The accompanying notes are an integral part of the consolidated financial statements.

Notes to the Consolidated Financial Statements

1. Basis of Presentation:

The unaudited interim consolidated financial statements and related notes have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the "SEC"). Accordingly, certain information and footnote disclosures normally included in complete financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP) have been omitted pursuant to such rules and regulations. The accompanying unaudited interim consolidated financial statements and related notes should be read in conjunction with the consolidated financial statements and notes thereto included in the Arrhythmia Research Technology, Inc. ("ART") and subsidiaries (the "Company") Annual Report on Form 10-K for the year ended December 31, 2011 filed with the SEC on April 25, 2012.

The information presented reflects, in the opinion of the management of the Company, all adjustments necessary for a fair presentation of the financial results for the interim period presented.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Operating results for interim periods are not necessarily indicative of results that may be expected for the entire fiscal year.

Principles of Consolidation

The consolidated financial statements include the accounts of ART, WirelessDx and Micron. All intercompany balances and transactions have been eliminated in consolidation.

2. Accounts Receivable

Management regularly reviews accounts receivable to determine if any receivables will potentially be uncollectible. The Company includes any accounts receivable balances that are determined to be uncollectible, along with a general reserve, in our overall allowance for doubtful accounts. After all attempts to collect a receivable have failed, the receivable is written off against the allowance. Based on the information available to us, management believes the allowance for doubtful accounts as of June 30, 2012 is adequate.

3. Inventories:

Inventories consist of the following as of:	June 30, 2012	December 31, 2011
Raw materials	\$ 851,996	\$ 647,906
Work-in-process	727,355	395,176
Finished goods	1,988,651	2,226,400
Total	\$ 3,568,002	\$ 3,269,482

The value of silver in inventory at June 30, 2012 and December 31, 2011 as a part of finished goods as plated sensors, work in process, or raw materials was \$777,572 and \$886,002, respectively. Inventories are stated at their net realizable value.

4. Debt:

At June 30, 2012, the Company has an unsecured demand line of credit for \$3,000,000 that provides for borrowings up to 80% of eligible accounts receivable plus 50% of finished goods inventories up to a \$700,000 maximum at an

interest rate of 2% over LIBOR. The interest rate at June 30, 2012 was 2.33%. This facility has no borrowing base charge. On March 16, 2011, ART obtained a \$1,000,000 letter of credit against the line of credit in favor of the Bank of Nova Scotia, replacing the Province of Prince Edward Island's performance guarantee obtained in conjunction with the acquisition of WirelessDx in 2010. During the quarter ended June 30, 2012, an aggregate of \$500,000 was drawn on this line and remains outstanding at June 30, 2012. The demand line of credit was renewed in April 2012 and expires in April 2013.

The agreement contains covenants that apply upon drawing on the line. The covenants relate to various matters including notice prior to executing further borrowings and security interests, merger or consolidation, acquisitions, guarantees, sales of assets other than in the normal course of business, leasing, changes in ownership and payment of dividends.

The Company has a master lease agreement with its bank that allows for money to be drawn on standard terms for the purchase of equipment. Said monies will be paid back over the life of the equipment. During the six months ended June 30, 2012, a total of \$523,269 was drawn down to acquire production equipment for Micron and \$888,649 for WirelessDx's patient monitoring devices. The principal will be paid over 5 years.

5. Income Taxes:

The Company accounts for income taxes in accordance with ASC 740 "Income Taxes," which requires recognition of deferred tax liabilities and assets for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred tax liabilities and assets are determined based on the difference between the financial statement and tax bases of assets and liabilities using tax rates in effect for the year in which the differences are expected to reverse.

As of December 31, 2011, the Company had recorded a valuation allowance against the Canadian portion of its deferred tax assets, consisting of a net operating loss carryforward. Based on the Company's pre-tax losses for the years since the acquisition of WirelessDx, management determined that realization of the assets cannot be considered more likely than not at this time. As of June 30, 2012, management assessed the valuation allowance and determined a full valuation allowance was still necessary. If and when management determines the valuation allowance should be reversed, the adjustment would result in a tax benefit in the consolidated statements of comprehensive income (loss). As of June 30, 2012, the Company has federal and state net operating loss carryforwards totaling \$817,000 and \$246,000, respectively, that begin to expire in 2031. As of June 30, 2012, the Company has a foreign net operating loss carryforward totaling \$1,096,000 that begins to expire 2030.

The Company has decided to amend the returns for 2008 and 2010, in order to use some of its 2011 net operating losses. As a result of these amendments, federal research and development credits and corporate alternative minimum tax credits of \$90,000 and \$22,000, respectively, are now available in future periods. As a result of the 2011 activities, management expects to realize a federal research and development credit of \$85,000. The Company has unused state investment tax credits and research and development credits available for carryforward totaling \$86,000. The federal tax credits begin to expire in 2029 and state credits begin to expire in 2027.

The Company files income tax returns in the U.S. Federal jurisdiction and various state and foreign jurisdictions. The periods from 2008 to 2011 remain open to examination by the IRS, state, and foreign jurisdictions. The Company believes it is not subject to any significant tax risks related to uncertain tax positions. The Company does not have any accrued interest or penalties associated with any unrecognized tax benefits, nor was any interest expense recognized during the six months ended June 30, 2012 and 2011.

6. Share-Based Compensation:

The Company accounts for non-cash share based compensation under Accounting Standards Codification ("ASC") 718 "Stock Compensation", which establishes accounting for equity instruments exchanged for employee services. Under the provisions of ASC 718, share-based compensation cost is measured at the grant date, based on the fair value of the award, and is recognized as an expense over the employee's requisite service period (generally the vesting period of the equity grant).

The Company recognized share-based compensation expense of \$26,982 and \$24,629 for the three months ended June 30, 2012 and 2011, and \$64,502 and \$61,864 for the six months ended June 30, 2012 and 2011, respectively.

The fair value of each stock option granted is estimated on the date of grant using the Black-Scholes option-pricing model. Key assumptions used to estimate the fair value of the stock options include the exercise price of the award, the expected option term, and the expected volatility of the Company's stock over the option's expected term, the risk free interest rate over the option's expected term, and the Company's expected annual dividend yield. The Company believes that the valuation technique and the approach utilized to develop the underlying assumptions are appropriate in calculating the fair values of the Company's stock options for the six months ended June 30, 2012 and 2011. Estimates of fair values are not intended to predict actual future events or the value ultimately realized by persons who receive equity awards.

Two grants totaling 160,000 options to 9 persons, including directors and management, were made during the six months ended June 30, 2011. There were no grants for the six months ended June 30, 2012.

The following is a weighted average of the assumptions used to estimate the fair market value of options granted using the Black Scholes valuation method:

	Six months ended June 30, 2011
Dividend Yield	2.1%
Expected Volatility	31.24%
Risk Free Interest Rate	0.98%
Expected Option Terms (in years)	5
Share-based Incentive Plan	

At June 30, 2012, the Company had one stock option plan that includes both incentive and non-qualified stock options to be granted to certain eligible employees, non-employee directors, or consultants. On March 10, 2010, the Company's Board of Directors adopted the Arrhythmia Research Technology, Inc. 2010 Equity Incentive Plan (the "2010 Plan") upon the recommendation of the Compensation Committee. The 2010 Plan was approved by stockholders at the 2010 Annual Meeting. The 2010 Plan authorizes the issuance of an aggregate of 500,000 shares, namely, 400,000 shares of our common stock plus an aggregate of 100,000 shares previously reserved for issuance under the Company's 2005 Stock Award Plan (the "2005 Plan"). The 2010 Plan replaced in its entirety the 2005 Plan, under which no grants have been made. The Company's 2001 Stock Option Plan (the "2001 Plan"), which expired in 2011, will continue to govern outstanding options but no further options will be granted under the 2001 Plan. The options granted have either six or ten year contractual terms and either vest immediately or vest annually over a five-year term.

At June 30, 2012, there were 340,000 shares available for future grants under the above stock option plan.

The following table sets forth the stock option transactions for the quarter ended June 30, 2012:

	Number of shares	Weighted average exercise price	Weighted average remaining contractual term	Aggregate intrinsic value
Outstanding at December 31, 2011	409,000	\$ 6.78	5.40 years	\$ —
Granted	—	—		—
Exercised	—	—		—
Forfeited/expired	—	—		—
Outstanding at June 30, 2012	409,000	\$ 6.78	4.93 years	\$ —
Exercisable at June 30, 2012	177,000	\$ 7.51	3.23 years	\$ —

During the six months ended June 30, 2012 and 2011, no options were exercised. At June 30, 2012 and 2011, the intrinsic value of the exercisable options is \$0 and \$48,320, respectively.

The following table sets forth the status of the Company's non-vested options for the six months ended June 30, 2012:

	Number of shares	Weighted average fair value
Non-vested at December 31, 2011	299,800	\$ 1.38
Granted	—	—
Vested	(67,800)	1.80
Forfeited	—	—
Non-vested at June 30, 2012	232,000	\$ 1.26

The following table presents the average price and contractual life information about options outstanding and exercisable at June 30, 2012:

Exercise Price	Number of Outstanding Shares	Weighted Average Remaining Contractual Life (years)	Options Currently Exercisable	Average Fair Value at Grant Date
\$3.41	75,500	3.51	30,200	\$0.96
4.76	60,000	2.96	20,000	1.77
5.73	90,000	8.93	18,000	1.42
7.15	93,500	1.51	74,800	2.74
9.86	70,000	8.88	14,000	0.65
12.42	10,000	0.10	10,000	5.38
23.10	10,000	0.68	10,000	10.77
	409,000		177,000	

At June 30, 2012, there was \$191,482 of total unrecognized cost related to non-vested share-based compensation arrangements granted under the Plan. This cost is expected to be recognized over a weighted average period of 3.52 years.

7. Earnings (loss) per share:

The Company follows the provisions of ASC 260 "Earnings Per Share," which requires the Company to present its basic earnings per share and diluted earnings per share, and certain other earnings per share disclosures for each year presented. Basic earnings per share is computed by dividing income available to common shareholders by the weighted average number of common shares outstanding. The computation of diluted earnings per share is similar to the computation of basic earnings per share except that the denominator is increased to include the average number of additional common shares that would have been outstanding if the dilutive potential common shares had been issued. In addition, the numerator is adjusted for any changes in income that would result from the assumed conversions of those potential shares. At June 30, 2012 and 2011, 409,000 and 399,000 stock options, respectively, were antidilutive and were not included in the calculation of earnings or loss per share.

8. Medical Services Revenue:

The Company's WirelessDx subsidiaries account for patient service revenues as net service revenues under Accounting Standards Update (ASU) 2011-07. This requires gross billed revenue to be reduced by an estimated allowance for contractual adjustments and uncollectibles to properly account for the anticipated difference between gross billed charge amounts and the expected reimbursement amounts.

The Company's contractual adjustments and uncollectibles as a percentage of gross patient service revenue will vary each year depending on several factors, including improved contracting with payers, changes in reimbursement from government sponsored programs, shifts in the percentage of patient services being reimbursed under insurance and the patients required co-insurance. Geography and demographics of the patient population will affect these estimates as the Company's historic expectations could differ from experience.

Gross service revenue in the three months ended June 30, 2012 was \$213,688. The revenue was adjusted by \$61,911 to account for expected contractual adjustments and uncollectibles. The net service revenue for the three months ended June 30, 2012 was \$151,777 as compared to \$15,172 in the same period of 2011.

Gross service revenue in the six months ended June 30, 2012 was \$335,549. The revenue was adjusted by \$94,731 to account for expected contractual adjustments and uncollectibles. The net service revenue for the six months ended June 30, 2012 was \$240,818 as compared to \$28,749 in the same period of 2011.

9. Subsequent Events

At a special meeting of the Board of Directors ("Board") held on July 13, 2012, the Board authorized the Company's management to consider strategic alternatives on the most favorable terms it can obtain, for all or some portion of the assets of the WirelessDx subsidiaries. This plan triggered the subsidiaries to be classified by GAAP as assets held for sale under the discontinued operations rules beginning in the third quarter of 2012. The assets and liabilities of the discontinued operations are presented in the unaudited June 30, 2012 condensed consolidated balance sheet excluding intercompany loans which exceed net book value listed below:

Current assets	461,000
Fixed assets, net	1,431,000
Deferred tax assets	749,000
Total assets	2,641,000

Current liabilities	578,000
Long term liabilities	725,000
Total liabilities	1,303,000

The unaudited assets and liabilities above do not include a \$1,000,000 performance letter of credit and operational leases with future obligations in excess of \$600,000.

10. Recent Pronouncements

Accounting Standards Update (ASU) 2011-07, "Health Care Entities (Topic 954): Presentation and Disclosure of Patient Service Revenue, Provision for Bad Debts and the Allowance for Doubtful Accounts for Certain Health Care Entities" ("Update 2011-07"). Update 2011-07 requires certain health care entities to change the presentation in their statement of operations by reclassifying the provision for bad debts associated with patient service revenue from an expense to a deduction from patient service revenue (net of contractual allowances and discounts). Additionally, those health care entities are required to provide enhanced disclosure about their policies for recognizing revenue and assessing bad debts. The amendments also require disclosures of patient service revenue (net of contractual allowances and discounts) as well as qualitative and quantitative information about changes in the allowance for doubtful accounts. Update 2011-07 is effective for fiscal years and interim periods within those fiscal years beginning after December 15, 2011. The adoption of this update did not have a material impact on the consolidated financial statements.

Accounting Standards Update (ASU) 2011-08, "Intangibles Goodwill and Other (Topic 350): Testing Goodwill for Impairment" ("Update 2011-08"). Update 2011-08 amends existing guidance by giving an entity the option to first assess qualitative factors to determine whether it is more likely than not (that is, a likelihood of more than 50%) that the fair value of a reporting unit is less than its carrying amount, before performing the more detailed qualitative two-step goodwill impairment test which is used to identify potential goodwill impairments and to measure the amount of goodwill impairment losses to be recognized, if any. ASU 2011-08 is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011, which for the Company is the first quarter of 2012. Management does not believe the adoption of this update did not have a material impact on the consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

Any forward looking statements made herein are based on current expectations of the Company that involve a number of risks and uncertainties and should not be considered as guarantees of future performance. These statements are made under the Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements may be identified by the use of words such as “expect,” “anticipate,” “believe,” “intend,” “plans,” “predict,” or “will”. Although the Company believes that our expectations are based on reasonable assumptions, we can give no assurance that our expectations will materialize. Many factors could cause actual results to differ materially from our forward-looking statements. Several of these factors include, without limitation: our ability to maintain our current pricing model and/or decrease our cost of sales; our ability to increase sales of higher margin products and services; variations in the mix of products and services sold; variability of customer delivery requirements; ability to license our software, provide timely customization and updates; ability to maximize the WirelessDx assets; a stable interest rate market and/or a stable currency rate environment in the world, and specifically the countries where we are doing business; continued availability of supplies or materials used in manufacturing at competitive prices; volatility in commodity and energy prices; the Company's ability to offset higher costs with price increases; adverse regulatory developments in the U.S. or any other country the Company plans to do business in; entrance of competitive products and services in the Company's markets; the ability of management to execute plans and motivate personnel in the execution of those plans; no adverse publicity related to the Company and/or its products; adverse claims relating to the Company's intellectual property; adoption of new, or changes in, accounting principles; passage of new, or changes in, regulations; legal proceedings; ability to maintain compliance with the NYSE MKT requirements for continued listing of our common stock; the costs inherent with complying with statutes and regulations applicable to public reporting companies, such as the Sarbanes-Oxley Act of 2002; the Company's ability to efficiently integrate acquisitions and other new lines of business that the Company may enter in the future, if any; and other risks referenced from time to time elsewhere in this report and in our filings with the SEC.

The Company is under no obligation and does not intend to update, revise or otherwise publicly release any revisions to these forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of any unanticipated events. More information about factors that potentially could affect the Company's financial results is included in the Company's filings with the SEC, including its Annual Report on Form 10-K for the year ended December 31, 2011.

Overview

Arrhythmia Research Technology, Inc. (“ART”) is engaged in the licensing of medical software, which acquires data and analyzes electrical impulses of the heart to aid in the detection of potentially lethal arrhythmias. Micron Products, Inc. (“Micron”), a wholly owned subsidiary, is the primary source of consolidated revenues. This primary source of revenue relates to the manufacturing of components, devices and equipment primarily for the medical and defense industries. The single largest category of revenue relates to Micron’s production and sale of silver/silver chloride coated and conductive resin sensors used as component parts in the manufacture of integrated disposable electrophysiological sensors. These disposable medical devices are used worldwide in the monitoring of electrical signals in various medical applications. In an effort to leverage these skills, the Company has expanded into custom thermoplastic injection molded products with a full array of design, engineering and production services and management. With the addition of a medical machining cell, the Company began production of patient specific metal and plastic orthopedic devices. RMDDxUSA Corp., together with its subsidiary RMDDx Corporation (such subsidiaries collectively, “WirelessDx”), a wholly owned subsidiary of ART, provides medical software and services, respectively, to the medical industry. Based on management's review of the WirelessDx operations and its prospects for contribution to the Company's overall business strategy and results, the board has decided that the Company

should consider strategic alternatives, including a sale of all or a portion of the assets of its WirelessDx subsidiaries as discussed in Note 9. Up to this point in time WirelessDx has not added significant revenue to the Company's financial results. Management continues to identify complementary and/or synergistic products, technologies and lines of business in an effort to broaden the Company's offerings.

Results of Operations

Revenues

The Company's consolidated net sales for the three months ended June 30, 2012 were \$4,976,985, a decrease of \$1,041,344 or 17%, when compared to the total net sales of \$6,018,329 in the three months ended June 30, 2011 as discussed by segment below.

Micron sales for the three months ended June 30, 2012 were \$4,813,569, a decrease of \$1,189,588 or 19.8%, when compared to sales of \$6,003,157 in the same period in 2011. While Micron's sensor volume was 3% higher over the same period last year, silver surcharge billed was significantly lower than the same period in 2011. The custom manufacturing division saw decreases in defense industry work that was not fully offset by new programs in medical molding and machining and automotive molding and packaging.

WirelessDx net sales were \$151,776 for the three months ended June 30, 2012 compared to the net sales of \$15,172 in the same period in 2011. The medical monitoring segment continued its expansion efforts in multiple markets during the quarter.

ART's net sales were \$11,640 for the three months ended June 30, 2012 compared to the net sales of \$0 in the same period in 2011. A customer reimbursed improvement to ART's proprietary SAECG software, PREDICTOR®, generated sales with ART's OEM customer in the Japanese market.

The Company's consolidated net sales for the six months ended June 30, 2012 were \$11,282,167, a decrease of \$919,227 or 7.5%, when compared to the total net sales of \$12,201,394 in the six months ended June 30, 2011 as discussed by segment below.

Micron sales for the six months ended June 30, 2012 were \$11,029,709, a decrease of \$1,142,936 or 9.4%, when compared to sales of \$12,172,645 in the same period in 2011. Although Micron's sensor volume was 13% higher in the comparable periods the silver surcharge billed was significantly lower as the price of silver decreased during the period. The decreases in the MIT division's custom manufacturing in the defense industry was not completely offset by increases in medical molding and engineered tooling revenue associated with new programs.

WirelessDx net sales were \$240,818 for the six months ended June 30, 2012 compared to the net sales of \$28,749 in the same period in 2011. The medical monitoring segment continued its expansion efforts including contracts with the Veterans Administration and other providers. The subsidiary was issued a provider number as an IDTF during 2011.

ART's net sales were \$11,640 for the six months ended June 30, 2012 compared to the net sales of \$0 in the same period in 2011. A customer reimbursed improvement to ART's proprietary SAECG software, PREDICTOR®, generated sales with ART's OEM customer in the Japanese market. This update to PREDICTOR is expected to yield revenues from license sales later in the year.

Revenue from domestic and foreign sales for the three and six month periods is as follows:

	Three months ended June 30,				Six months ended June 30,			
	2012	%	2011	%	2012	%	2011	%
United States	\$2,025,938	41	\$2,256,889	37	\$4,622,904	41	\$4,923,184	40
Canada	1,644,973	33	2,453,400	41	3,445,182	31	4,357,289	36
Europe	340,570	7	517,162	9	1,040,044	9	1,160,422	10
Pacific Rim	397,623	8	332,682	5	984,748	8	842,654	7
Other	567,881	11	458,196	8	1,189,289	11	917,845	7
Total	\$4,976,985	100%	\$6,018,329	100%	\$11,282,167	100%	\$12,201,394	100%

The decrease of sales in Canada is due to decreased silver surcharge billed, while European sensor revenue decreased during the quarter. The decrease of sales in United States is related to a reduction in defense industry products.

Cost of sales

The Company's consolidated cost of sales was \$4,702,364 (94% of net sales) in the three months ended June 30, 2012 compared to \$4,994,063 (83% of net sales) in the three months ended June 30, 2011, a decrease of \$291,699 or 5.8% as discussed by segment below.

Micron cost of sales was \$4,187,750 (87.0% of segment sales) in the three months ended June 30, 2012 compared to \$4,827,807 (80.4% of segment sales) in the same period in 2011, a decrease of \$640,057 or 13.3%. The cost of silver has generally been passed on to our customers in the form of a surcharge. The surcharge protects Micron from decreasing gross profits from an increase in the cost of silver. This surcharge does not completely insulate Micron's inventory on hand from any dramatic change in value of silver. Management routinely reviews its products and programs, including those in development, for contribution and value to our overall business strategy and results. Programs with unacceptable margins will be phased out or discontinued, so that Micron's resources will be used to develop those of more strategic value.

WirelessDx cost of sales was \$514,614 in the three months ended June 30, 2012 compared to \$166,256 in the same period in 2011 an increase of \$348,358. The large increase includes the cost of fully staffed monitoring and patient call centers. See Note 9.

ART cost of sales was \$0 in the three months ended June 30, 2012 and the same period in 2011. The sales in this period was for products completed by research and development.

The Company's consolidated cost of sales was \$9,897,121 (87.7% of net sales) in the six months ended June 30, 2012 compared to \$9,798,842 (80.3% of net sales) in the six months ended June 30, 2011 an increase of \$98,279 or 1.0% as discussed by segment below. The increase in the consolidated cost of sales is mainly due to the WirelessDx segment.

Micron cost of sales was \$8,993,855 (81.5% of segment sales) in the six months ended June 30, 2012 compared to \$9,559,886 (78.5% of segment sales) in the same period in 2011 a decrease of \$566,031 or 5.9%. The cost of silver has generally been passed on to our customers in the form of a surcharge. The surcharge protects Micron from decreasing gross profits from an increase in the cost of silver. This surcharge does not completely insulate Micron's inventory on hand from any dramatic change in value of silver. Management routinely reviews its products and programs, including those in development, for contribution and value to our overall business strategy and results. Programs with unacceptable margins will be phased out or discontinued, so that Micron's resources will be used to develop those of more strategic value.

WirelessDx cost of sales was \$903,266 in the six months ended June 30, 2012 compared to \$237,136 in the same period in 2011 an increase of \$666,130. See Note 9.

ART cost of sales was \$0 in the six months ended June 30, 2012 and \$1,820 in the same period in 2011.

Selling and marketing expenses

The Company's consolidated selling and marketing expense increased to \$689,968 (14% of net sales) in the three months ended June 30, 2012 from \$413,517 (7% of net sales) in the same period in 2011, an increase of \$276,451, or 67% as discussed by segment below.

Micron's selling and marketing expense increased to \$215,065 (4.5% of segment sales) in the three months ended June 30, 2012 from \$194,264 (3.2% of segment sales) in the same period in 2011, an increase of \$20,801. While Micron's selling expense remained stable, it is expected to continue to increase in 2012 due to higher sales commissions as new programs begin. The increase in selling expense is not expected to increase as a percentage of sales.

WirelessDx's selling and marketing expense increased to \$422,463 in the three months ended June 30, 2012 from \$169,504 in the same period in 2011, an increase of \$252,959, or 149%. In 2012, the sales force expansion was completed and included a full period of salaries for the staff during the second quarter of 2012. See Note 9.

ART's selling and marketing expense increased to \$52,440 in the three months ended June 30, 2012 from \$49,749 in the same period in 2011, an increase of \$2,691, or 5.4%. In 2012, expenses incurred were related to business development efforts, including travel and trade show expenses.

The Company's consolidated selling and marketing expense increased to \$1,319,933 (12% of net sales) in the six months ended June 30, 2012 from \$773,530 (6% of net sales) in the same period in 2011, an increase of \$546,403, or 70.6% as discussed by segment below.

Micron's selling and marketing expense increased to \$404,198 (3.7% of segment sales) in the six months ended June 30, 2012 from \$402,975 (3.3% of segment sales) in the same period in 2011, an increase of \$1,223. Micron's selling expense remained stable, but is expected to increase in 2012 due to higher sales commissions as new programs begin. The increase in selling expense is not expected to significantly increase as a percentage of sales.

WirelessDx's selling and marketing expense increased to \$813,838 in the six months ended June 30, 2012 from \$276,025 in the same period in 2011, an increase of \$537,813, or 267%. In 2012, the sales force expansion was completed. Also contributing to the increase in expense during the period was the cost of travel as the segment's growth included additional geographic markets. See Note 9.

ART's selling and marketing expense increased to \$101,897 in the six months ended June 30, 2012 from \$94,530 in the same period in 2011, an increase of \$7,367, or 7.8%. In 2012, expenses incurred were related to business development efforts for SAECEG, including travel and trade show expenses.

General and administrative expenses

The Company's consolidated general and administrative expense was \$1,033,901 (20.8% of net sales) in the three months ended June 30, 2012 as compared to \$920,473 (15.3% of net sales) in the same period in 2011, an increase of \$113,428 or 12.3% as discussed by segment below.

Micron's general and administrative expense decreased to \$181,899 (3.8% of net sales) in the three months ended June 30, 2012 from 206,985 (3.4% of net sales) in the same period in 2011, a decrease of \$25,086.

WirelessDx's general and administrative expense increased to \$305,986 (6.1% of net sales) in the three months ended June 30, 2012 from \$228,278 (3.8% of net sales) in the same period in 2011, an increase of \$77,708. The expense for the segment includes executive salaries, back office support, and travel expenses.

ART's general and administrative expense was \$79,326 (1.6% of net sales) in the three months ended June 30, 2012 as compared to \$103,567 (1.7% of net sales) in the same period in 2011, a decrease of \$24,241. This includes costs of the legal work on existing patents, travel expense associated with ART products and other costs to maintain the software library.

The Corporate segment increased to \$466,690 (9.4% of net sales) in the three months ended June 30, 2012 from \$381,643 (6.3% of net sales) in the same period in 2011, an increase of \$85,047. A large portion of this increase was the cost associated with the increased compliance requirements with the year end and first quarter SEC filings. Other corporate and travel expenses also increased when compared to the comparable period.

The Company's consolidated general and administrative expense was \$2,009,281 (17.8% of net sales) in the six months ended June 30, 2012 as compared to \$1,798,843 (14.7% of net sales) in the same period in 2011, an increase of \$210,438 or 11.7% as discussed by segment below.

Micron's general and administrative expense decreased to \$396,359 (3.5% of net sales) in the six months ended June 30, 2012 from \$424,951 (3.5% of net sales) in the same period in 2011, a decrease of \$28,592.

WirelessDx's general and administrative expense increased to \$588,707 (5.2% of net sales) in the six months ended June 30, 2012 from \$461,583 (3.8% of net sales) in the same period in 2011, an increase of \$127,124. The expense for the segment includes executive salaries, back office support, and travel expenses.

ART's general and administrative expense was \$159,337 (1.4% of net sales) in the six months ended June 30, 2012 as compared to \$178,809 (1.5% of net sales) in the same period in 2011, a decrease of \$19,472. This includes costs of the legal work on existing patents, travel expense associated with ART products and other costs to maintain the software library.

The Corporate segment increased to \$864,878 (7.7% of net sales) in the six months ended June 30, 2012 from \$733,500 (6.0% of net sales) in the same period in 2011, an increase of \$131,378. A large portion of this increase was the cost associated with the increased compliance requirements with the year end and first quarter SEC filings. This cost is expected to continue, with the increased complexity of additional tax jurisdictions and increased legal and audit related expenses.

Research and development expenses

The Company's consolidated research and development costs increased to \$131,823 (2.6% of net sales) in the three months ended June 30, 2012 from \$106,656 (1.8% of net sales) in the same period in 2011, an increase of \$25,167, or 23.6% as discussed by segment below.

Micron's research and development costs decreased to \$25,536 (0.5% of net sales) in the three months ended June 30, 2012 from \$46,408 (0.8% of net sales) in the same period in 2011, a decrease of \$20,872, or 45.0%. The expense is related to process improvements on the Micron sensors and snap product lines as well as new processes and capabilities within MIT.

WirelessDx's research and development costs were \$0 in the three months ended June 30, 2012 and in the same period in 2011.

ART's research and development expenses increased to \$106,287 (2.1% of net sales) in the three months ended June 30, 2012 from \$60,248 (1.0% of net sales) in the same period in 2011. Research and development expense in 2012 included the addition of a full-time employee, development work related to device accessories to be manufactured by Micron and used by WirelessDx, and additional technical consulting for PREDICTOR. The 2011 expenses included the technical support of a NIH research project utilizing ART's proprietary Signal Averaged ECG software and evaluation of other devices for software development.

The Company's consolidated research and development costs increased to \$268,564 (2.4% of net sales) in the six months ended June 30, 2012 from \$187,864 (1.5% of net sales) in the same period in 2011, an increase of \$80,700, or 43.0% as discussed by segment below.

Micron's research and development costs decreased to \$62,424 (0.6% of net sales) in the six months ended June 30, 2012 from \$96,260 (0.8% of net sales) in the same period in 2011, a decrease of \$33,836, or 35.2%. The expense is related to process improvements on the Micron sensors and snap product lines as well as new processes and capabilities within MIT.

WirelessDx's research and development costs increased to \$3,332 (0.0% of net sales) in the six months ended June 30, 2012 from \$0 in the same period in 2011, and increase of \$3,332. This expense is related to the documentation required for FDA clearance of devices.

ART's research and development expenses increased to \$202,808 (1.4% of net sales) in the six months ended June 30, 2012 from \$91,604 (1.5% of net sales) in the same period in 2011. Research and development expense in 2012 included the addition of a full-time employee, development work related to device accessories to be manufactured by Micron and used by WirelessDx, and additional technical consulting for PREDICTOR. The 2011 expenses included the technical support of a NIH research project utilizing ART's proprietary Signal Averaged ECG software and evaluation of other devices for software development.

Income tax benefit as a percentage of loss before income taxes was 35% for the three months ended June 30, 2012 as compared to an income tax benefit of 38% for the same period in 2011. For the six months ended June 30, 2012, the effective rate of income tax benefit was 36% compared to an income tax benefit of 37% for the same period in 2011. The benefit rate is based on estimated utilization of operating losses in the near term. Management will continue to seek to implement any tax planning opportunities that could effectively reduce the Company's income tax obligations in the future.

Liquidity and Capital Resources

Working capital was \$4,524,285 at June 30, 2012 compared to \$6,118,678 at December 31, 2011, a decrease of \$1,594,393. Capital investment may decrease working capital with any significant investment resulting from future acquisition of capital assets or businesses, significant expansion of production capacity, or further software and product development.

Net capital expenditures were \$1,302,794 for the first six months of 2012 as compared to \$780,982 for the same period in 2011. The largest portion of the capital expenditures in the first six months of 2012 resulted from increased investment in medical devices used by the WirelessDx medical services business with the remainder being deployed for the routine replacement of production equipment and tooling on the Micron sensor product line. Capital expenditures for the six months ended June 30, 2012 were made with cash on hand or the use of a equipment note.

The Company has an unsecured credit line with a large multinational bank which the Company increased from \$2 million to \$3 million during the six months ended June 30, 2012. The agreement provides for borrowings up to 80% of eligible accounts receivable plus 50% of raw material and finished goods inventories. This facility has no borrowing base charge. The agreement contains covenants that apply upon drawing on the line. The covenants relate to various matters including notice prior to executing further borrowings and security interests, merger or consolidation, acquisitions, guarantees, sales of assets other than in the normal course of business, leasing, changes in ownership and payment of dividends. During the quarter ended June 30, 2012, \$500,000 was drawn on this line. Under this credit line, the Company has for the benefit of its subsidiary RMDDx secured a \$1,000,000 letter of credit to replace the guarantee by the Province of Prince Edward Island.

During the six months ended June 30, 2012, the Board of Directors declared and paid a cash dividend of \$0.03 per share for a total of \$84,119. In the comparable period ended June 30, 2011, the Board of Directors declared and paid a cash dividend of \$0.06 per share for a total of \$168,236.

The Company has funded working capital and capital expenditures from operations, and borrowings under the line of credit and a capital equipment lease line. Management believes that as the Company needs to fund working capital, and or future capital expenditures, financing alternatives are available.

Critical Accounting Policies

The preparation of financial statements and related disclosures in conformity with U.S. generally accepted accounting principles requires management to make judgments, assumptions and estimates that affect the amounts reported. Certain of these significant accounting policies are considered to be critical accounting policies, as defined below.

A critical accounting policy is defined as one that is both material to the presentation of the Company's financial statements and requires management to make difficult, subjective, and complex judgments that could have a material effect on the Company's financial condition and results of operations. Specifically, critical accounting estimates have the following attributes: 1) the Company is required to make assumptions about matters that are highly uncertain at the time of the estimate; and 2) different estimates the Company could reasonably have used, or changes in the estimate that are reasonably likely to occur, would have a material effect on the Company's financial condition or results of operations.

Management believes that the following are critical accounting policies:

Revenue Recognition

The Company recognizes revenue upon product shipment or completion of patient monitoring services, provided that there exists persuasive evidence of an arrangement, the fee is fixed or determinable, and collectability of the related receivable is reasonably assured. Revenue from contracted commercial payers is recorded at the negotiated contractual rate.

WirelessDx recognizes service revenues derived from event and mobile cardiac telemetry services, a significant portion of which is from third party commercial payers and governmental entities. It also receives reimbursement directly from patients through co-insurance, deductibles and self-pay arrangements. Gross revenue is adjusted for contractual adjustments and uncollectibles to an estimated net realizable value, based on historical information. Revenue is earned when service is completed.

Accounts Receivable

Based on management's on-going analysis of accounts receivable balances, as to any event that adversely affects the ultimate ability to collect the related receivable, management will record an allowance for bad debts. Bad debts have not had a significant impact on the Company's financial position, results of operations and cash flows.

Stock-Based Compensation

The Company accounts for share based compensation under ASC 718, "Stock Compensation" ("ASC 718"). ASC 718 requires that companies recognize and measure compensation expense for all share-based payments at the grant date based on the fair market value of the award. This share-based compensation expense must be included in the Company's results of operations over the requisite service period.

The Company uses the Black-Scholes option pricing model which requires extensive use of financial estimates and accounting judgment, including the expected volatility of the Company's common stock over the estimated term, and estimates on the expected time period that employees will retain their vested options prior to exercising them. The use of alternative assumptions could produce significantly different estimates of the fair value of the stock-based compensation and as a result, provide significantly different amounts recognized in the Company's statements of comprehensive income (loss).

Inventory

The Company values its inventory at the lower of average cost or net realizable value (FIFO). The Company reviews its inventory for quantities in excess of production requirements, obsolescence and for compliance with internal quality specifications. Any adjustments to inventory would be equal to the difference between the cost of inventory and the estimated net market value based upon assumptions about future demand, market conditions and expected cost to distribute those products to market.

The Company provides for excess, slow moving, and obsolete inventory. A review of inventory on hand is made at least annually and obsolete inventory may be scrapped and/or recycled. The review is based on several factors including a current assessment of future product demand, historical experience, and product expiration.

Deferred Tax Assets

The Company assesses its deferred tax assets based upon a more likely than not to be realized criteria. The Company considers future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for the valuation allowance. The Company recognizes the benefits of a tax position if that position is more likely than not to be sustained on audit, based on the technical merit of the position.

Asset Impairment – Goodwill

The Company accounts for goodwill and indefinite lived intangibles in accordance with ASC 350 “Intangibles – Goodwill and other”. Goodwill is reviewed for impairment annually, or when events arise that could indicate that impairment exists. The provisions of ASC 350 require that the Company perform a two-step impairment test. In the first step, the Company compares the fair value of its reporting units to the carrying value of the reporting units. If the carrying value of the net assets assigned to the reporting units exceeds the fair value of the reporting units, then the second step of the impairment test is performed in order to determine the implied fair value of the reporting units' goodwill. If the carrying value of the reporting units' goodwill exceeds its implied fair value, an impairment loss equal to the difference is recorded.

At December 31, 2011, the market price of the Company's stock was trading lower than its book value for a prolonged period. The Company was required to acknowledge this as a possible triggering event and that an impairment may exist. In addition, the Company had reorganized its reporting unit structure to combine the three reporting units (Micron Products, New England Molders, and Leominster Tool) with goodwill into one reporting unit. The combined reporting unit better reflects the synergies between these components and aligns the segment with how management reviews and operates the business. An analysis of goodwill of the three reporting units prior to combining was performed to determine fair value using income and market approaches. The income approach is based on a discounted cash methodology that includes assumptions of, among other things, forecast income, cash flow, growth rates, and long-term discount rates, all of which require significant judgment. The market approach utilizes the Company's market data as well as market data from publicly traded companies that are similar to the Company. There are inherent uncertainties related to these factors and the judgment applied in the analysis. Management determined an impairment was required for the Leominster Tool portion of the goodwill equal to \$85,239. The Company changed the goodwill annual test date from March 31 to December 31 aligning the test with the year end audit. This change will provide more time for the Company to complete its assessment prior to its reporting deadline. As required, the Company's independent registered public accounting firm issued a preferability letter on the matter.

Asset Impairment – Long Lived Assets

In accordance with ASC 360, "Long Lived Assets", management assesses the impairment of long-lived assets and intangible assets with finite lives whenever events or changes in circumstances indicate that the carrying value may not be fully recoverable. When the Company's management determines that the carrying value of such assets may not be recoverable, management generally measures any impairment on a projected discounted cash flow method using a discount rate determined by management to be commensurate with the risk inherent in its current business model.

Foreign operations

During 2011, it was determined that WirelessDx foreign operations functional currency is U.S. Dollars. Assets and liabilities are maintained in U.S. dollars. Gains and losses resulting from transactions which are denominated in other than the functional currency are reported as other income or loss in the statements of comprehensive income (loss) in the period the gain or loss is occurred.

Item 3. Quantitative and Qualitative Disclosure About Market Risks

Not applicable.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures.

We maintain “disclosure controls and procedures,” as such term is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the “Exchange Act”), that are designed to provide reasonable assurance that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Our management, with the participation of the Chief Executive Officer and Chief Financial Officer, determined that we had a material weakness in the internal control over financial reporting as of December 31, 2011. As a result of this determination, the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by the Annual Report on Form 10-K, our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) were not effective. At December 31, 2011, we identified the following matter that rose to a level of material weakness: Our management concluded that the controls surrounding the completeness and accuracy of our accounting for income taxes were ineffective. Specifically, certain errors in the computations in preparation of the tax provision reconciliation were not detected in the related quarterly review and approval process.

In designing and evaluating our disclosure controls and procedures, management recognized that disclosure controls and procedures, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the disclosure controls and procedures are met. Additionally, in designing disclosure controls and procedures, our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. The design of any disclosure controls and procedures also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Based on our analysis and assessment of this material weakness, we began to plan the appropriate corrective actions, as more thoroughly described below in the section titled “Remediation Efforts of Material Weakness in Internal Control over Financial Reporting.” Given that such remediation actions were not fully implemented before June 30, 2012, management believes that it is premature at this time to declare that the material weakness has been fully remediated. Management will continue to closely monitor its internal controls over financial reporting during the three months ending September 30, 2012, and will further assess progress on remediation at that time.

Changes in Internal Control over Financial Reporting

During the six months ended June 30, 2012, there have been no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) or in other factors that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Remediation Efforts of Material Weakness in Internal Control over Financial Reporting

In an effort to remediate the material weakness described above, we have made significant progress in understanding and creating a remediation plan to address the material weakness surrounding the accounting for income taxes. With the help of external advisors the remediation actions undertaken include additional monitoring and oversight controls over the income tax accounting process and improvements in the control documentation for income taxes to ensure conformity with U.S. generally accepted accounting principles through the increased use of third party advisors with expertise in income taxes to assist us with our quarterly income tax provision and increased detail in our tracking, documentation and reconciliation process related to our deferred tax assets.
