UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 8-K

CURRENT REPORT
Pursuant to Section 13 or 15(d) of the
Securities Exchange Act of 1934

Date of Report (Date of Earliest event Reported): August 28, 2015 (August 28, 2015)

NETWORK CN INC.
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

000-30264
(Commission File Number)

90-0370486
(IRS Employer Identification No.)

2nd Floor, Goldsland Building,
22-26 Minden Avenue,
Tsim Sha Tsui,
Kowloon, Hong Kong

(Address of principal executive offices)

(852) 2833-2186
(Registrant's telephone number, including area code)

N/A
(Former name or former address, if changed since last report)

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions (see General Instruction A.2. below):

- Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)
- Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)
- Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))

o Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item Departure of Directors or Certain Officers; Election of Directors; Appointment of Certain Officers;
5.02. Compensatory Arrangements of Certain Officers.

At the 2015 Annual Meeting of Stockholders (the “Meeting”) held on August 28, 2015, the stockholders of Network CN Inc. (the “Company”) voted in a new slate of members to serve on the Company’s board of directors, effective immediately. As a result of this stockholder action, Mr. Frederick Wong has been appointed to serve as director. The Board also appointed Mr. Wong to serve as the Chairman of the Company’s Audit Committee and Remuneration Committee and as a member of the Company’s Nominating Committee as of the Effective Date.

Mr. Frederick Wong aged 48, is a Certified Public Accountant of Australia, Certified Public Accountant of Hong Kong, Certified General Accountant of Canada and fellow member of The Taxation Institute of Hong Kong. He has obtained a Bachelor of Business Administration from the Chinese University of Hong Kong in 1989 and a Bachelor of Commerce from The University of Southern Queensland in 1992. Also, he has studied in the Professional Master of Business Administration course offered by the Troy State University, USA.

Mr. Wong has more than 25 years of experience in audit, internal control, financial control and capital market. Since 2012, he has served as the Management Director of China Trillion Capital Limited. He is also now acting as Principal – Greater China of the CFO Centre Hong Kong. Mr. Wong started his career as an auditor and then moved to the area of IT advisory services, focusing on ERP, POS and catering services. Later, he shifted to advertising and media industry in China. Afterward, he started his own career in helping business to cope with internal financial and operational affairs and finance markets. He has extensive experience in China taxation and mergers and acquisitions. He also assisted companies to go public in USA and Hong Kong. He has held various positions in different companies in China, USA and Hong Kong including senior position in multinational companies. From 2004 to 2010, he was the Chief Financial Officer of Fuqi International, Inc, a jewelry company that he assisted to seek listing in the USA. He was also responsible for US regulatory filings and internal control. Mr. Wong also serves as an independent non-executive director of Huge China Holdings Limited, which is listed on Hong Kong Main Board, principally invests in securities listed on recognized stock exchanges and unlisted securities, including equity securities and convertible bonds issued by corporate entities. He also serves as the Board Secretary of the Board of China Oil Gangran Energy Group Holdings Limited, which is listed on Hong Kong GEM board. Mr. Wong was appointed as a director because his extensive auditing experience and financial expertise with over 25 years’ experience in the accounting industry which provides a strong foundation to serve as the Chairman of our Audit Committee.

There are no arrangements or understandings between Mr. Wong and any other persons pursuant to which they were selected as director and there are no transactions between the Company and any of them that would require disclosure under Item 404(a) of Regulation S-K.

The Company has not entered into written agreements with Mr. Wong, but the Company intends to enter agreements with them at a later date.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

Dated: August 28, 2015

NETWORK CN INC.

By: /s/ Earnest Leung
Earnest Leung
Chief Executive Officer

; "> **Business Development and New Deal Origination.** Over the years, we believe we have developed and maintained a strong industry reputation and an extensive network of relationships. We have a team of business development professionals dedicated to sourcing deals through our relationships with numerous private equity investors, investment banks, business brokers, merger and acquisition advisors, financial services companies, banks, law firms and accountants through whom we source investment opportunities. Through these relationships, we believe we have been able to strengthen our position as a private equity investor. We are well known in the private equity industry, and we believe that our experience and reputation provide a competitive advantage in originating new investments.

We believe that our debt portfolio relationships and sponsor relationships are a significant source for buyout investments. We generally source our buyout transactions in ways other than going to broad auctions, which include capitalizing on existing relationships with companies and sponsors to participate in proprietary buyout opportunities. We work closely with these companies and sponsors while we are debt investors so that we may be positioned to partner with them on buyout opportunities in a subsequent transaction.

From time to time, we may receive referrals for new prospective investments from our portfolio companies as well as other participants in the capital markets. We may pay referral fees to those who refer transactions to us that we consummate.

New Deal Underwriting and Investment Execution. In a typical transaction, we review, analyze, and substantiate through due diligence, the business plan and operations of the potential portfolio company. We perform financial due diligence, perform operational due diligence, study the industry and competitive landscape, and conduct reference checks with company management or other employees, customers, suppliers, and competitors, as necessary. We may work with external consultants, including accounting firms and industry or operational consultants, in performing due diligence and in monitoring our portfolio investments.

Once we have determined that a prospective portfolio company is suitable for investment, we work with the management and the other capital providers, including senior, junior, and equity capital providers, to structure a deal. We negotiate among these parties to agree on the rights and terms of our investment relative to the other capital in the portfolio company's capital structure. The typical debt transaction requires approximately two to six months of diligence and structuring before funding occurs. The typical buyout transaction may take up to one year to complete because the due diligence and structuring process is significantly longer when investing in a substantial equity stake in the company.

Our investments are tailored to the facts and circumstances of each deal. The specific structure is designed to protect our rights and manage our risk in the transaction. We generally structure the debt instrument to require restrictive affirmative and negative covenants, default penalties, or other protective provisions. In addition, each debt investment is individually priced to achieve a return that reflects our rights and priorities in the portfolio company's capital structure, the structure of the debt instrument, and our perceived risk of the investment. Our loans and debt securities have an annual stated interest rate; however, that interest rate is only one factor in pricing the investment. The annual stated interest rate may include some component of contractual payment-in-kind interest, which represents contractual interest accrued and added to the loan balance that generally becomes due at maturity or upon prepayment. In addition to the interest earned on loans and debt securities, our debt investments may include equity features, such as nominal cost warrants or options to buy a minority interest in the portfolio company. In a buyout transaction where our equity investment represents a significant portion of the equity, our equity ownership may or may not represent a controlling interest. If we invest in non-voting equity in a buyout, we generally have an option to acquire a controlling stake in the voting securities of the portfolio company at fair market value.

We have a centralized, credit-based approval process. The key steps in our investment process are:

Initial investment screening;

Initial investment committee approval;

Due diligence, structuring and negotiation;

Internal review of diligence results, including peer review;

Final investment committee approval;

Approval by the Executive Committee of the Board of Directors (for all debt investments that represent a commitment equal to or greater than \$20 million and every buyout transaction); and

Funding of the investment (due diligence must be completed with final investment committee approval and Executive Committee approval, as needed, before funds are disbursed).

The investment process benefits from the significant professional experience of the members of our investment committee, which is chaired by our Chief Executive Officer and includes our Chief Operating Officer, our Chief Financial Officer, and certain of our Managing Directors.

Portfolio Monitoring and Development. Middle market companies often lack the management expertise and experience found in larger companies. As a BDC, we are required by the 1940 Act to make available significant managerial assistance to our portfolio companies. Our senior level professionals work with portfolio company management teams to assist them in building their businesses. Managerial assistance includes, but is not limited to, management and consulting services related to corporate finance, marketing, human resources, personnel and board member recruiting, business operations, corporate governance, risk management and other general business matters. Our corporate finance assistance includes supporting our portfolio companies' efforts to structure and attract additional capital. We believe our extensive network of industry relationships and our internal resources help make us a collaborative partner in the development of our portfolio companies.

Our team of investment professionals regularly monitors the status and performance of each investment. This portfolio company monitoring process generally includes review of the portfolio company's financial performance against its business plan, review of current financial statements and compliance with financial covenants, evaluation of significant current developments and assessment of future exit strategies. For debt investments we may have board observation rights that allow us to attend portfolio company board meetings. For buyout investments, we generally hold a majority of the seats on the board of directors where we own a controlling interest in the portfolio company and we have board observation rights where we do not own a controlling interest in the portfolio company.

Our portfolio management committee is responsible for review and oversight of the investment portfolio, including reviewing the performance of selected portfolio companies, overseeing portfolio companies in workout status, reviewing and approving certain modifications or amendments to or certain additional investments in existing investments, reviewing and approving certain portfolio exits, reviewing and approving certain actions by portfolio companies whose voting securities are more than 50% owned by us, reviewing significant investment-related litigation matters where we are a named party, and reviewing and approving proxy votes with respect to our portfolio investments. Our portfolio management committee is chaired by our Chief Executive Officer and includes our Chief Operating Officer, Chief Financial Officer, Chief Valuation Officer (non-voting member), our private finance counsel, and certain of our Managing Directors. From time to time we will identify investments that require closer monitoring or become workout assets. We develop a workout strategy for workout assets and the portfolio management committee gauges our progress against the strategy.

We seek to price our investments to provide an investment return considering the fact that certain investments in the portfolio may underperform or result in loss of investment return or investment principal. As a private equity investor, we will incur losses from our investing activities, however we have a history of working with troubled portfolio companies in order to recover as much of our investments as is practicable.

Portfolio Grading

We employ a grading system for our entire portfolio. Grade 1 is for those investments from which a capital gain is expected. Grade 2 is for investments performing in accordance with plan. Grade 3 is for investments that require closer monitoring; however, no loss of investment return or principal is expected. Grade 4 is for investments that are in workout and for which some loss of current investment return is expected, but no loss of principal is expected. Grade 5 is for investments that are in workout and for which some loss of principal is expected. At December 31, 2006, Grade 1, 2, and 3 investments totaled \$4,287.7 million, and Grade 4 and 5 investments totaled \$208.4 million.

Portfolio Valuation

We determine the value of each investment in our portfolio on a quarterly basis, and changes in value result in unrealized appreciation or depreciation being recognized in our statement of operations. Value, as defined in Section 2(a)(41) of the 1940 Act, is (i) the market price for those securities for which a market quotation is readily available and (ii) for all other securities and assets, fair value is as determined

in good faith by the Board of Directors. Since there is typically no readily available market value for the investments in our portfolio, we value substantially all of our portfolio investments at fair value as determined in good faith by the Board of Directors pursuant to our valuation policy and a consistently applied valuation process. Because of the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of our investments determined in good faith by the Board of Directors may differ significantly from the values that would have been used had a ready market existed for the investments, and the differences could be material.

There is no single standard for determining fair value in good faith. As a result, determining fair value requires that judgment be applied to the specific facts and circumstances of each portfolio investment while employing a consistently applied valuation process for the types of investments we make. Unlike banks, we are not permitted to provide a general reserve for anticipated loan losses. Instead, we are required to specifically value each individual investment on a quarterly basis. We will record unrealized depreciation on investments when we believe that an investment has become impaired, including where collection of a loan or realization of an equity security is doubtful, or when the enterprise value of the portfolio company does not currently support the cost of our debt or equity investment. Enterprise value means the entire value of the company to a potential buyer, including the sum of the values of debt and equity securities used to capitalize the enterprise at a point in time. We will record unrealized appreciation if we believe that the underlying portfolio company has appreciated in value and/or our equity security has appreciated in value. Changes in fair value are recorded in the statement of operations as net change in unrealized appreciation or depreciation.

As a business development company, we invest in illiquid securities including debt and equity securities of companies and CDO and CLO bonds and preferred shares/income notes. The structure of each debt and equity security is specifically negotiated to enable us to protect our investment and maximize our returns. We include many terms governing interest rate, repayment terms, prepayment penalties, financial covenants, operating covenants, ownership parameters, dilution parameters, liquidation preferences, voting rights, and put or call rights. Our investments may be subject to certain restrictions on resale and generally have no established trading market. Because of the type of investments that we make and the nature of our business, our valuation process requires an analysis of various factors. Our fair value methodology includes the examination of, among other things, the underlying investment performance, financial condition, and market changing events that impact valuation.

Valuation Methodology. Our process for determining the fair value of a private finance investment begins with determining the enterprise value of the portfolio company. The fair value of our investment is based on the enterprise value at which the portfolio company could be sold in an orderly disposition over a reasonable period of time between willing parties other than in a forced or liquidation sale. The liquidity event whereby we exit a private finance investment is generally the sale, the recapitalization or, in some cases, the initial public offering of the portfolio company.

There is no one methodology to determine enterprise value and, in fact, for any one portfolio company, enterprise value is best expressed as a range of fair values. However, we must derive a single estimate of enterprise value. To determine the enterprise value of a portfolio company, we analyze its historical and projected financial results. This financial and other information is generally obtained from the portfolio companies, and may represent unaudited, projected or pro forma financial information. We generally require portfolio companies to provide annual audited and quarterly unaudited financial statements, as well as annual projections for the upcoming fiscal year. Typically in the private equity business, companies are bought and sold based on multiples of EBITDA, cash flow, net income, revenues or, in limited instances, book value. The private equity industry uses financial measures such as EBITDA or EBITDAM (Earnings Before Interest, Taxes, Depreciation, Amortization and, in some instances, Management fees) in order to assess a portfolio company's financial performance and to value a portfolio company. EBITDA and EBITDAM are not intended to represent cash flow from operations as defined by U.S. generally accepted accounting principles and such information should not be considered as an alternative to net income, cash flow from operations, or any other measure of performance prescribed by U.S. generally accepted accounting principles. When using EBITDA to determine enterprise value, we

may adjust EBITDA for non-recurring items. Such adjustments are intended to normalize EBITDA to reflect the portfolio company's earnings power. Adjustments to EBITDA may include compensation to previous owners, acquisition, recapitalization, or restructuring related items or one-time non-recurring income or expense items.

In determining a multiple to use for valuation purposes, we generally look to private merger and acquisition statistics, the entry multiple for the transaction, discounted public trading multiples or industry practices. In estimating a reasonable multiple, we consider not only the fact that our portfolio company may be a private company relative to a peer group of public comparables, but we also consider the size and scope of our portfolio company and its specific strengths and weaknesses. In some cases, the best valuation methodology may be a discounted cash flow analysis based on future projections. If a portfolio company is distressed, a liquidation analysis may provide the best indication of enterprise value.

If there is adequate enterprise value to support the repayment of our debt, the fair value of our loan or debt security normally corresponds to cost unless the borrower's enterprise value, overall financial condition or other factors lead to a determination of fair value at a different amount. The value of loan and debt securities may be greater than our cost basis if the amount that would be repaid on the loan or debt security upon the sale or liquidation of the portfolio company is greater than our cost basis. The fair value of equity interests in portfolio companies is determined based on various factors, including the enterprise value remaining for equity holders after the repayment of the portfolio company's debt and other preference capital, and other pertinent factors such as recent offers to purchase a portfolio company, recent transactions involving the purchase or sale of the portfolio company's equity securities, liquidation events, or other events. The determined equity values are generally discounted when we have a minority position, restrictions on resale, specific concerns about the receptivity of the capital markets to a specific company at a certain time, or other factors.

As a participant in the private equity business, we invest primarily in private middle market companies for which there is generally no publicly available information. Because of the private nature of these businesses, there is a need to maintain the confidentiality of the financial and other information that we have for the private companies in our portfolio. We believe that maintaining this confidence is important, as disclosure of such information could disadvantage our portfolio companies and could put us at a disadvantage in attracting new investments. Therefore, we do not intend to disclose financial or other information about our portfolio companies, unless required, because we believe doing so may put them at an economic or competitive disadvantage, regardless of our level of ownership or control. To balance the lack of publicly available information about our private portfolio companies, we will continue to work with third-party consultants to obtain assistance in determining fair value for a portion of the private finance portfolio each quarter as discussed below.

Valuation Process. The portfolio valuation process is managed by our Chief Valuation Officer (CVO). The CVO works with the investment professionals responsible for each investment. The following is an overview of the steps we take each quarter to determine the value of our portfolio.

Our valuation process begins with each portfolio company or investment being initially valued by the investment professionals, led by the Managing Director or senior officer who is responsible for the portfolio company relationship (the Deal Team).

The CVO and third-party valuation consultants, as applicable (see below), review the preliminary valuation documentation as prepared by the Deal Team.

The CVO, members of the valuation team, and third-party consultants, as applicable, meet with each Managing Director or responsible senior officer to discuss the preliminary valuation determined and documented by the Deal Team for each of their respective investments.

The CEO, COO, CFO and the Managing Directors meet with the CVO to discuss the preliminary valuation results.

Valuation documentation is distributed to the members of the Board of Directors.

The Audit Committee of the Board of Directors meets separately from the full Board of Directors with the third-party consultants (see below) to discuss the assistance provided and results. The CVO attends this meeting.

The CVO discusses and reviews the valuations with the Board of Directors.

To the extent there are changes or if additional information is deemed necessary, a follow-up Board meeting may take place.

The Board of Directors determines the fair value of the portfolio in good faith.

In connection with our valuation process to determine the fair value of a private finance investment, we work with third-party consultants to obtain assistance and advice as additional support in the preparation of our internal valuation analysis for a portion of the portfolio each quarter. In addition, we may receive other third-party assessments of a particular private finance portfolio company's value in the ordinary course of business, most often in the context of a prospective sale transaction or in the context of a bankruptcy process. The valuation analysis prepared by management using these third-party valuation resources, when applicable, is submitted to our Board of Directors for its determination of fair value of the portfolio in good faith.

We have received third-party valuation assistance from Duff & Phelps, LLC (Duff & Phelps) and Houlihan Lokey Howard and Zukin (Houlihan Lokey). We currently intend to continue to work with third-party consultants to obtain valuation assistance for a portion of the private finance portfolio each quarter. We currently anticipate that we will generally obtain valuation assistance for all companies in the portfolio where we own more than 50% of the outstanding voting equity securities on a quarterly basis and that we will generally obtain assistance for companies where we own equal to or less than 50% of the outstanding voting equity securities at least once during the course of the calendar year. Valuation assistance may or may not be obtained for new companies that enter the portfolio after June 30 of any calendar year during that year or for investments with a cost and value less than \$250,000. For the quarter ended December 31, 2006, Duff & Phelps and Houlihan Lokey assisted us by reviewing our valuation of 81 portfolio companies, which represented 82.9% of the private finance portfolio at value. See Management's Discussion and Analysis of Financial Condition and Results of Operations below.

Disposition of Investments

We manage our portfolio of investments in an effort to maximize our expected returns. Our portfolio is large and we are generally repaid by our borrowers and exit our debt and equity investments as portfolio companies are sold, recapitalized or complete an initial public offering.

We may retain a position in the senior loans we originate or we may sell all or a portion of these investments. In our debt investments where we have equity features, we are generally in a minority ownership position in a portfolio company, and as a result, generally exit the investment when the majority equity stakeholder decides to sell or recapitalize the company. Where we have a control position in an investment, as we may have in buyout investments, we have more flexibility and can determine whether or not we should exit our investment. Our most common exit strategy for a buyout investment is the sale of a portfolio company to a strategic or financial buyer. If an investment has appreciated in value, we may realize a gain when we exit the investment. If an investment has depreciated in value, we may realize a loss when we exit the investment.

We are in the investment business, which includes acquiring and exiting investments. It is our policy not to comment on potential transactions in the portfolio prior to reaching a definitive agreement or, in many cases, prior to consummating a transaction. To the extent we enter into any material transactions, we would provide disclosure as required.

Dividends

We have elected to be taxed as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986 (the Code). As such, we are not subject to corporate level income taxation on income we timely distribute to our stockholders as dividends. We pay regular quarterly dividends based upon an estimate of annual taxable income available for distribution to shareholders, which includes our taxable interest, dividend, and fee income, as well as taxable net capital gains. Taxable income generally differs from net income for financial reporting purposes due to temporary and permanent differences in the recognition of income and expenses, and generally excludes net unrealized appreciation or depreciation, as gains or losses are not included in taxable income until they are realized. In addition, gains realized for financial reporting purposes may differ from gains included in taxable income as a result of our election to recognize gains using installment sale treatment, which generally results in the deferment of gains for tax purposes until notes or other amounts, including amounts held in escrow, received as consideration from the sale of investments are collected in cash. Taxable income includes non-cash income, such as changes in accrued and reinvested interest and dividends, which includes contractual payment-in-kind interest, and the amortization of discounts and fees. Cash collections of income resulting from contractual payment-in-kind interest or the amortization of discounts and fees generally occur upon the repayment of the loans or debt securities that include such items. Non-cash taxable income is reduced by non-cash expenses, such as realized losses and depreciation and amortization expense.

As a regulated investment company, we distribute substantially all of our annual taxable income to shareholders through the payment of cash dividends. Our Board of Directors reviews the dividend rate quarterly, and may adjust the quarterly dividend throughout the year. Dividends are declared considering our estimate of annual taxable income available for distribution to shareholders and the amount of taxable income carried over from the prior year for distribution in the current year. Our goal is to declare what we believe to be sustainable increases in our regular quarterly dividends. To the extent that we earn annual taxable income in excess of dividends paid from such taxable income for the year, we may carry over the excess taxable income into the next year and such excess income will be available for distribution in the next year as permitted under the Code. The maximum amount of excess taxable income that may be carried over for distribution in the next year under the Code is the total amount of dividends paid in the following year, subject to certain declaration and payment guidelines. Excess taxable income carried over and paid out in the next year is generally subject to a 4% excise tax (see Other Matters Regulated Investment Company Status). We believe that carrying over excess taxable income into future periods may provide increased visibility with respect to taxable earnings available to pay the regular quarterly dividend.

We began paying quarterly dividends in 1963, and our portfolio has provided sufficient ordinary taxable income and realized net capital gains to sustain or grow our dividends over time. Since inception through December 31, 2006, our average annual total return to shareholders (assuming all dividends were reinvested) was 18.1%. Over the past one, three, five and ten years, our total return to shareholders (assuming all dividends were reinvested) has been 20.6%, 14.6%, 14.4% and 19.1%, respectively, with the dividend providing a meaningful portion of this return.

The percentage of our dividend generated by ordinary taxable income versus capital gain income will vary from year to year. The percentage of ordinary taxable income versus net capital gain income supporting the dividend since 1987 is shown below.

Corporate Structure and Offices

We are a Maryland corporation and a closed-end, non-diversified management investment company that has elected to be regulated as a business development company under the 1940 Act. We have a real estate investment trust subsidiary, Allied Capital REIT, Inc., and several subsidiaries that are single-member limited liability companies established for specific purposes, including holding real estate property. We also have a subsidiary, A.C. Corporation, that generally provides diligence and structuring services, as well as transaction, management, consulting, and other services, including underwriting and arranging senior loans, to Allied Capital and our portfolio companies.

Our executive offices are located at 1919 Pennsylvania Avenue, NW, Washington, DC 20006-3434 and our telephone number is (202) 721-6100. In addition, we have regional offices in New York, Chicago, and Los Angeles.

Available Information

Our Internet address is www.alliedcapital.com. We make available free of charge on our website our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. Information contained on our website is not incorporated by reference into this annual report on Form 10-K and you should not consider information contained on our website to be part of this annual report on Form 10-K.

Employees

At December 31, 2006, we employed 170 individuals including investment and portfolio management professionals, operations professionals and administrative staff. The majority of our employees are located in our Washington, DC office. We believe that our relations with our employees are excellent.

Certain Government Regulations

We operate in a highly regulated environment. The following discussion generally summarizes certain government regulations.

Business Development Company. A business development company is defined and regulated by the 1940 Act. A business development company must be organized in the United States for the purpose of investing in or lending to primarily private companies and making managerial assistance available to them. A business development company may use capital provided by public shareholders and from other sources to invest in long-term, private investments in businesses. A business development company provides shareholders the ability to retain the liquidity of a publicly traded stock, while sharing in the possible benefits, if any, of investing in primarily privately owned companies.

As a business development company, we may not acquire any asset other than qualifying assets unless, at the time we make the acquisition, the value of our qualifying assets represent at least 70% of the value of our total assets. The principal categories of qualifying assets relevant to our business are:

Securities purchased in transactions not involving any public offering, the issuer of which is an eligible portfolio company;

Securities received in exchange for or distributed with respect to securities described in the bullet above or pursuant to the exercise of options, warrants or rights relating to such securities; and

Cash, cash items, government securities or high quality debt securities (within the meaning of the 1940 Act), maturing in one year or less from the time of investment.

An eligible portfolio company is generally a domestic company that is not an investment company (other than a small business investment company wholly owned by a business development company) and that:

does not have a class of securities with respect to which a broker may extend margin credit at the time the acquisition is made;

is controlled by the business development company and has an affiliate of a business development company on its board of directors;

does not have any class of securities listed on a national securities exchange; or

meets such other criteria as may be established by the SEC.

Control, as defined by the 1940 Act, is presumed to exist where a business development company beneficially owns more than 25% of the outstanding voting securities of the portfolio company.

In October 2006, the SEC re-proposed rules providing for an additional definition of eligible portfolio company. As re-proposed, the rule would expand the definition of eligible portfolio company to include certain public companies that list their securities on a national securities exchange. The SEC is seeking comment regarding the application of this proposed rule to companies with: (1) a public float of less than \$75 million; (2) a market capitalization of less than \$150 million; or (3) a market capitalization of less than \$250 million. There is no assurance that such proposal will be adopted or what the final proposal will entail.

To include certain securities described above as qualifying assets for the purpose of the 70% test, a business development company must make available to the issuer of those securities significant managerial assistance such as providing significant guidance and counsel concerning the management, operations, or business objectives and policies of a portfolio company. We offer to provide significant managerial assistance to our portfolio companies.

As a business development company, we are entitled to issue senior securities in the form of stock or senior securities representing indebtedness, including debt securities and preferred stock, as long as each class of senior security has an asset coverage of at least 200% immediately after each such issuance. In

addition, while any senior securities remain outstanding, we must make provisions to prohibit any distribution to our shareholders unless we meet the applicable asset coverage ratio at the time of the distribution.

We are not generally able to issue and sell our common stock at a price below net asset value per share. We may, however, sell our common stock, at a price below the current net asset value of the common stock, or sell warrants, options or rights to acquire such common stock, at a price below the current net asset value of the common stock if our board of directors determines that such sale is in the best interests of the Company and our stockholders, and our stockholders approve our policy and practice of making such sales. In any such case, the price at which our securities are to be issued and sold may not be less than a price which, in the determination of our board of directors, closely approximates the market value of such securities (less any distributing commission or discount).

We are also limited in the amount of stock options that may be issued and outstanding at any point in time. The 1940 Act provides that the amount of a business development company's voting securities that would result from the exercise of all outstanding warrants, options and rights at the time of issuance may not exceed 25% of the business development company's outstanding voting securities, except that if the amount of voting securities that would result from the exercise of all outstanding warrants, options, and rights issued to the business development company's directors, officers, and employees pursuant to any executive compensation plan would exceed 15% of the business development company's outstanding voting securities, then the amount of voting securities that would result from the exercise of all outstanding warrants, options, and rights at the time of issuance shall not exceed 20% of the outstanding voting securities of the business development company.

We may also be prohibited under the 1940 Act from knowingly participating in certain transactions with our affiliates without the prior approval of the members of our Board of Directors who are not interested persons and, in some cases, prior approval by the SEC. We have been granted an exemptive order by the SEC permitting us to engage in certain transactions that would be permitted if we and our subsidiaries were one company and permitting certain transactions among our subsidiaries, subject to certain conditions and limitations.

We have designated a chief compliance officer and established a compliance program pursuant to the requirements of the 1940 Act. We are periodically examined by the SEC for compliance with the 1940 Act.

As with other companies regulated by the 1940 Act, a business development company must adhere to certain substantive regulatory requirements. A majority of our directors must be persons who are not interested persons, as that term is defined in the 1940 Act. Additionally, we are required to provide and maintain a bond issued by a reputable fidelity insurance company to protect us against larceny and embezzlement. Furthermore, as a business development company, we are prohibited from protecting any director or officer against any liability to us or our shareholders arising from willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of such person's office.

We maintain a code of ethics that establishes procedures for personal investment and restricts certain transactions by our personnel. Our code of ethics generally does not permit investment by our employees in securities that have been or are contemplated to be purchased or held by us. Our code of ethics is posted on our website at www.alliedcapital.com and is also filed as an exhibit to our registration statement which is on file with the SEC. You may read and copy the code of ethics at the SEC's Public Reference Room in Washington, D.C. You may obtain information on operations of the Public Reference Room by calling the SEC at 1-800-SEC-0330. In addition, the code of ethics is available on the EDGAR database on the SEC Internet site at <http://www.sec.gov>. You may obtain copies of the code of ethics, after paying a duplicating fee, by electronic request at the following email address: publicinfo@sec.gov, or by writing to the SEC's Public Reference Section, 100 F Street, NE, Washington, D.C. 20549.

As a business development company under the 1940 Act, we are entitled to provide and have provided loans to our officers in connection with the exercise of options. However, as a result of provisions

of the Sarbanes-Oxley Act of 2002, we have been prohibited from making new loans to our executive officers since July 2002.

We may not change the nature of our business so as to cease to be, or withdraw our election as, a
