Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995.
This quarterly report on Form 10-Q contains forward-looking statements about U.S. Bancorp. Statements that are not historical or current facts, including statements about beliefs and expectations, are forward-looking statements and are based on the information available to, and assumptions and estimates made by, management as of the date hereof. These forward-looking statements cover, among other things, anticipated future revenue and expenses and the future plans and prospects of U.S. Bancorp. Forward-looking statements involve inherent risks and uncertainties, and important factors could cause actual results to differ materially from those anticipated. Global and domestic economies could fail to recover from the recent economic downturn or could experience another severe contraction, which could adversely affect U.S. Bancorp s revenues and the values of its assets and liabilities. Global financial markets could experience a recurrence of significant turbulence, which could reduce the availability of funding to certain financial institutions and lead to a tightening of credit, a reduction of business activity, and increased market volatility. Continued stress in the commercial real estate markets, as well as a delay or failure of recovery in the residential real estate markets could cause additional credit losses and deterioration in asset values. In addition, U.S. Bancorp s business and financial performance is likely to be negatively impacted by recently enacted and future legislation and regulation. U.S. Bancorp s results could also be adversely affected by deterioration in general business and economic conditions; changes in interest rates; deterioration in the credit quality of its loan portfolios or in the value of the collateral securing those loans; deterioration in the value of securities held in its investment securities portfolio; legal and regulatory developments; increased competition from both banks and non-banks; changes in customer behavior and preferences; effects of mergers and acquisitions and related integration; effects of critical accounting policies and judgments; and management sability to effectively manage credit risk, residual value risk, market risk, operational risk, interest rate risk, and liquidity risk.

For discussion of these and other risks that may cause actual results to differ from expectations, refer to U.S. Bancorp s Annual Report on Form 10-K for the year ended December 31, 2012, on file with the Securities and Exchange Commission, including the sections entitled Risk Factors and Corporate Risk Profile contained in Exhibit 13, and all subsequent filings with the Securities and Exchange Commission under Sections 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934. However, factors other than these also could adversely affect U.S. Bancorp s results, and the reader should not consider these factors to be a complete set of all potential risks or uncertainties. Forward-looking statements speak only as of the date hereof, and U.S. Bancorp undertakes no obligation to update them in light of new information or future events.

## Management s Discussion and Analysis

## OVERVIEW

Earnings Summary U.S. Bancorp and its subsidiaries (the Company ) reported net income attributable to U.S. Bancorp of $\$ 1.4$ billion for the first quarter of 2013 , or $\$ .73$ per diluted common share, compared with $\$ 1.3$ billion, or $\$ .67$ per diluted common share for the first quarter of 2012 . Return on average assets and return on average common equity were 1.65 percent and 16.0 percent, respectively, for the first quarter of 2013 , compared with 1.60 percent and 16.2 percent, respectively, for the first quarter of 2012 . The provision for credit losses was $\$ 30$ million lower than net charge-offs for the first quarter of 2013 , compared with $\$ 90$ million lower than net charge-offs for the first quarter of 2012 .

Total net revenue, on a taxable-equivalent basis, for the first quarter of 2013 was $\$ 55$ million (1.1 percent) lower than the first quarter of 2012 , reflecting a 3.3 percent decrease in noninterest income, partially offset by a .7 percent increase in net interest income. The increase in net interest income over a year ago was the result of higher average earning assets, continued growth in lower cost core deposit funding and the positive impact from maturities of higher rate long-term debt during 2012, partially offset by decreases in loan and investment securities yields. Noninterest income decreased over a year ago, primarily due to lower mortgage banking and other revenue, partially offset by an increase in payments-related revenue and trust and investment management fees.

Noninterest expense in the first quarter of 2013 was $\$ 90$ million ( 3.5 percent) lower than the first quarter of 2012, primarily due to favorable variances in litigation, regulatory and insurance-related costs and lower marketing and business development expense, partially offset by higher compensation and employee benefits expense.

The provision for credit losses for the first quarter of 2013 of $\$ 403$ million was $\$ 78$ million ( 16.2 percent) lower than the first quarter of 2012. Net charge-offs in the first quarter of 2013 were $\$ 433$ million, compared with $\$ 571$ million in the first quarter of 2012. Refer to Corporate Risk Profile for further information on the provision for credit losses, net charge-offs, nonperforming assets and other factors
considered by the Company in assessing the credit quality of the loan portfolio and establishing the allowance for credit losses.

## STATEMENT OF INCOME ANALYSIS

Net Interest Income Net interest income, on a taxable-equivalent basis, was $\$ 2.7$ billion in the first quarter of 2013, an increase of $\$ 19$ million (.7 percent) over the first quarter of 2012. The increase was the result of growth in average earning assets and lower cost core deposit funding, partially offset by a lower net interest margin. Average earning assets were $\$ 13.9$ billion ( 4.6 percent) higher in the first quarter of 2013, compared with the first quarter of 2012 , driven by increases of $\$ 12.3$ billion ( 5.8 percent) in loans, $\$ 2.0$ billion ( 2.8 percent) in investment securities and $\$ 1.9$ billion ( 27.4 percent) in loans held for sale, partially offset by a decrease in other earning assets of $\$ 2.2$ billion (19.0 percent) primarily due to lower cash balances held at the Federal Reserve. The net interest margin in the first quarter of 2013 was 3.48 percent, compared with 3.60 percent in the first quarter of 2012 . The decrease in the net interest margin from the first quarter of 2012 primarily reflected higher balances in lower-yielding investment securities and loans, partially offset by lower rates on deposits, maturities of higher rate long-term debt during 2012 and a reduction in the cash balances held at the Federal Reserve. Refer to the Consolidated Daily Average Balance Sheet and Related Yields and Rates table for further information on net interest income.

Average total loans for the first quarter of 2013 were $\$ 12.3$ billion ( 5.8 percent) higher than the first quarter of 2012 , driven by growth in residential mortgages ( 19.2 percent), commercial loans ( 14.3 percent) and commercial real estate loans ( 3.4 percent). These increases were driven by higher demand for loans from new and existing customers. The increases were partially offset by declines in credit card loans ( 1.5 percent), other retail loans (1.4 percent) and loans covered by loss sharing agreements with the Federal Deposit Insurance Corporation ( FDIC ) ( 24.0 percent). Average loans acquired in FDIC-assisted transactions that are covered by loss sharing agreements with the FDIC ( covered loans) were $\$ 11.0$ billion in the first quarter of 2013 , compared with $\$ 14.5$ billion in the same period of 2012.

## Table of Contents

Table 2 Noninterest Income

|  | Three Months Ended |
| :--- | :---: | :---: | :---: |
|  |  |
|  |  |
|  |  |

* Not meaningful.

Average investment securities in the first quarter of 2013 were $\$ 2.0$ billion ( 2.8 percent) higher than the first quarter of 2012 , primarily due to purchases of U.S. government agency-backed securities, net of prepayments and maturities.

Average total deposits for the first quarter of 2013 were $\$ 16.7$ billion ( 7.3 percent) higher than the first quarter of 2012. Average noninterest-bearing deposits for the first quarter of 2013 were $\$ 2.8$ billion ( 4.4 percent) higher than the same period of 2012 , driven by growth in Consumer and Small Business Banking balances. Average total savings deposits were $\$ 10.7$ billion ( 8.7 percent) higher in the first quarter of 2013, compared with the first quarter of 2012, the result of growth in Consumer and Small Business Banking balances primarily from continued strong participation in a consumer savings product offering, as well as higher corporate trust and broker-dealer balances. Average time certificates of deposit less than $\$ 100,000$ were $\$ 1.3$ billion ( 9.0 percent) lower in the first quarter of 2013, compared with the same period of 2012, due to maturities. Average time deposits greater than $\$ 100,000$ were $\$ 4.6$ billion ( 16.7 percent) higher in the first quarter of 2013 , compared with the first quarter of 2012, principally due to growth in wholesale banking and corporate trust balances. Time deposits greater than $\$ 100,000$ are managed as an alternative to other funding sources such as wholesale borrowing, based largely on relative pricing.

Provision for Credit Losses The provision for credit losses for the first quarter of 2013 decreased $\$ 78$ million (16.2 percent) from the first quarter of 2012. Net charge-offs decreased $\$ 138$ million ( 24.2 percent) in the first quarter of 2013 , compared with the first quarter of

2012, principally due to improvement in the commercial and commercial real estate portfolios. The provision for credit losses was lower than net charge-offs by $\$ 30$ million in the first quarter of 2013 , compared with $\$ 90$ million lower than net charge-offs in the first quarter of 2012. Refer to Corporate Risk Profile for further information on the provision for credit losses, net charge-offs, nonperforming assets and other factors considered by the Company in assessing the credit quality of the loan portfolio and establishing the allowance for credit losses.

Noninterest Income Noninterest income in the first quarter of 2013 was $\$ 2.2$ billion, a decrease of $\$ 74$ million ( 3.3 percent), compared with the first quarter of 2012. The decrease from a year ago was principally due to a reduction in other income, driven by lower equity investment and retail leasing revenue, and a decrease in mortgage banking revenue due to lower origination and sales revenue, partially offset by an increase in servicing income and a favorable change in the fair value of mortgage servicing rights ( MSRs ). In addition, commercial products revenue was lower from a year ago due to lower syndication and standby letters of credit fees, partially offset by higher bond underwriting fees. Partially offsetting these variances was an increase in credit and debit card revenue over the prior year, driven by business expansion, and an increase in merchant processing services revenue due to higher product fees and business expansion. Trust and investment management fees also increased over the prior year, reflecting improved market conditions and business expansion. In addition, investment products fees increased compared with the prior year, due to higher sales and fee volumes.

## Table of Contents

## Table 3 Noninterest Expense

|  | Three Months Ended |  |  |
| :---: | :---: | :---: | :---: |
|  | March 31, |  |  |
| (Dollars in Millions) | 2013 | 2012 | Percent <br> Change |
| Compensation | \$ 1,082 | \$ 1,052 | 2.9\% |
| Employee benefits | 310 | 260 | 19.2 |
| Net occupancy and equipment | 235 | 220 | 6.8 |
| Professional services | 78 | 84 | (7.1) |
| Marketing and business development | 73 | 109 | (33.0) |
| Technology and communications | 211 | 201 | 5.0 |
| Postage, printing and supplies | 76 | 74 | 2.7 |
| Other intangibles | 57 | 71 | (19.7) |
| Other | 348 | 489 | (28.8) |
| Total noninterest expense | \$ 2,470 | \$ 2,560 | (3.5)\% |
| Efficiency ratio (a) | 50.7\% | 51.9\% |  |

(a) Computed as noninterest expense divided by the sum of net interest income on a taxable-equivalent basis and noninterest income excluding securities gains (losses), net.

Noninterest Expense Noninterest expense in the first quarter of 2013 was $\$ 2.5$ billion, a decrease of $\$ 90$ million ( 3.5 percent), compared with the first quarter of 2012. The decrease in noninterest expense from a year ago was primarily due to a reduction in other expense and marketing and business development costs, partially offset by higher compensation and employee benefits expenses. Other expense decreased due to lower litigation, regulatory and insurance-related costs and lower FDIC insurance expense, partially offset by higher costs related to investments in affordable housing and other tax-advantaged projects. Marketing and business development expense was lower, primarily reflecting the timing of charitable contributions in 2012. In addition, other intangibles expense decreased from the same period of the prior year due to the reduction or completion of the amortization of certain intangibles, and professional services expense was lower due to a reduction in mortgage servicing review-related costs. Compensation expense increased primarily as a result of growth in staffing for business initiatives and business expansion, in addition to merit increases. Employee benefits expense increased due to higher pension costs and staffing levels. In addition, net occupancy and equipment expense increased over the same period of the prior year due to business initiatives and expansion, along with higher maintenance costs. Technology and communications expense was higher due to business expansion and technology projects.

Income Tax Expense The provision for income taxes was $\$ 558$ million (an effective rate of 28.7 percent) for the first quarter of 2013 , compared with $\$ 527$ million (an effective rate of 28.8 percent) for the first quarter of 2012 . For further information on income taxes, refer to Note 10 of the Notes to Consolidated Financial Statements.

## BALANCE SHEET ANALYSIS

Loans The Company s loan portfolio was $\$ 223.4$ billion at March 31, 2013, essentially unchanged from December 31, 2012, the result of increases in residential mortgages, commercial real estate and commercial loans, partially offset by lower credit card, other retail and covered loans.

Residential mortgages held in the loan portfolio increased $\$ 2.0$ billion (4.5 percent) at March 31, 2013, compared with December 31, 2012, reflecting origination and refinancing activity due to the low interest rate environment. Residential mortgages originated and placed in the Company s loan portfolio are primarily well-secured jumbo mortgages and branch-originated first lien home equity loans to borrowers with high credit quality. The Company generally retains portfolio loans through maturity; however, the Company s intent may change over time based upon various factors such as ongoing asset/liability management activities, assessment of product profitability, credit risk, liquidity needs, and capital implications. If the Company $s$ intent or ability to hold an existing portfolio loan changes, it is transferred to loans held for sale.

Commercial real estate loans and commercial loans increased $\$ 447$ million ( 1.2 percent) and $\$ 100$ million (. 2 percent), respectively, at March 31, 2013, compared with December 31, 2012, reflecting higher demand from new and existing customers.

## Edgar Filing: US BANCORP \DE\ - Form 10-Q

Credit card loans decreased $\$ 886$ million ( 5.2 percent) at March 31, 2013, compared with December 31, 2012, the result of customers paying down their balances. Other retail loans, which include retail leasing, home equity and second mortgages and other retail loans, decreased \$1.0 billion ( 2.2 percent) at March 31, 2013, compared with December 31, 2012. The decrease was primarily driven by lower home equity and second mortgages and student loan balances.

## Table of Contents

Loans Held for Sale Loans held for sale, consisting primarily of residential mortgages to be sold in the secondary market, were $\$ 7.7$ billion at March 31, 2013, compared with $\$ 8.0$ billion at December 31, 2012. The decrease in loans held for sale was principally due to a lower amount of residential mortgage loan originations during the first quarter of 2013, as compared with the previous quarter.

Most of the residential mortgage loans the Company originates follow guidelines that allow the loans to be sold into existing, highly liquid secondary markets; in particular in government agency transactions and to government-sponsored enterprises ( GSEs ).

Investment Securities Investment securities totaled $\$ 75.3$ billion at March 31, 2013, compared with $\$ 74.5$ billion at December 31, 2012. The $\$ 758$ million ( 1.0 percent) increase primarily reflected $\$ 907$ million of net investment purchases, partially offset by a $\$ 119$ million unfavorable change in net unrealized gains (losses) on available-for-sale investment securities. Held-to-maturity securities were $\$ 34.7$ billion at March 31, 2013, compared with $\$ 34.4$ billion at December 31, 2012, primarily reflecting net purchases of U.S government agency-backed securities.

The Company s available-for-sale securities are carried at fair value with changes in fair value reflected in other comprehensive income (loss) unless a security is deemed to be other-than-temporarily impaired. At March 31, 2013, the Company s net unrealized gains on available-for-sale securities were $\$ 1.0$ billion, compared with $\$ 1.1$ billion at December 31, 2012. The unfavorable change in net unrealized gains was primarily due to decreases in the fair value of agency
mortgage-backed and state and political securities. Gross unrealized losses on available-for-sale securities totaled $\$ 156$ million at March 31, 2013, compared with $\$ 147$ million at December 31, 2012.

The Company conducts a regular assessment of its investment portfolio to determine whether any securities are other-than-temporarily impaired. When assessing unrealized losses for other-than-temporary impairment, the Company considers the nature of the investment, the financial condition of the issuer, the extent and duration of unrealized loss, expected cash flows of underlying assets and market conditions. At March 31, 2013, the Company had no plans to sell securities with unrealized losses, and believes it is more likely than not that it would not be required to sell such securities before recovery of their amortized cost.

There is limited market activity for non-agency mortgage-backed securities held by the Company. As a result, the Company estimates the fair value of these securities using estimates of expected cash flows, discount rates and management s assessment of various other market factors, which are judgmental in nature. The Company recorded $\$ 7$ million of impairment charges in earnings during the first quarter of 2013 on non-agency mortgage-backed securities. These impairment charges were due to changes in expected cash flows primarily resulting from increases in defaults in the underlying mortgage pools. Further adverse changes in market conditions may result in additional impairment charges in future periods. Refer to Notes 2 and 13 in the Notes to Consolidated Financial Statements for further information on investment securities.

(a) Information related to asset and mortgage-backed securities included above is presented based upon weighted-average maturities anticipating future prepayments.
(b) Information related to obligations of state and politcal subdivisions is presented based upon yield to first optional call date if the security is purchased at a premium, yield to maturity if purchased at par or a discount.
(c) Maturity calculations for obligations of state and politicial subdivisions are based on the first optional call date for securities with a fair value above par and contractual maturity for securities with a fair value equal to or below par.
(d) The weighted-average maturity of the available-for-sale investment securities was 4.1 years at December 31, 2012, with a corresponding weighted-average yield of 2.93 percent. The weighted-average maturity of the held-to-maturity investment securities was 3.3 years at December 31, 2012, with a corresponding weighted-average yield of 1.94 percent.
(e) Average yields are presented on a fully-taxable equivalent basis under a tax rate of 35 percent. Yields on available-for-sale and held-to-maturity investment securities are computed based on amortized cost balances, excluding any premiums or discounts recorded related to the transfer of investment securities at fair value from available-for-sale to held-to-maturity. Average yield and maturity calculations exclude equity securities that have no stated yield or maturity.

## Table of Contents

Deposits Total deposits were $\$ 248.0$ billion at March 31, 2013, compared with $\$ 249.2$ billion at December 31, 2012, the result of decreases in noninterest bearing deposits, interest checking balances and time certificates less than $\$ 100,000$, partially offset by increases in money market deposits, time deposits greater than $\$ 100,000$ and savings deposits. Money market balances increased $\$ 3.3$ billion ( 6.5 percent) primarily due to higher corporate trust and institutional trust and custody balances. Time deposits greater than $\$ 100,000$ increased $\$ 2.3$ billion ( 7.8 percent) at March 31, 2013, compared with December 31, 2012. Time deposits greater than $\$ 100,000$ are managed as an alternative to other funding sources such as wholesale borrowing, based largely on relative pricing. Savings account balances increased $\$ 1.3$ billion ( 4.3 percent), primarily due to continued strong participation in a savings product offered by Consumer and Small Business Banking. Noninterest-bearing deposits decreased $\$ 6.4$ billion ( 8.6 percent), primarily due to a decrease in Wealth Management and Securities Services, and Wholesale Banking and Commercial Real Estate balances. Interest checking balances decreased $\$ 1.4$ billion
(2.7 percent) primarily due to lower broker-dealer balances, partially offset by higher Consumer and Small Business Banking balances. Time certificates less than $\$ 100,000$ decreased $\$ 310$ million (2.3 percent) at March 31, 2013, compared with December 31, 2012.

Borrowings The Company utilizes both short-term and long-term borrowings as part of its asset/liability management and funding strategies. Short-term borrowings, which include federal funds purchased, commercial paper, repurchase agreements, borrowings secured by high-grade assets and other short-term borrowings, were $\$ 27.1$ billion at March 31, 2013, compared with $\$ 26.3$ billion at December 31, 2012. The $\$ 824$ million ( 3.1 percent) increase in short-term borrowings was primarily in commercial paper and federal funds purchased, partially offset by lower repurchase agreement balances. Long-term debt was $\$ 25.2$ billion at March 31, 2013, compared with $\$ 25.5$ billion at December 31, 2012. The $\$ 277$ million ( 1.1 percent) decrease was primarily due to $\$ 350$ million of medium-term note maturities, partially offset by a $\$ 74$ million increase in long-term debt related to certain consolidated variable interest entities. Refer to the Liquidity Risk Management section for discussion of liquidity management of the Company.

## Table of Contents

## CORPORATE RISK PROFILE

Overview Managing risks is an essential part of successfully operating a financial services company. The Company s most prominent risk exposures are credit, residual value, operational, interest rate, market, liquidity and reputation risk. Credit risk is the risk of not collecting the interest and/or the principal balance of a loan, investment or derivative contract when it is due. Residual value risk is the potential reduction in the end-of-term value of leased assets. Operational risk includes risks related to fraud, processing errors, technology, breaches of internal controls and in data security, and business continuation and disaster recovery. Operational risk also includes legal and compliance risks, including risks arising from the failure to adhere to laws, rules, regulations and internal policies and procedures. Interest rate risk is the potential reduction of net interest income as a result of changes in interest rates, which can affect the repricing of assets and liabilities differently. Market risk arises from fluctuations in interest rates, foreign exchange rates, and security prices that may result in changes in the values of financial instruments, such as trading and available-for-sale securities, certain mortgage loans held for sale, MSRs and derivatives that are accounted for on a fair value basis. Liquidity risk is the possible inability to fund obligations to depositors, investors or borrowers. Further, corporate strategic decisions, as well as the risks described above, could give rise to reputation risk. Reputation risk is the risk that negative publicity or press, whether true or not, could result in costly litigation or cause a decline in the Company s stock value, customer base, funding sources or revenue. In addition to the risks identified above, other risk factors exist that may impact the Company. Refer to Risk Factors in the Company s Annual Report on Form 10-K for the year ended December 31, 2012, for a detailed discussion of these factors.

Credit Risk Management The Company s strategy for credit risk management includes well-defined, centralized credit policies, uniform underwriting criteria, and ongoing risk monitoring and review processes for all commercial and consumer credit exposures. In evaluating its credit risk, the Company considers changes, if any, in underwriting activities, the loan portfolio composition (including product mix and geographic, industry or customer-specific concentrations), trends in loan performance, the level of allowance coverage relative to similar banking institutions and macroeconomic factors, such as changes in unemployment rates, gross domestic product and consumer bankruptcy filings. The Risk Management

Committee of the Company s Board of Directors oversees the Company s credit risk management process.

In addition, credit quality ratings, as defined by the Company, are an important part of the Company s overall credit risk management and evaluation of its allowance for credit losses. Loans with a pass rating represent those not classified on the Company s rating scale for problem credits, as minimal risk has been identified. Loans with a special mention or classified rating, including all of the Company s loans that are 90 days or more past due and still accruing, nonaccrual loans, those considered troubled debt restructurings ( TDRs ), and loans in a junior lien position that are current but are behind a modified or delinquent loan in a first lien position, encompass all loans held by the Company that it considers to have a potential or well-defined weakness that may put full collection of contractual cash flows at risk. The Company s internal credit quality ratings for consumer loans are primarily based on delinquency and nonperforming status, except for a limited population of larger loans within those portfolios that are individually evaluated. For this limited population, the determination of the internal credit quality rating may also consider collateral value and customer cash flows. The Company obtains recent collateral value estimates for the majority of its residential mortgage and home equity and second mortgage portfolios, which allows the Company to compute estimated loan-to-value ( LTV ) ratios reflecting current market conditions. These individual refreshed LTV ratios are considered in the determination of the appropriate allowance for credit losses. The decline in housing prices over the past several years has deteriorated the collateral support of the residential mortgage, home equity and second mortgage portfolios. However, the underwriting criteria the Company employs consider the relevant income and credit characteristics of the borrower, such that the collateral is not the primary source of repayment. Refer to Note 3 in the Notes to Consolidated Financial Statements for further discussion of the Company s loan portfolios including internal credit quality ratings. In addition, refer to Management s Discussion and Analysis Credit Risk Management in the Company s Annual Report on Form 10-K for the year ended December 31, 2012, for a more detailed discussion on credit risk management processes.

The Company manages its credit risk, in part, through diversification of its loan portfolio and limit setting by product type criteria and concentrations. As part of its normal business activities, the Company offers a broad array of lending products. The Company

## Table of Contents

categorizes its loan portfolio into three segments, which is the level at which it develops and documents a systematic methodology to determine the allowance for credit losses. The Company s three loan portfolio segments are commercial lending, consumer lending and covered loans. The commercial lending segment includes loans and leases made to small business, middle market, large corporate, commercial real estate, financial institution, non-profit and public sector customers. Key risk characteristics relevant to commercial lending segment loans include the industry and geography of the borrower s business, purpose of the loan, repayment source, borrower s debt capacity and financial flexibility, loan covenants, and nature of pledged collateral, if any. These risk characteristics, among others, are considered in determining estimates about the likelihood of default by the borrowers and the severity of loss in the event of default. The Company considers these risk characteristics in assigning internal risk ratings to, or forecasting losses on, these loans which are the significant factors in determining the allowance for credit losses for loans in the commercial lending segment.

The consumer lending segment represents loans and leases made to consumer customers including residential mortgages, credit card loans, and other retail loans such as revolving consumer lines, auto loans and leases, student loans, and home equity loans and lines. Home equity or second mortgage loans are junior lien closed-end accounts fully disbursed at origination. These loans typically are fixed rate loans, secured by residential real estate, with a 10 or 15 year fixed payment amortization schedule. Home equity lines are revolving accounts giving the borrower the ability to draw and repay balances repeatedly, up to a maximum commitment, and are secured by residential real estate. These include accounts in either a first or junior lien position. Typical terms on home equity lines are variable rates benchmarked to the prime rate, with a 15 -year draw period during which a minimum payment is equivalent to the monthly interest, followed by a 10 -year amortization period. At March 31, 2013, substantially all of the Company s home equity lines were in the draw period. Key risk characteristics relevant to consumer lending segment loans primarily relate to the borrowers capacity and willingness to repay and include unemployment rates and other economic factors, customer payment history and in some cases, updated LTV information on real estate based loans. These risk characteristics, among others, are reflected in forecasts of delinquency levels, bankruptcies and losses which are the primary factors in determining the allowance for credit losses for the consumer lending segment.

The covered loan segment represents loans acquired in FDIC-assisted transactions that are covered by loss sharing agreements with the FDIC that greatly reduce the risk of future credit losses to the Company. Key risk characteristics for covered segment loans are consistent with the segment they would otherwise be included in had the loss share coverage not been in place, but consider the indemnification provided by the FDIC.

The Company further disaggregates its loan portfolio segments into various classes based on their underlying risk characteristics. The two classes within the commercial lending segment are commercial loans and commercial real estate loans. The three classes within the consumer lending segment are residential mortgages, credit card loans and other retail loans. The covered loan segment consists of only one class.

The Company sconsumer lending segment utilizes several distinct business processes and channels to originate consumer credit, including traditional branch lending, indirect lending, portfolio acquisitions, correspondent banks and loan brokers. Each distinct underwriting and origination activity manages unique credit risk characteristics and prices its loan production commensurate with the differing risk profiles.

Residential mortgages represent an important financial product for consumer customers of the Company and are originated through the Company s branches, loan production offices and a wholesale network of originators. The Company may retain residential mortgage loans it originates on its balance sheet or sell the loans into the secondary market while retaining the servicing rights and customer relationships. Utilizing the secondary markets enables the Company to effectively reduce its credit and other asset/liability risks. For residential mortgages that are retained in the Company s portfolio and for home equity and second mortgages, credit risk is also diversified by geography and managed by adherence to LTV and borrower credit criteria during the underwriting process.

The Company estimates updated LTV information quarterly, based on a method that combines automated valuation model updates and relevant home price indices. LTV is the ratio of the loan s outstanding principal balance to the current estimate of property value. For home equity and second mortgages, combined loan-to-value ( CLTV ) is the combination of the first mortgage original principal balance and the second lien outstanding principal balance, relative to the current estimate of property value. Certain loans do not have a LTV or CLTV, primarily due to lack of availability of relevant automated valuation model and/or home price indices values, or lack of necessary valuation data on acquired loans.

## Table of Contents

The following tables provide summary information for the LTVs of residential mortgages and home equity and second mortgages by borrower type at March 31, 2013:

Residential mortgages

| Total | \$ | 14,489 | \$ | 1,642 | \$ | 16,131 | 100.0\% |

At March 31, 2013, approximately $\$ 1.5$ billion of residential mortgages were to customers that may be defined as sub-prime borrowers based on credit scores from independent agencies at loan origination, compared with $\$ 1.6$ billion at December 31, 2012. In addition to residential mortgages, at March 31, 2013, $\$ .3$ billion of home equity and second mortgage loans were to customers that may be defined as sub-prime borrowers, compared with $\$ .4$ billion at December 31, 2012. The total amount of consumer lending segment residential mortgage, home equity and second mortgage loans to customers that may be defined as sub-prime borrowers represented only .5 percent of total assets at March 31, 2013, compared with .6 percent at December 31, 2012. The Company considers sub-prime loans to be those made to borrowers with a risk of default significantly higher than those approved for prime lending programs, as reflected in credit scores obtained from independent agencies at loan origination, in addition to other credit underwriting criteria. Sub-prime portfolios include only loans originated according to the Company s underwriting programs specifically designed to serve customers with weakened credit histories. The sub-prime designation indicators have been and will continue to be subject to re-evaluation over time as borrower characteristics, payment performance and economic conditions change. The sub-prime loans originated during periods from June 2009 and after are with borrowers who met the Company s program guidelines and have a credit score that generally is at or below a threshold of 620 to 650 depending on the program. Sub-prime loans originated during periods prior to June 2009 were based upon program level guidelines without regard to credit score.

Covered loans included $\$ 1.1$ billion in loans with negative-amortization payment options at March 31, 2013, compared with $\$ 1.3$ billion at December 31, 2012. Other than covered loans, the Company does not have any residential mortgages with payment schedules that would cause balances to increase over time.

Home equity and second mortgages were $\$ 16.1$ billion at March 31, 2013, compared with $\$ 16.7$ billion at December 31, 2012, and included $\$ 4.9$ billion of home equity lines in a first lien position and $\$ 11.2$ billion of home equity and second mortgage loans and lines in a junior lien position. Loans and lines in a junior lien position at March 31, 2013, included approximately $\$ 3.6$ billion of loans and lines for which the Company also serviced the related first lien loan, and approximately $\$ 7.6$ billion where the Company did not service the related first lien loan. The Company was able

(a) Delinquent loan ratios exclude $\$ 3.4$ billion at March 31, 2013, and $\$ 3.2$ billion at December 31, 2012, of loans purchased from GNMA mortgage pools whose repayments are primarily insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs. Including these loans, the ratio of residential mortgages 90 days or more past due including all nonperforming loans was 9.32 percent at March 31, 2013, and 9.45 percent at December 31, 2012.
(b) Delinquent loan ratios exclude student loans that are guaranteed by the federal government. Including these loans, the ratio of total other retail loans 90 days or more past due including all nonperforming loans was 1.07 percent at March 31, 2013, and 1.08 percent at December $31,2012$.
to determine the status of the related first liens using information the Company has as the servicer of the first lien, information it received from its primary regulator on loans serviced by other large servicers or information reported on customer credit bureau files. The Company also evaluates other indicators of credit risk for these junior lien loans and lines including delinquency, estimated average CLTV ratios and updated weighted-average credit scores in making its assessment of credit risk, related loss estimates and determining the allowance for credit losses.

The following table provides a summary of delinquency statistics and other credit quality indicators for the Company sunior lien positions at March 31, 2013:

| Junior Liens Behind |  |  |
| :---: | :---: | :---: |
| Company |  |  |
| Owned |  |  |
| (Dollars in Millions) | or Serviced |  |
| First | Third Party | First Lien |

| allowance for credit losses for loans in a junior lien position. |  |  |  |

## Table of Contents

Loan Delinquencies Trends in delinquency ratios are an indicator, among other considerations, of credit risk within the Company s loan portfolios. The Company measures delinquencies, both including and excluding nonperforming loans, to enable comparability with other companies. Accruing loans 90 days or more past due totaled $\$ 1.2$ billion ( $\$ 609$ million excluding covered loans) at March 31, 2013, compared with $\$ 1.3$ billion ( $\$ 660$ million excluding covered loans) at December 31, 2012. These balances exclude loans purchased from Government National Mortgage Association ( GNMA ) mortgage pools whose repayments are primarily insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs. The $\$ 51$ million ( 7.7 percent) decrease,
excluding covered loans, reflected improvement in residential mortgages, credit card and other retail loan portfolios during the first three months of 2013. These loans are not included in nonperforming assets and continue to accrue interest because they are adequately secured by collateral, are in the process of collection and are reasonably expected to result in repayment or restoration to current status, or are managed in homogeneous portfolios with specified charge-off timeframes adhering to regulatory guidelines. The ratio of accruing loans 90 days or more past due to total loans was .52 percent ( .29 percent excluding covered loans) at March 31, 2013, compared with .59 percent ( .31 percent excluding covered loans) at December 31, 2012.

The following table provides summary delinquency information for residential mortgages, credit card and other retail loans included in the consumer lending segment:

|  | Amount |  |  |  | As a Percent of Ending Loan Balances |  |

| Total | \$ 959 | \$ | ,408 | 8.93\% | 12.45\% |

Restructured Loans In certain circumstances, the Company may modify the terms of a loan to maximize the collection of amounts due when a borrower is experiencing financial difficulties or is expected to experience difficulties in the near-term. In most cases the modification is either a

## Edgar Filing: US BANCORP \DE - Form 10-Q

concessionary reduction in interest rate, extension of the maturity date or reduction in the principal balance that would otherwise not be considered.

Troubled Debt Restructurings Concessionary modifications are classified as TDRs unless the modification results in only an insignificant delay in the payments to be received. TDRs accrue interest if the
borrower complies with the revised terms and conditions and has demonstrated repayment performance at a level commensurate with the modified terms over several payment cycles. Loans classified as TDRs are considered impaired loans for reporting and measurement purposes.

The Company continues to work with customers to modify loans for borrowers who are experiencing financial difficulties, including those acquired through FDIC-assisted acquisitions. Many of the Company s TDRs are determined on a case-by-case basis in connection with ongoing loan collection processes. The modifications vary within each of the Company s loan classes. Commercial lending segment TDRs generally include extensions of the maturity date and may be accompanied by an increase or decrease to the interest rate. The Company may also work with the borrower to make other changes to the loan to mitigate losses, such as obtaining additional collateral and/or guarantees to support the loan.

The Company has also implemented certain residential mortgage loan restructuring programs that may result in TDRs. The Company participates in the

## Table of Contents

U.S. Department of the Treasury Home Affordable Modification Program ( HAMP ). HAMP gives qualifying homeowners an opportunity to permanently modify their loan and achieve more affordable monthly payments, with the U.S. Department of the Treasury compensating the Company for a portion of the reduction in monthly amounts due from borrowers participating in this program. The Company also modifies residential mortgage loans under Federal Housing Administration, Department of Veterans Affairs, and other internal programs. Under these programs, the Company provides concessions to qualifying borrowers experiencing financial difficulties. The concessions may include adjustments to interest rates, conversion of adjustable rates to fixed rates, extensions of maturity dates or deferrals of payments, capitalization of accrued interest and/or outstanding advances, or in limited situations, partial forgiveness of loan principal. In most instances, participation in residential mortgage loan restructuring programs requires the customer to complete a short-term trial period. A permanent loan modification is contingent on the customer successfully completing the trial period arrangement and the loan documents are not modified until that time. The Company reports loans in a trial period arrangement as TDRs.

Credit card and other retail loan modifications are generally part of distinct restructuring programs. The Company offers a workout program providing customers modification solutions over a specified time period, generally up to 60 months. The Company also provides modification programs to qualifying customers experiencing a temporary financial hardship in which reductions are made to monthly required minimum payments for up to 12 months.

In accordance with regulatory guidance, the Company considers secured consumer loans that have had debt discharged through bankruptcy where the borrower has not reaffirmed the debt to be TDRs. If the loan amount exceeds the collateral value, the loan is charged down to collateral value and the remaining amount is reported as nonperforming.

Modifications to loans in the covered segment are similar in nature to that described above for non-covered loans, and the evaluation and determination of TDR status is similar, except that acquired loans restructured after acquisition are not considered TDRs for purposes of the Company s accounting and disclosure if the loans evidenced credit deterioration as of the acquisition date and are accounted for in pools. Losses associated with modifications on covered loans, including the economic impact of interest rate reductions, are generally eligible for reimbursement under the loss sharing agreements.

The following table provides a summary of TDRs by loan class, including the delinquency status for TDRs that continue to accrue interest and TDRs included in nonperforming assets:

| At March 31, 2013 | As a Percent of Performing TDRs |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Total | \$ | 5,612 | 5.9\% | 21.3\% | \$ | 899 | \$ 6,511 |

[^1]
## Edgar Filing: US BANCORP \DE\ - Form 10-Q

Includes $\$ 330$ million of Federal Housing Administration and Department of Veterans Affairs residential mortgage loans to borrowers that have had debt discharged through bankruptcy and $\$ 310$ million in trial period arrangements.

Short-term Modifications The Company makes short-term modifications that it does not consider to be TDRs, in limited circumstances, to assist borrowers experiencing temporary hardships. Consumer lending programs include payment reductions, deferrals of up to three past due payments, and the ability to return to current status if the borrower makes required payments. The Company may also make short-term modifications
to commercial lending loans, with the most common modification being an extension of the maturity date of three months or less. Such extensions generally are used when the maturity date is imminent and the borrower is experiencing some level of financial stress, but the Company believes the borrower will pay all contractual amounts owed. Short-term modifications were not material at March 31, 2013.

(a) Throughout this document, nonperforming assets and related ratios do not include accruing loans 90 days or more past due.
(b) Excludes $\$ 3.4$ billion and $\$ 3.2$ billion at March 31, 2013, and December 31, 2012, respectively, of loans purchased from GNMA mortgage pools that are 90 days or more past due that continue to accrue interest, as their repayments are primarily insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs.
(c)

## Edgar Filing: US BANCORP \DE\ - Form 10-Q

Foreclosed GNMA loans of $\$ 513$ million and $\$ 548$ million at March 31, 2013, and December 31, 2012, respectively, continue to accrue interest and are recorded as other assets and excluded from nonperforming assets because they are insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs.
(d) Includes equity investments in entities whose principal assets are other real estate owned.
(e) Charge-offs exclude actions for certain card products and loan sales that were not classified as nonperforming at the time the charge-off occurred.

## Table of Contents

Nonperforming Assets The level of nonperforming assets represents another indicator of the potential for future credit losses. Nonperforming assets include nonaccrual loans, restructured loans not performing in accordance with modified terms and not accruing interest, restructured loans that have not met the performance period required to return to accrual status, other real estate owned and other nonperforming assets owned by the Company. Interest payments collected from assets on nonaccrual status are typically applied against the principal balance and not recorded as income. However, interest income may be recognized for interest payments if the remaining carrying amount of the loan is believed to be collectible.

At March 31, 2013, total nonperforming assets were $\$ 2.4$ billion, compared with $\$ 2.7$ billion at December 31, 2012. Excluding covered assets, nonperforming assets were $\$ 2.0$ billion at March 31, 2013, compared with $\$ 2.1$ billion at December 31, 2012. The $\$ 59$ million ( 2.8 percent) decrease in nonperforming assets, excluding covered assets, was primarily driven by reductions in commercial, commercial real estate and credit card nonperforming assets. Nonperforming covered assets at March 31, 2013, were $\$ 377$ million, compared with $\$ 583$ million at December 31, 2012. These assets are covered by loss sharing agreements with the FDIC that substantially reduce the risk of credit losses to the Company. The ratio of total nonperforming assets to total loans and other real estate was 1.07 percent (. 95 percent excluding covered assets) at March 31, 2013, compared with 1.19 percent (.98 percent excluding covered assets) at December 31, 2012. The Company expects total nonperforming assets to trend lower in the second quarter of 2013.

Other real estate owned, excluding covered assets, was $\$ 379$ million at March 31, 2013, compared with $\$ 381$ million at December 31, 2012, and was related to foreclosed properties that previously secured loan balances. Other real estate owned includes properties vacated by the borrower and maintained by the Company, regardless of whether title in the property has been transferred to the Company.

The following table provides an analysis of other real estate owned, excluding covered assets, as a percent of their related loan balances, including geographical location detail for residential (residential mortgage, home equity and second mortgage) and commercial (commercial and commercial real estate) loan balances:

| (Dollars in Millions) | Amount |  |  | As a Percent of Ending Loan Balances |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | March 31, 2013 | December 31, 2012 |  | March 31, 2013 | December 31, 2012 |
| Residential |  |  |  |  |  |
| Minnesota | \$ 22 | \$ | 20 | . $36 \%$ | . $34 \%$ |
| Illinois | 18 |  | 19 | . 48 | . 55 |

| Washington | 11 |  | 7 | . 18 | . 11 |
| Nevada | 10 |  | 11 | . 81 | . 87 |
| Arizona | 9 |  | 10 | . 69 | . 83 |
| All other states | 41 |  | 63 | . 05 | . 07 |
| Total commercial | 99 |  | 113 | . 10 | . 11 |
| Total | \$ 379 | \$ | 381 | .18\% | .18\% |

Analysis of Loan Net Charge-Offs Total loan net charge-offs were $\$ 433$ million for the first quarter of 2013, compared with $\$ 571$ million for the first quarter of 2012. The ratio of total loan net charge-offs to average loans outstanding on an annualized basis for the first quarter of 2013 was .79 percent, compared with 1.09 percent for the first quarter of 2012. The decrease in total net charge-offs for the first quarter 2013, compared with the first quarter of 2012, primarily reflected improvement in the commercial and commercial real estate loan portfolios, as economic conditions continue to slowly improve. Given current economic conditions, the Company expects the level of net charge-offs to be relatively stable in the second quarter of 2013.

Commercial and commercial real estate loan net charge-offs for the first quarter of 2013 were $\$ 54$ million (. 21 percent of average loans outstanding on an annualized basis), compared with $\$ 157$ million (. 68 percent of average loans outstanding on an annualized basis) for the first quarter of 2012. The decrease reflected the impact of more stable economic conditions.

## Table of Contents

## Table 7 Net Charge-Offs as a Percent of Average Loans Outstanding

|  | Three Months Ended |
| :--- | :--- | :--- |
|  |  |
|  |  |

(a) Net charge-off as a percent of average loans outstanding, excluding portfolio purchases where the acquired loans were recorded at fair value at the purchase date, were 4.00 percent and 4.21 percent for the three months ended March 31, 2013 and 2012, respectively.

Residential mortgage loan net charge-offs for the first quarter of 2013 were $\$ 92$ million (. 83 percent of average loans outstanding on an annualized basis), compared with $\$ 112$ million ( 1.19 percent of average loans outstanding on an annualized basis) for the first quarter of 2012 . Credit card loan net charge-offs for the first quarter of 2013 were $\$ 160$ million ( 3.93 percent of average loans outstanding on an annualized basis), compared with $\$ 169$ million ( 4.05 percent of average loans outstanding on an annualized basis) for the first
quarter of 2012. Other retail loan net charge-offs for the first quarter of 2013 were $\$ 126$ million ( 1.08 percent of average loans outstanding on an annualized basis), compared with $\$ 132$ million ( 1.11 percent of average loans outstanding on an annualized basis) for the first quarter of 2012 . The decrease in total residential mortgage, credit card and other retail loan net charge-offs for the first quarter of 2013, compared with the first quarter of 2012, reflected the impact of more stable economic conditions.

The following table provides an analysis of net charge-offs as a percent of average loans outstanding for residential mortgages and home equity and second mortgages by borrower type:

| Three Months Ended March 31 | Average Loans |  | Percent of <br> Average <br> Loans |  |

(a) Represents loans purchased from GNMA mortgage pools whose payments are primarily insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs.

## Table of Contents

Analysis and Determination of the Allowance for Credit Losses The allowance for credit losses reserves for probable and estimable losses incurred in the Company s loan and lease portfolio and includes certain amounts that do not represent loss exposure to the Company because those losses are recoverable under loss sharing agreements with the FDIC. The allowance for credit losses is increased through provisions charged to operating earnings and reduced by net charge-offs. Management evaluates the allowance each quarter to ensure it appropriately reserves for incurred losses.

The allowance recorded for loans in the commercial lending segment is based on reviews of individual credit relationships and considers the migration analysis of commercial lending segment loans and actual loss experience. The Company currently uses a 12 -year period of historical losses in considering actual loss experience, because it believes that period best reflects the losses incurred in the portfolio. This timeframe and the results of the analysis are evaluated quarterly to determine if they are appropriate. The allowance recorded for impaired loans greater than $\$ 5$ million in the commercial lending segment is based on an individual loan analysis utilizing expected cash flows discounted using the original effective interest rate, the observable market price of the loan, or the fair value of the collateral for collateral-dependent loans. The allowance recorded for all other commercial lending segment loans is determined on a homogenous pool basis and includes consideration of product mix, risk characteristics of the portfolio, bankruptcy experience, and historical losses, adjusted for current trends.

The allowance recorded for TDR loans and purchased impaired loans in the consumer lending segment is determined on a homogenous pool basis utilizing expected cash flows discounted using the original effective interest rate of the pool, or the prior quarter effective rate, respectively. The allowance for collateral-dependent loans in the consumer lending segment is determined based on the fair value of the collateral. The allowance recorded for all other consumer lending segment loans is determined on a homogenous pool basis and includes consideration of product mix, risk characteristics of the portfolio, bankruptcy experience, delinquency status, refreshed LTV ratios when possible, portfolio growth and historical losses, adjusted for current trends. Credit card and other retail loans 90 days or more past due are generally not placed on nonaccrual status because of the relatively short period of time to charge-off and, therefore, are excluded from nonperforming loans and measures that include nonperforming loans as part of the calculation.

When evaluating the appropriateness of the allowance for credit losses for any loans and lines in a junior lien position, the Company considers the delinquency and modification status of the first lien. At March 31, 2013, the Company serviced the first lien on 32 percent of the home equity loans and lines in a junior lien position. The Company also considers information received from its primary regulator on the status of the first liens that are serviced by other large servicers in the industry and the status of first lien mortgage accounts reported on customer credit bureau files. Regardless of whether or not the Company services the first lien, an assessment is made of economic conditions, problem loans, recent loss experience and other factors in determining the allowance for credit losses. Based on the available information, the Company estimated $\$ 512$ million or 3.2 percent of the total home equity portfolio at March 31, 2013, represented junior liens where the first lien was delinquent or modified.

The Company uses historical loss experience on the loans and lines in a junior lien position where the first lien is serviced by the Company or can be identified in credit bureau data to establish loss estimates for junior lien loans and lines the Company services when they are current, but the first lien is delinquent or modified. Historically, the number of junior lien defaults in any period has been a small percentage of the total portfolio (for example, only 1.6 percent for the twelve months ended March 31, 2013), and the long-term average loss rate on the small percentage of loans that default has been approximately 80 percent. In periods of economic stress such as the current environment, the Company has experienced loss severity rates in excess of 90 percent for junior liens that default. In addition, the Company obtains updated credit scores on its home equity portfolio each quarter and in some cases more frequently, and uses this information to qualitatively supplement its loss estimation methods. Credit score distributions for the portfolio are monitored monthly and any changes in the distribution are one of the factors considered in assessing the Company s loss estimates.

The allowance for the covered loan segment is evaluated each quarter in a manner similar to that described for non-covered loans, and represents any decreases in expected cash flows on those loans after the acquisition date. The provision for credit losses for covered loans considers the indemnification provided by the FDIC.

In addition, the evaluation of the appropriate allowance for credit losses for purchased non-impaired loans acquired after January 1, 2009, in the various loan

## Table of Contents

segments considers credit discounts recorded as a part of the initial determination of the fair value of the loans. For these loans, no allowance for credit losses is recorded at the purchase date. Credit discounts representing the principal losses expected over the life of the loans are a component of the initial fair value. Subsequent to the purchase date, the methods utilized to estimate the required allowance for credit losses for these loans is similar to originated loans; however, the Company records a provision for credit losses only when the required allowance, net of any expected reimbursement under any loss sharing agreements with the FDIC, exceeds any remaining credit discounts.

The evaluation of the appropriate allowance for credit losses for purchased impaired loans in the various loan segments considers the expected cash flows to be collected from the borrower. These loans are initially recorded at fair value and therefore no allowance for credit losses is recorded at the purchase date.

Subsequent to the purchase date, the expected cash flows of purchased loans are subject to evaluation. Decreases in the present value of expected cash flows are recognized by recording an allowance for credit losses with the related provision for credit losses reduced for the amount reimbursable by the FDIC, where applicable. If the expected cash flows on the purchased loans increase such that a previously recorded impairment allowance can be reversed, the Company records a reduction in the allowance with a related reduction in losses reimbursable by the FDIC, where applicable. Increases in expected cash flows of purchased loans, when there are no reversals of previous impairment allowances, are recognized over the remaining life of the loans and resulting decreases in expected cash flows of the FDIC indemnification assets are amortized over the shorter of the remaining contractual term of the indemnification agreements or the remaining life of the loans. Refer to Note 3 of the Notes to Consolidated Financial Statements, for more information.

The Company s methodology for determining the appropriate allowance for credit losses for all the loan segments also considers the imprecision inherent in the methodologies used. As a result, in addition to the amounts determined under the methodologies described above, management also considers the potential impact of other qualitative factors which include, but are not limited to, economic factors; geographic and other concentration risks; delinquency and nonaccrual trends; current business conditions; changes in lending policy, underwriting standards, internal review and other relevant business practices; and the regulatory environment. The consideration of these items results in adjustments to allowance amounts included in the Company s allowance for credit losses for each of the above loan segments.

Refer to Management s Discussion and Analysis Analysis and Determination of the Allowance for Credit Losses in the Company s Annual Report on Form 10-K for the year ended December 31, 2012, for further discussion on the analysis and determination of the allowance for credit losses.

At March 31, 2013, the allowance for credit losses was $\$ 4.7$ billion ( 2.11 percent of both total loans and loans excluding covered loans), compared with an allowance of $\$ 4.7$ billion ( 2.12 percent of total loans and 2.15 percent of loans excluding covered loans) at December 31, 2012. The ratio of the allowance for credit losses to nonperforming loans was 255 percent ( 274 percent excluding covered loans) at March 31, 2013, compared with 228 percent ( 269 percent excluding covered loans) at December 31, 2012, due to the continued improvement in the commercial, commercial real estate and credit card portfolios. The ratio of the allowance for credit losses to annualized loan net charge-offs was 268 percent at March 31, 2013, compared with 226 percent of full year 2012 net charge-offs at December 31, 2012, as net charge-offs continue to decline due to stabilizing economic conditions.

Note: At March 31, 2013 and 2012, $\$ 1.7$ billion and $\$ 1.8$ billion, respectively, of the total allowance for credit losses related to incurred losses on credit card and other retail loans.
(a) Relates to covered loan charge-offs and recoveries not reimbursable by the FDIC.

## Table of Contents

Residual Value Risk Management The Company manages its risk to changes in the residual value of leased assets through disciplined residual valuation setting at the inception of a lease, diversification of its leased assets, regular residual asset valuation reviews and monitoring of residual value gains or losses upon the disposition of assets. As of March 31, 2013 , no significant change in the amount of residual values or concentration of the portfolios had occurred since December 31, 2012. Refer to Management s Discussion and Analysis Residual Value Risk Management in the Company s Annual Report on Form 10-K for the year ended December 31, 2012, for further discussion on residual value risk management.

Operational Risk Management The Company manages operational risk through a risk management framework and its internal control processes. Within this framework, the Risk Management Committee of the Company s Board of Directors provides oversight and assesses the most significant operational risks facing the Company within its business lines. Under the guidance of the Risk Management Committee, enterprise risk management personnel establish policies and interact with business lines to monitor significant operating risks on a regular basis. Business lines have direct and primary responsibility and accountability for identifying, controlling, and monitoring operational risks embedded in their business activities. In addition, enterprise risk management is responsible for establishing a culture of compliance and compliance program standards and policies, and performing risk assessments on the business lines adherence to laws, rules, regulations and internal policies and procedures. Refer to Management s Discussion and Analysis Operational Risk Management in the Company s Annual Report on Form 10-K for the year ended December 31, 2012, for further discussion on operational risk management.

Interest Rate Risk Management In the banking industry, changes in interest rates are a significant risk that can impact earnings, market valuations and the safety and soundness of an entity. To minimize the volatility of net interest income and the market value of assets and liabilities, the Company manages its exposure to changes in interest rates through asset and liability management activities within guidelines established by its Asset Liability

Committee ( ALCO ) and approved by the Board of Directors. The ALCO has the responsibility for approving and ensuring compliance with the ALCO management policies, including interest rate risk exposure. The Company uses net interest income simulation analysis and market value of equity modeling for measuring and analyzing consolidated interest rate risk.

Net Interest Income Simulation Analysis Management estimates the impact on net interest income of changes in market interest rates under a number of scenarios, including gradual shifts, immediate and sustained parallel shifts, and flattening or steepening of the yield curve. The table below summarizes the projected impact to net interest income over the next 12 months of various potential interest rate changes. The ALCO policy limits the estimated change in net interest income in a gradual 200 basis point ( bps ) rate change scenario to a 4.0 percent decline of forecasted net interest income over the next 12 months. At March 31, 2013, and December 31, 2012, the Company was within policy. Refer to Management s Discussion and Analysis Net Interest Income Simulation Analysis in the Company s Annual Report on Form 10-K for the year ended December 31, 2012, for further discussion on net interest income simulation analysis.

Market Value of Equity Modeling The Company also manages interest rate sensitivity by utilizing market value of equity modeling, which measures the degree to which the market values of the Company $s$ assets and liabilities and off-balance sheet instruments will change given a change in interest rates. Management measures the impact of changes in market interest rates under a number of scenarios, including immediate and sustained parallel shifts, and flattening or steepening of the yield curve. The ALCO policy limits the change in market value of equity in a 200 bps parallel rate shock to a 15.0 percent decline. A 200 bps increase would have resulted in a 1.7 percent decrease in the market value of equity at March 31, 2013, compared with a 2.5 percent decrease at December 31, 2012. A 200 bps decrease, where possible given current rates, would have resulted in a 6.3 percent decrease in the market value of equity at March 31, 2013, compared with a 5.3 percent decrease at December 31, 2012. Refer to

Sensitivity of Net Interest Income

|  | March 31, 2013 |  |  |  | December 31, 2012 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Down 50 bps | Up 50 bps | Down 200 bps | Up 200 bp®own 50 bps | Up 50 bps | Down 200 bps | Up 200 bps |
|  | Immediate | Immediate | Gradual | Gradual Immediate | Immediate | Gradual | Gradual |

## Table of Contents

Management s Discussion and Analysis Market Value of Equity Modeling in the Company s Annual Report on Form 10-K for the year ended December 31, 2012, for further discussion on market value of equity modeling.

Use of Derivatives to Manage Interest Rate and Other Risks To reduce the sensitivity of earnings to interest rate, prepayment, credit, price and foreign currency fluctuations (asset and liability management positions), the Company enters into derivative transactions. The Company uses derivatives for asset and liability management purposes primarily in the following ways:

To convert fixed-rate debt from fixed-rate payments to floating-rate payments;
To convert the cash flows associated with floating-rate loans and debt from floating-rate payments to fixed-rate payments;
To mitigate changes in value of the Company s mortgage origination pipeline, funded mortgage loans held for sale and MSRs;
To mitigate remeasurement volatility of foreign currency denominated balances; and
To mitigate the volatility of the Company s investment in foreign operations driven by fluctuations in foreign currency exchange rates.
To manage these risks, the Company may enter into exchange-traded and over-the-counter derivative contracts, including interest rate swaps, swaptions, futures, forwards and options. In addition, the Company enters into interest rate and foreign exchange derivative contracts to support the business requirements of its customers (customer-related positions). The Company minimizes the market and liquidity risks of customer-related positions by entering into similar offsetting positions with broker-dealers. The Company does not utilize derivatives for speculative purposes.

The Company does not designate all of the derivatives that it enters into for risk management purposes as accounting hedges because of the inefficiency of applying the accounting requirements and may instead elect fair value accounting for the related hedged items. In particular, the Company enters into interest rate swaps, forward commitments to buy to-be-announced securities ( TBAs ), U.S. Treasury futures and options on U.S. Treasury futures to mitigate fluctuations in the value of its MSRs, but does not designate those derivatives as accounting hedges.

Additionally, the Company uses forward commitments to sell TBAs and other commitments to sell residential mortgage loans at specified prices to economically hedge the interest rate risk in its residential
mortgage loan production activities. At March 31, 2013, the Company had $\$ 14.4$ billion of forward commitments to sell, hedging $\$ 6.5$ billion of mortgage loans held for sale and $\$ 10.1$ billion of unfunded mortgage loan commitments. The forward commitments to sell and the unfunded mortgage loan commitments on loans intended to be sold are considered derivatives under the accounting guidance related to accounting for derivative instruments and hedging activities. The Company has elected the fair value option for the mortgage loans held for sale.

Derivatives are subject to credit risk associated with counterparties to the contracts. Credit risk associated with derivatives is measured by the Company based on the probability of counterparty default. The Company manages the credit risk of its derivative positions by diversifying its positions among various counterparties, by entering into master netting agreements, and, where possible by requiring collateral agreements. The Company may also transfer counterparty credit risk related to interest rate swaps to third parties through the use of risk participation agreements.

For additional information on derivatives and hedging activities, refer to Notes 11 and 12 in the Notes to Consolidated Financial Statements.
Market Risk Management In addition to interest rate risk, the Company is exposed to other forms of market risk, principally related to trading activities which support customers strategies to manage their own foreign currency, interest rate risk and funding activities. The Company s Market Risk Committee ( MRC ), underneath the ALCO, oversees market risk management. The MRC monitors and reviews the Company s trading positions and establishes policies for market risk management, including exposure limits for each portfolio. The Company uses a Value at Risk ( VaR ) approach to measure general market risk. Theoretically, VaR represents the statistical risk of loss the Company has to adverse market movements over a one-day time horizon. The Company uses the Historical Simulation method to calculate VaR for its trading businesses measured at the ninety-ninth percentile using a one-year look-back period for distributions derived from past market data. The market factors used in the calculations include those pertinent to market risks inherent in the underlying trading portfolios, principally those that affect its investment grade bond trading business, foreign currency transaction business, client derivatives business, loan trading business and municipal securities business. On average, the Company expects the one-day VaR to be exceeded by actual losses two to

## Table of Contents

three times per year for its trading businesses. The Company monitors the effectiveness of its risk programs by back-testing the performance of its VaR models, regularly updating the historical data used by the VaR models and stress testing. If the Company were to experience market losses in excess of the estimated VaR more often than expected, the VaR models and associated assumptions would be analyzed and adjusted.

The average, high, low and period-end VaR amounts for the Company strading positions for the first quarter of 2013, were \$1 million, \$2 million, $\$ 1$ million and $\$ 1$ million, respectively, compared with $\$ 1$ million, $\$ 2$ million, $\$ 1$ million and $\$ 1$ million, respectively, for the first quarter of 2012. The Company experienced no trading losses that exceeded VaR for its combined trading businesses during the first quarter of 2013. The Company stress tests its market risk measurements to provide management with perspectives on market events that may not be captured by its VaR models, including worst case historical market movement combinations that have not necessarily occurred on the same date.

The Company calculates Stressed VaR using the same underlying methodology and model as VaR, except that a historical continuous one-year look-back period is utilized that reflects a period of significant financial stress appropriate to the Company s trading portfolio. The period selected by the Company includes the significant market volatility of the last four months of 2008. The average, high, low and period-end Stressed VaR amounts for the Company s trading positions for first quarter of 2013 were $\$ 3$ million, $\$ 8$ million, $\$ 2$ million, and $\$ 4$ million, respectively.

The Company also measures the market risk of its hedging activities related to MSRs and residential mortgage loans held for sale using the Historical Simulation method. The VaRs are measured at the ninety-ninth percentile and employ factors pertinent to the market risks inherent in the valuation of the assets and hedges. A three-year look-back period is used to obtain past market data. The Company monitors the effectiveness of the models through back-testing, updating the data and regular validations. The average, high and low VaR amounts for the MSRs and related hedges for the first quarter of 2013, were $\$ 3$ million, $\$ 6$ million and $\$ 2$ million, respectively, compared with $\$ 5$ million, $\$ 8$ million and $\$ 2$ million, respectively, for the first quarter of 2012. The average, high and low VaR amounts for residential mortgage loans held for sale and related hedges for the first quarter of 2013, were $\$ 2$ million, $\$ 4$ million and $\$ 1$ million, respectively, compared with $\$ 3$ million, $\$ 7$ million and $\$ 1$ million, respectively, for the first quarter of 2012.

Liquidity Risk Management The Company s liquidity risk management process is designed to identify, measure, and manage the Company s funding and liquidity risk to meet its daily funding needs and to address expected and unexpected changes in its funding requirements. The Company engages in various activities to manage its liquidity risk. These include diversifying its funding sources, stress testing, and holding readily-marketable assets which can be used as a source of liquidity if needed. In addition, the Company s profitable operations, sound credit quality and strong capital position have enabled it to develop a large and reliable base of core deposit funding within its market areas and in domestic and global capital markets.

The Risk Management Committee of the Company s Board of Directors oversees the Company s liquidity risk management process and approves the Company s liquidity policy and contingency funding plan. The ALCO reviews and approves the Company s liquidity policies and guidelines, and regularly assesses the Company s ability to meet funding requirements arising from adverse company-specific or market events.

The Company regularly projects its funding needs under various stress scenarios and maintains contingency plans consistent with the Company s access to diversified sources of contingent funding. The Company maintains a substantial level of total available liquidity in the form of on-balance sheet and off-balance sheet funding sources. These include cash at the Federal Reserve, unencumbered liquid assets, and capacity to borrow at the Federal Home Loan Bank ( FHLB ) and the Federal Reserve Discount Window. At March 31, 2013, the fair value of unencumbered available-for-sale and held-to-maturity investment securities totaled $\$ 56.3$ billion, compared with $\$ 54.1$ billion at December 31, 2012. Refer to Table 4 and Balance Sheet Analysis for further information on investment securities maturities and trends. Asset liquidity is further enhanced by the Company s ability to pledge loans to access secured borrowing facilities through the FHLB and Federal Reserve Bank. At March 31, 2013, the Company could have borrowed an additional $\$ 66.6$ billion at the FHLB and Federal Reserve Bank based on collateral available for additional borrowings.

The Company s diversified deposit base provides a sizeable source of relatively stable and low-cost funding, while reducing the Company s reliance on the wholesale markets. Total deposits were $\$ 248.0$ billion at March 31, 2013, compared with $\$ 249.2$ billion at December 31, 2012. Refer to Balance Sheet Analysis for further information on the Company s deposits.

## Table of Contents

Additional funding is provided by long-term debt and short-term borrowings. Long-term debt was $\$ 25.2$ billion at March 31, 2013, and is an important funding source because of its multi-year borrowing structure. Short-term borrowings were $\$ 27.1$ billion at March 31, 2013, and supplement the Company s other funding sources. Refer to Balance Sheet Analysis for further information on the Company s long-term debt and short-term borrowings.

In addition to assessing liquidity risk on a consolidated basis, the Company monitors the parent company s liquidity and maintains sufficient funding to meet expected parent company obligations, without access to the wholesale funding markets or dividends from subsidiaries, for 12 months when forecasted payments of common stock dividends are included and 24 months assuming dividends were reduced to zero. The parent company currently has available funds considerably greater than the amounts required to satisfy these conditions.

Refer to Management s Discussion and Analysis Liquidity Risk Management in the Company s Annual Report on Form 10-K for the year ended December 31, 2012, for further discussion on liquidity risk management.

At March 31, 2013, parent company long-term debt outstanding was $\$ 12.4$ billion, compared with $\$ 12.8$ billion at December 31, 2012. The $\$ .4$ billion decrease was due to medium-term note maturities during the first quarter of 2013. As of March 31, 2013, there was $\$ 2.5$ billion of parent company debt scheduled to mature in the remainder of 2013.

Federal banking laws regulate the amount of dividends that may be paid by banking subsidiaries without prior approval. The amount of dividends available to the parent company from its banking subsidiaries after meeting the regulatory capital requirements for well-capitalized banks was approximately $\$ 8.0$ billion at March 31, 2013.

European Exposures Certain European countries have experienced severe credit deterioration. The Company does not hold sovereign debt of any European country, but may have indirect exposure to sovereign debt through its investments in, and transactions with, European banks. At March 31, 2013, the Company had investments in perpetual preferred stock issued by European banks with an amortized cost totaling $\$ 70$ million and unrealized losses totaling $\$ 7$ million, compared with an amortized cost totaling $\$ 70$ million and unrealized losses totaling $\$ 10$ million, at December 31, 2012. The Company also transacts with
various European banks as counterparties to interest rate derivatives and foreign currency transactions for its hedging and customer-related activities, however none of these banks are domiciled in the countries experiencing the most significant credit deterioration. These derivative transactions are subject to master netting and collateral support agreements which significantly limit the Company s exposure to loss as they generally require daily posting of collateral. At March 31, 2013, the Company was in a net payable position to each of these European banks.

The Company has not bought or sold credit protection on the debt of any European country or any company domiciled in Europe, nor does it provide retail lending services in Europe. While the Company does not offer commercial lending services in Europe, it does provide financing to domestic multinational corporations that generate revenue from customers in European countries and provides a limited number of corporate credit cards to their European subsidiaries. While an economic downturn in Europe could have a negative impact on these customers revenues, it is unlikely that any effect on the overall credit worthiness of these multinational corporations would be material to the Company.

The Company provides merchant processing and corporate trust services in Europe and through banking affiliations in Europe. Operating cash for these businesses are deposited on a short-term basis with certain European banks. However, exposure is mitigated by the Company placing deposits at multiple banks and managing the amounts on deposit at any bank based on institution-specific deposit limits. At March 31, 2013, the Company had an aggregate amount on deposit with European banks of approximately $\$ 455$ million.

The money market funds managed by a subsidiary of the Company do not have any investments in European sovereign debt. Other than investments in banks in the countries of the Netherlands, France and Germany, those funds do not have any unsecured investments in banks domiciled in the Eurozone.

Off-Balance Sheet Arrangements Off-balance sheet arrangements include any contractual arrangements to which an unconsolidated entity is a party, under which the Company has an obligation to provide credit or liquidity enhancements or market risk support. In the ordinary course of business, the Company enters into an array of commitments to extend credit, letters of credit and various forms of guarantees that may be considered off-balance sheet arrangements. Refer to Note 14 of the Notes to Consolidated Financial Statements for further

| As a percent of risk-weighted assets |  | 13.2\% |  | 13.1\% |

information on these arrangements. The Company has not utilized private label asset securitizations as a source of funding. Off-balance sheet arrangements also include any obligation related to a variable interest held in an unconsolidated entity that provides financing, liquidity, credit enhancement or market risk support. Refer to Note 4 of the Notes to Consolidated Financial Statements for further information related to the Company s interests in variable interest entities.

Capital Management The Company is committed to managing capital to maintain strong protection for depositors and creditors and for maximum shareholder benefit. The Company also manages its capital to exceed regulatory capital requirements for well-capitalized bank holding companies. These requirements follow the Capital Accord of the Basel Committee on Banking Supervision ( Basel I ). Table 9 provides a summary of regulatory capital ratios defined by banking regulators under the FDIC Improvement Act prompt corrective action provisions applicable to all banks, as of March 31, 2013, and December 31, 2012. All regulatory ratios exceeded regulatory well-capitalized requirements. In 2010, the Basel Committee on Banking Supervision issued Basel III, a global regulatory framework, proposed to enhance international capital standards. In June 2012, U.S. banking regulators proposed regulatory enhancements to the regulatory capital requirements for U.S. banks, which implement aspects of Basel III and the Dodd-Frank Act, such as redefining the regulatory capital elements and minimum capital ratios, introducing regulatory capital buffers above those minimums, revising the rules for calculating risk-weighted assets and introducing a new Tier 1 common equity ratio. The Company continues to evaluate these proposals, but does not expect their impact to be material to the financial statements.

Total U.S. Bancorp shareholders equity was $\$ 39.5$ billion at March 31, 2013, compared with $\$ 39.0$ billion at December 31, 2012. The increase was primarily the result of corporate earnings, partially offset by dividends and common share repurchases. Refer to Management s Discussion and Analysis Capital Management in the Company s Annual Report on Form 10-K for the year ended December 31, 2012, for further discussion on capital management.

The Company believes certain capital ratios in addition to regulatory capital ratios defined by banking regulators under the FDIC Improvement Act prompt corrective action provisions are useful in evaluating its capital adequacy. The Company s Tier 1 common equity (using Basel I definition) and tangible common equity, as a percent of risk-weighted assets, were 9.1 percent and 8.8 percent, respectively, at March 31, 2013, compared with 9.0 percent and 8.6 percent, respectively, at December 31, 2012. The Company s tangible common equity divided by tangible assets was 7.4 percent at March 31, 2013, compared with 7.2 percent at December 31, 2012. Additionally, the Company s approximate Tier 1 common equity to risk-weighted assets ratio using proposed rules for the Basel III standardized approach released June 2012, was 8.2 percent at March 31, 2013, compared with 8.1 percent at December 31, 2012. Refer to Non-GAAP Financial Measures for further information regarding the calculation of these ratios.

On March 13, 2012, the Company announced its Board of Directors had approved an authorization to repurchase 100 million shares of common stock through March 31, 2013. On March 14, 2013, the Company announced its Board of Directors had approved a one-year authorization to repurchase up to $\$ 2.25$ billion of its common stock, from April 1, 2013 through March 31, 2014.

## Table of Contents

The following table provides a detailed analysis of all shares purchased by the Company or any affiliated purchaser during the first quarter of 2013:

|  |  |  |  | Total | Maximum |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | Number | Number |
|  |  |  |  | of Shares | of Shares |
|  |  |  |  | Purchased as | that May |
|  | Total | Average |  | Part of | Yet Be |
|  | Number |  |  | Publicly | Purchased |
|  | of Shares | Price Paid |  | Announced | Under the |
| Period | Purchased |  | Share | Programs (a) | Programs (b) |
| January | 9,059,098(c) | \$ | 33.11 | 6,300,315 | 47,814,528 |
| February | 6,856,767(d) |  | 33.74 | 6,606,767 | 41,207,761 |
| March | 4,213,450 |  | 33.91 | 4,213,450 |  |
| Total | 20,129,315(e) | \$ | 33.50 | 17,120,532 |  |

(a) All shares were purchased under the stock repurchase program announced on March 13, 2012. This program authorized the purchase of up to 100 million shares of common stock and expired on March 31, 2013.
(b) The shares subject to the stock repurchase program announced on March 14, 2013 are not reflected in this column.
(c) Includes 2,758,783 shares of common stock purchased, at an average price per share of $\$ 33.19$, in open-market transactions by U.S. Bank National Association, the Company's principal banking subsidiary, in its capacity as trustee of the Company's Employee Retirement Savings Plan (the " $401(k)$ Plan").
(d) Includes 250,000 shares of common stock purchased, at an average price per share of $\$ 33.39$, in open-market transactions by U.S. Bank National Association in its capacity as trustee of the Company's 401(k) Plan.
(e) Includes 3,008,783 shares of common stock purchased, at an average price per share of $\$ 33.21$, in open-market transactions by U.S. Bank National Association in its capacity as trustee of the Company's 401(k) Plan.

## LINE OF BUSINESS FINANCIAL REVIEW

The Company s major lines of business are Wholesale Banking and Commercial Real Estate, Consumer and Small Business Banking, Wealth Management and Securities Services, Payment Services, and Treasury and Corporate Support. These operating segments are components of the Company about which financial information is prepared and is evaluated regularly by management in deciding how to allocate resources and assess performance.

Basis for Financial Presentation Business line results are derived from the Company s business unit profitability reporting systems by specifically attributing managed balance sheet assets, deposits and other liabilities and their related income or expense. Refer to Management s Discussion and Analysis Line of Business Financial Review in the Company s Annual Report on Form 10-K for the year ended December 31, 2012, for further discussion on the business lines basis for financial presentation.

Designations, assignments and allocations change from time to time as management systems are enhanced, methods of evaluating performance or product lines change or business segments are realigned to better respond to the Company s diverse customer base. During 2013, certain organization and methodology changes were made and, accordingly, 2012 results were restated and presented on a comparable basis.

Wholesale Banking and Commercial Real Estate Wholesale Banking and Commercial Real Estate offers lending, equipment finance and small-ticket leasing, depository services, treasury management, capital markets, international trade services and other financial services to middle market, large corporate, commercial real estate, financial institution, non-profit and public sector clients. Wholesale Banking and Commercial Real Estate contributed $\$ 332$ million of the Company s net income in the first quarter of 2013, or an increase of $\$ 1 \mathrm{million}$ (. 3 percent), compared with the first quarter of 2012. The increase was primarily driven by a lower provision for credit losses, partially offset by lower net revenue.

Total net revenue decreased $\$ 57$ million ( 6.7 percent) in the first quarter of 2013, compared with the first quarter of 2012 . Net interest income, on a taxable-equivalent basis, decreased $\$ 24$ million ( 4.5 percent) in the first quarter of 2013 , compared with the first quarter of 2012 . The decrease was primarily driven by lower rates on loans and the impact of lower rates on the margin benefit from deposits, partially offset by higher average loan and deposit balances. Noninterest income decreased $\$ 33$ million ( 10.6 percent) in the first quarter of 2013 , compared with the first quarter of 2012, driven by lower commercial products revenue including loan syndication fees, commercial leasing revenue, standby letters of credit fees and other loan-related fees, partially offset by higher bond underwriting fees. In addition, there was a year-over-year decline

## Edgar Filing: US BANCORP \DE\ - Form 10-Q

in equity investment revenue.

Noninterest expense decreased $\$ 3$ million (. 9 percent) in the first quarter of 2013, compared with the first quarter of 2012, primarily due to lower costs related to other real estate owned and FDIC insurance expense. The provision for credit losses decreased $\$ 56$ million in the first quarter of 2013, compared with the first quarter of 2012, primarily due to lower net charge-offs. Nonperforming assets were $\$ 466$ million at March 31, 2013, $\$ 520$ million at December 31, 2012, and $\$ 836$ million at March 31, 2012. Nonperforming assets as a percentage of period-end loans were .67 percent at March 31, 2013, .75 percent at December 31, 2012, and 1.31 percent at March 31, 2012. Refer to the Corporate Risk Profile section for further information on factors impacting the credit quality of the loan portfolios.

Consumer and Small Business Banking Consumer and Small Business Banking delivers products and services through banking offices, telephone servicing and sales, on-line services, direct mail, ATM processing and over mobile

## Edgar Filing: US BANCORP \DE\ - Form 10-Q

Business Banking contributed $\$ 304$ million of the Company s net income in the first quarter of 2013, or a decrease of $\$ 76$ million (20.0 percent), compared with the first quarter of 2012. The decrease was due to lower total net revenue and an increase in noninterest expense, partially offset by a decrease in the provision for credit losses. Within Consumer and Small Business Banking, the retail banking division contributed $\$ 92$ million of the total net income in the first quarter of 2013, or a decrease of $\$ 56$ million ( 37.8 percent) from the first quarter of 2012. Mortgage banking contributed $\$ 212$ million of Consumer and Small Business Banking s net income in the first quarter of 2013, or a decrease of $\$ 20$ million ( 8.6 percent) from the first quarter of 2012.

Total net revenue decreased $\$ 112$ million ( 5.5 percent) in the first quarter of 2013, compared with
the first quarter of 2012. Net interest income, on a taxable-equivalent basis, decreased $\$ 30$ million ( 2.5 percent) in the first quarter of 2013, compared with the first quarter of 2012. The decrease in net interest income was primarily due to lower loan rates and the impact of lower rates on the margin benefit from deposits, partially offset by higher average loan and deposit balances. Noninterest income decreased $\$ 82$ million ( 9.5 percent) in the first quarter of 2013, compared with the first quarter of 2012, primarily the result of lower mortgage origination and sales revenue, as well as lower retail lease revenue.

Noninterest expense increased $\$ 18$ million ( 1.5 percent) in the first quarter of 2013, compared with the first quarter of 2012. The increase reflected higher total compensation and employee benefits expense and higher net shared services costs, partially offset by a reduction in mortgage servicing review-related professional services costs.

The provision for credit losses decreased $\$ 11$ million (4.3 percent) in the first quarter of 2013,

compared with the first quarter of 2012 , due to lower net charge-offs, partially offset by an increase in the reserve allocation due to higher loan balances. As a percentage of average loans outstanding on an annualized basis, net charge-offs decreased to . 74 percent in the first quarter of 2013, compared with .98 percent in the first quarter of 2012 . Nonperforming assets were $\$ 1.4$ billion at March 31, 2013, unchanged from December 31, 2012, and March 31, 2012. Nonperforming assets as a percentage of period-end loans were 1.17 percent at March 31, 2013,

## Edgar Filing: US BANCORP \DE\ - Form 10-Q

1.16 percent at December 31, 2012, and 1.18 percent at March 31, 2012. Refer to the Corporate Risk Profile section for further information on factors impacting the credit quality of the loan portfolios.

Wealth Management and Securities Services Wealth Management and Securities Services provides private banking, financial advisory services, investment management, retail brokerage services, insurance, trust, custody and fund servicing through five businesses: Wealth Management, Corporate Trust Services, U.S. Bancorp Asset Management, Institutional Trust \&

Custody and Fund Services. Wealth Management and Securities Services contributed $\$ 35$ million of the Company s net income in the first quarter of 2013 , or a decrease of $\$ 10$ million ( 22.2 percent), compared with the first quarter of 2012 . The decrease was primarily due to higher noninterest expense, partially offset by higher total net revenue.

Total net revenue increased $\$ 25$ million ( 6.9 percent) in the first quarter of 2013, compared with the first quarter of 2012. Net interest income, on a taxable-equivalent basis, decreased $\$ 2$ million ( 2.1 percent) in the first quarter of 2013, compared with the first quarter of 2012, primarily due to the impact of lower rates on the margin benefit of deposits, partially offset by higher average deposit balances. Noninterest income increased $\$ 27$ million ( 10.1 percent) due to the impact of improved market conditions, business expansion and higher investment product fees. Noninterest expense increased $\$ 40$ million ( 13.7 percent) in the first quarter of 2013, compared with the first quarter of 2012. The increase in noninterest expense was primarily due to higher total

## Table of Contents

compensation and employee benefits expense, an increase in net shared services costs and the impact of business expansion.

Payment Services Payment Services includes consumer and business credit cards, stored-value cards, debit cards, corporate and purchasing card services, consumer lines of credit and merchant processing. Payment Services contributed $\$ 254$ million of the Company s net income in the first quarter of 2013 , or an increase of $\$ 1$ million (. 4 percent) compared with the first quarter of 2012 . The modest increase was primarily due to a lower provision for credit losses and higher total net revenue, partially offset by an increase in noninterest expense.

Total net revenue increased $\$ 7$ million (. 6 percent) in the first quarter 2013, compared with the first quarter of 2012. Net interest income, on a taxable-equivalent basis, decreased $\$ 8$ million ( 2.0 percent) in the first quarter of 2013, compared with the first quarter of 2012, primarily due to lower loan fees and average loan balances, partially offset by improved loan rates and lower rebate costs on the government card program. Noninterest income increased $\$ 15$ million (2.0 percent) in the first quarter of 2013, compared with the first quarter of 2012, the result of higher credit and debit card revenue, primarily due to business expansion, and higher merchant processing services revenue due to higher product fees and business expansion.

Noninterest expense increased $\$ 18$ million ( 3.6 percent) in the first quarter of 2013, compared with the first quarter of 2012, primarily due to higher total compensation and employee benefits expense and an increase in net shared services expense, including the impact of business expansion, partially offset by a reduction in other intangibles and marketing expenses. The provision for credit losses decreased $\$ 11$ million ( 5.1 percent) in the first quarter of 2013, compared with the first quarter of 2012, principally due to lower net charge-offs. As a percentage of average loans outstanding, net charge-offs were 3.35 percent in the first quarter of 2013, compared with 3.54 percent in the first quarter of 2012 .

Treasury and Corporate Support Treasury and Corporate Support includes the Company s investment portfolios, most covered commercial and commercial real estate loans and related other real estate owned, funding, capital management, interest rate risk management, the net effect of transfer pricing related to average balances, income taxes not allocated to business lines, including most tax-advantaged investments, and the residual aggregate of those expenses associated with corporate activities that are managed on a consolidated basis. Treasury and Corporate Support recorded net income of $\$ 503$ million in the first quarter of 2013, compared with $\$ 329$ million in the first quarter of 2012.

Total net revenue increased $\$ 82$ million ( 15.0 percent) in the first quarter of 2013, compared with the first quarter of 2012. Net interest income, on a taxable-equivalent basis, increased $\$ 83$ million ( 17.1 percent) in the first quarter of 2013, compared with the first quarter of 2012, reflecting higher investment securities balances and lower long-term funding rates, partially offset by lower rates on investment securities. Noninterest income was relatively flat in the first quarter of 2013, compared with the first quarter of 2012.

Noninterest expense decreased $\$ 163$ million ( 64.2 percent) in the first quarter of 2013, compared with the first quarter of 2012, principally due to lower litigation, regulatory and insurance-related expenses, a reduction in net shared services expense and the timing of charitable contributions in 2012, partially offset by higher costs related to investments in affordable housing and other tax-advantaged projects and an increase in total compensation and employee benefits expense.

Income taxes are assessed to each line of business at a managerial tax rate of 36.4 percent with the residual tax expense or benefit to arrive at the consolidated effective tax rate included in Treasury and Corporate Support.

## Table of Contents

## NON-GAAP FINANCIAL MEASURES

In addition to capital ratios defined by banking regulators under the FDIC Improvement Act prompt corrective action provisions applicable to all banks, the Company considers various other measures when evaluating capital utilization and adequacy, including:

Tangible common equity to tangible assets,
Tangible common equity to risk-weighted assets using Basel I definition,
Tier 1 common equity to risk-weighted assets using Basel I definition, and
Tier 1 common equity to risk-weighted assets approximated using proposed rules for the Basel III standardized approach released June 2012.
These measures are viewed by management as useful additional methods of reflecting the level of capital available to withstand unexpected market or economic conditions. Additionally, presentation of these measures allows investors, analysts and banking regulators to assess the Company s capital position relative to other financial services companies. These measures differ from capital ratios defined by current banking regulations principally in that the numerator excludes trust preferred securities and preferred stock, the nature and extent of which varies among different financial services companies. These measures are not defined in generally accepted accounting principles (GAAP ) or federal banking regulations. As a result, these measures disclosed by the Company may be considered non- GAAP financial measures.

There may be limits in the usefulness of these measures to investors. As a result, the Company encourages readers to consider the consolidated financial statements and other financial information contained in this report in their entirety, and not to rely on any single financial measure.

The following table shows the Company $s$ calculation of these Non-GAAP financial measures:

| (Dollars in Millions) | $\begin{array}{r} \text { March 31, } \\ 2013 \end{array}$ | December 31, 2012 |  |
| :---: | :---: | :---: | :---: |
| Total equity | \$ 40,847 | \$ | 40,267 |
| Preferred stock | $(4,769)$ |  | $(4,769)$ |
| Noncontrolling interests | $(1,316)$ |  | $(1,269)$ |
| Goodwill (net of deferred tax liability) | $(8,333)$ |  | $(8,351)$ |
| Intangible assets, other than mortgage servicing rights | (963) |  | $(1,006)$ |
| Tangible common equity (a) | 25,466 |  | 24,872 |
| Tier 1 capital, determined in accordance with prescribed regulatory requirements using Basel I definition | 31,774 |  | 31,203 |
| Preferred stock | $(4,769)$ |  | $(4,769)$ |
| Noncontrolling interests, less preferred stock not eligible for Tier 1 capital | (684) |  | (685) |

## CRITICAL ACCOUNTING POLICIES

The accounting and reporting policies of the Company comply with accounting principles generally accepted in the United States and conform to general practices within the banking industry. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions. The Company s financial position and results of operations can be affected by these estimates and assumptions, which are integral to understanding the Company s financial statements. Critical accounting policies are those policies management believes are the most important to the portrayal of the Company s financial condition and results, and require management to make estimates that are difficult, subjective or complex. Most accounting policies are not considered by management to be critical accounting policies. Those policies considered to be critical accounting policies relate to the allowance for credit losses, fair value estimates, purchased loans and related indemnification assets, MSRs, goodwill and other intangibles and income taxes. Management has discussed the development and the selection of critical accounting policies with the Company s Audit Committee. These accounting policies are discussed in detail in Management s Discussion and Analysis Critical Accounting Policies and the Notes to Consolidated Financial Statements in the Company s Annual Report on Form 10-K for the year ended December 31, 2012.

## CONTROLS AND PROCEDURES

Under the supervision and with the participation of the Company s management, including its principal executive officer and principal financial officer, the Company has evaluated the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act )). Based upon this evaluation, the principal executive officer and principal financial officer have concluded that, as of the end of the period covered by this report, the Company s disclosure controls and procedures were effective.

During the most recently completed fiscal quarter, there was no change made in the Company s internal controls over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that has materially affected, or is reasonably likely to materially affect, the Company s internal control over financial reporting.

## Notes to Consolidated Financial Statements

(Unaudited)

## Note 1 Basis of Presentation

The accompanying consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and, therefore, do not include all information and notes necessary for a complete presentation of financial position, results of operations and cash flow activity required in accordance with accounting principles generally accepted in the United States. In the opinion of management of U.S. Bancorp (the Company ), all adjustments (consisting only of normal recurring adjustments) necessary for a fair statement of results for the interim periods have been made. These financial statements and notes should be read in conjunction with the consolidated financial statements and notes included in the Company s Annual Report on Form 10-K for the year ended December 31, 2012. Certain amounts in prior periods have been reclassified to conform to the current presentation.

Accounting policies for the lines of business are generally the same as those used in preparation of the consolidated financial statements with respect to activities specifically attributable to each business line. However, the preparation of business line results requires management to establish methodologies to allocate funding costs, expenses and other financial elements to each line of business. Table 10 Line of Business Financial Performance included in Management s Discussion and Analysis provides details of segment results. This information is incorporated by reference into these Notes to Consolidated Financial Statements.

## Table of Contents

## Note 2 Investment Securities

The amortized cost, other-than-temporary impairment recorded in other comprehensive income (loss), gross unrealized holding gains and losses, and fair value of held-to-maturity and available-for-sale investment securities were as follows:

(a) Held-to-maturity investment securities are carried at historical cost or at fair value at the time of transfer from the available-for-sale to held-to-maturity category, adjusted for amortization of premiums and accretion of discounts and credit-related other-than-temporary impairment.
(b) Available-for-sale investment securities are carried at fair value with unrealized net gains or losses reported within accumulated other comprehensive income (loss) in shareholders equity.
(c) Prime securities are those designated as such by the issuer at origination. When an issuer designation is unavailable, the Company determines at acquisition date the categorization based on asset pool characteristics (such as weighted-average credit score, loan-to-value, loan type, prevalence of low documentation loans) and deal performance (such as pool delinquencies and security market spreads). When the Company determines the designation, prime securities typically have a weighted average credit score of 725 or higher and a loan-to-value of 80 percent or lower; however, other pool characteristics may result in designations that deviate from these credit score and loan-to-value thresholds.
(d) Includes all securities not meeting the conditions to be designated as prime.
(e) Represents impairment not related to credit for those investment securities that have been determined to be other-than-temporarily impaired.
(f) Represents unrealized losses on investment securities that have not been determined to be other-than-temporarily impaired.

## Edgar Filing: US BANCORP \DE\ - Form 10-Q

The weighted-average maturity of the available-for-sale investment securities was 4.4 years at March 31, 2013, compared with 4.1 years at December 31, 2012. The corresponding weighted-average yields were 2.80 percent and 2.93 percent, respectively. The weighted-average maturity of the held-to-maturity investment securities was 3.6 years at March 31, 2013, and 3.3 years at December 31, 2012. The corresponding weighted-average yields were 1.91 percent and 1.94 percent, respectively.

For amortized cost, fair value and yield by maturity date of held-to-maturity and available-for-sale investment securities outstanding at March 31, 2013, refer to Table 4 included in Management s Discussion and Analysis which is incorporated by reference into these Notes to Consolidated Financial Statements.

Investment securities with a fair value of $\$ 18.1$ billion at March 31, 2013, and $\$ 20.1$ billion at December 31, 2012, were pledged to secure public, private and trust deposits, repurchase agreements and for other purposes required by contractual obligation or law. Included in these amounts were securities where the Company and certain counterparties have agreements granting the counterparties the right to sell or pledge the securities. Investment securities delivered under these types of arrangements had a fair value of $\$ 2.5$ billion at March 31, 2013, and $\$ 3.5$ billion at December 31, 2012.

## Table of Contents

The following table provides information about the amount of interest income from taxable and non-taxable investment securities:

| Three Months Ended March 31 | 2013 |  |
| :--- | ---: | ---: |
| (Dollars in Millions) | 2012 |  |
| Taxable | $\$ 344$ | $\$ 397$ |
| Non-taxable | 66 |  |
| Total interest income from investment securities | $\$ 410$ | $\$ 468$ |

The following table provides information about the amount of gross gains and losses realized through the sales of available-for-sale investment securities:

| Three Months Ended March 31 | 2013 |
| :--- | :---: |
| (Dollars in Millions) | 2012 |
| Realized gains | $\$ 12$ |
| Realized losses | $\$$ |
| Net realized gains (losses) | $\$ 12$ |
| Income tax (benefit) on net realized gains (losses) | $\$$ |

The Company conducts a regular assessment of its investment securities with unrealized losses to determine whether investment securities are other-than-temporarily impaired considering, among other factors, the nature of the investment securities, credit ratings or financial condition of the issuer, the extent and duration of the unrealized loss, expected cash flows of underlying collateral, market conditions and whether the Company intends to sell or it is more likely than not the Company will be required to sell the investment securities.

The following table summarizes other-than-temporary impairment by investment category:

|  | 2013 |  |  |  | 2012 |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Three Months Ended March 31 (Dollars in Millions) | Losses Recorded in Earnings |  | Other Gains (Losses) (c) |  | Losses <br> Recorded in TotalEarnings |  | Other Gains <br> (Losses) <br> (c) |  | Total |  |
| Available-for-sale |  |  |  |  |  |  |  |  |  |  |
| Mortgage-backed securities |  |  |  |  |  |  |  |  |  |  |
| Non-agency residential |  |  |  |  |  |  |  |  |  |  |
| Prime (a) | \$ | (1) | \$ | 1 | \$ | \$ (1) | \$ | (3) | \$ | (4) |
| Non-prime (b) |  | (6) |  | 5 | (1) | (7) |  | 3 |  | (4) |
| Commercial non-agency |  |  |  |  |  |  |  | (1) |  | (1) |
| Other asset-backed securities |  |  |  |  |  | (1) |  | 1 |  |  |
| Total available-for-sale | \$ | (7) | \$ | 6 | \$ (1) | \$ (9) | \$ |  |  | (9) |

(a) Prime securities are those designated as such by the issuer at origination. When an issuer designation is unavailable, the Company determines at acquisition date the categorization based on asset pool characteristics (such as weighted-average credit score, loan-to-value, loan type, prevalence of low documentation loans) and deal performance (such as pool delinquencies and security market spreads).
(b) Includes all securities not meeting the conditions to be designated as prime.
(c) Losses represent the non-credit portion of other-than-temporary impairment recorded in other comprehensive income (loss) for investment securities determined to be other-than-temporarily impaired during the period. Gains represent recoveries in the fair value of securities that had non-credit other-than-temporary impairment during the period.
The Company determined the other-than-temporary impairment recorded in earnings for debt securities not intended to be sold by estimating the future cash flows of each individual investment security, using market information where available, and discounting the cash flows at the original effective rate of the investment security. Other-than-temporary impairment recorded in other comprehensive income (loss) was measured as the difference between that discounted amount and the fair value of each investment security.

## Table of Contents

The following table includes the ranges for principal assumptions used for those available-for-sale non-agency mortgage-backed securities determined to be other-than-temporarily impaired:

|  | Prime (a) |  |  | Non-Prime (b) |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Minimum | Maximum | Average | Minimum | Maximum | Average |
| March 31, 2013 |  |  |  |  |  |  |
| Estimated lifetime prepayment rates | 8\% | 18\% | 16\% | 2\% | 10\% | 6\% |
| Lifetime probability of default rates | 4 | 6 | 4 | 4 | 10 | 7 |
| Lifetime loss severity rates | 45 | 50 | 48 | 50 | 70 | 60 |
| December 31, 2012 |  |  |  |  |  |  |
| Estimated lifetime prepayment rates | 6\% | 22\% | 14\% | 3\% | 10\% | 6\% |
| Lifetime probability of default rates | 3 | 6 | 4 | 3 | 10 | 7 |
| Lifetime loss severity rates | 40 | 50 | 47 | 45 | 65 | 56 |

(a) Prime securities are those designated as such by the issuer at origination. When an issuer designation is unavailable, the Company determines at acquisition date the categorization based on asset pool characteristics (such as weighted-average credit score, loan-to-value, loan type, prevalence of low documentation loans) and deal performance (such as pool delinquencies and security market spreads).
(b) Includes all securities not meeting the conditions to be designated as prime.

Changes in the credit losses on debt securities are summarized as follows:

(a) The Company has $\$ 21$ million of unrealized losses on residential non-agency mortgage-backed securities. Credit-related other-than-temporary impairment on these securities may occur if there is further deterioration in the underlying collateral pool performance. Borrower defaults may increase if current economic conditions persist or worsen. Additionally, further deterioration in home prices may increase the severity of projected losses.
(b) Prime securities are those designated as such by the issuer at origination. When an issuer designation is unavailable, the Company determines at acquisition date the categorization based on asset pool characteristics (such as weighted-average credit score, loan-to-value, loan type, prevalence of low documentation loans) and deal performance (such as pool delinquencies and security market spreads).
(c) Includes all securities not meeting the conditions to be designated as prime.
U. S. Bancorp

## Table of Contents

The Company does not consider these unrealized losses to be credit-related. These unrealized losses primarily relate to changes in interest rates and market spreads subsequent to purchase. A substantial portion of investment securities that have unrealized losses are either corporate debt or mortgage-backed securities issued with high investment grade credit ratings. In general, the issuers of the investment securities are contractually prohibited from prepayment at less than par, and the Company did not pay significant purchase premiums for these investment securities. At March 31, 2013, the Company had no plans to sell investment securities with unrealized losses, and believes it is more likely than not it would not be required to sell such investment securities before recovery of their amortized cost.

## Note 3 Loans and Allowance for Credit Losses

The composition of the loan portfolio, disaggregated by class and underlying specific portfolio type, was as follows:

The Company had loans of $\$ 75.1$ billion at March 31, 2013, and $\$ 74.1$ billion at December 31, 2012, pledged at the Federal Home Loan Bank ( FHLB ), and loans of $\$ 49.5$ billion at March 31, 2013, and $\$ 48.6$ billion at December 31, 2012, pledged at the Federal Reserve Bank.

Originated loans are reported at the principal amount outstanding, net of unearned interest and deferred fees and costs. Net unearned interest and deferred fees and costs amounted to $\$ 667$ million at March 31, 2013, and $\$ 753$ million at December 31, 2012. All purchased loans and related indemnification assets are recorded at fair value at the date of purchase. The Company evaluates purchased loans for impairment at the date of purchase in accordance with applicable authoritative accounting guidance. Purchased loans with evidence of credit deterioration since origination for which it is probable that all contractually required payments will not be collected are considered purchased impaired loans. All other purchased loans are considered purchased nonimpaired loans.

Changes in the accretable balance for purchased impaired loans were as follows:

Edgar Filing: US BANCORP \DE\ - Form 10-Q

| Balance at beginning of period | $\$ 1,709$ |
| :--- | ---: |
| Purchases | $\$ 2,619$ |
| Accretion | $(136)$ |
| Disposals | $(115)$ |
| Reclassifications (to)/from nonaccretable difference (a) | $(42)$ |
| Other (b) | 132 |
|  | $(2)$ |
| Balance at end of period | 10 |

(a) Primarily relates to changes in expected credit performance.
(b) The amount in first quarter 2013 primarily represents the reclassification of unamortized decreases in the FDIC asset (which are now presented as a separate component within the covered assets table on page 49), partially offset by the impact of changes in expectations about retaining covered single-family loans beyond the term of the indemnification agreements.

## Table of Contents

#### Abstract

Allowance for Credit Losses The allowance for credit losses reserves for probable and estimable losses incurred in the Company s loan and lease portfolio and includes certain amounts that do not represent loss exposure to the Company because those losses are recoverable under loss sharing agreements with the FDIC. The allowance for credit losses is increased through provisions charged to operating earnings and reduced by net charge-offs. Management evaluates the allowance each quarter to ensure it appropriately reserves for incurred losses.

The allowance recorded for loans in the commercial lending segment is based on reviews of individual credit relationships and considers the migration analysis of commercial lending segment loans and actual loss experience. The Company currently uses a 12 -year period of historical losses in considering actual loss experience, because it believes that period best reflects the losses incurred in the portfolio. This timeframe and the results of the analysis are evaluated quarterly to determine if they are appropriate. The allowance recorded for impaired loans greater than $\$ 5$ million in the commercial lending segment is based on an individual loan analysis utilizing expected cash flows discounted using the original effective interest rate, the observable market price of the loan, or the fair value of the collateral for collateral-dependent loans. The allowance recorded for all other commercial lending segment loans is determined on a homogenous pool basis and includes consideration of product mix, risk characteristics of the portfolio, bankruptcy experience, and historical losses, adjusted for current trends. The Company also considers the impacts of any loan modifications made to commercial lending segment loans and any subsequent payment defaults to its expectations of cash flows, principal balance, and current expectations about the borrower s ability to pay in determining the allowance for credit losses.

The allowance recorded for Troubled Debt Restructuring ( TDR ) loans and purchased impaired loans in the consumer lending segment is determined on a homogenous pool basis utilizing expected cash flows discounted using the original effective interest rate of the pool, or the prior quarter effective rate, respectively. The allowance for collateral-dependent loans in the consumer lending segment is determined based on the fair value of the collateral. The allowance recorded for all other consumer lending segment loans is determined on a homogenous pool basis and includes consideration of product mix, risk characteristics of the portfolio, bankruptcy experience, delinquency status, refreshed loan-to-value ratios when possible, portfolio growth and historical losses, adjusted for current trends. The Company also considers any modifications made to consumer lending segment loans including the impacts of any subsequent payment defaults since modification in determining the allowance for credit losses, such as the borrower s ability to pay under the restructured terms, and the timing and amount of payments.

The allowance for the covered loan segment is evaluated each quarter in a manner similar to that described for non-covered loans and represents any decreases in expected cash flows of those loans after the acquisition date. The provision for credit losses for covered loans considers the indemnification provided by the FDIC.

In addition, subsequent payment defaults on loan modifications considered TDRs are considered in the underlying factors used in the determination of the appropriateness of the allowance for credit losses. For each loan segment, the Company estimates future loan charge-offs through a variety of analysis, trends and underlying assumptions. With respect to the commercial lending segment, TDRs may be collectively evaluated for impairment where observed performance history, including defaults, is a primary driver of the loss allocation. For commercial TDRs individually evaluated for impairment, attributes of the borrower are the primary factors in determining the allowance for credit losses. However, incorporation of loss history is factored into the allowance methodology applied to this category of loans. With respect to the consumer lending segment, performance of the portfolio, including defaults on TDRs, is considered when estimating future cash flows.

The Company s methodology for determining the appropriate allowance for credit losses for all the loan segments also considers the imprecision inherent in the methodologies used. As a result, in addition to the amounts determined under the methodologies described above, management also considers the potential impact of other qualitative factors which include, but are not limited to, economic factors; geographic and other concentration risks; delinquency and nonaccrual trends; current business conditions; changes in lending policy, underwriting standards, internal review and other relevant business practices; and the regulatory environment. The consideration of these items results in adjustments to allowance amounts included in the Company $s$ allowance for credit losses for each of the above loan segments.

The Company also assesses the credit risk associated with off-balance sheet loan commitments, letters of credit, and derivatives. Credit risk associated with derivatives is reflected in the fair values recorded for those positions. The liability for off-balance sheet credit exposure related to loan commitments and other credit guarantees is included in other liabilities. Because business processes and credit risks associated with unfunded credit commitments are essentially the same as for loans, the Company utilizes similar processes to estimate its liability for unfunded credit commitments.

Additional detail of the allowance for credit losses by portfolio class was as follows:

## Edgar Filing: US BANCORP \DE\ - Form 10-Q

(a) Represents the allowance for credit losses related to loans greater than $\$ 5$ million classified as nonperforming or TDRs.

Additional detail of loan balances by portfolio class was as follows:

(a) Represents loans greater than $\$ 5$ million classified as nonperforming or TDRs.
(b) Includes expected reimbursements from the FDIC under loss sharing agreements.

## Table of Contents

Credit Quality The quality of the Company s loan portfolios is assessed as a function of net credit losses, levels of nonperforming assets and delinquencies, and credit quality ratings as defined by the Company.

For all loan classes, loans are considered past due based on the number of days delinquent except for monthly amortizing loans which are classified delinquent based upon the number of contractually required payments not made (for example, two missed payments is considered 30 days delinquent).

Commercial lending segment loans are generally placed on nonaccrual status when the collection of principal and interest has become 90 days past due or is otherwise considered doubtful. When a loan is placed on nonaccrual status, unpaid accrued interest is reversed. Commercial lending segment loans are generally fully or partially charged down to the fair value of the collateral securing the loan, less costs to sell, when the loan is considered uncollectible.

Consumer lending segment loans are generally charged-off at a specific number of days or payments past due. Residential mortgages and other retail loans secured by 1-4 family properties are generally charged down to the fair value of the collateral securing the loan, less costs to sell, at 180 days past due, and placed on nonaccrual status in instances where a partial charge-off occurs unless the loan is well secured and in the process of collection. Loans and lines in a junior lien position secured by 1-4 family properties are placed on nonaccrual status at 120 days past due or when behind a first lien that has become 180 days or greater past due or placed on nonaccrual status. Any secured consumer lending segment loan whose borrower has had debt discharged through bankruptcy, for which the loan amount exceeds the fair value of the collateral, is charged down to the fair value of the related collateral and the remaining balance is placed on nonaccrual status. Credit card loans continue to accrue interest until the account is charged off. Credit cards are charged off at 180 days past due. Other retail loans not secured by 1-4 family properties are charged-off at 120 days past due; and revolving consumer lines are charged off at 180 days past due. Similar to credit cards, other retail loans are generally not placed on nonaccrual status because of the relative short period of time to charge-off. Certain retail customers having financial difficulties may have the terms of their credit card and other loan agreements modified to require only principal payments and, as such, are reported as nonaccrual.

For all loan classes, interest payments received on nonaccrual loans are generally recorded as a reduction to the loan carrying amount. Interest payments are generally recorded as reductions to a loan s carrying amount while a loan is on nonaccrual and are recognized as interest income upon payoff of the loan. Interest income may be recognized for interest payments if the remaining carrying amount of the loan is believed to be collectible. In certain circumstances, loans in any class may be restored to accrual status, such as when a loan has demonstrated sustained repayment performance or no amounts are past due and prospects for future payment are no longer in doubt; or the loan becomes well secured and is in the process of collection. Loans where there has been a partial charge-off may be returned to accrual status if all principal and interest (including amounts previously charged-off) is expected to be collected and the loan is current.

Covered loans not considered to be purchased impaired are evaluated for delinquency, nonaccrual status and charge-off consistent with the class of loan they would be included in had the loss share coverage not been in place. Generally, purchased impaired loans are considered accruing loans. However, the timing and amount of future cash flows for some loans is not reasonably estimable. Those loans are classified as nonaccrual loans and interest income is not recognized until the timing and amount of the future cash flows can be reasonably estimated.

## Table of Contents

The following table provides a summary of loans by portfolio class, including the delinquency status of those that continue to accrue interest, and those that are nonperforming:

|  |  | Accruing <br> 30-89 Days <br> Past Due | 90 Days or <br> More Past Due | Nonperforming |
| :--- | ---: | ---: | ---: | ---: | ---: |

(a)At March 31, 2013, $\$ 398$ million of loans 3089 days past due and $\$ 3.4$ billion of loans 90 days or more past due purchased from Government National Mortgage Association ( GNMA ) mortgage pools whose repayments are insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs, were classified as current, compared with $\$ 441$ million and $\$ 3.2$ billion at December 31, 2012, respectively.
The Company classifies its loan portfolios using internal credit quality ratings on a quarterly basis. These ratings include: pass, special mention and classified, and are an important part of the Company s overall credit risk management process and evaluation of the allowance for credit losses. Loans with a pass rating represent those not classified on the Company s rating scale for problem credits, as minimal credit risk has been identified. Special mention loans are those that have a potential weakness deserving management s close attention. Classified loans are those where a well-defined weakness has been identified that may put full collection of contractual cash flows at risk. It is possible that others, given the same information, may reach different reasonable conclusions regarding the credit quality rating classification of specific loans.

The following table provides a summary of loans by portfolio class and the Company s internal credit quality rating:

Edgar Filing: US BANCORP \DE\ - Form 10-Q

| Total loans, excluding covered loans | 206,041 | 1,678 | 4,897 |  | 6,575 |  | 212,616 |

(a) Classified rating on consumer loans primarily based on delinquency status.
(b) At March 31, 2013, $\$ 3.4$ billion of GNMA loans 90 days or more past due and $\$ 2.4$ billion of restructured GNMA loans whose repayments are insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs were classified with a pass rating, compared with $\$ 3.2$ billion and $\$ 2.4$ billion at December 31, 2012, respectively.

## Table of Contents

For all loan classes, a loan is considered to be impaired when, based on current events or information, it is probable the Company will be unable to collect all amounts due per the contractual terms of the loan agreement. Impaired loans include all nonaccrual and TDR loans. For all loan classes, interest income on TDR loans is recognized under the modified terms and conditions if the borrower has demonstrated repayment performance at a level commensurate with the modified terms over several payment cycles. Interest income is generally not recognized on other impaired loans until the loan is paid off. However, interest income may be recognized for interest payments if the remaining carrying amount of the loan is believed to be collectible.

Factors used by the Company in determining whether all principal and interest payments due on commercial and commercial real estate loans will be collected and therefore whether those loans are impaired include, but are not limited to, the financial condition of the borrower, collateral and/or guarantees on the loan, and the borrower s estimated future ability to pay based on industry, geographic location and certain financial ratios. The evaluation of impairment on residential mortgages, credit card loans and other retail loans is primarily driven by delinquency status of individual loans or whether a loan has been modified. Individual covered loans, whose future losses are covered by loss sharing agreements with the FDIC that substantially reduce the risk of credit losses to the Company, are evaluated for impairment and accounted for in a manner consistent with the class of loan they would have been included in had the loss sharing coverage not been in place.

A summary of impaired loans by portfolio class was as follows:

| (Dollars in Millions) | Period-endRecordedInvestment (a) |  | Unpaid Principal Balance |  | Valuation <br> Allowance |  | Commitments to Lend Additional Funds |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Table of Contents

Troubled Debt Restructurings In certain circumstances, the Company may modify the terms of a loan to maximize the collection of amounts due when a borrower is experiencing financial difficulties or is expected to experience difficulties in the near-term. Concessionary modifications are classified as TDRs unless the modification results in only an insignificant delay in payments to be received. The Company recognizes interest on TDRs if the borrower complies with the revised terms and conditions as agreed upon with the Company and has demonstrated repayment performance at a level commensurate with the modified terms over several payment cycles. To the extent a previous restructuring was insignificant, the Company considers the cumulative effect of past restructurings related to the receivable when determining whether a current restructuring is a TDR. Loans classified as TDRs are considered impaired loans for reporting and measurement purposes.

The following table provides a summary of loans modified as TDRs during the periods presented, by portfolio class:

| Three Months Ended March 31 | 2013 <br> Pre-ModificatiorPost-Modification |  |  |  |  | 2012 |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  | Number of Loans | Pre-Modification Outstanding |  | Post-Modification |  |
|  | Number of Loans | Outstanding |  | Outstanding |  |  |  |  |  | ding |
|  |  |  | Loan |  | Loan |  |  | Loan |  | Loan |
| (Dollars in Millions) |  |  | lance |  | lance |  |  | ance |  | ance |
| Commercial | 815 | \$ | 34 | \$ | 33 | 1,279 | \$ | 91 | \$ | 72 |
| Commercial real estate | 63 |  | 80 |  | 78 | 111 |  | 204 |  | 197 |
| Residential mortgages | 807 |  | 110 |  | 105 | 621 |  | 111 |  | 107 |
| Credit card | 7,818 |  | 48 |  | 48 | 14,218 |  | 80 |  | 80 |
| Other retail | 1,865 |  | 49 |  | 49 | 988 |  | 15 |  | 15 |
|  |  |  |  |  |  |  |  |  |  |  |
| Total loans, excluding GNMA and covered loans | 11,368 |  | 321 |  | 313 | 17,217 |  | 501 |  | 471 |
| Loans purchased from GNMA mortgage pools | 1,256 |  | 177 |  | 182 | 1,400 |  | 179 |  | 187 |
| Covered loans | 50 |  | 53 |  | 41 | 43 |  | 140 |  | 137 |
|  |  |  |  |  |  |  |  |  |  |  |
| Total loans | 12,674 | \$ | 551 | \$ | 536 | 18,660 | \$ | 820 | \$ | 795 |

Residential mortgages, home equity and second mortgages, and loans purchased from Government National Mortgage Association ( GNMA ) mortgage pools in the table above include trial period arrangements offered to customers during the periods presented. The post-modification balances for these loans reflect the current outstanding balance until a permanent modification is made. In addition, the post-modification balances typically include capitalization of unpaid accrued interest and/or fees under the various modification programs. At March 31, 2013, 94 residential mortgages, 18 home equity and second mortgage loans and 338 loans purchased from GNMA mortgage pools with outstanding balances of $\$ 15$ million, $\$ 2$ million and $\$ 51$ million, respectively, were in a trial period and have estimated post-modification balances of $\$ 15$ million, $\$ 2$ million and $\$ 51$ million, respectively, assuming permanent modification occurs at the end of the trial period.

Many of the Company s TDRs are determined on a case-by-case basis in connection with ongoing loan collection processes. However, the Company has also implemented certain restructuring programs that may result in TDRs.

For the commercial lending segment, modifications generally result in the Company working with borrowers on a case-by-case basis. Commercial and commercial real estate modifications generally include extensions of the maturity date and may be accompanied by an increase or decrease to the interest rate, which may not be deemed a market rate of interest. In addition, the Company may work with the borrower in identifying other changes that mitigate loss to the Company, which may include additional collateral or guarantees to support the loan. To a lesser extent, the Company may waive contractual principal. The Company classifies these concessions as TDRs to the extent the Company determines that the borrower is experiencing financial difficulty.

Modifications for the consumer lending segment are generally part of programs the Company has initiated. The Company participates in the U.S. Department of Treasury Home Affordable Modification Program ( HAMP ). HAMP gives qualifying homeowners an opportunity to permanently modify residential mortgage loans and achieve more affordable monthly payments, with the U.S. Department of Treasury compensating the Company for a portion of the reduction in monthly amounts due from borrowers participating in this program. The Company also modifies residential mortgage loans under Federal Housing Administration, Department of Veterans Affairs, or other internal programs. Under these programs, the Company provides concessions to qualifying borrowers experiencing financial difficulties. The concessions may include adjustments to interest rates, conversion of adjustable rates to fixed rates, extension of maturity dates or deferrals of payments, capitalization of accrued interest and/or outstanding advances, or in limited situations, partial forgiveness of loan principal. In most instances, participation in residential mortgage loan restructuring programs requires the customer to complete a short-term trial period. A permanent loan modification is contingent on the customer successfully completing the trial period arrangement and the loan documents are not modified until that time. The Company reports loans in a trial period arrangement as TDRs.

## Table of Contents

Credit card and other retail loan modifications are generally part of two distinct restructuring programs. The Company offers workout programs providing customers experiencing financial difficulty with modifications whereby balances may be amortized up to 60 months, and generally include waiver of fees and reduced interest rates. The Company also provides modification programs to qualifying customers experiencing a temporary financial hardship in which reductions are made to monthly required minimum payments for up to 12 months. Balances related to these programs are generally frozen, however, accounts may be reopened upon successful exit of the program, in which account privileges may be restored.

In addition, the Company considers secured loans to consumer borrowers that have debt discharged through bankruptcy where the borrower has not reaffirmed the debt to be TDRs.

Modifications to loans in the covered segment are similar in nature to that described above for non-covered loans, and the evaluation and determination of TDR status is similar, except that acquired loans restructured after acquisition are not considered TDRs for purposes of the Company s accounting and disclosure if the loans evidenced credit deterioration as of the acquisition date and are accounted for in pools. Losses associated with the modification on covered loans, including the economic impact of interest rate reductions, are generally eligible for reimbursement under loss sharing agreements with the FDIC.

The following table provides a summary of TDR loans that defaulted (fully or partially charged-off or became 90 days or more past due) during the periods presented that were modified as TDRs within 12 months previous to default:

|  | 2013 |  |  | 012 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| (Dollars in Millions) | Number of Loans | Amount Defaulted |  | Number of Loans | Amount Defaulted |  |
| Commercial | 168 | \$ | 2 | 241 | \$ | 21 |
| Commercial real estate | 19 |  | 28 | 54 |  | 92 |
| Residential mortgages | 183 |  | 31 | 64 |  | 12 |
| Credit card | 1,986 |  | 11 | 2,526 |  | 15 |
| Other retail | 517 |  | 28 | 184 |  | 3 |
|  |  |  |  |  |  |  |
| Total loans, excluding GNMA and covered loans | 2,873 |  | 100 | 3,069 |  | 143 |
| Loans purchased from GNMA mortgage pools | 3,822 |  | 478 | 221 |  | 33 |
| Covered loans | 10 |  | 3 | 34 |  | 60 |
|  |  |  |  |  |  |  |
| Total loans | 6,705 | \$ | 581 | 3,324 | \$ | 236 |

In addition to the defaults in the table above, during the three months ended March 31, 2013, the Company had 97 residential mortgage loans, home equity and second mortgage loans and loans purchased from GNMA mortgage pools with aggregate outstanding balances of $\$ 16$ million where borrowers did not successfully complete the trial period arrangement and therefore are no longer eligible for a permanent modification under the applicable modification program.

Covered Assets Covered assets represent loans and other assets acquired from the FDIC, subject to loss sharing agreements, and include expected reimbursements from the FDIC. The carrying amount of the covered assets consisted of purchased impaired loans, purchased nonimpaired loans and other assets as shown in the following table:

## Edgar Filing: US BANCORP \DE\ - Form 10-Q

| Losses reimbursable by the FDIC (a) Unamortized changes in FDIC asset (b) |  |  |  | 1,298 | 1,298 |  |  |  | 1,280 | 1,280 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | 849 | 849 |  |  |  |  |  |
| Covered loans | 4,452 |  | 4,136 | 2,147 | 10,735 | 5,301 |  | 4,727 | 1,280 | 11,308 |
| Foreclosed real estate |  |  |  | 168 | 168 |  |  |  | 197 | 197 |
| Total covered assets | \$ 4,452 | \$ | 4,136 | \$ 2,315 | \$ 10,903 | \$ 5,301 | \$ | 4,727 | \$ 1,477 | \$ 11,505 |

(a) Relates to loss sharing agreements with remaining terms from 2 to 7 years.
(b) Represents decreases in losses expected to be reimbursed by the FDIC as a result of decreases in expected losses on the covered loans. These amounts are amortized as a reduction in interest income on covered loans over the shorter of the expected life of the respective covered loans or the remaining contractual term of the indemnification agreements. These amounts were presented within the separate loan categories prior to January 1, 2013.
U. S. Bancorp

## Table of Contents

The Company adopted recently issued indemnification asset accounting guidance effective January 1, 2013 applicable to FDIC loss-sharing agreements. The guidance requires any reduction in expected cash flows from the FDIC resulting from increases in expected cash flows from the covered assets (when there are no previous valuation allowances to reverse) to be amortized over the shorter of the remaining contractual term of the indemnification agreements or the remaining life of the covered assets. Prior to adoption of this guidance, such increases in expected cash flows of purchased loans and decreases in expected cash flows of the FDIC indemnification assets were considered together and recognized over the remaining life of the loans. The adoption of this guidance did not materially affect the Company s financial statements.

At March 31, 2013, $\$ 22$ million of the purchased impaired loans included in covered loans were classified as nonperforming assets, compared with $\$ 82$ million at December 31, 2012, because the expected cash flows are primarily based on the liquidation of underlying collateral and the timing and amount of the cash flows could not be reasonably estimated. Interest income is recognized on other purchased impaired loans through accretion of the difference between the carrying amount of those loans and their expected cash flows. The initial determination of the fair value of the purchased loans includes the impact of expected credit losses and, therefore, no allowance for credit losses is recorded at the purchase date. To the extent credit deterioration occurs after the date of acquisition, the Company records an allowance for credit losses.

Note 4 Accounting for Transfers and Servicing of Financial Assets and Variable Interest Entities
The Company sells financial assets in the normal course of business. The majority of the Company s financial asset sales are residential mortgage loan sales primarily to government-sponsored enterprises (GSEs ) through established programs, the sale or syndication of tax-advantaged investments, commercial loan sales through participation agreements, and other individual or portfolio loan and securities sales. In accordance with the accounting guidance for asset transfers, the Company considers any ongoing involvement with transferred assets in determining whether the assets can be derecognized from the balance sheet. For loans sold under participation agreements, the Company also considers the terms of the loan participation agreement and whether they meet the definition of a participating interest and thus qualify for derecognition. With the exception of servicing and certain performance-based guarantees, the Company s continuing involvement with financial assets sold is minimal and generally limited to market customary representation and warranty clauses. The guarantees provided to certain third-parties in connection with the sale or syndication of certain assets, primarily loan portfolios and tax-advantaged investments, are further discussed in Note 14. When the Company sells financial assets, it may retain servicing rights and/or other interests in the transferred financial assets. The gain or loss on sale depends on the previous carrying amount of the transferred financial assets and the consideration received and any liabilities incurred in exchange for the transferred assets. Upon transfer, any servicing assets and other interests that continue to be held by the Company are initially recognized at fair value. For further information on mortgage servicing rights ( MSRs ), refer to Note 5. On a limited basis, the Company may acquire and package high-grade corporate bonds for select corporate customers, in which the Company generally has no continuing involvement with these transactions. Additionally, the Company is an authorized GNMA issuer and issues GNMA securities on a regular basis. The Company has no other asset securitizations or similar asset-backed financing arrangements that are off-balance sheet.

The Company is involved in various entities that are considered to be variable interest entities ( VIEs ). The Company s investments in VIEs primarily represent private investment funds or partnerships that make equity investments, provide debt financing or support community-based investments that may enable the Company to ensure regulatory compliance with the Community Reinvestment Act. In addition, the Company sponsors entities to which it transfers tax-advantaged investments. The Company sinvestments in these entities are designed to generate a return primarily through the realization of federal and state income tax credits over specified time periods. The Company realized federal and state income tax credits related to these investments of $\$ 236$ million and $\$ 166$ million for the three months ended March 31, 2013, and 2012, respectively. The Company amortizes its investments in these entities as the tax credits are realized. Amortization expense is recorded in tax expense for investments meeting certain characteristics, and in other noninterest expense for other investments. Amortization expense recorded in tax expense was $\$ 149$ million and $\$ 89$ million, and in other noninterest expense was $\$ 132$ million and $\$ 101$ million for the three months ended March 31, 2013 and 2012, respectively.

At March 31, 2013, approximately $\$ 7.2$ billion of the Company s assets and $\$ 5.2$ billion of its liabilities included on the Consolidated Balance Sheet were related to community development and tax-advantaged investment VIEs which

## Table of Contents

the Company has consolidated, compared with $\$ 7.1$ billion and $\$ 5.2$ billion, respectively, at December 31, 2012. The majority of the assets of these consolidated VIEs are reported in other assets, and the liabilities are reported in long-term debt. The assets of a particular VIE are the primary source of funds to settle its obligations. The creditors of the VIEs do not have recourse to the general credit of the Company. The Company s exposure to the consolidated VIEs is generally limited to the carrying value of its variable interests plus any related tax credits previously recognized or sold to others with a guarantee.

In April and May 2013, the Company transferred control over the most significant activities of certain consolidated community development and tax-advantaged investment VIEs to a third party manager who concurrently provided a guarantee to these VIEs related to the occurrence of certain tax credit recapture events. As a result, the Company deconsolidated these VIEs subsequent to March 31, 2013, removing approximately $\$ 4$ billion from other assets and long-term debt on the Company s Consolidated Balance Sheet. This transaction will not materially impact the Company s Consolidated Statements of Income or Cash Flows in future periods.

In addition, the Company sponsors a conduit to which it previously transferred high-grade investment securities. The Company consolidates the conduit because of its ability to manage the activities of the conduit. At March 31, 2013, $\$ 139$ million of the held-to-maturity investment securities on the Company s Consolidated Balance Sheet related to the conduit, compared with $\$ 144$ million at December 31, 2012.

The Company also sponsors a municipal bond securities tender option bond program. The Company controls the activities of the program s entities, is entitled to the residual returns and provides credit, liquidity and remarketing arrangements to the program. As a result, the Company has consolidated the program s entities. At March 31, 2013, $\$ 5.2$ billion of available-for-sale securities and $\$ 4.9$ billion of short-term borrowings on the Consolidated Balance Sheet were related to the tender option bond program, compared with $\$ 5.3$ billion of available-for-sale securities and $\$ 5.0$ billion of short-term borrowings at December 31, 2012.

The Company is not required to consolidate VIEs in which it has concluded it does not have a controlling financial interest, and thus is not the primary beneficiary. In such cases, the Company does not have both the power to direct the entities most significant activities and the obligation to absorb losses or right to receive benefits that could potentially be significant to the VIEs. The Company s investments in these unconsolidated VIEs generally are carried in other assets on the Consolidated Balance Sheet. The Company s investments in unconsolidated VIEs at March 31, 2013, ranged from less than $\$ 1$ million to $\$ 51$ million, with an aggregate amount of $\$ 1.9$ billion, net of $\$ 1.3$ billion of liabilities recorded primarily for unfunded capital commitments of the Company to specific project sponsors. The Company $s$ investments in unconsolidated VIEs at December 31, 2012, ranged from less than $\$ 1$ million to $\$ 58$ million, with an aggregate amount of $\$ 1.9$ billion, net of liabilities of $\$ 1.3$ billion recorded primarily for unfunded capital commitments. While the Company believes potential losses from these investments are remote, the Company s maximum exposure to loss from these unconsolidated VIEs was $\$ 5.2$ billion at March 31, 2013 and December 31, 2012. The maximum exposure to loss was primarily related to community development tax-advantaged investments and included $\$ 1.8$ billion at March 31, 2013 and December 31, 2012, recorded on the Company s Consolidated Balance Sheet and $\$ 3.3$ billion at March 31, 2013 and December 31, 2012, of previously recorded tax credits which remain subject to recapture by taxing authorities based on compliance features required to be met at the project level. The remaining amounts related to investments in private investment funds and partnerships for which the maximum exposure to loss included amounts recorded on the Consolidated Balance Sheet and any unfunded commitments. The maximum exposure was determined by assuming a scenario where the separate investments within the individual private funds become worthless, and the community-based business and housing projects and related tax credits completely fail and do not meet certain government compliance requirements.

## Table of Contents

## Note 5 Mortgage Servicing Rights

The Company serviced $\$ 220.3$ billion of residential mortgage loans for others at March 31, 2013, and $\$ 215.6$ billion at December 31, 2012. The net impact included in mortgage banking revenue of fair value changes of MSRs and derivatives used to economically hedge MSRs were net gains of $\$ 42$ million and $\$ 30$ million for the three months ended March 31, 2013 and 2012, respectively. Loan servicing fees, not including valuation changes, included in mortgage banking revenue, were $\$ 187$ million and $\$ 171$ million for the three months ended March 31, 2013 and 2012, respectively.

Changes in fair value of capitalized MSRs are summarized as follows:

| Three Months Ended March 31 | 2013 |  |
| :--- | ---: | ---: |
| (Dollars in Millions) <br> Balance at beginning of period <br> Rights purchased | $\$ 1,700$ | $\$ 1,519$ |
| Rights capitalized | 2 |  |
| Changes in fair value of MSRs | 254 |  |
| Due to fluctuations in market interest rates (a) | 261 |  |
| Due te revised assumptions or models (b) | 127 |  |
| Other changes in fair value (c) | $(6)$ |  |
| Balance at end of period | $(122)$ | $(121)$ |

(a) Includes changes in MSR value associated with changes in market interest rates, including estimated prepayment rates and anticipated earnings on escrow deposits.
(b) Includes changes in MSR value not caused by changes in market interest rates, such as changes in cost to service, ancillary income, and discount rate, as well as the impact of any model changes.
(c) Primarily represents changes due to realization of expected cash flows over time (decay).

The estimated sensitivity to changes in interest rates of the fair value of the MSRs portfolio and the related derivative instruments was as follows:

|  |  |  | March 3 | , 2013 |  |  |  |  | Decemb | 1,2012 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Down | Down | Down | Up | Up | Up | Down | Down | Down | Up | Up | Up |
| (Dollars in Millions) | 100 bps | 50 bps | 25 bps | 25 bps | 50 bps | 100 bps | 100 bps | 50 bps | 25 bps | 25 bps | 50 bps | 100 bps |
| MSR portfolio | \$ (454) | \$ (243) | \$ (124) | \$ 122 | \$ 229 | \$ 428 | \$ (370) | \$ (217) | \$ (118) | \$ 126 | \$ 249 | \$ 480 |
| Derivative instrument hedges | 487 | 249 | 123 | (115) | (217) | (397) | 473 | 249 | 124 | (121) | (243) | (486) |
| Net sensitivity | \$ 33 | \$ 6 | \$ (1) | \$ 7 | \$ 12 | \$ 31 | \$ 103 | \$ 32 | \$ 6 | \$ 5 | \$ 6 | \$ (6) |

The fair value of MSRs and their sensitivity to changes in interest rates is influenced by the mix of the servicing portfolio and characteristics of each segment of the portfolio. The Company s servicing portfolio consists of the distinct portfolios of government-insured mortgages, conventional mortgages and Mortgage Revenue Bond Programs ( MRBP ). The servicing portfolios are predominantly comprised of fixed-rate agency loans with limited adjustable-rate or jumbo mortgage loans. The MRBP division specializes in servicing loans made under state and local housing authority programs. These programs provide mortgages to low-income and moderate-income borrowers and are generally government-insured programs with a favorable rate subsidy, down payment and/or closing cost assistance.

A summary of the Company s MSRs and related characteristics by portfolio was as follows:

| (Dollars in Millions) | MRBP | March 31, 2013 |  |  |  | Total |  | MRBP |  | December 31, 2012 |  |  |  | Total |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Government Conventional (b) |  |  |  |  |  | Gov | nment |  | tional (b) |  |  |
| Servicing portfolio | \$ 14,258 | \$ | 39,582 | \$ | 166,481 |  | 20,321 |  |  |  | ,143 | \$ | 39,048 | \$ | 162,446 |  | 5,637 |
| Fair value | \$ 151 | \$ | 343 | \$ | 1,461 | \$ | 1,955 | \$ | 154 | \$ | 314 | \$ | 1,232 | \$ | 1,700 |
| Value (bps) (a) | 106 |  | 87 |  | 88 |  | 89 |  | 109 |  | 80 |  | 76 |  | 79 |
| Weighted-average servicing fees (bps) | 40 |  | 33 |  | 30 |  | 31 |  | 40 |  | 33 |  | 30 |  | 31 |
| Multiple (value/servicing fees) | 2.65 |  | 2.64 |  | 2.93 |  | 2.87 |  | 2.73 |  | 2.42 |  | 2.53 |  | 2.55 |

## Edgar Filing: US BANCORP \DE\ - Form 10-Q

| Weighted-average note rate | 5.02\% | 4.45\% | 4.37\% | 4.43\% | 5.13\% | 4.57\% | 4.48\% | 4.54\% |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Weighted-average age (in years) | 4.2 | 2.4 | 2.5 | 2.6 | 4.2 | 2.4 | 2.5 | 2.6 |
| Weighted-average expected prepayment (constant prepayment rate) | 12.8\% | 19.1\% | 16.9\% | 17.0\% | 13.2\% | 21.2\% | 20.4\% | 20.1\% |
| Weighted-average expected life (in years) | 6.1 | 4.6 | 4.9 | 4.9 | 6.1 | 4.2 | 4.1 | 4.2 |
| Weighted-average discount rate | 12.1\% | 11.3\% | 9.9\% | 10.3\% | 12.1\% | 11.4\% | 10.0\% | 10.4\% |

(a) Value is calculated as fair value divided by the servicing portfolio.
(b) Represents loans sold primarily to GSEs.

## Table of Contents

## Note 6 Preferred Stock

At March 31, 2013 and December 31, 2012, the Company had authority to issue 50 million shares of preferred stock. The number of shares issued and outstanding and the carrying amount of each outstanding series of the Company s preferred stock was as follows:

| (Dollars in Millions) | March 31, 2013 |  |  |  |  |  |  |  | December 31, 2012 |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Shares | Liquidation Preference |  | Discount |  | Carrying Amount |  | Shares <br> Issued and Outstanding | Liquidation Preference |  | Discount |  | Carrying <br> Amount |
|  | Issued and Outstanding |  |  |  |  |  |  |  |  |  |  |  |  |
| Series A | 12,510 | \$ | 1,251 | \$ | 145 | \$ | 1,106 | 12,510 | \$ | 1,251 | \$ | 145 | \$ 1,106 |

| Total preferred stock (a) | 159,910 | \$ | 4,936 | \$ | 167 | \$ | 4,769 | 159,910 | \$ | 4,936 | \$ | 167 | \$ 4,769 |

(a) The par value of all shares issued and outstanding at March 31, 2013 and December 31, 2012, was $\$ 1.00$ per share.

Note $7 \quad$ Accumulated Other Comprehensive Income (Loss)
Shareholders equity is affected by transactions and valuations of asset and liability positions that require adjustments to accumulated other comprehensive income (loss). The reconciliation of the transactions affecting accumulated other comprehensive income (loss) included in shareholders equity for the three months ended March 31, is as follows:

| Applicable income taxes | (116) |  |  | (21) |  | (15) |  | (5) |  |  | (157) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Balance at end of period | \$ | 550 | \$ | \$ | (455) | \$ | (999) | \$ | (40) | \$ | (944) |

## Table of Contents

Additional detail about the impact to net income for items reclassified out of accumulated other comprehensive income and into earnings for the three months ended March 31, 2013, is as follows:

| (Dollars in Millions) | Impact to <br> Net Income | Affected Line Item in the <br> Changes in unrealized gains and losses on securities available-for-sale <br> Realized gains (losses) on sale of securities <br> Other-than-temporary impairment recognized in earnings | $\$$ |
| :--- | :---: | :---: | :---: |

## Note 8 Earnings Per Share

The components of earnings per share were:

| (Dollars and Shares in Millions, Except Per Share Data) | Three Months Ended March 31, |  |  |  |

| Net income applicable to U.S. Bancorp common shareholders |  | 1,358 | \$ | 1,285 |
| Average common shares outstanding |  | 1,858 |  | 1,901 |
| Net effect of the exercise and assumed purchase of stock awards |  | 9 |  | 9 |
|  |  |  |  |  |
| Average diluted common shares outstanding |  | 1,867 |  | 1,910 |
| Earnings per common share |  | . 73 | \$ | . 68 |
| Diluted earnings per common share |  | . 73 | \$ | . 67 |

Options and warrants outstanding at March 31, 2013 and 2012, to purchase 11 million and 45 million common shares, respectively, were not included in the computation of diluted earnings per share for the three months ended March 31, 2013 and 2012, respectively, because they were antidilutive. Convertible senior debentures outstanding at March 31, 2012, that could potentially be converted into shares of the Company s common stock pursuant to specified formulas, were not included in the computation of dilutive earnings per share for the three months ended March 31, 2012, because they were antidilutive.

Note 9 Employee Benefits
The components of net periodic benefit cost for the Company s retirement plans were:

## Table of Contents

## Note 10 Income Taxes

The components of income tax expense were:

A reconciliation of expected income tax expense at the federal statutory rate of 35 percent to the Company s applicable income tax expense follows:

The Company s income tax returns are subject to review and examination by federal, state, local and foreign government authorities. On an ongoing basis, numerous federal, state, local and foreign examinations are in progress and cover multiple tax years. As of March 31 , 2013, the federal taxing authority has completed its examination of the Company through the fiscal year ended December 31, 2008. The years open to examination by foreign, state and local government authorities vary by jurisdiction.

The Company s net deferred tax liability was \$1.3 billion at March 31, 2013 and December 31, 2012.

## Note 11 Netting Arrangements for Certain Financial Instruments

In the ordinary course of business, the Company enters into derivative transactions to manage various risks and to accommodate the business requirements of its customers. The majority of the Company s derivative portfolio consists of bilateral over-the-counter trades. However, due to legislative changes effective during the first quarter of 2013, certain derivatives executed after March 11, 2013, need to be centrally cleared through clearinghouses, with additional derivative products required to be centrally cleared in the future. A small portion of the Company s derivative positions are exchange-traded. These are predominantly U.S. Treasury futures and options on U.S. Treasury futures.

Irrespective of how derivatives are traded, the Company $s$ derivative contracts include offsetting rights (referred to as netting arrangements), and depending on expected volume, credit risk, and counterparty preference, collateral maintenance may be required. For all derivatives, fair value is

## Edgar Filing: US BANCORP \DE\ - Form 10-Q

determined daily and, depending on the collateral maintenance requirements, the Company and a counterparty may receive or deliver collateral, based upon the net fair value of all derivative positions between the Company and the counterparty. Collateral is typically cash, but securities may be allowed under collateral agreements with certain counterparties. Derivative asset and liability fair values are included in other assets and other liabilities, respectively, on the Consolidated Balance Sheet. Receivables and payables related to cash collateral are also included in other assets and other liabilities on the Consolidated Balance Sheet. Any securities pledged to counterparties as collateral remain on the Consolidated Balance Sheet. Securities received from counterparties as collateral are not recognized on the Consolidated Balance Sheet, unless the counterparty defaults.

## Table of Contents

Securities used as collateral can be sold, re-pledged or otherwise used by the party in possession. No restrictions exist on the use of cash collateral by either party. Refer to Note 12 for further discussion of the Company s derivatives, including collateral arrangements.

As part of the Company s treasury and broker-dealer operations, the Company transacts in arrangements that are treated as securities sold under agreements to repurchase or securities purchased under agreements to resell, both of which are accounted for as collateralized financings. Securities sold under agreements to repurchase include repurchase agreements and securities loaned transactions. Securities purchased under agreements to resell include reverse repurchase agreements and securities borrowed transactions. For securities sold under agreements to repurchase, the Company records a liability for the cash received, which is included in short-term borrowings on the Consolidated Balance Sheet. For securities purchased under agreements to resell, the Company records a receivable for the cash paid, which is included in other assets on the Consolidated Balance Sheet.

Securities transferred to counterparties under repurchase agreements and securities loaned transactions continue to be recognized on the Consolidated Balance Sheet, are measured at fair value, and are included in investment securities or other assets. Securities received from counterparties under reverse repurchase agreements and securities borrowed transactions are not recognized on the Consolidated Balance Sheet unless the counterparty defaults. Under all transactions, the fair value of the securities are determined daily, and additional cash is obtained or refunded to counterparties where appropriate. The securities transferred under repurchase and reverse repurchase transactions typically are U.S. Treasury securities or agency mortgage-backed securities. The securities loaned or borrowed are typically high-grade corporate bonds traded by the Company s broker-dealer. The securities transferred can be sold, repledged or otherwise used by the party in possession. No restrictions exist on the use of cash collateral by either party.

The Company executes its derivative, repurchase/reverse repurchase and securities loaned/borrowed transactions under the respective industry standard agreements. These agreements include master netting arrangements that allow for multiple contracts executed with the same counterparty to be viewed as a single arrangement. This allows for net settlement of a single amount on a daily basis. In the event of default, the master netting arrangement provides for close-out netting, which allows all positions with the defaulting counterparty to be terminated and net settled with a single payment amount.

The Company has elected to offset the assets and liabilities under netting arrangements for the balance sheet presentation of the majority of its derivative counterparties. The netting occurs at the counterparty level, and includes all receivables and payables related to the derivative contracts, including those associated with cash collateral received or pledged. The Company has not elected to offset the assets and liabilities under netting arrangements for the balance sheet presentation of repurchase/reverse repurchase and securities loaned/borrowed transactions.

The following tables provide information on the Company s netting adjustments, and items not offset in the Consolidated Balance Sheet but available for offset in the event of default:

| Total |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | \$ | 2,268 | \$ | (515) | \$ | 1,753 | \$ | (58) | \$ | (622) |  | 1,073 |
| December 31, 2012 |  |  |  |  |  |  |  |  |  |  |  |  |

| Reverse repurchase agreements |  | 363 |  |  |  | 363 |  | (44) |  | (319) |  |  |
| Securities borrowed |  | 368 |  |  |  | 368 |  |  |  | (356) |  | 12 |
| Total | \$ | 2,277 | \$ | (418) | \$ | 1,859 | \$ | (75) | \$ | (675) |  | 1,109 |

## Edgar Filing: US BANCORP \DE\ - Form 10-Q

(a) For derivative assets this includes any derivative liability fair values that could be offset in the event of counterparty default; for reverse repurchase agreements this includes any repurchase agreement payables that could be offset in the event of counterparty default; for securities borrowed this includes any securities loaned payables that could be offset in the event of counterparty default.
(b) Includes the fair value of securities received by the Company from the counterparty. These securities are not included in the Consolidated Balance Sheet unless the counterparty defaults.
(c) Excludes $\$ 160$ million and $\$ 260$ million of derivative assets not subject to netting arrangements at March 31, 2013 and December 31, 2012, respectively.

## Table of Contents

(a) For derivative liabilities this includes any derivative asset fair values that could be offset in the event of counterparty default; for repurchase agreements this includes any reverse repurchase agreement receivables that could be offset in the event of counterparty default; for securities loaned this includes any securities borrowed receivables that could be offset in the event of counterparty default.
(b) Includes the fair value of securities pledged by the Company to the counterparty. These securities are included in the Consolidated Balance Sheet unless the Company defaults.
(c) Excludes $\$ 8$ million and $\$ 5$ million of derivative liabilities not subject to netting arrangements at March 31, 2013 and December 31, 2012, respectively.

## Note 12 Derivative Instruments

The Company recognizes all derivatives in the Consolidated Balance Sheet at fair value in other assets or in other liabilities. On the date the Company enters into a derivative contract, the derivative is designated as either a hedge of the fair value of a recognized asset or liability ( fair value hedge ); a hedge of a forecasted transaction or the variability of cash flows to be paid related to a recognized asset or liability ( cash flow hedge ); a hedge of the volatility of an investment in foreign operations driven by changes in foreign currency exchange rates ( net investment hedge ); or a designation is not made as it is a customer-related transaction, an economic hedge for asset/liability risk management purposes or another stand-alone derivative created through the Company s operations ( free-standing derivative ). When a derivative is designated as a fair value, cash flow or net investment hedge, the Company performs an assessment, at inception and, at a minimum, quarterly thereafter, to determine the effectiveness of the derivative in offsetting changes in the value or cash flows of the hedged item(s).

Fair Value Hedges These derivatives are interest rate swaps that hedge the change in fair value related to interest rate changes of underlying fixed-rate debt and junior subordinated debentures. Changes in the fair value of derivatives designated as fair value hedges, and changes in the fair value of the hedged items, are recorded in earnings. All fair value hedges were highly effective for the three months ended March 31 , 2013, and the change in fair value attributed to hedge ineffectiveness was not material.

Cash Flow Hedges These derivatives are interest rate swaps that are hedges of the forecasted cash flows from the underlying variable-rate loans and debt. Changes in the fair value of derivatives designated as cash flow hedges are recorded in other comprehensive income (loss) until the cash flows of the hedged items are realized. If a derivative designated as a cash flow hedge is terminated or ceases to be highly effective, the gain or loss in other comprehensive income (loss) is amortized to earnings over the period the forecasted hedged transactions impact earnings. If a hedged forecasted transaction is no longer probable, hedge accounting is ceased and any gain or loss included in other comprehensive income (loss) is reported in earnings immediately, unless the forecasted transaction is at least reasonably possible of occurring, whereby the amounts within other comprehensive income (loss) remain. At March 31, 2013, the Company had $\$ 371$ million (net-of-tax) of realized and unrealized losses on derivatives classified as cash flow hedges recorded in other comprehensive income (loss), compared with $\$ 404$ million (net-of-tax) at December 31, 2012. The estimated amount to be reclassified from other comprehensive income (loss) into earnings during the remainder of 2013 and the next 12 months are losses of $\$ 100$ million (net-of-tax) and $\$ 133$ million (net-of-tax), respectively. This amount includes gains and losses related to hedges that were terminated early for which the forecasted transactions are still probable. All cash flow hedges were highly effective for the three months ended March 31, 2013, and the change in fair value attributed to hedge ineffectiveness was not material.

## Table of Contents

Net Investment Hedges The Company uses forward commitments to sell specified amounts of certain foreign currencies, and occasionally non-derivative debt instruments, to hedge the volatility of its investment in foreign operations driven by fluctuations in foreign currency exchange rates. The ineffectiveness on all net investment hedges was not material for the three months ended March 31, 2013. There were no non-derivative debt instruments designated as net investment hedges at March 31, 2013 or December 31, 2012.

Other Derivative Positions The Company enters into free-standing derivatives to mitigate interest rate risk and for other risk management purposes. These derivatives include forward commitments to sell to-be-announced securities ( TBAs ) and other commitments to sell residential mortgage loans, which are used to economically hedge the interest rate risk related to residential mortgage loans held for sale ( MLHFS ) and unfunded mortgage loan commitments. The Company also enters into interest rate swaps, forward commitments to buy TBAs, U.S. Treasury futures and options on U.S. Treasury futures to economically hedge the change in the fair value of the Company s MSRs. The Company also enters into foreign currency forwards to economically hedge remeasurement gains and losses the Company recognizes on foreign currency denominated assets and liabilities. In addition, the Company acts as a seller and buyer of interest rate derivatives and foreign exchange contracts for its customers. To mitigate the market and liquidity risk associated with these customer derivatives, the Company enters into similar offsetting positions with broker-dealers. The Company also has derivative contracts that are created through its operations, including commitments to originate MLHFS and certain derivative financial guarantee contracts.

For additional information on the Company s purpose for entering into derivative transactions and its overall risk management strategies, refer to Management Discussion and Analysis Use of Derivatives to Manage Interest Rate and Other Risks which is incorporated by reference into these Notes to Consolidated Financial Statements.

## Table of Contents

The following table summarizes the asset and liability management derivative positions of the Company:

| (Dollars in Millions) | Asset Derivatives |  |  | Liability Derivatives |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Table of Contents

The following table summarizes the customer-related derivative positions of the Company:

The table below shows the effective portion of the gains (losses) recognized in other comprehensive income (loss) and the gains (losses) reclassified from other comprehensive income (loss) into earnings (net-of-tax) for the three months ended March 31:

| (Dollars in Millions) | Gains (Losses) <br> Recognized in <br> Other <br> Comprehensive <br> Income (Loss) |  |  | Gains (Losses) Reclassified from Other <br> Comprehensive Income (Loss) into Earnings |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Asset and Liability Management Positions |  |  |  |  |  |  |
| Cash flow hedges |  |  |  |  |  |  |
| Interest rate contracts (a) | \$ | \$ | 1 | \$ (33) | \$ | (33) |
| Net investment hedges |  |  |  |  |  |  |
| Foreign exchange forward contracts | 23 |  | (6) |  |  |  |

Note: Ineffectiveness on cash flow and net investment hedges was not material for the three months ended March 31, 2013 and 2012.

## Edgar Filing: US BANCORP \DE\ - Form 10-Q

(a) Gains (Losses) reclassified from other comprehensive income (loss) into interest income on loans and interest expense on long-term debt.

## Table of Contents

The table below shows the gains (losses) recognized in earnings for fair value hedges, other economic hedges and the customer-related positions for the three months ended March 31:

|  | Location of Gains (Losses) |  |  |
| :---: | :---: | :---: | :---: |
| (Dollars in Millions) | Recognized in Earnings | 2013 | 2012 |
| Asset and Liability Management Positions |  |  |  |
| Fair value hedges (a) |  |  |  |
| Interest rate contracts | Other noninterest income | \$ (2) | \$ |
| Foreign exchange cross-currency swaps | Other noninterest income |  | 42 |
| Other economic hedges |  |  |  |
| Interest rate contracts |  |  |  |
| Futures and forwards | Mortgage banking revenue | 236 | 169 |
| Purchased and written options | Mortgage banking revenue | 129 | 154 |
| Receive fixed/pay floating swaps | Mortgage banking revenue | (40) | (57) |
| Foreign exchange forward contracts | Commercial products revenue | 8 | (17) |
| Equity contracts | Compensation expense |  | (1) |
| Credit contracts | Other noninterest income/expense | (1) | (6) |
| Customer-Related Positions |  |  |  |
| Interest rate contracts |  |  |  |
| Receive fixed/pay floating swaps | Other noninterest income | (96) | (140) |
| Pay fixed/receive floating swaps | Other noninterest income | 96 | 139 |
| Foreign exchange rate contracts |  |  |  |
| Forwards, spots and swaps | Commercial products revenue | 7 | 21 |

(a) Gains (Losses) on items hedged by interest rate contracts and foreign exchange forward contracts, included in noninterest income (expense), were $\$ 2$ million and zero for the three months ended March 31, 2013, respectively, and less than $\$ 1$ million and \$(44) million for the three months ended March 31, 2012, respectively. The ineffective portion was immaterial for the three months ended March 31, 2013 and 2012.
Derivatives are subject to credit risk associated with counterparties to the derivative contracts. The Company measures that credit risk using a credit valuation adjustment and includes it within the fair value of the derivative. The Company manages counterparty credit risk through diversification of its derivative positions among various counterparties, by entering into master netting agreements and, where possible, by requiring collateral agreements. A master netting agreement allows two counterparties, who have multiple derivative contracts with each other, the ability to net settle amounts under all contracts, including any related collateral, through a single payment and in a single currency. Collateral agreements require the counterparty to deliver, on a daily basis, collateral (typically cash or U.S. Treasury and agency securities) equal to the Company s net derivative receivable. For highly-rated counterparties, the collateral agreements may include minimum dollar thresholds, but allow for the Company to call for immediate, full collateral coverage when credit-rating thresholds are triggered by counterparties.

The Company s collateral agreements are bilateral and, therefore, contain provisions that require collateralization of the Company s net liability derivative positions. Required collateral coverage is based on certain net liability thresholds and contingent upon the Company s credit rating from two of the nationally recognized statistical rating organizations. If the Company s credit rating were to fall below credit ratings thresholds established in the collateral agreements, the counterparties to the derivatives could request immediate full collateral coverage for derivatives in net liability positions. The aggregate fair value of all derivatives under collateral agreements that were in a net liability position at March 31 , 2013 , was $\$ 1.3$ billion. At March 31, 2013, the Company had $\$ 1.1$ billion of cash posted as collateral against this net liability position.

## Note $13 \quad$ Fair Values of Assets and Liabilities

The Company uses fair value measurements for the initial recording of certain assets and liabilities, periodic remeasurement of certain assets and liabilities, and disclosures. Derivatives, trading and available-for-sale investment securities, certain MLHFS and MSRs are recorded at fair value on a recurring basis. Additionally, from time to time, the Company may be required to record at fair value other assets on a nonrecurring basis, such as loans held for sale, loans held for investment and certain other assets. These nonrecurring fair value adjustments typically involve application of lower-of-cost-or-fair value accounting or impairment write-downs of individual assets.

## Edgar Filing: US BANCORP \DE\ - Form 10-Q

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. A fair value measurement reflects all of the assumptions that market participants would use in pricing the asset or liability, including assumptions about the risk inherent in a particular valuation technique, the effect of a restriction on the sale or use of an asset, and the risk of nonperformance.

## Table of Contents

The Company groups its assets and liabilities measured at fair value into a three-level hierarchy for valuation techniques used to measure financial assets and financial liabilities at fair value. This hierarchy is based on whether the valuation inputs are observable or unobservable. These levels are:

Level 1 Quoted prices in active markets for identical assets or liabilities. Level 1 includes U.S. Treasury and exchange-traded instruments.
Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 includes debt securities that are traded less frequently than exchange-traded instruments and which are typically valued using third party pricing services; derivative contracts and other assets and liabilities, including securities, whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data; and MLHFS whose values are determined using quoted prices for similar assets or pricing models with inputs that are observable in the market or can be corroborated by observable market data.
Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. This category includes MSRs, certain debt securities and certain derivative contracts.
When the Company changes its valuation inputs for measuring financial assets and financial liabilities at fair value, either due to changes in current market conditions or other factors, it may need to transfer those assets or liabilities to another level in the hierarchy based on the new inputs used. The Company recognizes these transfers at the end of the reporting period that the transfers occur. During the three months ended March 31, 2013 and 2012, there were no transfers of financial assets or financial liabilities between the hierarchy levels.

The Company has processes and controls in place to increase the reliability of estimates it makes in determining fair value measurements. Items quoted on an exchange are verified to the quoted price. Items provided by a third party pricing service are subject to price verification procedures as discussed in more detail in the specific valuation discussions provided in the section that follows. For fair value measurements modeled internally, the Company s valuation models are subject to the Company s Model Risk Governance Policy and Program, as maintained by the Company s credit administration department. The purpose of model validation is to assess the accuracy of the models input, processing, and reporting components. All models are required to be independently reviewed and approved prior to being placed in use, and are subject to formal change control procedures. Under the Company s Model Risk Governance Policy, models are required to be reviewed at least annually to ensure they are operating as intended. Inputs into the models are market observable inputs whenever available. When market observable inputs are not available, the inputs are developed based upon analysis of historical experience and evaluation of other relevant market data. Significant unobservable model inputs are subject to review by senior management in corporate functions, who are independent from the modeling. Significant unobservable model inputs are also compared to actual results, typically on a quarterly basis. Significant Level 3 fair value measurements are also subject to corporate-level review and are benchmarked to market transactions or other market data, when available. Additional discussion of processes and controls are provided in the valuation methodologies section that follows.

The following section describes the valuation methodologies used by the Company to measure financial assets and liabilities at fair value and for estimating fair value for financial instruments not recorded at fair value as required under disclosure guidance related to the fair value of financial instruments. In addition, the following section includes an indication of the level of the fair value hierarchy in which the assets or liabilities are classified. Where appropriate, the description includes information about the valuation models and key inputs to those models. During the three months ended March 31, 2013 and 2012, there were no significant changes to the valuation techniques used by the Company to measure fair value.

Cash and Due From Banks The carrying value of cash and due from banks approximate fair value and are classified within Level 1. Fair value is provided for disclosure purposes only.

## Table of Contents

Federal Funds Sold and Securities Purchased Under Resale Agreements The carrying value of federal funds sold and securities purchased under resale agreements approximate fair value because of the relatively short time between the origination of the instrument and its expected realization and are classified within Level 2 . Fair value is provided for disclosure purposes only.

Investment Securities When quoted market prices for identical securities are available in an active market, these prices are used to determine fair value and these securities are classified within Level 1 of the fair value hierarchy. Level 1 investment securities are predominantly U.S. Treasury securities.

For other securities, quoted market prices may not be readily available for the specific securities. When possible, the Company determines fair value based on market observable information, including quoted market prices for similar securities, inactive transaction prices, and broker quotes. These securities are classified within Level 2 of the fair value hierarchy. Level 2 valuations are generally provided by a third party pricing service. The Company reviews the valuation methodologies utilized by the pricing service and, on a quarterly basis, reviews the security level prices provided by the pricing service against management $s$ expectation of fair value, based on changes in various benchmarks and market knowledge from recent trading activity. Additionally, each quarter, the Company validates the fair value provided by the pricing services by comparing them to recent observable market trades (where available), broker provided quotes, or other independent secondary pricing sources. Prices obtained from the pricing service are adjusted if they are found to be inconsistent with observable market data. Level 2 investment securities are predominantly agency mortgage-backed securities, certain other asset-backed securities, municipal securities, corporate debt securities, agency debt securities and perpetual preferred securities.

The fair value of securities for which there are no market trades, or where trading is inactive as compared to normal market activity, are classified within Level 3 of the fair value hierarchy. The Company determines the fair value of these securities using a discounted cash flow methodology and incorporating observable market information, where available. These valuations are modeled by a unit within the Company s treasury department. The valuations use assumptions regarding housing prices, interest rates and borrower performance. Inputs are refined and updated at least quarterly to reflect market developments and actual performance. The primary valuation drivers of these securities are the prepayment rates, default rates and default severities associated with the underlying collateral, as well as the discount rate used to calculate the present value of the projected cash flows. Level 3 fair values, including the assumptions used, are subject to review by senior management in corporate functions, who are independent from the modeling. The fair value measurements are also compared to fair values provided by third party pricing services, where available. Securities classified within Level 3 include non-agency mortgage-backed securities, non-agency commercial mortgage-backed securities, certain asset-backed securities, certain collateralized debt obligations and collateralized loan obligations and certain corporate debt securities.

Mortgage Loans Held For Sale MLHFS measured at fair value, for which an active secondary market and readily available market prices exist, are initially valued at the transaction price and are subsequently valued by comparison to instruments with similar collateral and risk profiles. MLHFS are classified within Level 2. Included in mortgage banking revenue was a $\$ 175$ million net loss and a $\$ 19$ million net gain for the three months ended March 31, 2013 and 2012, respectively, from the changes to fair value of these MLHFS under fair value option accounting guidance. Changes in fair value due to instrument specific credit risk were immaterial. Interest income for MLHFS is measured based on contractual interest rates and reported as interest income in the Consolidated Statement of Income. Electing to measure MLHFS at fair value reduces certain timing differences and better matches changes in fair value of these assets with changes in the value of the derivative instruments used to economically hedge them without the burden of complying with the requirements for hedge accounting.

Loans The loan portfolio includes adjustable and fixed-rate loans, the fair value of which was estimated using discounted cash flow analyses and other valuation techniques. The expected cash flows of loans considered historical prepayment experiences and estimated credit losses and were discounted using current rates offered to borrowers of similar credit characteristics. Generally, loan fair values reflect Level 3 information. Fair value is provided for disclosure purposes only, with the exception of impaired collateral-based loans that are measured at fair value on a non-recurring basis utilizing the underlying collateral fair value.

Mortgage Servicing Rights MSRs are valued using a discounted cash flow methodology. Accordingly, MSRs are classified within Level 3. The Company determines fair value by estimating the present value of the asset $s$ future cash

## Table of Contents

flows using prepayment rates, discount rates, and other assumptions. The MSR valuations, as well as the assumptions used, are developed by the mortgage banking division and are subject to review by senior management in corporate functions, who are independent from the modeling. The MSR valuations and assumptions are validated through comparison to trade information and industry surveys when available, and are also compared to independent third party valuations each quarter. Risks inherent in MSR valuation include higher than expected prepayment rates and/or delayed receipt of cash flows. There is minimal market activity for MSRs, therefore the determination of fair value requires significant management judgment. Refer to Note 5 for further information on MSR valuation assumptions.

Derivatives The majority of derivatives held by the Company are executed over-the-counter and are valued using standard cash flow, Black-Derman-Toy and Monte Carlo valuation techniques. The models incorporate inputs, depending on the type of derivative, including interest rate curves, foreign exchange rates and volatility. In addition, all derivative values incorporate an assessment of the risk of counterparty nonperformance, measured based on the Company $s$ evaluation of credit risk as well as external assessments of credit risk, where available. The Company monitors and manages its nonperformance risk by considering its ability to net derivative positions under master netting agreements, as well as collateral received or provided under collateral support agreements. Accordingly, the Company has elected to measure the fair value of derivatives, at a counterparty level, on a net basis. The majority of the derivatives are classified within Level 2 of the fair value hierarchy, as the significant inputs to the models, including nonperformance risk, are observable. However, certain derivative transactions are with counterparties where risk of nonperformance cannot be observed in the market, and therefore the credit valuation adjustments result in these derivatives being classified within Level 3 of the fair value hierarchy. The credit valuation adjustments for nonperformance risk are determined by the Company s treasury department using credit assumptions provided by credit administration. The credit assumptions are compared to actual results quarterly and are recalibrated as appropriate.

The Company also has commitments to sell, purchase and originate mortgage loans that meet the accounting requirements of a derivative. These mortgage loan commitments are valued by pricing models that include market observable and unobservable inputs, which result in the commitments being classified within Level 3 of the fair value hierarchy. The unobservable inputs include assumptions about the percentage of commitments that actually become a closed loan and the MSR value that is inherent in the underlying loan value, both of which are developed by the Company s mortgage banking division. The closed loan percentages for the mortgage loan commitments are monitored on an on-going basis, as these percentages are also used for the Company s economic hedging activities. The inherent MSR value for the commitments are generated by the same models used for the Company s MSRs and thus are subject to the same processes and controls as described for the MSRs above.

Other Financial Instruments Other financial instruments include cost method equity investments and community development and tax-advantaged related assets and liabilities. The majority of the Company s cost method equity investments are in Federal Home Loan Bank and Federal Reserve Bank stock, whose carrying amounts approximate their fair value and are classified within Level 2. Investments in private equity and other limited partnership funds are estimated using fund provided net asset values. These equity investments are classified within Level 3. Fair value is provided for disclosure purposes only.

Community development and tax-advantaged investments generate a return primarily through the realization of federal and state income tax credits, with a duration typically equal to the period that the tax credits are realized. Asset balances primarily represent the assets of the underlying community development and tax-advantaged entities the Company consolidated per applicable authoritative accounting guidance. Liabilities of the underlying consolidated entities were included in long-term debt. The carrying value of the asset balances are a reasonable estimate of fair value and are classified within Level 3. Refer to Note 4 for further information on community development and tax-advantaged related assets and liabilities. Fair value is provided for disclosure purposes only.

Deposit Liabilities The fair value of demand deposits, savings accounts and certain money market deposits is equal to the amount payable on demand. The fair value of fixed-rate certificates of deposit was estimated by discounting the contractual cash flow using current market rates. Deposit liabilities are classified within Level 2 . Fair value is provided for disclosure purposes only.

Short-term Borrowings Federal funds purchased, securities sold under agreements to repurchase, commercial paper and other short-term funds borrowed have floating rates or short-term maturities. The fair value of short-term borrowings

## Table of Contents

was determined by discounting contractual cash flows using current market rates. Short-term borrowings are classified within Level 2. Included in short-term borrowings is the Company s obligation on securities sold short, which is required to be accounted for at fair value per applicable accounting guidance. Fair value for other short-term borrowings is provided for disclosure purposes only.

Long-term Debt The fair value for most long-term debt was determined by discounting contractual cash flows using current market rates. Junior subordinated debt instruments were valued using market quotes. Long-term debt is classified within Level 2. Fair value is provided for disclosure purposes only.

Loan Commitments, Letters of Credit and Guarantees The fair value of commitments, letters of credit and guarantees represents the estimated costs to terminate or otherwise settle the obligations with a third party. Other loan commitments, letters of credit and guarantees are not actively traded, and the Company estimates their fair value based on the related amount of unamortized deferred commitment fees adjusted for the probable losses for these arrangements. These arrangements are classified within Level 3. Fair value is provided for disclosure purposes only.

## Significant Unobservable Inputs of Level 3 Assets and Liabilities

The following section provides information on the significant inputs used by the Company to determine the fair value measurements of Level 3 assets and liabilities recorded at fair value on the Consolidated Balance Sheet. In addition, the following section includes a discussion of the sensitivity of the fair value measurements to changes in the significant inputs and a description of any interrelationships between these inputs for Level 3 assets and liabilities recorded at fair value on a recurring basis. The discussion below excludes nonrecurring fair value measurements of collateral value used for impairment measures for loans and other real estate owned. These valuations utilize third party appraisal or broker price opinions, and are classified as Level 3 due to the significant judgment involved

Available-For-Sale Investment Securities The significant unobservable inputs used in the fair value measurement of the Company s modeled Level 3 available-for-sale investment securities are prepayment rates, probability of default and loss severities associated with the underlying collateral, as well as the discount margin used to calculate the present value of the projected cash flows. Increases in prepayment rates for Level 3 securities will typically result in higher fair values, as increased prepayment rates accelerate the receipt of expected cash flows and reduce exposure to credit losses. Increases in the probability of default and loss severities will result in lower fair values, as these increases reduce expected cash flows. Discount margin is the Company s estimate of the current market spread above the respective benchmark rate. Higher discount margin will result in lower fair values, as it reduces the present value of the expected cash flows.

Prepayment rates generally move in the opposite direction of market interest rates. In the current environment, an increase in the probability of default will generally be accompanied with an increase in loss severity, as both are impacted by underlying collateral values. Discount margins are influenced by market expectations about the security s collateral performance, and therefore may directionally move with probability and severity of default; however, discount margins are also impacted by broader market forces, such as competing investment yields, sector liquidity, economic news, and other macroeconomic factors.

## Table of Contents

The following table shows the significant valuation assumption ranges for Level 3 available-for-sale investment securities at March 31, 2013:

|  | Minimum | Maximum | Average |
| :---: | :---: | :---: | :---: |
| Residential Prime Non-Agency Mortgage-Backed Securities (a) |  |  |  |
| Estimated lifetime prepayment rates | 6\% | 20\% | 13\% |
| Lifetime probability of default rates |  | 6 | 3 |
| Lifetime loss severity rates | 25 | 70 | 43 |
| Discount margin | 2 | 7 | 4 |
| Residential Non-Prime Non-Agency Mortgage-Backed Securities (b) |  |  |  |
| Estimated lifetime prepayment rates | 2\% | 10\% | 6\% |
| Lifetime probability of default rates | 4 | 10 | 7 |
| Lifetime loss severity rates | 15 | 70 | 55 |
| Discount margin | 2 | 6 | 3 |
| Other Asset-Backed Securities |  |  |  |
| Estimated lifetime prepayment rates | 6\% | 6\% | 6\% |
| Lifetime probability of default rates | 4 | 4 | 4 |
| Lifetime loss severity rates | 40 | 40 | 40 |
| Discount margin | 18 | 18 | 18 |

(a) Prime securities are those designated as such by the issuer at origination. When an issuer designation is unavailable, the Company determines at acquisition date the categorization based on asset pool characteristics (such as weighted-average credit score, loan-to-value, loan type, prevalence of low documentation loans) and deal performance (such as pool delinquencies and security market spreads).
(b) Includes all securities not meeting the conditions to be designated as prime.

Mortgage Servicing Rights The significant unobservable inputs used in the fair value measurement of the Company s MSRs are expected prepayments and the discount rate used to calculate the present value of the projected cash flows. Significant increases in either of these inputs in isolation would result in a significantly lower fair value measurement. Significant decreases in either of these inputs in isolation would result in a significantly higher fair value measurement. There is no direct interrelationship between prepayments and discount rate. Prepayment rates generally move in the opposite direction of market interest rates. Discount rates are generally impacted by changes in market return requirements.

The following table shows the significant valuation assumption ranges for MSRs at March 31, 2013:

|  | Minimum | Maximum | Average |
| :--- | :---: | :---: | :---: |
| Expected prepayment | $12 \%$ | $28 \%$ | 10 |

Derivatives The Company has two distinct Level 3 derivative portfolios: (i) the Company s commitments to sell, purchase and originate mortgage loans that meet the requirements of a derivative, and (ii) the Company sasset/liability and customer-related derivatives that are Level 3 due to unobservable inputs related to measurement of risk of nonperformance by the counterparty.

The significant unobservable inputs used in the fair value measurement of the Company s derivative commitments to sell, purchase and originate mortgage loans are the percentage of commitments that actually become a closed loan and the MSR value that is inherent in the underlying loan value. A significant increase in the rate of loans that close would result in a larger derivative asset or liability. A significant increase in the inherent MSR value would result in an increase in the derivative asset or a reduction in the derivative liability. Expected loan close rates and the inherent MSR values are directly impacted by changes in market rates and will generally move in the same direction as interest rates.

The following table shows the significant valuation assumption ranges for the Company s derivative commitments to sell, purchase and originate mortgage loans at March 31, 2013:

## Edgar Filing: US BANCORP \DE - Form 10-Q

|  | Minimum | Maximum | Average |
| :--- | :---: | :---: | :---: |
| Expected loan close rate | $28 \%$ | $100 \%$ | $78 \%$ |
| Inherent MSR value (basis points per loan) | 52 | 198 | 111 |

The significant unobservable input used in the fair value measurement of certain of the Company s asset/liability and customer-related derivatives is the credit valuation adjustment related to the risk of counterparty nonperformance. A significant increase in the credit valuation adjustment would result in a lower fair value measurement. A significant decrease in the credit valuation adjustment would result in a higher fair value measurement. The credit valuation adjustment is impacted by changes in the Company s assessment of the counterparty s credit position. At March 31, 2013, the minimum, maximum and average credit valuation adjustment as a percentage of the derivative contract fair value prior to adjustment was 0 percent, 99 percent and 8 percent, respectively.

## Table of Contents

The following table summarizes the balances of assets and liabilities measured at fair value on a recurring basis:

| (Dollars in Millions) | Level 1 |  | Level 2 |  | Level 3 |  | Netting | Total |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

|  |  |  |  |  |  |  |  |  |  |
| Total available-for-sale |  | 678 |  | 38,458 |  | 1,003 |  |  | 40,139 |
| Mortgage loans held for sale |  |  |  | 7,957 |  |  |  |  | 7,957 |
| Mortgage servicing rights |  |  |  |  |  | 1,700 |  |  | 1,700 |
| Derivative assets |  |  |  | 572 |  | 1,234 |  | (418) | 1,388 |

[^3]
## Edgar Filing: US BANCORP \DE - Form 10-Q

(a) Prime securities are those designated as such by the issuer at origination. When an issuer designation is unavailable, the Company determines at acquisition date the categorization based on asset pool characteristics (such as weighted-average credit score, loan-to-value, loan type, prevalence of low documentation loans) and deal performance (such as pool delinquencies and security market spreads).
(b) Includes all securities not meeting the conditions to be designated as prime.
(c) Represents the Company sobligation on securities sold short required to be accounted for at fair value per applicable accounting guidance.

## Table of Contents

The following table presents the changes in fair value for all assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the three months ended March 31:

(a) Prime securities are those designated as such by the issuer at origination. When an issuer designation is unavailable, the Company determines at acquisition date the categorization based on asset pool characteristics (such as weighted-average credit score, loan-to-value, loan type, prevalence of low documentation loans) and deal performance (such as pool delinquencies and security market spreads).
(b) Includes all securities not meeting the conditions to be designated as prime.
(c) Approximately $\$(7)$ million included in securities gains (losses) and \$(1) million included in interest income.
(d) Included in mortgage banking revenue.
(e) Approximately \$(3) million included in other noninterest income and $\$ 150$ million included in mortgage banking revenue.
(f) Included in changes in unrealized gains and losses on securities available-for-sale.
(g) Represents MSRs capitalized during the period.
(h) Approximately \$(88) million included in other noninterest income and \$(250) million included in mortgage banking revenue.
(i) Approximately $\$(9)$ million included in securities gains (losses) and $\$ 14$ million included in interest income.
(j) Approximately $\$(22)$ million included in other noninterest income and $\$ 353$ million included in mortgage banking revenue.

## Edgar Filing: US BANCORP \DE\ - Form 10-Q

(k) Approximately \$(103) million included in other noninterest income and \$(358) million included in mortgage banking revenue.

The Company is also required periodically to measure certain other financial assets at fair value on a nonrecurring basis. These measurements of fair value usually result from the application of lower-of-cost-or-fair value accounting or write-downs of individual assets.

The following table summarizes the adjusted carrying values and the level of valuation assumptions for assets measured at fair value on a nonrecurring basis:

|  | March 31, 2013 |  |  |  |  |  | December 31, 2012 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| (Dollars in Millions) | Level 1 | Level 2 |  | el 3 | Total | el 1 | Level 2 |  | el 3 | Total |
| Loans (a) | \$ | \$ | \$ | 56 | \$ 56 | \$ | \$ | \$ | 140 | \$ 140 |
| Other assets (b) |  |  |  | 108 | 108 |  |  |  | 194 | 194 |

(a) Represents the carrying value of loans for which adjustments were based on the fair value of the collateral, excluding loans fully charged-off.
(b) Primarily represents the fair value of foreclosed properties that were measured at fair value based on an appraisal or broker price opinion of the collateral subsequent to their initial acquisition.

## Table of Contents

The following table summarizes losses recognized related to nonrecurring fair value measurements of individual assets or portfolios for the three months ended March 31:

| (Dollars in Millions) | 2013 |
| :--- | ---: |
| Loans (a) | 2012 |
| Other assets (b) | $\$ 21$ |

(a) Represents write-downs of loans which were based on the fair value of the collateral, excluding loans fully charged-off.
(b) Primarily represents related losses of foreclosed properties that were measured at fair value subsequent to their initial acquisition.

## Fair Value Option

The following table summarizes the differences between the aggregate fair value carrying amount of MLHFS for which the fair value option has been elected and the aggregate unpaid principal amount that the Company is contractually obligated to receive at maturity:

|  | March 31, 2013 |  |  |  |  | December 31, 2012 |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Fair Value Carrying Amount | Aggregate <br> Unpaid <br> Principal |  | Carrying |  | Fair Value | Aggregate |  | Carrying |  |
|  |  |  |  | Am | Over |  |  |  | Am | Over |
|  |  |  |  | Inder | paid | Carrying |  | Unpaid | (Un | paid |
| (Dollars in Millions) |  |  |  |  | cipal | Amount |  | incipal |  | cipal |
| Total loans | \$ 7,562 | \$ | 7,282 | \$ | 280 | \$ 7,957 | \$ | 7,588 | \$ | 369 |
| Nonaccrual loans | 9 |  | 14 |  | (5) | 8 |  | 13 |  | (5) |
| Loans 90 days or more past due | 2 |  | 3 |  | (1) | 2 |  | 3 |  | (1) |

## Disclosures about Fair Value of Financial Instruments

The following table summarizes the estimated fair value for financial instruments as of March 31, 2013 and December 31, 2012, and includes financial instruments that are not accounted for at fair value. In accordance with disclosure guidance related to fair values of financial instruments, the Company did not include assets and liabilities that are not financial instruments, such as the value of goodwill, long-term relationships with deposit, credit card, merchant processing and trust customers, other purchased intangibles, premises and equipment, deferred taxes and other liabilities. Additionally, in accordance with the disclosure guidance, insurance contracts and investments accounted for under the equity method are excluded.

The estimated fair values of the Company s financial instruments are shown in the table below:

| Edgar Filing: US BANCORP $\backslash$ DE $\backslash$ - Form |  |  |  |  | 10-Q |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  |  |  |  |  |  |
| Short-term borrowings (b) | 26,533 | 26,526 | 26,526 | 25,901 | 25,917 | 25,917 |
| Long-term debt | 25,239 | 26,099 | 26,099 | 25,516 | 26,205 | 26,205 |

(a) Excludes mortgages held for sale for which the fair value option under applicable accounting guidance was elected. (b) Excludes the Company s obligation on securities sold short required to be accounted for at fair value per applicable accounting guidance. The fair value of unfunded commitments, standby letters of credit and other guarantees is approximately equal to their carrying value. The carrying value of unfunded commitments and standby letters of credit was $\$ 421$ million and $\$ 415$ million at March 31, 2013 and December 31, 2012, respectively. The carrying value of other guarantees was $\$ 436$ million and $\$ 452$ million at March 31, 2013 and December 31, 2012, respectively.

## Table of Contents

## Note 14 Guarantees and Contingent Liabilities

Visa Restructuring and Card Association Litigation The Company s payment services business issues and acquires credit and debit card transactions through the Visa U.S.A. Inc. card association or its affiliates (collectively Visa ). In 2007, Visa completed a restructuring and issued shares of Visa Inc. common stock to its financial institution members in contemplation of its initial public offering ( IPO ) completed in the first quarter of 2008 (the Visa Reorganization ). As a part of the Visa Reorganization, the Company received its proportionate number of shares of Visa Inc. common stock, which were subsequently converted to Class B shares of Visa Inc. ( Class B shares ). Visa U.S.A. Inc. ( Visa U.S.A. ) and MasterCard International (collectively, the Card Associations ) are defendants in antitrust lawsuits challenging the practices of the Card Associations (the Visa Litigation ). Visa U.S.A. member banks have a contingent obligation to indemnify Visa Inc. under the Visa U.S.A. bylaws (which were modified at the time of the restructuring in October 2007) for potential losses arising from the Visa Litigation. The indemnification by the Visa U.S.A. member banks has no specific maximum amount.

Using proceeds from its IPO and through reductions to the conversion ratio applicable to the Class B shares held by Visa U.S.A. member banks, Visa Inc. has funded an escrow account for the benefit of member financial institutions to fund their indemnification obligations associated with the Visa Litigation. The receivable related to the escrow account is classified in other liabilities as a direct offset to the related Visa Litigation contingent liability. On October 19, 2012, Visa signed a settlement agreement to resolve class action claims associated with the multi-district interchange litigation, the largest of the remaining Visa Litigation matters. The settlement has not yet been finally approved by the court, is not yet binding, and has been challenged by some class members. At March 31, 2013, the carrying amount of the Company s liability related to the Visa Litigation matters, net of its share of the escrow fundings, was $\$ 65$ million and included the Company s estimate of its share of the temporary reduction in interchange rates specified in the settlement agreement. The remaining Class B shares held by the Company will be eligible for conversion to Class A shares, and thereby become marketable, upon settlement of the Visa Litigation. These shares are excluded from the Company s financial instruments disclosures included in Note 13.

The following table is a summary of other guarantees and contingent liabilities of the Company at March 31, 2013:

| (Dollars in Millions) | Collateral Held | Carrying Amount | Maximum Potential Future Payments |
| :---: | :---: | :---: | :---: |
| Standby letters of credit | \$ | \$ 80 | \$ 18,121 |
| Third-party borrowing arrangements |  |  | 308 |
| Securities lending indemnifications | 5,087 |  | 4,944 |
| Asset sales |  | 313 | 2,822(a) |
| Merchant processing | 796 | 81 | 79,390 |
| Contingent consideration arrangements |  | 12 | 14 |
| Tender option bond program guarantee | 5,176 |  | 4,897 |
| Minimum revenue guarantees |  | 14 | 15 |
| Other |  | 16 | 3,222 |

(a) The maximum potential future payments do not include loan sales where the Company provides standard representation and warranties to the buyer against losses related to loan underwriting documentation defects that may have existed at the time of sale that generally are identified after the occurrence of a triggering event such as delinquency. For these types of loan sales, the maximum potential future payments is generally the unpaid principal balance of loans sold measured at the end of the current reporting period. Actual losses will be significantly less than the maximum exposure, as only a fraction of loans sold will have a representation and warranty breach, and any losses on repurchase would generally be mitigated by any collateral held against the loans.
Merchant Processing The Company, through its subsidiaries, provides merchant processing services. Under the rules of credit card associations, a merchant processor retains a contingent liability for credit card transactions processed. This contingent liability arises in the event of a billing dispute between the merchant and a cardholder that is ultimately resolved in the cardholder s favor. In this situation, the transaction is charged-back to the merchant and the disputed amount is credited or otherwise refunded to the cardholder. If the Company is unable to collect this amount from the merchant, it bears the loss for the amount of the refund paid to the cardholder.

The Company currently processes card transactions in the United States, Canada, Europe, Mexico and Brazil through wholly-owned subsidiaries and joint ventures with other financial institutions. In the event a merchant were to be unable to fulfill product or services subject to delayed delivery, such as airline tickets, the Company could become financially liable for refunding tickets purchased through the credit card associations under the charge-back provisions. Charge-back risk related to these merchants is evaluated in a manner similar to credit risk assessments and, as such, merchant processing contracts contain various provisions to protect the Company in the event of default. At March 31,

## Table of Contents

2013, the value of airline tickets purchased to be delivered at a future date was $\$ 7.1$ billion. The Company held collateral of $\$ 608$ million in escrow deposits, letters of credit and indemnities from financial institutions, and liens on various assets.

Asset Sales The Company regularly sells loans to GSEs as part of its mortgage banking activities. The Company provides customary representation and warranties to the GSEs in conjunction with these sales. These representations and warranties generally require the Company to repurchase assets if it is subsequently determined that a loan did not meet specified criteria, such as a documentation deficiency or rescission of mortgage insurance. If the Company is unable to cure or refute a repurchase request, the Company is generally obligated to repurchase the loan or otherwise reimburse the counterparty for losses. At March 31, 2013, the Company had reserved $\$ 233$ million for potential losses from representation and warranty obligations, compared with $\$ 240$ million at December 31, 2012. The Company s reserve reflects management s best estimate of losses for representation and warranty obligations. The Company s reserving methodology uses current information about investor repurchase requests, and assumptions about defect rate, concur rate, repurchase mix, and loss severity, based upon the Company s most recent loss trends. The Company also considers qualitative factors that may result in anticipated losses differing from historical loss trends, such as loan vintage, underwriting characteristics and macroeconomic trends.

The following table is a rollforward of the Company $s$ representation and warranty reserve:

|  | Three Months Ended <br> March 31, |  |
| :--- | :---: | :---: |
| (Dollars in Millions) | 2013 |  |
| Balance at beginning of period | $\$ 240$ | $\$ 160$ |
| Net realized losses | $(23)$ | $(25)$ |
| Additions to reserve | 16 |  |
| Balance at end of period | $\$ 233$ | $\$ 202$ |

As of March 31, 2013 and December 31, 2012, the Company had $\$ 66$ million and $\$ 131$ million, respectively, of unresolved representation and warranty claims from the GSEs. The Company does not have a significant amount of unresolved claims from investors other than the GSEs.

Mortgage-Related Actions and Investigations Certain federal and state governmental authorities have reached a settlement agreement with five major financial institutions regarding their mortgage origination, servicing, and foreclosure activities. Those governmental authorities contacted other financial institutions, including the Company, to discuss their potential participation in a settlement. The Company has not agreed to any settlement at this point; however, if a settlement were reached it would likely include an agreement to comply with specified servicing standards, and settlement payments to governmental authorities as well as a monetary commitment that could be satisfied under various loan modification programs (in addition to the programs the Company already has in place). The Company has a $\$ 130$ million accrued liability with respect to these and related matters.

The Company is currently subject to other investigations and examinations by government agencies and bank regulators concerning mortgage-related practices, including those related to origination practices for Federal Housing Administration insured residential home loans, compliance with underwriting guidelines relating to residential home loans sold to GSEs, and various practices related to lender-placed insurance. The Company is cooperating fully with these examinations and investigations, any of which could lead to administrative or legal proceedings or settlements involving remedies including fines, penalties, restitution or alterations in the Company s business practices and in additional costs and expenses.

Other The Company is subject to various other litigation, investigations and legal and administrative cases and proceedings that arise in the ordinary course of its businesses. Due to their complex nature, it may be years before some matters are resolved. While it is impossible to ascertain the ultimate resolution or range of financial liability with respect to these contingent matters, including the matters described above, the Company believes that the aggregate amount of such liabilities will not have a material adverse effect on the financial condition, results of operations or cash flows of the Company. However, if during any period a contingent matter, including any of the matters described above, should require an accrual or be resolved for an amount in excess of established accruals, the results of operations in that period could be adversely affected, potentially materially.

## Table of Contents

For additional information on the nature of the Company s guarantees and contingent liabilities, refer to Note 21 in the Company s Annual Report on Form 10-K for the year ended December 31, 2012.

Note 15 Subsequent Events
The Company has evaluated the impact of events that have occurred subsequent to March 31, 2013 through the date the consolidated financial statements were filed with the United States Securities and Exchange Commission. Based on this evaluation, the Company has determined none of these events were required to be recognized or disclosed in the consolidated financial statements and related notes, other than the deconsolidation of certain VIEs in April and May 2013, as described in Note 4.

## CERTIFICATION PURSUANT TO

## RULE 13a-14(a) UNDER THE SECURITIES EXCHANGE ACT OF 1934

I, Richard K. Davis, certify that:
(1) I have reviewed this Quarterly Report on Form 10-Q of U.S. Bancorp;
(2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
(3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
(4) The registrant s other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and $15 \mathrm{~d}-15(\mathrm{f})$ ) for the registrant and have:
(a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
(b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
(c) evaluated the effectiveness of the registrant s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
(d) disclosed in this report any change in the registrant s internal control over financial reporting that occurred during the registrant s most recent fiscal quarter (the registrant $s$ fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant s internal control over financial reporting; and
(5) The registrant $s$ other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant $s$ auditors and the audit committee of the registrant $s$ board of directors (or persons performing the equivalent functions):
(a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant $s$ ability to record, process, summarize and report financial information; and

## Edgar Filing: US BANCORP \DE\ - Form 10-Q

(b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant $s$ internal control over financial reporting.
