Announcement to Shareholders

On February 15, 2006, BlackRock, Inc. ("BlackRock") and Merrill Lynch & Co., Inc. ("Merrill Lynch") entered into an agreement to contribute Merrill Lynch's investment management business, Merrill Lynch Investment Managers, L.P. and certain affiliates (including Fund Asset Management, L.P. and Merrill Lynch Investment Managers International Limited), to BlackRock to create a new independent company that will be one of the world's largest asset management firms with over \$1 trillion in assets under management (based on combined assets under management as of March 31, 2006). The transaction is expected to close in the third quarter of 2006, at which time the new company will operate under the BlackRock name. The Fund's Board of Directors/Trustees has approved a new investment advisory agreement with BlackRock Advisors, Inc. or its successor ("BlackRock Advisors") on substantially the same terms and for the same advisory fee as the current investment advisory agreement with the Investment Advisor. If the agreement is approved by the Fund's shareholders, BlackRock Advisors is expected to become the Fund's investment adviser upon the closing of the transaction between Merrill Lynch and BlackRock.

Swap Agreements

The Funds may invest in swap agreements, which are over-the-counter contracts in which one party agrees to make periodic payments based on the change in market value of a specified bond, basket of bonds, or index in return for periodic payments based on a fixed or variable interest rate or the change in market value of a different bond, basket of bonds or index. Swap agreements

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

may be used to obtain exposure to a bond or market without owning or taking physical custody of securities. Swap agreements involve the risk that the party with whom each Fund has entered into a swap will default on its obligation to pay the Fund and the risk that the Fund will not be able to meet its obligation to pay the other party to the agreement.

SEMI-ANNUAL REPORTS

A Letter From the President

Dear Shareholder

You may be aware that changes are on the horizon at Merrill Lynch Investment Managers ("MLIM"). On February 15, 2006, Merrill Lynch announced plans to combine the firm's investment advisory business, including MLIM, with another highly regarded investment manager - BlackRock, Inc. ("BlackRock").

We believe this merger of asset management strength will benefit our investors. MLIM is a leading investment management organization with over \$576 billion in assets under management globally and 2,757 employees in 17 countries. It offers over 100 investment strategies in vehicles ranging from mutual funds to institutional portfolios. BlackRock is one of the largest publicly traded investment management firms in the United States with \$463.1 billion in assets under management and 1,839 employees. It manages assets on behalf of institutional and individual investors worldwide through a variety of equity, fixed income, liquidity and alternative investment products.

At the completion of the transaction, which is expected in the third quarter of this year, the resultant firm will be a top-10 investment manager worldwide with over \$1 trillion in assets under management.* The combined company will provide a wider selection of high-quality investment solutions across a range of asset classes and investment styles. MLIM and BlackRock possess complementary capabilities that together create a well-rounded organization uniting some of the finest money managers in the industry. At the same time, the firms share similar values and beliefs - they are focused on delivering excellence on behalf of clients, and both make investment performance their single most important mission. In short, the merger only reinforces our commitment to shareholders.

Most of MLIM's investment products - including mutual funds, separately managed accounts, annuities and variable insurance funds - eventually will carry the "BlackRock" name. As a shareholder in one or more MLIM-advised mutual funds, you will receive a proxy package in the coming weeks in connection with this transaction. After you receive this information, should you have any questions or concerns, do not hesitate to contact your financial advisor.

As always, we thank you for entrusting us with your investment assets, and we look forward to continuing to serve your investment needs with even greater strength and scale as the new BlackRock.

Sincerely,

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

Merrill Lynch Investment Managers

* \$1.039 trillion in assets under management as of March 31, 2006.
Data, including assets under management, are as of March 31, 2006.

SEMI-ANNUAL REPORTS

APRIL 30, 2006

A Discussion With Your Funds' Portfolio Managers

New municipal issuance declined during the six-month period, helping tax-exempt bonds to outperform their taxable counterparts but also limiting opportunities to restructure the portfolios.

Describe the recent market environment relative to municipal bonds.

Long-term bond yields rose sharply during the six-month period, with much of the increase occurring in March and April 2006. Bond prices, which move opposite of yields, declined. Bond prices were pressured as investors focused on solid economic growth, both globally and in the United States, and renewed inflationary pressures deriving from rising commodity prices. First quarter 2006 gross domestic product growth was recently estimated at 4.8%, well above the 1.7% rate recorded in the fourth quarter of 2005.

The Federal Reserve Board (the Fed) continued to raise short-term interest rates at each of its meetings during the period, bringing the federal funds target rate to 4.75% at period-end, and to 5% with another interest rate hike on May 10, 2006. In response, the Treasury curve continued to flatten, with short-term interest rates rising more than longer-term interest rates. Over the past six months, 30-year U.S. Treasury bond yields rose 41 basis points (.41%) to 5.17% and 10-year U.S. Treasury note yields rose 50 basis points to 5.07%, the highest level since May 2002.

While the municipal yield curve also flattened during the period, the market's strong technical position provided significant price support. This allowed municipal bond prices to improve slightly or decline much less than those of their taxable counterparts. As measured by Municipal Market Data, yields on AAA-rated issues maturing in 30 years fell six basis points to 4.53% while yields on AAA-rated issues maturing in 10 years rose 16 basis points to 4.08%.

For the most part, the recent outperformance of the tax-exempt market has been fostered by a dramatic decline in new bond issuance so far in 2006. In 2005, more than \$408 billion in new long-term tax-exempt bonds was underwritten, a new annual record and an increase of more than 13% compared to 2004. Over the past six months, \$170 billion in long-term municipal bonds was issued, a decline of 8.6% versus the same period a year earlier. The record new issuance in 2005 was largely triggered by a 47% increase in refunding activity as issuers took advantage of historically low bond yields and a flattening yield curve to refinance outstanding higher-coupled debt. Year-to-date through April 2006, refunding issuance declined more than 55% relative to the first four months of 2005. This decline already has led some analysts to reduce

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

their forecasts for 2006 new issuance from the \$350 billion - \$370 billion range to the \$300 billion - \$325 billion range. Lower annual issuance would further solidify the tax-exempt market's already positive technical position.

The tax-exempt market has continued to enjoy strong investor demand. As reported by the Investment Company Institute, long-term municipal bond funds received net new monies of \$5.0 billion in 2005 - a sharp reversal from the \$3.7 billion outflow in 2004. During the first quarter of 2006, tax-exempt mutual funds received over \$9.3 billion, slightly higher than the \$8.9 billion inflow during the same period in 2005. Recent statistics from AMG Data Services indicate that, thus far in 2006, weekly cash flows into long-term municipal bond funds averaged over \$300 million, a significant improvement from the weekly average of \$65 million in December 2005.

Looking ahead, the fundamentals for the tax-exempt bond market appear favorable, and continued positive cash flows are anticipated. Given their attractive yields relative to comparable U.S. Treasury bonds, and the prospects for reduced issuance in 2006, we believe municipal bonds could enjoy solid results in the coming months.

MuniYield Florida Insured Fund

Describe conditions in the State of Florida.

Florida's economy has outperformed that of both the nation and other southern states, and appears likely to continue this trend in the foreseeable future. The state's mix of solid demographics and increasing job growth among diversified industries is expected to continue to encourage migration into Florida. Although national economic trends have put pressure on the state, we believe Florida is well positioned given its record of proactive management and financial flexibility.

The state's enacted fiscal year 2005-2006 budget is \$64.7 billion, an increase of 12% from the prior year. The budget reflects a combination of spending constraints, with spending below anticipated personal income growth, and increased revenue growth. Of the increased revenue, not all is expected to be permanent, as some stems primarily from the reconstruction and replacement of property destroyed by hurricanes and, therefore, is not recurring.

SEMI-ANNUAL REPORTS

APRIL 30, 2006

Fiscal discipline has afforded the state the opportunity to provide tax relief in the form of tax-free shopping days, reduced sales tax on equipment, tax credits and a phaseout of the intangible tax. Three areas of the budget account for 93% of the total expenditures - education at 52%, health and human services at 26% and public safety at 15%. Revenues for the first four months of the fiscal year were \$602 million, 14% higher than the same period in the prior fiscal year.

How did the Fund perform during the period?

For the six-month period ended April 30, 2006, the Common Shares of MuniYield Florida Insured Fund had net annualized yields of 5.19% and 5.49%, based on a period-end per share net asset value of \$14.57 and a per share market price of \$13.77, respectively, and \$.375 per share income dividends. Over the same

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

period, the total investment return on the Fund's Common Shares was +1.70%, based on a change in per share net asset value from \$14.72 to \$14.57, and assuming reinvestment of all distributions.

The Fund's return, based on net asset value, lagged the +2.16% average return of the Lipper Florida Municipal Debt Funds category for the six-month period. (Funds in this Lipper category limit their investment to securities exempt from taxation in Florida or a city in Florida). For the most part, performance was impacted as the yield curve flattened and short and intermediate maturities underperformed. We had exposure to these sectors through bonds that had been prerefunded - thereby transforming several of our longer-dated issues into intermediate-maturity issues - and higher-coupon bonds priced to a short call. Despite their underperformance on a total return basis, these bonds were acquired in a higher interest rate environment and, as such, contribute meaningfully to the Fund's yield. This supports our long-term commitment to providing shareholders with an attractive level of income and allowed the Fund to maintain an above-average yield versus its peers.

To a lesser extent, the Fund's total return performance was affected by its conservative investment parameters. This prohibited us from investing in non-investment grade issues, which outperformed the high-grade market as credit spreads narrowed during the period.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Shares (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of dividends, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Shares can vary significantly from total investment return based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?

We did not alter our strategy or make meaningful changes to the portfolio's composition during the six-month period. We continued to focus on increasing the income provided to shareholders and muting the Fund's net asset value volatility. To that end, we remained fully invested throughout the period in order to augment yield.

In making new purchases, we generally focused on premium-coupon bonds in the 20-year - 25-year maturity range whenever they became available, although we did begin to see value in the 15-year area of the curve and continue to explore opportunities there. Given the extent of the curve flattening, spreads are appearing wider now in the 20-year sector of the curve, so we are able to capture some of the most attractive yields on the curve without having to extend to the longest maturities.

Issuance of Florida municipal bonds increased less than 3% during the period compared to the same period six months a year ago. However, new issuance in the latter three months was down 32% compared to the same three months in 2005. The reduction in supply has meant few opportunities to restructure the portfolio. For the most part, we are seeing supply concentrated in the 15-year - 20-year area, most of these being insured issues with 4% to 4.5% coupons. We remain committed to structuring bonds with 5% to 5.25% coupons, although the cost for new issues with these characteristics has been prohibitive.

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

SEMI-ANNUAL REPORTS

APRIL 30, 2006

A Discussion With Your Funds' Portfolio Managers (continued)

For the six-month period ended April 30, 2006, the Fund's Auction Market Preferred Shares (AMPS) had average yields of 2.96% for Series A and 3.04% for Series B. The Fed raised the short-term interest rate target 100 basis points during the six-month period, and this continued to affect the Fund's borrowing costs. We would expect additional increases in the cost of funds to be more limited as the Fed nears a pause in its monetary tightening campaign. Despite the interest rate increases during the period, the tax-exempt yield curve maintained a positive slope, allowing us to borrow at a lower rate than where we invest. This continued to generate an income benefit to the holders of Common Shares from the leveraging of Preferred Shares. However, should the spread between short-term and long-term interest rates narrow, the benefits of leveraging will decline and, as a result, reduce the yield on the Fund's Common Shares. At the end of the period, the Fund's leverage amount, due to AMPS, was 36.90% of total net assets, before the deduction of Preferred Shares. (For a more complete explanation of the benefits and risks of leveraging, see page 10 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

We would characterize the Fund's position as fairly neutral in terms of interest rate risk. At period-end, we were looking to increase the portfolio's exposure to bonds in the 10-year - 20-year maturity range, where we see value emerging. Given the degree of yield-curve flattening that has occurred over the course of the Fed's interest rate-hiking campaign, we believe this maturity range could be ready to outperform.

We remain fully invested, consistent with our efforts to augment shareholder income, and intend to use periods of volatility to pursue higher-coupon bonds whenever they are attractively priced.

MuniYield New Jersey Insured Fund, Inc.

Describe conditions in the State of New Jersey.

In the November elections, New Jersey Democrats retained control of the state senate and assembly, as well as the governor's office. Former New Jersey senator Jon Corzine was elected the state's 54th governor and immediately faced the challenges of the fiscal year 2007 budget, including funding the public pension system, replenishing the Transportation Trust Fund and complying with court-mandated school construction spending.

The resulting \$31 billion budget proposed by the governor provided for a \$2.6 billion increase in overall spending and called for a 1% sales tax hike and a 35-cent per-pack cigarette tax increase. Surprisingly, no gasoline tax increase was included, although a higher percentage of the existing tax is slated to be applied to the ailing Transportation Trust Fund. Even so, that leaves the bulk of the state's transportation needs to be funded by \$6 billion in new debt that will be issued over the next five years, as well as the refinancing of \$1.7 billion in existing debt.

Although this proposed budget is in balance for fiscal year 2007, New Jersey still faces a structural deficit of \$1.5 billion heading into fiscal year

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

2008. From a credit-rating perspective, a positive in the governor's proposal is its reduced reliance on one-time revenues to balance the budget. Relatively late in the period, New Jersey issued an additional \$650 million worth of tax and revenue anticipation notes, which were given the highest short-term credit ratings from the major rating agencies and were well received by the market.

How did the Fund perform during the period?

For the six-month period ended April 30, 2006, the Common Stock of MuniYield New Jersey Insured Fund, Inc. had net annualized yields of 4.91% and 4.98%, based on a period-end per share net asset value of \$14.90 and a per share market price of \$14.70, respectively, and \$.363 per share income dividends. Over the same period, the total investment return on the Fund's Common Stock was +1.39%, based on a change in per share net asset value from \$15.07 to \$14.90, and assuming reinvestment of all distributions.

The Fund's total return, based on net asset value, trailed the +2.43% average return of the Lipper New Jersey Municipal Debt Funds category for the six-month period. (Funds in this Lipper category limit their investment to those securities exempt from taxation in New Jersey or a city in New Jersey.) Notably, the Fund was disadvantaged relative to many of its peers by its conservative investment parameters. Specifically, the Fund is limited in its ability to invest in lower-quality issues, which outperformed during the period as credits spreads (versus higher-quality issues of comparable maturity) tightened dramatically. Per its investment parameters, roughly 83% of the portfolio is invested in AAA-rated, insured bonds.

SEMI-ANNUAL REPORTS

APRIL 30, 2006

Another factor that weighed heavily on the Fund's performance was the fact that a number of seasoned holdings with higher coupons were called by their issuers. Given our limited ability to buy lower-rated issues and a sharp decline in new-issue supply during the period, particularly in the first quarter of 2006, it was especially difficult to compensate for the income lost to calls.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Stock (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of dividends, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Stock may vary significantly from total investment returns based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?

Activity during the period was extremely limited, due in large part to a lack of opportunities in both the primary and secondary markets, particularly in the latter half of the period. For the six months ended April 30, 2006, New Jersey municipal bond supply was down 48% compared to the same period a year ago. Notwithstanding the limitations imposed by the market and our own investment parameters, we felt that the portfolio was appropriately positioned for the yield curve flattening that we had anticipated, and we saw little need to make significant changes.

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

A number of factors have combined to sharply reduce the overall supply of municipal issues in the early months of 2006. The low interest rate environment of 2005 may have exhausted much of the potential new-issue supply, and with interest rates having risen somewhat over the past few months, some issuers may have been discouraged from coming to market. Looking ahead, though, the proposed 2007 budget includes \$6 billion of new debt to be issued for the Transportation Trust Fund over five years. As of this writing, the first installment of \$2.8 billion is scheduled to be issued in May 2006 and includes refinancing for \$1.7 billion of existing debt.

For the six-month period ended April 30, 2006, the Fund's Auction Market Preferred Stock (AMPS) had average yields of 2.70% for Series A and 2.72% for Series B. The Fed raised the short-term interest rate target 100 basis points during the six-month period, and this continued to affect the Fund's borrowing costs. We would expect additional increases in the cost of funds to be more limited as the Fed nears a pause in its monetary tightening campaign. Despite the interest rate increases during the period, the tax-exempt yield curve maintained a positive slope, allowing us to borrow at a lower rate than where we invest. This continued to generate an income benefit to the holders of Common Stock from the leveraging of Preferred Stock. However, should the spread between short-term and long-term interest rates narrow, the benefits of leveraging will decline and, as a result, reduce the yield on the Fund's Common Stock. At the end of the period, the Fund's leverage amount, due to AMPS, was 35.92% of total net assets, before the deduction of Preferred Stock. (For a more complete explanation of the benefits and risks of leveraging, see page 10 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

Throughout the period, the Fund remained relatively neutral with respect to interest rate risk, and with a high-quality credit profile. Our yield curve outlook has changed in response to recent speculation that the Fed may be closer to the end of its monetary tightening program. Therefore, we believe the majority of the curve flattening is behind us and we are in the early stages of reducing our exposure to the long end of the curve. We now see the most attractive value closer to the middle of the curve, around the 10-year - 15-year range. While we believe there is still some risk of further Fed tightening, the markets tend to anticipate and react to those moves before the fact, so we prefer to be at the front end of that trend.

SEMI-ANNUAL REPORTS

APRIL 30, 2006

A Discussion With Your Funds' Portfolio Managers (concluded)

MuniYield Pennsylvania Insured Fund

Describe conditions in the Commonwealth of Pennsylvania.

Pennsylvania continued to protect its credit ratings of Aa2, AA and AA from Moody's, Standard & Poor's and Fitch, respectively, by maintaining conservative budgeting practices, a relatively low debt burden and a more diversified service economy. Following a difficult period at the start of the decade, the commonwealth's finances have improved and stabilized. Through

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

March, revenue collections for fiscal year 2006 were \$505.4 million, or 2.8% above initial estimates, largely thanks to strong corporate and personal income tax collection.

Property-tax reform continues to be a key topic on the legislative agenda. Pennsylvania's House and Senate have put forth competing bills, with the House seeking larger property tax reductions through new state taxes for schools and the Senate proposing smaller property tax cuts that hinge largely on gambling tax revenue and voter-approved local wage tax shifts. The two chambers will try to negotiate a compromise that can pass both assemblies for a final decision by Governor Edward Rendell. With a gubernatorial election this November, it seems unlikely that the governor will increase personal income tax rates without the more tangible benefits of property tax reform.

Broad-based job growth continues to be a favorable trend in the commonwealth. For the first quarter of 2006, employment was up 1.2%, slightly below the national growth rate of 1.5%. Pennsylvania's unemployment rate was 4.5% in March 2006, down from 5.2% in March 2005. Personal income growth of 1.5% in the Keystone State trailed the U.S. average growth rate of 2.3% in the last quarter of 2005, but overall reflects a wealth level on par with the nation.

How did the Fund perform during the period?

For the six-month period ended April 30, 2006, the Common Shares of MuniYield Pennsylvania Insured Fund had net annualized yields of 5.24% and 5.50%, based on a period-end per share net asset value of \$15.48 and a per share market price of \$14.73, respectively, and \$.402 per share income dividends. Over the same period, the total investment return on the Fund's Common Shares was +2.13%, based on a change in per share net asset value from \$15.57 to \$15.48, and assuming reinvestment of all distributions.

The Fund provided an above-average yield during the six-month period and its total return, based on net asset value, surpassed the +1.95% average return of the Lipper Pennsylvania Municipal Debt Funds category. (Funds in this Lipper category limit their investment to those securities exempt from taxation in Pennsylvania or a city in Pennsylvania.)

The Fund's outperformance is primarily attributed to positive security selection. Pennsylvania's municipal bond issuance fell 38% in the first quarter of 2006, more than that experienced by the broader municipal market. Despite the limited investment opportunities, the Fund was able to realize price outperformance from its portfolio of high-quality Pennsylvania municipal bonds. Furthermore, the Fund's slightly longer maturity compared to its peers proved advantageous, as it allowed the portfolio to maintain an above-average yield, which added to incremental total return. As the yield curve continued to flatten over the six-month period, long-term bonds outperformed short-term issues, and our focus on this sector of the curve enhanced Fund results.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Shares (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of dividends, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Shares can vary significantly from total investment returns based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

As mentioned previously, new issuance of Pennsylvania debt declined significantly, with new issues of 25-year - 30-year bonds bordering on non-existent over the period. As a result, we made no material changes to the structure and composition of the portfolio.

SEMI-ANNUAL REPORTS

APRIL 30, 2006

We maintained our focus on protecting the Fund's net asset value and providing shareholders with an above-average level of income. To that end, we continued to target additional yield by investing in longer-dated bonds. The Fund continued to have a slightly long duration. Although we did seek to move the Fund closer to a neutral duration during the period, limited availability of appropriately structured issues precluded our efforts.

Importantly, the Fund was essentially fully invested throughout the period, consistent with our goal of maintaining an attractive level of income.

For the six-month period ended April 30, 2006, the Fund's Auction Market Preferred Shares (AMPS) had average yields of 2.87% for Series A, 2.80% for Series B and 2.91% for Series C. The Fed's interest rate hikes continue to have a material impact on the Fund's borrowing costs. The Fed raised the short-term interest rate target 100 basis points during the six-month period. We would expect additional increases in the cost of funds to be more limited as the Fed nears a pause in its monetary tightening campaign. Despite the interest rate increases during the period, the tax-exempt yield curve maintained a positive slope, allowing us to borrow at a lower rate than where we invest. This continued to generate an income benefit to the holders of Common Shares from the leveraging of Preferred Shares. However, should the spread between short-term and long-term interest rates narrow, the benefits of leveraging will decline and, as a result, reduce the yield on the Fund's Common Shares. At the end of the period, the Fund's leverage amount, due to AMPS, was 36.47% of total net assets, before the deduction of Preferred Shares. (For a more complete explanation of the benefits and risks of leveraging, see page 10 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

We ended the period with a fully invested portfolio and a positive stance on interest rate risk. We maintain a favorable outlook for the municipal market, based on declining issuance and increasing demand on the part of high net worth investors, U.S. subsidiaries of foreign banks and larger U.S. banking corporations that have merged and are seeking tax-exempt income.

After 16 consecutive interest rate hikes, we believe the Fed is prepared to pause in order to assess the impact that its measured monetary tightening campaign has had on economic growth and inflation. However, if there are additional rate increases, we would expect the municipal yield curve to steepen in the short term, particularly relative to the very flat U.S. Treasury yield curve, which should continue to provide attractive opportunities on the long end.

Against this backdrop, we intend to continue to look for maturities in the 25-year area and favor a neutral to slightly long portfolio duration, which we believe offers the benefit of incremental yield. We remain committed to our strategy of investing in high-quality bonds issued by high-tax states. Ultimately, we expect that above-average yields will provide competitive Fund returns over time.

SEMI-ANNUAL REPORTS

APRIL 30, 2006

The Benefits and Risks of Leveraging

The Funds utilize leveraging to seek to enhance the yield and net asset value of their Common Shares or Common Stock. However, these objectives cannot be achieved in all interest rate environments. To leverage, the Funds issue Preferred Shares or Stock, which pays dividends at prevailing short-term interest rates, and invests the proceeds in long-term municipal bonds. The interest earned on these investments, net of dividends to Preferred Shares or Stock, is paid to Common Shareholders or Common Stock shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share net asset value of the Fund's Common Shares or Stock. However, in order to benefit Common Shareholders or Common Stock shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. At the same time, a period of generally declining interest rates will benefit Common Shareholders or Common Stock shareholders. If either of these conditions change, then the risks of leveraging will begin to outweigh the benefits.

To illustrate these concepts, assume a fund's Common Shares or Stock capitalization of \$100 million and the issuance of Preferred Shares or Stock for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are approximately 3% and long-term interest rates are approximately 6%, the yield curve has a strongly positive slope. The fund pays dividends on the \$50 million of Preferred Shares or Stock based on the lower short-term interest rates. At the same time, the fund's total portfolio of \$150 million earns the income based on long-term interest rates.

In this case, the dividends paid to Preferred Shareholders or Common Stock shareholders are significantly lower than the income earned on the fund's long-term investments, and therefore the Common Shareholders or Common Stock shareholders are the beneficiaries of the incremental yield. However, if short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental yield pickup on the Common Shares or Stock will be reduced or eliminated completely. At the same time, the market value of the fund's Common Shares or Stock (that is, its price as listed on

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

the New York Stock Exchange) may, as a result, decline. Furthermore, if long-term interest rates rise, the Common Shares' or Stock's net asset value will reflect the full decline in the price of the portfolio's investments, since the value of the fund's Preferred Shares or Stock does not fluctuate. In addition to the decline in net asset value, the market value of the fund's Common Shares or Stock may also decline.

As a part of their investment strategy, the Funds may invest in certain securities whose potential income return is inversely related to changes in a floating interest rate ("inverse floaters"). In general, income on inverse floaters will decrease when short-term interest rates increase and increase when short-term interest rates decrease. Investments in inverse floaters may be characterized as derivative securities and may subject the Funds to the risks of reduced or eliminated interest payments and losses of invested principal. In addition, inverse floaters have the effect of providing investment leverage and, as a result, the market value of such securities will generally be more volatile than that of fixed rate, tax-exempt securities. To the extent the Funds invest in inverse floaters, the market value of each Fund's portfolio and the net asset value of each Fund's shares may also be more volatile than if the Funds did not invest in these securities. As of April 30, 2006, the percentages of MuniYield Florida Insured Fund's, MuniYield New Jersey Insured Fund, Inc.'s and MuniYield Pennsylvania Insured Fund's total net assets invested in inverse floaters were 5.89%, 9.03% and 12.06%, respectively, before the deduction of Preferred Shares or Stock.

Dividend Policy

The Funds' dividend policy is to distribute all or a portion of their net investment income to their shareholders on a monthly basis. In order to provide shareholders with a more stable level of dividend distributions, the Funds may at times pay out less than the entire amount of net investment income earned in any particular month and may at times in any particular month pay out such accumulated but undistributed income in addition to net investment income earned in that month. As a result, the dividends paid by the Funds for any particular month may be more or less than the amount of net investment income earned by the Funds during such month. The Funds' current accumulated but undistributed net investment income, if any, is disclosed in the Statement of Net Assets, which comprises part of the financial information included in these reports.

SEMI-ANNUAL REPORTS

APRIL 30, 2006

Notes to Financial Statements

1. Significant Accounting Policies:

MuniYield Florida Insured Fund, MuniYield New Jersey Insured Fund, Inc. and MuniYield Pennsylvania Insured Fund (the "Funds" or individually as the "Fund") are registered under the Investment Company Act of 1940, as amended, as non-diversified, closed-end management investment companies. The Funds' financial statements are prepared in conformity with U.S. generally accepted accounting principles, which may require the use of management accruals and estimates. Actual results may differ from these estimates. These unaudited financial statements reflect all adjustments which are, in the opinion of management, necessary to present a fair statement of the results for the interim period. All such adjustments are of a normal, recurring nature. The Funds determine and make available for publication the net asset value of their Common Stock/Shares on a daily basis. The Fund's Common Stock/Shares are listed on the New York Stock Exchange under the symbol MFT for MuniYield Florida Insured Fund, MJI for MuniYield New Jersey Insured Fund, Inc., and MPA for MuniYield Pennsylvania Insured Fund. The following is a summary of significant accounting policies followed by the Funds.

(a) Valuation of investments--Municipal bonds are traded primarily in the over-the-counter ("OTC") markets and are valued at the last available bid price in the OTC markets or on the basis of values as obtained by a pricing service. Pricing services use valuation matrixes that incorporate both dealer-supplied valuations and valuation models. The procedures of the pricing service and its valuations are reviewed by the officers of the Funds under the general direction of the Board of Directors/Trustees. Such valuations and procedures are reviewed periodically by the Board of Directors/Trustees of the Funds. Financial futures contracts and options thereon, which are traded on exchanges, are valued at their closing prices as of the close of such exchanges. Options written or purchased are valued at the last sale price in the case of exchange-traded options. In the case of options traded in the OTC market, valuation is the last asked price (options written) or the last bid price (options purchased). Swap agreements are valued by quoted fair values received daily by the Funds' pricing service. Short-term investments with a remaining

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

maturity of 60 days or less are valued at amortized cost, which approximates market value, under which method the investment is valued at cost and any premium or discount is amortized on a straight line basis to maturity. Investments in open-end investment companies are valued at their net asset value each business day. Securities and other assets for which market quotations are not readily available are valued at fair value as determined in good faith by or under the direction of the Board of Directors/Trustees of the Funds.

(b) Derivative financial instruments--Each Fund may engage in various portfolio investment strategies both to increase the return of the Fund and to hedge, or protect, its exposure to interest rate movements and movements in the securities markets. Losses may arise due to changes in the value of the contract or if the counterparty does not perform under the contract.

* Financial futures contracts--Each Fund may purchase or sell financial futures contracts and options on such futures contracts. Futures contracts are contracts for delayed delivery of securities at a specific future date and at a specific price or yield. Upon entering into a contract, the Fund deposits and maintains as collateral such initial margin as required by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

* Options--Each Fund may purchase and write call and put options. When the Fund writes an option, an amount equal to the premium received by the Fund is reflected as an asset and an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. When a security is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of the security acquired or deducted from (or added to) the proceeds of the security sold. When an option expires (or the Fund enters into a closing transaction), the Fund realizes a gain or loss on the option to the extent of the premiums received or paid (or gain or loss to the extent the cost of the closing transaction exceeds the premium paid or received).

SEMI-ANNUAL REPORTS

APRIL 30, 2006

Notes to Financial Statements (continued)

Written and purchased options are non-income producing investments.

* Forward interest rate swaps--Each Fund may enter into forward interest rate swaps. In a forward interest rate swap, the Fund and the counterparty agree to make periodic net payments on a specified notional contract amount, commencing on a specified future effective date, unless terminated earlier. When the agreement is closed, the Fund records a realized gain or loss in an amount equal to the value of the agreement.

(c) Income taxes--It is each Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

(d) Security transactions and investment income--Security transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on security transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend dates. Interest income is recognized on the accrual basis. The Funds amortize all premiums and discounts on debt securities.

(e) Dividends and distributions--Dividends from net investment income are declared and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates.

(f) Offering expenses--Direct expenses relating to the public offering of certain Fund's Preferred Stock/Shares were charged to capital. Any adjustments to estimates of offering costs were recorded back to capital.

2. Investment Advisory Agreement and Transactions with Affiliates:

Each Fund has entered into an Investment Advisory Agreement with Fund Asset Management, L.P. ("FAM"). The general partner of FAM is Princeton Services, Inc. ("PSI"), an indirect, wholly-owned subsidiary of Merrill Lynch & Co., Inc. ("ML & Co."), which is the limited partner.

FAM is responsible for the management of each Fund's portfolio and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of the Fund. For such services, each Fund pays a monthly fee at an annual rate of .50% of the Fund's average weekly net assets, including proceeds from the issuance of Preferred Stock/Shares. For the six months ended April 30, 2006, the Investment Adviser agreed to reimburse its management fee by the amount of management fees each Fund pays to FAM indirectly through its investment(s) described below:

	Investment (s)	Reimbursement For the Six Months Ended April 30, 2006
MuniYield Florida Insured Fund	Merrill Lynch Institutional Exempt/ CMA Florida Municipal Money Fund	\$3,006
MuniYield New Jersey Insured Fund, Inc.	CMA New Jersey Municipal Money Fund	\$4,903
MuniYield Pennsylvania Insured Fund	CMA Pennsylvania Municipal Money Fund	\$4,821

For the six months ended April 30, 2006, the Funds reimbursed FAM for certain accounting services. Each Fund's reimbursements were as follows:

	Reimbursement
MuniYield Florida Insured Fund	\$2,142
MuniYield New Jersey Insured Fund, Inc.	\$2,283
MuniYield Pennsylvania Insured Fund	\$3,032

Certain officers and/or directors/trustees of the Funds are officers and/or directors of FAM, PSI, and/or ML & Co.

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

In February 2006, ML & Co. and BlackRock, Inc. entered into an agreement to contribute ML & Co.'s investment management business, including FAM, to the investment management business of BlackRock, Inc. The transaction is expected to close in the third quarter of 2006.

3. Investments:

Purchases and sales of investments, excluding short-term securities, for the six months ended April 30, 2006 were as follows:

	MuniYield Florida Insured Fund	MuniYield New Jersey Insured Fund, Inc.	MuniYield Pennsylvania Insured Fund
Total Purchases	\$47,843,969	\$ 6,033,265	\$52,331,031
Total Sales	\$49,630,943	\$11,779,501	\$45,690,857

SEMI-ANNUAL REPORTS

APRIL 30, 2006

Notes to Financial Statements (continued)

4. Stock/Share Transactions:

MuniYield Florida Insured Fund and MuniYield Pennsylvania Insured Fund are authorized to issue an unlimited number of Common Shares of beneficial interest, par value \$.10 per share together with 1,000,000 Preferred Shares of beneficial interest, par value of \$.05 per share. The Board of Trustees is authorized, however, to reclassify any unissued shares of beneficial interest without approval of the holders of Common Shares.

MuniYield New Jersey Insured Fund, Inc. is authorized to issue 200,000,000 shares of stock, including Preferred Stock, par value \$.10 per share, all of which were initially classified as Common Stock. The Board of Directors is authorized, however, to classify any unissued shares of stock without approval of holders of Common Stock.

Common Stock/Shares

MuniYield Florida Insured Fund

Shares issued and outstanding during the six months ended April 30, 2006 and during the year ended October 31, 2005 increased by 1,851 and 9,507, respectively, as a result of dividend reinvestment.

MuniYield New Jersey Insured Fund, Inc.

Shares issued and outstanding during the six months ended April 30, 2006 remained constant. Shares issued and outstanding during the year October 31, 2005 increased by 43,611 as a result of dividend reinvestment.

MuniYield Pennsylvania Insured Fund

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

Shares issued and outstanding during the six months ended April 30, 2006 remained constant. Shares issued and outstanding during the year ended October 31, 2005 increased by 16,822 as a result of dividend reinvestment.

Preferred Stock/Shares

Auction Market Preferred Stock/Shares are redeemable Preferred Stock/Shares of the Funds, with a liquidation preference of \$25,000 per share plus accrued and unpaid dividends that entitle their holders to receive cash dividends at an annual rate that may vary for the successive dividend periods.

MuniYield Florida Insured Fund and MuniYield Pennsylvania Insured Fund have a par value of \$.05 per share. MuniYield New Jersey Insured Fund, Inc. has a par value of \$.05 per share for Series A Shares and \$.10 per share for Series B Shares. The yields in effect at April 30, 2006 were as follows:

	MuniYield Florida Insured Fund	MuniYield New Jersey Insured Fund, Inc.	MuniYield Pennsylvania Insured Fund
Series A	3.70%	3.50%	2.82%
Series B	3.65%	3.60%	3.65%
Series C	--	--	2.90%

MuniYield Florida Insured Fund

Shares issued and outstanding during the six months ended April 30, 2006 remained constant. Shares issued and outstanding during the year ended October 31, 2005 increased by 480 shares from the issuance of an additional series of Preferred Shares.

MuniYield New Jersey Insured Fund, Inc.

Shares issued and outstanding during the six months ended April 30, 2006 and the year ended October 31, 2005 remained constant.

MuniYield Pennsylvania Insured Fund

Shares issued and outstanding during the six months ended April 30, 2006 remained constant. Shares issued and outstanding during the year ended October 31, 2005 increased by 560 shares from the issuance of an additional series of Preferred Shares.

The Funds pay commissions to certain broker-dealers at the end of each auction at an annual rate ranging from .25% to .375%, calculated on the proceeds of each auction. For the six months ended April 30, 2006, MLPF&S earned commissions as follows:

	Commissions
MuniYield Florida Insured Fund	\$ 54,036
MuniYield New Jersey Insured Fund, Inc.	\$ 55,315
MuniYield Pennsylvania Insured Fund	\$ 77,601

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

Laurie Simon Hodrick resigned as a Director/Trustee of MuniYield Florida Insured Fund, MuniYield New Jersey Insured Fund, Inc. and MuniYield Pennsylvania Insured Fund effective May 1, 2006.

Investment Objectives

NYSE Symbol MFT MuniYield Florida Insured Fund seeks to provide shareholders with as high a level of current income exempt from federal income taxes as is consistent with its investment policies and prudent investment management by investing primarily in a portfolio of long-term, investment grade municipal obligations the interest on which, in the opinion of bond counsel to the issuer, is exempt from federal income taxes and which enables shares of the Fund to be exempt from Florida intangible personal property taxes.

Edgar Filing: MUNIYIELD FLORIDA INSURED FUND /NJ/ - Form N-CSRS

NYSE Symbol MuniYield New Jersey Insured Fund, Inc. seeks to provide
MJI shareholders with as high a level of current income exempt from
federal income tax and New Jersey personal income taxes as is
consistent with its investment policies and prudent investment
management by investing primarily in a portfolio of long-term
municipal obligations the interest on which, in the opinion of
bond counsel to the issuer, is exempt from federal income tax and
New Jersey personal income taxes.

NYSE Symbol MuniYield Pennsylvania Insured Fund seeks to provide shareholders
MPA with as high a level of current income exempt from federal and
Pennsylvania income taxes as is consistent with its investment
policies and prudent investment management by investing primarily
in a portfolio of long-term municipal obligations the interest on
which, in the opinion of bond counsel to the issuer, is exempt
from federal and Pennsylvania income taxes.

SEMI-ANNUAL REPORTS

Availability of Quarterly Schedule of Investments

The Funds file their complete schedules of portfolio holdings with the Securities and Exchange Commission ("SEC") for the first and third quarters of each fiscal year on Form N-Q. The Funds' Forms N-Q are available on the SEC's Web site at <http://www.sec.gov>. The Funds' Forms N-Q may also be reviewed and copied at the SEC's Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

Electronic Delivery

The Funds offer electronic delivery of communications to their shareholders. In order to receive this service, you must register your account and provide us with e-mail information. To sign up for this service, simply access this Web site at <http://www.icsdelivery.com/live> and follow the instructions. When you visit this site, you will obtain a personal identification number (PIN). You will need this PIN should you wish to update your e-mail address, choose to discontinue this service and/or make any other changes to the service. This service is not available for certain retirement accounts at this time.
