FOR IMMEDIATE RELEASE

CAMTEK RECEIVES A FOLLOW ON ORDER FOR ITS NEXT GENERATION XACT SYSTEM

Xact is Camtek's revolutionary sample preparation system

MIGDAL HAEMEKE, Israel – April 23, 2013 – Camtek Ltd. (NASDAQ and TASE: CAMT), today announced that it has received an order and completed the installation of an Xact200 system – Camtek's next generation revolutionary TEM Sample Preparation System. This is a follow on order from a previous purchase of the tool over a year ago.

Shrinking feature dimensions and advances in material complexity require a scale of analysis only possible through Transmission Electron Microscope (TEM) processes. Xact200 performs cutting-edge TEM sample preparation in line with Semiconductor and Nanotechnology roadmap requirements, for next generation physical Failure Analysis and characterization.

Roy Porat, Camtek's Chief Executive Officer, commented, "Camtek penetrated the Sample Preparation market with the acquisition of SELA in 2010. This order represents a milestone after over a year in which we invested a lot of efforts in improving and maturing the product. I am pleased with the progress we have made with Xact200, and look forward to seeing additional installations in the coming months."

ABOUT CAMTEK LTD.

Camtek Ltd. provides automated and technologically advanced solutions dedicated to enhancing production processes and increasing yields, enabling and supporting customer's latest technologies in the Semiconductors, Printed Circuit Boards (PCB) and IC Substrates industries.

Camtek addresses the specific needs of these interconnected industries with dedicated solutions based on a wide and advanced platform of technologies including intelligent imaging, image processing, adaptive ion milling (AIM) and digital material deposition (DMD). Camtek's solutions range from micro-to-nano by applying its technologies to the industries' specific requirements.
