TAT Technologies Reports Transfer of Listing to The Nasdaq Global Market

Tuesday June 23, 2009 15:00 pm ET

GEDERA, Israel, June 23 /PRNewswire-FirstCall/ TAT Technologies Ltd. (NASDAQ: TATTF News), reported today that effective June 24, 2009, the company's ordinary shares will begin trading on the Nasdaq Global Market. The company's symbol (TATTF) will remain the same.

About TAT Technologies Ltd.

TAT provides a variety of services and products to the military and commercial aerospace and ground defense industries through its Gedera facility in Israel, as well as through its subsidiaries, Bental Industries Ltd., or Bental, in Israel and Limco in the U.S.

TAT operates under four operational segments: (i) OEM of Heat Transfer products (ii) OEM of Electric Motion Systems (iii) MRO services; and (iv) parts services, each with the following characteristics.

TAT's activities in the area of OEM of Heat Transfer products primarily relate to the (i) design, development, manufacture and sale of a broad range of heat transfer components (such as heat exchangers, pre-coolers and oil/fuel hydraulic coolers) used in mechanical and electronic systems on-board commercial, military and business aircraft; and (ii) manufacture and sale of environmental control and cooling systems and (iii) a variety of other electronic and mechanical aircraft accessories and systems such as pumps, valves, power systems and turbines. TAT's activities in the area of OEM of Electric Motion Systems primarily relate to the design, development, manufacture and sale of a broad range of electrical motor applications for airborne and ground systems. TAT activities in this segment commenced with the acquisition of Bental in August 2008 and accordingly, the results in this segment for fiscal year 2008 are not compared with the previous years.

TAT's MRO services include the remanufacture, overhaul and repair of heat transfer equipment and other aircraft components, APUs, propellers and landing gear. TAT's Limco subsidiary operates FAA certified repair stations, which provide aircraft component MRO services for airlines, air cargo carriers, maintenance service centers and the military.

TAT's parts segment focuses on inventory management and sale of APU parts, propellers and landing gear. TAT offers parts services for commercial, regional and charter airlines and business aircraft owners.

TAT's executive offices are located in the Re'em Industrial Park, Neta Boulevard, Bnei Ayish, Gedera 70750, Israel, and TAT's telephone number is 972-8-862-8500.

Safe Harbor for Forward-Looking Statements

This press release contains forward-looking statements that are subject to risks and uncertainties. Factors that could cause actual results to differ materially from these forward-looking statements include, but are not limited to, general business conditions in the airline industry, changes in demand for our services and products, the timing and amount or cancellation of orders, the price and continuity of supply of component parts used in our operations, and other risks detailed from time to time in the Company's filings with the Securities and Exchange Commission. These documents contain and identify other important factors that could cause actual results to differ materially from those contained in our projections or forward-looking statements. Shareholders and other readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date on which they are made. We undertake no obligation to update publicly or revise any forward-looking statement.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

PRIMEENERGY CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2014

(Unaudited)

(1) Basis of Presentation:

The accompanying condensed consolidated financial statements of PrimeEnergy Corporation ("PEC" or the "Company") have not been audited by independent public accountants. Pursuant to applicable Securities and Exchange Commission ("SEC") rules and regulations, the accompanying interim financial statements do not include all disclosures presented in annual financial statements and the reader should refer to the Company's Form 10-K for the year ended December 31, 2013. In the opinion of management, the accompanying interim condensed consolidated financial statements contain all material adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation of the Company's condensed consolidated balance sheets as of March 31, 2014 and December 31, 2013, the condensed consolidated results of operations, cash flows and equity for the three months ended March 31, 2014 and 2013. Certain amounts presented in prior period financial statements have been reclassified for consistency with current period presentation. The results for interim periods are not necessarily indicative of annual results. For purposes of disclosure in the condensed consolidated financial statements, subsequent events have been evaluated through the date the statements were issued.

Recently Issued Accounting Pronouncements

In July 2013, the FASB issued ASU 2013-11, "Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists." ASU 2013-11 provided guidance on the presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. This guidance requires entities to present unrecognized tax benefits as a decrease in a net operating loss, similar tax loss, or tax credit carryforward if certain criteria are met. The guidance will eliminate the diversity in practice in the presentation of unrecognized tax benefits but will not alter the way in which entities assess deferred tax assets for realizability. ASU No. 2013-11 is effective for annual and interim reporting periods beginning after December 15, 2013. The requirements of ASU 2013-11 did not have a material impact on the Company's condensed consolidated financial position, results of operations or cash flows.

(2) Acquisitions and Dispositions:

Historically the Company has repurchased the interests of the partners and trust unit holders in the eighteen oil and gas limited partnerships (the "Partnerships") and the two asset and business income trusts (the "Trusts") managed by the Company as general partner and as managing trustee, respectively. The Company purchased such interests in amounts totaling \$48,000 and \$1,000 for the three months ended March 31, 2014 and 2013, respectively.

(3) Restricted Cash and Cash Equivalents:

Restricted cash and cash equivalents include \$2.01 million at March 31, 2014 and December 31, 2013 of cash primarily pertaining to oil and gas revenue payments. There were corresponding accounts payable recorded at March 31, 2014 and December 31, 2013 for these liabilities. Both the restricted cash and the accounts payable are classified as current on the accompanying condensed consolidated balance sheets.

(4) Additional Balance Sheet Information:

Certain balance sheet amounts are comprised of the following:

<i>(Thousands of dollars)</i>	March 31, 2014	December 31, 2013
<u>Accounts Receivable:</u>		
Joint interest billing	\$ 5,272	\$ 6,287
Trade receivables	2,174	2,014
Oil and gas sales	10,596	9,604
Other	173	122
	18,215	18,027
Less: Allowance for doubtful accounts	(351)	(334)
Total	\$ 17,864	\$ 17,693

Table of Contents

Accounts Payable:		
Trade	\$ 1,618	\$ 1,596
Royalty and other owners	8,943	7,391
Partner advances	3,221	3,378
Prepaid drilling deposits	899	978
Other	2,709	2,906
Total	\$ 17,390	\$ 16,249
Accrued Liabilities:		
Compensation and related expenses	\$ 3,779	\$ 3,062
Property costs	3,016	3,119
Income tax	200	268
Other	490	383
Total	\$ 7,485	\$ 6,832

(5) Property and Equipment:

Property and equipment at March 31, 2014 and December 31, 2013 consisted of the following:

<i>(Thousands of dollars)</i>	March 31, 2014	December 31, 2013
Proved oil and gas properties, at cost	\$ 371,095	\$ 364,123
Less: Accumulated depletion and depreciation	(173,637)	(169,100)
Oil and Gas Properties, Net	\$ 197,458	\$ 195,023
Field and office equipment	\$ 27,258	\$ 26,653
Less: Accumulated depreciation	(13,808)	(13,251)
Field and Office Equipment, Net	\$ 13,450	\$ 13,402
Total Property and Equipment, Net	\$ 210,908	\$ 208,425

(6) Long-Term Bank Debt:**Bank Debt:**

Effective July 30, 2010 the Company entered into a Second Amended and Restated Credit Agreement between Compass Bank as agent and a syndicated group of lenders (Credit Agreement). The Credit Agreement has a revolving line of credit and letter of credit facility of up to \$250 million with a final maturity date of July 30, 2017. The credit facility is secured by substantially all of the Company's oil and gas properties. The credit facility is subject to a borrowing base determined by the lenders taking into consideration the estimated value of PEC's oil and gas properties in accordance with the lenders' customary practices for oil and gas loans. This process involves reviewing PEC's estimated proved reserves and their valuation. The borrowing base is redetermined semi-annually, and the available

borrowing amount could be increased or decreased as a result of such redetermination. In addition, PEC and the lenders each have at their discretion the right to request the borrowing base be redetermined with a maximum of one such request each year. A revision to PEC's reserves may prompt such a request on the part of the lenders, which could possibly result in a reduction in the borrowing base and availability under the credit facility. At any time if the sum of the outstanding borrowings and letter of credit exposures exceed the applicable portion of the borrowing base, PEC would be required to repay the excess amount within a prescribed period.

At March 31, 2014, the credit facility borrowing base was \$140.0 million with no required monthly reduction amount. The borrowings made within the credit facility may be placed in a base rate loan or LIBO rate loan. The Company's borrowing rates in the credit facility provide for base rate loans at the prime rate (3.25% at March 31, 2014) plus applicable margin utilization rates that range from 1.50% to 2.00%, and LIBO rate loans at LIBO published rates plus applicable utilization rates (2.50% to 3.00% at March 31, 2014). At March 31, 2014, the Company had in place one base rate loan and one LIBO rate loan with effective rates of 5.00% and 2.91%, respectively.

At March 31, 2014, the Company had a total of \$108.5 million of borrowings outstanding under its revolving credit facility at a weighted-average interest rate of 3.51% and \$31.5 million available for future borrowings. The combined weighted average interest rate paid on outstanding bank borrowings subject to base rate and LIBO interest was 3.55% for the three months ended March 31, 2014 as compared to 3.57% for the three months ended March 31, 2013.

On July 31, 2013, the Company entered into a \$10.0 million Loan and Security Agreement with JP Morgan Chase Bank (Equipment Loan). The Equipment Loan is secured by substantially all of the Company's field service equipment, carries an interest rate of 3.95% per annum, requires monthly payments (principal and interest) of \$184,000, and has a final maturity date of July 31, 2018. As of March 31, 2014, the Company had a total of \$8.9 million outstanding on the Equipment Loan.

Table of Contents

The Company entered into interest rate hedge agreements to help manage interest rate exposure. These contracts include interest rate swaps. Interest rate swap transactions generally involve the exchange of fixed and floating rate interest payment obligations without the exchange of the underlying principal amounts. In July 2012, the Company entered into interest swap agreements for a period of two years, which commenced in January 2014, related to \$75 million of the Company's bank debt resulting in a LIBO fixed rate of 0.563%. For the three months ended March 31, 2014, the Company recorded interest expense and paid \$54,000 related to the settlement of interest rate swaps.

(7) Other Long-Term Obligations and Commitments:**Operating Leases:**

The Company has several non-cancelable operating leases, primarily for rental of office space, that have a term of more than one year. The future minimum lease payments for the rest of fiscal 2014 and thereafter for the operating leases are as follows:

<i>(Thousands of dollars)</i>	Operating Leases
2014	\$ 563
2015	651
2016	545
2017	46
Total minimum payments	\$ 1,805

Rent expense for office space for the three months ended March 31, 2014 and 2013 was \$164,000 and \$191,000, respectively.

Asset Retirement Obligation:

A reconciliation of the liability for plugging and abandonment costs for the three months ended March 31, 2014 is as follows:

<i>(Thousands of dollars)</i>		
Asset retirement obligation	December 31, 2013	\$ 10,537
Liabilities incurred		35
Liabilities settled		(43)
Accretion expense		90
Asset retirement obligation	March 31, 2014	\$ 10,619

The Company's liability is determined using significant assumptions, including current estimates of plugging and abandonment costs, annual inflation of these costs, the productive life of wells and a risk-adjusted interest rate. Changes in any of these assumptions can result in significant revisions to the estimated asset retirement obligation. Revisions to the asset retirement obligation are recorded with an offsetting change to producing properties, resulting in

prospective changes to depreciation, depletion and amortization expense and accretion of discount. Because of the subjectivity of assumptions and the relatively long life of most of the Company's wells, the costs to ultimately retire the wells may vary significantly from previous estimates.

(8) Contingent Liabilities:

The Company, as managing general partner of the affiliated Partnerships, is responsible for all Partnership activities, including the drilling of development wells and the production and sale of oil and gas from productive wells. The Company also provides the administration, accounting and tax preparation work for the Partnerships, and is liable for all debts and liabilities of the affiliated Partnerships, to the extent that the assets of a given limited Partnership are not sufficient to satisfy its obligations. As of March 31, 2014, the affiliated Partnerships have established cash reserves in excess of their debts and liabilities and the Company believes these reserves will be sufficient to satisfy Partnership obligations.

The Company is subject to environmental laws and regulations. Management believes that future expenses, before recoveries from third parties, if any, will not have a material effect on the Company's financial condition. This opinion is based on expenses incurred to date for remediation and compliance with laws and regulations, which have not been material to the Company's results of operations.

From time to time, the Company is party to certain legal actions arising in the ordinary course of business. While the outcome of these events cannot be predicted with certainty, management does not expect these matters to have a materially adverse effect on the financial position or results of operations of the Company.

(9) Stock Options and Other Compensation:

In May 1989, non-statutory stock options were granted by the Company to four key executive officers for the purchase of shares of common stock. At March 31, 2014 and 2013, remaining options held by two key executive officers on 767,500 shares were outstanding and exercisable at prices ranging from \$1.00 to \$1.25. According to their terms, the options have no expiration date.

Table of Contents**(10) Related Party Transactions:**

The Company, as managing general partner or managing trustee, makes an annual offer to repurchase the interests of the partners and trust unit holders in certain of the Partnerships or Trusts. The Company purchased such interests in amounts totaling \$48,000 and \$1,000 for the three months ended March 31, 2014 and 2013, respectively.

Treasury stock purchases in any reported period may include shares from a related party, which may include members of the Company's Board of Directors.

Receivables from related parties consist of reimbursable general and administrative costs, lease operating expenses and reimbursement for property development and related costs. These receivables are due from joint venture partners, which may include members of the Company's Board of Directors.

Payables owed to related parties primarily represent receipts collected by the Company as agent for the joint venture partners, which may include members of the Company's Board of Directors, for oil and gas sales net of expenses.

(11) Financial Instruments:***Fair Value Measurements:***

Authoritative guidance on fair value measurements defines fair value, establishes a framework for measuring fair value and stipulates the related disclosure requirements. The Company follows a three-level hierarchy, prioritizing and defining the types of inputs used to measure fair value. The fair values of the Company's interest rate swaps, natural gas and crude oil price collars and swaps are designated as Level 3. The following fair value hierarchy table presents information about the Company's assets and liabilities measured at fair value on a recurring basis as of March 31, 2014 and December 31, 2013:

<u>March 31, 2014</u>	Quoted Prices in Active Markets			Significant Other	Significant	Balance as of
<i>(Thousands of dollars)</i>	For Identical Assets (Level 1)	Observable Inputs (Level 2)	Unobservable Inputs (Level 3)	2014	2014	2014
Assets						
Commodity derivative contracts	\$	\$	\$	701	\$	701
Interest rate derivative contracts				99		99
Total assets	\$	\$	\$	800	\$	800
Liabilities						
Commodity derivative contracts	\$	\$	\$	(3,354)	\$	(3,354)
Interest rate derivative contracts				(295)		(295)
Total liabilities	\$	\$	\$	(3,649)	\$	(3,649)

<u>December 31, 2013</u>	Quoted Prices in			Balance as of
<i>(Thousands of dollars)</i>	Active Markets	Significant	Significant	December 31,
<i>(Thousands of dollars)</i>	For Identical	Other	Unobservable	2013
<i>(Thousands of dollars)</i>	Assets (Level	Observable	Inputs (Level 3)	2013
<i>(Thousands of dollars)</i>	1)	Inputs (Level 2)	Inputs (Level 3)	2013
Assets				
Commodity derivative contracts	\$	\$	\$ 1,337	\$ 1,337
Interest rate derivative contracts			86	86
Total assets	\$	\$	\$ 1,423	\$ 1,423
Liabilities				
Commodity derivative contracts	\$	\$	\$ (2,010)	\$ (2,010)
Interest rate derivative contracts			(278)	(278)
Total liabilities	\$	\$	\$ (2,288)	\$ (2,288)

The derivative contracts were measured based on quotes from the Company's counterparties. Such quotes have been derived using valuation models that consider various inputs including current market and contractual prices for the underlying instruments, quoted forward prices for natural gas and crude oil, volatility factors and interest rates, such as a LIBOR curve for a similar length of time as the derivative contract term as applicable. These estimates are verified using comparable NYMEX futures contracts or are compared to multiple quotes obtained from counterparties for reasonableness.

The significant unobservable inputs for Level 3 derivative contracts include basis differentials and volatility factors. An increase (decrease) in these unobservable inputs would result in an increase (decrease) in fair value, respectively. The Company does not have access to the specific assumptions used in its counterparties' valuation models. Consequently, additional disclosures regarding significant Level 3 unobservable inputs were not provided.

Table of Contents

The following table sets forth a reconciliation of changes in the fair value of financial assets and liabilities classified as Level 3 in the fair value hierarchy for the three months ended March 31, 2014.

<i>(Thousands of dollars)</i>		
Net liabilities	December 31, 2013	\$ (865)
Total realized and unrealized (gains) losses:		
Included in earnings (a)		(3,033)
Included in other comprehensive loss		(5)
Purchases, sales, issuances and settlements		1,054
Net liabilities	March 31, 2014	\$ (2,849)

- (a) Derivative instruments are reported in revenues as realized gain/loss and on a separately reported line item captioned unrealized gain/loss on derivative instruments, and interest rate swap instruments are reported as an increase or reduction to interest expense.

Derivative Instruments:

The Company is exposed to commodity price and interest rate risk, and management considers periodically the Company's exposure to cash flow variability resulting from the commodity price changes and interest rate fluctuations. Futures, swaps and options are used to manage the Company's exposure to commodity price risk inherent in the Company's oil and gas production operations. The Company does not apply hedge accounting to any of its commodity based derivatives. Both realized and unrealized gains and losses associated with derivative instruments are recognized in earnings.

Interest rate swap derivatives are treated as cash-flow hedges and are used to fix or float interest rates on existing debt. The value of these interest rate swaps at March 31, 2014 and December 31, 2013 is located in accumulated other comprehensive loss, net of tax. Settlement of the swaps, which began in January 2014, is recorded within interest expense.

The following table sets forth the effect of derivative instruments on the condensed consolidated balance sheets at March 31, 2014 and December 31, 2013:

<i>(Thousands of dollars)</i>	Balance Sheet Location	Fair Value	
		March 31, 2014	December 31, 2013
Asset Derivatives:			
<i>Derivatives designated as cash-flow hedging instruments:</i>			
Interest rate swap contracts	Other assets	\$ 99	\$ 86
<i>Derivatives not designated as cash-flow hedging instruments:</i>			
Crude oil commodity contracts	Other current assets	73	307

Edgar Filing: TAT TECHNOLOGIES LTD - Form 6-K

Natural gas commodity contracts	Other current assets		50
Crude oil commodity contracts	Other assets	468	980
Natural gas commodity contracts	Other assets	160	
Total		\$ 800	\$ 1,423

Liability Derivatives:

Derivatives designated as cash-flow hedging instruments:

Interest rate swap contracts	Derivative liability short-term	\$ (265)	\$ (209)
Interest rate swap contracts	Derivative liability long-term	(30)	(69)

Derivatives not designated as cash-flow hedging instruments:

Crude oil commodity contracts	Derivative liability short-term	(2,378)	(1,667)
Natural gas commodity contracts	Derivative liability short-term	(921)	(318)
Crude oil commodity contracts	Derivative liability long-term	(44)	(25)
Natural gas commodity contracts	Derivative liability long-term	(11)	

Total		\$ (3,649)	\$ (2,288)
--------------	--	-------------------	-------------------

Total derivative instruments		\$ (2,849)	\$ (865)
------------------------------	--	------------	----------

Table of Contents

The following table sets forth the effect of derivative instruments on the condensed consolidated statement of operations for the three-month periods ended March 31, 2014 and 2013:

	Location of gain/loss recognized in income	Amount of gain/loss recognized in income	
		2014	2013
<i>(Thousands of dollars)</i>			
<i>Derivative designated as cash-flow hedge instruments:</i>			
Interest rate swap contracts	Interest expense	\$ (54)	\$
<i>Derivatives not designated as cash-flow hedge instruments</i>			
Natural gas commodity contracts	Unrealized loss on derivative instruments, net	(504)	(1,552)
Crude oil commodity contracts	Unrealized loss on derivative instruments, net	(1,478)	(531)
Natural gas commodity contracts (a)	Realized gain (loss) on derivative instruments, net	(243)	373
Crude oil commodity contracts	Realized loss on derivative instruments, net	(754)	(133)
		\$ (3,033)	\$ (1,843)

(a) In January 2014, the Company unwound and monetized natural gas swaps with original settlement dates from January 2015 through December 2015 for net proceeds of \$276,000. The \$276,000 gain associated with this early settlement transaction is included in realized gain on derivative instruments for the three months ended March 31, 2014.

(12) Earnings Per Share:

Basic earnings per share are computed by dividing earnings available to common stockholders by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflect per share amounts that would have resulted if dilutive potential common stock had been converted to common stock in gain periods. The following reconciles amounts reported in the financial statements:

Three Months Ended March 31,					
2014			2013		
Net Income	Weighted	Per Share	Net Income	Weighted	Per Share
(In	Average	Amount	(In	Average	Amount
000 s)	Number of		000 s)	Number of	

		Shares Outstanding			Shares Outstanding	
Basic	\$ 2,809	2,380,536	\$ 1.18	\$ 2,258	2,499,130	\$ 0.90
Effect of dilutive securities:						
Options		751,836			736,376	
Diluted	\$ 2,809	3,132,372	\$ 0.90	\$ 2,258	3,235,506	\$ 0.70

Table of Contents

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Report may contain statements relating to the future results of the Company that are considered forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995 (the PSLRA). In addition, certain statements may be contained in the Company's future filings with the SEC, in press releases, and in oral and written statements made by or with the approval of the Company that are not statements of historical fact and constitute forward-looking statements within the meaning of the PSLRA. Such forward-looking statements, in addition to historical information, which involve risk and uncertainties, are based on the beliefs, assumptions and expectations of management of the Company. Words such as expects, believes, should, plans, anticipates, will, potential, intend, may, outlook, predict, project, would, estimates, assumes, likely and variations of such similar intended to identify such forward-looking statements. These statements are not guarantees of future performance and involve risks and uncertainties and are based on a number of assumptions that could ultimately prove inaccurate and, therefore, there can be no assurance that they will prove to be accurate. Actual results and outcomes may vary materially from what is expressed or forecast in such statements due to various risks and uncertainties. These risks and uncertainties include, among other things, the possibility of drilling cost overruns and technical difficulties, volatility of oil and gas prices, competition, risks inherent in the Company's oil and gas operations, the inexact nature of interpretation of seismic and other geological and geophysical data, imprecision of reserve estimates, and the Company's ability to replace and expand oil and gas reserves. Accordingly, stockholders and potential investors are cautioned that certain events or circumstances could cause actual results to differ materially from those projected. The forward-looking statements are made as of the date of this report and other than as required by the federal securities laws, the Company assumes no obligation to update the forward-looking statements or to update the reasons why actual results could differ from those projected in the forward-looking statements.

The following discussion is intended to assist you in understanding our results of operations and our present financial condition. Our Condensed Consolidated Financial Statements and the accompanying Notes to the Condensed Consolidated Financial Statements included elsewhere in this Report contain additional information that should be referred to when reviewing this material.

OVERVIEW

We are an independent oil and natural gas company engaged in acquiring, developing and producing oil and natural gas. We presently own producing and non-producing properties located primarily in Texas, Oklahoma, West Virginia, the Gulf of Mexico, New Mexico, Colorado and Louisiana. In addition, we own a substantial amount of well servicing equipment. All of our oil and gas properties and interests are located in the United States. Assets in our principal focus areas include mature properties with long-lived reserves and significant development opportunities as well as newer properties with development and exploration potential. We believe our balanced portfolio of assets and our ongoing hedging program position us well for both the current commodity price environment and future potential upside as we develop our attractive resource opportunities. Our primary sources of liquidity are cash generated from our operations and our credit facility.

We attempt to assume the position of operator in all acquisitions of producing properties and will continue to evaluate prospects for leasehold acquisitions and for exploration and development operations in areas in which we own interests. We continue to actively pursue the acquisition of producing properties. In order to diversify and broaden our asset base, we will consider acquiring the assets or stock in other entities and companies in the oil and gas business. Our main objective in making any such acquisitions will be to acquire income producing assets so as to build stockholder value through consistent growth in our oil and gas reserve base on a cost-efficient basis.

Our cash flows depend on many factors, including the price of oil and gas, the success of our acquisition and drilling activities and the operational performance of our producing properties. We use derivative instruments to manage our commodity price risk. This practice may prevent us from receiving the full advantage of any increases in oil and gas prices above the maximum fixed amount specified in the derivative agreements and subjects us to the credit risk of the counterparties to such agreements. Since all of our derivative contracts are accounted for under mark-to-market accounting, we expect continued volatility in gains and losses on mark-to-market derivative contracts in our consolidated income statement as changes occur in the NYMEX price indices.

RECENT ACTIVITIES

During 2014, we continued our drilling program in our West Texas and Mid-Continent regions. It is our goal to increase our oil and gas reserves and production through the acquisition and development of oil and gas properties. Based upon the results of horizontal wells drilled by us and other offsetting operators and historical vertical well performance, we have decided to reduce the number of vertical wells in our drilling program and drill more horizontal wells. We believe horizontal development of our resource base will provide the opportunity to improve returns relative to vertical drilling by accessing a larger base of reserves in target zones with a lateral wellbore. Through April 30, 2014, we have participated in the drilling of 5 gross (1.8 net) wells; 3 of these wells are currently producing and 2 are awaiting completion. We intend to drill a total of approximately 25 gross (12 net) wells this year, primarily in the West Texas area at a net cost of \$60 million.

Table of Contents**RESULTS OF OPERATIONS****2014 and 2013 Compared**

We reported net income attributable to PrimeEnergy for the three months ended March 31, 2014 of \$2.81 million, or \$1.18 per share as compared to \$2.26 million, or \$0.90 per share for the three months ended March 31, 2013. Net income increased in 2014 by \$0.55 million or 24% primarily due to increases in oil and gas sales and field service income and a gain on the sale of non-essential oil and gas interests partially offset by increases in realized losses on derivative instruments, lease operating expenses and field service expenses as well as related increases in net income attributable to non-controlling interests and income tax provisions. Operating revenues increased \$3.42 million for the three months ended March 31, 2014 as compared to the same period in 2013 largely due to increased commodity prices realized in 2014 and an increase in field service income with the addition of new service equipment during the latter periods of 2013 partially offset by an increase in losses on derivative instruments in 2014. Lease operating and field service expenses increased \$1.92 million and \$0.99 million, respectively, for the three months ended March 31, 2014 as compared to the same period in 2013 primarily from increased labor costs and an increase in services provided. During the three months ended March 31, 2014 we recognized gains on the sale of non-essential oil and gas interests and field service equipment of \$3.17 million as compared to \$1.06 million during the same period in 2013.

The significant components of net income are discussed below.

Oil and gas sales increased \$2.84 million, or 13% from \$21.36 million for the three months ended March 31, 2013 to \$24.20 million for the three months ended March 31, 2014. Crude oil and natural gas sales vary due to changes in volumes of production sold and realized commodity prices. Our realized prices at the well head increased an average of \$8.07 per barrel, or 9% on crude oil during the three months ended March 31, 2014 from the same period in 2013 while our average well head price for natural gas increased \$1.51 per mcf, or 33% during the three months ended March 31, 2014 from the same period in 2013.

Our crude oil production decreased slightly by 2,000 barrels, or 1% from 184,000 barrels for the first quarter 2013 to 182,000 barrels for the first quarter 2014. Our natural gas production decreased by 37,000 mcf, or 3% from 1,190,000 mcf for the first quarter 2013 to 1,153,000 mcf for the first quarter 2014. The net decrease in crude oil and natural gas production volumes are a result of the natural decline of existing properties.

The following table summarizes the primary components of production volumes and average sales prices realized for the three months ended March 31, 2014 and 2013 (excluding realized gains and losses from derivatives).

	Three Months Ended March 31,		
	2014	2013	Increase / (Decrease)
Barrels of Oil Produced	182,000	184,000	(2,000)
Average Price Received	\$ 94.15	\$ 86.08	\$ 8.07
Oil Revenue (In 000 s)	\$ 17,133	\$ 15,864	\$ 1,269
Mcf of Gas Produced	1,153,000	1,190,000	(37,000)
Average Price Received	\$ 6.13	\$ 4.62	\$ 1.51
Gas Revenue (In 000 s)	\$ 7,068	\$ 5,495	\$ 1,573

Total Oil & Gas Revenue (In 000 s)	\$ 24,201	\$ 21,359	\$ 2,842
------------------------------------	-----------	-----------	----------

Realized net gains on derivative instruments include net losses of \$0.24 million and \$0.75 million on the settlements of natural gas and crude oil derivatives, respectively for the first quarter 2014 and net gains of \$0.37 million and net losses of \$0.13 million on the settlements of natural gas and crude oil derivatives, respectively for the first quarter 2013. In the first quarter of 2014, we unwound and monetized natural gas swaps with original settlement dates from January 2015 through December 2015 for net proceeds of \$0.28 million. The \$0.28 million gain associated with these early settlement transactions is included in realized gain on derivative instruments for the three months ended March 31, 2014.

Oil and gas prices received including the impact of derivatives but excluding the early settlement transactions were:

	Three Months Ended March 31,		
	2014	2013	Increase (Decrease)
Oil Price	\$ 90.01	\$ 85.35	\$ 4.66
Gas Price	\$ 5.68	\$ 4.93	\$ 0.75

We do not apply hedge accounting to any of our commodity based derivatives, thus changes in the fair market value of commodity contracts held at the end of a reported period, referred to as mark-to-market adjustments, are recognized as unrealized gains and losses in the accompanying condensed consolidated statements of operations. As oil and natural gas prices remain volatile, mark-to-market accounting treatment creates volatility in our revenues. During the three months ended March 31, 2014, we recognized net unrealized losses of \$0.50 million associated with natural gas fixed swap contracts and \$1.48 million in net unrealized

Table of Contents

losses associated with crude oil fixed swaps and collars due to an increase in natural gas and crude oil futures market prices between December 31, 2013 and March 31, 2014. During the three months ended March 31, 2013, we recognized net unrealized losses of \$1.55 million associated with natural gas fixed swap contracts and \$0.53 million associated with crude oil fixed swaps and collars due to market fluctuations in natural gas and crude oil futures market prices between December 31, 2012 and March 31, 2013.

Field service income increased \$1.44 million, or 27% from \$5.33 million for the first quarter 2013 to \$6.77 million for the first quarter 2014. This underlying increase is a result of adding service equipment during the latter periods of 2013 and the market allowing us to charge slightly higher rates to customers. Workover rig services represent the bulk of our field service operations, and with the upgrading of our rigs during late 2013 those rates have all increased between the periods in our most active districts. In addition, income from water hauling and disposal services in our South Texas district have generally recovered from a slight down turn during the first quarter of 2013 due to increased competition in the area, and income from hot oiler services have increased in our West Texas district with the addition of service equipment in the area.

Lease operating expense increased \$1.93 million, or 19% from \$9.98 million for the first quarter 2013 to \$11.91 million for the first quarter 2014. This underlying increase is primarily due to higher pumper / labor costs and salt water disposal costs associated with new wells coming on line from the recent drilling success in West Texas during the first three months of 2014 as compared to the same period of 2013.

Field service expense increased \$0.99 million, or 22% from \$4.54 million for the first quarter 2013 to \$5.53 million for the first quarter 2014. Field service expenses primarily consist of salaries and vehicle operating expenses which have increased during the three months ended March 31, 2014 over the same period of 2013 as a direct result of increased services and utilization of the equipment.

Depreciation, depletion, amortization and accretion on discounted liabilities increased \$0.47 million, or 10% from \$4.88 million for the first quarter 2013 to \$5.35 million for the first quarter 2014. This increase is primarily due to increased depletion rates recognized during the first three months of 2014 associated with the recent drilling success in West Texas as compared to the same period of 2013.

General and administrative expense increased \$0.41 million, or 10% from \$4.04 million for the three months ended March 31, 2013 to \$4.45 million for the three months ended March 31, 2014. This increase in 2014 is largely due to increased personnel costs in 2014. The largest component of these personnel costs was salaries and employee related taxes and insurance.

Gain on sale and exchange of assets of \$3.17 million and \$1.06 million for the three months ended March 31, 2014 and March 31, 2013, respectively consists of sales of non-essential oil and gas interests and field service equipment.

Interest expense increased \$0.01 million, or less than 1% from \$1.07 million for the first quarter 2013 to \$1.08 million for the first quarter 2014. This increase relates to a slight increase in weighted average interest rates due to our Equipment Loan entered into in July 2013 substantially offset by a decrease in average debt outstanding during the first quarter 2014 as compared to the same period of 2013.

A provision for income taxes of \$1.48 million, or an effective tax rate of 34% was recorded for the three months ended March 31, 2014 versus a provision of \$1.15 million, or an effective tax rate of 34% for the three months ended March 31, 2013. Our provision for income taxes can vary from the federal statutory tax rate of 34% primarily due to state taxes and percentage depletion deductions. We are entitled to percentage depletion on certain of our wells, which is calculated without reference to the basis of the property. To the extent that such depletion exceeds a property's basis

it creates a permanent difference, which would have the effect of lowering our effective rate.

LIQUIDITY AND CAPITAL RESOURCES

Our primary capital resources are cash provided by our operating activities and our credit facility.

Net cash provided by our operating activities for the three months ended March 31, 2014 was \$11.13 million compared to \$11.41 million for the three months ended March 31, 2013. Excluding the effects of significant unforeseen expenses or other income, our cash flow from operations fluctuates primarily because of variations in oil and gas production and prices or changes in working capital accounts. Our oil and gas production will vary based on actual well performance but may be curtailed due to factors beyond our control.

Our realized oil and gas prices vary due to world political events, supply and demand of products, product storage levels, and weather patterns. We sell the vast majority of our production at spot market prices. Accordingly, product price volatility will affect our cash flow from operations. To mitigate price volatility we sometimes lock in prices for some portion of our production through the use of derivatives.

If our exploratory drilling results in significant new discoveries, we will have to expend additional capital in order to finance the completion, development, and potential additional opportunities generated by our success. We believe that, because of the additional reserves resulting from the successful wells and our record of reserve growth in recent years, we will be able to access sufficient additional capital through bank financing.

Table of Contents

We currently maintain a credit facility totaling \$250 million, with a current borrowing base of \$140 million and \$31.50 million in availability at March 31, 2014. The bank reviews the borrowing base semi-annually and, at their discretion, may decrease or propose an increase to the borrowing base relative to a redetermined estimate of proved oil and gas reserves. Our oil and gas properties are pledged as collateral for the line of credit and we are subject to certain financial and operational covenants defined in the agreement. If we do not comply with these covenants on a continuing basis, the lenders have the right to refuse to advance additional funds under the facility and/or declare all principal and interest immediately due and payable. We are currently in compliance with these covenants and expect to be in compliance over the next twelve months.

In July 2013, we obtained a \$10 million loan secured by most of our field service equipment used in our field service operations. We used the funds from that loan to pay down our credit facility, and as a result, freed up additional funds under the credit facility for future acquisitions, development and operations. As of April 20, 2014 we had a total of \$8.8 million outstanding on this loan.

It is our goal to increase our oil and gas reserves and production through the acquisition and development of oil and gas properties. During 2014 we continued our drilling program in our West Texas and Mid-Continent regions. Based upon the results of horizontal wells drilled by us and other offsetting operators and historical vertical well performance, we have decided to reduce the number of vertical wells in our drilling program and drill more horizontal wells. We believe horizontal development of our resource base will provide the opportunity to improve returns relative to vertical drilling by accessing a larger base of reserves in target zones with a lateral wellbore. During 2014, we intend to drill a total of approximately 25 gross (12 net) wells, primarily in the West Texas area, at a net cost of \$60 million. We also continue to explore and consider opportunities to further expand our oilfield servicing revenues through additional investment in field service equipment. However, the majority of our capital spending is discretionary, and the ultimate level of expenditures will be dependent on our assessment of the oil and gas business environment, the number and quality of oil and gas prospects available, the market for oilfield services, and oil and gas business opportunities in general.

We have in place both a stock repurchase program and a limited partnership interest repurchase program under which we expect to continue spending during 2014. For the three month period ended March 31, 2014, we have spent \$1.09 million under these programs.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company is a smaller reporting company and no response is required pursuant to this Item.

Item 4. CONTROLS AND PROCEDURES

As of the end of the current reported period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rules 13a-15 and 15d-15 of the Securities Exchange Act of 1934 (the Exchange Act). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective with respect to the recording, processing, summarizing and reporting, within the time periods specified in the Commission's rules and forms, of information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act.

There were no changes in the Company's internal control over financial reporting that occurred during the first three months of 2014 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents**PART II OTHER INFORMATION****Item 1. LEGAL PROCEEDINGS**

None.

Item 1A. RISK FACTORS

The Company is a smaller reporting company and no response is required pursuant to this Item.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

There were no sales of equity securities by the Company during the period covered by this report.

During the three months ended March 31, 2014, the Company purchased the following shares of common stock as treasury shares.

2014 Month	Number of Shares	Average Price Paid per share	Maximum Number of Shares that May Yet Be Purchased Under The Program at Month - End (1)
January	6,214	\$ 50.34	336,114
February	714	\$ 52.21	335,400
March	13,684	\$ 50.92	321,716
Total/Average	20,612	\$ 50.79	

- (1) In December 1993, we announced that the Board of Directors authorized a stock repurchase program whereby we may purchase outstanding shares of the common stock from time-to-time, in open market transactions or negotiated sales. On October 31, 2012, the Board of Directors of the Company approved an additional 500,000 shares of the Company's stock to be included in the stock repurchase program. A total of 3,500,000 shares have been authorized to date under this program. Through March 31, 2014, a total of 3,178,284 shares have been repurchased under this program for \$49,954,547 at an average price of \$15.72 per share. Additional purchases of shares may occur as market conditions warrant. We expect future purchases will be funded with internally generated cash flow or from working capital.
