Form 10-Q
August 16, 2010

UNITED STATES<br>SECURITIES AND EXCHANGE COMMISSION<br>Washington, D.C. 20549

FORM 10-Q
(Mark One)
x QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2010
or
o TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from $\qquad$ to $\qquad$
Commission file Number: 000-32891
1ST CONSTITUTION BANCORP
(Exact Name of Registrant as Specified in Its Charter)

New Jersey
(State of Other Jurisdiction
of Incorporation or Organization)

22-3665653
(I.R.S. Employer Identification No.)

2650 Route 130, P.O. Box 634, Cranbury, NJ
(Address of Principal Executive Offices)

08512
(Zip Code)
(609) 655-4500
(Issuer's Telephone Number, Including Area Code)
(Former name, former address and former fiscal year, if changed since last
report)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or $15(\mathrm{~d})$ of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes $x$ No o

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T
( $\$ 232.405$ of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required
to submit and post such files). Yes o No o
Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer
Non-accelerated filer
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule $12 \mathrm{~b}-2$ of the Exchange Act). Yes o Nox

As of August 13, 2010, there were 4,530,993 shares of the registrant's common stock, no par value, outstanding.

# Edgar Filing: 1ST CONSTITUTION BANCORP - Form 10-Q 

## Table of Contents

1st Constitution Bancorp and Subsidiaries Notes To Consolidated Financial Statements<br>June 30, 2010 (Unaudited)

## (1) Summary of Significant Accounting Policies

The accompanying unaudited Consolidated Financial Statements include 1st Constitution Bancorp (the "Company"), its wholly-owned subsidiary, 1st Constitution Bank (the "Bank"), and the Bank's wholly-owned subsidiaries, 1st Constitution Investment Company of Delaware, Inc., 1st Constitution Investment Company of New Jersey, Inc., FCB Assets Holdings, Inc. and 1st Constitution Title Agency, LLC. 1st Constitution Capital Trust II, a subsidiary of the Company, is not included in the Company's consolidated financial statements, as it is a variable interest entity and the Company is not the primary beneficiary. All significant intercompany accounts and transactions have been eliminated in consolidation and certain prior period amounts have been reclassified to conform to current year presentation. The accounting and reporting policies of the Company and its subsidiaries conform to accounting principles generally accepted in the United States of America and pursuant to the rules and regulations of the Securities and Exchange Commission (the "SEC") including the instructions to Form 10-Q and Article 8 of Regulation S-X. Certain information and footnote disclosures normally included in financial statements have been condensed or omitted pursuant to such rules and regulations. These Consolidated Financial Statements should be read in conjunction with the audited consolidated financial statements and the notes thereto included in the Company's Form 10-K for the year ended December 31, 2009, filed with the SEC on March 26, 2010.

In the opinion of the Company, all adjustments (consisting only of normal recurring accruals) which are necessary for a fair presentation of the operating results for the interim periods have been included. The results of operations for periods of less than a year are not necessarily indicative of results for the full year.

The Company has evaluated events and transactions occurring subsequent to the balance sheet date of June 30, 2010 for items that should potentially be recognized or disclosed in these financial statements. The evaluation was conducted through the date these financial statements were issued.

## (2) Net Income Per Common Share

Basic net income per common share is calculated by dividing net income less dividends and discount accretion on preferred stock by the weighted average number of common shares outstanding during each period.

Diluted net income per common share is calculated by dividing net income less dividends and discount accretion on preferred stock by the weighted average number of common shares outstanding, as adjusted for the assumed exercise of potential common stock options and unvested restricted stock awards (as defined below), using the treasury stock method. All share information has been adjusted for the effect of a 5\% stock dividend declared December 17, 2009 and paid on February 3, 2010 to shareholders of record on January 19, 2010.

The following tables illustrate the reconciliation of the numerators and denominators of the basic and diluted earnings per common share (EPS) calculations. Dilutive securities in the tables below exclude common stock options and warrants with exercise prices that exceed the average market price of the Company's common stock during the periods presented. Inclusion of these common stock options and warrants would be anti-dilutive to the diluted earnings per common share calculation.

## Table of Contents

U.S. Treasury securities and obligations of U.S. Government sponsored corporations and agencies: The unrealized losses on investments in these securities were caused by interest rate increases. The contractual terms of these investments do not permit the issuer to settle the securities at a price less than the amortized cost of the investment. Because the Company does not intend to sell these investments and it is not more likely than not that the Company will be required to sell these investments before a market price recovery or maturity, these investments are not considered other-than temporarily impaired.

Residential collateralized mortgage obligations and residential mortgaged-backed securities: The unrealized losses on investments in residential collateralized residential mortgage obligations and mortgage-backed securities were caused by interest rate increases. The contractual cash flows of these securities are guaranteed by the issuer, which are either government or government sponsored agencies. It is expected that the securities would not be settled at a price less than the amortized cost of the investment. Because the decline in fair value is attributable to changes in interest rates and not credit quality, and because the Company does not intend to sell these investments and it is not more likely than not that the Company will be required to sell these investments before a market price recovery or maturity, these investments are not considered other-than-temporarily impaired.

Obligations of State and Political Subdivisions: The unrealized losses or investments in these securities were caused by interest rate increases. It is expected that the securities would not be settled at a price less than the amortized cost of the investment. Because the decline in fair value is attributable to changes in interest rates and not credit quality, and because the Company does not intend to sell these investments and it is not more likely than not that the Company will be required to sell these investments before a market price recovery or maturity, these investments are not considered other-than-temporarily impaired.

Trust preferred debt securities - single issue: The investments in these securities with unrealized losses are comprised of four corporate trust preferred securities that mature in 2027, all of which were single-issuer securities. The contractual terms of the trust preferred securities do not allow the issuer to settle the securities at a price less than the face value of the trust preferred securities, which is greater than the amortized cost of the trust preferred securities. None of the corporate issuers have defaulted on interest payments. Because the decline in fair value is
attributable to widening of interest rate spreads and the lack of an active trading market for these securities and to a lesser degree market concerns on the issuers' credit quality, and because the Company does not intend to sell these investments and it is not more likely than not that the Company will be required to sell these investments before a market price recovery or maturity, these investments are not considered other-than-temporarily impaired.

Trust preferred debt security - pooled: This trust preferred debt security was issued by a two issuer pool (Preferred Term Securities XXV, Ltd. co-issued by Keefe, Bruyette and Woods, Inc. and First Tennessee ("Pre TSL XXV")), consisting primarily of financial institution holding companies. During 2009, the Company recognized an other-than-temporary impairment charge of $\$ 864,727$ of which $\$ 363,783$ was determined to be a credit loss and charged to operations and $\$ 500,944$ was recognized in other comprehensive income (loss) component of shareholders' equity.

## Table of Contents

A number of factors or combinations of factors could cause management to conclude in one or more future reporting periods that an unrealized loss that exists with respect to PreTSL XXV constitutes an additional credit impairment. These factors include, but are not limited to, failure to make interest payments, an increase in the severity of the unrealized loss, an increase in the continuous duration of the unrealized loss without an impairment in value or changes in market conditions and/or industry or issuer specific factors that would render management unable to forecast a full recovery in value. In addition, the fair value of trust preferred securities could decline if the overall economy and the financial condition of the issuers continue to deteriorate and there remains limited liquidity for this security.

The following table presents a cumulative roll forward of the amount of other-than-temporary impairment ("OTTI") related to credit losses, all of which relate to one pooled trust preferred debt security, which have been recognized in earnings for debt securities held and not intended to be sold.
(in thousands)

|  | Three and six <br> months ended <br> June 30, 2010 |
| :--- | :---: | :---: |
| Balance at beginning of period | $\$ \quad 364$ |
| Change during the period | $\$ \quad 3$ |
| Balance at end of period | $\$ \quad 364$ |

The amounts in the above table relate to one pooled trust preferred security included in the held to maturity portfolio.
(4) Share-Based Compensation

The Company establishes fair value for its equity awards to determine its cost and recognizes the related expense for stock options over the vesting period using the straight-line method. The grant date fair value for stock options is calculated using the Black-Scholes option valuation model.

The Company's stock-based incentive plans (the "Stock Plans") authorize the issuance of an aggregate of 1,177,500 shares of common stock pursuant to awards that may be granted in the form of stock options to purchase common stock ("Options") and awards of shares of common stock ("Stock Awards"). The purpose of the Company's Stock Plans is to attract and retain personnel for positions of substantial responsibility and to provide additional incentive to certain officers, directors, employees and other persons to promote the success of the Company. Under the Company's Stock Plans, options expire ten years after the date of grant. Options are granted with an exercise price at the then fair market value of the Company's common stock. As of June 30, 2010, there were 261,388 shares of common stock (as adjusted for the 5\% stock dividend declared December 17, 2009 and paid February 3, 2010 to shareholders of record on January 19, 2010) available for future grants under the Company's Stock Plans.

Stock-based compensation expense related to Options was $\$ 30,242$ and $\$ 41,050$ for the six months ended June 30, 2010 and 2009, respectively.

## Table of Contents

Transactions under the Company's Stock Plans during the six months ended June 30, 2010 are summarized as follows:

| Stock Options | Number of Shares |  | Weighted <br> Average <br> Exercise <br> Price | Weighted Average Remaining Contractual Term (years) | Aggregate Intrinsic Value |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Outstanding at January 1, 2010 | 154,710 | \$ | 11.04 |  |  |
| Options Granted | -- |  | -- |  |  |
| Options Exercised | -- |  | -- |  |  |
| Options Forfeited | (1,969 |  | 9.86 |  |  |
| Options Expired | -- |  | -- |  |  |
| Outstanding at June 30, 2010 | 152,741 | \$ | 11.07 | 5.6 | \$63,206 |
| Exercisable at June 30, 2010 | 111,248 | \$ | 11.49 | 4.6 | \$63,206 |

As of June 30, 2010, there was approximately $\$ 119,766$ of unrecognized compensation costs related to non-vested option-based compensation arrangements granted under the Company's Stock Plans. That cost is expected to be recognized over the next four years.

Stock Awards generally vest over a four-year service period on the anniversary of the grant date, except in the case of the Company's highest compensated employee (currently its chief executive officer) for Stock Awards granted on or after June 15, 2009 which related to long term restricted stock awards. Such long-term restricted Stock Awards granted to the highest compensated employee vest $50 \%$ immediately following the second anniversary of the Award and $25 \%$ immediately following each of the next two anniversaries. In that instance, transferability of the stock received pursuant to a Stock Award is generally tied to repayment of funds received by the Company from the United States Department of the Treasury (the "Treasury") in exchange for preferred stock of the Company and warrants to acquire common stock of the Company. Also, such Stock Awards granted to the Company's highest compensated employee which are long term are subject to forfeiture unless such person performs substantial services for the Company for two years after the date of grant of the Stock Award, except in certain circumstances and even if vested, the Stock Award is not transferable until the Company has repaid the Treasury the funds received with respect to the preferred stock and warrants sold to the Treasury. The release of the transferability restriction is $25 \%$ of the Stock Award for each repayment of $25 \%$ of the funds originally received by the Company from the Treasury, with an exception from the transferability restriction for the number of shares sufficient to pay taxes arising from the vesting of the Stock Award. Once vested, Stock Awards are irrevocable, except that such Stock Awards are subject to clawback in certain circumstances pursuant to Section 304 of the Sarbanes-Oxley Act of 2002 and pursuant to Section 111 of the Emergency Economic Stabilization Act of 2008 as amended by the American Recovery and Reinvestment Act of 2009. The product of the number of shares granted and the grant date market price of the Company's common stock determine the fair value of shares covered by the Stock Award under the Company's Stock Plans. Management recognizes compensation expense for the fair value of the shares covered by the Stock Award on a straight-line basis over the requisite service period. Stock-based compensation expense related to Stock Awards was $\$ 80,000$ for each of the six months ended June 30, 2010 and 2009.

The following table summarizes nonvested restricted shares for the six months ended June 30, 2010 (as adjusted to reflect the 5\% stock dividend declared in December 2009):

Nonvested shares

| Number of | Average Grant Date |
| :---: | :---: |
| Shares | Fair Value |

Edgar Filing: 1ST CONSTITUTION BANCORP - Form 10-Q

| Non-vested stock awards at January 1, 2010 | 75,769 | $\$$ | 9.53 |
| :--- | :--- | :--- | :--- |
| Shares granted | 12,075 |  | 5.25 |
| Shares vested | $(5,565$ | $)$ | 10.00 |
| Shares forfeited | $(2,941$ | $)$ | 10.11 |
| Non-vested stock awards at June 30, 2010 | 79,338 | $\$$ | 8.82 |

## Edgar Filing: 1ST CONSTITUTION BANCORP - Form 10-Q

## Table of Contents

As of June 30, 2010, there was approximately $\$ 455,600$ of unrecognized compensation cost related to non-vested share-based compensation arrangements granted under the Company's Stock Plans. That cost is expected to be recognized over the four years following June 30, 2010.
(5) Benefit Plans

The Company has a $401(\mathrm{k})$ plan which covers substantially all employees with six months or more of service. The Company's contributions to the $401(\mathrm{k})$ plan are expensed as incurred.

The Company also provides retirement benefits to certain employees under a supplemental executive retirement plan. The supplemental executive retirement plan is unfunded and the Company accrues actuarial determined benefit costs over the estimated service period of the employees in the plan. The Company recognizes the over funded or under funded status of a defined benefit post-retirement plan (other than a multiemployer plan) as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur, through comprehensive income.

The components of net periodic expense for the Company's supplemental executive retirement plan for the three months and six months ended June 30, 2010 and 2009 are as follows:

|  | Three months ended June 30, |  |  |  | Six months ended June 30, |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 2010 |  | 2009 |  | 2010 |  | 2009 |
| Service cost | \$ | 56,514 | \$ | 79,544 | \$ | 113,028 | \$ | 140,638 |
| Interest cost |  | 48,435 |  | 45,630 |  | 96,870 |  | 91,260 |
| Actuarial loss recognized |  | 38,517 |  | 21,744 |  | 77,034 |  | 43,488 |
| Prior service cost recognized |  | 24,858 |  | 24,750 |  | 49,716 |  | 49,608 |
|  | \$ | 168,324 | \$ | 171,668 | \$ | 336,648 | \$ | 324,994 |

(6) Comprehensive Income and Accumulated Other Comprehensive Income (Loss)

The components of Accumulated other comprehensive income (loss) and their related income tax effects are as follows:

Edgar Filing: 1ST CONSTITUTION BANCORP - Form 10-Q

| Pension liability | $(419,383$ | $)$ | $(647,228$ |
| :--- | :--- | :--- | :--- |
| Related income tax effect | 167,961 | 258,425 |  |
|  | $(251,422$ | $(388,803)$ |  |
|  |  |  |  |
| Accumulated other comprehensive income (loss) | $\$$ | 127,246 | $\$$ |

## Table of Contents

The components of Accumulated other comprehensive income (loss), net of tax, which is a component of shareholders' equity, were as follows:

## (7) Recent Accounting Pronouncements

In June 2009, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2009-16, Transfers and Servicing (Topic 860) - Accounting for Transfers of Financial Asets. ASU 2009-16 provides guidance regarding the accounting for transfers of financial assets that prescribes the information that a reporting entity must provide in its financial reports about a transfer of financial assets; the effects of a transfer on its financial position, financial performance and cash flows; and a transferor's continuing involvement in transferred financial assets. This guidance specifically removes the concept of a qualifying special-purpose entity and the exception from applying otherwise applicable consolidation requirements to variable interest entities that are qualifying special-purpose entities. It also modifies the financial-components approach used in accounting for transfers. This guidance will be effective for fiscal years beginning after November 15, 2009. Adoption of the new guidance did not significantly impact the Company's financial statements.

In June 2009, the FASB issued ASU 2009-17, Consolidations (TOPIC 810) - Improvements to financial Reporting by Enterprises Involved with Variable Interest Entities. ASU 2009-17 amended previously existing guidance to require that an enterprise determine whether it's variable interest or interests give it a controlling financial interest in a variable interest entity. The primary beneficiary of a variable interest entity is the enterprise that has both (1) the power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance and (2) the obligation to absorb losses of the entity that could potentially be significant to the variable interest entity or the right to receive benefits from the entity that could potentially be significant to the variable interest entity. This guidance requires ongoing reassessments of whether an enterprise is the primary beneficiary of a variable interest entity and is effective for fiscal years beginning after November 15, 2009. Adoption of the new guidance did not significantly impact the Company's financial statements.

The FASB has issued ASU 2010-06, Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements. This ASU requires some new disclosures and clarifies some existing disclosure requirements about fair value measurement as set forth in Codification Subtopic 820-10. The FASB's objective is to improve these disclosures and, thus, increase the transparency in financial reporting. Specifically, ASU 2010-06 amends Codification Subtopic 820-10 to now require: (1) A reporting entity to disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and describe the reasons for the transfers; and (2) In the reconciliation for fair value measurements using significant unobservable inputs, a reporting entity should present separately information about purchases, sales, issuances, and settlements. In addition, ASU 2010-06 clarifies the requirements of the following existing disclosures: (1) For purposes of reporting fair value
measurement for each class of assets and liabilities, a reporting entity needs to use judgment in determining the appropriate classes of assets and liabilities; and (2) A reporting entity should provide disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements. ASU 2010-06 is effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The implementation of the effective portions of this ASU, effective January 1, 2010, did not have a material impact on the Company's consolidated financial statements.

# Edgar Filing: 1ST CONSTITUTION BANCORP - Form 10-Q 

## Table of Contents

The FASB issued ASU 2010-11, Derivatives and Hedging (Topic 815): Scope Exception Related to Embedded Credit Derivatives. The FASB believes this ASU clarifies the type of embedded credit derivative that is exempt from embedded derivative bifurcation requirements. Specifically, only one form of embedded credit derivative qualifies for the exemption - one that is related only to the subordination of one financial instrument to another. As a result, entities that have contracts containing an embedded credit derivative feature in a form other than such subordination may need to separately account for the embedded credit derivative feature. The amendments in the ASU are effective for each reporting entity at the beginning of its first fiscal quarter beginning after June 15, 2010. Early adoption is permitted at the beginning of each entity's first fiscal quarter beginning after March 5, 2010. We have not early adopted this guidance and have determined that the adoption of this guidance will not have a material impact on our consolidated financial position or results of operations.

The FASB issued ASU 2010-18, Receivables (Topic 310): Effect of a Loan Modification When the Loan Is Part of a Pool That Is Accounted for as a Single Asset, codifies the consensus reached in EITF Issue No. 09-I, "Effect of a Loan Modification When the Loan Is Part of a Pool That Is Accounted for as a Single Asset." The amendments to the Codification provide that modifications of loans that are accounted for within a pool under Subtopic 310-30 do not result in the removal of those loans from the pool even if the modification of those loans would otherwise be considered a troubled debt restructuring. An entity will continue to be required to consider whether the pool of assets in which the loan is included is impaired if expected cash flows for the pool change. ASU 2010-18 does not affect the accounting for loans under the scope of Subtopic 310-30 that are not accounted for within pools. Loans accounted for individually under Subtopic 310-30 continue to be subject to the troubled debt restructuring accounting provisions within Subtopic 310-40.

ASU 2010-18 is effective prospectively for modifications of loans accounted for within pools under Subtopic 310-30 occurring in the first interim or annual period ending on or after July 15, 2010. Early application is permitted. Upon initial adoption of ASU 2010-18, an entity may make a one-time election to terminate accounting for loans as a pool under Subtopic 310-30. This election may be applied on a pool-by-pool basis and does not preclude an entity from applying pool accounting to subsequent acquisitions of loans with credit deterioration. The adoption of ASU 2010-18 is not expected to have a significant impact to our consolidated financial position or result of operations.

The FASB issued ASU 2010-20, Receivables (Topic 310): Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses, will help investors assess the credit risk of a company's receivables portfolio and the adequacy of its allowance for credit losses held against the portfolios by expanding credit risk disclosures.

This ASU requires more information about the credit quality of financing receivables in the disclosures to financial statements, such as aging information and credit quality indicators. Both new and existing disclosures must be disaggregated by portfolio segment or class. The disaggregation of information is based on how a company develops its allowance for credit losses and how it manages its credit exposure.

The amendments in this Update apply to all public and nonpublic entities with financing receivables. Financing receivables include loans and trade accounts receivable. However, short-term trade accounts receivable, receivables measured at fair value or lower of cost or fair value, and debt securities are exempt from these disclosure amendments.

The effective date of ASU 2010-20 differs for public and nonpublic companies. For public companies, the amendments that require disclosures as of the end of a reporting period are effective for periods ending on or after December 15, 2010. The amendments that require disclosures about activity that occurs during a reporting period are effective for periods beginning on or after December 15, 2010. For nonpublic companies, the amendments are effective for annual reporting periods ending on or after December 15, 2011. The adoption of ASU 2010-20 is not
expected to have a significant impact on our consolidated financial position or results of operations.
(8) Fair Value Disclosures
U.S. GAAP has established a fair value hierarchy that prioritizes the inputs to valuation methods used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

## Table of Contents

Level Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, 1: unrestricted assets or liabilities.

Level 2: Quoted prices in markets that are not active, or inputs that are observable either directly or indirectly, for substantially the full term of the asset or liability.

Level Prices or valuation techniques that require inputs that are both significant to the fair value measurement and 3: unobservable (i.e., supported with little or no market activity).

An asset's or liability's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. These valuation methodologies were applied to all of the Company's financial assets and financial liabilities carried at fair value.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality and counterparty creditworthiness, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. The Company's valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective value or reflective of future values. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Securities Available for Sale. Securities classified as available for sale are reported at fair value utilizing Level 2 Inputs. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayments speeds, credit information and the security's terms and conditions, among other things.

Impaired loans. Loans included in the following table are those which the Company has measured and recognized impairment generally based on the fair value of the loan's collateral. Fair value is generally determined based upon independent third party appraisals of the properties, or discounted cash flows based on the expected proceeds. These assets are included as Level 3 fair values, based upon the lowest level of input that is significant to the fair value measurements. The fair value consists of the loan balances less specific valuation allowances.

Other Real Estate Owned. Foreclosed properties are adjusted to fair value less estimated selling costs at the time of foreclosure in preparation for transfer from portfolio loans to other real estate owned ("OREO"), establishing a new accounting basis. The Company subsequently adjusts the fair value on the OREO utilizing Level 3 inputs on a non-recurring basis to reflect partial write-downs based on the observable market price, current appraised value of the asset or other estimates of fair value.

Derivatives - Interest Rate Swap. Derivatives are reported at fair value utilizing Level 2 Inputs. The Company obtains dealer quotations to value its interest rate swap.

## Table of Contents

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:
$\left.\begin{array}{lcccccc} & \begin{array}{c}\text { Level 1 } \\ \text { Inputs }\end{array} & \begin{array}{c}\text { Level 2 } \\ \text { Inputs }\end{array} & \begin{array}{c}\text { Level 3 } \\ \text { Inputs }\end{array} & \begin{array}{c}\text { Total Fair } \\ \text { Value }\end{array} \\ \text { June 30, 2010: } & \$- & \$ 136,081,634 & \$ & - & \$ & 136,081,634 \\ (640,963\end{array}\right)$

Certain financial assets and financial liabilities are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). Financial assets and financial liabilities measured at fair value on a non-recurring basis at June 30, 2010 and December 31, 2009 are as follows:

|  | Level 1 <br> Inputs | Level 2 <br> Inputs | Level 3 <br> Inputs | Total Fair <br> Value |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| June 30, 2010: | $\$-$ | $\$$ | - | $\$$ | $2,571,735$ | $\$$ |
| Impaired loans | - | - |  | $2,571,735$ |  |  |
| Other real estate owned |  |  |  |  |  |  |
| December 31, 2009: | $\$-$ | $\$-$ | $\$$ | $1,116,129$ | $\$$ | $1,116,129$ |
| Impaired loans | - | - | $1,362,621$ | $1,362,621$ |  |  |
| Other real estate owned | - | 133,054 | - | 133,054 |  |  |

Impaired loans measured at fair value and included in the above table, consisted of four loans having an aggregate principal balance of $\$ 2,880,940$ and specific loan loss allowances of $\$ 309,205$ at June 30, 2010 and twelve loans at December 31, 2009, having an aggregate principal balance of $\$ 1,292,910$ and specific loan loss allowances of \$176,781.

The fair value of other real estate owned was determined using appraisals, which may be discounted based on management's review and changes in market conditions.

The following is a summary of fair value versus the carrying value of all the Company's financial instruments. For the Company and the Bank, as for most financial institutions, the bulk of its assets and liabilities are considered financial instruments. Many of the financial instruments lack an available trading market as characterized by a willing buyer and willing seller engaging in an exchange transaction. Therefore, significant estimations and present value calculations were used for the purpose of this note. Changes in assumptions could significantly affect these estimates.

Estimated fair values have been determined by using the best available data and an estimation methodology suitable for each category of financial instruments as follows:

Cash and Cash Equivalents, Accrued Interest Receivable and Accrued Interest Payable (Carried at Cost). The carrying amounts reported in the balance sheet for cash and cash equivalents, accrued interest receivable and accrued interest payable approximate fair value.

Securities Held to Maturity (Carried at Amortized Cost). The fair values of securities held to maturity are determined in the same manner as for securities available for sale.

## Edgar Filing: 1ST CONSTITUTION BANCORP - Form 10-Q

## Table of Contents

Loans Held For Sale (Carried at Lower of Aggregated Cost or Fair Value). The fair values of loans held for sale are determined, when possible, using quoted secondary market prices. If no such quoted market prices exist, fair values are determined using quoted prices for similar loans, adjusted for the specific attributes of the loans.

Gross Loans Receivable (Carried at Cost). The fair values of loans, excluding impaired loans subject to specific loss reserves, are estimated using discounted cash flow analyses, using market rates at the balance sheet date that reflect the credit and interest rate-risk inherent in the loans. Projected future cash flows are calculated based upon contractual maturity or call dates, projected repayments and prepayments of principal. Generally, for variable rate loans that re-price frequently and with no significant change in credit risk, fair values are based on carrying values.

Deposit Liabilities (Carried at Cost). The fair values disclosed for demand deposits (e.g., interest and non-interest demand and savings accounts) are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts). Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered in the market on certificates to a schedule of aggregated expected monthly maturities on time deposits.

Borrowings and Subordinated Debentures (Carried at Cost). The carrying amounts of short-term borrowings approximate their fair values. The fair values of long-term FHLB advances and subordinated debentures are estimated using discounted cash flow analysis, based on quoted or estimated interest rates for new borrowings with similar credit risk characteristics, terms and remaining maturity.

The estimated fair values, and the recorded book balances, were as follows:

|  | $\begin{array}{c}\text { June } 30,2010 \\ \text { Carrying } \\ \text { Value }\end{array}$ |  | $\begin{array}{c}\text { Estimated } \\ \text { Fair Value }\end{array}$ | $\begin{array}{c}\text { December 31, 2009 } \\ \text { Carrying } \\ \text { Value }\end{array}$ | $\begin{array}{c}\text { Estimated } \\ \text { Fair Value }\end{array}$ |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Cash and cash equivalents | $\$ 15,885,995$ | $\$ 15,885,995$ | $\$ 25,854,285$ | $\$ 25,854,285$ |  |
| Securities available for sale | $136,081,634$ | $136,081,634$ | $204,118,850$ | $204,118,850$ |  |
| Securities held to maturity | $91,062,786$ | $92,210,226$ | $23,608,980$ | $24,215,530$ |  |
| Loans held for sale | $14,866,298$ | $14,866,298$ | $21,514,785$ | $21,514,785$ |  |
| Gross loans | $433,271,445$ | $432,678,000$ | $379,945,735$ | $379,617,000$ |  |
| Accrued interest receivable | $2,200,112$ | $2,200,112$ | $2,274,087$ | $2,274,087$ |  |
| Deposits | $(533,470,008)$ | $(535,086,000)$ | $(572,155,354)$ | $(573,596,000)$ |  |
| Other borrowings | $(97,100,000)$ | $(99,566,000)$ | $(22,500,000)$ | $(25,321,000)$ |  |
| Redeemable subordinated debentures | $(18,557,000)$ | $(18,557,000)$ | $(18,557,000)$ | $(18,557,000)$ |  |
| Accrued interest payable | $(1,486,171)$ | $(1,486,171$ | $)$ | $(1,757,151$ | $(1,757,151)$ |
| Interest rate swap contract | $(640,963$ | $)$ | $(640,963$ | $)$ | $(883,806$ |$)$

Loan commitments and standby letters of credit as of June 30, 2010 and December 31, 2009 are based on fees charged for similar agreements; accordingly, the estimated fair value of loan commitments and standby letters of credit is nominal.
(9) Derivative Financial Instruments

The use of derivative financial instruments creates exposure to credit risk. This credit risk relates to losses that would be recognized if the counterparts fail to perform their obligations under the contracts. As part of the Company's interest rate risk management process, the Company entered into an interest rate derivative contract effective November 27, 2007. Interest rate derivative contracts are typically used to limit the variability of the Company's net
interest income that could result due to shifts in interest rates. This derivative interest rate contract was an interest rate swap used to modify the repricing characteristics of a specific liability. At June 30, 2010, the Company's position in derivative contracts consisted entirely of this interest rate swap.

## Table of Contents

| Maturity | Hedged Liability | Notional <br> Amounts | Swap Fixed <br> Interest Rates | Swap Variable <br> Interest Rates |
| ---: | :--- | :---: | :---: | :---: |
| June 15, 2011 | Subordinated <br> Debenture | $\$ 18,000,000$ | $5.87 \%$ | 3 month LIBOR <br> plus |
|  |  |  |  | 165 basis points |

During 2006, the Company issued trust preferred securities to fund loan growth and generate liquidity. In conjunction with the trust preferred securities issuance, the Company entered into a $\$ 18.0$ million pay fixed swap designated as fair value hedges that was used to convert floating rate quarterly interest payments indexed to three month LIBOR, based on common notional amounts and maturity dates. The pay fixed swap changed the repricing characteristics of the quarterly interest payments from floating rate to fixed rate. The fair value of the pay fixed swap outstanding at June 30, 2010 and December 31, 2009 was $(\$ 640,963$ ) and ( $\$ 883,806$ ), respectively, and was recorded in other liabilities in the consolidated balance sheets, with the change in fair value, net of deferred taxes, recorded through Accumulated other comprehensive income (loss).

## Shareholders' Equity

As a result of its participation in the Troubled Asset Relief Program ("TARP") Capital Purchase Program (the "CPP") under the Emergency Economic Stabilization Act of 2008 ("EESA") through the sale by the Company of its Fixed Rate Cumulative Perpetual Preferred Stock, Series B ("Preferred Stock Series B") to the Treasury, the Company is subject to restrictions contained in the agreement between the Treasury and the Company related to the sale of the Preferred Stock Series B. These restrictions include restrictions on the repurchase of shares of common stock or other capital stock or other equity securities of any kind of the Company or any of its or its affiliates' trust preferred securities until the third anniversary of the purchase of the Preferred Stock Series B by the Treasury, with certain exceptions, without approval of the Treasury.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
The purpose of this discussion and analysis of the operating results and financial condition at June 30, 2010 is intended to help readers analyze the accompanying financial statements, notes and other supplemental information contained in this document. Results of operations for the three month and six month periods ended June 30, 2010 are not necessarily indicative of results to be attained for any other period.

This discussion and analysis should be read in conjunction with the Consolidated Financial Statements, notes and tables included elsewhere in this report and Part II, Item 7 of the Company's Form 10-K (Management's Discussion and Analysis of Financial Condition and Results of Operations) for the year ended December 31, 2009, as filed with the Securities and Exchange Commission (the "SEC") on March 26, 2010.

## General

Throughout the following sections, the "Company" refers to 1st Constitution Bancorp and, as the context requires, its wholly-owned subsidiaries, 1st Constitution Bank and 1st Constitution Capital Trust II; the "Bank" refers to 1st Constitution Bank; and "Trust II" refers to 1st Constitution Capital Trust II. Trust II is not included in the Company's consolidated financial statements as it is a variable interest entity and the Company is not the primary beneficiary. Trust II was created in May 2006 to issue trust preferred securities to assist the Company to raise additional regulatory capital.

The Company is a bank holding company registered under the Bank Holding Company Act of 1956, as amended. The Company was organized under the laws of the State of New Jersey in February 1999 for the purpose of acquiring all of the issued and outstanding stock of the Bank, a full service commercial bank which began operations in August 1989, and thereby enabling the Bank to operate within a bank holding company structure. The Company became an active bank holding company on July 1,1999 . The Bank is a wholly-owned subsidiary of the Company. Other than its ownership interest in the Bank, the Company currently conducts no other significant business activities.

19

## Table of Contents

The Bank operates twelve branches, and manages an investment portfolio through 1st Constitution Investment Company of Delaware, Inc., and 1st Constitution Investment Company of New Jersey, Inc., its subsidiaries. FCB Assets Holdings, Inc., a subsidiary of the Bank, is used by the Bank to manage and dispose of repossessed real estate.

## Forward-Looking Statements

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). The Private Securities Litigation Reform Act of 1995 provides a "safe harbor" for forward looking statements. When used in this and in future filings by the Company with the SEC, in the Company's press releases and in oral statements made with the approval of an authorized executive officer of the Company, the words or phrases "will," "will likely result," "could," "anticipates," "believes," "continues," "expects," "plans," "will continue," "is anticipated," "estimated," "project" or "outlo expressions (including confirmations by an authorized executive officer of the Company of any such expressions made by a third party with respect to the Company) are intended to identify forward-looking statements. The Company wishes to caution readers not to place undue reliance on any such forward-looking statements, each of which speak only as of the date made. Such statements are subject to certain risks and uncertainties that could cause actual results to differ materially from historical earnings and those presently anticipated or projected.

Factors that may cause actual results to differ from those results expressed or implied, include, but are not limited to, those listed under "Business", "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Company's Annual Report on Form 10-K filed with the SEC on March 26, 2010, such as the overall economy and the interest rate environment; the ability of customers to repay their obligations; the adequacy of the allowance for loan losses; competition; significant changes in accounting, tax or regulatory practices and requirements; certain interest rate risks; risks associated with investments in mortgage-backed securities; and risks associated with speculative construction lending. Although management has taken certain steps to mitigate any negative effect of the aforementioned items, significant unfavorable changes could severely impact the assumptions used and could have an adverse effect on profitability. The Company undertakes no obligation to publicly revise any forward-looking statements to reflect anticipated or unanticipated events or circumstances occurring after the date of such statements, except as required by law.

## RESULTS OF OPERATIONS

Three Months Ended June 30, 2010 Compared to the Three Months Ended June 30, 2009

## Summary

The Company realized net income of $\$ 795,559$ for the three months ended June 30, 2010, an increase of $\$ 260,949$, or $48.8 \%$, from the $\$ 534,610$ reported for the three months ended June 30,2009 . The increase is due primarily to increases in net interest income and non-interest income and to a decrease in the level of noninterest expenses for the three months ended June 30, 2010. Net income per diluted common share was $\$ 0.14$ for the three months ended June 30,2010 compared to net income per diluted common share of $\$ 0.08$ for the three months ended June 30, 2009. Net income available to common shareholders increased from $\$ 357,625$ for the three months ended June 30, 2009 to $\$ 618,575$ for the three months ended June 30, 2010 principally for the reasons indicated above. Net income available to common shareholders in the 2010 and 2009 periods reflected an aggregate of $\$ 176,984$ and $\$ 176,985$, respectively, attributable to dividends and discount accretion related to the preferred stock issued to the United States Department of the Treasury (the "Treasury"). All prior year share information has been adjusted for the effect of a 5\% stock dividend declared on December 17, 2009 and paid on February 3, 2010 to shareholders of record on January 19, 2010.

Key performance ratios improved for the three months ended June 30, 2010 due to higher net income for that period compared to the three months ended June 30, 2009. Return on average assets and return on average equity were $0.49 \%$ and $5.42 \%$ for the three months ended June 30, 2010 compared to $0.35 \%$ and $3.81 \%$, respectively, for the three months ended June 30, 2009.

## Edgar Filing: 1ST CONSTITUTION BANCORP - Form 10-Q

## Table of Contents

The Bank's results of operations depend primarily on net interest income, which is primarily affected by the market interest rate environment, the shape of the U.S. Treasury yield curve, and the difference between the yield on interest-earning assets and the rate paid on interest-bearing liabilities. Other factors that may affect the Bank's operating results are general and local economic and competitive conditions, government policies and actions of regulatory authorities. The net interest margin for the three months ended June 30, 2010 was $3.17 \%$ as compared to the $3.40 \%$ net interest margin recorded for the three months ended June 30, 2009, a reduction of 23 basis points. The Company will continue to closely monitor the mix of earning assets and funding sources to maximize net interest income during this challenging interest rate environment.

## Earnings Analysis

## Net Interest Income

Net interest income, the Company's largest and most significant component of operating income, is the difference between interest and fees earned on loans and other earning assets, and interest paid on deposits and borrowed funds. This component represented $82.8 \%$ of the Company's net revenues for the three month period ended June 30, 2010 and $82.6 \%$ of net revenues for the three-month period ended June 30, 2009. Net interest income also depends upon the relative amount of average interest-earning assets, average interest-bearing liabilities, and the interest rate earned or paid on them, respectively.

The Company's net interest income increased by $\$ 329,191$, or $7.3 \%$, to $\$ 4,848,391$ for the three months ended June 30 , 2010 from the $\$ 4,519,200$ reported for the three months ended June 30, 2009. The increase in net interest income was principally attributable to increased loan volume, which was more than sufficient to offset the reduced interest spread and margin.

Average interest earning assets increased by $\$ 79,240,831$, or $14.7 \%$, to $\$ 620,128,601$ for the quarter ended June 30 , 2010 from $\$ 540,887,770$ for the quarter ended June 30, 2009. Overall, the yield on interest earning assets, on a tax-equivalent basis, decreased 107 basis points to $4.60 \%$ for the quarter ended June 30, 2010 when compared to $5.67 \%$ for the quarter ended June 30, 2009.

Average interest bearing liabilities increased by $\$ 39,217,337$, or $8.5 \%$, to $\$ 499,709,691$ for the quarter ended June 30 , 2010 from $\$ 460,492,354$ for the quarter ended June 30, 2009. Overall, the cost of total interest bearing liabilities decreased 90 basis points to $1.78 \%$ for the three months ended June 30,2010 compared to $2.68 \%$ for the three months ended June 30, 2009.

The net interest margin (on a tax-equivalent basis), which is net interest income divided by average interest earning assets, was $3.17 \%$ for the three months ended June 30, 2010 compared to $3.40 \%$ the three months ended June 30, 2009.

## Provision for Loan Losses

Management considers a complete review of the following specific factors in determining the provisions for loan losses: historical losses by loan category, non-accrual loans, problem loans as identified through internal classifications, collateral values, and the growth and size of the loan portfolio. In addition to these factors, management takes into consideration current economic conditions and local real estate market conditions. Using this evaluation process, the Company's provision for loan losses was $\$ 550,000$ for the three months ended June 30, 2010 and $\$ 325,000$ for the three months ended June 30, 2009. While the risk profile of the loan portfolio was reduced by a change in its composition via a $\$ 10,356,396$ reduction in higher risk construction loans, non-performing loans increased by $\$ 3,000,304$. This change in the overall risk profile necessitated the increased provision.

Non-Interest Income
Total non-interest income for the three months ended June 30, 2010 was $\$ 1,007,020$, an increase of $\$ 54,096$, or $5.7 \%$, over non-interest income of $\$ 952,924$ for the three months ended June 30, 2009.

21

## Edgar Filing: 1ST CONSTITUTION BANCORP - Form 10-Q

## Table of Contents

Service charges on deposit accounts represents a significant source of non-interest income. Service charges on deposit accounts revenues decreased by $\$ 27,563$, or $12.7 \%$, to $\$ 188,672$ for the three months ended June 30, 2010 from $\$ 216,235$ for the three months ended June 30, 2009. This decrease primarily resulted from a lower volume of uncollected funds and overdraft fees collected on deposit accounts during the second quarter of 2010 compared to the second quarter of 2009 .

Gain on sales of loans increased by $\$ 51,584$, or $15.1 \%$, to $\$ 392,577$ for the three months ended June 30, 2010 when compared to $\$ 340,993$ for the three months ended June 30, 2009. The Bank sells both residential mortgage loans and SBA loans in the secondary market. The volume of mortgage loan sales decreased for the second quarter of 2010 compared to the second quarter of 2009; however, the margin earned as a result of these sales in the second quarter of 2010 increased from that of the second quarter of 2009, thus resulting in the $15.1 \%$ increase in gains for the second quarter of 2010 compared to the prior year period. Management anticipates mortgage loan sales volume to increase moderately during the remainder of 2010, as lower market interest rates generally result in an increase in loan refinance activity.

Non-interest income also includes income from bank-owned life insurance ("BOLI"), which amounted to $\$ 105,056$ for the three months ended June 30, 2010 compared to $\$ 102,305$ for the three months ended June 30, 2009. The Bank purchased tax-free BOLI assets to partially offset the cost of employee benefit plans and reduced the Company's overall effective tax rate.

The Bank also generates non-interest income from a variety of fee-based services. These include safe deposit box rental, wire transfer service fees and Automated Teller Machine fees for non-Bank customers. Increased customer demand for these services contributed to the Other income component of non-interest income amounting to $\$ 320,715$ for the three months ended June 30, 2010, compared to $\$ 293,391$ for the three months ended June 30, 2009.

## Non-Interest Expense

Non-interest expenses decreased by $\$ 522,599$, or $10.9 \%$, to $\$ 4,279,090$ for the three months ended June 30, 2010 from $\$ 4,801,689$ for the three months ended June 30, 2009. The following table presents the major components of non-interest expenses for the three months ended June 30, 2010 and 2009.

| Non-interest Expenses | Three months ended June 30, |  |  |
| :--- | :---: | :---: | :---: |
|  | 2010 |  | 2009 |
| Salaries and employee benefits | $\$$ | $2,417,234$ | $\$$ |
| Occupancy expenses | 452,841 | $2,294,066$ |  |
| Data processing services | 272,391 | 443,007 |  |
| Equipment expense | 167,895 | 276,197 |  |
| Marketing | 42,672 | 167,358 |  |
| Regulatory, professional and other fees | 268,557 | 42,773 |  |
| Office expense | 180,189 | 333,547 |  |
| FDIC insurance expense | 247,568 | 142,999 |  |
| Directors' fees | 27,000 | 704,025 |  |
| Other real estate owned expenses | 28,447 | 25,000 |  |
| All other expenses | $\$$ | 474,297 | 50,495 |
|  |  |  | 322,222 |

## Table of Contents

Salaries and employee benefits, which represent the largest portion of non-interest expenses, increased by $\$ 123,168$, or $5.4 \%$, to $\$ 2,417,234$ for the three months ended June 30,2010 compared to $\$ 2,294,066$ for the three months ended June 30, 2009. The increase in salaries and employee benefits for the three months ended June 30, 2010 was a result of an increase in the number of employees, regular merit increases and increased health care costs. Staffing levels overall increased to 130 full-time equivalent employees at June 30, 2010 as compared to 119 full-time equivalent employees at June 30, 2009.

Regulatory, professional and other fees decreased by $\$ 64,990$, or $19.5 \%$, to $\$ 268,557$ for the three months ended June 30 , 2010 compared to $\$ 333,547$ for the three months ended June 30 , 2009. During the second quarter of 2009 , the Company incurred additional legal fees primarily in connection with the recovery of non-performing asset balances. The Bank also incurred additional fees in connection with examinations performed by independent consultants during the second quarter of 2009 to assess the effectiveness of internal controls as required by the Sarbanes-Oxley Act.

The cost of FDIC deposit insurance has decreased from $\$ 704,025$ for the three months ended June 30, 2009 to $\$ 247,568$ for the three months ended June 30, 2010. During the second quarter of 2009, the FDIC announced a special assessment on all insured financial institutions to replenish the deposit insurance fund. Included in the 2009 expense was a one-time $\$ 272,518$ accrual for the special assessment.

All other expenses decreased by $\$ 147,925$, or $45.9 \%$, to $\$ 174,297$ for the three months ended June 30, 2010 compared to $\$ 322,222$ for the three months ended June 30, 2009. Current year decreases occurred in correspondent bank fees, maintenance agreements and ATM operating expenses. All other expenses are comprised of a variety of operating expenses and fees as well as expenses associated with lending activities.

An important financial services industry productivity measure is the efficiency ratio. The efficiency ratio is calculated by dividing total operating expenses by net interest income plus non-interest income. An increase in the efficiency ratio indicates that more resources are being utilized to generate the same or greater volume of income, while a decrease would indicate a more efficient allocation of resources. The Company's efficiency ratio decreased to $73.1 \%$ for the three months ended June 30, 2010, compared to $87.7 \%$ for the three months ended June 30, 2009. The decrease in the efficiency ratio is due to the above-noted decreases in non-interest expenses as well as increased net interest and non-interest income.

Income Taxes
Income tax expense was $\$ 230,762$ for the three months ended June 30, 2010 compared to a tax benefit of $\$ 189,175$ for the three months ended June 30, 2009. The increase was primarily due to the reversal of a prior year over-accrual of income taxes at June 30, 2009 that coincided with the completion of an Internal Revenue Service examination of the Company's 2007 and 2006 Federal income tax returns.

Pre-tax income increased to $\$ 1,026,321$ for the three months ended June 30, 2010 from $\$ 345,435$ for the three months ended June 30, 2009.

During June 2009, the Internal Revenue Service completed an examination of the Company's 2007 and 2006 Federal tax returns and issued its Revenue Agent Report on June 30, 2009. The Company had deferred the annual process of adjusting the recorded Federal and State liability balances pending the completion of the examination, which began in September 2008. The examination adjustments were included in this annual process of adjusting recorded liabilities with balances per the tax returns and resulted in over-accrued Federal and State liabilities being reversed via a current period credit to income tax expense during the second quarter of 2009.

Six Months Ended June 30, 2010 Compared to the Six Months Ended June 30, 2009

## Summary

The Company realized net income of $\$ 1,494,817$ for the six months ended June 30, 2010, an increase of $47.8 \%$ from the $\$ 1,011,300$ reported for the six months ended June 30,2009 . The increase is due primarily to increases in net interest income and noninterest income and to a decrease in the level of noninterest expenses for the six months ended June 30, 2010 compared to the same period in 2009. Net income available to common shareholders for the six months ended June 30, 2010 increased to $\$ 1,140,849$ from $\$ 645,665$ for the six months ended June 30, 2009 principally for the reasons indicated above. Net income available to common shareholders for the six months ended June 30, 2010 and 2009 reflected an aggregate of $\$ 353,968$ and $\$ 365,635$, respectively, attributable to dividends and discount accretion related to the preferred stock issued to the Treasury.

## Table of Contents

Diluted net income per common share was $\$ 0.25$ for the six months ended June 30, 2010 compared to diluted net income per common share of $\$ 0.15$ for the six months ended June 30, 2009. All prior year share information has been adjusted for the effect of a 5\% stock dividend declared on December 17, 2009, and paid on February 3, 2010 to shareholders of record on January 19, 2010.

Key performance ratios improved for the six months ended June 30, 2010 as compared to the six months ended June 30,2009 due to higher net income for the 2010 period. Return on average assets and return on average equity were $0.46 \%$ and $5.18 \%$ for the six months ended June 30,2010 compared to $0.35 \%$ and $3.65 \%$, respectively, for the six months ended June 30, 2009.

The Bank's results of operations depend primarily on net interest income, which is primarily affected by the market interest rate environment, the shape of the U.S. Treasury yield curve, and the difference between the yield on interest-earning assets and the rate paid on interest-bearing liabilities. Other factors that may affect the Bank's operating results are general and local economic and competitive conditions, government policies and actions of regulatory authorities. The net interest margin for the six months ended June 30, 2010 was $3.05 \%$ as compared to the $3.34 \%$ net interest margin recorded for the six months ended June 30, 2009, a reduction of 29 basis points. The Company will continue to closely monitor the mix of earning assets and funding sources to maximize net interest income during this challenging interest rate environment.

## Earnings Analysis

## Net Interest Income

Net interest income, the Company's largest and most significant component of operating income, is the difference between interest and fees earned on loans and other earning assets, and interest paid on deposits and borrowed funds. This component represented $82.6 \%$ of the Company's net revenues for the six month period ended June 30, 2010 and $82.9 \%$ of net revenues for the six-month period ended June 30, 2009. Net interest income also depends upon the relative amount of interest-earning assets, interest-bearing liabilities, and the interest rate earned or paid on them.

The following table sets forth the Company's consolidated average balances of assets, liabilities and shareholders' equity as well as interest income and expense on related items, and the Company's average yield or rate for the six month periods ended June 30, 2010 and 2009, respectively. The average rates are derived by dividing interest income and expense by the average balance of assets and liabilities, respectively.

| :--- | :--- | :--- | :--- | :--- |
| Other Liabilities | $7,745,825$ | $5,537,806$ |  |  |
| Total Liabilities | $594,071,372$ | $532,296,010$ |  |  |
| Shareholders' Equity | $58,240,307$ | $55,815,773$ |  |  |
| Total Liabilities and Shareholders' <br> Equity | $\$ 652,311,679$ | $\$ 588,111,783$ |  |  |
| Net Interest Margin |  | $\$ 9,390,351$ | $3.05 \%$ |  |

The Company's net interest income increased by $\$ 568,359$, or $6.5 \%$, to $\$ 9,287,548$ for the six months ended June 30 , 2010 from the $\$ 8,719,189$ reported for the six months ended June 30, 2009. The increase in net interest income was attributable to increased loan volume, which was more than sufficient to offset the reduced interest spread and margin.

Average interest earning assets increased by $\$ 86,571,954$, or $16.2 \%$, to $\$ 620,443,653$ for the six month period ended June 30, 2010 from $\$ 533,871,699$ for the six month period ended June 30, 2009. The average investment securities portfolio increased by $\$ 99,527,749$, or $83.3 \%$, to $\$ 220,698,429$ for the six month period ended June 30,2010 compared to $\$ 121,170,680$ for the six month period ended June 30, 2009, as funds were invested during the 2010 period in low risk U.S. Treasury securities and U.S. Government sponsored agency bonds rather than being invested in the relatively higher risk loan portfolio. The average loan portfolio decreased by $\$ 39,548,622$, or $9.6 \%$, to $\$ 371,221,568$ for the six month period ended June 30,2010 compared to $\$ 410,770,190$ for the six month period ended June 30, 2009. The overall risk profile of the loan portfolio was reduced by a change in its composition via a reduction in average construction loans of $\$ 19,230,561$, or $20.8 \%$, to $\$ 73,404,258$ for the six month period ended June 30, 2010 compared to $\$ 92,634,819$ for the six month period ended June 30, 2009, as the current adverse economic conditions have resulted in depreciation of collateral values securing these loans. Overall, the yield on interest earning assets, on a tax-equivalent basis, decreased 115 basis points to $4.56 \%$ for the six month period ended June 30, 2010 when compared to $5.71 \%$ for the six month period ended June 30, 2009.

## Edgar Filing: 1ST CONSTITUTION BANCORP - Form 10-Q

## Table of Contents

Average interest bearing liabilities increased by $\$ 57,286,043$, or $12.8 \%$, to $\$ 505,109,520$ for the six month period ended June 30, 2010 from $\$ 447,823,477$ for the six month period ended June 30, 2009. Overall, the cost of total interest bearing liabilities decreased 98 basis points to $1.85 \%$ for the six months ended June 30, 2010 compared to $2.83 \%$ for the six months ended June 30, 2009.

The net interest margin (on a tax-equivalent basis), which is net interest income divided by average interest earning assets, was $3.05 \%$ for the six months ended June 30, 2010 compared to $3.34 \%$ the six months ended June 30, 2009.

## Provision for Loan Losses

Management considers a complete review of the following specific factors in determining the provisions for loan losses: historical losses by loan category, non-accrual loans, problem loans as identified through internal classifications, collateral values, and the growth and size of the loan portfolio. In addition to these factors, management takes into consideration current economic conditions and local real estate market conditions. Using this evaluation process, the Company's provision for loan losses was $\$ 850,000$ for the six months ended June 30, 2010 and $\$ 788,000$ for the six months ended June 30, 2009. While the risk profile of the loan portfolio was reduced by a change in its composition via a $\$ 10,356,396$ reduction in higher risk construction loans, non-performing loans increased by $\$ 3,000,304$. This change in the overall risk profile necessitated the increased provision.

## Non-Interest Income

Total non-interest income for the six months ended June 30, 2010 was $\$ 1,955,866$, an increase of $\$ 155,890$, or $8.7 \%$, over non-interest income of $\$ 1,799,976$ for the six months ended June 30, 2009.

Service charges on deposit accounts represents a significant source of non-interest income. Service charges on deposit accounts revenues decreased by $\$ 89,726$, or $19.7 \%$, to $\$ 365,028$ for the six months ended June 30,2010 from the $\$ 454,754$ for the six months ended June 30, 2009. This decrease was the result of a lower volume of uncollected funds and overdraft fees collected on deposit accounts during the first six months of 2010 compared to the first six months of 2009 .

Gain on sales of loans increased by $\$ 99,935$, or $16.3 \%$, to $\$ 713,121$ for the six months ended June 30,2010 when compared to $\$ 613,186$ for the six months ended June 30, 2009. The Bank sells both residential mortgage loans and SBA loans in the secondary market. The volume of mortgage loan sales decreased for the six months ended June 30, 2010 compared to the six months ended June 30, 2009; however, the margin earned as a result of these sales during 2010 increased from that earned during 2009 thus resulting in the $16.3 \%$ current year increase in gains. Management anticipates mortgage loan sales volume to increase moderately during the remainder of 2010 as the lower market interest rates generally results in an increase in loan refinance activity.

Non-interest income also includes income from bank-owned life insurance ("BOLI"), which amounted to $\$ 201,695$ for the six months ended June 30, 2010 compared to $\$ 193,327$ for the six months ended June 30, 2009. The Bank purchased tax-free BOLI assets to partially offset the cost of employee benefit plans and reduced the Company's overall effective tax rate.

## Edgar Filing: 1ST CONSTITUTION BANCORP - Form 10-Q

## Table of Contents

The Bank also generates non-interest income from a variety of fee-based services. These include safe deposit box rental, wire transfer service fees and Automated Teller Machine fees for non-Bank customers. Increased customer demand for these services contributed to the other income component of non-interest income amounting to $\$ 676,022$ for the six months ended June 30, 2010, compared to $\$ 538,709$ for the six months ended June 30, 2009.

## Non-Interest Expense

Non-interest expenses decreased by $\$ 409,266$, or $4.6 \%$, to $\$ 8,413,036$ for the six months ended June 30, 2010 from $\$ 8,822,302$ for the six months ended June 30, 2009. The following table presents the major components of non-interest expenses for the six months ended June 30, 2010 and 2009.

| Non-interest Expenses | Six months ended June 30, |  |  |
| :--- | :--- | :--- | :--- |
|  | 2010 | 2009 |  |
| Salaries and employee benefits | $\$$ | $4,793,934$ | $\$$ |
| Occupancy expenses | 898,765 | $4,521,395$ |  |
| Data processing services | 531,198 | 595,672 |  |
| Equipment expense | 319,881 | 535,880 |  |
| Marketing | 66,123 | 322,438 |  |
| Regulatory, professional and other fees | 441,141 | 82,214 |  |
| Office expense | 349,782 | 646,603 |  |
| FDIC insurance expense | 495,251 | 271,036 |  |
| Directors' fees | 53,500 | 803,783 |  |
| Other real estate owned expenses | 46,237 | 57,000 |  |
| All other expenses | 417,224 | 100,848 |  |
|  | $\$$ | $8,413,036$ | $\$$ |
|  |  | 885,432 |  |

Salaries and employee benefits, which represent the largest portion of non-interest expenses, increased by $\$ 272,539$, or $6.0 \%$, to $\$ 4,793,934$ for the six months ended June 30, 2010 compared to $\$ 4,521,395$ for the six months ended June 30, 2009. The increase in salaries and employee benefits for the six months ended June 30, 2010 was a result of an increase in the number of employees, regular merit increases and increased health care costs. Staffing levels overall increased to 130 full-time equivalent employees at June 30, 2010 as compared to 119 full-time equivalent employees at June 30, 2009.

Regulatory, professional and other fees decreased by $\$ 205,462$, or $37.3 \%$, to $\$ 441,141$ for the six months ended June 30,2010 compared to $\$ 646,603$ for the six months ended June 30,2009 . During the first six months of 2009 , the Company incurred additional legal fees primarily in connection with the recovery of non-performing asset balances. The Bank also incurred additional fees in connection with examinations performed by independent consultants during the second quarter of 2009 to assess the effectiveness of internal controls as required by the Sarbanes-Oxley Act.

Office expenses increased by $\$ 78,746$, or $29.1 \%$, to $\$ 349,782$ for the six months ended June 30, 2010 compared to $\$ 271,036$ for the six months ended June 30, 2009. The increase in expense was primarily attributable to increased costs in enhancing the Bank's telephone and data transmission systems.

Other real estate owned expenses decreased by $\$ 54,611$, or $54.2 \%$ to $\$ 46,237$ for the six months ended June 30,2010 compared to $\$ 100,848$ for the six months ended June 30,2009 as the Company incurred less maintenance costs due to the fewer number of properties held as other real estate during the first six months of 2010 as compared to the first six months of 2009.

The cost of FDIC deposit insurance has decreased to $\$ 495,251$ for the six months ended June 30, 2010 from $\$ 803,783$ for the six months ended June 30, 2009. During the second quarter of 2009, the FDIC announced a special assessment on all insured financial institutions to replenish the deposit insurance fund. Included in the expense for the 2009 period was a one-time $\$ 272,518$ accrual for this special assessment.

## Table of Contents

All other expenses decreased by $\$ 168,209$, or $28.7 \%$, to $\$ 417,224$ for the six months ended June 30,2010 compared to $\$ 585,433$ for the six months ended June 30, 2009. Current year decreases occurred in correspondent bank fees, maintenance agreements and ATM operating expenses. All other expenses are comprised of a variety of operating expenses and fees as well as expenses associated with lending activities.

An important financial services industry productivity measure is the efficiency ratio. The efficiency ratio is calculated by dividing total operating expenses by net interest income plus non-interest income. An increase in the efficiency ratio indicates that more resources are being utilized to generate the same or greater volume of income, while a decrease would indicate a more efficient allocation of resources. The Company's efficiency ratio decreased to $74.8 \%$ for the six months ended June 30, 2010, compared to $83.9 \%$ for the six months ended June 30, 2009.

Income Taxes
The Company had income tax expense of $\$ 485,561$ for the six months ended June 30, 2010 compared to an income tax benefit of $\$ 102,437$ for the six months ended June 30, 2009. The increase in the income tax expense for the 2010 period was primarily due to the reversal of an over-accrual of income taxes at June 30, 2009 that coincided with the completion of an Internal Revenue Service examination of the Company's 2007 and 2006 Federal income tax returns.

Pre-tax income increased to $\$ 1,980,378$ or the six months ended June 30,2010 from $\$ 908,863$ for the six months ended June 30, 2009.

During June 2009, the Internal Revenue Service completed an examination of the Company's 2007 and 2006 Federal tax returns and issued its Revenue Agent Report on June 30, 2009. The Company had deferred the annual process of adjusting the recorded Federal and State liability balances pending the completion of the examination which began in September 2008. The examination adjustments were included in this annual process of adjusting recorded liabilities with balances per the tax returns and resulted in over-accrued Federal and State liabilities being reversed via a current period credit to income tax expense during the second quarter of 2009.

## Financial Condition

June 30, 2010 Compared with December 31, 2009
Total consolidated assets at June 30,2010 were $\$ 714,797,554$, representing an increase of $\$ 36,801,074$, or $5.4 \%$, from total consolidated assets of $\$ 677,996,480$ at December 31, 2009. The increase in assets was primarily attributable to increases in our loan portfolio during the first six months of 2010. Although the Bank's non-interest bearing demand deposits increased by $\$ 5,477,264$, or $6.6 \%$, during the first six months of 2010 , the strategy to guard against the potential ill-effects of rising market rates resulted in the managed outflow of higher rate savings accounts and certificate of deposit accounts rather than the use of cash inflows to invest in long-term investment securities.

## Cash and Cash Equivalents

Cash and cash equivalents at June 30, 2010 totaled $\$ 15,885,995$ compared to $\$ 25,854,285$ at December 31, 2009. Cash and cash equivalents at June 30, 2010 consisted of cash and due from banks of $\$ 15,874,607$ and Federal funds sold/short term investments of $\$ 11,388$. The corresponding balances at December 31, 2009 were $\$ 25,842,901$ and $\$ 11,384$, respectively. The decrease was due primarily to timing of cash flows related to the Bank's business activities. To the extent that the Bank did not utilize the funds for loan originations or securities purchases, the cash inflows accumulated in cash and cash equivalents.

Loans Held for Sale

Loans held for sale at June 30, 2010 amounted to $\$ 14,866,298$ compared to $\$ 21,514,785$ at December 31, 2009. The primary cause for this decrease was a lower volume of mortgage loan refinance activity during the first six months of 2010 compared with the level of activity during the first six months of 2009. The amount of loans originated for sale was $\$ 55,441,982$ for the first six months of 2010 compared with $\$ 85,249,642$ for the first six months of 2009.

# Edgar Filing: 1ST CONSTITUTION BANCORP - Form 10-Q 

## Table of Contents

Investment Securities
Investment securities represented $31.8 \%$ of total assets at June 30, 2010 and $33.6 \%$ at December 31, 2009. Total investment securities decreased $\$ 583,410$, or $0.3 \%$, to $\$ 227,144,420$ at June 30, 2010 from $\$ 227,727,830$ at December 31, 2009. Proceeds from investment calls and principal repayments totaling $\$ 103,797,238$ during the six months ended June 30, 2010, which exceeded purchases totaling $\$ 102,261,864$ during the period.

Securities available for sale are investments that may be sold in response to changing market and interest rate conditions or for other business purposes. Activity in this portfolio is undertaken primarily to manage liquidity and interest rate risk and to take advantage of market conditions that create more economically attractive returns. At June 30,2010 , securities available for sale totaled $\$ 136,081,634$, which is a decrease of $\$ 68,037,216$, or $33.3 \%$, from securities available for sale totaling $\$ 204,118,850$ at December 31, 2009.

At June 30, 2010, the securities available for sale portfolio had net unrealized gains of $\$ 1,656,775$, compared to net unrealized gains of $\$ 255,743$ at December 31, 2009. These unrealized gains are reflected, net of tax, in shareholders' equity as a component of Accumulated other comprehensive income (loss).

Securities held to maturity, which are carried at amortized historical cost, are investments for which there is the positive intent and ability to hold to maturity. At June 30, 2010, securities held to maturity were $\$ 91,062,786$, an increase of $\$ 67,453,806$, or $285.7 \%$, from $\$ 23,608,980$ at December 31,2009 . The fair value of the held to maturity portfolio at June 30, 2010 was $\$ 92,210,226$.

Due to the continued uncertain economic environment that includes historically low levels of market interest rates, proceeds from maturities and prepayments of securities during the first six months of 2010 were reinvested primarily in the low risk U.S. Treasury securities and obligations of U.S. Government sponsored corporations and agencies component of the Bank's held to Maturity portfolio. It is management's intention to hold these short-term securities to their maturity and have the proceeds available for reinvestment in a more favorable interest rate environment.

## Loans

The loan portfolio, which represents our largest asset, is a significant source of both interest and fee income. Elements of the loan portfolio are subject to differing levels of credit and interest rate risk. The Bank's primary lending focus continues to be mortgage warehouse lines, construction loans, commercial loans, owner-occupied commercial mortgage loans and tenanted commercial real estate loans.

The following table sets forth the classification of loans by major category at June 30, 2010 and December 31, 2009.
Loan Portfolio Composition

| Component | Amount | of total |  |  | Amount | of total |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  | $\$$ | $69,448,882$ | 16 | $\%$ | $\$$ | $79,805,278$ | 21 |
| Construction loans | $11,518,231$ | 3 | $\%$ |  | $10,253,895$ | 3 | $\%$ |
| Residential real estate loans | $57,439,401$ | 13 | $\%$ | $57,925,392$ | 15 | $\%$ |  |
| Commercial business | $93,868,399$ | 22 | $\%$ |  | $96,306,097$ | 25 | $\%$ |
| Commercial real estate | $186,052,529$ | 43 | $\%$ | $119,382,078$ | 32 | $\%$ |  |
| Mortgage warehouse lines | $14,236,595$ | 3 | $\%$ | $15,554,027$ | 4 | $\%$ |  |
| Loans to individuals | 497,763 | 0 | $\%$ | 489,809 | 0 | $\%$ |  |
| Deferred loan fees and costs | 209,645 | 0 | $\%$ | 229,159 | 0 | $\%$ |  |
| All other loans | $\$$ | $433,271,445$ | 100 | $\%$ | $\$$ | $379,945,735$ | 100 |

The loan portfolio increased by $\$ 53,325,710$, or $14.0 \%$, to $\$ 433,271,445$ at June 30,2010 , compared to $\$ 379,945,735$ at December 31, 2009. The construction loan portfolio decreased by $\$ 10,356,396$, or $13.0 \%$, to $\$ 69,448,882$ at June 30, 2010 compared to $\$ 79,805,278$ at December 31, 2009. This decrease at June 30, 2010 compared to December 31, 2009 was principally the result of the current uncertain New Jersey economic conditions and management's actions to allow the higher risk construction loan portfolio to run off.

## Edgar Filing: 1ST CONSTITUTION BANCORP - Form 10-Q

## Table of Contents

The Bank's Mortgage Warehouse Funding Group offers a revolving line of credit that is available to licensed mortgage banking companies (the "Warehouse Line of Credit") and that we believe has been successful from inception in 2008. The Warehouse Line of Credit is used by mortgage bankers to originate one-to-four family residential mortgage loans that are pre-sold to the secondary mortgage market, which includes state and national banks, national mortgage banking firms, insurance companies and government-sponsored enterprises, including the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation and others. On average, an advance under the Warehouse Line of Credit remains outstanding for a period of less than 30 days, with repayment coming directly from the sale of the loan into the secondary mortgage market. Interest (the spread between our borrowing cost and the rate charged to the client) and a transaction fee are collected by the Bank at the time of repayment. Additionally, customers of the Warehouse Line of Credit are required to maintain deposit relationships with the Bank that, on average, represent $10 \%$ to $15 \%$ of the loan balances. The balance of outstanding Mortgage Warehouse Line of Credit advances increased to $\$ 186,052,529$ at June 30,2010 , an increase of $\$ 66,670,451$, or $55.8 \%$, compared to $\$ 119,382,078$ at December 31, 2009. During the first six months of 2010, the number of active mortgage banking customers increased from 35 to 39 plus average usage across all active lines increased due to purchase and refinance activity attributed to historically low mortgage interest rates.

The ability of the Company to enter into larger loan relationships and management's philosophy of relationship banking are key factors in the Company's strategy for loan growth. The ultimate collectability of the loan portfolio and recovery of the carrying amount of real estate are subject to changes in the Company's market region's economic environment and real estate market.

## Non-Performing Assets

Non-performing assets consist of non-performing loans and other real estate owned. Non-performing loans are composed of (1) loans on a non-accrual basis, (2) loans which are contractually past due 90 days or more as to interest and principal payments but have not been classified as non-accrual, and (3) loans whose terms have been restructured to provide a reduction or deferral of interest on principal because of a deterioration in the financial position of the borrower.

The Bank's policy with regard to non-accrual loans is that generally, loans are placed on a non-accrual status when they are 90 days past due, unless these loans are well secured and in the process of collection or, regardless of the past due status of the loan, when management determines that the complete recovery of principal or interest is in doubt. Consumer loans are generally charged off after they become 120 days past due. Subsequent payments on loans in non-accrual status are credited to income only if collection of principal is not in doubt.

Non-performing loans increased by $\$ 3,000,304$ to $\$ 7,307,830$ at June 30, 2010 from $\$ 4,307,526$ at December 31, 2009, as the disruptions in the financial system and the real estate market during the past two years have negatively affected certain of the Bank's construction borrowers. The major segments of non-accrual loans consist of land designated for residential development where the required approvals to begin construction have been received, commercial loans which are in the process of collection and residential real estate which is either in foreclosure or under contract to close after June 30, 2010. The table below sets forth non-performing assets and risk elements in the Bank's portfolio for the periods indicated.

As the table demonstrates, non-performing loans to total loans increased to $1.69 \%$ at June 30, 2010 from $1.13 \%$ at December 31, 2009. Loan quality is still considered to be sound. This was accomplished through quality loan underwriting, a proactive approach to loan monitoring and aggressive workout strategies.

## Table of Contents

| Non-Performing Assets and Loans | June 30, <br> 2010 | December 31, <br> 2009 |
| :--- | :---: | :---: |
| Non-Performing loans: | $\$ 4,488$ | $\$ 145,898$ |
| Loans 90 days or more past due and still accruing | $7,303,342$ | $4,161,628$ |
| Non-accrual loans | $7,307,830$ | $4,307,526$ |
| Total non-performing loans | $1,713,502$ | $1,362,621$ |
| Other real estate owned | $\$ 9,021,332$ | $\$ 5,670,147$ |
| Total non-performing assets | $1.69 \%$ | $1.13 \%$ |
| Non-performing loans to total loans | $1.26 \%$ | $0.84 \%$ |
| Non-performing assets to total assets |  |  |

Non-performing assets increased by $\$ 3,351,185$ to $\$ 9,021,332$ at June 30, 2010 from $\$ 5,670,147$ at December 31, 2009. Other real estate owned increased by $\$ 350,881$ to $\$ 1,713,502$ at June 30, 2010 from $\$ 1,362,621$ at December 31, 2009. The Bank continues to complete the remaining units of an 18 -unit condominium project for which it has, as of June 30, 2010, commitments from individual buyers to purchase.

Non-performing assets represented $1.26 \%$ of total assets at June 30, 2010 and $0.84 \%$ at December 31, 2009.
The Bank had no loans classified as restructured loans at June 30, 2010 or December 31, 2009.
Management takes a proactive approach in addressing delinquent loans. The Company's President meets weekly with all loan officers to review the status of credits past-due ten days or more. An action plan is discussed for delinquent loans to determine the steps necessary to induce the borrower to cure the delinquency and restore the loan to a current status. Also, delinquency notices are system generated when loans are five days past-due and again at 15 days past-due.

In most cases, the Company's collateral is real estate and when the collateral is foreclosed upon, the real estate is carried at the lower of fair market value less the estimated selling costs or the initially recorded amount. The amount, if any, by which the recorded amount of the loan exceeds the fair market value of the collateral is a loss which is charged to the allowance for loan losses at the time of foreclosure or repossession. Resolution of a past-due loan can be delayed if the borrower files a bankruptcy petition because a collection action cannot be continued unless the Company first obtains relief from the automatic stay provided by the bankruptcy code.

## Allowance for Loan Losses and Related Provision

The allowance for loan losses is maintained at a level sufficient to absorb estimated credit losses in the loan portfolio as of the date of the financial statements. The allowance for loan losses is a valuation reserve available for losses incurred or inherent in the loan portfolio and other extensions of credit. The determination of the adequacy of the allowance for loan losses is a critical accounting policy of the Company.

The Company's primary lending emphasis is the origination of commercial and commercial real estate loans. Based on the composition of the loan portfolio, the inherent primary risks are deteriorating credit quality, a decline in the economy, and a decline in New Jersey real estate market values. Any one or a combination of these events may adversely affect the loan portfolio and may result in increased delinquencies, loan losses and increased future provision levels.

All, or part, of the principal balance of commercial and commercial real estate loans and construction loans are charged off to the allowance as soon as it is determined that the repayment of all, or part, of the principal balance is highly unlikely. Consumer loans are generally charged off no later than 120 days past due on a contractual basis, earlier in the event of bankruptcy, or if there is an amount deemed uncollectible. Because all identified losses are immediately charged off, no portion of the allowance for loan losses is restricted to any individual loan or groups of loans, and the entire allowance is available to absorb any and all loan losses.

## Edgar Filing: 1ST CONSTITUTION BANCORP - Form 10-Q

## Table of Contents

Management reviews the adequacy of the allowance on at least a quarterly basis to ensure that the provision for loan losses has been charged against earnings in an amount necessary to maintain the allowance at a level that is adequate based on management's assessment of probable estimated losses. The Company's methodology for assessing the adequacy of the allowance for loan losses consists of several key elements. These elements may include a specific reserve for doubtful or high risk loans, an allocated reserve, and an unallocated portion.

The Company consistently applies the following comprehensive methodology. During the quarterly review of the allowance for loan losses, the Company considers a variety of factors that include:

- General economic conditions.
- Trends in charge-offs.
- Trends and levels of delinquent loans.
- Trends and levels of non-performing loans, including loans over 90 days delinquent.
- Trends in volume and terms of loans.
- Levels of allowance for specific classified loans.
- Credit concentrations.

A specific reserve for high risk loans is established for commercial loans, commercial real estate loans, and construction loans which have been identified by management as being high risk or impaired loans. A high risk or impaired loan is assigned a doubtful risk rating grade because the loan has not performed according to payment terms and there is reason to believe that repayment of the loan principal in whole, or in part, is unlikely. The specific portion of the allowance is the total amount of potential unconfirmed losses for such individual doubtful loans. To assist in determining the fair value of loan collateral, the Company often utilizes independent third party qualified appraisal firms which, in turn, employ their own criteria and assumptions that may include occupancy rates, rental rates, and property expenses, among others.

The second category of reserves consists of the allocated portion of the allowance. The allocated portion of the allowance is determined by taking pools of loans outstanding that have similar characteristics and applying historical loss experience for each pool. This estimate represents the potential unconfirmed losses within the portfolio. Individual loan pools are created for commercial and commercial real estate loans, construction loans, and the various types of loans to individuals. The historical estimation for each loan pool is then adjusted to account for current conditions, current loan portfolio performance, loan policy or management changes, or any other factor which may cause future losses to deviate from historical levels.

During the quarterly reviews, the Company may determine that an unallocated allowance is appropriate. The unallocated allowance is used to cover any factors or conditions which may cause a potential loan loss but are not specifically identifiable. It is prudent to maintain an unallocated portion of the allowance because no matter how detailed an analysis of potential loan losses is performed, these estimates inherently lack precision. Management must make estimates using assumptions and information which is often subjective and changing rapidly. At June 30, 2010, management believed that the allowance for loan losses was adequate.

While management uses the best information available to make such evaluations, future additions to the allowance may be necessary based on changes in economic conditions. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Bank's allowance for loan losses. Such agencies may require the Bank to recognize additions to the allowance based on their judgments of information available to them at the time of their examination.

## Table of Contents

The following table presents, for the periods indicated, an analysis of the allowance for loan losses and other related data.
$\left.\begin{array}{llcc} & \begin{array}{c}\text { Six Months } \\ \text { Ended } \\ \text { June 30, }\end{array} & \begin{array}{c}\text { Year Ended } \\ \text { December 31, } \\ 2009\end{array} & \begin{array}{c}\text { Six Months } \\ \text { Ended }\end{array} \\ \text { June 30, 2009 }\end{array}\right)$

Management considers a complete review of the following specific factors in determining the provisions for loan losses: historical losses by loan category, non-accrual loans, problem loans as identified through internal classifications, collateral values, and the growth and size of the loan portfolio. In addition to these factors, management takes into consideration current economic conditions and local real estate market conditions. Using this evaluation process, the Company's provision for loan losses was $\$ 850,000$ for the six months ended June 30, 2010 and $\$ 788,000$ for the six months ended June 30, 2009. While the risk profile of the loan portfolio was reduced by a change in its composition via a $\$ 10,356,396$ reduction in higher risk construction loans, non-performing loans increased by $\$ 3,000,304$. This change in the overall risk profile necessitated the increased provision. Net charge-offs/recoveries amounted to a net charge-off of \$417,496 for the six months ended June 30, 2010.

At June 30, 2010, the allowance for loan losses was $\$ 4,937,891$ compared to $\$ 4,505,387$ at December 31, 2009, an increase of $\$ 432,504$, or $9.6 \%$. The ratio of the allowance for loan losses to total loans at June 30, 2010 and December 31, 2009 was $1.14 \%$ and $1.19 \%$, respectively. The allowance for loan losses as a percentage of non-performing loans was $67.57 \%$ at June 30, 2010, compared to $104.59 \%$ at December 31, 2009. Management believes the quality of the loan portfolio remains sound considering the economic climate and economy in the state of New Jersey and that the allowance for loan losses is adequate in relation to credit risk exposure levels.

## Table of Contents

Deposits

Deposits, which include demand deposits (interest bearing and non-interest bearing), savings deposits and time deposits, are a fundamental and cost-effective source of funding. The flow of deposits is influenced significantly by general economic conditions, changes in market interest rates and competition. The Bank offers a variety of products designed to attract and retain customers, with the Bank's primary focus being on building and expanding long-term relationships.

The following table summarizes deposits at June 30, 2010 and December 31, 2009.

December 31,
June 30, 20102009

| Demand | $\$$ | $87,950,592$ | $\$$ | $82,473,328$ |
| :--- | :---: | :--- | :--- | :--- |
| $\quad$ Non-interest bearing |  | $109,948,204$ |  | $125,529,223$ |
| $\quad$ Interest bearing |  | $173,472,451$ |  | $193,369,640$ |
| Savings |  | $162,098,761$ |  | $170,783,163$ |
| Time | $\$$ | $533,470,008$ | $\$$ | $572,155,354$ |

At June 30, 2010, total deposits were $\$ 533,470,008$, a decrease of $\$ 38,685,346$, or $6.8 \%$ from $\$ 572,155,354$ at December 31, 2009. Although the Bank's non-interest bearing demand deposits increased by $\$ 5,477,592$, or $6.6 \%$, at June 30, 2010 compared to December 31, 2009, the Company's strategy to remain more liquid and guard against the potential ill-effects of rising market rates included the managed outflow of higher rate interest bearing demand accounts, savings accounts and time accounts. Management believes this strategy will improve the net interest margin in future 2010 quarters.

Borrowings

Borrowings are mainly comprised of Federal Home Loan Bank ("FHLB") borrowings and overnight funds purchased. These borrowings are primarily used to fund asset growth not supported by deposit generation. The balance of borrowings was $\$ 97,100,000$ at June 30,2010 and consisted of overnight funds purchased of $\$ 74,600,000$ and long-term FHLB borrowings of $\$ 22,500,000$. The balance of borrowings at December 31, 2009 was $\$ 22,500,000$, consisting entirely of long-term FHLB borrowings.

The Bank has four ten-year fixed rate convertible advances from the FHLB that total $\$ 22,500,000$ in the aggregate. These advances, in the amounts of $\$ 2,500,000, \$ 5,000,000, \$ 5,000,000$ and $\$ 10,000,000$ bear interest at the rates of $5.50 \%, 5.34 \%, 5.06 \%$, and $4.08 \%$, respectively. These advances may be called by the FHLB quarterly at the option of the FHLB if rates rise and the rate earned by the FHLB is no longer a "market" rate. These advances are fully secured by marketable securities.

Shareholders' Equity and Dividends

Shareholders' equity increased by $\$ 2,522,539$, or $4.4 \%$, to $\$ 59,923,592$ at June 30,2010 , from $\$ 57,401,053$ at December 31, 2009. Tangible book value per common share increased by $\$ 0.51$, or $5.1 \%$, to $\$ 10.54$ at June 30 , 2010 from $\$ 10.03$ at December 31, 2009. The ratio of shareholders' equity to total assets was $8.38 \%$ and $8.47 \%$ at June 30 , 2010 and December 31, 2009, respectively. The increase in shareholders' equity was primarily the result of net income of $\$ 1,494,817$ and $\$ 1,207,915$ in other comprehensive income, partially offset by, among other items, the $\$ 300,000$ in dividends recorded on the Company's Preferred Stock Series B.

## Table of Contents

On December 23, 2008, pursuant to the TARP CPP under the EESA, the Company entered into a Letter Agreement, including the Securities Purchase Agreement - Standard Terms, with the Treasury pursuant to which the Company issued and sold, and the Treasury purchased (i) 12,000 shares of the Company's Preferred Stock Series B and (ii) a ten-year warrant to purchase up to 200,222 shares of the Company's common stock, no par value, at an initial exercise price of $\$ 8.99$ per share, for aggregate cash consideration of $\$ 12,000,000$. As a result of the $5 \%$ stock dividends paid on February 3, 2010 and February 2, 2009, the shares of common stock underlying the warrant were adjusted to $220,744.76$ shares and the exercise price was adjusted to $\$ 8.154$ per share.

The Preferred Stock Series B pays quarterly cumulative dividends at a rate of 5\% per year for the first five years and thereafter at a rate of $9 \%$ per year and has a liquidation preference of $\$ 1,000$ per share. The warrant provides for the adjustment of the exercise price and the number of shares of the Company's common stock issuable upon exercise pursuant to customary anti-dilution provisions, such as upon stock splits or distributions of securities or other assets to holders of the Company's common stock, and upon certain issuances of the Company's common stock at or below a specified price relative to the initial exercise price. The warrant is immediately exercisable and expires 10 years from the issuance date. In addition, the Treasury has agreed not to exercise voting power with respect to any shares of common stock issued upon exercise of the warrant.

The Company is subject to restrictions contained in the agreement between the Treasury and the Company related to the sale of the Preferred Stock Series B which among other things restricts the payment of cash dividends or making other distributions by the Company on its common stock or the repurchase of its shares of common stock or other capital stock or other equity securities of any kind of the Company or any of its or its affiliates' trust preferred securities until the third anniversary of the purchase of the Preferred Stock Series B by the Treasury with certain exceptions without approval of the Treasury and the Company is prohibited by the terms of the Preferred Stock Series B from paying dividends on the common stock of the Company or redeeming or otherwise acquiring its common stock or certain other of its equity securities unless all dividends on the Preferred Stock Series B have been declared and either paid in full or set aside with certain limited exceptions.

In addition, EESA, as amended by the American Recovery and Reinvestment Act of 2009 (the "Stimulus Package Act"), and guidance issued by the Treasury with respect to this legislation, limit executive compensation, require the reporting of information to the Treasury and others, limit the deductibility for Federal income tax purposes of compensation paid to certain executives in excess of $\$ 500,000$ per year, limit the payment of certain severance and change in control payments to certain executives, limit the type and amount of compensation paid to our highest paid executive (our chief executive officer) of the Company or the Bank, impose a clawback of certain compensation paid to certain executives of the Company or the Bank and impose new corporate governance requirements on the Company, including the inclusion of a non-binding "say to pay" proposal in the Company's annual proxy statement.

The Federal Reserve Board has issued a supervisory letter to bank holding companies that contains guidance on when the board of directors of a bank holding company should eliminate or defer or severely limit dividends including for example when net income available for shareholders for the past four quarters net of previously paid dividends paid during that period is not sufficient to fully fund the dividends. The letter also contains guidance on the redemption of stock by bank holding companies which urges bank holding companies to advise the Federal Reserve of any such redemption or repurchase of common stock for cash or other value which results in the net reduction of a bank holding company's capital at the beginning of the quarter below the capital outstanding at the end of the quarter.

In lieu of cash dividends to common shareholders, the Company (and its predecessor the Bank) has declared a stock dividend every year since 1992 and has paid such dividends every year since 1993. 5\% stock dividends were declared in 2009 and 2008 and paid in 2010 and 2009, respectively. A 6\% stock dividend was declared in 2007 and paid in 2008.

The Company's common stock is quoted on the Nasdaq Global Market under the symbol "FCCY".

## Table of Contents

In 2005, the Company's board of directors authorized a common stock repurchase program that allows for the repurchase of a limited number of the Company's shares at management's discretion on the open market. The Company undertook this repurchase program in order to increase shareholder value. A table disclosing repurchases of Company shares, if any, made during the quarter ended June 30, 2010 is set forth under Part II, Item 2 of this report, Unregistered Sales of Equity Securities and Use of Proceeds.

Actual capital amounts and ratios for the Company and the Bank as of June 30, 2010 and December 31, 2009 are as follows:

|  | Actual Amount | Ratio | For Capital <br> Adequacy Purposes |  | To Be Well Capitalized Under Prompt Corrective Action Provision |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Amount | Ratio | Amount | Ratio |
| As of June 30, 2010 |  |  |  |  |  |  |
| Company |  |  |  |  |  |  |
| Total Capital to Risk Weighted Assets | \$ 82,360,564 | 16.27\% | \$ 40,503,360 | >8\% | N/A | N/A |
| Tier 1 Capital to Risk Weighted Assets | 77,422,821 | 15.29\% | 20,251,680 | >4\% | N/A | N/A |

| Tier 1 Capital to Average Assets | 75,739,580 | 11.72\% | 25,838,921 | >4\% | 32,298,651 | >5\% |

As of December 31, 2009
Company

| Total Capital to Risk Weighted Assets | $\$ 79,091,277$ | $17.23 \%$ | $\$ 36,713,599$ | $>8 \%$ | N/A | N/A |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Tier 1 Capital to Risk Weighted Assets | $74,585,890$ | $16.25 \%$ | $18,356,800$ | $>4 \%$ | N/A | N/A |  |
| Tier 1 Capital to Average Assets | $74,585,890$ | $10.99 \%$ | $27,143,523$ | $>4 \%$ | N/A | N/A |  |
| Bank |  |  |  |  |  |  |  |
| Total Capital to Risk Weighted Assets | $\$ 77,370,821$ | $16.90 \%$ | $\$ 36,633,760$ | $>8 \%$ | $\$$ | $45,792,200$ | $>10 \%$ |
| Tier 1 Capital to Risk Weighted Assets | $72,865,434$ | $15.91 \%$ | $18,316,040$ | $>4 \%$ | $27,475,320$ | $>6 \%$ |  |
| Tier 1 Capital to Average Assets | $72,865,434$ | $10.78 \%$ | $27,043,305$ | $>4 \%$ | $33,804,131$ | $>5 \%$ |  |

The minimum regulatory capital requirements for financial institutions require institutions to have a Tier 1 capital to average assets ratio of $4.0 \%$, a Tier 1 capital to risk weighted assets ratio of $4.0 \%$ and a total capital to risk weighted assets ratio of $8.0 \%$. To be considered "well capitalized," an institution must have a minimum Tier 1 leverage ratio of $5.0 \%$. At June 30, 2010, the ratios of the Company exceeded the ratios required to be considered well capitalized. It is management's goal to monitor and maintain adequate capital levels to continue to support asset growth and continue its status as a well capitalized institution.

## Liquidity

At June 30, 2010, the amount of liquid assets remained at a level management deemed adequate to ensure that contractual liabilities, depositors' withdrawal requirements, and other operational and customer credit needs could be satisfied.

Liquidity management refers to the Company's ability to support asset growth while satisfying the borrowing needs and deposit withdrawal requirements of customers. In addition to maintaining liquid assets, factors such as capital position, profitability, asset quality and availability of funding affect a bank's ability to meet its liquidity needs. On the asset side, liquid funds are maintained in the form of cash and cash equivalents, Federal funds sold, investment securities held to maturity maturing within one year, securities available for sale and loans held for sale. Additional asset-based liquidity is derived from scheduled loan repayments as well as investment repayments of principal and interest from mortgage-backed securities. On the liability side, the primary source of liquidity is the ability to generate core deposits. Short-term borrowings are used as supplemental funding sources when growth in the core deposit base does not keep pace with that of earnings assets.

## Edgar Filing: 1ST CONSTITUTION BANCORP - Form 10-Q

## Table of Contents

The Bank has established a borrowing relationship with the FHLB and a correspondent bank which further supports and enhances liquidity. At June 30, 2010, the Bank maintained an Overnight Line of Credit at the FHLB in the amount of $\$ 58,584,800$ plus a One-Month Overnight Repricing Line of Credit of $\$ 58,584,800$. Advances issued under these programs are subject to FHLB stock level and collateral requirements. Pricing of these advances may fluctuate based on existing market conditions. The Bank also maintains an unsecured Federal funds line of $\$ 20,000,000$ with a correspondent bank.

The Consolidated Statements of Cash Flows present the changes in cash from operating, investing and financing activities. At June 30, 2010, the balance of cash and cash equivalents was $\$ 15,885,995$.

Net cash provided by operating activities totaled $\$ 9,093,821$ for the six months ended June 30, 2010 compared to net cash used in operating activities of $\$ 15,664,512$ for the six months ended June 30, 2009. The primary sources of funds are net income from operations adjusted for provision for loan losses, depreciation expenses, and net proceeds from sales of loans held for sale. The primary use of funds was origination of loans held for sale.

Net cash used in investing activities totaled $\$ 54,766,330$ in the six months ended June 30, 2010, compared to $\$ 20,592,176$ used in investing activities in the six months ended June 30, 2009. The current period amount was primarily the result of an increase in the investment securities and loan portfolios partially offset by the proceeds from maturities and repayments of securities.

Net cash provided by financing activities amounted to $\$ 35,704,219$ in the six months ended June 30 , 2010, compared to $\$ 70,014,027$ provided by financing activities in the six months ended June 30, 2009. The current period amount resulted primarily from an increase in borrowings less a decrease in deposits.

The securities portfolio is also a source of liquidity, providing cash flows from maturities and periodic repayments of principal. During the six months ended June 30, 2010, maturities and prepayments of investment securities totaled $\$ 103,797,238$. Another source of liquidity is the loan portfolio, which provides a flow of payments and maturities.

The Company anticipates that cash and cash equivalents on hand, the cash flow from assets as well as other sources of funds will provide adequate liquidity for the Company's future operating, investing and financing needs. Management will continue to monitor the Company's liquidity and maintain it at a level that it deems adequate and not excessive.

## Interest Rate Sensitivity Analysis

The largest component of the Company's total income is net interest income, and the majority of the Company's financial instruments are composed of interest rate-sensitive assets and liabilities with various terms and maturities. The primary objective of management is to maximize net interest income while minimizing interest rate risk. Interest rate risk is derived from timing differences in the repricing of assets and liabilities, loan prepayments, deposit withdrawals, and differences in lending and funding rates. Management actively seeks to monitor and control the mix of interest rate-sensitive assets and interest rate-sensitive liabilities.

The Company continually evaluates interest rate risk management opportunities, including the use of derivative financial instruments. Management believes that hedging instruments currently available are not cost-effective, and therefore, has focused its efforts on increasing the Bank's spread by attracting lower-cost retail deposits.

## Recent Legislation

On July 21, 2010, the President signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"). This new law will significantly change the current bank regulatory structure and affect the

## Edgar Filing: 1ST CONSTITUTION BANCORP - Form 10-Q

lending, deposit, investment, trading and operating activities of financial institutions and their holding companies.
The Dodd-Frank Act requires various federal agencies to adopt a broad range of new rules and regulations, and to prepare various studies and reports for Congress. The federal agencies are given significant discretion in drafting such rules and regulations, and consequently, many of the details and much of the impact of the Dodd-Frank Act may not be known for months or years.

## Table of Contents

Certain provisions of the Dodd-Frank Act are expected to have a near term impact on the Company. For example, effective July 21, 2011, is a provision of the Dodd-Frank Act that eliminates the federal prohibitions on paying interest on demand deposits, thus allowing businesses to have interest bearing checking accounts. Depending on competitive responses, this significant change to existing law could have an adverse impact on the Company's interest expense.

The Dodd-Frank Act also broadens the base for Federal Deposit Insurance Corporation insurance assessments. Assessments will now be based on the average consolidated total assets less tangible equity capital of a financial institution. The Dodd-Frank Act also permanently increases the maximum amount of deposit insurance for banks, savings institutions and credit unions to $\$ 250,000$ per depositor, retroactive to January 1, 2008, and non-interest bearing transaction accounts have unlimited deposit insurance through December 31, 2013.

Bank and thrift holding companies with assets of less than $\$ 15$ billion as of December 31, 2009, such as the Company, will be permitted to include trust preferred securities that were issued before May 19, 2010, as Tier 1 capital; however, trust preferred securities issued by a bank or thrift holding company (other than those with assets of less than \$500 million) after May 19, 2010, will no longer count as Tier 1 capital. Trust preferred securities still will be entitled to be treated as Tier 2 capital.

The Dodd-Frank Act will require publicly traded companies to give stockholders a non-binding vote on executive compensation and so-called "golden parachute" payments, and allow greater access by shareholders to the company's proxy material by authorizing the SEC to promulgate rules that would allow stockholders to nominate their own candidates using a company's proxy materials. The legislation also directs the Federal Reserve Board to promulgate rules prohibiting excessive compensation paid to bank holding company executives, regardless of whether the company is publicly traded.

The Dodd-Frank Act creates a new Consumer Financial Protection Bureau with broad powers to supervise and enforce consumer protection laws. The Consumer Financial Protection Bureau has broad rule-making authority for a wide range of consumer protection laws that apply to all banks and savings institutions, including the authority to prohibit "unfair, deceptive or abusive" acts and practices. The Consumer Financial Protection Bureau has examination and enforcement authority over all banks and savings institutions with more than $\$ 10$ billion in assets. Banks and savings institutions with $\$ 10$ billion or less in assets such as the Bank will continue to be examined for compliance with the consumer laws by their primary bank regulators. The Dodd-Frank Act also weakens the federal preemption rules that have been applicable for national banks and federal savings associations, and gives state attorneys general the ability to enforce federal consumer protection laws.

It is difficult to predict at this time what specific impact the Dodd-Frank Act and the yet to be written implementing rules and regulations will have on community banks. However, it is expected that at a minimum they will increase our operating and compliance costs and could increase our interest expense.

In July 2010, final rules implemented by the Board of Governors of the Federal Reserve took effect which impose overdraft and interchange fee restrictions and may reduce our non-interest income. The new rules prohibit financial institutions from charging consumers fees for paying overdrafts on automated teller machine and one-time debit card transactions, unless a consumer consents to the overdraft service for those types of transactions.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.
Not required.

Item 4. Controls and Procedures.
The Company has established disclosure controls and procedures designed to ensure that information required to be disclosed in the reports that the Company files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms and is accumulated and communicated to management, including the principal executive officer and principal financial officer, to allow timely decisions regarding required disclosure.

The Company's principal executive officer and principal financial officer, with the assistance of other members of the Company's management, have evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this quarterly report. Based upon such evaluation, the Company's principal executive officer and principal financial officer have concluded that the Company's disclosure controls and procedures are effective as of the end of the period covered by this quarterly report.

The Company's principal executive officer and principal financial officer have also concluded that there was no change in the Company's internal control over financial reporting (as such term is defined in Rule 13a-15(f) under the Exchange Act) that occurred during the quarter ended June 30, 2010 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

## PART II. OTHER INFORMATION

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.
Issuer Purchases of Equity Securities
On July 21, 2005, the board of directors authorized a stock repurchase program under which the Company may repurchase in open market or privately negotiated transactions up to $5 \%$ of its common shares outstanding at that date. The Company undertook this repurchase program in order to increase shareholder value. The following table provides common stock repurchases made by or on behalf of the Company during the three months ended June 30, 2010.

Issuer Purchases of Equity Securities(1)

|  |  |  | Maximum Number |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | Total Number of | of |
| Shares Purchased |  |  |  |  |$\quad$ Shares That May

| Beginning | Ending |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| April 1, 2010 | April 30, 2010 | - | - | - | 163,233 |
| May 1, 2010 | May 31, 2010 | - | - | - | 163,233 |
| June 1, 2010 | June 30, 2010 | - | - | - | 163,233 |
|  |  |  | Total | - | - |
|  |  |  | - | 163,233 |  |

(1) The Company's common stock repurchase program covers a maximum of 195,076 shares of common stock of the Company, representing $5 \%$ of the outstanding common stock of the Company on July 21, 2005, as adjusted for the subsequent stock dividends

As a result of the Company's issuance on December 23, 2008 of Preferred Stock Series B and a warrant to purchase common stock to the Treasury as part of its TARP CPP, the Company may not repurchase its common stock or other equity securities except under certain limited circumstances, which were applicable to the purchases reflected in this table.
