***SOUTHERN FIRST BANCSHARES, INC. AND SUBSIDIARY
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS***

NOTE 1 Nature of Business and Basis of Presentation

Business Activity

Southern First Bancshares, Inc. (the Company) is a South Carolina corporation that owns all of the capital stock of Southern First Bank (the Bank) and all of the stock of Greenville First Statutory Trust I and II (collectively, the Trusts). The Trusts are special purpose non-consolidated entities organized for the sole purpose of issuing trust preferred securities. The Bank's primary federal regulator is the Federal Deposit Insurance Corporation (the FDIC). The Bank is also regulated and examined by the South Carolina Board of Financial Institutions. The Bank is primarily engaged in the business of accepting demand deposits and savings deposits insured by the FDIC, and providing commercial, consumer and mortgage loans to the general public.

Basis of Presentation

The accompanying consolidated financial statements have been prepared in accordance with generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and six month periods ended June 30, 2014 are not necessarily indicative of the results that may be expected for the year ending December 31, 2014. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2013 as filed with the Securities and Exchange Commission on March 4, 2014. The consolidated financial statements include the accounts of the Company and the Bank. In accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 810, Consolidation, the financial statements related to the Trusts have not been consolidated.

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the consolidated financial statements and the reported amount of income and expenses during the reporting periods. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, real estate acquired in the settlement of loans, fair value of financial instruments, evaluating other-than-temporary-impairment of investment securities and valuation of deferred tax assets.

Reclassifications

Certain amounts, previously reported, have been reclassified to state all periods on a comparable basis and had no effect on shareholders' equity or net income.

Subsequent Events

Subsequent events are events or transactions that occur after the balance sheet date but before financial statements are issued. Recognized subsequent events are events or transactions that provide additional evidence about conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing financial statements. Non-recognized subsequent events are events that provide evidence about conditions that did not exist at the date of the balance sheet but arose after that date. Management performed an evaluation to determine whether there have been any subsequent events since the balance sheet date and determined that no subsequent events occurred requiring accrual or disclosure.

Recently Adopted Accounting Pronouncements

The following is a summary of recently adopted authoritative pronouncements that have impacted the accounting,

reporting, and/or disclosure of financial information by the Company.

In April 2013, the FASB issued guidance addressing application of the liquidation basis of accounting. The guidance is intended to clarify when an entity should apply the liquidation basis of accounting. In addition, the guidance provides principles for the recognition and measurement of assets and liabilities and requirements for financial statements prepared using the liquidation basis of accounting. The amendments went into effect for entities that determine liquidation is imminent during annual reporting periods beginning after December 15, 2013, and interim reporting periods therein and those requirements should be applied prospectively from the day that liquidation becomes imminent. Early adoption is permitted. The amendments did not have a material effect on the Company's financial statements.

The Comprehensive Income topic of the ASC was amended in June 2011. The amendment eliminated the option to present other comprehensive income as a part of the statement of changes in stockholders' equity and required consecutive presentation of the statement of net income and other comprehensive income. The amendments were applicable to the Company January 1, 2012 and have been applied retrospectively. In December 2011, the topic was further amended to defer the effective date of presenting reclassification adjustments from other comprehensive income to net income on the face of the financial statements while the FASB redeliberated the presentation requirements for the reclassification adjustments. In February 2013, the FASB further amended the Comprehensive Income topic clarifying the conclusions from such redeliberations. Specifically, the amendments do not change the current requirements for reporting net income or other comprehensive income in financial statements. However, the amendments do require an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component. In addition, in certain circumstances an entity is required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income. The amendments were effective for the Company on a prospective basis for reporting periods beginning after December 15, 2013. These amendments did not have a material effect on the Company's financial statements.

NOTE 2 Preferred and Common Stock

On February 27, 2009, as part of the Capital Purchase Program (CPP), the Company entered into a Securities Purchase Agreement with the U.S. Department of the Treasury (the Treasury), pursuant to which the Company sold 17,299 shares of its Fixed Rate Cumulative Perpetual Preferred Stock, Series T (the Series T Preferred Stock) and a warrant to purchase 399,970.34 shares of the Company's common stock (the Warrant) for an aggregate purchase price of \$17.3 million in cash. The Series T Preferred Stock qualifies as Tier 1 capital and is entitled to cumulative dividends at a rate of 5% per annum for the first five years, which increased to a rate of 9% per annum on May 15, 2014. The Warrant had a 10-year term and was immediately exercisable upon its issuance, with an exercise price, subject to anti-dilution adjustments equal to \$6.487 per share of the common stock.

On June 28, 2012, the Treasury sold its Series T Preferred Stock through a public offering structured as a modified Dutch auction. The Company bid on a portion of the Series T Preferred Stock in the auction after receiving approval from its regulators to do so. The clearing price per share for the preferred shares was \$904 (compared to a par value

of \$1,000 per share), and the Company was successful in repurchasing 1,000 shares of the 17,299 shares of Series T Preferred Stock outstanding through the auction process. The remaining 16,299 shares of Series T Preferred Stock held by the Treasury were sold to unrelated third-parties through the auction process. Included in the September 30, 2012 operating results are approximately \$130,000 of costs incurred by the Company related to the offering. These costs are not tax-deductible. The net balance sheet impact was a reduction to shareholders' equity of \$904,000 which is comprised of a decrease in Series T Preferred Stock of \$1.0 million and a \$96,000 increase to retained earnings related to the discount on the shares repurchased.

In addition, on July 25, 2012, the Company completed its repurchase of the Warrant from the Treasury for a mutually agreed upon price of \$1.1 million. The difference between the fair value of the Warrant, as originally

9

recorded, and the \$1.1 million repurchase price was \$343,000 which resulted in a decrease to additional paid in capital. The Company also recorded the remaining accretion of \$180,000 on the Series T Preferred Stock which brought the Series T Preferred Stock to its par value. Following the settlement of the Warrant on July 25, 2012, the Treasury has completely eliminated its equity stake in the Company through the Capital Purchase Program.

On January 3, 2013 and April 1, 2013, the Company redeemed a total of \$1.0 million of its outstanding Series T Preferred Stock from three of its preferred shareholders.

On January 27, 2014, the Company issued a total of 475,000 shares of its common stock at \$13.00 per share in a private placement offering. Immediately following the consummation of the Private Placement, the Company redeemed 4,057 shares of the Series T Preferred Stock at a redemption price of \$1,000 per share, or par, using the proceeds from the private placement. The redemption of the 4,057 shares of Series T Preferred Stock will reduce the Company's annual preferred dividend expenses by approximately \$200,000.

Since July of 2012, the Company has redeemed shares of its outstanding Series T Preferred Stock with a cumulative par value of \$6,057,000, thus reducing the balance to shares with a par value of \$11,242,000. The Company will continue to explore options and opportunities to repurchase the remaining Series T Preferred Stock outstanding.

NOTE 3 Investment Securities

At June 30, 2014, the Company had two individual investments with a fair market value of \$762 thousand that were in an unrealized loss position for less than 12 months and 15 individual investments with a fair market value of \$25.0 million that were in an unrealized loss position for 12 months or longer. The unrealized losses were primarily attributable to changes in interest rates, rather than deterioration in credit quality. The individual securities are each investment grade securities. The Company considers the length of time and extent to which the fair value of available-for-sale debt securities have been less than cost to conclude that such securities are not other-than-temporarily impaired. We also consider other factors such as the financial condition of the issuer including credit ratings and specific events affecting the operations of the issuer, volatility of the security,

underlying assets that collateralize the debt security, and other industry and macroeconomic conditions. As the Company has no intent to sell securities with unrealized losses and it is not more-likely-than-not that the Company will be required to sell these securities before recovery of amortized cost, we have concluded that the securities are not impaired on an other-than-temporary basis.

During the second quarter of 2014, we developed a need for additional liquidity as we experienced increased loan demand and, as a result, sold \$10.4 million of our mortgage-backed securities and state and municipal obligations and recorded a net gain on sale of investment securities of \$230,000.

Other investments are comprised of the following and are recorded at cost which approximates fair value.

(dollars in thousands)	June 30, 2014	December 31, 2013
Federal Home Loan Bank stock	\$ 5,458	5,614
Certificates of deposit with other banks	99	99
Investment in Trust Preferred securities	403	403
Total other investments	\$ 5,960	6,116

The Company has evaluated the Federal Home Loan Bank (FHLB) stock for impairment and determined that the investment in the FHLB stock is not other than temporarily impaired as of June 30, 2014 and ultimate recoverability of the par value of this investment is probable. All of the FHLB stock is used to collateralize advances with the FHLB.

At June 30, 2014 \$21.7 million of securities were pledged as collateral for repurchase agreements from brokers, and approximately \$5.1 million of securities were pledged to secure client deposits. At December 31, 2013, \$22.0 million of securities were pledged as collateral for repurchase agreements from brokers, and approximately \$25.0 million of securities were pledged to secure client deposits.

NOTE 4 Loans and Allowance for Loan Losses

The following table summarizes the composition of our loan portfolio. Total gross loans are recorded net of deferred loan fees and costs, which totaled \$1.7 million and \$1.3 million as of June 30, 2014 and December 31, 2013, respectively.

(dollars in thousands)	June 30, 2014		December 31, 2013

Maturities and Sensitivity of Loans to Changes in Interest Rates

The information in the following tables summarizes the loan maturity distribution by type and related interest rate characteristics based on the contractual maturities of individual loans, including loans which may be subject to renewal at their contractual maturity. Renewal of such loans is subject to review and credit approval, as well as modification of terms upon maturity. Actual repayments of loans may differ from the maturities reflected below, because borrowers have the right to prepay obligations with or without prepayment penalties.

Commercial

Commercial loans are assessed for estimated losses by grading each loan using various risk factors identified through periodic reviews. We apply historic grade-specific loss factors to each class of loan. In the development of our statistically derived loan grade loss factors, we observe historical losses over 12 quarters for each loan grade. These loss estimates are adjusted as appropriate based on additional analysis of external loss data or other risks identified from current economic conditions and credit quality trends. The allowance also includes an amount for the estimated impairment on nonaccrual commercial loans and commercial loans modified in a troubled debt restructuring (TDR), whether on accrual or nonaccrual status.

Consumer

For consumer loans, we determine the allowance on a collective basis utilizing historical losses over 12 quarters to represent our best estimate of inherent loss. We pool loans, generally by loan class with similar risk characteristics. The allowance also includes an amount for the estimated impairment on nonaccrual consumer loans and consumer loans modified in a TDR, whether on accrual or nonaccrual status.

Credit Quality Indicators

Commercial

We manage a consistent process for assessing commercial loan credit quality by monitoring our loan grading trends and past due statistics. All loans are subject to individual risk assessment. Our risk categories include Pass, Special Mention, Substandard, and Doubtful, each of which is defined by banking regulatory agencies. Delinquency statistics are also an important indicator of credit quality in the establishment of our allowance for credit losses.

We categorize our loans into risk categories based on relevant information about the ability of the borrower to service their debt such as current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. A description of the general characteristics of the risk grades is as follows:

.
Pass These loans range from minimal credit risk to average however still acceptable credit risk.
.

Special mention A special mention loan has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or the

institution's credit position at some future date.

Substandard A substandard loan is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified must have a well-defined weakness, or weaknesses, that may jeopardize the liquidation of the debt. A substandard loan is characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected.

Doubtful A doubtful loan has all of the weaknesses inherent in one classified as substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of the currently existing facts, conditions and values, highly questionable and improbable.

The tables below provide a breakdown of outstanding commercial loans by risk category.

	\$110,590	78,479	19,888	12,961	221,918

As of June 30, 2014 and December 31, 2013, consumer loans 30 days or more past due were 0.23% and 0.28%, respectively, of total loans.

Nonperforming assets

The following table shows the nonperforming assets and the related percentage of nonperforming assets to total assets and gross loans. Generally, a loan is placed on nonaccrual status when it becomes 90 days past due as to principal or interest, or when we believe, after considering economic and business conditions and collection efforts, that the borrower's financial condition is such that collection of the contractual principal or interest on the loan is doubtful. A payment of interest on a loan that is classified as nonaccrual is recognized as a reduction in principal when received.

Following is a summary of our nonperforming assets, including nonaccruing TDRs.

(dollars in thousands)	June 30, 2014	December 31, 2013

Impaired Loans

The table below summarizes key information for impaired loans. Our impaired loans include loans on nonaccrual status and loans modified in a TDR, whether on accrual or nonaccrual status. These impaired loans may have estimated impairment which is included in the allowance for loan losses. Our commercial and consumer impaired loans are evaluated individually to determine the related allowance for loan losses.

Allowance for Loan Losses

The allowance for loan loss is management's estimate of credit losses inherent in the loan portfolio. The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance. The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectability of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

We have an established process to determine the adequacy of the allowance for loan losses that assesses the losses inherent in our portfolio. While we attribute portions of the allowance to specific portfolio segments, the entire allowance is available to absorb credit losses inherent in the total loan portfolio. Our process involves procedures to appropriately consider the unique risk characteristics of our commercial and consumer loan portfolio segments. For each portfolio segment, impairment is measured individually for each impaired loan. Our allowance levels are influenced by loan volume, loan grade or delinquency status, historic loss experience and other economic conditions.

The following table summarizes the activity related to our allowance for loan losses by commercial and consumer portfolio segments:

(dollars in thousands)	Six months ended June 30, 2014

NOTE 5 Troubled Debt Restructurings

The Company considers a loan to be a TDR when the debtor experiences financial difficulties and the Company grants a concession to the debtor that it would not normally consider. Concessions can relate to the contractual interest rate, maturity date, or payment structure of the note. As part of our workout plan for individual loan relationships, we may restructure loan terms to assist borrowers facing financial challenges in the current economic environment. At June 30, 2014, we had 38 loans totaling \$12.4 million and at December 31, 2013 we had 34 loans totaling \$13.0 million, which we considered as TDRs. To date, we have restored four commercial loans previously classified as TDRs to accrual status.

The following table summarizes the concession at the time of modification and the recorded investment in our TDRs before and after their modification during the six months ended June 30, 2014 and 2013, respectively.

NOTE 6 Fair Value Accounting

FASB ASC 820, Fair Value Measurement and Disclosures, defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market

21

for the asset or liability in an orderly transaction between market participants on the measurement date. FASB ASC 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1 Quoted market price in active markets

Quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include certain debt and equity securities that are traded in an active exchange market.

Level 2 Significant other observable inputs

Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include fixed income securities and mortgage-backed securities that are held in the Company's available-for-sale portfolio and valued by a third-party pricing service, as well as certain impaired loans.

Level 3 Significant unobservable inputs

Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. These methodologies may result in a significant portion of the fair value being derived from unobservable data.

Following is a description of valuation methodologies used for assets recorded at fair value.

Investment Securities

Securities available for sale are valued on a recurring basis at quoted market prices where available. If quoted market prices are not available, fair values are based on quoted market prices of comparable securities. Level 1 securities include those traded on an active exchange, such as the New York Stock Exchange or U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets and money market funds. Level 2 securities include mortgage-backed securities and debentures issued by government sponsored entities, municipal bonds and corporate debt securities. In certain cases where there is limited activity or less transparency around inputs to valuations, securities are classified as Level 3 within the valuation hierarchy. Securities held to maturity are valued at quoted market prices or dealer quotes similar to securities available for sale. The carrying value of Other Investments, such as Federal Reserve Bank and FHLB stock, approximates fair value based on their redemption provisions.

Loans Held for Sale

Loans held for sale include mortgage loans and are carried at the lower of cost or market value. The fair values of mortgage loans held for sale are based on commitments on hand from investors within the secondary market for loans with similar characteristics.

Loans

The Company does not record loans at fair value on a recurring basis. However, from time to time, a loan may be considered impaired and an allowance for loan losses may be established. Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, management measures the impairment in accordance with FASB ASC 310, Receivables. The fair value of impaired loans is estimated using one of several methods, including collateral value, market value of similar debt, enterprise value, liquidation value, and discounted cash flows. Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans. At June 30, 2014, substantially all of the impaired loans were evaluated based on the fair value of the collateral. In accordance with FASB ASC 820, Fair Value Measurement and Disclosures, impaired loans where an allowance is established

based on the fair value of collateral require classification in the fair value hierarchy. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company considers the impaired loan as nonrecurring Level 2. The Company's current loan and appraisal policies require the Bank to obtain updated appraisals on an as is basis at renewal, or in the case of an impaired loan, on an annual basis, either through a new external appraisal or an appraisal evaluation. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company considers the impaired loan as nonrecurring Level 3. The fair value of impaired loans may also be estimated using the present value of expected future cash flows to be realized on the loan, which is also considered a Level 3 valuation. These fair value estimates are subject to fluctuations in assumptions about the amount and timing of expected cash flows as well as the choice of discount rate used in the present value calculation.

Other Real Estate Owned (OREO)

OREO, consisting of properties obtained through foreclosure or in satisfaction of loans, is reported at the lower of cost or fair value, determined on the basis of current appraisals, comparable sales, and other estimates of value obtained principally from independent sources, adjusted for estimated selling costs (Level 2). At the time of foreclosure, any excess of the loan balance over the fair value of the real estate held as collateral is treated as a charge against the allowance for loan losses. Gains or losses on sale and generally any subsequent adjustments to the value are recorded as a component of real estate owned activity. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company considers the OREO as nonrecurring Level 3.

Assets and Liabilities Recorded at Fair Value on a Recurring Basis

The tables below present the recorded amount of assets and liabilities measured at fair value on a recurring basis as of June 30, 2014 and December 31, 2013.

(dollars in thousands)	June 30, 2014			
	Level 1	Level 2	Level 3	Total
Assets

Mortgage-backed securities	-	31,044	-	31,044
Total assets measured at fair value on a recurring basis	\$ -	67,440	-	67,440

The Company has no liabilities carried at fair value or measured at fair value on a recurring basis as of June 30, 2014 and December 31, 2013.

Assets and Liabilities Recorded at Fair Value on a Nonrecurring Basis

The Company is predominantly an asset based lender with real estate serving as collateral on more than 80% of loans as of June 30, 2014. Loans which are deemed to be impaired are valued net of the allowance for loan losses, and other real estate owned is valued at the lower of cost or net realizable value of the underlying real estate collateral. Such market values are generally obtained using independent appraisals, which the Company considers to be level 2 inputs. The tables below present the recorded amount of assets and liabilities measured at fair value on a nonrecurring basis as of June 30, 2014 and December 31, 2013.

			As of June 30, 2014	
(dollars in thousands)	Level 1	Level 2	Level 3	Total
Assets				
Impaired loans	\$ -	11,850	1,130	12,980
Other real estate owned	-	1,164	113	1,277

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

Total assets measured at fair value on a nonrecurring basis \$ - 13,014 1,243 14,257

	As of December 31, 2013			
	Level 1	Level 2	Level 3	Total
Assets				
Impaired loans	\$ -	10,495	1,158	11,653
Other real estate owned	-	1,085	113	1,198
Total assets measured at fair value on a nonrecurring basis	\$ -	11,580	1,271	12,851

The Company has no liabilities carried at fair value or measured at fair value on a nonrecurring basis as of June 30, 2014 and December 31, 2013.

For Level 3 assets and liabilities measured at fair value on a recurring or non-recurring basis as of June 30, 2014, the significant unobservable inputs used in the fair value measurements were as follows:

	Valuation Technique	Significant Unobservable Inputs
Impaired loans	Appraised Value/ Discounted Cash Flows	Discounts to appraisals or cash flows for estimated holding and/or selling costs
Other real estate owned	Appraised Value/ Comparable Sales	Discounts to appraisals for estimated holding or selling costs

Fair Value of Financial Instruments

Financial instruments require disclosure of fair value information, whether or not recognized in the consolidated balance sheets, when it is practical to estimate the fair value. A financial instrument is defined as cash, evidence of an ownership interest in an entity or a contractual obligation which requires the exchange of cash. Certain items are specifically excluded from the disclosure requirements, including the Company's common stock, premises and equipment and other assets and liabilities.

The following is a description of valuation methodologies used to estimate fair value for certain other financial instruments.

Fair value approximates carrying value for the following financial instruments due to the short-term nature of the instrument: cash and due from banks, federal funds sold, federal funds purchased, and securities sold under agreement to repurchase.

Deposits Fair value for demand deposit accounts and interest-bearing accounts with no fixed maturity date is equal to the carrying value. The fair value of certificate of deposit accounts are estimated by discounting cash flows from expected maturities using current interest rates on similar instruments.

24

FHLB Advances and Other Borrowings Fair value for FHLB advances and other borrowings are estimated by discounting cash flows from expected maturities using current interest rates on similar instruments.

Junior subordinated debentures Fair value for junior subordinated debentures are estimated by discounting cash flows from expected maturities using current interest rates on similar instruments.

The Company has used management's best estimate of fair value based on the above assumptions. Thus, the fair values presented may not be the amounts that could be realized in an immediate sale or settlement of the instrument. In addition, any income taxes or other expenses, which would be incurred in an actual sale or settlement, are not taken into consideration in the fair value presented.

The estimated fair values of the Company's financial instruments at June 30, 2014 and December 31, 2013 are as follows:

			June 30, 2014		
(dollars in thousands)	Carrying Amount	Fair Value	Level 1	Level 2	Level 3

NOTE 7 Earnings Per Common Share

The following schedule reconciles the numerators and denominators of the basic and diluted earnings per share computations for the three and six month periods ended June 30, 2014 and 2013. Dilutive common shares arise from the potentially dilutive effect of the Company's stock options that were outstanding at June 30, 2014. The assumed conversion of stock options can create a difference between basic and dilutive net income per common share. At June 30, 2014 and 2013, 114,124 and 47,193 options, respectively, were anti-dilutive in the calculation of earnings per share as their exercise price exceeded the fair market value.

	Three months ended June 30,		Six months ended June 30,

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion reviews our results of operations for the three and six month periods ended June 30, 2014 as compared to the three and six month periods ended June 30, 2013 and assesses our financial condition as of June 30, 2014 as compared to December 31, 2013. You should read the following discussion and analysis in conjunction with the accompanying consolidated financial statements and the related notes and the consolidated financial statements and the related notes for the year ended December 31, 2013 included in our Annual Report on Form 10-K for that period. Results for the three and six month periods ended June 30, 2014 are not necessarily indicative of the results for the year ending December 31, 2014 or any future period.

CAUTIONARY WARNING REGARDING FORWARD-LOOKING STATEMENTS

This report, including information included or incorporated by reference in this report, contains statements which constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements may relate to our financial condition, results of operation, plans, objectives, or future performance. These statements are based on many assumptions and estimates and are not guarantees of future performance. Our actual results may differ materially from those anticipated in any forward-looking statements, as they will depend on many factors about which we are unsure, including many factors which are beyond our control. The words may, would, could, should, will, expect, anticipate, pre potential, believe, continue, assume, intend, plan, and estimate, as well as similar expressions, are meant to identify such forward-looking statements. Potential risks and uncertainties that could cause our actual results to differ from those anticipated in any forward-looking statements include, but are not limited to, those described under Item 1A-Risk Factors of our Annual Report on Form 10-K for the year ended December 31, 2013, as well as the following:

credit losses as a result of declining real estate values, increasing interest rates, increasing unemployment, changes in payment behavior or other factors;

.
credit losses due to loan concentration;

.
changes in the amount of our loan portfolio collateralized by real estate and weaknesses in the real estate market;

.
restrictions or conditions imposed by our regulators on our operations;

.
increases in competitive pressure in the banking and financial services industries;

.
changes in the interest rate environment which could reduce anticipated or actual margins;

26

.
our expectations regarding our operating revenues, expenses, effective tax rates and other results of operations;

.
changes in political conditions or the legislative or regulatory environment, including governmental initiatives affecting the financial services industry;

.
changes in economic conditions resulting in, among other things, a deterioration in credit quality;

.
changes occurring in business conditions and inflation;

.
changes in access to funding or increased regulatory requirements with regard to funding;

.
increased cybersecurity risk, including potential business disruptions or financial losses;

changes in deposit flows;

.

changes in technology;

.

our current and future products, services, applications and functionality and plans to promote them;

.

the adequacy of the level of our allowance for loan losses and the amount of loan loss provisions required in future periods;

.

examinations by our regulatory authorities, including the possibility that the regulatory authorities may, among other things, require us to increase our allowance for loan losses or write-down assets;

.

changes in monetary and tax policies;

.

changes in accounting policies and practices;

.

the rate of delinquencies and amounts of loans charged-off;

.

the rate of loan growth in recent years and the lack of seasoning of a portion of our loan portfolio;

.

our ability to maintain appropriate levels of capital and to comply with our capital ratio requirements, including the potential that the regulatory agencies may require higher levels of capital above the current standard regulatory-mandated minimums and the impact of the capital rules under Basel III;

.

our ability to attract and retain key personnel;

.

loss of consumer confidence and economic disruptions resulting from terrorist activities or other military actions;

.

our ability to retain our existing clients, including our deposit relationships;

.

adverse changes in asset quality and resulting credit risk-related losses and expenses; and

.

other risks and uncertainties detailed from time to time in our filings with the Securities and Exchange Commission (the "SEC").

If any of these risks or uncertainties materialize, or if any of the assumptions underlying such forward-looking statements proves to be incorrect, our results could differ materially from those expressed in, implied or projected by, such forward-looking statements. For information with respect to factors that could cause actual results to differ from the expectations stated in the forward-looking statements, see "Risk Factors" under Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2013. We urge investors to consider all of these factors carefully in evaluating the forward-looking statements contained in this Quarterly Report on Form 10-Q. We make these forward-looking statements as of the date of this document and we do not intend, and assume no obligation, to update the forward-looking statements or to update the reasons why actual results could differ from those expressed in, or implied or projected by, the forward-looking statements.

OVERVIEW

We are a bank holding company headquartered in Greenville, South Carolina, and were incorporated in March 1999 under the laws of South Carolina. We provide a wide range of banking services and products to our clients through our wholly-owned subsidiary, Southern First Bank, a South Carolina state bank.

27

The Bank is primarily engaged in the business of accepting demand deposits and savings deposits insured by the FDIC, and providing commercial, consumer and mortgage loans to the general public. We currently have eight offices located in Greenville, Lexington, Richland, and Charleston Counties of South Carolina. During the second quarter of 2013, we purchased a piece of property for a future full-service office in Mount Pleasant, South Carolina. This office will be our second office in the Charleston, South Carolina market, which is expected to open in August 2014.

Our business model continues to be client-focused, utilizing relationship teams to provide our clients with a specific banker contact and support team responsible for all of their banking needs. The purpose of this structure is to provide a consistent and superior level of professional service, and we believe it provides us with a distinct competitive advantage. We consider exceptional client service to be a critical part of our culture, which we refer to as ClientFIRST.

At June 30, 2014, we had total assets of \$967.1 million, an 8.6% increase from total assets of \$890.8 million at December 31, 2013. The largest components of our total assets are net loans and securities which were \$801.7 million and \$64.7 million, respectively, at June 30, 2014. Comparatively, our net loans and securities totaled \$723.4 million and \$73.6 million, respectively, at December 31, 2013. Our liabilities and shareholders equity at June 30, 2014 totaled \$895.2 million and \$71.9 million, respectively, compared to liabilities of \$825.2 million and shareholders equity of \$65.7 million at December 31, 2013. The principal component of our liabilities is deposits which were \$747.4 million and \$680.3 million at June 30, 2014 and December 31, 2013, respectively.

Like most community banks, we derive the majority of our income from interest received on our loans and investments. Our primary source of funds for making these loans and investments is our deposits, on which we pay interest. Consequently, one of the key measures of our success is our amount of net interest income, or the difference between the income on our interest-earning assets, such as loans and investments, and the expense on our interest-bearing liabilities, such as deposits and borrowings. Another key measure is the spread between the yield we earn on these interest-earning assets and the rate we pay on our interest-bearing liabilities, which is called our net interest spread. In addition to earning interest on our loans and investments, we earn income through fees and other charges to our clients.

Our net income was \$1.6 million and \$1.3 million for the three months ended June 30, 2014 and 2013, respectively, an increase of \$266,000, or 20.5%. After our dividend payment to our preferred shareholders, net income to common shareholders was \$1.3 million, or diluted earnings per share (EPS) of \$0.26, for the second quarter of 2014 as compared to net income to common shareholders of \$1.1 million, or diluted EPS of \$0.25 for the same period in 2013. The increase in net income resulted primarily from increases in net interest income and noninterest income, partially offset by an increase in noninterest expense.

Our net income was \$2.8 million and \$2.3 million for the six months ended June 30, 2014 and 2013, respectively, an increase of \$554,000, or 24.5%. After our dividend payment to our preferred shareholders, net income to common shareholders was \$2.4 million, or diluted EPS of \$0.48, for the six months ended June 30, 2014 as compared to net income to common shareholders of \$1.9 million, or diluted EPS of \$0.43 for the same period in 2013.

Economic conditions, competition, and the monetary and fiscal policies of the Federal government significantly affect most financial institutions, including the Bank. Lending and deposit activities and fee income generation are influenced by levels of business spending and investment, consumer income, consumer spending and savings, capital market activities, and competition among financial institutions, as well as customer preferences, interest rate conditions and prevailing market rates on competing products in our market areas.

Effect of Economic Trends

Markets in the United States and elsewhere have experienced extreme volatility and disruption since the latter half of 2007. While the economy as a whole has steadily improved since 2009, the weaker economic conditions are expected to continue throughout 2014. Financial institutions likely will continue to experience credit losses

above historical levels and elevated levels of non-performing assets, charge-offs and foreclosures. In light of these conditions, financial institutions also face heightened levels of scrutiny from federal and state regulators. These factors negatively influenced, and likely will continue to negatively influence, earning asset yields at a time when the market for deposits is intensely competitive. As a result, financial institutions experienced, and may continue to experience, pressure on credit costs, loan yields, deposit and other borrowing costs, liquidity, and capital.

RESULTS OF OPERATIONS

Net Interest Income and Margin

Our level of net interest income is determined by the level of earning assets and the management of our net interest margin. For the three month period ended June 30, 2014 our net interest income was \$8.1 million, a 13.2% increase over net interest income of \$7.1 million for the same period in 2013. In comparison, our average earning assets increased 14.1%, or \$110.2 million, during the second quarter of 2014 compared to the second quarter of 2013, while our interest bearing liabilities increased by \$73.1 million during the same period. The increase in average earning assets is primarily related to an increase in average loans, partially offset by a decrease in investment securities and federal funds sold, while the increase in average interest-bearing liabilities is primarily a result of an increase in interest bearing deposits, offset in part by a decrease in FHLB advances and other borrowings.

We have included a number of tables to assist in our description of various measures of our financial performance. For example, the *Average Balances, Income and Expenses, Yields and Rates* table reflects the average balance of each category of our assets and liabilities as well as the yield we earned or the rate we paid with respect to each category during the three and six month periods ended June 30, 2014 and 2013. A review of this table shows that our loans typically provide higher interest yields than do other types of interest-earning assets, which is why we direct a substantial percentage of our earning assets into our loan portfolio. Similarly, the *Rate/Volume Analysis* table demonstrates the effect of changing interest rates and changing volume of assets and liabilities on our financial condition during the periods shown. We also track the sensitivity of our various categories of assets and liabilities to changes in interest rates, and we have included tables to illustrate our interest rate sensitivity with respect to interest-earning accounts and interest-bearing accounts.

The following tables set forth information related to our average balance sheets, average yields on assets, and average costs of liabilities. We derived these yields by dividing income or expense by the average balance of the corresponding assets or liabilities. We derived average balances from the daily balances throughout the periods indicated. During the same periods, we had no securities purchased with agreements to resell. All investments owned have an original maturity of over one year. Nonaccrual loans are included in the following tables. Loan yields have been reduced to reflect the negative impact on our earnings of loans on nonaccrual status. The net of capitalized loan costs and fees are amortized into interest income on loans.

adjustment

(2)

Net interest income	\$8,070	\$7,130
---------------------------	---------	---------

(1)

Annualized for the three month period.

(2)

The tax-equivalent adjustment to net interest income adjusts the yield for assets earning tax-exempt income to a comparable yield on a taxable basis.

Our net interest margin, on a tax-equivalent basis, was 3.66% for the three months ended June 30, 2014 compared to 3.70% for the second quarter of 2013. The decrease in net interest margin as compared to the same period in 2013, was driven primarily by an 18 basis point reduction in the yield of our interest-earning assets, offset in part by a 14 basis point reduction in the cost of our interest-bearing liabilities.

Our interest-earning assets increased by \$110.2 million during the second quarter of 2014 as compared to the same quarter in 2013, while the yield on these assets decreased by 18 basis points. The decline in yield on our interest earning assets was driven primarily by reduced yields on our loan portfolio due to loans being originated or renewed at market rates which are lower than those in the past. Our average loan balances increased by \$124.5 million as of the second quarter of 2014, compared to the same period in 2013, while our loan yield decreased by 36 basis points during the same period.

While our interest-bearing liabilities increased by \$73.1 million during the second quarter of 2014 as compared to the second quarter of 2013, our interest expense decreased by \$62,000 due to a 14 basis point decline in the rate paid on these liabilities. During the past 12 months, we have continued to reduce rates on all of our deposit products as the Federal funds target rate has remained at a historical low. Consequently, the cost of our interest bearing deposits decreased 9 basis points from the second quarter of 2013. However, we do not anticipate this trend to continue for our deposit rates. As these rates are currently at historically low rates, we do not anticipate further significant reductions in the rates on our deposits or FHLB advances and other borrowings in the future.

Our net interest spread was 3.50% for the three months ended June 30, 2014 compared to 3.54% for the same period in 2013. The net interest spread is the difference between the yield we earn on our interest-earning assets and the rate we pay on our interest-bearing liabilities. The 18 basis point reduction in yield on our earning assets, partially offset by a 14 basis point decline in rate on our interest-bearing liabilities, resulted in a 4 basis point decrease in our net interest spread for the 2014 period.

Net interest income	\$15,714			\$14,008		

(1)

Annualized for the six month period.

(2)

The tax-equivalent adjustment to net interest income adjusts the yield for assets earning tax-exempt income to a comparable yield on a taxable basis.

Our net interest margin, on a tax-equivalent basis, was 3.67% for the six months ended June 30, 2014 compared to 3.70% for the six months ended June 30, 2013. The three basis point decrease in net interest margin during the six months ended June 30, 2014 was driven primarily by a 19 basis point reduction in the yield on our interest-earning assets, partially offset by 17 basis point reduction in the cost of our interest bearing liabilities compared to the same period in 2013.

During the first six months of 2014, our average interest-earning assets increased by \$98.8 million as compared to the same period in 2013; however, the yield on our interest-earning assets declined by 19 basis points during 2014. The increase in interest-earning assets was driven by a \$110.8 million increase in average loans, partially offset by a \$9.9 million decrease in average investment securities, while the decline in yield on interest earning assets was driven primarily by reduced yields on our loan portfolio.

In addition, our average interest-bearing liabilities increased by \$72.1 million during the six month period ended June 30, 2014 as compared to the same period in 2013, while the cost of our interest-bearing liabilities declined by 17 basis points.

Our net interest spread was 3.52% for the six months ended June 30, 2014 compared to 3.53% for the same period in 2013. The 19 basis point reduction in yield on our earning assets, partially offset by a 17 basis point decline in rate on our interest-bearing liabilities, resulted in a slight decrease in our net interest spread for the 2014 period.

Rate/Volume Analysis

Net interest income can be analyzed in terms of the impact of changing interest rates and changing volume. The following table sets forth the effect which the varying levels of interest-earning assets and interest-bearing liabilities and the applicable rates have had on changes in net interest income for the periods presented.

(dollars in thousands)	Increase (Decrease) Due to				Increase (Decrease) Due to			
	Volume	Rate	Rate/ Volume	Total	Volume	Rate	Rate/ Volume	Total
Interest income								
Loans	\$1,553	(601)	(111)	841	830	(349)	(36)	445
Investment securities	(45)	94	(10)	39	22	(82)	(4)	(64)
Federal funds sold	(3)	1	-	(2)	(2)	(1)	-	(3)
Total interest income	1,505	(506)	(121)	878	850	(432)	(40)	378
Interest expense								
Deposits	243	(230)	(41)	(28)	103	(377)	(39)	(313)
Note payable and other	(38)	11	-	(27)	60	(109)	(7)	(56)
Junior subordinated debt	-	(7)	-	(7)	-	(5)	-	(5)
Total interest expense	205	(226)	(41)	(62)	163	(491)	(46)	(374)
Net interest income	\$1,300	(280)	(80)	940	687	59	6	752

Net interest income, the largest component of our income, was \$8.1 million for the three month period ended June 30, 2014 and \$7.1 million for the three months ended June 30, 2013, a \$940,000, or 13.2% increase during the second quarter of 2014. The increase in net interest income is due to an \$878,000 increase in interest income, combined with a \$62,000 decrease in interest expense. Driving the increase in interest income during the 2014 period was a \$110.2 million increase in average earning assets compared to the second quarter of 2013.

(dollars in thousands)	June 30, 2014 vs. 2013				Six Months Ended June 30, 2013 vs. 2012			
	Increase (Decrease) Due to				Increase (Decrease) Due to			
	Volume	Rate	Rate/ Volume	Total	Volume	Rate	Rate/ Volume	Total
Interest income								
Loans	2,773	(1,182)	(197)	1,394	\$ 1,604	(802)	(78)	724
Investment securities	(112)	226	(27)	87	(66)	(97)	6	(157)
Federal funds sold	(2)	-	-	(2)	(2)	(1)	-	(3)
Total interest income	2,659	(956)	(224)	1,479	1,536	(900)	(72)	564
Interest expense								
Deposits	16	(169)	(1)	(154)	165	(870)	(64)	(769)
Note payable and other	(128)	74	(6)	(60)	206	(327)	(31)	(152)
Junior subordinated debt	-	(13)	-	(13)	-	(15)	-	(15)
Total interest expense	(112)	(108)	(7)	(227)	371	(1,212)	(95)	(936)
Net interest income	2,771	(848)	(217)	1,706	\$ 1,165	312	23	1,500

Net interest income for the six months ended June 30, 2014 was \$15.7 million compared to \$14.0 million for the first

six months ended June 30, 2013, a \$1.7 million, or 12.2% increase during the first six months of 2014 compared to the same period in 2013. The increase in net interest income is due to a \$1.5 million increase in interest income, combined with a \$227,000 decrease in interest expense. The \$98.8 million increase in average earning assets during the six months ended June 30, 2014 as compared to six months ended June 30, 2013 was the primary driver of the increase in net interest income during the 2014 period.

Provision for Loan Losses

We have established an allowance for loan losses through a provision for loan losses charged as an expense on our consolidated statements of income. We review our loan portfolio periodically to evaluate our outstanding loans and to measure both the performance of the portfolio and the adequacy of the allowance for loan losses. Please see the discussion below under *Balance Sheet Review* *Allowance for Loan Losses* for a description of the factors we consider in determining the amount of the provision we expense each period to maintain this allowance.

For the three months ended June 30, 2014 and 2013, we incurred a noncash expense related to the provision for loan losses of \$950,000 and \$750,000, respectively, resulting in an allowance for loan losses of \$11.1 million and

32

\$9.6 million for the 2014 and 2013 periods, respectively. The increased provision for loan losses during the 2014 period relates primarily to the growth of our loan portfolio, in addition to the \$560,000 of net charge-offs during the second quarter of 2014. The \$11.1 million allowance represented 1.37% of gross loans at June 30, 2014 while the \$9.6 million allowance was 1.39% of gross loans at June 30, 2013.

During the past twelve months, our loan balances increased by \$127.2 million and our total nonperforming loans increased by \$6.8 million; however, the amount of our classified loans declined from 34% at June 30, 2013 to 26% at June 30, 2014. Factors such as these are also considered in determining the amount of loan loss provision necessary to maintain our allowance for loan losses at an adequate level.

Noninterest Income

The following table sets forth information related to our noninterest income.

(dollars in thousands)	Three months ended		Six months ended	
	June 30,		June 30,	
	2014	2013	2014	2013
Loan fee income	\$ 613	267	955	526
Service fees on deposit accounts	231	204	445	428
Income from bank owned life insurance	167	158	329	318
Gain on sale of investment securities	230	-	230	-
Other income	277	249	529	488
Total noninterest income	\$ 1,518	878	2,488	1,760

Noninterest income increased \$640,000, or 72.9%, for the second quarter of 2014 as compared to the same period in 2013. Excluding the \$230,000 gain on sale of investment securities, noninterest income increased \$410,000, or 46.7%, during the 2014 period. The increase in total noninterest income during the three months ended June 30, 2014 resulted primarily from the following:

Loan fee income increased \$346,000, or 129.6%, resulting primarily from increased mortgage origination fee income which totaled \$576,000 for the most recent three months.

Service fees on deposit accounts increased \$27,000, or 13.2%, primarily related to additional income from service charges on our checking, money market, and savings accounts.

Other income increased by \$28,000, or 11.2%, due primarily to increased income received from ATM and debit card transactions which is driven by the volume of these transactions. Partially offsetting these increases was a \$19,000 decrease in ACH processing fees related primarily to one client account.

Noninterest income increased \$728,000, or 41.4%, during the six months ended June 30, 2014 as compared to the same period in 2013. Excluding the \$230,000 gain on sale of investment securities, noninterest income increased \$498,000, or 28.3%, during the 2014 period. The increase in total noninterest income during the six months ended June 30, 2014 resulted primarily from a \$429,000 increase in loan fee income, an increase of \$17,000 in service fees on deposit accounts, an \$11,000 increase in income from bank owned life insurance, and a \$41,000 increase in other income which consists primarily of income from ATM and debit card transactions and rent income from tenants at our Cayce, South Carolina office.

In accordance with the requirements set forth under the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) in June 2011, the Federal Reserve approved the final rule which caps an issuer's base fee at 21 cents per transaction and allows an additional 5 basis point charge per transaction to help cover fraud losses. Although the rule does not apply to institutions with less than \$10 billion in assets, such as our Bank, there is concern that the price controls may harm community banks, which could be pressured by the marketplace to lower their own interchange rates. Our ATM/Debit card fee income is included in other noninterest income and was \$169,000 and \$137,000 for the three months ended June 30, 2014 and 2013, respectively, and \$311,000 and \$256,000 for the six months ended June 30, 2014 and 2013, respectively.

Noninterest expenses

The following table sets forth information related to our noninterest expenses.

	Three months ended		Six months ended	
	June 30,		June 30,	
(dollars in thousands)	2014	2013	2014	2013
Compensation and benefits	\$3,514	3,018	6,925	5,970
Occupancy	730	744	1,457	1,452
Real estate owned activity	12	(14)	25	5
Data processing and related costs	622	594	1,216	1,170
Insurance	203	201	395	441
Marketing	197	218	398	404
Professional fees	294	183	517	364
Other	743	357	1,152	725
Total noninterest expense	\$6,315	5,301	12,085	10,531

Noninterest expense was \$6.3 million for the three months ended June 30, 2014, a \$1.0 million, or 19.1%, increase from noninterest expense of \$5.3 million for the three months ended June 30, 2013.

The increase in total noninterest expenses resulted primarily from the following:

Compensation and benefits expense increased \$496,000, or 16.4%, relating primarily to increases in base compensation and benefits expenses. Base compensation increased by \$351,000 driven by the cost of 13 additional employees, seven of which were hired in relation to the expansion of our mortgage operations, with the remainder being hired to support our retail clients in both the loan and deposit areas, combined with annual company-wide salary increases. Incentive compensation, which is based on certain targeted financial performance goals met by management, increased by \$35,000, while benefit expenses increased by \$118,000 during the same period, compared to the second quarter of the prior year.

Real estate owned expenses increased \$26,000 during the first six months of 2014 due primarily to \$17,000 of income recorded from the gain on sale of property during the prior year.

Data processing and related costs increased 4.7%, or \$28,000, primarily related to increased ATM and debit card network fees, as well as increased courier fees for services we provide to our clients.

Professional fees increased \$111,000, or 60.7%, driven primarily by increased legal fees related to a specific litigation issue.

Other expenses increased by \$386,000, or 108.1%, primarily related to increased travel and entertainment expenses, collection costs, and a one-time \$250,000 litigation settlement expense.

Partially offsetting these increases in noninterest expense was a \$14,000 decrease in occupancy expense primarily related to lower depreciation expense during the 2014 period, combined with a \$21,000, or 9.6%, decrease in marketing expenses.

Our efficiency ratio, excluding gains on sale of investment securities and real estate owned activity, was 67.4% for the second quarter of 2014 compared to 66.4% for the same period in 2013. The efficiency ratio represents the percentage of one dollar of expense required to be incurred to earn a full dollar of revenue and is computed by dividing noninterest expense by the sum of net interest income and noninterest income. The slight increase in the efficiency ratio during the 2014 period relates primarily to the increase in noninterest expenses as compared to the prior year.

Noninterest expense for the six months ended June 30, 2014 increased 14.8%, or \$1.6 million, as compared to the six months ended June 30, 2013. The increase relates primarily to the \$955,000 increase in compensation and benefits expense, \$20,000 in real estate owned expenses, \$46,000 in data processing and related costs, \$153,000 in professional fees, and \$427,000 in other expenses. Partially offsetting the increases in noninterest expense was a decrease of \$46,000 in insurance expenses.

We incurred income tax expense of \$757,000 for the three months ended June 30, 2014 as compared to \$657,000 during the same period in 2013. Income tax expense for the six months ended June 30, 2014 was \$1.4 million as compared to \$1.1 million for the same period of 2013. Our effective tax rate was 32.4% and 32.7% for the six months ended June 30, 2014 and 2013, respectively. The increase in income tax expense during the 2014 periods is primarily a result of the increase in our net income during the respective periods.

BALANCE SHEET REVIEW

Investment Securities

At June 30, 2014, the \$64.7 million in our investment securities portfolio represented approximately 6.7% of our total assets. We held investment securities with a fair value and amortized cost of \$58.7 million with an unrealized loss of \$14,000. At December 31, 2013, the \$73.6 million in our investment securities portfolio represented approximately 8.3% of our total assets. At December 31, 2013, we held investment securities with a fair value of \$67.4 million and an amortized cost of \$69.5 million for an unrealized loss of \$2.0 million.

Loans

Since loans typically provide higher interest yields than other types of interest earning assets, a substantial percentage of our earning assets are invested in our loan portfolio. Average loans for the six months ended June 30, 2014 and 2013 were \$776.1 million and \$665.3 million, respectively. Before the allowance for loan losses, total loans outstanding at June 30, 2014 and December 31, 2013 were \$812.8 and \$733.7 million, respectively.

The principal component of our loan portfolio is loans secured by real estate mortgages. As of June 30, 2014, our loan portfolio included \$657.6 million, or 80.9%, of real estate loans. As of December 31, 2013, real estate loans made up 80.6% of our loan portfolio and totaled \$591.0 million. Most of our real estate loans are secured by residential or commercial property. We obtain a security interest in real estate, in addition to any other available collateral. This collateral is taken to increase the likelihood of the ultimate repayment of the loan. Generally, we limit the loan-to-value ratio on loans to coincide with the appropriate regulatory guidelines. We attempt to maintain a relatively diversified loan portfolio to help reduce the risk inherent in concentration in certain types of collateral and business types. We do not generally originate traditional long term residential mortgages to hold in our loan portfolio, but we do issue traditional second mortgage residential real estate loans and home equity lines of credit. Home equity lines of credit totaled \$87.8 million as of June 30, 2014, of which approximately 38% were in a first lien position, while the

remaining balance was second liens, compared to \$78.5 million as of December 31, 2013, with approximately 37% in first lien positions. The average loan had a balance of approximately \$87,000 and a loan to value of 71% as of June 30, 2014, compared to an average loan balance of \$105,000 and a loan to value of approximately 67% as of December 31, 2013. Further, 0.36% and 0.10% of our total home equity lines of credit were over 30 days past due as of June 30, 2014 and December 31, 2013, respectively.

Following is a summary of our loan composition at June 30, 2014 and December 31, 2013. Of the \$79.2 million in loan growth during 2014, \$33.5 million was originated in the Greenville market, \$18.7 million originated in the Columbia market, and \$27.0 million originated in the Charleston market. In addition, \$66.6 million of the increase was in loans secured by real estate, and \$12.6 million in commercial business or consumer loans.

(dollars in thousands)	June 30, 2014		December 31, 2013

Nonperforming assets

Nonperforming assets include real estate acquired through foreclosure or deed taken in lieu of foreclosure and loans on nonaccrual status. Generally, a loan is placed on nonaccrual status when it becomes 90 days past due as to principal or interest, or when we believe, after considering economic and business conditions and collection efforts, that the borrower's financial condition is such that collection of the contractual principal or interest on the loan is doubtful. A

payment of interest on a loan that is classified as nonaccrual is recognized as a reduction in principal when received. As of June 30, 2014 and December 31, 2013, we had no loans 90 days past due and still accruing.

Following is a summary of our nonperforming assets, including nonaccruing TDRs.

(dollars in thousands)	June 30, 2014	December 31, 2013
Commercial	\$ 5,936	3,198
Consumer	489	156
Nonaccruing troubled debt restructurings	5,871	4,983
Total nonaccrual loans	12,296	8,337
Other real estate owned	1,277	1,198
Total nonperforming assets	\$13,573	9,535
Accruing troubled debt restructurings	\$ 6,479	8,045

At June 30, 2014, nonperforming assets were \$13.6 million, or 1.40% of total assets and 1.67% of gross loans. Comparatively, nonperforming assets were \$9.5 million, or 1.07% of total assets and 1.30% of gross loans at December 31, 2013. Nonaccrual loans increased \$4.0 million to \$12.3 million at June 30, 2014 from \$8.3 million at December 31, 2013. Nonaccrual loans at June 30, 2014 include nine loans, or six relationships, which were put on nonaccrual status during the first six months of 2014. In addition, during the first six months of 2014, three nonaccrual loans were returned to accrual status, two nonaccrual loans were either fully or partially charged-off, and one nonaccrual loan was moved to other real estate owned. The amount of foregone interest income on the nonaccrual loans in the first six months of 2014 and 2013 was approximately \$314,000 and \$395,000, respectively.

Nonperforming assets include other real estate owned which increased by \$79,000 from December 31, 2013. During the first six months of 2014, we added one commercial property for \$154,000 and sold three real estate lots for \$75,000. The balance at June 30, 2014 includes five commercial properties totaling \$1.2 million and two

residential properties totaling \$64,000. All of these properties are located in the Upstate of South Carolina. We believe that these properties are appropriately valued at the lower of cost or market as of June 30, 2014.

At June 30, 2014 and 2013, the allowance for loan losses represented 90.3% and 172.5% of the total amount of nonperforming loans, respectively. A significant portion, or 95%, of nonperforming loans at June 30, 2014 is secured by real estate. Our nonperforming loans have been written down to approximately 71% of their original nonperforming balance. We have evaluated the underlying collateral on these loans and believe that the collateral on these loans is sufficient to minimize future losses. Based on the level of coverage on nonperforming loans and analysis of our loan portfolio, we believe the allowance for loan losses of \$11.1 million as of June 30, 2014 to be adequate.

As a general practice, most of our loans are originated with relatively short maturities of less than 10 years. As a result, when a loan reaches its maturity we frequently renew the loan and thus extend its maturity using the same credit standards as those used when the loan was first originated. Due to these loan practices, we may, at times, renew loans which are classified as nonperforming after evaluating the loan's collateral value and financial strength of its guarantors. Nonperforming loans are renewed at terms generally consistent with the ultimate source of repayment and rarely at reduced rates. In these cases the Company will seek additional credit enhancements, such as additional collateral or additional guarantees to further protect the loan. When a loan is no longer performing in accordance with its stated terms, the Company will typically seek performance under the guarantee.

In addition, at June 30, 2014, 80.9% of our loans are collateralized by real estate and 87.2% of our impaired loans are secured by real estate. The Company utilizes third party appraisers to determine the fair value of collateral dependent loans. Our current loan and appraisal policies require the Company to obtain updated appraisals on an annual basis, either through a new external appraisal or an appraisal evaluation. Impaired loans are individually reviewed on a quarterly basis to determine the level of impairment. As of June 30, 2014, we do not have any impaired real estate loans carried at a value in excess of the appraised value. We typically charge-off a portion or create a specific reserve for impaired loans when we do not expect repayment to occur as agreed upon under the original terms of the loan agreement.

As of June 30, 2014, impaired loans totaled \$18.8 million for which \$14.3 million of these loans have a reserve of approximately \$5.8 million allocated in the allowance. During the first six months of 2014, the average recorded investment in impaired loans was approximately \$17.2 million. Comparatively, impaired loans totaled \$16.4 million at December 31, 2013, and \$14.1 million of these loans had a reserve of approximately \$4.7 million allocated in the allowance. During 2013, the average recorded investment in impaired loans was approximately \$16.1 million.

We consider a loan to be a TDR when the debtor experiences financial difficulties and we provide concessions such that we will not collect all principal and interest in accordance with the original terms of the loan agreement. Concessions can relate to the contractual interest rate, maturity date, or payment structure of the note. As part of our workout plan for individual loan relationships, we may restructure loan terms to assist borrowers facing challenges in the current economic environment. As of June 30, 2014, we determined that we had loans totaling \$12.4 million, that we considered TDRs. As of December 31, 2013, we had loans totaling \$13.0 million, that we considered TDRs.

Allowance for Loan Losses

The allowance for loan losses was \$11.1 million and \$9.6 million at June 30, 2014 and 2013, respectively, or 1.37% and 1.39% of outstanding loans, respectively. At December 31, 2013, our allowance for loan losses was \$10.2 million, or 1.39% of outstanding loans, and we had net loans charged-off of \$2.4 million for the year ended December 31, 2013.

During the six months ended June 30, 2014, we charged-off \$1.2 million of loans and recorded \$104,000 of recoveries on loans previously charged-off, for net charge-offs of \$1.1 million, or 0.28% of average loans, annualized. Comparatively, we charged-off \$1.5 million of loans and recorded \$99,000 of recoveries on loans previously charged-off, resulting in net charge-offs of \$1.4 million, or 0.43% of average loans, annualized, for the first six months of 2013.

Following is a summary of the activity in the allowance for loan losses.

	Six months ended		Year ended
	June 30,		December 31,
(dollars in thousands)	2014	2013	2013
Balance, beginning of period	\$ 10,213	9,091	9,091
Provision	1,950	1,875	3,475
Loan charge-offs	(1,164)	(1,504)	(2,478)
Loan recoveries	104	99	125
Net loan charge-offs	(1,060)	(1,405)	(2,353)
Balance, end of period	\$ 11,103	9,561	10,213

Deposits and Other Interest-Bearing Liabilities

Our primary source of funds for loans and investments is our deposits, advances from the FHLB, and structured repurchase agreements. In the past, we have chosen to obtain a portion of our certificates of deposits from areas outside of our market in order to obtain longer term deposits than are readily available in our local market. We have adopted guidelines regarding our use of brokered deposits that limit such deposits to 25% of total deposits and dictate that our current interest rate risk profile determines the terms. In addition, we do not obtain time deposits of \$100,000 or more through the Internet. These guidelines allow us to take advantage of the attractive terms that wholesale

funding can offer while mitigating the related inherent risk.

The following is a detail of our deposit accounts:

(dollars in thousands)	June 30, 2014	December 31, 2013
Non-interest bearing	\$ 123,548	101,971
Interest bearing:		
NOW accounts	146,515	153,376
Money market accounts	192,706	151,759
Savings	7,775	6,671
Time, less than \$100,000	65,669	68,190
Time and out-of-market deposits, \$100,000 and over	211,156	198,352
Total deposits	\$ 747,369	680,319

Our retail deposits represented \$681.3 million, or 91.2%, of total deposits at June 30, 2014, while our out-of-market, or brokered, deposits represented \$66.1 million, or 8.8%, of total deposits. At December 31, 2013, retail deposits represented \$617.0 million, or 90.7%, of our total deposits and brokered CDs were \$63.3 million, representing 9.3% of our total deposits. Of the \$64.3 million increase in retail deposits during the first six months of 2014, \$30.6 million is related to the Greenville market, \$11.2 million is related the Columbia market, and \$22.5 million is related to the Charleston market. Our loan-to-deposit ratio was 109% at June 30, 2014 and 108% at December 31, 2013.

The following table shows the average balance amounts and the average rates paid on deposits.

(dollars in thousands)	Six months ended June 30,			
	2014		2013	
	Amount	Rate	Amount	Rate
Noninterest bearing demand deposits	\$112,178	-%	87,496	-%
Interest bearing demand deposits	147,435	0.15%	156,518	0.29%
Money market accounts	167,251	0.32%	127,380	0.32%
Savings accounts	7,443	0.09%	6,257	0.09%

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

Time deposits less than \$100,000	68,445	0.72%	74,526	0.90%
Time deposits greater than \$100,000	204,265	0.75%	148,520	1.05%
Total deposits	\$707,017	0.39%	600,697	0.51%

During the six months ended June 30, 2014, our average transaction account balances increased by \$56.7 million, or 15.0%, from the six months ended June 30, 2013. In addition, our average time deposit balances increased by \$49.7 million, or 22.3%, during the 2014 period, due primarily to a \$43.1 million increase in average brokered deposits. In addition, during the past 12 months, we have continued to reduce the rates we pay on our interest-bearing deposits, as these deposits repriced; however, we do not anticipate a significant reduction in our deposit costs in the future.

During the past 12 months, we continued our focus on increasing core deposits, which exclude out-of-market deposits and time deposits of \$100,000 or more, in order to provide a relatively stable funding source for our loan portfolio and other earning assets. Our core deposits were \$536.2 million and \$482.0 million at June 30, 2014 and December 31, 2013, respectively.

All of our time deposits are certificates of deposits. The maturity distribution of our time deposits of \$100,000 or more at June 30, 2014 was as follows:

(dollars in thousands)	June 30, 2014
Three months or less	\$ 27,701
Over three through six months	44,983
Over six through twelve months	76,496
Over twelve months	61,976
Total	\$211,156

At June 30, 2014, the Company had \$127.1 million in FHLB advances and other borrowings. Of the \$127.1 million, FHLB advances represented \$103.5 million, securities sold under structured agreements to repurchase represented \$19.2 million, and a line of credit represented \$4.4 million. During the first six months of 2014, we restructured five FHLB advances totaling \$59.5 million. In accordance with accounting guidance, we determined that the present value of the cash flows of the modified advance will not change by more than 10% from the present value of the cash flows of the original advances. Therefore, the modified FHLB advance is considered to be a restructuring and no gain or loss was recorded in the transaction. The original FHLB advances had a weighted rate of 2.31% and an average remaining life of 40 months. Under the modified arrangement, the \$59.5 million in FHLB advances have a weighted average rate of 2.22% and an average remaining life of 43 months.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity represents the ability of a company to convert assets into cash or cash equivalents without significant loss, and the ability to raise additional funds by increasing liabilities. Liquidity management involves monitoring our sources and uses of funds in order to meet our day-to-day cash flow requirements while maximizing profits. Liquidity management is made more complicated because different balance sheet components are subject to varying degrees of management control. For example, the timing of maturities of our investment portfolio is fairly predictable and subject to a high degree of control at the time investment decisions are made. However, net deposit inflows and outflows are far less predictable and are not subject to the same degree of control.

At June 30, 2014 and December 31, 2013, our liquid assets, consisting of cash and due from banks and federal funds sold, amounted to \$41.1 million and \$39.2 million, or 4.3% and 4.4% of total assets, respectively. Our investment securities at June 30, 2014 and December 31, 2013 amounted to \$64.7 million and \$73.6 million, or 6.7% and 8.3% of total assets, respectively. Investment securities traditionally provide a secondary source of liquidity since they can be converted into cash in a timely manner. However, approximately 37% of these securities are pledged against outstanding debt. Therefore, the related debt would need to be repaid prior to the securities being sold in order for these securities to be converted to cash. In addition, approximately 9% of our investment securities are pledged to secure client deposits.

Our ability to maintain and expand our deposit base and borrowing capabilities serves as our primary source of liquidity. We plan to meet our future cash needs through the liquidation of temporary investments, the generation of deposits, loan payoffs, and from additional borrowings. In addition, we will receive cash upon the maturity and sale of loans and the maturity of investment securities. We maintain three federal funds purchased lines of credit with correspondent banks totaling \$45.0 million for which there were no borrowings against the lines of credit at June 30, 2014.

We are also a member of the FHLB, from which applications for borrowings can be made. The FHLB requires that securities, qualifying mortgage loans, and stock of the FHLB owned by the Bank be pledged to secure any advances from the FHLB. The unused borrowing capacity currently available from the FHLB at June 30, 2014 was \$68.6 million, based on the Bank's \$5.5 million investment in FHLB stock, as well as qualifying mortgages available to secure any future borrowings. However, we are able to pledge additional securities to the FHLB in order to increase our available borrowing capacity.

In addition, we have a line of credit with another financial institution for \$10 million, for which \$4.4 million was outstanding at June 30, 2014. The line of credit bears interest at LIBOR plus 2.90% with a floor of 3.25% and a ceiling of 5.15%, and matures on June 6, 2017.

We believe that our existing stable base of core deposits, borrowings from the FHLB, and short-term repurchase agreements will enable us to successfully meet our long-term liquidity needs. However, as short-term liquidity needs arise, we have the ability to sell a portion of our investment securities portfolio to meet those needs.

Total shareholders' equity at June 30, 2014 was \$71.9 million. At December 31, 2013, total shareholders' equity was \$65.7 million. The \$6.2 million increase from December 31, 2013 is primarily related to the \$6.0 million net proceeds from the issuance of 475,000 shares of common stock in a private placement, net income of \$2.8 million and other comprehensive income of \$1.3 million, partially offset by the repurchase of 4,057 shares of preferred stock for \$4.1 million.

The following table shows the return on average assets (net income divided by average total assets), return on average equity (net income divided by average equity), and equity to assets ratio (average equity divided by average assets) annualized for the six months ended June 30, 2014 and the year ended December 31, 2013. Since our inception, we have not paid cash dividends.

40

	June 30, 2014	December 31, 2013
Return on average assets	0.62%	0.61%
Return on average equity	8.09%	7.88%
Return on average common equity	8.19%	8.81%
Average equity to average assets ratio	7.61%	7.74%
Tangible common equity to assets ratio	6.27%	5.65%

Under the capital adequacy guidelines, regulatory capital is classified into two tiers. These guidelines require an institution to maintain a certain level of Tier 1 and Tier 2 capital to risk-weighted assets. Tier 1 capital consists of common shareholders' equity, excluding the unrealized gain or loss on securities available for sale, minus certain intangible assets. In determining the amount of risk-weighted assets, all assets, including certain off-balance sheet assets, are multiplied by a risk-weight factor of 0% to 100% based on the risks believed to be inherent in the type of asset. Tier 2 capital consists of Tier 1 capital plus the general reserve for loan losses, subject to certain limitations. We are also required to maintain capital at a minimum level based on total average assets, which is known as the Tier 1

leverage ratio.

At both the holding company and bank level, we are subject to various regulatory capital requirements administered by the federal banking agencies. To be considered well-capitalized, we must maintain total risk-based capital of at least 10%, Tier 1 capital of at least 6%, and a leverage ratio of at least 5%. To be considered adequately capitalized under these capital guidelines, we must maintain a minimum total risk-based capital of 8%, with at least 4% being Tier 1 capital. In addition, we must maintain a minimum Tier 1 leverage ratio of at least 4%. As of June 30, 2014, our capital ratios exceed those required to be well-capitalized.

In July 2013, the Federal Reserve, the FDIC, and the Office of the Comptroller of the Currency each approved final rules to implement the Basel III regulatory capital reforms, among other changes required by the Dodd-Frank Act. The rules will apply to all national and state banks, such as the Bank, and savings associations and most bank holding companies and savings and loan holding companies, such as the Company, which we collectively refer to herein as covered banking organizations. Bank holding companies with less than \$500 million in total consolidated assets are not subject to the final rules, nor are savings and loan holding companies substantially engaged in commercial activities or insurance underwriting. The framework requires covered banking organizations to hold more and higher quality capital, which acts as a financial cushion to absorb losses, taking into account the impact of risk. The approved rules include a new minimum ratio of common equity Tier 1 capital to risk-weighted assets of 4.5% as well as a common equity Tier 1 capital conservation buffer of 2.5% of risk-weighted assets. The rules also raise the minimum ratio of Tier 1 capital to risk-weighted assets from 4% to 6% and include a minimum leverage ratio of 4% for all banking institutions. In terms of quality of capital, the final rules emphasize common equity Tier 1 capital and implement strict eligibility criteria for regulatory capital instruments. The final rules also change the methodology for calculating risk-weighted assets to enhance risk sensitivity. The requirements in the rules begin to phase in on January 1, 2015 for covered banking organizations such as the Company and the Bank. The requirements in the rules will be fully phased in by January 1, 2019. The ultimate impact of the new capital standards on the Company and the Bank is currently being reviewed.

The following table summarizes the capital amounts and ratios of the Bank and the regulatory minimum requirements.

	June 30, 2014					
	Actual		For capital adequacy purposes minimum		To be well capitalized under prompt corrective action provisions minimum	
(dollars in thousands)	Amount	Ratio	Amount	Ratio	Amount	Ratio
Total Capital (to risk weighted assets)	\$ 97,064	12.18%	63,733	8.0%	79,667	10.0%
Tier 1 Capital (to risk weighted assets)	87,092	10.93%	31,867	4.0%	47,800	6.0%
Tier 1 Capital (to average assets)	87,092	9.26%	37,618	4.0%	47,023	5.0%

The following table summarizes the capital amounts and ratios of the Company and the minimum regulatory requirements.

	June 30, 2014					
	Actual		For capital adequacy purposes; minimum		To be well capitalized under prompt corrective action provisions minimum	
(dollars in thousands)	Amount	Ratio	Amount	Ratio	Amount	Ratio
Total Capital (to risk weighted assets)	\$94,867	11.91%	63,733	8.0%	N/A	N/A
Tier 1 Capital (to risk weighted assets)	84,895	10.66%	31,867	4.0%	N/A	N/A
Tier 1 Capital (to average assets)	84,895	9.01%	37,695	4.0%	N/A	N/A

The ability of the Company to pay cash dividends is dependent upon receiving cash in the form of dividends from the Bank. The dividends that may be paid by the Bank to the Company are subject to legal limitations and regulatory capital requirements. Further, the Company cannot pay cash dividends on its common stock during any calendar quarter unless full dividends on the Series T preferred stock for the dividend period ending during the calendar quarter have been declared and the Company has not failed to pay a dividend in the full amount of the Series T preferred stock with respect to the period in which such dividend payment in respect of its common stock would occur.

EFFECT OF INFLATION AND CHANGING PRICES

The effect of relative purchasing power over time due to inflation has not been taken into account in our consolidated financial statements. Rather, our financial statements have been prepared on an historical cost basis in accordance with generally accepted accounting principles.

Unlike most industrial companies, our assets and liabilities are primarily monetary in nature. Therefore, the effect of changes in interest rates will have a more significant impact on our performance than will the effect of changing prices and inflation in general. In addition, interest rates may generally increase as the rate of inflation increases, although

not necessarily in the same magnitude. As discussed previously, we seek to manage the relationships between interest sensitive assets and liabilities in order to protect against wide rate fluctuations, including those resulting from inflation.

OFF-BALANCE SHEET RISK

Commitments to extend credit are agreements to lend money to a client as long as the client has not violated any material condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require the payment of a fee. At June 30, 2014, unfunded commitments to extend credit were \$159.6 million, of which \$49.7 million was at fixed rates and \$109.9 million was at variable rates. At December 31, 2013, unfunded commitments to extend credit were \$138.7 million, of which approximately \$32.6 million was at fixed rates and \$106.1 million was at variable rates. A significant portion of the unfunded commitments related to consumer equity lines of credit. Based on historical experience, we anticipate that a significant portion of these lines of credit will not be funded. We evaluate each client's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by us upon extension of credit, is based on our credit evaluation of the borrower. The type of collateral varies but may include accounts receivable, inventory, property, plant and equipment, and commercial and residential real estate.

At June 30, 2014 and December 31, 2013, there was a \$3.5 million and \$3.0 million, respectively, commitment under letters of credit. The credit risk and collateral involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. Since most of the letters of credit are expected to expire without being drawn upon, they do not necessarily represent future cash requirements.

A portion of our business is to originate mortgage loans that will be sold in the secondary market to investors. Loan types that we originate include conventional loans, jumbo loans and other governmental agency loan products. We

adhere to the legal lending limits and guidelines as set forth by the various governmental agencies and investors to whom we sell loans. Under a "best efforts" selling procedure, we make our best effort to process, fund, and deliver the loan to a particular investor. If the loan fails to fund, there is no immediate cost to us, as the market risk has been transferred to the investor. In the event of a customer loan default, we may be required to reimburse the investor.

Except as disclosed in this report, we are not involved in off-balance sheet contractual relationships, unconsolidated related entities that have off-balance sheet arrangements or transactions that could result in liquidity needs or other commitments that significantly impact earnings.

MARKET RISK AND INTEREST RATE SENSITIVITY

Market risk is the risk of loss from adverse changes in market prices and rates, which principally arises from interest rate risk inherent in our lending, investing, deposit gathering, and borrowing activities. Other types of market risks, such as foreign currency exchange rate risk and commodity price risk, do not generally arise in the normal course of our business.

We actively monitor and manage our interest rate risk exposure in order to control the mix and maturities of our assets and liabilities utilizing a process we call asset/liability management. The essential purposes of asset/liability management are to ensure adequate liquidity and to maintain an appropriate balance between interest sensitive assets and liabilities in order to minimize potentially adverse impacts on earnings from changes in market interest rates. Our asset/liability management committee (ALCO) monitors and considers methods of managing exposure to interest rate risk. We have both an internal ALCO consisting of senior management that meets at various times during each month and a board ALCO that meets monthly. The ALCOs are responsible for maintaining the level of interest rate sensitivity of our interest sensitive assets and liabilities within board-approved limits.

As of June 30, 2014, the following table summarizes the forecasted impact on net interest income using a base case scenario given upward and downward movements in interest rates of 100, 200, and 300 basis points based on forecasted assumptions of prepayment speeds, nominal interest rates and loan and deposit repricing rates. Estimates are based on current economic conditions, historical interest rate cycles and other factors deemed to be relevant. However, underlying assumptions may be impacted in future periods which were not known to management at the time of the issuance of the Consolidated Financial Statements. Therefore, management's assumptions may or may not prove valid. No assurance can be given that changing economic conditions and other relevant factors impacting our net interest income will not cause actual occurrences to differ from underlying assumptions. In addition, this analysis does not consider any strategic changes to our balance sheet which management may consider as a result of changes in market conditions.

Interest rate scenario	Change in net interest income from base
Up 300 basis points	11.67 %
Up 200 basis points	6.50 %
Up 100 basis points	2.77 %
Base	-
Down 100 basis points	(4.57)%

Down 200 basis points	(8.30)%
Down 300 basis points	(10.73)%

CRITICAL ACCOUNTING POLICIES

We have adopted various accounting policies that govern the application of accounting principles generally accepted in the United States and with general practices within the banking industry in the preparation of our financial statements. Our significant accounting policies are described in the footnotes to our audited consolidated financial statements as of December 31, 2013, as filed in our Annual Report on Form 10-K.

43

Certain accounting policies involve significant judgments and assumptions by us that have a material impact on the carrying value of certain assets and liabilities. We consider these accounting policies to be critical accounting policies. The judgment and assumptions we use are based on historical experience and other factors, which we believe to be reasonable under the circumstances. Our Critical Accounting Policies are the allowance for loan losses, fair value of financial instruments, other-than-temporary impairment analysis, other real estate owned, and income taxes. Because of the nature of the judgment and assumptions we make, actual results could differ from these judgments and estimates that could have a material impact on the carrying values of our assets and liabilities and our results of operations.

ACCOUNTING, REPORTING, AND REGULATORY MATTERS

Recently Issued Accounting Standards

The following is a summary of recent authoritative pronouncements that could affect accounting, reporting, and disclosure of financial information by us:

In January 2014, the FASB amended the Receivables Troubled Debt Restructurings by Creditors subtopic of the Codification to address the reclassification of consumer mortgage loans collateralized by residential real estate upon foreclosure. The amendments clarify the criteria for concluding that an in substance repossession or foreclosure has occurred, and a creditor is considered to have received physical possession of residential real estate property

collateralizing a consumer mortgage loan. The amendments also outline interim and annual disclosure requirements. The amendments will be effective for the Company for interim and annual reporting periods beginning after December 15, 2014. Companies are allowed to use either a modified retrospective transition method or a prospective transition method when adopting this update. Early adoption is permitted. The Company does not expect these amendments to have a material effect on its financial statements.

In January 2014, the FASB amended Receivables topic of the Accounting Standards Codification. The amendments are intended to resolve diversity in practice with respect to when a creditor should reclassify a collateralized consumer mortgage loan to OREO. In addition, the amendments require a creditor reclassify a collateralized consumer mortgage loan to OREO upon obtaining legal title to the real estate collateral, or the borrower voluntarily conveying all interest in the real estate property to the lender to satisfy the loan through a deed in lieu of foreclosure or similar legal agreement. The amendments will be effective for the Company for annual periods, and interim periods within those annual periods, beginning after December 15, 2014, with early implementation of the guidance permitted. In implementing this guidance, assets that are reclassified from real estate to loans are measured at the carrying value of the real estate at the date of adoption. Assets reclassified from loans to real estate are measured at the lower of the net amount of the loan receivable or the fair value of the real estate less costs to sell at the date of adoption. The Company does not expect these amendments to have a material effect on its financial statements.

In May 2014, the FASB issued guidance to change the recognition of revenue from contracts with customers. The core principle of the new guidance is that an entity should recognize revenue to reflect the transfer of goods and services to customers in an amount equal to the consideration the entity receives or expects to receive. The guidance will be effective for the Company for reporting periods beginning after December 15, 2016. The Company does not expect these amendments to have a material effect on its financial statements.

In June 2014, the FASB issued guidance which makes limited amendments to the guidance on accounting for certain repurchase agreements. The new guidance (1) requires entities to account for repurchase-to-maturity transactions as secured borrowings (rather than as sales with forward repurchase agreements), (2) eliminates accounting guidance on linked repurchase financing transactions, and (3) expands disclosure requirements related to certain transfers of financial assets that are accounted for as sales and certain transfers (specifically, repos, securities lending transactions, and repurchase-to-maturity transactions) accounted for as secured borrowings. The amendments will be effective for the Company for the first interim or annual period beginning after December 15, 2014. The Company does not expect these amendments to have a material effect on its financial statements.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on the consolidated financial

statements upon adoption.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

See Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Market Risk and Interest Rate Sensitivity and Liquidity Risk.

Item 4. CONTROLS AND PROCEDURES.

Evaluation of Disclosure Controls and Procedures

Management, including our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this report. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective to ensure that information required to be disclosed in the reports we file and submit under the Exchange Act is (i) recorded, processed, summarized and reported as and when required and (ii) accumulated and communicated to our management, including our Chief Executive Officer and the Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There has been no change in the Company's internal control over financial reporting during the three months ended June 30, 2014, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS.

We are a party to claims and lawsuits arising in the course of normal business activities. Management is not aware of any material pending legal proceedings against the Company which, if determined adversely, would have a material adverse impact on the company's financial position, results of operations or cash flows.
