FOR IMMEDIATE RELEASE

**CAMTEK PENETRATES ANOTHER WORLD LEADING OSAT WITH ITS NEW
GROWTH ENGINE: EAGLE-AP**

Eagle-AP provides both 2D and 3D inspection and metrology on the same platform

MIGDAL HAEMEK, Israel – July 14, 2015 – Camtek Ltd. (NASDAQ: CAMT, TASE: CAMT), today announced the receipt of initial orders for Eagle-AP systems, its new generation of 2D and 3D inspection and metrology system. The orders were received from a world leading Outsourced Semiconductor Assembly and Test (OSAT), which has not previously used Camtek equipment. Camtek's management expect to see follow-on orders from this customer in the near future.

Ramy Langer, Vice President and Head of Camtek's Semiconductor Division, commented: "Since the introduction of Eagle a year ago, Camtek has gained substantial momentum in the marketplace and in particular has achieved significant penetration into new accounts which it had previously not sold into. The Eagle family, designed to support the latest technologies and emerging market trends, strengthens our long standing position as one of the leaders in the Semiconductor inspection and metrology industry."

Continued Mr. Langer: "Camtek has been an active player in the emerging Advanced Packaging market segment since its inception and has strong proven inspection and metrology capabilities which can support the OSATs' needs. This new and important strategic customer, provides further validation of our solution and strengthens our positioning as a supplier of choice for Advanced Packaging applications."

ABOUT CAMTEK LTD.

Camtek Ltd. provides automated and technologically advanced solutions dedicated to enhancing production processes, increasing products yield and reliability, enabling and supporting customer's latest technologies in the Semiconductors, Printed Circuit Boards (PCB) and IC Substrates industries.

Camtek addresses the specific needs of these interconnected industries with dedicated solutions based on a wide and advanced platform of technologies including intelligent imaging, image processing and functional 3D inkjet printing.
