ALLEGHANY CORPORATION AND SUBSIDIARIES

Notes to Unaudited Consolidated Financial Statements

1. Principles of Financial Statement Presentation

This report should be read in conjunction with the Annual Report on Form 10-K for the year ended December 31, 2009 (the 2009 10-K) and the Quarterly Reports on Form 10-Q for the quarters ended March 31, 2010 and June 30, 2010, of Alleghany Corporation (Alleghany).

Alleghany, a Delaware corporation, is engaged in the property and casualty and surety insurance business through its wholly-owned subsidiary Alleghany Insurance Holdings LLC (AIHL). AIHL s insurance business is conducted through its wholly-owned subsidiaries RSUI Group, Inc. (RSUI), Capitol Transamerica Corporation and Platte River Insurance Company (collectively CATA), and Pacific Compensation Corporation, formerly known as Employers Direct Corporation. Effective April 12, 2010, as part of a strategic repositioning effort, Employers Direct Corporation changed its name to Pacific Compensation Corporation (PCC), and the name of its insurance subsidiary from Employers Direct Insurance Company to Pacific Compensation Insurance Company (PCIC). AIHL Re LLC (AIHL Re), a captive reinsurance subsidiary of AIHL, has in the past provided reinsurance to Alleghany operating units and affiliates. In addition, Alleghany owns approximately 33 percent of the outstanding shares of common stock of Homesite Group Incorporated (Homesite), a national, full-service, mono-line provider of homeowners insurance, and approximately 38 percent of ORX Exploration, Inc. (ORX), a regional oil and gas exploration and production company. These investments are reflected in Alleghany s financial statements in other invested assets. Alleghany also owns and manages properties in the Sacramento, California region through its subsidiary Alleghany Properties Holdings LLC (Alleghany Properties) and makes strategic investments in operating companies and conducts other activities at the parent level.

The financial statements contained in this Quarterly Report on Form 10-Q are unaudited, but reflect all adjustments which, in the opinion of management, are necessary to a fair statement of results of the interim periods covered thereby. All adjustments are of a normal and recurring nature except as described herein.

The accompanying consolidated financial statements include the results of Alleghany and its wholly-owned subsidiaries, and have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). All significant inter-company balances and transactions have been eliminated in consolidation.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those reported results to the extent that those estimates and assumptions prove to be inaccurate.

Certain prior year amounts have been reclassified to conform to the 2010 presentation.

Table of Contents**2. Recent Accounting Pronouncements*****(a) Recently Adopted***

In June 2009, the Financial Accounting Standards Board (FASB) issued guidance that establishes the FASB Accounting Standards Codification (the ASC) as the single source of authoritative accounting principles in the preparation of financial statements in conformity with GAAP. The ASC is effective for interim and annual periods ending after September 15, 2009. Alleghany adopted the ASC in the 2009 third quarter, and the implementation did not have any impact on its results of operations and financial condition.

In June 2009, FASB issued guidance that changes the way entities account for securitizations and special-purpose entities. This guidance eliminates the concept of a qualifying special-purpose entity, changes the requirements for derecognizing financial assets, and requires additional disclosure about transfers of financial assets, including securitization transactions and an entity's continuing exposure to the risks related to transferred financial assets. This guidance also changes how a company determines when an entity that is insufficiently capitalized or is not controlled through voting rights (or similar rights) should be consolidated. The determination of whether a company is required to consolidate an entity is based on, among other things, an entity's purpose and design and a company's ability to direct the activities of the entity that most significantly impact the entity's economic performance. This guidance is generally effective for interim and annual periods beginning in 2010. Alleghany adopted this guidance in the 2010 first quarter, and the implementation did not have any impact on its results of operations and financial condition. Alleghany did not have any off-balance sheet arrangements outstanding at September 30, 2010 or December 31, 2009, including those that may involve the types of entities contemplated in this guidance.

In September 2009, FASB issued guidance that allows investors to use net asset value as a practical expedient to estimate the fair value of investments in investment companies (and like entities) that do not have readily determinable fair values. This guidance does not apply to investments accounted for using the equity method. This guidance is effective for interim and annual periods ending after December 15, 2009, with early application permitted. Alleghany adopted this guidance in the fourth quarter of 2009, and the implementation did not have any impact on its results of operations and financial condition. Alleghany's partnership investments that are accounted for as available-for-sale are subject to this guidance. Net asset value quotes from the third-party general partner of the entity in which such investments are held, which will often be based on unobservable market inputs, constitute the primary input in Alleghany's determination of the fair value of such investments. The fair value of Alleghany's available-for-sale partnership investments was \$23.9 million at September 30, 2010 and \$35.2 million at December 31, 2009.

In January 2010, FASB issued guidance that provides for additional financial statement disclosure regarding fair value measurements, including how fair values are measured. This guidance is effective for interim and annual periods ending after December 15, 2009. Alleghany adopted this guidance in the 2010 first quarter, and the implementation did not have any impact on its results of operations and financial condition.

Table of Contents***(b) Future Application of Accounting Standards***

In July 2010, FASB issued guidance that provides for additional financial statement disclosure regarding financing receivables, including the credit quality and allowance for credit losses associated with such assets. This guidance is effective for interim and annual periods ending after December 15, 2010. Alleghany will adopt this guidance in the 2011 first quarter, and Alleghany does not currently believe that the implementation will have any impact on its results of operations and financial condition.

In October 2010, FASB issued new guidance that provides additional clarification for costs associated with acquiring or renewing insurance contracts. The new guidance states that only incremental, direct costs associated with the successful acquisition of a new or renewal insurance contract may be capitalized as deferred acquisition costs. Furthermore, such costs: (i) must be essential to the contract transaction; (ii) would not have been incurred had the contract transaction not occurred; and (iii) must be related directly to the acquisition activities involving underwriting, policy issuance and processing, medical and inspection, and sales force contract selling. Advertising costs should be included in deferred acquisition costs only if the capitalization criteria in separate direct-response advertising guidance within GAAP are met. All other acquisition-related costs and other expenses should be charged to expense as incurred. This guidance is effective for interim and annual periods beginning after December 15, 2011, with early adoption permitted (but only at the beginning of an entity's annual reporting period). Alleghany will adopt this guidance in the 2012 first quarter, and Alleghany does not currently believe that the implementation will have a material impact on its results of operations and financial condition.

3. Earnings Per Share of Common Stock

The following is a reconciliation of the income and share data used in the basic and diluted earnings per share computations for the three and nine months ended September 30, 2010 and 2009 (in millions, except share amounts):

	Three months ended September 30,		Nine months ended September 30,	
	2010	2009	2010	2009
Net earnings	\$ 36.6	\$ 49.5	\$ 161.1	\$ 140.1
Preferred dividends				6.2
Income available to common stockholders for basic earnings per share	36.6	49.5	161.1	133.9
Preferred dividends				6.2
Effect of other dilutive securities			(0.1)	(0.7)
Income available to common stockholders for diluted earnings per share	\$ 36.6	\$ 49.5	\$ 161.0	\$ 139.4
Weighted average shares outstanding applicable to basic earnings per share	8,829,414	9,176,357	8,936,763	8,824,589
Preferred stock				584,965
Effect of other dilutive securities			11,261	5,468
Adjusted weighted average shares outstanding applicable to diluted earnings per share	8,829,414	9,176,357	8,948,024	9,415,022

Contingently issuable shares of 42,784 and 40,215 were potentially available during the first nine months of 2010 and 2009, respectively, but were not included in the computations of diluted earnings per share because the impact was anti-dilutive to the earnings per share calculation.

Table of Contents

Earnings per share by quarter may not equal the amount for the full year due to rounding.

4. Commitments and Contingencies

(a) Leases

Alleghany leases certain facilities, furniture and equipment under long-term lease agreements.

(b) Litigation

Alleghany's subsidiaries are parties to pending litigation and claims in connection with the ordinary course of their businesses. Each such subsidiary makes provisions for estimated losses to be incurred in such litigation and claims, including legal costs. In the opinion of management, such provisions were adequate at September 30, 2010.

(c) Asbestos and Environmental Impairment Exposure

AIHL's reserves for unpaid losses and loss adjustment expenses include \$14.2 million of gross reserves and \$14.1 million of net reserves at September 30, 2010, and \$18.9 million of gross reserves and \$18.8 million of net reserves at December 31, 2009, for various liability coverages related to asbestos and environmental impairment claims that arose from reinsurance assumed by a subsidiary of CATA between 1969 and 1976. This subsidiary exited such business in 1976. CATA released \$3.5 million of such net reserves at June 30, 2010 based on a reserve study that was completed in the 2010 second quarter. Although Alleghany is unable at this time to determine whether additional reserves, which could have a material impact upon its results of operations, may be necessary in the future, Alleghany believes that CATA's asbestos and environmental reserves were adequate at September 30, 2010. Additional information concerning CATA's asbestos and environmental exposure can be found in Note 13 to the Notes to Consolidated Financial Statements set forth in Item 8 of the 2009 10-K.

(d) Indemnification Obligations

On July 14, 2005, Alleghany completed the sale of its world-wide industrial minerals business, World Minerals, Inc. ("World Minerals"), to Imerys USA, Inc. (the "Purchaser"), a wholly-owned subsidiary of Imerys, S.A., pursuant to a Stock Purchase Agreement, dated as of May 19, 2005, by and among the Purchaser, Imerys, S.A. and Alleghany (the "Stock Purchase Agreement"). Pursuant to the Stock Purchase Agreement, Alleghany undertook certain indemnification obligations, including a general indemnification for breaches of representations and warranties set forth in the Stock Purchase Agreement (the "Contract Indemnification") and a special indemnification (the "Products Liability Indemnification") related to products liability claims arising from events that occurred during pre-closing periods, including the period of Alleghany ownership.

The Products Liability Indemnification is divided into two parts, the first relating to products liability claims arising in respect of events occurring during the period prior to Alleghany's acquisition of the World Minerals business from Johns Manville Corporation, Inc., formerly known as Manville Sales Corporation ("Manville"), in July 1991 (the "Manville Period"), and the second relating to products

Table of Contents

liability claims arising in respect of events occurring during the period of Alleghany ownership (the Alleghany Period).

Under the terms of the Stock Purchase Agreement, Alleghany will provide indemnification at a rate of 100 percent for the first \$100.0 million of losses arising from products liability claims relating to the Manville Period and at a rate of 50 percent for the next \$100.0 million of such losses, so that Alleghany's maximum indemnification obligation in respect of products liability claims relating to the Manville Period is \$150.0 million. This indemnification obligation in respect of the Manville Period products liability claims will expire on July 31, 2016. The Stock Purchase Agreement states that it is the intention of the parties that, with regard to losses incurred in respect of products liability claims relating to the Manville Period, recovery should first be sought from Manville, and that Alleghany's indemnification obligation in respect of products liability claims relating to the Manville Period is intended to indemnify the Purchaser for such losses which are not recovered from Manville within a reasonable period of time after recovery is sought from Manville. In connection with World Minerals' acquisition of the assets of the industrial minerals business of Manville in 1991, Manville agreed to indemnify World Minerals for certain product liability claims, in respect of products of the industrial minerals business manufactured during the Manville Period, asserted against World Minerals through July 31, 2006. In June 2006, Manville agreed to extend its indemnification for such claims asserted against World Minerals through July 31, 2009. Notwithstanding the expiration of the Manville indemnity, World Minerals did not, as part of its 1991 acquisition of the assets of Manville's industrial minerals business assets, assume liability for product liability claims to the extent that such claims relate, in whole or in part, to the Manville Period, and Manville should continue to be responsible for such claims.

The Stock Purchase Agreement provides that Alleghany has no responsibility for products liability claims arising in respect of events occurring after the closing, and that any products liability claims involving both pre-closing and post-closing periods will be apportioned on an equitable basis.

With respect to the Contract Indemnification, substantially all of the representations and warranties to which the Contract Indemnification applies survived until July 14, 2007, with the exception of certain representations and warranties such as those related to environmental, real estate and tax matters, which survive for longer periods and generally, except for tax and certain other matters, apply only to aggregate losses in excess of \$2.5 million, up to a maximum of approximately \$123.0 million.

Additional information concerning the Contract Indemnification and Products Liability Indemnification can be found in Note 13 to the Notes to Consolidated Financial Statements set forth in Item 8 of the 2009 10-K.

Based on Alleghany's historical experience and other analyses, in July 2005, Alleghany established a \$0.6 million reserve in connection with the Products Liability Indemnification for the Alleghany Period. Such reserve was approximately \$0.3 million at both September 30, 2010 and December 31, 2009.

(e) Equity Holdings Concentration

At September 30, 2010 and December 31, 2009, Alleghany had a concentration of market risk in its available-for-sale equity securities portfolio with respect to certain energy sector businesses of \$675.5

Table of Contents

million and \$399.2 million, respectively. Of the \$675.5 million, \$432.5 million represented Alleghany's ownership of common stock of Exxon Mobil Corporation.

5. Segments of Business

Information related to Alleghany's reportable segment is shown in the table below. Property and casualty and surety insurance operations are conducted by AIHL through its insurance operating units RSUI, CATA and PCC. In addition, AIHL Re is a wholly-owned subsidiary of AIHL that has in the past provided reinsurance to Alleghany's insurance operating units and affiliates.

Alleghany's reportable segment is reported in a manner consistent with the way management evaluates the businesses. As such, insurance underwriting activities are evaluated separately from investment activities. Net realized capital gains and other-than-temporary impairment losses are not considered relevant in evaluating investment performance on an annual basis. Segment accounting policies are described in Note 1 to the Notes to Consolidated Financial Statements set forth in Item 8 of the 2009 10-K.

The primary components of corporate activities are Alleghany Properties, Alleghany's investments in Homesite and ORX, and strategic investments and other activities at the parent level.

6. Reinsurance

As discussed in the 2009 10-K, RSUI reinsures its property lines of business through a program consisting of surplus share treaties, facultative placements, per risk, and catastrophe excess of loss treaties. RSUI's catastrophe reinsurance program (which covers catastrophe risks including, among others, windstorms and earthquakes) and per risk reinsurance program run on an annual basis from May 1 to the following April 30 and thus expired on April 30, 2010. RSUI placed all of its catastrophe reinsurance program for the 2010-2011 period, and the new program is substantially similar to the expired program. The new reinsurance program provides coverage in two layers for \$400.0 million of losses in excess of a \$100.0 million net retention after application of the surplus share treaties, facultative reinsurance and per risk covers. The first layer provides coverage for \$100.0 million of losses, before a 33 percent co-participation by RSUI, in excess of the \$100.0 million net retention, and the second layer provides coverage for \$300.0 million of losses, before a 5 percent co-participation by RSUI, in excess of \$200.0 million. In addition, RSUI's property per risk reinsurance program for the 2010-2011 period provides RSUI with coverage for \$90.0 million of losses, before a 10 percent co-participation by RSUI (compared with no RSUI co-participation under the expired program), in excess of a \$10.0 million net retention per risk after application of the surplus share treaties and facultative reinsurance.

As discussed in Note 5(d) to the Notes to Consolidated Financial Statements set forth in Item 8 of the 2009 10-K, RSUI reinsures its other lines of business through quota share treaties, except for professional liability and binding authority lines where RSUI retains all of such business. RSUI's quota share reinsurance treaty for umbrella/excess renewed on June 1, 2010 on the same terms as the expiring treaty, providing coverage for policies with limits up to \$30.0 million, with RSUI ceding 35 percent of the premium and loss for policies with limits up to \$15.0 million and ceding 67.5 percent of the premium and loss for policies with limits in excess of \$15.0 million up to \$30.0 million. RSUI's directors and officers liability line quota share reinsurance treaty renewed on July 1, 2010 on the same terms as the expiring treaty, providing coverage for policies with limits up to \$20.0 million, with RSUI ceding 35 percent of the premium and loss for policies with limits up to \$10.0 million and ceding 60 percent of the premium and loss for policies with limits in excess of \$10.0 million up to \$20.0 million.

7. Investments**(a) Fair Value**

Edgar Filing: ALLEGHANY CORP /DE - Form 10-Q

The estimated carrying values and fair values of Alleghany's consolidated financial instruments as of September 30, 2010 and December 31, 2009 were as follows (in millions):

	September 30, 2010		December 31, 2009	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Assets				
Investments (excluding equity method investments and loans)*	\$ 4,572.0	\$ 4,572.0	\$ 4,211.6	\$ 4,211.6
Liabilities				
Senior Notes**	\$ 298.9	\$ 304.7		

12

Table of Contents

* This table includes available-for-sale investments (securities as well as partnership investments carried at fair value that are included in other invested assets). This table excludes investments accounted for using the equity method (Homesite, ORX and other investments) as well as certain loans receivable that are carried at cost, all of which are included in other invested assets. The fair value of short-term investments approximates amortized cost. The fair value of all other categories of investments is discussed below.

** See Note 11 herein.

GAAP defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are not adjusted for transaction costs. In addition, GAAP has a three-tiered hierarchy for inputs used in management's determination of fair value of financial instruments that emphasizes the use of observable inputs over the use of unobservable inputs by requiring that the observable inputs be used when available. Observable inputs are market participant assumptions based on market data obtained from sources independent of the reporting entity. Unobservable inputs are the reporting entity's own assumptions about market participant assumptions based on the best information available under the circumstances. In assessing the appropriateness of using observable inputs in making its fair value determinations,

Alleghany considers whether the market for a particular security is active or not based on all the relevant facts and circumstances. For example, Alleghany may consider a market to be inactive if there are relatively few recent transactions or if there is a significant decrease in market volume. Furthermore, Alleghany considers whether observable transactions are orderly or not. Alleghany does not consider a transaction to be orderly if there is evidence of a forced liquidation or other distressed condition, and as such, little or no weight is given to that transaction as an indicator of fair value.

The hierarchy is broken down into three levels based on the reliability of inputs as follows:

Level 1 Valuations are based on unadjusted quoted prices in active markets for identical, unrestricted assets. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these assets does not involve any meaningful degree of judgment. An active market is defined as a market where transactions for the financial instrument occur with sufficient frequency and volume to provide pricing information on an ongoing basis. Alleghany's Level 1 assets generally include publicly traded common stocks and debt securities issued directly by the U.S. Government, where Alleghany's valuations are based on quoted market prices.

Level 2 Valuations are based on quoted market prices where such markets are not deemed to be sufficiently active. In such circumstances, additional valuation metrics will be used which involve direct or indirect observable market inputs. Alleghany's Level 2 assets generally include preferred stocks and debt securities other than debt issued directly by the U.S. Government. Alleghany's Level 2 liabilities include its Senior Notes. Substantially all of the determinations of value in this category are based on a single quote from third-party dealers and pricing services. As Alleghany generally does not make any adjustments thereto, such quote typically constitutes the sole input in Alleghany's determination of the fair value of these types of securities. In developing a quote, such third parties will use the terms of the security and market-based inputs. Terms of the security include coupon, maturity date, and any special provisions that may, for example, enable the investor, at its election, to redeem the security prior to its scheduled maturity date. Market-based inputs include the level of interest rates applicable to comparable securities in the market place and current credit rating(s) of the security. Such quotes are generally non-binding.

Table of Contents

Level 3 Valuations are based on inputs that are unobservable and significant to the overall fair value measurement. Valuation under Level 3 generally involves a significant degree of judgment on the part of Alleghany. Alleghany's Level 3 assets are primarily limited to partnership investments. Net asset value quotes from the third-party general partner of the entity in which such investments are held, which will often be based on unobservable market inputs, constitute the primary input in Alleghany's determination of the fair value of such assets.

Alleghany validates the reasonableness of its fair value determinations for Level 2 investment securities by testing the methodology of the relevant third-party dealer or pricing service that provides the quotes upon which the fair value determinations are made. Alleghany tests the methodology by comparing such quotes with prices from executed market trades when such trades occur. Alleghany discusses with the relevant third-party dealer or pricing service any identified material discrepancy between the quote derived from its methodology and the executed market trade in order to resolve the discrepancy. Alleghany uses the quote from the third-party dealer or pricing service unless Alleghany determines that the methodology used to produce such quote is not in compliance with GAAP. In addition to such procedures, Alleghany also compares the aggregate amount of the fair value for such Level 2 securities with the aggregate fair value provided by a third-party financial institution. Furthermore, Alleghany reviews the reasonableness of its classification of securities within the three-tiered hierarchy to ensure that the classification is consistent with GAAP.

The estimated carrying values of Alleghany's financial instruments as of September 30, 2010 and December 31, 2009 allocated among the three levels set forth above were as follows (in millions):

Table of Contents

	Level 1	Level 2	Level 3 (1)	Total
As of September 30, 2010				
Equity securities:				
Common stock	\$ 936.6	\$	\$	\$ 936.6

Other invested assets			35.2	35.2
Investments (excluding equity method investments)	\$ 1,338.1	\$ 2,838.3	\$ 35.2	\$ 4,211.6
(1) Level 3 securities consist of partnership investments and certain debt				

securities. The carrying value of partnership investments of \$23.9 million decreased by \$11.3 million from the December 31, 2009 carrying value of \$35.2 million, due primarily to sales of \$13.9 million (which generated a realized capital gain of \$5.1 million), partially offset by an increase in estimated fair value during the period of \$2.6 million. The carrying value of debt securities of \$1.6 million consists of four mortgage- and asset-backed securities acquired during the 2010 third quarter.

- (2) Consists primarily of residential mortgage-backed securities.
- (3) Consists of Alleghany's 5.625% Senior Notes due on September 15, 2020. See Note 11.

(b) Available-For-Sale Securities

Available-for-sale securities at September 30, 2010 and December 31, 2009 are summarized as follows (in millions):

15

	\$ 4,029.4	\$ 171.4	\$ (24.4)	\$ 4,176.4

* Consists primarily of residential mortgage-backed securities.

The amortized cost and estimated fair value of debt securities at September 30, 2010 by contractual maturity are shown below (in millions). Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

Table of Contents

	Amortized Cost	Fair Value
Short-term investments due in one year or less	\$ 413.8	\$ 413.8
Mortgage- and asset-backed securities	950.4	988.9
Debt securities		
One year or less	195.3	197.8
Over one through five years	834.9	869.5
Over five through ten years	519.1	554.1
Over ten years	561.4	587.4
Equity securities	929.9	936.6
	\$ 4,404.8	\$ 4,548.1

The proceeds from sales of available-for-sale securities were approximately \$1.3 billion and \$1.3 billion for the nine months ended September 30, 2010 and 2009, respectively. The amounts of gross realized capital gains and gross realized capital losses of available-for-sale securities for the nine months ended September 30, 2010 and 2009 were:

	Nine Months Ended September 30, 2010 2009 (in millions)	
Gross realized gains	\$ 94.3	\$ 221.5
Gross realized losses	(7.3)	(17.5)
Net realized gains	\$ 87.0	\$ 204.0

The gross loss amounts exclude other-than-temporary impairment losses discussed below, but include \$11.2 million of other impairment losses incurred by PCC in the 2009 second quarter (see Note 4(a) to the Notes to Consolidated Financial Statements set forth in Item 8 of the 2009 10-K). Realized gains and losses on investments are determined in accordance with the specific identification method.

(c) Other-Than-Temporary Impairment Losses

Alleghany holds its equity and debt securities as available for sale, and as such, these securities are recorded at fair value. Alleghany continually monitors the difference between cost and the estimated fair value of its investments, which involves uncertainty as to whether declines in value are temporary in nature. If Alleghany believes a decline in the value of a particular investment is temporary, Alleghany records the decline as an unrealized loss in stockholders equity. If the decline is deemed to be other than temporary, Alleghany writes it down to the carrying value of the investment and records an other-than-temporary impairment loss on its statement of earnings. In addition, under GAAP, any portion of such decline that relates to debt securities that is believed to arise from factors other than credit is to be recorded as a component of other comprehensive income.

Management's assessment of a decline in value includes, among other things: (i) the duration of time and the relative magnitude to which fair value of the investment has been below cost; (ii) the financial condition and near-term prospects of the issuer of the investment; (iii) extraordinary events, including negative news releases and rating agency downgrades, with respect to the issuer of the investment; (iv) Alleghany's ability and intent to hold an equity security for a period of time sufficient to allow for any anticipated recovery; and (v) whether it is more likely than not that Alleghany will sell a debt security before recovery of its amortized cost basis. A debt security is deemed

impaired if it is probable that Alleghany will not be able to collect all amounts due under the security's contractual terms. An equity security is deemed impaired if, among other things, its decline in estimated fair value has existed

Table of Contents

for twelve months or more or if its decline in estimated fair value from its cost is greater than 50 percent, absent compelling evidence to the contrary. Further, for securities expected to be sold, an other-than-temporary impairment loss is recognized if Alleghany does not expect the fair value of a security to recover its cost prior to the expected date of sale. If that judgment changes in the future, Alleghany may ultimately record a realized loss after having originally concluded that the decline in value was temporary. Risks and uncertainties are inherent in the methodology Alleghany uses to assess other-than-temporary declines in value. Risks and uncertainties could include, but are not limited to, incorrect assumptions about financial condition, liquidity or future prospects, inadequacy of any underlying collateral, and unfavorable changes in economic or social conditions, interest rates or credit ratings.

Other-than-temporary impairment losses for the nine months ended September 30, 2010 reflect \$9.2 million of unrealized losses that were deemed to be other-than temporary and, as such, were required to be charged against earnings. Of the \$9.2 million, \$8.0 million related to equity security holdings (primarily in the energy sector), and \$1.2 million related to debt security holdings (all of which were deemed to be credit-related). Of the \$9.2 million of impairment losses, \$2.5 million was incurred in the third quarter of 2010. The determination that unrealized losses on such securities were other-than-temporary was primarily based on the severity and duration of the declines in fair value of such securities relative to their cost as of the balance sheet date. Other-than-temporary impairment losses for the first nine months of 2009 reflect \$85.3 million of unrealized losses that were deemed to be other-than-temporary and, as such, were required to be charged against earnings. Of the \$85.3 million, \$57.0 million related to equity security holdings in the energy sector, \$16.5 million related to equity security holdings in various other sectors, and \$11.8 million related to debt security holdings (all of which were deemed to be credit-related). Such severe declines primarily related to a significant deterioration of U.S. equity and, to a lesser extent, residential housing market conditions during the latter part of 2008 and extending through the first quarter of 2009, which abated somewhat in the 2009 second and third quarters. Of the \$85.3 million of impairment losses, \$9.5 million was incurred in the third quarter of 2009.

After adjusting the cost basis of securities for the recognition of unrealized losses through other-than-temporary impairment losses, the gross unrealized investment losses and related fair value of debt securities and equity securities at September 30, 2010 and December 31, 2009 were as follows (in millions):

Table of Contents

	As of September 30, 2010		As of December 31, 2009	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
<i>Debt securities</i>

More than 12 months	53.2	4.3	167.1	13.5
Total	\$ 707.3	\$ 51.6	\$ 666.0	\$ 24.4

As of September 30, 2010, Alleghany held a total of 68 debt and equity securities that were in an unrealized loss position, of which 19 securities, all debt securities, were in an unrealized loss position continuously for 12 months or more. Of the debt securities that were in an unrealized loss position, all were mortgage- and asset-backed securities, and states, municipalities and political subdivisions bonds. At September 30, 2010, virtually all of Alleghany's debt securities were rated investment grade.

At September 30, 2010, non-income producing invested assets were insignificant.

8. Income Taxes

As of September 30, 2010, Alleghany believed there were no material uncertain tax positions that would require disclosure under GAAP.

The effective tax rate on earnings before income taxes was 27.8 percent for the first nine months of 2010, compared with 28.7 percent for the corresponding 2009 period. The slightly lower effective tax rate in 2010 primarily reflects Alleghany's recognition of a permanent tax benefit in the 2010 first

Table of Contents

quarter. This permanent tax benefit relates to a finalization of Alleghany's unused foreign tax credits arising from its prior ownership of World Minerals which was sold on July 14, 2005.

9. Regulatory Matters

The California Department of Insurance (the "CDI") is responsible for periodic financial and market conduct examinations of California-domiciled insurance companies. In September 2010, the CDI issued a financial examination report of PCIC for the period from July 1, 2004 through December 31, 2008. As part of its work for such financial examination report, the CDI produced an actuarial report (the "Actuarial Report") for the years ended December 31, 2009 and 2008. The Actuarial Report included an estimate of loss and LAE reserves on a statutory basis of accounting that was higher than that recorded by PCIC at such dates. Alleghany believes that PCIC's reserves for unpaid losses and LAE are adequate, and the CDI did not require PCIC to currently or retroactively increase its carried reserves to the estimates included in the Actuarial Report. AIHL did, however, contribute \$40.0 million of capital to PCC on September 27, 2010, and these funds were used by PCIC to increase its workers' compensation deposit, which is required to be maintained by PCIC under California workers' compensation regulations, to a level consistent with the estimated loss and LAE reserves included in the Actuarial Report.

10. Share Repurchases

In February 2008, Alleghany announced that its Board of Directors had authorized the repurchase of shares of its common stock, at such times and at prices as management may determine advisable, up to an aggregate of \$300.0 million. During the first nine months of 2010, Alleghany had repurchased approximately \$66.6 million of shares. As of September 30, 2010, \$284.8 million of the \$300.0 million program was utilized. In July 2010, Alleghany's Board of Directors authorized the repurchase of additional shares of common stock, at such times and at prices as management may determine advisable, up to an aggregate of \$300.0 million upon the completion of the previously announced program.

11. Senior Notes and Credit Agreement

On September 20, 2010, Alleghany issued \$300.0 million of 5.625% Senior Notes due on September 15, 2020 ("Senior Notes"). The Senior Notes are unsecured and unsubordinated general obligations of Alleghany. Interest is payable semi-annually on March 15 and September 15 of each year. The terms of the Senior Notes permit redemption prior to their maturity. The indenture under which the Senior Notes were issued contains covenants that impose conditions on Alleghany's ability to create liens on the capital stock of AIHL or RSUI or to engage in sales of the capital stock of AIHL or RSUI. The Senior Notes were issued at a discount of approximately 99.63 percent, resulting in proceeds before underwriting discount, commissions and other expenses of \$298.9 million, and an effective yield of approximately 5.67 percent. Approximately \$2.8 million of underwriting discount, commissions and other expenses were recorded as deferred charges, which are amortized over the life of the Senior Notes. Alleghany currently intends to use the net proceeds from the sale of the Senior Notes for general corporate purposes, including, but not limited to, acquisitions, additions to working capital, capital expenditures, investments, contributions of capital to its subsidiaries, repayment of Senior Notes, and repurchases and redemptions of its securities.

On September 9, 2010, Alleghany entered into a three-year credit agreement (the "Credit Agreement"), with a bank syndicate, providing commitments (the "Commitments") for a two-tranche revolving credit facility in an aggregate principal amount of up to \$100.0 million, consisting of (i) a secured credit facility ("Tranche A"), subject to a borrowing base as set forth in the Credit Agreement,

Table of Contents

in an aggregate principal amount of up to \$50.0 million and (ii) an unsecured credit facility (Tranche B) in an aggregate principal amount of up to \$50.0 million. The Commitments under the Credit Agreement are scheduled to terminate on September 9, 2013 (the Maturity Date), unless earlier terminated. Borrowings under the Credit Agreement will be available for working capital and general corporate purposes. Alternate Base Rate Borrowings under the Credit Agreement will bear interest at (x) the greatest of (a) the administrative agent's prime rate, (b) the federal funds rate plus 0.5 percent or (c) an adjusted London Interbank Overnight (LIBO) rate for a one month interest period on such day plus 1 percent, plus (y) a specified margin (currently 0 basis points for Tranche A and 125 basis points for Tranche B). Eurodollar Borrowings under the Credit Agreement will bear interest at an adjusted LIBO Rate for the interest period in effect plus a specified margin (currently 75 basis points for Tranche A and 225 basis points for Tranche B). The Credit Agreement requires that all loans be repaid in full no later than the Maturity Date. The Credit Agreement also requires Alleghany to pay a commitment fee each quarter in a range of between one-fifth and one-half of one percent per annum, in each case based upon Alleghany's credit ratings, on the daily unused amount of the Commitments of the relevant Tranche.

The Credit Agreement contains representations, warranties and covenants customary for bank loan facilities of this nature. In this regard, the Credit Agreement requires Alleghany to, among other things, (i) maintain a consolidated net worth of not less than the sum of (x) approximately \$2.0 billion plus (y) 50 percent of Alleghany's accumulated, consolidated net earnings earned in each fiscal quarter (if positive) commencing September 30, 2010 and (ii) maintain a ratio of total indebtedness to total capital as of the end of each fiscal quarter of not greater than 0.25 to 1.0. Additionally, the Credit Agreement contains various negative covenants with which Alleghany must comply, including, but not limited to, limitations respecting the creation of liens on any property or asset; the incurrence of indebtedness; mergers, consolidations, liquidations and dissolutions; change of business; sales of assets; transactions with affiliates; and other provisions customary in similar types of agreements. There were no borrowings under the Credit Agreement during the third quarter of 2010.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

References to the Company, Alleghany, we, us, and our in Items 2, 3 and 4 of Part I, as well as in Part II, of this Quarterly Report on Form 10-Q, or this Form 10-Q, refer to Alleghany Corporation and its consolidated subsidiaries unless the context otherwise requires. AIHL refers to our insurance holding company subsidiary Alleghany Insurance Holdings LLC. RSUI refers to our subsidiary RSUI Group, Inc. and its subsidiaries. CATA refers to our subsidiary Capitol Transamerica Corporation and its subsidiaries and also includes the results of operations of Platte River Insurance Company unless the context otherwise requires. PCC refers to our subsidiary Pacific Compensation Corporation (formerly known as Employers Direct Corporation). AIHL Re refers to our subsidiary AIHL Re LLC. Unless the context otherwise requires, references to AIHL include the results of operations of RSUI, CATA, PCC and AIHL Re. Alleghany Properties refers to our subsidiary Alleghany Properties Holdings LLC and its subsidiaries.

Cautionary Statement Regarding Forward-Looking Information

Management's Discussion and Analysis of Financial Condition and Results of Operations and Quantitative and Qualitative Disclosures About Market Risk contain disclosures which are forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. Forward-looking statements include all statements that do not relate solely to historical or current facts, and can be identified by the use of words such as may, will, expect, project, estimate, anticipate, plan, believe, potential, should, continue or the negative versions of those words or other comparable words. These forward-looking statements are based upon our current plans or expectations and are subject to a number of uncertainties and risks that could significantly affect current plans, anticipated actions and our future financial condition and results. These statements are not guarantees of future performance, and we have no specific intention to update these statements. The uncertainties and risks include, but are not limited to,

significant weather-related or other natural or human-made catastrophes and disasters;

the cyclical nature of the property and casualty insurance industry;

changes in market prices of our equity investments and changes in value of our debt portfolio;

adverse loss development for events insured by our insurance operating units in either the current year or prior years;

the long-tail and potentially volatile nature of certain casualty lines of business written by our insurance operating units;

the cost and availability of reinsurance;

exposure to terrorist acts;

the willingness and ability of our insurance operating units' reinsurers to pay reinsurance recoverables owed to our insurance operating units;

changes in the ratings assigned to our insurance operating units;

claims development and the process of estimating reserves;

legal and regulatory changes, including the new federal financial regulatory reform of the insurance industry established by the Dodd-Frank Wall Street Reform and Consumer Protection Act;

the uncertain nature of damage theories and loss amounts; and

increases in the levels of risk retention by our insurance operating units.

Table of Contents

Additional risks and uncertainties include general economic and political conditions, including the effects of a prolonged U.S. or global economic downturn or recession; changes in costs; variations in political, economic or other factors; risks relating to conducting operations in a competitive environment; effects of acquisition and disposition activities, inflation rates, or recessionary or expansive trends; changes in interest rates; extended labor disruptions, civil unrest, or other external factors over which we have no control; and changes in our plans, strategies, objectives, expectations, or intentions, which may happen at any time at our discretion. As a consequence, current plans, anticipated actions, and future financial condition and results may differ from those expressed in any forward-looking statements made by us or on our behalf.

Critical Accounting Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America, or GAAP, requires us to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period covered by the financial statements. Critical accounting estimates are defined as those estimates that are important to the presentation of our financial condition and results of operations and require us to exercise significant judgment.

We review our critical accounting estimates and assumptions quarterly. These reviews include evaluating the adequacy of reserves for unpaid losses and loss adjustment expenses, or LAE, and the reinsurance allowance for doubtful accounts, analyzing the recoverability of deferred tax assets, assessing goodwill for impairment and evaluating the investment portfolio for other-than-temporary declines in estimated fair value. Actual results may differ from the estimates used in preparing the financial statements.

Readers are encouraged to review our Report on Form 10-K for the year ended December 31, 2009, or the 2009 10-K, for a more complete description of our critical accounting estimates.

Consolidated Results of Operations

The following discussion and analysis presents a review of our results for the three and nine months ended September 30, 2010 and 2009. You should read this review in conjunction with the consolidated financial statements and other data presented in this Form 10-Q as well as Management's Discussion and Analysis of Financial Condition and Results of Operations and Risk Factors contained in our 2009 10-K and our Quarterly Reports on Form 10-Q for the quarters ended March 31, 2010 and June 30, 2010. Our results for the first nine months of 2010 are not indicative of operating results in future periods.

Overview

We are engaged, through AIHL and its subsidiaries, primarily in the property and casualty and surety insurance business. We also own and manage properties in the Sacramento, California region through our subsidiary Alleghany Properties and seek out strategic investments and conduct other activities at the parent level. Strategic investments currently include an approximately 33 percent stake in Homesite Group Incorporated, or Homesite, a national, full-service, mono-line provider of homeowners

Table of Contents

insurance, and an approximately 38 percent stake in ORX Exploration Inc., or ORX, a regional gas and oil exploration and production company. Our primary sources of revenues and earnings are our insurance operations and investments.

The profitability of our insurance operating units, and as a result, our profitability, is primarily impacted by the adequacy of premium rates, level of catastrophe losses, investment returns, intensity of competition, and the cost of reinsurance. The adequacy of premium rates is affected mainly by the severity and frequency of claims, which are influenced by many factors, including natural disasters, regulatory measures and court decisions that define and expand the extent of coverage, and the effects of economic inflation on the amount of compensation due for injuries or losses. The ultimate adequacy of premium rates is not known with certainty at the time property and casualty insurance policies are issued because premiums are determined before claims are reported.

Catastrophe losses, or the absence thereof, can have a significant impact on our results. For example, RSUI's pre-tax catastrophe losses, net of reinsurance, were \$23.9 million for the first nine months of 2010, minimal for the year ended December 31, 2009, and \$97.9 million for the year ended December 31, 2008 (primarily reflecting net losses from 2008 third quarter Hurricanes Ike, Gustav and Dolly). The incidence and severity of catastrophes in any short period of time are inherently unpredictable. Catastrophes can cause losses in a variety of our property and casualty lines of business, and most of our past catastrophe-related claims have resulted from severe hurricanes. Longer-term natural catastrophe trends may be changing due to climate change, a phenomenon that has been associated with extreme weather events linked to rising temperatures, and includes effects on global weather patterns, sea, land and air temperatures, sea levels, rain and snow. Climate change, to the extent it produces rising temperatures and changes in weather patterns, could impact the frequency or severity of weather events such as hurricanes. To the extent climate change increases the frequency and severity of such weather events, our insurance operating units, particularly RSUI, may face increased claims, particularly with respect to properties located in coastal areas. Our insurance operating units take certain measures to mitigate against the frequency and severity of such events by giving consideration to these risks in their underwriting and pricing decisions and through the purchase of reinsurance.

At September 30, 2010, we had consolidated total investments of approximately \$4.7 billion, of which approximately \$3.2 billion was invested in debt securities and approximately \$936.6 million was invested in equity securities. Net realized capital gains, other-than-temporary impairment losses and net investment income related to such investment assets are subject to market conditions and management investment decisions and as a result can have a significant impact on our profitability. In the first nine months of 2010, net realized capital gains were \$87.0 million, compared with \$204.0 million in the corresponding 2009 period, and other-than-temporary impairment losses were \$9.2 million in the first nine months of 2010, compared with \$85.3 million in the corresponding 2009 period.

The profitability of our insurance operating units is also impacted by competition generally and price competition in particular. Historically, the financial performance of the property and casualty insurance industry has tended to fluctuate in cyclical periods of price competition and excess underwriting capacity followed by periods of high premium rates and shortages of underwriting capacity. Although an individual insurance company's financial performance is dependent on its own specific business characteristics, the profitability of most property and casualty insurance companies tends to follow this cyclical market pattern. In the past few years, our insurance operating units have faced increasing

Table of Contents

competition as a result of an increased flow of capital into the insurance industry, with both new entrants and existing insurers seeking to gain market share. This has resulted in decreased premium rates and less favorable contract terms and conditions. In particular, RSUI and CATA's specialty lines of business increasingly encounter competition from admitted companies seeking to increase market share. We expect to continue to face strong competition in these and the other lines of business of our insurance operating units, and our insurance operating units may continue to experience decreases in premium rates and/or premium volume and less favorable contract terms and conditions.

As part of their overall risk and capacity management strategy, our insurance operating units purchase reinsurance for certain amounts of risk underwritten by them, especially catastrophe risks. The reinsurance programs purchased by our insurance operating units are generally subject to annual renewal. Market conditions beyond the control of our insurance operating units determine the availability and cost of the reinsurance protection they purchase, which may affect the level of business written and thus their profitability.

The following table summarizes our consolidated revenues, costs and expenses and earnings (in millions).

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2010	2009	2010	2009

Corporate activities*	4.2	(12.9)	7.6	97.7
Earnings before income taxes:				
AIHL	\$ 66.1	\$ 102.1	\$ 237.9	\$ 116.0
Corporate activities*	(5.7)	(21.6)	(15.0)	80.5

* Corporate activities consist of Alleghany Properties, our investments in Homesite and ORX and corporate activities at the parent level.

Our earnings before income taxes in the 2010 third quarter decreased from the corresponding 2009 period, primarily reflecting lower net realized capital gains and net premiums earned, partially offset by higher net investment income and lower loss and LAE. The decrease in net realized capital gains in the

Table of Contents

2010 third quarter from the corresponding 2009 period primarily reflects higher equity returns in the 2009 period compared with the corresponding 2010 period. The decrease in net premiums earned and loss and LAE primarily reflects the impact of continuing competition at RSUI, as well as PCC's determination in June 2009 to cease soliciting new and renewal business on a direct basis commencing August 1, 2009. The increase in net investment income primarily reflects modest ORX losses, net of purchase accounting adjustments, in the 2010 third quarter, whereas such losses were significant in the 2009 third quarter.

Our earnings before income taxes in the first nine months of 2010 increased from the corresponding 2009 period, primarily reflecting a decrease in loss and LAE and lower other-than-temporary impairment losses, partially offset by lower net realized capital gains and net premiums earned. The decrease in loss and LAE primarily reflects the absence of adverse reserve development at PCC in the 2010 period, compared with \$34.5 million of adverse development recorded during the second quarter of the 2009 period, as well as PCC's determination in June 2009 to cease soliciting new and renewal business on a direct basis commencing August 1, 2009. The decrease in other-than-temporary impairment losses was due to improvements in U.S. equity market conditions since the 2009 first quarter when we incurred substantial losses primarily related to a significant deterioration of U.S. equity and, to a lesser extent, residential housing market conditions. The decrease in net realized capital gains primarily reflects the absence of sales of common stock of Burlington Northern Santa Fe Corporation, or Burlington Northern, in the 2010 period, which were significant in the 2009 period. The decrease in net premiums earned in the first nine months of 2010 compared with the corresponding 2009 period reflects the impact of the factors discussed above with respect to the quarter over quarter results.

The effective tax rate on earnings before income taxes was 27.8 percent for the first nine months of 2010, compared with 28.7 percent for the corresponding 2009 period. The slightly lower effective tax rate in 2010 primarily reflects our recognition of a permanent tax benefit in the 2010 first quarter. This permanent tax benefit relates to a finalization of our unused foreign tax credits arising from our prior ownership of World Minerals, Inc. which we sold on July 14, 2005.

Combined ratio (6)	75.8%	93.4%	284.9%	90.8%

- (1) Represent components of total revenues.
- (2) Commissions, brokerage and other underwriting expenses represent commission and brokerage expenses and that portion of salaries, administration and other operating expenses attributable primarily to underwriting activities, whereas the remainder constitutes other expenses.
- (3) Represents net premiums earned less loss and LAE and commissions, brokerage and other underwriting expenses, all as determined in accordance with GAAP, and does not include net investment income, net realized capital gains, other-than-temporary impairment losses, other income or other expenses.
Underwriting profit does not replace net earnings determined in accordance with GAAP as a measure

of profitability; rather, we believe that underwriting profit, which does not include net investment income, net realized capital gains, other-than-temporary impairment losses, other income or other expenses, enhances the understanding of AIHL's insurance operating units operating results by highlighting net earnings attributable to their underwriting performance. With the addition of net investment income, net realized capital gains, other-than-temporary impairment losses, other income and other expenses, reported pre-tax net earnings (a GAAP measure) may show a profit despite an underlying underwriting loss. Where underwriting losses persist over extended periods, an insurance company's ability to continue as an ongoing concern may be at risk. Therefore, we view underwriting profit as an important measure in the overall evaluation of performance.

- (4) Loss and LAE divided by net premiums earned, all

as determined in accordance with GAAP.

- (5) Commissions, brokerage and other underwriting expenses divided by net premiums earned, all as determined in accordance with GAAP.
- (6) The sum of the loss ratio and expense ratio, all as determined in accordance with GAAP, representing the percentage of each premium dollar an insurance company has to spend on losses and LAE and commissions, brokerage and other underwriting expenses.

Table of Contents

Discussion of individual AIHL operating unit results follows, and AIHL investment results are discussed below under AIHL Investment Results.

RSUI

The decrease in gross premiums written by RSUI in the third quarter and first nine months of 2010 from the corresponding 2009 periods primarily reflects the impact of reduced exposures of RSUI's customers and continuing and increasing competition, particularly in RSUI's property, umbrella/excess and general liability lines of business, partially offset by growth in RSUI's binding authority business. RSUI's net premiums earned decreased in the third quarter and first nine months of 2010 from the corresponding 2009 periods primarily due to the decline in gross premiums written, partially offset by a decrease in ceded premiums written associated primarily with RSUI's property line of business.

The decrease in loss and LAE in the third quarter and first nine months of 2010 from the corresponding 2009 periods primarily reflects the impact of lower net premiums earned and lower non-catastrophe property losses incurred, partially offset by \$23.9 million of catastrophe losses in first nine months of 2010, compared with minimal catastrophe losses in the first nine months of 2009. The decrease in loss and LAE in the first nine months of 2010 from the corresponding 2009 period was also partially offset by modestly lower net releases of prior accident year loss reserves in the 2010 period (as further described below).

Loss and LAE in the first nine months of 2010 reflect a net \$8.5 million release of prior accident year loss reserves, compared with a net \$11.9 million reserve release of prior accident year loss reserves during the corresponding 2009 period. The \$8.5 million release consisted of a net \$7.5 million increase in loss reserves in the first quarter of 2010 and a net \$16.0 million reserve release in the 2010 second quarter. The \$7.5 million increase in loss reserves in the first quarter of 2010 relates to an increase in estimated ultimate 2007 accident year losses for the directors and officers or

D&O, liability line of business, reflecting, in part, unfavorable loss emergence on certain sub-prime mortgage industry claims. Such increase did not impact the assumptions used in estimating RSUI's loss and LAE liabilities for its D&O line of business earned in 2010.

The net \$16.0 million reserve release in the 2010 second quarter reflects a \$21.3 million reserve release in RSUI's casualty lines of business and a \$5.3 million reserve increase in RSUI's property reserves related to prior year catastrophes. The \$21.3 million reserve release in RSUI's casualty lines of business relates primarily to the general liability, professional liability and umbrella/excess lines of business primarily for the 2003 through 2007 accident years and reflects favorable loss emergence, compared with loss emergence patterns assumed in earlier periods for such lines of business. Specifically, cumulative losses for such lines of business, which include both loss payments and case reserves, in respect of prior accident years were expected to be higher through June 30, 2010 than the actual cumulative losses through that date. The amount of lower cumulative losses, expressed as a percentage of carried loss and LAE reserves at the beginning of the year, was 5.6 percent. Such reduction did not impact the assumptions used in estimating RSUI's loss and LAE liabilities for its general liability, professional liability and umbrella/excess lines of business earned in 2010. The \$5.3

Table of Contents

million reserve increase in RSUI's property reserves in the 2010 second quarter relates to an increase in loss reserves related to specific cases from third quarter 2008 catastrophes.

The net \$11.9 million reserve release in RSUI's casualty lines of business in the first nine months of 2009 relates primarily to the general liability, professional liability and D&O liability lines of business primarily for the 2003 through 2006 accident years and reflects favorable loss emergence, compared with loss emergence patterns assumed in earlier periods for such lines of business.

The decrease in net premiums earned, partially offset by a decrease in loss and LAE, was the primary cause for the decrease in RSUI's underwriting profit in the third quarter and first nine months of 2010 from the corresponding 2009 periods.

In general, rates at RSUI in the first nine months of 2010, compared with the corresponding 2009 period, reflect overall industry trends of lower pricing as a result of increased competition. RSUI continued to see fewer qualified opportunities to write business in the first nine months of 2010, as a more competitive market caused less business to flow into the wholesale marketplace in which RSUI operates.

As discussed in the 2009 10-K, RSUI reinsures its property lines of business through a program consisting of surplus share treaties, facultative placements, per risk, and catastrophe excess of loss treaties. RSUI's catastrophe reinsurance program (which covers catastrophe risks including, among others, windstorms and earthquakes) and per risk reinsurance program run on an annual basis from May 1 to the following April 30 and thus expired on April 30, 2010. RSUI placed all of its catastrophe reinsurance program for the 2010-2011 period, and the new program is substantially similar to the expired program. The new reinsurance program provides coverage in two layers for \$400.0 million of losses in excess of a \$100.0 million net retention after application of the surplus share treaties, facultative reinsurance and per risk covers. The first layer provides coverage for \$100.0 million of losses, before a 33 percent co-participation by RSUI, in excess of the \$100.0 million net retention, and the second layer provides coverage for \$300.0 million of losses, before a 5 percent co-participation by RSUI, in excess of \$200.0 million. In addition, RSUI's property per risk reinsurance program for the 2010-2011 period provides RSUI with coverage for \$90.0 million of losses, before a 10 percent co-participation by RSUI (compared with no RSUI co-participation under the expired program), in excess of a \$10.0 million net retention per risk after application of the surplus share treaties and facultative reinsurance.

As discussed in Note 5(d) to the Notes to Consolidated Financial Statements set forth in Item 8 of the 2009 10-K, RSUI reinsures its other lines of business through quota share treaties, except for professional liability and binding authority lines where RSUI retains all of such business. RSUI's quota share reinsurance treaty for umbrella/excess renewed on June 1, 2010 on the same terms as the expiring treaty, providing coverage for policies with limits up to \$30.0 million, with RSUI ceding 35 percent of the premium and loss for policies with limits up to \$15.0 million and ceding 67.5 percent of the premium and loss for policies with limits in excess of \$15.0 million up to \$30.0 million. RSUI's D&O liability line quota share reinsurance treaty renewed on July 1, 2010 on the same terms as the expiring treaty, providing coverage for policies with limits up to \$20.0 million, with RSUI ceding 35 percent of the premium and loss for policies with limits up to \$10.0 million and ceding 60 percent of the premium and loss for policies with limits in excess of \$10.0 million up to \$20.0 million.

Table of Contents*CATA*

CATA's net premiums earned increased slightly in the 2010 third quarter from the corresponding 2009 period primarily reflecting higher gross premiums written and net premiums earned in CATA's specialty markets division and commercial surety and miscellaneous errors and omissions liability lines of business, partially offset by continuing price competition in CATA's property and casualty (including in excess and surplus markets) lines of business.

CATA's net premiums earned decreased slightly in the first nine months of 2010 from the corresponding 2009 period primarily reflecting continuing price competition in CATA's property and casualty (including in excess and surplus markets) lines of business, partially offset by higher gross premiums written and net premiums earned in CATA's specialty markets division and commercial surety and miscellaneous errors and omissions liability lines of business.

The increase in loss and LAE in the third quarter and first nine months of 2010 from the corresponding 2009 periods primarily reflects a lower amount of prior year reserve releases in the 2010 periods. During the first nine months of 2010, CATA had net prior year reserve releases of \$4.3 million (none of which related to the 2010 third quarter), compared with \$9.8 million in the first nine months of 2009 (of which \$2.1 million related to the 2009 third quarter). Of the \$4.3 million reserve release, \$3.5 million reflects favorable loss emergence for various discontinued liability coverages related to asbestos and environmental impairment claims that arose from reinsurance assumed by a subsidiary of CATA between 1969 and 1976, based on a reserve study that was completed in the 2010 second quarter. In addition, the \$4.3 million reserve release includes a modest amount of net prior year reserve releases in the casualty and surety lines of business compared with loss emergence patterns assumed in earlier periods for such lines of business. Such reduction did not impact the assumptions used in estimating CATA's loss and LAE liabilities for its casualty and surety lines of business earned in 2010. The \$9.8 million reserve release in the first nine months of 2009 primarily reflects favorable loss emergence in CATA's casualty and surety lines of business, compared with loss emergence patterns assumed in earlier periods for such lines of business.

The increase in loss and LAE described above was the primary cause for the decrease in CATA's underwriting profit in the third quarter and first nine months of 2010 from the corresponding 2009 periods.

In general, rates at CATA in the first nine months of 2010, compared with the corresponding 2009 period, reflect overall industry trends of lower pricing as a result of increased competition.

PCC

PCC reported an underwriting loss of \$17.3 million for the first nine months of 2010, primarily reflecting a substantial decrease in net premiums earned from the corresponding 2009 period as a result of PCC's determination in June 2009 to cease soliciting new and renewal business on a direct basis commencing August 1, 2009. PCC's decision to cease soliciting new and renewal business on a direct basis was due to its determination that it was unable to write business at rates it deemed adequate due to the state of the California workers' compensation market. On June 30, 2009, A.M. Best downgraded its rating of PCC's insurance subsidiary, Pacific Compensation Insurance Company, or PCIC, from A- (Excellent), with a negative outlook, to B++ (Good), with a stable outlook. Commencing August 1, 2009, PCC ceased soliciting new or renewal business on a direct basis and took corresponding expense reduction steps, including staff reductions, in light of such determination. Effective April 12, 2010, as

Table of Contents

part of a strategic repositioning effort, Employers Direct Corporation changed its name to Pacific Compensation Corporation and the name of its insurance subsidiary from Employers Direct Insurance Company to Pacific Compensation Insurance Company.

PCC reported an underwriting loss of \$65.5 million for the first nine months of 2009, primarily reflecting a substantial decrease in net earned premiums and a \$34.5 million reserve increase in the 2009 second quarter. Of the \$34.5 million reserve increase, \$26.5 million related to prior accident years and \$8.0 million related to the 2009 accident year. In addition, PCC also recorded a pre-tax non-cash impairment charge of \$11.2 million in the 2009 second quarter, which is classified as a net realized capital loss in its consolidated statement of earnings.

The California Department of Insurance, or the CDI, is responsible for periodic financial and market conduct examinations of California-domiciled insurance companies. In September 2010, the CDI issued a financial examination report of PCIC for the period from July 1, 2004 through December 31, 2008. As part of its work for such financial examination report, the CDI produced an actuarial report, or the Actuarial Report, for the years ended December 31, 2009 and 2008. The Actuarial Report included an estimate of loss and LAE reserves on a statutory basis of accounting that was higher than that recorded by PCIC at such dates. We believe that PCIC's reserves for unpaid losses and LAE are adequate, and the CDI did not require PCIC to currently or retroactively increase its carried reserves to the estimates included in the Actuarial Report. AIHL did, however, contribute \$40.0 million of capital to PCC on September 27, 2010, and these funds were used by PCIC to increase its workers' compensation deposit, which is required to be maintained by PCIC under California workers' compensation regulations, to a level consistent with the estimated loss and LAE reserves included in the Actuarial Report. To the extent that PCIC's actual loss experience is less than the CDI's final estimate of PCIC's loss and LAE reserves, over time such additional workers' compensation deposit funds will be released back to PCIC.

AIHL Investment Results

Following is information relating to AIHL's investment results (in millions):

	Three months ended September 30,		Nine months ended September 30,	
	2010	2009	2010	2009
Net investment income	\$ 30.5	\$ 30.0	\$ 96.9	\$ 84.7
Net realized capital gains	\$ 27.2	\$ 62.9	\$ 82.6	\$ 89.3
Other than temporary impairment losses	\$ (2.5)	\$ (9.5)	\$ (9.2)	\$ (85.3)

Net Investment Income. The increase in AIHL's net investment income in the first nine months of 2010 from the corresponding 2009 period is due principally to improved results from partnership investments, primarily equity method partnership investments (which were unwound during the 2010 third quarter), and higher dividend income.

Net Realized Capital Gains. The decrease in net realized capital gains in the 2010 third quarter and first nine months of 2010 from the corresponding 2009 periods primarily reflects higher equity returns in the 2009 period compared with the 2010 period, partially offset by the absence of other impairment losses incurred in the first nine months of 2010, compared with \$11.2 million of other impairment losses incurred by PCC in the 2009 second quarter (see Note 4(a) to the Notes to Consolidated Financial

Table of Contents

Statements set forth in Item 8 of the 2009 10-K).

Other-Than-Temporary Impairment Losses. Other-than-temporary impairment losses for the nine months ended September 30, 2010 reflect \$9.2 million of unrealized losses that were deemed to be other-than-temporary and, as such, were required to be charged against earnings. Of the \$9.2 million, \$8.0 million related to equity security holdings (primarily in the energy sector), and \$1.2 million related to debt security holdings (all of which were deemed to be credit-related). Of the \$9.2 million of impairment losses, \$2.5 million was incurred in the third quarter of 2010. The determination that unrealized losses on such securities were other-than-temporary was primarily based on the severity and duration of the declines in fair value of such securities relative to their cost as of the balance sheet date. Other-than-temporary impairment losses for the first nine months of 2009 reflect \$85.3 million of unrealized losses that were deemed to be other-than-temporary and, as such, are required to be charged against earnings. Of the \$85.3 million, \$57.0 million related to equity security holdings in the energy sector, \$16.5 million related to equity security holdings in various other sectors, and \$11.8 million related to debt security holdings (all of which were deemed to be credit-related). Such severe declines primarily related to a significant deterioration of U.S. equity and, to a lesser extent, residential housing market conditions during the latter part of 2008 and extending through the first quarter of 2009, which abated somewhat in the 2009 second and third quarters. Of the \$85.3 million of impairment losses, \$9.5 million was incurred in the third quarter of 2009.

After adjusting the cost basis of securities for the recognition of unrealized losses through other-than-temporary impairment losses, no equity security was in a continuous unrealized loss position for twelve months or more at September 30, 2010. See Note 7 to the Notes to Unaudited Consolidated Financial Statements set forth in Part I, Item 1 of this Form 10-Q for further details concerning gross unrealized investment losses for debt securities and equity securities at September 30, 2010.

Corporate Activities Operating Results

The following table summarizes corporate activities results (in millions):

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2010	2009	2010	2009
Net investment income	\$ (1.1)	\$ (14.0)	\$ (3.3)	\$ (17.1)
Net realized capital gains	0.1	1.1	4.4	114.7
Other than temporary impairment losses				
Other income	5.2		6.5	0.1
Total revenues	\$ 4.2	\$ (12.9)	\$ 7.6	\$ 97.7
Corporate administration and other expenses	9.3	8.5	21.9	16.7
Interest expense	0.6	0.2	0.7	0.5
(Losses) earnings before income taxes	\$ (5.7)	\$ (21.6)	\$ (15.0)	\$ 80.5

Corporate activities losses before income taxes decreased in the third quarter of 2010 from the corresponding 2009 period, primarily reflecting modest ORX losses, net of purchase accounting adjustments, in the 2010 third quarter, whereas such losses were significant in the 2009 third quarter. The 2009 losses were due primarily to asset impairment charges incurred as of December 31, 2008, but finalized in the 2009 third quarter arising from relatively low energy prices as of December 31, 2008.

Corporate activities reported a loss before income taxes for the first nine months of 2010 compared with earnings before income taxes for the comparable 2009 period, primarily reflecting lower net

Table of Contents

realized capital gains, partially offset by higher net investment income in the 2010 period. The lower net realized capital gains primarily reflects the absence of sales of common stock of Burlington Northern in the 2010 period, which were significant in the 2009 period. Net realized capital gains in the first nine months of 2009 resulted primarily from parent-level sales of shares of Burlington Northern common stock, which occurred in the first and second quarters of 2009. The higher net investment income in the first nine months of 2010 compared with the corresponding 2009 period primarily reflects the ORX asset impairment charges recorded in the 2009 third quarter discussed above.

Net investment income includes \$0.5 million and \$19.2 million of our equity in losses of ORX, net of purchase accounting adjustments, for the nine months ended September 30, 2010 and 2009, respectively. Net investment income also includes \$5.2 million and \$4.0 million of our equity in losses of Homesite, net of purchase accounting adjustments, for the nine months ended September 30, 2010 and 2009, respectively. Homesite losses in both periods primarily reflect the impact of increased homeowners insurance claims from severe weather and ongoing purchase accounting adjustments.

Reserve Review Process

AIHL's insurance operating units periodically analyze, at least quarterly, liabilities for unpaid losses and LAE established in prior years and adjust their expected ultimate cost, where necessary, to reflect positive or negative development in loss experience and new information, including, for certain catastrophic events, revised industry estimates of the magnitude of a catastrophe. Adjustments to previously recorded liabilities for unpaid losses and LAE, both positive and negative, are reflected in our financial results in the periods in which these adjustments are made and are referred to as prior year reserve development. The following table presents the reserves established in connection with the losses and LAE of AIHL's insurance operating units on a gross and net basis by line of business. These reserve amounts represent the accumulation of estimates of ultimate losses (including for incurred but not yet reported losses, or IBNR) and LAE.

	Property	Casualty(1)	CMP(2)	Surety	Workers Comp(3)	All Other(4)	Total
	(dollars in millions)						
As of September 30, 2010							
Gross loss and LAE reserves	\$ 182.1	\$ 1,898.1	\$ 61.1	\$ 16.7	\$ 197.9	\$ 32.9	\$ 2,388.8
Reinsurance recoverables on unpaid losses	(68.6)	(769.7)	(0.7)	(0.1)	(20.3)	(18.8)	(878.2)
Net loss and LAE reserves	\$ 113.5	\$ 1,128.4	\$ 60.4	\$ 16.6	\$ 177.6	\$ 14.1	\$ 1,510.6
As of December 31, 2009							
Gross loss and LAE reserves	\$ 249.1	\$ 1,902.4	\$ 63.6	\$ 18.0	\$ 245.9	\$ 42.0	\$ 2,521.0
Reinsurance recoverables on unpaid losses	(104.5)	(799.5)	(0.2)	(0.1)	(20.2)	(23.2)	(947.7)

Net loss and LAE reserves	\$ 144.6	\$ 1,102.9	\$ 63.4	\$ 17.9	\$ 225.7	\$ 18.8	\$ 1,573.3
---------------------------	----------	------------	---------	---------	----------	---------	------------

(1) Primarily consists of umbrella/excess, D&O liability, professional liability and general liability.

(2) Commercial multiple peril.

(3) Workers compensation amounts include PCC, net of purchase accounting adjustments (see Note 4(a) to the Notes to Consolidated Financial Statements set forth in Item 8 of our 2009 10-K). Such adjustments include a minor reduction of gross and net loss and LAE for acquisition date discounting, as required under purchase accounting. Workers compensation amounts also include minor balances from CATA.

(4) Primarily consists of loss and LAE reserves for

terminated lines of business and loss reserves acquired in connection with prior acquisitions for which the sellers provided loss reserve guarantees. The loss and LAE reserves are ceded 100 percent to the sellers. Additional information regarding the loss reserve guarantees can be found in Note 5(b) to the Notes to Consolidated Financial Statements set forth in Item 8 of our 2009 10-K.

Table of Contents*Changes in Loss and LAE Reserves between September 30, 2010 and December 31, 2009*

Gross Reserves. Gross loss and LAE reserves at September 30, 2010 decreased from December 31, 2009, due primarily to reserve decreases in property and workers' compensation lines of business. The decrease in property gross loss and LAE reserves is mainly due to loss payments made by RSUI on hurricane related losses incurred in prior years. The decrease in workers' compensation gross loss and LAE reserves primarily reflects the impact of PCC's decision in June 2009 to cease soliciting new or renewal business on a direct basis commencing August 1, 2009.

Net Reserves. Net loss and LAE reserves at September 30, 2010 decreased from December 31, 2009, due primarily to reserve decreases in the workers' compensation and property lines of business, partially offset by a modest reserve increase in the casualty line of business. The decrease in workers' compensation net loss and LAE reserves primarily reflects the impact of PCC's decision in June 2009 to cease soliciting new or renewal business on a direct basis commencing August 1, 2009. The decrease in property net loss and LAE reserves is mainly due to loss payments made by RSUI on hurricane related losses incurred in prior years, net of corresponding decreases in reinsurance recoverables on unpaid losses. The increase in the casualty line of business relates primarily to modest increases at CATA due to growth in its specialty markets division and its miscellaneous errors and omissions liability line of business.

Reinsurance Recoverables

At September 30, 2010, AIHL had total reinsurance recoverables of \$919.1 million, consisting of \$878.2 million of ceded outstanding losses and LAE and \$40.9 million of recoverables on paid losses. RSUI's reinsurance recoverables totaled approximately \$785.1 million of AIHL's \$919.1 million. Approximately 93.1 percent of AIHL's reinsurance recoverables balance at September 30, 2010 was due from reinsurers having an A.M. Best financial strength rating of A (Excellent) or higher. AIHL's Reinsurance Security Committee, which includes certain of our officers and the chief financial officer of each of AIHL's operating units and which manages the use of reinsurance by such operating units, has determined that reinsurers with a rating of A (Excellent) or higher have an ability to meet their ongoing obligations at a level that is acceptable to us.

Information regarding concentration of AIHL's reinsurance recoverables at September 30, 2010 is as follows (dollars in millions):

Reinsurer(1)	Rating(2)	Dollar Amount	Percentage
Swiss Reinsurance Company	A (Excellent)	\$ 163.9	17.8%
The Chubb Corporation	A++ (Superior)	97.6	10.6%
Platinum Underwriters Holdings, Ltd.	A (Excellent)	96.6	10.5%
All other reinsurers		561.0	61.1%
Total		\$ 919.1	100.0%

(1) Reinsurance recoverables reflect amounts due from one or more reinsurance subsidiaries of the listed reinsurer.

- (2) Represents the A.M. Best rating for the applicable reinsurance subsidiary or subsidiaries from which the reinsurance recoverables are due.

At September 30, 2010, AIHL also had fully collateralized reinsurance recoverables of \$96.8 million

Table of Contents

due from Darwin Professional Underwriters, Inc., or Darwin. AIHL owned approximately 55 percent of Darwin, a specialty property and casualty insurer, until October 20, 2008, when it was merged with a subsidiary of Allied World Assurance Company Holdings, Ltd. The A.M. Best financial strength rating of Darwin was A (Excellent) at September 30, 2010. AIHL had no allowance for uncollectible reinsurance as of September 30, 2010.

Financial Condition*Parent Level*

General. In general, we follow a policy of maintaining a relatively liquid financial condition at the parent company. This policy has permitted us to expand our operations through internal growth at our subsidiaries and through acquisitions of, or substantial investments in, operating companies. At September 30, 2010, we held marketable securities and cash of approximately \$73.6 million at the parent company and \$951.5 million at AIHL, which totaled \$1,025.1 million. We believe that we have and will have adequate internally generated funds, cash resources and unused credit facilities to provide for the currently foreseeable needs of our business, and we had no material commitments for capital expenditures at September 30, 2010.

Stockholders' equity increased to approximately \$2.81 billion as of September 30, 2010, compared with approximately \$2.72 billion as of December 31, 2009, representing an increase of 3.5 percent. The increase in stockholders' equity primarily reflects net earnings in the first nine months of 2010, partially offset by the repurchase of our common stock pursuant to our repurchase program described below.

Senior Notes. On September 20, 2010, we issued \$300.0 million of 5.625% Senior Notes due on September 15, 2020, or Senior Notes. The Senior Notes are unsecured and unsubordinated general obligations of Alleghany as the parent company. Interest is payable semi-annually on March 15 and September 15 of each year. The terms of the Senior Notes permit redemption prior to their maturity. The indenture under which the Senior Notes were issued contains covenants that impose conditions on our ability to create liens on the capital stock of AIHL or RSUI or to engage in sales of the capital stock of AIHL or RSUI. The Senior Notes were issued at a discount of approximately 99.63 percent, resulting in proceeds before underwriting discount, commissions and other expenses of \$298.9 million, and an effective yield of approximately 5.67 percent. Approximately \$2.8 million of underwriting discount, commissions and other expenses were recorded as deferred charges, which are amortized over the life of the Senior Notes. We currently intend to use the net proceeds from the sale of the Senior Notes for general corporate purposes, including, but not limited to, acquisitions, additions to working capital, capital expenditures, investments, contributions of capital to our subsidiaries, repayment of Senior Notes, and repurchases and redemptions of our securities.

Credit Agreement. On September 9, 2010, we entered into a three-year credit agreement, or the Credit Agreement, and a related security agreement, or the Security Agreement, with a bank syndicate. The Credit Agreement provides for a two-tranche revolving credit facility in an aggregate principal amount of up to \$100.0 million, or the

Commitments, consisting of (i) a secured credit facility, or Tranche A, subject to a borrowing base as set forth in the Credit Agreement, in an aggregate principal amount of up to \$50.0 million and (ii) an unsecured credit facility, or

Tranche B, in an aggregate principal amount of up to \$50.0 million. The Commitments under the Credit Agreement are scheduled to terminate on September 9, 2013, or the Maturity Date, unless earlier terminated.

Table of Contents

Borrowings under the Credit Agreement will be available for working capital and general corporate purposes.

Alternate Base Rate Borrowings under the Credit Agreement will bear interest at (x) the greatest of (a) the administrative agent's prime rate, (b) the federal funds rate plus 0.5 percent or (c) an adjusted London Interbank Overnight, or LIBO, rate for a one month interest period on such day plus 1 percent, plus (y) a specified margin (currently 0 basis points for Tranche A and 125 basis points for Tranche B). Eurodollar Borrowings under the Credit Agreement will bear interest at the Adjusted LIBO Rate for the interest period in effect plus a specified margin (currently 75 basis points for Tranche A and 225 basis points for Tranche B). The Credit Agreement requires that all loans be repaid in full no later than the Maturity Date. The Credit Agreement also requires us to pay a Commitment Fee each quarter in a range of between one fifth and one-half of one percent per annum, based upon our Moody's Rating and S&P Rating, on the daily unused amount of the Commitments of the relevant Tranche.

The Credit Agreement contains representations, warranties and covenants customary for bank loan facilities of this nature. In this regard, the Credit Agreement requires us to, among other things, (i) maintain a consolidated net worth of not less than the sum of (x) approximately \$2.0 billion plus (y) 50 percent of our cumulative consolidated net income earned in each fiscal quarter (if positive) commencing on September 30, 2010 and (ii) maintain a ratio of consolidated total indebtedness to consolidated capital as of the end of each fiscal quarter of not greater than 0.25 to 1.0. Additionally, the Credit Agreement contains various negative covenants with which we must comply, including, but not limited to, limitations respecting the creation of liens on any property or asset; the incurrence of indebtedness; mergers, consolidations, liquidations and dissolutions; change of business; sales of assets; transactions with affiliates; and other provisions customary in similar types of agreements. In addition, at any time when a Default has occurred and is continuing or would result therefrom, the Credit Agreement proscribes our ability to declare or pay, or permit certain of our subsidiaries to declare or pay, any dividend on, or make any payment on account of, or set apart assets for a sinking or other analogous fund for, the purchase, redemption, defeasance, retirement or acquisition of, any of our stock or any such subsidiaries.

Under the Credit Agreement, an Event of Default is defined as (a) a failure to pay any principal or interest on any of the loans or any fee or any other amount payable under the Credit Agreement or any other loan document within designated time periods; (b) a breach of any representation or warranty made in the Credit Agreement or any other loan document; (c) a failure to comply with certain specified covenants, conditions or agreements in the Credit Agreement; (d) a failure to comply with any other conditions, covenants or agreements in the Credit Agreement or any other loan document within thirty days after knowledge or written notice of such failure; (e) a failure by us or any subsidiary to pay any indebtedness, other than loans under the Credit Agreement, or any obligation in respect of our or any subsidiary's hedging agreements in an aggregate amount exceeding \$25.0 million, or Material Indebtedness, when due or payable; (f) any event or condition occurs that results in the acceleration of the maturity of Material Indebtedness or which enables or permits the holder of such Material Indebtedness to cause the acceleration of such indebtedness, except for secured indebtedness that becomes due as a result of the voluntary sale or transfer of the property or assets securing such indebtedness; (g) the occurrence of certain involuntary or voluntary bankruptcy, insolvency or reorganization events relating to us or any of our material subsidiaries; (h) the rendering of certain money judgments against us or any of our subsidiaries in an aggregate amount in excess of \$25.0

Table of Contents

million; (i) a failure by us or certain affiliates to pay any material amounts to the Pension Benefit Guaranty Corporation or to an employee pension benefit plan or the institution of an enforcement proceeding under ERISA, the occurrence of certain ERISA events which would reasonably be expected to have a material adverse effect, or the occurrence of certain material events under ERISA covered plans; (j) the failure of any lien created by any of the security documents to constitute an enforceable first priority perfected lien on all of the collateral encumbered thereby; or (k) the occurrence of certain events constituting a Change of Control relating to us.

If an Event of Default occurs, then, to the extent permitted in the Credit Agreement, the Lenders may, as applicable, terminate the Commitments, accelerate the repayment of any outstanding loans and exercise all rights and remedies available to such Lenders under the Credit Agreement, the Security Agreement and related documents and applicable law, including, without limitation, exercising rights and remedies with respect to the Collateral for the benefit of the Tranche A Lenders. In the case of an Event of Default that exists due to the occurrence of certain involuntary or voluntary bankruptcy, insolvency or reorganization events relating to us, the Commitments will automatically terminate and the repayment of any outstanding loans shall be automatically accelerated.

The Security Agreement secures all of our obligations relating to the Tranche A Loans under the Credit Agreement, and grants to a collateral agent for the Lenders, or Collateral Agent, a continuing first priority lien on and security interest in, and assigns to the Collateral Agent (for the ratable benefit of the Lenders) as collateral security, all of our right, title and interest in and to: (a) all cash, securities, shares of stock, investment property, financial assets, equity interests, instruments and general intangibles which are from time to time held in or credited to a certain account, or the Account, maintained with the Collateral Agent, (b) the Account itself, and (c) all rights to which we now or hereafter become entitled by reason of our interest in any of the previously described collateral, and all security entitlements related to the Account and the financial assets credited to the Account, and the additions to, accessions to, substitutions of, products or proceeds of any or all of the foregoing.

There were no borrowings under the Credit Agreement during the third quarter of 2010.

Common Stock Repurchases. In February 2008, we announced that our Board of Directors had authorized the repurchase of shares of our common stock, at such times and at prices as management may determine advisable, up to an aggregate of \$300.0 million. As of September 30, 2010, \$284.8 million of this program was utilized. In July 2010, our Board of Directors authorized the repurchase of additional shares of common stock, at such times and at prices as management may determine advisable, up to an aggregate of \$300.0 million upon the completion of the previously announced program. During the first nine months of 2010, we repurchased an aggregate of 230,122 shares of our common stock in the open market for approximately \$66.6 million, at an average price per share of \$289.21 (share and average price amounts are not adjusted for the stock dividend declared in February 2010). As of September 30, 2010 and December 31, 2009, we had 8,820,292 and 9,037,561 shares of our common stock outstanding, respectively. Unless stated otherwise, all preceding figures have been adjusted to reflect the common stock dividend declared in February 2010 and paid in April 2010.

Subsidiaries

Financial strength is also a high priority of our subsidiaries, whose assets stand behind their financial

Table of Contents

commitments to their customers and vendors. We believe that our subsidiaries have and will have adequate internally generated funds, cash resources, and unused credit facilities to provide for the currently foreseeable needs of their businesses. Our subsidiaries had no material commitments for capital expenditures at September 30, 2010.

The obligations and cash outflow of AIHL's insurance operating units include claim settlements, administrative expenses and purchases of investments. In addition to premium collections, cash inflow is obtained from interest and dividend income and maturities and sales of investments. Because cash inflow from premiums is received in advance of cash outflow required to settle claims, AIHL's insurance operating units accumulate funds which they invest pending the need for liquidity. As an insurance company's cash needs can be unpredictable due to the uncertainty of the claims settlement process, AIHL's portfolio, which includes those of its insurance operating units, is composed primarily of debt securities and short-term investments to ensure the availability of funds and maintain a sufficient amount of liquid securities. As of September 30, 2010, investments and cash represented 74.6 percent of the assets of AIHL and its insurance operating units.

Consolidated Investment Holdings

Overview. On a consolidated basis, our invested asset portfolio was approximately \$4.75 billion as of September 30, 2010, an increase of 7.6 percent from December 31, 2009. The increase is due to the issuance of Senior Notes discussed above and positive cash flow from underwriting activities at RSUI, partially offset by negative cash flow at PCC, cash payments for year-end 2009 incentive compensation in early 2010 and our repurchase of common stock pursuant to our repurchase program. Negative cash flow at PCC was a result of PCC's determination in June 2009 to cease soliciting new and renewal business on a direct basis commencing August 1, 2009.

At September 30, 2010, the average duration of our consolidated debt securities portfolio was 3.5 years, compared with 3.5 years at December 31, 2009. The overall debt securities portfolio credit quality is measured using the lower of either Standard & Poor's or Moody's rating. In this regard, the weighted average rating at September 30, 2010 and December 31, 2009 was AA+, with substantially all securities rated investment grade.

Fair Value. The estimated carrying values and fair values of our consolidated financial instruments as of September 30, 2010 and December 31, 2009 were as follows (in millions):

	September 30, 2010		December 31, 2009	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Assets				
Investments (excluding equity method investments and loans)*	\$ 4,572.0	\$ 4,572.0	\$ 4,211.6	\$ 4,211.6
Liabilities				
Senior Notes**	\$ 298.9	\$ 304.7		

* This table includes available-for-sale investments (securities as well as partnership investments carried at fair value that are included in other invested assets). This table excludes investments

accounted for using the equity method (Homesite, ORX and other investments) and certain loans receivable that are carried at cost, all of which are included in other invested assets. The fair value of short-term investments approximates amortized cost. The fair value of all other categories of investments is discussed below.

** As discussed previously.

Table of Contents

GAAP defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are not adjusted for transaction costs. In addition, GAAP has a three-tiered hierarchy for inputs used in management's determination of fair value of financial instruments that emphasizes the use of observable inputs over the use of unobservable inputs by requiring that the observable inputs be used when available. Observable inputs are market participant assumptions based on market data obtained from sources independent of the reporting entity. Unobservable inputs are the reporting entity's own assumptions about market participant assumptions based on the best information available under the circumstances. In assessing the appropriateness of using observable inputs in making our fair value determinations, we consider whether the market for a particular security is active or not based on all the relevant facts and circumstances. For example, we may consider a market to be inactive if there are relatively few recent transactions or if there is a significant decrease in market volume. Furthermore, we consider whether observable transactions are orderly or not. We do not consider a transaction to be orderly if there is evidence of a forced liquidation or other distressed condition, and as such, little or no weight is given to that transaction as an indicator of fair value.

The hierarchy is broken down into three levels based on the reliability of inputs as follows:

Level 1 Valuations are based on unadjusted quoted prices in active markets for identical, unrestricted assets. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these assets does not involve any meaningful degree of judgment. An active market is defined as a market where transactions for the financial instrument occur with sufficient frequency and volume to provide pricing information on an ongoing basis. Our Level 1 assets generally include publicly traded common stocks and debt securities issued directly by the U.S. Government, where our valuations are based on quoted market prices.

Level 2 Valuations are based on quoted market prices where such markets are not deemed to be sufficiently active. In such circumstances, additional valuation metrics will be used which involve direct or indirect observable market inputs. Our Level 2 assets generally include preferred stocks and debt securities other than debt issued directly by the U.S. Government. Our Level 2 liabilities include the Senior Notes. Substantially all of the determinations of value in this category are based on a single quote from third-party dealers and pricing services. As we generally do not make any adjustments thereto, such quote typically constitutes the sole input in our determination of the fair value of these types of securities. In developing a quote, such third parties will use the terms of the security and market-based inputs. Terms of the security include coupon, maturity date, and any special provisions that may, for example, enable the investor, at its election, to redeem the security prior to its scheduled maturity date. Market-based inputs include the level of interest rates applicable to comparable securities in the market place and current credit rating(s) of the security. Such quotes are generally non-binding.

Level 3 Valuations are based on inputs that are unobservable and significant to the overall fair value measurement. Valuation under Level 3 generally involves a significant degree of judgment on our part. Our Level 3 assets are primarily limited to partnership investments. Net asset value quotes from the third-party general partner of the entity in which such investments are held, which will often be based on unobservable market inputs, constitute the primary input in our determination of the fair value of such assets.

Table of Contents

We validate the reasonableness of our fair value determinations for Level 2 investment securities by testing the methodology of the relevant third-party dealer or pricing service that provides the quotes upon which the fair value determinations are made. We test the methodology by comparing such quotes with prices from executed market trades when such trades occur. We discuss with the relevant third-party dealer or pricing service any identified material discrepancy between the quote derived from its methodology and the executed market trade in order to resolve the discrepancy. We use the quote from the third-party dealer or pricing service unless we determine that the methodology used to produce such quote is not in compliance with GAAP. In addition to such procedures, we also compare the aggregate amount of the fair value for such Level 2 securities with the aggregate fair value provided by a third-party financial institution. Furthermore, we review the reasonableness of our classification of securities within the three-tiered hierarchy to ensure that the classification is consistent with GAAP.

The estimated carrying values of our financial instruments as of September 30, 2010 and December 31, 2009 allocated among the three levels set forth above were as follows (in millions):

	Level 1	Level 2	Level 3 (1)	Total
As of September 30, 2010				
Equity securities:				
Common stock	\$ 936.6	\$	\$	\$ 936.6
Preferred stock				
Debt securities:				
U.S. Government obligations	343.6	30.5		374.1
Mortgage- and asset-backed securities (2)		987.3	1.6	988.9
States, municipalities and political subdivisions bonds		1,261.0		1,261.0
Foreign bonds		112.2		112.2
Corporate bonds and other		461.5		461.5
	343.6	2,852.5	1.6	3,197.7
Short-term investments	149.9	263.9		413.8
Other invested assets			23.9	23.9
Investments (excluding equity method investments)	\$ 1,430.1	\$ 3,116.4	\$ 25.5	\$ 4,572.0
Senior Notes	\$	\$ 304.7	\$	\$ 304.7
As of December 31, 2009				
Equity securities:				
Common stock	\$ 624.5	\$	\$	\$ 624.5
Preferred stock				
Debt securities:				
U.S. Government obligations	638.4			638.4
Mortgage- and asset-backed securities (2)		958.8		958.8
States, municipalities and political subdivisions bonds		1,234.0		1,234.0
Foreign bonds		144.3		144.3
Corporate bonds and other		313.5		313.5
	638.4	2,650.6		3,289.0

Short-term investments	75.2	187.7		262.9
Other invested assets			35.2	35.2
Investments (excluding equity method investments)	\$ 1,338.1	\$ 2,838.3	\$ 35.2	\$ 4,211.6

(1) Level 3 securities consist of partnership investments and certain debt securities. The carrying value of partnership investments of \$23.9 million decreased by \$11.3 million from the December 31, 2009 carrying value of \$35.2 million, due primarily to sales of \$13.9 million (which generated a realized capital gain of \$5.1 million), partially offset by an increase in estimated fair value during the period of \$2.6 million. The carrying value of debt securities of \$1.6 million consists of four mortgage- and asset-backed securities acquired during the 2010 third quarter.

(2) Consists primarily of residential mortgage-backed

securities.

Table of Contents

Mortgage- and Asset-Backed Securities. At September 30, 2010, our mortgage- and asset-backed securities portfolio, which primarily included residential mortgage-backed securities, or RMBS, and constituted \$988.9 million of our debt securities portfolio, was backed by the following types of underlying collateral (in millions):

Type of Underlying Collateral	Fair Value	Average Rating
RMBS: guaranteed by FNMA or FHLMC (1)	\$ 57.4	Aaa /AAA
RMBS: guaranteed by GNMA (2)	469.9	Aaa /AAA
RMBS: Alt A	16.0	A1 /AA
RMBS: Sub-prime	2.8	Aaa/AAA
Other (3)	442.8	Aa1/AA+
Total	\$ 988.9	Aa1 /AA+

(1) FNMA refers to the Federal National Mortgage Association, and FHLMC refers to the Federal Home Loan Mortgage Corporation.

(2) GNMA refers to the Government National Mortgage Association.

(3) Includes other asset-backed securities, commercial mortgage-backed securities and other RMBS.

Municipal Bonds. The following table details the top five state exposures of our municipal bond portfolio as of September 30, 2010 (in millions):

	General Obligation	Special Revenue	Total Fair Value
Texas	\$ 88.1	\$ 32.7	\$ 120.8
Massachusetts	8.6	76.8	85.4
Washington	55.7	15.9	71.6
New York	4.6	55.9	60.5
Colorado	35.6	21.6	57.2
All other	274.8	438.4	713.2

	\$ 467.4	\$ 641.3	\$ 1,108.7
Advance refunded/escrowed to maturity bonds			152.3
Total municipal bond portfolio			\$ 1,261.0

Recent Accounting Pronouncements

Recently Adopted

In June 2009, the Financial Accounting Standards Board, or FASB, issued guidance that establishes the FASB Accounting Standards Codification, or the ASC, as the single source of authoritative accounting principles in the preparation of financial statements in conformity with GAAP. The ASC is effective for interim and annual periods ending after September 15, 2009. We adopted the ASC in the 2009 third quarter, and the implementation did not have any impact on our results of operations and financial condition.

In June 2009, FASB issued guidance that changes the way entities account for securitizations and special-purpose entities. This guidance eliminates the concept of a qualifying special-purpose entity, changes the requirements for derecognizing financial assets, and requires additional disclosure about transfers of financial assets, including securitization transactions and an entity's continuing exposure to the risks related to transferred financial assets. This guidance also changes how a company determines when an entity that is insufficiently capitalized or is not controlled through voting rights (or similar rights) should be consolidated. The determination of whether a company is required to consolidate an

Table of Contents

entity is based on, among other things, an entity's purpose and design and a company's ability to direct the activities of the entity that most significantly impact the entity's economic performance. This guidance is generally effective for interim and annual periods beginning in 2010. We adopted this guidance in the 2010 first quarter, and the implementation did not have any impact on our results of operations and financial condition. We did not have any off-balance sheet arrangements outstanding at September 30, 2010 or December 31, 2009, including those that may involve the types of entities contemplated in this guidance.

In September 2009, FASB issued guidance that allows investors to use net asset value as a practical expedient to estimate the fair value of investments in investment companies (and like entities) that do not have readily determinable fair values. This guidance does not apply to investments accounted for using the equity method. This guidance is effective for interim and annual periods ending after December 15, 2009, with early application permitted. We adopted this guidance in the fourth quarter of 2009, and the implementation did not have any impact on our results of operations and financial condition. Our partnership investments that are accounted for as available-for-sale are subject to this guidance. Net asset value quotes from the third-party general partner of the entity in which such investments are held, which will often be based on unobservable market inputs, constitute the primary input in our determination of the fair value of such investments. The fair value of our available-for-sale partnership investments was \$23.9 million at September 30, 2010 and \$35.2 million at December 31, 2009.

In January 2010, FASB issued guidance that provides for additional financial statement disclosure regarding fair value measurements, including how fair values are measured. This guidance is effective for interim and annual periods ending after December 15, 2009. We adopted this guidance in the 2010 first quarter, and the implementation did not have any impact on our results of operations and financial condition.

Future Application of Accounting Standards

In July 2010, FASB issued guidance that provides for additional financial statement disclosure regarding financing receivables, including the credit quality and allowance for credit losses associated with such assets. This guidance is effective for interim and annual periods ending after December 15, 2010. We will adopt this guidance in the 2011 first quarter, and we do not currently believe that the implementation will have any impact on our results of operations and financial condition.

In October 2010, FASB issued new guidance that provides additional clarification for costs associated with acquiring or renewing insurance contracts. The new guidance states that only incremental, direct costs associated with the successful acquisition of a new or renewal insurance contract may be capitalized as deferred acquisition costs. Furthermore, such costs: (i) must be essential to the contract transaction; (ii) would not have been incurred had the contract transaction not occurred; and (iii) must be related directly to the acquisition activities involving underwriting, policy issuance and processing, medical and inspection, and sales force contract selling. Advertising costs should be included in deferred acquisition costs only if the capitalization criteria in separate direct-response advertising guidance within GAAP are met. All other acquisition-related costs and other expenses should be charged to expense as incurred. This guidance is effective for interim and annual periods beginning after December 15, 2011, with early adoption permitted (but only at the beginning of an entity's annual reporting period). We will adopt this guidance in the 2012 first quarter, and we do not currently believe

Table of Contents

that the implementation will have a material impact on our results of operations and financial condition.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

Market risk is the risk of loss from adverse changes in market prices and rates, such as interest rates, foreign currency exchange rates and commodity prices. The primary market risk related to our non-trading financial instruments is the risk of loss associated with adverse changes in interest rates. We invest in equity securities which are subject to fluctuations in market value. We also purchase debt securities with fixed maturities that expose us to risk related to adverse changes in interest rates. We hold our equity securities and debt securities as available for sale. Any changes in the fair value in these securities, net of tax, would be recorded as a component of other comprehensive income. However, if a decline in fair value relative to cost is believed to be other than temporary, a loss is generally recorded on our statement of earnings.

Debt Securities and Senior Notes. The primary market risk for our and our subsidiaries' debt securities is interest rate risk at the time of refinancing. We monitor the interest rate environment to evaluate refinancing opportunities. We generally do not use derivatives to manage market and interest rate risks. The tables below present sensitivity analyses at September 30, 2010 of our (i) consolidated debt securities and (ii) Senior Notes, that are sensitive to changes in interest rates. Sensitivity analysis is defined as the measurement of potential change in future earnings, fair values, or cash flows of market sensitive instruments resulting from one or more selected hypothetical changes in interest rates over a selected time. In the sensitivity analysis model below, we use a +/- 300 basis point range of change in interest rates to measure the hypothetical change in fair value of the financial instruments included in the analysis. The change in fair value is determined by calculating hypothetical September 30, 2010 ending prices based on yields adjusted to reflect a +/- 300 basis point range of change in interest rates, comparing these hypothetical ending prices to actual ending prices, and multiplying the difference by the par outstanding.

At September 30, 2010 (dollars in millions)

Interest rate shifts	-300	-200	-100	0	100	200	300
Assets:							
Debt securities, fair value	\$ 3,562.9	\$ 3,435.3	\$ 3,313.8	\$ 3,197.7	\$ 3,082.6	\$ 2,961.4	\$ 2,841.2
Estimated change in fair value	365.2	237.6	116.1		(115.1)	(236.3)	(356.5)
Liabilities:							
Senior Notes, fair value	\$ 384.7	\$ 355.5	328.9	\$ 304.7	\$ 282.7	\$ 262.6	\$ 244.2
Estimated change in fair value	80.0	50.8	24.2		(22.0)	(42.1)	(60.5)

This sensitivity analysis provides only a limited, point-in-time view of the market risk of the financial instruments discussed above. The actual impact of changes in prices and market interest rates on the financial instruments may differ significantly from those shown in the above sensitivity analysis. The sensitivity analysis is further limited because it does not consider any actions we could take in response to actual and/or anticipated changes in prices and in interest rates.

Partnership Investments. In addition to debt and equity securities, we invest in several partnerships which are subject to fluctuations in market value. Partnership investments are included in other invested assets and are accounted for as either available-for-sale or an equity method investment. The carrying value of available-for-sale partnership investments was \$23.9 million at September 30, 2010 and \$35.2 million at December 31, 2009. The carrying value of equity method partnership investments were

Table of Contents

\$47.7 million at December 31, 2009 (such partnerships were unwound during the third quarter of 2010).

Item 4. Controls and Procedures.

We carried out an evaluation, under the supervision and with the participation of our management, including our chief executive officer, or CEO, and our chief financial officer, or CFO, of the effectiveness of design and operation of our disclosure controls and procedures as of the end of the period covered by this Form 10-Q pursuant to Rule 13a-15(e) or Rule 15d-15(e) promulgated under the Securities Exchange Act of 1934, or Exchange Act. Based on that evaluation, our management, including our CEO and CFO, concluded that our disclosure controls and procedures were effective as of that date to provide reasonable assurance that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and timely reported as specified in the U.S. Securities and Exchange Commission's rules and forms. Additionally, as of the end of the period covered by this Form 10-Q, there have been no changes in internal control over financial reporting during the period covered by this Form 10-Q that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1A. Risk Factors.

Except as set forth below, there are no material changes from the risk factors set forth in Part I, Item 1A, Risk Factors, of our 2009 10-K. Please refer to the risk factors set forth below and that section of the 2009 10-K for disclosures regarding what we believe are the more significant risks and uncertainties related to our businesses.

Our failure to comply with restrictive covenants contained in the indenture governing the Senior Notes or any other indebtedness, including indebtedness under our revolving credit facility and any future indebtedness, could trigger prepayment obligations, which could adversely affect our business, financial condition and results of operations. On September 9, 2010, we entered into a three-year credit agreement with a bank which provides for a two tranche revolving credit facility, or the Credit Agreement, in an aggregate principal amount of up to \$100.0 million. On September 20, 2010, we issued \$300.0 million of the Senior Notes. The indenture governing the Senior Notes contains covenants that impose restrictions on us with respect to, among other things, the incurrence of liens on the capital stock of certain of our subsidiaries. The indenture governing the Senior Notes requires us to file with the trustee copies of our annual, quarterly and current reports which we are required to file with the SEC, and the Credit Agreement requires us to comply with certain covenants. Our failure to comply with such covenants could result in an event of default under the indenture, under the Credit Agreement or under any other debt agreement we may enter into in the future, which could, if not cured or waived, result in us being required to repay the Senior Notes, the indebtedness under the Credit Agreement or any other future indebtedness. As a result, our business, financial condition and results of operations could be adversely affected.

To service our debt, we will require a significant amount of cash, which may not be available to us. Our ability to make payments on, or repay or refinance, our debt, including the Senior

Table of Contents

Notes, will depend largely upon our future operating performance, including the operating performance of our subsidiaries. Our future performance, to a certain extent, is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control. In addition, our ability to borrow funds in the future will depend on the satisfaction of the covenants in the indenture governing the Senior Notes, in the Credit Agreement and in other debt agreements we may enter into in the future. We may need to maintain certain financial ratios. We cannot assure you that our business, including the operating performance of our subsidiaries, will generate sufficient cash flow from operations or that future borrowings will be available to us under the Credit Agreement or from other sources in an amount sufficient to enable us to pay our debt, including the Senior Notes, or to fund our other liquidity needs.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.**(c) Issuer Purchases of Equity Securities.**

The following table summarizes our common stock repurchases for the quarter ended September 30, 2010:

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share (1)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (2)	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
July 1 to July 31	9,492	\$ 293.49		
August 1 to August 31	13,497	\$ 292.74		
September 1 to September 30				
Total	22,989	\$ 293.05	22,989	\$ 315,164,891

(1) Share and average price amounts are not adjusted for the stock dividend declared in February 2010.

(2) All shares represent shares repurchased pursuant to an authorization of the Board of Directors. In February 2008,

we announced that our Board of Directors had authorized the repurchase of shares of our common stock, at such times and at prices as management may determine advisable, up to an aggregate of \$300.0 million. In July 2010, our Board of Directors authorized the repurchase of additional shares of our common stock, at such times and at prices as management may determine advisable, up to an aggregate of \$300.0 million upon completion of the previously announced program.
