

Edgar Filing: IMA EXPLORATION INC - Form 6-K

IMA EXPLORATION INC
Form 6-K
March 31, 2003

SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, DC 20549

FORM 6-K

REPORT OF FOREIGN PRIVATE ISSUER
PURSUANT TO RULE 13a-16 OR 15d-16 UNDER
THE SECURITIES EXCHANGE ACT OF 1934

For the month of MARCH , 2003.

IMA EXPLORATION INC.

(Translation of registrant's name into English)

#709 - 837 West Hastings Street, Vancouver, British Columbia, V6C 3N6, Canada

(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F:

Form 20-F X Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1): _____

Note: Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7): _____

Note: Regulation S-T Rule 101(b)(7) only permits the submission in paper of a Form 6-K if submitted to furnish a report or other document that the registrant foreign private issuer must furnish and make public under the laws of the jurisdiction in which the registrant is incorporated, domiciled or legally organized (the registrant's "home country"), or under the rules of the home country exchange on which the registrant's securities are traded, as long as the report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and, if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.

Indicate by check mark whether by furnishing the information contained in this Form, the registrant is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes No X

Edgar Filing: IMA EXPLORATION INC - Form 6-K

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3- 2(b): 82-_____

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf of the undersigned, thereunto duly authorized.

IMA Exploration Inc.
(Registrant)

Date March 28, 2003

NEWS RELEASE

March 28, 2003

IMA DEFINES A LARGE GOLD-COPPER PORPHYRY TARGET IN NORTHWESTERN ARGENTINA

IMA Exploration Inc. is pleased to announce results from a recently completed surface program at its Mogote project, San Juan Province, Argentina. These new results significantly expand the gold-copper exploration potential of the project and show excellent opportunity for discovery of a deposit similar in style to the nearby Marte-Lobo (6 million ounces gold resources) or Refugio (5 million ounces gold reserves and resources) deposits. Mogote is located along the Argentina-Chile border between the prolific Maricunga and El Indio mineralized belts. Geologic and alteration mapping suggest the presence of a very large, high-level, gold-copper porphyry system on the Mogote property.

Detailed mapping, rock chip sampling, and talus-fines sampling have defined two large, intersecting target areas at Mogote which are defined by coincident >100 ppb gold and >500 ppm copper in talus-fines sampling and have been confirmed by rock chip sampling. Filo Central measures 4,000 metres by 800 metres and trends north-northwest; it includes two higher-grade (>200 ppb gold) cores measuring 1,400 by 400 metres and 900 by 250 metres. Filo Este is 2,000 metres by 700 metres in size and trends east-west; within this zone a core of >200 ppb gold in talus fines measures 1,200 by 250 metres. Alteration in the area of these zones is clearly indicative of the uppermost portions of a porphyry system and includes a central core of widespread potassic alteration (biotite, potassium feldspar, and quartz-magnetite veining), quartz veining and stockwork in porphyry and surrounding sediments, a halo of disseminated pyrite, and an outer zone of propylitic alteration (chlorite, pyrite, epidote). All of these alteration styles are overprinted by argillic alteration.

The >100 ppb gold contour in talus fine sampling has been previously used, with documented success, to define several large gold-copper deposits in the Maricunga belt. The anomaly at Filo Central is much longer and more continuous than that defined during the early stages of the Refugio discovery; the Filo Este anomaly approximates the size of the early talus fines anomaly at Lobo. Neither of these targets have been drill tested or trenched.

The exploration work at Mogote was carried out by Linus Keating, D.Sc. under the supervision of Lindsay Bottomer, P.Geol., IMA's Qualified Person for the project.

ON BEHALF OF THE BOARD

/s/ Gerald G. Carlson

Dr. Gerald G. Carlson, P.Eng., Chairman
