## MINE SAFETY APPLIANCES COMPANY

## NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Unaudited

**(1) Basis of Presentation**

We have prepared the condensed consolidated financial statements in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the rules and regulations for reporting on Form 10-Q. Accordingly, they do not include certain information and disclosures required for comprehensive financial statements.

The interim condensed consolidated financial statements are unaudited; however, we believe that all adjustments, consisting of only normal recurring adjustments, necessary for a fair statement of these interim periods have been included. The results for interim periods are not necessarily indicative of the results to be expected for the full year.

The condensed consolidated financial statements include the accounts of the company and all subsidiaries. Intercompany accounts and transactions have been eliminated.

Certain prior year amounts have been reclassified to conform with the current year presentation.

Management's Discussion and Analysis of Financial Condition and Results of Operations that is included elsewhere in this report contains additional information about our results of operations and financial position and should be read in conjunction with these notes.

**(2) Restructuring and Other Charges**

During the three and six month periods ended June 30, 2006, we recorded charges of \$0.5 million (\$0.3 million after tax) and \$6.5 million (\$4.0 million after tax), respectively, related to the previously-announced Project Outlook reorganization plan in North America. Project Outlook is designed to ensure that our North American management teams, employees, product design processes, and operational functions are fully aligned with our strategic goals and the needs of our customers. The reorganization of business and support functions in our North American operations is expected to result in cost reductions and a higher degree of collaboration, focus and efficiency. A significant portion of the cost reductions resulting from Project Outlook is being realized from a focused voluntary retirement incentive program (VRIP) that was completed during the first quarter of 2006. In January 2006, approximately 60 employees elected to retire at the end of February under the terms of the VRIP. Restructuring charges for the six months ended June 30, 2006 include \$5.3 million for VRIP retirees, primarily special termination benefits, \$0.7 million in severance costs related to additional staffing reductions that were made at the end of January 2006, and \$0.5 million related to the relocation of various employee work groups within the new organizational structure. We do not expect that Project Outlook expenses will be significant during the remainder of 2006.

**(3) Earnings per Share**

Basic earnings per share is computed using the weighted average number of common shares outstanding during the period. Diluted earnings per share includes the effect of the weighted average stock options outstanding during the period, using the treasury stock method. Antidilutive options are not considered in computing diluted earnings per share.

<b>Accumulated other comprehensive income</b>	<b>(5,280)</b>	<b>(9,571)</b>

**(5) Segment Information**

We are organized into three geographic operating segments: North America, Europe, and International. Reportable segment information is presented in the following table:

(In thousands)	Three Months Ended June 30, 2006				Consolidated Totals
	North America	Europe	International	Reconciling Items	
	Sales to external customers	\$ 121,406	\$ 50,343	\$ 46,874	
Intercompany sales	9,924	22,505	1,638	(34,067)	
Net income	11,556	2,017	2,995	(487)	16,081

(In thousands)	Six Months Ended June 30, 2006				Consolidated Totals
	North America	Europe	International	Reconciling Items	
	Sales to external customers	\$ 257,922	\$ 98,067	\$ 90,984	
Intercompany sales	19,505	41,988	2,776	(64,269)	
Net income	23,112	3,769	6,092	(1,154)	31,819

(In thousands)	Three Months Ended June 30, 2005				Consolidated Totals
	North America	Europe	International	Reconciling Items	
	Sales to external customers	\$ 135,831	\$ 43,356	\$ 40,937	
Intercompany sales	12,839	16,855	1,080	(30,774)	

Edgar Filing: MINE SAFETY APPLIANCES CO - Form 10-Q

Net income	14,495	1,627	3,512	(433)	19,201
------------	--------	-------	-------	-------	--------

	Six Months Ended June 30, 2005				Consolidated
	North			Reconciling	
(In thousands)	America	Europe	International	Items	Totals
Sales to external customers	\$ 281,370	\$ 89,247	\$ 77,555	\$	\$ 448,172
Intercompany sales	19,993	35,345	2,477	(57,815)	
Net income	30,825	4,312	6,447	(1,030)	40,554

Reconciling items consist primarily of intercompany eliminations and items reported at the corporate level.

**(6) Pensions and Other Postretirement Benefits**

Components of net periodic benefit (credit) cost consisted of the following:

(In thousands)	Three Months Ended June 30			
	Pension Benefits		Other Benefits	
	2006	2005	2006	2005
Service cost	\$ 2,354	\$ 1,940	\$ 163	\$ 144
Interest cost	3,972	3,714	394	381
Expected return on plan assets	(7,879)	(7,444)		
Amortization of transition amounts	11	85		
Amortization of prior service cost	51	68	(57)	(57)
Recognized net actuarial losses (gains)	312	(23)	200	282
Net periodic benefit (credit) cost	(1,179)	(1,660)	700	750

(In thousands)	Six Months Ended June 30			
	Pension Benefits		Other Benefits	
	2006	2005	2006	2005
Service cost	\$ 4,647	\$ 3,886	\$ 327	\$ 288
Interest cost	7,836	7,453	788	761
Expected return on plan assets	(15,641)	(14,886)		
Amortization of transition amounts	22	170		
Amortization of prior service cost	100	135	(114)	(114)
Recognized net actuarial losses	566	13	400	565
Net periodic benefit (credit) cost	(2,470)	(3,229)	1,401	1,500

We made contributions of \$0.9 million to our pension plans in the six months ended June 30, 2006. We expect to make net contributions of approximately \$1.7 million to our pension plans in 2006.

**(7) Goodwill and Intangible Assets**

Changes in goodwill and intangible assets, net of accumulated amortization, for the six months ended June 30, 2006 were as follows:

(In thousands)	Goodwill	Intangibles
Net balances at January 1, 2006	\$ 55,654	\$ 9,353
Goodwill and intangible assets acquired	5,494	1,366
Amortization expense		(616)
Currency translation and other	379	45
Net balances at June 30, 2006	61,527	10,148

At June 30, 2006, goodwill of approximately \$40.8 million, \$16.1 million, and \$4.6 million related to the North American, European, and International operating segments, respectively.

**(8) Inventories**

Edgar Filing: MINE SAFETY APPLIANCES CO - Form 10-Q

	June 30	December 31
(In thousands)	2006	2005
Finished products	\$ 63,362	\$ 49,073
Work in process	26,269	24,096
Raw materials and supplies	50,702	46,562
Total LIFO inventories	140,333	119,731

**(9) Stock-Based Compensation**

The 1998 Management Share Incentive Plan provides for grants of restricted stock awards and stock options to eligible key employees through March 2008. The 1990 Non-Employee Directors' Stock Option Plan, as amended April 29, 2004,

provides for annual grants of stock options and restricted stock awards to eligible directors. Restricted stock awards are granted without payment to the company in consideration of services to be performed in the ensuing three years. Stock options are granted at market value option prices and expire after ten years (limited instances of option prices in excess of market value and expiration after five years). Stock options granted in 2006 are exercisable beginning three years after the grant date. Stock options granted in 2005 and earlier years were fully vested as of December 31, 2005. As of June 30, 2006, there were 916,004 shares and 111,740 shares, respectively, reserved for future grants under the management and directors plans. We issue Stock Compensation Trust shares or new shares for stock option exercises and restricted stock awards.

On January 1, 2006, we adopted Statement of FAS No. 123R, Share-Based Payment, which requires that we recognize compensation expense for stock-based compensation based on the grant date fair value. Except for retirement-eligible employees, for whom there is no requisite service period, this expense is recognized ratably over the requisite service periods following the date of grant. For retirement-eligible employees, this expense is recognized at the grant date. We have elected the modified prospective application method for adoption, and prior periods financial statements have not been restated. Prior to January 1, 2006, we accounted for stock-based compensation in accordance with the provisions of APB Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations, using the intrinsic value method, which resulted in no compensation expense for stock options.

Stock-based compensation expense for the three and six months ended June 30 was as follows:

(In thousands)	Three Months Ended		Six Months Ended	
	June 30		June 30	
	2006	2005	2006	2005
Restricted stock awards	\$ 414	\$ 362	\$ 1,397	\$ 614
Stock option grants	181		1,404	
Total compensation expense before income taxes	595	362	2,801	614
Income tax benefit	217	141	1,023	239
Total compensation expense, net of income tax benefit	378	221	1,778	375

We did not capitalize any stock-based compensation expenses in the six months ended June 30, 2006 or 2005.

Prior to January 1, 2006, we did not recognize stock-based compensation expense for stock options. If we had elected to recognize compensation cost based on the fair value of the options at the grant date as prescribed by FAS 123, Accounting for Stock-Based Compensation, net income and earnings per share for the three and six months ended June 30, 2005 would have been reduced to the pro forma amounts shown below:

(In thousands)	Three Months Ended		Six Months Ended	
	June 30		June 30	
	2005	2005	2005	2005
Net income as reported	\$19,201		\$40,554	
Fair value of stock options granted, net of tax	(197)		(610)	
Pro forma net income	19,004		39,944	
Basic earnings per share:				
As reported	\$ .53		\$ 1.11	
Pro forma	.52		1.09	
Diluted earnings per share:				
As reported	\$ .52		\$ 1.09	
Pro forma	.51		1.07	

Stock option expense for the three and six month periods ended June 30, 2006 and the pro forma effect as if FAS 123 had been applied for the same periods of 2005 are based on the fair value of stock option grants estimated on the grant dates using the Black-Scholes option pricing

## Edgar Filing: MINE SAFETY APPLIANCES CO - Form 10-Q

model and the following weighted average assumptions for options granted in 2006 and 2005:

	<b>2006</b>	<b>2005</b>
Fair value per option	\$ 16.38	\$ 16.58
Risk-free interest rate	4.6%	4.3%
Expected dividend yield	1.4%	2.0%
Expected volatility	41%	34%
Expected life (years)	5.7	9.9

Edgar Filing: MINE SAFETY APPLIANCES CO - Form 10-Q

The risk-free interest rate is based on the U.S. Treasury Constant Maturity rates as of the grant date converted into an implied spot rate yield curve. Expected dividend yield is based on the most recent annualized dividend divided by the one year average closing share price. Expected volatility is based on the ten year historical volatility using daily stock prices. Expected life in years for 2006 is based on historical stock option exercise data. Prior to 2006, expected life approximated contractual life.

A summary of stock option activity for the six months ended June 30, 2006 follows:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (years)	Aggregate Intrinsic Value (In millions)
Outstanding at January 1, 2006	1,554,207	\$17.17		
Granted	181,527	40.20		
Exercised	(196,900)	8.77		
Outstanding at June 30, 2006	1,538,834	20.96	6.9	\$29.6
Exercisable at June 30, 2006	1,357,307	18.38	6.5	29.6

A summary of restricted stock award activity for the six months ended June 30, 2006 follows:

	Shares	Weighted Average Grant Date Fair Value
Unvested at January 1, 2006	169,730	\$ 25.10
Granted	47,738	40.29
Vested	(76,600)	12.09
Forfeited	(974)	41.37
Unvested at June 30, 2006	139,894	37.29

During the six months ended June 30, 2006, the total intrinsic value of stock options exercised (i.e. the difference between the market price at exercise and the option price paid to exercise the option) was \$6.4 million. The fair value of restricted stock awards vested during the six months ended June 30, 2006 and 2005 were \$2.9 million and \$2.1 million, respectively.

As of June 30, 2006, there was \$4.3 million of total future unvested stock-based compensation expense, and the weighted average period over which this expense is expected to be recognized was approximately 2.1 years.

#### **(10) Derivative Financial Instruments**

On April 6, 2004, we entered into an eight year interest rate swap agreement. Under the terms of the agreement, we receive a fixed interest rate of 8.39% and pay a floating interest rate based on LIBOR. The notional amount of the swap was initially \$20.0 million and declines \$4.0 million per year beginning in 2008. The interest rate swap has been designated as a fair value hedge of a portion of our fixed rate 8.39% Senior Notes.

In order to account for these derivatives as hedges, the interest rate swap must be highly effective at offsetting changes in the fair value of the hedged debt. We have assumed that there is no ineffectiveness in the hedge, since all of the critical terms of the hedge match the underlying terms of the hedged debt.

The fair value of the interest rate swap at June 30, 2006 and December 31, 2005 has been recorded as a liability of \$1.4 million and \$0.9 million, respectively, that is included in other noncurrent liabilities, with an offsetting reduction in the carrying value of long-term debt.

As a result of entering into the interest rate swap, we have increased our exposure to interest rate fluctuations. Differences between the fixed rate amounts received and the variable rate amounts paid are recognized in interest expense on an ongoing basis. This rate difference resulted in an increase in interest expense of \$0.1 million during the six months ended June 30, 2006, and a reduction in interest expense of \$0.1 million during the six months ended June 30, 2005.

#### **(11) Acquisitions**

In January 2006, we took steps to ensure our compliance with South African Black Economic Empowerment (BEE) requirements by forming a new South African holding company in which Mineworkers Investment Company (MIC) of Johannesburg, South Africa holds a 25.1% ownership interest. Compliance with BEE, a South African government program similar to Affirmative Action in the United States, is key to achieving meaningful growth in South Africa, particularly in the mining industry. At the same time, we acquired Select Personal Protective Equipment (Select PPE) of South Africa, an established supplier of multi-brand safety equipment and solutions to the South African mining industry. Our existing South African company, MSA Africa, and Select PPE are operating independently under the newly-established South African holding company. We believe that our new South African operating structure significantly improves our market presence and expertise in serving the mining industry and provides significant growth opportunities in the region. The acquisition was recorded using the purchase method of accounting. We are currently determining the fair value of Select PPE assets acquired and liabilities assumed. Our preliminary allocation of the \$7.9 million Select PPE purchase price includes goodwill of \$4.7 million. Operating results for Select PPE have been included in our consolidated financial statements from the acquisition date. Proforma consolidated results, as if the acquisition had occurred at the beginning of 2005, would not be materially different from the results reported.

In September 2005, we acquired Microsensor Systems, Inc. of Bowling Green, Kentucky. Microsensor Systems is a world leader in surface acoustic wave based chemical sensing technology used to detect chemical warfare agents. We believe the acquisition of Microsensor Systems significantly strengthens our position as a premier provider of leading edge detection technology, while expanding our product offerings in the homeland security, emergency responder, law enforcement, military and industrial markets. The initial purchase price of \$12.8 million included \$5.2 million of intangible assets and \$5.6 million of goodwill, which is expected to be deductible for tax purposes. The acquisition agreement provides for additional consideration of up to \$2.3 million to be paid to the former owners based on sales of certain Microsensor Systems products during the five year period from September 1, 2005 through August 31, 2010. Additional consideration will be charged to goodwill when paid. Microsensor Systems operating results have been included in our consolidated financial statements from the acquisition date. Pro forma consolidated results, as if the acquisition had occurred at the beginning of 2005, would not be materially different from the results reported.

#### **(12) Contingencies**

Various lawsuits and claims arising in the normal course of business are pending against us. These lawsuits are primarily product liability claims. We are presently named as a defendant in approximately 2,800 lawsuits primarily involving respiratory protection products allegedly manufactured and sold by us. Collectively, these lawsuits represent a total of approximately 23,000 plaintiffs. Approximately 90% of these lawsuits involve plaintiffs alleging they suffer from silicosis, with the remainder alleging they suffer from other or combined injuries, including asbestosis. These lawsuits typically allege that these conditions resulted in part from respirators that were negligently designed or manufactured by us. Consistent with the experience of other companies involved in silica and asbestos-related litigation, in recent years there has been an increase in the number of asserted claims that could potentially involve us. We cannot determine our potential maximum liability for such claims, in part because the defendants in these lawsuits are often numerous, and the claims generally do not specify the amount of damages sought.

With some limited exceptions, we maintain insurance against product liability claims. We also maintain a reserve for uninsured product liability based on expected settlement charges for pending claims and an estimate of unreported claims derived from experience, sales volumes, and other relevant information. We reevaluate our exposures on an ongoing basis and make adjustments to the reserve as appropriate. Based on information currently available, we believe that the disposition of matters that are pending will not have a materially adverse effect on our financial condition.

In the normal course of business, we make payments to settle product liability claims and related legal fees that are covered by insurance. We record receivables for the portion of these payments that we believe to be probable of recovery from insurance carriers. At June 30, 2006, the net balance of receivables from insurance carriers was \$21.8 million. We evaluate the collectibility of these receivables on an ongoing basis and make adjustments as appropriate.

In connection with our sale of the Callery Chemical facility in Evans City, Pennsylvania, we have retained responsibility for certain environmental costs at this site, where relatively low levels of contamination are known to exist. Under the terms of the asset purchase agreement with BASF, our maximum liability for these matters is capped at \$50.0 million. Based on environmental studies performed prior to the sale of the division, we do not believe that our potential exposure under the terms of this agreement will materially affect our financial condition.

### **(13) Recently Issued Accounting Standards**

In June 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (an interpretation of FASB Statement No. 109). This interpretation was issued to clarify the accounting for uncertainty in income taxes recognized in the financial statements by prescribing a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation is effective beginning January 1, 2007, with the cumulative effect of the change in accounting principle recorded as an adjustment to opening retained earnings. We are currently evaluating the potential impact of this interpretation.

### **Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

*The following discussion and analysis should be read in conjunction with the historical financial statements and other financial information included elsewhere in this report on Form 10-Q. This discussion may contain forward-looking statements that involve risks and uncertainties. The forward-looking statements are not historical facts, but rather are based on current expectations, estimates, assumptions and projections about our industry, business and future financial results. Our actual results could differ materially from the results contemplated by these forward-looking statements due to a number of factors. These factors include, but are not limited to, spending patterns of government agencies, competitive pressures, product liability claims, the success of new product introductions, currency exchange rate fluctuations, the identification and successful integration of acquisitions, and the risks of doing business in foreign countries. For discussion of risk factors affecting our business, see Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2005.*

### **BUSINESS OVERVIEW**

We are a global leader in the development, manufacture and supply of sophisticated products that protect people's health and safety. Sophisticated safety products typically integrate any combination of electronics, mechanical systems and advanced materials to protect users against hazardous or life threatening situations. Our comprehensive line of safety products is used by workers around the world in the fire service, homeland security, construction and other industries, as well as the military.

In recent years, we have concentrated on specific initiatives intended to help improve our competitive position and profitability, including:

identifying and developing promising new markets;

focusing on innovation and new product introductions;

further strengthening relationships with major distributors;

optimizing factory performance and driving operational excellence;

positioning international business to capture significant growth opportunities; and

pursuing strategic acquisitions.

We tailor our product offerings and distribution strategy to satisfy distinct customer preferences that vary across geographic regions. We believe that we best serve these customer preferences by organizing our business into three geographic segments: North America, Europe, and International. Each segment includes a number of operating companies. In 2005, approximately 63%, 21%, and 16% of our net sales were made by our North America, Europe, and International segments, respectively.

*North America.* Our largest manufacturing and research and development facilities are located in the United States. We serve our North American markets with sales and distribution functions in the U.S., Canada, and Mexico.

*Europe.* Our Europe segment includes well-established companies in most Western European countries, and more recently established operations in a number of Eastern European locations. Our largest European companies, based in Germany and France, develop, manufacture, and sell a wide variety of products. Operations in other European countries focus primarily on sales and distribution in their respective home country markets. While some of these companies may perform limited production, most of their sales are of products that are manufactured in our plants in Germany, France, and the U.S., or are purchased from third party vendors.

*International.* Our International segment includes operating entities located in Abu Dhabi, Argentina, Australia, Brazil, Chile, China, Hong Kong, India, Indonesia, Japan, Malaysia, Peru, Singapore, South Africa and Zimbabwe, some of which are in developing regions of the world. Principal manufacturing operations are located in Australia, Brazil, South Africa, and China. These companies develop and manufacture products that are sold primarily in each company's home country and regional markets. The other companies in the International segment focus primarily on sales and distribution in their respective home country markets. While some of these companies may perform limited production, most of their sales are of products that are manufactured in our plants in the U.S., Germany, and France, or are purchased from third party vendors.

We believe that our financial performance in recent years is the result of initiatives that have allowed us to anticipate and respond quickly to market requirements, particularly in the fire service, homeland security, construction and general industries, as well as the military, and reflects our ability to quickly bring to market products that comply with changing industry standards and to create new market demand with innovative products.

## ACQUISITIONS

In January 2006, we took steps to ensure our compliance with South African Black Economic Empowerment (BEE) requirements by forming a new South African holding company in which Mineworkers Investment Company (MIC) of Johannesburg, South Africa holds a 25.1% ownership interest. Compliance with BEE, a South African government program similar to Affirmative Action in the United States, is key to achieving meaningful growth in South Africa, particularly in the mining industry. At the same time, we acquired Select Personal Protective Equipment (Select PPE) of South Africa, an established supplier of multi-brand safety equipment and solutions to the South African mining industry. Our existing South African company, MSA Africa, and Select PPE are operating independently under the newly-established South African holding company. We believe that our new South African operating structure significantly improves our market presence and expertise in serving the mining industry and provides significant growth opportunities in the region.

In September 2005, we acquired Microsensor Systems, Inc. of Bowling Green, Kentucky. Microsensor Systems is a world leader in surface acoustic wave based chemical sensing technology used to detect chemical warfare agents. We believe the acquisition of Microsensor Systems significantly strengthens our position as a premier provider of leading edge detection technology, while expanding our product offerings in the homeland security, emergency responder, law enforcement, military and industrial markets.

## RESULTS OF OPERATIONS

### Three Months Ended June 30, 2006 Compared to Three Months Ended June 30, 2005

*Net Sales.* Net sales for the three months ended June 30, 2006 were \$218.6 million, compared with \$220.1 million in the same period in 2005.

	Three Months Ended		Dollar	Percent
	June 30	June 30	Increase	Increase
(In millions)	2006	2005	(Decrease)	(Decrease)
North America	\$ 121.4	\$ 135.8	\$ (14.4)	(11)%

Edgar Filing: MINE SAFETY APPLIANCES CO - Form 10-Q

Europe	50.3	43.4	6.9	16%
International	46.9	40.9	6.0	15%

Net sales of the North America segment were \$121.4 million for the second quarter of 2006, a decrease of \$14.4 million, or 11%, compared to \$135.8 million for the second quarter of 2005. The sales decrease in the second quarter of 2006 reflects lower shipments of Advanced Combat Helmets and gas masks, partially offset by improved shipments of instruments and head protection. Our shipments of Advanced Combat Helmets to the military were approximately \$13.2 million lower in the current quarter reflecting the completion of certain contracts. As previously disclosed, based on our current contracts with the government, we expect that Advanced Combat Helmet sales will continue to be lower than in the prior year. Gas mask sales were approximately \$5.9 million lower in the current quarter, on lower shipments of military masks, as well as commercial masks to the homeland security market. Our sales of instruments and head protection improved approximately \$4.1 million and \$2.5 million, respectively, on increased demand in construction and industrial markets.

In Europe, net sales for the second quarter of 2006 were \$50.3 million, an increase of \$6.9 million, or 16%, compared to \$43.4 million in the same quarter of 2005. The increase reflects strong shipments of self-contained breathing apparatus, fire helmets, and disposable respirators. Currency translation effects on European sales, when stated in U.S. dollars, were not significant.

Net sales for the International segment were \$46.9 million for the second quarter of 2006, an increase of \$6.0 million, or 15%, compared to \$40.9 million in the second quarter of 2005. The sales increase was primarily in South Africa, where sales were up \$7.2 million, primarily due to the acquisition of Select PPE. Currency translation effects on International segment sales, when stated in U.S. dollars, were not significant.

*Cost of Products Sold.* Cost of products sold was \$131.3 million for the second quarter of 2006, compared to \$134.3 million in the second quarter of 2005.

Cost of products sold, selling, general and administrative expenses, and research and development expenses include net periodic pension benefit costs and credits. Pension credits, combined with pension costs, resulted in net pension credits during the second quarters of 2006 and 2005 of \$1.2 million and \$1.7 million, respectively.

*Gross Profit.* Gross profit for the second quarter of 2006 was \$87.3 million, which was \$1.5 million, or 2%, higher than gross profit of \$85.8 million in the second quarter of 2005. The ratio of gross profit to net sales improved to 39.9% in the second quarter of 2006 compared to 39.0% in the same quarter last year. The higher gross profit ratio in the second quarter of 2006 was primarily related to proportionately lower sales of Advanced Combat Helmets to the U.S. military at gross margins that are generally lower than our margins on commercial sales, partially offset by the higher sales in the European and International segments, where gross margins are generally somewhat lower than in North America.

*Selling, General and Administrative Expenses.* Selling, general and administrative expenses were \$53.9 million during the second quarter of 2006, an increase of \$2.4 million, or 5%, compared to \$51.5 million in the second quarter of 2005. Selling, general and administrative expenses were 24.6% of net sales in the second quarter of 2006 compared to 23.4% of net sales in the second quarter of 2005. Local currency selling, general and administrative expenses in the European and International segments were up approximately \$2.1 million, including approximately \$1.2 million at Select PPE which we acquired in January 2006. The remainder of the increase in the European and International segments was primarily related to additional costs associated with generating and supporting higher sales.

*Research and Development Expense.* Research and development expense was \$7.0 million during the second quarter of 2006, an increase of \$1.0 million, or 17%, compared to \$6.0 million during the second quarter of 2005. The increase occurred in North America and reflects our strategic emphasis on developing innovative new products.

*Depreciation and Amortization Expense.* Depreciation and amortization expense, which is reported in cost of products sold, selling, general and administrative expenses, and research and development expenses, was \$5.2 million for the second quarter of 2006, a decrease of \$1.1 million, or 18%, compared to \$6.3 million for the second quarter of 2005. The decrease was primarily related to the absence of depreciation on computer systems that became fully depreciated during the fourth quarter of 2005.

*Restructuring and Other Charges.* During the second quarter of 2006, we recorded charges of \$0.5 million related to our Project Outlook reorganization effort in North America. Project Outlook is designed to ensure that our North American management teams, employees, product design processes, and operational functions are fully aligned with our strategic goals and the needs of our customers. The plan includes a reorganization of business and support functions in our North American operations that will result in cost reductions and a higher degree of collaboration, focus and efficiency. A significant portion of the Project Outlook cost reductions is being realized through a focused voluntary retirement incentive program (VRIP) that was completed during the first quarter of 2006. Second quarter Project Outlook expenses were primarily related to the relocation of various employee work groups within the new organizational structure. We do not expect that Project Outlook expenses will be significant during the remainder of 2006.

## Edgar Filing: MINE SAFETY APPLIANCES CO - Form 10-Q

*Interest Expense.* Interest expense was \$1.2 million during the second quarter of 2006 compared to \$1.4 million in the same quarter last year. The decrease in interest expense reflects reductions in short and long term debt.

*Currency Exchange Losses.* Currency exchange losses were \$0.9 million in the second quarter of 2006 and \$0.7 million in the second quarter of 2005. Currency exchange losses in the current quarter were primarily related to the weakening of the South African rand. Currency exchange losses in the second quarter of 2005 were primarily due to a weakening of the euro.

*Other Income.* Other income for second quarter of 2006 was \$1.5 million compared to \$1.0 million for the second quarter of 2005. During the current quarter we realized a gain of \$0.9 million on the sale of property in the United States.

*Income Taxes.* The effective tax rate for the second quarter of 2006 was 36.5% compared to 29.6% for the same quarter last year.

In June 2005, we received communication from the Internal Revenue Service indicating that their audits of our federal income tax returns for the years 1995 through 2001 were substantially complete, with no adverse adjustments to research and development credits that we claimed during the period covered by the examinations. On the basis of this communication, our provision for income taxes for the second quarter of 2005 includes a one-time benefit of approximately \$2.0 million, primarily related to the release of previously-established reserves taken on research and development credits claimed in those years. Excluding this discrete item, our effective tax rate for the second quarter of 2005 was 36.9%.

The effective tax rate in the current quarter reflects the expiration of the research and development tax credit in the U.S. Historically, the research and development tax credit has been reinstated retroactively. If this occurs, we estimate a favorable effect of approximately 1% on our effective tax rate for the year will be recognized in the period of reinstatement.

The determination of income tax expense takes into consideration amounts which may be needed to cover exposures for open tax years. We have resolved all matters with the IRS related to our federal income tax returns through 2002 and are awaiting the final clearance on the 1995 through 2001 examination from the Joint Committee on Taxation. We believe that we have made adequate provision for income taxes and interest which may become payable or receivable for years not yet settled. We do not expect any material adverse impact on earnings to result from the resolution of matters related to open tax years.

*Net Income.* Net income for the second quarter of 2006 was \$16.1 million, or \$0.44 per basic share, compared to \$19.2 million, or \$0.53 per basic share, for the same quarter last year.

North American segment net income for the second quarter of 2006 was \$11.6 million, a decrease of \$2.9 million, or 20%, compared to \$14.5 million in the second quarter of 2005. Lower net income in North America was primarily related to the higher effective tax rate and increased research and development expense.

European segment net income during the second quarter of 2006 was \$2.0 million, an increase of \$0.4 million, or 24%, from \$1.6 million during the second quarter of 2005. The increase in European segment net income reflects higher sales, partially offset by an increase in operating expenses.

International segment net income for the second quarter of 2006 was \$3.0 million, a decrease of \$0.5 million, or 15%, compared to \$3.5 million in the same quarter last year. The decrease in International net income was primarily related to lower gross margins in the current quarter and currency exchange losses associated with the South African rand.

### Six Months Ended June 30, 2006 Compared to Six Months Ended June 30, 2005

*Net Sales.* Net sales for the six months ended June 30, 2006 were \$447.0 million, compared with \$448.2 million in the same period in 2005.

	Six Months Ended		Dollar	Percent
	June 30		Increase	Increase
(In millions)	2006	2005	(Decrease)	(Decrease)
North America	\$ 257.9	\$ 281.4	\$ (23.5)	(8)%
Europe	98.1	89.2	8.9	10%
International	91.0	77.6	13.4	17%

Net sales of the North America segment were \$257.9 million for the six months ended June 30, 2006, a decrease of \$23.5 million, or 8%, compared to \$281.4 million for the same period in 2005. The sales decrease in the six months ended June 30, 2006 reflects lower shipments of Advanced Combat Helmets and gas masks, partially offset by improved shipments of instruments and head protection. Our shipments of Advanced Combat Helmets to the military were approximately \$24.4 million lower than in the first half of 2005, reflecting the completion of certain contracts. As previously disclosed, based on our current contracts with the government, we expect that Advanced Combat Helmet sales will continue to be lower than in the prior year. Gas mask sales were approximately \$17.2 million lower in the first six months of 2006, on lower shipments of military masks, as well as commercial masks to the homeland security market. Our sales of instruments and head protection improved approximately \$10.1 million and \$5.4 million, respectively, on increased demand in construction and industrial markets.

In Europe, net sales for the six months ended June 30, 2006 were \$98.1 million, an increase of \$8.9 million, or 10%, compared to \$89.2 million in the same period in 2005. Local currency sales in Europe for the six months ended June 30, 2006 were approximately \$15.2 million higher than in the same period last year. The increase reflects strong shipments of disposable respirators in Germany and France, self-rescuer canisters to the German Army, and fire helmets in Western European markets. The unfavorable effect of the weaker euro reduced net sales when stated in U.S. dollars by approximately \$6.4 million.

Net sales for the International segment were \$91.0 million for the six months ended June 30, 2006, an increase of \$13.4 million, or 17%, compared to \$77.6 million in the same period in 2005. The sales increase was primarily in South Africa, where sales were up \$12.4 million, primarily due to the acquisition of Select PPE. Currency translation effects on International segment sales, when stated in U.S. dollars, were not significant.

*Cost of Products Sold.* Cost of products sold was \$267.1 million for the six months ended June 30, 2006 compared to \$270.6 million in the same period in 2005.

Cost of products sold, selling, general and administrative expenses, and research and development expenses include net periodic pension benefit costs and credits. Pension credits, combined with pension costs, resulted in net pension credits during the six month periods ended June 30, 2006 and 2005 of \$2.5 million and \$3.2 million, respectively.

*Gross Profit.* Gross profit for the six months ended June 30, 2006 was \$179.9 million, which was \$2.3 million, or 1%, higher than gross profit of \$177.6 million in the same period in 2005. The ratio of gross profit to net sales improved to 40.2% in the six months ended June 30, 2006 compared to 39.6% in the same period last year. The higher gross profit ratio in the first half of 2006 was primarily related to proportionately lower sales of Advanced Combat Helmets to the U.S. military at gross margins that are generally lower than our margins on commercial sales, partially offset by higher sales in the European and International segments, where gross margins are generally somewhat lower than in North America.

*Selling, General and Administrative Expenses.* Selling, general and administrative expenses were \$107.4 million during the six months ended June 30, 2006, an increase of \$4.0 million, or 4%, compared to \$103.4 million in the same period in 2005. Selling, general and administrative expenses were 24.0% of net sales in the six months ended June 30, 2006 compared to 23.1% of net sales in the first half of 2005. The increase in selling, general and administrative expenses includes \$2.0 million of incremental stock compensation expense in the North American segment, related to our adoption of FAS 123R, Share Based Payment, on January 1, 2006. FAS 123R requires the recognition of compensation expense for the estimated fair value of stock option grants and immediate expense recognition for restricted stock awards and stock options that are granted to participants who are eligible for retirement. The incremental stock compensation expense relates to restricted stock awards and stock option grants made to officers, key management employees, and directors in 2006. The fair value of the 2006 stock option grants and restricted stock awards was \$4.9 million, of which \$2.2 million was expensed during the six months ended June 30, 2006. The remaining \$2.7 million of fair value will generally be expensed over the three year vesting period. Excluding the incremental stock compensation expense, selling, general and administrative expenses in North America were down \$1.7 million, primarily due to the absence of depreciation expense on computer systems that became fully depreciated during the fourth quarter of 2005. Local currency selling, general and administrative expenses in the European and International segments were up approximately \$5.1 million, including approximately \$2.2 million in South Africa, due to the January 2006 acquisition of Select PPE. The remainder of the selling, general and administrative expense increase in the European and International segments was primarily due to additional costs associated with generating and supporting higher sales. The local currency increase was partially offset, when stated in U.S. dollars, by a favorable currency exchange effect of \$1.4 million, primarily due to a weaker euro.

*Research and Development Expense.* Research and development expense was \$12.5 million during the six months ended June 30, 2006, an increase of \$0.8 million, or 7%, compared to \$11.7 million during the same period in 2005. Higher research and development expense in the six months ended June 30, 2006 occurred in North America and reflects our strategic emphasis on developing innovative new products.

*Depreciation and Amortization Expense.* Depreciation and amortization expense, which is reported in cost of products sold, selling, general and administrative expenses, and research and development expenses, was \$10.5 million for the six months ended June 30, 2006, a decrease of \$2.3 million, or 18%, compared to \$12.8 million for the same period in 2005. The primary reason for lower depreciation expense was the previously-discussed decrease in depreciation of computer systems.

*Restructuring and Other Charges.* During the six months ended June 30, 2006, we recorded charges of \$6.5 million related to our previously-discussed Project Outlook reorganization effort in North America. A significant portion of the Project Outlook cost reductions is being realized through a focused voluntary retirement incentive program (VRIP). In February 2006, approximately 60 employees retired under the terms of the VRIP. Project Outlook charges include \$5.3 million for VRIP retirees (including \$4.8 million in non-cash special termination benefits), \$0.7 million in severance costs related to additional staffing reductions, and \$0.5 million related to the relocation of various employee work groups within the new organizational structure. We do not expect that Project Outlook expenses will be significant during the remainder of 2006.

*Interest Expense.* Interest expense was \$2.4 million during the six months ended June 30, 2006 compared to \$2.6 million in the same period last year. The decrease in interest expense reflects reductions in short and long term debt.

*Currency Exchange Losses.* Currency exchange losses were \$2.0 million in the six months ended June 30, 2006 and \$1.3 million in the same period last year. The currency exchange loss during the current period was primarily related to the weakening of the South African rand. The currency exchange loss during the first half of 2005 was primarily due to the weakening of the euro.

*Other Income.* Other income for the six months ended June 30, 2006 was \$1.7 million compared to \$2.3 million for the same period in 2005.

*Income Taxes.* The effective tax rate for the six months ended June 30, 2006 was 37.4% compared to 33.4% for the same period last year.

In June 2005, we received communication from the Internal Revenue Service indicating that their audits of our federal income tax returns for the years 1995 through 2001 were substantially complete, with no adverse adjustments to research and development credits that we claimed during the period covered by the examinations. On the basis of this communication, our provision for income taxes for the first half of 2005 includes a one-time benefit of approximately \$2.0 million, primarily related to the release of previously-established reserves taken on research and development credits claimed in those years. Excluding this discrete item, our effective tax rate for the six months ended June 30, 2005 was 36.7%.

The higher rate for the six months ended June 30, 2006 reflects the expiration of the research and development tax credit in the U.S. Historically, the research and development tax credit has been reinstated retroactively. If this occurs, we estimate a favorable effect of approximately 1% on our effective tax rate for the year will be recognized in the period of reinstatement.

The determination of income tax expense takes into consideration amounts which may be needed to cover exposures for open tax years. We have resolved all matters with the IRS related to our federal income tax returns through 2002 and are awaiting the final clearance on the 1995 through 2001 examination from the Joint Committee on Taxation. We believe that we have made adequate provision for income taxes and interest which may become payable or receivable for years not yet settled. We do not expect any material adverse impact on earnings to result from the resolution of matters related to open tax years.

*Net Income.* Net income for the six months ended June 30, 2006 was \$31.8 million, or \$0.87 per basic share, compared to \$40.6 million, or \$1.11 per basic share, for the same period last year.

North American segment net income for the six months ended June 30, 2006 was \$23.1 million, a decrease of \$7.7 million, or 25%, compared to \$30.8 million in the same period last year. The reduction in North American net income was primarily due to Project Outlook reorganization charges of \$4.0 million after-tax, incremental stock compensation expense of \$1.2 million after-tax recognized upon the adoption of FAS 123R, and higher income taxes.

European segment net income for the six months ended June 30, 2006 was \$3.8 million, a decrease of \$0.5 million, or 13%, compared to \$4.3 million for the first half of 2005. Net income during the six months ended June 30, 2005 included an after-tax gain of \$0.4 million on the sale of idle production equipment in Germany. Excluding that non-recurring gain in 2005, European segment net income remained steady, reflecting higher sales, offset by increased operating expenses.

International segment net income for the six months ended June 30, 2006 was \$6.1 million, a decrease of \$0.3 million, or 6%, compared to \$6.4 million in the same period last year. The decrease in International net income was primarily related to lower gross margins in the current period and currency exchange losses associated with the South African rand.

## **LIQUIDITY AND CAPITAL RESOURCES**

Our main sources of liquidity are cash generated from operations and borrowing capacity. Our principal liquidity requirements are for working capital, capital expenditures, and principal and interest payments on outstanding indebtedness.

Cash and cash equivalents decreased \$4.8 million during the six months ended June 30, 2006, compared to a decrease of \$15.0 million during the six months ended June 30, 2005. The significant decrease in cash during the first six months of 2005 was primarily due to the purchase of \$54.0 million of treasury stock, partially offset by a \$30.9 million increase in short term debt.

Operating activities provided cash of \$23.1 million during the six months ended June 30, 2006, compared to providing cash of \$26.1 million in the six months ended June 30, 2005. Trade receivables were \$162.5 million at June 30, 2006 and \$169.4 million at December 31, 2005. LIFO inventories were \$140.3 million at June 30, 2006 and \$119.7 million at December 31, 2005. Approximately \$4.3 million of the increase in inventories was related to the acquisition of Select PPE in South Africa. The remainder of the increase in inventories occurred primarily in North America and Europe and related to certain factory level inventories for products that are selling well.

Cash flow from operating activities during the six months ended June 30, 2006 reflects the settlement of 197 product liability claims for a total of \$18.3 million. Under the terms of the settlement agreements, we advanced payments of \$10.2 million during the first half of 2006 that were the responsibility of our insurance carriers. We will pay the remaining \$8.1 million related to these settlements during the third quarter of 2006. We have recorded receivables of \$17.4 million for the portion of these settlements that we believe to be probable of recovery from insurance carriers. As of June 30, 2006, we have received \$1.5 million of this balance from insurance carriers.

Investing activities used cash of \$18.2 million during the six months ended June 30, 2006, compared to using \$11.1 million in the same period last year. During the six month periods ended June 30, 2006 and 2005, we used cash of \$9.4 million and \$10.7 million, respectively, for property additions, primarily production equipment in the U.S. During the first six months of 2006, we used cash of \$7.9 million to acquire Select PPE in South Africa. Cash used for other investing activities during the first six months of both 2006 and 2005 related primarily to the technology transfers and licensing arrangements.

Financing activities used \$11.0 million of cash in the six months ended June 30, 2006, compared to using \$27.9 million in the same period last year. During the first six months of 2006, we used \$11.7 million of cash to pay dividends compared to paying dividends of \$8.8 million in the same period last year. During the six months ended June 30, 2006, we purchased \$16.5 million in treasury shares and financed a portion of those purchases through short term borrowings, which increased \$12.8 million. During the same period in 2005, we purchased \$54.0 million treasury shares and short-term borrowings increased \$30.9 million.

## **CUMULATIVE TRANSLATION ADJUSTMENTS**

The position of the U.S. dollar relative to international currencies at June 30, 2006 resulted in a translation gain of \$4.3 million being credited to the cumulative translation adjustments shareholders' equity account in the six months ended June 30, 2006, compared to a loss of \$9.7 million in the six months ended June 30, 2005. Translation gains in the first half of 2006 were primarily related to the strengthening of the euro and the Brazilian real, partially offset by a weakening of the South African rand. Translation losses in 2005 were primarily due to the weakening of the euro and South African rand.

## **COMMITMENTS AND CONTINGENCIES**

We have purchase commitments for materials, supplies, services, and property, plant and equipment as part of our ordinary conduct of business.

During 2003, we sold our real property in Berlin, Germany for \$25.7 million, resulting in a gain of \$13.6 million. At the same time, we entered into an eight year agreement to lease back the portion of the property that we occupy. Under sale-leaseback accounting, \$12.1 million of gain was deferred and is being amortized over the term of the lease.

In 2003, we entered into a lease agreement with BASF pertaining to that portion of the Callery Chemical site that is occupied by our Evans City, Pennsylvania manufacturing operations. The initial term of the lease was one year, with a renewal option for five successive one year periods. In September 2005, we exercised our second one year renewal option.

Various lawsuits and claims arising in the normal course of business are pending against us. These lawsuits are primarily product liability claims. We are presently named as a defendant in approximately 2,800 lawsuits primarily involving respiratory protection products allegedly manufactured and sold by us. Collectively, these lawsuits represent a total of approximately 23,000 plaintiffs. Approximately 90% of these lawsuits involve plaintiffs alleging they suffer from silicosis, with the remainder alleging they suffer from other or combined injuries, including asbestosis. These lawsuits typically allege that these conditions resulted in part from respirators that were negligently designed or manufactured by us. Consistent with the experience of other companies involved in silica and asbestos-related litigation, in recent years there has been an increase in the number of asserted claims that could potentially involve us. We cannot determine our potential maximum liability for such claims, in part because the defendants in these lawsuits are often numerous, and the claims generally do not specify the amount of damages sought.

With some limited exceptions, we maintain insurance against product liability claims. We also maintain a reserve for uninsured product liability based on expected settlement charges for pending claims and an estimate of unreported claims derived from experience, sales volumes and other relevant information. We reevaluate our exposures on an ongoing basis and make adjustments to the reserve as appropriate. Based on information currently available, we believe that the disposition of matters that are pending will not have a materially adverse effect on our financial condition.

In the normal course of business, we make payments to settle product liability claims and related legal fees that are covered by insurance. We record receivables for the portion of these payments that we believe to be probable of recovery from insurance carriers. At June 30, 2006, the balance of receivables from insurance carriers was \$21.8 million. We evaluate the collectibility of these receivables on an ongoing basis and make adjustments as appropriate.

In connection with our sale of the Callery Chemical facility in Evans City, Pennsylvania, we have retained responsibility for certain environmental costs at this site, where relatively low levels of contamination are known to exist. Under the terms of the asset purchase agreement with BASF, our maximum liability for these matters is capped at \$50.0 million. Based on environmental studies performed prior to the sale of the division, we do not believe that our potential exposure under the terms of this agreement will materially affect our financial condition.

## **CRITICAL ACCOUNTING POLICIES AND ESTIMATES**

We prepare our consolidated financial statements in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and the related disclosures. We evaluate these estimates and judgments on an on-going basis based on historical experience and various assumptions that we believe to be reasonable under the circumstances. However, different amounts could be reported if we had used different assumptions and in light of different facts and circumstances. Actual amounts could differ from the estimates and judgments reflected in our financial statements.

We believe that the following are the more critical judgments and estimates used in preparation of our financial statements.

**Accounting for contingencies.** We accrue for contingencies in accordance with FAS No. 5, Accounting for Contingencies, when we believe that it is probable that a liability or loss has been incurred and the amount can be reasonably estimated. Contingencies relate to uncertainties that require our judgment both in assessing whether or not a liability or loss has been incurred and in estimating the amount of the probable loss. Significant contingencies affecting our financial statements include pending or threatened litigation, including product liability claims, and product warranties.

**Product liability.** We face an inherent business risk of exposure to product liability claims arising from the alleged failure of our products to prevent the types of personal injury or death against which they are designed to protect. We accrue for our estimates of the probable costs to be incurred in the resolution of product liability claims. These estimates are based on actuarial valuations, past experience, and our judgments regarding the probable outcome of pending and threatened claims. Due to uncertainty as to the ultimate outcome of pending and threatened claims, as well as the incidence of future claims, it is possible that future results could be materially affected by changes in our assumptions and estimates related to product liability matters. Our product liability expense averaged less than 1% of net sales from continuing operations during the three years ended December 31, 2005.

**Product warranties.** We accrue for the estimated probable cost of product warranties at the time that sales are recognized. Our estimates are principally based on historical experience. We also accrue for our estimates of the probable costs of corrective action when significant product quality issues are identified. These estimates are principally based on our assumptions regarding the cost of corrective action and the probable number of units to be repaired or replaced. Our product warranty obligation is affected by product failure rates, material usage, and service delivery costs incurred in correcting a product failure. Due to the uncertainty and potential volatility of these factors, it is possible that future results could be materially affected by changes in our assumptions or the effectiveness of our strategies related to these matters. Our product warranty expense averaged less than 2% of net sales during the three years ended December 31, 2005.

**Income taxes.** We account for income taxes in accordance with FAS No. 109, Accounting for Income Taxes, which requires that deferred tax assets and liabilities be recognized using enacted tax rates for the effect of temporary differences between the book and tax basis of recorded assets and liabilities. FAS No. 109 also requires that deferred tax assets be reduced by valuation allowances if it is more likely than not that some portion of the deferred tax asset will not be realized.

We record valuation allowances to reduce deferred tax assets to the amounts that we estimate are probable to be realized. When assessing the need for valuation allowances, we consider projected future taxable income and prudent and feasible tax planning strategies. Should a change in circumstances lead to a change in our judgments about the realizability of deferred tax assets in future years, we would adjust the related valuation allowances in the period that the change in circumstances occurs, along with a corresponding charge or credit to income. There were no valuation allowances as of June 30, 2006.

We record an estimated income tax liability based on our best judgment of the amounts likely to be paid in the various tax jurisdictions in which we operate. The tax liabilities ultimately paid are dependent on a number of factors, including the resolution of tax audits, and may differ from the amounts recorded. Tax liabilities are adjusted through income when it becomes probable that the actual liability differs from the amount recorded.

**Stock based compensation.** On January 1, 2006, we adopted FAS No. 123R, Share-Based Payment, which requires the recognition of stock-based compensation expense for the fair value of the grant over the requisite service period. We elected the modified prospective application method for adoption of FAS 123R, and prior period financial statements have not been restated.

Prior to the adoption of FAS No. 123R, we accounted for stock-based compensation in accordance with the provisions of APB Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations using the intrinsic value method, which resulted in no compensation expense for stock options granted; and we used the nominal vesting approach related to retirement-eligible employees, in which the compensation expense was recognized over the original vesting period.

On December 14, 2005, we accelerated the vesting of 194,786 unvested stock options that were granted in 2005. The accelerated options have a weighted average exercise price of \$45.68, and represented approximately 13% of the options outstanding. The decision to accelerate the vesting of the 2005 options was made primarily to avoid recognizing the related stock compensation expense in future financial statements as required by FAS 123R. The accelerated vesting of the 2005 stock options will reduce our after tax stock-based compensation expense in 2006, 2007, and 2008 by approximately \$0.7 million, \$0.7 million, and \$0.1 million, respectively.

Stock-based compensation grants to management and key employees are generally made during the first quarter of each year. Under the terms of our stock-based compensation plans, there is no requisite service period for individuals who are retirement-eligible. Therefore, beginning in 2006, a larger portion of stock-based compensation expense is recognized in the first quarter for retirement-eligible employees.

We use the Black-Scholes option pricing model to estimate fair value of stock options at the grant date. Determining the fair value of stock options requires a number of judgments, including estimates of the risk-free interest rate, expected dividend yield, expected volatility, and expected life.

**Pensions and other postretirement benefits.** We account for our pension and postretirement benefit plans as required under FAS No. 87, Employers Accounting for Pensions, and FAS No. 106, Employers Accounting for Postretirement Benefits Other than Pensions. Accounting for the net periodic benefit costs and credits for these plans requires us to estimate the cost of benefits to be provided well into the future and to attribute these costs over the expected work life of the employees participating in these plans. These estimates require our judgment about discount rates used to determine these obligations, expected returns on plan assets, rates of future compensation increases, rates of increase in future health care costs, participant withdrawal and mortality rates, and participant retirement ages. Differences between our estimates and actual results may significantly affect the cost of our obligations under these plans and could cause net periodic benefit costs

and credits to change materially from year to year. The discount rate assumptions used in determining projected benefit obligations are based on published long-term bond indices. We reduced the assumed discount rates in 2005, reflecting a decline in long-term bond rates.

**Goodwill.** As required by FAS No. 142, Goodwill and Other Intangible Assets, each year we evaluate for goodwill impairment by comparing the fair value of each of our reporting units with its carrying value. If carrying value exceeds fair value, then a possible impairment of goodwill exists and requires further evaluation. We estimate the fair value of our reporting units using a combination of discounted cash flow analysis and market capitalization based on historical and projected financial information. We apply our best judgment in assessing the reasonableness of the financial projections and other estimates used to determine the fair value of each reporting unit.

#### **RECENTLY ISSUED ACCOUNTING STANDARDS**

In June 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (an interpretation of FASB Statement No. 109). This interpretation was issued to clarify the accounting for uncertainty in income taxes recognized in the financial statements by prescribing a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation is effective beginning January 1, 2007, with the cumulative effect of the change in accounting principle recorded as an adjustment to opening retained earnings. We are currently evaluating the potential impact of this interpretation.

#### **Item 3. Quantitative and Qualitative Disclosures About Market Risk**

Market risk represents the risk of adverse changes in the value of a financial instrument caused by changes in currency exchange rates, interest rates, and equity prices. We are exposed to market risks related to currency exchange rates and interest rates.

**Currency exchange rate sensitivity.** We are subject to the effects of fluctuations in currency exchange rates on various transactions and on the translation of the reported financial position and operating results of our non-U.S. companies from local currencies to U.S. dollars. A hypothetical 10% strengthening or weakening of the U.S. dollar would increase or decrease our reported sales and net income for the six months ended June 30, 2006 by approximately \$18.9 million and \$1.0 million, respectively. When appropriate, we may attempt to limit our transactional exposure to changes in currency exchange rates through contracts or other actions intended to reduce existing exposures by creating offsetting currency exposures. At June 30, 2006, contracts for the purpose of hedging cash flows were not significant.

**Interest Rate Sensitivity.** We are exposed to changes in interest rates primarily as a result of borrowing and investing activities used to maintain liquidity and fund business operations. Because of the relatively short maturities of temporary investments and the variable rate nature of industrial development debt, these financial instruments are reported at carrying values which approximate fair values.

We hold one interest rate swap agreement, which is used to hedge the fair market value on a portion of our 8.39% fixed rate long-term debt. At June 30, 2006, the swap agreement had a notional amount of \$20.0 million and a fair market value in

favor of the bank of \$1.4 million. The swap will expire in 2012. The notional amount of the swap declines \$4.0 million per year beginning in 2008. A hypothetical increase of 10% in market interest rates would result in a decrease of approximately \$0.4 million in the fair value of the interest rate swap.

We have \$44.0 million of fixed rate debt which matures at various dates through 2012. The incremental increase in the fair value of fixed rate long term debt resulting from a hypothetical 10% decrease in interest rates would be approximately \$0.8 million, excluding the impact of outstanding hedge instruments. However, our sensitivity to interest rate declines and the corresponding increase in the fair value of our debt portfolio would unfavorably affect earnings and cash flows only to the extent that we elected to repurchase or retire all or a portion of our fixed rate debt portfolio at prices above carrying values.

Item 4. Controls and procedures

(a) *Evaluation of disclosure controls and procedures.* Based on their evaluation as of the end of the period covered by this Form 10-Q, the Company's principal executive officer and principal financial officer have concluded that the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act)) are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms.

(b) *Changes in internal control.* There were no changes in the Company's internal control over financial reporting that occurred during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

Not Applicable.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) Issuer Purchases of Equity Securities

Period		Total Number of Shares Purchased as Part of	Maximum Number of Shares that May Yet Be Purchased Under the
April 1	April 30, 2006	4,400	2,309,500
May 1	May 30, 2006	195,600	2,148,560
June 1	June 30, 2006	62,000	2,142,310

## Edgar Filing: MINE SAFETY APPLIANCES CO - Form 10-Q

On November 2, 2005, the Board of Directors authorized the purchase of up to \$100 million of common stock from time to time in private transactions and on the open market. The share purchase program has no expiration date. The maximum shares that may yet be purchased is calculated based on the dollars remaining under the program and the respective month-end closing share price.

We do not have any other share repurchase programs.

Item 4. Submission of Matters to a Vote of Security Holders

(a) May 11, 2006 - Annual Meeting

(b) Directors elected at Annual Meeting:

Calvin A. Campbell, Jr.

Thomas B. Hotopp

John T. Ryan III

Directors whose term of office continued after the meeting:

James A. Cederna

John C. Unkovic

Diane M. Pearse

L. Edward Shaw, Jr.

Thomas H. Witmer

(c) Election of one Director for a term of one year:

Calvin A. Campbell, Jr.	For	36,079,887
	Withhold	329,710
	Abstentions/Broker Nonvotes	

Election of two Directors for a term of three years:

Thomas B. Hotopp	For	34,174,321
	Withhold	2,235,276
	Abstentions/Broker Nonvotes	

John T. Ryan III	For	34,295,680
	Withhold	2,113,917
	Abstentions/Broker Nonvotes	

Selection of PricewaterhouseCoopers LLP as independent accountants for the year ending December 31, 2006.

	For	36,124,286
	Against	250,141
	Abstentions/Broker Nonvotes	35,170

(d) Not Applicable

Item 6. Exhibits

Edgar Filing: MINE SAFETY APPLIANCES CO - Form 10-Q

- 31.1 Certification of Chief Executive Officer pursuant to Rule 13a-14(a)
- 31.2 Certification of Chief Financial Officer pursuant to Rule 13a-14(a)
- 32 Certification of Chief Executive Officer and Chief Financial Officer pursuant to 18 U.S.C. (S)1350

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

August 2, 2006
