Edgar Filing: MDU RESOURCES GROUP INC - Form 8-K

Item 1.01. Entry into a Material Definitive Agreement.

On April 19, 2005, Fidelity Exploration & Production Company (Fidelity), an indirect wholly owned subsidiary of MDU Resources Group, Inc., signed Purchase and Sale Agreements to acquire natural gas and oil properties from Smith Production Inc. (Smith) for an aggregate cash purchase price of \$145 million, subject to accounting and purchase price adjustments customary for oil and natural gas acquisitions of this type.

The acquisition is expected to close in May 2005, conditional upon completion of a due diligence process, including environmental reviews, and satisfaction of other standard closing conditions. Funds for the acquisition are expected to be provided from a combination of cash on hand and available debt capacity. Upon closing, the company anticipates the acquisition will be accretive to earnings per share and cash flow. The properties being acquired are located in south Texas with primary production from the Frio and Vicksburg formations. Smith will continue to operate one of the production fields and Fidelity will operate the rest of the acquired properties.

This information includes certain forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934. The forward-looking statements contained in this information, including those with respect to the anticipated effect of the transaction upon earnings per share and cash flow, are expressed in good faith and are believed by the company to have a reasonable basis. Nonetheless, actual results may differ materially from the projected results expressed in the forward-looking statements. Important factors that could cause actual results to differ materially from those in the forward-looking statements include the ability to effectively integrate the acquired properties; fluctuations in natural gas and crude oil prices; fluctuations in commodity price basis differentials; drilling successes in natural gas and oil operations; the ability to contract for or to secure necessary drilling rig contracts and to retain employees to drill for and develop reserves; market demand for, and/or available supplies of, energy products and services; and the effects on operations of extensive environmental laws and regulations. For a discussion of other important factors that could cause actual results to differ materially from those expressed in the forward-looking statements, refer to Part I and Part II, Item 7 - Management's Discussion and Analysis of Financial Condition and Results of Operations - Risk Factors and Cautionary Statements that May Affect Future Results, in the company's most recent Form 10-K and Form 8-K filed April 19, 2005.
