LG DISPLAY REPORTS FOURTH QUARTER 2010 RESULTS

SEOUL, Korea January 21, 2011 LG Display [NYSE: LPL, KRX: 034220], a leading innovator of TFT-LCD technology, today reported unaudited earnings results based on consolidated IFRS (International Financial Reporting Standards) for the three-month period ending December 31, 2010.

Sales in the fourth quarter of 2010 decreased by 3% to KRW 6,483 billion from sales of KRW 6,698 billion in the third quarter of 2010, and increased by 10% compared to KRW 5,905 billion in the fourth quarter of 2009.

Operating loss in the fourth quarter of 2010 was KRW 387 billion compared to operating profits of KRW 182 billion in the third quarter of 2010, and KRW 313 billion in the fourth quarter of 2009.

EBITDA in the fourth quarter of 2010 was KRW 396 billion, a decrease of 60% from KRW 986 billion in the third quarter of 2010 and a year-on-year decrease of 64% from KRW 1,091 billion in the fourth quarter of 2009.

Net loss in the fourth quarter of 2010 was KRW 268 billion compared to operating profits of KRW 224 billion in the third quarter of 2010, and KRW 502 billion in the fourth quarter of 2009.

The company reflected the European Commission fines related to the alleged past anticompetitive acts in the LCD industry as an operating loss in the fourth quarter.

However, the company posted a record high annual sales and stable earnings in 2010. Annual sales was KRW 25,512 billion, an increase of 27% from KRW 20,038 billion in 2009, and annual operating profit was KRW 1,310 billion, an increase of 30% from KRW 1,010 billion year-on-year.

Mr. Young Soo Kwon, CEO of LG Display, noted "There were sharp changes in market conditions mainly owing to inventory adjustment by several customers and distribution channels in the latter half of last year. But on the contrary, LG Display was able to attain stable earnings by expanding its market share and the proportion of premium products as we gained recognition from customers and the market with our differentiated technological capabilities, including IPS(In-Plane Switching). Despite the current challenges in the LCD industry, we are carrying out proactive management activities based on differentiated products and confidence. Recently, we strengthened our partnership with customers worldwide with the launching of FPR 3D panels that are comfortable on the eyes."

The company shipped a total of 792 million square meters of net display area in the fourth quarter of 2010, an increase of 10% quarter-on-quarter. TFT-LCD panels for TVs, monitors, notebook PCs and mobile applications accounted for 56%, 19%, 17% and 8%, respectively, on a revenue basis in the fourth quarter of 2010.

With KRW 3,134 billion of cash and cash equivalents and 116% of liability to equity ratio as of December 31, 2010, the financial structure of the company remains stable.

Outlook

The following expectations are based on information as of January 21, 2011. The Company does not expect to update its expectations until next quarter's earnings announcement. However, the Company reserves the right to update its full business outlook, or any portion thereof, at any time and for any reason.

LG Display expects total display area shipment in the first quarter to decrease by a high single digit percentage compare to the fourth quarter. The company also expects the decline of TV panel price in the first quarter to decelerate and IT panel prices are expected to remain stabilized.

Ref.) LG Display reported consolidated financial statements based on International Financial Reporting Standards (IFRS) from the first quarter of 2010. Figures for 3Q '10 and 3Q '09 shown in the press release are also based on IFRS.

Earnings Conference and Conference Call

LG Display will hold a Korean language earnings conference on January 21, 2011, at 4:30 p.m. Korea Standard Time at the LG Twin Tower Auditorium (East Tower, B1) in 20 Yeoido-dong, Yeongdeungpo-gu, Seoul, Korea.
