- (1) Assumes conversion of all of the holder's notes at a conversion rate of 69.1085 shares of common stock per \$1,000 principal amount at maturity of the notes. This conversion rate is subject to adjustment, however, as described under "Description of the Notes -- Conversion Rights." As a result, the number of shares of common stock issuable upon conversion of the notes may increase or decrease in the future.
- (2) Calculated based on Rule 13d-3(d)(i) of the Securities Exchange Act of 1934, as amended, using 38,375,157 shares of common stock outstanding as of February 28, 2005. In calculating this amount for each holder, we treated as outstanding the number of shares of common stock issuable upon conversion of all that holder's notes, but we did not assume conversion of any other holder's notes.
- (3) Information about other selling securityholders will be set forth in prospectus supplements, if required.
- (4) Represents the number of shares of common stock into which \$260,000,000 aggregate principal amount of notes would be convertible at the conversion rate described in footnote 1 above.
- (5) Represents the amount which the selling securityholders may sell under this prospectus divided by the sum of the common stock outstanding as of February 28, 2005, plus the 17,968,210 shares of common stock into which the \$260,000,000 aggregate principal amount of notes is convertible.
