UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
WASHINGTON, DC 20549

FORM 10-K

(Mark One)

ANNUAL REPORT UNDER SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2012

TRANSITION REPORT UNDER SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission file Number: 000-32891

1ST CONSTITUTION BANCORP  
(Exact Name of Registrant as Specified in Its Charter)

New Jersey  
(State or Other Jurisdiction of  
Incorporation or Organization)

22-3665653  
IRS Employer Identification  
Number)

2650 Route 130, P.O. Box 634, Cranbury, NJ 08512  
(Address of Principal Executive Offices, including Zip  
Code)

(609) 655-4500  
(Registrant's telephone number, including area code)

SECURITIES REGISTERED PURSUANT TO SECTION 12(b) OF THE ACT:

Common Stock, No Par Value  
Stock Purchase Rights Relating to Common Stock, No Par  
Value

SECURITIES REGISTERED PURSUANT TO SECTION 12(g) OF THE ACT:

None

(Title of Class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes  No

Edgar Filing: 1ST CONSTITUTION BANCORP - Form 10-K

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act.  
Yes  No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).  
Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

---

---

---

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of “large accelerated filer,” “accelerated filer,” and “smaller reporting company” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	<input type="radio"/>	Accelerated filer	<input type="radio"/>
Non-accelerated filer	<input type="radio"/>	Smaller reporting company	<input checked="" type="radio"/>

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

The aggregate market value of the registrant’s common stock held by non-affiliates of the registrant, computed by reference to the price at which the common stock was last sold, or the average bid and asked price of such common stock, as of the last business day of the registrant’s most recently completed second quarter, is \$43,290,330.

As of February 28, 2013, 5,972,415 shares of the registrant’s common stock were outstanding.

Portions of the registrant’s definitive Proxy Statement for its 2013 Annual Meeting of Shareholders are incorporated by reference into Part III of this Annual Report on Form 10-K.

Forward-Looking Statements

This Annual Report on Form 10-K contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 relating to, without limitation, our future economic performance, plans and objectives for future operations, and projections of revenues and other financial items that are based on our beliefs, as well as assumptions made by and information currently available to us. The words “may,” “will,” “anticipate,” “should,” “would,” “believe,” “contemplate,” “could,” “project,” “predict,” “expect,” “estimate,” “continue,” and “intend,” as well as other similar expressions of the future, are intended to identify forward-looking statements.

These forward-looking statements generally relate to our plans, objectives and expectations for future events and include statements about our expectations, beliefs, plans, objectives, intentions, assumptions and other statements that are not historical facts. These statements are based upon our opinions and estimates as of the date they are made. Although we believe that the expectations reflected in these forward-looking statements are reasonable, such forward-looking statements are subject to known and unknown risks and uncertainties that may be beyond our control, which could cause actual results, performance and achievements to differ materially from results, performance and achievements projected, expected, expressed or implied by the forward-looking statements.

Examples of events that could cause actual results to differ materially from historical results or those anticipated, expressed or implied include, without limitation, changes in the overall economy and interest rate changes; inflation, market and monetary fluctuations; the ability of our customers to repay their obligations; the accuracy of our financial statement estimates and assumptions, including the adequacy of the estimate made in connection with determining the adequacy of the allowance for loan losses; increased competition and its effect on the availability and pricing of deposits and loans; significant changes in accounting, tax or regulatory practices and requirements; changes in deposit flows, loan demand or real estate values; legislation or regulatory changes, including the Dodd-Frank Act; changes in monetary and fiscal policies of the U.S. Government; changes in loan delinquency rates or in our levels of non-performing assets; our ability to declare and pay dividends; changes in the economic climate in the market areas in which we operate; the frequency and magnitude of foreclosure of our loans; changes in consumer spending and saving habits; the effects of the health and soundness of other financial institutions, including the FDIC’s need to increase the Deposit Insurance Fund assessments; technological changes; the effect of harsh weather conditions, including hurricanes and man-made disasters; the economic impact of any future terrorist threats and attacks, acts of war or threats thereof and the response of the United States to any such threats and attacks; other risks described from time to time in our filings with the Securities and Exchange Commission (the “SEC”); and our ability to manage the risks involved in the foregoing. Although management has taken certain steps to mitigate any negative effect of the aforementioned items, significant unfavorable changes could severely impact the assumptions used and have an adverse effect on profitability. Additional information concerning the factors that could cause actual results to differ materially from those in the forward-looking statements is contained in Item 1. “Business”, Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations”, and elsewhere in this Annual Report on Form 10-K and in our other filings with the SEC. However, other factors besides those listed in Item 1A. Risk Factors or discussed in this Annual Report also could adversely affect our results and you should not consider any such list of factors to be a complete list of all potential risks or uncertainties. Any forward-looking statements made by us or on our behalf speak only as of the date they are made. We undertake no obligation to publicly revise any forward-looking statements or cautionary factors, except as required by law.

PART I

Item 1. Business.

1st Constitution Bancorp

1st Constitution Bancorp (the “Company”) is a bank holding company registered under the Bank Holding Company Act of 1956, as amended. The Company was organized under the laws of the State of New Jersey in February 1999 for the purpose of acquiring all of the issued and outstanding stock of 1st Constitution Bank (the “Bank”) and thereby enabling the Bank to operate within a bank holding company structure. The Company became an active bank holding company on July 1, 1999. As of December 31, 2012, the Company has two employees, both of whom are full-time. The Bank is a wholly-owned subsidiary of the Company. Other than its investment in the Bank, the Company currently conducts no other significant business activities.

## Table of Contents

The main office of the Company and the Bank is located at 2650 Route 130 North, Cranbury, New Jersey 08512, and the telephone number is (609) 655-4500.

### 1st Constitution Bank

The Bank is a commercial bank formed under the laws of the State of New Jersey and engages in the business of commercial and retail banking. As a community bank, the Bank offers a wide range of services (including demand, savings and time deposits and commercial and consumer/installment loans) to individuals, small businesses and not-for-profit organizations principally in the Fort Lee area of Bergen County and in Middlesex, Mercer and Somerset Counties, New Jersey. The Bank conducts its operations through its main office located in Cranbury, New Jersey, and operates thirteen additional branch offices in downtown Cranbury, Hamilton Square, Hightstown, Hillsborough, Hopewell, Jamesburg, Lawrenceville, Perth Amboy, Plainsboro, Skillman, West Windsor, Fort Lee and Princeton, New Jersey. The Bank's deposits are insured up to applicable legal limits by the Federal Deposit Insurance Corporation ("FDIC"). As of December 31, 2012, the Bank had 150 employees, of which 134 were full-time employees.

Management efforts focus on positioning the Bank to meet the financial needs of the communities in Middlesex, Mercer and Somerset Counties and the Fort Lee area of Bergen County and to provide financial services to individuals, families, institutions and small businesses. To achieve this goal, the Bank is focusing its efforts on:

- personal service;
- expansion of its branch network;
- innovative product offerings; and
- technological advances and e-commerce.

### Personal Service

The Bank provides a wide range of commercial and consumer banking services to individuals, families, institutions and small businesses in central New Jersey and the Fort Lee area of Bergen County. The Bank's focus is to understand the needs of the community and the customers and tailor products, services and advice to meet those needs. The Bank seeks to provide a high level of personalized banking services, emphasizing quick and flexible responses to customer demands.

### Expansion of Branch Network

On March 25, 2011, the Bank acquired certain deposit and other liabilities, real estate and related assets of the Rocky Hill, Hillsborough and Hopewell, New Jersey branch banking offices from another financial institution for a purchase price of \$9.85 million (the "March 2011 Acquisition").

As a result of the March 2011 Acquisition, the three branches became branches of the Bank. Included in the March 2011 Acquisition were the assumption of deposit liabilities of \$111.9 million, primarily consisting of demand deposits, and the acquisition of cash of approximately \$101.5 million, fixed assets of approximately \$4.6 million, which includes, without limitation, ownership of the real estate and improvements upon which the branches are situated, and loans of \$862,000. The Bank recorded goodwill of approximately \$3.2 million and a core deposit intangible asset of approximately \$1.7 million as a result of the March 2011 Acquisition.

The Bank continually evaluates opportunities for branch bank expansion, either mini-branches or full service branches, to continue to grow and meet the needs of the community.

## Table of Contents

### Innovative Product Offerings

The Bank's Mortgage Warehouse Unit provides a revolving line of credit that is available to licensed mortgage banking companies (the "Warehouse Line of Credit") and that has been successful since inception in 2008. The Warehouse Line of Credit is used by the mortgage banker to originate one-to-four family residential mortgage loans that are pre-sold to the secondary mortgage market, which includes state and national banks, national mortgage banking firms, insurance companies and government-sponsored enterprises, including the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation and others. On average, an advance under the Warehouse Line of Credit remains outstanding for a period of less than 30 days, with repayment coming directly from the sale of the loan into the secondary mortgage market. Interest (the spread between our borrowing cost and the rate charged to the client) and a transaction fee are collected by the Bank at the time of repayment. Additionally, customers of the Warehouse Lines of Credit are required to maintain deposit relationships with the Bank that, on average, represent 10% to 15% of the loan balances. The Bank had outstanding Warehouse Line of Credit advances of \$284,127,530 at December 31, 2012.

### Technological Advances and e-Commerce

The Bank recognizes that customers want to receive service via their most convenient delivery channel, be it the traditional branch office, by telephone, ATM, or the internet. For this reason, the Bank continues to enhance its e-commerce capabilities. At [www.1stconstitution.com](http://www.1stconstitution.com), customers have easy access to online banking, including account access, and to the Bank's bill payment system. Consumers can apply online for loans and interact with senior management through the e-mail system. Business customers have access to cash management information and transaction capability through the Bank's online Cash Manager product which permits business customers to make deposits, originate ACH payments, initiate wire transfers, retrieve account information and place "stop payment" orders. This overall expansion in electronic banking offers the Bank's customers means to access the Bank's services easily and at their own convenience.

### Competition

The Bank experiences substantial competition in attracting and retaining deposits and in making loans. In attracting deposits and borrowers, the Bank competes with commercial banks, savings banks, and savings and loan associations, as well as regional and national insurance companies and non-bank financial institutions, regulated small loan companies and local credit unions, regional and national issuers of money market funds and corporate and government borrowers. Within the direct market area of the Bank, there are a significant number of offices of competing financial institutions. In New Jersey generally, and in the Bank's local market specifically, the Bank's most direct competitors are large commercial banks including Bank of America, PNC Bank, Wells Fargo and Sovereign Bank, as well as savings banks and savings and loan associations, including Provident Savings Bank and Hudson City Savings Bank.

The Bank is at a competitive disadvantage compared with these larger national and regional commercial and savings banks. By virtue of their larger capital, asset size or reserves, many of such institutions have substantially greater lending limits (ceilings on the amount of credit a bank may provide to a single customer that are linked to the institution's capital) and other resources than the Bank. Many such institutions are empowered to offer a wider range of services, including trust services, than the Bank and, in some cases, have lower funding costs (the price a bank must pay for deposits and other borrowed monies used to make loans to customers) than the Bank. In addition to having established deposit bases and loan portfolios, these institutions, particularly large national and regional commercial and savings banks, have the financial ability to finance extensive advertising campaigns and to allocate considerable resources to locations and products perceived as profitable.

In addition, non-bank financial institutions offer services that compete for deposits with the Bank. For example, brokerage firms and insurance companies offer such instruments as short-term money market funds, corporate and government securities funds, mutual funds and annuities. It is expected that competition in these areas will continue to increase. Some of these competitors are not subject to the same degree of regulation and supervision as the Company and the Bank and therefore may be able to offer customers more attractive products than the Bank.

However, management of the Bank believes that loans to small and mid-sized businesses and professionals, which represent the main commercial loan business of the Bank, are not always of primary importance to the larger banking institutions. The Bank competes for this segment of the market by providing responsive personalized services, making timely local decisions, and acquiring knowledge of its customers and their businesses.

#### Lending Activities

The Bank's lending activities include both commercial and consumer loans. Loan originations are derived from a number of sources including real estate broker referrals, mortgage loan companies, direct solicitation by the Bank's loan officers, existing depositors and borrowers, builders, attorneys, walk-in customers and, in some instances, other lenders. The Bank has established disciplined and systematic procedures for approving and monitoring loans that vary depending on the size and nature of the loan.

## Table of Contents

### Commercial Lending

The Bank offers a variety of commercial loan services, including term loans, lines of credit, and loans secured by equipment and receivables. A broad range of short-to-medium term commercial loans, both secured and unsecured, are made available to businesses for working capital (including inventory and receivables), business expansion (including acquisition and development of real estate and improvements), and the purchase of equipment and machinery. The Bank also makes construction loans to real estate developers for the acquisition, development and construction of residential subdivisions.

Commercial loans are granted based on the borrower's ability to generate cash flow to support its debt obligations and other cash related expenses. A borrower's ability to repay commercial loans is substantially dependent on the success of the business itself and on the quality of its management. As a general practice, the Bank takes as collateral a security interest in any available real estate, equipment, inventory, receivables or other personal property of its borrowers, although occasionally the Bank makes commercial loans on an unsecured basis. Generally, the Bank requires personal guaranties of its commercial loans to offset the risks associated with such loans.

### Residential Consumer Lending

A portion of the Bank's lending activities consists of the origination of fixed and adjustable rate residential first mortgage loans secured by owner-occupied property located in the Bank's primary market areas. Home mortgage lending is unique in that a broad geographic territory may be serviced by originators working from strategically placed offices either within the Bank's traditional banking facilities or from affordable storefront locations in commercial buildings. The Bank also offers construction loans, second mortgage home improvement loans and home equity lines of credit.

The Bank finances the construction of individual, owner-occupied houses on the basis of written underwriting and construction loan management guidelines. First mortgage construction loans are made to contractors and are secured by real estate that is both a pre-sold and a "speculation" basis. Such loans are also made to qualified individual borrowers and are generally supported by a take-out commitment from a permanent lender. The Bank makes residential construction loans to individuals who intend to erect owner occupied housing on a purchased parcel of real estate. The construction phase of these loans has certain risks, including the viability of the contractor, the contractor's ability to complete the project and changes in interest rates.

In most cases, the Bank will sell its mortgage loans with terms of 15 years or more in the secondary market. The sale to the secondary market allows the Bank to hedge against the interest rate risks related to such lending operations. This brokerage arrangement allows the Bank to accommodate its clients' demands while eliminating the interest rate risk for the 15- to 30- year period generally associated with such loans.

The Bank in most cases requires borrowers to obtain and maintain title, fire, and extended casualty insurance, and, where required by applicable regulations, flood insurance. The Bank maintains its own errors and omissions insurance policy to protect against loss in the event of failure of a mortgagor to pay premiums on fire and other hazard insurance policies. Mortgage loans originated by the Bank customarily include a "due on sale" clause, which gives the Bank the right to declare a loan immediately due and payable in certain circumstances, including, without limitation, upon the sale or other disposition by the borrower of the real property subject to a mortgage. In general, the Bank enforces due on sale clauses. Borrowers are typically permitted to refinance or repay loans at their option without penalty.

### Non-Residential Consumer Lending

Non-residential consumer loans made by the Bank include loans for automobiles, recreation vehicles, and boats, as well as personal loans (secured and unsecured) and deposit account secured loans. The Bank also conducts various indirect lending activities through established retail companies in its market areas. Non-residential consumer loans are attractive to the Bank because they typically have a shorter term and carry higher interest rates than are charged on other types of loans. Non-residential consumer loans, however, do pose additional risk of collectability when compared to traditional types of loans, such as residential mortgage loans.

## Table of Contents

Consumer loans are granted based on employment and financial information solicited from prospective borrowers as well as credit records collected from various reporting agencies. The stability of the borrower, willingness to pay and credit history are the primary factors to be considered. The availability of collateral is also a factor considered in making such a loan. The Bank seeks collateral that can be assigned and has good marketability with a clearly adequate margin of value. The geographic area of the borrower is another consideration, with preference given to borrowers in the Bank's primary market areas.

## Supervision and Regulation

Banking is a complex, highly regulated industry. The primary goals of the bank regulatory scheme are to maintain a safe and sound banking system and to facilitate the conduct of monetary policy. In furtherance of those goals, Congress has created several largely autonomous regulatory agencies and enacted a myriad of legislation that governs banks, bank holding companies and the banking industry. This regulatory framework is intended primarily for the protection of depositors and not for the protection of the Company's shareholders or creditors. Descriptions of, and references to, the statutes and regulations below are brief summaries thereof, and do not purport to be complete. The descriptions are qualified in their entirety by reference to the specific statutes and regulations discussed.

## State and Federal Regulations

The Company is a bank holding company within the meaning of the Bank Holding Company Act of 1956, as amended (the "BHCA"). As a bank holding company, the Company is subject to inspection, examination and supervision by the Board of Governors of the Federal Reserve System (the "Federal Reserve Board") and is required to file with the Federal Reserve Board an annual report and such additional information as the Federal Reserve Board may require pursuant to the BHCA. The Federal Reserve Board may also make examinations of the Company and its subsidiaries. The Company is subject to capital standards similar to, but separate from, those applicable to the Bank.

Under the BHCA, bank holding companies that are not financial holding companies generally may not acquire the ownership or control of more than 5% of the voting shares, or substantially all of the assets, of any company, including a bank or another bank holding company, without the Federal Reserve Board's prior approval. The Company has not applied to become a financial holding company but did obtain such approval to acquire the shares of the Bank. A bank holding company that does not qualify as a financial holding company is generally limited in the types of activities in which it may engage to those that the Federal Reserve Board had recognized as permissible for bank holding companies prior to the date of enactment of the Gramm-Leach-Bliley Financial Services Modernization Act of 1999. For example, a holding company and its banking subsidiary are prohibited from engaging in certain tie-in arrangements in connection with any extension of credit or lease or sale of any property or the furnishing of services. At present, the Company does not engage in any significant activity other than owning the Bank.

In addition to federal bank holding company regulation, the Company is registered as a bank holding company with the New Jersey Department of Banking and Insurance (the "Department"). The Company is required to file with the Department copies of the reports it files with the federal banking and securities regulators.

The Federal Reserve Board has issued a supervisory letter to bank holding companies that contains guidance on when the board of directors of a bank holding company should eliminate or defer or severely limit dividends including, for example, when net income available for shareholders for the past four quarters net of previously paid dividends paid during that period is not sufficient to fully fund the dividends. The letter also contains guidance on the redemption of stock by bank holding companies which urges bank holding companies to advise the Federal Reserve of any such redemption or repurchase of common stock for cash or other value which results in the net reduction of a bank holding company's capital at the beginning of the quarter below the capital outstanding at the end of the quarter.

On July 21, 2010, President Obama signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the “Dodd-Frank Act”). The Dodd-Frank Act has and will continue to have a broad impact on the financial services industry, including significant regulatory and compliance changes such as, among other things, (i) enhanced resolution authority of troubled and failing banks and their holding companies; (ii) increased capital and liquidity requirements; (iii) increased regulatory examination fees; (iv) changes to assessments to be paid to the FDIC for federal deposit insurance; and (v) numerous other provisions designed to improve supervision and oversight of, and strengthen safety and soundness for, the financial services sector. Additionally, the Dodd-Frank Act established a new framework for systemic risk oversight within the financial system to be distributed among new and existing federal regulatory agencies, including the Financial Stability Oversight Council, the Federal Reserve, the Office of the Comptroller of the Currency, and the FDIC.

## Table of Contents

Effective in July 2011, the Dodd-Frank Act eliminated federal prohibitions on paying interest on demand deposits, thus allowing businesses to have interest bearing checking accounts. This significant change to existing law has not had an adverse impact on our net interest margin for the years ended December 31, 2012 and 2011.

The Dodd-Frank Act also changed the base for FDIC deposit insurance assessments. Assessments are now based on average consolidated total assets less tangible equity capital of a financial institution, rather than on deposits. The Dodd-Frank Act also increased the maximum amount of deposit insurance for banks, savings institutions and credit unions to \$250,000 per account, retroactive to January 1, 2008, and non-interest bearing transaction accounts and Interest on Lawyer Trust Accounts (IOLTAs) where the accrued interest is paid to state bar associations or other organizations to fund legal assistance programs have unlimited deposit insurance through December 31, 2012. The legislation also increased the required minimum reserve ratio for the Deposit Insurance Fund, from 1.15% to 1.35% of insured deposits, and directed the FDIC to offset the effects of increased assessments on depository institutions with less than \$10 billion in assets, including the Bank.

The Dodd-Frank Act requires publicly traded companies to give their stockholders a non-binding vote on executive compensation (“say on pay”) and so-called “golden parachute” payments. It also provides that the listing standards of the national securities exchanges shall require listed companies to implement and disclose “clawback” policies mandating the recovery of incentive compensation paid to executive officers in connection with accounting restatements. Because the Company qualifies as a “smaller reporting company” under the rules of the Securities and Exchange Commission, the “say on pay” requirement will become applicable to the Company at the Company’s 2013 annual meeting of shareholders.

The Dodd-Frank Act created a new Consumer Financial Protection Bureau with broad powers to supervise and enforce consumer protection laws. The Consumer Financial Protection Bureau has broad rule-making authority for a wide range of consumer protection laws that apply to all banks and savings institutions, including the authority to prohibit “unfair, deceptive or abusive” acts and practices. The Consumer Financial Protection Bureau has examination and enforcement authority over all banks and savings institutions with more than \$10 billion in assets, which authority does not extend to the Bank at this time since we do not meet the asset threshold.

The Dodd-Frank Act also weakens the federal preemption rules that have been applicable for national banks and federal savings associations, and gives state attorneys general the ability to enforce federal consumer protection laws. The Dodd-Frank Act requires minimum leverage (Tier 1) and risk based capital requirements for bank and savings and loan holding companies, which exclude certain instruments that previously have been eligible for inclusion by bank holding companies as Tier 1 capital, such as trust preferred securities; however, bank holding companies with assets of less than \$15 billion as of December 31, 2009 are permitted to include trust preferred securities that were issued before May 19, 2010 as Tier 1 capital and bank holding companies with assets of less than \$500 million are permitted to continue to issue trust preferred securities and have them count as Tier 1 capital.

It is difficult to predict at this time what specific impact the Dodd-Frank Act and certain yet to be written implementing rules and regulations will have on community banks. However, it is expected that at a minimum, they will increase our operating and compliance costs and could increase our interest expense.

## Capital Adequacy

The Company is required to comply with minimum capital adequacy standards established by the Federal Reserve Board. There are two basic measures of capital adequacy for bank holding companies and the depository institutions that they own: a risk based measure and a leverage measure. All applicable capital standards must be satisfied for a bank holding company to be considered in compliance.

The Federal Deposit Insurance Corporation Improvement Act of 1991 (“FDICIA”) required each federal banking agency to revise its risk-based capital standards to ensure that those standards take adequate account of interest rate risk, concentration of credit risk and the risks of non-traditional activities. In addition, pursuant to FDICIA, each federal banking agency has promulgated regulations, specifying the levels at which a bank would be considered “well capitalized,” “adequately capitalized,” “undercapitalized,” “significantly undercapitalized,” or “critically undercapitalized,” and to take certain mandatory and discretionary supervisory actions based on the capital level of the institution.

Table of Contents

The regulations implementing these provisions of FDICIA provide that a bank will be classified as “well capitalized” if it (i) has a total risk-based capital ratio of at least 10.0 percent, (ii) has a Tier 1 risk-based capital ratio of at least 6.0 percent, (iii) has a Tier 1 leverage ratio of at least 5.0 percent, and (iv) meets certain other requirements. A bank will be classified as “adequately capitalized” if it (i) has a total risk-based capital ratio of at least 8.0 percent, (ii) has a Tier 1 risk-based capital ratio of at least 4.0 percent, (iii) has a Tier 1 leverage ratio of (a) at least 4.0 percent, or (b) at least 3.0 percent if the bank was rated 1 in its most recent examination and is not experiencing or anticipating significant growth, and (iv) does not meet the definition of “well capitalized.” A bank will be classified as “undercapitalized” if it (i) has a total risk-based capital ratio of less than 8.0 percent, (ii) has a Tier 1 risk-based capital ratio of less than 4.0 percent, or (iii) has a Tier 1 leverage ratio of (a) less than 4.0 percent, or (b) less than 3.0 percent if the bank was rated 1 in its most recent examination and is not experiencing or anticipating significant growth. A bank will be classified as “significantly undercapitalized” if it (i) has a total risk-based capital ratio of less than 6.0 percent, (ii) has a Tier 1 risk-based capital ratio of less than 3.0 percent, or (iii) has a Tier 1 leverage ratio of less than 3.0 percent. An institution will be classified as “critically undercapitalized” if it has a tangible equity to total assets ratio that is equal to or less than 2.0 percent. An insured depository institution may be deemed to be in a lower capitalization category if the FDIC has determined (i) that the insured depository institution is in unsafe or unsound condition or (ii) that, in the most recent examination of the insured depository institution, the insured depository institution received and has not corrected a less-than-satisfactory rating for any of the categories of asset quality, management, earnings, or liquidity.

As of December 31, 2012, the Bank’s capital ratios exceed the requirements to be considered a “well capitalized” institution under these regulations.

The risk-based capital guidelines for bank holding companies such as the Company currently require a minimum ratio of total capital to risk-weighted assets (including off-balance sheet activities, such as standby letters of credit) of 8%. At least half of the total capital is required to be Tier 1 capital, consisting principally of common shareholders’ equity, non-cumulative perpetual preferred stock, a limited amount of cumulative perpetual preferred stock and minority interest in the equity accounts of consolidated subsidiaries, less goodwill. The remainder of the total capital (Tier 2 capital) may consist of a limited amount of subordinated debt and intermediate-term preferred stock, certain hybrid capital instruments and other debt securities, perpetual preferred stock and a limited amount of the general loan loss allowance. At December 31, 2012, the Company maintained a Tier 1 capital ratio of 11.84% and total qualifying capital ratio of 12.98%.

In addition to the risk-based capital guidelines, the federal banking regulators established minimum leverage ratio (Tier 1 capital to total assets) guidelines for bank holding companies. These guidelines provide for a minimum leverage ratio of 3% for those bank holding companies which have the highest regulatory examination ratings and are not contemplating or experiencing significant growth or expansion. All other bank holding companies are required to maintain a leverage ratio of at least 4%. Banking organizations with supervisory, financial, operational, or managerial weaknesses, as well as organizations that are anticipating or experiencing significant growth, are expected to maintain capital ratios well above the minimum levels. Moreover, higher capital ratios may be required for any bank holding company if warranted by its particular circumstances or risk profile. In all cases, bank holding companies should hold capital commensurate with the level and nature of the risks, including the volume and severity of problem loans, to which they are exposed. At December 31, 2012, the Company’s leverage ratio was 9.29%.

The current risk-based capital guidelines are based upon the 1988 capital accord of the International Basel Committee on Banking Supervision, a committee of central banks and bank supervisors and regulators from the major industrialized countries that develops broad policy guidelines for use by each country’s supervisors in determining the supervisory policies they apply. A new international accord, referred to as Basel II, became mandatory for large or “core” international banks outside the U.S. in 2008 (total assets of \$250 billion or more or consolidated foreign exposures of \$10 billion or more) and emphasizes internal assessment of credit, market and operational risk, as well as supervisory assessment and market discipline in determining minimum capital requirements. It is optional for other

banks. In December 2010, the Group of Governors and Heads of Supervisors of the Basel Committee on Banking Supervision, the oversight body of the Basel Committee, published its “calibrated” capital standards for major banking institutions, referred to as Basel III. Under these standards, when fully phased-in on January 1, 2019, banking institutions will be required to maintain heightened Tier 1 common equity, Tier 1 capital, and total capital ratios, as well as maintaining a “capital conservation buffer.” The Tier 1 common equity and Tier 1 capital ratio requirements will be phased-in incrementally between January 1, 2013 and January 1, 2015; the deductions from common equity made in calculating Tier 1 common equity will be phased-in incrementally over a four-year period commencing on January 1, 2014; and the capital conservation buffer will be phased-in incrementally between January 1, 2016 and January 1, 2019. The Basel Committee also announced that a countercyclical buffer of 0% to 2.5% of common equity or other fully loss-absorbing capital will be implemented according to national circumstances as an extension of the conservation buffer.

Table of Contents

In June 2012, the federal bank regulatory agencies issued a series of proposed rules that would revise their risk-based and leverage capital requirements and their method for calculating risk-weighted assets to make them consistent with Basel III and certain provisions of the Dodd-Frank Act. The proposed rules would apply to all depository institutions, top-tier bank holding companies with total consolidated assets of \$500 million or more, and top-tier savings and loan holding companies (“banking organizations”). Among other things, the proposed rules establish a new minimum common equity Tier 1 capital ratio of 4.5% of risk-weighted assets and a higher minimum Tier 1 risk-based capital ratio of 6.0% (up from the present 4.0%). Additionally, the U.S. implementation of Basel III contemplates that, for banking organizations with less than \$15 billion in assets, the ability to treat trust preferred securities as Tier 1 capital would be phased out over a ten-year period. The proposed rules also required unrealized gains and losses on certain securities holdings to be included for purposes of calculating regulatory capital requirements. In addition, the proposed rules limit a banking organization’s capital distributions and certain discretionary bonus payments if the banking organization does not hold a “capital conservation buffer” consisting of a specified amount of common equity Tier 1 capital in addition to the amount necessary to meet its minimum risk-based capital requirements. The proposed rules indicated that the final rule would become effective on January 1, 2013, and the changes set forth in the final rules will be phased in from January 1, 2013 through January 1, 2019. However, the federal bank regulatory agencies indicated in November 2012 that they did not expect that any of the proposed rules would become effective on January 1, 2013. The federal bank regulatory agencies did not specify a new deadline.

On May 30, 2006, the Company established 1st Constitution Capital Trust II, a Delaware business trust and wholly-owned subsidiary of the Company (“Trust II”), for the sole purpose of issuing \$18 million of trust preferred securities (the “Capital Securities”). Trust II utilized the \$18 million proceeds along with \$557,000 invested in Trust II by the Company to purchase \$18,557,000 of floating rate junior subordinated debentures issued by the Company and due to mature on June 15, 2036. The Capital Securities were issued in connection with a pooled offering involving approximately 50 other financial institution holding companies. All of the Capital Securities were sold to a single pooling vehicle. The floating rate junior subordinated debentures are the only asset of Trust II and have terms that mirror the Capital Securities. These debentures are redeemable in whole or in part prior to maturity after June 15, 2011. Trust II is obligated to distribute all proceeds of a redemption of these debentures, whether voluntary or upon maturity, to holders of the Capital Securities. The Company’s obligation with respect to the Capital Securities and the debentures, when taken together, provide a full and unconditional guarantee on a subordinated basis by the Company of the obligations of Trust II to pay amounts when due on the Capital Securities. Interest payments on the floating rate junior subordinated debentures flow through Trust II to the pooling vehicle.

On December 23, 2008, pursuant to the Troubled Asset Relief Program (“TARP”) Capital Purchase Program (the “CPP”) under the Emergency Economic Stabilization Act of 2008 (“EESA”), the Company entered into a Letter Agreement, including the Securities Purchase Agreement – Standard Terms, with the United States Department of the Treasury (the “Treasury”), pursuant to which the Company issued and sold, and the Treasury purchased (i) 12,000 shares of the Company’s Fixed Rate Cumulative Perpetual Preferred Stock, Series B (“Preferred Stock Series B”) and (ii) a ten-year warrant to purchase up to 200,222 shares of the Company’s common stock, no par value, at an initial exercise price of \$8.99 per share, for aggregate cash consideration of \$12 million. As a result of the declarations of stock dividends to holders of common stock since the issuance of the warrant, the shares of common stock underlying the two warrants issued as replacements to the original warrant have been adjusted to 255,540 shares and the initial exercise price has been adjusted to \$7.044 per share. On October 27, 2010, the Company repurchased all of the outstanding shares of the Preferred Stock Series B from the Treasury, and the warrant was sold by the Treasury on November 23, 2011 and bifurcated into two warrants that were issued to two affiliated purchasers. As of the date hereof, two warrants remain outstanding.

The two new warrants provide for the adjustment of the exercise price and the number of shares of the Company’s common stock issuable upon exercise pursuant to customary anti-dilution provisions, such as upon stock splits or distributions of securities or other assets to holders of the Company’s common stock. The outstanding two warrants

are immediately exercisable and expire in December 2018.

## Table of Contents

### Restrictions on Dividends

The primary source of cash to pay dividends, if any, to the Company's shareholders and to meet the Company's obligations is dividends paid to the Company by the Bank. Dividend payments by the Bank to the Company are subject to the New Jersey Banking Act of 1948 (the "Banking Act") and the Federal Deposit Insurance Act (the "FDIA"). Under the Banking Act and the FDIA, the Bank may not pay any dividends if after paying the dividend, it would be undercapitalized under applicable capital requirements. In addition to these explicit limitations, the federal regulatory agencies are authorized to prohibit a banking subsidiary or bank holding company from engaging in an unsafe or unsound banking practice. Depending upon the circumstances, the agencies could take the position that paying a dividend would constitute an unsafe or unsound banking practice.

It is the policy of the Federal Reserve Board that bank holding companies should pay cash dividends on common stock only out of income available over the immediately preceding year and only if prospective earnings retention is consistent with the organization's expected future needs and financial condition. The policy provides that bank holding companies should not maintain a level of cash dividend that undermines the bank holding company's ability to serve as a source of strength to its banking subsidiary. A bank holding company may not pay dividends when it is insolvent.

The Company has never paid a cash dividend and the Company's Board of Directors has no plans to pay a cash dividend in the foreseeable future.

### Priority on Liquidation

The Company is a legal entity separate and distinct from the Bank. The rights of the Company as the sole shareholder of the Bank, and therefore the rights of the Company's creditors and shareholders, to participate in the distributions and earnings of the Bank when the Bank is not in bankruptcy, are subject to various state and federal law restrictions as discussed above under the heading "Restrictions on Dividends." In the event of a liquidation or other resolution of an insured depository institution such as the Bank, the claims of depositors and other general or subordinated creditors are entitled to a priority of payment over the claims of holders of an obligation of the institution to its shareholders (the Company) or any shareholder or creditor of the Company. The claims on the Bank by creditors include obligations in respect of federal funds purchased and certain other borrowings, as well as deposit liabilities.

### Financial Institution Legislation

The Gramm-Leach-Bliley Financial Modernization Act of 1999 (the "Modernization Act") became effective in early 2000. The Modernization Act:

- allows bank holding companies meeting management, capital and Community Reinvestment Act standards to engage in a substantially broader range of non-banking activities than is permissible for a bank holding company, including insurance underwriting and making merchant banking investments in commercial and financial companies; if a bank holding company elects to become a financial holding company, it files a certification, effective in 30 days, and thereafter may engage in certain financial activities without further approvals;
- allows banks to establish subsidiaries to engage in certain activities which a financial holding company could engage in, if the bank meets certain management, capital and Community Reinvestment Act standards;
- allows insurers and other financial services companies to acquire banks and removes various restrictions that currently apply to bank holding company ownership of securities firms and mutual fund advisory companies; and establishes the overall regulatory structure applicable to financial holding companies that also engage in insurance and securities operations.

The Modernization Act modified other laws, including laws related to financial privacy and community reinvestment.

Table of Contents

The Modernization Act also amended the BHCA and the Bank Merger Act to require the federal banking agencies to consider the effectiveness of a financial institution's anti-money laundering activities when reviewing an application under these acts.

Additional proposals to change the laws and regulations governing the banking and financial services industry are frequently introduced in Congress, in state legislatures and before the various bank regulatory agencies. The likelihood and timing of any such changes and the impact such changes might have on the Company cannot be determined at this time.

The Sarbanes-Oxley Act of 2002 ("Sarbanes-Oxley Act"), which became law on July 30, 2002, added new legal requirements affecting corporate governance, accounting and corporate reporting for companies with publicly traded securities.

The Sarbanes-Oxley Act provides for, among other things:

- a prohibition on personal loans made or arranged by the issuer to its directors and executive officers (except for loans made by a bank subject to Regulation O of the Federal Reserve Board);
  - independence requirements for audit committee members;
- disclosure of whether at least one member of the audit committee is a "financial expert" (as such term is defined by the Securities and Exchange Commission ("SEC") and if not, why not;
  - independence requirements for outside auditors;
- a prohibition by a company's registered public accounting firm from performing statutorily mandated audit services for the company if the company's chief executive officer, chief financial officer, comptroller, chief accounting officer or any person serving in equivalent positions had been employed by such firm and participated in the audit of such company during the one-year period preceding the audit initiation date;
- certification of financial statements and annual and quarterly reports by the principal executive officer and the principal financial officer;
- the forfeiture of bonuses or other incentive-based compensation and profits from the sale of an issuer's securities by directors and senior officers in the twelve month period following initial publication of any financial statements that later require restatement due to corporate misconduct;
  - disclosure of off-balance sheet transactions;
- two-business day filing requirements for insiders filing Forms 4;
- disclosure of a code of ethics for financial officers and filing a Form 8-K for a change or waiver of such code;
  - "real time" filing of periodic reports;
  - posting of certain SEC filings and other information on the company's website;
- the reporting of securities violations "up the ladder" by both in-house and outside attorneys;

- restrictions on the use of non-GAAP financial measures;
- the formation of a public accounting oversight board; and
- various increased criminal penalties for violations of securities laws.

Table of Contents

Additionally, Section 404 of the Sarbanes-Oxley Act requires that a public company subject to the reporting requirements of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), include in its annual report (i) a management’s report on internal control over financial reporting assessing the company’s internal controls, and (ii) if the company is an “accelerated filer” or a “large accelerated filer”, an auditor’s attestation report, completed by the registered public accounting firm that prepares or issues an accountant’s report which is included in the company’s annual report, attesting to the effectiveness of management’s internal control assessment.

Each of the national stock exchanges, including the Nasdaq Global Market where the Company’s common stock is listed, have in place corporate governance rules, including rules requiring director independence, and the adoption of charters for the nominating, corporate governance, and audit committees. These rules are intended to, among other things, make the board of directors independent of management and allow shareholders to more easily and efficiently monitor the performance of companies and directors. These burdens increase the Company’s legal and accounting fees and the amount of time that the Board of Directors and management must devote to corporate governance issues.

Section 302(a) of Sarbanes-Oxley requires the Company’s principal executive officer and principal financial officer to certify that the Company’s Quarterly and Annual Reports do not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of circumstances under which they were made, not misleading. The rules have several requirements, including having these officers certify that: they are responsible for establishing, maintaining and regularly evaluating the effectiveness of the Company’s disclosure controls and procedures and internal control over financial reporting; they have made certain disclosures to the Company’s auditors and the audit committee of the Board of Directors about the Company’s internal control over financial reporting; and they have included information in the Company’s Quarterly and Annual Reports about their evaluation of disclosure controls and procedures and whether there have been significant changes in the Company’s internal controls over financial reporting.

As part of the USA Patriot Act, signed into law on October 26, 2001, Congress adopted the International Money Laundering Abatement and Financial Anti-Terrorism Act of 2001 (the “Act”). The Act authorizes the Secretary of the Treasury, in consultation with the heads of other government agencies, to adopt special measures applicable to financial institutions such as banks, bank holding companies, broker-dealers and insurance companies. Among its other provisions, the Act requires each financial institution: (i) to establish an anti-money laundering program; (ii) to establish due diligence policies, procedures and controls that are reasonably designed to detect and report instances of money laundering in United States private banking accounts and correspondent accounts maintained for non-United States persons or their representatives; and (iii) to avoid establishing, maintaining, administering, or managing correspondent accounts in the United States for, or on behalf of, a foreign shell bank that does not have a physical presence in any country. In addition, the Act expands the circumstances under which funds in a bank account may be forfeited and requires covered financial institutions to respond under certain circumstances to requests for information from federal banking agencies within 120 hours.

The Department of Treasury has issued regulations implementing the due diligence requirements. These regulations require minimum standards to verify customer identity and maintain accurate records, encourage cooperation among financial institutions, federal banking agencies, and law enforcement authorities regarding possible money laundering or terrorist activities, prohibit the anonymous use of “concentration accounts,” and require all covered financial institutions to have in place an anti-money laundering compliance program.

As a New Jersey-chartered commercial bank, the Bank is subject to supervision and examination by the New Jersey Department of Banking and Insurance. The Bank is also subject to regulation by the FDIC, which is its principal federal bank regulator.

The Bank must comply with various requirements and restrictions under federal and state law, including the maintenance of reserves against deposits, restrictions on the types and amounts of loans that may be granted and the interest that may be charged thereon, limitations on the types of investments that may be made and the services that may be offered, and restrictions on dividends as described in the preceding section. Consumer laws and regulations also affect the operations of the Bank. In addition to the impact of regulation, commercial banks are affected significantly by the actions of the Federal Reserve Board which influence the money supply and credit availability in the national economy.

## Table of Contents

### Community Reinvestment Act

Under the Community Reinvestment Act (“CRA”), as implemented by FDIC regulations, a bank has a continuing and affirmative obligation, consistent with its safe and sound operation, to help meet the credit needs of its entire community, including low- and moderate-income neighborhoods. CRA does not establish specific lending requirements or programs for financial institutions nor does it limit an institution’s discretion to develop the types of products and services that it believes are best suited to its particular community, consistent with CRA. CRA requires the FDIC to assess an institution’s record of meeting the credit needs of its community and to take such record into account in its evaluation of certain applications by the applicable institution. The CRA requires public disclosure of an institution’s CRA rating and requires that the FDIC provide a written evaluation of an institution’s CRA performance utilizing a four-tiered descriptive rating system. An institution’s CRA rating is considered in determining whether to grant charters, branches and other deposit facilities, relocations, mergers, consolidations and acquisitions. Performance less than satisfactory may be the basis for denying an application. At its last CRA examination, the Bank was rated “satisfactory” under CRA.

### FIRREA

Under the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (“FIRREA”), a depository institution insured by the FDIC can be held liable for any loss incurred by, or reasonably expected to be incurred by, the FDIC in connection with (i) the default of a commonly controlled FDIC-insured depository institution or (ii) any assistance provided by the FDIC to a commonly controlled FDIC-insured depository institution in danger of default. These provisions have commonly been referred to as FIRREA’s “cross guarantee” provisions. Further, under FIRREA, the failure to meet capital guidelines could subject a bank to a variety of enforcement remedies available to federal regulatory authorities.

FIRREA also imposes certain independent appraisal requirements upon a bank’s real estate lending activities and further imposes certain loan-to-value restrictions on a bank’s real estate lending activities. The bank regulators have promulgated regulations in these areas.

### Insurance of Deposits

The Bank’s deposits are insured up to applicable limits by the Deposit Insurance Fund of the FDIC. Due to the recent difficult economic conditions, deposit insurance per account owner was raised to \$250,000. That limit was made permanent by the Dodd-Frank Act. The FDICIA is applicable to depository institutions and deposit insurance. The FDICIA requires the FDIC to establish a risk-based assessment system for all insured depository institutions. Under this legislation, the FDIC is required to establish an insurance premium assessment system based upon: (i) the probability that the insurance fund will incur a loss with respect to the institution, (ii) the likely amount of the loss, and (iii) the revenue needs of the insurance fund. In compliance with this mandate, the FDIC has developed a matrix that sets the assessment premium for a particular institution in accordance with its capital level and overall rating by the primary regulator. Under the matrix as currently in effect, the assessment rate ranges from 0 to 27 basis points of assessed deposits. The FDIC’s Transaction Account Guarantee Program (the “TAG Program”), one of two components of the Temporary Liquidity Guarantee Program (the “TLG Program”), provided participating depository institutions full federal deposit insurance coverage for non-interest bearing transaction deposit accounts, regardless of dollar amount.

Under the TAG Program, effective December 5, 2008, insured depository institutions that have not opted out of the TAG Program were subject to a 0.10% surcharge applied to non-interest bearing transaction deposit account balances in excess of \$250,000, which surcharge was added to the institution’s existing risk-based deposit insurance assessments. The Bank opted into the TAG Program, which was initially set to expire on December 31, 2009. On August 26, 2009, the FDIC extended the program until June 30, 2010, and revised the annualized assessment rate

charged for the guarantee to between 15 and 25 basis points, depending on the institution's risk category, on balances in noninterest-bearing transaction accounts that exceed the existing deposit insurance limit of \$250,000. On April 13, 2010, the FDIC announced a second extension of the program until December 31, 2010. The Bank opted into the extensions.

## Table of Contents

The Dodd-Frank Act provides that non-interest bearing transaction accounts have unlimited deposit insurance coverage from December 31, 2010 through December 31, 2012. As of January 1, 2013, the maximum deposit insurance coverage per account holder was \$250,000 for all depository accounts, including non-interest bearing transaction accounts, money market accounts, NOW accounts and savings accounts. The temporary unlimited deposit insurance coverage had replaced the TAG Program that expired on December 31, 2010 and did not apply to all accounts covered under the TAG Program. It covered only noninterest-bearing transaction accounts and Interest on Lawyer Trust Accounts (IOLTAs) where the accrued interest is paid to state bar associations or other organizations to fund legal assistance programs. Beginning January 1, 2011, low-interest consumer checking accounts (NOW Accounts) and all other fiduciary accounts maintained by attorneys or other entities are no longer eligible for the unlimited deposit insurance coverage. Unlike the TAG Program, which allowed banks to opt in, the temporary unlimited insurance coverage applied at all FDIC-insured institutions and was no longer funded by separate premiums.

The second component of the Temporary Liquidity Guarantee Program, the Debt Guarantee Program, guarantees certain senior unsecured debt of participating organizations. The Bank opted not to participate in this component of the Temporary Liquidity Guarantee Program.

In February 2011, the FDIC adopted final rules to implement changes required by the Dodd-Frank Act with respect to the FDIC assessment rules. In particular, the definition of an institution's deposit insurance assessment base is being changed from total deposits to total assets less tangible equity. In addition, the FDIC is revising the deposit insurance assessment rates down. The changes were effective April 1, 2011. The new initial base assessment rates range from 5 to 9 basis points for Risk Category I banks to 35 basis points for Risk Category IV banks. Risk Category II and III banks will have an initial base assessment rate of 14 or 23 basis points, respectively. The new rates and assessment base have reduced our current FDIC insurance assessment for 2012 compared to 2011. However, if the risk category of the Bank changes adversely, our FDIC insurance premiums could increase.

## Lending Limits

In January 2013, the New Jersey Department of Banking and Insurance issued an order requiring a New Jersey chartered bank's calculation of lending limits to any person or entity to include credit exposure to such person or entity arising from a derivative transaction, repurchase agreement, reverse repurchase agreement, securities lending transaction or securities borrowing transaction. Previously, such credit exposure was not included in a New Jersey chartered bank's calculation of lending limits. New Jersey chartered banks will have until July 1, 2013 to comply with the operative provisions of the order, which include compliance with all of the rules set forth in the Office of the Comptroller of the Currency's Interim Final Rule on Lending Limits (codified at 12 C.F.R pts. 32, 159 and 160). The Company does not anticipate this change in the calculation of lending limits to have a significant impact on its operations.

## Item 1A. Risk Factors.

The following are some important factors that could cause the Company's actual results to differ materially from those referred to or implied in any forward-looking statement. These are in addition to the risks and uncertainties discussed elsewhere in this Annual Report on Form 10-K and the Company's other filings with the SEC.

A prolonging of the economic downturn or the return of negative developments in the financial services industry could negatively impact our operations.

The global and U.S. economic downturn has resulted in uncertainty in the financial markets in general with the possibility of a slow recovery or a fall back into recession. The Federal Reserve, in an attempt to help the overall economy, has kept interest rates low through its targeted federal funds rate, the purchase of mortgage-backed securities and the purchase of the Treasury securities. If the Federal Reserve increases the federal funds rate, overall interest rates will likely rise which may negatively impact the housing markets and the U.S. economic recovery. A prolonging of the economic downturn or the return of negative developments in the financial services industry could negatively impact our operations by causing an increase in our provision for loan losses and a deterioration of our loan portfolio. Such a downturn may also adversely affect our ability to originate or sell loans. The occurrence of any of these events could have an adverse impact our financial performance.

A prolonging or worsening of the downturn affecting the economy and/or the real estate market in our primary market area would adversely affect our loan portfolio and our growth potential.

Table of Contents

Much of the Company's lending is in northern and central New Jersey. As a result of this geographic concentration, a further continued significant broad-based deterioration in economic conditions in the New Jersey metropolitan area could have a material adverse impact on the quality of the Company's loan portfolio, results of operations and future growth potential. A prolonged decline in economic conditions in our market area could restrict borrowers' ability to pay outstanding principal and interest on loans when due, and consequently, adversely affect the cash flows and results of operation of the Company's business.

The Company's loan portfolio is largely secured by real estate collateral located in the State of New Jersey. Conditions in the real estate markets in which the collateral for the Company's loans are located strongly influence the level of the Company's non-performing loans and results of operations. A continued decline in the New Jersey real estate markets could adversely affect the Company's loan portfolio. Decreases in local real estate values would adversely affect the value of property used as collateral for our loans. Adverse changes in the economy also may have a negative effect on the ability of our borrowers to make timely repayments of their loans, which would have an adverse impact on our earnings.

The Company faces significant competition.

The Company faces significant competition from many other banks, savings institutions and other financial institutions which have branch offices or otherwise operate in the Company's market area. Non-bank financial institutions, such as securities brokerage firms, insurance companies and money market funds, engage in activities which compete directly with traditional bank business, which has also led to greater competition. Many of these competitors have substantially greater financial resources than the Company, including larger capital bases that allow them to attract customers seeking larger loans than the Company is able to accommodate and the ability to aggressively advertise their products and to allocate considerable resources to locations and products perceived as profitable. There can be no assurance that the Company and the Bank will be able to successfully compete with these entities in the future.

The Company is subject to interest rate risk.

The Company's earnings are largely dependent upon its net interest income. Net interest income is the difference between interest income earned on interest-earning assets such as loans and securities and interest expense paid on interest-bearing liabilities such as deposits and borrowed funds. Interest rates are highly sensitive to many factors that are beyond the Company's control, including general economic conditions and policies of various governmental and regulatory agencies and, in particular, the Federal Reserve Board. Changes in monetary policy, including changes in interest rates, could influence not only the interest the Company receives on loans and securities and the amount of interest it pays on deposits and borrowings, but such changes could also affect (i) the Company's ability to originate loans and obtain deposits, (ii) the fair value of the Company's financial assets and liabilities, and (iii) the average duration of the Company's mortgage-backed securities portfolio. If the spread between the interest rates paid on deposits and other borrowings and the interest rates received on loans and other investments narrows, the Company's net interest income, and therefore earnings, could be adversely affected. This also includes the risk that interest-earning assets may be more responsive to changes in interest rates than interest-bearing liabilities, or vice versa (repricing risk), the risk that the individual interest rates or rate indices underlying various interest-earning assets and interest bearing liabilities may not change in the same degree over a given time period (basis risk), and the risk of changing interest rate relationships across the spectrum of interest-earning asset and interest-bearing liability maturities (yield curve risk).

Although management believes it has implemented effective asset and liability management strategies to reduce the potential effects of changes in interest rates on the Company's results of operations, any substantial, unexpected, prolonged change in market interest rates could have a material adverse effect on the Company's financial condition

and results of operations.

Historically low interest rates may adversely affect our net interest income and profitability.

During the last four years it has been the policy of the Federal Reserve Board to maintain interest rates at historically low levels through its targeted federal funds rate and the purchase of mortgage-backed securities. As a result, yields have been at levels lower than were available prior to 2008 on securities we have purchased and loans we have originated. Consequently, the average yield on our interest-earning assets has decreased during the recent low interest rate environment. As a general matter, our interest-bearing liabilities re-price or mature more quickly than our interest-earning assets, which has contributed to increases in net interest income (the difference between interest income earned on assets and interest expense paid on liabilities) in the short term. However, our ability to lower our interest expense is limited at these interest rate levels, while the average yield on our interest-earning assets may continue to decrease. The Federal Reserve Board has indicated its intention to maintain low interest rates in the near future. Accordingly, our net interest income may decrease, which may have an adverse affect on our profitability.

## Table of Contents

The Company is subject to risks associated with speculative construction lending.

The risks associated with speculative construction lending include the borrower's inability to complete the construction process on time and within budget, the sale of the project within projected absorption periods, the economic risks associated with real estate collateral, and the potential of a rising interest rate environment. Such loans may include financing the development and/or construction of residential subdivisions. This activity may involve financing land purchase, infrastructure development (i.e. roads, utilities, etc.), as well as construction of residences or multi-family dwellings for subsequent sale by developer/builder. Because the sale of developed properties is integral to the success of developer business, loan repayment may be especially subject to the volatility of real estate market values. Management has established underwriting and monitoring criteria to minimize the inherent risks of speculative commercial real estate construction lending. Further, management concentrates lending efforts with developers demonstrating successful performance on marketable projects within the Bank's lending areas.

Our mortgage warehouse lending business represents a significant portion of our overall lending activity and is subject to numerous risks.

Our primary lending emphasis is the origination of commercial and commercial real estate loans and mortgage warehouse lines of credit. Based on the composition of our loan portfolio, the inherent primary risks are deteriorating credit quality, a decline in the economy, and a decline in New Jersey real estate market values. Any one, or a combination, of these events may adversely affect the loan portfolio and may result in increased delinquencies, loan losses and increased future provision levels.

A significant portion of our loan portfolio consists of the mortgage warehouse lines of credit. Risks associated with these loans include, without limitation, (i) credit risks relating to the mortgage bankers that borrow from us, (ii) the risk of intentional misrepresentation or fraud by any of such mortgage bankers, (iii) changes in the market value of mortgage loans originated by the mortgage banker, the sale of which is the expected source of repayment of the borrowings under a warehouse line of credit, due to changes in interest rates during the time in warehouse, or (iv) unsalable or impaired mortgage loans so originated, which could lead to decreased collateral value and the failure of a purchaser of the mortgage loan to purchase the loan from the mortgage banker.

The impact of interest rates on our mortgage warehouse business can be significant. Changes in interest rates can impact the number of residential mortgages originated and initially funded under mortgage warehouse lines of credit and thus our mortgage warehouse related revenues. A decline in mortgage rates generally increases the demand for mortgage loans. Conversely, in a constant or increasing rate environment, we would expect fewer loans to be originated. Although we use models to assess the impact of interest rates on mortgage related revenues, the estimates of net income produced by these models are dependent on estimates and assumptions of future loan demand, prepayment speeds and other factors which may overstate or understate actual subsequent experience. Further, the concentration of our loan portfolio on loans originated through our mortgage warehouse business increases the risk associated with our loan portfolio because of the concentration of loans in a single line of business, namely one-to-four family residential mortgage lending, and in a particular segment of that business, namely mortgage warehouse lending.

If our allowance for loan losses is not sufficient to cover actual loan losses, our earnings could decrease.

We make various assumptions and judgments about the collectability of our loan portfolio, including the creditworthiness of our borrowers and the value of the real estate and other assets serving as collateral for the repayment of many of our loans. In determining the amount of the allowance for loan losses, we review our loans and our loan and delinquency experience, and we evaluate economic conditions. If our assumptions are incorrect, our allowance for loan losses may not be sufficient to cover losses inherent in our loan portfolio, resulting in additions to

our allowance. Material additions to our allowance would materially decrease our net income.

Table of Contents

In addition, bank regulators periodically review our loan portfolio and our allowance for loan losses and may require us to increase our provision for loan losses or recognize further loan charge-offs or reclassify loans. Any increase in our allowance for loan losses or loan charge-offs or loan reclassifications as required by these regulatory authorities might have a material adverse effect on our financial condition and results of operations.

Federal and state government regulation impacts the Company's operations.

The operations of the Company and the Bank are heavily regulated and will be affected by present and future legislation and by the policies established from time to time by various federal and state regulatory authorities. In particular, the monetary policies of the Federal Reserve Board have had a significant effect on the operating results of banks in the past and are expected to continue to do so in the future. Among the instruments of monetary policy used by the Federal Reserve Board to implement its objectives are changes in the discount rate charged on bank borrowings. It is not possible to predict what changes, if any, will be made to the monetary policies of the Federal Reserve Board or to existing federal and state legislation or the effect that such changes may have on the future business and earnings prospects of the Company.

The Company and the Bank are subject to examination, supervision and comprehensive regulation by various federal and state agencies. Compliance with the rules and regulations of these agencies may be costly and may limit growth and restrict certain activities, including payment of dividends, investments, loans and interest rate charges, interest rates paid on deposits, and locations of offices. The Bank is also subject to capitalization guidelines set forth in federal legislation and regulations.

The laws and regulations applicable to the banking industry could change at any time, and we cannot predict the impact of these changes on our business and profitability. Because government regulation greatly affects the business and financial results of all commercial banks and bank holding companies, the cost of compliance could adversely affect the Company's result of operations.

Legislative and regulatory reforms may materially adversely impact our financial condition, results of operation, liquidity, or stock price.

The Dodd-Frank Act restructures the regulation of depository institutions. The Dodd-Frank Act contains various provisions designed to enhance the regulation of depository institutions and prevent the recurrence of a financial crisis such as occurred in 2008-2009. Also included was the creation of the Consumer Financial Protection Bureau, a new federal agency administering consumer and fair lending laws, a function that was previously performed by the depository institution regulators. The federal preemption of state laws currently accorded federally chartered depository institutions has been reduced as well. We expect that many of the requirements called for in the Dodd-Frank Act will be implemented over time, and most will be subject to implementing regulations over the course of several years. Given the uncertainty associated with the manner in which the provisions of the Dodd-Frank Act will be implemented by the various regulatory agencies and through regulations, the full extent of the impact such requirements will have on financial institutions' operations is unclear. The changes resulting from the Dodd-Frank Act may impact the profitability of our business activities, require changes to certain of our business practices, impose upon us more stringent capital, liquidity and leverage ratio requirements or otherwise adversely affect our business. These changes may also require us to invest significant management attention and resources to evaluate and make necessary changes in order to comply with new statutory and regulatory requirements.

In addition, international banking industry regulators have largely agreed upon significant changes in the regulation of capital required to be held by banks and their holding companies to support their businesses. The new international rules, known as Basel III, generally increase the capital required to be held and narrow the types of instruments which will qualify as providing appropriate capital and impose a new liquidity measurement. The Basel III requirements are

complex and will be phased in over many years.

The Basel III rules do not apply to U.S. banks or holding companies automatically. Among other things, the Dodd-Frank Act requires U.S. regulators to reform the system under which the safety and soundness of banks and other financial institutions, individually and systemically, are regulated. That reform effort will include the regulation of capital and liquidity. In June 2012, the federal bank regulatory agencies issued a series of proposed rules that would revise their risk-based and leverage capital requirements and their method for calculating risk-weighted assets to make them consistent with Basel III and certain provisions of the Dodd-Frank Act. Among other things, the proposed rules establish a new minimum common equity Tier 1 capital ratio of 4.5% of risk-weighted assets and a higher minimum Tier 1 risk-based capital ratio of 6.0% (up from the present 4.0%). The proposed rules indicated that the final rule would become effective on January 1, 2013, and the changes set forth in the final rules will be phased in from January 1, 2013 through January 1, 2019. However, the federal bank regulatory agencies indicated in November 2012 that they did not expect that any of the proposed rules would become effective on January 1, 2013. The federal bank regulatory agencies did not specify a new deadline.

## Table of Contents

One likely effect of the proposed rules' tightening of U.S. capital requirements would be to increase our cost of capital, among other things. Any permanent significant increase in our cost of capital could have significant adverse impacts on the profitability of many of our products, the types of products we could offer profitably, our overall profitability, and our overall growth opportunities, among other things. Although most financial institutions would be affected, these business impacts could be felt unevenly, depending upon the business and product mix of each institution. Other potential effects could include less ability to repurchase our common shares, higher dilution of common shareholders, and a higher risk that we might fall below regulatory capital thresholds in an adverse economic cycle.

The price of our common stock may fluctuate.

The price of our common stock on the NASDAQ Global Market constantly changes and recently, given the uncertainty in the financial markets, has fluctuated widely. From the beginning of fiscal year 2011 through the end of fiscal year 2012, our stock price fluctuated between a high of \$8.58 per share and a low of \$4.99 per share. We expect that the market closing price of our common stock will continue to fluctuate. Consequently, the current market price of our common stock may not be indicative of future market prices, and we may be unable to sustain or increase the value of an investment in our common stock.

Our common stock price can fluctuate as a result of a variety of factors, many of which are beyond our control. These factors include:

- quarterly fluctuations in our operating and financial results;
- operating results that vary from the expectations of management, securities analysts and investors;
- changes in expectations as to our future financial performance, including financial estimates by securities analysts and investors;
- events negatively impacting the financial services industry which result in a general decline in the market valuation of our common stock;
  - announcements of material developments affecting our operations or our dividend policy;
  - future sales of our equity securities;
- new laws or regulations or new interpretations of existing laws or regulations applicable to our business;
  - changes in accounting standards, policies, guidance, interpretations or principles; and
  - general domestic economic and market conditions.

In addition, recently the stock market generally has experienced extreme price and volume fluctuations, and industry factors and general economic and political conditions and events, such as economic slowdowns or recessions, interest rate changes or credit loss trends, could also cause our stock price to decrease regardless of our operating results.

The Bank is subject to liquidity risk.

Liquidity risk is the potential that the Bank will be unable to meet its obligations as they become due, capitalize on growth opportunities as they arise, or pay regular dividends because of an inability to liquidate assets or obtain adequate funding in a timely basis, at a reasonable cost and within acceptable risk tolerances.

Table of Contents

Liquidity is required to fund various obligations, including credit commitments to borrowers, mortgage and other loan originations, withdrawals by depositors, repayment of borrowings, dividends to shareholders, operating expenses and capital expenditures.

Liquidity is derived primarily from retail deposit growth and retention; principal and interest payments on loans; principal and interest payments; sale, maturity and prepayment of investment securities; net cash provided from operations and access to other funding sources.

Our access to funding sources in amounts adequate to finance our activities could be impaired by factors that affect us specifically or the financial services industry in general. Factors that could detrimentally impact our access to liquidity sources include a decrease in the level of our business activity due to a market downturn or adverse regulatory action against us. Our ability to borrow could also be impaired by factors that are not specific to us, such as a severe disruption of the financial markets or negative views and expectations about the prospects for the financial services industry as a whole. If we become unable to obtain funds when needed, it could have a material adverse effect on our business and in turn, our consolidated financial condition and results of operations.

The Company is subject to liquidity risk.

Our recurring cash requirements, at the holding company level, primarily consist of interest expense on junior subordinated debentures issued to capital trusts. Holding company cash needs are routinely satisfied by dividends collected from the Bank.

While we expect that the holding company will continue to receive dividends from the Bank sufficient to satisfy holding company cash needs, in the event that the Bank has insufficient resources or is subject to legal or regulatory restrictions on the payment of dividends, the Bank may be unable to provide dividends or a sufficient level of dividends to the holding company; in that event, the holding company may have insufficient funds to satisfy its obligations as they become due.

Future growth, operating results or regulatory requirements may require us to raise additional capital but that capital may not be available.

We are required by federal and state regulatory authorities to maintain adequate levels of capital to support our operations. To the extent our future operating results erode capital or we elect to expand through loan growth or acquisition, we may be required to raise additional capital. Our ability to raise capital will depend on conditions in the capital markets, which are outside of our control, and on our financial performance. Accordingly, we cannot be assured of our ability to raise capital when needed or on favorable terms. If we cannot raise additional capital when needed, we will be subject to increased regulatory supervision and the imposition of restrictions on our growth and business. These actions could negatively impact our ability to operate or further expand our operations and may result in increases in operating expenses and reductions in revenues that could have a material effect on our consolidated financial condition and results of operations.

Higher FDIC deposit insurance premiums and assessments could adversely affect our financial condition.

In February 2011, the FDIC adopted final rules to implement changes required by the Dodd-Frank Act with respect to the FDIC assessment rules. In particular, the definition of an institution's deposit insurance assessment base is being changed from total deposits to total assets less tangible equity. In addition, the FDIC is revising the deposit insurance assessment rates down. The changes were effective April 1, 2011. The new initial base assessment rates range from 5 to 9 basis points for Risk Category I banks to 35 basis points for Risk Category IV banks. Risk Category II and III banks will have an initial base assessment rate of 14 or 23 basis points, respectively. The new rates and assessment

base have reduced our current FDIC insurance assessment for 2012 compared to 2011. However, if the risk category of the Bank changes adversely, our FDIC insurance premiums could increase.

Recent insured depository institution failures, as well as deterioration in banking and economic conditions, have significantly increased the loss provisions of the FDIC, resulting in a decline in the designated reserve ratio of the Deposit Insurance Fund to historical lows. Effective January 1, 2011, the FDIC increased the designated reserve ratio from 1.25 to 2.00. In addition, the Dodd-Frank Act permanently increased the deposit insurance limit on FDIC deposit insurance coverage to \$250,000 per insured depositor, retroactive to January 1, 2008, which may result in even larger losses to the Deposit Insurance Fund.

Table of Contents

The FDIC may further increase or decrease the assessment rate schedule in order to manage the Deposit Insurance Fund to prescribed statutory target levels. An increase in the risk category for the Bank or in the assessment rates could have an adverse effect on the Bank's earnings. The FDIC may terminate deposit insurance if it determines the institution involved has engaged in or is engaging in unsafe or unsound banking practices, is in an unsafe or unsound condition, or has violated applicable laws, regulations or orders.

Future offerings of debt or other securities may adversely affect the market price of our stock.

In the future, we may attempt to increase our capital resources or, if our or the Bank's capital ratios fall below the required minimums, we or the Bank could be forced to raise additional capital by making additional offerings of debt or preferred equity securities, including medium-term notes, trust preferred securities, senior or subordinated notes and preferred stock. Upon liquidation, holders of our debt securities and shares of preferred stock and lenders with respect to other borrowings will receive distributions of our available assets prior to the holders of our common stock. Additional equity offerings may dilute the holdings of our existing shareholders or reduce the market price of our common stock, or both. Holders of our common stock are not entitled to preemptive rights or other protections against dilution.

The Company may lose lower-cost funding sources.

Checking, savings, and money market deposit account balances and other forms of customer deposits can decrease when customers perceive alternative investments, such as the stock market, as providing a better risk/return tradeoff. If customers move money out of bank deposits and into other investments, the Company could lose a relatively low-cost source of funds, increasing its funding costs and reducing the Company's net interest income and net income.

There may be changes in accounting policies or accounting standards.

The Company's accounting policies are fundamental to understanding its financial results and condition. Some of these policies require the use of estimates and assumptions that may affect the value of the Company's assets or liabilities and financial results. The Company identified its accounting policies regarding the allowance for loan losses, security impairment, goodwill and other intangible assets, and income taxes to be critical because they require management to make difficult, subjective and complex judgments about matters that are inherently uncertain. Under each of these policies, it is possible that materially different amounts would be reported under different conditions, using different assumptions, or as new information becomes available.

From time to time the Financial Accounting Standards Board and the SEC change the financial accounting and reporting standards that govern the form and content of the Company's external financial statements. Recently, FASB has proposed new accounting standards related to fair value accounting and accounting for leases that could materially change the Company's financial statements in the future. In addition, accounting standard setters and those who interpret the accounting standards (such as the FASB, SEC, banking regulators and the Company's independent auditors) may change or even reverse their previous interpretations or positions on how these standards should be applied. Changes in financial accounting and reporting standards and changes in current interpretations may be beyond the Company's control, can be hard to predict and could materially impact how the Company reports its financial results and condition. In certain cases, the Company could be required to apply a new or revised standard retroactively or apply an existing standard differently (also retroactively) which may result in the Company restating prior period financial statements in material amounts.

The Company encounters continuous technological change.

The financial services industry is continually undergoing rapid technological change with frequent introductions of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better serve customers and to reduce costs. The Company's future success depends, in part, upon its ability to address the needs of its customers by using technology to provide products and services that will satisfy customer demands, as well as to create additional efficiencies in the Company's operations. Many of the Company's competitors have substantially greater resources to invest in technological improvements. The Company may not be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to its customers. Failure to successfully keep pace with technological change affecting the financial services industry could have a material adverse impact on the Company's business and, in turn, the Company's financial condition and results of operations.

Table of Contents

The Company is subject to operational risk.

The Company faces the risk that the design of its controls and procedures, including those to mitigate the risk of fraud by employees or outsiders, may prove to be inadequate or are circumvented, thereby causing delays in detection of errors or inaccuracies in data and information. Management regularly reviews and updates the Company's internal controls, disclosure controls and procedures, and corporate governance policies and procedures. Any system of controls, however well designed and operated, is based in part on certain assumptions and can provide only reasonable, not absolute, assurances that the objectives of the system are met. Any failure or circumvention of the Company's controls and procedures or failure to comply with regulations related to controls and procedures could have a material adverse effect on the Company's business, results of operations and financial condition.

The Company may also be subject to disruptions of its systems arising from events that are wholly or partially beyond its control (including, for example, computer viruses or electrical or telecommunications outages), which may give rise to losses in service to customers and to financial loss or liability. The Company is further exposed to the risk that its external vendors may be unable to fulfill their contractual obligations (or will be subject to the same risk of fraud or operational errors by their respective employees as is the Company) and to the risk that the Company's (or its vendors') business continuity and data security systems prove to be inadequate.

The Company's performance is largely dependent on the talents and efforts of highly skilled individuals. There is intense competition in the financial services industry for qualified employees. In addition, the Company faces increasing competition with businesses outside the financial services industry for the most highly skilled individuals. The Company's business operations could be adversely affected if it were unable to attract new employees and retain and motivate its existing employees.

There may be claims and litigation.

From time to time as part of the Company's normal course of business, customers make claims and take legal action against the Company based on actions or inactions of the Company. If such claims and legal actions are not resolved in a manner favorable to the Company, they may result in financial liability and/or adversely affect the market perception of the Company and its products and services. This may also impact customer demand for the Company's products and services. Any financial liability or reputation damage could have a material adverse effect on the Company's business, which, in turn, could have a material adverse effect on its financial condition and results of operations.

Severe weather, acts of terrorism and other external events could significantly impact our business.

A significant portion of our primary markets are located near coastal waters which could generate naturally occurring severe weather, or in response to climate change, that could have a significant impact on our ability to conduct business. Additionally, surrounding areas, including New Jersey, may be central targets for potential acts of terrorism against the United States. Such events could affect the stability of our deposit base, impair the ability of borrowers to repay outstanding loans, impair the value of collateral securing loans, cause significant property damage, result in loss of revenue and/or cause us to incur additional expenses. Although we have established disaster recovery policies and procedures, the occurrence of any such event in the future could have a material adverse effect on our business, which, in turn, could have a material adverse effect on our financial condition and results of operations. On October 29, 2012, Hurricane Sandy caused destruction along the East Coast, including in New Jersey, and resulted in, among other things, severe property damage and the closure of many businesses and financial markets. The financial impact to the Company was minimal as our mortgage loan customers in the areas affected by Hurricane Sandy did not sustain severe damage to their real properties and we experienced no loan delinquencies specifically related to Hurricane Sandy.

## Item 2. Properties.

We currently operate 14 branch offices in New Jersey, which includes the Bank's main office in Cranbury, New Jersey. In addition, we have a Mortgage Warehousing Funding Office which we lease in Somerset, New Jersey and an Operations Center which we lease in Cranbury, New Jersey. The following table provides certain information with respect to our offices as of December 31, 2012:

	Location	Leased or Owned	Original Year Leased or Acquired	Year of Lease Expiration
Main Office	2650 Route 130 Cranbury, New Jersey	Leased	1989	2017
Village Office	74 North Main Street Cranbury, New Jersey	Owned	2005	---
Plainsboro Office	Plainsboro Village Center 11 Shalks Crossing Road Plainsboro, New Jersey	Leased	1998	2021
Hamilton Office	3659 Nottingham Way Hamilton, New Jersey	Leased	1999	2014
Princeton Office	The Windrows at Princeton Forrestal 2000 Windrow Drive Princeton, New Jersey	Leased	2001	2016
Perth Amboy Office	145 Fayette Street Perth Amboy, New Jersey	Leased	2003	2018
Jamesburg Office	1 Harrison Street Jamesburg, New Jersey	Owned	2002	---
West Windsor Office	44 Washington Road Princeton Jct, New Jersey	Leased	2004	2019
Fort Lee Office	180 Main Street Fort Lee, New Jersey	Leased	2006	2014

Hightstown Office	140 Mercer Street Hightstown, New Jersey	Leased	2007	2014
Mortgage Warehouse Funding Office	285 Davidson Avenue Somerset, New Jersey	Leased	2009	2015
Lawrenceville Property	150 Lawrenceville-Pennington Road, Lawrenceville, New Jersey	Owned	2009	---
South River Operations Center	1246 South River Road, Bldg. 2 Cranbury, New Jersey	Leased	2010	2015

Rocky Hill Office	995 Route 518 Skillman, New Jersey	Owned	2011	---
Hopewell Office	86 East Broad Street Hopewell, New Jersey	Owned	2011	---
Hillsborough Office	32 New Amwell Road Hillsborough, New Jersey	Owned	2011	---

Management believes the foregoing facilities are suitable for the Company's and the Bank's present and projected operations.

## Item 3. Legal Proceedings.

The Company may, in the ordinary course of business, become a party to litigation involving collection matters, contract claims and other legal proceedings relating to the conduct of its business. Management is not aware of any material pending legal proceedings against the Company which, if determined adversely, would have a material adverse effect on the Company's financial position or results of operations.

## Item 4. Mine Safety Disclosures.

Not applicable

## PART II

## Item 5. Market for Registrant's Common Equity, Related Shareholder Matters and Issuer Purchases of Equity Securities.

The common stock of the Company trades on the Nasdaq Global Market under the trading symbol "FCCY". The following are the high and low sales prices per share for each quarter during 2012 and 2011, as reported on the Nasdaq Global Market.

	2012(1)		2011(1)	
	High	Low	High	Low
First Quarter	\$ 8.16	\$ 5.74	\$ 8.61	\$ 7.39
Second Quarter	\$ 8.58	\$ 7.03	\$ 7.85	\$ 6.57
Third Quarter	\$ 8.62	\$ 7.45	\$ 7.70	\$ 5.47
Fourth Quarter	\$ 8.48	\$ 7.80	\$ 6.35	\$ 4.99

(1) Prices have been retroactively adjusted for the 5% stock dividend declared December 20, 2012 and paid January 31, 2013 to shareholders of record on January 14, 2013.

As of February 28, 2013, there were approximately 276 record holders of the Company's common stock.

The Company paid 5% stock dividends on January 31, 2013, and February 2, 2012.

The Company has never paid a cash dividend on its common stock and there are no plans to pay a cash dividend on its common stock at this time. In addition, please refer to the discussion under the heading "Shareholders' Equity and Dividends" under Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations" for additional restrictions on cash dividends.

Table of Contents

## Issuer Purchases of Equity Securities

On July 21, 2005, the Board of Directors authorized a stock repurchase program under which the Company may repurchase in open market or privately negotiated transactions up to 5% of its common shares outstanding at that date. The Company undertook this repurchase program in order to increase shareholder value. The following table provides common stock repurchases made by or on behalf of the Company during the three months ended December 31, 2012, which purchases were made under the stock repurchase program.

## Issuer Purchases of Equity Securities (1)

Beginning	Period	Ending	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased As Part of Publicly Announced Plan or Program	Maximum Number of Shares That May Yet be Purchased Under the Plan or Program
October 1, 2012	October 31, 2012		-	\$ -	-	187,559
November 1, 2012	November 30, 2012		2,337 (2)	8.95	-	187,559
December 1, 2012	December 31, 2012		-	-	-	187,559
		Total	2,337 (2)	\$ 8.95	-	187,559

(1) The Company's common stock repurchase program covers a maximum of 225,824 shares of common stock of the Company, representing 5% of the outstanding common stock of the Company on July 21, 2005, as adjusted for subsequent stock dividends.

(2) Shares repurchased by the Company from an employee not pursuant to the Company's common stock repurchase program.

## Item 6. Selected Financial Data.

Not required.

## Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation.

This discussion should be read in conjunction with the consolidated financial statements, notes and tables included elsewhere in this report. Throughout the following sections, the "Company" refers to 1st Constitution Bancorp and, as the context requires, its wholly-owned subsidiary, 1st Constitution Bank (the "Bank") and the Bank's wholly-owned subsidiaries, 1st Constitution Investment Company of New Jersey, Inc., FCB Assets Holdings, Inc., 1st Constitution Title Agency, L.L.C., 204 South Newman Street Corp. and 249 New York Avenue, LLC. 1st Constitution Capital Trust II ("Trust II"), a subsidiary of the Company, is not included in the Company's consolidated financial statements as it is a variable interest entity and the Company is not the primary beneficiary. The purpose of this discussion and analysis is to assist in the understanding and evaluation of the Company's financial condition, changes in financial condition and results of operations.

Table of Contents

Critical Accounting Policies and Estimates

“Management’s Discussion and Analysis of Financial Condition and Results of Operation” is based upon the Company’s consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. Note 1 to the Company’s Consolidated Financial Statements for the year ended December 31, 2012 contains a summary of the Company’s significant accounting policies. Management believes the Company’s policies with respect to the methodologies for the determination of the allowance for loan losses and for determining other-than-temporary security impairment involve a higher degree of complexity and requires management to make difficult and subjective judgments which often require assumptions or estimates about highly uncertain matters. Changes in these judgments, assumptions or estimates could materially impact results of operations. These critical policies and their application are periodically reviewed with the Audit Committee and the Board of Directors. The provision for loan losses is based upon management’s evaluation of the adequacy of the allowance, including an assessment of known and inherent risks in the portfolio, giving consideration to the size and composition of the loan portfolio, actual loan loss experience, level of delinquencies, detailed analysis of individual loans for which full collectability may not be assured, the existence and estimated net realizable value of any underlying collateral and guarantees securing the loans, and current economic and market conditions. Although management uses the best information available to it, the level of the allowance for loan losses remains an estimate which is subject to significant judgment and short-term change. Various regulatory agencies, as an integral part of their examination process, periodically review the Company’s allowance for loan losses. Such agencies may require the Company to make additional provisions for loan losses based upon information available to them at the time of their examination. Furthermore, the majority of the Company’s loans are secured by real estate in the State of New Jersey. Accordingly, the collectibility of a substantial portion of the carrying value of the Company’s loan portfolio is susceptible to changes in local market conditions and may be adversely affected should real estate values decline or should the Central New Jersey area experience an adverse economic shock. Future adjustments to the allowance for loan losses may be necessary due to economic, operating, regulatory and other conditions beyond the Company’s control.

Real estate acquired through foreclosure, or a deed-in-lieu of foreclosure, is recorded at fair value less estimated selling costs at the date of acquisition or transfer, and subsequently at the lower of its new cost or fair value less estimated selling costs. Adjustments to the carrying value at the date of acquisition or transfer are charged to the allowance for loan losses. The carrying value of the individual properties is subsequently adjusted to the extent it exceeds estimated fair value less estimated selling costs, at which time a provision for losses on such real estate is charged to operations. Appraisals are critical in determining the fair value of the other real estate owned amount. Assumptions for appraisals are instrumental in determining the value of properties. Overly optimistic assumptions or negative changes to assumptions could significantly affect the valuation of a property. The assumptions supporting such appraisals are carefully reviewed by management to determine that the resulting values reasonably reflect amounts realizable.

Management utilizes various inputs to determine the fair value of its investment portfolio. To the extent they exist, unadjusted quoted market prices in active markets (level 1) or quoted prices on similar assets (level 2) are utilized to determine the fair value of each investment in the portfolio. In the absence of quoted prices, valuation techniques would be used to determine fair value of any investments that require inputs that are both significant to the fair value measurement and unobservable (level 3). Valuation techniques are based on various assumptions, including, but not limited to cash flows, discount rates, rate of return, adjustments for nonperformance and liquidity, and liquidation values. A significant degree of judgment is involved in valuing investments using level 3 inputs. The use of different assumptions could have a positive or negative effect on consolidated financial condition or results of operations.

Management must periodically evaluate if unrealized losses (as determined based on the securities valuation methodologies discussed above) on individual securities classified as held to maturity or available for sale in the investment portfolio are considered to be other-than-temporary. The analysis of other-than-temporary impairment requires the use of various assumptions, including, but not limited to, the length of time an investment's book value is greater than fair value, the severity of the investment's decline, as well as any credit deterioration of the investment. If the decline in value of an investment is deemed to be other-than-temporary, the investment is written down to fair value and a non-cash impairment charge is recognized in the period of such evaluation.

#### Rights Offering to Existing Shareholders

During the third quarter of 2012, the Company launched a shareholders' common stock rights offering, which expired on October 5, 2012. The Company received gross proceeds of \$5.0 million from holders of subscription rights who exercised their basic subscription rights and from holders who exercised the over-subscription privilege. The rights offering was fully subscribed. Accordingly, the Company issued a total of 555,555 shares of common stock to the holders of subscription rights who validly exercised their subscription rights, including pursuant to the exercise of the over-subscription privilege.

## Table of Contents

### Acquisition of Three Branches in 2011

On March 25, 2011, the Bank acquired certain deposit and other liabilities, real estate and related assets of the Rocky Hill, Hillsborough and Hopewell, New Jersey banking offices from another financial institution for a purchase price of \$9.85 million (the “March 2011 Acquisition”).

The Company accounted for the March 2011 Acquisition using applicable accounting guidance regarding business combinations. The fair value of savings and transaction deposit accounts acquired was assumed to approximate the carrying value as these accounts have no stated maturity and are payable on demand. A core deposit intangible was ascribed to the value of non-maturity deposits based upon an independent third party evaluation which was prepared using the actual characteristics of the deposits and assumptions we believe to be reasonable. Certificates of deposit accounts were valued utilizing a discounted cash flows analysis based upon the underlying accounts’ contractual maturities and interest rates. The present value of the projected cash flow was then determined using discount rates based upon certificate of deposit interest rates available in the marketplace for accounts with similar terms. The fair value of the three branch buildings was determined via appraisals performed by qualified independent third party appraisers. The fair value of loans acquired, all of which were performing, was assumed to approximate amortized cost based upon the small size and nature of those loans.

As a result of the March 2011 Acquisition, the three branches became branches of the Bank. Included in the March 2011 Acquisition were the assumption of deposit liabilities of \$111.9 million, primarily consisting of demand deposits, and the acquisition of cash of approximately \$101.5 million, fixed assets of approximately \$4.6 million, which includes, without limitation, ownership of the real estate and improvements upon which the branches are situated, and loans of \$862,000. The Bank recorded goodwill of approximately \$3.2 million and a core deposit intangible asset of approximately \$1.7 million as a result of the March 2011 Acquisition.

### Results of Operations

The Company reported net income for the year ended December 31, 2012 of \$5,060,504, an increase of 28.7% from the \$3,931,443 reported for the year ended December 31, 2011. The increase was due primarily to increases in net interest income and noninterest income, which were partially offset by increases in non-interest expenses and income taxes during the year ended December 31, 2012 compared to the prior year.

Diluted net income per common share was \$0.90 for the year ended December 31, 2012 compared to \$0.74 reported for the year ended December 31, 2011. Basic net income per common share for the year ended December 31, 2012 was \$0.92 as compared to \$0.74 reported for the year ended December 31, 2011. All per share information has been restated for the effect of a 5% stock dividend declared on December 20, 2012 and paid on January 31, 2013 to shareholders of record on January 14, 2013.

Return on average assets (“ROA”) and return on average equity (“ROE”) were 0.65% and 8.63%, respectively, for the year ended December 31, 2012, compared to 0.54% and 7.60%, respectively, for the year ended December 31, 2011 and 0.50% and 5.78%, respectively, for the year ended December 31, 2010. Key performance ratios improved for the 2012 fiscal year as compared to the prior year due to the higher net income for the year ended December 31, 2012 as compared to the year ended December 31, 2011.

The Bank’s results of operations depend primarily on net interest income, which is primarily affected by the market interest rate environment, the shape of the U.S. Treasury yield curve, and the difference between the yield on interest-earning assets and the rate paid on interest-bearing liabilities. Other factors that may affect the Bank’s operating results are general and local economic and competitive conditions, government policies and actions of regulatory authorities. The net interest margin for the year ended December 31, 2012 was 3.98% as compared to the

3.55% net interest margin recorded for the year ended December 31, 2011, an increase of 43 basis points. The Company will continue to closely monitor the mix of earning assets and funding sources to maximize net interest income during this challenging interest rate environment.

#### Net Interest Income

Net interest income, the Company's largest and most significant component of operating income, is the difference between interest and fees earned on loans and other earning assets, and interest paid on deposits and borrowed funds. This component represented 84.0% of the Company's non-GAAP net revenues for the year ended December 31, 2012. Net interest income also depends upon the relative amount of average interest earning assets, average interest-bearing liabilities, and the interest rate earned or paid on them, respectively.

Table of Contents

The following tables set forth the Company's consolidated average balances of assets and liabilities and shareholders' equity as well as interest income and expense on related items, and the Company's average yield or rate for the years ended December 31, 2012, 2011 and 2010. The average rates are derived by dividing interest income and expense by the average balance of assets and liabilities, respectively.

## Average Balance Sheets with Resultant Interest and Rates

- (1) Loan origination fees are considered an adjustment to interest income. For the purpose of calculating loan yields, average loan balances include nonaccrual loans with no related interest income. Please refer to Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation under the heading "Non-Performing Assets" for a discussion of the Bank's policy with regard to non-accrual loans.
- (2) The interest rate spread is the difference between the average yield on interest earning assets and the average rate paid on interest bearing liabilities.
- (3) The net interest margin is equal to net interest income divided by average interest earning assets.
- (4) Tax equivalent basis.

Table of Contents

Changes in net interest income and margin result from the interaction between the volume and composition of interest earning assets, interest bearing liabilities, related yields, and associated funding costs. The Rate/Volume Table demonstrates the impact on net interest income of changes in the volume of interest earning assets and interest bearing liabilities and changes in interest rates earned and paid.

The Company's net interest income increased on a tax equivalent basis by \$4,704,754, or 19.8%, to \$28,490,616 for the year ended December 31, 2012, from the \$23,785,862 reported for the year ended December 31, 2011. As indicated in the Rate/Volume Table, the principal factor contributing to the increase in net interest income for the year ended December 31, 2012 was an increase in interest income of \$3,068,532, resulting from increased volumes on the interest-earning loan portfolio.

The Company's net interest income increased on a tax equivalent basis by \$3,086,830, or 14.9%, to \$23,785,862 for the year ended December 31, 2011, from the \$20,699,032 reported for the year ended December 31, 2010. As indicated in the Rate/Volume Table, the principal factor contributing to the increase in net interest income for the year ended December 31, 2011 was a decrease in the interest expense of \$2,032,134, resulting from decreased rates on the interest-bearing liability components, and an increase in interest income from investment securities.

---------------------	--------------	--------------	--------------	------------	--------------

Average interest earning assets increased by \$46,456,303, or 6.9%, to \$716,199,958 for the year ended December 31, 2012 from \$669,743,655 for the year ended December 31, 2011. The average total loan portfolio increased by \$88,902,035, or 23.7%, to \$463,587,211 for the year ended December 31, 2012 from \$374,684,906 for the year ended December 31, 2011. Due to a restructuring of the components of the Company's loan portfolio during 2012, loan yields averaged 5.75% for the year ended December 31, 2012, 34 basis points lower than for the year ended December 31, 2011. The average investment securities portfolio decreased 9.9%, while the yield on that portfolio increased 2 basis points for the year ended December 31, 2012 compared to the year ended December 31, 2011. Overall, the yield on interest earning assets increased 14 basis points to 4.70% in the year ended December 31, 2012 from 4.56% in the year ended December 31, 2011.

## Table of Contents

Average interest earning assets increased by \$36,409,877, or 5.7%, to \$669,743,655 for the year ended December 31, 2011 from \$633,333,778 for the year ended December 31, 2010. The average total loan portfolio decreased by \$31,543,359, or 7.8%, to \$374,684,906 for the year ended December 31, 2011 from \$406,228,265 for the year ended December 31, 2010. Due to a marginal increase in the level of market interest rates during 2011, loan yields averaged 6.09% for the year ended December 31, 2011, 18 basis points higher than for the year ended December 31, 2010. The average investment securities portfolio increased 17.5%, while the yield on that portfolio increased 50 basis points for the year ended December 31, 2011 compared to the year ended December 31, 2010. Overall, the yield on interest earning assets decreased 10 basis points to 4.56% in the year ended December 31, 2011 from 4.66% in the year ended December 31, 2010.

Interest expense decreased by \$1,636,222, or 24.1%, to \$5,151,142 for the year ended December 31, 2012, from \$6,787,364 for the year ended December 31, 2011. This decrease in interest expense was principally attributable to higher levels of interest-bearing liabilities priced at a significantly lower market interest rate level. Money market and NOW accounts, increased on average by \$30,629,257 in 2012, or 17.7%, as compared to 2011, contributing to the funding of loan portfolio growth. The cost on these deposits decreased 50 basis points in 2012 as compared to 2011. Average interest bearing liabilities rose 6.7% in 2012 from 2011. The cost of total interest-bearing liabilities decreased 36 basis points to 0.89% in 2012 from 1.25% in 2011.

Interest expense decreased by \$2,032,134, or 23.0%, to \$6,787,364 for the year ended December 31, 2011 from \$8,819,498 for the year ended December 31, 2010. This decrease in interest expense was principally attributable to higher levels of interest-bearing liabilities priced at a significantly lower market interest rate level. Money market and NOW accounts, increased on average by \$50,940,546 in 2011, or 41.8%, as compared to 2010, contributing to the funding of loan portfolio growth. The cost on these deposits decreased 41 basis points in 2011 as compared to 2010. Average interest bearing liabilities rose 5.4% in 2011 from 2010. The cost of total interest-bearing liabilities decreased 46 basis points to 1.25% in 2011 from 1.71% in 2010.

Average non-interest bearing demand deposits increased by \$9,681,778, or 8.27%, to \$127,558,073 for the year ended December 31, 2012 from \$117,876,295 for the year ended December 31, 2011. The primary reason for this increase in 2012 was the requirement for customers of the Warehouse Line of Credit to maintain deposit relationships with the Bank that, on average, represent 10% to 15% of the loan balances.

### Provision for Loan Losses

Management considers a complete review of the following specific factors in determining the provisions for loan losses: historical losses by loan category, non-accrual loans, and problem loans as identified through internal classifications, collateral values, and the growth and size of the loan portfolio. In addition to these factors, management takes into consideration current economic conditions and local real estate market conditions. Using this evaluation process, the Company's provision for loan losses was \$2,149,992 for the year ended December 31, 2012 and \$2,558,328 for the year ended December 31, 2011.

### Non-Interest Income

Non-interest income increased by \$751,278, or 16.6%, to \$5,267,528 for the year ended December 31, 2012 from \$4,516,250 for the year ended December 31, 2011. The following paragraphs explain the increase for 2012 versus 2011.

Service charges on deposit accounts increased by \$38,663 to \$930,162 for the year ended December 31, 2012 compared to \$891,499 for the year ended December 31, 2011. This component of non-interest income represented 17.7% and 19.7% of the total non-interest income for the years ended December 31, 2012 and 2011, respectively. The

current year increase is due to an increase in the number of accounts subject to service charges.

Gains on sales of loans held for sale increased by \$86,065, or 4.8%, to \$1,862,219 for the year ended December 31, 2012 from \$1,776,154 for the year ended December 31, 2011. Loan sale volume totaled \$163.2 million in 2012 compared to \$143.2 million in 2011. The Bank sells both residential mortgage loans and Small Business Administration loans in the secondary market. During the second quarter of 2011, the Bank revised its pricing on mortgage loan sales and now requires a 160 basis point return on sale transactions compared to the 110 basis point return requirement that existed prior to this revision.

During December 2012, the Bank sold available-for-sale securities with an aggregate book value of \$5,761,594 that resulted in a pre-tax gain of \$313,004. There were no sales of securities for the year ended December 31, 2011.

Table of Contents

Non-interest income also includes income from bank-owned life insurance (“BOLI”) which amounted to \$447,524 for the year ended December 31, 2012 compared to \$404,338 for the year ended December 31, 2011. The Bank purchased tax-free BOLI assets to partially offset the cost of employee benefit plans and reduce the Company’s overall effective tax rate.

The Bank also generates non-interest income from a variety of fee-based services. These include safe deposit rentals, wire transfer service fees and Automated Teller Machine fees for non-Bank customers. An increase in demand for these services contributed to the increase in the other income component of non-interest income to \$1,714,619 for the year ended December 31, 2012 as compared to \$1,444,259 for the year ended December 31, 2011.

## Non-Interest Expenses

Non-interest expenses increased by \$3,965,531, or 20.0%, to \$23,770,561 for the year ended December 31, 2012 from \$19,805,030 for the year ended December 31, 2011. The March 2011 Acquisition was a contributing cause for this current period increase in total non-interest expense and each of its major components when compared with non-interest expense for the prior period. Operating expenses of the three acquired branches are included in all twelve months of operations for 2012 whereas 2011 operating expenses for the twelve month period include only nine months of expenses for these branches. The current period increase in other real estate owned expenses was another significant factor contributing to the increase in total non-interest expenses. The following table presents the major components of non-interest expenses for the years ended December 31, 2012 and 2011.

Non-interest Expenses	Year ended December 31,	
	2012	2011
Salaries and employee benefits	\$ 12,434,900	\$ 11,219,439
Occupancy expense	2,470,577	2,391,281
Equipment expense	862,765	928,554
Telephone	351,183	365,218
Marketing	185,738	183,467
Data processing services	1,056,629	1,171,136
Regulatory, professional and consulting fees	726,556	931,339
FDIC deposit insurance	565,027	646,365
Other real estate owned expenses	3,553,779	732,693
Amortization of intangible assets	267,967	210,154
Other expenses	1,295,440	1,025,384
Total	\$ 23,770,561	\$ 19,805,030

Salaries and employee benefits, which represent the largest portion of non-interest expenses, increased by \$1,215,461, or 10.8%, to \$12,434,900 for the year ended December 31, 2012 compared to \$11,219,439 for the year ended December 31, 2011. The increase in salaries and employee benefits for the year ended December 31, 2012 was the result of an increase in the number of employees, regular merit increases and increased health care costs.

Occupancy expenses increased by \$79,296, or 3.3%, to \$2,470,577 for the year ended December 31, 2012 compared to \$2,391,281 for the year ended December 31, 2011. In addition to the operating costs of the three new branches acquired in the March 2011 Acquisition, the increase in occupancy expenses for the current period was primarily attributable to increased depreciation, property taxes and maintenance costs in maintaining the Bank’s branch

properties.

The cost of data processing services has decreased to \$1,056,629 for the year ended December 31, 2012 from \$1,171,136 for the year ended December 31, 2011, as Bank management reviewed all data processing systems during 2012 in order to obtain efficiencies through streamlining operations and purging non-essential elements, which resulted in lower monthly costs.

Regulatory, professional and other fees decreased by \$204,783, or 22.0%, to \$726,556 for the year ended December 31, 2012. For the prior year, the Company incurred a higher level of legal fees in connection with the recovery of non-performing asset balances. The Bank also incurred additional professional fees in the prior year in connection with the March 2011 Acquisition.

## Table of Contents

FDIC insurance expense decreased to \$565,027 for the year ended December 31, 2012 compared to \$646,365 for the year ended December 31, 2011 as a result of the changes required by the Dodd-Frank Act with respect to FDIC assessment rules.

Other real estate owned expenses increased by \$2,821,086 to \$3,553,779 for the year ended December 31, 2012 compared to \$732,693 for the year ended December 31, 2011, as the Company recorded \$2,357,825 in loss provisions during 2012 and incurred maintenance and other holding costs on more properties held as other real estate owned during 2012 as compared to 2011.

Amortization of intangible assets expense increased to \$267,967 for the year ended December 31, 2012 compared to \$210,154 for the year ended December 31, 2011 as the expense for 2012 included twelve months of amortization of the \$1.7 million core deposit intangible asset resulting from the March 2011 Acquisition versus nine months of amortization in the prior year.

All other expenses not addressed above increased in the aggregate by \$192,503 to \$2,695,126 for the year ended December 31, 2012 compared to \$2,502,623 for the year ended December 31, 2011. Current year increases occurred in correspondent bank fees, maintenance agreements and ATM operating expenses. All other expenses were comprised of a variety of operating expenses and fees as well as expenses associated with lending activities.

An important financial services industry productivity measure is the efficiency ratio. The efficiency ratio is calculated by dividing total operating expenses by net interest income plus non-interest income. An increase in the efficiency ratio indicates that more resources are being utilized to generate the same or greater volume of income, while a decrease would indicate a more efficient allocation of resources. The Company's efficiency ratio increased modestly to 72.1% for the year ended December 31, 2012 compared to 71.8% for the year ended December 31, 2011.

## Income Taxes

Pre-tax income increased to \$7,032,469 for the year ended December 31, 2012 compared to \$5,222,574 for the year ended December 31, 2011.

The Company had income tax expense of \$1,971,965 for the year ended December 31, 2012 compared to income tax expense of \$1,291,131 for year ended December 31, 2011. The increase in the income tax expense for the year ended December 31, 2012 compared to the year ended December 31, 2011 was primarily due to the \$1,809,895 increase in pre-tax income for 2012 compared to 2011. The Company's effective tax rate increased to 28.0% in 2012 from 24.7% in 2011 due to a lower ratio of tax-exempt income to pre-tax income in 2012 compared to 2011.

## Financial Condition

### Cash and Cash Equivalents

At December 31, 2012 cash and cash equivalents totaled \$14,044,921 compared to \$15,195,259 at December 31, 2011. Cash and cash equivalents at December 31, 2012 consisted primarily of cash and due from banks of \$14,033,501 and federal funds sold/short-term investments of \$11,420. The corresponding balances at December 31, 2011 were \$15,183,853 and \$11,406, respectively. The decrease was due primarily to timing of cash flows related to the Bank's business activities. To the extent that the Bank did not utilize the funds for loan originations or securities purchases, the cash inflows accumulated in cash and cash equivalents.

### Investment Securities

The investment securities portfolio amounted to \$225,868,865, or 26.9% of total assets, at December 31, 2012 compared to \$236,158,197, or 29.8% of total assets, at December 31, 2011. Proceeds from maturities and prepayments for the year ended December 31, 2012 totaled \$66,392,783 while security purchases totaled \$63,884,715 during this period. On an average balance basis, the investment securities portfolio represented 30.9% and 36.7%, respectively, of average interest-earning assets for each of the years ended December 31, 2012 and 2011. The average yield earned on the portfolio, on a fully tax-equivalent basis, was 3.13% for the year ended December 31, 2012, an increase of 2 basis points from 3.11% earned for the year ended December 31, 2011.

Table of Contents

Securities available for sale are investments that may be sold in response to changing market and interest rate conditions or for other business purposes. Activity in this portfolio is undertaken primarily to manage liquidity and interest rate risk and to take advantage of market conditions that create economically more attractive returns. At December 31, 2012, available-for-sale securities amounted to \$109,840,965, an increase from \$93,683,774 at December 31, 2011.

Proceeds from maturities and prepayments of securities available for sale amounted to \$34,468,644 for the year ended December 31, 2012 and \$62,413,278 for the year ended December 31, 2011. At December 31, 2012, the portfolio had net unrealized gains of \$1,806,967 compared to net unrealized gains of \$2,318,299 at December 31, 2011. These unrealized gains are reflected net of tax in shareholders' equity as a component of accumulated other comprehensive income.

Securities held to maturity, which are carried at amortized historical cost, are investments for which there is the positive intent and ability to hold to maturity. At December 31, 2012, securities held to maturity were \$116,027,900, a decrease of \$26,446,523 from \$142,474,423 at December 31, 2011. The fair value of the held-to-maturity portfolio at December 31, 2012 was \$121,839,363.

The amortized cost, estimated fair value and weighted average yield of investment securities at December 31, 2012, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. Federal Home Loan Bank stock is included in "Available for Sale - Due in one year or less."

\* computed on a tax equivalent basis.

The Company regularly reviews the composition of the investment securities portfolio, taking into account market risks, the current and expected interest rate environment, liquidity needs, and its overall interest rate risk profile and strategic goals.

On a quarterly basis, management evaluates each security in the portfolio with an individual unrealized loss to determine if that loss represents other-than-temporary impairment. During the fourth quarter of 2009, management determined that it was necessary, following other-than-temporary impairment requirements, to write down the cost basis of the Company’s only pooled trust preferred security. This trust preferred debt security was issued by a two issuer pool (Preferred Term Securities XXV, Ltd. co-issued by Keefe, Bruyette and Woods, Inc. and First Tennessee (“PreTSL XXV”)), consisting primarily of financial institution holding companies. During 2009, the Company recognized an other-than-temporary impairment charge of \$864,727 with respect to this security. No other-than-temporary impairment losses were recorded during 2012 and 2011. See Note 3 to the consolidated financial statements for additional information.

#### Loans Held for Sale

Loans held for sale at December 31, 2012 amounted to \$35,960,262 compared to \$19,234,111 at December 31, 2011. As indicated in the Consolidated Statements of Cash Flows, the amount of loans originated for sale was \$178,044,892 for 2012 compared with \$139,478,341 for 2011.

Table of Contents

## Loans

The loan portfolio, which represents our largest asset, is a significant source of both interest and fee income. Elements of the loan portfolio are subject to differing levels of credit and interest rate risk. The Bank's primary lending focus continues to be mortgage warehouse lines, construction loans, commercial loans, owner-occupied commercial mortgage loans and tenanted commercial real estate loans. Total loans averaged \$463,587,211 for the year ended December 31, 2012, an increase of \$88,902,305, or 23.7%, compared to an average of \$374,684,906 for the year ended December 31, 2011. At December 31, 2012, total loans amounted to \$521,814,110 compared to \$475,431,771 at December 31, 2011, an increase of \$46,382,339. The average yield earned on the loan portfolio was 5.75% for the year ended December 31, 2012 compared to 6.09% for the year ended December 31, 2011, a decrease of 34 basis points. This decrease was primarily due to a restructuring of the loan portfolio components during 2012.

The following table represents the components of the loan portfolio for the dates indicated.

	2012		2011		December 31, 2010		2009	
	Amount	%	Amount	%	Amount	%	Amount	%
Construction loans	\$ 55,691,393	11%	\$ 49,285,783	10%	\$ 67,890,703	16%	\$ 79,805,278	21%

Mortgage warehouse lines	284,127,530	54%	249,345,831	52%	169,575,899	41%	119,382,078	32%
Loans to individuals	9,643,385	2%	12,219,640	3%	13,349,036	3%	15,554,027	4%
Deferred loan costs	987,086	0%	1,017,959	0%	543,753	0%	489,809	0%
All other loans	189,279	0%	255,556	0%	181,924	0%	229,159	0%
<b>Total</b>	<b>\$ 521,814,110</b>	<b>100%</b>	<b>\$ 475,431,771</b>	<b>100%</b>	<b>\$ 411,987,339</b>	<b>100%</b>	<b>\$ 379,945,735</b>	<b>100%</b>

Commercial and commercial real estate loans averaged \$145,308,719 for the year ended December 31, 2012, an increase of \$10,861,912, or 8.1%, compared to \$134,446,807 for the year ended December 31, 2011. Commercial loans consist primarily of loans to small and middle market businesses and are typically working capital loans used to finance inventory, receivables or equipment needs. These loans are generally secured by business assets of the commercial borrower. The average yield on the commercial and commercial real estate loan portfolio decreased 7 basis points to 7.48% for 2012 from 7.55% for 2011.

Construction loans averaged \$56,802,621 for the year ended December 31, 2012, a decrease of \$3,457,958, or 5.7%, compared to \$60,260,579 for the year ended December 31, 2011. Generally, these loans represent owner-occupied or investment properties and usually complement a broader commercial relationship between the bank and the borrower. Construction loans are structured to provide for advances only after work is completed and inspected by qualified professionals. The average yield on the construction loan portfolio increased 6 basis points to 6.47% for 2012 from 6.41% for 2011.

The Bank's Mortgage Warehouse Unit offers a revolving line of credit that is available to licensed mortgage banking companies (the "Warehouse Line of Credit"). The Warehouse Line of Credit is used by the mortgage banker to originate one-to-four family residential mortgage loans that are pre-sold to the secondary mortgage market, which includes state and national banks, national mortgage banking firms, insurance companies and government-sponsored enterprises, including the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation and others. On average, an advance under the Warehouse Line of Credit remains outstanding for a period of less than 30 days, with repayment coming directly from the sale of the loan into the secondary mortgage market. Interest (the

spread between our borrowing cost and the rate charged to the client) and a transaction fee are collected by the Bank at the time of repayment. Additionally, customers of the Warehouse Lines of Credit are required to maintain deposit relationships with the Bank that, on average, represent 10% to 15% of the loan balances. The Bank had outstanding Warehouse Line of Credit advances of \$284,127,531 at December 31, 2012 and \$249,345,831 at December 31, 2011. During 2012 and 2011, Warehouse Lines of Credit averaged \$204,852,547 and \$131,955,449, respectively, and yielded 4.75% and 4.89%, respectively. The number of active mortgage banking customers increased from 44 in 2011 to 46 in 2012, plus the average usage across all active lines increased due to purchase and refinance activity attributed to historically low mortgage interest rates throughout 2012.

Table of Contents

The following table provides information concerning the interest rate sensitivity of the commercial and commercial real estate loans and construction loans at December 31, 2012.

As of December 31, 2012:

### Non-Performing Assets

Non-performing assets consist of non-performing loans and other real estate owned. Non-performing loans are composed of (1) loans on a non-accrual basis and (2) loans which are contractually past due 90 days or more as to interest and principal payments but have not been classified as non-accrual. Included in non-accrual loans are loans whose terms have been restructured to provide a reduction or deferral of interest and/or principal because of a deterioration in the financial position of the borrower and have not performed in accordance with the restructured terms.

The Bank's policy with regard to non-accrual loans is that generally, loans are placed on a non-accrual status when they are 90 days past due, unless these loans are well secured and in the process of collection or, regardless of the past due status of the loan, when management determines that the complete recovery of principal or interest is in doubt. Consumer loans are generally charged off after they become 120 days past due. Subsequent payments on loans in non-accrual status are credited to income only if collection of principal is not in doubt.

Non-performing loans increased by \$2,972,032 to \$5,963,502 at December 31, 2012, from \$2,991,470 at December 31, 2011 as the disruptions in the financial system and the real estate market during the past few years required the Bank to charge-off \$548,091 of loans during 2012 compared to charge-offs of \$2,799,482 during 2011. The Bank recorded recoveries on previously charged-off loans of \$14,860 and \$12,892 during 2012 and 2011, respectively. The major segments of non-accrual loans consist of commercial loans, commercial real estate loans and SBA loans which are in the process of collection and residential real estate which is either in foreclosure or under contract to close after December 31, 2012. The table below sets forth non-performing assets and risk elements in the Bank's portfolio for the years indicated.

As the table demonstrates, non-performing loans to total loans increased to 1.14% at December 31, 2012 from 0.63% at December 31, 2011. Loan quality is still considered to be sound. This was accomplished through quality loan underwriting, a proactive approach to loan monitoring and aggressive workout strategies.

Non-performing assets decreased by \$1,104,568 to \$14,296,103 at December 31, 2012 from \$15,400,671 at December 31, 2011. Other real estate owned decreased by \$4,076,600 to \$8,332,601 at December 31, 2012 from \$12,409,201 at December 31, 2011. During 2012, the Bank was able to successfully dispose of properties with an aggregate carrying value of \$2,426,145 for a net loss of \$13,347. The Bank recorded loss provisions against other real estate owned properties of \$2,345,267 during 2012 and \$147,178 during 2011. The Bank was able to secure the title for other

properties totaling \$553,762 during 2012, which will help to facilitate their disposal by sale process.

Non-performing assets represented 1.70% of total assets at December 31, 2012 and 1.95% at December 31, 2011.

Table of ContentsNon-Performing Assets and  
Loans

	December 31,				
	2012	2011	2010	2009	2008
Non-Performing loans:					
Loans 90 days or more past due and still accruing	\$ 84,948	\$ 0	\$ 0	\$ 145,898	\$ 0
Non-accrual loans	5,878,554	2,991,470	8,809,167	4,161,628	3,351,777
Total non-performing loans	5,963,502	2,991,470	8,809,167	4,307,526	3,351,777
Other real estate owned:	8,332,601	12,409,201	4,850,818	1,362,621	4,296,536
Total non-performing assets	\$ 14,296,103	\$ 15,400,671	\$ 13,659,985	\$ 5,670,147	\$ 7,648,313
Non-performing loans to total loans	1.14%	0.63%	2.14%	1.13%	0.89%
Non-performing loans to total loans excluding warehouse lines	2.51%	1.32%	3.63%	1.65%	1.24%
Non-performing assets to total assets	1.70%	1.95%	2.12%	0.84%	1.40%
Non-performing assets to total assets excluding mortgage warehouse lines	2.57%	2.84%	2.88%	1.02%	1.74%

At December 31, 2012, the Bank had ten loans totaling \$2,491,879 that were troubled debt restructurings. Five of these loans totaling \$480,233 are included in the above table as non-accrual loans; the remaining five loans totaling \$2,011,646 are considered performing.

Management takes a proactive approach in addressing delinquent loans. The Company's President meets weekly with all loan officers to review the status of credits past-due ten days or more. An action plan is discussed for delinquent loans to determine the steps necessary to induce the borrower to cure the delinquency and restore the loan to a current status. Also, delinquency notices are system generated when loans are five days past-due and again at 15 days past-due.

In most cases, the Company's collateral is real estate and when the collateral is foreclosed upon, the real estate is carried at the lower of fair market value less the estimated selling costs or the initially recorded amount. The amount, if any, by which the recorded amount of the loan exceeds the fair market value of the collateral less estimated selling costs is a loss which is charged to the allowance for loan losses at the time of foreclosure or repossession. Resolution of a past-due loan can be delayed if the borrower files a bankruptcy petition because a collection action cannot be continued unless the Company first obtains relief from the automatic stay provided by the bankruptcy code.

## Allowance for Loan Losses and Related Provision

The allowance for loan losses is maintained at a level sufficient to absorb estimated credit losses in the loan portfolio as of the date of the financial statements. The allowance for loan losses is a valuation reserve available for losses

incurred or inherent in the loan portfolio and other extensions of credit. The determination of the adequacy of the allowance for loan losses is a critical accounting policy of the Company.

The Company's primary lending emphasis is the origination of commercial and commercial real estate loans and mortgage warehouse lines of credit. Based on the composition of the loan portfolio, the inherent primary risks are deteriorating credit quality, a decline in the economy, and a decline in New Jersey real estate market values. Any one, or a combination, of these events may adversely affect the loan portfolio and may result in increased delinquencies, loan losses and increased future provision levels.

All, or part, of the principal balance of commercial and commercial real estate loans and construction loans are charged off against the allowance as soon as it is determined that the repayment of all, or part, of the principal balance is highly unlikely. Consumer loans are generally charged off no later than 120 days past due on a contractual basis, earlier in the event of bankruptcy, or if there is an amount deemed uncollectible. Because all identified losses are immediately charged off, no portion of the allowance for loan losses is restricted to any individual loan or groups of loans, and the entire allowance is available to absorb any and all loan losses.

Table of Contents

The following table presents, for the years indicated, an analysis of the allowance for loan losses and other related data.

Allowance for Loan  
Losses

	2012	2011	2010	2009	2008

excluding  
Mortgage warehouse lines

Non-performing loans	119.92%	185.01%	65.42%	104.59%	109.93%
----------------------	---------	---------	--------	---------	---------

At December 31, 2012, the allowance for loan losses was \$7,151,212 compared to \$5,534,450 at December 31, 2011, an increase of \$1,616,762, or 29.2%. The ratio of the allowance for loan losses to total loans at December 31, 2012 and 2011 was 1.37% and 1.16%, respectively. The allowance for loan losses as a percentage of non-performing loans was 119.92% at December 31, 2012 compared to 185.01% at December 31, 2011. Management believes that the quality of the loan portfolio remains sound considering the economic climate and economy in the State of New Jersey and that the allowance for loan losses is adequate in relation to credit risk exposure levels.

The following table describes the allocation of the allowance for loan losses among the various categories of loans and certain other information as of the dates indicated. The allocation is made for analytical purposes and is not necessarily indicative of the categories in which future losses may occur. The total allowance is available to absorb losses from any segment of loans.

## Deposits

Deposits, which include demand deposits (interest bearing and non-interest bearing), savings deposits and time deposits, are a fundamental and cost-effective source of funding. The flow of deposits is influenced significantly by general economic conditions, changes in market interest rates and competition. The Bank offers a variety of products designed to attract and retain customers, with the Bank's primary focus being on the building and expanding of long-term relationships. Deposits in the year ended December 31, 2012 averaged \$670,563,583, an increase of \$46,624,575, or 7.5%, compared to \$623,939,008 in the year ended December 31, 2011. At December 31, 2012, total deposits were \$707,689,475, an increase of \$83,826,990, or 13.4%, from \$623,862,485 at December 31, 2011. The Bank's non-interest bearing demand deposits increased by \$46,864,216, or 44.4%, at December 31, 2012 compared to December 31, 2011. The average rate paid on the Bank's interest-bearing deposit balances for 2012 was 0.79%, a decrease from the 1.12% average rate for 2011. Average interest bearing deposits increased by \$36,942,797, or 7.3%, to \$543,005,510 for the year ended December 31, 2012 from \$506,062,713 for the year ended December 31, 2011.

Time deposits consist primarily of retail certificates of deposit and certificates of deposit of \$100,000 or more. Time deposits at December 31, 2012 were \$141,617,916, an increase of \$1,412,632, or 1.0%, from \$140,205,284 at December 31, 2011. The retail certificates of deposit component of time deposits decreased by \$3,369,968, or 4.6%, to an average of \$70,100,750 for 2012 from an average of \$73,470,718 for 2011. The average cost of these deposits decreased to 1.54% for 2012 from 1.72% for 2011. Certificates of deposit of \$100,000 or more decreased by \$3,372,032 to an average of \$76,526,600 for 2012 from an average of \$79,898,632 for 2011. Certificates of deposit of \$100,000 or more are a less stable funding source and are used primarily as an alternative to other sources of borrowed funds. For information concerning time deposits of \$100,000 or more by time remaining until maturity, see Note 10 of the Notes to Consolidated Financial Statements.

Average non-interest bearing demand deposits increased by \$9,681,778, or 8.2%, to \$127,558,073 for the year ended December 31, 2012 from \$117,876,295 for the year ended December 31, 2011. At December 31, 2012, non-interest bearing demand deposits totaled \$152,334,759, an increase of 44.4% compared to \$105,470,543 at December 31, 2011. Non-interest bearing demand deposits made up 21.5% and 16.9% of total deposits at December 31, 2012 and 2011, respectively, and represent a stable, interest-free source of funds.

Savings accounts increased by \$26,062,128, or 14.8%, to \$202,261,035 at December 31, 2012 from \$176,198,907 at December 31, 2011. The average balance of savings accounts for 2012 increased by \$13,055,540 to \$192,958,737 compared to an average balance of \$179,903,197 for 2011.

Interest bearing demand deposits, which include interest-bearing checking, money market and the Bank's premier money market product, 1st Choice account, increased by \$30,629,257, or 17.7%, to an average of \$203,419,423 for 2012 from an average of \$172,790,166 in 2011. The average cost of interest bearing demand deposits decreased 50 basis points to 0.49% for 2012 compared to 0.99% for 2011.

Table of Contents

The following table illustrates the components of average total deposits for the dates indicated.

## Average Deposit Balances

	2012		2011		2010	
	Average Balance	Percentage of Total	Average Balance	Percentage of Total	Average Balance	Percentage of Total
Non-interest bearing demand deposits	\$ 127,558,073	19%	\$ 117,876,295	19%	\$ 87,482,143	16%

Other certificates of deposit	70,100,750	11%	73,470,718	12%	87,523,084	17%
Total	\$ 670,563,583	100%	\$ 623,939,008	100%	\$ 548,034,011	100%

## Borrowings

Borrowings are mainly comprised of Federal Home Loan Bank (“FHLB”) borrowings and overnight funds purchased. These borrowings are primarily used to fund asset growth not supported by deposit generation. The average balance of other borrowed funds decreased by \$595,848, or 3.2%, to \$17,804,645 for the year ended December 31, 2012 from the average balance of \$18,400,493 for the year ended December 31, 2011. The average cost of other borrowed funds increased 12 basis points to 2.53% for 2012 compared to 2.41% for 2011.

The balance of borrowings was \$42,400,000 at December 31, 2012, consisting of a long-term FHLB advance of \$10,000,000 and overnight funds purchased of \$32,400,000. The balance of borrowings at December 31, 2011 was \$88,300,000, consisting of a long-term FHLB advance of \$10,000,000 and overnight funds purchased of \$78,300,000.

## Shareholders’ Equity and Dividends

Shareholders’ equity increased by \$10,053,757, or 18.3%, to \$65,053,532 at December 31, 2012 from \$54,999,775 at December 31, 2011. Tangible book value per common share was \$10.02 at December 31, 2012 and \$9.27 (restated for subsequent stock dividends) at December 31, 2011. The ratio of average shareholders’ equity to total average assets was 7.57%, 7.17% and 8.58% for 2012, 2011, and 2010, respectively. The increase in shareholders’ equity from December 31, 2011 to December 31, 2012 was primarily the result of net income of \$5,060,504 for 2012 supplemented by the net proceeds of \$4,819,794 from the sale of the Company’s common stock through a rights offering to shareholders that was completed in October 2012.

On December 23, 2008, pursuant to the TARP CPP under the EESA, the Company entered into a Letter Agreement, including the Securities Purchase Agreement – Standard Terms, with the Treasury pursuant to which the Company issued and sold, and the Treasury purchased (i) 12,000 shares of the Company’s Preferred Stock Series B and (ii) a ten-year warrant to purchase up to 200,222 shares of the Company’s common stock, no par value, at an initial exercise price of \$8.99 per share, for aggregate cash consideration of \$12 million. As a result of subsequent stock dividends, the shares of common stock underlying the two warrants issued as replacements to the original warrant have been adjusted to 255,540 shares and the exercise price was adjusted to \$7.044 per share.

On October 27, 2010, the Company repaid the Treasury for the Treasury’s investment in the Company made under the TARP CPP. The Company paid \$12,120,000 (including accrued and unpaid dividends) to the Treasury to redeem all 12,000 outstanding shares of the Company’s Preferred Stock Series B that were issued to the Treasury under the TARP program.

Table of Contents

The warrant issued to the Treasury provides for the adjustment of the exercise price and the number of shares of the Company's common stock issuable upon exercise pursuant to customary anti-dilution provisions, such as upon stock splits or distributions of securities or other assets to holders of the Company's common stock, and upon certain issuances of the Company's common stock at or below a specified price relative to the initial exercise price. The warrant is immediately exercisable and expires 10 years from the issuance date. In addition, the Treasury agreed not to exercise voting power with respect to any shares of common stock issued upon exercise of the warrant. On November 23, 2011, the Treasury held an auction and sold the warrant in a private placement to an unrelated third party purchaser. At the time of the sale, the number of shares of the Company's common stock underlying the warrant had been adjusted to 231,782 shares and the exercise price had been adjusted to \$7.766 per share as a result of stock dividends. In connection with the sale, the Company issued two new warrants (a warrant to purchase 197,529 shares at an exercise price of \$7.766 per share and a warrant to purchase 34,253 shares at an exercise price of \$7.766 per share) to affiliates of the third party purchaser. Certain terms and conditions of the original warrant issued to the Treasury were modified or deleted in the two new warrants, including, without limitation, the deletion of the anti-dilution provision upon certain issuances of the Company's common stock at or below a specified price relative to the initial exercise price. However, the anti-dilution provisions related to stock splits or distributions of securities or other assets to holders of the Company's common stock remain in place under the two new warrants. In addition, the Company has no agreement with the holders of the warrants pursuant to which such holders will not exercise voting rights with respect to any shares of common stock issued upon exercise of their warrants. These warrants remain outstanding, are immediately exercisable and continue to have an expiration date of December 23, 2018, which was the expiration date of the original warrant issued to the Treasury.

The Federal Reserve Board has issued a supervisory letter to bank holding companies that contains guidance on when the board of directors of a bank holding company should eliminate or defer or severely limit dividends, including, for example, when net income available for shareholders for the past four quarters net of previously paid dividends paid during that period is not sufficient to fully fund the dividends. The letter also contains guidance on the redemption of stock by bank holding companies which urges bank holding companies to advise the Federal Reserve of any such redemption or repurchase of common stock for cash or other value which results in the net reduction of a bank holding company's capital at the beginning of the quarter below the capital outstanding at the end of the quarter.

In lieu of cash dividends, the Company (and its predecessor, the Bank) has declared a stock dividend every year since 1992 and has paid such dividends every year since 1993. 5% stock dividends were declared in 2012 and 2011 and paid in 2013 and 2012, respectively.

The Company's common stock is quoted on the Nasdaq Global Market under the symbol "FCCY".

The Company and the Bank are subject to various regulatory capital requirements administered by the Federal Reserve Board and the Federal Deposit Insurance Corporation. For information on regulatory capital, see Note 19 of the Notes to Consolidated Financial Statements.

## Off-Balance Sheet Arrangements

The following table shows the amounts and expected maturities of significant commitments as of December 31, 2012. Further discussion of these commitments is included in Note 17 to the Consolidated Financial Statements.

	One Year or Less	One to Three Years	Three to Five Years	Over Five Years	Total
Standby letters of credit	\$ 1,620,362	\$ 0	\$ 0	\$ 0	\$ 1,620,362
Commitments to extend credit	\$ 160,459,141	\$ 0	\$ 0	\$ 0	\$ 160,459,141

Commitments to sell residential loans	\$ 35,960,262	\$	0	\$	0	\$	0	\$ 35,960,262
---------------------------------------	---------------	----	---	----	---	----	---	---------------

## Liquidity

At December 31, 2012, the amount of liquid assets remained at a level management deemed adequate to ensure that contractual liabilities, depositors' withdrawal requirements, and other operational and customer credit needs could be satisfied.

Liquidity management refers to the Company's ability to support asset growth while satisfying the borrowing needs and deposit withdrawal requirements of customers. In addition to maintaining liquid assets, factors such as capital position, profitability, asset quality and availability of funding affect a bank's ability to meet its liquidity needs. On the asset side, liquid funds are maintained in the form of cash and cash equivalents, Federal funds sold, investment securities held to maturity maturing within one year, securities available for sale and loans held for sale. Additional asset-based liquidity is derived from scheduled loan repayments as well as investment repayments of principal and interest from mortgage-backed securities. On the liability side, the primary source of liquidity is the ability to generate core deposits. Short-term borrowings are used as supplemental funding sources when growth in the core deposit base does not keep pace with that of earnings assets.

## Table of Contents

The Bank has established a borrowing relationship with the FHLB which further supports and enhances liquidity. During 2010, FHLB replaced its Overnight Line of Credit and One-Month Overnight Repricing Line of Credit facilities available to member banks with a fully secured line of up to 50 percent of a bank's quarter-end total assets. Under the terms of this facility, the Bank's total credit exposure to FHLB cannot exceed 50 percent, or \$420,484,191, of its December 31, 2012 total assets. In addition, the aggregate outstanding principal amount of the Bank's advances, letters of credit, the dollar amount of the FHLB's minimum collateral requirement for off balance sheet financial contracts and advance commitments cannot exceed 30 percent of the Bank's total assets, unless the Bank obtains approval from FHLB's Board of Directors or its Executive Committee. These limits are further restricted by a member's ability to provide eligible collateral to support its obligations to FHLB as well as the ability to meet the FHLB's stock requirement. The Bank also maintains an unsecured federal funds line of \$20,000,000 with a correspondent bank.

The Consolidated Statements of Cash Flows present the changes in cash from operating, investing and financing activities. At December 31, 2012, the balance of cash and cash equivalents was \$14,044,921.

Subsequent to the end of the third quarter of 2012, the Company completed its common stock rights offering, which expired on October 5, 2012. The Company received gross proceeds of \$5.0 million from holders of subscription rights. The rights offering was fully subscribed. The Company intends to use the proceeds from the rights offering for general corporate purposes.

Net cash used in operating activities totaled \$5,588,032 for the year ended December 31, 2012 compared to net cash provided by operations of \$9,610,506 for the year ended December 31, 2011. The primary source of funds was net income from operations adjusted for activity related to loans originated for sale, the provision for loan losses, depreciation expenses, and net amortization of premiums on securities. Cash was used in operations primarily for originating loans held for sale.

Net cash used in investing activities totaled \$38,670,566 for the year ended December 31, 2012 compared to net cash used in investing activities of \$43,066,163 for the year ended December 31, 2011. The decrease in cash usage for 2012 compared to 2011 resulted from a decreased volume of loan closings during 2012.

Net cash provided by financing activities totaled \$43,108,260 for the year ended December 31, 2012 compared to net cash provided by financing activities of \$30,940,415 for the year ended December 31, 2011. The cash provided by financing activities in 2012 came primarily from the net increase in deposits and proceeds from the issuance of common stock pursuant to the rights offering that was completed in October 2012. The cash provided by financing activities in 2011 came primarily from an increase in short term borrowings.

The securities portfolios are also a source of liquidity, providing cash flows from maturities and periodic repayments of principal. For the year ended December 31, 2012, prepayments and maturities of investment securities totaled \$66,392,783. Another source of liquidity is the loan portfolio, which provides a flow of payments and maturities.

## Interest Rate Sensitivity Analysis

The largest component of the Bank's total income is net interest income, and the majority of the Bank's financial instruments are composed of interest rate-sensitive assets and liabilities with various terms and maturities. The primary objective of management is to maximize net interest income while minimizing interest rate risk. Interest rate risk is derived from timing differences in the repricing of assets and liabilities, loan prepayments, deposit withdrawals, and differences in lending and funding rates. Management actively seeks to monitor and control the mix of interest rate-sensitive assets and interest rate-sensitive liabilities.

Table of Contents

The following tables set forth certain information relating to the Bank's financial instruments that are sensitive to changes in interest rates, categorized by expected maturity or repricing and the fair value of such instruments at December 31, 2012.

## Interest Rate Sensitivity Analysis at December 31, 2012

(\$ in thousands)	Interest Sensitivity Period				Total	One Year	Over	Non-interest	
	30 Day	90 Day	180 Day	365 Day	Within One Year	to Five Years	Five Years	Sensitive	To
<b>Assets :</b>

Non-interest-bearing sources								72,321	7
	\$256,258	\$34,673	\$23,481	\$37,129	\$351,541	\$200,269	\$64,502	\$224,656	\$84
<b>Asset (Liability) Sensitivity Gap :</b>									
Period Gap	\$204,116	(\$14,282)	\$3,048	\$3,398	\$196,280	(\$43,494)	\$24,711	(\$177,497)	
Cumulative Gap	\$204,116	\$189,834	\$192,882	\$196,280	\$196,280	\$152,786	\$177,497		-
Cumulative Gap to Total Assets	24.3%	22.6%	22.9%	23.3%	23.3%	18.2%	-		-

The Bank continually evaluates interest rate risk management opportunities, including the use of derivative financial instruments. Management believed that hedging instruments available during 2012 were not cost-effective, and therefore, focused its efforts on increasing the Bank's spread by attracting lower-cost retail deposits.

In addition to utilizing the gap ratio for interest rate risk assessment, management utilizes simulation analysis whereby models estimate the variance in net income with a change in interest rates of plus or minus 200, 300, and 400 basis points over 12 and 24 month periods. Given recent simulations, net interest income would be within policy guidelines regardless of the direction of market rates.

## Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Not required.

## Item 8. Financial Statements and Supplementary Data.

Reference is made to Item 15(a)(1) and (2) on page F-1 for a list of financial statements and supplementary data required to be filed pursuant to this Item 8. The information required by this Item 8 is provided beginning on page F-1 hereof.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

The Company has established disclosure controls and procedures designed to ensure that information required to be disclosed in the reports that the Company files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms and is accumulated and communicated to management, including the principal executive officer and principal financial officer, to allow timely decisions regarding required disclosure.

## Table of Contents

The Company's principal executive officer and principal financial officer, with the assistance of other members of the Company's management, have evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this annual report. Based upon such evaluation, the Company's principal executive officer and principal financial officer have concluded that the Company's disclosure controls and procedures are effective as of the end of the period covered by this annual report.

### Management's Report on Internal Control Over Financial Reporting

Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

The Company's internal control over financial reporting includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that the receipts and expenditures of the Company are being made only in accordance with authorizations of its management and directors; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on its financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of the effectiveness of internal control over financial reporting to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with policies or procedures may deteriorate.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis. A significant deficiency is a control deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness; yet important enough to merit attention by those responsible for oversight of the company's financial reporting.

The Company's management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2012. In making this assessment, management used the criteria set forth in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Based on their assessment using those criteria, management concluded that, as of December 31, 2012, the Company's internal control over financial reporting was effective.

The Company's principal executive officer and principal financial officer have also concluded that there was no change in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the quarter ended December 31, 2012 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to the exemption provided to issuers that are not "large accelerated filers" or "accelerated filers".

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of  
1st Constitution Bancorp  
Cranbury, New Jersey

We have audited the accompanying consolidated balance sheets of 1st Constitution Bancorp (the “Company”) and subsidiaries as of December 31, 2012 and 2011, and the related consolidated statements of income, comprehensive income, changes in shareholders’ equity and cash flows for the years then ended. The Company’s management is responsible for these consolidated financial statements. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of 1st Constitution Bancorp and subsidiaries as of December 31, 2012 and 2011, and the results of their operations and their cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

1st CONSTITUTION BANCORP  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
December 31, 2012 and 2011

1. Summary of Significant Accounting Policies

1st Constitution Bancorp (the “Company”) is a bank holding company registered under the Bank Holding Company Act of 1956, as amended, and was organized under the laws of the State of New Jersey. The Company is parent to 1st Constitution Bank (the “Bank”), a state chartered commercial bank. The Bank provides community banking services to a broad range of customers, including corporations, individuals, partnerships and other community organizations in the central and northeastern New Jersey area. The Bank conducts its operations through its main office located in Cranbury, New Jersey, and operates thirteen additional branch offices in downtown Cranbury, Fort Lee, Hamilton Square, Hightstown, Hillsborough, Hopewell, Jamesburg, Lawrenceville, Perth Amboy, Plainsboro, Skillman, West Windsor, and Princeton, New Jersey.

The Company has evaluated events and transactions occurring subsequent to the balance sheet date of December 31, 2012 for items that should potentially be recognized or disclosed in these financial statements. The evaluation was conducted through the date these financial statements were issued.

Basis of Presentation

The accounting and reporting policies of the Company conform to accounting principals generally accepted in the United States of America (“U.S. GAAP”) and to the accepted practices within the banking industry. The following is a description of the more significant of these policies and practices.

Principles of Consolidation

The accompanying consolidated financial statements include the Company and its wholly-owned subsidiary, the Bank, and the Bank’s wholly-owned subsidiaries, 1st Constitution Investment Company of New Jersey, Inc., FCB Assets Holdings, Inc., 1st Constitution Title Agency, 204 South Newman Street Corp. and 249 New York Avenue LLC. 1st Constitution Capital Trust II, a subsidiary of the Company (“Trust II”), is not included in the Company’s consolidated financial statements as it is a variable interest entity and the Company is not the primary beneficiary. All significant intercompany accounts and transactions have been eliminated in consolidation and certain prior period amounts have been reclassified to conform to current year presentation.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, other-than-temporary security impairment, the fair value of other real estate owned and the valuation of deferred tax assets.

Concentration of Credit Risk

Financial instruments which potentially subject the Company and its subsidiaries to concentrations of credit risk primarily consist of investment securities and loans. At December 31, 2012, 50.7% of our investment securities consisted of U.S. Government and Agency issues, mortgage-backed securities and municipal bonds. In addition,

another 19.3% of our portfolio consisted of highly rated collateralized mortgage obligations. The remaining 30.0% of our investment securities consisted primarily of corporate debt issues and restricted stock of the Federal Home Loan Bank of New York. The Bank's lending activity is primarily concentrated in loans collateralized by real estate located in the State of New Jersey. As a result, credit risk is broadly dependent on the real estate market and general economic conditions in that state.

F-8

---

## Table of Contents

### Interest Rate Risk

The Bank is principally engaged in the business of attracting deposits from the general public and using these deposits, together with other funds, to purchase securities and to make loans, the majority of which are secured by real estate. The potential for interest-rate risk exists as a result of the generally shorter duration of interest-sensitive assets compared to the generally longer duration of interest-sensitive liabilities. In a volatile rate environment, assets held by the Bank will re-price faster than liabilities of the Bank, thereby affecting net interest income. For this reason, management regularly monitors the maturity structure and rate adjustment features of the Bank's assets and liabilities in order to measure its level of interest-rate risk and to plan for future volatility.

### Investment Securities

Investment Securities which the Company has the intent and ability to hold until maturity are classified as held to maturity and are recorded at cost, adjusted for amortization of premiums and accretion of discounts. Investment Securities which are held for indefinite periods of time, which management intends to use as part of its asset/liability management strategy, or that may be sold in response to changes in interest rates, changes in prepayment risk, increased capital requirements or other similar factors, are classified as available for sale and are carried at fair value, except for restricted stock of the Federal Home Loan Bank of New York and Atlantic Central Banker Bank, which are carried at cost. Unrealized gains and losses on such securities are recorded as a separate component of shareholders' equity. Realized gains and losses, which are computed using the specific identification method, are recognized on a trade date basis.

If the fair value of a security is less than its amortized cost, the security is deemed to be impaired. Management evaluates all securities with unrealized losses quarterly to determine if such impairments are temporary or other-than-temporary in accordance with the Accounting Standards Codification ("ASC") of the Financial Accounting Standards Board ("FASB"). Temporary impairments on available for sale securities are recognized, on a tax-effected basis, through other comprehensive income ("OCI") with offsetting adjustments to the carrying value of the security and the balance of related deferred taxes. Temporary impairments of held to maturity securities are not recorded in the consolidated financial statements; however, information concerning the amount and duration of impairments on held to maturity securities is disclosed.

Other-than-temporary impairments on all equity securities and on debt securities that the Company has decided to sell, or will, more likely than not, be required to sell prior to the full recovery of fair value to a level equal to or exceeding amortized cost, are recognized in earnings. If neither of these conditions regarding the likelihood of sale for a debt security apply, the other-than-temporary impairment is bifurcated into credit-related and noncredit-related components. Credit-related impairment generally represents the amount by which the present value of the cash flows that are expected to be collected on a debt security fall below its amortized cost. The noncredit-related component represents the remaining portion of the impairment not otherwise designated as credit-related. The Company recognizes credit-related other-than-temporary impairments in earnings. Noncredit-related other-than-temporary impairments on debt securities are recognized in OCI. For held to maturity debt securities, the amount of any other-than-temporary impairment recorded in OCI is amortized prospectively over the remaining lives of the securities based on the timing of future estimated cash flows related to those securities.

Premiums and discounts on all securities are amortized/accreted to maturity by use of the level-yield method considering the impact of principal amortization and prepayments.

Federal law requires a member institution of the Federal Home Loan Bank ("FHLB") system to hold restricted stock of its district FHLB according to a predetermined formula. The Bank's investment in the restricted stock of the FHLB of New York, while included in investment securities available for sale, is carried at cost.

Management evaluates the FHLB restricted stock for impairment in accordance with U.S. GAAP. Management's determination of whether these investments are impaired is based on their assessment of the ultimate recoverability of their cost rather than by recognizing temporary declines in value. The determination of whether a decline affects the ultimate recoverability of their cost is influenced by criteria such as (1) the significance of the decline in net assets of the FHLB as compared to the capital stock amount for the FHLB and the length of time this situation has persisted, (2) commitments by the FHLB to make payments required by law or regulation and the level of such payments in relation to the operating performance of the FHLB, and (3) the impact of legislative and regulatory changes on institutions and, accordingly, on the customer base of the FHLB. Management believes no impairment charge is necessary related to the FHLB stock as of December 31, 2012.

F-9

---

## Table of Contents

### Bank-Owned Life Insurance

The Company invests in bank-owned life insurance (“BOLI”). BOLI involves the purchasing of life insurance by the Company on a chosen group of employees. The Company is the owner and beneficiary of the policies. This pool of insurance, due to the advantages of the Bank, is profitable to the Company. This profitability offsets a portion of future benefit costs and is intended to provide a funding source for the payment of future benefits. The Bank’s deposits fund BOLI and the earnings from BOLI are recognized as non-interest income.

### Loans And Loans Held For Sale

Loans that management intends to hold to maturity are stated at the principal amount outstanding, net of unearned income. Unearned income is recognized over the lives of the respective loans, principally using the effective interest method. Interest income is generally not accrued on loans, including impaired loans, where interest or principal is 90 days or more past due, unless the loans are adequately secured and in the process of collection, or on loans where management has determined that the borrowers may be unable to meet contractual principal and/or interest obligations. When it is probable that, based upon current information, the Bank will not collect all amounts due under the contractual terms of the loan, the loan is reported as impaired. Smaller balance homogenous type loans, such as residential loans and loans to individuals, which are collectively evaluated, are excluded from consideration for impairment. Loan impairment is measured based upon the present value of the expected future cash flows discounted at the loan’s effective interest rate or the underlying fair value of collateral for collateral dependent loans. When a loan, including an impaired loan, is placed on non-accrual, interest accruals cease and uncollected accrued interest is reversed and charged against current income. Non-accrual loans are generally not returned to accruing status until principal and interest payments have been brought current and full collectibility is reasonably assured. Cash receipts on non-accrual and impaired loans are applied to principal, unless the loan is deemed fully collectible.

Loans held for sale are carried at the aggregate lower of cost or market value. Realized gains and losses on loans held for sale are recognized at settlement date and are determined based on the cost, including deferred net loan origination fees and the costs of the specific loans sold.

The Bank accounts for its transfers and servicing of financial assets in accordance with ASC Topic 860, “Transfers and Servicing.” The Bank originates mortgages under a definitive plan to sell those loans with servicing generally released. Mortgage loans originated and intended for sale in the secondary market are carried at the lower aggregate cost or estimated fair value. Gains and losses on sales are also accounted for in accordance with ASC Topic 860.

The Bank enters into commitments to originate loans whereby the interest rate on the loan is determined prior to funding (rate lock commitments). Rate lock commitments on mortgage loans that are intended to be sold are considered to be derivatives. Time elapsing between the issuance of a loan commitment and closing and sale of the loan generally ranges from 30 to 120 days. The Bank protects itself from changes in interest rates through the use of best efforts forward delivery contracts, whereby the Bank commits to sell a loan at the time the borrower commits to an interest rate with the intent that the buyer has assumed interest rate risk on the loan. As a result, the Bank is not exposed to losses nor will it realize significant gains related to its rate lock commitments due to changes in interest rates.

The market value of rate lock commitments and best efforts contracts is not readily ascertainable with precision because rate lock commitments and best efforts contracts are not actively traded in stand-alone markets. The Bank determines the fair value of rate lock commitments and best efforts contracts by measuring the change in the value of the underlying asset while taking into consideration the probability that the rate lock commitments will close. Due to high correlation between rate lock commitments and best efforts contracts, no gain or loss occurs on the rate lock commitments. Rate lock commitments and related derivative instruments were not deemed to be significant at

December 31, 2012 and 2011 and therefore, not recorded on the balance sheet at December 31, 2012 and 2011.

F-10

---

Table of Contents

ASC Topic 460, "Guarantees," requires a guarantor entity, at the inception of a guarantee covered by the measurement provisions of the interpretation, to record a liability for the fair value of the obligation undertaken in issuing the guarantee.

Standby letters of credit are conditional commitments issued by the Bank to guarantee the financial performance of a customer to a third party. Those guarantees are primarily issued to support contracts entered into by customers. Most guarantees extend for one year. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Bank defines the fair value of these letters of credit as the fees paid by the customer or similar fees collected on similar instruments. The Bank amortizes the fees collected over the life of the instrument. The Bank generally obtains collateral, such as real estate or liens on customer assets for these types of commitments. The Bank's potential liability would be reduced by any proceeds obtained in liquidation of the collateral held. The Bank had standby letters of credit for customers aggregating \$1,620,362 and \$3,119,020 at December 31, 2012 and 2011, respectively. These letters of credit are primarily related to our real estate lending and the approximate value of underlying collateral upon liquidation is expected to be sufficient to cover this maximum potential exposure at December 31, 2012. The amount of the liability related to guarantees under standby letters of credit issued was not material as of December 31, 2012 and 2011.

Allowance for Loan Losses

The allowance for loan losses is maintained at a level sufficient to absorb estimated credit losses in the loan portfolio as of the date of the financial statements. The allowance for loan losses is a valuation reserve available for losses incurred or inherent in the loan portfolio and other extensions of credit. The determination of the adequacy of the allowance for loan losses is a critical accounting policy of the Company.

All, or part, of the principal balance of commercial and commercial real estate loans and construction loans are charged off against the allowance as soon as it is determined that the repayment of all, or part, of the principal balance is highly unlikely. Consumer loans are generally charged off no later than 120 days past due on a contractual basis, or earlier in the event of bankruptcy, or if there is an amount deemed uncollectible. Because all identified losses are immediately charged off, no portion of the allowance for loan losses is restricted to any individual loan or groups of loans, and the entire allowance is available to absorb any and all loan losses.

Loans are placed in a nonaccrual status when the ultimate collectability of principal or interest in whole, or in part, is in doubt. Past-due loans contractually past-due 90 days or more for either principal or interest are also placed in nonaccrual status unless they are both well secured and in the process of collection. Impaired loans are evaluated individually.

The following is our charge-off policy by our loan segments:

Commercial

Loans are generally fully or partially charged down to the fair value of collateral securing the asset when:

- Management judges the loan to be uncollectible;
- Repayment is deemed to be protracted beyond reasonable time frames;
- The loan has been classified as a loss by either internal loan review process or external examiners;
- The customer has filed bankruptcy and the loss becomes evident owing to a lack of assets; or
- The loan is significantly past due unless both well secured and in the process of collection.

Consumer

Consumer loans are generally charged off no later than 120 days past due on a contractual basis, earlier in the event of bankruptcy, or if there is an amount deemed uncollectible.

F-11

---

## Table of Contents

### Premises and Equipment

Premises and equipment are stated at cost less accumulated depreciation and amortization. Depreciation is computed primarily on the straight-line method over the estimated useful lives of the related assets for financial reporting purposes and using the mandated methods by asset type for income tax purposes. Building, furniture and fixtures, equipment and leasehold improvements are depreciated or amortized over the estimated useful lives of the assets or lease terms, as applicable. Estimated useful lives of buildings are forty years, furniture and fixtures and equipment are three to fifteen years, and leasehold improvements are three to ten years. Expenditures for maintenance and repairs are charged to expense as incurred.

The Company accounts for impairment of long lived assets in accordance with ASC Topic 360, "Property, Plant, and Equipment," which requires recognition and measurement for the impairment of long lived assets to be held and used or to be disposed of by sale. The Bank had no impaired long lived assets at December 31, 2012 and 2011.

### Derivative Contracts

Derivative contracts, as required by ASC Topic 815, "Derivatives and Hedging," are carried at fair value as either assets or liabilities in the statement of financial condition with unrealized gains and losses excluded from earnings and reported in a separate component of shareholders' equity, net of related income tax effects. Gains and losses on derivative contracts are recognized upon realization utilizing the specific identification method.

### Income Taxes

There are two components of income tax expense: current and deferred. Current income tax expense approximates cash to be paid or refunded for taxes for the applicable period. Deferred tax assets and liabilities are recognized due to differences between the basis of assets and liabilities as measured by tax laws and their basis as reported in the financial statements. Deferred tax assets are subject to management's judgment based upon available evidence that future realizations are likely. If management determines that the Company may not be able to realize some or all of the net deferred tax asset in the future, a charge to income tax expense may be required to reduce the value of the net deferred tax asset to the expected realizable value. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred taxes of a change in tax rates is recognized in income in the period that includes the enactment date. Deferred tax expense or benefit is recognized for the change in deferred tax liabilities.

The Company accounts for uncertainty in income taxes recognized in its consolidated financial statements in accordance with ASC Topic 740, "Income Taxes," which prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return, and also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The Company has not identified any significant income tax uncertainties through the evaluation of its income tax positions for the years ended December 31, 2012 and 2011 and has not recognized any liabilities for tax uncertainties as of December 31, 2012 and 2011. Our policy is to recognize interest and penalties on unrecognized tax benefits in income tax expense; such amounts were not significant during the years ended December 31, 2012 and 2011. The tax years subject to examination by the taxing authorities are, for federal purposes, the years ended December 31, 2011 and 2010, and, for state purposes, the years ended December 31, 2011, 2010, and 2009. The Company's 2009 Federal income tax return is currently under review by the Internal Revenue Service.

### Other Real Estate Owned

Other real estate owned obtained through loan foreclosures or the receipt of deeds-in-lieu of foreclosure is carried at the lower of fair value of the related property, as determined by current appraisals less estimated costs to sell, or the recorded investment in the property. Write-downs on these properties, which occur after the initial transfer from the loan portfolio, are recorded as operating expenses. Costs of holding such properties are charged to expense in the current period. Gains, to the extent allowable, and losses on the disposition of these properties are reflected in current operations.

F-12

---

## Table of Contents

### Goodwill and Other Intangible Assets

Goodwill represents the excess of the cost of an acquired entity over the fair value of the identifiable net assets acquired in accordance with the purchase method of accounting. Goodwill is not amortized but is reviewed for potential impairment on an annual basis, or more often if events or circumstances indicated that there may be impairment, in accordance with ASC Topic 350, "Intangibles – Goodwill and Other." Goodwill is tested for impairment at the reporting unit level and an impairment loss is recorded to the extent that the carrying amount of goodwill exceeds its implied fair value. Core deposit intangibles are a measure of the value of checking and savings deposits acquired in business combinations accounted for under the purchase method. Core deposit intangibles are amortized on a straight-line basis over their estimated lives (ranging from five to ten years) and identifiable intangible assets are evaluated for impairment if events and circumstances indicate a possible impairment. Any impairment loss related to goodwill and other intangible assets is reflected as other non-interest expense in the statement of operations in the period in which the impairment was determined. No assurance can be given that future impairment tests will not result in a charge to earnings. See Note 9 – Goodwill and Other Intangibles for additional information.

### Share-Based Compensation

The Company recognizes compensation expense for stock awards and options in accordance with ASC Topic 718, "Compensation – Stock Compensation." The expense of stock-based compensation is generally measured at fair value at the grant date with compensation expense recognized over the service period, which is usually the vesting period. The Company utilizes the Black-Scholes option-pricing model to estimate the fair value of each stock option on the date of grant. The Black-Scholes model takes into consideration the exercise price and expected life of the options, the current price of the underlying stock and its expected volatility, the expected dividends on the stock and the current risk-free interest rate for the expected life of the option. The Company's estimate of the fair value of a stock option is based on expectations derived from historical experience and may not necessarily equate to its market value when fully vested. See Note 16 – Share-Based Compensation for additional information.

### Benefit Plans

The Company provides certain retirement benefits to employees under a 401(k) plan. The Company's contributions to the 401(k) plan are expensed as incurred.

The Company also provides retirement benefits to certain employees under a supplemental executive retirement plan. The plan is unfunded and the Company accrues actuarial determined benefit costs over the estimated service period of the employees in the plan. In accordance with ASC Topic 715, "Compensation – Retirement Benefits," the Company recognizes the under funded status of this postretirement plan as a liability in its statement of financial position and recognizes changes in that funded status in the year in which the changes occur through other comprehensive income.

### Cash And Cash Equivalents

Cash and cash equivalents includes cash on hand, interest and non-interest bearing amounts due from banks, Federal funds sold and short-term investments. Generally, Federal funds are sold and short-term investments are made for a one or two-day period.

### Reclassifications

Certain reclassifications have been made to the prior period amounts to conform with the current period presentation. Such reclassification had no impact on net income or total shareholders' equity.

Table of Contents

## Advertising Costs

It is the Company's policy to expense advertising costs in the period in which they are incurred.

## Earnings Per Common Share

Basic net income per common share is calculated by dividing net income by the weighted average number of common shares outstanding during each period.

Diluted net income per common share is calculated by dividing net income by the weighted average number of common shares outstanding, as adjusted for the assumed exercise of potential common stock warrants, common stock options and unvested restricted stock awards (as defined below), using the treasury stock method. All share information has been restated for the effect of a 5% stock dividend declared on December 20, 2012 and paid on January 31, 2013 to shareholders of record on January 14, 2013.

The following tables illustrate the reconciliation of the numerators and denominators of the basic and diluted earnings per common share (EPS) calculations. Dilutive securities in the tables below exclude common stock options and warrants with exercise prices that exceed the average market price of the Company's common stock during the periods presented. Inclusion of these common stock options and warrants would be anti-dilutive to the diluted earnings per common share calculation.

	Year Ended December 31, 2012		
	Income	Weighted- average shares	Per share Amount
Basic earnings per common share:			
Net income	\$ 5,060,504	5,511,114	\$ 0.92
Effect of dilutive securities:			
Stock options and unvested stock awards		95,989	
Diluted EPS:			
Net income plus assumed conversion	\$ 5,060,504	5,607,103	0.90

	Year Ended December 31, 2011		
	Income	Weighted- average shares	Per share Amount
Basic earnings per common share:			
Net income	\$ 3,931,443	5,302,287	\$ 0.74
Effect of dilutive securities:			
Stock options and unvested stock awards		38,968	
Diluted EPS:			
Net income plus assumed conversion	\$ 3,931,443	5,341,255	\$ 0.74

For the years ended December 31, 2012 and 2011, 108,174 and 70,924 options, respectively, were anti-dilutive and were not included in the computation of diluted earnings per common share. For the year ended December 31, 2011, all common stock warrants issued under the CPP were anti-dilutive.

---

## Table of Contents

### Comprehensive Income

Comprehensive income consists of net income and other comprehensive income. Other comprehensive income includes unrealized gains and losses on securities available for sale, other-than-temporary non-credit related security impairments, unrealized gains and losses on cash flows hedges, and changes in the funded status of benefit plans which are also recognized in equity.

### Variable Interest Entities

Management has determined that Trust II qualifies as a variable interest entity under ASC Topic 810, "Consolidation." Trust II issued mandatorily redeemable preferred stock to investors, loaned the proceeds to the Company and holds, as its sole asset, subordinated debentures issued by the Company. As a qualified variable interest entity, Trust II's Balance Sheet and Statement of Operations have never been consolidated with those of the Company.

In March 2005, the Federal Reserve Board adopted a final rule that would continue to allow the inclusion of trust preferred securities in Tier 1 capital, but with stricter quantitative limits. Under the final rule, after a five-year transition period, the aggregate amount of trust preferred securities and certain other capital elements would be limited to 25% of Tier 1 capital elements, net of goodwill. The amount of trust preferred securities and certain other elements in excess of the limit could be included in Tier 2 capital, subject to restrictions. Based on the final rule, the Company has included all of its \$18.0 million in trust preferred securities in Tier 1 capital at December 31, 2012 and 2011.

### Segment Information

U.S. GAAP establishes standards for public business enterprises to report information about operating segments in their annual financial statements and requires that those enterprises report selected information about operating segments in subsequent interim financial reports issued to shareholders. It also established standards for related disclosure about products and services, geographic areas, and major customers. Operating segments are components of an enterprise, which are evaluated regularly by the chief operating decision-maker in deciding how to allocate and assess resources and performance. The Company's chief operating decision-maker is the President and Chief Executive Officer. The Company has applied the aggregation criteria for its operating segments to create one reportable segment, "Community Banking."

The Company's Community Banking segment consists of construction, commercial, retail and mortgage banking. The Community Banking segment is managed as a single strategic unit, which generates revenue from a variety of products and services provided by the Company. For example, construction and commercial lending is dependent upon the ability of the Company to fund itself with retail deposits and other borrowings and to manage interest rate and credit risk. This situation is also similar for consumer and residential real estate lending.

### Recent Accounting Pronouncements.

#### ASU 2011-11 (Disclosures about offsetting Assets and Liabilities)

On December 19, 2011, The FASB issued Accounting Standards Update (ASU) 2011-11, "Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities." This new guidance affects all entities with financial instruments or derivatives that are either presented on a net basis in the balance sheet or subject to an enforceable master netting arrangement or a similar arrangement. The ASU does not change existing offsetting criteria in U.S. generally accepted accounting principles (U.S. GAAP) or the permitted balance sheet presentation for items meeting the criteria. To help financial statement users better assess the effect or potential effect of offsetting arrangements on an entity's financial position, the new guidance requires disclosures in the financial statement notes that provide both net

and gross information about assets and liabilities that have been offset and the related arrangements.

The new disclosure requirements in the ASU are intended to enhance comparability between financial statements prepared using U.S. GAAP and those prepared in accordance with international Financial Reporting Standards (IFRS). The eligibility criteria for offsetting are different in U.S. GAAP and IFRS. In January 2011, the FASB and the International Accounting Standards Board issued an exposure draft proposing new common criteria for offsetting, but the boards could not agree. The FASB voted to retain existing U.S. GAAP guidance on offsetting and to require expanded disclosures for financial instruments and derivative instruments that are either offset in the balance sheet or eligible for offset subject to a master netting arrangement or similar arrangement.

F-15

---

## Table of Contents

The ASU is effective for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. Disclosures required by the amendments should be provided retrospectively for all comparative periods. The FASB has published a short recap highlighting the significant issues the ASU addresses. The Company does not expect the adoption of this ASU to have a material impact on the Company's consolidated financial position or results of operations.

### ASU 2011-05, 2001-12 and 2013-12 (Presentation of Comprehensive Income)

The provisions of ASU 2011-05 amend FASB ASC Topic 220, Comprehensive Income, to facilitate the continued alignment of U.S. GAAP with International Accounting Standards. The ASU prohibits the presentation of the components of comprehensive income in the statement of shareholders' equity. Reporting entities are allowed to present either: a statement of comprehensive income, which reports both net income and other comprehensive income; or separate, but consecutive, statements of net income and other comprehensive income. Under previous GAAP, all three presentations were acceptable. Regardless of the presentation selected, the reporting entity is required to present all reclassifications between other comprehensive and net income on the face of the new statement or statements. The provisions of this ASU are effective for fiscal years and interim periods beginning after December 31, 2011 for public entities. The Company adopted this update on January 1, 2012 and the new Consolidated Statements of Comprehensive Income are included in these financial statements.

ASU 2011-12, "Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income ("AOCI") in Accounting Standards Update No. 2011-05," was issued by the FASB on December 23, 2011. This ASU defers the implementation of only those provisions in ASU 2011-05, dealing only with the presentation of items reclassified out of AOCI.

The amendments in ASU 2011-12 and ASU 2011-05 are effective at the same time: For public entities, the guidance is effective for fiscal years and interim periods within those years, beginning after December 15, 2011. The requirements are effective for nonpublic entities for fiscal years ending after December 15, 2012. The FASB has published a short recap of the reasons for the ASU 2011-12 deferrals. The adoption of this guidance did not have any impact on the Company's consolidated financial position or results of operations.

In February 2013, the FASB issued ASU 2013-02, Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income, to improve the transparency of reporting reclassifications out of accumulated other comprehensive income. The amendments in this ASU do not change the current requirements for reporting net income or other comprehensive income in financial statements. All of the information that this ASU requires already is required to be disclosed elsewhere in the financial statements under U.S. GAAP.

The new amendments will require an organization to present (either on the face of the statement where net income is presented or in the notes) the effects on the line items of net income of significant amounts reclassified out of accumulated other comprehensive income, but only if the item reclassified is required under U.S. GAAP to be reclassified to net income in its entirety in the same reporting period. The new amendments will also require an organization to present cross-reference to other disclosures currently required under U.S. GAAP for other reclassification items (that are not required under U.S. GAAP) to be reclassified directly to net income in their entirety in the same reporting period. This would be the case when a portion of the amount reclassified out of accumulated other comprehensive income is initially transferred to a balance sheet account (e.g. pension-related amounts) instead of directly to income or expense.

The amendments apply to all public and private companies that report items of other comprehensive income. Public companies are required to comply with these amendments for all reporting periods (interim and annual). Nonpublic

company are required to meet the reporting requirements of the amended paragraphs about the roll forward of accumulated other comprehensive income for both interim and annual reporting periods. However, private companies are only required to provide the information about the impact of reclassifications on line items of net income for annual reporting periods, not for interim reporting periods.

F-16

---

Table of Contents

The amendments of ASU 2013-02 are effective for reporting periods beginning after December 15, 2012, for public companies and are effective for reporting periods beginning after December 15, 2013, for nonpublic companies. The Company does not believe this pronouncement, when adopted, will have a material impact on operations or financial position.

2. Acquisition of Unaffiliated Branches

On March 25, 2011, the Bank acquired certain deposit and other liabilities, real estate and related assets of the Rocky Hill, Hillsborough and Hopewell, New Jersey branch banking offices from another financial institution for a purchase price of \$9.85 million (the “March 2011 Acquisition”). The March 2011 Acquisition was completed pursuant to the terms and conditions of the Branch Purchase and Assumption Agreement and Agreement for Purchase dated as of December 30, 2010, which was previously disclosed on a Current Report on Form 8-K filed by the Company with the SEC on January 3, 2011.

The Company accounted for this transaction using applicable accounting guidance regarding business combinations. The fair value of savings and transaction deposit accounts acquired was assumed to approximate the carrying value as these accounts have no stated maturity and are payable on demand. A core deposit intangible was ascribed to the value of non-maturity deposits based upon an independent third party evaluation which was prepared using the actual characteristics of the deposits and assumptions we believe to be reasonable. Certificates of deposit accounts were valued utilizing a discounted cash flow analysis based upon the underlying accounts’ contractual maturities and interest rates. The present value of the projected cash flow was then determined using discount rates based upon certificate of deposit interest rates available in the marketplace for accounts with similar terms. The fair value of loans acquired, all of which were performing, was assumed to approximate amortized cost based upon the small size and nature of those loans.

As a result of the March 2011 Acquisition, the three branches became branches of the Bank. Included in the March 2011 Acquisition were the assumption of deposit liabilities of \$111.9 million, primarily consisting of demand deposits, and the acquisition of cash of approximately \$101.5 million, fixed assets of approximately \$4.6 million, which includes, without limitation, ownership of the real estate and improvements upon which the branches are situated, and loans of \$862,000. The Bank recorded goodwill of approximately \$3.2 million and a core deposit intangible asset of approximately \$1.7 million as a result of the March 2011 Acquisition.

3. Investment Securities

Amortized cost, gross unrealized gains and losses, and the estimated fair value by security type are as follows:

U.S. Treasury securities and obligations of U.S. Government sponsored corporations and agencies: The Unrealized losses on investments in these securities were caused by interest rate increases. The contractual terms of these investments do not permit the issuer to settle the securities at a price less than the amortized cost of the investment. Because the Company does not intend to sell these investments and it is not more likely than not that the Company will be required to sell these investments before a market price recovery or maturity, these investments are not considered other-than temporarily impaired.

Residential collateralized mortgage obligations and residential mortgage-backed securities: The unrealized losses on investments in residential collateralized mortgage obligations and residential mortgage-backed securities were caused by interest rate increases. The contractual cash flows of these securities are guaranteed by the issuer, primarily government or government sponsored agencies. It is expected that the securities would not be settled at a price less than the amortized cost of the investment. Because the decline in fair value is attributable to changes in interest rates and not credit quality, and because the Company does not intend to sell these investments and it is not more likely than not that the Company will be required to sell these investments before a market price recovery or maturity, these investments are not considered other-than-temporarily impaired.

Table of Contents

Obligations of State and Political Subdivisions: The unrealized losses on investments in these securities were caused by interest rate increases. It is expected that the securities would not be settled at a price less than the amortized cost of the investment. Because the decline in fair value is attributable to changes in interest rates and not credit quality, and because the Company does not intend to sell these investments and it is not more likely than not that the Company will be required to sell these investments before a market price recovery or maturity, these investments are not considered other-than-temporarily impaired.

Trust preferred debt securities – single issuer: The investments in these securities with unrealized losses are comprised of four corporate trust preferred securities issued by two large financial institutions that mature in 2027. The contractual terms of the trust preferred securities do not allow the issuer to settle the securities at a price less than the face value of the trust preferred securities, which is greater than the amortized cost of the trust preferred securities. Both of the issuers continue to maintain investment grade credit ratings and neither has defaulted on interest payments. Because the decline in fair value is attributable to the widening of interest rate spreads and the lack of an active trading market for these securities and, to a lesser degree, market concerns on the issuers' credit quality, and because the Company does not intend to sell these investments and it is not more likely than not that the Company will be required to sell these investments before a market price recovery or maturity, these investments are not considered other-than-temporarily impaired.

Corporate debt securities. The unrealized losses on investments in corporate debt securities were caused by interest rate increases. None of the corporate issuers have defaulted on interest payments. Because the decline in fair value is attributable to changes in interest rates and not credit quality, and because the Company does not intend to sell these investments before a market price recovery or maturity, these investments are not considered other-than-temporarily impaired.

Trust preferred debt securities-pooled: This trust preferred debt security was issued by a two issuer pool (Preferred Term Securities XXV, Ltd. Co-issued by Keefe, Bruyette and Woods, Inc. and First Tennessee ("PRETSL XXV"), consisting primarily of financial institution holding companies. During 2009, the Company recognized an other-than-temporary impairment charge of \$864,727, of which \$363,783 was determined to be a credit loss and charged to operations and \$500,944 was recognized in other comprehensive income (loss) component of shareholders' equity.

The primary factor used to determine the credit portion of the impairment loss to be recognized in the income statement for this security was the discounted present value of projected cash flow where that present value of cash flow was less than the amortized cost basis of the security. The present value of cash flow was developed using an EITF 99-20 model that considered performing collateral ratios, the level of subordination to senior tranches of the security, credit ratings of and projected credit defaults in the underlying collateral.

On a quarterly basis, management evaluates this security to determine if any additional other-than-temporary impairment is required. As of December 31, 2012, our evaluation was as follows:

- a. We obtained the PRETSL XXV Depository Institutions Issuer List as of December 31, 2012 from the FTN Financial Corp. ("FTN") website and reviewed the financial ratios and capital levels of each individual financial institution issuer.
- b. We sorted the financial institutions on the issuer list to develop three "buckets" (or categories) for further deferred/default analysis based upon the indicated "Texas Ratio." The Texas Ratio is calculated by dividing the institution's Non-Performing Assets plus loans 90 days past due by the combined total of Tangible Equity plus the Allowance for Loan Losses. The three buckets consisted of those institutions with a Texas Ratio of:

(1)

Above 100;

F-23

---

Table of Contents

- (2) 75 to 100; and
- (3) Below 75.

c. We then applied the following asset specific deferral/default assumptions to each of these buckets:

- (1) Above 100 - 100% default; 0% recovery;
- (2) 75 to 100 – 100% deferred; 15% recovery at 2 years from initial date of deferral; and
- (3) Below 75 – no deferral/default.

d. We then ran a cash flow projection to analyze the impact of future deferral/default activity by applying the following assumption on those institutions in bucket (3) of our analysis:

- Defaults at 75 basis points applied annually; 15% recovery with a 2-year lag from the initial date of deferral.

Our rationale for these metrics is as follows: (1) The FDIC lists the number of bank failures each year from 1934 – 2008. Comparing bank failures to the number of FDIC institutions produces an annual average default rate of 36 basis points. Given the continuing uncertain economic environment, we believe the doubling of this amount, or 75 basis points, to be an appropriate measurement for defaults; and (2) Standard & Poor’s published “Global Methodology for Rating Trust Preferred/Hybrid Securities Revised” on November 21, 2008. This analysis uses a recovery assumption of 15%, which we also deem an appropriate measurement.

Our position is that it is appropriate to apply this future default factor in our analysis as it is not realistic to assume no adverse conditions will occur over the remaining 26-year stated maturity of this pooled security even though the individual institutions are currently performing according to terms.

e. This December 31, 2012 projection of future cash flows produced a present value factor that exceeded the carrying value of the pooled trust preferred security; therefore, management concluded that no other-than-temporary impairment issues were present at December 31, 2012.

A number of factors could cause management to conclude in one or more future reporting periods that an unrealized loss that exists with respect to PRETSL XXV constitutes an additional credit impairment. These factors include, but are not limited to, failure to make interest payments, an increase in the severity of the unrealized loss, an increase in the continuous duration of the unrealized loss without an impairment in value or changes in market conditions and/or industry or issuer specific factors that would render management unable to forecast a full recovery in value. In addition, the fair value of trust preferred securities could decline if the overall economy and the financial condition of the issuers continue to deteriorate and there remains limited liquidity for this security.

The following table sets forth information with respect to this security at December 31, 2012:

Security Class	Amortized Cost	Fair Value	Unrealized (Loss)	Percent of Underlying Collateral Performing	Percent of Underlying Collateral In Deferral (1)	Percent of Underlying Collateral In Default (1)	Expected Deferrals and Defaults as a % of Remaining	Moody's / S&P Ratings	Excess Subordination Amount % of Current Performing Collateral
----------------	----------------	------------	-------------------	---	--	---	---	-----------------------	--

Performing  
Collateral

PreTSL XXV B-1	\$656,662	\$146,080	(\$510,582)	65.7%	15.6%	18.7%	14.1%	C/NR	\$102,500,000	20.0%
----------------	-----------	-----------	-------------	-------	-------	-------	-------	------	---------------	-------

F-24

---

Table of Contents

Notes to table above:

- (1) This percentage represents the amount of specific deferrals / defaults that have occurred, plus those that are known for the following quarters to the total amount of original collateral. Fewer deferrals / defaults produce a lower percentage.
- (2) “Excess subordination” amount is the additional defaults / deferrals necessary in the next reporting period to deplete the entire credit enhancement (excess interest and over-collateralization) beneath our tranche within each pool to the point that would cause a “break in yield”. This amount assumes that all currently performing collateral continues to perform. A break in yield means that our security would not be expected to receive all the contractual cash flows (principal and interest) by maturity. The “percent of underlying collateral performing” is the ratio of the “excess subordination amount” to current performing collateral - a higher percentage means there is more excess subordination to absorb additional defaults / deferrals, and the better our security is protected from loss.

The Company regularly reviews the composition of the investment securities portfolio, taking into account market risks, the current and expected interest rate environment, liquidity needs, and its overall interest rate risk profile and strategic goals.

## 4. Loans and Loans Held for Sale

Loans are as follows:

	2012	2011
Commercial business	\$ 57,865,436	\$ 50,784,674
Commercial real estate	102,412,694	99,636,976
Mortgage warehouse lines	284,127,530	249,345,831
Construction loans	55,691,393	49,285,783
Residential real estate loans	10,897,307	12,885,352
Loans to individuals	9,643,385	12,219,640
All other loans	189,279	255,556
Gross Loans	520,827,024	474,413,812
Deferred loan costs	987,086	1,017,959
	\$ 521,814,110	\$ 475,431,771

The Bank’s business is concentrated in New Jersey, particularly Middlesex, Mercer and Somerset Counties and the Fort Lee area of Bergen County. A significant portion of the total loan portfolio is secured by real estate or other collateral located in these areas.

The Bank had residential mortgage loans held for sale of \$35,960,262 at December 31, 2012 and \$19,234,111 at December 31, 2011. The Bank sells residential mortgage loans in the secondary market on a non-recourse basis. The related loan servicing rights are generally released to the purchaser. Loans held for sale at December 31, 2012 and 2011 were residential mortgage loans that the Bank intends to sell under forward contracts providing for delivery to purchasers generally within a two month period. Changes in fair value of the forward sales contracts, and the related loan origination commitments and closed loans, were not significant at December 31, 2012 and 2011.

Table of Contents

## 5. Allowance for Loan Losses and Credit Quality Disclosure

A summary of the allowance for loan losses is as follows:

	2012	2011
Balance, beginning of year	\$ 5,534,450	\$ 5,762,712
Provision charged to operations	2,149,992	2,558,328
Loans charged off	(548,091)	(2,799,482)
Recoveries of loans charged off	14,861	12,892
Balance, end of year	\$ 7,151,212	\$ 5,534,450

The Company's primary lending emphasis is the origination of commercial and commercial real estate loans and mortgage warehouse lines of credit. Based on the composition of the loan portfolio, the inherent primary risks are deteriorating credit quality, a decline in the economy, and a decline in New Jersey real estate market values. Any one, or a combination, of these events may adversely affect the loan portfolio and may result in increased delinquencies, loan losses and increased future provision levels.

The following table provides an aging of the loan portfolio by loan class at December 31, 2012:

	30-59 Days	60-89 Days	Greater than 90 Days	Total Past Due	Current	Total Loans Receivable	Recorded Investment > 90 Days Accruing	Nonaccrual Loans

Consumer								
Loans to								
Individuals	0	144,904	77,858	222,762	11,996,878	12,219,640	0	77,858
Other	0	0	0	0	255,556	255,556	0	0
Deferred Loan								
Costs	0	0	0	0	1,017,959	1,017,959	0	0
Total	\$1,270,053	\$ 954,930	\$1,505,496	\$3,730,479	\$471,701,292	\$475,431,771	\$ 0	\$ 2,991,470

Additional income before taxes amounting to \$362,399 and \$337,158 would have been recognized in 2012 and 2011, respectively, if interest on all loans had been recorded based upon original contract terms.

Management reviews the adequacy of the allowance on at least a quarterly basis to ensure that the provision for loan losses has been charged against earnings in an amount necessary to maintain the allowance at a level that is adequate based on management's assessment of probable estimated losses. The Company's methodology for assessing the adequacy of the allowance for loan losses consists of several key elements. These elements include a specific reserve for impaired loans, an allocated reserve, and an unallocated portion.

The Company consistently applies the following comprehensive methodology. During the quarterly review of the allowance for loan losses, the Company considers a variety of factors that include:

- General economic conditions.
- Trends in charge-offs.
- Trends and levels of delinquent loans.
- Trends and levels of non-performing loans, including loans over 90 days delinquent.

- Trends in volume and terms of loans.
- Levels of allowance for specific classified loans.
- Credit concentrations.

The methodology includes the segregation of the loan portfolio into loan types with a further segregation into risk rating categories, such as special mention, substandard, doubtful, and loss. This allows for an allocation of the allowance for loan losses by loan type; however, the allowance is available to absorb any loan loss without restriction. Larger balance, non-homogeneous loans representing significant individual credit exposures are evaluated individually through the internal loan review process. It is this process that produces the watch list. The borrower's overall financial condition, repayment sources, guarantors and value of collateral, if appropriate, are evaluated. Based on these reviews, an estimate of probable losses for the individual larger-balance loans are determined, whenever possible, and used to establish specific loan loss reserves. In general, for non-homogeneous loans not individually assessed and for homogeneous groups, such as residential mortgages and consumer credits, the loans are collectively evaluated based on delinquency status, loan type, and historical losses. These loan groups are then internally risk rated.

## Table of Contents

The watch list includes loans that are assigned a rating of special mention, substandard, doubtful and loss. Loans criticized special mention have potential weaknesses that deserve management's close attention. If uncorrected, the potential weaknesses may result in deterioration of the repayment prospects. Loans classified substandard have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They include loans that are inadequately protected by the current sound net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans classified doubtful have all the weaknesses inherent in loans classified substandard with the added characteristic that collection or liquidation in full, on the basis of current conditions and facts, is highly improbable. Loans rated as doubtful in whole, or in part, are placed in nonaccrual status. Loans classified as a loss are considered uncollectible and are charged off against the allowance for loan losses.

The specific reserve for impaired loans is established for specific loans which have been identified by management as being impaired. These impaired loans are primarily assigned a doubtful risk rating grade because the loan has not performed according to payment terms and there is reason to believe that repayment of the loan principal in whole, or in part, is unlikely. The specific portion of the allowance is the total amount of potential unconfirmed losses for these individual doubtful loans. To assist in determining the fair value of loan collateral, the Company often utilizes independent third party qualified appraisal firms which in turn employ their own criteria and assumptions that may include occupancy rates, rental rates, and property expenses, among others.

The second category of reserves consists of the allocated portion of the allowance. The allocated portion of the allowance is determined by taking pools of loans outstanding that have similar characteristics and applying historical loss experience for each pool. This estimate represents the potential unconfirmed losses within the portfolio. Individual loan pools are created for commercial and commercial real estate loans, construction loans, and various types of loans to individuals. The historical estimation for each loan pool is then adjusted to account for current conditions, current loan portfolio performance, loan policy or management changes, or any other factor which may cause future losses to deviate from historical levels.

The Company also maintains an unallocated allowance. The unallocated allowance is used to cover any factors or conditions which may cause a potential loan loss but are not specifically identifiable. It is prudent to maintain an unallocated portion of the allowance because no matter how detailed an analysis of potential loan losses is performed, these estimates by definition lack precision. Management must make estimates using assumptions and information that is often subjective and changing rapidly.

The following discusses the risk characteristics of each of our loan portfolio segments, commercial and consumer.

### Commercial

The Company's primary lending emphasis is the origination of commercial and commercial real estate loans and mortgage warehouse lines of credit. Based on the composition of the loan portfolio, the inherent primary risks are deteriorating credit quality, a decline in the economy, and a decline in New Jersey real estate market values. Any one or a combination of these events may adversely affect the loan portfolio and may result in increased delinquencies, loan losses and increased future provision levels.

### Consumer

The Company's loan portfolio consumer segment is comprised of residential real estate loans, home equity loans and other loans to individuals. Individual loan pools are created for the various types of loans to individuals.

In general, for homogeneous groups, such as residential mortgages and consumer credits, the loans are collectively evaluated based on delinquency status, loan type, and industry historical losses. These loan groups are then internally risk rated.

The Company considers the following credit quality indicators in assessing the risk in the loan portfolio:

F-28

---

Table of Contents

- Consumer credit scores
- Internal credit risk grades
- Loan-to-value ratios
- Collateral
- Collection experience

The Company's internal credit risk grades are based on the definitions currently utilized by the banking regulatory agencies. The grades assigned and definitions are as follows, and loans graded excellent, above average, good and watch list are treated as "pass" for grading purposes:

1. Excellent - Loans that are based upon cash collateral held at the Bank and adequately margined. Loans that are based upon "blue chip" stocks listed on the major exchanges and adequately margined.
2. Above Average - Loans to companies whose balance sheets show excellent liquidity and long-term debt is on well-spread schedules of repayment easily covered by cash flow. Such companies have been consistently profitable and have diversification in their product lines or sources of revenue. The continuation of profitable operations for the foreseeable future is likely. Management is comprised of a mix of ages, experience, and backgrounds and management succession is in place. Sources of raw materials are abundant, and for service companies, the source of revenue is abundant. Future needs have been planned for. Character and ability of individuals or company principals are excellent. Loans to individuals supported by high net worths and liquid assets.
3. Good - Loans to companies whose balance sheets show good liquidity and cash flow adequate to meet maturities of long-term debt with a comfortable margin. Such companies have established profitable records over a number of years, and there has been growth in net worth. Operating ratios are in line with those of the industry, and expenses are in proper relationship to the volume of business done and the profits achieved. Management is well-balanced and competent in their responsibilities. Economic environment is favorable; however, competition is strong. The prospects for growth are good. Loans in this category do not meet the collateral requirements of loans in categories 1 and 2 above. Loans to individuals supported by good net worths but whose supporting assets are illiquid.
- 3w. Watch List - Included in this category are loans evidencing problems identified by Bank management that require closer supervision. Such problem has not developed to the point which requires a Special Mention rating. This category also covers situations where the Bank does not have adequate current information upon which credit quality can be determined. The account officer has the obligation to correct these deficiencies within 30 days from the time of notification.
4. Special Mention - Loans or borrowing relationships that require more than the usual amount of attention by Bank management. Industry conditions may be adverse or weak. The borrower's ability to meet current payment schedules may be questionable, even though interest and principal are being paid as agreed. Heavy reliance has been placed on the collateral. Profits, if any, are interspersed with losses. Management is "one man" or weak or incompetent or there is no plan for management succession. Expectations of a loan loss are not immediate; however, if present trends continue, a loan loss could be expected.
5. Substandard - Loans in this category possess weaknesses that jeopardize the ultimate collection of total outstandings. These weaknesses require close supervision by Bank management. Current financial statements are unavailable and the loan is inadequately protected by the collateral pledged. This category will normally include loans that have been classified as substandard by the regulators.
6. Doubtful - Loans with the same weaknesses inherent in the substandard classification and where collection or liquidation in full is highly questionable. It is likely that the loan will not be collected in full and the Bank will suffer

some loss which is not quantifiable at the time of review.

7. Loss - Loans considered uncollectable and of such little value that their continuance as an active asset is not warranted. Loans in this category should immediately be eliminated from the Bank's loan loss reserve. Any accrued interest should immediately be backed out of income.

F-29

---

Table of Contents

The following table provides a breakdown of the loan portfolio by credit quality indicator at December 31, 2012.

Commercial Credit Exposure - By Internally Assigned Grade	Commercial		Commercial	Mortgage	Residential

## Impaired Loans Disclosures

Loans are considered to be impaired when, based on current information and events, it is determined that the Company will not be able to collect all amounts due according to the loan contract, including scheduled interest payments. When a loan is placed on nonaccrual status, it is also considered to be impaired. Loans are placed on nonaccrual status when: (1) the full collection of interest or principal becomes uncertain; or (2) they are contractually past due 90 days or more as to interest or principal payments unless the loans are both well secured and in the process of collection.

When a loan is identified as impaired, the measurement of impairment is based on the present value of expected future cash flows, discounted at the loan's effective interest rate, except when the sole remaining source of repayment for the loan is the liquidation of the collateral. In such cases, the current fair value of the collateral less selling costs is used. If the value of the impaired loan is less than the recorded investment in the loan, the impairment is recognized through an allowance estimate or a charge to the allowance.

Table of Contents

In the normal course of business, the Bank may consider modifying loan terms for various reasons. These reasons may include as a retention strategy to compete in the current interest rate environment or to re-amortize or extend a loan term to better match the loan's payment stream with the borrower's cash flow. A modified loan would be considered to be a troubled debt restructuring ("TDR") if the Bank grants a concession to a borrower and has determined that the borrower is troubled (i.e., experiencing financial difficulties).

If the Bank restructures a loan to a troubled borrower, the loan terms (i.e. interest rate, payment, amortization period, maturity date) may be modified in various ways to enable the borrower to cover the modified debt service payments based on current financials and cash flow adequacy. If a borrower's hardship is thought to be temporary, then modified terms may only be offered for that time period. Where possible, the Bank would attempt to obtain additional collateral and/or secondary payment sources at the time of the restructure in order to put the Bank in the best possible position if the borrower is not able to meet the modified terms. The Bank will not offer modified terms if it believes that modifying the loan terms will only delay an inevitable permanent default.

The Bank adopted Accounting Standards Update ("ASU") No. 2011-02 on July 1, 2011. ASU No. 2011-02 provides additional guidance to creditors for evaluating whether a modification or restructuring of a receivable is a troubled debt restructuring. In evaluating whether a restructuring constitutes a troubled debt restructuring, ASU No. 2011-02 requires that a creditor must separately conclude that the restructuring constitutes a concession and the borrower is experiencing financial difficulties. As a result of our adoption of ASU No. 2011-02, we reassessed the terms and restructurings. The following table is a breakdown of troubled debt restructurings, all of which are classified as impaired, which occurred during the years ended December 31, 2012 and 2011.

## During 2012

	Number of Contracts	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment
Troubled Debt Restructurings:			
Commercial	2	\$ 137,028	\$ 86,794
Construction	1	1,278,362	1,261,000

## During 2011

	Number of Contracts	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment
Troubled Debt Restructurings:			
Commercial	4	\$ 329,889	\$ 329,889
Commercial Real Estate	2	840,106	840,106
Residential Real Estate	1	519,913	519,913

The following is a summary of troubled debt restructurings that subsequently defaulted within twelve months of restructuring during the years ended December 31, 2012 and 2011:

## During 2012

	Number of Contracts	Recorded Investment
Troubled Debt Restructurings that subsequently defaulted:		
Commercial	2	\$ 82,113

Table of Contents

During 2011

	Number of Contracts	Recorded Investment
Troubled Debt Restructurings that subsequently defaulted:		
Commercial	1	\$ 22,471
Residential Real Estate	1	518,694

If the Bank determines that a borrower has suffered deterioration in their financial condition, a restructuring of the loan terms may occur. Such loan restructurings may include, but are not limited to, reductions in principal or interest, reductions in interest rates, and extensions of the maturity date. When modifications are implemented, such loans meet the definition of a troubled debt restructuring. Most of the modifications employed by the Bank during 2012 and 2011 have resulted in lower amortization payments for a limited time period without any reduction in the interest rate. The lower payments are determined by an analysis of the borrower's cash flow ability to meet the modified terms while anticipating an improved financial condition to enable a resumption of the original payment terms.

## 6. Loans to Related Parties

Activity related to loans to directors, executive officers and their affiliated interests during 2012 and 2011 is as follows:

	December 31,	
	2012	2011
Balance, beginning of year	\$ 3,077,361	\$ 3,368,786
Loans granted	412,581	9,711
Repayments of loans	(233,208)	(301,136)
Balance, end of year	\$ 3,256,734	\$ 3,077,361

All such loans were made under customary terms and conditions and were current as to principal and interest payments as of December 31, 2012 and 2011.

## 7. Premises and Equipment

Premises and equipment consist of the following:

		December 31,	
	Estimated Useful Lives	2012	2011
Land		\$ 1,797,528	\$ 1,797,528
Construction in progress		0	18,427
Building	40 Years	7,272,293	7,300,110
Leasehold improvements	10 Years	4,016,113	3,291,727
Furniture and equipment	3 – 15 Years	3,745,340	3,409,030
		16,831,274	15,816,822
Less: Accumulated depreciation		(6,200,979)	(5,377,518)
		\$ 10,630,295	\$ 10,439,304

Depreciation expense was \$904,658 and \$849,954 for the years ended December 31, 2012 and 2011, respectively.

F-36

---

Table of Contents

## 8. Other Real Estate Owned (“OREO”)

The Bank held six properties valued at \$8,332,601 at December 31, 2012 and thirteen properties valued at \$12,409,201 at December 31, 2011. The Company incurred impairment write-downs of \$2,345,267 and \$147,718 on OREO property during the years ended December 31, 2012 and 2011, respectively. Further declines in real estate values may result in increased foreclosed real estate expense in the future. Routine holding costs are charged to expense as incurred and improvements to real estate owned that enhance the value of the real estate are capitalized. Net OREO expenses, including impairment write-downs and sales gains and losses, amounted to \$3,553,779 and \$732,693 for the years ended December 31, 2012 and 2011, respectively, and is included in other operating expenses.

## 9. Goodwill and Intangible Assets

Goodwill and intangible assets are included in other assets and are summarized as follows:

	2012	2011
Goodwill	\$ 3,764,314	\$ 3,764,314
Core deposits intangible	1,393,228	1,661,195
Total	\$ 5,157,542	\$ 5,425,509

Amortization expense of intangible assets was \$267,967 for the year ended December 31, 2012 and \$210,154 for the year ended December 31, 2011.

Scheduled amortization of the core deposits intangible is as follows:

2013	\$ 267,967
2014	258,054
2015	231,255
2016	231,255
2017	231,255
Thereafter	173,442
	\$ 1,393,228

## 10. Deposits

Deposits consist of the following:

	2012	2011
Demand		
Non-interest bearing	\$ 152,334,759	\$ 105,470,543
Interest bearing	211,475,765	201,987,751
Savings	202,261,035	176,198,907
Time	141,617,916	140,205,284
	\$ 707,689,475	\$ 623,862,485

At December 31, 2012, time deposits have contractual maturities as follows:

Year	Amount
------	--------

2013	\$	82,529,124
2014		26,438,280
2015		12,191,851
2016		10,340,849
2017		10,117,812
	\$	141,617,916

Table of Contents

Individual time deposits in amounts of \$100,000 or greater amounted to \$72,248,706 and \$70,588,990 at December 31, 2012 and 2011, respectively. As of December 31, 2012, time certificates of deposit in amounts of \$100,000 or more have remaining maturities as follows:

Maturity Range	Amount
Three months or less	\$ 9,056,166
Over three months through six months	12,170,788
Over six months through twelve months	20,208,987
Over twelve months	30,812,765
	\$ 72,248,706

## 11. Borrowings

The balance of borrowings was \$42,400,000 at December 31, 2012, consisting of a long-term FHLB advance of \$10,000,000 and overnight funds purchased of \$32,400,000. The balance of borrowings was \$88,300,000 at December 31, 2011 and consisted of long-term FHLB advance of \$10,000,000 and overnight funds purchased of \$78,300,000.

The Bank has established a borrowing relationship with the FHLB which further supports and enhances liquidity. During 2010, FHLB replaced its Overnight Line of Credit and One-Month Overnight Repricing Line of Credit facilities available to member banks with a fully secured line of up to 50 percent of a bank's quarter-end total assets. Under the terms of this facility, the Bank's total credit exposure to FHLB cannot exceed 50 percent, or \$420,484,191, of its December 31, 2012 total assets. In addition, the aggregate outstanding principal amount of the Bank's advances, letters of credit, the dollar amount of the FHLB's minimum collateral requirement for off balance sheet financial contracts and advance commitments cannot exceed 30 percent of the Bank's total assets, unless the Bank obtains approval from FHLB's Board of Directors or its Executive Committee. These limits are further restricted by a member's ability to provide eligible collateral to support its obligations to FHLB as well as the ability to meet the FHLB's stock requirement. The Bank also maintains an unsecured federal funds line of \$20,000,000 with a correspondent bank that will expire on June 30, 2013 at which time it will be subject to review and renewal.

The Bank has one ten-year fixed rate convertible advances from the FHLB. This advance, in the amount of \$10,000,000 bears interest at the rate of 4.08%. This advance is convertible quarterly at the option of the FHLB and is fully secured by marketable securities. The FHLB advance matures on July 31, 2017. Due to the call provision, expected maturity could differ from contractual maturity. The \$32,400,000 in overnight funds purchased at December 31, 2012, had an interest rate of 0.31% and matured on January 2, 2013.

## 12. Redeemable Subordinated Debentures

On May 30, 2006, the Company established 1st Constitution Capital Trust II, a Delaware business trust and wholly owned subsidiary of the Company ("Trust II"), for the sole purpose of issuing \$18 million of trust preferred securities (the "Capital Securities"). Trust II utilized the \$18 million proceeds along with \$557,000 invested in Trust II by the Company to purchase \$18,557,000 of floating rate junior subordinated debentures issued by the Company and due to mature on June 15, 2036. The subordinated debentures carry a floating interest rate based on the three-month LIBOR plus 165 basis points (1.9580% at December 31, 2012). The Capital Securities were issued in connection with a pooled offering involving approximately 50 other financial institution holding companies. All of the Capital Securities were sold to a single pooling vehicle. The floating rate junior subordinated debentures are the only asset of Trust II and have terms that mirrored the Capital Securities. These debentures are redeemable in whole or in part prior to maturity after June 15, 2011. Trust II is obligated to distribute all proceeds of a redemption of these debentures, whether voluntary or upon maturity, to holders of the Capital Securities. The Company's obligation with

respect to the Capital Securities and the debentures, when taken together, provided a full and unconditional guarantee on a subordinated basis by the Company of the obligations of Trust II to pay amounts when due on the Capital Securities. Interest payments on the floating rate junior subordinated debentures flow through Trust II to the pooling vehicle.

## 13. Income Taxes

The components of income tax expense (benefit) are summarized as follows:

	2012	2011
<b>Federal-</b>		
Current	\$ 3,089,047	\$ 1,238,594
Deferred	(1,415,505)	(79,149)
	1,673,542	1,159,445
<b>State-</b>		
Current	675,260	271,372
Deferred	(376,837)	(139,686)
	298,423	131,686
	\$ 1,971,965	\$ 1,291,131

A comparison of income tax expense at the Federal statutory rate in 2012 and 2011 to the Company's provision for income taxes is as follows:

	2012	2011
Federal income tax	\$ 2,391,039	\$ 1,775,675
Add (deduct) effect of:		
State income taxes net of federal income tax effect	196,959	86,913
Tax-exempt interest income	(570,292)	(507,294)
Bank-owned life insurance	(152,158)	(137,475)
Other items, net	106,417	73,312
Provision for income taxes	\$ 1,971,965	\$ 1,291,131

The tax effects of existing temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities are as follows:

	2012	2011
<b>Deferred tax assets (liabilities):</b>		
Write-downs and expenses of OREO	\$ 1,443,644	\$ 523,763
Allowance for loan losses	2,856,194	2,210,460
Unrealized gain on securities available for sale	(571,763)	(788,221)
SERP Liability	1,737,663	1,508,758
Other than temporary impairment loss	302,651	294,007
Depreciation	334,896	320,479
Nonaccrual interest	144,742	134,661
FAS 158 pension liability	65,493	70,668
Other	13,182	48,502
Net deferred tax assets	\$ 6,326,702	\$ 4,323,077

Based upon the current facts, management has determined that it is more likely than not that there will be sufficient taxable income in future years to realize the deferred tax assets. However, there can be no assurances about the level of future earnings.

## 14. Comprehensive Income and Accumulated Other Comprehensive Income

The components of accumulated other comprehensive income and their related income tax effects are as follows:

F-39

---

Table of Contents

	December 31, 2012	December 31, 2011
Unrealized holding gains on securities available for sale	\$ 1,806,967	\$ 2,318,299
Related income tax effect	(571,763 )	(788,221 )
	1,235,204	1,530,078
Unrealized impairment loss on held to maturity security	(500,944 )	(500,944 )
Related income tax effect	170,321	170,321
	(330,623 )	(330,623 )
Pension Liability	(165,781 )	(178,661 )
Related income tax effect	65,493	70,668
	(100,288 )	(107,993 )
Accumulated other comprehensive income	\$ 804,293	\$ 1,091,462

The components of other accumulated comprehensive income (loss), net of tax, which is a component of shareholders' equity, were as follows:

	Net Unrealized Gains On Available for Sale Securities	Net Unrealized Impairment Loss On Held to Maturity Security	Net Change in Fair Value of Interest Rate Swap Contract	Net Change Related to Defined Benefit Pension Plans	Accumulated Other Comprehensive Income
Balance, December 31, 2010	\$ 756,057	\$ (330,623 )	\$ (211,562 )	\$ (115,698 )	\$ 98,174
Net Change	774,021	-	211,562	7,705	993,288
Balance, December 31, 2011	1,530,078	(330,623 )	0	(107,993 )	1,091,462
Net Change	(294,874 )	0	0	7,705	(287,169 )
Balance, December 31, 2012	\$ 1,235,204	\$ (330,623 )	\$ 0	\$ (100,288 )	\$ 804,293

## 15. Benefit Plans

## Retirement Savings Plan

The Bank has a 401(K) plan which covers substantially all employees with six months or more of service. The plan permits all eligible employees to make basic contributions to the plan up to the IRS salary deferral limit. Under the plan, the Bank provided a matching contribution of 50% in 2012 and 2011 up to 6% of base compensation. Employer contributions to the plan amounted to \$204,918 in 2012 and \$175,008 in 2011.

## Benefit Plans

The Company also provides retirement benefits to certain employees under a supplemental executive retirement plan. The plan is unfunded and the Company accrues actuarial determined benefit costs over the estimated service

period of the employees in the plan. The present value of the benefits accrued under these plans as of December 31, 2012 and 2011 is approximately \$4,517,757 and \$3,952,450, respectively, and is included in other liabilities and accumulated other comprehensive income in the accompanying consolidated balance sheets. Compensation expense of \$568,215 and \$573,115 is included in the accompanying consolidated statements of income for the years ended December 31, 2012 and 2011, respectively.

In connection with the benefit plans, the Bank has life insurance policies on the lives of its executives, directors and divisional officers. The Bank is the owner and beneficiary of the policies. The cash surrender values of the policies total approximately \$15.0 million and \$13.6 million as of December 31, 2012 and 2011, respectively.

F-40

---

Table of Contents

The following table sets forth the changes in benefit obligations of the Company's supplemental executive retirement plan.

	2012	2011
<b>Change in Benefit Obligation</b>		
Liability for pension, beginning	\$ 3,952,450	\$ 3,392,213
Service cost	247,293	273,702
Interest cost	200,290	208,231
Actuarial (gain) loss	117,724	78,304
Benefits paid	0	0
Liability for pension, ending	\$ 4,517,757	\$ 3,952,450

**Amount Recognized in Consolidated Balance Sheets**

Liability for pension	\$ 4,517,757	\$ (3,952,450)
Net actuarial loss included in accumulated other comprehensive income	157,336	60,811
Prior service cost included in accumulated other comprehensive income	8,445	107,878
Net recognized pension expense	\$ (4,351,977)	\$ (3,783,761)

**Information for pension plans with an accumulated benefit obligation in excess of plan assets**

Projected benefit obligation	\$ 4,517,757	\$ 3,952,450
Accumulated benefit obligation	3,380,461	3,602,957

**Components of Net Periodic Benefit Cost**

	2012	2011
Service cost	\$ 247,293	\$ 273,702
Interest cost	200,290	208,231
Amortization of prior service cost	99,432	99,432
Recognized net actuarial gain	21,201	(8,250)
Net periodic benefit expense	\$ 568,216	\$ 573,115

The net periodic benefit cost for the year ended December 31, 2013 is projected to be \$218,210.

During the year ended December 31, 2013, actuarial (gains) and prior service cost of \$(270,998) and \$8,445, respectively, are expected to be removed from accumulated other comprehensive income and recognized as a component of net periodic benefit expense.

Weighted-Average Assumptions, December 31	2012	2011
Discount Rate	6.00%	6.00%
Salary Scale	4.00%	4.00%

**Projected Annual Benefit Payments\***

2013	\$689,198
2014	\$0

2015	\$3,776,489
2016	\$0
2017	\$804,660
2018-2022	\$0

\* Represents management's expectation as of December 31, 2012 as to when such payments will be made.

## 16. Share-Based Compensation

The Company's stock-based incentive plans (the "Stock Plans") authorize the issuance of an aggregate of 1,363,102 shares of the Company's common stock (as adjusted for stock dividends) pursuant to awards that may be granted in the form of stock options to purchase common stock ("Options") and awards of shares of common stock ("Stock Awards"). The purpose of the Stock Plans is to attract and retain personnel for positions of substantial responsibility and to provide additional incentive to certain officers, directors, employees and other persons to promote the success of the Company. Under the Stock Plans, options have a term of ten years after the date of grant, subject to earlier termination in certain circumstances. Options are granted with an exercise price at the then fair market value of the Company's common stock. The grant date fair value is calculated using the Black-Scholes option valuation model. As of December 31, 2012, there were 74,355 shares of common stock (as adjusted for the 5% stock dividend declared December 20, 2012 and paid January 31, 2013 to shareholders of record on January 14, 2013) available for future grants under the Stock Plans, of which 49,926 shares are available for future grant under the 2006 Directors Stock Plan and 24,429 shares are available for future grant under the 2005 Equity Incentive Plan.

Stock-based compensation expense related to stock options was \$99,152 and \$90,596 for the years ended December 31, 2012 and 2011, respectively.

Transactions under the Company's stock option plans during the years ended December 31, 2012 and 2011 (as adjusted to reflect the 5% stock dividend declared in December 2012) are summarized as follows:

Stock Options	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (years)	Aggregate Intrinsic Value
Outstanding at January 1, 2011	172,060	\$ 9.74		
Granted	64,782	6.84		
Exercised	(14,573 )	5.55		
Forfeited	-	-		
Expired	(15,518 )	9.09		
Outstanding at December 31, 2011	206,751	9.20	6.2	\$ 6,390
Granted	28,007	6.11		
Exercised	(9,040 )	7.43		
Forfeited	-	-		
Expired	(3,824 )	7.95		
Outstanding at December 31, 2012	221,894	\$ 8.91	6.0	\$ 193,917
Exercisable at December 31, 2012	153,535	\$ 9.90	4.9	\$ 79,813

The total intrinsic value (market value on date of exercise less grant price) of options exercised during the years ended December 31, 2012 and 2011 was \$9,399 and \$16,122, respectively.

The following table summarizes stock options outstanding and exercisable at December 31, 2012:

Exercise Price Range	Outstanding Options			Exercisable Options		
	Number	Average Life in	Average Exercise	Number	Average Life in	Average Exercise

Edgar Filing: 1ST CONSTITUTION BANCORP - Form 10-K

		Years	Price		Years	Price
\$5.69 to \$6.21	62,000	8.9	\$ 6.15	19,200	8.8	\$ 6.16
\$6.79 to \$10.75	96,376	6.0	\$ 8.18	70,817	5.5	\$ 8.40
\$11.51 to \$13.77	63,518	3.1	\$ 12.70	63,518	3.1	\$ 12.70
	221,894	6.0	\$ 8.91	153,535	4.9	\$ 9.90

F-42

---

Table of Contents

The fair value of each option and the significant weighted average assumptions used to calculate the fair value of the options granted during the years ended December 31, 2012 and 2011 are as follows:

	January 2012	December 2011	September 2011	January 2011
Fair value of options granted	\$2.20	\$2.14	\$2.25	\$3.09
Risk-free rate of return	0.84%	0.91%	0.90%	1.99%
Expected option life in years	7	7	7	7
Expected volatility	31.48%	31.48%	31.48%	33.02%
Expected dividends (1)	-	-	-	-

(1) To date, the Company has not paid cash dividends on its common stock.

As of December 31, 2012, there was approximately \$96,434 of unrecognized compensation cost related to non-vested stock option-based compensation arrangements granted under the Company's stock incentive plans. That cost is expected to be recognized over the next four years.

The following table summarizes nonvested restricted shares for the years ended December 31, 2012 and 2011 (as adjusted to reflect the 5% stock dividend declared in December 2012):

Non-vested Shares	Number of Shares	Average Grant-Date Fair Value
Non-vested at January 1, 2011	120,744	\$ 6.98
Granted	74,921	6.61
Vested	(32,155)	8.23
Forfeited	(4,169)	7.39
Non-vested at December 31, 2011	159,341	6.54
Granted	47,034	8.73
Vested	(65,800)	8.38
Forfeited	-	-
Non-vested at December 31, 2012	140,575	\$ 6.41

The value of restricted shares is based upon the closing price of the common stock on the date of grant. The shares generally vest over a four year service period with compensation expense recognized on a straight-line basis.

Stock based compensation expense related to stock grants was \$375,606 and \$336,134 for the years ended December 31, 2012 and 2011.

As of December 31, 2012, there was approximately \$833,593 of unrecognized compensation cost related to non-vested stock grants that will be recognized over the next three years.

## 17. Commitments and Contingencies

As of December 31, 2012, future minimum rental payments under non-cancelable operating leases are as follows:

2013	\$940,518
2014	697,226
2015	457,434

2016	420,589
2017	411,257
Thereafter	620,333
	\$3,547,357

F-43

---

## Table of Contents

Rent expense aggregated \$1,303,584 and \$1,241,770 for the years ended December 31, 2012 and 2011, respectively.

### Commitments With Off-Balance Sheet Risk

The consolidated balance sheet does not reflect various commitments relating to financial instruments which are used in the normal course of business. Management does not anticipate that the settlement of those financial instruments will have a material adverse effect on the Company's financial position. These instruments include commitments to extend credit and letters of credit. These financial instruments carry various degrees of credit risk, which is defined as the possibility that a loss may occur from the failure of another party to perform according to the terms of the contract. As these off-balance sheet financial instruments have essentially the same credit risk involved in extending loans, the Bank generally uses the same credit and collateral policies in making these commitments and conditional obligations as it does for on-balance sheet investments. Additionally, as some commitments and conditional obligations are expected to expire without being drawn or returned, the contractual amounts do not necessarily represent future cash requirements.

Commitments to extend credit are legally binding loan commitments with set expiration dates. They are intended to be disbursed, subject to certain conditions, upon request of the borrower. The Bank receives a fee for providing a commitment. The Bank was committed to advance \$160,459,141 and \$146,616,964 to its borrowers as of December 31, 2012 and December 31, 2011, respectively.

The Bank issues financial standby letters of credit that are within the scope of ASC Topic 460, "Guarantees." These are irrevocable undertakings by the Bank to guarantee payment of a specified financial obligation. Most of the Bank's financial standby letters of credit arise in connection with lending relationships and have terms of one year or less. The maximum potential future payments the Bank could be required to make under these standby letters of credit amounted to \$1,620,362 at December 31, 2012 and \$3,119,020 at December 31, 2011. The current amount of the liability as of December 31, 2012 and 2011 for guarantors under standby letters of credit is not material.

The Bank also enters into forward contracts to sell residential mortgage loans it has closed (loans held for sale) or that it expects to close (commitments to originate loans held for sale). These contracts are used to reduce the Bank's market price risk during the period from the commitment date to the sale date. The notional amount of the Bank's forward sales contracts was approximately \$36.0 million at December 31, 2012 and \$19.2 million at December 31, 2011. Changes in fair value of the forward sales contracts, and the related loan origination commitments and closed loans, were not significant at December 31, 2012 and 2011.

### Litigation

The Company may, in the ordinary course of business, become a party to litigation involving collection matters, contract claims and other legal proceedings relating to the conduct of its business. The Company may also have various commitments and contingent liabilities which are not reflected in the accompanying consolidated statement of condition. Management is not aware of any present legal proceedings or contingent liabilities and commitments that would have a material impact on the Company's financial position or results of operations.

Table of Contents

## 18. Other Operating Expenses

The components of other operating expenses for the years ended December 31, 2012 and 2011 are as follows:

	2012	2011
Marketing	\$ 185,738	\$ 183,467
Equipment	862,765	928,554
Telephone	351,183	365,218
Regulatory, professional and other consulting fees	726,556	931,339
Amortization of intangible assets	267,967	210,154
Other expenses	1,295,440	1,025,156
	\$ 3,689,649	\$ 3,644,116

## 19. Regulatory Requirements

The Company and the Bank are subject to various regulatory capital requirements administered by the Federal and state banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory, and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on the Bank's and the Company's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of the Company's and the Bank's assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Company's and the Bank's capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios of Total and Tier I capital (as defined in the regulations) to risk-weighted assets (as defined), and of Tier I capital to average assets (as defined). As of December 31, 2012, the Company and the Bank met all capital adequacy requirements to which they are subject.

To be categorized as adequately capitalized, the Company and the Bank must maintain minimum total risk-based, Tier I risk-based, and Tier I leverage ratios as set forth in the table. As of December 31, 2012, the Bank's capital ratios exceed the regulatory standards for well-capitalized institutions. Certain bank regulatory limitations exist on the availability of the Bank's assets for the payment of dividends by the Bank without prior approval of bank regulatory authorities.

Table of Contents

Actual capital amounts and ratios for the Company and the Bank as of December 31, 2012 and 2011 are as follows:

	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio

Dividend payments by the Bank to the Company are subject to the New Jersey Banking Act of 1948 (the “Banking Act”) and the Federal Deposit Insurance Act (the “FDIA”). Under the Banking Act and the FDIA, the Bank may not pay any dividends if after paying the dividend, it would be undercapitalized under applicable capital requirements. In addition to these explicit limitations, the federal regulatory agencies are authorized to prohibit a banking subsidiary or bank holding company from engaging in an unsafe or unsound banking practice. Depending upon the circumstances, the agencies could take the position that paying a dividend would constitute an unsafe or unsound banking practice.

In the event the Company defers payments on the junior subordinated debentures used to fund payments to be made pursuant to the terms of the Capital Securities, the Company would be unable to pay cash dividends on its common stock until the deferred payments are made.

20. Shareholders' Equity

During the third quarter of 2012, the Company launched a shareholders' common stock rights offering, which expired on October 5, 2012. The Company received gross proceeds of \$5.0 million from holders of subscription rights who exercised their basic subscription rights and from holders who exercised the over-subscription privilege. The rights offering was fully subscribed. Accordingly, the Company issued a total of 555,555 shares of common stock at \$9.00 per share to the holders of subscription rights who validly exercised their subscription rights, including pursuant to the exercise of the over-subscription privilege.

On December 23, 2008, pursuant to the Troubled Asset Relief Program ("TARP") Capital Purchase Program (the "CPP") under the Emergency Economic Stabilization Act of 2008 ("EESA"), the Company entered into a Letter Agreement, including the Securities Purchase Agreement – Standard Terms, with the United States Department of the Treasury (the "Treasury") pursuant to which the Company issued and sold, and the Treasury purchased (i) 12,000 shares of the Company's Fixed Rate Cumulative Perpetual Preferred Stock, Series B ("Preferred Stock Series B") and (ii) a ten-year warrant to purchase up to 200,222 shares of the Company's common stock, no par value, at an initial exercise price of \$8.99 per share, for aggregate cash consideration of \$12,000,000. As a result of subsequent stock dividends declared, the shares of common stock initially underlying the warrant were adjusted to 255,540 shares and the initial exercise price was adjusted to \$7.044 per share. On October 27, 2010, the Company repurchased from the Treasury all of the outstanding shares of the Preferred Stock Series B.

Table of Contents

The warrant issued to the Treasury provides for the adjustment of the exercise price and the number of shares of the Company's common stock issuable upon exercise pursuant to customary anti-dilution provisions, such as upon stock splits or distributions of securities or other assets to holders of the Company's common stock, and upon certain issuances of the Company's common stock at or below a specified price relative to the initial exercise price. The warrant is immediately exercisable and expires 10 years from the issuance date. On November 23, 2011, the Treasury held an auction and sold the warrant in a private placement to an unrelated third party purchaser. At the time of the sale, the number of shares of the Company's common stock underlying the warrant had been adjusted to 231,782 shares and the exercise price had been adjusted to \$7.766 per share as a result of stock dividends. In connection with the sale, the Company issued two new warrants (a warrant to purchase 197,529 shares at an exercise price of \$7.766 per share and a warrant to purchase 34,253 shares at an exercise price of \$7.766 per share) to affiliates of the third party purchaser. Certain terms and conditions of the original warrant issued to the Treasury were modified or deleted in the two new warrants, including, without limitation, the deletion of the anti-dilution provision upon certain issuances of the Company's common stock at or below a specified price relative to the initial exercise price. However, the anti-dilution provisions related to stock splits or distributions of securities or other assets to holders of the Company's common stock remain in place under the two new warrants. As a result of the declarations of stock dividends to holders of common stock since the issuance of the two new warrants, the shares of common stock underlying the warrants have been adjusted to 255,540 shares (with 217,775 shares underlying one warrant and 37,765 shares underlying the other warrant) and the initial exercise prices for both warrants were adjusted to \$7.044 per share. These two warrants remain outstanding, are immediately exercisable and continue to have an expiration date of December 23, 2018, which was the expiration date of the original warrant issued to the Treasury.

The Board of Governors of the Federal Reserve System has issued a supervisory letter to bank holding companies that contains guidance on when the board of directors of a bank holding company should eliminate or defer or severely limit dividends including for example when net income available for shareholders for the past four quarters net of previously paid dividends paid during that period is not sufficient to fully fund the dividends. The letter also contains guidance on the redemption of stock by bank holding companies which urges bank holding companies to advise the Federal Reserve of any such redemption or repurchase of common stock for cash or other value which results in the net reduction of a bank holding company's capital at the beginning of the quarter below the capital outstanding at the end of the quarter.

The two new warrants, which replaced the warrant issued under the TARP CCP, qualify and are accounted for as permanent equity on the Company's balance sheet.

In July, 2005, the Board of Directors of the Company authorized a common stock repurchase program that allows for the repurchase of a limited number of the company's shares at management's discretion on the open market. The Company undertook this repurchase program in order to increase shareholder value. During the years ended December 31, 2012 and 2011, the Company repurchased 2,337 and 2,829 shares, respectively, as adjusted for subsequent stock dividends, for an aggregate price of approximately \$20,916 and \$23,484, respectively.

## 21. Fair Value Disclosures

U.S. GAAP has established a fair value hierarchy that prioritizes the inputs to valuation methods used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2: Quoted prices in markets that are not active, or inputs that are observable either directly or indirectly, for substantially the full term of the asset or liability.

Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported with little or no market activity).

F-47

---

Table of Contents

An asset's or liability's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. These valuation methodologies were applied to all of the Company's financial assets and financial liabilities carried at fair value.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality and counterparty creditworthiness, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. The Company's valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future values. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

**Securities Available for Sale.** Securities classified as available for sale are reported at fair value utilizing quoted market prices on nationally recognized exchanges (Level 1) or by using Level 2 inputs. For Level 2 securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayments speeds, credit information and the security's terms and conditions, among other things.

**Impaired loans.** Loans included in the following table are those which the Company has measured and recognized impairment generally based on the fair value of the loan's collateral. Fair value is generally determined based upon independent third party appraisals of the properties, or discounted cash flows based on the expected proceeds. These assets are included as Level 3 fair values, based upon the lowest level of input that is significant to the fair value measurements. The fair value consists of the loan balances less specific valuation allowances.

**Other Real Estate Owned.** Foreclosed properties are adjusted to fair value less estimated selling costs at the time of foreclosure in preparation for transfer from portfolio loans to other real estate owned ("OREO"), establishing a new accounting basis. The Company subsequently adjusts the fair value on the OREO utilizing Level 3 inputs on a non-recurring basis to reflect partial write-downs based on the observable market price, current appraised value of the asset or other estimates of fair value.

Table of Contents

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
December 31, 2012:				
Securities available for sale:				
U.S. Treasury Securities and obligations of U.S. Government sponsored corporations ("GSE") and agencies	\$27,923,670	\$1,571,865	\$-	\$29,495,535
Residential collateralized mortgage obligations GSE	-	6,632,665	-	6,632,665
Residential collateralized mortgage obligations – non GSE	-	3,924,182	-	3,924,182
Residential mortgage backed securities - GSE	-	26,489,335	-	26,489,335
Obligations of State and Political subdivisions	-	20,682,301	-	20,682,301
Trust preferred debt securities - single issuer	-	1,998,366	-	1,998,366
Corporate debt securities	-	18,100,281	-	18,100,281
Restricted stock	-	2,493,300	-	2,493,300
Mutual fund	-	25,000	-	25,000
December 31, 2011:				
Securities available for sale:				
U.S. Treasury Securities and obligations of U.S. Government sponsored corporations ("GSE") and agencies	\$7,108,870	\$12,363,819	\$-	\$19,472,689
Residential collateralized mortgage obligations GSE	-	13,898,133	-	13,898,133
Residential collateralized mortgage obligations – non GSE	-	4,300,444	-	4,300,444
Residential mortgage backed securities - GSE	-	42,687,209	-	42,687,209
Obligations of State and Political subdivisions	-	5,700,514	-	5,700,514
Trust preferred debt securities - single issuer	-	1,751,241	-	1,751,241
Corporate debt securities	-	1,435,944	-	1,435,944
Restricted stock	-	4,412,600	-	4,412,600
Mutual fund	-	25,000	-	25,000

Certain financial assets and financial liabilities are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). Financial assets and financial liabilities measured at fair value on a non-recurring basis at December 31, 2012 and 2011 are as follows:

	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
December 31, 2012:				
Impaired loans	-	-	\$ 4,794,369	\$ 4,794,369
Other real estate owned	-	-	6,568,781	6,568,781

December 31, 2011:

Impaired loans	-	-	\$ 2,038,805	\$ 2,038,805
Other real estate owned	-	-	491,536	491,536

Impaired loans, measured at fair value and included in the above table, consisted of 16 loans having an aggregate balance of \$6,086,432 and specific loan loss allowances of \$1,292,063 at December 31, 2012 and nine loans at December 31, 2011 having an aggregate balance of \$2,597,761 and specific loan loss allowances of \$558,956.

---

Table of Contents

The following table presents additional qualitative information about assets measured at fair value on a nonrecurring basis and for which the Company has utilized Level 3 inputs to determine fair value:

Quantitative Information about Level 3 Fair Value Measurements				
	Fair Value Estimate	Valuation Techniques	Unobservable Input	Range of Adjustments
December 31, 2012				
Impaired loans	\$4,794,369	Appraisal of collateral (1)	Appraisal adjustments (2)	5-50%
Other Real Estate Owned	\$6,568,781	Appraisal of collateral (1)	Appraisal adjustments (2)	8-60%

(1) Fair value is generally determined through independent appraisals of the underlying collateral, which generally include various Level 3 inputs that are not identifiable.

(2) Includes qualitative adjustments by management and estimated liquidation expenses.

The fair values of other real estate owned was determined using appraisals, which may be discounted based on management's review and changes in market conditions.

The following is a summary of fair value versus the carrying value of all the Company's financial instruments. For the Company and the Bank, as for most financial institutions, the bulk of its assets and liabilities are considered financial instruments. Many of the financial instruments lack an available trading market as characterized by a willing buyer and willing seller engaging in an exchange transaction. Therefore, significant estimations and present value calculations were used for the purpose of this note. Changes in assumptions could significantly affect these estimates.

Estimated fair values have been determined by using the best available data and an estimation methodology suitable for each category of financial instruments as follows:

Cash and Cash Equivalents, Accrued Interest Receivable and Accrued Interest Payable (Carried at Cost). The carrying amounts reported in the balance sheet for cash and cash equivalents, accrued interest receivable and accrued interest payable approximate fair value.

Securities Held to Maturity (Carried at Amortized Cost). The fair values of securities held to maturity are determined in the same manner as for securities available for sale.

F-50

---

Table of Contents

Loans Held For Sale (Carried at Lower of Aggregated Cost or Fair Value). The fair values of loans held for sale are determined, when possible, using quoted secondary market prices. If no such quoted market prices exist, fair values are determined using quoted prices for similar loans, adjusted for the specific attributes of the loans.

Gross Loans Receivable (Carried at Cost). The fair values of loans, excluding impaired loans subject to specific loss reserves, are estimated using discounted cash flow analyses, using market rates at the balance sheet date that reflect the credit and interest rate-risk inherent in the loans. Projected future cash flows are calculated based upon contractual maturity or call dates, projected repayments and prepayments of principal. Generally, for variable rate loans that re-price frequently and with no significant change in credit risk, fair values are based on carrying values.

Deposit Liabilities (Carried at Cost). The fair values disclosed for demand deposits (e.g., interest and non-interest demand and savings accounts) are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts). Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered in the market on certificates to a schedule of aggregated expected monthly maturities on time deposits.

Borrowings and Subordinated Debentures (Carried at Cost). The carrying amounts of short-term borrowings approximate their fair values. The fair values of long-term FHLB advances and subordinated debentures are estimated using discounted cash flow analysis, based on quoted or estimated interest rates for new borrowings with similar credit risk characteristics, terms and remaining maturity.

Table of Contents

The estimated fair values, and the recorded book balances, were as follows:

	December 31, 2012				Fair Value
	Carrying Value	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	
Cash and cash equivalents	\$ 14,044,921	\$ 14,044,921	-	-	\$ 14,044,921
Securities available for sale	109,840,965	27,923,670	81,917,295	-	109,840,965
Securities held to maturity	116,027,900	-	121,839,363	-	121,839,363
Loans held for sale	35,960,262	-	35,960,262	-	35,960,262
Loans	514,662,898	-	-	515,577,788	515,577,788
Accrued interest receivable	2,872,099	-	2,872,099	-	2,872,099
Deposits	(707,689,475)	-	(709,678,000)	-	(709,678,000)
Borrowings	(42,400,000 )	-	(43,906,000 )	-	(43,906,000 )
Redeemable subordinated debentures	(18,557,000 )	-	(18,557,000 )	-	(18,557,000 )
Accrued interest payable	(1,057,779 )	-	(1,057,779 )	-	(1,057,779 )

	December 31, 2011	
	Carrying Value	Fair Value
Cash and cash equivalents	\$ 15,195,259	\$ 15,195,259
Securities available for sale	93,683,774	93,683,774
Securities held to maturity	142,474,423	147,621,280
Loans held for sale	19,234,111	19,234,111
Loans	469,897,321	471,633,550
Accrued interest receivable	2,996,848	2,996,848
Deposits	(623,862,485)	(625,764,000)
Borrowings	(88,300,000)	(90,163,000)
Redeemable subordinated debentures	(18,557,000)	(18,557,000)
Accrued interest payable	(1,186,511)	(1,186,511)

Loan commitments and standby letters of credit as of December 31, 2012 and 2011 are based on fees charged for similar agreements; accordingly, the estimated fair value of loan commitments and standby letters of credit is nominal.

Basic	\$ 0.21	\$ 0.23	\$ 0.16	\$ 0.15
Diluted	\$ 0.21	\$ 0.23	\$ 0.16	\$ 0.15

## 24. Recent Events

On October 29, 2012, Hurricane Sandy caused destruction along the East Coast, including in New Jersey, and resulted in, among other things, severe property damage and the closure of many businesses and financial markets. The

financial impact to the Company was minimal as its mortgage loan customers in the areas affected by Hurricane Sandy did not sustain severe damage to their real properties and the Company experienced no loan delinquencies specifically related to Hurricane Sandy.
