K. We continue to cooperate with the investigation. We expect that the investigation will result in monetary liability, but as settlement discussions have not yet commenced, we cannot reasonably estimate the amount, range of amounts or timing of a resolution. Accordingly, we have not yet established any provision relating to these matters.

The SEC staff has informed us that it intends to seek approval from the Commission to enter into settlement discussions with us and, failing a settlement, to commence an action charging the Company with various violations of the federal securities laws. In that connection, the staff has sent the Company a Wells notice, which invites us to make a responsive submission before the staff makes a final determination concerning its recommendation to the Commission. We expect to discuss settlement with the staff once the Commission authorizes the staff to engage in such discussions. We cannot at this time predict what the Commission will authorize or the outcome of any settlement negotiations.

Item 2. *Unregistered Sales of Equity Securities and Use of Proceeds*

(a) During the second quarter of 2007, we engaged in one transaction, which is described below, in which we issued shares of our common stock, par value \$.10 per share, that were not registered under the Securities Act of 1933, as amended (the Securities Act).

1. On June 6, 2007, we issued 24,639 shares of our common stock as part of a deferred payment of purchase price to five former shareholders of a company that one of our subsidiaries had acquired in the third quarter of 2001. The shares were valued at \$288,472 as of the date of issuance and were issued without registration in reliance on Section 4(2) of the Securities Act, based on the sophistication of the former shareholders of the acquired company. The former shareholders had access to all the documents filed by us with the SEC.

Table of Contents

(c) The following table provides information regarding our purchases of our equity securities during the period from April 1, 2007 to June 30, 2007:

	Total Number of Shares (or Units) Purchased	Average Price Paid per Share (or Unit)⁽²⁾	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
April 1-30	3,158 shares	\$ 12.32		
May 1-31	536,063 shares	\$ 11.68		
June 1-30	31,876 shares	\$ 11.56		
Total ⁽¹⁾	571,097 shares	\$ 11.67		

(1) Consists of restricted shares of our common stock withheld under the terms of grants under employee stock-based compensation plans to offset tax withholding obligations that occurred upon vesting and release of restricted shares during each month of the second quarter of 2007 (the Withheld Shares).

(2) The average price per month of the Withheld Shares was calculated by dividing the aggregate value of the tax withholding obligations for each month by the aggregate number of shares of common stock withheld each month.

(d) The terms of our outstanding series of preferred stock do not permit us to pay dividends on our common stock unless all accumulated and unpaid dividends on our preferred stock have been or contemporaneously are declared and paid or provision for the payment thereof has been made.
