2003 Interim Report

## 2 CHAIRMAN'S STATEMENT

During the first half of 2003, the Company experienced strong international oil price and serious impact of the Severe Acute Respiratory Syndrome (SARS) in China. Thanks to the collaborative effort of our staff, the Company maintained its momentum of rapid development with stable increase in production. Benefiting from the strong international oil price, the Company saw remarkable growth in oil and gas revenues, and our cost remained competitive, leading to a significant increase in the net profit. In February 2003, the Company continued to implement its natural gas strategy by completing the acquisition of equity interests in the Tangguh LNG Project in Indonesia. In May 2003, the Company took the opportunity of the low interest rate environment to issue two tranches of 10-year and 30-year guaranteed notes with a value of US\$200 million and US\$300 million respectively, optimizing the Company's capital structure. In addition, we also maintained an active exploration and development program during the period, marked with a number of successful discoveries and appraisals. Our oil and gas development projects also proceeded on schedule.

### REVIEW OF OPERATIONS

For the six months ended 30 June 2003, the Company recorded stable production growth. Our oil and gas production reached 352,780 barrels-of-oil-equivalent per day, representing an increase of 14.8% over the same period last year. Net crude oil production reached 307,103 barrels per day, while net natural gas production totaled 263.2 million cubic feet per day, representing a 15.0% and 10.4% increase over the first half of 2002 respectively. The realized oil price was US\$28.56 per barrel, up 30.9% from last year. The realized natural gas price was US\$2.93 per thousand cubic feet.

## Edgar Filing: CNOOC LTD - Form 6-K

Owing to the stable production growth and strong oil price, the Company's oil and gas sales reached RMB14.18 billion during the first half of this year, representing a remarkable increase of 47.3% compared to RMB9.63 billion of the same period last year. Coupled with the revenues from trading and other activities, the Company achieved a total revenue of RMB17.90 billion, representing a significant increase of 68.3% from RMB10.64 billion last year. The reported profit before tax was RMB8.74 billion, up 75.1% from RMB4.99 billion in 2002, and the reported net profit was RMB6.33 billion, representing a sharp increase of 75.0% compared with RMB3.62 billion in the previous year. During the period, the basic and diluted earnings per share of the Company were RMB0.77. According to the Company's dividend policy and considering the future trend of the oil prices, current cash position and future needs of investment capital, the Board of Directors has decided to pay out an interim dividend of HK\$0.14 per share and a special interim dividend of HK\$0.18 per share.

During the first half of 2003, the Company recorded seven wildcat discoveries through its successful exploration activities, including five crude oil discoveries in the Bohai Bay. These five discoveries include the independent discoveries of Bozhong 34-1S (discovered and appraised during the period), Bozhong 34-1 and Bozhong 3-2 fields, and the Caofeidian 11-5 and Penglai 19-9 discoveries made by our PSC partners, demonstrating the enormous potential of the Bohai Bay. In Eastern South China Sea, we have made two independent gas discoveries, Liuhua 19-5 and Panyu 35-1, reflecting the successful explorations in the area. During the period, the appraisal of 5 discoveries were completed, namely the Jinzhou 25-1S, Bozhong 34-1S, and Panyu 30-1, which are independent discoveries, Caofeidian 12-1 and Caofeidian 12-1S, which are discoveries made by our PSC partners. Among the appraisal successes, Panyu 30-1 and the surrounding gas discoveries were the Company's major natural gas discoveries in the Eastern South China Sea area, showcasing the area's prospects for explorations and strengthening the Company's dominant position in the natural gas business in the Pearl River Delta Region.

CHAIRMAN'S STATEMENT

3

The Company continued to focus on the development of oil and gas fields during the period, with a number of projects proceeding on schedule. Dongfang 1-1, the Company's largest independent gas field, was expected to be on stream soon, while the Panyu 4-2/5-1 oilfield would also be on stream in the second half. In addition, the Caofeidian 11-1/2, Bozhong 25-1 and Xihu Trough Chunxiao projects were also proceeding on schedule.

The Company is highly committed to health, safety and environmental protection. During the period, the management succeeded in overcoming the impact of SARS by implementing a comprehensive health, safety and environmental system for the Company's operations, and no employees or their family members fell victim to the epidemic. In addition, the Company achieved double zero record in both the recordable accident rate and the work hours lost rate, bringing a huge encouragement for us to continue our persistent health, safety and environmental policies.

OUTLOOK

## Edgar Filing: CNOOC LTD - Form 6-K

In the second half of 2003, maximizing shareholders' return will remain to be the mission of the management and our staff as a whole. We will also stick to our development strategy to achieve our production and operations targets for the year. Our key tasks in the second half of the year include:

- Focus on hitting our oil and gas production targets for the year while controlling the costs. We will also strive to maintain our current competitive cost structure.
- Continue our active exploration program in offshore China and optimize our exploration plans and targets, so as to increase reserves through maintaining the growth of oil reserves in Bohai Bay and the momentum of gas explorations in Eastern South China Sea.
- Continue to closely control the progress, costs and quality of our existing development projects, especially for the Dongfang 1-1 and the Panyu 4-2/5-1 project which will be on stream during the second half of the year, so as to achieve the Company's development target.
- Health, safety and environment issues will remain our top priorities. We are deeply committed to the health of our staff and we will achieve a perfect synergy between the Company and our staff.

### 2. PRINCIPAL ACCOUNTING POLICIES

The accompanying interim financial statements are prepared under the historical cost convention as modified by the revaluation of land and buildings and short term investments, and in accordance with Hong Kong Statement of Standard Accounting Practice ("SSAP") No. 25 "Interim financial reporting".

The principal accounting policies and basis of presentation used in the preparation of the interim financial statements are the same as those used in the annual audited financial statements for the year ended 31 December 2002, except for the changes in accounting policies following the adoption of the revised SSAP 12 (Revised) "Income Taxes" issued by the Hong Kong Society of Accountants.

SSAP 12 (Revised) prescribes the basis for accounting for current and deferred income taxes. The principal impact of the revision of this SSAP on the consolidated financial statements is that it requires full provision for deferred taxes under the asset and liability method on all temporary differences.

There was no significant impact on the Group's financial statements upon the adoption of SSAP 12 (Revised).

The exercise prices of the options are determined based on the original consideration paid plus adjustments stipulated in the Repurchase Agreement.

20. SIGNIFICANT DIFFERENCES BETWEEN HONG KONG GAAP AND U.S. GAAP

The accounting policies adopted by the Group conform to Hong Kong GAAP, which differ in certain respects from generally accepted accounting principles in the United States of America ("U.S. GAAP").

(a) Net profit and equity

(i) Revaluation of land and buildings

The Group revalued certain land and buildings on 31 August 1999 and 31 December 2000 and the related revaluation surplus was recorded on the respective dates. Under Hong Kong GAAP, revaluation of property, plant and equipment is permitted and depreciation, depletion and amortisation are based on the revalued amount. Additional depreciation arising from the revaluation for the six months ended 30 June 2003 was approximately RMB4,578,000 (2002: RMB4,578,000). Under U.S. GAAP, property, plant and equipment are required to be stated at cost. Accordingly, no additional depreciation, depletion and amortisation from the revaluation are recognised under U.S. GAAP.

(ii) Short term investments

According to Hong Kong GAAP, available-for-sale investments in marketable securities are measured at fair value and related unrealised holding gains and losses are included in current period earnings. According to U.S. GAAP, such investments are also measured at fair value and classified in accordance with Statement of Financial Accounting Standards ("SFAS") No. 115. Under U.S. GAAP, related unrealised gains and losses on available-for-sale securities are excluded from current period earnings and included in other comprehensive income.

(iii) Impairment of long-lived assets

Under Hong Kong GAAP, impairment charges are recognised when a long-lived asset's carrying amount exceeds the higher of an asset's net selling price and value in use, which incorporates discounting the asset's estimated future cash flows.

Under U.S. GAAP, long-lived assets are assessed for possible

## Edgar Filing: CNOOC LTD - Form 6-K

impairment in accordance with SFAS No. 144, "Accounting for the impairment or disposal of long-lived assets". SFAS No. 144 requires the Group to (a) recognise an impairment loss only if the carrying amount of a long-lived asset is not recoverable from its undiscounted cash flows; and (b) measure an impairment loss as the difference between the carrying amount and fair value of the asset. SFAS No. 144 requires that a long-lived asset to be abandoned, exchanged for a similar productive asset, or distributed to owners in a spin-off be considered as held and used until it is disposed of.

#### 20. SIGNIFICANT DIFFERENCES BETWEEN HONG KONG GAAP AND U.S. GAAP (CONTINUED)

##### (a) Net profit and equity (continued)

##### (iii) Impairment of long-lived assets (continued)

SFAS No. 144 also requires the Group to assess the need for an impairment of capitalised costs of proved oil and gas properties and the costs of wells and related equipment and facilities on a property-by-property basis. If an impairment is indicated based on undiscounted expected future cash flows, then an impairment is recognised to the extent that net capitalised costs exceed the estimated fair value of the property. Fair value of the property is estimated by the Group using the present value of future cash flows. The impairment was determined based on the difference between the carrying value of the assets and the present value of future cash flows. It is reasonably possible that a change in reserve or price estimates could occur in the near term and adversely impact management's estimate of future cash flows and consequently the carrying value of properties.

In addition, under Hong Kong GAAP, a subsequent increase in the

## Edgar Filing: CNOOC LTD - Form 6-K

recoverable amount of an asset is reversed to the income statement to the extent that an impairment loss on the same asset was previously recognised as an expense when the circumstances and events that led to write-down or write-off cease to exist. The reversal is reduced by the amount that would have been recognised as depreciation had the write-off not occurred. Under U.S. GAAP, an impairment loss establishes a new cost basis for the impaired asset and the new cost basis should not be adjusted subsequently other than for further impairment losses.

For the six months period ended 30 June 2003, there were no impairment losses recognised under Hong Kong GAAP and U.S. GAAP and no reversal of the recovery of previous impairment charges has been recorded under Hong Kong GAAP.

- (iv) Stock compensation schemes  
As described in note 14 to the interim financial statements, as at 30 June 2003, the Group had three stock option schemes. The Group applies Accounting Principles Board Opinion 25 and related Interpretations in accounting for these stock option schemes. Accordingly, compensation costs recognised for the stock option schemes amounted to RMB1,316,000 for the six months ended 30 June 2003 (2002: RMB1,376,000).
- (v) Provision for dismantlement  
Hong Kong GAAP requires the provision of dismantlement to be recorded for a present obligation whether that obligation is legal or constructive. The associated cost is capitalised and the liability is discounted and accretion expense is recognised using the credit-adjusted risk-free interest rate in effect when the liability is initially recognised.

### 20. SIGNIFICANT DIFFERENCES BETWEEN HONG KONG GAAP AND U.S. GAAP (CONTINUED)

- (a) Net profit and equity (continued)
  - (v) Provision for dismantlement (continued)  
On 15 August 2001, SFAS No. 143 "Accounting for asset retirement obligation" was released and is effective for the

## Edgar Filing: CNOOC LTD - Form 6-K

fiscal years beginning after 15 June 2002. SFAS No. 143 requires that the fair value of a liability for an asset retirement obligation be recognised in the period in which it is incurred if a reasonable estimate of fair value can be made. The associated asset retirement costs are capitalised as part of the carrying amount of the long-lived assets. Further, under SFAS No. 143, the liability is discounted and accretion expense is recognised using the credit-adjusted risk-free interest rate in effect when the liability is initially recognised.

The Company adopted SFAS No. 143 on 1 January 2003, which resulted in an increase in net property of RMB863,093,000, an increase in the provision for dismantlement of RMB240,077,000 and an increase in deferred income tax liabilities of RMB186,904,000 to recognise the cumulative effect of retrospectively applying the new accounting standard.

This adjustment is due to the difference in the method of accruing for dismantlement costs under SFAS No. 143 compared with the method required by SFAS No. 19 "Financial accounting and reporting by oil and gas producing companies", the accounting standard that the Company has been adopted since its establishment. Under SFAS No. 19, the dismantlement costs are accrued on a unit-of-production basis of accounting as the oil and gas is produced. The SFAS No. 19 method matches the accruals with the revenues generated from production and results in most of the costs being accrued early in field life, when production is at the highest level. Because SFAS No. 143 requires accretion of the liability as a result of the passage of time using an interest method of allocation, the majority of the costs will be accrued towards the end of field life, when production is at the lowest level. The cumulative income adjustment described above resulted from reversing the higher liability accumulated under SFAS No. 19 in order to adjust it to the lower present value amount resulting from transition to SFAS No. 143. This amount being reversed in transition, which was previously charged to the income statement under SFAS No. 19, will again be charged to the income statement under SFAS No. 143 in future years.

[Chinese Characters Omitted]

To the board of directors  
CNOOC Limited (the "Company")

We have been instructed by the Company to review the interim financial report of the Company and its subsidiaries (collectively as the "Group") for the six months ended 30 June 2003 set out on pages 5 to 29.

RESPONSIBILITIES OF DIRECTORS AND AUDITORS

The Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Listing Rules") require the preparation of an interim financial report to be in compliance with Statement of Standard Accounting Practice 25 "Interim financial reporting" issued by the Hong Kong Society of Accountants and the relevant provisions thereof. The interim financial report is the responsibility of, and has been approved by, the directors. It is our responsibility to form an independent conclusion, based on our review, on the interim financial report and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

REVIEW WORK PERFORMED

We conducted our review in accordance with Statement of Auditing Standards 700 "Engagements to review interim financial reports" issued by the Hong Kong Society of Accountants. A review consists principally of making enquiries of the Group's management and applying analytical procedures to the interim financial report and based thereon, assessing whether the accounting policies and presentation have been consistently applied unless otherwise disclosed. A review excludes audit procedures such as tests of controls and verification of assets, liabilities and transactions. It is substantially less in scope than an audit and therefore provides a lower level of assurance than an audit.

## Edgar Filing: CNOOC LTD - Form 6-K

Accordingly, we do not express an audit opinion on the interim financial report.

### REVIEW CONCLUSION

On the basis of our review which does not constitute an audit, we are not aware of any material modifications that should be made to the interim financial report for the six months ended 30 June 2003.

Under the 2002 Share Option Scheme, the Directors of the Company may, at their discretion, invite employees, including executive directors, of the Company or any of its subsidiaries, to take up options to subscribe for shares in the Company.
