Banco Latinoamericano de Comercio Exterior, S. A. and Subsidiaries

Notes to the unaudited condensed consolidated interim financial statements
(Amounts expressed in thousands of U.S. dollars, unless otherwise indicated)

1. Corporate information

Banco Latinoamericano de Comercio Exterior, S. A. (“Bladex Head Office” and together with its subsidiaries “Bladex” or the “Bank”), headquartered in Panama City, Republic of Panama, is a specialized multinational bank established to support the financing of trade and economic integration in Latin America and the Caribbean (the “Region”). The Bank was established pursuant to a May 1975 proposal presented to the Assembly of Governors of Central Banks in the Region, which recommended the creation of a multinational organization to increase the foreign trade financing capacity of the Region. The Bank was organized in 1977, incorporated in 1978 as a corporation pursuant to the laws of the Republic of Panama, and officially initiated operations on January 2, 1979. Under a contract law signed in 1978 between the Republic of Panama and Bladex, the Bank was granted certain privileges by the Republic of Panama, including an exemption from payment of income taxes in Panama.

The Bank operates under a general banking license issued by the National Banking Commission of Panama, predecessor of the Superintendency of Banks of Panama (the “SBP”).

In the Republic of Panama, banks are regulated by the SBP through Executive Decree No. 52 of April 30, 2008, which adopts the unique text of the Law Decree No. 9 of February 26, 1998, modified by the Law Decree No. 2 of February 22, 2008. Banks are also regulated by resolutions and agreements issued by this entity. The main aspects of this law and its regulations include: the authorization of banking licenses, minimum capital and liquidity requirements, consolidated supervision, procedures for management of credit and market risks, measures to prevent money laundering, the financing of terrorism and related illicit activities, and procedures for banking intervention and liquidation, among others.

Bladex Head Office’s subsidiaries are the following:

Bladex Holdings Inc. a wholly owned subsidiary, incorporated under the laws of the State of Delaware, United States of America (USA), on May 30, 2000. Bladex Holdings Inc. has ownership in two subsidiaries: Bladex Representacao Ltda. and Bladex Investimentos Ltda.

Bladex Representação Ltda., incorporated under the laws of Brazil on January 7, 2000, acts as the Bank’s representative office in Brazil. Bladex Representacao Ltda. is 99.999% owned by Bladex Head Office and the remaining 0.001% owned by Bladex Holdings Inc.

Bladex Investimentos Ltda. was incorporated under the laws of Brazil on May 3, 2011. Bladex Head Office owned 99% of Bladex Investimentos Ltda., and Bladex Holdings Inc. owned the remaining 1%. This company had invested substantially all of its assets in an investment fund, Alpha 4x Latam Fundo de Investimento Multimercado, incorporated in Brazil (“the Brazilian Fund”), registered with the Brazilian Securities Commission (“CVM”, for its acronym in Portuguese). Bladex Investimentos Ltda. merged with Bladex Representacao Ltda. on April 2016, being the latter the extinct company under Brazilian law and prevailing the acquiring company Bladex Representacao Ltda.

Bladex Development Corp. was incorporated under the laws of Panama on June 5, 2014. Bladex Development Corp. is 100% owned by Bladex Head Office.

BLX Soluciones, S.A. de C.V., SOFOM, E.N.R. was incorporated under the laws of Mexico on June 13, 2014. BLX -Soluciones is 99.9% owned by Bladex Head Office, and Bladex Development Corp. owns the remaining 0.1%. The company specializes in offering financial leasing and other financial products such as loans and factoring.

Banco Latinoamericano de Comercio Exterior, S. A. and Subsidiaries

Notes to the unaudited condensed consolidated interim financial statements
(Amounts expressed in thousands of U.S. dollars, unless otherwise indicated)

1. Corporate information (continued)

Bladex Head Office has an agency in New York City, USA (the “New York Agency”), which began operations on March 27, 1989. The New York Agency is principally engaged in financing transactions related to international trade, mostly the confirmation and financing of letters of credit for customers in the Region. The New York Agency also has authorization to book transactions through an International Banking Facility (“IBF”).

The Bank has representative offices in Buenos Aires, Argentina; in Mexico City, and Monterrey, Mexico (until April 5, 2017); in Lima, Peru; and in Bogota, Colombia.

These unaudited condensed consolidated interim financial statements were authorized for issue by the Board of Directors on July 18, 2017.

2. Basis of preparation of the unaudited condensed consolidated interim financial statements

2.1 Statement of compliance

These unaudited consolidated condensed interim financial statements of Banco Latinoamericano de Comercio Exterior, S. A. and its subsidiaries have been prepared in accordance with International Accounting Standard 34 *Interim Financial Reporting* (IAS 34) issued by the International Accounting Standards Board (“IASB”). As all of the disclosures required by IFRS for annual period consolidated financial statements are not included herein, these unaudited condensed consolidated interim financial statements should be read in conjunction with the audited consolidated financial statements and the notes thereto as of and for the year ended December 31, 2016, contained in the Bank’s annual audited consolidated financial statements. The unaudited condensed consolidated interim statements of profit or loss, profit or loss and other comprehensive income, changes in equity and cash flows for the periods presented are not necessarily indicative of results expected for any future period.

4. Financial instruments (continued)

4.4 Recognition and derecognition of financial assets

During the periods ended June 30, 2017, 2016 and 2015, the Bank sold certain financial instruments in the secondary market measured at amortized cost. These sales were made on the basis of compliance with the Bank's strategy to optimize the loan portfolio.

The amounts and gains arising from the derecognition of these financial instruments are presented in the following table. These gains are presented within the line "gain on sale of loans at amortized cost" in the consolidated statement of profit or loss.

	Assignments and Participations	Gains
For the period ended June 30, 2017	70,400	98
For the period ended June 30, 2016	53,900	326
For the period ended June 30, 2015	41,020	227

4.5 Loans – at amortized cost

The following table set forth details of the Bank's gross loan portfolio:

	June 30, 2017	December 31, 2016
Corporations:		
Private	2,369,870	2,655,910
State-owned	868,755	786,900
Banking and financial institutions:		
Private	1,629,497	1,738,999
State-owned	456,093	544,877
Middle-market companies:		
Private	246,100	294,045
Total	5,570,315	6,020,731

The composition of the gross loan portfolio by industry is as follows:

	June 30, 2017	December 31, 2016
Banking and financial institutions	2,085,590	2,283,876
Industrial	1,111,020	1,242,441
Oil and petroleum derived products	975,877	788,186
Agricultural	698,428	1,007,139
Services	341,187	419,440
Mining	195,000	54,000
Others	163,213	225,649
Total	5,570,315	6,020,731

Banco Latinoamericano de Comercio Exterior, S. A. and Subsidiaries

Notes to the unaudited condensed consolidated interim financial statements
(Amounts expressed in thousands of U.S. dollars, unless otherwise indicated)

4. Financial instruments (continued)

4.5 Loans – at amortized cost (continued)

Loans are reported at their amortized cost considering the principal outstanding amounts net of unearned interest, deferred fees and allowance for expected credit losses.

The amortization of net unearned interest and deferred fees are recognized as an adjustment to the related loan yield using the effective interest rate method.

The unearned discount interest and deferred commission amounted to \$6,723 and \$7,249 at June 30, 2017 and December 31, 2016, respectively.

Loans classified by borrower's credit quality indicators are as follows:

June 30, 2017

Rating ⁽¹⁾	Corporations		Banking and financial institutions		Middle-market companies	Total
	Private	State-owned	Private	State-owned	Private

As of June 30, 2017 and December 31, 2016, the Bank had credit transactions in the normal course of business with 16%, for both periods, respectively, of its Class “A” and “B” stockholders. All transactions were made based on arm’s-length terms and subject to prevailing commercial criteria and market rates and were subject to all of the Bank’s Corporate Governance and control procedures. As of June 30, 2017 and December 31, 2016, approximately 8% and 10%, respectively, of the outstanding loan portfolio was placed with the Bank’s Class “A” and “B” stockholders and their related parties. As of June 30, 2017, the Bank was not directly or indirectly owned or controlled by another corporation or any foreign government, and no Class “A” or “B” shareholder was the registered owner of more than 3.5% of the total outstanding shares of the voting capital stock of the Bank.

The allowances for expected credit losses related to loans at amortized cost are as follows:

	Stage 1 ⁽¹⁾	Stage 2 ⁽²⁾	Stage 3 ⁽³⁾	Total

4. Financial instruments (continued)

4.6 Derivative financial instruments for hedging purposes (continued)

For control purposes, derivative instruments are recorded at their nominal amount (“notional amount”) in memorandum accounts. Interest rate swaps are made either in a single currency or cross currency for a prescribed period to exchange a series of interest rate flows, which involve fixed for floating interest payments, and vice versa. The Bank also engages in certain foreign exchange trades to serve customers’ transaction needs and to manage foreign currency risk. All such positions are hedged with an offsetting contract for the same currency.

The Bank manages and controls the risks on these foreign exchange trades by establishing counterparty credit limits by customer and by adopting policies that do not allow for open positions in the credit and investment portfolio. The Bank also uses foreign currency exchange contracts to hedge the foreign exchange risk associated with the Bank’s equity investment in a non-U.S. dollar functional currency foreign subsidiary. Derivative and foreign exchange instruments negotiated by the Bank are executed mainly over-the-counter (OTC). These contracts are executed between two counterparties that negotiate specific agreement terms, including notional amount, exercise price and maturity.

The maximum length of time over which the Bank has hedged its exposure to the variability in future cash flows on forecasted transactions is 6.69 years.

The Bank estimates that approximately \$733 reported as losses in OCI as of June 30, 2017, related to foreign exchange forward contracts, are expected to be reclassified into interest income as an adjustment to yield of hedged loans during the twelve-month period ending June 30, 2018.

The Bank estimates that approximately \$1,041 of losses reported in OCI as of June 30, 2017, related to forward foreign exchange contracts are expected to be reclassified into interest expense as an adjustment to yield of hedged available-for-sale securities during the twelve-month period ending June 30, 2018.

Types of Derivatives and Foreign Exchange Instruments

Interest rate swaps are contracts in which a series of interest rate flows in a single currency are exchanged over a prescribed period. The Bank has designated a portion of these derivative instruments as fair value hedges and a portion as cash flow hedges. Cross currency swaps are contracts that generally involve the exchange of both interest and principal amounts in two different currencies. The Bank has designated a portion of these derivative instruments as fair value hedges and a portion as cash flow hedges. Foreign exchange forward contracts represent an agreement to purchase or sell foreign currency at a future date at agreed-upon terms. The Bank has designated these derivative instruments as cash flow hedges and net investment hedges.

In addition to hedging derivative financial instruments, the Bank has derivative financial instruments held for trading purposes as disclosed in Note 4.1.

4.7 Offsetting of financial assets and liabilities

In the ordinary course of business, the Bank enters into derivative financial instrument transactions and securities sold under repurchase agreements under industry standards agreements. Depending on the collateral requirements stated in the contracts, the Bank and counterparties can receive or deliver collateral based on the fair value of the financial instruments transacted between parties. Collateral typically consists of cash deposits and securities. The master netting agreements include clauses that, in the event of default, provide for close-out netting, which allows all positions with the defaulting counterparty to be terminated and net settled with a single payment amount.

The International Swaps and Derivatives Association master agreement (“ISDA”) and similar master netting arrangements do not meet the criteria for offsetting in the consolidated statement of financial position. This is because they create for the parties to the agreement a right of set-off of recognized amounts that is enforceable only following an event of default, insolvency or bankruptcy of the Bank or the counterparties or following other predetermined events.

*(Amounts expressed in thousands of U.S. dollars, unless otherwise indicated)***5. Loans commitments and financial guarantees contracts**

In the normal course of business, to meet the financing needs of its customers, the Bank is party to loans commitments and financial guarantees contracts. These instruments involve, to varying degrees, elements of credit and market risk in excess of the amount recognized in the consolidated statement of financial position. Credit risk represents the possibility of loss resulting from the failure of a customer to perform in accordance with the terms of a contract.

The Bank's outstanding loans commitments and financial guarantees contracts are as follows:

	June 30, 2017	December 31, 2016
Confirmed letters of credit	254,071	216,608
Stand-by letters of credit and guaranteed – Commercial risk	2,342	176,177
Credit commitments	7,438	10,250
Total	263,851	403,035

The remaining maturity profile of the Bank's outstanding loans commitments and financial guarantees contracts is as follows:

Maturities	June 30, 2017	December 31, 2016
Up to 1 year	246,713	399,257
From 1 to 2 years	13,000	-
From 2 to 5 years	578	3,200
More than 5 years	3,560	578
	263,851	403,035

Loans commitments and financial guarantees contracts classified by issuer's credit quality indicators are as follows:

Rating⁽¹⁾

Edgar Filing: FOREIGN TRADE BANK OF LATIN AMERICA, INC. - Form 6-K

Switzerland	-	1,000
United Kingdom	-	70
Uruguay	745	18,128
Total	263,851	403,035

Letters of credit and guarantees

The Bank, on behalf of its client's base, advises and confirms letters of credit to facilitate foreign trade transactions. When confirming letters of credit, the Bank adds its own unqualified assurance that the issuing bank will pay and that if the issuing bank does not honor drafts drawn on the letter of credit, the Bank will. The Bank provides stand-by letters of credit and guarantees, which are issued on behalf of institutional clients in connection with financing between its clients and third parties. The Bank applies the same credit policies used in its lending process, and once issued the commitment is irrevocable and remains valid until its expiration. Credit risk arises from the Bank's obligation to make payment in the event of a client's contractual default to a third party. Risks associated with stand-by

letters of credit and guarantees are included in the evaluation of the Bank's overall credit risk.

Credit commitments

Commitments to extend credit are binding legal agreements to lend to clients. Commitments generally have fixed expiration dates or other termination clauses and require payment of a fee to the Bank. As some commitments expire without being drawn down, the total commitment amounts do not necessarily represent future cash requirements.

(Amounts expressed in thousands of U.S. dollars, unless otherwise indicated)

9. Borrowings and debt (continued)**9.2 Long-term borrowings and debt (continued)**

The balances of long-term borrowings and debt by currency, is as follows:

	June 30, 2017	December 31, 2016
Currency		
US dollar	1,076,609	1,392,995
Mexican peso	236,888	219,347
Japanese yen	98,771	95,238
Euro	56,534	52,574
Australian dollar	23,061	21,717
Total	1,491,863	1,781,871

The Bank's funding activities include: (i) EMTN, which may be used to issue notes for up to \$2.3 billion, with maturities from 7 days up to a maximum of 30 years, at fixed or floating interest rates, or at discount, and in various currencies. The notes are generally issued in bearer or registered form through one or more authorized financial institutions; (ii) Short-and Long-Term Notes "Certificados Bursatiles" Program (the "Mexico Program") in the Mexican local market, registered with the Mexican National Registry of Securities maintained by the National Banking and Securities Commission in Mexico ("CNBV", for its acronym in Spanish), for an authorized aggregate principal amount of 10 billion Mexican pesos with maturities from one day to 30 years.

Some borrowing agreements include various events of default and covenants related to minimum capital adequacy ratios, incurrence of additional liens, and asset sales, as well as other customary covenants, representations and warranties. As of June 30, 2017 the Bank was in compliance with all covenants.

The future maturities of long-term borrowings and debt outstanding as of June 30, 2017, are as follows:

Due in Outstanding

2017	55,983
2018	426,363
2019	363,837
2020	378,199
2021	200,893
2022	10,054
2024	56,534
	1,491,863

(Amounts expressed in thousands of U.S. dollars, unless otherwise indicated)

12. Capital and Reserves**Common stock**

The Bank's common stock is divided into four categories:

- 1) "Class A"; shares may only be issued to Latin American Central Banks or banks in which the state or other government agency is the majority shareholder.
- 2) "Class B"; shares may only be issued to banks or financial institutions.
- 3) "Class E"; shares may be issued to any person whether a natural person or a legal entity.
- 4) "Class F"; may only be issued to state entities and agencies of non-Latin American countries, including, among others, central banks and majority state-owned banks in those countries, and multilateral financial institutions either international or regional institutions.

The holders of "Class B" shares have the right to convert or exchange their "Class B" shares, at any time, and without restriction, for "Class E" shares, at a rate of one-to-one.

The following table provides detailed information on the Bank's common stock activity per class for each of the periods in the three-year period ended June 30, 2017, 2016 and 2015:

(Share units)	"Class A"	"Class B"	"Class E"	"Class F"	Total

Reserves

The Banking Law in the Republic of Panama requires banks with general banking license to maintain a total capital adequacy index that shall not be lower than 8% of total assets and off-balance sheet irrevocable contingency transactions, weighted according to their risk; and primary capital equivalent that shall not be less than 4.5% of its assets and loans commitments and financial guarantees contracts, weighted according to their risk. As of June 30, 2017, the Bank's total capital adequacy ratio is 17.97% which is in compliance with the minimum capital adequacy ratios required by the Banking Law in the Republic of Panama.

Banco Latinoamericano de Comercio Exterior, S. A. and Subsidiaries

Notes to the unaudited condensed consolidated interim financial statements
(Amounts expressed in thousands of U.S. dollars, unless otherwise indicated)

12. Capital and Reserves (continued)

Restriction on retained earnings

The Bank does not have restrictions on its ability to access its retained earnings other than those resulting from the supervisory framework within which the Bank operates. The supervisory framework requires banks to keep an additional reserve within equity for credit risk coverage of its credit facilities. As of June 30, 2017 and December 31, 2016, the amount stands at \$114.5 million and \$62.5 million, respectively of retained earnings are restricted from dividend distribution for purposes of complying with local regulatory requirements.

Additional paid-in capital

As of June 30, 2017 and December, 31 2016, the additional paid-in capital consists of additional cash contributions to the common capital paid by shareholders.

13. Business segment information

The Bank's activities are managed and executed in two business segments: Commercial and Treasury. The business segment results are determined based on the Bank's managerial accounting process as defined by IFRS 8 – Operating Segments, which assigns consolidated statement of financial positions, revenue and expense items to each business segment on a systematic basis. The Chief Operating Decision Maker (CODM), represented by the Chief Executive Officer (CEO) and the Management Committee reviews internal management reports from each division at least quarterly. Segment profit, as included in the internal management reports is used to measure performance as management believes that this information is the most relevant in evaluating the results of the respective segments relative to other entities that operate within the same industry.

The Bank's net interest income represents the main driver of profits; therefore, the Bank presents its interest-earning assets by business segment, to give an indication of the size of business generating net interest income. Interest-earning assets also generate gains and losses on sales, such as for financial instruments at fair value through OCI and financial instruments at fair value through profit or loss, which are included in net other income, in the

Treasury Segment. The Bank also discloses its other assets and contingencies by business segment, to give an indication of the size of business that generates net fees and commissions, also included in net other income, in the Commercial Business Segment.

The Commercial Business Segment incorporates all of the Bank's financial intermediation and fees generated by the commercial portfolio. The commercial portfolio includes book value of loans at amortized cost, acceptances, loan commitments and financial guarantee contracts. Profits from the Commercial Business Segment include net interest income from loans at amortized cost, fee income, gain on sale of loans at amortized cost, impairment loss from expected credit losses on loans at amortized cost, impairment loss from expected credit losses on loan commitments and financial guarantee contracts, and allocated expenses.

The Treasury Business Segment incorporates deposits in banks and all of the Bank's financial instruments at fair value through profit or loss, financial instruments at fair value through OCI and securities at amortized cost. Profits from the Treasury Business Segment include net interest income from deposits with banks, financial instruments at fair value through OCI and securities at amortized cost, derivative financial instruments foreign currency exchange, gain (loss) for financial instrument at fair value through profit or loss, gain (loss) for financial instrument at fair value through OCI, impairment loss for expected credit losses on investment securities, other income and allocated expenses.

14. Fair value of financial instruments

The Bank determines the fair value of its financial instruments using the fair value hierarchy established in IFRS 13 - Fair Value Measurements and Disclosure, which requires the Bank to maximize the use of observable inputs (those that reflect the assumptions that market participants would use in pricing the asset or liability developed based on market information obtained from sources independent of the reporting entity) and to minimize the use of unobservable inputs (those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances) when measuring fair value. Fair value is used on a recurring basis to measure assets and liabilities in which fair value is the primary basis of accounting. Additionally, fair value is used on a non-recurring basis to evaluate assets and liabilities for impairment or for disclosure purposes. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Depending on the nature of the asset or liability, the Bank uses some valuation techniques and assumptions when estimating fair value. The Bank applied the following fair value hierarchy:

Level 1 – Assets or liabilities for which an identical instrument is traded in an active market, such as publicly-traded instruments or futures contracts.

Level 2 – Assets or liabilities valued based on observable market data for similar instruments, quoted prices in markets that are not active; or other observable inputs that can be corroborated by observable market data for substantially the full term of the asset or liability.

Banco Latinoamericano de Comercio Exterior, S. A. and Subsidiaries

Notes to the unaudited condensed consolidated interim financial statements
(Amounts expressed in thousands of U.S. dollars, unless otherwise indicated)

14. Fair value of financial instruments (continued)

Level 3 – Assets or liabilities for which significant valuation assumptions are not readily observable in the market; instruments measured based on the best available information, which might include some internally-developed data, and considers risk premiums that a market participant would require.

When determining the fair value measurements for assets and liabilities that are required or permitted to be recorded at fair value, the Bank considers the principal or most advantageous market in which it would transact and considers the assumptions that market participants would use when pricing the asset or liability. When possible, the Bank uses active and observable markets to price identical assets or liabilities. When identical assets and liabilities are not traded in active markets, the Bank uses observable market information for similar assets and liabilities. However, certain assets and liabilities are not actively traded in observable markets and the Bank must use alternative valuation techniques to determine the fair value measurement. The frequency of transactions, the size of the bid-ask spread and the size of the investment are factors considered in determining the liquidity of markets and the relevance of observed prices in those markets.

When there has been a significant decrease in the volume or level of activity for a financial asset or liability, the Bank uses the present value technique which considers market information to determine a representative fair value in usual market conditions.

A description of the valuation methodologies used for assets and liabilities measured at fair value on a recurring basis, including the general classification of such assets and liabilities under the fair value hierarchy is presented below:

Financial instruments at FVTPL and FVOCI

Financial instruments at FVTPL are carried at fair value, which is based upon quoted prices when available, or if quoted market prices are not available, on discounted expected cash flows using market rates commensurate with the credit quality and maturity of the security.

Financial instruments at FVOCI are carried at fair value, based on quoted market prices when available, or if quoted market prices are not available, based on discounted expected cash flows using market rates commensurate with the credit quality and maturity of the security.

When quoted prices are available in an active market, financial instruments at FVOCI and financial instruments at FVTPL are classified in level 1 of the fair value hierarchy. If quoted market prices are not available or they are available in markets that are not active, then fair values are estimated based upon quoted prices of similar instruments, or where these are not available, by using internal valuation techniques, principally discounted cash flows models. Such securities are classified within level 2 of the fair value hierarchy.

Derivative financial instruments

The valuation techniques and inputs depend on the type of derivative and the nature of the underlying instrument. Exchange-traded derivatives that are valued using quoted prices are classified within level 1 of the fair value hierarchy.

For those derivative contracts without quoted market prices, fair value is based on internal valuation techniques using inputs that are readily observable and that can be validated by information available in the market. The principal technique used to value these instruments is the discounted cash flows model and the key inputs considered in this technique include interest rate yield curves and foreign exchange rates. These derivatives are classified within level 2 of the fair value hierarchy.

The fair value adjustments applied by the Bank to its derivative carrying values include credit valuation adjustments (“CVA”), which are applied to OTC derivative instruments, in which the base valuation generally discounts expected cash flows using the Overnight Index Swap (“OIS”) interest rate curves. Because not all counterparties have the same credit risk as that implied by the relevant OIS curve, a CVA is necessary to incorporate the market view of both, counterparty credit risk and the Bank’s own credit risk, in the valuation.

Banco Latinoamericano de Comercio Exterior, S. A. and Subsidiaries

Notes to the unaudited condensed consolidated interim financial statements
(Amounts expressed in thousands of U.S. dollars, unless otherwise indicated)

14. Fair value of financial instruments (continued)Derivative financial instruments (continued)

Own-credit and counterparty CVA is determined using a fair value curve consistent with the Bank's or counterparty credit rating. The CVA is designed to incorporate a market view of the credit risk inherent in the derivative portfolio. However, most of the Bank's derivative instruments are negotiated bilateral contracts and are not commonly transferred to third parties. Derivative instruments are normally settled contractually, or if terminated early, are terminated at a value negotiated bilaterally between the counterparties. Therefore, the CVA (both counterparty and own-credit) may not be realized upon a settlement or termination in the normal course of business. In addition, all or a portion of the CVA may be reversed or otherwise adjusted in future periods in the event of changes in the credit risk of the Bank or its counterparties or due to the anticipated termination of the transactions.

Transfer of financial assets

Gains or losses on sale of loans depend in part on the carrying amount of the financial assets involved in the transfer, and its fair value at the date of transfer. The fair value of instruments is determined based upon quoted market prices when available, or are based on the present value of future expected cash flows using information related to credit losses, prepayment speeds, forward yield curves, and discounted rates commensurate with the risk involved.

Financial instruments measured at fair value on a recurring basis by caption on the consolidated statement of financial positions using the fair value hierarchy are described below:

^(c)Level 3: Internally developed models with significant unobservable market information.

The following information should not be interpreted as an estimate of the fair value of the Bank. Fair value calculations are only provided for a limited portion of the Bank's financial assets and liabilities. Due to a wide range of valuation techniques and the degree of subjectivity used in making the estimates, comparison of fair value information of the Bank and other companies may not be meaningful for comparative analysis.

The following methods and assumptions were used by the Bank's management in estimating the fair values of financial instruments whose fair value is not measured on a recurring basis:

Financial instruments with carrying value that approximates fair value

The carrying value of certain financial assets, including cash and due from banks, interest-bearing deposits in banks, customers' liabilities under acceptances, accrued interest receivable and certain financial liabilities including customer's demand and time deposits, securities sold under repurchase agreements, accrued interest payable, and acceptances outstanding, as a result of their short-term nature, are considered to approximate fair value. These instruments are classified in Level 2.

Banco Latinoamericano de Comercio Exterior, S. A. and Subsidiaries

Notes to the unaudited condensed consolidated interim financial statements
(Amounts expressed in thousands of U.S. dollars, unless otherwise indicated)

14. Fair value of financial instruments (continued)

Securities at amortized cost

The fair value has been based upon current market quotations, where available. If quoted market prices are not available, fair value has been estimated based upon quoted price of similar instruments, or where these are not available, on discounted expected cash flows using market rates commensurate with the credit quality and maturity of the security. These securities are classified in Levels 1 and 2.

Loans at amortized cost

The fair value of the loan portfolio, including impaired loans, is estimated by discounting future cash flows using the current rates at which loans would be made to borrowers with similar credit ratings and for the same remaining maturities, considering the contractual terms in effect as of December 31 of the relevant year. These assets are classified in Level 2.

Short and long-term borrowings and debt

The fair value of short and long-term borrowings and debt is estimated using discounted cash flow analysis based on the current incremental borrowing rates for similar types of borrowing arrangements, taking into account the changes in the Bank's credit margin. These liabilities are classified in Level 2.

The following table provides information on the carrying value and estimated fair value of the Bank's financial instruments that are not measured on a recurring basis:

16. Related party transactions

During the reporting periods, total compensation paid to directors and the executives of Bladex as representatives of the Bank amounted to:

	Three months ended June 30,			Six months ended June 30,		
	2017	2016	2015	2017	2016	2015
Expenses:						
Compensation costs paid to directors	189	164	208	223	239	242
Compensation costs paid to executives	996	2,016	2,154	1,389	3,350	3,872

17. Litigation

Bladex is not engaged in any litigation that is material to the Bank's business or, to the best of the knowledge of the Bank's management that is likely to have an adverse effect on its business, financial condition or results of operations.

18. Risk management

Risk is inherent in the Bank's activities, but it is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. This process of risk management is critical to the Bank's continuing profitability and each individual within the Bank is accountable for the risk exposures relating to his or her responsibilities. The Bank is exposed to market, credit, compliance and liquidity risk. It is also subject to country risk and various operating risks.

The Board of Directors is responsible for the overall risk management approach and for approving the risk management strategies and principles. The Board has appointed an Administration Committee which has the responsibility to monitor the overall risk process within the Bank.

The Risk Committee has the overall responsibility for the development of the risk strategy and implementing principles, frameworks, policies and limits. The Risk Committee is responsible for managing risk decisions and

monitoring risk levels and reports on a weekly basis to the Supervisory Board.

The Risk Management Unit is responsible for implementing and maintaining risk related procedures to ensure an independent control process is maintained. The unit works closely with the Risk Committee to ensure that procedures are compliant with the overall framework.

The Risk Management Unit is responsible for monitoring compliance with risk principles, policies and limits across the Bank. This unit also ensures the complete capture of the risks in risk measurement and reporting systems. Exceptions are reported on a daily basis, where necessary, to the Risk Committee, and the relevant actions are taken to address exceptions and any areas of weakness.

The Bank's Assets/Liabilities Committee (ALCO) is responsible for managing the Bank's assets and liabilities and the overall financial structure. It is also primarily responsible for the funding and liquidity risks of the Bank. The Bank's policy is that risk management processes throughout the Bank are audited annually by the Internal Audit function, which examines both the adequacy of the procedures and the Bank's compliance with the procedures. Internal Audit discusses the results of all assessments with management, and reports its findings and recommendations to the Audit Committee.

18. Risk management (continued)

Risk measurement and reporting systems

The Bank's risks are measured using a method that reflects both the expected loss likely to arise in normal circumstances and unexpected losses, which are an estimate of the ultimate actual loss based on statistical models. The models make use of probabilities derived from historical experience, adjusted to reflect the economic environment. The Bank also runs worst-case scenarios that would arise in the event that extreme events which are unlikely to occur do, in fact, occur.

Monitoring and controlling risks is primarily performed based on limits established by the Bank. These limits reflect the business strategy and market environment of the Bank as well as the level of risk that the Bank is willing to accept, with additional emphasis on selected industries. In addition, the Bank's policy is to measure and monitor the overall risk bearing capacity in relation to the aggregate risk exposure across all risk types and activities. Information compiled from all the businesses is examined and processed in order to analyze, control and identify risks on a timely basis. This information is presented and explained to the Board of Directors, the Risk Committee, and the head of each business division. The report includes aggregate credit exposure, credit metric forecasts, market risk sensitivities, stop losses, liquidity ratios and risk profile changes. On a monthly basis, detailed reporting of industry, customer and geographic risks takes place. Senior management assesses the appropriateness of the allowance for credit losses on a monthly basis. The Supervisory Board receives a comprehensive risk report once a quarter which is designed to provide all the necessary information to assess and conclude on the risks of the Bank. For all levels throughout the Bank, specifically tailored risk reports are prepared and distributed in order to ensure that all business divisions have access to extensive, necessary and up-to-date information.

Risk mitigation

As part of its overall risk management, the Bank uses derivatives and other instruments to manage exposures resulting from changes in interest rates, foreign currencies, equity risks, credit risks, and exposures arising from forecast transactions.

In accordance with the Bank's policy, its risk profile is assessed before entering into hedge transactions, which are authorized by the appropriate level of seniority within the Bank. The effectiveness of hedges is assessed by the Risk Controlling Unit (based on economic considerations rather than the IFRS hedge accounting regulations). The effectiveness of all the hedge relationships is monitored by the Risk Controlling Unit quarterly. In situations of ineffectiveness, the Bank will enter into a new hedge relationship to mitigate risk on a continuous basis.

Risk concentration

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographical region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Bank's performance to developments affecting a particular industry or geographical location. In order to avoid excessive concentrations of risk, the Bank's policies and procedures include specific guidelines to focus on maintaining a diversified portfolio. Identified concentrations of credit risks are controlled and managed accordingly. Selective hedging is used within the Bank to manage risk concentrations at both the relationship and industry levels.

The Bank has exposure to the following risk from financial instruments:

18.1 Credit risk

Credit risk is the risk that the Bank will incur a loss because its customers or counterparties fail to discharge their contractual obligations. The Bank manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties and for geographical and industry concentrations, and by monitoring exposures in relation to such limits.

The Bank has established a credit quality review process to provide early identification of possible changes in the creditworthiness of counterparties, including regular collateral revisions. Counterparty limits are established by the use of a credit risk classification system, which assigns each counterparty a risk rating. Risk ratings are subject to regular revision. The credit quality review process aims to allow the Bank to assess the potential loss as a result of the risks to which it is exposed and take corrective action.

Notes to the unaudited condensed consolidated interim financial statements
(Amounts expressed in thousands of U.S. dollars, unless otherwise indicated)

18. Risk management (continued)

18.1 Credit risk (continued)

Individually assessed allowances

The Bank determines the allowances appropriate for each individually significant loan or advance on an individual basis, taking into account any overdue payments of interests, credit rating downgrades, or infringement of the original terms of the contract. Items considered when determining allowance amounts include the sustainability of the counterparty's business plan, its ability to improve performance if it is in a financial difficulty, projected receipts and the expected payout should bankruptcy ensue, the availability of other financial support, the realizable value of collateral and the timing of the expected cash flows. Allowances for losses are evaluated at each reporting date, unless unforeseen circumstances require more careful attention.

Collectively assessed allowances

Allowances are assessed collectively for losses on loans and advances and for debt investments at amortized costs that are not individually significant and for individually significant loans and advances that have been assessed individually and found not to be impaired. The Bank generally bases its analyses on historical experience and prospective information. However, when there are significant market developments, regional and/or global, the Bank would include macroeconomic factors within its assessments. These factors include, depending on the characteristics of the individual or collective assessment: unemployment rates, current levels of bad debt, changes in the law, changes in regulation, bankruptcy trends, and other consumer data. The Bank may use the aforementioned factors as appropriate to adjust the impairment allowances.

Allowances are evaluated separately at each reporting date with each portfolio. The collective assessment is made for groups of assets with similar risk characteristics, in order to determine whether provision should be made due to incurred loss events for which there is objective evidence, but the effects of which are not yet evident in the individual loans assessments. The collective assessment takes account of data from the loan portfolio (such as historical losses on the portfolio, levels of arrears, credit utilization, loan to collateral ratios and expected receipts and recoveries once impaired) or economic data (such as current economic conditions, unemployment levels and local or industry-specific

problems). The approximate time when a loss is likely to have been incurred and the time it will be identified as requiring an individually assessed impairment allowance is also taken into consideration. The impairment allowance is then reviewed by credit management to ensure alignment with the Bank's overall policy.

Financial guarantees and letters of credit are assessed in a similar manner as for loans.

Derivative financial instruments

Credit risk arising from derivative financial instruments is, at any time, limited to those with positive fair values, as recorded on the statement of financial position at fair value.

With gross-settled derivatives, the Bank is also exposed to a settlement risk, being the risk that the Bank honors its obligation, but the counterparty fails to deliver the counter value.

Credit-related commitments risks

The Bank makes available to its customers guarantees that may require that the Bank makes payments on their behalf and enters into commitments to extend credit lines to secure their liquidity needs. Letters of credit and guarantees (including standby letters of credit) commit the Bank to make payments on behalf of customers in the event of a specific act, generally related to the import or export of goods. Such commitments expose the Bank to similar risks to loans and are mitigated by the same control processes and policies.

Notes to the unaudited condensed consolidated interim financial statements
(Amounts expressed in thousands of U.S. dollars, unless otherwise indicated)

18. Risk management (continued)

18.1 Credit risk (continued)

Collateral and other credit enhancements

The amount and type of collateral required depends on an assessment of the credit risk of the counterparty. Guidelines are in place covering the acceptability and valuation of each type of collateral.

The main types of collateral obtained are, as follows:

- For commercial lending, charges over real estate properties, inventory and trade receivables.

The Bank also obtains guarantees from parent companies for loans to their subsidiaries. Management monitors the market value of collateral and will request additional collateral in accordance with the underlying agreement. It is the Bank's policy to dispose of repossessed properties in an orderly fashion. The proceeds are used to reduce or repay the outstanding claim. In general, the Bank does not occupy repossessed properties for business use.

The Bank also makes use of master netting agreements with counterparties with whom a significant volume of transactions are undertaken. Such arrangements provide for single net settlement of all financial instruments covered by the agreements in the event of default on any one contract. Master netting arrangements do not normally result in an offset of balance-sheet assets and liabilities unless certain conditions for offsetting.

Although master netting arrangements may significantly reduce credit risk, it should be noted that:

Credit risk is eliminated only to the extent that amounts due to the same counterparty will be settled after the assets are realized.

The extent to which overall credit risk is reduced may change substantially within a short period because the exposure is affected by each transaction subject to the arrangement.

18.2 Liquidity risk

Liquidity refers to the Bank's ability to maintain adequate cash flows to fund operations and meet obligations and other commitments on a timely basis.

As established by the Bank's liquidity policy, the Bank's liquid assets are held in overnight deposits with the Federal Reserve Bank of New York or in the form of interbank deposits with reputable international banks that have A1, P1, or F1 ratings from two of the major internationally – recognized rating agencies and are primarily located outside of the Region. In addition, the Bank's liquidity policy allows for investing in negotiable money market instruments, including Euro certificates of deposit, commercial paper, and other liquid instruments with maturities of up to three years. These instruments must be of investment grade quality A or better, must have a liquid secondary market and be considered as such according to Basel III rules.

The Bank performs daily reviews, controls and periodic stress tests on its liquidity position, including the application of a series of limits to restrict its overall liquidity risk and to monitor the liquidity level according to the macroeconomic environment. The Bank determines the level of liquid assets to be held on a daily basis, adopting a Liquidity Coverage Ratio methodology referencing the Basel Committee guidelines. Additionally, the Liquidity Coverage Ratio is complemented with the use of the Net Stable Funding Ratio to maintain an adequate long-term funding structure. Specific limits have been established to control (1) cumulative maturity "gaps" between assets and liabilities, for each maturity classification presented in the Bank's internal liquidity reports, and (2) concentrations of deposits taken from any client or economic group maturing in one day and total maximum deposits maturing in one day.

Banco Latinoamericano de Comercio Exterior, S. A. and Subsidiaries

Notes to the unaudited condensed consolidated interim financial statements
(Amounts expressed in thousands of U.S. dollars, unless otherwise indicated)

18. Risk management (continued)**18.2 Liquidity risk (continued)**

The Bank follows a Contingent Liquidity Plan. The plan contemplates the regular monitoring of several quantified internal and external reference benchmarks (such as deposit level, Emerging Markets Bonds Index Plus, LIBOR-OIS spread and market interest rates), which in cases of high volatility would trigger implementation of a series of precautionary measures to reinforce the Bank's liquidity position. In the Bank's opinion, its liquidity position is adequate for the Bank's present requirements.

While the Bank's liabilities generally mature over somewhat shorter periods than its assets, the associated liquidity risk is diminished by the short-term nature of the loan portfolio, as the Bank is engaged primarily in the financing of foreign trade.

The following table details the Banks's assets and liabilities grouped by its remaining maturity with respect to the contractual maturity:

Description	June 30, 2017						Total

18. Risk management (continued)

18.3 Market risk

Market risk generally represents the risk that values of assets and liabilities or revenues will be adversely affected by changes in market conditions. Market risk is inherent in the financial instruments associated with many of the Bank's operations and activities, including loans, deposits, investment and financial instruments at FVTPL, short- and long-term borrowings and debt, derivatives and trading positions. This risk may result from fluctuations in different parameters: interest rates, currency exchange rates, inflation rates and changes in the implied volatility. Accordingly, depending on the instruments or activities impacted, market risks can have wide ranging, complex adverse effects on the Bank's financial condition, results of operations, cash flows and business

Interest rate risk

The Bank endeavors to manage its assets and liabilities in order to reduce the potential adverse effects on the net interest income that could be produced by interest rate changes. The Bank's interest rate risk is the exposure of earnings (current and potential) and capital to adverse changes in interest rates and is managed by attempting to match the term and repricing characteristics of the Bank's interest rate sensitive assets and liabilities. The Bank's policy with respect to interest rate risk provides that the Bank establishes limits with regards to: (1) changes in net interest income due to a potential impact, given certain movements in interest rates and (2) changes in the amount of available equity funds of the Bank, given a one basis point movement in interest rates.

The following summary table presents a sensitivity analysis of the effect on the Bank's results of operations derived from a reasonable variation in interest rates which its financial obligations are subject to, based on change in points.

	Change in interest rate	Effect on income
June 30, 2017	+200 bps	21,800
	-200 bps	(6,163)
June 30, 2016	+200 bps	17,019

Edgar Filing: FOREIGN TRADE BANK OF LATIN AMERICA, INC. - Form 6-K

	-200 bps	(1,874)
June 30, 2015	+200 bps	15,563
	-200 bps	(3,374)

This analysis is based on the prior year changes in interest rates and assesses the impact on income, with balances as of June 30, 2017 and December 31, 2016. This sensitivity provides an idea of the changes in interest rates, taking as example the volatility of the interest rate of the previous year.

Notes to the unaudited condensed consolidated interim financial statements

*(Amounts expressed in thousands of U.S. dollars, unless otherwise indicated)***18. Risk management (continued)****18.3 Market risk (continued)****Currency risk**

Currency risk is the risk that the value of a financial instrument will fluctuate because of changes in exchange rates of foreign currencies, and other financial variables, as well as the reaction of market participants to political and economic events. For purposes of accounting standards this risk does not come from financial instruments that are not monetary items, or for financial instruments denominated in the functional currency. Exposure to currency risk is low since the Bank's has maximum exposure limits established by the Board.

Most of the Bank's assets and most of its liabilities are denominated in US American Dollars and hence the Bank does not incur a significant currency exchange risk. The currency exchange rate risk is mitigated by the use of derivatives, which, although perfectly covered economically, may generate a certain accounting volatility.

The following table details the maximum to foreign currency, where all assets and liabilities are presented based on their book value, except for derivatives, which are included within other assets and other liabilities based on its value nominal.

18.4 Operational Risk

Operational risk is the risk of loss arising from systems failure, human error, fraud or external events. When controls fail to operate effectively, operational risks can cause damage to reputation, have legal or regulatory implications, or lead to financial loss. Bladex, like all financial institutions, is exposed to operational risks, including the risk of fraud by employees and outsiders, failure to obtain proper internal authorizations, failure to properly document transactions, equipment failures, and errors by employees, and any failure, interruption or breach in the security or operation of the Bank's information technology systems could result in interruptions in such activities. Operational problems or errors may occur, and their occurrence may have a material adverse impact on the Bank's business, financial condition, results of operations and cash flows. The Bank cannot expect to eliminate all operational risks, but it endeavors to manage these risks through a control framework and by monitoring and responding to potential risks. Controls include effective segregation of duties, access, authorization and reconciliation procedures, staff education and assessment processes, such as the use of internal audit.

*(Amounts expressed in thousands of U.S. dollars, unless otherwise indicated)***18. Risk management (continued)****18.4 Operational Risk (continued)****Capital management**

The primary objectives of the Bank's capital management policy are to ensure that the Bank complies with externally imposed capital requirements and maintains strong credit ratings and healthy capital ratios in order to support its business and to maximize shareholder value.

The Bank manages its capital structure and makes adjustments to it according to changes in economic conditions and the risk characteristics of its activities. In order to maintain or adjust the capital structure, the Bank may adjust the amount of dividend payment to shareholders, return capital to shareholders or issue capital securities. No changes have been made to the objectives, policies and processes from the previous years. However, they are under constant review by the Board.
