FORWARD-LOOKING STATEMENTS

When used in this Form 10-Q or future filings by Oriental Financial Group Inc. (the "Group") with the Securities and Exchange Commission (the "SEC"), in the Group's press releases or other public or shareholder communications, or in oral statements made with the approval of an authorized executive officer, the words or phrases "would be," "will allow," "intends to," "will likely result," "are expected to," "will continue," "is anticipated," "estimated," "project," "believe," expressions are intended to identify forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995.

The future results of the Group could be affected by subsequent events and could differ materially from those expressed in forward-looking statements. If future events and actual performance differ from the Group's assumptions, the actual results could vary significantly from the performance projected in the forward-looking statements.

The Group wishes to caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made and are based on management's current expectations, and to advise readers that various factors, including local, regional and national economic conditions, substantial changes in levels of market interest rates, credit and other risks of lending and investment activities, competitive, and regulatory factors, legislative changes and accounting pronouncements, could affect the Group's financial performance and could cause the Group's actual results for future periods to differ materially from those anticipated or projected. The Group does not undertake, and specifically disclaims, any obligation to update any forward-looking statements to reflect occurrences or unanticipated events or circumstances after the date of such statements.

ORIENTAL FINANCIAL GROUP INC.

Notes to Unaudited Consolidated Financial Statements

NOTE 1 BASIS OF PRESENTATION

The accounting and reporting policies of Oriental Financial Group Inc. (the Group or Oriental) conform with U.S. generally accepted accounting principles (GAAP) and to financial services industry practices.

The unaudited consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). In the opinion of management, these consolidated financial statements include all adjustments necessary, all of which are of normal recurring nature, to present fairly the consolidated statement of financial condition as of June 30, 2009, and December 31, 2008, and the consolidated results of operations and cash flows for the quarters and six-month periods ended June 30, 2009 and 2008. All significant intercompany balances and transactions have been eliminated in the accompanying unaudited consolidated financial statements. Certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such SEC rules and regulations. Management believes that the disclosures made are adequate to make the information presented not misleading. The results of operations and cash flows for the periods ended June 30, 2009 and 2008 are not necessarily indicative of the results to be expected for the full year. For further information, refer to the consolidated financial statements and footnotes thereto for the year ended December 31, 2008, included in the Group s 2008 annual report on Form 10-K.

Nature of Operations

The Group is a publicly-owned financial holding company incorporated under the laws of the Commonwealth of Puerto Rico. It has four direct subsidiaries, Oriental Bank and Trust (the Bank), Oriental Financial Services Corp. (Oriental Financial Services), Oriental Insurance, Inc. (Oriental Insurance) and Caribbean Pension Consultants, Inc., which is located in Boca Raton, Florida. The Group also has a special purpose entity, Oriental Financial (PR) Statutory Trust II (the Statutory Trust II). Through these subsidiaries and its divisions, the Group provides a wide range of financial services such as mortgage, commercial and consumer lending, financial planning, insurance sales, money management and investment banking and brokerage services, as well as corporate and individual trust services. Note 10 to the unaudited consolidated financial statements presents further information about the operations of the Group s business segments.

The main offices of the Group and its subsidiaries are located in San Juan, Puerto Rico. The Group is subject to examination, regulation and periodic reporting under the U.S. Bank Holding Company Act of 1956, as amended, which is administered by the Board of Governors of the Federal Reserve System.

The Bank operates through 23 financial centers located throughout Puerto Rico and is subject to the supervision, examination and regulation of the Office of the Commissioner of Financial Institutions of Puerto Rico (OCIF) and the Federal Deposit Insurance Corporation (FDIC). The Bank offers banking services such as commercial and consumer lending, saving and time deposit products, financial planning, and corporate and individual trust services, and capitalizes on its commercial banking network to provide mortgage lending products to its clients. Oriental International Bank Inc. (OIB), a wholly-owned subsidiary of the Bank, operates as an international banking entity (IBE) pursuant to the International Banking Center Regulatory Act of Puerto Rico, as amended. OIB offers the Bank certain Puerto Rico tax advantages. OIB activities are limited under Puerto Rico law to persons and assets/liabilities located outside of Puerto Rico.

Oriental Financial Services is subject to the supervision, examination and regulation of the Financial Industry Regulatory Authority (FINRA), the SEC, and the OCIF. Oriental Insurance is subject to the supervision, examination and regulation of the Office of the Commissioner of Insurance of Puerto Rico.

Table of Contents

The Group's mortgage banking activities are conducted through a division of the Bank. The mortgage banking activities primarily consist of the origination and purchase of residential mortgage loans for the Group's own portfolio and from time to time, if the conditions so warrant, the Group may engage in the sale of such loans to other financial institutions in the secondary market. The Group originates Federal Housing Administration (FHA)-insured and Veterans Administration (VA)-guaranteed mortgages that are primarily securitized for issuance of Government National Mortgage Association (GNMA) mortgage-backed securities which can be resold to individual or institutional investors in the secondary market. Conventional loans that meet the underwriting requirements for sale or exchange under standard Federal National Mortgage Association (the FNMA) or the Federal Home Loan Mortgage Corporation (the FHLMC) programs are referred to as conforming mortgage loans and are also securitized for issuance of FNMA or FHLMC mortgage-backed securities. The Group is an approved seller of FNMA, as well as FHLMC, mortgage loans for issuance of FNMA and FHLMC mortgage-backed securities. The Group is also an approved issuer of GNMA mortgage-backed securities. The Group outsources the servicing of the GNMA, FNMA and FHLMC pools that it issues and of its mortgage loan portfolio.

Significant Accounting Policies

The unaudited consolidated financial statements of the Group are prepared in accordance with GAAP and with the general practices within the financial services industry. In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The Group believes that of its significant accounting policies, the following may involve a higher degree of judgment and complexity.

Allowance for Loan Losses

The Group follows a systematic methodology to establish and evaluate the adequacy of the allowance for loan losses to provide for inherent losses in the loan portfolio. This methodology includes the consideration of factors such as economic conditions, portfolio risk characteristics, prior loss experience, and results of periodic credit reviews of individual loans. The provision for loan losses charged to current operations is based on such methodology. Loan losses are charged and recoveries are credited to the allowance for loan losses.

Larger commercial loans that exhibit potential or observed credit weaknesses are subject to individual review and grading. Where appropriate, allowances are allocated to individual loans based on management's estimate of the borrower's ability to repay the loan given the availability of collateral, other sources of cash flow and legal options available to the Group.

Included in the review of individual loans are those that are impaired, as provided in the Statement of Financial Accounting Standards (SFAS) No. 114, *Accounting by Creditors for Impairment of a Loan*. A loan is considered impaired when, based on current information and events, it is probable that the Group will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Impaired loans are measured based on the present value of expected future cash flows discounted at the loan's effective interest rate, or as a practical expedient, at the observable market price of the loan or the fair value of the collateral, if the loan is collateral dependent. Loans are individually evaluated for impairment, except large groups of small balance homogeneous loans that are collectively evaluated for impairment under the provisions of SFAS No. 5, *Accounting for Contingencies*, as amended, and loans that are recorded at fair value or at the lower of cost or market. The Group measures for impairment all commercial loans over \$250 thousand and over 90-days past-due. The portfolios of mortgage and consumer loans are considered homogeneous, and are evaluated collectively for impairment. The Group, using a rating system, applies an overall allowance percentage to each loan portfolio category based on historical credit losses adjusted for current conditions and trends. This delinquency-based calculation is the starting point for management's determination of the required level of the allowance for loan losses. Other data considered in this determination includes: the overall historical loss trends and other information including underwriting standards and economic trends.

Loan loss ratios and credit risk categories are updated quarterly and are applied in the context of GAAP and the importance of depository institutions having prudent, conservative, but not excessive loan allowances that fall within

an acceptable range of estimated losses. While management uses current available information in estimating possible loan losses, factors beyond the Group's control such as those affecting general economic conditions may require future changes to the allowance.

-6-

Table of Contents

Financial Instruments

Certain financial instruments including derivatives, trading securities and investment securities available-for-sale are recorded at fair value and unrealized gains and losses are recorded in other comprehensive income or as part of non-interest income, as appropriate. Fair values are based on listed market prices, if available. If listed market prices are not available, fair value is determined based on other relevant factors, including price quotations for similar instruments. The fair values of certain derivative contracts are derived from pricing models that consider current market and contractual prices for the underlying financial instruments as well as time value and yield curve or volatility factors underlying the positions.

SFAS No. 157, *Fair Value Measurements* (SFAS 157), establishes a fair value hierarchy that prioritizes the inputs of valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under SFAS 157 are described below:

Basis of Fair Value Measurement

Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 Quoted prices in markets that are not considered to be active or financial instruments for which all significant inputs are observable, either directly or indirectly;

Level 3 Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

Impairment of Investment Securities

The Group conducts periodic reviews to identify and evaluate each investment in an unrealized loss position, in accordance with FASB Staff Position (FSP) No. 115-1, *The Meaning of Other-Than-Temporary Impairment and its Application to Certain Investments* (FSP FAS 115-1). In June 2009, the Group adopted FSP FAS 115-2 and 124-2,

Recognition and Presentation of Other-Than-Temporary Impairments, which changed the accounting requirements for other than temporary impairments for debt securities, and in certain circumstances, separates the amount of total impairment into credit and noncredit-related amounts. The review takes into consideration current market conditions, issuer rating changes and trends, the credit worthiness of the obligator of the security, current analysts' evaluations, failure of the issuer to make scheduled interest or principal payments, the Group's intent to not sell the security or whether it is more-likely-than-not that the Group will be required to sell the debt security before its anticipated recovery, as well as other qualitative factors. The term other than temporary impairments is not intended to indicate that the decline is permanent, but indicates that the prospects for a near-term recovery of value is not necessarily favorable, or that there is a lack of evidence to support a realizable value equal to or greater than the carrying value of the investment. Any portion of a decline in value associated with credit loss is recognized in income with the remaining noncredit-related component being recognized in other comprehensive income. A credit loss is determined by assessing whether the amortized cost basis of the security will be recovered, by comparing the present value of cash flows expected to be collected from the security, computed using original yield as the discount rate, to the amortized cost basis of the security. The shortfall of the present value of the cash flows expected to be collected in relation to the amortized cost basis is considered to be the credit loss.

Factors considered in determining whether a loss is temporary include:

the length of time to which fair value has been below cost;

the severity of the impairment;

the cause of the impairment and the financial condition and near-term prospects of the issuer;

activity in the market of the issuer which may indicate adverse credit conditions.

Table of Contents

The Group's review for impairment generally entails:

intent to sell the debt security;

if it is more likely than not that the entity will be required to sell the debt securities before the anticipated recovery;

identification and evaluation of investments that have indications of possible other-than-temporary impairment;

analysis of individual investments that have fair values less than amortized cost, including consideration of the length of time the investment has been in an unrealized loss position and the expected recovery period;

discussion of evidential matter, including an evaluation of factors or triggers that could cause individual investments to qualify as having other-than-temporary impairment and those that would not support other-than-temporary impairment; and

documentation of the results of these analyses.

The extent of the Group's analysis regarding credit quality and the stress on assumptions used in the analysis have been refined for securities where the current fair value or other characteristics of the security warrant. Given the declines in fair values and length of time in which non-agency collateralized mortgage obligations and structured credit investments have been in an unrealized loss position, general concerns regarding housing prices and the delinquency and default rates on the mortgage loans and credit spreads underlying these securities, the Group's analysis for identifying securities for which all principal and interest contractually due might not be recovered have been performed.

Income Taxes

In preparing the unconsolidated financial statements, the Group is required to estimate income taxes. This involves an estimate of current income tax expense together with an assessment of temporary differences resulting from differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The determination of current income tax expense involves estimates and assumptions that require the Group to assume certain positions based on its interpretation of current tax laws and regulations. Changes in assumptions affecting estimates may be required in the future and estimated tax assets or liabilities may need to be increased or decreased accordingly. The accrual for tax contingencies is adjusted in light of changing facts and circumstances, such as the progress of tax audits, case law and emerging legislation. When particular matters arise, a number of years may elapse before such matters are audited and finally resolved. Favorable resolution of such matters could be recognized as a reduction to the Group's effective rate in the year of resolution. Unfavorable settlement of any particular issue could increase the effective rate and may require the use of cash in the year of resolution.

The determination of deferred tax expense or benefit is based on changes in the carrying amounts of assets and liabilities that generate temporary differences. The carrying value of the Group's net deferred tax assets assumes that the Group will be able to generate sufficient future taxable income based on estimates and assumptions. If these estimates and related assumptions change in the future, the Group may be required to record valuation allowances against its deferred tax assets resulting in additional income tax expense in the consolidated statements of operations. Management evaluates the realizability of the deferred tax assets on a regular basis and assesses the need for a valuation allowance. A valuation allowance is established when management believes that it is more likely than not that some portion of its deferred tax assets will not be realized. Changes in valuation allowance from period to period are included in the Group's tax provision in the period of change.

In addition to valuation allowances, the Group establishes accruals for uncertain tax positions when, despite the belief that Group's tax return positions are fully supported, the Group believes that certain positions are likely to be challenged. The uncertain tax positions accruals are adjusted in light of changing facts and circumstances, such as the progress of tax audits, case law and emerging legislation. The Group's uncertain tax positions accruals are reflected as

income tax payable as a component of accrued expenses and other liabilities.

-8-

Table of Contents

The Group follows the provisions of Financial Accounting Standard Board (FASB) Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes* an interpretation of FASB Statement No. 109 , which contains a two-step approach to recognizing and measuring uncertain tax positions accounted for in accordance with SFAS 109.

The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation process, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely of being realized upon ultimate settlement.

The Group's policy to include interest and penalties related to unrecognized tax benefits within the provision for taxes on the consolidated statements of operations did not change as a result of implementing the provisions of FIN 48.

Equity-Based Compensation Plans

On April 25, 2007, the Board of Directors (the Board) adopted the Oriental Financial Group Inc. 2007 Omnibus Performance Incentive Plan (the Omnibus Plan), which was subsequently approved by the Group's stockholders at their annual meeting held on June 27, 2007. The Omnibus Plan provides for equity-based compensation incentives through the grant of stock options, stock appreciation rights, restricted stock, restricted stock units and dividend equivalents, as well as equity-based performance awards.

The purpose of the Omnibus Plan is to provide flexibility to the Group to attract, retain and motivate directors, officers, and key employees through the grant of awards based on performance and to adjust its compensation practices to the best compensation practice and corporate governance trends as they develop from time to time. The Omnibus Plan is further intended to motivate high levels of individual performance coupled with increased shareholder returns. Therefore, awards under the Omnibus Plan (each, an Award) are intended to be based upon the recipient's individual performance, level of responsibility and potential to make significant contributions to the Group. Generally, the Omnibus Plan will terminate as of (a) the date when no more of the Group's shares of common stock are available for issuance under the Omnibus Plan, or, if earlier, (b) the date the Omnibus Plan is terminated by the Group's Board.

The Board's Compensation Committee (the Committee), or such other committee as the Board may designate, has full authority to interpret and administer the Omnibus Plan in order to carry out its provisions and purposes. The Committee has the authority to determine those persons eligible to receive an Award and to establish the terms and conditions of any Award. The Committee may delegate, subject to such terms or conditions or guidelines as it shall determine, to any employee or group of employees any portion of its authority and powers under the Omnibus Plan with respect to participants who are not directors or executive officers subject to the reporting requirements under Section 16(a) of the Securities Exchange Act of 1934. Only the Committee may exercise authority in respect of Awards granted to such participants.

The Omnibus Plan replaced and superseded the Oriental Financial Group Inc. 1996, 1998 and 2000 Incentive Stock Option Plans (the Stock Option Plans). All outstanding stock options under the Stock Option Plans continue in full force and effect, subject to their original terms and conditions.

The Group follows the fair value method of recording stock-based compensation. Effective July 1, 2005, the Group adopted SFAS No. 123R *Share-Based Payment* (SFAS 123R), an amendment of SFAS No. 123 *Accounting for Stock-Based Compensation* using the modified prospective transition method. SFAS 123R requires measurement of the cost of employee services received in exchange for an award of equity instruments based on the grant date fair value of the award with the cost to be recognized over the service period. SFAS No. 123R applies to all awards unvested and granted after this effective date and awards modified, repurchased, or cancelled after that date.

The following assumptions were used in estimating the fair value of the options granted:

	Six-Month Period Ended June 30,	
	2009	2008
Weighted Average Assumptions:		
Dividend yield	4.74%	4.40%
Expected volatility	36.14%	31.86%

Risk-free interest rate		4.40%	4.33%
Expected life (in years)		8.5	8.5

-9-

Table of Contents

The expected term of share options granted represents the period of time that share options granted are expected to be outstanding. Expected volatilities are based on historical volatility of the Group's shares over the most recent period equal to the expected term of the share option.

Accumulated Other Comprehensive Loss

Accumulated other comprehensive income (loss), net of income tax, as of June 30, 2009 and December 31, 2008 consisted of:

	June, 30 2009	December 31, 2008
	(In thousands)	
Unrealized loss on securities available-for-sale which are not other-than-temporarily impaired	\$ (11,037)	\$ (128,191)
Unrealized loss on securities available-for-sale which a portion of other-than-temporary impairment has been recorded in earnings	(102,968)	
Tax effect of accumulated other comprehensive income	4,165	6,004
	\$(109,840)	\$ (122,187)

Subsequent Events

Subsequent to June 30, 2009, as part of its general banking and asset and liability management strategies, the Group executed a \$200 million deleverage of its balance sheet at the holding company level by terminating certain repurchase agreements at a cost of approximately \$17.5 million (before income taxes). Subsequent events have been evaluated through August 7, 2009, when the Financial Statements were available to be issued.

Recent Accounting Developments***FSP FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly***

FSP FAS 157-4, issued by the FASB in April 2009, provides additional guidance for estimating fair value in accordance with SFAS No. 157 when the volume and level of activity for the asset or liability have decreased significantly. FSP FAS 157-4 also provides guidance on identifying circumstances that indicate a transaction is not orderly. The Group adopted FSP FAS 157-4 effective April 1, 2009 and complied with its guidance in determining the fair value of its securities at June 30, 2009.

FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments

FSP FAS 115-2 and FAS 124-2, issued by the FASB in April 2009, amend the other-than-temporary impairment guidance in U.S. GAAP for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. These FSP do not amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities. This FSP requires that for securities that are not expected to be sold, the credit-related portion of other-than-temporary impairment losses be recognized in earnings while the non-credit related portion is recognized in other comprehensive loss. The Group adopted the provisions of FSP FAS 115-2 and FAS 124-2 on April 1, 2009. As a result of its adoption, a net other than temporary impairment loss of \$4.4 million was recognized in earnings and \$58.2 million non-credit related impairment unrealized loss was recognized in other comprehensive loss. Also in accordance with the FSP, the Group reclassified the noncredit-related portion of an other-than-temporary impairment loss previously recognized in earnings in 2008. The reclassification was reflected as a cumulative effect adjustment of \$14.4 million that increased retained earnings and accumulated other comprehensive loss.

Table of Contents

FSP FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments*

FSP FAS 107-1 and APB 28-1, issued by the FASB in April 2009, amend FASB Statement No. 107, Disclosures about Fair Value of Financial Instruments, to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. These FSP also amend APB Opinion No. 28, Interim Financial Reporting, requiring to (a) disclose in the body or in the accompanying notes of its financial statements for interim and annual reporting periods the fair value of all financial instruments for which it is practicable to estimate that value, whether recognized or not recognized in the statement of financial position, as required by SFAS No. 107, (b) disclose in the notes, fair value information presented together with the related carrying amount in a form that makes it clear whether the fair value and carrying amount represent assets or liabilities and how the carrying amount relates to what is reported in the statement of financial position and (c) disclose the method(s) and significant assumptions used to estimate the fair value of financial instruments and describe changes in method(s) and significant assumptions, if any, during the period. The provisions and disclosures of FSP FAS 107-1 and APB 28-1 were adopted, as required, effective for the period ended June 30, 2009.

FAS 165 *Subsequent Events*

In May 2009, the FASB issued FAS 165 which establishes general standards of accounting for and disclosures of events that occur after the balance sheet date but before the financial statements are issued or are available to be issued. It requires the disclosure of the date through which an entity has evaluated subsequent events. We adopted the new disclosure requirements in our June 30, 2009 condensed consolidated financial statements.

FAS 166, *Accounting for Transfers of Financial Assets* and FAS 167, *Amendments to FASB Interpretation No. 46(R)*

In June 2009, FASB issued FAS 166 and FAS 167, which change the way entities account for securitizations and special-purpose entities, and will have a material effect on how banking organizations account for off-balance sheet vehicles. The new standards amend FAS 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*", and FASB Interpretation No. 46(R), *Consolidation of Variable Interest Entities*". Both Statements 166 and 167 will be effective January 1, 2010 for companies reporting earnings on a calendar-year basis. The Group anticipates that adoption of FAS 166 and 167 will not have a material impact on the Group's consolidated financial statements.

FAS 168, *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles a replacement of FASB Statement No. 162*

FAS 168, issued by the FASB in June 2009, amends FAS 162, *The Hierarchy of Generally Accepted Accounting Principles, to modify the GAAP hierarchy to include only two levels of GAAP: authoritative and non-authoritative* . The provisions of FAS 168 are effective for financial statements issued for interim and annual periods ending after September 15, 2009. The adoption of FAS 168 is not expected to affect the Group's statements of financial condition and operations.

NOTE 2 INVESTMENTS

Money Market Investments

The Group considers as cash equivalents all money market instruments that are not pledged and that have maturities of three months or less at the date of acquisition. At June 30, 2009, and December 31, 2008, cash equivalents included as part of cash and due from banks amounted to \$210.2 million and \$52.0 million, respectively.

Table of Contents***Investment Securities***

The amortized cost, gross unrealized gains and losses, fair value, and weighted average yield of the investment securities as of June 30, 2009, and December 31, 2008, were as follows:

	June 30, 2009 (In thousands)				Weighted Average Yield
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	
Available-for-sale					
Obligations of US Government sponsored agencies	\$ 929,902	\$ 3,708	\$ 12,364	\$ 921,246	3.48%
Puerto Rico Government and agency obligations	71,565	5	8,589	62,981	5.37%

	December 31, 2008 (In thousands)				Weighted Average Yield
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	
Available-for-sale					
Obligations of US Government sponsored agencies	\$ 941,144	\$ 7,172	\$ 6,400	\$ 941,916	5.37%
Puerto Rico Government and agency obligations	91,599	597	9,307	82,889	5.40%
Structured credit investments	176,127	3,469	43,415	136,181	6.18%
Total investment securities	1,208,870	11,238	59,122	1,160,986	
FNMA and FHLMC certificates	1,521,428	25,527	205	1,546,750	5.51%
GNMA certificates	332,071	4,206	496	335,781	5.76%

CMOs issued by US Government sponsored agencies	352,579	202	1,755	351,026	5.34%
Non-agency collateralized mortgage obligations	637,626		107,962	529,664	8.49%
Total mortgage-backed-securities and CMOs	2,843,704	29,935	110,418	2,763,221	
Total securities available-for-sale	\$ 4,052,574	\$ 41,173	\$ 169,540	\$ 3,924,207	5.90%

The amortized cost and fair value of the Group's investment securities available-for-sale at June 30, 2009, by contractual maturity, are shown in the next table. Securities not due on a single contractual maturity date, such as collateralized mortgage obligations, are classified in the period of final contractual maturity. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

	(In thousands)	
	Amortized Cost	Fair Value
Investment securities		
Due less than 1 year	\$ 338,978	\$ 338,978
Due after 5 to 10 years	229,206	220,795
Due after 10 years	610,263	568,277
	1,178,447	1,128,050
Mortgage-backed securities		
Due after 5 to 10 years	20,164	20,634
Due after 10 years	3,866,089	3,801,836
	3,886,253	3,822,470
	\$5,064,700	\$4,950,520

Table of Contents

Keeping with the Group's investment strategy, during the six-month period ended June 30, 2009 and 2008, there were certain sales of available-for-sale securities because the Group felt at the time of such sales that gains could be realized while at the same time having good opportunities to invest the proceeds in other investment securities with attractive yields and terms that would allow the Group to continue to protect its net interest margin. Also, the Group, as part of its asset and liability management, purchases agency discount notes close to their maturities as a short term vehicle to reinvest the proceeds of sales of transactions until similar investment securities with attractive yields can be purchased. The discount notes are pledged as collateral for repurchase agreements. During the six-month period ended June 30, 2009, the Group sold \$932.3 million of discount notes with minimal aggregate gross gains of approximately \$162 thousand and sold \$739.9 million of discounted notes with minimal aggregate gross losses of approximately \$13 thousand.

The table below presents an analysis of the gross realized gains and losses by category for the six month periods ended June 30, 2009 and 2008:

	Six-Month Period Ended June 30, 2009 (In thousands)

The Group adopted the provisions of FSP FAS 115-2 and FAS 124-2 as of April 1, 2009. For those debt securities for which the fair value of the security is less than its amortized cost, the Group does not intend to sell such security and it is more likely than not that it will not be required to sell such security prior to the recovery of its amortized cost basis.

less any current period credit losses, FSP FAS 115-2 and FAS 124-2 requires that the credit-related portion of other-than-temporary impairment losses be recognized in earnings while the noncredit-related portion is recognized in other comprehensive income, net of related taxes. As a result of the adoption of FSP FAS 115-2 and FAS 124-2 and as more fully described below, in the second quarter of 2009 a \$4.4 million net credit-related impairment loss was recognized in earnings and a \$58.2 million noncredit-related impairment loss was recognized in other comprehensive income for two non-agency collateralized mortgage obligation pools not expected to be sold. Major inputs to measure the amount related to the credit loss includes 16.16% of default rate, 35% severity, and 11.41% prepayment rate. Also in accordance with FSP FAS 115-2 and FAS 124-2, the Group reclassified the noncredit-related portion of an other-than-temporary impairment loss previously recognized in earnings in the third quarter of 2008. This reclassification was reflected as a cumulative effect adjustment of \$14.4 million that increased retained earnings and increased accumulated other comprehensive loss. The amortized cost basis of this non-agency collateralized mortgage obligation pool for which an other-than-temporary impairment loss was recognized in the third quarter of 2008 was adjusted by the amount of the cumulative effect adjustment. These other-than-temporary impairment losses do not have income tax effect because the impaired securities are held in the Group's IBE, and potential recoveries of these losses, if any, are expected to occur in a period in which the income earned by IBE, would be 100% exempt from income taxes.

Non-agency collateralized mortgage obligations amortized cost includes \$72.5 million of non-credit related unrealized losses included in accumulated other comprehensive income (loss). Subsequent changes in fair value of securities that has been other-than-temporarily impaired are included as part of unrealized gain (loss) on securities available-for-sale in the unaudited statement of comprehensive income.

-15-

Table of Contents

The following table summarizes other-than-temporary impairment losses on securities for the quarter and six-month period ended June 30, 2009:

		Quarter and six-month period ended June 30, 2009	
		Non-credit related unrealized loss on securities recognized in	Credit-related other-than-
	Excess of amortized cost over fair value on	other	temporary
	other-than-temporarily impaired securities	comprehensive income	impairment on securities
Mortgage-backed securities and CMOs			
Non-agency collateralized mortgage obligations	\$(62,594)	\$ 58,178	\$(4,416)

The following table presents a roll-forward of the balance of credit-related impairment losses on securities held at June 30, 2009 for which a portion of an other-than-temporary impairment was recognized in other comprehensive income:

	Quarter ended June 30, 2009 (In thousands)
Balance at the beginning of the period:	\$
Credit-related impairment loss on securities for which an other-than-temporary impairment was previously recognized on adoption of FSP FAS 115-2	21,080
Credit-related impairment loss on securities for which an other-than-temporary impairment was not previously recognized	4,416
Balance at the end of the period	\$ 25,496

During the second quarter of 2009, a \$4.4 million credit-related impairment loss was recognized in earnings for two non-agency collateralized mortgage obligation pools not expected to be sold. In accordance with FSP FAS 15-2 and FAS 124-2, the anticipated cash flows expected to be collected from this debt security were discounted at the rate equal to the yield used to accrete the current and prospective beneficial interest for the security. Significant inputs included estimated cash flows, defaults and recoveries. Estimated cash flows are generated based on the underlying seniority status and subordination structure of the tranche at the time of measurement. Default and recovery estimates affecting projected cash flows were based on analysis of the underlying financial condition of individual issuers, and took into account capital adequacy, credit quality, lending concentrations, and other factors. All cash flow estimates were based on the underlying security's tranche structure and contractual rate and maturity terms. The present value of

the expected cash flows was compared to the current outstanding balance of the tranche to determine the ratio of the estimated present value of expected cash flows to the total current balance for the tranche. This ratio was then multiplied by the principal balance of the security to determine the credit-related impairment loss.

-16-

Table of Contents

At June 30, 2009, the Group's available-for-sale investment securities portfolio included approximately \$595.0 million (amortized cost) in non-agency collateralized mortgage obligations with unrealized losses of approximately \$118.8 million. The Group constantly monitors such non-agency mortgage-backed securities to measure the collateral performance and gauge trends for these positions, and the effect of collateral behavior on credit enhancements, cash flows, and fair values of the bonds. The Group also periodically monitors any rating migration, and takes into account the time lag between underlying performance and rating agency actions. This assessment is made using a cash flow model that estimates the cash flows on the underlying mortgages, based on the security-specific collateral and deal structure, and also includes inputs such as constant default rates, prepayment rates, and loss severity. The cash flows estimated by the model are distributed through the different tranches of each security, considering subordination for the different tranches. The model results as of June 30, 2009 show that the estimated future collateral losses, if any, are lower than the Group's subordination levels for each one of these securities, except for the three non-agency CMO's which are considered to be impaired (two in the second quarter of 2009 and one in the third quarter of 2008) and measured based on the new guidelines established in FSP FAS 115-2 and FAS 124-2 as discussed above. Therefore, the rest of the securities are deemed to have sufficient credit support to absorb the estimated collateral losses.

At June 30, 2009, the Group held structured credit investments amounting to \$177.0 million (amortized cost) in the available-for-sale portfolio, with net unrealized losses of approximately \$33.2 million. The Group's structured credit investments portfolio consist of two types of instruments: synthetic collateralized debt obligations (CDOs) and collateralized loan obligations (CLOs). At June 30, 2009, the Group estimated that it will recover all interest and principal for the Group's specific tranches of these securities. This assessment is based on an analysis in which the credit quality of the Group's positions was evaluated through a determination of the expected losses on the underlying collateral. The losses on the underlying corporate pools were inferred by observations on the credit spreads of the reference entities or market quotes used to derive the credit spreads. The spreads of the portfolios were converted to loss probabilities, and these were applied to a cash flow model that provided estimated projected losses for each security. The model results as of June 30, 2009 show that the estimated future collateral losses, if any, are lower than the Group's subordination levels for each one of these securities. Therefore, these securities are deemed to have sufficient credit support to absorb the estimated collateral losses.

Other than temporary impairment analysis is based on estimates that depend on market conditions and are subject to further change over time. In addition, while the Group believes that the methodology used to value these exposures is reasonable, the methodology is subject to continuing refinement, including those made as a result of market developments. Consequently, it is reasonably possible that changes in estimates or conditions could result in the need to recognize additional other than temporary impairment charges in the future.

Other securities in an unrealized loss position at June 30, 2009 are mainly composed of securities issued or backed by U.S. government agencies and U.S. government sponsored agencies. These investments are primarily highly liquid securities that have a large and efficient secondary market. Valuations are performed on a monthly basis. The Group's management believes that the unrealized losses of such other securities at June 30, 2009, are also temporary and are substantially related to market interest rate fluctuations and not to deterioration in the creditworthiness of the issuer or guarantor. At June 30, 2009, the Group does not have the intent to sell these investments in unrealized loss position.

NOTE 3 PLEDGED ASSETS

At June 30, 2009, residential mortgage loans amounting to \$591.9 million were pledged to secure advances and borrowings from the FHLB. Investment securities with fair values totaling \$4.382 billion, \$90.5 million, and \$21.2 million at June 30, 2009, were pledged to secure securities sold under agreements to repurchase, public fund deposits and other funds, respectively. Also, investment securities with fair value totaling \$115 thousand at June 30, 2009, were pledged to the Puerto Rico Treasury Department.

As of June 30, 2009, investment securities available-for-sale not pledged amounted to \$456.5 million. As of June 30, 2009, mortgage loans not pledged amounted to \$392.0 million.

Table of Contents**NOTE 4 LOANS RECEIVABLE AND ALLOWANCE FOR LOAN LOSSES****Loans**

The Group's credit activities are mainly with customers located in Puerto Rico. The Group's loan transactions are encompassed within three main categories: mortgage, commercial and consumer. The composition of the Group's loan portfolio at June 30, 2009, and December 31, 2008, was as follows:

	(In thousands)	
	June 30, 2009	December 31, 2008
Loans secured by real estate:		
Residential mortgage loans	\$ 924,567	\$ 976,569
Home equity loans, secured personal loans and others	21,872	23,507
Commercial	158,398	145,377
Deferred loan fees, net	(3,496)	(3,197)
	1,101,341	1,142,256
Other loans:		
Commercial	40,738	41,700
Personal consumer loans and credit lines	20,982	23,054
Deferred loan fees, net	(155)	(167)
	61,565	64,587
Loans receivable	1,162,906	1,206,843
Allowance for loan losses	(16,718)	(14,293)
Loans receivable, net	1,146,188	1,192,550
Mortgage loans held-for-sale	40,886	26,562
Total loans, net	\$ 1,187,074	\$ 1,219,112

Allowance for Loan Losses

The Group maintains an allowance for loan losses at a level that management considers adequate to provide for probable losses based upon an evaluation of known and inherent risks. The Group's allowance for loan losses policy provides for a detailed quarterly analysis of probable losses. The analysis includes a review of historical loan loss experience, value of underlying collateral, current economic conditions, financial condition of borrowers and other pertinent factors.

While management uses available information in estimating probable loan losses, future additions to the allowance may be required based on factors beyond the Group's control. Refer to Table 4 of the Management's Discussion and Analysis of Financial Condition and Results of Operations for additional details related to the changes in the allowance for loan losses for the quarters and six-month periods ended June 30, 2009 and 2008.

The Group evaluates all loans, some individually, and others as homogeneous groups, for purposes of determining impairment. At June 30, 2009, and December 31, 2008, the total balance of impaired commercial loans was \$6.4 million and \$4.6 million, respectively. The impaired commercial loans were measured based on the fair value of

collateral. The Group's management determined that impaired loans required a valuation allowance in accordance with FASB Statement No. 114 *Accounting by Creditors for Impairment of a Loan* of approximately \$380 thousand and \$1.9 million at June 30, 2009 and December 31, 2008, respectively.

-18-

Table of Contents**NOTE 5 OTHER ASSETS**

Other assets at June 30, 2009, and December 31, 2008 consist of the following:

	(In thousands)	
	June 30, 2009	December 31, 2008
Prepaid expenses	\$ 7,605	\$ 3,433
Servicing asset	5,242	2,819
Debt issuance costs	4,146	900
Mortgage tax credits	3,819	5,047
Goodwill	2,006	2,006
Investment in Statutory Trust	1,086	1,086
Derivative asset	422	
Accounts receivable and other assets	3,734	8,635
	\$ 28,060	\$ 23,926

NOTE 6 BORROWINGS***Short Term Borrowings***

At June 30, 2009, short term borrowings amounted to \$27.7 million (December 31, 2008 \$29.2 million) which mainly consist of federal funds purchased with a weighted average rate of 0.70% (December 31, 2008 1.49%).

Securities Sold under Agreements to Repurchase

At June 30, 2009, securities underlying agreements to repurchase were delivered to, and are being held by, the counterparties with whom the repurchase agreements were transacted. The counterparties have agreed to resell to the Group the same or similar securities at the maturity of the agreements.

At June 30, 2009, securities sold under agreements to repurchase (classified by counterparty), excluding accrued interest in the amount of \$7.5 million, were as follows:

	(In thousands)	
	Borrowing Balance	Fair Value of Underlying Collateral
Citigroup Global Markets Inc.	\$ 1,800,000	\$ 2,125,194
Credit Suisse Securities (USA) LLC	1,250,000	1,291,194
UBS Financial Services Inc.	500,000	574,118
JP Morgan Chase Bank NA	100,000	120,919
Merrill Lynch Government Securities Inc.	100,000	113,042
Total	\$ 3,750,000	\$ 4,224,467

The fair value of underlying collateral includes agency-issued investment securities with a fair value of \$339.1 million for which the transaction settled after that date. The proceeds from such sale were reinvested after quarter-end in similar quality agency-issued securities, which were then placed as collateral for the corresponding repurchase agreements.

The terms of the Group's structured repurchase agreements range between three and ten years, and the counterparts have the right to exercise put options before their contractual maturity from one to three years after the agreements

settlement dates. The following table shows a summary of these agreements and their terms, excluding accrued interest in the amount of \$7.5 million, at June 30, 2009:

-19-

Table of Contents

Year of Maturity	(In thousands)		Weighted-Average	Settlement	Maturity	Next Put

	100,000	4.50%	8/14/2007	8/14/2012	8/14/2009	
	300,000	4.47%	9/13/2007	9/13/2012	9/13/2009	
	150,000	4.31%	3/6/2007	12/6/2012	12/7/2009	
	900,000					
2014	100,000	4.67%	7/27/2007	7/27/2014	1/27/2010	
	100,000					
2017	250,000	0.25%	3/2/2007	3/2/2017	9/2/2009	
	500,000	4.46%	3/2/2007	3/2/2017	9/2/2009	
	1,000,000	0.00%	3/6/2007	3/6/2017	9/6/2009	
	1,750,000					
	\$ 3,750,000	2.93%				

The structured repurchase agreements include \$1.25 billion, which reset at the put date at a formula which is based on the three-month LIBOR rate less fifteen times the difference between the ten-year SWAP rate and the two-year SWAP rate, with a minimum of 0.00% on \$1.0 billion and 0.25% on \$250 million, and a maximum of 10.6%. These

repurchase agreements bear the respective minimum rates of 0.0% (from March 6, 2009) and 0.25% (from March 2, 2009) to at least their next put dates scheduled for September 2009.

Advances from the Federal Home Loan Bank

During 2007, the Group restructured most of its FHLB advances portfolio into longer-term, structured advances. The terms of these advances range between five and seven years, and the FHLB has the right to exercise put options before the contractual maturity of the advances from six months to one year after the advances' settlement dates. The following table shows a summary of these advances and their terms, excluding accrued interest in the amount of \$1.7 million, at June 30, 2009:

(In thousands)					
Year of Maturity	Borrowing Balance	Weighted- Average	Settlement	Maturity Date	Next Put Date
		Coupon	Date		
2012	\$ 25,000	4.37%	5/4/2007	5/4/2012	8/5/2009
	25,000	4.57%	7/24/2007	7/24/2012	7/24/2009
	25,000	4.26%	7/30/2007	7/30/2012	7/30/2009
	50,000	4.33%	8/10/2007	8/10/2012	8/10/2009
	100,000	4.09%	8/16/2007	8/16/2012	8/16/2009
	225,000				
2014	25,000	4.20%	5/8/2007	5/8/2014	8/8/2009
	30,000	4.22%	5/11/2007	5/11/2014	8/13/2009
	55,000				
	\$ 280,000	4.24%			

None of the structured advances from the FHLB referred above with put dates up to August 5, 2009 were put by the counterparty at their corresponding put dates.

Table of Contents

Subordinated Capital Notes

Subordinated capital notes amounted to \$36.1 million at June 30, 2009, and December 31, 2008.

In October 2001 and August 2003, the Statutory Trust I and the Statutory Trust II, respectively, special purpose entities of the Group, were formed for the purpose of issuing trust redeemable preferred securities. In December 2001 and September 2003, \$35.0 million of trust redeemable preferred securities were issued by each of the Statutory Trust I and the Statutory Trust II, respectively, as part of pooled underwriting transactions. Pooled underwriting involves participating with other bank holding companies in issuing the securities through a special purpose pooling vehicle created by the underwriters.

The proceeds from these issuances were used by the Statutory Trust I and the Statutory Trust II to purchase a like amount of floating rate junior subordinated deferrable interest debentures (subordinated capital notes) issued by the Group. The call provision of the subordinated capital note purchased by the Statutory Trust I was exercised by the Group in December 2006. The other subordinated capital note has a par value of \$36.1 million, bears interest based on 3-month LIBOR plus 295 basis points (3.56% at June 30, 2009; 4.82% at December 31, 2008), payable quarterly, and matures on September 17, 2033. The subordinated capital note purchased by the Statutory Trust II may be called at par after five years and quarterly thereafter (next call date September 2009). The trust redeemable preferred securities have the same maturity and call provisions as the subordinated capital notes. The subordinated deferrable interest debentures issued by the Group are accounted for as a liability denominated as subordinated capital notes on the unaudited consolidated statements of financial condition.

The subordinated capital notes are treated as Tier 1 capital for regulatory purposes. Under Federal Reserve Board rules, restricted core capital elements, which are qualifying trust preferred securities, qualifying cumulative perpetual preferred stock (and related surplus) and certain minority interests in consolidated subsidiaries, are limited in the aggregate to no more than 25% of a bank holding company's core capital elements (including restricted core capital elements), net of goodwill less any associated deferred tax liability.

Temporary Liquidity Guarantee Program

The Group's banking subsidiary issued in March 2009 \$105 million in notes guaranteed under the FDIC Temporary Liquidity Guarantee Program. These notes are due on March 16, 2012, bear interest at a 2.75% fixed rate, and are backed by the full faith and credit of the United States. Interest on the notes is payable on the 16th of each March and September, beginning September 16, 2009. Shortly after issuance of the notes, the Group paid \$3.3 million (equivalent to an annual fee of 100 basis points) to the FDIC to maintain the FDIC guarantee coverage until the maturity of the notes. This cost has been deferred and is being amortized over the term of the notes.

NOTE 7 DERIVATIVE ACTIVITIES

The Group may use various derivative instruments as part of its asset and liability management. These transactions involve both credit and market risks. The notional amounts are amounts on which calculations, payments, and the value of the derivatives are based. Notional amounts do not represent direct credit exposures. Direct credit exposure is limited to the net difference between the calculated amounts to be received and paid, if any. The actual risk of loss is the cost of replacing, at market, these contracts in the event of default by the counterparties. The Group controls the credit risk of its derivative financial instrument agreements through credit approvals, limits, monitoring procedures and collateral, when considered necessary.

Derivative instruments are generally negotiated over-the-counter (OTC) contracts. Negotiated OTC derivatives are generally entered into between two counterparties that negotiate specific contractual terms, including the underlying instrument, amount, exercise price and maturity.

The Group generally uses interest rate swaps and options in managing its interest rate risk exposure. Certain swaps were entered into to convert the forecasted rollover of short-term borrowings into fixed rate liabilities for longer periods and provide protection against increases in short-term interest rates. Under these swaps, the Group paid a fixed monthly or quarterly cost and received a floating thirty or ninety-day payment based on LIBOR. Floating rate payments received from the swap counterparties partially offset the interest payments to be made on the forecasted rollover of short-term borrowings.

Table of Contents

During the six-month period ended June 30, 2009 and 2008, gains of \$19.8 million and a loss of \$7.6 million, respectively, were recognized and reflected as Derivatives Activities in the unaudited consolidated statements of operations. The gains of \$19.8 million were mainly due to interest-rate swap contracts that the Group entered into in April and May 2009 to manage the Group's interest rate risk exposure for a total notional amount of \$1.0 billion, which were terminated before June 30, 2009. The loss in the previous year six-month period was mainly due to an interest-rate swap contract that the Group entered into to manage the Group's interest rate risk exposure with a notional amount of \$500 million. Such contract was terminated in January 2008, resulting in a loss to the Group of approximately \$7.9 million.

The Group offers its customers certificates of deposit with an option tied to the performance of the Standard & Poor's 500 stock market index. The Group uses option agreements with major broker-dealer companies to manage its exposure to changes in this index. Under the terms of the option agreements, the Group receives the average increase in the month-end value of the index in exchange for a fixed premium. The changes in fair value of the option agreements used to manage the exposure in the stock market in the certificates of deposit are recorded in earnings in accordance with SFAS No. 133, as amended.

There were no derivatives designated as a hedge as of June 30, 2009 and December 31, 2008. At June 30, 2009, and December 31, 2008, the purchased options used to manage the exposure to the stock market on stock indexed deposits represented an asset of \$2.4 million (notional amount of \$147.5 million) and \$12.8 million (notional amount of \$155.4 million), respectively; the options sold to customers embedded in the certificates of deposit and recorded as deposits in the unaudited consolidated statement of financial condition, represented a liability of \$5.8 million (notional amount of \$140.4 million) and \$16.6 million (notional amount of \$149.8 million), respectively. Also, at June 30, 2009, the Group has an outstanding forward sale of when-issued securities (4% FNMA TBA mortgage backed security), entered as part of its asset and liability management program, with a notional amount of \$300 million which were sold at a fixed price, as committed, in July 2009. The fair value of this instrument amounted to \$422 thousand at June 30, 2009 and it is included as part of other assets in the unaudited consolidated statement of financial condition.

NOTE 8 INCOME TAX

Under the Puerto Rico Code, all companies are treated as separate taxable entities and are not entitled to file consolidated returns. The Group and its subsidiaries are subject to Puerto Rico regular income tax or alternative minimum tax (AMT) on income earned from all sources. The AMT is payable if it exceeds regular income tax. The excess of AMT over regular income tax paid in any one year may be used to offset regular income tax in future years, subject to certain limitations.

The Group maintained an effective tax rate lower than the maximum marginal statutory rate of 40.95% and 39% as of June 30, 2009 and 2008, respectively, mainly due to the interest income arising from investments exempt from Puerto Rico income taxes, net of expenses attributable to the exempt income. Exempt interest relates mostly to interest earned on obligations of the United States and Puerto Rico governments and certain mortgage-backed securities, including securities held by the Bank's international banking entity. Pursuant to the Declaration of Fiscal Emergency and Omnibus Plan for Economic Stabilization and Restoration of the Puerto Rico Credit Act of March 9, 2009, for tax years beginning after December 31, 2008, and ending before January 1, 2012, every taxable corporation engaged in trade or business in Puerto Rico, including banks and insurance companies will be subject to an additional five percent (5%) surcharge on corporate income tax, increasing the maximum tax rate from 39% to 40.95%. Also, income earned by international banking entities, which was previously exempt, will be subject to a 5% income tax during the same period. These temporary taxes were enacted as a measure to generate additional revenues to address the fiscal crisis that the government of Puerto Rico is currently facing. Income tax expense for the six-month period ended June 30, 2009 includes approximately \$2.0 millions related to these tax impositions.

The determination of deferred tax expense or benefit is based on changes in the carrying amounts of assets and liabilities that generate temporary differences. The carrying value of the Group's net deferred tax assets assumes that the Group will be able to generate sufficient future taxable income based on estimates and assumptions. If these estimates and related assumptions change in the future, the Group may be required to record valuation allowances against its deferred tax assets resulting in additional income tax expense in the consolidated statements of operations.

Table of Contents

Management evaluates the realizability of the deferred tax assets on a regular basis and assesses the need for a valuation allowance. Total gross deferred tax asset at June 30, 2009 amounts to \$25.8 million. A valuation allowance is established when management believes that it is more likely than not that some portion of its deferred tax assets will not be realized. Changes in valuation allowance from period to period are included in the Group's tax provision in the period of change. As of June 30, 2009, a valuation allowance of approximately \$1.1 million was recorded to offset deferred tax asset that the Group believes it is more likely that would not be realized in future periods.

In addition to valuation allowances, the Group establishes accruals for uncertain tax positions when, despite the belief that Group's tax return positions are fully supported, the Group believes that certain positions are likely to be challenged. The uncertain tax positions accruals are adjusted in light of changing facts and circumstances, such as the progress of tax audits, case law and emerging legislation. The Group's uncertain tax positions accruals are reflected as income tax payable as a component of accrued expenses and other liabilities.

The Group follows the provisions of Financial Accounting Standard Board (FASB) Interpretation No. 48 (FIN 48),

Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 , which contains a two-step approach to recognizing and measuring uncertain tax positions accounted for in accordance with SFAS 109. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation process, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely of being realized upon ultimate settlement.

The total amount of gross unrecognized tax benefits as of the date of adoption that would affect the effective tax rate was \$5.8 million. The Group classifies unrecognized tax benefits in income taxes payable. These gross unrecognized tax benefits would affect the effective tax rate if realized. For the six-month period ended June 30, 2009, \$325 thousand in unrecognized tax losses expired due to statute of limitation (six-month period ended June 30, 2008 \$2.4 million in unrecognized tax benefits). The balance of unrecognized tax benefits at June 30, 2009 was \$4.3 million (December 31, 2008 \$4.0 million). The tax periods ended June 30, 2005, December 31, 2005, 2006, 2007, and 2008, remain subject to examination by the Puerto Rico Department of Treasury.

The Group's policy to include interest and penalties related to unrecognized tax benefits within the provision for taxes on the consolidated statements of operations did not change as a result of implementing the provisions of FIN 48. The Group had accrued \$1.8 million at June 30, 2009 (December 31, 2008-\$1.5 million) for the payment of interest and penalties relating to unrecognized tax benefits. On January 13, 2009, \$325 thousand in unrecognized tax losses expired due to statute of limitation. The Group does not anticipate any other significant changes in unrecognized tax benefits during 2009.

NOTE 9 FAIR VALUE

As discussed in Note 1, effective January 1, 2008, the Group adopted SFAS 157, which provides a framework for measuring fair value under GAAP.

Fair Value Measurement

SFAS 157 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. SFAS 157 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1 Level 1 asset and liabilities include equity securities that are traded in an active exchange market, as well as certain U.S. Treasury and other U.S. government agency securities that are traded by dealers or brokers in active markets. Valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities.

Table of Contents

Level 2 observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include (i) mortgage-backed securities for which the fair value is estimated based on valuations obtained from third-party pricing services for identical or comparable assets, (ii) debt securities with quoted prices that are traded less frequently than exchange-traded instruments and (iii) derivative contracts and financial liabilities (e.g. callable brokered CDs and medium-term notes elected for fair value option under SFAS 159) whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data.

Level 3 unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, for which the determination of fair value requires significant management judgment or estimation. The following is a description of the valuation methodologies used for instruments measured at fair value:

Investment securities

The fair value of investment securities is based on quoted market prices, when available, or market prices provided by recognized broker dealers. If listed prices or quotes are not available, fair value is based upon externally developed models that use both observable and unobservable inputs depending on the market activity of the instrument. Structured credit investments and non-agency collateralized mortgage obligations are not trading actively in the current market; accordingly, they do not exhibit readily observable prices. Based on their valuation methodology, such investments are classified as Level 3. The estimated fair value of the structured credit investments and the non-agency collateralized mortgage obligations are determined by using a third-party cash flow valuation model to calculate the present value of projected future cash flows. The assumptions used, which are highly uncertain and require a high degree of judgment, include primarily market discount rates, current spreads, duration, leverage, delinquency, and loss rates. The assumptions used are drawn from a combination of internal and external data sources. A third-party valuation of these investments (external-based valuation), is obtained at least on a quarterly basis and is used by management as a benchmark to evaluate the adequacy of the cash flow model and the reasonableness of the assumptions and fair value estimates developed internally for the internal-based valuation. The external-based valuations are analyzed and assumptions are evaluated by management and incorporated in the internal-based valuation model.

Derivative instruments

The fair values of the derivative instruments were provided by valuation experts and counterparties. Certain derivatives with limited market activity are valued using externally developed models that consider unobservable market parameters. The Group offers its customers certificates of deposit with an option tied to the performance of the Standard & Poor's 500 stock market index (S&P Index), and uses equity indexed option agreements with major broker-dealer companies to manage its exposure to changes in this index. Their fair value is obtained from counterparties or an external pricing source and validated by management. Based on their valuation methodology, derivative instruments are classified as Level 3. These options are mainly tied in to Asian options whose payoff is linked to the average value of the S&P Index on a specific set of dates during the life of the option. The methodology uses an average rate option or a cash-settled option whose payoff is based on the difference between the expected average value of the S&P Index during the remaining life of the option and the strike price at inception. The assumptions used, which are uncertain and require a degree of judgment, include primarily S&P Index volatility and leverage. The external-based valuations are analyzed and assumptions are evaluated and incorporated in either an internal-based valuation model when deemed necessary or compared to counterparties prices and agreed by management.

Table of Contents

Assets and liabilities measured at fair value on a recurring basis, including financial liabilities for which the Group has elected the fair value option, are summarized below:

<i>(In thousands)</i>	June 30, 2009		
	Fair Value Measurements		
	Level 1	Level 2	Level 3
Investment securities available-for-sale	\$	\$ 4,330,503	\$ 620,017
Money market investments	210,156		
Derivative asset		422	2,412
Derivative liability			(5.762)
	\$ 210,156	\$ 4,330,925	\$ 616,667

The table below presents a reconciliation for all assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the quarter and six-month period ended June 30, 2009:

Level 3 Instruments Only <i>(In thousands)</i>	Total Fair Value Measurements (Quarter ended June 30, 2009)			Total Fair Value Measurements (Six-month period ended June 30, 2009)		
	Investment securities available-for-sale	Derivative asset	Derivative liability	Investment securities available-for-sale	Derivative asset	Derivative liability
Balance at beginning of period	\$635,058	\$ 3,052	\$(6,513)	\$665,845	\$ 12,801	\$(16,588)
Gains (losses) included in earnings	(4,416)	(559)	506	(4,416)	(10,676)	11,057
Gains (losses) included in other comprehensive income	1,328			(11,474)		
New instruments acquired		2,385	(1,951)		3,332	(2,849)
Principal repayments and amortization	(26,312)	(2,044)	2,196	(44,297)	(2,623)	2,618
Adoption of FSP SFAS 115-2	14,359			14,359		
Transfers in and/or out of Level 3						
Balance at end of period	\$620,017	2,834	\$(5,762)	\$620,017	2,834	\$ (5,762)

Table of Contents

The table below presents a detail of investment securities available-for-sale classified as level 3 at June 30, 2009:

Type	June 30, 2009 (In thousands)				
	Amortized Cost	Unrealized Losses	Fair Value	Weighted Average Yield	Principal Protection
Non-agency collateralized mortgage obligations					
Prime Collateral	\$ 188,922	\$ 37,303	\$ 151,619	6.00%	4.85%
Prime Collateral	172,332	20,875	151,457	6.00%	4.85%
Alt-A Collateral	124,712	44,790	79,922	5.35%	10.63%
Prime Collateral	23,787	3,044	20,743	6.21%	9.95%
Prime Collateral	22,537	2,440	20,097	6.11%	4.61%
Prime Collateral	21,724	3,973	17,751	5.61%	6.90%
Prime Collateral	20,940	3,742	17,198	5.83%	10.20%
Prime Collateral	20,008	2,601	17,407	6.43%	4.10%
	594,962	118,768	476,194	5.87%	
Structured credit investments					
CDO	115,259	9,667	105,592	2.56%	3.81%
CDO	25,548	10,920	14,628	5.80%	7.42%
CLO	15,000	4,618	10,382	3.03%	7.48%
CLO	11,973	5,005	6,968	2.66%	26.18%
CLO	9,200	2,947	6,253	2.93%	22.44%
	176,980	33,157	143,823	3.09%	
	\$ 771,942	\$ 151,925	\$ 620,017	5.23%	

The information about the estimated fair value of financial instruments required by GAAP is presented hereunder. The aggregate fair value amounts presented do not necessarily represent management's estimate of the underlying value of the Group.

The estimated fair value is subjective in nature and involves uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could affect these fair value estimates. The fair value estimates do not take into consideration the value of future business and the value of assets and liabilities that are not financial instruments. Other significant tangible and intangible assets that are not considered financial instruments are the value of long-term customer relationships of the retail deposits, and premises and equipment.

Table of Contents

The estimated fair value and carrying value of the Group's financial instruments at June 30, 2009 and December 31, 2008 is as follows:

	(In thousands)			
	June 30, 2009		December 31, 2008	
	Fair Value	Carrying Value	Fair Value	Carrying Value
Financial Assets:				
Cash and cash equivalents	\$ 307,062	\$ 307,062	\$ 66,372	\$ 66,372
Trading securities	904	904	256	256
Investment securities available-for-sale	4,950,520	4,950,520	3,924,207	3,924,207
FHLB stock	19,937	19,937	21,013	21,013
Securities sold but yet not delivered	360,764	360,764	834,976	834,976
Total loans (including loans held-for-sale)	1,186,908	1,187,074	1,216,398	1,219,112
Investment in equity indexed options	2,412	2,412	12,801	12,801
Accrued interest receivable	37,785	37,785	43,914	43,914
Derivative asset	422	422		
Financial Liabilities:				
Deposits	1,855,593	1,852,446	1,789,309	1,785,300
Securities sold under agreements to repurchase	4,039,380	3,757,510	4,016,479	3,761,121

Subordinated capital notes	36,083	36,083	36,083	36,083
Federal funds purchased and other short term borrowings	27,748	27,748	29,193	29,193
Securities and loans purchased but not yet received	497,360	497,360	398	398
Accrued expenses and other liabilities	31,971	31,971	23,682	23,682
	-27-			

Table of Contents

The following methods and assumptions were used to estimate the fair values of significant financial instruments at June 30, 2009 and December 31, 2008:

Cash and cash equivalents, money market investments, time deposits with other banks, securities sold but not yet delivered, accrued interest receivable and payable, securities and loans purchased but not yet received, federal funds purchased, accrued expenses, other liabilities, term notes and subordinated capital notes have been valued at the carrying amounts reflected in the consolidated statements of financial condition as these are reasonable estimates of fair value given the short-term nature of the instruments.

The fair value of trading securities, investment securities available-for-sale, and derivative asset is estimated based on bid quotations from securities dealers. If a quoted market price is not available, fair value is estimated using either quoted market prices for similar securities, or valuations provided by securities dealers. Investments in FHLB stock are valued at their redemption value.

The fair value of loan portfolio (including loans held-for-sale) has been estimated for loan portfolios with similar financial characteristics. Loans are segregated by type, such as mortgage, commercial and consumer. Each loan category is further segmented into fixed and adjustable interest rates and by performing and non-performing categories. The fair value of performing loans is calculated by discounting contractual cash flows, adjusted for prepayment estimates, if any, using estimated current market discount rates that reflect the credit and interest rate risk inherent in the loan, which may not result in an exit price.

The fair value of demand deposits and savings accounts is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit is based on the discounted value of the contractual cash flows, using estimated current market discount rates for deposits of similar remaining maturities.

For short-term borrowings, the carrying amount is considered a reasonable estimate of fair value. The fair value of long-term borrowings is based on the discounted value of the contractual cash flows, using current estimated market discount rates for borrowings with similar terms and remaining maturities and put dates.

The fair value of interest rate swaps and equity index option contracts were estimated by management based on the present value of expected future cash flows using discount rates of the swap yield curve. These fair values represent the estimated amount the Group would receive or pay to terminate the contracts taking into account the current interest rates and the current creditworthiness of the counterparties.

The fair value of commitments to extend credit and unused lines of credit is based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties credit standings.

NOTE 10 SEGMENT REPORTING

The Group segregates its businesses into the following major reportable segments of business: Banking, Financial Services, and Treasury. Management established the reportable segments based on the internal reporting used to evaluate performance and to assess where to allocate resources. Other factors such as the Group's organization, nature of its products, distribution channels and economic characteristics of the products were also considered in the determination of the reportable segments. The Group measures the performance of these reportable segments based on pre-established goals of different financial parameters such as net income, net interest income, loan production, and fees generated. Non-interest expenses allocations among segments were reviewed during the second quarter of 2009 to reallocate expenses from the Banking to the Treasury Segment for a suitable presentation.

Banking includes the Bank's branches and mortgage banking, with traditional banking products such as deposits and mortgage, commercial and consumer loans. Mortgage banking activities are carried out by the Bank's mortgage banking division, whose principal activity is to originate mortgage loans for the Group's own portfolio. As part of its mortgage banking activities, the Group may sell loans directly into the secondary market or securitize conforming

loans into mortgage-backed securities.

-28-

Table of Contents

Financial services are comprised of the Bank's trust division (Oriental Trust), the broker dealer subsidiary (Oriental Financial Services Corp.), the insurance agency subsidiary (Oriental Insurance, Inc.), and the pension plan administration subsidiary (Caribbean Pension Consultants, Inc.). The core operations of this segment are financial planning, money management and investment banking, brokerage services, insurance sales activity, corporate and individual trust and retirement services, as well as pension plan administration services.

The Treasury segment encompasses all of the Group's asset and liability management activities such as: purchases and sales of investment securities, interest rate risk management, derivatives, and borrowings. Intersegment sales and transfers, if any, are accounted for as if the sales or transfers were to third parties, that is, at current market prices. The accounting policies of the segments are the same followed by the Group, which are described in the *Summary of Significant Accounting Policies* included in the Group's annual report on Form 10-K. Following are the results of operations and the selected financial information by operating segment for the quarters and six-month period ended June 30, 2009 and 2008:

	Banking	Financial Services	Treasury	Unaudited Total Major Segments (In thousands)	Eliminations	Consolidated Total

OVERVIEW OF FINANCIAL PERFORMANCE**Introduction**

The Group's diversified mix of businesses and products generates both the interest income traditionally associated with a banking institution and non-interest income traditionally associated with a financial services institution (generated

by such businesses as securities brokerage, fiduciary services, investment banking, insurance and pension administration). Although all of these businesses, to varying degrees, are affected by interest rate and financial markets fluctuations and other external factors, the Group's commitment is to continue producing a balanced and growing revenue stream.

During the quarter ended June 30, 2009, the strategies in place enabled the Group to continue to perform well despite the turbulent credit market and the recession in Puerto Rico. Highlights of the second quarter included:

Pre-tax operating income (net interest income, core non-interest income from banking and financial service revenues, less non-interest expenses) of approximately \$17.3 million – an increase when compared to the \$13.0 million-to-\$14.8 million range the Group has generated since the first quarter of 2008.

Strong increase in net interest income of 24.8% and 15.7% compared to the year-ago quarter and the previous quarter, respectively, and a corresponding improvement in the net interest margin to 2.29% (compared to 1.90% and 1.98% in the year-ago and previous quarter, respectively), mainly reflecting the reduction in the cost of funds.

Growth in core banking and financial service revenues of 19.4% and 15.8% compared to the year-ago and previous quarter, respectively. On a sequential quarter basis, the Group saw increases in mortgage banking activities of 30.3%, banking service revenues of 15.0%, and financial service revenues of 5.5%.

-32-

Table of Contents

Benefitting from the strategic positioning of its investment securities portfolio, the Group took advantage of market conditions during the quarter to realize gains on: (i) sales of securities of \$10.5 million, (ii) derivative activities of \$19.4 million, and (iii) trading activities of \$13.0 million. These gains more than offset credit-related other than temporary impairment charges of \$4.4 million on securities.

Sustained growth in retail deposits of \$110.4 million (9.3%) on a sequential quarter basis and \$220.7 million (20.4%) on a year-to-date basis.

Stockholders' equity increased \$40.3 million during the quarter and \$98.3 million since December 31, 2008, representing an increase of 37.6% on a year-to-date basis.

Book value per common share increased to \$12.04, from \$10.38 at March 31, 2009 and \$7.96 at December 31, 2008.

Non-interest expenses were negatively affected by approximately \$2.9 million, representing the increase in the Group's insurance expense corresponding to the industry-wide FDIC special assessment on insured depository institutions and payable on September 30, 2009.

Income Available to Common Shareholders

For the quarter and six-month period ended June 30, 2009, the Group's income available to common shareholders totaled \$49.7 million and \$73.3 million, respectively, compared to \$13.2 million and \$28.9 million, respectively, in the comparable year-ago quarter and six-month period. Earnings per basic and fully diluted common share were \$2.05 and \$2.04, respectively, for the quarter ended June 30, 2009, compared to \$0.54 per basic and fully diluted common share in the same year-ago period, and \$3.02 for the six-month period ended June 30, 2009, compared to \$1.19 in the year ago period.

Return on Average Assets and Common Equity

Return on average common equity (ROE) for the quarter and six-month period ended June 30, 2009, was 80.89% and 66.98%, respectively, up from 20.65% and 20.64% for the quarter and six-month period ended June 30, 2008 respectively. Return on average assets (ROA) for the quarter and six-month period ended June 30, 2009, was 3.05% and 2.30%, respectively, up from 0.95% and 1.01%, for the quarter and six-month period ended June 30, 2008, respectively.

Net Interest Income after Provision for Loan Losses

Net interest income after provision for loan losses increased 20.3% for the quarter and 19.3% for the six-month period ended June 30, 2009, totaling \$31.8 million and \$59.3 million, respectively, compared with \$26.5 million and \$49.7 million for the same periods last year. Growth reflects the significant reduction in cost of funds, which has declined more rapidly than the yield on interest-earning assets.

Non-Interest Income

Non-interest income was \$46.1 million and \$63.3 million, respectively, for the quarter and six-month period ended June 30, 2009, representing an increase of 592.5% and 308.0% when compared to the corresponding periods ended June 30, 2008. Core banking and financial service revenues increased 19.4% and 2.8% when compared to the corresponding quarter and six-month period ended June 30, 2008. In addition, the Group took advantage of market conditions during the quarter to realize gains on: (i) sales of securities of \$10.5 million, (ii) derivative activities of \$19.4 million, and (iii) trading activities of 15.0 million.

Non-Interest Expenses

Non-interest expenses of \$22.2 million and \$41.5 million, respectively, for the quarter and six-month period ended June 30, 2009, compared to \$18.1 million and \$35.8 million, respectively, in the year ago periods, resulting in an efficiency ratio of 57.29% and 54.53%, respectively, for the quarter and six-month period ended June 30, 2009 (compared to 51.82% and 53.20% in the year-ago periods). Non-interest expense were negatively affected by approximately \$2.9 million, representing the increase in the Group's insurance expense corresponding to the industry-wide FDIC special assessment on insured depository institutions and payable on September 30, 2009.

Table of Contents

Income Tax Expense

The income tax expense was \$4.8 million and \$5.5 million, respectively, for the quarter and six-month period ended June 30, 2009, which includes Puerto Rico's additional taxes on international banking entities and financial institutions, compared to an expense of \$598 thousand and a benefit of \$1.9 million for the respective periods ended June 30, 2008.

Group's Financial Assets

The Group's total financial assets include owned assets and the assets managed by the trust division, the securities broker-dealer subsidiary, and the private pension plan administration subsidiary. At June 30, 2009, total financial assets reached \$9.797 billion, compared to \$9.108 billion at December 31, 2008, a 7.6% increase. When compared to December 31, 2008, there was 12.0% increase in assets owned as of June 30, 2009, while assets managed by the trust division and the broker-dealer subsidiary decreased from \$2.9 billion as of December 31, 2008 to \$2.8 billion as of June 30, 2009.

The Group's trust division offers various types of individual retirement accounts (IRA) and manages 401(K) and Keogh retirement plans and custodian and corporate trust accounts, while Caribbean Pension Consultants, Inc. (CPC) manages the administration of private pension plans. At June 30, 2009, total assets managed by the Group's trust division and CPC amounted to \$1.677 billion, compared to \$1.706 billion at December 31, 2008. The Group's broker-dealer subsidiary offers a wide array of investment alternatives to its client base, such as tax-advantaged fixed income securities, mutual funds, stocks, bonds and money management wrap-fee programs. At June 30, 2009, total assets gathered by the broker-dealer from its customer investment accounts decreased to \$1.170 billion, compared to \$1.196 billion at December 31, 2008.

Interest Earning Assets

The investment portfolio amounted to \$4.972 billion at June 30, 2009, a 26.0% increase compared to \$3.946 billion at December 31, 2008, while the loan portfolio decreased 2.6% to \$1.187 billion at June 30, 2009, compared to \$1.219 billion at December 31, 2008.

The mortgage loan portfolio totaled \$983.7 million at June 30, 2009, a 4.9% decrease from \$1.034 billion at June 30, 2008, and a decrease of 3.9%, from \$1.023 billion at December 31, 2008. Mortgage loan production for the quarter and six-month period ended June 30, 2009, totaled \$63.9 million and \$131.8 million, respectively, which represents a decrease of 15.9% for the quarter and a 5.2% increase for the six-month period.

Interest Bearing Liabilities

Total deposits amounted to \$1.852 billion at June 30, 2009, an increase of 3.8% compared to \$1.785 billion at December 31, 2008, primarily due to increased retail deposits, particularly in demand deposit accounts.

Stockholders' Equity

Stockholders' equity at June 30, 2009, was \$359.6 million, compared to \$261.3 million at December 31, 2008, mainly reflecting increased earnings in the six-month period.

The Group's capital ratios remain above regulatory capital requirements, with risk-based capital ratios above regulatory capital adequacy guidelines. At June 30, 2009, Tier 1 Leverage Capital Ratio was 7.31% (1.8 times the minimum of 4.00%), Tier 1 Risk-Based Capital Ratio was 14.62% (3.7 times the minimum of 4.00%), and Total Risk-Based Capital Ratio was 15.13% (1.9 times the minimum of 8.00%).

Due to the initial adoption of FSP FAS 115-2, the Group reclassified the noncredit-related portion of an other-than-temporary impairment loss previously recognized in earnings in the third quarter of 2008 for an amount of \$14.4 million that increased retained earnings and accumulated other comprehensive loss. This reclassification had a positive impact on regulatory capital ratios and no impact on tangible equity.

Table of Contents

Financial Service-Banking Franchise

The Group's niche market approach to the integrated delivery of services to mid and high net worth clients performed well, as it expanded market share based on its service proposition and capital strength, as opposed to using rates to attract loans or deposits.

Lending

Total loan production of \$73.5 million remained strong, as the Group's capital levels and low credit losses, compared to most banking institutions, enabled it to continue prudent lending. The average FICO score was 722 and the average loan to value ratio was 81% on residential mortgage loans originated in the quarter.

The Group sells most of its conforming mortgages into the secondary market, but retains servicing rights. Mortgage banking activities on a sequential quarter basis reflect the continued high level of originations as well as its growing servicing portfolio, a source of recurring revenue.

Deposits

Growth in retail deposits during the quarter primarily reflects a \$121.1 million increase in savings and demand deposits. At the same time, Oriental also reduced brokered deposits by \$42.7 million

Assets Under Management

Assets under management, which generate recurring fees, increased 5.23% from March 31, 2009, to \$2.85 billion. This growth, plus the Group's participation in the selling of Puerto Rico's COFINA II bonds, resulted in the sequential increase in financial service revenues.

Credit Quality

Net credit losses declined by 11.42%, to \$2.1 million (0.70% of average loans outstanding), from \$2.3 million (0.78%), in the previous quarter. The Group increased its provision for loan losses to \$3.7 million (176% of net credit losses), from \$3.2 million in the previous quarter, resulting in a \$16.7 million allowance at June 30, 2009, up 10.37% from the previous quarter.

Non-performing loans (NPLs) increased \$3.3 million in the quarter. The Group's NPLs generally reflect the economic environment in Puerto Rico. Based on historical performance, however, the Group does not expect non-performing loans to result in significantly higher losses as most are well-collateralized with adequate loan-to-value ratios. In residential mortgage lending, more than 90% of the Group's portfolio consists of fixed-rate, fully amortizing, fully documented loans that do not have the level of risk generally associated with subprime loans. In commercial lending, more than 90% of its loans are collateralized by real estate.

The Investment Securities Portfolio

The average balance of the investment securities portfolio was \$5.0 billion, up 4.7% from the year ago quarter and up 0.38% from the previous quarter. Yield declined slightly due to higher prepayments in the first half of the quarter. Approximately 87% of the portfolio consists of fixed-rate mortgage-backed securities or notes, guaranteed or issued by FNMA, FHLMC, or GNMA and U.S. agency senior debt obligations, backed by a U.S. government sponsored entity or the full faith and credit of the U.S. government (86%), and Puerto Rico Government and agency obligations (1%). The remaining balance consists of non-agency collateralized mortgage obligations (10%), the majority of which are backed by prime fixed-rate residential mortgage collateral, and structured credit investments (3%).

Subsequent Event

Subsequent to June 30, 2009, as part of its general banking and asset and liability management strategies, the Group executed a \$200 million deleverage of its balance sheet at the holding company level by terminating certain repurchase agreements at a cost of approximately \$17.5 million (before income taxes). This transaction increases the Group's financial flexibility, creates additional liquidity, and helps to offset the Group's income tax liability.

Table of Contents

Net interest income is a function of the difference between rates earned on the Group's interest-earning assets and rates paid on its interest-bearing liabilities (interest rate spread) and the relative amounts of its interest-earning assets and interest-bearing liabilities (interest rate margin). Typically, bank liabilities re-price in line with changes in short-term rates, while many asset positions are affected by longer-term rates. The Group constantly monitors the composition and re-pricing of its assets and liabilities to maintain its net interest income at adequate levels.

For the quarter and six-month period ended June 30, 2009, net interest income amounted to \$35.5 million and \$66.2 million, respectively, an increase of 24.8% and 24.0% from \$28.4 million and \$53.3 million, in the same periods previous year. The increase for the quarter and six-month period reflects a 17.9% and 12.4% decrease in interest expense, due to a negative rate variance of interest-bearing liabilities of \$12.7 million and \$41.6 million, respectively, partially offset by a positive volume variance of interest-bearing liabilities \$2.5 million and \$27.5 million, respectively. The decrease of 3.6% and 0.8% in interest income for the quarter and six-month period ended June 30, 2009, was primarily the result of a decrease of \$5.9 million and \$36.5 million, respectively in rate variance, partially offset by an increase of \$2.8 million and \$35.2 million, respectively, in volume variance. Interest rate spread increased 49 basis points to 2.17% for the quarter ended June 30, 2009 from 1.68% in the June 30, 2008 quarter, and 45 basis points to 1.98% for the six-month period ended June 30, 2009 from 1.53% for the year ago period. These increases reflect a 88 point decrease in the average cost of funds to 3.13% in the quarter ended June 30, 2009 from 4.01% in June 30, 2008 quarter, partially offset by a 39 basis point decrease in the average yield of interest earning assets to 5.30% in the quarter ended June 30, 2009 from 5.69% in June 30, 2008 quarter; and a 74 point decrease in the average cost of funds to 3.38% in the six-month period ended June 30, 2009 from 4.12% for the year ago period, partially offset by a 29 basis point decrease in the average yield of interest earning assets to 5.36% in the six-month period ended June 30, 2009 from 5.65% for the year ago period.

For the quarter and six month period ended June 30, 2009, the average balances of total interest-earnings assets were \$6.192 billion and \$6.188 billion, respectively, a 3.5% and 4.5% increase from the same periods last year. The increase in the quarterly average balance reflects increases of 4.7% to \$4.999 billion in the investment portfolio, partially offset by a decrease of 1.2% to \$1.193 billion in the loans portfolio for the 2009 quarter. The increase in the six-month period average balance reflects increases of 5.1% to \$4.990 billion in the investment portfolio, and an increase of 2.2% to \$1.199 billion in the loans portfolio for the 2009 six-month period.

For the quarter and six-month period ended June 30, 2009, the average yield on interest-earning assets was 5.30% and 5.36%, respectively, compared to 5.69% and 5.65% in the same period last year, due to lower average yields in the loan portfolio and the investment portfolio. The loan portfolio yield decreased to 6.27% and 6.18% in the quarter and six-month period ended June 30, 2009, respectively, versus 6.52% and 6.74% in the same period last year, respectively. The investment portfolio yield decreased to 5.07% and 5.17% in the quarter and six-month period ended June 30, 2009, respectively, versus 5.48% and 5.38% in the same periods last year, respectively.

For the quarter and six-month period ended June 30, 2009, interest expense amounted to \$46.6 million and \$99.8 million, respectively, a decrease of 17.9% and 12.4%, respectively, from \$56.7 million and \$113.9 million, in the same period last year, mainly resulting from a significant reduction in cost of funds, which has declined more rapidly than the yield on interest-earning assets.

For the quarter ended June 30, 2009, the cost of deposits decreased 19 basis points to 3.25%, as compared to the same period a year ago. For the six-month period ended June 30, 2009, the cost of deposits decreased 56 basis points to 3.26%, as compared to the same period a year ago. The decrease reflects lower average rates paid on higher balances, most significantly in savings and certificates of deposit accounts. For the quarter and six-month period ended June 30, 2009, the cost of borrowings decreased 112 basis points and 78 basis points, respectively, to 3.08% and 3.43%, respectively, from the same period last year.

Other	4		100.0%	4	(1)	500.0%
Total non-interest income, net	\$ 46,051	\$ 6,650	592.5%	\$ 63,297	\$ 15,514	308.0%

Non-interest income is affected by the amount of securities, derivatives and trading transactions, the level of trust assets under management, transactions generated by the gathering of financial assets by the securities broker-dealer subsidiary, the level of investment and mortgage banking activities, and the fees generated from loans, deposit accounts, and insurance activities.

Non-interest income totaled \$46.1 million and \$63.3 million in the quarter and six-month period ended June 30, 2009, an increase of 592.5% and 308.0% when compared to \$6.7 million and \$15.5 million in the same periods last year. Increase in revenues from sale of securities was partially offset by decrease in financial service revenues.

Financial service revenues, which consist of commissions and fees from fiduciary activities, and commissions and fees from securities brokerage, and insurance activities, decreased 27.0% and 26.8% to \$3.3 million and \$6.4 million in the quarter and six-month period ended June 30, 2009, respectively, from \$4.5 million and \$8.7 million in the same periods of 2008, mainly the result of reduced financial service revenues. Banking service revenue, which consists primarily of fees generated by deposit accounts, electronic banking services, and customer services, increased 14.8% and 2.5% to \$1.6 million and \$3.0 million in the quarter and six-month period ended June 30, 2009, respectively, from \$1.4 million and \$2.9 million in the same periods last year, mainly driven by increase in consumer banking activity. Investment banking revenues decreased to \$8 thousand and a loss of \$4 thousand in the quarter and six-month period ended June 30, 2009, respectively, compared to \$12 thousand and \$750 thousand in the same periods of 2008. Income generated from mortgage banking activities increased 414.9% and 219.7% in the quarter and six-month period ended June 30, 2009, respectively, from \$545 thousand million and \$1.6 million in the quarter and six-month period ended June 30, 2008, to \$2.8 million and \$5.0 million in the same period of 2009 mainly the result of increased mortgage banking revenues due to the securitization and sale of conventional mortgages into the secondary market and increase in residential mortgage loan production.

-39-

Table of Contents

For the quarter and six-month period ended June 30, 2009, gains from securities, derivatives, trading activities and other investment activities were \$38.4 million and \$48.9 million, compared to \$198 thousand and \$1.6 million for the same periods last year. During the quarter and six-month period ended June 30, 2009, a gain of \$19.4 million and \$19.8 million, respectively, was recognized in derivatives, compared to a gain of \$228 thousand and a loss of \$7.6 million, respectively. Keeping with the Group's investment strategy, during the six-month period ended June 30, 2009 and 2008, there were certain sales of available-for-sale securities because the Group felt at the time of such sales that gains could be realized while at the same time having good opportunities to invest the proceeds in other investment securities with attractive yields and terms that would allow the Group to continue to protect its net interest margin. Sale of securities available-for-sale, which generated gains of \$10.5 million and \$20.9 million, for the quarter and six-month period ended June 30, 2009, respectively, increased 5213.1% and 119.1% when compared to \$198 thousand and \$9.5 million for the same period a year ago. During the quarter and six-month period ended June 30, 2009, a gain of \$13.0 million and \$13.0 million, respectively, was recognized in trading securities, compared to a gain of \$16 thousand and a loss of \$1 thousand, respectively.

The Group adopted the provisions of FSP FAS 115-2 and FAS 124-2 as of April 1, 2009. For those debt securities for which the fair value of the security is less than its amortized cost, the Group does not intend to sell such security and it is more likely than not that it will not be required to sell such security prior to the recovery of its amortized cost basis less any current period credit losses, FSP FAS 115-2 and FAS 124-2 requires that the credit-related portion of other-than-temporary impairment losses be recognized in earnings while the noncredit-related portion is recognized in other comprehensive income, net of related taxes. As a result of the adoption of FSP FAS 115-2 and FAS 124-2 and as more fully described below, in the second quarter of 2009 a \$4.4 million net credit-related impairment loss was recognized in earnings and a \$58.2 million noncredit-related impairment loss was recognized in other comprehensive income for two non-agency collateralized mortgage obligation pools not expected to be sold. Also in accordance with FSP FAS 115-2 and FAS 124-2, The Group reclassified the noncredit-related portion of an other-than-temporary impairment loss previously recognized in earnings in the third quarter of 2008. This reclassification was reflected as a cumulative effect adjustment of \$14.4 million that increased retained earnings and increased accumulated other comprehensive loss. The amortized cost basis of this non-agency collateralized mortgage obligation pool for which an other-than-temporary impairment loss was recognized in the third quarter of 2008 was adjusted by the amount of the cumulative effect adjustment. These other-than-temporary impairment losses do not have income tax effect because the impaired securities are held in the Group's IBE, and potential recoveries of these losses, if any, are expected to occur in a period in which the income earned by IBE, would be 100% exempt from income taxes.

average employee

Non-interest expenses for the quarter and six-month period ended June 30, 2009 were \$22.2 million and \$41.5 million, representing an increase of 22.9% and 15.9%, respectively, when compared to \$18.1 million and \$35.8 million in the same period a year ago, primarily as a result of higher insurance expense, electronic banking charges, communications, and professional and service fees. Insurance expense increase 499.7% and 263.0% for quarter and six-month period ended June 30, 2009, respectively, from \$579 thousand and \$1.2 million in the quarter and six-month period ended June 30, 2008 to \$3.5 million and \$4.3 million in the same period for 2009, as a result of the industry-wide FDIC special assessment on insured depository institutions recognized during this period amounting to \$2.9 million, which is payable on September 2009. Electronic banking charges increased 50.5% and 39.6% for the quarter and six-month period ended June 30, 2009, respectively, from \$396 thousand and \$814 thousand versus \$596 thousand and \$1.1 million, respectively, in the same period a year ago. Communications increased to \$402 thousand and \$781 thousand, representing an increase of 23.7% and 20.2% for the quarter and six-month period ended June 30, 2009, respectively, when compared to \$325 thousand and \$650 thousand in the same period a year ago. Professional fees increased 5.6% and 20.6% for the quarter and six-month period ended June 30, 2009, respectively, from \$2.3 million and \$4.1 million in the quarter and six-month period ended June 30, 2008 to \$2.4 million and \$5.0 million in the same period for 2009. The non-interest expense results reflect an efficiency ratio of 51.43% for the quarter ended June 30, 2009, compared to 51.82% in the same quarter last year. For the six-month period ended June 30, 2009, the efficiency ratio was 51.54% compared to 53.20% for the same period last year. The efficiency ratio measures how much of a company's revenue is used to pay operating expenses. The Group computes its efficiency ratio by dividing non-interest expenses by the sum of its net interest income and non-interest income, but excluding gains on sale of investments securities, derivatives gains or losses and other income that may be considered volatile in nature. Management believes that the exclusion of those items permit greater comparability. Amounts presented as part of non-interest income that are excluded from the efficiency ratio computation amounted to \$48.9 million and \$1.6 million for the six-month period ended June 30, 2009 and 2008, respectively.

Table of Contents

The provision for loan losses for the quarter and six-month period ended June 30, 2009, totaled \$3.7 million and \$6.9 million, representing an increase of 84.3% and 88.7% from the \$2.0 million and \$3.6 million reported for the same periods last year, which are in line with the increase in non-performing loans of the Group. Based on an analysis of the credit quality and composition of the Group's loan portfolio, management determined that the provision for the quarter and six-month period ended June 30, 2009 was adequate in order to maintain the allowance for loan losses at an adequate level.

Net credit losses for the quarter and six-month period ended June 30, 2009, increased 75.2% and 132.2% during the quarter and six-month period ended June 30, 2009 to \$2.1 million and \$4.4 million, respectively, from \$1.2 million and \$1.9 million in the same periods of 2008, primarily due to the overall deterioration of the economy in Puerto Rico. The increase was primarily due to higher net credit losses from mortgage loans and commercial loans.

Non-performing loans of \$89.9 million at June 30, 2009, were 30.7% higher than the \$68.8 million at June 30, 2008, and 16.0% higher than the \$77.5 million at December 31, 2008.

The Group maintains an allowance for loan losses at a level that management considers adequate to provide for probable losses based upon an evaluation of known and inherent risks. The Group's allowance for loan losses policy provides for a detailed quarterly analysis of probable losses.

The Group follows a systematic methodology to establish and evaluate the adequacy of the allowance for loan losses to provide for inherent losses in the loan portfolio. This methodology includes the consideration of factors such as economic conditions, portfolio risk characteristics, prior loss experience, and results of periodic credit reviews of individual loans. The provision for loan losses charged to current operations is based on such methodology. Loan losses are charged and recoveries are credited to the allowance for loan losses.

Larger commercial loans that exhibit potential or observed credit weaknesses are subject to individual review and grading. Where appropriate, allowances are allocated to individual loans based on management's estimate of the borrower's ability to repay the loan given the availability of collateral, other sources of cash flow and legal options available to the Group.

Included in the review of individual loans are those that are impaired, under the provisions of SFAS 114. A loan is considered impaired when, based on current information and events, it is probable that the Group will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Impaired loans are measured based on the present value of expected future cash flows discounted at the loan's effective interest rate, or as a practical expedient, at the observable market price of the loan or the fair value of the collateral, if the loan is collateral dependent. Loans are individually evaluated for impairment, except large groups of small balance homogeneous loans that are collectively evaluated for impairment under the provisions of SFAS No. 5, and loans that are recorded at fair value or at the lower of cost or market. The portfolios of mortgage and consumer loans are considered homogeneous, and are evaluated collectively for impairment. For the commercial loans portfolio, all loans over \$250 thousand and over 90-days past due are evaluated for impairment, under the provisions of SFAS 114. At June 30, 2009, the total investment in impaired loans was \$6.4 million, compared to \$4.6 million at December 31, 2008. Impaired loans are measured based on the fair value of collateral method, since all impaired loans during the period were collateral dependant. The Group's management determined that impaired loans required a valuation allowance in accordance with FASB Statement No. 114 *Accounting by Creditors for Impairment of a Loan* of approximately \$380 thousand at June 30, 2009. No allowance was required at June 30, 2008.

The Group, using a rating system, applies an overall allowance percentage to each loan portfolio category based on historical credit losses adjusted for current conditions and trends. This delinquency-based calculation is the starting point for management's determination of the required level of the allowance for loan losses. Other data considered in this determination includes overall historical loss trends and other information, including underwriting standards, economic trends and unusual events.

Loan loss ratios and credit risk categories are updated quarterly and are applied in the context of GAAP and the Joint Interagency Guidance on the importance of depository institutions having prudent, conservative, but not excessive loan loss allowances that fall within an acceptable range of estimated losses. While management uses available information in estimating probable loan losses, future changes to the allowance may be necessary, based on factors beyond the Group's control, such as factors affecting general economic conditions.

At June 30, 2009, the Group s total assets amounted to \$6.950 billion, an increase of 12.0%, when compared to \$6.206 billion at December 31, 2008. Interest-earning assets were \$6.519 billion at June 30, 2009, an 8.7% increase compared to \$6.000 billion at December 31, 2008.

Table of Contents

Investments principally consist of U.S. government and agency obligations, mortgage-backed securities, collateralized mortgage obligations, and Puerto Rico government bonds. At June 30, 2009, the investment portfolio increased 26.0% to \$4.972 billion, from \$3.946 billion at December 31, 2008. For further details regarding the Group's investment securities, refer to Note 2 of the unaudited consolidated financial statements.

At June 30, 2009, the Group's loan portfolio, the second largest category of the Group's interest-earning assets, amounted to \$1.187 billion, a decrease of 2.6% when compared to \$1.219 billion at December 31, 2008, mainly the result of increase in the securitization and sale of conventional mortgages into the secondary market. The Group's loan portfolio is mainly comprised of residential loans, home equity loans, and commercial loans collateralized by mortgages on real estate located in Puerto Rico. Loan production and purchases for the quarter and six-month period ended June 30, 2009, decreased 20.6% and increased 1.2%, respectively, to \$73.5 million and \$160.8 million, compared to \$92.6 million and \$158.9 million for the quarter and six-month period ended June 30, 2008, respectively.

Table of Contents

Detailed information concerning each of the items that comprise non-performing assets follows:

Mortgage loans are placed on a non-accrual basis when they become 365 days or more past due and are written-down, if necessary, based on the specific evaluation of the collateral underlying the loan. At June 30, 2009, the Group's non-performing mortgage loans totaled \$82.2 million (91.4% of the Group's non-performing loans), a 14.9% increase from the \$71.5 million (92.3% of the Group's non-performing loans) reported at December 31, 2008. Non-performing loans in this category are primarily residential mortgage loans.

Commercial loans are placed on non-accrual status when they become 90 days or more past due and are written-down, if necessary, based on the specific evaluation of the underlying collateral, if any. At June 30, 2009, the Group's non-performing commercial loans amounted to \$6.9 million (7.6% of the Group's non-performing loans), a 32.4% increase when compared to non-performing commercial loans of \$5.2 million reported at December 31, 2008 (6.7% of the Group's non-performing loans). Most of this portfolio is collateralized by commercial real estate properties.

Consumer loans are placed on non-accrual status when they become 90 days past due and written-off when payments are delinquent 120 days in personal loans and 180 days in credit cards and personal lines of credit. At June 30, 2009, the Group's non-performing consumer loans amounted to \$847 thousand (0.9% of the Group's total non-performing loans), a 9.7% increase from the \$772 thousand reported at December 31, 2008 (1.0% of total non-performing loans).

Foreclosed real estate is initially recorded at the lower of the related loan balance or fair value at the date of foreclosure. Any excess of the loan balance over the fair value of the property is charged against the allowance for loan losses. Subsequently, any excess of the carrying value over the estimated fair value less disposition cost is charged to operations. Proceeds from sales of foreclosed real estate properties during the quarter ended June 30, 2009, totaled approximately \$1.8 million.

At June 30, 2009, the Group's total liabilities were \$6.591 billion, 10.9% higher than the \$5.944 billion reported at December 31, 2008. Deposits and borrowings, the Group's funding sources, amounted to \$6.061 billion at June 30, 2009, an increase of 2.4% when compared to \$5.920 billion reported at December 31, 2008. Borrowings represented 69% of interest-bearing liabilities and deposits represented 31%.

The FHLB system functions as a source of credit to financial institutions that are members of a regional Federal Home Loan Bank. As a member of the FHLB, the Group can obtain advances from the FHLB, secured by the FHLB stock owned by the Group, as well as by certain of the Group's mortgages and investment securities. FHLB funding amounted to \$281.7 million at June 30, 2009, versus \$308.4 at December 31, 2008. These advances mature from May 2012 through May 2014.

At June 30, 2009, deposits reached \$1.852 billion, up 3.8%, compared to the \$1.785 billion reported at December 31, 2008. The increase in deposits was driven by interest bearing checking accounts, which totaled \$620.5 million at June 30, 2009, up 54.9% when compared to the \$400.6 million reported at December 31, 2008, and also by savings accounts deposits, which increased 24.8% during the six-month period ended June 30, 2009, from \$50.2 million at December 31, 2008, to \$62.6 million. This increase was partially offset by a decrease in certificates of deposit, which totaled \$1.1 billion, net of accrued interest payable of \$7.9 million, at June 30, 2009, down 13.7% when compared to the \$1.275 billion reported at December 31, 2008. The change in composition of retail deposits reflects the conversion in the third quarter of 2008 of the Oriental Money savings and checking account to an interest-bearing checking account.

At June 30, 2009, the Group's total stockholders' equity was \$359.6 million, a 37.6% increase when compared to \$261.3 million at December 31, 2008. The Group's capital ratios are above regulatory capital requirements. At June 30, 2009, the Tier 1 Leverage Capital Ratio was 7.31%, the Tier 1 Risk-Based Capital Ratio was 14.62%, and the Total Risk-Based Capital Ratio was 15.13%.

Due to the initial adoption of FSP FAS 115-2, the Group reclassified the noncredit-related portion of an other-than-temporary impairment loss previously recognized in earnings in the third quarter of 2008 for an amount of \$14.4 million that increased retained earnings and accumulated other comprehensive loss. This reclassification had a positive impact on regulatory capital ratios and no impact on tangible equity.

Table of Contents

The following provides the high and low prices and dividend per share of the Group's stock:

Quarter ended	PRICE		Cash Dividend per share
	High	Low	
2009

The Bank is considered well-capitalized under the regulatory framework for prompt corrective action if it meets or exceeds a Tier I risk-based capital ratio of 6%, a total risk-based capital ratio of 10% and a leverage capital ratio of 5%. In addition, the Group and the Bank meet the following minimum capital requirements: a Tier I risk-based capital ratio of 4%, a total risk-based capital ratio of 8% and a Tier 1 leverage capital ratio of 4%. The Group and the Bank exceed these benchmarks due to the high level of capital and the quality and conservative nature of its assets. The table below shows the Bank's regulatory capital ratios at June 30, 2009 and 2008, and December 31, 2008:

	June 30, 2009	December 31, 2008	Variance %	June 30, 2008
<i>(Dollars in thousands)</i>

Minimum to be well capitalized (10%)	\$ 309,944	\$ 219,216	41.4%	\$ 209,866

The Group's common stock is traded on the New York Stock Exchange (NYSE) under the symbol OFG. At June 30, 2009, the Group's market capitalization for its outstanding common stock was \$235.0 million (\$9.70 per share). On April 25, 2007, the Board of Directors formally adopted the Oriental Financial Group Inc. 2007 Omnibus Performance Incentive Plan (the "Omnibus Plan"), which was subsequently approved at the June 27, 2007 annual meeting of stockholders. The Omnibus Plan provides for equity-based compensation incentives through the grant of stock options, stock appreciation rights, restricted stock, restricted stock units and dividend equivalents, as well as equity-based performance awards. Refer to Note 1 of the accompanying unaudited consolidated financial statements for additional information regarding the Omnibus Plan.

**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK
RISK MANAGEMENT**

Background

The Group's risk management policies are established by its Board of Directors (the "Board"), implemented by management, through the adoption of a risk management program, which is overseen and monitored by the Chief Risk Officer and the Risk Management Committee (RMC). The Group has continued to refine and enhance its risk management program by strengthening policies, processes and procedures necessary to maintain effective risk management.

All aspects of the Group's business activities are susceptible to risk. Consequently, risk identification and monitoring are essential to risk management. As more fully discussed below, the Group's primary risks exposure include, market, interest rate, credit, liquidity, operational and concentration risks.

Market Risk

Market risk is the risk to earnings or capital arising from adverse movements in market rates or prices, such as interest rates or prices. The Group evaluates market risk together with interest rate risk (See "Interest Rate Risk" below).

The Group's financial results and capital levels are constantly exposed to market risk. The Board and management are primarily responsible for ensuring that the market risk assumed by the Group complies with the guidelines established by Board approved policies. The Board has delegated the management of this risk to the Asset and Liability Management Committee ("ALCO") which is composed of certain executive officers from the business, treasury and finance areas. One of ALCO's primary goals is to ensure that the market risk assumed by the Group is within the parameters established in the policies adopted by the Board.

Interest Rate Risk

Interest rate risk is the exposure of the Group's earnings or capital to adverse movements in interest rates. It is a predominant market risk in terms of its potential impact on earnings.

The Group manages its asset/liability position in order to limit the effects of changes in interest rates on net interest income. ALCO is responsible for monitoring compliance with the market risk policies approved by the Board and adopting interest risk management strategies. In that role, ALCO oversees interest rate risk, liquidity management and other related matters.

In discharging its responsibilities, ALCO examines current and expected conditions in world financial markets, competition and prevailing rates in the local deposit market, liquidity, unrealized gains and losses in securities, recent or proposed changes to the investment portfolio, alternative funding sources and their costs, hedging and the possible purchase of derivatives such as swaps and caps, and any tax or regulatory issues which may be pertinent to these areas. ALCO approves funding decisions in light of the Group's overall growth strategies and objectives.

Each quarter, the Group performs a net interest income simulation analysis on a consolidated basis to estimate the potential change in future earnings from projected changes in interest rates. These simulations are carried out over a one-year time horizon, assuming gradual upward and downward interest rate movements of 200 basis points, achieved during a twelve-month period. Simulations are carried out in two ways:

- (1) using a static balance sheet as the Group had on the simulation date, and
- (2) using a growing balance sheet based on recent growth patterns and strategies.

The balance sheet is divided into groups of assets and liabilities detailed by maturity or re-pricing and their corresponding interest yields and costs. As interest rates rise or fall, these simulations incorporate expected future lending rates, current and expected future funding sources and cost, the possible exercise of options, changes in prepayment rates, deposits decay and other factors which may be important in projecting the future growth of net interest income.

The Group uses an asset-liability management software to project future movements in the Group's balance sheet and income statement. The starting point of the projections generally corresponds to the actual values of the balance sheet on the date of the simulations.

Table of Contents

These simulations are highly complex, and use many simplifying assumptions that are intended to reflect the general behavior of the Group over the period in question. There can be no assurance that actual events will match these assumptions in all cases. For this reason, the results of these simulations are only approximations of the true sensitivity of net interest income to changes in market interest rates. The following table presents the results of the simulations at June 30, 2009, assuming a one-year time horizon:

Change in interest rate (In thousands)	Net Interest Income Risk (one year projection)			
	Static Balance Sheet		Growing simulation	
	Amount Change	Percent Change	Amount Change	Percent Change
+ 200 Basis points	\$ 17,192	12.16%	\$ 16,573	11.49%
+ 100 Basis points	\$ 11,778	8.33%	\$ 11,511	7.98%
- 100 Basis points	\$ (12,869)	-9.10%	\$ (12,990)	-9.00%
- 200 Basis points	\$ (22,324)	-15.78%	\$ (20,856)	-14.45%

Future net interest income could be affected by the Group's investments in callable securities, prepayment risk related to mortgage loans and mortgage-backed securities, and its structured repurchase agreements and advances from the FHLB. As part of the strategy to limit the interest rate risk and reduce the re-pricing gaps of the Group's assets and liabilities, the maturity and the re-pricing frequency of the liabilities has been extended to longer terms. The concentration of long-term fixed rate securities has also been reduced.

The Group uses derivative instruments and other strategies to manage its exposure to interest rate risk caused by changes in interest rates beyond management's control. The following summarizes strategies, including derivative activities, used by the Group in managing interest rate risk:

Interest rate swaps Interest rate swap agreements generally involve the exchange of fixed and floating-rate interest payment obligations without the exchange of the underlying principal. The interest rate swaps have been utilized to convert short term repurchase agreements into fixed rate to better match the re-pricing nature of these borrowings. There were no outstanding interest rate swaps as of June 30, 2009 or December 31, 2008.

Structured borrowings The Group uses structured repurchase agreements and advances from the FHLB, with embedded call options, to reduce the Group's exposure to interest rate risk by lengthening the contractual maturities of its liabilities, while keeping funding costs low.

The Group offers its customers certificates of deposit with an option tied to the performance of the Standard & Poor's 500 stock market index. At the end of five years, the depositor receives a minimum return or a specified percentage of the average increase of the month-end value of the stock index. The Group uses option agreements with major money center banks and major broker-dealer companies to manage its exposure to changes in those indexes. Under the terms of the option agreements, the Group receives the average increase in the month-end value of the corresponding index in exchange for a fixed premium. The changes in fair value of the options purchased and the options embedded in the certificates of deposit are recorded in earnings.

Derivative instruments are generally negotiated over-the-counter (OTC) contracts. Negotiated OTC derivatives are generally entered into between two counterparties that negotiate specific agreement terms, including the underlying instrument, amount, exercise price and maturity.

At June 30, 2009 and December 31, 2008, the fair value the purchased options used to manage the exposure to the stock market on stock indexed deposits represented an asset of \$2.4 million, and \$12.8 million, respectively; and the options sold to customers embedded in the certificates of deposit represented a liability of \$5.8 million and \$16.6 million, respectively, recorded in deposits.

Table of Contents

Also, at June 30, 2009, the Group has an outstanding forward sale of when-issued securities (4% FNMA TBA mortgage backed security), entered as part of its asset and liability management program, with a notional amount of \$300 million which were sold at a fixed price, as committed, in July 2009. The fair value of this instrument amounted to \$422 thousand at June 30, 2009 and it is included as part of derivatives net gain (losses) in the unaudited consolidated statement of operations.

Credit Risk

Credit risk is the possibility of loss arising from a borrower or counterparty in a credit-related contract failing to perform in accordance with its terms. The principal source of credit risk for the Group is its lending activities. The Group manages its credit risk through a comprehensive credit policy which establishes sound underwriting standards, by monitoring and evaluating loan portfolio quality, and by the constant assessment of reserves and loan concentrations. The Group also employs proactive collection and loss mitigation practices.

The Group may also encounter risk of default in relation to its securities portfolio. The securities held by the Group are principally mortgage-backed securities and U.S. Treasury and agency securities. Thus, a substantial portion of these instruments are guaranteed by mortgages, a U.S. government-sponsored entity or the full faith and credit of the U.S. government, and are deemed to be of the highest credit quality. The available-for-sale securities portfolio also includes approximately \$476.2 million in non-government agency pass-through collateralized mortgage obligations and \$143.8 million in structured credit investments that are considered of a higher credit risk than agency securities. Management's Credit Committee, composed of the Group's Chief Executive Officer, Chief Credit Risk Officer and other senior executives, has primary responsibility for setting strategies to achieve the Group's credit risk goals and objectives. Those goals and objectives are set forth in the Group's Credit Policy.

Liquidity Risk

Liquidity risk is the risk of the Group not being able to generate sufficient cash from either assets or liabilities to meet obligations as they become due, without incurring substantial losses. The Group's cash requirements principally consist of deposit withdrawals, contractual loan funding, repayment of borrowings as they mature, and funding of new and existing investment as required.

Effective liquidity management requires the Group to have sufficient cash available at all times to meet its financial commitments, finance planned growth and have a reasonable safety margin for normal as well as unexpected cash needs. ALCO is responsible for managing the Group's liquidity risk in accordance with the policies adopted by the Board. In discharging its liquidity risk management obligations, ALCO approves operating and contingency procedures and monitors their implementation. The Group's Treasurer and Chief Investment Officer is responsible for the implementation of the liquidity risk management policies adopted by the Board and of the operating and contingency procedures adopted by ALCO, and for monitoring the Group's liquidity position on an ongoing basis. Using measures of liquidity developed by the Group's Treasury Division under several different scenarios, the Treasury Division reviews the Group's liquidity position on a daily basis whereas ALCO and the Board review is monthly.

The Group meets its liquidity management objectives by maintaining (i) liquid assets in the form of investment securities, (ii) sufficient unused borrowing capacity in the national money markets, and achieving (iii) consistent growth in core deposits. As of June 30, 2009, the Group had approximately \$456.5 million in investment securities and \$392.0 million in mortgage loans available to cover liquidity needs.

The Group utilizes different sources of funding to help ensure that adequate levels of liquidity are available when needed. Diversification of funding sources is of great importance as it protects the Group's liquidity from market disruptions. The principal sources of short-term funds are deposits, securities sold under agreements to repurchase, and lines of credit with the FHLB. ALCO reviews credit availability on a regular basis. The Group securitizes and sells mortgage loans as supplemental source of funding. Long-term certificates of deposit as well as long-term funding through the issuance of notes have also provided additional funding. The cost of these different alternatives, among other things, is taken into consideration. The Group's principal uses of funds are the origination of loans and the repayment of maturing deposit accounts and borrowings.

Table of Contents

Operational Risk

Operational risk is the risk of loss from inadequate or failed internal processes, personnel and systems or from external events. All functions, products and services of the Group are susceptible to operational risk.

The Group faces ongoing and emerging risk and regulatory pressure related to the activities that surround the delivery of banking and financial products. Coupled with external influences such as market conditions, security risks, and legal risk, the potential for operational and reputational loss has increased. In order to mitigate and control operational risk, the Group has developed, and continues to enhance, specific internal controls, policies and procedures that are designed to identify and manage operational risk at appropriate levels throughout the organization. The purpose of these policies and procedures is to provide reasonable assurance that the Group's business operations are functioning within established limits.

The Group classifies operational risk into two major categories: business specific and corporate-wide affecting all business lines. For business specific risks, a risk assessment group works with the various business units to ensure consistency in policies, processes, and assessments. With respect to corporate wide risks, such as information security, business recovery, legal and compliance, the Group has specialized groups, such as Information Security, Corporate Compliance, Information Technology and Operations. These groups assist the lines of business in the development and implementation of risk management practices specific to the needs of the business groups. All these matters are reviewed and discussed in the RMC.

The Group is subject to extensive regulation in the different jurisdictions in which it conducts its business, and this regulatory scrutiny has been significantly increasing over the last several years. The Group has established and continues to enhance procedures based on legal and regulatory requirements that are reasonably designed to ensure compliance with all applicable statutory and regulatory requirements. The Group has a corporate compliance function, headed by a Compliance and Risk Director who reports to the Chief Risk Officer and is responsible for the oversight of regulatory compliance and implementation of an enterprise-wide compliance program.

Concentration Risk

Substantially all of the Group's business activities and a significant portion of its credit exposure are concentrated in Puerto Rico. As a consequence, the Group's profitability and financial condition may be adversely affected by an extended economic slowdown, adverse political or economic developments in Puerto Rico or the effects of a natural disaster, all of which could result in a reduction in loan originations, an increase in non-performing assets, an increase in foreclosure losses on mortgage loans, and a reduction in the value of its loans and loan servicing portfolio.

The Commonwealth of Puerto Rico government is currently facing a significant fiscal deficit. The Commonwealth's access to the municipal bond market and its credit ratings depend, in part, on achieving a balanced budget. In March 2009, the Legislature passed, and the Governor signed, laws to reduce spending, including public-sector employment by 10% (approximately 30 thousand jobs), raise revenues through selective tax increases, and stimulate the economy. It is not possible to determine the impact on the economy of these measures at this time.

Item 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

As of the end of the period covered by this quarterly report on Form 10-Q, an evaluation was carried out under the supervision and with the participation of the Group's management, including the Chief Executive Officer (CEO) and the Chief Financial Officer (CFO), of the effectiveness of the design and operation of the Group's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Based upon such evaluation, the CEO and the CFO have concluded that, as of the end of such period, the Group's disclosure controls and procedures are effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by the Group in the reports that it files or submits under the Exchange Act.

Internal Control over Financial Reporting

There were no changes in the Group's internal control over financial reporting (as such term is defined on rules 13a-15(e) and 15d-15(e) under the Exchange Act) during the quarter ended June 30, 2009.

Table of Contents**PART II OTHER INFORMATION****Item 1. LEGAL PROCEEDINGS**

The Group and its subsidiaries are defendants in a number of legal proceedings incidental to their business. The Group is vigorously contesting such claims. Based upon a review by legal counsel and the development of these matters to date, Management is of the opinion that the ultimate aggregate liability, if any, resulting from these claims will not have a material adverse effect on the Group's financial condition or results of operations.

Item 1A. RISK FACTORS

There have been no material changes to the risk factors as previously disclosed under Item 1A to Part 1 of the Group's annual report on Form 10-K for the year ended December 31, 2008.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

a) None

b) Not applicable

c) Purchases of equity securities by the issuer and affiliated purchasers.

On July 27 2007, the Board approved a new stock repurchase program pursuant to which the Group is authorized to purchase in the open market up to \$15.0 million of its outstanding shares of common stock. The shares of common stock so repurchased are to be held by the Group as treasury shares. There were no purchases of equity securities under this repurchase program during the quarter ended June 30, 2009. The approximate dollar value of shares that may yet be repurchased under the plan amounted to \$11.3 million at June 30, 2009.

Item 3. DEFAULTS UPON SENIOR SECURITIES

None

Item 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITIES HOLDERS

The annual meeting of stockholders of the Group was held on June 24, 2009, for (i) the election of a director for a two-year term expiring at the 2011 annual meeting of shareholders and until his successor is duly elected and qualified, and four directors for a three-year term expiring at the 2012 annual meeting of shareholders and until their successors are duly elected and qualified; and (ii) to ratify the selection of KPMG LLP as our independent auditors for the year ending December 31, 2009;. The voting results were as follows:

	For #	Withheld #		
Proposal 1-Election of Directors				
Two-year term				
Josen Rossi	21,845,002	385,594		
Three-year term				
Nelson García	20,925,383	1,305,213		
Julian S. Inclán	21,776,579	454,017		
Rafael Machargo Chardón	20,932,181	1,298,415		
Pedro Morazzani	21,844,872	385,724		
	For #	Against #	Abstain #	Broker Non-Vote #
Proposal				
3-Ratification of selection of independent auditors	22,094,611	94,623	41,360	

Item 5. OTHER INFORMATION
