INSIGNIA SOLUTIONS PLC

**NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS
(unaudited)**

Note 1. Basis of presentation

The accompanying unaudited condensed consolidated financial statements of Insignia Solutions plc (Insignia , us , our , we or the Company) have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and pursuant to the instructions to Form 10-QSB. The unaudited interim financial statements have been prepared on the same basis as the annual financial statements and, in the opinion of management, reflect all adjustments, consisting of normal recurring adjustments, considered necessary for a fair presentation. Interim results are not necessarily indicative of results for a full year. These unaudited condensed consolidated financial statements and notes should be read in conjunction with Insignia s audited consolidated financial statements for the year ended December 31, 2004 and footnotes thereto, included in Insignia s Annual Report on Form 10-K.

During the past 24 months, we have incurred an aggregate loss from operations and negative operating cash flows of \$13,946,000 and \$11,795,000, respectively. On April 19, 2005, we received a Nasdaq Staff Determination indicating that the Company was not, at December 31, 2004, in compliance with the Nasdaq rule that requires us to have a minimum of \$2.5 million in shareholders equity. We are, therefore, subject to delisting from the Nasdaq SmallCap Market. We have requested and have been granted a hearing on May 19, 2005 before a Nasdaq Listing Qualifications Panel to appeal the Staff Determination. The delisting has been stayed pending the Panel s decision. At December 31, 2004, our shareholders equity was \$1,341,000. Although as of March 31, 2005, our shareholders equity was \$3,640,000, there is no assurance the Panel will grant the Company s appeal for continued listing.

As part of our strategy for ongoing funding and compliance with Nasdaq listing requirements, we have entered into a securities subscription agreement with Fusion Capital Fund II, LLC (Fusion). Under this securities subscription agreement, Fusion has agreed to purchase on each trading day after the commencement of funding, \$20,000 of our American Depository Shares (ADSs), for an aggregate of up to \$12 million over a 30-month period, subject to earlier termination at our discretion. The commencement of funding under the securities subscription agreement is subject to certain conditions, including the declaration of effectiveness by the Securities and Exchange Commission of a registration statement covering the sale of the ADSs issued to Fusion under the securities subscription agreement. There can be no assurance as to whether, or when, these conditions will be satisfied. Any delay in the commencement of funding under the 2005 Fusion Capital securities subscription agreement could jeopardize Insignia s business.

By instituting cost cutting measures, increasing revenue streams, collecting current outstanding receivables and accessing the subscription agreement, we believe we will be able to meet our operating and capital requirements through the end of 2005.

Under the rules and regulations of the Nasdaq SmallCap Market, the Company would be required to obtain shareholder approval to sell more than 19.99% of the issued and outstanding shares as of February 9, 2005 under this agreement. We have called a shareholders meeting on May 24, 2005 in order to seek such approval, pursuant to a definitive proxy statement that we filed on May 3, 2005. However, there can be no assurance that our shareholders will approve the subscription agreement.

The failure to raise additional funds, if needed, on a timely basis and on sufficiently favorable terms could have a material adverse effect on our business, operating results and financial condition. Insignia's liquidity may also be adversely affected in the future by factors such as an increase in interest rates, inability to borrow without collateral, availability of capital financing and continued operating losses. The accompanying unaudited condensed consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

Table of Contents

We follow accounting principles generally accepted in the United States of America. We conduct our business in U.S. dollars, Euros and British pounds, and since March 16, 2005, also in Swedish Krona. All amounts included in the financial statements and in the notes herein are in U.S. dollars unless designated £, in which case they are in British pounds.

Note 2. Net loss per share

Net loss per share is presented on a basic and diluted basis, and is computed by dividing our net loss by the weighted average number of ordinary shares and ordinary equivalent shares outstanding during the period. Ordinary equivalent shares consist of warrants and stock options that have a dilutive effect (using the treasury stock method). Under the basic method of calculating net loss per share, ordinary equivalent shares are excluded from the computation. Under the diluted method of calculating net loss per share, ordinary equivalent shares are excluded from the computation only if their effect is anti-dilutive, due to our net loss.

Calculation of basic and diluted net loss per share (in thousands, except per share data):

	Three months ended March 31,	
	2005	2004
Numerator basic and diluted:		
Net loss	\$ (1,889)	\$ (1,910)
Denominator calculation of basic net loss per share:		
Weighted average number of ordinary shares outstanding	39,490	28,616
Basic net loss per share	\$ (0.05)	\$ (0.07)
Denominator calculation of diluted net loss per share:		
Weighted average number of ordinary shares outstanding	39,490	28,616
Dilutive ordinary equivalent shares		
Weighted average number of ordinary shares outstanding	39,490	28,616
Diluted net loss per share	\$ (0.05)	\$ (0.07)

The following number of options and warrants have not been included in the calculation of diluted net loss per share because their inclusion would have been anti-dilutive:

	Three months ended March 31,	
	2005	2004
Options	4,319,724	4,299,737

Warrants	6,130,911	1,143,844
----------	-----------	-----------

Note 3. Stock based compensation

Insignia accounts for stock based employee compensation using the intrinsic value method under Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations and complies with the disclosure provisions of Statement of Financial Accounting Standards No. 148, Accounting for

- 7 -

Table of Contents

Stock-Based Compensation, Transition and Disclosure an Amendment of FASB Statement No.123 . The following table illustrates the effect on our net loss and net loss per share if we had applied the fair value recognition provisions of Statement of Financial Accounting Standards No.123 (SFAS 123), Accounting for Stock Based Compensation to stock based compensation.

	Three months ended March 31,	
	2005	2004
Net loss-as reported	\$ (1,889)	\$ (1,910)
Less stock based compensation expense determined under fair value based method	(83)	(174)
Net loss pro forma	\$ (1,972)	\$ (2,084)
Basic and diluted net loss per share as reported	\$ (0.05)	\$ (0.07)
Basic and diluted net loss per share pro forma	\$ (0.05)	\$ (0.07)

In accordance with the disclosure provisions of SFAS No. 123, the fair value of employee stock options granted during the three months ended March 31, 2005 and 2004 was estimated at the date of grant using the Black-Scholes model and the following weighted average assumptions:

	Three months ended March 31,	
	2005	2004
Stock Options:		
Volatility range	104-276%	143-198%
Risk-free interest rate range	3.9%	1.1-3.0%
Dividend yield	0%	0%
Expected life (years)	4	4
Employee Stock Purchase Plan:		
Volatility range	84%	198%
Risk-free interest rate range	2.9%	1.1%
Dividend yield	0%	0%
Expected life (years)	0.5	0.5

Note 4. New accounting pronouncement

In December 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 123 (revised 2004) Share-Based Payment (SFAS 123R), a revision to SFAS 123. SFAS 123R addresses all forms of share-based payment (SBP) awards, including shares issued under our 1995 Incentive Stock Option Plan (Purchase Plan), stock options, restricted stock, restricted stock units and stock appreciation rights. SFAS 123R will require Insignia to record compensation expense for SBP awards based on the fair value of the SBP awards. Under SFAS 123R, restricted stock and restricted stock units will generally be valued by reference to the market value of freely tradable shares of the Company's ordinary shares. Stock options, stock appreciation rights and shares issued under the Purchase Plan will generally be valued at fair value determined through an option valuation model, such as a lattice model or the Black-Scholes model (the model that Insignia currently uses for its footnote disclosure). SFAS 123R is effective for annual periods beginning after June 15, 2005 and, accordingly, Insignia must adopt the new

accounting provisions effective January 1, 2006. The Company will adopt the provisions of SFAS 123R using a modified prospective application. Under a modified prospective application, SFAS 123R will apply to new awards and to awards that are outstanding on the effective date and are subsequently modified or cancelled. Compensation expense for outstanding awards for which the requisite service had not been rendered as of the effective date will be recognized over the remaining service period using the compensation cost calculated for pro forma disclosure purposes under SFAS 123. Insignia is in the process of determining how the new method of valuing stock-based compensation as prescribed in SFAS 123R will be applied to valuing share-based awards granted after the effective date and the impact the recognition of compensation expense related to such awards will have on its consolidated financial statements.

Table of Contents**Note 5. Mi4e Acquisition**

On March 16, 2005, we acquired 100% of Mi4e Device Management AB (Mi4e), a private company headquartered in Stockholm, Sweden. The consideration paid in the transaction was 2,969,692 American depositary shares (ADSs) representing ordinary shares, and another 989,896 ADSs issuable on March 31, 2006, subject to potential offset for breach of representations, warranties and covenants. In addition, up to a maximum of 700,000 Euros is payable in a potential earn-out based on a percentage of future revenue collected from sales of existing Mi4e products. Mi4e develops, markets and supports software technologies that enable mobile operators and phone manufacturers to update firmware of mobile devices using standards over-the-air data networks. Its main product is a Device Management Server (DMS) and is a mobile device management infrastructure solution for mobile operators that support the Open Mobile Alliance OMA Client Provisioning Specification.

The initial purchase price of approximately \$3.0 million consisted of 3,959,588 ordinary shares with a value of approximately \$2,760,000 and acquisition costs of approximately \$247,000. The fair value of Insignia s ordinary shares was determined using an average value of \$0.6943 per share, which was the average closing price of Insignia s ordinary shares three days before and after the measurement date of February 10, 2005. The shares issuable in March 2006 have been recorded as an ordinary share subscription on the condensed consolidated balance sheet. In addition, up to a maximum of 700,000 Euros is payable in a potential earn-out based on a percentage of future revenue collected from sales of existing Mi4e products. Any earn-out amounts paid by Insignia to Mi4e s shareholders will be recorded as additional purchase price and an increase to goodwill. Insignia allocated the initial purchase price to the tangible net assets and intangible assets acquired and liabilities assumed, based on their estimated fair values. Under the purchase method of accounting, the initial purchase price does not include the contingent earn-out amount described above. By integrating the Mi4e capabilities with existing Insignia applications, the Company will be able to deliver comprehensive solutions across multiple generations of technology and therefore resolve firmware update and compatibility issues for current and future users who require over-the-air repair.

The preliminary estimated initial purchase price is allocated as follows (in thousands):

Allocation of Purchase Price:

Tangible assets acquired	\$ 518
Liabilities assumed	(420)
Goodwill(a)	509
Customer relationships(b)	900
Technology (c)	1,500
Total purchase price	\$ 3,007

-
- (a) Goodwill represents the excess of the purchase price over the fair value of the net assets acquired and liabilities assumed.
- (b) Customer relationships will be amortized over 10 years, the period of time Insignia estimates it will benefit from the acquired customer relationships.
- (c) Technology will be amortized over 5 years, the period of time Insignia estimates it will benefit from the technology acquired.

In performing the purchase price allocation of acquired intangible assets, Insignia considered its intention for future use of the assets, analysis of historical financial performance and estimates of future performance of Mi4e s products,

among other factors. Insignia determined the fair values of the above intangible technology assets using the residual income method, and for the customer relationships the income approach method was used.

The excess of the purchase price over the fair value of the identifiable tangible and intangible net assets acquired and liabilities assumed of \$509,000 was assigned to goodwill. In accordance with SFAS No. 142 Goodwill and Other Intangible Assets (SFAS 142), goodwill will not be amortized but will be tested for impairment at least annually. This amount is not deductible for tax purposes.

Table of Contents

The following table presents unaudited summarized combined results of operations of Insignia and Mi4e, on a pro forma basis, as though the companies had been combined as of the beginning of each period presented after giving effect to certain purchase accounting adjustments. The operating results of Mi4e have been included in Insignia's condensed consolidated financial statements from March 16, 2005, the date of acquisition. The following unaudited pro forma amounts are in thousands, except the per share amounts:

	Three months ended	
	March 31, 2005	
	2005	2004
Net revenues	\$ 675	\$ 448
Net loss	\$ (2,050)	\$ (2,077)
Net loss per share Basic and diluted	\$ (0.05)	\$ (0.07)

The above unaudited pro forma summarized results of operations are intended for informational purposes only and, in the opinion of management, are neither indicative of the results of operations of Insignia had the acquisition actually taken place as of the beginning of the periods presented, nor indicative of Insignia's future results of operations. In addition, the above unaudited pro forma summarized results of operations do not include potential cost savings from operating efficiencies or synergies that may result from Insignia's acquisition of Mi4e.

Note 6. Commitments and Contingencies**Guarantee Agreements**

Insignia indemnifies its officers and directors for certain events or occurrences, subject to certain limits, while the officer is or was serving at our request in such capacity. The term of the indemnification period is for the officer's or director's lifetime. The maximum amount of potential future indemnification is unlimited; however we do have a Director and Officer Insurance Policy that limits our exposure and enables us to recover a portion of any future amounts paid. As a result of the insurance policy coverage, we believe the fair value of these indemnification agreements is minimal.

In our sales agreements, we typically agree to indemnify our customers for any expenses or liability resulting from claimed infringements of patents, trademarks or copyrights of third parties. The terms of these indemnification provisions are generally perpetual any time after the execution of the agreement. The maximum amount of potential future indemnification is unlimited. To date we have not paid any amounts to settle claims or defend lawsuits.

Insignia, on a limited basis, has granted price protection. The terms of these agreements are generally perpetual. We have not recorded any liabilities for these potential future payments either because they are not probable or we have yet to incur the expense.

Insignia warrants its software products against defects in material and workmanship under normal use and service for a period of ninety days. There is no warranty accrual recorded because potential future payments either are not probable or we have yet to incur the expense.

Note 7. Segment reporting and long-lived assets

Insignia operates in a single industry segment, providing software technologies that enable mobile operators and phone manufacturers to update the firmware of mobile devices using standard over-the-air data networks. In the first quarter of 2004, revenues received from sales of SSP products and from esmertec (with regard to our percentage of the

revenue share program from sales of the Jeode product line) accounted for 71% and 29% of revenues, respectively. In the first quarter of 2004, one United States customer, Insignia Asia and esmertec accounted for 47%, 24% and 22% of total revenues, respectively. In the first quarter of 2005, one French company accounted for 48% of total revenues, one Israeli company accounted for 28% of total revenues and one Spanish company accounted for 22% of total revenues. No other customers accounted for 10% or more of Insignia's total revenues during the first quarter of 2005 or 2004. Sales to customers outside the United States, derived mainly from customers in Europe, the

Table of Contents

Middle East and Asia, represented approximately 100% of total revenues in the three months ended March 31, 2005, and 47% of total revenues in the three months ended March 31, 2004. Revenue is attributed to countries based on customer location.

The majority of our long-lived assets are located outside the United States, principally in Sweden. All of our net intangible assets (\$2,387,000), goodwill (\$509,000), investment in affiliate (\$50,000) and other non-current assets (\$232,000) are located outside the United States. \$55,000 of our net fixed assets (\$150,000) are located outside the United States. At December 31, 2004, substantially all of our long-lived assets were located in the United States.

Note 8. Equity transactions and warrants

On October 17, 2002, we entered into a securities subscription agreement with Fusion Capital Fund II, LLC (Fusion Capital), pursuant to which Fusion Capital agreed to purchase, on each trading day following the effectiveness of a registration statement covering the American Depository Shares (ADSs) to be purchased by Fusion Capital, \$10,000 of our ADSs up to an aggregate of \$6 million over a period of 30 months. The purchase price of the ADSs was based on a formula based on the market price at the time of each purchase. During January 2005, we sold 299,007 shares under the 2002 Fusion Capital agreement, for aggregate proceeds of \$200,000, net of transaction costs. In 2004, we sold 3,100,060 shares to Fusion Capital for aggregate proceeds of \$1.5 million, net of transaction costs, under the 2002 Fusion Capital securities subscription agreement. During 2003, we issued and sold to Fusion Capital 3,380,132 shares resulting in proceeds of \$1.9 million, net of transaction costs, under the 2002 Fusion Capital securities subscription agreement. On February 9, 2005, Insignia and Fusion Capital entered into a mutual termination agreement pursuant to which their 2002 Fusion Capital securities subscription agreement was terminated. On February 9, 2005, we sold to Fusion Capital 3,220,801 ADSs at a purchase price of \$0.40 per share, resulting in proceeds of approximately \$1.3 million. These shares were issued to Fusion Capital in a private placement. Insignia intends to file as soon as practicable a registration statement on Form S-3 in order to register the resale of these shares.

In addition to the shares purchased by Fusion Capital under the 2002 Fusion Capital securities subscription agreement, we also issued warrants to purchase an aggregate of 2,000,000 shares to Fusion Capital, with a per share exercise price of the United States dollar equivalent of 20.5 pence. As of December 31, 2002, the estimated value of the warrants, using the Black-Scholes model was \$544,000. Upon Fusion 's exercise of the warrants in 2003, we issued Fusion Capital 2,000,000 ADSs for a total of \$668,000, net of issuance costs.

On February 10, 2005, Insignia entered into a new securities subscription agreement with Fusion Capital to sell up to \$12 million in ADSs, representing ordinary shares, to Fusion Capital over a period of 30 months (subject to a daily maximum purchase amounts) (the 2005 Fusion Capital securities subscription agreement). The shares will be priced based on a market-based formula at the time of purchase. Under this securities subscription agreement we issued warrants to purchase 4,000,000 ADSs as a commitment fee to Fusion Capital. This agreement with Fusion Capital does not constitute an offer to sell securities. The commencement of funding under the 2005 Fusion Capital securities subscription agreement is subject to certain conditions, including the declaration of effectiveness by the Securities and Exchange Commission of the registration statement covering the ADSs to be purchased by Fusion Capital under the 2005 Fusion Capital securities subscription agreement. Under the rules and regulations of the Nasdaq SmallCap Market, the Company is required to obtain shareholder approval to sell more than 19.99% of the issued and outstanding shares as of February 9, 2005 under this agreement. Insignia currently expects that commencement of funding under the 2005 Fusion Capital securities subscription agreement will begin during the second quarter of 2005, however the timing and certainty of the commencement of funding under the 2005 Fusion Capital securities subscription agreement are not within Insignia 's control. Any delay in the commencement of funding under the 2005 Fusion Capital securities subscription agreement could jeopardize Insignia 's business.

Edgar Filing: INSIGNIA SOLUTIONS PLC - Form 10QSB

On March 16, 2005, we acquired Mi4e. The consideration paid in the transaction was 2,969,692 ADSs representing ordinary shares and another 989,896 ADSs issuable on March 31, 2006, subject to potential offset for breach of representations, warranties and covenants. The shares issuable in March 2006 have been recorded as an ordinary share subscription on the condensed consolidated balance sheet.

Table of Contents

The following table summarizes the warrant activity during the three months ended March 31, 2005.

	Warrants outstanding and exercisable		Warrants outstanding exercise price
Balance, December 31, 2004	2,130,911	\$	1.03 - \$5.00
Granted	4,000,000		0.40 - \$0.60 (1)
Exercised			
Balance, March 31, 2005	6,130,911	\$	0.40 - \$5.00 (1)

(1) 2,000,000 of the warrants are exercisable at £0.205 (\$0.40) and 2,000,000 of the warrants are exercisable at the greater of £0.205 or \$0.60.

Note 9. Related party transactions

On March 16, 2005, we closed our acquisition of Mi4e. The consideration paid in the transaction was 2,969,692 ADSs representing ordinary shares and another 989,896 ADSs issuable on March 31, 2006, subject to potential offset for breach of representations, warranties and covenants. In addition up to a maximum of 700,000 Euros is payable in a potential earn-out based on a percentage of future revenue collected from sales of existing Mi4e products. Anders Furehed, our senior vice president of European operations, was an indirect 50% shareholder of Mi4e and thus received 1,484,846 ADSs on the closing of the acquisition.

Note 10. Notes payable

With the March 16, 2005 acquisition of Mi4e, Insignia assumed two notes payable. The largest note is from ALMI Foretagspartner (ALMI) and is referred to as a regional development loan . The total loan amount is SEK 700,000 or approximately \$100,000. This note is to be repaid within 42 months. The interest rate on this note is 9.5% per annum. As of March 31, 2005, the outstanding balance of the ALMI note was approximately SEK 530,000 or \$77,000.

In addition to the ALMI note payable, there is a note payable from Smandinaviska Enskilda Banken (SEB). The total note amount is SEK 400,000 or approximately \$57,000. The interest rate on the SEB note is approximately 8% per annum. As of March 31, 2005, the outstanding balance was SEK 192,000 or approximately \$27,000.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with the unaudited condensed consolidated financial statements and notes thereto included in Part I Item 1 of this Form 10-QSB and the Management's Discussion and Analysis of Financial Condition and Results of Operations set forth in Insignia's Form 10-K for the year ended December 31, 2004 (the Form 10-K) filed with the Securities and Exchange Commission.

This Form 10-QSB contains forward-looking statements. Words such as anticipates, believes, expects, future, and intends, and similar expressions are used to identify forward-looking statements. These forward-looking statements concern matters which include, but are not limited to, the revenue model and market for our products, its features, benefits and advantages of our international operations and sales, gross margins, spending levels, the availability of licenses to third-party proprietary rights, business and sales strategies, matters relating to proprietary rights, competition, exchange rate fluctuations and our liquidity and capital needs. These and other statements regarding matters that are not historical are forward-looking statements. These matters involve risks and uncertainties that could cause actual results to differ materially from those in the forward-looking statements. In addition to the factors discussed above, among other factors that could cause actual results to differ materially are the following: the demand for our products; their performance and functionality; our ability to deliver products on time, and market acceptance of new products or upgrades of existing products; the timing of, or delay in, large customer orders; continued availability of technology and intellectual property license rights; product life cycles; quality control of products sold; competitive conditions in the industry; economic conditions generally or in various geographic areas; and the other risks listed from time to time in the reports that we file with the U.S. Securities and Exchange Commission. Factors that could cause or contribute to such differences in results and outcomes include without limitation those discussed below as well as those discussed elsewhere in this Report. Readers are cautioned not to place undue reliance on these forward-looking statements, which reflect management's analysis only as of the date hereof. We assume no obligation to update these forward-looking statements to reflect actual results or changes in factors or assumptions affecting such forward-looking statements.

Table of Contents

The following table sets forth the unaudited condensed consolidated results of operations as a percentage of total revenues for the three-month periods ended March 31, 2005 and 2004.

	Three months ended March 31,	
	2005	2004
Net revenues:		
License	90.3%	99.1%
Service	9.7%	0.9%
Total net revenues	100.0%	100%
Expenses:		
Cost of revenues	1.1%	7.2%
Sales and marketing	143.3%	255.8%
Research and development	178.3%	254.2%
General and administrative	171.9%	185.3%
Total operating expenses	494.6%	702.5%
Operating loss	(394.6)%	(602.5)%
Interest income (expense), net	0.2%	(0.3)%
Other income (expense), net	(6.7)%	(4.1)%
Loss before income taxes	(401.1)%	(606.9)%
Provision for (benefit from) income taxes	7.8%	(8.2)%
Net loss	(408.9)%	(598.7)%

Table of Contents

Overview

We commenced operations in 1986, and currently develop, market and support software technologies that enable mobile operators and phone manufacturers to update the firmware of mobile devices using standard over-the-air data networks. Before 2003, our principal product line was the Jeode platform, based on our Embedded Virtual Machine (EVM) technology.

During 2001, we began development of a range of products (Secure System Provisioning or SSP products) for the mobile phone and wireless operator industry. These SSP products build on our position as a Virtual Machine (VM) supplier for manufacturers of mobile devices and allow wireless operators and phone manufacturers to reduce customer care and software recall costs as well as increase subscriber revenue by deploying new mobile services based on dynamically provisional capabilities. With the sale of our JVM product line in April 2003, our sole product line until March 2005 consisted of our SSP product. We shipped our first SSP product in December 2003.

On March 16, 2005, we closed our acquisition of Mi4e Device Management AB (Mi4e), a private company headquartered in Stockholm, Sweden. The consideration paid in the transaction was 2,969,692 American depository shares (ADSs) representing ordinary shares, and another 989,896 ADSs issuable on March 31, 2006, subject to potential offset for breach of representations, warranties and covenants. In addition, up to a maximum of 700,000 Euros is payable in a potential earn-out based on a percentage of future revenue collected from sales of existing Mi4e products. Mi4e develops, markets and supports software technologies that enable mobile operators and phone manufacturers to update firmware of mobile devices using standards over-the-air data networks. Its main product is a Device Management Server (DMS) and is a mobile device management infrastructure solution for mobile operators that support the Open Mobile Alliance OMA Client Provisioning Specification. DMS was first deployed at Telstra in Australia in 2000 and has since been deployed at more than ten carriers around the world.

Our operations outside of the United States are primarily in the United Kingdom (U.K.) and Sweden, where part of our research and development operations and our European sales activities are located. We sell our products directly to operators, to distributors and OEMs. Our revenues from customers outside the United States are derived primarily from Europe and Asia and are generally affected by the same factors as our revenues from customers in the United States. The operating expenses of our operations outside the United States are mostly incurred in Europe and relate to our research and development and European sales activities. Such expenses consist primarily of ongoing fixed costs and consequently do not fluctuate in direct proportion to revenues. Our revenues and expenses outside the United States can fluctuate from period to period based on movements in currency exchange rates. Historically, movements in currency exchange rates have not had a material effect on our revenues and expenses.

We operate with the U.S. dollar as our functional currency, with a majority of revenues and operating expenses denominated in Euros, U.S. dollars, British pounds sterling and Swedish Krona. Exchange rate fluctuations against the dollar can cause U.K. and Swedish expenses, which are translated into dollars for financial statement reporting purposes, to vary from period-to-period.

The Current Economic Environment

The economic climate in which we operate has been difficult over recent years, and information technology (IT) spending has decreased dramatically. This has had an effect on our ability to generate new license fees, as expenditures like those required to purchase some of our products have been quite limited. We cannot provide any assurance that these pressures on IT spending will ease, or that the general economic climate will improve. Continued competitive pressure and a weak economy could have a continuing pronounced effect on our operating results. We have undertaken a variety of cost reduction measures designed to bring our operating expenses in line with our perceptions of the business climate, including workforce reductions.

Table of Contents

Critical accounting policies and estimates

The condensed consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America. Certain of our accounting policies require the application of significant judgment by management in selecting the appropriate assumptions for calculating financial estimates. These estimates affect the reported amounts of assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reporting periods. By their nature, these judgments are subject to an inherent degree of uncertainty. The most significant estimates and assumptions relate to revenue recognition, and the adequacy of allowances for doubtful accounts. Actual amounts could differ from these estimates.

Revenue recognition

We recognize revenue in accordance with Statement of Position 97-2 (SOP 97-2), Software Revenue Recognition , as amended. SOP 97-2 requires that four basic criteria must be met before revenue can be recognized: (1) persuasive evidence of an arrangement exists; (2) delivery has occurred or services rendered; (3) the fee is fixed or determinable; and (4) collectibility is reasonably assured. Determination of criteria (3) and (4) are based on management's judgments regarding the fixed nature of the fee charged for services rendered and products delivered and the collectibility of those fees. Should changes in conditions cause management to determine these criteria are not met for certain future transactions, revenue recognized for any reporting period could be adversely affected.

At the time of the transaction, we assess whether the fee associated with our revenue transaction is fixed or determinable and whether or not collection is reasonably assured. We assess whether the fee is fixed or determinable based on the payment terms associated with the transaction. If a significant portion of a fee is due after the normal payment terms, which are 30 to 90 days from invoice date, we account for the fee as not being fixed or determinable. In these cases, we recognize revenue on the earlier of due date or cash collected.

We assess collectibility based on a number of factors, including past transaction history with the customer and the credit-worthiness of the customer. We do not request collateral from our customers. If we determine that collection of a fee is not reasonably assured, we will defer the fee and recognize revenue at the time collection becomes reasonably assured, which is generally upon receipt of cash.

For all sales, we use either a signed license agreement or a binding purchase order (primarily for maintenance renewals) as evidence of an arrangement.

For arrangements with multiple obligations (for example, undelivered maintenance and support), we will allocate revenue to each component of the arrangement using the residual value method based on the fair value of the undelivered elements, which is specific to us. This means that we will defer revenue equivalent to the fair value of the undelivered elements. Fair value for the ongoing maintenance and support obligation is based upon separate sales of renewals to other customers or upon renewal rates quoted in the contracts. Fair value of services, such as training or consulting, is based upon separate sales by us of these services to other customers.

Our arrangements do not generally include acceptance clauses. However, if an arrangement includes an acceptance provision, recognition occurs upon the earlier of receipt of written customer acceptance or expiration of the acceptance period.

We recognize revenue for maintenance and hosting services ratably over the contract term. Our training and consulting services are billed based on hourly rates, and we will generally recognize revenue as these services are performed. However, at the time of entering into a transaction, we will assess whether or not any services included within the arrangement require us to perform significant work either to alter the underlying software or to build

additional complex interfaces so that the software performs as the customer requests. If these services are included as part of an arrangement, we recognize the entire fee using the percentage of completion method. We estimate the percentage of completion based on our estimate of the total costs estimated to complete the project as a percentage of the costs incurred to date and the estimated costs to complete.

Table of Contents*Accounts receivable and allowance for doubtful accounts*

We perform ongoing credit evaluations of our customers and will adjust credit limits based upon payment history and the customer's current credit worthiness, as determined by our review of their current credit information. We continuously monitor collections and payments from our customers and maintain an allowance for estimated credit losses based upon historical experience and any specific customer collection issues that we have identified. While such credit losses have historically been within expectations and the allowance established, we cannot guarantee that we will continue to experience the same credit loss rates as in the past. Since our accounts receivable are concentrated in a relatively few number of customers, a significant change in the liquidity or financial position of any one of these customers could have a material adverse impact on the collectibility of accounts receivables and future operating results.

The preparation of financial statements requires us to make estimates of the uncollectibility of our accounts receivables. We specifically analyze accounts receivable and analyze historical bad debts, customer concentrations, customer credit-worthiness, current economic trends and changes in customer payment terms when evaluating the adequacy of the allowance for doubtful accounts.

Results of Operations**Revenues**

	Three months ended	
	March 31,	
	2005	2004
	(in thousands)	
License revenue	\$ 417	\$ 316
Service revenue	45	3
Total net revenue	\$ 462	\$ 319

The SSP product line, which we launched in 2003, was expanded by our introduction of additional products in March 2005. These products include Device Management Server (DMS) and Open Management Client (OMC). The DMS product was developed by Insignia and the OMC was acquired through the acquisition of Mi4E in March 2005. In the first quarter of 2004, revenue from the SSP product line was derived from a combination of sources including (1) initial licensing fees, (2) transactional occurrence fees, (3) support and maintenance fees and (4) engineering service fees. In the first quarter of 2005 the revenue from SSP, DMS and OMC included (1) initial licensing fees, (2) transactional occurrence fees, (3) support and maintenance fees, (4) trials and installations, (5) hosting services and (6) engineering service and set up fees.

The 45% increase in total revenues from the first quarter of 2004 to the first quarter of 2005 was primarily due to increased license revenues. License revenue and service revenue accounted for 90% and 10%, respectively, of total revenues in the first quarter of 2005. In the first quarter of 2004, license revenue and service revenue accounted for 99% and 1% respectively.

The increase in license revenues from the first quarter of 2004 to the first quarter of 2005 was primarily due to increased revenues from our SSP, DMS and OMC products. The SSP, DMS and OMC products made up 43%, 29% and 28%, respectively, of license revenues in the first quarter of 2005. In the first quarter of 2004, the SSP and Jeode

product lines made up 71% and 29% of total license revenues respectively.

The increase in service revenue from the first quarter of 2004 to the first quarter of 2005 was primarily due to the increase in agreements for set up, hosting, and support and maintenance services for the DMS and SSP products.

Sales to distributors represented approximately 100% of total revenues in the three months ended March 31, 2005 and 93% of total revenues in the three months ended March 31, 2004. 7% of total revenues in the three months ended March 31, 2004 were to OEMs.

Table of Contents

Sales to customers outside the United States, derived mainly from customers in Europe, the Middle East and Asia, represented approximately 100% of total revenues in the three months ended March 31, 2005 and 47% of total revenues in the three months ended March 31, 2004.

Expenses

	Three months ended March 31,	
	2005	2004
	(in thousands, except percentages)	
Sales and marketing	\$ 662	\$ 816
Percentage of total revenues	143%	256%
Research and development	\$ 824	\$ 811
Percentage of total revenues	178%	254%
General and administrative	\$ 794	\$ 591
Percentage of total revenues	172%	185%

Sales and marketing expenses consist primarily of personnel and related overhead costs, salespersons commissions, advertising and promotional expenses and expenses relating to trade shows. Sales and marketing expenses decreased by 19% in the quarter ended March 31, 2005 from the quarter ended March 31, 2004. The decrease was primarily due to a non-cash charge of \$349,000 in the first quarter of 2004, for warrants issued to outside partners supporting the Company's SSP product launch. This decrease was offset in part by a \$110,000 increase in expenses related to fees for outside sales consultants as well as a \$32,000 increase in discretionary marketing. There was an increase of \$30,000 relating to sales and marketing salaries and related employee expenses. In addition, there was a \$24,000 increase in sales and marketing travel. In the future we anticipate a moderate increase in sales and marketing expenses as we attempt to increase our revenues.

Research and development costs consist primarily of personnel costs, professional consulting and travel expenses. Research and development expenses increased by 2% in the three months ended March 31, 2005 compared to the same period of 2004. In the three months ended March 31, 2005 compared to the same period in 2004, engineering salaries and related personnel expenses increased by \$45,000. This increase was offset in part by decreases in personnel recruiting fees of \$22,000 and a decrease in engineering consulting costs of \$7,000.

General and administrative expenses consist primarily of personnel and related overhead costs for finance, information systems, human resources and general management. General and administrative expenses increased by 34% in the three months ended March 31, 2005 compared to the same period of 2004. The increase was due primarily to an increase of \$175,000 in the reserve for doubtful accounts for two customers in Asia. There was also a \$60,000 increase in professional and consulting services for the period ended March 31, 2005 over the same period of 2004 and an increase in general and administrative salaries and related expenses of \$25,000. These increases were offset in part by a \$44,000 decrease in recruiting costs as well as a \$7,000 decrease in insurance and a \$6,000 decrease in general and administrative travel for the period ended March 31, 2005 over the period ended March 31, 2004.

Table of Contents**Provision for (benefit from) income taxes**

	Three months ended March 31,	
	2005	2004
	(in thousands, except percentages)	
Provision for (benefit from) income taxes	\$ 36	\$ (26)
Effective income tax rate	2%	(1)%

The provision for income taxes for the three months ended March 31, 2005 primarily represents taxes on our earnings in Sweden. Our benefit from income taxes of \$26,000 for the three months ended March 31, 2004 primarily represented a refund received from the United Kingdom for research and development claims. We have recorded a full valuation allowance against all deferred tax assets, primarily comprised of net operating losses, on the basis that significant uncertainty exists with respect to their realization.

Liquidity and capital resources

	March 31,	
	2005	2004
	(in thousands)	
Cash, cash equivalents and restricted cash	\$ 932	\$ 2,859
Working capital	\$ 312	\$ 3,106
Net cash used in operating activities for the three month period	\$ (1,739)	\$ (1,767)

Cash has been used for the development and marketing efforts associated with our products. Cash used in operating activities in the first quarter of 2005 totaled \$1,739,000 compared to \$1,767,000 for the same period in 2004. For the three months ended March 31, 2005, cash used in operating activities resulted primarily from a net loss of \$1,889,000, and an increase in accounts receivable of \$499,000, partially offset by a decrease in other receivables and prepaid expenses of \$475,000 and an increase of accounts payable of \$148,000 and deferred revenue of \$24,000. In addition accrued liabilities decreased by \$264,000.

Cash provided by investing activities for the three months ended March 31, 2005 was \$291,000, which consisted of cash received from the purchase of Mi4e of \$301,000 less \$10,000 for the purchase of fixed assets.

Cash provided by financing activities for the three months ended March 31, 2005 was \$1,428,000, resulting from share issuances to Fusion Capital with aggregate proceeds of \$1,361,000 and proceeds from exercise of stock options and employee stock purchase plan of \$67,000.

Our cash, cash equivalents and restricted cash were \$932,000 at March 31, 2005, a decrease of \$20,000 from \$952,000 at December 31, 2004. At March 31, 2005 and 2004, we had a working capital surplus of \$312,000 and \$3,106,000, respectively. The principal source of working capital came as a result of the issuance of shares. We have no material commitments for capital expenditures. Our commitments for expenditures consist of building leases in the U.K. and U.S.

Table of Contents

As of March 31, 2005, we had the following contractual cash obligations (including operating lease obligations that were restructured pursuant to the sale of the JVM product line) (in thousands):

	Operating Leases
Year ending December 31, 2005 (April 1, 2005 through December 31, 2005)	\$ 160
2006	122
2007	95
2008	95
2009	95
Thereafter	918
	\$ 1,485

As of March 31, 2005, four customers accounted for 85% of our total accounts receivable.

On October 17, 2002, we entered into a securities subscription agreement (Agreement) with Fusion Capital Fund II, LLC (Fusion Capital), pursuant to which Fusion Capital agreed to purchase, on each trading day following the effectiveness of a registration statement covering the American Depository Shares (ADSs) to be purchased by Fusion Capital, \$10,000 of our ADSs up to an aggregate of \$6.0 million over a period of 30 months. The purchase price of the ADSs will be equal to a price based upon the future market price of the shares. In order to be in compliance with Nasdaq rules, we cannot sell our ordinary shares to Fusion Capital at a price below \$0.38, which represented the greater of the book value per share of our ordinary shares as of September 30, 2002 and the closing sale price per share of our ADSs on October 16, 2002.

In November 2003, Fusion made a binding election to purchase an aggregate of 1,766,667 ADSs for an aggregate purchase price of \$1,325,000. In November 2003, we issued 1,000,000 ADSs to Fusion for an aggregate purchase price of \$750,000. Fusion's delivery of the additional amount of \$575,000 in November 2003 constituted a binding commitment to purchase the remaining 766,667 shares at such time as Fusion's beneficial ownership of Insignia became less than 9.9%, and the balance of these 766,667 shares were issued to Fusion in January 2004.

During the third quarter of 2003, Fusion also purchased an aggregate of 2,000,000 ADSs on exercise of warrants.

On October 18, 2004, we closed two equity financing transactions in which we raised over \$2.3 million, net of transaction costs. We closed a private placement financing with certain institutional and other accredited investors pursuant to which we issued and sold 3,208,499 newly issued ADSs and warrants to purchase 802,127 ADSs, for a total purchase price of approximately \$1.540 million, or \$1.366 million net of transaction costs. The shares were priced at \$0.48 per share, and the warrants had an exercise price of \$1.06 per share. The warrants may be exercised any time after the date that is six months after the closing of the private placement until the earlier of April 18, 2010 or a change of control of Insignia. We issued warrants to purchase an aggregate of 204,597 ADSs to the two principals of Nash Fitzwilliams Ltd., who served as the private placement agent in the private placement. The warrants issued to Nash Fitzwilliams Ltd.'s principals have the same exercise price and terms as the warrants issued to the investors in the private placement. As part of the transaction, we had agreed to file a resale registration statement on Form S-3 with the Securities and Exchange Commission within 30 days after closing for the purpose of registering the resale of the shares, and the shares underlying the warrants, issued in the private placement.

Edgar Filing: INSIGNIA SOLUTIONS PLC - Form 10QSB

Two investors in the October 18, 2004 private placement were related parties of Insignia. Mark McMillan, our Chief Executive Officer, invested \$25,000 to purchase 52,083 ADSs and warrants to purchase 13,021 additional ADSs. In addition, Vincent Pino, one of our directors, and his immediate family invested \$200,000 to purchase 416,667 ADSs and warrants to purchase 104,167 additional ADSs.

- 20 -

Table of Contents

Additionally, under a the previously executed securities subscription agreement, we sold to Fusion Capital 2,500,000 shares of newly issued ADSs at a purchase price of \$0.40 per share (which quantity and price the parties agreed to under a modification of the agreement), resulting in proceeds of approximately \$1.0 million, net of transaction costs. As of October 18, 2004, we had sold \$3.152 million of our ADSs (out of a total potential issuance of \$6 million under the securities subscription agreement) to Fusion Capital.

On February 9, 2005, Insignia entered into a new securities subscription agreement with Fusion Capital to sell up to \$12 million in ADSs, representing ordinary shares, to Fusion Capital over a period of 30 months (subject to daily maximum purchase amounts). The shares will be priced based on a market-based formula at the time of purchase. The closing of the 2005 Fusion Capital securities subscription agreement is subject to certain closing conditions, including the declaration of effectiveness by the Securities and Exchange Commission of a registration statement covering the ADSs to be purchased by Fusion Capital under the 2005 Fusion Capital securities subscription agreement. Insignia currently expects that the 2005 Fusion Capital securities subscription agreement will be closed by the second quarter of 2005, however the timing and certainty of the closing of the 2005 Fusion Capital securities subscription agreement are not within Insignia's control. Any delay in the closing of the 2005 Fusion Capital securities subscription agreement could jeopardize our business.

Based upon our current forecasts and estimates of targets for revenues and accounts receivable collections and funding from Fusion Capital, our current cash and cash equivalents together with cash generated from on-going operations, we believe that we will have sufficient funds to meet our operating and capital requirements through the end of 2005. If cash currently available from all sources is insufficient to satisfy our liquidity requirements, we may seek additional sources of financing, including selling additional equity or debt securities. If additional funds are raised through the issuance of equity or debt securities, these securities could have rights, preferences and privileges senior to holders of our shares, and the terms of such securities could impose restrictions on our operations. The sale of additional equity or debt securities could result in additional dilution to our shareholders. We may not be able to obtain additional financing on acceptable terms, if at all. If we are unable to obtain additional financing as and when needed and on acceptable terms, we may be required to reduce the scope of our planned sales, marketing and product development efforts, which could jeopardize our business.

For the three months ended March 31, 2005 approximately 29% of our total revenues and 48% of our operating expenses were denominated in U.S. dollars. 71% of our revenues were in Euros. 50% of our expenses were in British pound sterling and 2% of our expenses in Swedish Krona. Consequently we are exposed to fluctuations in Euro, British pound sterling and Swedish Krona exchange rates. There can be no assurance that such fluctuations will not have a material effect on our results of operations in the future. We did not enter into any currency option hedge contracts in 2004 or the first quarter of 2005.

New Accounting Pronouncement

In December 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 123 (revised 2004) Share-Based Payment (SFAS 123R), a revision to SFAS 123. SFAS 123R addresses all forms of share-based payment (SBP) awards, including shares issued under the 1995 Incentive Stock Option Plan (Purchase Plan), stock options, restricted stock, restricted stock units and stock appreciation rights. SFAS 123R will require the Company to record compensation expense for SBP awards based on the fair value of the SBP awards. Under SFAS 123R, restricted stock and restricted stock units will generally be valued by reference to the market value of freely tradable shares of the Company's ordinary shares. Stock options, stock appreciation rights and shares issued under the Purchase Plan will generally be valued at fair value determined through an option valuation model, such as a lattice model or the Black-Scholes model (the model that Insignia currently uses for its footnote disclosure). SFAS 123R is effective for annual periods beginning after June 15, 2005 and, accordingly, Insignia must adopt the new accounting provisions effective January 1, 2006. The Company will adopt the provisions of SFAS 123R

using a modified prospective application. Under a modified prospective application, SFAS 123R will apply to new awards and to awards that are outstanding on the effective date and are subsequently modified or cancelled. Compensation expense for outstanding awards for which the requisite service had not been rendered as of the effective date will be recognized over the remaining service period using the compensation cost calculated for pro forma disclosure purposes under SFAS 123. The Company is in the process of determining how the new method of valuing stock-based compensation as prescribed in SFAS 123R will be applied to valuing stock-based awards granted after the effective date and the impact the recognition of compensation expense related to such awards will have on its financial statements.

Risk Factors

In addition to the other information in this report, the following factors should be considered carefully in evaluating our business and prospects:

- 21 -

Table of Contents

We may need additional financing to sustain our operations, and we may not be able to continue to operate as a going concern.

We had cash, cash equivalents, and restricted cash of \$0.9 million at March 31, 2005. We had recurring net losses of \$7.1 million, \$4.3 million, and \$8.4 million for the years ended December 31, 2004, 2003, and 2002, respectively, and we also had net cash used in operations of \$7.6 million, \$4.2 million, and \$8.4 million for the years ended December 31, 2004, 2003, and 2002, respectively. In the quarter ended March 31, 2005 we had a net loss of \$1.9 million and had net cash used in operations of \$1.7 million. These conditions raise substantial doubt about our ability to continue as a going concern.

Based upon our current forecasts and estimates, including the timely closing of the 2005 Fusion Capital securities subscription agreement and the achievement of our target revenues, cost-cutting and accounts receivable collection goals, our current forecasted cash and cash equivalents will be sufficient to meet our operating and capital requirements through December 31, 2005. If cash currently available from all sources is insufficient to satisfy our liquidity requirements, we may seek additional sources of financing including selling additional equity or debt securities. If additional funds are raised through the issuance of equity or debt securities, these securities could have rights, preferences and privileges senior to holders of our shares, and the terms of such securities could impose restrictions on our operations. The sale of additional equity or debt securities could result in additional dilution to our shareholders. We may not be able to obtain additional financing on acceptable terms, if at all. If we are unable to obtain additional financing as and when needed and on acceptable terms our business may be jeopardized.

On February 9, 2005, Insignia entered into a new securities subscription agreement with Fusion Capital to sell ADSs, representing ordinary shares having an aggregate purchase price of up to \$12.0 million, to Fusion Capital Fund II, LLC over a period of 30 months. The shares will be priced based on a market-based formula at the time of purchase. The commencement of funding under the 2005 Fusion Capital securities subscription agreement is subject to the declaration of effectiveness by the Securities and Exchange Commission of a registration statement covering the ADSs to be purchased by Fusion Capital under the 2005 Fusion Capital securities subscription agreement. Under the rules and regulations of the Nasdaq SmallCap Market, the Company is seeking shareholder approval to sell more than 19.99% of the 39,249,013 issued and outstanding shares as of February 10, 2005. If we do not obtain such shareholder approval, we may only sell 7,845,878 shares (including 4,000,000 shares issuable on exercise of warrants held by Fusion Capital) to Fusion Capital under the 2005 securities subscription agreement. The timing and certainty of such shareholder approval and the effectiveness of this registration statement are not within Insignia's control. Any delay in the commencement of funding under the 2005 Fusion Capital securities subscription agreement could jeopardize Insignia's business.

We only have the right to receive \$20,000 per trading day under the agreement with Fusion Capital unless our stock price equals or exceeds \$1.00, in which case the daily amount may be increased under certain conditions as the price of our common stock increases. Fusion Capital shall not have the right nor be obligated to purchase any shares of our common stock on any trading days that the market price of our common stock is less than \$0.40. Under the laws of England and Wales, we are not permitted to sell our ADSs at a purchase price that is less than the nominal value of our ordinary shares. Currently, the nominal value per ordinary share is £0.20. In addition, Insignia will not effect any issuance of ordinary shares (or have its transfer agent or depository issue any ADSs) on any trading day where the purchase price for any subscriptions would be less than the U.S. dollar equivalent of 102.5% of the then nominal value of the ordinary shares.

We have a total of 75,000,000 shares authorized for issuance, of which 42,372,199 shares were outstanding as of April 22, 2005, 7,021,007 shares were reserved for issuance upon the exercise of outstanding warrants and options and 989,896 shares were reserved in connection with the Mi4e acquisition. Accordingly, we have a total of 24,616,898 shares available and authorized for issuance in connection with future financing and strategic transactions.

Edgar Filing: INSIGNIA SOLUTIONS PLC - Form 10QSB

Because we are registering 20,000,000 shares for sale by Fusion Capital (of which 4,000,000 shares are purchasable on exercise of warrants issued to Fusion Capital), the selling price of our common stock to Fusion Capital will have to average at least \$0.75 per share for us to receive the maximum proceeds of \$12,000,000.

- 22 -

Table of Contents

Assuming an average purchase price of \$0.70 per share (the closing sale price of the common stock on May 4, 2005) and the purchase by Fusion Capital of 16,000,000 shares under the 2005 securities subscription agreement, proceeds to us would be \$11,200,000, plus approximately \$2,000,000 from exercise of warrants. In addition, even if we are able to access the full \$12,000,000 under the 2005 securities subscription agreement with Fusion Capital, we may still need additional capital to implement our business, operating and development plans. Should the financing we require to sustain our working capital needs be unavailable or prohibitively expensive when we require it, our business could be jeopardized.

Our stock could be delisted from Nasdaq.

The Company received on April 19, 2005 a Nasdaq Staff Determination indicating that the Company was not, at December 31, 2004, in compliance with the stockholders' equity requirement for continued listing set forth in MarketPlace Rule 4310(c)(2)(B) and that its securities are, therefore, subject to delisting from the Nasdaq SmallCap Market at the opening of business on April 28, 2005. The Company has a hearing before a Nasdaq Listing Qualifications Panel to review the Staff Determination on May 19, 2005. The delisting is stayed pending the Panel's decision. MarketPlace Rule 4310(c)(2)(B) requires that the Company have a minimum stockholders' equity of \$2,500,000 for continued listing on the Nasdaq SmallCap Market. At December 31, 2004 the Company's shareholders' equity was \$1,341,000. Although as of March 31, 2005 the company's shareholders' equity exceeded \$2,500,000, there is no assurance the Panel will grant the Company's request for continued listing.

The sale of our shares to Fusion Capital may cause dilution, and the sale of the shares by Fusion Capital could cause the price of our shares to decline.

The number of shares to be issued to Fusion Capital pursuant to the 2005 securities subscription agreement with Fusion Capital will fluctuate based on the price of our shares. Shares sold to Fusion Capital under the 2005 securities subscription agreement will be freely tradable. Fusion Capital may sell none, some or all of the shares purchased from us at any time. We expect that the shares to be sold to Fusion Capital will be sold over a period of up to 30 months from the effective date of the registration statement filed in connection with the transaction.

In addition, we are registering for resale an aggregate of 10,534,064 shares sold to other parties in connection with either private placement transactions or acquisitions. Depending upon market liquidity at the time, a sale of such shares at any given time could cause the trading price of our shares to decline. The sale of a substantial number of shares, or anticipation of such sales, could make it more difficult for us to sell equity or equity-related securities in the future at a time and at a price that we might otherwise wish to effect sales.

We have achieved minimal sales of our products to date.

Our future performance depends upon sales of our SSP, DMS and OMC product lines. We began shipping the SSP product in December 2003 and the OMC product line in October 2004. We have achieved only minimal sales to date, including revenues of only \$450,000 relating to sales of the SSP product in 2004. The DMS product line was acquired as part of Mi4e in March 2005 and we thus have limited experience in selling this product. If we are unable to gain the necessary customer traction for our products, our business may be jeopardized.

Our SSP and OMS products represents the next-generation products that enable carriers to repair and update mobile phones over-the-air without having their customers send back their handsets to the carrier for repair or update. To the extent that carriers continue to use the current generation of over-the-air products, such as those offered by Bitfone, Innopath, Openwave and mFormation, to make repairs and updates and do not believe that the next generation products, such as our SSP product, offer a sufficiently important improvement at a reasonable cost, then we may not achieve our targeted sales and our business could fail. Conversely our newly acquired DMS product

represents the current generation of technology.

In addition, some prospective customers have been reticent to buy our products because of our current financial position. To the extent that prospective customers believe that we are under-capitalized, they may be hesitant to buy our products.

Table of Contents

The long and complex process of licensing our products makes our revenue unpredictable.

Our revenue is dependent upon our ability to license our products to third parties. Licensing our products has to date been a long and complex process, typically being a six to nine months sales cycle. Before committing to license our products, potential customers must generally consider a wide range of issues including product benefits, infrastructure requirements, functionality, reliability and our ability to work with existing systems. The process of entering into a development license with a company typically involves lengthy negotiations. Because of the sales cycle, it is difficult for us to predict when, or if, a particular prospect might sign a license agreement. Development license fees may be delayed or reduced because of this process. We only began shipping the SSP product in December 2003 and have achieved only minimal sales to date.

We rely on third parties for software development tools, which we distribute with some of our products.

We license software development tool products from other companies to distribute with some of our products. These third parties may not be able to provide competitive products with adequate features and high quality on a timely basis or to provide sales and marketing cooperation. Furthermore, our products compete with products produced by some of our licensors. When these licenses terminate or expire, continued license rights might not be available to us on reasonable terms, or at all. We might not be able to obtain similar products to substitute into our tool suites.

If handset manufacturers (and other third parties) do not achieve substantial sales of their products that incorporate our technology, we will not receive royalty payments on our licenses.

Our success depends upon the use of our technology by our licensees in their smart devices. Our licensees undertake a lengthy process of developing systems that use our technology. Until a licensee has sales of its systems incorporating our technology, they will not pay commercial use royalties to us. We expect that the period of time between entering into a development license and actually recognizing commercial use royalties will be lengthy and difficult to predict.

We have a history of losses and we must generate significantly greater revenue if we are to achieve profitability.

We have experienced operating losses in each quarter since the second quarter of 1996. To achieve profitability, we will have to increase our revenue significantly. Our ability to increase revenue depends upon the success of our products, and to date we have received only minimal revenue. If we are unable to create revenue in the form of development license fees, maintenance and support fees, commercial use royalties and nonrecurring engineering services, our current revenue will be insufficient to sustain our business.

We need to increase our sales and marketing expenditures in order to achieve sales of our products; however, this increase in expenses is expected to decrease our cash position.

In the quarters ended March 31, 2005 and March 31, 2004, we spent 143% and 256%, respectively, of our total revenue on sales and marketing. We expect to continue to incur disproportionately high sales and marketing expenses in the future. To market our products effectively, we must develop client and server channel markets. We will continue to incur the expenses for a sales and marketing infrastructure before we recognize significant revenue from sales of the product. Because customers in the smart device market tend to remain with the same vendor over time, we believe that we must devote significant resources to each potential sale. If potential customers do not design our products into their systems, the resources we have devoted to the sales prospect would be lost. If we fail to achieve and sustain significant increases in our quarterly sales, we may not be able to continue to increase our investment in these areas. With increased expenses, we must significantly increase our revenue if we are to become profitable.

Table of Contents

If we are unable to stay abreast of technological changes, evolving industry standards and rapidly changing customer requirements, our business reputation will likely suffer and revenue may decline.

The market for mobile devices is fragmented and characterized by technological change, evolving industry standards and rapid changes in customer requirements. Our products will need to be continually improved to meet emerging market conditions, such as new interoperability standards, new methods of wireless notifications, new flash silicon technologies and new telecom infrastructure elements. Our existing products will become less competitive or obsolete if we fail to introduce new products or product enhancements that anticipate the features and functionality that customers demand. The success of our new product introductions will depend on our ability to:

accurately anticipate industry trends and changes in technology standards;

complete and introduce new product designs and features in a timely manner;

continue to enhance our existing product lines; and

respond promptly to customers requirements and preferences.

Development delays are commonplace in the software industry. We have experienced delays in the development of new products and the enhancement of existing products in the past and are likely to experience delays in the future. We may not be successful in developing and marketing, on a timely basis or at all, competitive products, product enhancements and new products that respond to technological change, changes in customer requirements and emerging industry standards.

Our targeted market is highly competitive.

Our products are targeted for the mobile operator and mobile device market. The market for these products is fragmented and highly competitive. This market is also rapidly changing, and there are many companies creating products that compete or will compete with ours. As the industry develops, we expect competition to increase in the future. This competition may come from existing competitors or other companies that we do not yet know about. Our main competitors include Bitfone, IBM, InnoPath, 4thPass, mFormation, Openwave and Red Bend.

If these competitors develop products that are less expensive or provide better capabilities or functionality than do our products, we will be unable to gain market share. Many of our current competitors and potential competitors have greater resources, including larger customer bases and greater financial resources than we do, and we might not be able to compete successfully against these companies. A variety of other potential actions by our competitors, including increased promotion and accelerated introduction of new or enhanced products, could also harm our competitive position.

Our revenue model may not succeed.

Competition could force us to reduce the prices of our products, which would result in reduced gross margins and could harm our ability to provide adequate service to our customers and our business. Our pricing model for our software products is a combination of (1) initial license fees, (2) activated subscriber fees, (3) support and maintenance fees, (4) hosting services and (5) engineering service fees, any of which may be subject to significant pricing pressures. Also, the market may demand alternative pricing models in the future, which could decrease our revenues and gross margins.

Fluctuations in our quarterly results could cause the market price of our shares to decline.

Our quarterly operating results can vary significantly depending on a number of factors. These factors include:

the volume and timing of orders received during the quarter;

the mix of and changes in customers to whom our products are sold;

- 25 -

Table of Contents

the mix of product and service revenue received during the quarter;

the mix of development license fees and commercial use royalties received;

the timing and acceptance of new products and product enhancements by us or by our competitors;

changes in product pricing;

foreign currency exchange rate fluctuations; and

ability to recognize revenue on orders received.

All of these factors are difficult to forecast. Our future operating results may fluctuate due to these and other factors, including our ability to continue to develop innovative and competitive products. Due to all of these factors, we believe that period-to-period comparisons of our results of operations are not necessarily meaningful and should not be viewed as an indication of our future performance.

We have engineering and other operations both in the United States and foreign countries, which is expensive and can create logistical challenges.

We currently have 17 employees in the United States, 10 employees in the United Kingdom and 7 employees in Sweden. In the past, the geographic distance between our engineering personnel in the United Kingdom and our principal offices in California and primary markets in Asia, Europe and the United States has led to logistical and communication difficulties. In the future, we may experience similar difficulties, which may have an adverse impact on our business. Further, because a substantial portion of our research and development operations is located in the United Kingdom and Sweden, our operations and expenses are directly affected by economic and political conditions in the United Kingdom and Sweden.

Economic conditions in Europe and fluctuations in the value of the U.S. dollar against the Euro, Swedish Krona and British pound sterling could impair our revenue and results of operations. International operations are subject to a number of other special risks. These risks include foreign government regulation, reduced protection of intellectual property rights in some countries where we do business, longer receivable collection periods and greater difficulty in accounts receivable collection, unexpected changes in, or imposition of, regulatory requirements, tariffs, import and export restrictions and other barriers and restrictions, potentially adverse tax consequences, the burdens of complying with a variety of foreign laws and staffing and managing foreign operations, general geopolitical risks, such as political and economic instability, hostilities with neighboring countries and changes in diplomatic and trade relationships, and possible recessionary environments in economies outside the United States.

In March 2005, we acquired Mi4e Device Management, AB, a company headquartered in Sweden. We now have 7 employees and an office in Sweden. It takes substantial management time and financial resources to integrate operations in connection with an acquisition, and the potential logistical, personnel and customer challenges are exacerbated when, as in this case, the acquirer and target company are separated by great geographic distance.

International sales of our products, which we expect to comprise a significant portion of total revenue, expose us to the business and economic risks of international operations.

Sales from outside of the United States accounted for approximately 100% and 47% of our total revenue for the quarters ended March 31, 2005 and March 31, 2004, respectively. We expect to market SSP, DMS and OMC to mobile operators and handset manufacturers in Europe. Economic conditions in Europe and fluctuations in the value of the Euro, British pounds sterling and Swedish Krona against the U.S. dollar could impair our revenue and results of

operations. International operations are subject to a number of other risks. These risks include:

longer receivable collection periods and greater difficulty in accounts receivable collection;

- 26 -

Table of Contents

foreign government regulation;

reduced protection of intellectual property rights in some countries where we do business;

unexpected changes in, or imposition of, regulatory requirements, tariffs, import and export restrictions and other barriers and restrictions;

potentially adverse tax consequences;

the burdens of complying with a variety of foreign laws and staffing and managing foreign operations;

general geopolitical risks, such as political and economic instability, terrorism, hostilities with neighboring countries and changes in diplomatic and trade relationships; and

possible recessionary environments in economies outside the United States.

Product defects can be expensive to fix and may cause us to lose customers.

Our software products, like all software products, may have undetected errors or compatibility problems. Software errors are particularly common when a product is first introduced or a new version is released. Despite thorough testing, our products might be shipped with errors. If this were to happen, customers could reject our products, or there might be costly delays in correcting the problems. Our products are increasingly used in systems that interact directly with the general public, such as in transportation and medical systems. In these public-facing systems, the failure of our product could cause substantial property damage or personal injury, which could expose us to product liability claims. Our products are used for applications in business systems where the failure of our product could be linked to substantial economic loss. Our agreements with our customers typically contain provisions designed to limit our exposure to potential product liability and other claims. It is likely, however, that these provisions are not effective in all circumstances and in all jurisdictions. We may not have adequate insurance against product liability risks, and renewal of our insurance may not be available to us on commercially reasonable terms. Further, our errors and omissions insurance may not be adequate to cover claims. If we ever had to recall our product due to errors or other problems, it would cost us a great deal of time, effort and expense.

Our operations depend on our ability to protect our computer equipment and the information stored in our databases against damage by fire, natural disaster, power loss, telecommunications failure, unauthorized intrusion and other catastrophic events. The measures we have taken to reduce the risk of interruption in our operations may not be sufficient. As of the date of this report, we have not experienced any major interruptions in our operations because of a catastrophic event.

If we lose key personnel or are unable to hire additional qualified personnel as necessary, we may not be able to successfully manage our business or sell our products.

Our future performance depends to a significant degree upon the continued contributions of our key management, product development, sales, marketing and operations personnel. We do not have agreements with any of our key personnel that obligates them to work for us for a specific term, and we do not maintain any key person life insurance policies. We currently intend to hire additional salespeople and believe our future success will depend in large part upon our ability to attract and retain highly skilled managerial, engineering, sales, marketing and operations personnel, many of whom are in great demand. Competition for qualified personnel can be intense in the San Francisco Bay Area, where our U.S. operations are headquartered.

If we fail to protect our intellectual property rights, competitors could introduce similar or superior products, and we could lose market share.

We depend on our proprietary technology. Despite our efforts to protect our proprietary rights, it may be possible for unauthorized third parties to copy our products or to reverse engineer or otherwise obtain and use information that we consider proprietary. Our competitors could independently develop technologies that are substantially

- 27 -

Table of Contents

equivalent or superior to our technologies. Policing unauthorized use of our products is difficult, and while we are unable to determine the extent to which software piracy of our products exists, software piracy can be expected to be a persistent problem. Effective protection of intellectual property rights may be unavailable or limited in foreign countries. The status of U.S. patent protection in the software industry is not well defined and will evolve as the United States Patent and Trademark Office grants additional patents. Patents have been granted on fundamental technologies in software, and patents may be issued that relate to fundamental technologies incorporated into our products.

Our products may infringe the intellectual property rights of third parties, which may result in lawsuits and prevent us from selling our products.

As the number of patents, copyrights, trademarks and other intellectual property rights in our industry increases, products based on our technology may increasingly become the subject of infringement claims. Third parties could assert infringement claims against us in the future. Infringement claims, with or without merit, could be time consuming, result in costly litigation, cause product shipment delays or require us to enter into royalty or licensing agreements. Royalty or licensing agreements, if required, might not be available on terms acceptable to us. We may initiate claims or litigation against third parties for infringement of our proprietary rights or to establish the validity of our proprietary rights. Litigation to determine the validity of any claims, whether or not the litigation is resolved in our favor, could result in significant expense to us and divert the efforts of our technical and management personnel from productive tasks. If there is an adverse ruling against us in any litigation, we may be required to pay substantial damages, discontinue the use and sale of infringing products, expend significant resources to develop non-infringing technology or obtain licenses to infringing technology. Our failure to develop or license a substitute technology could prevent us from selling our products.

We are at risk of securities litigation which, regardless of the outcome, could result in substantial costs and divert management attention and resources.

Stock market volatility has had a substantial effect on the market prices of securities issued by us and other high technology companies, often for reasons unrelated to the operating performance of the specific companies. Following periods of volatility in the market price of a company's securities, securities class action litigation has often been instituted against high technology companies. We have in the past been, and may in the future be, the target of similar litigation. Regardless of the outcome, securities litigation may result in substantial costs and divert management attention and resources.

Our investors may have difficulty enforcing judgments against us in U.S. courts because many of our assets and some of our directors and management are located in England and Sweden.

Insignia is incorporated under the laws of England and Wales. Two of our directors reside in England. All or a substantial portion of the assets of these persons, and a portion of our assets, are located outside of the United States. It may not be possible for investors to serve a complaint within the United States upon these persons or to enforce against them or against us, in U.S. courts, judgments obtained in U.S. courts based upon the civil liability provisions of U.S. securities laws. There is doubt about the enforceability outside of the United States, in original actions or in actions for enforcement of judgments of U.S. courts, of civil liabilities based solely upon U.S. securities laws. The rights of holders of our shares are governed by English law, including the Companies Act 1985, and by our memorandum and articles of association. The rights of holders of our ADSs are also affected by English law. These rights differ from the rights of security holders in typical U.S. corporations.

Table of Contents

Item 3. Controls and Procedures

We have evaluated the design and operation of our disclosure controls and procedures to determine whether they are effective. This evaluation was made under the supervision and with the participation of management, including our principal executive officer, principal accounting officer and principal financial officer within the 90-day period prior to the filing of this Quarterly Report on Form 10-QSB. The principal executive officer, principal accounting officer and principal financial officer has concluded, based on his review, that our disclosure controls and procedures, as defined at Exchange Act Rules 13a-14(c) and 15d-14(c), are effective to ensure that information required to be disclosed by us in reports that we file under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms. No significant changes were made to our internal controls during our first quarter of 2005 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
