-- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c)).

Item 8.01 Other Events.

On October 23, 2013, Senesco Technologies, Inc. (“Senesco” or the “Company”) issued a press release announcing the treatment of the first patient at the Company’s newly opened clinical-trial site at Seattle Cancer Care Alliance (SCCA). This patient is part of Senesco’s Phase 1b/2a clinical study of its therapeutic drug candidate, SNS01-T, targeting B-cell cancers.

SCCA is a cancer treatment center that unites physician scientists from Fred Hutchinson Cancer Research Center, UW Medicine and Seattle Children’s. The organization strives to provide outstanding care to cancer patients and to further improve survival rates. By bringing together the cancer-related patient-care services of the three institutions, SCCA builds on existing strengths, allows easier interactions among the cancer experts in each organization and provides improved access to resources.

The study is an open-label, multiple-dose, dose-escalation study, which is evaluating the safety and tolerability of SNS01-T when administered by intravenous infusion to approximately 15 relapsed or refractory multiple myeloma, mantle cell (MCL) or diffuse large B-cell lymphoma (DLBCL) patients. While the primary objective of this study is to evaluate safety and tolerability, the effect of SNS01-T on tumor response and time to relapse or progression will be assessed using multiple well-established metrics including measurement of monoclonal protein in multiple myeloma and CT imaging in MCL and DLBCL.

A copy of the press release is filed as Exhibit 99.1 hereto and incorporated herein by reference.

Item 9.01. Financial Statements and Exhibits.

(d) Exhibits.

Exhibit No.	Description
