David C. Novak, Chairman and CEO said, *"I am pleased to report that we have achieved our 2001 full-year ongoing operating EPS commitment.*

"I am even more pleased that we are moving into 2002 with wind behind our backs from a strong fourth-quarter performance. We are successfully executing our strategies of driving global expansion, improving restaurant operations, and leading the industry in multibrand innovation. Internationally, we continue to develop new restaurants at a record pace and have huge expansion opportunities for our brands, which we expect will drive more than half of Tricon's earnings growth for many years. Importantly, our operations measures for the U.S. improved in 2001, and we anticipate continued progress. Our U.S. sales trends at KFC and Taco Bell have improved. In fact, we believe our three U.S. brands enter 2002 better positioned, have sounder plans, and are fundamentally stronger businesses than a year ago.

"We continue to expand the best multibrand combinations for our brands while testing other QSR brand combinations. We believe that the multibranding concept is a key enabler for accelerating U.S. same-store sales growth, facilitating the remodeling of our U.S. restaurant system with solid returns, and expanding distribution into new trade areas.

"I am confident we have entered 2002 with solid prospects for revenue, earnings, and shareholder value growth. Our focus is consistency you can count on year after year."

Following is an update on Tricon's business segments and key drivers, which include global expansion, portfolio of leading U.S. brands, multibranding, franchise fees and cash generation and returns:

a. This year's fourth quarter and full year contained one less week than the comparable period in the year 2000.

b. Prior to foreign exchange conversion to U.S. dollars.

For the fourth quarter, international restaurant growth and system-wide, international same-store sales growth drove revenue and ongoing operating profit growth. On a comparable 16-week basis, ongoing operating profit increased 26% prior to foreign currency conversion to U.S. dollars. Higher operating costs adversely affected restaurant margin, and acquisitions of lower-margin restaurants were also a contributing factor.

For the full year, the same factors previously noted for the fourth quarter impacted revenue growth, restaurant margin and ongoing operating profit in a similar manner. On a comparable 52-week basis, ongoing operating profit increased 12% prior to foreign currency conversion.

In 2002, the company expects international revenues to grow at a low-double-digit rate and international ongoing operating profit to grow 14% to 15% prior to foreign currency conversion and the favorable impact of the cessation of amortization of goodwill and certain intangible assets (SFAS 142). Based on current foreign currency rates, the company expects an approximate \$10-million adverse impact of foreign-currency conversion on ongoing operating profit for the full year 2002.

a. This year's Q4 and full year 2001 contained one less week than the comparable period in the year 2000.

b. Calculated on a 16- and 52-week comparable basis, respectively

For the fourth quarter 2001, blended portfolio same-store sales at company restaurants increased 3% and consisted of an 8% increase at Taco Bell, a 7% increase at KFC, and a 5% decrease at Pizza Hut. Revenue declined 4% primarily due to the impact of refranchising and one less operating week in 2001. Excluding the impact of refranchising, acquisitions and lapping an extra week in 2000, revenues would have increased 4%. Restaurant margin improved by 1.1 ppts, driven by the positive same-store sales increases achieved during the quarter. Higher same-store sales drove a 16% increase in ongoing operating profit. Versus 2000, the negative ongoing operating profit impact of one less operating week in 2001 was offset by substantially lower costs related to Taco Bell's franchise financial health.

For the full year 2001, blended portfolio same-store sales at company restaurants increased 1% and consisted of a 3% increase at KFC combined with same-store sales that were even with last year at Taco Bell and Pizza Hut. Revenue declined 5% primarily due to the impact of refranchising. Excluding the impact of refranchising, acquisitions and lapping an extra week in 2000, revenues would have increased 2%. Restaurant margin was even with last year as the benefit from higher same-store sales was offset by higher operating costs. Refranchising was the main factor that resulted in a 3% decline in ongoing operating profit. Excluding refranchising, acquisitions and lapping an extra week in 2000, ongoing operating profit would have increased 4%.

For the full year 2002, we expect U.S. blended same-store sales growth of at least 2%, U.S. revenues to increase 3% and U.S. ongoing operating profit to increase 5% prior to the benefit of SFAS 142.

WORLDWIDE NEW RESTAURANT DEVELOPMENT

	<u>Q4</u>	<u>Full Year</u>
Restaurant Openings (a)		
Worldwide	626	1,489
International	437	1,041
United States	189	448
Restaurant Net Growth Vs. Last Year (a)		
Worldwide	NA	2%
International	NA	6%
United States	NA	(1)%

a. Excluding licensed locations

The company set a record with 1,041 international openings in 2001. These included over 600 KFCs and 400 Pizza Huts. Our franchise and joint-venture partners opened nearly 70% of our new international restaurants in 2001.

KFC and Pizza Hut drove openings in the United States for the full year. Restaurant closures more than offset openings in the U.S. for the full year as we continued to restructure and upgrade our asset base with higher-volume, new-image restaurants. One point not reflected in these statistics is the impact of multibranding on our U.S. restaurant system. Multibrand conversions, while increasing the points of distribution of the added brand, result in no additional unit counts. Similarly, a newly opened multibrand unit, while increasing the points of distribution of two brands, results in just one additional unit count.

For 2002, we expect 5% to 6% net growth in international restaurants and no change in the U.S. This forecast excludes licensed locations.

MULTIBRANDING

	<u>Q4</u>	<u>Full Year</u>
Multibrand Additions	137	309
Total Multibrand Restaurants	NA	1,520

Tricon continues to expand multibranding with its three brands and test the viability of other QSR concepts as multibrand partners. We now have 71 KFC/A&W multibrands in the system. We have also begun testing multibranding with Long John Silver's (LJS) and have two Taco Bell/LJS and five KFC/LJS restaurants in operation as of the end of 2001. We expect to continue to expand these multibrand combinations based on results to date. Furthermore, we recently announced that the company would begin a multibrand test with Back Yard Burgers. Our first restaurant multibranded with Back Yard Burgers is expected to open by the end of the first quarter.

In 2002, Tricon continues to expect to add at least 325 multibranded restaurants through new-restaurant openings and conversions of existing restaurants.

- a. This year's Q4 and full year 2001 contained one less week than the comparable period in the year 2000.
b. Includes joint ventures

For 2002, the company expects franchise fees to grow to at least \$850 million.

CASH GENERATED AND RETURN ON INVESTED CAPITAL

(\$ millions)	<u>Q4</u>	<u>Full Year</u>
Cash Generated	\$344	\$1,121
Capital Spending and Acquisitions	\$282	\$744
Debt Reduction	\$134	\$300
Share Repurchase	\$2	\$100
Return on Invested Capital	NM	18%

Cash generated for the full year 2001 included \$90 million of after-tax refranchising proceeds and over \$120 million of receivable collections and other proceeds related to AmeriServe.

For 2002, the company expects to generate over \$1.1 billion of cash, including \$200 million of proceeds from stock-option exercises and \$65 million from after-tax refranchising proceeds prior to capital spending of an estimated \$785 million.

The company expects return on invested capital to remain in the top tier of large-scale restaurant companies.

FIRST-QUARTER 2002 OUTLOOK

Our guidance for first quarter ongoing operating EPS is between \$0.74 and \$0.78, an increase of 25% to 32%.

Projected factors contributing to these expectations are . . .

- International system sales growth of 5%, or 8% prior to foreign exchange conversion. Revenue growth of 8%, or 10% prior to foreign exchange conversion.

- International ongoing operating profit growth in the mid-single-digit range in U.S. dollar terms. We expect that foreign exchange conversion and the timing of a holiday in Asia will adversely impact first quarter International reported ongoing operating profits. A key holiday occurs in Tricon's second quarter this year versus the first quarter in 2001. With the benefit of the holiday shift and less adverse foreign exchange rate comparisons, International ongoing operating growth of 15% to 20%, in U.S. dollar terms, is expected for the second quarter.
- U.S. blended company same-store sales of 4% to 5%. Revenue growth of 3% to 4%.
- U.S. ongoing operating profit growth of at least 20%.
- Worldwide company-restaurant margin up at least 1.0 percentage point versus last year, including a projected 0.5 percentage-point benefit from the adoption of SFAS 142.
- General and administrative expenses up slightly in U.S. dollar terms versus last year.
- Interest expense down about \$5 million versus last year.
- Ongoing operating tax rate of 36% to 37%.
- Diluted average shares outstanding of about 155 million, up over 4 million or 3% higher versus last year.

YEAR 2002 OUTLOOK

Tricon expects to earn between \$3.56 and \$3.63 of ongoing operating EPS for the full year.

SFAS 142 UPDATE

Effective December 30, 2001, the beginning of fiscal year 2002, we adopted Statement of Financial Accounting Standards (SFAS) No. 142 "Goodwill and Other Intangible Assets" and ceased amortization of certain of our indefinite-lived intangibles, including goodwill. If SFAS 142 had been effective for fiscal 2001, reported net income and ongoing operating EPS would have increased by approximately \$26 million and \$0.17 respectively.

U.S. restaurant profit would have been approximately \$21 million higher and restaurant margin would have been approximately 0.5 percentage points higher, while general and administrative costs would have been approximately \$1 million lower.

International restaurant profit would have been approximately \$11 million higher and restaurant margin would have been approximately 0.6 percentage points higher, while general and administrative costs would have been approximately \$1 million lower and other income would have been approximately \$4 million higher.

For 2002, the company anticipates that the adoption of SFAS 142 will favorably impact ongoing operating EPS by \$0.13 to \$0.16 subject to portfolio actions occurring in 2002, changes in foreign-currency exchange rates, tax rates, and average diluted shares outstanding. This assumption is included in the above noted 2002 EPS outlook. Tricon will provide additional updates throughout the year as results become final.

This announcement contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements include those identified by such words as may, will, expect, anticipate, believe, plan and other similar terminology. These "forward-looking" statements reflect management's current expectations regarding future events and operating and financial performance and are based on currently available data.
