Dear
SHAREHOLDER

Once again, I am pleased to write that during the period covered by this report your Nuveen Fund continued to meet its objective of providing attractive monthly income free from regular federal income taxes and, where applicable, state income taxes. Detailed information on your Fund's performance can be found in the Portfolio Managers' Comments and on the Performance Overview pages within this report. Please take the time to read them.

In addition to providing tax-free income, we believe that a municipal bond investment like your Nuveen Fund also may offer opportunities to reduce the risk of your overall investment portfolio. This is because the prices of municipal bonds may move differently than the prices of the common stocks, mutual funds or other investments you may own. Since one part of your portfolio may be going up when another is going down, portfolio diversification may reduce your overall risk. Your financial advisor can explain the advantages of portfolio diversification in more detail. I urge you to contact him or her soon for more information on this important investment strategy.

I also urge you to consider receiving future Fund reports and other Fund information by e-mail and through the Internet. Not only will you be able to receive the information faster, but this also may help lower your Fund's expenses. Sign up is quick and easy - see the inside front cover of this report for step-by-step instructions.

For more than 100 years, Nuveen has specialized in offering quality investments such as your Nuveen Fund to those seeking to accumulate and preserve wealth. Our commitment to careful research, constant surveillance and judicious trading by our seasoned portfolio management team has never been stronger. Our mission continues to be to assist you and your financial advisor by offering the investment solutions and services that can help you meet your financial objectives. We thank you for choosing us as a partner as you work toward that goal.

Sincerely,

Portfolio Managers'
COMMENTS

Portfolio managers Tom Spalding and Tom O'Shaughnessy discuss U.S. and state economic conditions, key investment strategies, and the recent performance of the New Jersey and Pennsylvania Funds. A 26-year veteran of Nuveen, Tom Spalding has managed NQJ, NNJ, and NXJ since 2001, adding NUJ at its inception in March 2002. Tom O'Shaughnessy, who joined Nuveen in 1983, has managed NQP since 1991,

Edgar Filing: NUVEEN PENNSYLVANIA INVESTMENT QUALITY MUNICIPAL FUND INC - Form N-30D

NPY since 1995, NXM since 2001, and NVY since its inception in March 2002.

(In January 2003, as part of a general realignment of portfolio management assignments, Paul Brennan assumed primary management responsibility for these New Jersey and Pennsylvania Funds. Paul has eleven years of investment management experience.)

WHAT WERE THE MAJOR FACTORS AFFECTING THE U.S. ECONOMY AND THE MUNICIPAL MARKET DURING THIS REPORTING PERIOD?

In a number of ways, economic and market conditions have not changed significantly since our last shareholder report dated June 30, 2002. We believe the most influential factors shaping the U.S. economy and the municipal market continue to be the slow pace of economic growth and the relatively low level of interest rates. Continued geopolitical uncertainty and the ongoing threat of terrorism also had an economic and market impact during the reporting period.

In the municipal market, the sluggish economic recovery and lack of inflationary pressures created conditions that encouraged many issuers to bring new securities to market. New municipal supply nationwide topped \$357 billion in 2002, a 25% increase over 2001. This eclipsed the previous record issuance of \$292 billion set in 1993. Demand for municipal bonds remained strong over most of the year, as many individual investors continued to seek tax-free income and increased diversification within their portfolios. Institutional investors, especially traditional municipal bond purchasers such as property/ casualty insurance companies, also were active buyers in the municipal market.

HOW WERE ECONOMIC AND MARKET CONDITIONS IN NEW JERSEY AND PENNSYLVANIA?

New Jersey's diverse economy, convenient location, high income and wealth levels, and highly skilled workforce provide a solid economic base for the long term. Like many other states, however, New Jersey is currently grappling with budgetary stress brought on by declining tax revenues. After using reserve funds to close the fiscal 2002 budget deficit, the state is addressing a projected \$6 billion shortfall for fiscal 2003 by instituting a corporate alternative minimum tax, borrowing against tobacco settlement proceeds and reducing expenditures. Given the one-time nature of some of these and other proposed remedies, some believe that budgetary imbalances are likely to persist and that the fiscal 2004 budget process may begin with a deficit of about \$4 billion.

On the economic front, New Jersey's recovery continued to be weak. While the state's employment picture benefited from its sizable pharmaceutical industry as well as an influx of financial services jobs from New York City, this was offset to some degree by continuing losses in the manufacturing sector. As of December 2002, New Jersey's unemployment stood at 5.5%, up from 4.8% a year earlier but still below the national average of 6.0%. In 2002, New Jersey issued \$11 billion in new municipal debt, an increase of 13% over 2001 levels. New Jersey's declining tax revenues and increased spending pressures, especially for Medicaid and pensions, led both Moody's and Standard & Poor's to downgrade the state's general obligation debt to Aa2/AA from Aa1/AA+, respectively, during the course of 2002.

Although increasingly diverse, Pennsylvania's economy still has substantial exposure to old-line manufacturing industries. As a result, the commonwealth's economy mirrored the national slowdown during 2002. Most major industry groups cut jobs, with employment in the manufacturing sector down 5% from 2001. This was offset

somewhat by new jobs in pharmaceuticals, software, tourism, and business services as well as modest growth in construction. As a whole, unemployment in Pennsylvania rose over the past year, standing at 6.0% in December 2002, compared with 5.1% a year earlier.

In fiscal 2002, the erosion of tax revenues and a decline in reserves required Pennsylvania to use a complete \$1 billion drawdown of its rainy day fund in order to balance the budget. Fiscal 2003 budget estimates, which were based on a modest economic recovery, may now require a mid-year revision. However, Pennsylvania's debt levels are moderate relative to those of other large states, and state pension plans are fully funded. Although the commonwealth will probably not totally escape the budget problems currently prevalent across the nation, Pennsylvania has a history of conservative fiscal management, which is expected to help it make the necessary adjustments to balance operations. In 2002, Pennsylvania issued \$14.7 billion in municipal bonds, up 13% over 2001. Over the past 12 months, both Moody's and S&P maintained the commonwealth's credit ratings at Aa2/AA, respectively.

For additional information, see the individual Performance Overview for your Fund in this report.

For the 12 months ended December 31, 2002, all of the New Jersey and Pennsylvania Funds in this report having at least one year of performance history significantly outperformed the unleveraged, unmanaged Lehman Brothers Municipal Bond Index. Some of this performance difference can be traced to the built-in inequalities of comparing a national index with results obtained within a specific state. In addition, the Funds benefited from their leveraged

structure, which can provide additional income for investors while adding additional volatility to the Fund's NAV and share price.

NXJ, NQP, and NXM also outperformed their Lipper peer group averages for the twelve-month period. NXJ and NXM are relatively new, while NQPs portfolio has been repositioned in recent years as a result of bond calls. As a result their leverage-adjusted durations⁴ were longer than many of their Fund peers. A longer duration generally will help a Fund perform well in a declining interest rate environment like the one we experienced in 2002. (Please see the individual Performance Overview pages for each Fund's duration.)

The modest underperformance of NQJ, NNJ and NPY when compared with their Lipper peer group average resulted from the cumulative effects of several factors, including relative durations and specific sector weightings. For example, NQJ and NNJ had leverage-adjusted durations as of December 31, 2002, of 8.15 and 7.20, respectively. While there are advantages in having relatively short durations (as will be discussed in a later section), the municipal market environment in 2002 generally favored longer duration funds. In addition to a somewhat shorter duration, NPY also held a relatively small amount of education bonds over the twelve-month period. Education bonds were one of the best performing sectors in Pennsylvania. As a result, NPY did not receive the total return benefit from its education holdings to the same extent as other funds with higher education bond concentrations.

- 1 The total annual returns on common share net asset value (NAV) for these Nuveen Funds are compared with the total annual return of the Lehman Brothers Municipal Bond Index, an unleveraged national index comprising a broad range of investment-grade municipal bonds. Results for the Lehman index do not reflect any expenses.
- 2 The total returns of the Nuveen New Jersey Funds are compared with the average annualized return of the 10 funds in the Lipper New Jersey Municipal Debt Funds category, while the total returns of the Nuveen Pennsylvania Funds are compared with the average annualized return of the 10 funds in the Lipper Pennsylvania Municipal Debt Funds category. Fund and Lipper returns assume reinvestment of dividends.
- 3 The taxable-equivalent yield represents the yield that must be earned on a taxable investment in order to equal the yield of the Nuveen Fund on an after-tax basis. The taxable-equivalent yield is based on the Fund's market yield on the indicated date and a federal income tax rate of 30% plus the applicable state income tax rate. The combined federal and state tax rates used in this report are as follows: New Jersey 34.5% and Pennsylvania 32%.
- 4 Duration is a measure of a Fund's NAV volatility in reaction to interest rate movements. Fund duration, also known as leverage-adjusted duration, takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund. References to duration in this commentary are intended to indicate Fund duration unless otherwise noted.

HOW DID THE MARKET ENVIRONMENT AFFECT THE FUNDS' DIVIDENDS AND SHARE PRICES?

With short-term interest rates relatively low, the dividend-paying capabilities of these Funds benefited from their use of leverage, a strategy that can potentially enhance the dividends paid to common shareholders. The amount of

this benefit is tied in part to the short-term rates the Funds pay their MuniPreferred, shareholders. Low short-term rates can enable the Funds to reduce the amount of income they pay preferred shareholders, which can leave more earnings to support common share dividends.

During the twelve-months ended December 31, 2002, we were able to implement four dividend increases in NNJ, three in NPY and NXM, and one in NXJ. NQJ and NQP continued to pay steady, attractive monthly dividends during this period, marking 50 and 31 consecutive months, respectively, of stable dividends for these two Funds. The two Funds introduced in March 2002 -- NUJ and NVY -- paid their first monthly dividends in May 2002.

Over the course of the twelve-month period, NNJ, NPY, and NXM saw their share prices finish 2002 higher than where they had begun the year. Share prices of the other five Funds fell slightly over the course of 2002, affected by the general weakening of bond prices during October and November 2002. Over the twelve months ended December 31, 2002, NQJ, NXJ, NQP, and NXM moved from trading at a premium to their common share net asset values to trading at a discount, while NNJ and NPY continued to trade at discounts. The two new Funds -- NUJ and NVY -- were also trading at discounts as of December 31, 2002 (Please see charts on individual Performance Overview pages).

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE FUNDS DURING THE YEAR ENDED DECEMBER 31, 2002?

Over the twelve-month period, our strategic focus continued to be on diversifying holdings, enhancing call protection, and positioning the Funds more defensively in anticipation of potential changes in the interest rate environment. Given the recent steepness of the municipal yield curve, we concentrated on finding value in the long-intermediate part of the yield curve (approximately 15 to 20 years to maturity). In many cases, these bonds were offering yields similar to those of longer bonds, but in our opinion carried less inherent risk. The addition of these long-intermediate bonds should help to moderate the Funds' durations over time, making the portfolios less sensitive to interest rate changes while still allowing the Funds to provide competitive yields and returns. We think bonds in this maturity range offer excellent opportunities for price appreciation and should perform well relative to longer-maturity bonds if and when interest rates begin to rise. Over the past year, the addition of such bonds resulted in a shortening of duration in all of the Funds.

In addition to an emphasis on yield curve positioning and risk reduction, we also continued to look for individual issues that we believed would perform well regardless of the future direction of interest rates. Many of our purchases were insured general-purpose municipal bonds, rather than from specific sectors like housing or healthcare. We also participated in New Jersey's sale of the tobacco settlement bonds, which modestly increased our weighting in these bonds to 2%-5% of each portfolio. This is in line with our 5% cap for this type of credit.

NNJ marked its 10-year anniversary in December 2002, and we have been actively working to mitigate the effects of increasing bond calls that can occur around this point in a Fund's lifecycle. We were successful in transitioning out of several callable issues into bonds with greater call production, reducing the amount of potential calls in 2003 to about 10% of the Fund, and to about 4% in 2004.

Although issuance in the Pennsylvania municipal market was up in both 2001 and

2002, we found relatively few trading opportunities for our Funds. This was because the Pennsylvania new issue supply has been somewhat atypical over the past two years, with a large amount of very high-quality issuance and relatively few lower-rated securities with larger coupons that would help us enhance the Funds' earning streams. Therefore, we continued to hold most of our higher-yielding securities in anticipation of improved buying prospects over the next few years.

The Pennsylvania opportunities we did pursue often were within the education sector. With an unusually large number of colleges and universities within Pennsylvania, much of the commonwealth's municipal issuance traditionally comes in this area. During 2002, this sector offered some of the few opportunities to purchase uninsured BBB paper. We also continued to invest in general obligation bonds, especially those issued by small local school districts, and in water and sewer bonds.

In the geopolitical and economic climate of the past year, we believed that maintaining strong credit quality was a key requirement. As of December 31, 2002, each of these Funds continued to offer excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 56% to 89%. Our weightings in higher quality and insured bonds generally benefited the performance of these Funds during the past year.

WHAT IS YOUR OUTLOOK FOR THE MUNICIPAL MARKET IN GENERAL AND THESE FUNDS IN PARTICULAR?

In general, our outlook for the fixed income markets remains positive. We believe the U.S. economy is headed for an eventual recovery, but one that may be less robust and slower to arrive than some are predicting. We expect inflation and interest rates to remain relatively low over the near term, while new municipal volume nationally should continue to be strong, although probably below the record levels seen in 2002, as issuers take advantage of the low rate environment for both new issues and refinancings.

We think issuance in New Jersey may increase once current budget issues are resolved. In Pennsylvania, we expect to see a wider credit quality range among new offerings, especially as many of the higher-coupon bonds issued in the early 1990s start to be called. In addition, we believe that the healthcare sector of the Pennsylvania market is fully priced, and we may begin to reduce the Funds' holdings in this area.

We believe these Nuveen New Jersey and Pennsylvania Funds generally offer good levels of call protection. One exception is NPY, which marks its tenth anniversary in March 2003. This Fund is entering a period typically associated with increased call exposure, and NPY faces potential calls on 26% of its portfolio over the next two years. We plan to actively take advantage of what we anticipate will be opportunities in the Pennsylvania market to eliminate much of the near-term call exposure of this Fund.

In the months ahead, we expect to continue the process of shortening the durations of many of these Funds in an effort to better position them in the event of a rise in interest rates. More generally, we plan to remain focused on adding value for our shareholders and supporting the Funds' long-term dividend-payment capabilities. We remain convinced that the attractive tax-free income and portfolio diversification potential offered by these Funds will continue to benefit shareholders in the period ahead.

FINANCIAL STATEMENTS (Unaudited)

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The state Funds (the "Funds") covered in this report and their corresponding Common share stock exchange symbols are Nuveen New Jersey Investment Quality Municipal Fund, Inc. (NQJ), Nuveen New Jersey Premium Income Municipal Fund, Inc. (NNJ), Nuveen New Jersey Dividend Advantage Municipal Fund (NXJ), Nuveen New Jersey Dividend Advantage Municipal Fund 2 (NUJ), Nuveen Pennsylvania Investment Quality Municipal Fund (NQP), Nuveen Pennsylvania Premium Income Municipal Fund 2 (NPY), Nuveen Pennsylvania Dividend Advantage Municipal Fund (NXM) and Nuveen Pennsylvania Dividend Advantage Municipal Fund 2 (NVY). New Jersey Investment Quality (NQJ), New Jersey Premium Income (NNJ), Pennsylvania Investment Quality (NQP) and Pennsylvania Premium Income 2 (NPY) are traded on the New York Stock Exchange while New Jersey Dividend Advantage (NXJ), New Jersey Dividend Advantage 2 (NUJ), Pennsylvania Dividend Advantage (NXM) and Pennsylvania Dividend Advantage 2 (NVY) are traded on the American Stock Exchange.

Prior to the commencement of operations of New Jersey Dividend Advantage 2 (NUJ) and Pennsylvania Dividend Advantage 2 (NVY), each Fund had no operations other than those related to organizational matters, the initial capital contribution of \$100,275 per Fund by Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc. (formerly, The John Nuveen Company) and the recording of the organization expenses (\$11,500 per Fund) and their reimbursement by Nuveen Investments, LLC (formerly, Nuveen Investments) also a wholly owned subsidiary of Nuveen Investments, Inc.

Each Fund seeks to provide current income exempt from both regular federal and designated state income taxes by investing primarily in a diversified portfolio

of municipal obligations issued by state and local government authorities within a single state. The Funds are registered under the Investment Company Act of 1940 as closed-end management investment companies.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Directors/Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Directors/Trustees of the Funds or its designee may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets in a separate account with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At December 31, 2002, Pennsylvania Investment Quality (NQP), Pennsylvania Premium Income 2 (NPY), Pennsylvania Dividend Advantage (NXM) and Pennsylvania Dividend Advantage 2 (NVY) had outstanding when-issued and/or delayed delivery purchase commitments of \$11,913,766, \$12,402,291, \$986,140 and \$986,140, respectively. There were no such outstanding purchase commitments in any of the other Funds.

Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and applicable state and local income taxes, to retain such tax-exempt status when distributed to shareholders of the Funds.

Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared and paid monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually.

Edgar Filing: NUVEEN PENNSYLVANIA INVESTMENT QUALITY MUNICIPAL FUND INC - Form N-30D

Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of such distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States. Accordingly, temporary over-distributions as a result of these differences may occur and will be classified as either distributions in excess of net investment income, distributions in excess of net realized gains and/or distributions in excess of net ordinary taxable income from investment transactions, where applicable.

Preferred Shares

The Funds have issued and outstanding \$25,000 stated value Preferred shares. Each Fund's Preferred shares are issued in one or more Series. The dividend rate on each Series may change every seven days, as set pursuant to a dutch auction process by the auction agent, and is payable at or near the end of each rate period. The number of Preferred shares outstanding, by Series and in total, for each of the Funds is as follows:

Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the six months ended December 31, 2002.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Offering Costs

Nuveen Investments, LLC has agreed to pay all offering costs (other than the sales load) that exceed \$.03 per Common share for New Jersey Dividend Advantage 2 (NUJ) and Pennsylvania Dividend Advantage 2 (NVY). New Jersey Dividend Advantage 2's (NUJ) and Pennsylvania Dividend Advantage 2's (NVY) share of offering costs (\$135,000 and \$111,450, respectively) were recorded as a reduction of the proceeds from the sale of Common shares.

Costs incurred by New Jersey Dividend Advantage 2 (NUJ) and Pennsylvania Dividend Advantage 2 (NVY) in connection with their offering of Preferred shares (\$479,767 and \$412,260, respectively) were recorded as a reduction to paid-in surplus.

FINANCIAL STATEMENTS (Unaudited) (continued)

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

Build Your Wealth
 AUTOMATICALLY

SIDEBAR TEXT: NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN
 Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions

that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

Policy Change

On November 14, 2002, the Board adopted a policy that allows these Funds, in addition to investments in municipal bonds, to invest up to 5% of its net assets (including assets attributable to preferred shares, if any) in tax-exempt or taxable fixed-income securities or equity securities for the purpose of acquiring control of an issuer whose municipal bonds (a) the Fund already owns and (b) have deteriorated or are expected shortly to deteriorate significantly in credit quality, provided Nuveen Advisory determines that such investment should enable the Fund to better maximize the value of its existing investment in such issuer. This policy is a non-fundamental policy of each Fund which means that it can be changed at any time by the Board of Trustees without vote of the shareholders.

Glossary of Terms Used in this Report

Average Annual Total Return: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return (including change in NAV and reinvested dividends) THAT WOULD HAVE BEEN NECESSARY ON AN ANNUAL BASIS TO EQUAL THE INVESTMENT'S actual performance over the time period being considered.

Average Effective Maturity: The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

Leverage-Adjusted Duration: Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund.

Market Yield (also known as Dividend Yield or Current Yield): An investment's current annualized dividend divided by its current market price.

Net Asset Value (NAV): A fund's NAV is calculated by subtracting the liabilities of the fund from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

Taxable-Equivalent Yield: The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.

Each Fund intends to repurchase shares of its own common or preferred stock in the future at such times and in such amounts as is deemed advisable. No shares were repurchased during the six-month period ended December 31, 2002. Any future repurchases will be reported to shareholders in the next annual or semiannual report.
